
Global Services

We offer a host of global solutions, available on certain of the wireless devices we offer, including GlobalAccess and GlobalEmail. This suite of solutions gives customers voice service in more than 185 destinations worldwide and data access in more than 100 destinations worldwide.

Wireless Devices

We are a service provider of choice for wireless device manufacturers which helps us develop exclusive offers for our customers, as well as branded wireless devices that complement our focus on a high-quality customer experience. The wireless devices that we offer are predominantly EV-DO enabled, and all of them are compatible with our 1XRTT network. In addition, all of the handsets that we offer are headphone/earphone compatible and, compliant with the FCC's E-911 requirements, through their GPS functionality.

Marketing

We focus our marketing strategy on targeting solutions based on satisfying our customers' needs, promoting our brand, leveraging our extensive distribution network and cross-marketing with Verizon's other business units and Vodafone.

We focus our marketing efforts on a coordinated program of television, print, radio, outdoor signage and Internet and point-of-sale media promotions. Coordinated marketing efforts throughout our service area ensure that our marketing message is consistently presented across all of our markets. Promoting the "Verizon Wireless" brand is complemented by Verizon's other brand marketing efforts, reinforcing the awareness of our services in shared markets and capitalizing on the size and breadth of Verizon Communications' customer base.

Sales and Distribution Channels

Our sales strategy uses a mix of direct, indirect and wholesale distribution channels to increase customer growth while reducing customer acquisition costs.

Our company-operated stores are an important component of our distribution strategy. Our experience has been that customers entering through this direct channel are generally higher-value customers who generate higher revenue per month on average and are less likely to cancel their service than those who come through other mass-market channels. We had approximately 2,400 company-operated stores and kiosks (including our "store-within-a-store" kiosks in Circuit City and BJ's Wholesale locations) as of December 31, 2007. In addition, our direct channel also includes our business-to-business organization, which is focused on supporting the needs of our local, regional and national business customers, as well as a telemarketing sales force dedicated to receiving incoming calls. We also offer fully-automated, end-to-end, web-based sales of wireless devices, accessories and service in all of our markets.

We have indirect retail locations throughout the United States selling wireless services, including both full-service locations and locations selling our prepaid products and services, such as Wal-Mart, Best Buy and Target. We also sell wireless access on a wholesale basis, which involves the sale of wholesale access and minutes to independent companies that package and resell wireless services to end-users.

Customer Service, Retention and Satisfaction

We believe that quality customer service increases customer satisfaction, which reduces churn, and is a key differentiator in the wireless industry. We are committed to providing high-quality customer service, investing in loyalty and retention efforts and continually monitoring customer satisfaction in all facets of our service.

While our customer service representatives are available during our normal business hours, we also have representatives available 24 hours a day, 7 days a week for emergency and technical customer issues. In addition, customers can do business with us at any time, without having to speak with a customer service representative, through our enhanced self-service applications via our interactive voice response system, through our web site, and via applications accessible from the customer's handset.

Under our enhanced Worry Free Guarantee, a national retention and loyalty initiative, we commit to provide our customers an extensive and advanced network: responsive customer service with end-to-end resolution; the option to change at any time to any qualifying price plan without payment of any additional fees or requiring any contract extension; a satisfaction guarantee with our "Test Drive" program; an early termination fee that declines each full month that a customer remains on their contract; and a handset upgrade credit every two years, provided that the customer signs a new two-year contract on a calling plan with at least $35 monthly access. In addition, our "My Account Advantage" program offers customers who register with our "My Account" website free back-up protection that stores a copy of the customer's phone contact list on a secure website, an annual handset upgrade option for qualified customers and periodic notification if the customer exceeds their plan allowance. Another major retention and loyalty program is a customer life cycle management program in which we contact customers at key points in their service tenure with targe ctive rate-plan analysis.

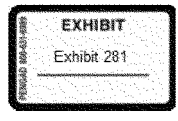
Cautionary Statement Concerning Forward-Looking Statements

In this Annual Report on Form 10-K we have made forward-looking statements. These statements are based on our estimates and assumptions and are subject to risks and uncertainties. Forward-looking statements include the information concerning our possible or assumed future results of operations. Forward-looking statements also include those preceded or followed by the words "anticipates," "believes," "estimates," "hopes" or similar expressions. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

The following important factors, along with those discussed elsewhere in this Annual Report, could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements:

- materially adverse changes in economic and industry conditions and labor matters, including workforce levels and labor negotiations, and any resulting financial and/or operational impact, in the markets served by us or by companies in which we have substantial investments;
- material changes in available technology, including disruption of our suppliers' provisioning of critical products or services;
- the impact on our operations of natural or man-made disasters and any resulting financial impact not covered by insurance;
- technology substitution;
- an adverse change in the ratings afforded our debt securities by nationally accredited ratings organizations;
- the final results of federal and state regulatory proceedings concerning our provision of retail and wholesale services and judicial review of those results;
- the effects of competition in our markets;
- the timing, scope and financial impact of our deployment of fiber-to-the-premises broadband technology;
- the ability of Verizon Wireless to continue to obtain sufficient spectrum resources;
- changes in our accounting assumptions that regulatory agencies, including the SEC, may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings;
- the ability to complete acquisitions and dispositions; and
- the extent and timing of our ability to obtain revenue enhancements and cost savings following our business combination with MCI, Inc.



CSOC.CBR.00032574

We face significant competition that may reduce our market share and lower our profits.

We face significant competition in our industry. The rapid development of new technologies, services and products has eliminated the traditional lines between local, long distance, wireless, cable and Internet communication services and brought new competitors to our markets, including other telephone companies, cable companies, wireless service providers, satellite providers, electric utilities, and providers of VoIP services. While these changes have enabled us to offer new types of services, they have also allowed other service providers to broaden the scope of their own competitive offerings. Our ability to compete effectively will depend on how successfully we anticipate and respond to various competitive factors, including new services that may be introduced by our competitors, changes in consumer preferences, demographic trends and pricing pressures. We are subject to more regulation and have higher cost structures than many of our competitors, due in part to the presence of a unionized workforce and a large retiree population in our wireline business. Accordingly, our competitors may be able to offer services at lower prices. The resulting pressure on the price of services we provide may result in reduced revenues and profits. In addition, while the workforce of our wireless business is almost entirely non-union, we cannot predict what level of success unions may have in organizing this workforce or the potentially negative impact of such labor organizing on our costs.

If we are not able to take advantage of technological developments in the telecommunications industry on a timely basis, we may experience a decline in a demand for our services or may be unable to implement our business strategy.

Our industry is experiencing rapid change as new technologies are developed that offer consumers an array of choices for their communications needs. In order to grow and remain competitive, we will need to adapt to future changes in technology, to enhance our existing offerings and introduce new offerings to address our customers' changing demands. If we are unable to meet future advances in competing technologies on a timely basis or at an acceptable cost, we could lose customers to our competitors. In general, the development of new services in our industry requires us to anticipate and respond to the varied and continually changing demands of our customers. We may not be able to accurately predict technological trends or the success of new services in the market. In addition, there could be legal or regulatory restraints to our introduction of new services. If these services fail to gain acceptance in the marketplace, or if costs associated with implementation and completion of the introduction of these services materially increase, our ability to retain and attract customers could be adversely affected.

While we believe our primary wireless technology platform, CDMA, and its upgrades offer many advantages, many competing wireless service providers have chosen GSM or other technologies as the technology platforms for their wireless networks. In addition, in November 2007, we announced that we intend to develop and deploy our "fourth generation" mobile broadband network using "Long Term Evolution" (LTE). This new technology is designed to enable mobile data networks with higher speeds and improved efficiencies. However, there are risks that current or future versions of the wireless technologies and evolutionary path that we have selected may not be demanded by existing and prospective customers or provide the advantages that we expect. In addition, there are risks that other wireless carriers on whom our customers roam may change their technology to other technologies that are incompatible with ours. As a result, the ability of our and such other carriers' customers to roam on our respective wireless networks could be adversely affected. If these risks materialize, our ability to provide national wireless service to our customers, to retain and attract customers, and to maintain and grow our customer revenues could be materially adversely affected.

We depend on key suppliers and vendors to provide equipment that we need to operate our business.

We also depend upon various key suppliers and vendors to provide us with the equipment that we need to operate our business. If these suppliers or vendors fail to provide equipment or service to us on a timely basis, it could have an adverse impact on our ability to implement our business strategy and, in addition, we might be unable to satisfy the requirements contained in our FCC licenses regarding the construction of our wireless network. These suppliers and vendors may be subject to litigation with respect to technology that we depend on for our service offerings.

Changes in the regulatory framework under which we operate could adversely affect our business prospects or results of operations.

Our operations are subject to regulation by the FCC and other federal, state and local agencies. It is impossible to predict with any certainty the outcome of pending federal and state regulatory proceedings relating to our provision of retail or wholesale services, or the reviews by federal or state courts of regulatory rulings. Unless we are able to obtain appropriate relief, existing laws and regulations may inhibit our ability to expand our business and introduce new products and services. In addition, the adoption of new laws or regulations or changes to the existing regulatory framework could adversely affect our business plans. For example, the development of new technologies, such as Internet Protocol-based services, including VoIP and super high-speed broadband and video, could be subject to conflicting regulation between the FCC and various state and local authorities, which could significantly increase the cost of implementing and introducing new services based on this technology. In addition, the rapid growth of the wireless industry has led to an increase in efforts by some state legislatures and state public utility commissions to regulate the industry in ways tha[illegible]s on Verizon Wireless. Moreover, many states have also imposed significant taxes on providers in the wireless in[illegible]

13

Natural or man-made disasters may disrupt our operations.

The occurrence of natural or man-made disasters may disrupt our operations. While we maintain insurance coverage for some of these events, the potential liabilities associated with these events could exceed the insurance coverage we maintain. Our inability to operate our wireline or wireless networks as a result of such events, even for a limited period of time, may result in significant expenses and/or loss of market share to other communications providers, which could have a material adverse effect on our results of operations and financial condition.

We are subject to a significant amount of litigation, which could require us to pay significant damages or settlements.

Our business faces a substantial amount of litigation, including patent infringement lawsuits, antitrust class actions, wage and hour class actions, personal injury claims and lawsuits relating to our advertising, sales, billing and collection practices. In addition, our wireless business also faces personal injury and consumer class action lawsuits relating to alleged health effects of wireless phones or radio frequency transmitters, and class action lawsuits that challenge marketing practices and disclosures relating to alleged adverse health effects of handheld wireless phones. We may incur significant expenses in defending these lawsuits. In addition, we may be required to pay significant awards or settlements.

Item 1B. Unresolved Staff Comments.

None.

Item 2. Properties.

General

Our principal properties do not lend themselves to simple description by character and location. Our total investment in plant, property and equipment was approximately $214 billion at December 31, 2007 and $204 billion at December 31, 2006, including the effect of retirements, but before deducting accumulated depreciation. Our gross investment in plant, property and equipment consisted of the following at December 31:

	2007	2006
Network equipment	**81.1%**	80.1%
Land, buildings and building equipment	**9.6**	9.9
Furniture and other	**9.3**	10.0
	100.0%	100.0%

Our properties are divided among our operating segments at December 31, as follows:

	2007	2006
Wireline	**75.7%**	76.7%
Wireless	**23.8**	22.7
Corporate and Other	**0.5**	0.6
	100.0%	100.0%

Network equipment consists primarily of cable (predominantly aerial, buried underground or undersea) and the related support structures of poles and conduit, wireless plant, switching equipment, transmission equipment and related facilities. Land, buildings and building equipment consists of land and land improvements, central office buildings or any other buildings that house network equipment, and buildings owned by Verizon that are used for administrative and other purposes. Furniture and other consists of public telephone instruments and telephone equipment (including PBXs), furniture, office equipment, motor vehicles, plant under construction, capital leases, capitalized computer software costs and leasehold improvements. A portion of our property is subject to the liens of their respective mortgages securing funded debt.

The customers of our telephone operations are served by electronic switch systems (analog/digital/packet) that provide a wide variety of services. As of December 31, 2007, virtually all of the switched access lines were served by digital capability.

Capital Expenditures

We continue to make significant capital expenditures to meet the demand for communications services and to further improve such services. Capital spending for Wireline was $10,956 million in 2007, $10,259 million in 2006 and $8,267 million in 2005. Capital spending for Domestic Wireless was $6,503 million in 2007, $6,618 m illion in 2005.

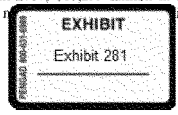


Table of Contents

Item 3. Legal Proceedings

Verizon, and a number of other telecommunications companies, have been the subject of multiple class action suits concerning its alleged participation in intelligence-gathering activities allegedly carried out by the federal government, at the direction of the President of the United States, as part of the government's post-September 11 program to prevent terrorist attacks. Plaintiffs generally allege that Verizon has participated by permitting the government to gain access to the content of its subscribers' telephone calls and/or records concerning those calls and that such action violates federal and/or state constitutional and statutory law. Relief sought in the cases includes injunctive relief, attorneys' fees, and statutory and punitive damages. On August 9, 2006, the Judicial Panel on Multidistrict Litigation ("Panel") ordered that these actions be transferred, consolidated and coordinated in the U.S. District Court for the Northern District of California. The Panel subsequently ordered that a number of "tag along" actions also be transferred to the Northern District of California. Verizon believes that these lawsuits are without merit and has moved to dismiss them.

The New York State Department of Environmental Conservation has advised Verizon New York Inc. (VZNY) of potential issues in connection with its underground storage tank registration, inspection and maintenance program. While VZNY does not believe that any of the alleged conditions has resulted in a release or threatened release, aggregate penalties relating to alleged violations could exceed $100,000 because of the number of tanks operated by VZNY. VZNY does not believe that the cost of remedying any alleged violations will be material.

Verizon Wireless is conducting an audit of its cell site, switch and non-retail building facilities under an audit agreement with the United States Environmental Protection Agency. The audit while not complete, identified potential violations of various laws governing hazardous substance reporting, air permitting and spill plan preparation. Although none of the potential violations has resulted in a release or threatened release, aggregate penalties relating to alleged violations could exceed $100,000 because of the number of facilities operated by Verizon Wireless. Verizon Wireless does not believe that the penalties ultimately incurred and the cost of remedying any alleged violations will be material.

Item 4. Submission of Matters to a Vote of Security Holders

Not Applicable.

Executive Officers of the Registrant

Set forth below is information with respect to our executive officers.

Name	Age	Office	Held Since
Ivan G. Seidenberg	61	Chairman and Chief Executive Officer	2000
William P. Barr	57	Executive Vice President and General Counsel	2000
Thomas A. Bartlett	49	Senior Vice President and Controller	2005
John W. Diercksen	58	Executive Vice President – Strategy, Development and Planning	2003
Shaygan Kheradpir	47	Executive Vice President and Chief Information Officer	2007
John F. Killian	53	President – Verizon Business	2006
Richard J. Lynch	59	Executive Vice President and Chief Technology Officer	2007
Lowell C. McAdam	53	Executive Vice President and President and Chief Executive Officer – Verizon Wireless	2007
Marc C. Reed	49	Executive Vice President – Human Resources	2004
Virginia P. Ruesterholz	46	President – Verizon Telecom	2006
John G. Stratton	46	Executive Vice President and Chief Marketing Officer	2007
Dennis F. Strigl	61	President and Chief Operating Officer	2007
Thomas J. Tauke	57	Executive Vice President – Public Affairs, Policy and Communications	2004
Doreen A. Toben	58	Executive Vice President and Chief Financial Officer	2002
Catherine T. Webster	55	Senior Vice President and Treasurer	2005

Prior to serving as an executive officer, each of the above officers has held high level managerial positions with the company or one of its subsidiaries for at least five years.

Officers are not elected for a fixed term of office and may be removed from office at any time at the discretion of the Board of Directors.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The principal market for trading in the common stock of Verizon is the New York Stock Exchange. The common stock is also listed in the United States on the Chicago and Philadelphia stock exchanges. As of December 31, 2007, there were 836,237 shareowners of record.

High and low stock prices, as reported on the New York Stock Exchange composite tape of transactions, and dividend data are as follows:

		Market Price		Cash Dividend Declared
		High	Low	
2007	**First Quarter**	**$ 38.77**	**$ 35.60**	**$ .405**
	Second Quarter	**43.99**	**36.75**	**.405**
	Third Quarter	**44.75**	**39.27**	**.430**
	Fourth Quarter	**46.24**	**40.77**	**.430**
2006*	First Quarter	$ 33.89	$ 28.95	$ .405
	Second Quarter	33.46	29.00	.405
	Third Quarter	36.62	30.22	.405
	Fourth Quarter	37.64	33.99	.405

* 2006 prices have been adjusted for the spin-off of our domestic print and Internet yellow pages directories business.

The following table provides information about Verizon's common stock repurchases during the fourth quarter of 2007.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
October	7,245,000	$ 45.02	7,245,000	56,814,000
November	11,209,000	43.28	11,209,000	45,605,000
December	6,781,000	43.85	6,781,000	38,824,000
	25,235,000		25,235,000	

On January 19, 2006, the Board of Directors approved a share buy back program which authorized the repurchase of up to 100 million common shares by no later than the close of business on February 28, 2008. On March 1, 2007, the Board of Directors replaced this share buy back program with a new program for the repurchase of up to 100 million shares of Verizon common stock through the earlier of February 28, 2010 or when the total number of shares repurchased under the new buy back program aggregates to 100 million. On February 7, 2008, the Board of Directors replaced this share buy back program with a new program for the repurchase of up to 100 million common shares terminating no later than the close of business on February 28, 2011. The Board also determined that no additional shares were to be purchased under the prior program. The current program permits Verizon to repurchase shares over time, with the amount and timing of repurchases depending on market conditions and corporate needs. The Board also authorized Verizon to enter into Rule 10b5-1 plans from time to time to facilitate the repurchase of its shares. A Rule 10b5-1 plan permits the Company to repurchase shares at times when it might otherwise be prevented from doing so, provided the plan is adopted when the Company is not aware of material non-public information.

Item 6. Selected Financial Data

Information required by this item is included in the 2007 Verizon Annual Report to Shareowners under the heading "Selected Financial Data" on page 17, which is incorporated herein by reference.

Item 7. Management's Discussion and Analysis of Results of Finances and Condition and Results of Operations

Information required by this item is included in the 2007 Verizon Annual Report to Shareowners under the heading "Management's Discussion and Analysis of Financial Condition and Results of Operations" on pages 18 through 37, which is incorporated herein by reference.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Information required by this item is included in the 2007 Verizon Annual Report to Shareowners under the heading "Market Risk" on page 31, which is incorporated herein by reference.

Item 8. Financial Statements and Supplementary Data

Information required by this item is included in the 2007 Verizon Annual Report to Shareowners on pages 38 through 71, which is incorporated herein by reference.

Table of Contents

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Our chief executive officer and chief financial officer have evaluated the effectiveness of the registrant's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) of the Securities Exchange Act of 1934), as of the end of the period covered by this annual report, that ensure that information relating to the registrant which is required to be disclosed in this report is recorded, processed, summarized and reported, within required time periods. Based on this evaluation, our chief executive officer and chief financial officer have concluded that the registrant's disclosure controls and procedures were effective as of December 31, 2007.

There were no changes in the registrant's internal control over financial reporting during the fourth quarter of 2007 that have materially affected, or are reasonably likely to materially affect the registrant's internal control over financial reporting.

Management's report on internal control over financial reporting and the attestation report of Verizon's independent registered public accounting firm is included in the 2007 Verizon Annual Report to Shareowners on pages 38 through 39 and is incorporated herein by reference.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

For information with respect to our executive officers, see "Executive Officers of the Registrant" at the end of Part I of this Report. For other information required by this item see the sections entitled "Election of Directors," "About Verizon's Governance Practices," "About the Board of Directors and its Committees" and "Section 16(a) Beneficial Ownership Reporting Compliance" in the Proxy Statement for our 2008 Annual Meeting of Shareholders filed pursuant to Regulation 14A, which is incorporated herein by reference.

Item 11. Executive Compensation

For information with respect to executive compensation, see the section entitled "Executive Compensation" in the Proxy Statement for our 2008 Annual Meeting of Shareholders filed pursuant to Regulation 14A, which is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

For information with respect to the security ownership of the Directors and Executive Officers, see the section entitled "Security Ownership of Directors and Officers" in the Proxy Statement for our 2008 Annual Meeting of Shareholders filed pursuant to Regulation 14A, which is incorporated herein by reference. In addition, the following table provides other equity compensation plan information:

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plans
Equity compensation plans approved by security holders	139,145,918	$ 49.28	137,935,869
Equity compensation plans not approved by security holders	36,754,227	41.96	13,236,690*
Total	175,900,145	47.75	151,172,559

* Indicates the number of securities available for issuance under the Verizon Communications 2000 Broad-Based Incentive Plan, which provides for awards of nonqualified stock options, restricted stock, restricted stock units and other equity-based hypothetical stock units to employees of Verizon and its subsidiaries.

Schedule II - Valuation and Qualifying Accounts

Verizon Communications Inc. and Subsidiaries

For the Years Ended December 31, 2007, 2006 and 2005

(dollars in millions)

Description	Balance at Beginning of Period	Additions: Charged To Expenses	Additions: Charged to Other Accounts Note (a)	Deductions Note (b)	Balance at End of Period
Allowance for Uncollectible Accounts Receivable:					
Year 2007	**$ 1,139**	**$ 1,047**	**$ 834**	**$ 1,995**	**$ 1,025**
Year 2006	1,100	1,034	1,627	2,622	1,139
Year 2005	1,363	1,076	794	2,133	1,100
Valuation Allowance for Deferred Tax Assets:					
Year 2007	**$ 2,600**	**$ 231**	**$ 29**	**$ 189**	**$ 2,671**
Year 2006	815	51	2,234	500	2,600
Year 2005	1,217	46	43	491	815
Discontinued Businesses:					
Year 2007	**$ 237**	**$ –**	**$ –**	**$ 13**	**$ 224**
Year 2006	248	–	–	11	237
Year 2005	287	5	–	44	248

(a) Allowance for Uncollectible Accounts Receivable includes: (1) amounts previously written off which were credited directly to this account when recovered: and (2) accruals charged to accounts payable for anticipated uncollectible charges on purchases of accounts receivable from others which were billed by us. Also includes amounts transferred from other accounts. The 2006 amounts charged to other accounts for the allowance for uncollectible accounts receivable and valuation allowance for deferred tax assets were primarily due to the acquisition of MCI.

(b) Amounts written off as uncollectible or transferred to other accounts or utilized.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Verizon Communications Inc. (Verizon or the Company) is one of the world's leading providers of communications services. Verizon's wireline business provides communications services, including voice, broadband data and video services, network access, nationwide long-distance and other communications products and services, and also owns and operates one of the most expansive end-to-end global Internet Protocol (IP) networks. Verizon's domestic wireless business, operating as Verizon Wireless, provides wireless voice and data products and services across the United States using one of the most extensive and reliable wireless networks. Stressing diversity and commitment to the communities in which we operate, we have a highly diverse workforce of approximately 235,000 employees.

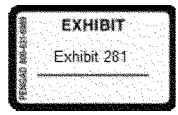
The sections that follow provide information about the important aspects of our operations and investments, both at the consolidated and segment levels, and include discussions of our results of operations, financial position and sources and uses of cash. In addition, we have highlighted key trends and uncertainties to the extent practicable. The content and organization of the financial and non-financial data presented in these sections are consistent with information used by our chief operating decision makers for, among other purposes, evaluating performance and allocating resources. We also monitor several key economic indicators as well as the state of the economy in general, primarily in the United States where the majority of our operations are located, in evaluating our operating results and analyzing and understanding business trends. While most key economic indicators, including gross domestic product, impact our operations to some degree, we have noted higher correlations to housing starts, non-farm employment, personal consumption expenditures and capital spending, as well as more general economic indicators such as inflation and unemployment rates.

Our results of operations, financial position and sources and uses of cash in the current and future periods reflect Verizon management's focus on the following strategic imperatives:

- **Revenue Growth** – Our emphasis is on revenue growth, devoting more resources to higher growth markets such as wireless, including wireless data, wireline broadband connections, including Verizon's high-capacity fiber optics to the premises network operated under the FiOS service mark, digital subscriber lines (DSL) and other data services, as well as expanded strategic services to business markets, rather than to the traditional wireline voice market. During 2007, we reported consolidated revenue growth of 6% compared to 2006, primarily driven by 15.3% higher revenue at Domestic Wireless, where we added approximately 6.9 million retail net wireless customers, partially offset by a decline in reseller customers, resulting in approximately 6.7 million total wireless net customer additions. At Wireline, revenue growth in the residential market, driven by broadband and video services, coupled with growth in the business market derived from strategic services, partially offset declines in the traditional voice mass market.

- **Market Share Gains** – We are focused on gaining market share. In our wireline business, our goal is to become the leading broadband provider in every market in which we operate. We added 1,253,000 wireline broadband connections during 2007 and we achieved our goal of being among the top 10 video providers in the U.S. during 2007 through the continued deployment of FiOS. At Wireline, as of December 31, 2007, we passed 9.3 million premises with our high-capacity fiber network, and we have obtained over 1,000 video franchises covering 12.5 million households with TV service available for sale to 5.9 million premises. We had 943,000 FiOS TV customers, adding approximately 736,000 net new FiOS TV customers in 2007 and exceeded 1.8 million total video customers, including our satellite offering from DIRECTV. Also during 2007, revenues from our enterprise customers grew 2.7% compared with last year, primarily driven by a 25.7% increase in revenues from sales of strategic services (Private IP, IP, Virtual Private Network or VPN, Web Hosting and Voice over IP or VoIP). At Domestic Wireless, we continue to add retail customers, grow revenue and gain market share while maintaining a low churn (customer turnover) rate.

- **Profitability Improvement** – Our goal is to increase operating income and margins. In 2007, operating income rose 16.5% compared to 2006, while income before provision for income taxes, discontinued operations, extraordinary item and cumulative effect of accounting change rose 16.4% over the same period. Our operating income margin rose to 16.7% in 2007, compared with 15.2% in 2006. Supporting these improvements, our capital spending continues to be directed toward growth markets, positioning the Company for sustainable, long-term profitability. High-speed wireless data (Evolution-Data Optimized or EV-DO) services, deployment of fiber optics to the premises, as well as expanded services to enterprise customers are examples of these growth markets. During 2007, capital expenditures were $17,538 million compared with capital expenditures of $17,101 million in 2006, excluding discontinued operations. We expect 2008 capital expenditures to be lower than 2007 capital expenditures. In addition to capital expenditures, Domestic Wireless expects, from time-to-time, to acquire additional wireless spectrum through participation in the Federal Communications Commission's (FCC) wireless spectrum auctions and in the secondary market, as spectrum capacity is needed to support expanding data applications and a growing customer base. Domestic Wireless also expects, from time-to-time, to acquire operating markets and spectrum in geographic areas where it does not currently operate.



- **Operational Efficiency** – While focusing resources on revenue growth and market share gains, we are continually challenging our management team to lower expenses, particularly through technology-assisted productivity improvements, including self-service initiatives. The effect of these and other efforts, such as real estate consolidations, call center routing improvements, the formation of a centralized shared services organization, and centralizing information technology and marketing efforts, has led to changes to the Company's cost structure as well as maintaining and improving operating income margins. With our deployment of the FiOS network, we expect to realize savings in annual, ongoing operating expenses as a result of efficiencies gained from fiber network facilities. As the deployment of the FiOS network gains scale and installation and automation improvements occur, costs per home connected are expected to decline. Since the merger with MCI, we have gained operational benefits from sales force and product and systems integration initiatives. Workforce levels in 2007 decreased to 235,000 compared to 238,000 in 2006, primarily from a decrease at Wireline due to continued productivity improvements and merger synergy savings, partially offset by an increase in headcount at Wireless.

- **Customer Experience** – Our goal is to provide the best customer experience possible and to be the leading company in customer service in every market we serve. We view superior product offerings and customer service experiences as a competitive differentiator and a catalyst to growing revenues and gaining market share. During 2007, our Company received citations for superior products and customer service, and we continued these initiatives to enhance the value of our products and services. We are developing and marketing innovative product bundles to include local wireline, long-distance, wireless and broadband services for consumer and general business retail customers. These efforts will help counter the effects of competition and technology substitution that have resulted in access line losses, and will enable us to grow revenues. Also at Wireline, we continued to roll out next-generation global IP networks to meet the ongoing global enterprise market shift to IP-based products and services. Deployment of new strategic service offerings — including expansion of our VoIP and international Ethernet capabilities, the introduction of cutting edge video and web-based conferencing capabilities, and enhancements to our virtual private network portfolio — will allow us to continue to gain share in the enterprise market. In addition, during 2007 we acquired a security-services firm that enhanced our managed information security services offerings to large-business and government customers worldwide. At Domestic Wireless, we continue to execute on the fundamentals of our network superiority and value proposition to deliver growth for our business and provide new and innovative products and services, such as Broadband Access, our EV-DO service. We also continue to expand our wireless data, messaging and multi-media offerings for both consumer and business customers and take advantage of the growing demand for wireless data services.

- **Performance-Based Culture** – We embrace a culture of corporate-wide accountability, based on individual and team objectives that are performance-based and tied to these imperatives. Key objectives of our compensation programs are pay-for-performance and the alignment of executives' and shareowners' long-term interests. We also employ a highly diverse workforce, since respect for diversity is an integral part of Verizon's culture and a critical element of our competitive success.

We create value for our shareowners by investing the cash flows generated by the business in opportunities and transactions that support these strategic imperatives, thereby increasing customer satisfaction and usage of our products and services. In addition, we use our cash flows to repurchase shares and maintain and grow our dividend payout to shareowners. Verizon's total debt decreased by $5,204 million to $31,157 million as of December 31, 2007 from December 31, 2006. Reflecting continued strong cash flows and confidence in Verizon's business model, Verizon's Board of Directors increased the Company's quarterly dividend 6.2% during the third quarter of 2007. Verizon's ratio of debt to debt combined with shareowners' equity was 38.1% as of December 31, 2007 compared with 42.8% as of December 31, 2006. During 2007, we repurchased $2,843 million of our common stock as part of our previously announced share buyback program. We plan to continue our share buyback program in 2008. Verizon's cash and cash equivalents at December 31, 2007 of $1,153 million decreased by $2,066 million from $3,219 million at December 31, 2006.

As discussed in the "Recent Developments" section beginning on page 33, in January 2007, Verizon announced a definitive agreement with FairPoint Communications, Inc. (FairPoint) that will result in Verizon establishing a separate entity for its local exchange access lines and related business assets in Maine, New Hampshire and Vermont, spinning off that new entity to Verizon's shareowners, and immediately merging it with and into FairPoint. Based upon the number of shares (as adjusted) and closing price of FairPoint common stock on the date immediately prior to the announcement of the merger, the estimated total value to be received by Verizon and its shareowners in exchange for these operations was approximately $2,715 million. The actual total value to be received by Verizon and its shareowners will be determined based on the number of shares (as adjusted) and price of FairPoint common stock on the date of the closing of the merger, and is expected to be less than $2,715 million.

Consolidated Results of Operations

In this section, we discuss our overall results of operations and highlight items that are not included in our business segment results. As a result of the spin-off of our domestic print and Internet yellow pages directories business, which was included in the Information Services segment, and the sale of our interests in Telecomunicaciones de Puerto Rico, Inc. (TELPRI) and Verizon Dominicana, each of which was included in the International segment, the operations of our former domestic print and Internet yellow pages directories business, Verizon Dominicana and TELPRI are reported as discontinued operations and assets held for sale. Accordingly, we currently have two reportable segments, which we operate and manage as strategic business units and organize by products and services. Our segments are Wireline and Domestic Wireless. Included in our Wireline results of operations are the results of the former MCI business subsequent to the close of the merger on January 6, 2006.

This section and the following "Segment Results of Operations" section also highlight and describe those items of a non-recurring nature separately to ensure consistency of presentation. In the following section, we review the performance of our two reportable segments. We exclude the effects of certain items that management does not consider in assessing segment performance, due primarily to their non-recurring and/or non-operational nature as discussed below and in the "Other Consolidated Results" and "Other Items" sections. We believe that this presentation will assist readers in better understanding our results of operations and trends from period to period.

Revenues of Hawaii operations sold	–	–	–	–	180	(100.0)
Consolidated Revenues	$ 93,469	$ 88,182	6.0	$ 88,182	$ 69,518	26.8

2007 Compared to 2006

Consolidated revenues in 2007 increased by $5,287 million, or 6.0% compared to 2006. This increase was primarily the result of continued strong growth at Domestic Wireless.

Wireline's revenues in 2007 decreased $412 million, or 0.8% compared to 2006, primarily driven by lower demand and usage of our basic local exchange and accompanying services, partially offset by continued growth from broadband and strategic services. During 2007, we added 1,253,000 new broadband connections, an increase of 17.9%, including 854,000 for FiOS, for a total of 8,235,000 lines at December 31, 2007. In addition, we added 736,000 FiOS TV customers in 2007, for a total of 943,000 at December 31, 2007. Revenues at Verizon Business increased during 2007 compared to 2006 primarily due to higher demand for strategic products. These increases were offset by a decline in voice revenues at Verizon Telecom due to a 3.6 million decline in subscribers resulting from competition and technology substitution, such as wireless and VoIP, including those subscribers who have migrated to our other service offerings.

Domestic Wireless's revenues in 2007 increased by $5,839 million, or 15.3% compared to 2006 due to increases in service revenues, which include data revenues, and equipment and other revenue. Equipment and other revenue increased principally as a result of increases in the number of existing customers upgrading their wireless devices. Total data revenues increased by $2,911 million, or 65.0% in 2007 compared to 2006. There were approximately 65.7 million total Domestic Wireless customers as of December 31, 2007, an increase of 11.3% from December 31, 2006. Domestic Wireless's retail customer base as of December 31, 2007 was approximately 63.7 million, a 12.2% increase from 2006, and represented approximately 97% of its total customer base. Average total service revenue per customer (ARPU) increased by 2.3% to $50.96 in 2007 compared to 2006, primarily attributable to increases in data revenue per customer driven by increased use of our messaging and other data services. Retail ARPU increased by 2.2% to $51.57 in 2007 compared to 2006.

2006 Compared to 2005

Consolidated revenues in 2006 were higher by $18,664 million, or 26.8% compared to 2005 revenues. This increase was primarily the result of significantly higher revenues at Wireline and Domestic Wireless.

Wireline's revenues in 2006 increased by $13,112 million, or 34.9% compared to 2005 primarily due to the acquisition of MCI and, to a lesser extent, growth from broadband and long distance services. We added 1.8 million new broadband connections, for a total of 7.0 million lines in service at December 31, 2006, an increase of 35.7% compared to 5.1 million lines in service at December 31, 2005. The number of retail service plans continued to stimulate growth in long distance services, as the number of packages reached 7.9 million at December 31, 2006, representing a 44.1% increase from December 31, 2005. These increases were partially offset by declines in wholesale revenues at Verizon Telecom due to subscriber losses resulting from technology substitution, including wireless and VoIP. Wholesale revenues at Verizon Telecom declined by $748 million, or 8.2% in 2006 compared to similar periods in 2005 primarily due to the exclusion of affiliated access revenues billed to the former MCI mass market entities in 2006. Revenues at Verizon Business increased primarily due to the acquisition of MCI.

Domestic Wireless's revenues increased by $5,742 million, or 17.8% compared to 2005 due to increases in service revenues (which include data revenues) and equipment and other revenue. Data revenues increased by $2,232 million or 99.5% compared to 2005. Domestic Wireless ended 2006 with 59.1 million customers, an increase of 15.0% over 2005. Domestic Wireless's retail customer base as of December 31, 2006 was approximately 56.8 million, a 15.9% increase over December 31, 2005, and represented approximately 96.2% of our total customer base. ARPU increased by 0.6% to $49.80 in 2006 compared to 2005, primarily attributable to increases in data revenue per customer driven by increased use of our messaging and other data services. Retail ARPU increased by 0.7% to $50.44 for 2006 compared to 2005.

The $180 million decrease in revenues from Hawaii operations from 2006 to 2005 resulted from the sale of our wireline and directory businesses in Hawaii during 2005. Verizon Hawaii Inc., which operated approximately 700,000 switched access lines, as well as the services and assets of Verizon Long Distance, Verizon Online, Verizon Information Services and Verizon Select Services Inc. in Hawaii, were sold to an affiliate of The Carlyle Group for $1,326 million in cash proceeds. In connection with this sale, we recorded a net pretax gain of $530 million ($336 million after-tax, or $.12 per diluted share) during the second quarter of 2005.

Consolidated Operating Expenses

					(dollars in millions)	
Years Ended December 31,	2007	2006	% Change	2006	2005	% Change
Cost of services and sales	$ 37,547	$ 35,309	6.3	$ 35,309	$ 24,409	44.7
Selling, general and administrative expense	25,967	24,955	4.1	24,955	19,443	28.3
Depreciation and amortization expense	14,377	14,545	(1.2)	14,545	13,615	6.8
Sales of businesses, net	–	–	–	–	(530)	(100.0)
Consolidated Operating Expenses	$ 77,891	$74,809	4.1	$ 74,809	$ 56,937	31.4

2007 Compared to 2006

Cost of Services and Sales

Cost of services and sales includes the following costs directly attributable to a service or product: salaries and wages, benefits, materials and supplies, contracted services, network access and transport costs, customer provisioning costs, computer systems support, costs to support our outsourcing contracts and technical facilities and contributions to the universal service fund. Aggregate customer care costs, which include billing and service provisioning, are allocated between cost of services and sales and selling, general and administrative expense.

Consolidated cost of services and sales in 2007 increased $2,238 million, or 6.3% compared to 2006, primarily as a result of higher wireless network costs and wireless equipment costs, as well as higher costs associated with Wireline's growth businesses. The increase was partially offset by the impact of productivity improvement initiatives and decreases in net pension and other postretirement benefit costs.

The higher wireless network costs were caused by increased network usage relating to both voice and data services in 2007 compared to 2006, partially offset by decreased local interconnection, long distance and roaming rates. Cost of wireless equipment sales increased in 2007 compared to 2006, primarily as a result of an increase in wireless devices sold due to an increase in equipment upgrades.

Consolidated operating expenses in 2007 and 2006 primarily include $32 million and $25 million, respectively, of costs associated with the integration of MCI into our wireline business.

Selling, General and Administrative Expense

Selling, general and administrative expense includes salaries and wages and benefits not directly attributable to a service or product, bad debt charges, taxes other than income, advertising and sales commission costs, customer billing, call center and information technology costs, professional service fees and rent for administrative space.

Consolidated selling, general and administrative expense in 2007 increased $1,012 million, or 4.1% compared to 2006. The increase was primarily attributable to higher salary and benefits expenses. Also contributing to the increase was higher sales commission expense at Domestic Wireless and higher advertising costs at Wireline. Partially offsetting the increases were lower bad debt expenses and cost reduction initiatives.

Consolidated operating expenses in 2007 included $772 million for severance and related expenses as a result of workforce reductions that began in the fourth quarter of 2007 and are expected to occur throughout 2008 as well as adjustments to our actuarial assumptions for severance to align with future expectations, $146 million for merger integration costs, primarily comprised of Wireline systems integration activities related to businesses acquired and $84 million related to the spin-off of local exchange and related business assets in Maine, New Hampshire and Vermont. In addition, during 2007 we contributed $100 million of the proceeds from the sale of TELPRI to the Verizon Foundation.

Consolidated operating expenses in 2006 included $56 million related to pension settlement losses incurred in connection with our benefit plans and a net pretax charge of $369 million for employee severance and severance-related activities in connection with the involuntary separation of approximately 4,100 employees who were separated in 2006. Consolidated operating expenses in 2006 also included $207 million of merger integration costs, primarily for advertising and other costs related to re-branding initiatives and systems integration activities, and a net pretax charge of $184 million for Verizon Center relocation costs.

Depreciation and Amortization Expense

Depreciation and amortization expense decreased $168 million, or 1.2% in 2007 compared to 2006. The decrease was primarily due to lower rates of depreciation as a result of changes in the estimated useful lives of certain asset classes at Wireline and fully amortized customer lists at Domestic Wireless, partially offset by growth in depreciable telephone plant as a result of increased capital expenditures.

2006 Compared to 2005

Cost of Services and Sales

Cost of services and sales increased by $10,900 million, or 44.7% in 2006 compared to 2005. This increase was principally driven by higher costs attributable to the inclusion of the former MCI operations in the Wireline segment subsequent to the completion of the merger, and to a lesser extent higher wireless network costs, increases in wireless equipment costs and increases in pension and other postretirement benefit costs, partially offset by the net impact of productivity improvement initiatives.

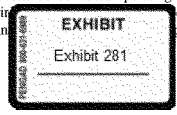
The higher wireless network costs were caused by increased network usage relating to both voice and data services in 2006 compared to 2005, partially offset by decreased roaming, local interconnection and long distance rates. Cost of wireless equipment sales increased in 2006 compared to 2005 primarily as a result of an increase in wireless devices sold due to an increase in gross activations and equipment upgrades as well as an increase in cost per unit.

Costs in these periods were also impacted by increased pension and other postretirement benefit costs. The overall impact of the 2006 assumptions, combined with the impact of lower than expected actual asset returns over the past several years, resulted in pension and other postretirement benefit expense of approximately $1,377 million in 2006 compared to net pension and postretirement benefit expense of $1,231 million in 2005. Consolidated operating expenses in 2006 included $25 million of merger integration costs related to the acquisition of MCI.

Selling, General and Administrative Expense

Selling, general and administrative expense increased by $5,512 million, or 28.3% in 2006 compared to 2005. This increase was driven by the inclusion of the former MCI operations in the Wireline segment subsequent to the completion of the merger, increases in the Domestic Wireless segment primarily related to increased salary and benefits expenses, and non-operational charges.

Consolidated operating expenses in 2006 included $56 million related to pension settlement losses incurred in connection with our benefit plans, a net pretax charge of $369 million for employee severance and severance-related activities in connection with the involuntary separation of approximately 4,100 employees who were separated in 2006. Consolidated operating expenses in 2006 also included $207 million of merger integration costs primarily for advertising and other costs related to re-branding initiatives and systems integration activities, and a net pretax charge of $184 million for Verizon Center relocation costs. Consolidated operating expenses in 2005 included a pretax impairment charge of $125 million pertaining to our leasing operations for air[illegible]eriencing financial difficulties, a net pretax charge of $98 million related to the restructuring of the Verizon man[illegible]plans and a pretax charge of $59 million associated with



employee severance costs and severance-related activities in connection with the voluntary separation program for surplus union-represented employees.

Depreciation and Amortization Expense

Depreciation and amortization expense increased by $930 million, or 6.8% in 2006 compared to 2005. This increase was primarily due to higher depreciable and amortizable asset bases as a result of the MCI merger and, to a lesser extent, increased capital expenditures.

Other Consolidated Results

Equity in Earnings of Unconsolidated Businesses

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Vodafone Omnitel	$ 597	$ 703	$ 741
CANTV	–	182	53
Other	(12)	(112)	(108)
	$ 585	$ 773	$ 686

Equity in earnings of unconsolidated businesses decreased by $188 million, or 24.3% in 2007 compared to 2006. The decrease is primarily driven by the nationalization of Compañía Anónima Nacional Teléfonos de Venezuela (CANTV) during 2007, as well as the effect of lower tax benefits at Vodafone Omnitel N.V. (Vodafone Omnitel).

Equity in earnings of unconsolidated businesses increased by $87 million, or 12.7% in 2006 compared to 2005. The increase is primarily due to additional pension liabilities that CANTV recognized in 2005, as well as the effect of favorable operating results and lower taxes in 2006. In addition, the increase reflects our proportionate share, or $85 million, of a tax benefit at Vodafone Omnitel in the third quarter of 2006, partially offset by a similar benefit recorded in the third quarter of 2005 of $76 million. This was offset by lower tax benefits and lower operating results at Vodafone Omnitel.

Other Income and (Expense), Net

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Interest income	$ 168	$ 201	$ 103
Foreign exchange gains (losses), net	14	(3)	11
Other, net	29	197	197
Total	$ 211	$ 395	$ 311

Other Income and (Expense), Net in 2007 decreased $184 million, or 46.6% compared to 2006. The decline was primarily attributable to a gain on the sale of a Wireline investment in the prior year, as well as decreased interest income as a result of lower average cash balances.

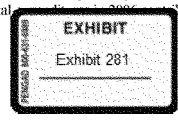
Other Income and (Expense), Net in 2006 increased $84 million, or 27% compared to 2005. The increase was primarily due to increased interest income as a result of higher average cash balances coupled with higher interest rates in 2006 compared to 2005, partially offset by foreign exchange losses. Other, net in 2005 included a pretax gain on the sale of a small international business and investment gains and expenses related to the early retirement of debt.

Interest Expense

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Total interest costs on debt balances	$ 2,258	$ 2,811	$ 2,481
Less: capitalized interest costs	(429)	(462)	(352)
Interest expense	$ 1,829	$ 2,349	$ 2,129
Weighted average debt outstanding	$ 32,964	$ 41,500	$ 39,152
Effective interest rate	6.85%	6.78%	6.30%

Total interest costs decreased $553 million in 2007 compared to 2006, primarily due to a decrease in average debt levels, partially offset by slightly higher interest rates. Debt levels decreased primarily as a result of the approximately $7.1 billion reduction from the spin-off of our domestic print and Internet yellow pages directories business in November 2006, as well as from debt redemptions and retirements funded by proceeds from the spin-off and the divestiture of our Caribbean and Latin American investments during 2006 and the first quarter of 2007.

In 2006, interest costs increased $330 million compared to 2005 primarily due to an increase in average debt level of $2,348 million and increased interest rates compared to 2005. Higher capital [illegible] buted to higher capitalized interest costs.



Minority Interest

Years Ended December 31,	2007	2006	2005
			(dollars in millions)
Minority interest	$ 5,053	$ 4,038	$ 3,001

The increase in minority interest in 2007 compared to 2006, and in 2006 compared to 2005, was due to the higher earnings at Domestic Wireless, which has a significant minority interest attributable to Vodafone Group Plc (Vodafone).

Provision for Income Taxes

Years Ended December 31,	2007	2006	2005
			(dollars in millions)
Provision for income taxes	$ 3,982	$ 2,674	$ 2,421
Effective income tax rate	42.0%	32.8%	28.7%

The effective income tax rate is calculated by dividing the provision for income taxes by income from continuing operations before the provision for income taxes. The effective income tax rate in 2007 compared to 2006 was higher primarily due to recording $610 million of foreign and domestic taxes and expenses specifically relating to our share of Vodafone Omnitel distributable earnings. Verizon received a net distribution from Vodafone Omnitel in December 2007 of approximately $2.1 billion and anticipates that it may receive an additional distribution from Vodafone Omnitel within the next twelve months. The 2007 rate was also increased due to higher state taxes in 2007 as compared to 2006, as well as greater benefits from foreign operations in 2006 compared to 2007. These increases were partially offset by lower expenses recorded for unrecognized tax benefits in 2007 as compared to 2006.

Our effective income tax rate in 2006 was higher than 2005 primarily as a result of favorable tax settlements and the recognition of capital loss carry forwards in 2005. These increases were partially offset by tax benefits from foreign operations and lower state taxes in 2006 compared to 2005.

A reconciliation of the statutory federal income tax rate to the effective income tax rate for each period is included in Note 16 to the consolidated financial statements.

Discontinued Operations

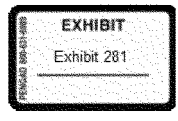
In accordance with Statement of Financial Accounting Standard (SFAS) No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* , we have classified TELPRI, Verizon Dominicana and our former domestic print and Internet yellow pages directories publishing operations as discontinued operations in the consolidated financial statements for all periods presented through the date of the spin-off or divestiture.

On March 30, 2007, after receiving Federal Communications Commission approval, we completed the sale of our 52% interest in TELPRI and received gross proceeds of approximately $980 million. The sale resulted in a pretax gain of $120 million ($70 million after-tax, or $.02 per diluted share). Additionally, $100 million of the proceeds were contributed to the Verizon Foundation.

The sale of Verizon Dominicana closed in December 2006, and primarily due to taxes on previously unremitted earnings, a pretax gain of $30 million resulted in an after-tax loss of $541 million (or $.18 per diluted share).

We completed the spin-off of our domestic print and Internet yellow pages directories business to our shareowners on November 17, 2006, which resulted in an $8,695 million increase to contributed capital in shareowner's investment. In addition, we recorded pretax charges of $117 million ($101 million after-tax, or $.03 per diluted share) for costs related to this spin-off. These costs primarily consisted of debt retirement costs, costs associated with accumulated vested benefits of employees, investment banking fees and other transaction costs related to the spin-off, which are included in discontinued operations.

Income from discontinued operations, net of tax, decreased by $617 million, or 81.3% in 2007 compared to 2006. The decrease was primarily driven by the assets disposed of in 2006, partially offset by the after-tax gain recorded in 2007 on the sale of TELPRI. Income from discontinued operations, net of tax, decreased by $611 million, or 44.6% in 2006 compared to 2005. This decrease was primarily due to the after-tax loss recorded in 2006 on the sale of Verizon Dominicana, partially offset by the cessation of depreciation on fixed assets held for sale.



Extraordinary Item

In January 2007, the Bolivarian Republic of Venezuela (the Republic) declared its intent to nationalize certain companies, including CANTV. On February 12, 2007, we entered into a Memorandum of Understanding (MOU) with the Republic, which provided that the Republic offer to purchase all of the equity securities of CANTV, including our 28.5% interest, through public tender offers in Venezuela and the United States. Under the terms of the MOU, the prices in the tender offers would be adjusted downward to reflect any dividends declared and paid subsequent to February 12, 2007. During the second quarter of 2007, the tender offers were completed and Verizon received an aggregate amount of approximately $572 million, which included $476 million from the tender offers as well as $96 million of dividends declared and paid subsequent to the MOU. Based upon our investment balance in CANTV, we recorded an extraordinary loss of $131 million, including taxes of $38 million, or $.05 per diluted share.

Cumulative Effect of Accounting Change

Effective January 1, 2006, we adopted SFAS No. 123(R), *Share-Based Payments* , utilizing the modified prospective method. The impact to Verizon primarily resulted from Domestic Wireless, for which we recorded a $42 million ($.01 per diluted share) cumulative effect of accounting change, net of taxes and after minority interest, to recognize the effect of initially measuring the outstanding liability for awards granted to Domestic Wireless employees at fair value utilizing a Black-Scholes model.

Segment Results of Operations

We have two reportable segments, which we operate and manage as strategic business units and organize by products and services. Our segments are Wireline and Domestic Wireless. You can find additional information about our segments in Note 17 to the consolidated financial statements.

We measure and evaluate our reportable segments based on segment income. Corporate, eliminations and other includes unallocated corporate expenses, intersegment eliminations recorded in consolidation, the results of other businesses such as our wholly-owned insurance and leasing subsidiaries, the results of investments in unconsolidated businesses, primarily Vodafone Omnitel, and other adjustments that are not allocated in assessing segment performance. These adjustments also include transactions that the chief operating decision makers exclude in assessing business unit performance due primarily to their non-recurring and/or non-operational nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses that are not individually significant are included in all segment results, since these items are included in the chief operating decision makers' assessment of unit performance.

Wireline

The Wireline segment consists of the operations of Verizon Telecom, a provider of communication services, including voice, broadband video and data, network access, long distance, and other services to residential and small business customers and carriers, and Verizon Business, which provides next-generation IP network services to medium and large businesses and government customers globally. Operating results shown for 2006 exclude the results of the former MCI prior to the date of the merger (January 6, 2006).

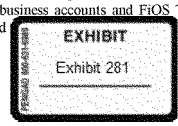
Operating Revenues

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Verizon Telecom			
Mass Markets	$ 21,978	$ 22,234	$ 20,044
Wholesale	8,086	8,336	9,084
Other	1,862	2,368	2,566
Verizon Business			
Enterprise Business	14,677	14,296	6,385
Wholesale	3,345	3,281	1,386
International and Other	3,214	3,101	–
Intrasegment Eliminations	(2,846)	(2,888)	(1,849)
Total Wireline Operating Revenues	$ 50,316	$ 50,728	$ 37,616

Verizon Telecom

Mass Markets

Verizon Telecom's Mass Markets revenue includes local exchange (basic service and end-user access), value-added services, long distance, broadband services for residential and certain small business accounts and FiOS TV services. Also included are revenues generated from former MCI consumer and small business products and [illegible]udes both regional toll services and long distance services. Broadband services include DSL and FiOS data.



Our Mass Markets revenue decreased by $256 million, or 1.2% in 2007, and increased by $2,190 million, or 10.9% in 2006. The decrease in 2007 was primarily driven by lower demand and usage of our basic local exchange and accompanying services, attributable to consumer subscriber losses. These losses are driven by competition and technology substitution, including wireless and VoIP. These decreases were partially offset by growth from broadband services and FiOS TV services and the inclusion of the results of operations of the former MCI business subsequent to the close of the merger on January 6, 2006, which helped drive the increase in 2006 over 2005.

Declines in switched access lines in service of 8.1% in 2007 and 7.6% in 2006 were mainly driven by the effects of competition and technology substitution. Residential retail access lines declined 9.5% in 2007 and 8.8% in 2006, as customers substituted wireless, VoIP, broadband and cable services for traditional voice landline services. At the same time, business retail access lines declined 4.0% in 2007 and 3.2% in 2006, primarily reflecting competition and a shift to high-speed access lines. The resulting total retail access line loss was 7.6% and 6.9% in 2007 and 2006, respectively. Access line losses include the loss of lines served by the former MCI.

We added 1,253,000 new broadband connections, including 854,000 for FiOS data in 2007. We ended 2007 with 8,235,000 broadband lines in service, including 1,541,000 for FiOS data, representing an increase of 17.9% compared to 6,982,000 lines in service at December 31, 2006. In addition, we added approximately 736,000 FiOS TV customers in 2007 and ended the year with a total of 943,000, an increase of approximately 355% compared to 207,000 FiOS TV customers at December 31, 2006. As of December 31, 2007, for FiOS data and FiOS TV, we achieved penetration rates of 20.6% and 16.0%, respectively, across the markets where we have been selling these services.

Wholesale

Wholesale revenues are earned from long distance and other competing carriers who use our local exchange facilities to provide services to their customers. Switched access revenues are generated from fixed and usage-based charges paid by carriers for access to our local network. Special access revenues are generated from carriers that buy dedicated local exchange capacity to support their private networks. Wholesale services also include local wholesale revenues from unbundled network elements (UNEs) and interconnection revenues from competitive local exchange carriers (CLECs) and wireless carriers.

Wholesale revenues decreased by $250 million, or 3.0% in 2007 and by $748 million, or 8.2% in 2006, due to declines in switched access revenues and local wholesale revenues (UNEs) and, in 2006, the reduction in access revenues billed to the former MCI mass market entities. These declines were partially offset by increases in special access revenues.

Switched minutes of use (MOUs) declined in 2007 and 2006, reflecting the impact of access line loss and wireless substitution. Wholesale lines decreased by 15.9% in 2007 due to the ongoing impact of a 2005 decision by a major competitor to deemphasize their local market initiatives. Special access revenue growth reflects continuing demand for high-capacity, high-speed digital services, partially offset by lower demand for older, low-speed data products and services. As of December 31, 2007, customer demand for high-capacity and digital data services increased 8.2% compared to 2006.

The FCC regulates the rates that we charge customers for interstate access services. See "Other Factors That May Affect Future Results – Regulatory and Competitive Trends – FCC Regulation" for additional information on FCC rulemaking concerning federal access rates, universal service and certain broadband services.

Other Revenues

Other revenues include such services as operator services (including deaf relay services), public (coin) telephone, card services and supply sales, as well as dial around services including 10-10-987, 10-10-220, 1-800-COLLECT and Prepaid Cards.

Verizon Telecom's revenues from other services decreased by $506 million, or 21.4% in 2007, and by $198 million, or 7.7% in 2006. These revenue decreases were mainly due to the discontinuation of non-strategic product lines and reduced business volumes, partially offset by the inclusion of revenues from the former MCI in 2006.

Verizon Business

Enterprise Business

Our Enterprise Business channel distributes voice, data and Internet communications services to medium and large business customers, multi-national corporations, and state and federal government customers. In addition to communication services, this channel provides value-added services that make communications more secure, reliable and efficient. Enterprise Business provides managed network services for customers that outsource all or portions of their communications and information processing operations and data services such as Private IP, Private Line, Frame Relay and ATM services, both domestically and internationally.

Enterprise Business 2007 revenues of $14,677 million increased by $381 million, or 2.7%, as compared to 2006, primarily reflecting growth in demand for our strategic products, specifically IP servi[illegible]s well as the inclusion of the results of operations of the former MCI business subsequent to the close of the merg[illegible]P suite of products is Enterprise Business' fastest growing set of product offerings and includes Private IP, IP VP[illegible] Our Enterprise Business channel services many customer

Exhibit 281

accounts that are moving from core data products to IP based products. This shift in technology is occurring across our customer base. Enterprise Business 2006 revenues of $14,296 million increased $7,911 million, or 123.9% compared to 2005 primarily due to the acquisition of MCI.

Wholesale

Our Wholesale revenues relate to domestic wholesale services and include all interexchange wholesale traffic sold in the United States, as well as internationally destined traffic that originates in the United States. The Wholesale line of business is comprised of numerous large and small customers that predominately resell voice services to their own customer base. A portion of this revenue is generated by a few large telecommunication carriers, many of whom compete directly with Verizon.

Verizon Business 2007 Wholesale revenues of $3,345 million increased by $64 million, or 2.0% as compared to 2006, primarily due to increased MOUs in traditional voice products, partially offset by continued rate compression due to competition in the marketplace. During 2006, Verizon Business Wholesale revenues of $3,281 million, increased $1,895 million, or 136.7%, compared to 2005, primarily due to the MCI acquisition.

International and Other

Our International operations serve retail and wholesale customers, including enterprise businesses, government entities and telecommunication carriers outside of the United States, primarily in Europe, the Middle East and Africa, the Asia Pacific region, Latin America and Canada. These operations provide telecommunications services, which include voice, data services, Internet and managed network services.

International and other revenues of $3,214 million during 2007 increased by $113 million, or 3.6% as compared to 2006. Revenue growth in our strategic products, specifically IP services, was partially offset by competitive rate compression and lower volumes with respect to our voice products. Our revenues from International and Other in the year ended December 31, 2006 were $3,101 million. This market represented a new revenue stream to Verizon resulting from the MCI acquisition on January 6, 2006.

Operating Expenses

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Cost of services and sales	$ 25,220	$ 24,767	$ 15,813
Selling, general and administrative expense	11,236	11,820	8,210
Depreciation and amortization expense	9,184	9,590	8,801
	$ 45,640	$ 46,177	$ 32,824

Cost of Services and Sales

Cost of services and sales includes the following costs directly attributable to a service or product: salaries and wages, benefits, materials and supplies, contracted services, network access and transport costs, customer provisioning costs, computer systems support, costs to support our outsourcing contracts and technical facilities, contributions to the universal service fund, customer provisioning costs and cost of products sold. Aggregate customer care costs, which include billing and service provisioning, are allocated between cost of services and sales and selling, general and administrative expense.

Cost of services and sales increased by $453 million, or 1.8%, during 2007 compared to 2006. This increase was primarily due to higher costs associated with our growth businesses, annual wage increases and higher customer premise equipment costs, partially offset by productivity improvement initiatives and lower switched access lines in service, as well as lower wholesale voice connections.

Cost of services and sales increased by $8,954 million, or 56.6%, in 2006 compared to 2005. These increases were primarily due to the MCI merger in 2006 partially offset by the net impact of other cost changes. Higher costs associated with our growth businesses and annual wage increases were partially offset by productivity improvement initiatives, which reduced cost of services and sales expenses in 2006. Expenses were also impacted by increased net pension and other postretirement benefit costs. The overall impact of the 2006 assumption changes, combined with the impact of lower than expected actual asset returns over the past several years, resulted in pension and other postretirement benefit expense of $1,408 million in 2006 compared to net pension and postretirement benefit expense of $1,248 million in 2005. Expenses decreased in 2006 due to the discontinuation of non-strategic businesses, including the termination of a large commercial inventory management contract in 2005.

Selling , General and Administrative Expense

Selling, general and administrative expense includes salaries, wages and benefits not directly attributable to a service or product, bad debt charges, taxes other than income, advertising and sales commission costs, customer billing, call center and information technology costs, professional service fees and rent for administrative space.

Selling, general and administrative expenses in 2007 decreased by $584 million or 4.9%, in 2007 compared to 2006. The decrease was primarily due to cost reduction initiatives, as well as tl estate sales and lower bad debt costs, partially offset by higher advertising costs and the inclusion of the results r MCI business subsequent to the close of the merger on January 6, 2006.

Selling, general and administrative expenses in 2006 increased by $3,610 million, or 44.0% compared to 2005. These increases were primarily due to the inclusion of expenses from the former MCI in 2006, partially offset by synergy savings resulting from our merger integration efforts, the impact of gains from real estate sales and lower bad debt costs.

Depreciation and Amortization Expense

The decrease in depreciation and amortization expense of $406 million, or 4.2%, in 2007 compared to 2006 was mainly driven by lower rates of depreciation as a result of changes in the estimated useful lives of certain asset classes, partially offset by growth in depreciable telephone plant from increased capital spending. The increase in depreciation and amortization expense of $789 million, or 9.0% in 2006 compared to 2005 was mainly driven by the acquisition of MCI's depreciable property and equipment and finite-lived intangible assets, including its customer lists and capitalized non-network software, and by growth in depreciable telephone plant and non-network software assets.

Segment Income

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Segment Income	$ 1,506	$ 1,625	$ 1,906

Segment income decreased by $119 million, or 7.3% in 2007 and by $281 million, or 14.7% in 2006, due to the after-tax impact of operating revenues and operating expenses described above, along with the impact of favorable income tax adjustments in 2005.

Non-recurring or non-operational items not included in Verizon Wireline's segment income totaled $714 million, $407 million and ($168) million in 2007, 2006, and 2005, respectively. Non-recurring or non-operational items in 2007 included costs associated with severance and other related charges, costs incurred related to network, non-network software, and other activities in connection with the spin-off of local exchange assets in Maine, New Hampshire and Vermont (see "Recent Developments" section), as well as costs associated with merger integration initiatives, principally related to the acquisition of MCI and other items. Non-recurring or non-operational items in 2006 included costs associated with severance activity, pension settlement losses, Verizon Center relocation-related costs and merger integration costs. Merger integration costs primarily included costs related to advertising and re-branding initiatives, facility exit costs, severance costs, labor and contractor costs related to information technology integration initiatives and employee retention expenses. Non-recurring or non-operational items in 2005 related to the gain on the sale of our Hawaii wireline operations, the net gain on the sale of a New York City office building, changes to management retirement benefit plans, severance costs and Verizon Center relocation-related costs.

Domestic Wireless

Our Domestic Wireless segment provides wireless voice and data services, other value-added services and equipment sales across the United States. This segment primarily represents the operations of the Verizon Wireless joint venture with Vodafone. Verizon owns a 55% interest in the joint venture and Vodafone owns the remaining 45%. All financial results included in the tables below reflect the consolidated results of Verizon Wireless.

Operating Revenues

Years Ended December 31,	2007	2006	(dollars in millions) 2005
Service revenues	**$ 38,016**	$ 32,796	$ 28,131
Equipment and other	**5,866**	5,247	4,170
Total Domestic Wireless Operating Revenue	**$ 43,882**	$ 38,043	$ 32,301

Domestic Wireless's total operating revenues of $43,882 million were $5,839 million, or 15.3% higher in 2007 compared to 2006. Service revenues of $38,016 million were $5,220 million, or 15.9% higher than 2006. The service revenue increase was primarily due to an 11.3% increase in customers as of December 31, 2007 compared to December 31, 2006, and increased average revenue per customer. Equipment and other revenue increased $619 million, or 11.8% in 2007 compared to 2006, principally as a result of increases in the number of customers upgrading their wireless devices. Other revenue also increased due to increases in cost recovery surcharges and regulatory fees.

Total customers as of December 31, 2007 were 65.7 million, of which 97% were retail customers, compared to 59.1 million, of which 96% were retail customers at December 31, 2006. Retail (non-wholesale) customers are customers who are directly served and managed by Verizon Wireless and who buy its branded services. Our Domestic Wireless customer base as of December 31, 2007 was 93% retail postpaid compared to 92.6% retail postpaid at December 31, 2006. Total average monthly churn was 1.21% in 2007 compared to 1.17% in 2006.

Our Domestic Wireless segment ended 2007 with 63.7 million retail customers, an increase of 6.9 million net new retail customers or 12.2%, compared to December 31, 2006. Average monthly retail postpaid churn, the rate at which retail postpaid customers disconnect service, was 0.91% in 2007, unchanged compared to 2006.

Average retail service revenue per customer per month increased 2.2% to $51.57 in 2007 compared to 2006. Average retail data service revenue per customer per month increased 43.9% in 2007 compared to 2006 driven by increased use of our messaging service, *VZAccess*, and other data services. Retail data revenues were $7,309 million and accounted for 19.7% of retail service revenue in 2007, compared to $4,445 million and 14.0% of retail service revenue in 2006.

Domestic Wireless's total operating revenues of $38,043 million in 2006 increased $5,742 million, or 17.8% compared to 2005. Service revenues of $32,796 million were $4,665 million, or 16.6% higher than 2005. The service revenue increase was primarily due to a 15.0% increase in customers as of December 31, 2006 compared to December 31, 2005, and increased average revenue per customer. Equipment and other revenue increased $1,077 million, or 25.8% in 2006 compared to 2005 principally as a result of increases in the number and price of wireless devices sold. Other revenue also increased due to increases in regulatory fees, primarily the universal service fund and cost recovery surcharges.

Average retail service revenue per customer per month increased 0.7% to $50.44 in 2006 compared to 2005. Average retail data service revenue per customer per month increased 71.3% in 2006, compared to 2005, driven by increased use of our messaging, *VZAccess* and other data services. However, Domestic Wireless experienced an increase in the proportion of customers on its Family Share price plans, which put downward pressure on average service revenue per customer during 2006. Retail data revenues were $4,445 million and accounted for 14.0% of retail service revenue in 2006, compared to $2,232 million and 8.2% of retail service revenue in 2005.

Operating Expenses

Years Ended December 31,	2007	2006	2005
			(dollars in millions)
Cost of services and sales	**$ 13,456**	$ 11,491	$ 9,393
Selling, general and administrative expense	**13,477**	12,039	10,768
Depreciation and amortization expense	**5,154**	4,913	4,760
	$ 32,087	$ 28,443	$ 24,921

Cost of Services and Sales

Cost of services and sales, which are costs to operate the wireless network as well as the cost of roaming, long distance and equipment sales, increased by $1,965 million, or 17.1% in 2007 compared to 2006. Cost of services increased due to higher wireless network costs in 2007 caused by increased network usage, partially offset by lower rates for long distance, roaming and local interconnection. Cost of equipment sales grew by 20.2% in 2007 compared to 2006. The increase was primarily attributed to an increase in equipment upgrades, together with an increase in cost per unit as a result of increased sales of higher cost advanced wireless devices.

Cost of services and sales increased by $2,098 million, or 22.3% in 2006 compared to 2005. This increase was primarily due to higher wireless network costs in 2006 caused by increased network usage relating to both voice and data services and an increase in cost of equipment sales driven by an increase in wireless devices sold, resulting from an increase in equipment upgrades, together with an increase in cost per unit in 2006.

Selling, General and Administrative Expense

Selling, general and administrative expense increased by $1,438 million, or 11.9% in 2007 compared to 2006. This increase was primarily due to an increase in salary and benefits expense of $641 million, resulting from an increase in employees in the sales and customer care areas, and higher per employee salary and benefit costs. Sales commissions expense in both our direct and indirect channels increased by $147 million in 2007 compared to 2006, primarily as a result of an increase in customer renewals and equipment upgrades. Advertising and promotion expense increased $144 million in 2007, compared to 2006. Also contributing to the increase were higher costs associated with regulatory fees, which increased by $127 million in 2007.

Selling, general and administrative expense increased by $1,271 million, or 11.8% in 2006 compared to 2005. This increase was primarily due to an increase in salary and benefits expense, as well as advertising and promotion, and regulatory fee increases, compared to 2005.

Depreciation and Amortization Expense

Depreciation and amortization expense increased by $241 million, or 4.9% in 2007 compared to 2006 and increased by $153 million, or 3.2% in 2006 compared to 2005. These increases were primarily due to an increase in depreciable assets. Partially offsetting this increase in 2007 was lower amortization expense resulting from customer lists becoming fully amortized during 2006.

Segment Income

Years Ended December 31,	2007	2006	2005
			(dollars in millions)
Segment Income	**$ 3,794**	$ 2,976	$ 2,219

Segment income increased by $818 million, or 27.5% in 2007 compared to 2006 and increased by $757 million, or 34.1% in 2006 compared to 2005, primarily as a result of the after-tax impact of operating revenues and operating expenses described above, partially offset by higher minority interest expense. Segment income in 2006 excludes $42 million after-tax due to the adoption of SFAS No. 123(R).

Increases in minority interest expense in 2007 and 2006 were due to the increased income of the wireless joint venture and the significant minority interest attributable to Vodafone.

Other Items

Merger Integration Costs

In 2007 and 2006 , we recorded pretax charges of $178 million ($112 million after-tax, or $.04 per diluted share) and $232 million ($146 million after-tax, or $.05 per diluted share), respectively, primarily associated with the MCI acquisition in 2006 that were comprised of advertising and other costs related to re-branding initiatives, facility exit costs and systems integration activities.

Tax Matters

In December 2007, Verizon received a net distribution from Vodafone Omnitel of approximately $2.1 billion and we anticipate that we may receive an additional distribution from Vodafone Omnitel within the next twelve months. As a result, we recorded $610 million ($.21 per diluted share) of foreign and domestic taxes and expenses specifically relating to our share of Vodafone Omnitel's distributable earnings.

During 2005, we recorded tax benefits of $336 million ($.12 per diluted share) in connection with the utilization of prior year loss carry forwards. As a result of the capital gain realized in 2005 in connection with the sale of our Hawaii businesses, we recorded a tax benefit of $242 million related to the capital losses incurred in previous years.

Also during 2005, we recorded a net tax provision of $206 million ($.07 per diluted share) related to the repatriation of foreign earnings under the provisions of the American Jobs Creation Act of 2004, for two of our foreign investments.

Facility and Employee-Related Items

During the fourth quarter of 2007, we recorded a charge of $772 million ($477 million after-tax, or $.16 per diluted share) primarily in connection with workforce reductions of 9,000 employees and related charges, 4,000 of whom were terminated in the fourth quarter of 2007 with the remaining reductions expected to occur throughout 2008. In addition, we adjusted our actuarial assumptions for severance to align with future expectations.

During 2006, we recorded net pretax severance, pension and benefits charges of $425 million ($258 million after-tax, or $.09 per diluted share). These charges included net pretax pension settlement losses of $56 million ($26 million after-tax, or $.01 per diluted share) related to employees that received lump-sum distributions primarily resulting from our separation plans. These charges were recorded in accordance with SFAS No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination* (SFAS No. 88), which requires that settlement losses be recorded once prescribed payment thresholds have been reached. Also included are pretax charges of $369 million ($228 million after-tax, or $.08 per diluted share), for employee severance and severance-related costs in connection with the involuntary separation of approximately 4,100 employees. In addition, during 2005 we recorded a charge of $59 million ($36 million after-tax, or $.01 per diluted share) associated with employee severance costs and severance-related activities in connection with the voluntary separation program for surplus union-represented employees.

During 2006, we recorded pretax charges of $184 million ($118 million after-tax, or $.04 per diluted share) in connection with the relocation of employees and business operations to Verizon Center in Basking Ridge, New Jersey. During 2005, we recorded a net pretax gain of $18 million ($8 million after-tax) in connection with the relocation, including a pretax gain of $120 million ($72 million after-tax, or $.03 per diluted share) related to the sale of a New York City office building, partially offset by a pretax charge of $102 million ($64 million after-tax, or $.02 per diluted share), primarily associated with relocation, employee severance and related activities.

During 2005, we reported a net pretax charge of $98 million ($59 million after-tax, or $.02 per diluted share) related to the restructuring of the Verizon management retirement benefit plans. This pretax charge was recorded in accordance with SFAS No. 88, and SFAS No. 106, *Employers' Accounting for the Postretirement Benefits Other Than Pensions* (SFAS No. 106) and includes the unamortized cost of prior pension enhancements of $430 million offset partially by a pretax curtailment gain of $332 million related to retiree medical benefits. In connection with this restructuring, management employees: no longer earn pension benefits or earn service towards the company retiree medical subsidy after June, 2006; received an 18-month enhancement of the value of their pension and retiree medical subsidy; and receive a higher savings plan matching contribution.

Other

In 2006, we recorded pretax charges of $26 million ($16 million after-tax, or $.01 per diluted share) resulting from the extinguishment of debt assumed in connection with the completion of the MCI merger.

During 2005, we recorded pretax charges of $139 million ($133 million after-tax, or $.05 per diluted share) including a pretax impairment charge of $125 million ($125 million after-tax, or $.04 per diluted share) pertaining to aircraft leased to airlines involved in bankruptcy proceedings and a pretax charge of $14 million ($8 million after-tax, or less than $.01 per diluted share) in connection with the early extinguishment of debt.

Selected Financial Condition

Years Ended December 31,	2007	2006	(dollars in millions) 2005
Cash Flows Provided By (Used In)			
Operating Activities:			
Continuing operations	**$ 26,309**	$ 23,030	$ 20,444
Discontinued operations	**(570)**	1,076	1,581
Investing Activities:			
Continuing operations	**(16,865)**	(17,422)	(18,136)
Discontinued operations	**757**	1,806	(356)
Financing activities:			
Continuing operations	**(11,697)**	(5,752)	(4,958)
Discontinued operations	**--**	(279)	(76)
Increase (Decrease) In Cash and Cash Equivalents	**$ (2,066)**	$ 2,459	$ (1,501)

We use the net cash generated from our operations to fund network expansion and modernization, repay external financing, pay dividends and invest in new businesses. Additional external financing is obtained when necessary. While our current liabilities typically exceed current assets, our sources of funds, primarily from operations and, to the extent necessary, from readily available external financing arrangements, are sufficient to meet ongoing operating and investing requirements. We expect that capital spending requirements will continue to be financed primarily through internally generated funds. Additional debt or equity financing may be needed to fund additional development activities or to maintain our capital structure to ensure our financial flexibility.

Cash Flows Provided By Operating Activities

Our primary source of funds continues to be cash generated from operations. In total, cash from operating activities in 2007 increased compared to the similar period of 2006. The increase was due to higher cash flow from continuing operations, partially offset by decreased cash flow from discontinued operations. The increase in cash flow from operating activities – continuing operations in 2007 compared to 2006 was primarily due to the distributions from Vodafone Omnitel and CANTV, increased operating cash flows from Domestic Wireless and lower interest payments on outstanding debt, partially offset by changes in working capital.

The decrease in cash flow from operating activities—discontinued operations in 2007 compared to 2006 was primarily due to income taxes paid in 2007 related to the fourth quarter 2006 disposition of Verizon Dominicana, as well as the disposal of the discontinued operations in the fourth quarter of 2006.

In 2006, the increase in cash from operating activities compared to 2005 was primarily due to higher earnings at Domestic Wireless, which included higher minority interest earnings, and lower dividends paid to minority partners. Total minority interest earnings, net of dividends paid to minority interest partners, was $3.2 billion in 2006 compared to $1.7 billion in 2005. In addition, higher operating cash flow in 2006 compared to 2005 was due to lower cash taxes paid in 2006, resulting from 2005 tax payments related to foreign operations and investments sold during the fourth quarter of 2004. Partially offsetting these increases were significant 2005 repatriations of foreign earnings of unconsolidated businesses.

Operating cash flows from discontinued operations decreased $505 million to $1,076 million in 2006 from $1,581 million in 2005 due to the completion of our domestic print and Internet yellow pages directories business spin-off on November 17, 2006 and the close of the sale of Verizon Dominicana on December 1, 2006, partially offset by the operating activities of the remaining assets held for sale.

Cash Flows Used In Investing Activities

Capital expenditures continue to be our primary use of cash flows from operations, as they facilitate the introduction of new products and services, enhance responsiveness to competitive challenges and increase the operating efficiency and productivity of our networks. Including capitalized software, we invested $10,956 million in our Wireline business in 2007, compared to $10,259 million and $8,267 million in 2006 and 2005, respectively. We also invested $6,503 million in our Domestic Wireless business in 2007, compared to $6,618 million and $6,484 million in 2006 and 2005, respectively. The increase in capital spending at Wireline is mainly driven by increased spending in high growth areas such as fiber optic to the premises. Capital spending at Domestic Wireless represents our continuing effort to invest in this high growth business.

In 2008, capital expenditures, including capitalized software, are expected to be lower than 2007 expenditures.

In 2007, we paid $417 million, net of cash received, to acquire a security-services firm and $180 million to purchase several wireless properties and licenses. In 2006, we invested $1,422 million in acquisitions and investments in businesses, including $2,809 million to acquire thirteen 20 MHz licenses in connection with the FCC Advanced Wireless Services auction and $57 million to acquire other wireless properties. This was offset by MCI's cash balances of $2,361 million we acquired at the date of the merger. In 2005, we invested $4,684 million in acquisitions and investments in businesses, including $3,003 million to acquire NextWave Telecom Inc. (NextWave) personal communications services licenses, $641 million to acquire 63 broadband wireless licenses in connection with FCC auction 58, $419 million to purchase Qwest Wireless, LLC's spectrum licenses and wireless network assets in several existing and new markets, $230 million to purchase spectrum from MetroPCS, Inc. and $297 million for other wireless properties and licenses. In 2005, we received cash proceeds of $1,326 million in connection with the sale of Verizon's wireline operations in Hawaii.

Our short-term investments principally include cash equivalents held in trust accounts for payment of employee benefits. In 2007, 2006 and 2005, we invested $1,693 million, $1,915 million and $1,955 million, respectively, in short-term investments, primarily to pre-fund active employees' health and welfare benefits. Proceeds from the sales of all short-term investments, principally for the payment of these benefits, were $1,862 million, $2,205 million and $1,609 million in the years 2007, 2006 and 2005, respectively.

Other, net investing activities during 2007 primarily include cash proceeds of approximately $800 million from property sales and sales of select non-strategic assets, as well as $476 million from the disposition of our interest in CANTV. Other, net investing activities for 2006 primarily include cash proceeds of $283 million from property sales. Other, net investing activities for 2005 primarily include a net investment of $913 million for the purchase of 43.4 million shares of MCI common stock from eight entities affiliated with Carlos Slim Helú, offset by cash proceeds of $713 million from property sales, including a New York City office building, and $349 million of repatriated proceeds from the sales of European investments in prior years.

In 2007, investing activities of discontinued operations primarily included gross proceeds of approximately $980 million in connection with the sale of TELPRI. In 2006, investing activities of discontinued operations included net pretax cash proceeds of $2,042 million in connection with the sale of Verizon Dominicana. In 2005, investing activities of discontinued operations primarily related to capital expenditures related to discontinued operations.

Cash Flows Used In Financing Activities

In 2007, our total debt was reduced by $5.2 billion, due to the repayment of approximately $1.7 billion of Wireline debt, including the early repayment of previously guaranteed $300 million 7% debentures issued by Verizon South Inc. and $480 million 7% debentures issued by Verizon New England Inc., as well as approximately $1.6 billion of other borrowings. Also, we redeemed $1,580 million principal of our outstanding floating rate notes, which were called on January 8, 2007, and the $500 million 7.90% debentures issued by GTE Corporation. Partially offsetting the reduction in total debt were cash proceeds of $3,402 million in connection with fixed and floating rate debt issued during 2007.

Our total debt was reduced by $1,896 million in 2006. We repaid $6,838 million of Wireline debt, including premiums associated with the retirement of $5,665 million of aggregate principal amount of long-term debt assumed in connection with the MCI merger. The Wireline repayments also included the early retirement/prepayment of $697 million of long-term debt and $155 million of other long-term debt at maturity. We repaid approximately $2.5 billion of Domestic Wireless 5.375% fixed rate notes that matured on December 15, 2006. Also, we redeemed the $1,375 million accreted principal of our remaining zero-coupon convertible notes and retired $482 million of other corporate long-term debt at maturity. These repayments were partially offset by our issuance of long-term debt with a total aggregate principal amount of $4 billion, resulting in cash proceeds of $3,958 million, net of discounts, issuance costs and the receipt of cash proceeds related to hedges on the interest rate of an anticipated financing. In connection with the spin-off of our domestic print and Internet yellow pages directories business, we received net cash proceeds of approximately $2 billion and retired debt in the aggregate principal amount of approximately $7 billion.

Cash of $240 million was used to reduce our total debt in 2005. We repaid $1,533 million of Domestic Wireless, $1,183 million of Wireline and $1,109 million of Verizon corporate long-term debt. The Wireline debt repayment included the early retirement of $350 million of long-term debt and $806 million of other long-term debt at maturity. This decrease was largely offset by the issuance by Verizon corporate of long-term debt with a total principal amount of $1,500 million, resulting in total cash proceeds of $1,478 million, net of discounts and costs, and an increase in our short-term borrowings of $2,098 million.

Our ratio of debt to debt combined with shareowners' equity was 38.1% at December 31, 2007 compared to 42.8% at December 31, 2006.

As of December 31, 2007, we had no bank borrowings outstanding. We also had approximately $6.2 billion of unused bank lines of credit (including a $6 billion three-year committed facility that expires in September 2009 and various other facilities totaling approximately $400 million) and we had shelf registrations for the issuance of up to $8 billion of unsecured debt securities. The debt securities of Verizon and our telephone subsidiaries continue to be accorded high ratings by primary rating agencies. In July 2007, S&P revised its outlook to stable from negative and affirmed its long term rating of A. Other long-term ratings of Verizon are: Moody's A3 with stable outlook; and Fitch A+ with stable outlook. The short-term ratings of Verizon are: Moody's P-2; S&P A-1; and Fitch F1.

We and our consolidated subsidiaries are in compliance with all of our debt covenants.

In February 2008, we issued $4,000 million of fixed rate notes with varying maturities that resulted in cash proceeds of $3,953 million, net of discounts and issuance costs.

As in prior years, dividend payments were a significant use of cash flows from operations. We continuously evaluate the level of our dividend payments by considering such factors as long-term growth opportunities, internal cash requirements and the expectations of our shareowners. During the first half of 2007, Verizon announced quarterly cash dividends of $.405 per share. During the third quarter of 2007, we increased our dividend payments 6.2% to $.43 per share from $.405 per share. In the third and fourth quarters of 2007, Verizon declared a quarterly cash dividend of $.43 per share. In 2006 and 2005, Verizon declared quarterly cash dividends of $.405 per share.

Common stock has been used from time to time to satisfy some of the funding requirements of employee and shareowner plans. On March 1, 2007, the Board of Directors determined that no additional common shares could be purchased under previously authorized share repurchase programs and gave authorization to repurchase up to 100 million common shares terminating no later than the close of business on February 28, 2010. During 2007, we repurchased $2,843 million of our common stock. We plan to continue our share buyback program in 2008. Additionally, we received $1,274 million of cash proceeds from the sale of common stock, primarily due to the exercise of stock options. On February 7, 2008, the Board of Directors replaced this share buy back program with a new program for the repurchase of up to 100 million common shares terminating no later than the close of business on February 28, 2011. The Board also determined that no additional shares were to be purchased under the prior program.

Increase (Decrease) In Cash and Cash Equivalents

Our cash and cash equivalents at December 31, 2007 totaled $1,153 million, a $2,066 million decrease compared to cash and cash equivalents at December 31, 2006. Our cash and cash equivalents at December 31, 2006 totaled $3,219 million, a $2,459 million increase compared to cash and cash equivalents at December 31, 2005 of $760 million.

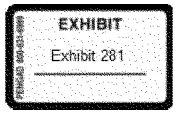
Employee Benefit Plan Funded Status and Contributions

We operate numerous qualified and nonqualified pension plans and other postretirement benefit plans. These plans primarily relate to our domestic business units. The majority of Verizon's pension plans are adequately funded. We contributed $612 million, $451 million and $593 million in 2007, 2006 and 2005, respectively, to our qualified pension plans. We also contributed $125 million, $117 million and $105 million to our nonqualified pension plans in 2007, 2006 and 2005, respectively.

Based on the funded status of the plans at December 31, 2007, we anticipate qualified pension trust contributions of $350 million in 2008. Our estimate of required qualified pension trust contributions for 2009 is approximately $300 million. Nonqualified pension contributions are estimated to be approximately $130 million for both 2008 and 2009, respectively.

Contributions to our other postretirement benefit plans generally relate to payments for benefits on an as-incurred basis since the other postretirement benefit plans do not have funding requirements similar to the pension plans. We contributed $1,048 million, $1,099 million and $1,040 million to our other postretirement benefit plans in 2007, 2006 and 2005, respectively. Contributions to our other postretirement benefit plans are estimated to be approximately $1,580 million in 2008 and $1,770 million in 2009.

Refer to Note 1 in the consolidated financial statements for a discussion of the adoption of SFAS No. 158, which was effective December 31, 2006.



Leasing Arrangements

We are the lessor in leveraged and direct financing lease agreements for commercial aircraft and power generating facilities, which comprise the majority of the portfolio along with telecommunications equipment, real estate property and other equipment. These leases have remaining terms up to 48 years as of December 31, 2007. Minimum lease payments receivable represent unpaid rentals, less principal and interest on third-party nonrecourse debt relating to leveraged lease transactions. Since we have no general liability for this debt, which holds a senior security interest in the leased equipment and rentals, the related principal and interest have been offset against the minimum lease payments receivable in accordance with generally accepted accounting principles. All recourse debt is reflected in our consolidated balance sheets. See "Other Items" for a discussion of lease impairment charges.

Off Balance Sheet Arrangements and Contractual Obligations

Contractual Obligations and Commercial Commitments

The following table provides a summary of our contractual obligations and commercial commitments at December 31, 2007. Additional detail about these items is included in the notes to the consolidated financial statements.

(dollars in millions)

	Payments Due By Period				
Contractual Obligations	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Long-term debt (see Note 11)	$ 30,455	$ 2,518	$ 5,781	$ 6,891	$ 15,265
Capital lease obligations (see Note 10)	312	46	93	71	102
Total long-term debt, including current maturities	30,767	2,564	5,874	6,962	15,367
Interest on long-term debt (see Note 11)	21,116	1,897	3,350	2,622	13,247
Operating leases (see Note 10)	7,001	1,489	2,292	1,253	1,967
Purchase obligations (see Note 20)	844	613	188	33	10
Income Tax Audit Settlements* (see Note 16)	233	233	–	–	–
Other long-term liabilities (see Note 15)	4,190	2,020	2,170	–	–
Total contractual obligations	$ 64,151	$ 8,816	$ 13,874	$ 10,870	$ 30,591

*The $233 million of income tax audit settlements include gross unrecognized tax benefits of $148 million as determined under Financial Accounting Standards Board (FASB) Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48) and related gross interest of $85 million. We are not able to make a reliable estimate of when the balance of $2,735 million of unrecognized tax benefits and related interest and penalties will be settled with the respective taxing authorities until issues or examinations are further developed (see Note 16).

Guarantees

In connection with the execution of agreements for the sale of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as financial losses.

As of December 31, 2007, letters of credit totaling $225 million were executed in the normal course of business, which support several financing arrangements and payment obligations to third parties.

We are exposed to various types of market risk in the normal course of business, including the impact of interest rate changes, foreign currency exchange rate fluctuations, changes in equity investment and commodity prices and changes in corporate tax rates. We employ risk management strategies using a variety of derivatives, including interest rate swap agreements, interest rate locks, foreign currency forwards and commodity swaps. We do not hold derivatives for trading purposes.

It is our general policy to enter into interest rate, foreign currency and other derivative transactions only to the extent necessary to achieve our desired objectives in limiting our exposure to the various market risks. Our objectives include maintaining a mix of fixed and variable rate debt to lower borrowing costs within reasonable risk parameters and to protect against earnings and cash flow volatility resulting from changes in market conditions. We do not hedge our market risk exposure in a manner that would completely eliminate the effect of changes in interest rates, commodity prices and foreign exchange rates on our earnings. We do not expect that our net income, liquidity and cash flows will be materially affected by these risk management strategies.

Interest Rate Risk

The table that follows summarizes the fair values of our long-term debt and interest rate derivatives as of December 31, 2007 and 2006. The table also provides a sensitivity analysis of the estimated fair values of these financial instruments assuming 100-basis-point upward and downward shifts in the yield curve. Our sensitivity analysis does not include the fair values of our commercial paper and bank loans, if any, because they are not significantly affected by changes in market interest rates.

(dollars in millions)

At December 31, 2007	Fair Value	Fair Value assuming +100 basis point shift	Fair Value assuming -100 basis point shift
Long-term debt and interest rate derivatives	**$ 31,930**	**$ 30,154**	**$ 33,957**
At December 31, 2006			
Long-term debt and interest rate derivatives	$ 33,569	$ 31,724	$ 35,607

Foreign Currency Translation

The functional currency for our foreign operations is primarily the local currency. The translation of income statement and balance sheet amounts of our foreign operations into U.S. dollars are recorded as cumulative translation adjustments, which are included in Accumulated Other Comprehensive Loss in our consolidated balance sheets. The translation gains and losses of foreign currency transactions and balances are recorded in the consolidated statements of income in Other Income and (Expense), Net and Income from Discontinued Operations, Net of Tax. At December 31, 2007, our primary translation exposure was to the British Pound and the Euro.

During 2007, we entered into foreign currency forward contracts to hedge a portion of our net investment in Vodafone Omnitel. Changes in fair value of these contracts due to Euro exchange rate fluctuations are recognized in Accumulated Other Comprehensive Loss and partially offset the impact of foreign currency changes on the value of our net investment. As of December 31, 2007, Accumulated Other Comprehensive Loss includes unrecognized losses of approximately $57 million ($37 million after-tax) related to these hedge contracts, which along with the unrealized foreign currency translation balance on the investment hedged, remain in Accumulated Other Comprehensive Loss until the investment is sold. We have not hedged our accounting translation exposure to foreign currency fluctuations relative to the carrying value of our other investments.

Critical Accounting Estimates

A summary of the critical accounting estimates used in preparing our financial statements are as follows:

- Verizon's plant, property and equipment balance represents a significant component of our consolidated assets. Depreciation expense on Verizon's local telephone operations is principally based on the composite group remaining life method and straight-line composite rates, which provides for the recognition of the cost of the remaining net investment in telephone plant, less anticipated net salvage value, over the remaining asset lives. We depreciate other plant, property and equipment generally on a straight-line basis over the estimated useful life of the assets. Changes in the remaining useful lives of assets as a result of technological change or other changes in circumstances, including competitive factors in the markets where we operate, can have a significant impact on asset balances and depreciation expense.

- We maintain benefit plans for most of our employees, including pension and other postretirement benefit plans. In the aggregate, the fair value of pension plan assets exceeds benefit obligations, which contributes to pension plan income. Other postretirement benefit plans have larger benefit obligations than plan assets, resulting in expense. Significant benefit plan assumptions, including the discount rate used, the long-term rate of return on plan assets and health care trend rates are periodically updated and impact the amount of benefit plan income, expense, assets and obligations (see "Consolidated Results of Operations – Consolidated Operating Expenses – Pension and Other Postretirement Benefits"). A sensitivity analysis of the impact of changes in these assumptions on the benefit obligations and expense (income) recorded as of December 31, 2007 and for the year then ended pertaining to Verizon's pension and postretirement benefit plans is provided in the table below.

		(dollars in millions)	
	Percentage point change	Benefit obligation increase (decrease) at December 31, 2007	Expense increase (decrease) for the year ended December 31, 2007
Pension plans discount rate	+ 0.50	$ (1,768)	$ (64)
	- 0.50	1,886	109
Long-term rate of return on pension plan assets	+1.00	–	(374)
	- 1.00	–	374
Postretirement plans discount rate	+0.50	(1,442)	(117)
	- 0.50	1,579	118
Long-term rate of return on postretirement plan assets	+1.00	–	(37)
	- 1.00	–	37
Health care trend rates	+1.00	3,038	489
	- 1.00	(2,512)	(378)

- Our current and deferred income taxes, and associated valuation allowances, are impacted by events and transactions arising in the normal course of business as well as in connection with the adoption of new accounting standards, acquisitions of businesses and non-recurring items. Assessment of the appropriate amount and classification of income taxes is dependent on several factors, including estimates of the timing and realization of deferred income tax assets and the timing of income tax payments. Actual collections and payments may materially differ from these estimates as a result of changes in tax laws as well as unanticipated future transactions impacting related income tax balances. We account for tax benefits taken or expected to be taken in our tax returns in accordance with FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), which requires the use of a two-step approach for recognizing and measuring tax benefits taken or expected to be taken in a tax return and disclosures regarding uncertainties in income tax positions.

- Goodwill and other intangible assets are a significant component of our consolidated assets. Wireline goodwill of $4,900 million represents the largest component of our goodwill and, as required by SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142), is periodically evaluated for impairment. The evaluation of Wireline goodwill for impairment is primarily based on a discounted cash flow model that includes estimates of future cash flows. There is inherent subjectivity involved in estimating future cash flows, which can have a material impact on the amount of any potential impairment. Wireless licenses of $50,796 million represent the largest component of our intangible assets. Our wireless licenses are indefinite-lived intangible assets, and as required by SFAS No. 142, are not amortized but are periodically evaluated for impairment. Any impairment loss would be determined by comparing the aggregated fair value of the wireless licenses with the aggregated carrying value. The direct value approach is used to determine fair value by estimating future cash flows. There is inherent subjectivity involved in estimating future cash flows, which can have a material impact on the amount of any impairment.

Recent Accounting Pronouncements

Business Combinations

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations* (SFAS No. 141(R)), to replace SFAS No. 141, *Business Combinations* . SFAS No. 141(R) requires use of the acquisition method of accounting, defines the acquirer, establishes the acquisition date and broadens the scope to all transactions and other events in which one entity obtains control over one or more other businesses. This statement is effective for business combinations or transactions entered into for fiscal years beginning on or after December 15, 2008. We are still evaluating the impact of SFAS No. 141(R), however, the adoption of this statement is not expected to have a material impact on our financial position or results of operations.

Noncontrolling Interests in Consolidated Financial Statements

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51* , (SFAS No. 160). SFAS No. 160 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the retained interest and gain or loss when a subsidiary is deconsolidated. This statement is effective for financial statements issued for fiscal years beginning on or after December 15, 2008. Upon the initial adoption of this statement we will change the classification and presentation of Noncontrolling Interest in our financial statements, which we currently refer to as minority interest. We are still evaluating the impact SFAS No. 160 will have, but we do not expect a material impact on our financial position or results of operations.

Fair Value Measurements

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of SFAS 115* (SFAS No. 159), which permits but does not require us to measure financial instruments and certain other items at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. As we will not elect to fair value any of our financial instruments under the provisions of SFAS No. 159, the adoption of this statement effective January 1, 2008 will not have an impact on our financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurement* (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value in GAAP and establishes a hierarchy that categorizes and prioritizes the sources to be used to estimate fair value. SFAS No. 157 also expands financial statement disclosures about fair value measurements. On February 12, 2008, the FASB issued FASB Staff Position (FSP) 157-2 which delays the effective date of SFAS No. 157 for one year, for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). SFAS No. 157 and FSP 157-2 are effective for financial statements issued for fiscal years beginning after November 15, 2007. We will elect a partial deferral of SFAS No. 157 under the provisions of FSP 157-2 related to the measurement of fair value used when evaluating goodwill, other intangible assets, wireless licenses and other long-lived assets for impairment and valuing asset retirement obligations and liabilities for exit or disposal activities. The impact of partially adopting SFAS No. 157 effective January 1, 2008 will not be material to our financial statements.

Refer to Note 1 in the consolidated financial statements for a discussion of the accounting pronouncements adopted during 2007.

Other Factors That May Affect Future Results

Recent Developments

Rural Cellular Corporation

In late July 2007, Verizon Wireless announced that it had entered into an agreement to acquire Rural Cellular Corporation (Rural Cellular), for $45 per share in cash (or approximately $757 million). As a result of the acquisition, Verizon Wireless will assume Rural Cellular's outstanding debt. The total value of the transaction is approximately $2.7 billion. Rural Cellular has more than 700,000 customers in markets adjacent to Verizon Wireless's existing customer service areas. Rural Cellular's networks are located in the states of Maine, Vermont, New Hampshire, New York, Massachusetts, Alabama, Mississippi, Minnesota, North Dakota, South Dakota, Wisconsin, Kansas, Idaho, Washington, and Oregon. Rural Cellular's shareholders approved the transaction on October 4, 2007. The acquisition, which is subject to regulatory approvals, is expected to close in the first half of 2008.

In a related transaction, on December 3, 2007, Verizon Wireless signed a definitive exchange agreement with AT&T. Under the terms of the agreement, Verizon Wireless will receive cellular operating markets in Madison and Mason, KY, and 10MHz PCS licenses in Las Vegas, NV; Buffalo, NY; Sunbury-Shamokin and Erie, PA; and Youngstown, OH. Verizon Wireless will also receive minority interests held by AT&T in three entities in which Verizon Wireless also holds an interest plus a cash payment. In exchange, Verizon Wireless will transfer to AT&T six cellular operating markets in Burlington, Franklin and the northern portion of Addison, VT; Franklin, NY; and Okanogan and Ferry, WA; and a cellular license for the Kentucky-6 market. The operati is exchanging are among those it is to acquire from Rural Cellular. The exchange with AT&T is subject to regulat to close in the first half of 2008.

EXHIBIT
Exhibit 281

Telephone Access Lines Spin-off

On January 16, 2007, we announced a definitive agreement with FairPoint that will result in Verizon establishing a separate entity for its local exchange and related business assets in Maine, New Hampshire and Vermont, spinning off that new entity into a newly formed company, known as Northern New England Spinco Inc. (Spinco), to Verizon's shareowners, and immediately merging it with and into FairPoint. These local exchange and business assets are included in Verizon's continuing operations. It is anticipated that as long as all conditions are satisfied and assuming completion of the related financing transactions, both the spin-off of Spinco to Verizon shareowners and the merger of Spinco with FairPoint will occur on March 31, 2008. Verizon's Board of Directors established a record date of March 7, 2008, and a closing date of March 31, 2008, for the proposed spin-off of shares of Spinco to Verizon shareowners.

During 2007, we recorded pretax charges of $84 million ($80 million after-tax, or $.03 per diluted share) for costs incurred related to certain network and work center re-arrangements, the isolation and extraction of related business information, and other activities to separate the wireline facilities and operations in Maine, New Hampshire and Vermont from Verizon at the closing of the transaction, as well as professional advisory and legal fees in connection with this transaction.

Upon the closing of the transaction, Verizon shareowners will own approximately 60 percent of the new company, and FairPoint shareowners will own approximately 40 percent. Verizon Communications will not receive any shares in FairPoint as a result of the transaction. In connection with the merger, Verizon shareowners will receive one share of FairPoint stock for approximately every 53 shares of Verizon stock held as of the record date. The proposal relating to the merger was approved by the FairPoint shareowners in August 2007. Both the spin-off and merger are expected to qualify as tax-free transactions, except to the extent that cash is paid to Verizon shareowners in lieu of fractional shares.

Based upon the number of shares (as adjusted) and price of FairPoint common stock (NYSE: FRP) on the date of the announcement of the merger, the estimated total value to be received by Verizon and its shareowners in exchange for these operations was approximately $2,715 million. This consisted of (a) approximately $1,015 million of FairPoint common stock that was to be received by Verizon shareowners in the merger, and (b) $1,700 million in value that was to be received by Verizon through a combination of cash distributions to Verizon and debt securities issued to Verizon prior to the spin-off. Verizon currently intends to exchange these newly issued debt securities for certain debt that was previously issued by Verizon, which would have the effect of reducing Verizon's then-outstanding debt. The actual total value to be received by Verizon and its shareowners will be determined in part based on the number of shares (as adjusted) and price of FairPoint common stock on the date of the closing of the merger. This value is now expected to be less than $2,715 million because (a) FairPoint expects to issue approximately 54 million shares of common stock in the merger and the price of FairPoint common stock has declined since the announcement of the merger (the closing price of FairPoint common stock on the last business day prior to the announcement of the merger was $18.54 per share) and (b) in connection with the regulatory approval process, Verizon currently expects to make additional contributions of approximately $320 million to the entity that will merge with FairPoint.

Environmental Matters

During 2003, under a government-approved plan, remediation commenced at the site of a former Sylvania facility in Hicksville, New York that processed nuclear fuel rods in the 1950s and 1960s. Remediation beyond original expectations proved to be necessary and a reassessment of the anticipated remediation costs was conducted. A reassessment of costs related to remediation efforts at several other former facilities was also undertaken. In September 2005, the Army Corps of Engineers (ACE) accepted the Hicksville site into the Formerly Utilized Sites Remedial Action Program. This may result in the ACE performing some or all of the remediation effort for the Hicksville site with a corresponding decrease in costs to Verizon. To the extent that the ACE assumes responsibility for remedial work at the Hicksville site, an adjustment to a reserve previously established for the remediation may be made. Adjustments may also be made based upon actual conditions discovered during the remediation at any of the sites requiring remediation.

New York Recovery Funding

In August 2002, President Bush signed the Supplemental Appropriations bill that included $5.5 billion in New York recovery funding. Of that amount, approximately $750 million was allocated to cover utility restoration and infrastructure rebuilding as a result of the September 11th terrorist attacks on lower Manhattan. These funds will be distributed through the Lower Manhattan Development Corporation following an application and audit process. As of September 2004, we had applied for reimbursement of approximately $266 million under Category One and in 2004 and 2005 we applied for reimbursement of an additional $139 million of Category Two losses. Category One funding relates to Emergency and Temporary Service Response while Category Two funding is for permanent restoration and infrastructure improvement. According to the plan, permanent restoration is reimbursed up to 75% of the loss. On November 3, 2005, we received the results of preliminary audit findings disallowing all but $49.9 million of our $266 million of Category One application. On December 8, 2005, we provided a detailed rebuttal to the preliminary audit findings. We received a copy of the final audit report for Verizon's Category One applications largely confirming the preliminary audit findings and, on January 4, 2007, we filed an appeal. That appeal, as well as our Category Two applications, are pending.

Regulatory and Competitive Trends

Competition and Regulation

Technological, regulatory and market changes have provided Verizon both new opportunities and challenges. These changes have allowed Verizon to offer new types of services in an increasingly competitive market. At the same time, they have allowed other service providers to broaden the scope of their own competitive offerings. Current and potential competitors for network services include other telephone companies, cable companies, wireless service providers, foreign telecommunications providers, satellite providers, electric utilities, Internet service providers, providers of VoIP services, and other companies that offer network services using a variety of technologies. Many of these companies have a strong market presence, brand recognition and existing customer relationships, all of which contribute to intensifying competition and may affect our future revenue growth. Many of our competitors also remain subject to fewer regulatory constraints than Verizon.

We are unable to predict definitively the impact that the ongoing changes in the telecommunications industry will ultimately have on our business, results of operations or financial condition. The financial impact will depend on several factors, including the timing, extent and success of competition in our markets, the timing and outcome of various regulatory proceedings and any appeals, and the timing, extent and success of our pursuit of new opportunities.

FCC Regulation

The FCC has jurisdiction over our interstate telecommunications services and other matters for which the FCC has jurisdiction under the Communications Act of 1934, as amended (Communications Act). The Communications Act generally provides that we may not charge unjust or unreasonable rates, or engage in unreasonable discrimination when we are providing services as a common carrier, and regulates some of the rates, terms and conditions under which we provide certain services. The FCC also has adopted regulations governing various aspects of our business including: (i) use and disclosure of customer proprietary network information; (ii) telemarketing; (iii) assignment of telephone numbers to customers; (iv) provision to law enforcement agencies of the capability to obtain call identifying information and call content information from calls pursuant to lawful process; (v) accessibility of services and equipment to individuals with disabilities if readily achievable; (vi) interconnection with the networks of other carriers; (vii) customers' ability to keep (or "port") their telephone numbers when switching to another carrier; and (viii) availability of back-up power. In addition, we pay various fees to support other FCC programs, such as the universal service program discussed below. Changes to these mandates, or the adoption of additional mandates, could require us to make changes to our operations or otherwise increase our costs of compliance.

Broadband

The FCC has adopted a series of orders that recognize the competitive nature of the broadband market and impose lesser regulatory requirements on broadband services and facilities than apply to narrowband or traditional telephone services. With respect to facilities, the FCC has determined that certain unbundling requirements that apply to narrowband facilities do not apply to broadband facilities such as fiber to the premise loops and packet switches. With respect to services, the FCC has concluded that broadband Internet access services offered by telephone companies and their affiliates qualify as largely deregulated information services. The same order also concluded that telephone companies may offer the underlying broadband transmission services that are used as an input to Internet access services through private carriage arrangements on negotiated commercial terms. The order was upheld on appeal. In addition, a Verizon petition asking the FCC to forbear from applying common carrier regulation to certain broadband services sold primarily to larger business customers when those services are not used for Internet access was deemed granted by operation of law on March 19, 2006 when the FCC did not deny the petition by the statutory deadline. The relief obtained through the forbearance petition has been upheld on appeal, but remains under challenge.

Video

The FCC has a body of rules that apply to cable operators under Title VI of the Communications Act of 1934, and these rules also generally apply to telephone companies that provide cable services over their networks. In addition, companies that provide cable service over a cable system generally must obtain a local cable franchise. On March 5, 2007, the FCC released an order setting forth parameters consistent with Section 621 of the Communications Act of 1934 and other federal law, on the timing and scope of franchise negotiations by local franchising authorities. The FCC found that some prior practices in the local franchise approval process constituted an unreasonable refusal to award a competitive local franchise under the requirements of federal law. This order is the subject of a pending appeal.

Interstate Access Charges and Intercarrier Compensation

The current framework for interstate access rates was established in the Coalition for Affordable Local and Long Distance Services (CALLS) plan which the FCC adopted on May 31, 2000. The CALLS plan has three main components. First, it establishes portable interstate access universal service support of $650 million for the industry that replaces implicit support previously embedded in interstate access charges. Second, the plan simplifies the patchwork of common li[illegible]er line charge (SLC) and provides for de-averaging of the SLC by zones and class of customers. Third, the plan se[illegible]ransition to a set target of $.0055 per minute for switched access services. Once that target rate is reached, local e[illegible]er required to make further annual price cap reductions to

EXHIBIT
Exhibit 281

their switched access prices. As a result of tariff adjustments which became effective in July 2003, virtually all of our switched access lines reached the $.0055 benchmark.

The FCC currently is conducting a broad rulemaking proceeding to consider new rules governing intercarrier compensation including, but not limited to, access charges, compensation for Internet traffic and reciprocal compensation for local traffic. The FCC has sought

comments about intercarrier compensation in general and requested input on a number of specific reform proposals. The FCC also has pending before it issues relating to intercarrier compensation for dial-up Internet-bound traffic. The FCC previously found that this traffic is not subject to reciprocal compensation under Section 251(b)(5) of the Telecommunications Act of 1996. Instead, the FCC established federal rates per minute for this traffic that declined from $.0015 to $.0007 over a three-year period, established caps on the total minutes of this traffic subject to compensation in a state and required incumbent local exchange carriers to offer to both bill and pay reciprocal compensation for local traffic at the same rate as they are required to pay on Internet-bound traffic. The U.S. Court of Appeals for the D.C. Circuit rejected part of the FCC's rationale, but declined to vacate the order while it is on remand. As a result, pending further action by the FCC, the FCC's underlying order remains in effect. The FCC subsequently denied a petition to discontinue the $.0007 rate cap on this traffic, but removed the caps on the total minutes of Internet-bound traffic subject to compensation. That decision has been upheld on appeal. Disputes also remain pending in a number of forums relating to the appropriate compensation for Internet-bound traffic during previous periods under the terms of our interconnection agreements with other carriers.

The FCC also is conducting a rulemaking proceeding to address the regulation of services that use Internet protocol. One of the issues raised in the rulemaking as well as in several petitions currently pending before the FCC addresses whether, and under what circumstances, access charges should apply to voice or other Internet protocol services. The FCC previously has held that one provider's peer-to-peer Internet protocol service that does not use the public switched network is an interstate information service and is not subject to access charges, while a service that utilizes Internet protocol for only one intermediate part of a call's transmission is a telecommunications service that is subject to access charges. Another petition asking the FCC to forbear from applying access charges to voice over Internet protocol services that are terminated on switched local exchange networks was withdrawn by the carrier that filed that petition. The FCC also declared the services offered by one provider of a voice over Internet protocol service to be jurisdictionally interstate. The FCC also stated that its conclusion would apply to other services with similar characteristics. On March 21, 2007, the Eighth Circuit Court of Appeals affirmed the FCC's Order.

The FCC also has adopted rules for special access services that provide for pricing flexibility and ultimately the removal of services from price regulation when prescribed competitive thresholds are met. More than half of special access revenues are now removed from price regulation. The FCC currently has a rulemaking proceeding underway to update the public record concerning its pricing flexibility rules and to determine whether any changes to those rules are warranted.

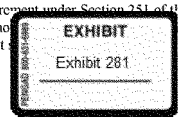
Universal Service

The FCC also has a body of rules implementing the universal service provisions of the Telecommunications Act of 1996, including rules governing support to rural and non-rural high-cost areas, support for low income subscribers and support for schools, libraries and rural health care. The FCC's current rules for support to high-cost areas served by larger "non-rural" local telephone companies were previously remanded by U.S. Court of Appeals for the Tenth Circuit, which had found that the FCC had not adequately justified these rules. The FCC has initiated a rulemaking proceeding in response to the court's remand, but its rules remain in effect pending the results of the rulemaking. It is also considering modifications to the high-cost support system that could include a cap on the amount of support and other limits on what certain eligible carriers may receive. The FCC also has proceedings underway to evaluate possible changes to its current rules for assessing contributions to the universal service fund. As an interim step, in June 2006, the FCC ordered that providers of VoIP services are subject to federal universal service obligations. The FCC also increased the percentage of revenues subject to federal universal service obligations that wireless providers may use as a safe harbor. The substance of these orders was upheld on appeal in June 2007, but the Court did remand some more minor implementation issues back to the FCC. Any further change in the current assessment mechanism could result in a change in the contribution that local telephone companies, wireless carriers or others must make and that would have to be collected from customers.

Unbundling of Network Elements

Under Section 251 of the Telecommunications Act of 1996, incumbent local exchange carriers were required to provide competing carriers with access to components of their network on an unbundled basis, known as UNEs, where certain statutory standards are satisfied. The Telecommunications Act of 1996 also adopted a cost-based pricing standard for these UNEs, which the FCC interpreted as allowing it to impose a pricing standard known as "total element long run incremental cost" or "TELRIC." The FCC's rules defining the unbundled network elements that must be made available at TELRIC prices have been overturned on multiple occasions by the courts. In its most recent order issued in response to these court decisions, the FCC eliminated the requirement to unbundle mass market local switching on a nationwide basis, with the obligation to accept new orders ending as of the effective date of the order (March 11, 2005). The FCC also established a one year transition for existing UNE switching arrangements. For high-capacity transmission facilities, the FCC established criteria for determining whether high-capacity loops, transport or dark fiber transport must be unbundled in individual wire centers, and stated that these standards were only expected to affect a small number of wire centers. The FCC also eliminated the obligation to provide dark fiber loops and found that there is no obligation to provide UNEs exclusively for wireless or long distance service. In any instance where a particular high-capacity facility no longer has to be made available as a UNE, the FCC established a similar one year transition for any existing high-capacity loop or transport UNEs, and an 18 month transition for any existing dark fiber UNEs. This decision has been upheld on appeal.

As noted above, the FCC has concluded that the requirement under Section 251 of the Telecommunications Act of 1996 to provide unbundled network elements at TELRIC prices generally does no dband facilities, such as fiber to the premises loops, the packet-switched capabilities of hybrid loops and packet held that any separate unbundling obligations that may be



imposed by Section 271 of the Telecommunications Act of 1996 do not apply to these same facilities. The decision with respect to Section 271 has been upheld on appeal and a petition for rehearing of that order was denied.

Wireless Services

The FCC regulates the licensing, construction, operation, acquisition and transfer of wireless communications systems, including the systems that Verizon Wireless operates, pursuant to the Communications Act, other legislation, and the FCC's rules. The FCC and Congress continuously consider changes to these laws and rules. Adoption of new laws or rules may raise the cost of providing service or require modification of Verizon Wireless' business plans or operations.

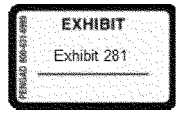
To use the radio frequency spectrum, wireless communications systems must be licensed by the FCC to operate the wireless network and mobile devices in assigned spectrum segments. Verizon Wireless holds FCC licenses to operate in several different radio services, including the cellular radiotelephone service, personal communications service, advanced wireless service, and point-to-point radio service. The technical and service rules, the specific radio frequencies and amounts of spectrum we hold, and the sizes of the geographic areas we are authorized to operate in, vary for each of these services. However, all of the licenses Verizon Wireless holds allow it to use spectrum to provide a wide range of mobile and fixed communications services, including both voice and data services, and Verizon Wireless operates a seamless network that utilizes those licenses to provide services to customers. Because the FCC issues licenses for only a fixed time, generally 10 years, Verizon Wireless must periodically seek renewal of those licenses. Although the FCC has routinely renewed all of Verizon Wireless' licenses that have come up for renewal to date, challenges could be brought against the licenses in the future. If a wireless license were revoked or not renewed upon expiration, Verizon Wireless would not be permitted to provide services on the licensed spectrum in the area covered by that license.

The FCC has also imposed specific mandates on carriers that operate wireless communications systems, which increase Verizon Wireless' costs. These mandates include requirements that Verizon Wireless: (i) meet specific construction and geographic coverage requirements during the license term; (ii) meet technical operating standards that, among other things, limit the radio frequency radiation from mobile devices and antennas; (iii) deploy "Enhanced 911" wireless services that provide the wireless caller's number, location and other information upon request by a state or local public safety agency that handles 911 calls; (iv) provide backup electric power at most cell sites in the event electric utility service is disrupted; and (v) comply with regulations for the construction of transmitters and towers that, among other things, restrict siting of towers in environmentally sensitive locations and in places where the towers would affect a site listed or eligible for listing on the National Register of Historic Places. Changes to these mandates could require Verizon Wireless to make changes to operations or increase its costs of compliance.

The Communications Act imposes restrictions on foreign ownership of U.S. wireless systems. The FCC has approved the interest that Vodafone Group Plc holds, through various of its subsidiaries, in Verizon Wireless. The FCC may need to approve any increase in Vodafone's interest or the acquisition of an ownership interest by other foreign entities. In addition, as part of the FCC's approval of Vodafone's ownership interest, Verizon Wireless, Verizon and Vodafone entered into an agreement with the U.S. Department of Defense, Department of Justice and Federal Bureau of Investigation which imposes national security and law enforcement-related obligations on the ways in which Verizon Wireless stores information and otherwise conducts its business.

Verizon Wireless anticipates that it will need additional spectrum to meet future demand. It can meet spectrum needs by purchasing licenses or leasing spectrum from other licensees, or by acquiring new spectrum licenses from the FCC. Under the Communications Act, before Verizon Wireless can acquire a license from another licensee in order to expand its coverage or its spectrum capacity in a particular area, it must file an application with the FCC, and the FCC can grant the application only after a period for public notice and comment. This review process can delay acquisition of spectrum needed to expand services. The Communications Act also requires the FCC to award new licenses for most commercial wireless services through a competitive bidding process in which spectrum is awarded to bidders in an auction. Verizon Wireless participated in spectrum auctions to acquire licenses for personal communication service and most recently advanced wireless service. In addition, the FCC began conducting an auction of spectrum in the 700 MHz band on January 24, 2008. This spectrum is currently used for UHF television operations but by law those operations must cease no later than February 17, 2009. Verizon Wireless filed an application on December 3, 2007, to qualify as a bidder in this auction, and on January 14, 2008, the FCC announced that Verizon Wireless and 213 other applicants had qualified as eligible to bid in the auction. The FCC determined that bidding in this auction will be "anonymous," which means that prior to and during the course of the auction(s), the FCC will not make public any information about a specific applicant's upfront deposit or its bids. In addition, FCC rules restrict information that bidders may disclose about their participation in the auction. The FCC also adopted service rules that will impose costs on licensees that acquire the 700 MHz band spectrum, including minimum coverage mandates by specific dates during the license terms, and, for approximately one-third of the spectrum, "open access" requirements, which generally require licensees of that spectrum to allow customers to use devices and applications of their choice, subject to certain limits. The open access requirements are the subject of a pending appeal in which Verizon Wireless has intervened. The timing of future auctions, and the spectrum being sold, may not match Verizon Wireless' needs, and the company may not be able to secure the spectrum in the amounts and/or in the markets it seeks through the current or any future auction.

The FCC is also conducting several proceedings to explore making additional spectrum available for licensed and/or unlicensed use. These proceedings could increase radio interference to Verizon Wireless' operations from other spectrum users and could impact the ways in which it uses spectrum, the capacity of that spectrum to carry traffic, and the value of that spectrum.



State Regulation and Local Approvals

Telephone Operations

State public utility commissions regulate our telephone operations with respect to certain telecommunications intrastate rates and services and other matters. Our competitive local exchange carrier and long distance operations are generally classified as nondominant and lightly regulated the same as other similarly situated carriers. Our incumbent local exchange operations are generally classified as dominant. These latter operations predominantly are subject to alternative forms of regulation (AFORs) in the various states, although they remain subject to rate of return regulation in a few states. Arizona, Illinois, Nevada, New Hampshire, Oregon and Washington are rate of return regulated with various levels of pricing flexibility for competitive services. California, Connecticut, Delaware, the District of Columbia, Florida, Indiana, Maryland, Michigan, Maine, Massachusetts, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Texas, Vermont, Virginia, West Virginia and Wisconsin are under AFORs with various levels of pricing flexibility, detariffing, and service quality standards. None of the AFORs include earnings regulation. In Idaho, Verizon has made the election under a recent statutory amendment into a deregulatory regime that phases out all price regulation.

Video

Companies that provide cable service over a cable system are typically subject to state and/or local cable television rules and regulations. As noted above, cable operators generally must obtain a local cable franchise from each local unit of government prior to providing cable service in that local area. Some states have recently enacted legislation that enables cable operators to apply for, and obtain, a single cable franchise at the state, rather than local, level. To date, Verizon has applied for and received state-issued franchises in California, Indiana, Florida, New Jersey, Texas and the unincorporated areas of Delaware. Virginia law provides us the option of entering a given franchise area using state standards if local franchise negotiations are unsuccessful.

Wireless Services

The rapid growth of the wireless industry has led to an increase in efforts by some state legislatures and state public utility commissions to regulate the industry in ways that may impose additional costs on Verizon Wireless. The Communications Act generally preempts regulation by state and local governments of the entry of, or the rates charged by, wireless carriers. Although a state may petition the FCC to allow it to impose rate regulation, no state has done so. In addition, the Communications Act does not prohibit the states from regulating the other "terms and conditions" of wireless service. While numerous state commissions do not currently have jurisdiction over wireless services, state legislatures may decide to grant them such jurisdiction, and those commissions that already have authority to impose regulations on wireless carriers may adopt new rules.

State efforts to regulate wireless services have included proposals to regulate customer billing, termination of service, trial periods for service, advertising, network outages, the use of handsets while driving, and the provision of emergency or alert services. Over the past several years, only a few states have imposed regulation in one or more of these areas, and in 2006 a federal appellate court struck down one such state statute, but Verizon Wireless expects these efforts to continue. Some states also impose their own universal service support regimes on wireless and other telecommunications carriers, and other states are considering whether to create such regimes.

Verizon Wireless (as well as AT&T (formerly Cingular) and Sprint-Nextel) is a party to an Assurance of Voluntary Compliance ("AVC") with 33 State Attorneys General. The AVC, which generally reflected Verizon Wireless's practices at the time it was entered into in July 2004, obligates the company to disclose certain rates and terms during a sales transaction, to provide maps depicting coverage, and to comply with various requirements regarding advertising, billing, and other practices.

At the state and local level, wireless facilities are subject to zoning and land use regulation. Under the Communications Act, neither state nor local governments may categorically prohibit the construction of wireless facilities in any community or take actions, such as indefinite moratoria, which have the effect of prohibiting service. Nonetheless, securing state and local government approvals for new tower sites has been and is likely to continue to be a difficult, lengthy and expensive process. Finally, state and local governments continue to impose new or higher fees and taxes on wireless carriers.

Cautionary Statement Concerning Forward-Looking Statements

In this Annual Report on Form 10-K we have made forward-looking statements. These statements are based on our estimates and assumptions and are subject to risks and uncertainties. Forward-looking statements include the information concerning our possible or assumed future results of operations. Forward-looking statements also include those preceded or followed by the words "anticipates," "believes," "estimates," "hopes" or similar expressions. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

The following important factors, along with those discussed elsewhere in this Annual Report, could affect future results and could cause those results to differ materially from those expressed in the forward-looking statements:

- materially adverse changes in economic and industry conditions and labor matters, including workforce levels and labor negotiations, and any resulting financial and/or operational impact, in the markets served by us or by companies in which we have substantial investments;
- material changes in available technology, including disruption of our suppliers' provisioning of critical products or services;
- the impact on our operations of natural or man-made disasters and any resulting financial impact not covered by insurance;
- technology substitution;
- an adverse change in the ratings afforded our debt securities by nationally accredited ratings organizations;
- the final results of federal and state regulatory proceedings concerning our provision of retail and wholesale services and judicial review of those results;
- the effects of competition in our markets;
- the timing, scope and financial impact of our deployment of fiber-to-the-premises broadband technology;
- the ability of Verizon Wireless to continue to obtain sufficient spectrum resources;
- changes in our accounting assumptions that regulatory agencies, including the SEC, may require or that result from changes in the accounting rules or their application, which could result in an impact on earnings;
- the ability to complete acquisitions and dispositions; and
- the extent and timing of our ability to obtain revenue enhancements and cost savings following our business combination with MCI, Inc.

Report of Management on Internal Control Over Financial Reporting

We, the management of Verizon Communications Inc., are responsible for establishing and maintaining adequate internal control over financial reporting of the company. Management has evaluated internal control over financial reporting of the company using the criteria for effective internal control established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Management has assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2007. Based on this assessment, we believe that the internal control over financial reporting of the company is effective as of December 31, 2007. In connection with this assessment, there were no material weaknesses in the company's internal control over financial reporting identified by management.

The company's financial statements included in this annual report have been audited by Ernst & Young LLP, independent registered public accounting firm. Ernst & Young LLP has also provided an attestation report on the company's internal control over financial reporting.

Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting

To The Board of Directors and Shareowners of Verizon Communications Inc.:

We have audited Verizon Communications Inc. and subsidiaries' (Verizon) internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Verizon's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Report of Management on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

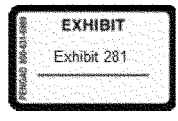
In our opinion, Verizon maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Verizon as of December 31, 2007 and 2006, and the related consolidated statements of income, cash flows and changes in shareowners' investment for each of the three years in the period ended December 31, 2007 of Verizon and our report dated February 22, 2008 expressed an unqualified opinion thereon.

Ernst & Young LLP

Ernst & Young LLP
New York, New York

February 22, 2008



To The Board of Directors and Shareowners of Verizon Communications Inc.:

We have audited the accompanying consolidated balance sheets of Verizon Communications Inc. and subsidiaries (Verizon) as of December 31, 2007 and 2006, and the related consolidated statements of income, cash flows and changes in shareowners' investment for each of the three years in the period ended December 31, 2007. These financial statements are the responsibility of Verizon's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Verizon at December 31, 2007 and 2006, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2007, in conformity with U.S. generally accepted accounting principles.

As discussed in Note 1 to the financial statements, Verizon changed its methods of accounting for uncertainty in income taxes and leveraged lease transactions effective January 1, 2007, stock-based compensation effective January 1, 2006 and pension and other post-retirement obligations effective December 31, 2006.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Verizon's internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 22, 2008 expressed an unqualified opinion thereon.

Note 1

Description of Business and Summary of Significant Accounting Policies

Description of Business

Verizon Communications Inc. (Verizon or the Company) is one of the world's leading providers of communications services. We have two reportable segments, Wireline and Domestic Wireless, which we operate and manage as strategic business units and organize by products and services. For further information concerning our business segments, see Note 17. Our Wireline segment provides communications services, including voice, broadband video and data, network access, nationwide long-distance and other communications products and services, and also owns and operates one of the most expansive end-to-end global Internet Protocol (IP) networks. We continue to deploy advanced broadband network technology, with our fiber-to-the-premises network (FiOS) creating a platform with sufficient bandwidth and capabilities to meet customers' current and future needs. FiOS allows us to offer our customers a wide array of broadband services, including advanced data and video offerings. Our IP network includes over 485,000 route miles of fiber optic cable and provides access to over 150 countries across six continents, enabling us to provide next-generation IP network products and Information Technology (IT) services to medium and large businesses and government customers worldwide.

Verizon's Domestic Wireless segment, operating as Verizon Wireless, provides wireless voice and data products and other value-added services and equipment across the United States using one of the most extensive and reliable wireless networks. Verizon Wireless continues to expand our wireless data, messaging and multi-media offerings at broadband speeds for both consumer and business customers.

Consolidation

The method of accounting applied to investments, whether consolidated, equity or cost, involves an evaluation of all significant terms of the investments that explicitly grant or suggest evidence of control or influence over the operations of the investee. The consolidated financial statements include our controlled subsidiaries. Investments in businesses which we do not control, but have the ability to exercise significant influence over operating and financial policies, are accounted for using the equity method. Investments in which we do not have the ability to exercise significant influence over operating and financial policies are accounted for under the cost method. Equity and cost method investments are included in Investments in Unconsolidated Businesses in our consolidated balance sheets. Certain of our cost method investments are classified as available-for-sale securities and adjusted to fair value pursuant to the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 115, *Accounting for Certain Investments in Debt and Equity Securities* (SFAS No. 115).

All significant intercompany accounts and transactions have been eliminated.

We have reclassified prior year amounts to conform to the current year presentation.

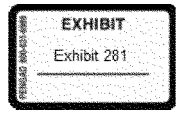
Discontinued Operations, Assets Held for Sale, and Sales of Businesses and Investments

We classify as discontinued operations for all periods presented any component of our business that we hold for sale or disposal that has operations and cash flows that are clearly distinguishable operationally and for financial reporting purposes from the rest of Verizon. For those components, Verizon has no significant continuing involvement after disposal and their operations and cash flows are eliminated from Verizon's ongoing operations. Sales of significant components of our business not classified as discontinued operations are reported as either Sales of Businesses, Net, Equity in Earnings of Unconsolidated Businesses or Other Income and (Expense), Net in our consolidated statements of income.

Use of Estimates

We prepare our financial statements using U.S. generally accepted accounting principles (GAAP), which require management to make estimates and assumptions that affect reported amounts and disclosures. Actual results could differ from those estimates.

Examples of significant estimates include unrealized tax benefits, the allowance for doubtful accounts, the recoverability of plant, property and equipment, the recoverability of intangible assets and other long-lived assets, valuation allowances on tax assets and pension and postretirement benefit assumptions.



Revenue Recognition

Wireline

Our Wireline segment earns revenue based upon usage of our network and facilities and contract fees. In general, fixed monthly fees for voice, video, data and certain other services are billed one month in advance and recognized the following month when earned. Revenue from services that are not fixed in amount and are based on usage are recognized when such services are provided.

We recognize equipment revenue for services, in which we bundle the equipment with maintenance and monitoring services, when the equipment is installed in accordance with contractual specifications and ready for the customer's use. The maintenance and monitoring services are recognized monthly over the term of the contract as we provide the services. Long-term contracts are accounted for using the percentage of completion method. We use the completed contract method if we cannot estimate the costs with a reasonable degree of reliability.

Customer activation fees, along with the related costs up to but not exceeding the activation fees, are deferred and amortized over the customer relationship period.

Domestic Wireless

Our Domestic Wireless segment earns revenue by providing access to and usage of our network, which includes roaming revenue. In general, access revenue is billed one month in advance and recognized when earned. Access revenue, usage revenue and roaming revenue are recognized when service is rendered. Equipment sales revenue associated with the sale of wireless handsets and accessories is recognized when the products are delivered to and accepted by the customer, as this is considered to be a separate earnings process from the sale of wireless services. Customer activation fees are considered additional consideration when handsets are sold to customers at a discount and are recorded as equipment sales revenue at the time of customer acceptance.

Maintenance and Repairs

We charge the cost of maintenance and repairs, including the cost of replacing minor items not constituting substantial betterments, principally to Cost of Services and Sales as these costs are incurred.

Advertising Costs

Advertising costs for advertising products and services as well as other promotional and sponsorship costs are charged to Selling, General & Administrative expense in the periods in which they are incurred.

Earnings Per Common Share

Basic earnings per common share are based on the weighted-average number of shares outstanding during the period. Diluted earnings per common share include the dilutive effect of shares issuable under our stock-based compensation plans, an exchangeable equity interest and zero-coupon convertible notes (see Note 13). As of December 31, 2006, the exchangeable equity interest and zero-coupon convertible notes were no longer outstanding.

Cash and Cash Equivalents

We consider all highly liquid investments with a maturity of 90 days or less when purchased to be cash equivalents, except cash equivalents held as short-term investments. Cash equivalents are stated at cost, which approximates market value.

Short-Term Investments

Our short-term investments consist primarily of cash equivalents held in trust to pay for certain employee benefits. Short-term investments are stated at cost, which approximates market value.

Marketable Securities

Marketable securities are included in the accompanying consolidated balance sheets in Investments in Unconsolidated Businesses or Other Assets. We continually evaluate our investments in marketable securities for impairment due to declines in market value considered to be other than temporary. That evaluation includes, in addition to persistent, declining stock prices, general economic and company-specific evaluations. In the event of a determination that a decline in market value is other than temporary, a charge to earnings is recorded for the loss, and a new cost basis in the investment is established.

Inventories

Inventory consists primarily of wireless equipment held for sale, which is carried at the lower of cost (determined principally on either an average cost or first-in, first-out basis) or market. We also include in inventory new and reusable supplies and network equipment of our local telephone operations, which are stated principally at average original cost, except that specific costs are used in the case of large individual items.

Plant and Depreciation

We record plant, property and equipment at cost. Our local telephone operations' depreciation expense is principally based on the composite group remaining life method and straight-line composite rates. This method provides for the recognition of the cost of the remaining net investment in local telephone plant, less anticipated net salvage value, over the remaining asset lives. This method requires the periodic revision of depreciation rates.

Plant, property and equipment of other wireline and wireless operations are generally depreciated on a straight-line basis.

The asset lives used by our operations are presented in the following table:

Average Useful Lives (in years)	
Buildings	8 - 45
Central office equipment	3 - 11
Other network equipment	3 - 15
Outside communications plant	
Copper cable	13 - 18
Fiber cable (including undersea cable)	11 - 25
Microwave towers	30
Poles and conduit	30 - 50
Furniture, vehicles and other	1 - 20

When we replace, retire or otherwise dispose of depreciable plant used in our local telephone network, we deduct the carrying amount of such plant from the respective accounts and charge it to accumulated depreciation. When the depreciable assets of our other Wireline and Domestic Wireless operations are retired or otherwise disposed of, the related cost and accumulated depreciation are deducted from the plant accounts, and any gains or losses on disposition are recognized in income.

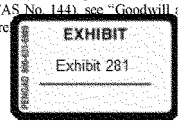
We capitalize network software purchased or developed along with related plant assets. We also capitalize interest associated with the acquisition or construction of network-related assets. Capitalized interest is reported as part of the cost of the network-related assets and as a reduction in interest expense.

In connection with our ongoing review of the estimated remaining useful lives of plant, property and equipment and associated depreciation rates, we determined that, effective January 1, 2005, the remaining useful lives of copper cable and certain components of central office equipment at our Wireline segment would be shortened by 1 to 2 years. These changes in asset lives were based on Verizon's plans, and progress to date on those plans, to deploy fiber optic cable to homes, replacing copper cable.

Effective January 1, 2007, the remaining useful lives of certain of the circuit equipment was lengthened from 8 years to 9 years based on subsequent modifications to our fiber optic cable deployment plan. The remaining useful lives of buildings was also increased from 42 years to 45 years. The reduction in depreciation resulting from these adjustments in 2007 was partially offset by increased depreciation resulting from the shortening of the lives of various types of wireless plant, property and equipment. While the timing and extent of current deployment plans are subject to modification, we believe that current estimates of reductions in impacted asset lives is reasonable and subject to ongoing analysis as deployment of fiber optic lines continues.

Computer Software Costs

We capitalize the cost of internal-use network and non-network software which has a useful life in excess of one year in accordance with Statement of Position (SOP) No. 98-1, "Accounting for the Costs of Computer Software Developed or Obtained for Internal Use." Subsequent additions, modifications or upgrades to internal-use network and non-network software are capitalized only to the extent that they allow the software to perform a task it previously did not perform. Software maintenance and training costs are expensed in the period in which they are incurred. Also, we capitalize interest associated with the development of non-network internal-use software. Capitalized non-network internal-use software costs are amortized using the straight-line method over a period of 2 to 7 years and are included in Other Intangible Assets, Net in our consolidated balance sheets. For a discussion of our impairment policy for capitalized software costs under SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets* (SFAS No. 144), see "Goodwill and Other Intangible Assets" below. Also, see Note 9 for additional detail of internal-use non-network software re lance sheets.



Goodwill and Other Intangible Assets

Goodwill

Goodwill is the excess of the acquisition cost of businesses over the fair value of the identifiable net assets acquired. Impairment testing for goodwill is performed annually or more frequently if indications of impairment exist under the provisions of SFAS No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142). The impairment test for goodwill uses a two-step approach, which is performed at the reporting unit level. We have determined that in our case, the reporting units are our operating segments since that is the lowest level at which discrete, reliable financial and cash flow information is available. Step one compares the fair value of the reporting unit (calculated using a market approach and a discounted cash flow method) to its carrying value. If the carrying value exceeds the fair value, there is a potential impairment and step two must be performed. Step two compares the carrying value of the reporting unit's goodwill to its implied fair value (i.e., fair value of reporting unit less the fair value of the unit's assets and liabilities, including identifiable intangible assets). If the carrying value of goodwill exceeds its implied fair value, the excess is required to be recorded as an impairment.

Intangible Assets Not Subject to Amortization

A significant portion of our intangible assets are Domestic Wireless licenses that provide our wireless operations with the exclusive right to utilize designated radio frequency spectrum to provide cellular communication services. While licenses are issued for only a fixed time, generally ten years, such licenses are subject to renewal by the Federal Communications Commission (FCC). Renewals of licenses have occurred routinely and at nominal cost. Moreover, we have determined that there are currently no legal, regulatory, contractual, competitive, economic or other factors that limit the useful life of our wireless licenses. As a result, we treat the wireless licenses as an indefinite-lived intangible asset under the provisions of SFAS No. 142 . We reevaluate the useful life determination for wireless licenses each reporting period to determine whether events and circumstances continue to support an indefinite useful life.

We test our Domestic Wireless licenses for impairment annually or more frequently if indications of impairment exist. We use a direct value approach in performing our annual impairment test. The direct value approach determines fair value using estimates of future cash flows associated specifically with the licenses. If the fair value of the aggregated wireless licenses is less than the aggregated carrying amount of the licenses, an impairment is recognized.

Intangible Assets Subject to Amortization

Our intangible assets that do not have indefinite lives (primarily customer lists and non-network internal-use software) are amortized over their useful lives and reviewed for impairment in accordance with SFAS No. 144, whenever events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. If any indications were present, we would test for recoverability by comparing the carrying amount of the asset to the net undiscounted cash flows expected to be generated from the asset. If those net undiscounted cash flows do not exceed the carrying amount (i.e., the asset is not recoverable), we would perform the next step which is to determine the fair value of the asset and record an impairment, if any. We reevaluate the useful life determinations for these intangible assets each reporting period to determine whether events and circumstances warrant a revision in their remaining useful lives.

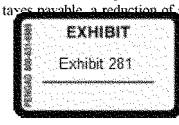
For information related to the carrying amount of goodwill, other intangibles and wireless licenses by segment as well as the major components and average useful lives of our other acquired intangible assets, see Note 9.

Income Taxes

Verizon and its domestic subsidiaries file a consolidated federal income tax return.

Deferred income taxes are provided for temporary differences in the bases between financial statement and income tax assets and liabilities. Deferred income taxes are recalculated annually at rates then in effect. We record valuation allowances to reduce our deferred tax assets to the amount that is more likely than not to be realized.

Effective January 1, 2007, we adopted FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), which requires the use of a two-step approach for recognizing and measuring tax benefits taken or expected to be taken in a tax return and disclosures regarding uncertainties in income tax positions. The first step is recognition: we determine whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, we presume that the position will be examined by the appropriate taxing authority that has full knowledge of all relevant information. The second step is measurement: a tax position that meets the more-likely-than-not recognition threshold is measured to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50 percent likely of being realized upon ultimate settlement. Differences between tax positions taken in a tax return and amounts recognized in the financial statements will generally result in one or more of the following: an increase in a liability for income taxes payable, a reduction of an income tax refund receivable, a reduction in a deferred tax asset, or an increase in a deferred tax liability.



As a result of the implementation of FIN 48, we recorded adjustments to liabilities that resulted in a net $79 million increase in the liability for unrecognized tax benefits with an offsetting reduction to reinvested earnings as of January 1, 2007. The implementation

of FIN 48 also resulted in adjustments to prior acquisitions accounted for under purchase accounting, resulting in a reduction in the liability for tax contingencies in the amount of $635 million and corresponding reductions to goodwill and wireless licenses of $100 million and $535 million, respectively. The implementation impact included a reduction in deferred income taxes of approximately $3 billion, offset with a similar increase in other liabilities as of January 1, 2007.

FASB Staff Position FAS 13-2, *Accounting for a Change or Projected Change in the Timing of Cash Flows Relating to Income Taxes Generated by a Leveraged Lease Transaction* (FSP 13-2), requires that changes in the projected timing of income tax cash flows generated by a leveraged lease transaction be recognized as a gain or loss in the year in which the change occurs. We adopted FSP 13-2 effective January 1, 2007. The cumulative effect of initially adopting FSP 13-2 was a reduction to reinvested earnings of $55 million, after-tax.

Stock-Based Compensation

Effective January 1, 2006, we adopted SFAS No. 123(R), *Share-Based Payment* (SFAS No. 123(R)) utilizing the modified prospective method. SFAS No. 123(R) requires the measurement of stock-based compensation expense based on the fair value of the award on the date of grant. Under the modified prospective method, the provisions of SFAS No. 123(R) apply to all awards granted or modified after the date of adoption. The impact to Verizon resulted from the Domestic Wireless segment, for which we recorded a $42 million cumulative effect of accounting change as of January 1, 2006, net of taxes and after minority interest, to recognize the effect of initially measuring the outstanding liability for Value Appreciation Rights (VARs) granted to Domestic Wireless employees at fair value utilizing a Black-Scholes model.

Foreign Currency Translation

The functional currency for all of our foreign operations is generally the local currency. For these foreign entities, we translate income statement amounts at average exchange rates for the period, and we translate assets and liabilities at end-of-period exchange rates. We record these translation adjustments in Accumulated Other Comprehensive Loss, a separate component of Shareowners' Investment, in our consolidated balance sheets. We report exchange gains and losses on intercompany foreign currency transactions of a long-term nature in Accumulated Other Comprehensive Loss. Other exchange gains and losses are reported in income.

Employee Benefit Plans

Pension and postretirement health care and life insurance benefits earned during the year as well as interest on projected benefit obligations are accrued currently. Prior service costs and credits resulting from changes in plan benefits are amortized over the average remaining service period of the employees expected to receive benefits. Expected return on plan assets is determined by applying the return on assets assumption to the market-related value of assets.

As of July 1, 2006, Verizon management employees no longer earn pension benefits or earn service towards the company retiree medical subsidy (see Note 15).

In September 2006, the FASB issued SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106, and 132(R)* (SFAS No. 158). Effective December 31, 2006, SFAS No. 158 requires the recognition of a defined benefit postretirement plan's funded status as either an asset or liability on the balance sheet. SFAS No. 158 also requires the immediate recognition of the unrecognized actuarial gains and losses and prior service costs and credits that arise during the period as a component of other accumulated comprehensive income, net of applicable income taxes. Additionally, the fair value of plan assets must be determined as of the Company's year-end. We adopted SFAS No. 158 effective December 31, 2006, which resulted in a net decrease to shareowners' investment of $7,409 million. This included a net increase in pension obligations of $2,007 million, an increase in Other Postretirement Benefits Obligations of $10,828 million and an increase in Other Employee Benefit Obligations of $31 million, offset by an increase in deferred taxes of $5,457 million.

Derivative Instruments

We have entered into derivative transactions to manage our exposure to fluctuations in foreign currency exchange rates, interest rates and commodity prices. We employ risk management strategies using a variety of derivatives including foreign currency forwards and collars, equity options, interest rate and commodity swap agreements and interest rate locks. We do not hold derivatives for trading purposes.

In accordance with SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* (SFAS No. 133) and related amendments and interpretations, we measure all derivatives, including derivatives embedded in other financial instruments, at fair value and recognize them as either assets or liabilities on our consolidated balance sheets. Changes in the fair values of derivative instruments not qualifying as hedges or any ineffective portion of hedges are recognized in earnings in the current period. Changes in the fair values of derivative instruments used effectively as fair value hedges are recognized in earnings, along with changes in the fair value of the hedged item. Changes in the fair value of the effective portions of cash flow hedges are reported in other comprehensive income (loss) and recognized in earnings when the hedged item is recognized in earnings.

Recent Accounting Pronouncements

In December 2007, the FASB issued SFAS No. 141(R), *Business Combinations (Revised)*, (SFAS No. 141(R)), to replace SFAS No. 141, *Business Combinations* . SFAS No. 141(R) requires the use of the acquisition method of accounting, defines the acquirer, establishes the acquisition date and broadens the scope to all transactions and other events in which one entity obtains control over one or more other businesses. This statement is effective for business combinations or transactions entered into for fiscal years beginning on or after December 15, 2008. We are still evaluating the impact of SFAS No. 141(R), however, the adoption of this statement is not expected to have a material impact on our financial position or results of operations.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No. 51* , (SFAS No. 160). SFAS No. 160 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the retained interest and gain or loss when a subsidiary is deconsolidated. This statement is effective for financial statements issued for fiscal years beginning on or after December 15, 2008. Upon the initial adoption of this statement we will change the classification and presentation of Noncontrolling Interest in our financial statements, which we currently refer to as minority interest. We are still evaluating the impact SFAS No. 160 will have, but we do not expect a material impact on our financial position or results of operations.

In February 2007, the FASB issued SFAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities—Including an Amendment of SFAS 115* (SFAS No. 159), which permits but does not require us to measure financial instruments and certain other items at fair value. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. As we will not elect to fair value any of our financial instruments under the provisions of SFAS No.159, the adoption of this statement effective January 1, 2008 will not have any impact on our financial statements.

In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements* (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles and establishes a hierarchy that categorizes and prioritizes the sources to be used to estimate fair value. SFAS No. 157 also expands financial statement disclosures about fair value measurements. On February 12, 2008, the FASB issued FASB Staff Position (FSP) 157-2 which delays the effective date of SFAS No. 157 for one year, for all nonfinancial assets and nonfinancial liabilities, except those that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). SFAS No. 157 and FSP 157-2 are effective for financial statements issued for fiscal years beginning after November 15, 2007. We will elect a partial deferral of SFAS No. 157 under the provisions of FSP 157-2 related to the measurement of fair value used when evaluating goodwill, other intangible assets, wireless licenses and other long-lived assets for impairment and valuing asset retirement obligations and liabilities for exit or disposal activities. The impact of partially adopting SFAS No. 157 effective January 1, 2008 will not be material to our financial statements.

In June 2006, the Emerging Issues Task Force (EITF) reached a consensus on EITF No. 06-3, *How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement* (EITF No. 06-3). EITF No. 06-3 permits that such taxes may be presented on either a gross basis or a net basis as long as that presentation is used consistently. The adoption of EITF No. 06-3 on January 1, 2007 did not impact our financial statements. We present the taxes within the scope of EITF No. 06-3 on a net basis.

Note 2

Discontinued Operations, Extraordinary Item and Other Dispositions

Discontinued Operations

Telecomunicaciones de Puerto Rico, Inc.

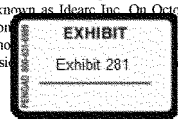
On March 30, 2007, we completed the sale of our 52% interest in Telecomunicaciones de Puerto Rico, Inc. (TELPRI) and received gross proceeds of approximately $980 million. The sale resulted in a pretax gain of $120 million ($70 million after-tax). Verizon contributed $100 million ($65 million after-tax) of the proceeds to the Verizon Foundation.

Verizon Dominicana C. por A.

On December 1, 2006, we closed the sale of Verizon Dominicana C. por A (Verizon Dominicana). The transaction resulted in net pretax cash proceeds of $2,042 million, net of a purchase price adjustment of $373 million. The U.S. taxes that became payable and were recognized at the time the transaction closed exceeded the $30 million pretax gain on the sale resulting in an overall after-tax loss of $541 million.

Verizon Information Services

In October, 2006, we announced our intention to spin-off our domestic print and Internet yellow pages directories publishing operations, which have been organized into a newly formed company known as Idearc Inc. On October 18, 2006, the Verizon Board of Directors declared a dividend consisting of 1 share of the newly formed co Verizon owned. In making its determination to effect the spin-off, Verizon's Board of Directors considered, amo n-off may allow each company to separately focus on its core business, which may facilitate the potential expansi d the newly



formed company, and allow each company to determine its own capital structure. On November 17, 2006, we completed the spin-off of our domestic print and Internet yellow pages directories business. Cash was paid for fractional shares. The distribution of common stock of the newly formed company to our shareowners was considered a tax free transaction for us and for our shareowners, except for the cash payments for fractional shares which were generally taxable.

At the time of the spin-off, the exercise price and number of shares of Verizon common stock underlying options to purchase shares of Verizon common stock, restricted stock units (RSU's) and performance stock units (PSU's) were adjusted pursuant to the terms of the applicable Verizon equity incentive plans, taking into account the change in the value of Verizon common stock as a result of the spin-off.

In connection with the spin-off, Verizon received approximately $2 billion in cash from the proceeds of loans under a term loan facility of the newly formed company and transferred to the newly formed company debt obligations in the aggregate principal amount of approximately $7.1 billion thereby reducing Verizon's outstanding debt at that time. We incurred pretax charges of approximately $117 million ($101 million after-tax), including debt retirement costs, costs associated with accumulated vested benefits of employees of the newly formed company, investment banking fees and other transaction costs related to the spin-off, which are included in discontinued operations.

In accordance with SFAS No. 144 we have classified TELPRI, Verizon Dominicana and our former domestic print and Internet yellow page directories publishing operations as discontinued operations in the consolidated financial statements for all periods presented through the date of the spin-off or divestiture.

The assets and liabilities of TELPRI are disclosed as current assets held for sale and current liabilities related to assets held for sale in the consolidated balance sheet as of December 31, 2006. Additional details related to those assets and liabilities were as follows:

	(dollars in millions)
At December 31,	2006
Current assets	$ 303
Plant, property and equipment, net	1,436
Other non-current assets	853
Total assets	$ 2,592
Current liabilities	$ 181
Long-term debt	575
Other non-current liabilities	1,398
Total liabilities	$ 2,154

Related to the assets and liabilities above was $241 million included as Accumulated Other Comprehensive Loss in the consolidated balance sheet as of December 31, 2006.

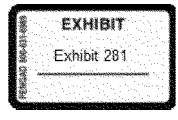
Income from discontinued operations, net of tax, presented in the consolidated statements of income included the following:

			(dollars in millions)
Year Ended December 31,	2007	2006	2005
Operating revenues	$ 306	$ 5,077	$ 5,595
Income before provision for income taxes	$ 185	$ 2,041	$ 2,159
Provision for income taxes	(43)	(1,282)	(789)
Income from discontinued operations, net of tax	$ 142	$ 759	$ 1,370

Extraordinary Item

Compañia Anónima Nacional Teléfonos de Venezuela (CANTV)

In January 2007, the Bolivarian Republic of Venezuela (the Republic) declared its intent to nationalize certain companies, including CANTV. On February 12, 2007, we entered into a Memorandum of Understanding (MOU) with the Republic, which provided that the Republic offer to purchase all of the equity securities of CANTV, including our 28.5% interest, through public tender offers in Venezuela and the United States. Under the terms of the MOU, the prices in the tender offers would be adjusted downward to reflect any dividends declared and paid subsequent to February 12, 2007. During the second quarter of 2007, the tender offers were completed and Verizon received an aggregate amount of approximately $572 million, which included $476 million from the tender offers as well as $96 million of dividends declared and paid subsequent to the MOU. Based upon our investment balance in CANTV, we recorded an extraordinary loss of $131 million, including taxes of $38 million.



Other Dispositions

Telephone Access Lines Spin-off

On January 16, 2007, we announced a definitive agreement with FairPoint Communications, Inc. (FairPoint) that will result in Verizon establishing a separate entity for its local exchange and related business assets in Maine, New Hampshire and Vermont, spinning off that new entity into a newly formed company, known as Northern New England Spinco Inc. (Spinco), to Verizon's shareowners, and immediately merging it with and into FairPoint. These local exchange and business assets are included in Verizon's continuing operations. It is anticipated that as long as all conditions are satisfied and assuming completion of the related financing transactions, both the spin-off of Spinco to Verizon shareowners and the merger of Spinco with FairPoint will occur on March 31, 2008. Verizon's Board of Directors established a record date of March 7, 2008, and a closing date of March 31, 2008, for the proposed spin-off of shares of Spinco to Verizon shareowners.

During 2007, we recorded pretax charges of $84 million ($80 million after-tax) for costs incurred related to certain network and work center re-arrangements, the isolation and extraction of related business information, and other activities to separate the wireline facilities and operations in Maine, New Hampshire and Vermont from Verizon at the closing of the transaction, as well as professional advisory and legal fees in connection with this transaction.

Upon the closing of the transaction, Verizon shareowners will own approximately 60 percent of the new company, and FairPoint shareowners will own approximately 40 percent. Verizon Communications will not receive any shares in FairPoint as a result of the transaction. In connection with the merger, Verizon shareowners will receive one share of FairPoint stock for approximately every 53 shares of Verizon stock held as of the record date. The proposal relating to the merger was approved by the FairPoint shareowners in August 2007. Both the spin-off and merger are expected to qualify as tax-free transactions, except to the extent that cash is paid to Verizon shareowners in lieu of fractional shares.

Based upon the number of shares (as adjusted) and price of FairPoint common stock (NYSE: FRP) on the date of the announcement of the merger, the estimated total value to be received by Verizon and its shareowners in exchange for these operations was approximately $2,715 million. This consisted of (a) approximately $1,015 million of FairPoint common stock that was to be received by Verizon shareowners in the merger, and (b) $1,700 million in value that was to be received by Verizon through a combination of cash distributions to Verizon and debt securities issued to Verizon prior to the spin-off. Verizon currently intends to exchange these newly issued debt securities for certain debt that was previously issued by Verizon, which would have the effect of reducing Verizon's then-outstanding debt. The actual total value to be received by Verizon and its shareowners will be determined in part based on the number of shares (as adjusted) and price of FairPoint common stock on the date of the closing of the merger. This value is now expected to be less than $2,715 million because (a) FairPoint expects to issue approximately 54 million shares of common stock in the merger and the price of FairPoint common stock has declined since the announcement of the merger (the closing price of FairPoint common stock on the last business day prior to the announcement of the merger was $18.54 per share) and (b) in connection with the regulatory approval process, Verizon currently expects to make additional contributions of approximately $320 million to the entity that will merge with FairPoint.

Verizon Hawaii Inc.

During 2005, we sold our wireline and directory businesses in Hawaii, including Verizon Hawaii Inc. which operated approximately 700,000 switched access lines, as well as the services and assets of Verizon Long Distance, Verizon Online, Verizon Information Services and Verizon Select Services Inc. in Hawaii, to an affiliate of The Carlyle Group for $1,326 million in cash proceeds. In connection with this sale, we recorded a net pretax gain of $530 million ($336 million after-tax).

Other Items

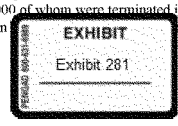
Other Tax Matters

During 2005, we recorded tax benefits of $336 million in connection with the utilization of prior year loss carry forwards. As a result of the capital gain realized in 2005 in connection with the sale of our Hawaii businesses, we recorded a tax benefit of $242 million related to the capital losses incurred in previous years.

Also during 2005, we recorded a net tax provision of $206 million related to the repatriation of foreign earnings under the provisions of the American Jobs Creation Act of 2004, for two of our foreign investments.

Facility and Employee-Related Items

During the fourth quarter of 2007, we recorded a charge of $772 million ($477 million after-tax) primarily in connection with workforce reductions of 9,000 employees and related charges, 4,000 of whom were terminated in the fourth quarter of 2007 with the remaining reductions expected to occur throughout 2008 (see Note 15). In [redacted] actuarial assumptions for severance to align with future expectations.



During 2006, we recorded net pretax severance, pension and benefits charges of $425 million ($258 million after-tax). These charges included net pretax pension settlement losses of $56 million ($26 million after-tax) related to employees that received lump-sum distributions primarily resulting from our separation plans. These charges were recorded in accordance with SFAS No. 88, *Employers' Accounting for Settlements and Curtailments of Defined Benefit Pension Plans and for Termination* (SFAS No. 88), which requires that settlement losses be recorded once prescribed payment thresholds have been reached. Also included are pretax charges of $369 million ($228 million after-tax) for employee severance and severance-related costs in connection with the involuntary separation of approximately 4,100 employees. In addition, during 2005 we recorded a charge of $59 million ($36 million after-tax) associated with employee severance costs and severance-related activities in connection with a voluntary separation program for surplus union-represented employees.

During 2006, we recorded pretax charges of $184 million ($118 million after-tax) in connection with the continued relocation of employees and business operations to Verizon Center located in Basking Ridge, New Jersey. During 2005, we recorded a net pretax gain of $18 million ($8 million after-tax) in connection with this relocation, including a pretax gain of $120 million ($72 million after-tax) related to the sale of a New York City office building, partially offset by a pretax charge of $102 million ($64 million after-tax) primarily associated with relocation, employee severance and related activities.

During 2005, we reported a net pretax charge of $98 million ($59 million after-tax) related to the restructuring of the Verizon management retirement benefit plans. This pretax charge was recorded in accordance with SFAS No. 88, and SFAS No. 106, *Employers' Accounting for the Postretirement Benefits Other Than Pensions* (SFAS No. 106) and included the unamortized cost of prior pension enhancements of $430 million, offset partially by a pretax curtailment gain of $332 million related to retiree medical benefits. In connection with this restructuring, management employees: no longer earn pension benefits or earn service towards the company retiree medical subsidy after June, 2006; received an 18-month enhancement of the value of their pension and retiree medical subsidy; and receive a higher savings plan matching contribution.

Other Items

In 2006, we recorded pretax charges of $26 million ($16 million after-tax) resulting from the extinguishment of debt assumed in connection with the completion of the MCI merger (see Note 8).

During 2005, we recorded pretax charges of $139 million ($133 million after-tax) including a pretax impairment charge of $125 million pertaining to aircraft leased to airlines involved in bankruptcy proceedings and a pretax charge of $14 million ($8 million after-tax) in connection with the early extinguishment of debt.

Note 4
Marketable Securities and Other Investments

We have investments in marketable securities which are considered "available-for-sale" under SFAS No. 115. These investments have been included in our consolidated balance sheets in Short-Term Investments, Investments in Unconsolidated Businesses and Other Assets.

Under SFAS No. 115, available-for-sale securities are required to be carried at their fair value, with unrealized gains and losses (net of income taxes) that are considered temporary in nature recorded in Accumulated Other Comprehensive Loss. The fair values of our investments in marketable securities are determined based on market quotations. We continually evaluate our investments in marketable securities for impairment due to declines in market value considered to be other than temporary. That evaluation includes, in addition to persistent, declining stock prices, general economic and company-specific evaluations. In the event of a determination that a decline in market value is other than temporary, a charge to earnings is recorded in Other Income and (Expense), Net in the consolidated statements of income for all or a portion of the unrealized loss, and a new cost basis in the investment is established. As of December 31, 2007, no impairments were determined to exist.

The following table shows certain summarized information related to our investments in marketable securities:

(dollars in millions)

	Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
At December 31, 2007				
Short-term investments	**$ 497**	**$ 21**	**$ –**	**$ 518**
Investments in unconsolidated businesses (Note 6)	**286**	**42**	**–**	**328**
Other assets	**661**	**31**	**–**	**692**
	$ 1,444	**$ 94**	**$ –**	**$ 1,538**
At December 31, 2006				
Short-term investments	$ 616	$ 28	$ –	$ 644
Investments in unconsolidated businesses (Note 6)	259	38	(2)	295
Other assets	594	31	–	625
	$ 1,469	$ 97	$ (2)	$ 1,564

Our short-term investments are primarily bonds and mutual funds.

Certain other investments in securities that we hold are not adjusted to market values because those values are not readily determinable and/or the securities are not marketable. We do, however, adjust the carrying values of these securities in situations where we believe declines in value below cost were other than temporary. The carrying values for investments not adjusted to market value were $15 million at December 31, 2007 and $12 million at December 31, 2006.

Note 5

Plant, Property and Equipment

The following table displays the details of plant, property and equipment, which is stated at cost:

(dollars in millions)

At December 31,	2007	2006
Land	$ 839	$ 959
Buildings and equipment	19,734	19,207
Network equipment	173,654	163,580
Furniture, office and data processing equipment	11,912	12,789
Work in progress	1,988	2,315
Leasehold improvements	3,612	3,061
Other	2,255	2,198
	213,994	204,109
Less accumulated depreciation	128,700	121,753
Total	$ 85,294	$ 82,356

Note 6

Investments in Unconsolidated Businesses

Our investments in unconsolidated businesses are comprised of the following:

(dollars in millions)

At December 31,	Ownership	2007 Investment	Ownership	2006 Investment
Equity Investees				
Vodafone Omnitel	23.1%	$ 2,313	23.1%	$ 3,624
CANTV	–	–	28.5	230
Other	Various	744	Various	744
Total equity investees		3,057		4,598
Cost Investees	Various	315	Various	270
Total investments in unconsolidated businesses		$ 3,372		$ 4,868

Dividends and repatriations of foreign earnings received from these investees amounted to $2,571 million in 2007, $42 million in 2006 and $2,335 million in 2005.

Equity Investees

Vodafone Omnitel

Vodafone Omnitel is the second largest wireless communications company in Italy. At December 31, 2007 and 2006, our investment in Vodafone Omnitel included goodwill of $1,154 million and $1,044 million, respectively.

In December 2007, Verizon received a net distribution from Vodafone Omnitel of approximately $2.1 billion and we anticipate that we may receive an additional distribution from Vodafone Omnitel within the next twelve months. As a result, we recorded $610 million of foreign and domestic taxes and expenses specifically relating to our share of Vodafone Omnitel's distributable earnings. During 2005, we repatriated approximately $2.2 billion of Vodafone Omnitel's earnings through the repurchase of issued and outstanding shares of its equity. Vodafone Omnitel's owners, Verizon and Vodafone Group Plc (Vodafone), participated on a pro rata basis; consequently, Verizon's ownership interest after the share repurchase remained at 23.1%.

CANTV

Verizon sold its interest in CANTV in 2007 (see Note 2).

Other Equity Investees

Verizon has limited partnership investments in entities that invest in affordable housing projects, for which Verizon provides funding as a limited partner and receives tax deductions and tax credits based on its partnership interests. At December 31, 2007 and 2006, Verizon had equity investments in these partnerships of $637 millio ely. Verizon currently adjusts the carrying value of these investments for any losses incurred by the limited partne

The remaining investments include wireless partnerships r domestic and international investments.

EXHIBIT
Exhibit 281
CSOC.CBR.00032644

Cost Investees

Some of our cost investments are carried at their current market value. Other cost investments are carried at their original cost, except in cases where we have determined that a decline in the estimated market value of an investment is other than temporary as described in Note 4. Our cost investments include a variety of domestic and international investments primarily involved in providing communication services.

Note 7

Minority Interest

Minority interests in equity of subsidiaries were as follows:

At December 31,	2007	(dollars in millions) 2006
Minority interests in consolidated subsidiaries:		
Wireless joint venture	$ 31,782	$ 27,854
Cellular partnerships and other	506	483
	$ 32,288	$ 28,337

Wireless Joint Venture

The wireless joint venture was formed in April 2000 in connection with the combination of the U.S. wireless operations and interests of Verizon and Vodafone. The wireless joint venture operates as Verizon Wireless. Verizon owns a controlling 55% interest in Verizon Wireless and Vodafone owns the remaining 45%.

Under the terms of an investment agreement, Vodafone had the right to require Verizon Wireless to purchase up to an aggregate of $20 billion worth of Vodafone's interest in Verizon Wireless at designated times (put windows) at its then fair market value, not to exceed $10 billion in any one put window. The last of these put windows opened on June 10 and closed on August 9 in 2007. Vodafone did not exercise its right during this period and no longer has any right to require the purchase of any of its interest in Verizon Wireless.

Cellular Partnerships and Other

In August 2002, Verizon Wireless and Price Communications Corp. (Price) combined Price's wireless business with a portion of Verizon Wireless. The resulting limited partnership, Verizon Wireless of the East LP (VZ East), is controlled and managed by Verizon Wireless. In exchange for its contributed assets, Price received a limited partnership interest in VZ East which was exchangeable into the common stock of Verizon Wireless if an initial public offering of that stock occurred, or into the common stock of Verizon on the fourth anniversary of the asset contribution date. On August 15, 2006, Verizon delivered 29.5 million shares of newly-issued Verizon common stock to Price valued at $1,007 million in exchange for Price's limited partnership interest in VZ East. As a result of acquiring Price's limited partnership interest, Verizon recorded goodwill of $345 million in the third quarter of 2006 attributable to its Domestic Wireless segment.

Note 8

Merger and Acquisitions

Completion of Merger with MCI

On January 6, 2006, after receiving the required state, federal and international regulatory approvals, Verizon completed the acquisition of 100% of the outstanding common stock of MCI, Inc. (MCI) for a combination of Verizon common shares and cash. MCI was a global communications company that provided Internet, data and voice communication services to businesses and government entities throughout the world and consumers in the United States.

The merger was accounted for using the purchase method in accordance with SFAS No. 141, and the aggregate transaction value was $6,890 million, consisting of $5,829 million of cash and common stock issued at closing, $973 million of consideration for the shares acquired from entities controlled by Carlos Slim Helú, net of the portion of the special dividend paid by MCI that was treated as a return of our investment, and closing and other direct merger-related costs. The number of shares issued was based on the "Average Parent Stock Price," as defined in the merger agreement. The consolidated financial statements include the results of MCI's operations from the date of the close of the merger.

Allocation of the cost of the merger

In accordance with SFAS No. 141, the cost of the merger was allocated to the assets acquired and liabilities assumed based on their fair values as of the close of the merger, with the amounts exceeding the fair value being recorded as goodwill. The process to identify and record the fair value of assets acquired and liabilities assumed included an analysis of the acquired fixed assets, including real and personal property; various contracts, including leases, contractual commitments, an stomer relationships; investments; and contingencies.

The fair values of the assets acquired and liabilities assumed were determined using one or more of three valuation approaches: market, income and cost. The selection of a particular method for a given asset depended on the reliability of available data and the nature of the asset, among other considerations. The market approach, which indicates value for a subject asset based on available market pricing for comparable assets, was utilized for certain acquired real property and investments. The income approach, which indicates value for a subject asset based on the present value of cash flow projected to be generated by the asset, was used for certain intangible assets such as customer relationships, as well as for favorable/unfavorable contracts. Projected cash flow is discounted at a required rate of return that reflects the relative risk of achieving the cash flow and the time value of money. Projected cash flows for each asset considered multiple factors, including current revenue from existing customers; distinct analysis of expected price, volume, and attrition trends; reasonable contract renewal assumptions from the perspective of a marketplace participant; expected profit margins giving consideration to marketplace synergies; and required returns to contributory assets. The cost approach, which estimates value by determining the current cost of replacing an asset with another of equivalent economic utility, was used for the majority of personal property. The cost to replace a given asset reflects the estimated reproduction or replacement cost for the property, less an allowance for loss in value due to depreciation or obsolescence, with specific consideration given to economic obsolescence if indicated.

The following table summarizes the allocation of the cost of the merger to the assets acquired, including cash of $2,361 million, and liabilities assumed as of the close of the merger.

	(dollars in millions)
Assets acquired	
Current assets	$ 6,001
Property, plant & equipment	6,453
Intangible assets subject to amortization	
Customer relationships	1,162
Rights of way and other	176
Deferred income taxes and other assets	1,995
Goodwill	5,085
Total assets acquired	$ 20,872
Liabilities assumed	
Current liabilities	$ 6,093
Long-term debt	6,169
Deferred income taxes and other non-current liabilities	1,720
Total liabilities assumed	13,982
Purchase price	$ 6,890

The goodwill resulting from the merger with MCI is included in our Wireline segment, which includes the operations of the former MCI. The customer relationships are being amortized on a straight-line basis over 3-8 years based on whether the relationship is with a consumer or a business customer since this correlates to the pattern in which the economic benefits are expected to be realized.

We recorded certain severance and severance-related costs and contract termination costs in connection with the merger, pursuant to EITF Issue No. 95-3, *Recognition of Liabilities in Connection with a Purchase Business Combination* . The following table summarizes the activity related to these obligations during 2007:

(dollars in millions)	At December 31, 2006	Payments	At December 31, 2007
Severance costs and contract termination costs	$ 376	$ (340)	$ 36

The remaining contract termination costs at December 31, 2007 are expected to be paid over the remaining contract periods through 2008.

In 2007 and 2006 , we recorded pretax charges of $178 million ($112 million after-tax) and $232 million ($146 million after-tax), respectively, primarily associated with the MCI acquisition that were comprised of advertising and other costs related to re-branding initiatives, facility exit costs and systems integration activities.

Pro Forma Information

The following unaudited pro forma consolidated results of operations assume that the MCI merger was completed as of January 1 for the periods shown below:

	(dollars in millions, except per share amounts)	
Years Ended December 31,	2006	2005
Operating revenues	$ 88,409	$ 85,781
Income before discontinued operations and cumulative effect of accounting change	5,480	6,724
Net income	6,197	8,176
Basic earnings per common share:		
Income before discontinued operations and cumulative effect of accounting change	1.88	2.30
Net income	2.13	2.79
Diluted earnings per common share:		
Income before discontinued operations and cumulative effect of accounting change	1.88	2.28
Net income	2.12	2.76

The unaudited pro forma information presents the combined operating results of Verizon and the former MCI, with the results prior to the acquisition date adjusted to include the pro forma impact of: the elimination of transactions between Verizon and the former MCI; the adjustment of amortization of intangible assets and depreciation of fixed assets based on the purchase price allocation; the elimination of merger expenses incurred by the former MCI; the elimination of the loss on the early redemption of MCI's debt; the adjustment of interest expense reflecting the redemption of all of MCI's debt and the replacement of that debt with $4 billion of new debt issued in February 2006 at Verizon's weighted average borrowing rate; and to reflect the impact of income taxes on the pro forma adjustments utilizing Verizon's statutory tax rate of 40%. The unaudited pro forma results for 2005 include $82 million for discontinued operations that were sold by MCI during the first quarter of 2005. The unaudited pro forma results for 2005 include approximately $300 million of net tax benefits resulting from tax reserve adjustments recognized by the former MCI primarily during the third and fourth quarters of 2005, including audit settlements and other activity.

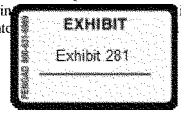
The unaudited pro forma consolidated basic and diluted earnings per share for 2006 and 2005 are based on the consolidated basic and diluted weighted average shares of Verizon and the former MCI. The historical basic and diluted weighted average shares of the former MCI were converted for the actual number of shares issued upon the closing of the merger.

The unaudited pro forma results are presented for illustrative purposes only and do not reflect the realization of potential cost savings, or any related integration costs. Certain cost savings may result from the merger; however, there can be no assurance that these cost savings will be achieved. Cost savings, if achieved, could result from, among other things, the reduction of overhead expenses, including employee levels and the elimination of duplicate facilities and capital expenditures. These pro forma results do not purport to be indicative of the results that would have actually been obtained if the merger occurred as of the beginning of each of the periods presented, nor does the pro forma data intend to be a projection of results that may be obtained in the future.

Rural Cellular Corporation

In late July 2007, Verizon Wireless announced that it had entered into an agreement to acquire Rural Cellular Corporation (Rural Cellular), for $45 per share in cash (or approximately $757 million). As a result of the acquisition, Verizon Wireless will assume Rural Cellular's outstanding debt. The total value of the transaction is approximately $2.7 billion. Rural Cellular has more than 700,000 customers in markets adjacent to Verizon Wireless's existing customer service areas. Rural Cellular's networks are located in the states of Maine, Vermont, New Hampshire, New York, Massachusetts, Alabama, Mississippi, Minnesota, North Dakota, South Dakota, Wisconsin, Kansas, Idaho, Washington, and Oregon. Rural Cellular's shareholders approved the transaction on October 4, 2007. The acquisition, which is subject to regulatory approvals, is expected to close in the first half of 2008.

In a related transaction, on December 3, 2007, Verizon Wireless signed a definitive exchange agreement with AT&T. Under the terms of the agreement, Verizon Wireless will receive cellular operating markets in Madison and Mason, KY, and 10MHz PCS licenses in Las Vegas, NV; Buffalo, NY; Sunbury-Shamokin and Erie, PA; and Youngstown, OH. Verizon Wireless will also receive minority interests held by AT&T in three entities in which Verizon Wireless also holds an interest plus a cash payment. In exchange, Verizon Wireless will transfer to AT&T six cellular operating markets in Burlington, Franklin and the northern portion of Addison, VT; Franklin, NY; and Okanogan and Ferry, WA; and a cellular license for the Kentucky-6 market. The operati is exchanging are among those it is to acquire from Rural Cellular. The exchange with AT&T is subject to regulat to close in the first half of 2008.



Other Acquisitions

In July 2007, Verizon acquired a security-services firm for $435 million, resulting in goodwill of $343 million and other intangible assets of $81 million. This acquisition was made to enhance our managed information security services to large business and government customers worldwide. This acquisition was integrated into the Wireline segment.

On November 29, 2006, we were granted thirteen 20MHz licenses we won in an FCC auction that concluded on September 18, 2006. We paid a total of $2,809 million for the licenses, which cover a population of nearly 200 million.

Note 8
Goodwill and Other Intangible Assets

Goodwill

Changes in the carrying amount of goodwill are as follows:

(dollars in millions)

	Wireline	Domestic Wireless	Total
Balance at December 31, 2005	$ 315	$ –	$ 315
Acquisitions	5,085	345	5,430
Reclassifications and adjustments	(90)	–	(90)
Balance at December 31, 2006	$ 5,310	$ 345	$ 5,655
Acquisitions	**343**	–	**343**
Reclassifications and adjustments	**(753)**	–	**(753)**
Balance at December 31, 2007	**$ 4,900**	**$ 345**	**$ 5,245**

Reclassifications and adjustments to goodwill include the impact of adopting FIN 48 (see Note 1) of $100 million as of January 1, 2007, as well as to reflect revised estimated tax bases of acquired assets and liabilities during 2007 and 2006.

Other Intangible Assets

The following table displays the details of other intangible assets:

(dollars in millions)

	At December 31, 2007		At December 31, 2006	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Finite-lived intangible assets:				
Customer lists (3 to 10 years)	**$ 1,307**	**$ 459**	$ 1,278	$ 270
Non-network internal-use software (2 to 7 years)	**8,116**	**4,147**	7,777	3,826
Other (1 to 25 years)	**215**	**44**	204	23
Total	**$ 9,638**	**$ 4,650**	$ 9,259	$ 4,119
Indefinite-lived intangible assets:				
Wireless licenses	**$ 50,796**		$ 50,959	

Reclassifications and adjustments to wireless licenses include the impact of adopting FIN 48 (see Note 1) of $535 million as of January 1, 2007, partially offset by acquisitions during 2007.

Amortization expense was $1,341 million, $1,423 million, and $1,444 million for the years ended December 31, 2007, 2006 and 2005, respectively and is estimated to be $1,324 million in 2008, $1,116 million in 2009, $884 million in 2010, $696 million in 2011 and $472 million in 2012. Customer lists and relationships of $3,313 million at Domestic Wireless became fully amortized during 2006.

Note 9

Leasing Arrangements

As Lessor

We are the lessor in leveraged and direct financing lease agreements for commercial aircraft and power generating facilities, which comprise the majority of the portfolio along with telecommunications equipment, real estate property, and other equipment. These leases have remaining terms up to 48 years as of December 31, 2007. Minimum lease payments receivable represent unpaid rentals, less principal and interest on third-party nonrecourse debt relating to leveraged lease transactions. Since we have no general liability for this debt, which holds a senior security interest in the leased equipment and rentals, the related principal and interest have been offset against the minimum lease payments receivable in accordance with GAAP. All recourse debt is reflected in our consolidated balance sheets. See Note 3 for information on lease impairment charges.

Finance lease receivables, which are included in Prepaid Expenses and Other and Other Assets in our consolidated balance sheets are comprised of the following:

(dollars in millions)

At December 31,	2007			2006		
	Leveraged Leases	Direct Finance Leases	Total	Leveraged Leases	Direct Finance Leases	Total
Minimum lease payments receivable	$ 2,959	$ 131	$ 3,090	$ 3,311	$ 128	$ 3,439
Estimated residual value	1,434	16	1,450	1,637	18	1,655
Unamortized initial direct costs	–	1	1	–	–	–
Unearned income	(1,483)	(25)	(1,508)	(1,895)	(22)	(1,917)
	$ 2,910	$ 123	3,033	$ 3,053	$ 124	3,177
Allowance for doubtful accounts			(168)			(175)
Finance lease receivables, net			$ 2,865			$ 3,002
Current			$ 36			$ 40
Noncurrent			$ 2,829			$ 2,962

Accumulated deferred taxes arising from leveraged leases, which are included in Deferred Income Taxes, amounted to $2,307 million at December 31, 2007 and $2,674 million at December 31, 2006.

The following table is a summary of the components of income from leveraged leases:

(dollars in millions)

Years Ended December 31,	2007	2006	2005
Pretax lease income	$ 78	$ 96	$ 119
Income tax expense/(benefit)	30	57	(25)
Investment tax credits	4	4	4

The future minimum lease payments to be received from noncancelable leases, net of nonrecourse loan payments related to leveraged and direct financing leases for the periods shown at December 31, 2007, are as follows:

(dollars in millions)

Years	Capital Leases	Operating Leases
2008	$ 127	$ 29
2009	215	23
2010	136	16
2011	110	10
2012	110	9
Thereafter	2,392	16
Total	$ 3,090	$ 103

As Lessee

We lease certain facilities and equipment for use in our operations under both capital and operating leases. Total rent expense from continuing operations under operating leases amounted to $1,712 million in 2007, $1,608 million in 2006 and $1,458 million in 2005.

Amortization of capital leases is included in depreciation and amortization expense in the consolidated statements of income. Capital lease amounts included in plant, property and equipment are as follows:

At December 31,	2007	2006
	(dollars in millions)	
Capital leases	$ 329	$ 359
Accumulated amortization	(153)	(160)
Total	$ 176	$ 199

The aggregate minimum rental commitments under noncancelable leases for the periods shown at December 31, 2007, are as follows:

Years	Capital Leases	Operating Leases
		(dollars in millions)
2008	$ 75	$ 1,489
2009	63	1,276
2010	59	1,016
2011	55	756
2012	38	497
Thereafter	132	1,967
Total minimum rental commitments	422	$ 7,001
Less interest and executory costs	(110)	
Present value of minimum lease payments	312	
Less current installments	(46)	
Long-term obligation at December 31, 2007	$ 266	

As of December 31, 2007, the total minimum sublease rentals to be received in the future under noncancelable operating and capital subleases were $50 million and $22 million, respectively.

Note 11
Debt

Debt Maturing Within One Year

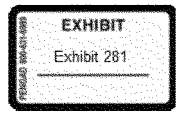
Debt maturing within one year is as follows:

At December 31,	2007	2006
	(dollars in millions)	
Long-term debt maturing within one year	$ 2,564	$ 4,139
Commercial paper	390	3,576
Total debt maturing within one year	$ 2,954	$ 7,715

The weighted average interest rate for our commercial paper at December 31, 2007 and December 31, 2006 was 4.6% and 5.3%, respectively.

Capital expenditures (primarily acquisition and construction of network assets) are partially financed, pending long-term financing, through bank loans and the issuance of commercial paper payable within 12 months.

At December 31, 2007, we had approximately $6.2 billion of unused bank lines of credit (including a $6 billion three-year committed facility that expires in September 2009 and various other facilities totaling approximately $400 million). Certain of these lines of credit contain requirements for the payment of commitment fees.



Long - Term Debt

Outstanding long-term debt obligations are as follows:

			(dollars in millions)	
At December 31,	Interest Rates %	Maturities	2007	2006
Notes payable	4.00 – 8.23	2008 – 2037	$ 14,923	$ 14,805
Telephone subsidiaries – debentures	4.63 – 7.00	2008 – 2033	10,580	11,703
	7.15 – 7.63	2012 – 2032	850	1,275
	7.85 – 8.75	2010 – 2031	1,679	1,679
Other subsidiaries – debentures and other	6.46 – 8.75	2008 – 2028	2,450	2,977
Employee stock ownership plan loans – NYNEX debentures	9.55	2010	70	92
Capital lease obligations (average rate 6.8% and 8.0%)			312	360
Unamortized discount, net of premium			(97)	(106)
Total long-term debt, including current maturities			30,767	32,785
Less: debt maturing within one year			(2,564)	(4,139)
Total long-term debt			$ 28,203	$ 28,646

Notes Payable

In April 2007, Verizon issued $750 million of 5.50% notes due 2017, $750 million of 6.25% notes due 2037, and $500 million of floating rate notes due 2009 resulting in cash proceeds of $1,977 million, net of discounts and issuance costs.

In March 2007, Verizon issued $1,000 million of 13-month floating rate exchangeable notes with an original maturity of 2008. These notes are exchangeable periodically at the option of the note holder into similar notes until 2017.

In February 2007, Verizon utilized a $425 million floating rate vendor financing facility due 2013.

In February 2008, we issued $4,000 million of fixed rate notes, with varying maturities, that resulted in cash proceeds of $3,953 million, net of discounts and issuance costs.

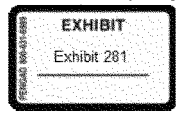
Previously, Verizon issued $1,750 million in principal amount at maturity of floating rate notes due August 15, 2007. On January 8, 2007, we redeemed the remaining $1,580 million principal of the outstanding floating rate notes at a redemption price equal to 100% of the principal amount of the notes being redeemed plus accrued and unpaid interest through the date of redemption. The total payment on the date of redemption was approximately $1,593 million. Approximately $1,600 million of other borrowings were redeemed during 2007.

Telephone and Other Subsidiary Debt

During the fourth quarter of 2007, Verizon redeemed previously guaranteed $480 million 7.0% debentures, Series B, issued by Verizon New England Inc. due 2042 at par plus accrued and unpaid interest to the redemption dates. During the third quarter of 2007, $150 million Verizon Pennsylvania Inc. 7.375% notes matured and were repaid. During the second quarter of 2007, $125 million Verizon New England Inc. 7.65% notes and the $225 million Verizon South Inc. 6.125% notes matured and were repaid. During the first quarter of 2007, $150 million GTE Southwest Inc. 6.23% notes and the $275 million Verizon California Inc. 7.65% notes matured and were repaid. In addition, we redeemed $500 million of GTE Corporation 7.90% debentures due February 1, 2027 and $300 million Verizon South Inc. 7.0% debentures, Series F, due 2041 at par plus accrued and unpaid interest to the redemption dates. During the first quarter we recorded pretax charges of $28 million ($18 million after-tax) in connection with the early extinguishments of debt.

During the second quarter of 2006, we redeemed/prepaid several debt issuances, including: Verizon North Inc. $200 million 7.625% Series C debentures due May 15, 2026; Verizon Northwest Inc. $175 million 7.875% Series B debentures due June 1, 2026; Verizon South Inc. $250 million 7.5% Series D debentures due March 15, 2026; Verizon California Inc. $25 million 9.41% Series W first mortgage bonds due 2014; Verizon California Inc. $30 million 9.44% Series X first mortgage bonds due 2015; Verizon Northwest Inc. $3 million 9.67% Series HH first mortgage bonds due 2010 and Contel of the South Inc. $14 million 8.159% Series GG first mortgage bonds due 2018. The gain/(loss) from these retirements was immaterial.

During the third quarter of 2005, we redeemed Verizon New England Inc. $250 million 6.875% debentures due October 1, 2023 resulting in a pretax charge of $10 million ($6 million after-tax) in connection with the early extinguishment of the debt.



Redemption of Debt Assumed in Merger

On January 17, 2006, Verizon announced offers to purchase two series of MCI senior notes, MCI $1,983 million aggregate principal amount of 6.688% Senior Notes Due 2009 and MCI $1,699 million aggregate principal amount of 7.735% Senior Notes Due 2014, at 101% of their par value. Due to the change in control of MCI that occurred in connection with the merger with Verizon on January 6, 2006, Verizon was required to make this offer to noteholders within 30 days of the closing of the merger. Noteholders tendered $165 million of the 6.688% Senior Notes. Separately, Verizon notified noteholders that MCI was exercising its right to redeem both series of Senior Notes prior to maturity under the optional redemption procedures provided in the indentures. The 6.688% Notes were redeemed on March 1, 2006, and the 7.735% Notes were redeemed on February 16, 2006.

In addition, on January 20, 2006, Verizon announced an offer to repurchase MCI $1,983 million aggregate principal amount of 5.908% Senior Notes Due 2007 at 101% of their par value. On February 21, 2006, $1,804 million of these notes were redeemed by Verizon. Verizon satisfied and discharged the indenture governing this series of notes shortly after the close of the offer for those noteholders who did not accept this offer.

We recorded pretax charges of $26 million ($16 million after-tax) during the first quarter of 2006 resulting from the extinguishment of the debt assumed in connection with the completion of this merger.

Zero-Coupon Convertible Notes

The previously issued $5.4 billion zero-coupon convertible notes due 2021, which resulted in gross proceeds of approximately $3 billion, were redeemable at the option of the holders on May 15th in each of the years 2004, 2006, 2011 and 2016. On May 15, 2004, $3,292 million of principal amount of the notes ($1,984 million after unamortized discount) were redeemed. On May 15, 2006, we redeemed the remaining $1,375 million accreted principal of the remaining outstanding zero-coupon convertible principal. The total payment on the date of redemption was $1,377 million.

Guarantees

Verizon Global Funding had guaranteed the debt obligations of GTE Corporation (but not the debt of its subsidiary or affiliate companies) that were issued and outstanding prior to July 1, 2003. Verizon assumed this guarantee in connection with the 2006 merger of Verizon Global Funding into Verizon. As of December 31, 2007, $2,450 million principal amount of these obligations remained outstanding.

Verizon and NYNEX Corporation are the joint and several co-obligors of the 20-Year 9.55% Debentures due 2010 previously issued by NYNEX on March 26, 1990. As of December 31, 2007, $70 million principal amount of this obligation remained outstanding. NYNEX and GTE no longer issue public debt or file SEC reports.

Debt Covenants

We and our consolidated subsidiaries are in compliance with all of our debt covenants.

Maturities of Long-Term Debt

Maturities of long-term debt outstanding at December 31, 2007 are as follows:

Years	(dollars in million)
2008	$ 2,564
2009	2,966
2010	2,908
2011	2,671
2012	4,291
Thereafter	15,367

Note 13

Financial Instruments

Derivatives

The ongoing effect of SFAS No. 133 and related amendments and interpretations on our consolidated financial statements will be determined each period by several factors, including the specific hedging instruments in place and their relationships to hedged items, as well as market conditions at the end of each period.

Interest Rate Risk Management

We have entered into domestic interest rate swaps to achieve a targeted mix of fixed and variable rate debt, where we principally receive fixed rates and pay variable rates based on LIBOR. These swaps hedge against changes in the fair value of our debt portfolio. We record the interest rate swaps at fair value in our balance sheet as assets and liabilities and adjust debt for the change in its fair value due to changes in interest rates.

We also enter into interest rate derivatives to limit our exposure to interest rate changes. In accordance with the provisions of SFAS No. 133, changes in fair value of these cash flow hedges due to interest rate fluctuations are recognized in Accumulated Other Comprehensive Loss. Amounts recorded to Other Comprehensive Income related to these interest rate cash flow hedges for the years ended December 31, 2007, 2006 and 2005 were not material.

Net Investment Hedges

During 2007, we entered into foreign currency forward contracts to hedge a portion of our net investment in Vodafone Omnitel. Changes in fair value of these contracts due to Euro exchange rate fluctuations are recognized in Accumulated Other Comprehensive Loss and partially offset the impact of foreign currency changes on the value of our net investment. As of December 31, 2007, Accumulated Other Comprehensive Loss includes unrecognized losses of approximately $57 million ($37 million after-tax) related to these hedge contracts, which along with the unrealized foreign currency translation balance on the investment hedged, remain in Accumulated Other Comprehensive Loss until the investment is sold.

During 2005, we entered into zero cost Euro collars to hedge a portion of our net investment in Vodafone Omnitel. During 2005, our positions in the zero cost euro collars were settled. As of December 31, 2007 and 2006, Accumulated Other Comprehensive Loss includes unrecognized gains of $2 million in each year related to these hedge contracts, which along with the unrealized foreign currency translation balance of the investment hedged, remain in Accumulated Other Comprehensive Loss until the investment is sold.

Other Derivatives

On May 17, 2005, we purchased 43.4 million shares of MCI common stock under a stock purchase agreement that contained a provision for the payment of an additional cash amount determined immediately prior to April 9, 2006 based on the market price of Verizon's common stock. Under SFAS No. 133, this additional cash payment was an embedded derivative which we carried at fair value and was subject to changes in the market price of Verizon stock. Since this derivative did not qualify for hedge accounting under SFAS No. 133, changes in its fair value were recorded in the consolidated statements of income in Other Income and (Expense), Net. As of December 31, 2006, this embedded derivative expired with no requirement for an additional cash payment to be made under the stock purchase agreement. During 2006 and 2005, we recorded pretax income of $4 million and $57 million, respectively, in connection with this embedded derivative.

Concentrations of Credit Risk

Financial instruments that subject us to concentrations of credit risk consist primarily of temporary cash investments, short-term and long-term investments, trade receivables, certain notes receivable, including lease receivables, and derivative contracts. Our policy is to deposit our temporary cash investments with major financial institutions. Counterparties to our derivative contracts are also major financial institutions. The financial institutions have all been accorded high ratings by primary rating agencies. We limit the dollar amount of contracts entered into with any one financial institution and monitor our counterparties' credit ratings. We generally do not give or receive collateral on swap agreements due to our credit rating and those of our counterparties. While we may be exposed to credit losses due to the nonperformance of our counterparties, we consider the risk remote and do not expect the settlement of these transactions to have a material effect on our results of operations or financial condition.

Fair Values of Financial Instruments

The tables that follow provide additional information about our significant financial instruments:

Financial Instrument	Valuation Method
Cash and cash equivalents and short-term investments	Carrying amounts
Short- and long-term debt (excluding capital leases)	Market quotes for similar terms and maturities or future cash flows discounted at current rates
Cost investments in unconsolidated businesses, derivative assets and liabilities and notes receivable	Future cash flows discounted at current rates, market quotes for similar instruments or other valuation models

(dollars in millions)

At December 31,	2007		2006	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Short- and long-term debt	$ 30,845	$ 32,380	$ 36,000	$ 37,165
Cost investments in unconsolidated businesses	315	315	270	270
Short- and long-term derivative assets	61	61	31	31
Short- and long-term derivative liabilities	57	57	10	10

Note 8

Earnings Per Share and Shareowners' Investment

Earnings Per Share

The following table is a reconciliation of the numerators and denominators used in computing earnings per common share:

Years Ended December 31,	2007	2006	2005
	(dollars and shares in millions, except per share amounts)		
Income Before Discontinued Operations, Extraordinary Item and Cumulative Effect of Accounting Change	$ 5,510	$ 5,480	$ 6,027
After-tax minority interest expense related to exchangeable equity interest	-	20	32
After-tax interest expense related to zero-coupon convertible notes	-	11	28
Income Before Discontinued Operations, Extraordinary Item and Cumulative Effect of Accounting Change – after assumed conversion of dilutive securities	$ 5,510	$ 5,511	$ 6,087
Weighted-average shares outstanding – basic	2,898	2,912	2,766
Effect of dilutive securities:			
Stock options	4	1	5
Exchangeable equity interest	-	18	29
Zero-coupon convertible notes	-	7	17
Weighted-average shares outstanding – diluted	2,902	2,938	2,817
Earnings Per Common Share from Income Before Discontinued Operations, Extraordinary Item and Cumulative Effect of Accounting Change			
Basic	$ 1.90	$ 1.88	$ 2.18
Diluted	$ 1.90	$ 1.88	$ 2.16

Certain outstanding options to purchase shares were not included in the computation of diluted earnings per common share because they were not dilutive, including approximately 170 million weighted-average shares during 2007, 228 million weighted-average shares during 2006 and 250 million shares during 2005.

The zero-coupon convertible notes were retired on May 15, 2006 and the exchangeable equity interest was converted on August 15, 2006 by issuing 29.5 million Verizon shares (see Notes 7 and 11).

Shareowners' Investment

Our certificate of incorporation provides authority for the issuance of up to 250 million shares of Series Preferred Stock, $.10 par value, in one or more series, with such designations, preferences, rights, qualifications, limitations and restrictions as the Board of Directors may determine.

We are authorized to issue up to 4.25 billion shares of common stock.

On February 7, 2008, the Board of Directors replaced the prior share buy back program with a new program for the repurchase of up to 100 million shares of Verizon common stock through the earlier of February 28, 2011 or when the total number of shares repurchased under the new buy back program aggregates to 100 million.

During 2007, 2006 and 2005, we repurchased approximately 68 million, 50 million and 7.9 million common shares under programs previously authorized by the Board of Directors.

NOTE 9

Stock-Based Compensation

Refer to Note 1 for a discussion of the adoption of SFAS No. 123(R), which was effective January 1, 2006.

Verizon Communications Long Term Incentive Plan

The Verizon Communications Long Term Incentive Plan (the Plan), permits the granting of nonqualified stock options, incentive stock options, restricted stock, restricted stock units, performance shares, performance share units and other awards. The maximum number of shares for awards is 207 million.

Restricted Stock Units

The Plan provides for grants of restricted stock units (RSUs) that generally vest at the end of the third year after the grant. The RSUs are classified as liability awards because the RSUs will be paid in cash upon vesting. The RSU award liability is measured at its fair value at the end of each reporting period and, therefore, will fluctuate based on the performance of Verizon's stock. Dividend equivalent units are also paid to participants at the time the RSU award is paid.

The following table summarizes Verizon's Restricted Stock Unit activity:

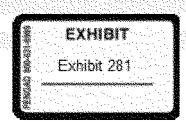
(shares in thousands)	Restricted Stock Units	Weighted-Average Grant-Date Fair Value
Outstanding, January 1, 2005	525	$ 36.75
Granted	6,410	36.06
Cancelled/Forfeited	(66)	36.07
Outstanding, December 31, 2005	6,869	36.12
Granted	9,116	31.88
Cancelled/Forfeited	(392)	35.01
Outstanding, December 31, 2006	15,593	33.67
Granted	**6,779**	**37.59**
Payments	**(602)**	**36.75**
Cancelled/Forfeited	**(197)**	**34.81**
Outstanding, December 31, 2007	**21,573**	**34.80**

Performance Share Units

The Plan also provides for grants of performance share units (PSUs) that generally vest at the end of the third year after the grant. The Human Resources Committee of the Board of Directors determines the number of PSUs a participant earns based on Verizon's Total Shareholder Return (TSR), as defined in the Plan, for a three-year performance cycle relative to the total shareholder returns of: the companies in the industry peer group (60% weight); and the companies in the Standard & Poor's (S&P) 500 index (40% weight). All payments are subject to approval by the Human Resources Committee. The PSUs are classified as liability awards because the PSU awards are paid in cash upon vesting. The PSU award liability is measured at its fair value at the end of each reporting period and, therefore, will fluctuate based on the price of Verizon's stock as well as Verizon's TSR relative to the peer group's TSR and the S&P 500 TSR. Dividend equivalent units are also paid to participants at the time that the PSU award is determined and paid, and in the same proportion as the PSU award.

The following table summarizes Verizon's Performance Share Unit activity:

(shares in thousands)	Performance Share Units	Weighted-Average Grant-Date Fair Value
Outstanding, January 1, 2005	10,079	$ 37.50
Granted	9,300	36.13
Cancelled/Forfeited	(288)	36.91
Outstanding, December 31, 2005	19,091	36.84
Granted	14,166	32.05
Payments	(3,607)	38.54
Cancelled/Forfeited	(1,227)	37.25
Outstanding, December 31, 2006	28,423	34.22
Granted	**10,371**	**37.59**
Payments	**(5,759)**	**36.75**
Cancelled/Forfeited	**(900)**	**36.18**
Outstanding, December 31, 2007	**32,135**	**34.80**



As of December 31, 2007, unrecognized compensation expense related to the unvested portion of Verizon's RSUs and PSUs was approximately $439 million and is expected to be recognized over a weighted-average period of approximately two years.

Verizon Wireless's Long-Term Incentive Plan

The 2000 Verizon Wireless Long-Term Incentive Plan (the Wireless Plan) provides compensation opportunities to eligible employees and other participating affiliates of Verizon Wireless (the Partnership). The Wireless Plan provides rewards that are tied to the long-term performance of the Partnership. Under the Wireless Plan, Value Appreciation Rights (VARs) were granted to eligible employees. The aggregate number of VARs that may be issued under the Wireless Plan is approximately 343 million.

VARs reflect the change in the value of the Partnership, as defined in the Wireless Plan, similar to stock options. Once VARs become vested, employees can exercise their VARs and receive a payment that is equal to the difference between the VAR price on the date of grant and the VAR price on the date of exercise, less applicable taxes. VARs are fully exercisable three years from the date of grant with a maximum term of 10 years. All VARs are granted at a price equal to the estimated fair value of the Partnership, as defined in the Wireless Plan, at the date of the grant.

With the adoption of SFAS No. 123(R), the Partnership began estimating the fair value of VARs granted using a Black-Scholes option valuation model. The following table summarizes the assumptions used in the model during 2007:

	Ranges
Risk-free rate	3.2% - 5.1%
Expected term (in years)	0.9 - 3.4
Expected volatility	18.1% - 23.4%
Expected dividend yield	n/a

The risk-free rate is based on the U.S. Treasury yield curve in effect at the time of the measurement date. The expected term of the VARs granted was estimated using a combination of the simplified method as prescribed in Staff Accounting Bulletin (SAB) No. 107, "Share Based Payments," (SAB No. 107) historical experience, and management judgment. Expected volatility was based on a blend of the historical and implied volatility of publicly traded peer companies for a period equal to the VARs expected life, ending on the measurement date, and calculated on a monthly basis.

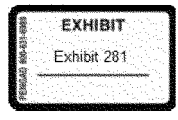
The following table summarizes the Value Appreciation Rights activity:

(shares in thousands)	VARs	Weighted-Average Grant-Date Fair Value
Outstanding rights, January 1, 2005	160,661	$ 15.63
Granted	10	14.85
Exercised	(47,964)	12.27
Cancelled/Forfeited	(3,784)	15.17
Outstanding rights, December 31, 2005	108,923	17.12
Exercised	(7,448)	13.00
Cancelled/Forfeited	(7,008)	23.25
Outstanding rights, December 31, 2006	94,467	16.99
Exercised	**(30,848)**	**15.07**
Cancelled/Forfeited	**(3,207)**	**24.55**
Outstanding rights, December 31, 2007	**60,412**	**17.58**

As of December 31, 2007, all VARs were fully vested.

Stock-Based Compensation Expense

After-tax compensation expense for stock-based compensation related to RSUs, PSUs, and VARs described above included in net income as reported was $750 million, $535 million and $359 million for 2007, 2006 and 2005, respectively.



Stock Options

The Verizon Long Term Incentive Plan provides for grants of stock options to employees at an option price per share of 100% of the fair market value of Verizon Stock on the date of grant. Each grant has a 10 year life, vesting equally over a three year period, starting at the date of the grant. We have not granted new stock options since 2004.

The following table summarizes Verizon's stock option activity:

(shares in thousands)	Stock Options	Weighted Average Exercise Price
Outstanding, January 1, 2005	280,889	$ 46.18
Exercised	(1,133)	28.73
Cancelled/Forfeited	(19,996)	49.62
Outstanding, December 31, 2005	259,760	46.01
Exercised	(3,371)	32.12
Cancelled/Forfeited	(27,025)	43.72
Outstanding, December 31, 2006	229,364	46.48
Exercised	**(33,079)**	**38.50**
Cancelled/Forfeited	**(21,422)**	**48.26**
Options outstanding, December 31, 2007	**174,863**	**47.78**
Options exercisable, December 31,		
2005	244,424	46.64
2006	225,067	46.69
2007	**174,838**	**47.78**

The following table summarizes information about Verizon's stock options outstanding as of December 31, 2007:

		Stock Options Outstanding	
Range of Exercise Prices	Shares (in thousands)	Weighted-Average Remaining Life	Weighted-Average Exercise Price
$ 20.00 – 29.99	27	4.7 years	$ 27.68
30.00 – 39.99	20,671	5.5	36.45
40.00 – 49.99	76,518	2.9	44.06
50.00 – 59.99	77,183	2.1	54.43
60.00 – 69.99	464	1.8	60.74
Total	174,863	2.9	47.78

The total intrinsic value was approximately $223 million for stock options outstanding as of December 31, 2007. The total intrinsic value for stock options exercised was $147 million, $10 million and $6 million, during 2007, 2006 and 2005, respectively.

The amount of cash received from the exercise of stock options was approximately $1,274 million, $101 million and $34 million for 2007, 2006 and 2005, respectively. The related tax benefits were not material.

The after-tax compensation expense for stock options was not material in 2007, and was $28 million and $53 million for 2006 and 2005, respectively.

Note 7

Employee Benefits

We maintain non-contributory defined benefit pension plans for many of our employees. In addition, we maintain postretirement health care and life insurance plans for our retirees and their dependents, which are both contributory and non-contributory and include a limit on the Company's share of cost for certain recent and future retirees. We also sponsor defined contribution savings plans to provide opportunities for eligible employees to save for retirement on a tax-deferred basis. We use a measurement date of December 31 for our pension and postretirement health care and life insurance plans.

Refer to Note 1 for a discussion of the adoption of SFAS No. 158, which was effective December 31, 2006.

Pension and Other Postretirement Benefits

Pension and other postretirement benefits for many of our employees are subject to collective bargaining agreements. Modifications in benefits have been bargained from time to time, and we may also periodically amend the benefits in the management plans.

As of June 30, 2006, Verizon management employees no longer earned pension benefits or earned service towards the company retiree medical subsidy. In addition, new management employees hired after December 31, 2005 are not eligible for pension benefits and managers with less than 13.5 years of service as of June 30, 2006 are not eligible for company-subsidized retiree healthcare or retiree life insurance benefits. Beginning July 1, 2006, management employees receive an increased company match on their savings plan contributions.

The following tables summarize benefit costs, as well as the benefit obligations, plan assets, funded status and rate assumptions associated with pension and postretirement health care and life insurance benefit plans:

Obligations and Funded Status

			(dollars in millions)	
	Pension		Health Care and Life	
At December 31,	2007	2006	2007	2006
Change in Benefit Obligations				
Beginning of year	**$ 34,159**	$ 35,540	**$ 27,330**	$ 26,783
Service cost	**442**	581	**354**	356
Interest cost	**1,975**	1,995	**1,592**	1,499
Plan amendments	**–**	–	**–**	50
Actuarial (gain) loss, net	**123**	(282)	**(409)**	152
Benefits paid	**(4,204)**	(2,762)	**(1,561)**	(1,564)
Termination benefits	**–**	47	**–**	14
Acquisitions and divestitures, net	**–**	477	**–**	40
Settlements	**–**	(1,437)	**–**	–
End of year	**$ 32,495**	$ 34,159	**$ 27,306**	$ 27,330
Change in Plan Assets				
Beginning of year	**$ 41,509**	$ 39,227	**$ 4,303**	$ 4,275
Actual return on plan assets	**4,591**	5,536	**352**	493
Company contributions	**737**	568	**1,048**	1,099
Benefits paid	**(4,204)**	(2,762)	**(1,561)**	(1,564)
Settlements	**–**	(1,437)	**–**	–
Acquisitions and divestitures, net	**26**	377	**–**	–
End of year	**$ 42,659**	$ 41,509	**$ 4,142**	$ 4,303
Funded Status				
End of year	**$ 10,164**	$ 7,350	**$ (23,164)**	$ (23,027)

	Pension		Health Care and Life	
(dollars in millions) At December 31,	2007	2006	2007	2006
Amounts recognized on the balance sheet				
Noncurrent assets	$ 13,745	$ 12,058	$ –	$ –
Current liabilities	(130)	–	(360)	–
Noncurrent liabilities	(3,451)	(4,708)	(22,804)	(23,027)
Total	$ 10,164	$ 7,350	$ (23,164)	$ (23,027)
Amounts recognized in Accumulated Other Comprehensive Loss (Pre-tax)				
Actuarial loss, net	$ 13	$ 1,428	$ 6,040	$ 6,799
Prior service cost	932	975	3,636	4,029
Total	$ 945	$ 2,403	$ 9,676	$ 10,828

Changes in benefit obligations were caused by factors including changes in actuarial assumptions and settlements.

The accumulated benefit obligation for all defined benefit pension plans was $31,343 million and $32,724 million at December 31, 2007 and 2006, respectively.

Information for pension plans with an accumulated benefit obligation in excess of plan assets follows:

(dollars in millions) At December 31,	2007	2006
Projected benefit obligation	$ 11,001	$ 11,495
Accumulated benefit obligation	10,606	11,072
Fair value of plan assets	8,868	8,288

Net Periodic Cost

The following table displays the details of net periodic pension and other postretirement costs:

	Pension			Health Care and Life		
(dollars in millions) Years Ended December 31,	2007	2006	2005	2007	2006	2005
Service cost	$ 442	$ 581	$ 675	$ 354	$ 356	$ 358
Interest cost	1,975	1,995	1,959	1,592	1,499	1,467
Expected return on plan assets	(3,175)	(3,173)	(3,231)	(317)	(328)	(349)
Amortization of prior service cost	43	44	42	392	360	290
Actuarial loss, net	98	182	124	316	290	258
Net periodic benefit (income) cost	(617)	(371)	(431)	2,337	2,177	2,024
Termination benefits	–	47	11	–	14	1
Settlement loss	–	56	80	–	–	–
Curtailment (gain) loss and other, net	–	–	436	–	–	(332)
Subtotal	–	103	527	–	14	(331)
Total (income) cost	$ (617)	$ (268)	$ 96	$ 2,337	$ 2,191	$ 1,693

In 2005, as a result of changes in management retiree benefits, we recorded pretax expense of $430 million for pension curtailments and pretax income of $332 million for retiree medical curtailments (see Note 3 for additional information).

Termination benefits and settlement and curtailment losses of $94 million pertaining to the sale of Hawaii operations in 2005 were recorded in the consolidated statements of income in Sales of Businesses, Net.

Other changes in plan assets and benefit obligations recognized in other comprehensive income in 2007 are as follows:

	(dollars in millions)			
	Pension		Health Care and Life	
At December 31,	2007	2006	2007	2006
Other changes in plan assets and benefit obligations recognized in other comprehensive income (Pre-tax)				
Actuarial (gain), net	$ (1,317)	$ –	$ (444)	$ –
Reversal of amortization items:				
Prior service cost	(43)	–	(392)	–
Actuarial loss, net	(98)	–	(316)	–
Total recognized in other comprehensive income	$ (1,458)	$ –	$ (1,152)	$ –

The estimated net loss and prior service cost for the defined benefit pension plans that will be amortized from Accumulated Other Comprehensive Loss into net periodic benefit cost over the next fiscal year are $39 million and $54 million, respectively. The estimated net loss and prior service cost for the defined benefit postretirement plans that will be amortized from Accumulated Other Comprehensive Loss into net periodic benefit cost over the next fiscal year are $268 million and $397 million, respectively.

Additional Information

As a result of the adoption of SFAS No. 158 in 2006, we no longer record an additional minimum pension liability. In prior years, as a result of changes in interest rates and changes in investment returns, an adjustment to the additional minimum pension liability was required for a number of plans, as indicated below. The adjustment in the liability was recorded as a charge or (credit) to Accumulated Other Comprehensive Loss, net of tax, in shareowners' investment in the consolidated balance sheets. The Additional Minimum Pension Liability at December 31, 2006, was reduced by $809 million, ($526 million after-tax) based on the final measurement just prior to the adoption of SFAS No. 158. The remaining $396 million, ($262 million after-tax), was reversed as a result of the adoption of SFAS No. 158.

	(dollars in millions)		
Years Ended December 31,	2007	2006	2005
Increase (decrease) in minimum liability included in other comprehensive income, net of tax	$ –	$ (526)	$ (51)

Assumptions

The weighted-average assumptions used in determining benefit obligations follow:

	Pension		Health Care and Life	
At December 31,	2007	2006	2007	2006
Discount rate	**6.50%**	6.00%	**6.50%**	6.00%
Rate of future increases in compensation	**4.00**	4.00	**4.00**	4.00

The weighted-average assumptions used in determining net periodic cost follow:

	Pension			Health Care and Life		
Years Ended December 31,	2007	2006	2005	2007	2006	2005
Discount rate	**6.00%**	5.75%	5.75%	**6.00%**	5.75%	5.75%
Expected return on plan assets	**8.50**	8.50	8.50	**8.25**	8.25	7.75
Rate of compensation increase	**4.00**	4.00	5.00	**4.00**	4.00	4.00

In order to project the long-term target investment return for the total portfolio, estimates are prepared for the total return of each major asset class over the subsequent 10-year period, or longer. Those estimates are based on a combination of factors including the following: current market interest rates and valuation levels, consensus earnings expectations, historical long-term risk premiums and value-added. To determine the aggregate return for the pension trust, the projected return of each individual asset class is then weighted according to the allocation to that investment area in the trust's long-term asset allocation policy.

The assumed Health Care Cost Trend Rates follow:

	Health Care and Life		
At December 31,	2007	2006	2005
Health care cost trend rate assumed for next year	**10.00%**	10.00%	10.00%
Rate to which cost trend rate gradually declines	**5.00**	5.00	5.00
Year the rate reaches level it is assumed to remain thereafter	**2013**	2011	2010

A one-percentage-point change in the assumed health care cost trend rate would have the following effects:

	(dollars in millions)	
One-Percentage-Point	Increase	Decrease
Effect on 2007 service and interest cost	$ 295	$ (234)
Effect on postretirement benefit obligation as of December 31, 2007	**3,038**	**(2,512)**

Plan Assets

Pension Plans

The weighted-average asset allocations for the pension plans by asset category follow:

At December 31,	2007	2006
Asset Category		
Equity securities	**59%**	63%
Debt securities	**18**	16
Real estate	**6**	4
Other	**17**	17
Total	**100%**	100%

Equity securities include Verizon common stock of $127 million and $95 million at December 31, 2007 and 2006, respectively. Other assets include cash and cash equivalents (primarily held for the payment of benefits), private equity and investments in absolute return strategies.

Health Care and Life Plans

The weighted-average asset allocations for the other postretirement benefit plans by asset category follow:

At December 31,	2007	2006
Asset Category		
Equity securities	**74%**	72%
Debt securities	**21**	21
Other	**5**	7
Total	**100%**	100%

There was no Verizon common stock held at the end of 2007 and 2006 in the health care and life plans.

This portfolio strategy emphasizes a long-term equity orientation, significant global diversification, the use of both public and private investments and professional financial and operational risk controls. Assets are allocated according to a long-term policy neutral position and held within a relatively narrow and pre-determined range. Both active and passive management approaches are used depending on perceived market efficiencies and various other factors.

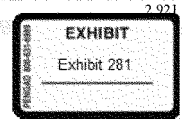
Cash Flows

In 2007, we contributed $612 million to our qualified pension plans, $125 million to our nonqualified pension plans and $1,048 million to our other postretirement benefit plans. We estimate required qualified pension plan contributions for 2008 to be approximately $350 million. We also anticipate $130 million in contributions to our non-qualified pension plans and $1,580 million to our other postretirement benefit plans in 2008.

Estimated Future Benefit Payments

The benefit payments to retirees, which reflect expected future service, are expected to be paid as follows:

			(dollars in millions)
	Pension Benefits	Health Care and Life Prior to Medicare Prescription Drug Subsidy	Expected Medicare Prescription Drug Subsidy
2008	$ 4,422	$ 1,925	$ 88
2009	3,665	2,036	99
2010	2,944	2,131	110
2011	2,921	2,205	120
2012		2,212	133
2013 – 2017		11,045	838



Savings Plan and Employee Stock Ownership Plans

We maintain four leveraged employee stock ownership plans (ESOP). Only one plan currently has unallocated shares. We match a certain percentage of eligible employee contributions to the savings plans with shares of our common stock from this ESOP. At December 31, 2007, the number of unallocated and allocated shares of common stock in this ESOP were 4 million and 77 million, respectively. All leveraged ESOP shares are included in earnings per share computations.

Total savings plan costs were $712 million, $669 million, and $499 million in 2007, 2006 and 2005, respectively.

Severance Benefits

The following table provides an analysis of our severance liability recorded in accordance with SFAS No. 112, *Employers' Accounting for Postemployment Benefits* (SFAS No. 112):

				(dollars in millions)	
Year	Beginning of Year	Charged to Expense	Payments	Other	End of Year
2005	$ 753	$ 99	$ (251)	$ (5)	$ 596
2006	596	343	(383)	88	644
2007	**644**	**743**	**(363)**	**–**	**1,024**

The remaining severance liability is actuarially determined. The 2007 expense includes charges for the involuntary separation of approximately 9,000 employees, including approximately 4,000 during the fourth quarter of 2007 and 5,000 expected during 2008. In addition, the expense includes costs associated with higher assumed attrition beyond 2008. The 2006 expense includes charges for the involuntary separation of 4,100 employees (see Note 3).

Note 10

Income Taxes

The components of Income Before Provision for Income Taxes, Discontinued Operations, Extraordinary Item and Cumulative Effect of Accounting Change are as follows:

		(dollars in millions)	
Years Ended December 31,	**2007**	2006	2005
Domestic	**$ 8,508**	$ 7,000	$ 7,707
Foreign	**984**	1,154	741
	$ 9,492	$ 8,154	$ 8,448

The components of the provision for income taxes from continuing operations are as follows:

		(dollars in millions)	
Years Ended December 31,	**2007**	2006	2005
Current			
Federal	**$ 2,568**	$ 2,364	$ 2,772
Foreign	**461**	141	81
State and local	**545**	421	661
	3,574	2,926	3,514
Deferred			
Federal	**397**	(9)	(844)
Foreign	**66**	(45)	(55)
State and local	**(48)**	(191)	(187)
	415	(245)	(1,086)
Investment tax credits	**(7)**	(7)	(7)
Total income tax expense	**$ 3,982**	$ 2,674	$ 2,421

The following table shows the principal reasons for the difference between the effective income tax rate and the statutory federal income tax rate:

Years Ended December 31,	2007	2006	2005
Statutory federal income tax rate	**35.0%**	35.0%	35.0%
Distributions from foreign investments	**5.9**	–	2.0
State and local income tax, net of federal tax benefits	**3.4**	1.8	3.6
Tax benefits from investment losses	**(0.8)**	(0.9)	(4.5)
Equity in earnings from unconsolidated businesses	**(2.3)**	(3.8)	(3.5)
Other, net	**0.8**	0.7	(3.9)
Effective income tax rate	**42.0%**	32.8%	28.7%

The effective income tax rate is the provision for income taxes as a percentage of income from continuing operations before the provision for income taxes. The effective income tax rate in 2007 compared to 2006 was higher primarily due to recording $610 million of foreign and domestic taxes and expenses specifically relating to our share of Vodafone Omnitel's distributable earnings. Verizon received a net distribution from Vodafone Omnitel in December 2007 of approximately $2.1 billion and anticipates that it may receive an additional distribution from Vodafone Omnitel within the next twelve months. The 2007 rate was also increased due to higher state taxes in 2007 as compared to 2006, as well as greater benefits from foreign operations in 2006 compared to 2007. These increases were partially offset by lower expenses recorded for unrecognized tax benefits in 2007 as compared to 2006.

Our effective income tax rate in 2006 was higher than 2005 primarily as a result of favorable tax settlements and the recognition of capital loss carry forwards in 2005. These increases were partially offset by tax benefits from foreign operations and lower state taxes in 2006 compared to 2005.

Deferred taxes arise because of differences in the book and tax bases of certain assets and liabilities. Significant components of deferred tax are shown in the following table:

		(dollars in millions)
At December 31,	2007	2006
Employee benefits	**$ 7,067**	$ 7,788
Tax loss carry forwards	**2,868**	2,994
Uncollectible accounts receivable	**400**	455
Other – assets	**422**	903
	10,757	12,140
Valuation allowance	**(2,671)**	(2,600)
Deferred tax assets	**8,086**	9,540
Former MCI intercompany accounts receivable basis difference	**1,977**	2,003
Depreciation	**7,045**	7,617
Leasing activity	**2,307**	2,674
Wireless joint venture including wireless licenses	**11,634**	12,177
Other – liabilities	**349**	2,493
Deferred tax liabilities	**23,312**	26,964
Net deferred tax liability	**$ 15,226**	$ 17,424

Employee benefits deferred tax assets include $4,929 million and $5,590 million at December 31, 2007 and 2006, respectively, recognized in accordance with SFAS No. 158 (see Notes 1 and 15).

At December 31, 2007, undistributed earnings of our foreign subsidiaries indefinitely invested outside of the United States amounted to approximately $900 million. We have not provided deferred taxes on these earnings because we intend that they will remain indefinitely invested outside of the United States. Determination of the amount of unrecognized deferred taxes related to these undistributed earnings is not practical.

At December 31, 2007, we had net operating loss carry forwards for income tax purposes of approximately $3,600 million, expiring through 2026 in various foreign, state and local jurisdictions. The amount of tax loss carry forwards reflected as a deferred tax asset above has been reduced by approximately $1,017 million due to federal and state tax law limitations on utilization of net operating losses.

During 2007, the valuation allowance increased $71 million. Under current accounting guidelines, approximately $2.0 billion of the valuation allowance, if recognized, would be recorded as a reduction of goodwill.

FASB Interpretation No. 48

Effective January 1, 2007, we adopted FIN 48, which prescribes the recognition, measurement and disclosure standards for uncertainties in income tax positions. See Note 1 for a discussion of the impact to Verizon of adopting this new accounting pronouncement.

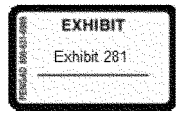
A reconciliation of the beginning and ending balance of unrecognized tax benefits is as follows:

	(dollars in millions)
Balance at January 1, 2007	$ 2,958
Additions based on tax positions related to the current year	141
Additions for tax positions of prior years	291
Reductions for tax positions of prior years	(420)
Settlements	(11)
Lapses of statutes of limitations	(76)
Balance at December 31, 2007	**$ 2,883**

Included in the total unrecognized tax benefits at December 31, 2007 is $1,245 million that, if recognized, would favorably affect the effective income tax rate. The remaining unrecognized tax benefits relate to temporary items that would not affect the effective income tax rate and uncertain tax positions resulting from prior acquisitions which, pursuant to current purchase accounting tax rules, would adjust goodwill.

We recognize any interest and penalties accrued related to unrecognized tax benefits in income tax expense. During the year ended December 31, 2007, we recognized approximately $154 million (after-tax) for the payment of interest and penalties. We had approximately $598 million (after-tax) and $444 million (after-tax) for the payment of interest and penalties accrued in the balance sheet at December 31, 2007 and January 1, 2007, respectively.

Verizon or one of its subsidiaries files income tax returns in the U.S. federal jurisdiction, and various state, local and foreign jurisdictions. The Company is generally no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2000. The Internal Revenue Service (IRS) is currently examining the Company's U.S. income tax returns for years 2000 through 2003. As a large taxpayer, we are under continual audit by the IRS and other taxing authorities on numerous open tax positions. It is possible that the amount of the liability for unrecognized tax benefits could change by a significant amount during the next twelve month period. An estimate of the range of the possible change cannot be made until issues are further developed or examinations close.



Note 7

Segment Information

Reportable Segments

On March 30, 2007, we completed the sale of our 52% interest in TELPRI. On February 12, 2007 we entered into an MOU to sell our interest in CANTV. On December 1, 2006, we closed the sale of Verizon Dominicana. Consequently, with these three transactions, we completed the disposition of our International segment. For further information concerning the disposition of the International segment, see Note 2.

On November 17, 2006, we completed the spin-off of our Information Services segment which included our domestic print and Internet yellow pages directories business. For further information concerning the disposition of the Information Services segment, see Note 2.

We now have two reportable segments, which we operate and manage as strategic business units and organize by products and services. We measure and evaluate our reportable segments based on segment income. Corporate, eliminations and other includes unallocated corporate expenses, intersegment eliminations recorded in consolidation, the results of other businesses such as our investments in unconsolidated businesses, lease financing, and other adjustments and gains and losses that are not allocated in assessing segment performance due to their non-recurring or unusual nature. These adjustments include transactions that the chief operating decision makers exclude in assessing business unit performance due primarily to their non-recurring and/or non-operational nature. Although such transactions are excluded from the business segment results, they are included in reported consolidated earnings. Gains and losses that are not individually significant are included in all segment results, since these items are included in the chief operating decision makers' assessment of unit performance.

Our segments and their principal activities consist of the following:

Segment	Description
Wireline	Wireline communications services include voice, Internet access, broadband video and data, next generation IP network services, network access, long distance and other services. We provide these services to consumers, carriers, businesses and government customers both domestically and internationally in 150 countries.
Domestic Wireless	Domestic Wireless's products and services include wireless voice, data products, and other value-added services and equipment sales across the United States.

The following table provides operating financial information for our two reportable segments:

(dollars in millions)

2007	Wireline	Domestic Wireless	Total Segments
External revenues	$ 49,059	$ 43,777	$ 92,836
Intersegment revenues	1,257	105	1,362
Total operating revenues	50,316	43,882	94,198
Cost of services and sales	25,220	13,456	38,676

Reconciliation To Consolidated Financial Information

A reconciliation of the results for the operating segments to the applicable line items in the consolidated financial statements is as follows:

	2007	2006	2005
			(dollars in millions)
Operating Revenues			
Total reportable segments	$ 94,198	$ 88,771	$ 69,917
Impact of Hawaii (2005) and other operations sold (2006)	–	104	180
Corporate, eliminations and other	(729)	(693)	(579)
Consolidated operating revenues – reported	$ 93,469	$ 88,182	$ 69,518
Operating Expenses			
Total reportable segments	$ 77,727	$ 74,620	$ 57,745
Merger integration costs (see Note 8)	178	232	–
Access line spin-off related charges (see Note 2)	84	–	–
Taxes on foreign distributions (see Note 6)	15	–	–
Verizon Center relocation (see Note 3)	–	184	(18)
Severance, pension and benefit charges, net (see Note 3)	772	425	157
Impact of Hawaii (2005) and other operations sold (2006) (see Note 2)	–	89	118
Sales of businesses net (see Note 2)	–	–	(530)
Lease impairment and other items (see Note 3)	–	–	125
Verizon Foundation contribution (see Note 2)	100	–	–
Corporate, eliminations and other	(985)	(741)	(660)
Consolidated operating expenses – reported	$ 77,891	$ 74,809	$ 56,937

	2007	2006	2005
			(dollars in millions)
Net Income			
Segment income – reportable segments	$ 5,300	$ 4,601	$ 4,125
Debt extinguishment costs (see Note 11)	–	(16)	–
Merger integration costs (see Note 8)	(112)	(146)	–
Sales of businesses and investments, net (see Note 2)	5	(541)	336
Extraordinary item (see Note 2)	(131)	–	–
Access line spin-off related charges (see Note 2)	(80)	–	–
Taxes on foreign distributions (see Note 6)	(610)	–	(206)
Cumulative effect of accounting change (see Note 1)	–	(42)	–
Verizon Center relocation, net (see Note 3)	–	(118)	8
Severance, pension and benefit charges (see Note 3)	(477)	(258)	(95)
Domestic print and Internet yellow pages directories business spin-off costs (see Note 2)	–	(101)	–
Lease impairment and other items (see Note 3)	–	–	(133)
Tax benefits (see Note 3)	–	–	336
Income from discontinued operations, net of tax (see Note 2)	72	1,398	1,370
Corporate and other	1,554	1,420	1,656
Consolidated net income – reported	$ 5,521	$ 6,197	$ 7,397
Assets			
Total reportable segments	$ 176,019	$ 174,263	$ 151,917
Reconciling items	10,940	14,541	16,213
Consolidated assets	$ 186,959	$ 188,804	$ 168,130

Financial information for Wireline excludes the effects of Hawaii access lines and directory operations sold in 2005, in addition to the sale of non-strategic assets of the Wireline segment sold in the first quarter of 2007.

We generally account for intersegment sales of products and services and asset transfers at current market prices. We are not dependent on any single customer.

Geographic Areas

Our foreign investments are located principally in the Americas and Europe. Domestic and foreign operating revenues are based on the location of customers. Long-lived assets consist of plant, property and equipment (net of accumulated depreciation) and investments in unconsolidated businesses. The table below presents financial information by major geographic area:

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Domestic			
Operating revenues	**$ 89,504**	$ 84,731	$ 69,327
Long-lived assets	**85,081**	82,277	74,813
International			
Operating revenues	**3,965**	3,451	191
Long-lived assets	**3,585**	4,947	2,776

Note 13

Comprehensive Income

Comprehensive income consists of net income and other gains and losses affecting shareowners' investment that, under GAAP, are excluded from net income. Significant changes in the components of other comprehensive income (loss), net of income tax expense (benefit), are described below.

Foreign Currency Translation

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Foreign Currency Translation Adjustments:			
Vodafone Omnitel	**$ 397**	$ 330	$ (590)
CANTV	**412**	–	(47)
Verizon Dominicana	**–**	786	(114)
Other international operations	**29**	80	(4)
	$ 838	$ 1,196	$ (755)

We sold our interest in CANTV during the second quarter of 2007. We sold our interest in Verizon Dominicana during the fourth quarter of 2006. See Note 2 for information on CANTV and Verizon Dominicana. The foreign currency translation adjustment in 2005 represents unrealized losses from the decline in the functional currencies of our investments in Vodafone Omnitel, Verizon Dominicana and CANTV.

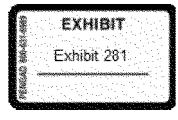
Unrealized Gains (Losses) on Marketable Securities

The changes in Unrealized Gains (Losses) on Marketable Securities were as follows:

			(dollars in millions)
Years Ended December 31,	2007	2006	2005
Unrealized Gains (Losses) on Marketable Securities			
Unrealized gains, net of taxes of $13, $30 and $10	**$ 13**	$ 79	$ 4
Less reclassification adjustments for gains realized in net income, net of taxes of $11, $13 and $14	**(17)**	(25)	(25)
Net unrealized gains (losses) on marketable securities	**$ (4)**	$ 54	$ (21)

Defined Benefit Pension and Postretirement Plans

During 2007, the change in defined benefit pension and postretirement plans of $1,948 million, net of taxes of $661 million, represents the change in the funded status of the plans in connection with the annual pension and postretirement valuation in accordance with SFAS No. 158. The funded status was impacted by changes in actuarial assumptions, asset performance and plan experience.



Accumulated Other Comprehensive Loss

The components of Accumulated Other Comprehensive Loss are as follows:

At December 31,	2007	(dollars in millions) 2006
Foreign currency translation adjustments	$ 1,167	$ 329
Net unrealized losses on hedging	(10)	(11)
Unrealized gains on marketable securities	60	64
Defined benefit pension and postretirement plans	(5,723)	(7,671)
Other	–	(241)
Accumulated Other Comprehensive Loss	$ (4,506)	$ (7,530)

The foreign currency translation adjustments at December 31, 2007 were primarily comprised of unrealized gains in the value of our investment in Vodafone Omnitel as a result of the appreciation of the Euro.

Note 19

Additional Financial Information

The tables that follow provide additional financial information related to our consolidated financial statements:

Income Statement Information

Years Ended December 31,	2007	2006	(dollars in millions) 2005
Depreciation expense	$ 13,036	$ 13,122	$ 12,171
Interest cost incurred	2,258	2,811	2,481
Capitalized interest	(429)	(462)	(352)
Advertising expense	2,463	2,271	1,844

Balance Sheet Information

At December 31,	2007	(dollars in millions) 2006
Accounts Payable and Accrued Liabilities		
Accounts payable	$ 4,491	$ 4,392
Accrued expenses	2,400	2,982
Accrued vacation, salaries and wages	4,828	3,575
Interest payable	473	614
Accrued taxes	2,270	2,757
	$ 14,462	$ 14,320
Other Current Liabilities		
Advance billings and customer deposits	$ 2,476	$ 2,226
Dividends payable	1,266	1,199
Other	3,583	4,666
	$ 7,325	$ 8,091

Cash Flow Information

Years Ended December 31,	2007	2006	2005
		(dollars in millions)	
Cash Paid			
Income taxes, net of amounts refunded	**$ 2,491**	$ 3,299	$ 4,189
Interest, net of amounts capitalized	**1,682**	2,103	2,025
Supplemental Investing and Financing Transactions			
Cash acquired in business combinations	**17**	2,361	–
Assets acquired in business combinations	**589**	18,511	635
Liabilities assumed in business combinations	**154**	7,813	35
Debt assumed in business combinations	**–**	6,169	9
Shares issued to Price to acquire limited partnership interest in VZ East (Note 7)	**–**	1,007	–

Other, net cash provided by operating activities – continuing operations primarily included the add back of the minority interest's share of Verizon Wireless earnings, net of dividends paid to minority partners, of $3,953 million in 2007, $3,232 million in 2006 and $1,720 million in 2005.

Note 21

Commitments and Contingencies

Several state and federal regulatory proceedings may require our telephone operations to pay penalties or to refund to customers a portion of the revenues collected in the current and prior periods. There are also various legal actions pending to which we are a party and claims which, if asserted, may lead to other legal actions. We have established reserves for specific liabilities in connection with regulatory and legal actions, including environmental matters, that we currently deem to be probable and estimable. We do not expect that the ultimate resolution of pending regulatory and legal matters in future periods, including the Hicksville matter described below, will have a material effect on our financial condition, but it could have a material effect on our results of operations for a given reporting period.

During 2003, under a government-approved plan, remediation commenced at the site of a former Sylvania facility in Hicksville, New York that processed nuclear fuel rods in the 1950s and 1960s. Remediation beyond original expectations proved to be necessary and a reassessment of the anticipated remediation costs was conducted. A reassessment of costs related to remediation efforts at several other former facilities was also undertaken. In September 2005, the Army Corps of Engineers (ACE) accepted the Hicksville site into the Formerly Utilized Sites Remedial Action Program. This may result in the ACE performing some or all of the remediation effort for the Hicksville site with a corresponding decrease in costs to Verizon. To the extent that the ACE assumes responsibility for remedial work at the Hicksville site, an adjustment to a reserve previously established for the remediation may be necessary. Adjustments may also be necessary based upon actual conditions discovered during the remediation at any of the sites requiring remediation.

In connection with the execution of agreements for the sales of businesses and investments, Verizon ordinarily provides representations and warranties to the purchasers pertaining to a variety of nonfinancial matters, such as ownership of the securities being sold, as well as financial losses.

Subsequent to the sale of Verizon Information Services Canada in 2004, we continue to provide a guarantee to publish directories, which was issued when the directory business was purchased in 2001 and had a 30-year term (before extensions). The preexisting guarantee continues, without modification, despite the subsequent sale of Verizon Information Services Canada and the spin-off of our domestic print and Internet yellow pages directories business. The possible financial impact of the guarantee, which is not expected to be adverse, cannot be reasonably estimated since a variety of the potential outcomes available under the guarantee result in costs and revenues or benefits that may offset each other. In addition, performance under the guarantee is not likely.

As of December 31, 2007, letters of credit totaling $225 million were executed in the normal course of business, which support several financing arrangements and payment obligations to third parties.

We have several commitments primarily to purchase network services, equipment and software from a variety of suppliers totaling $844 million. Of this total amount, $613 million, $137 million, $51 million, $28 million, $5 million and $10 million are expected to be purchased in 2008, 2009, 2010, 2011, 2012 and thereafter, respectively.

Note 21

Quarterly Financial Information (Unaudited)

(dollars in millions, except per share amounts)

Quarter Ended	Operating Revenues	Operating Income	Income Before Discontinued Operations, Extraordinary Item and Cumulative Effect of Accounting Change — Amount	Per Share-Basic	Per Share-Diluted	Net Income
2007						
March 31	**$ 22,584**	**$ 3,796**	**$ 1,484**	**$ .51**	**$ .51**	**$ 1,495**
June 30	**23,273**	**4,149**	**1,683**	**.58**	**.58**	**1,683**
September 30	**23,772**	**4,210**	**1,271**	**.44**	**.44**	**1,271**
December 31	**23,840**	**3,423**	**1,072**	**.37**	**.37**	**1,072**
2006						
March 31	$ 21,231	$ 3,175	$ 1,282	$ .44	$ .44	$ 1,632
June 30	21,886	3,217	1,263	.43	.43	1,611
September 30	22,459	3,537	1,545	.53	.53	1,922
December 31	22,606	3,444	1,390	.48	.48	1,032

- Results of operations for the first quarter of 2007 include after-tax charges of $9 million for merger integration costs, $131 million for an extraordinary charge related to the nationalization of CANTV, a $70 million after-tax gain on the sale of our interest in TELPRI and a $65 million after tax contribution to the Verizon Foundation.
- Results of operations for the second quarter of 2007 include after-tax charges of $17 million for merger integration costs.
- Results of operations for the third quarter of 2007 include after-tax charges of $28 million for merger integration costs, $44 million related to access line spin-off charges and $471 million associated with taxes on foreign distributions.
- Results of operations for the fourth quarter of 2007 include after-tax charges of $58 million for merger integration costs, $36 million related to access line spin-off charges, $139 million associated with taxes on foreign distributions, and $477 million for severance, pension and other charges.
- Results of operations for the first quarter of 2006 include after-tax charges of $16 million for the early extinguishment of debt related to the MCI merger, $28 million for costs associated with the relocation to Verizon Center, $42 million for the impact of accounting for share based payments, and $35 million for merger integration costs.
- Results of operations for the second quarter of 2006 include after-tax charges of $48 million for merger integration costs, $29 million for costs associated with the relocation to Verizon Center and $186 million for severance, pension and benefits charges.
- Results of operations for the third quarter of 2006 include after-tax charges of $16 million for merger integration costs, $31 million for costs associated with the relocation to Verizon Center and $17 million for severance, pension and benefits charges.
- Results of operations for the fourth quarter of 2006 include after-tax charges of $47 million for merger integration costs, $30 million for costs associated with the relocation to Verizon Center, $55 million for severance, pension and benefits charges, $541 million for the loss on sale of Verizon Dominicana included in discontinued operations, and $101 million for costs associated with the spin-off of our directories publishing business.

Income before discontinued operations per common share is computed independently for each quarter and the sum of the quarters may not equal the annual amount.

Consent of Independent Registered Public Accounting Firm

We consent to the incorporation by reference in this Annual Report (Form 10-K) of Verizon Communications Inc. (Verizon) of our reports dated February 22, 2008, with respect to the consolidated financial statements of Verizon and the effectiveness of internal control over financial reporting of Verizon, included in the 2007 Annual Report to Shareowners of Verizon.

Our audits also included the financial statement schedule of Verizon listed in Item 15(a). This schedule is the responsibility of Verizon's management. Our responsibility is to express an opinion based on our audits. In our opinion, the financial statement schedule referred to above, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also consent to the incorporation by reference in the following registration statements of Verizon and where applicable, related Prospectuses, of our reports dated February 22, 2008, with respect to the consolidated financial statements of Verizon and the effectiveness of internal control over financial reporting of Verizon, incorporated herein by reference, and our report included in the preceding paragraph with respect to the financial statement schedule of Verizon included in this Annual Report (Form 10-K) for the year ended December 31, 2007: Form S-8, No. 333-66459; Form S-8, No. 333-66349; Form S-4, No. 333-11573; Form S-8, No. 333-41593; Form S-8, No. 333-42801; Form S-4, No. 333-76171; Form S-8, No. 333-75553; Form S-8, No. 333-76171; Form S-8, No. 333-50146; Form S-8, No. 333-53830; Form S-4, No. 333-82408; Form S-8, No. 333-82690; Form S-3, No. 333-109028-01; Form S-3, No. 333-106750; Form S-8, No. 333-105512; Form S-8, No. 333-105511; Form S-8, No. 333-118904; Form S-8, No. 333-123374; Form S-4, No. 333-124008; Form S-8, No. 333-124008; Form S-4, No. 333-132651; Form S-8, No. 333-134846; Form S-8, No. 333-137475; Form S-3, No. 333-138705; Form S-8, No. 333-142549; and Form S-3, 333-143744.

EXHIBIT 31.1

I, Ivan G. Seidenberg, certify that:

1. I have reviewed this annual report on Form 10-K of Verizon Communications Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

George

Attached is a paper on bonus depreciation as it applies to broadband deployment.

Mark Mullet in our office already forwarded to John Buckley and Jon Sheiner.

Just wanted you to have for your review and input with Charlie.

Thanks Roger.

Jon & John,

Attached is an industry paper regarding suggested changes to previous 'bonus depreciation' language used in 2002 and 2003. In order to encourage more broadband investment and job creation in our industry the rules on self constructed property need to be modified in section 168(K). Otherwise, the IRS is likely to whipsaw us on their view of 'projects'. We think that in 2002 Congress did not understand the advance costs needed to deploy broadband, and how the definition of 'projects' can be manipulated so significant investments did not qualify that we think should have.

We understand you may be working on similar language (as in this paper) and that a bill could move to the House floor early next week. As a result, I want to provide you with our industry comments (attached). I hope this is helpful, and thank you for considering these comments.

Regards,

Mark

CSOC.CBR.00032313

SUMMARY AS OF:
4/15/2008--Passed House amended. (There are 2 other summaries)

Taxpayer Assistance and Simplification Act of 2008 - (Sec. 2) Amends the Internal Revenue Code to modify the standards for imposing penalties on tax return preparers for understatements of tax to require: (1) substantial authority for a position with respect to an item on a tax return if such position was not disclosed with the return; and (2) a reasonable basis for a position that was disclosed with the return.

Requires tax return preparers to have a reasonable belief that a position with respect to a tax shelter or a reportable transaction (a transaction having a potential for tax avoidance or evasion) will more likely than not be sustained on its merits.

(Sec. 3) Removes certain limitations on the tax deduction for employee use of cellular telephones.

(Sec. 4) Delays until 2012 the 3% withholding requirement on government payments to contractors providing goods and services.

(Sec. 5) Exempts recipients of home care services under federally-**assisted** state or local government home care programs for the elderly or disabled from payment of employment taxes for amounts paid to service providers. Imposes liability for payment of such taxes on the fiscal administrators of such programs.

(Sec. 6) Allows officers and employees of the Department of the Treasury to refer **taxpayers** for advice and **assistance** to federally-funded low-income **taxpayer** clinics.

(Sec. 7) Authorizes the Secretary of the Treasury to make grants to provide matching funds for volunteer income tax **assistance** programs. Increases to $10 million the annual amount the Secretary may allocate for grants to such programs.

(Sec. 8) Requires the Secretary to provide **taxpayers** with annual written notices of eligibility for the earned income tax credit.

(Sec. 9) Prohibits the Secretary from providing a debt indicator (notice of a tax refund offset) to businesses that provide refund anticipation loans and engage in predatory business practices with respect to such loans.

(Sec. 10) Directs the Secretary to conduct a feasibility study for delivering tax refunds on debit cards, prepaid cards, and other electronic means to facilitate refunds to individuals who do not have bank accounts.

(Sec. 11) Extends from nine months to two years the period in which the Internal Revenue Service (IRS) may return property that has been wrongfully levied and for bringing a civil action for a wrongful levy.

(Sec. 12) Allows **taxpayers** to recontribute to their individual retirement accounts (IRAs), without penalty or limitation, amounts that were wrongfully levied by the IRS. Requires the IRS to pay interest on IRA amounts that were wrongfully seized.

(Sec. 13) Requires the Secretary to notify a **taxpayer** of: (1) any unauthorized use of such **taxpayer's** identity (suspected identity theft) which the Secretary uncovers during a tax investigation; and (2) any criminal charges brought against an individual who is using the identity of such **taxpayer**.

(Sec. 14) Repeals the authority of the IRS to enter into private debt collection contracts. Exempts contracts entered into before March 1, 2008, that are not renewed or extended after such date. Nullifies any contract entered into, extended, or renewed on or after such date.

(Sec. 15) Allows the IRS to use any means of [illegible] (e.g., the Internet) to publish unclaimed tax

George

Just wanted you to have a copy of Ivan Seidenberg's letter to Charlie this morning regarding tomorrow's vote.

Thanks.

Roger

Ivan Seidenberg
Chairman & CEO

verizon

140 West Street, Floor 29
New York, NY 10007

October 1, 2008

The Honorable Charles B. Rangel
United States House of Representatives
2354 Rayburn House Office Building
Washington, DC 20515-3215

Dear Representative Rangel:

The credit crisis facing the nation is now significantly affecting business and the economy as a whole. Therefore, I encourage you to act promptly to approve legislation to stabilize our nation's financial system.

As chairman and CEO of Verizon, I'd like to share with you our perspective on how the current financial problems are affecting our 228,000 employees, our suppliers and vendors, and our customers.

First, Verizon is on very strong financial footing, and we are in the midst of a great mission – deploying the best wireless broadband network across America and the premier fiber network (FiOS) to 18 million American homes. At the same time, we recognize that the health of our business is dependent upon the ability of our customers to buy our products and services, the capacity of our suppliers to manufacture and deliver products and equipment, and the ability of our vendors to dig the ditches to deploy fiber or build the towers that deliver wireless services. If action is not taken to ease the current credit crunch, many of our suppliers and vendors will not be able to get the credit they need to purchase materials and other products, meet payroll, and remain in business.

Many of our employees and customers are feeling the effects of the credit crunch. Not only is this a serious personal challenge for each of them, the impact of the credit crisis on average citizens will have a direct and increasing impact on the economy as a whole.

I know that this is a difficult issue. Yet, I believe that quick congressional action is necessary to avoid a serious setback to our nation's economy and a lot of personal pain for our citizens. Action by Congress to restore liquidity to the credit markets is an essential step toward restoring our economy.

I thank you for considering these thoughts as you work to develop legislation to respond to this serious challenge to our nation.

Sincerely,

Ivan Seidenberg

Subject: Rangel-Seidenberg Meeting, Tuesday, March 24 at 1:45PM.

Andy

Charlie Rangel can visit with Ivan at 1:45PM tomorrow in H-208 of the Capitol. Does not want an entourage so if you are with Ivan fine. I would counsel against bringing others for sake of it not becoming a group discussion instead of a one on one Chairman Rangel and Chairman Seidenberg discussion. Probably 20 minute time slot.

Copying Mark in case we need a brief for Ivan on tax issues that Charlie might raise over the course of the meeting.

Wendy Featherson, Charlie's scheduler set this up and can be reached at 225-[illegible] if there are any last minute issues. I am around tomorrow if you need me there for any reason.

Roger

15) Organization Mission

A Proud History and Mission -- The Children of the Whole People

The City College of New York was founded in 1847 by Townsend Harris to offer higher education to the children of the working class and immigrants.

For 160 years, The City College of New York has symbolized the union of excellence and public higher education. The most important avenue to upward mobility and social advancement for generations of New Yorkers, City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented but needy students. With particular focus on meeting the needs of ""the children of the whole people,"" The College provides unique opportunities for underrepresented populations to enter fields new to them with expert skills and education.

City College's mission emphasizes access and excellence in undergraduate and graduate education and research. Requiring demonstrated potential for admission and a high level of accomplishment for graduation, the College provides a diverse student body with exceptional opportunities to participate in creative intellectual pursuits. The College is led by a faculty committed to the advancement of knowledge and the guidance of students in the attainment of rigorous academic goals.

CITY COLLEGE/VERIZON PARTNERSHIP

The City College of New York (CCNY) is excited about the opportunity to partner with Verizon to develop the "Verizon Foundation Literacy in Technology Program" at the new Rangel Center at the College.

City College requests Verizon's support at the $500,000 level to develop and implement this technology literacy program which will serve approximately 200 students pursuing degrees in public service. All 700 students of the Division of Worker Education (DWE) will be impacted by this program because technological literacy will be integrated throughout the curriculum. In addition, CCNY students participating in Rangel Center programs who are not registered at DWE will be able to take these courses through web casts and distance learning.

Verizon Foundation recommends support at the $500,000 level; $100,000 payable in 2007, $300,000 in 2008, and $100,000 in 2009.

City College is one of the most truly diverse campuses in America. More than 87% of CCNY students describe themselves as members of a minority group. City College's demographics are now approximately: 36% Hispanic; 26% African-American; 22% Asian; 13% White; 1% American Indian; 2% Other. Most of CCNY's students come from the New York City public schools. Many are immigrants or children of immigrants; they speak 91 languages other than English and were born in 147 countries. City College students are often the first in their families to go to college, and most have very limited financial resources. Approximately 58% come from families with combined incomes of $30,000 or less; three quarters work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial reasons.

The Division of Worker Education students are ethnically similar to the City College profile just described, but in other ways they are different. City College's median undergraduate age is 22, but DWE's is 32. Furthermore, City College undergraduates are evenly divided between men and women, but 80% of DWE students are women.

Fundamental to Congressman Rangel's lifelong service is a belief that America's ""governing class"" -- those men and women who make our laws and policies --must reflect the rich tapestry of cultures, faiths, and ethnicities that make us who we are as a country. Today, non-whites make up nearly 30% of the US population. Yet fewer than 14% of men and women in middle and senior levels of the Federal Civil Service and 8% of the United States Foreign Service are members of minority groups.

The Rangel Center for Public Service will prepare students, particularly from underserved and underrepresented populations for careers as leaders in public service. At the heart of that effort is a curriculum that emphasizes a combination of classroom instruction, practical training, and opportunities for vibrant co-curricular interaction with the Rangel Leadership Fellows.

The program is designed to attract students at both the graduate and undergraduate levels. For undergraduates, a unique, seamless five-year BA/MPA Program in Public Service will attract current CCNY students and new students who come to City College specifically to enroll in the Rangel Program.

Rangel Center students will leave the City College of New York uniquely prepared for careers in public service. The Verizon Foundation Literacy in Technology Program at the new Rangel Center will ensure that these students have the necessary technological skills to make a difference to the agencies and public constituencies they will go on to serve.

Proposal Information (continued)

Please specifically state/explain how Verizon Foundation's funding will be used in the proposed program/project. (continued)

PROJECT BACKGROUND

Teaching Technological Literacy for Rangel Center Students

Educational technology is nudging instruction beyond its oral and print-based tradition to embrace online and electronic texts as well as multimedia. Computers are creating new opportunities for writing and collaborating and technology is influencing how people read, write, listen and communicate. The Internet is constructing global bridges for students to communicate, underscoring the need for individuals to be equipped with technology skills and competencies to actively participate as members of the 21st Century.

In today's digital world technology has contributed to an expanded understanding of literacy. Besides having basic literacy skills, today's students also need technology skills for communicating, investigating, accessing and using information, computing, thinking critically about messages inherent in new media, and understanding and evaluating data.

Technological literacy is knowledge about what technology is, how it works, what purposes it can serve, and how it can be used efficiently and effectively to achieve specific goals. Just 20 years ago, cell phones, laptops, pagers, and fax machines were in the realm of scientists and science fiction. Today, those technologies and the Internet have gained widespread public acceptance and use. It is clear that, in today's Digital Age, students must be technologically literate to live, learn, and work successfully.

City College acknowledges the importance of technology to its students' futures, but to date has not incorporated technology into the mainstream of academic learning. Because technological literacy has become an essential component of job readiness, citizenry, and life skills, students must not only become competent in the use of technology and associated applications, they also must be able to apply their skills to practical situations.

Accessing information has become increasingly important as databases previously accessible only to library media specialists are now available to students directly. Browsing, searching, and navigating online have become essential skills for all students, as has recognition of the limitations of digital archives. (Some things remain unavailable electronically.) Familiarity with natural inquiry, Boolean search strategies, and organizational systems (cataloging, abstracting, indexing, rating) is extremely important as students locate information from sources across the globe.
The digitizing of resources raises new issues of analysis and evaluation. For example, consider a student who is asked to prepare a presentation based on information from the Web. That student can access vast quantities of information without a lot of understanding, because search engines make accessing information so simple. But one must also recognize that:

Using search engines well requires an increased skill level. Evaluating and synthesizing information found in a variety of sources requires even more advanced skills, representing a literacy that is far beyond what is needed in a more constrained environment, such as with textbooks where all the information is contained within one source. In effect, because technology makes the simple tasks easier, it places a greater burden on higher-level skills.

Ultimately, students need to understand the interrelationships between library collections, proprietary databases, and other Internet documents to ensure appropriate, effective searching and accurate evaluation of sources. Furthermore, as students access electronic resources, it is critical that they recognize the importance of honoring the intellectual property of others by strictly adhering to copyright and fair-use laws.

Expanding the teaching and learning of technology will both better achieve the educational objectives that are foundational to the BA component of the BA/MPA degree, and also ensure that students graduate and move on to the MPA degree with significant technological literacy to help them along their career paths in public service.

A Professor of Technology Literacy will be identified and will coordinate and lead this program across a multidisciplinary platform. Interdisciplinary curriculum developed will include three integrated core courses, as well as advanced courses, that students take from several disciplines that relate to their area of concentration. For instance, public administration students will take courses in literature, sociology, psychology, history, economics and philosophy, in addition to courses like organizational behavior or

Proposal Information (continued)

Please specifically state/explain how Verizon Foundation's funding will be used in the proposed program/project. (continued)

urban politics and policy that are more specific to their concentration area. Technological literacy will be incorporated into these courses.

In addition, three courses required of all Rangel Center BA/MPA students--Communication and Political Action; Accessing, Analyzing, and Interpreting Data; and Management of Public Organizations-- will have significant technological components.

With a commitment from the Verizon Foundation, beginning in the fall of 2007, the Rangel Center will implement this Technology Literacy Program at the Rangel Center and DWE and will begin the search for the project's Professor.

We will offer specific coursework on technology tailored to students pursuing public administration and service and human services. Examples of such courses would include the use of GIS data, techniques in data analysis and presentation, and statistical analysis.

In addition, rather than offering only courses on technology, we plan to incorporate the technology learning with much of the current course content. Educational research shows this to be most effective way to develop of skill competency. People need to use new techniques they are learning as they learn them; otherwise the newly-acquired skills are quickly forgotten and lost. So we will have special sessions in the computer lab taught by the regular instructor or a specialist where students learn specific skills. Then, these skills would be immediately used in the coursework of the class they are taking. Advanced classes would require these skills and would add to them.

We would develop a skill grid, so we could be sure that all students have sufficient exposure to the basic skills before they take upper division courses. For example, in the social science core course, we would introduce tabulating and graphically presenting data. It could be population data on a topic like income distribution in the US. This would require several one hour sessions in the computer lab with the instructor giving hands on instruction in various techniques like entering the data, computing averages and then creating a graph. Following each session, students would be given an assignment to do readings or Internet research in which they gather data and create their own graphical representation of it along with some narrative explanation. All of these skills could be required for a final project at the end of the term.

We would start in the core courses with individual modules tied into the existing curriculum that develop skills in internet research, using databases, and data analysis and presentation tools. We would also develop learning modules that enhance basic skills to more advanced skills and learning outcomes. In more advanced courses, these skills would be assumed and reinforced through the expectation that they would be systematically used. More advanced skills would be developed in upper-division courses. These would include special statistics software, GIS software, presentation preparation, web site development, desktop publishing and video post-production. As mentioned already, a course in GIS data analysis and use would be important for some students so they have expertise in this area beyond the introductory level. The same is true for desktop publishing, video post-production, statistics and other areas where specialization is needed.

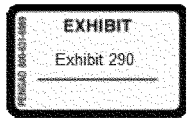
Once this project is fully implemented, we would expect every graduating student in DWE and the Rangel Center to possess a strong base in technology skills that have been used many times in different courses. This will provide the preparation to effectively use the tools available, and the comfort level to continue to learn as new technologies become available.

The Program's faculty, once trained, will be able to continue to teach literacy in technology and the knowledge base they create will also be available through publications, the website and curriculum modules made available to other educational institutions and to the community.

The Division of Worker Education at City College has been fortunate to receive $680,000 in funding this year from the New York City Council to complete the technological infrastructure. This includes money for completely outfitted smart classrooms, portable laptop computer labs for use in any classroom, and a video production and desktop publishing facility. These will be in place by the early spring of 2008.

VERIZON FUNDING

Verizon Foundation funding would provide the most critical elements of the Rangel Center's



Proposal Information (continued)

Please specifically state/explain how Verizon Foundation's funding will be used in the proposed program/project. (continued)

technological infrastructure which is the programmatic support to train faculty and students, develop curricular modules for many courses and enhance the teaching infrastructure with appropriate, state-of-the-art software.

State of the art teleconferencing connections (made available through the funding recently acquired for the Center's technology infrastructure) between the newly-renovated building that houses the Center for Worker Education and the Rangel Center will allow an efficient use of resources in which students at CWE or the City College main campus may enroll in courses at either location. This will allow students at both locations to take advantage of learning from some of the noted authorities who will be teaching in the program while pursuing their busy schedules involving schoolwork, jobs, and sometimes parenting.

The excellent facilities we will have require this investment in program development and training in order to be effectively used. Specifically, we would hire a full-time educator with extensive technological expertise to work with faculty to develop the learning modules, to train them in workshops, and to develop and implement the evaluation of the project. This person would also be available to conduct training of students in the computer lab or regular classroom. Both the Division of Worker Education and the BA/MPA public service program of the Rangel Center would be served by this person who would be based at the Center for Worker Education. A part-time person with web expertise both in web page design but also in webcasting would work with faculty as they develop web-based resources and online courses. This person would also develop the capability to webcast between the campuses.

Stipends for faculty will be provided to compensate them for the extra time they need to put in --in order to be trained in the use of technology in their courses. They would attend a number of half-day and/or full-day workshops. Further, we would pay some faculty for their time to develop new elective courses or to be added to the curriculum, or to significantly modify existing courses, incorporating technological literacy modules. In year two we envision adding new software capability as we are more aware of specific needs of elective courses.

Evaluation costs will include technical time for developing surveys on our Class Time computerized survey system and print costs and time for technicians to prepare analyses and summaries of the program and each student's individual results.

Publications costs will include printed materials and electronic materials that are made available both to students and to faculty in other institutions who want to use and adapt the developed materials. This also includes funding for faculty to present their modules and courses at national meetings.

Supplies will include disposable media and consumables directly related to the development and use of technological literacy modules.

MEASURMENT, EVALUATION AND OUTCOMES

Students participating in the Verizon Foundation Literacy in Technology Program at the Rangel Center will:

* develop knowledge, ability and responsibility in the use of information technology
* acquire, organize, analyze, evaluate, and present information using appropriate information technology
* use information technology to expand their range and effectiveness of communication
* solve problems, accomplish tasks, and express creativity, both individually and collaboratively, using technology
* understand the role and impact of technology, and apply ethical, responsible, and legal standards in its use

In order to evaluate the success of the program, determine a true and measurable outcome, and assess the benefits to The College, the Rangel Center, and the community, the Rangel Center will keep records and track:

* the number of students per year who participate in the Verizon Foundation Literacy in Technology Program,
* a student breakout by public service area/discipline and the associated technology learnings and levels achieved
* the professional development and technology curriculum developed and offered through the program,

Proposal Information (continued)

Please specifically state/explain how Verizon Foundation's funding will be used in the proposed program/project. (continued)

* the number of technology uses before and after completing the curriculum, and
* the number of uses of computerized presentations before and after completing the curriculum.

At the end of years one, two, and three, the Rangel Center will ask Verizon Foundation Literacy in Technology Program participants to fill out a questionnaire regarding their experiences with the program and the Center. The College will survey and analyze findings based on:
* usage of new technological skills,
* satisfaction with the learning experience before and after access to the program/Center.

After five years, The College's surveys of Rangel Center alumni will quantify:
* how many entered public service,
* in which capacities, and
* how they felt the Verizon Foundation Literacy in Technology Program assisted them in the long term.

In addition, City College is in the process of developing learning outcomes for all courses as a part of the Middle States accreditation process. We plan to use this same process as we incorporate the technological literacy modules. The technological literacy grid which lists the specific skills in the columns and the courses where they are learned in the rows would allow for evaluation of how well students are doing in each course. A particular course would have a specific set of technological literacy learning outcomes and for each outcome there would be a way to assess it in individual students. The expectation is that from now on, we will do outcomes assessment each year to evaluate the effectiveness of classes.

Specifically state the social cause/issue you intend to address.

Rangel Center students will leave the City College of New York uniquely prepared for careers in public service. The Verizon Foundation Literacy in Technology Program at the new Rangel Center will ensure that these students have the necessary technological skills to make a difference to the agencies and public constituencies they will go on to serve.

Specifically state what you will do to address this cause.

Please state how technology will be used to achieve your results.

Yes. Expanding the use of technology will both better achieve the learning objectives that are foundational to the BA component of the BA/MPA, and also ensure that students graduate and move on to the MPA degree with significant technological literacy to help them along their career paths in public service.

Approach Information

What overall approach or strategy are you using to achieve results?

City College is establishing the Charles B. Rangel Center for Public Service in honor of a distinguished public servant and long-time friend of the College, Congressman Charles B. Rangel. In a notable career spanning more than four decades, The Honorable Charles B. Rangel has done as much as any single person in public service to help the least powerful among our citizens to achieve their goals and to change their lives, their communities, and the nation.

The Charles B. Rangel Center for Public Service at The City College of New York will strive to become a national center for the promotion of greater diversity in public service, consisting of five major elements:

1. The Charles B. Rangel Library, consisting of documents, archives, and memorabilia from Congressman Rangel's lifetime of public service. These papers will be made available to scholars nationally, and particularly to scholars within The City College and the City University, and will serve as a focus of sponsored research and conferences concerning barriers to full participation in public service by underserved minorities;

2. The Master's Program in Public Service, which will recruit and prepare young people for careers in government and public service. The program will include participation in internships in service organizations, arranged by the Rangel Center. It will also offer interdisciplinary specializations in concert with The City College Schools of Architecture, Engineering, Education, and Biomedical Education, as well as CCNY's special programs in transportation, waste management, and urban public health;

Upon completion of a degree, graduates will be eligible for programs like the Federal Career Intern Program, entering government service for a two-year temporary appointment with eligibility for a permanent assignment upon completion. These opportunities will encourage the involvement of members of underrepresented minority groups and those with financial need;

3. A Combined BA/MPA Program in Public Service, which will work together with several undergraduate programs unique to City College that are particularly suited to draw outstanding students into public service. The BA/MPA Program will attract students capable of and interested in an intensive ""fast-track"" program leading to the master's degree. It will prepare them for public service with high-level coursework, experienced government personnel mentors, and hands-on training in internships and service learning;

4. The Charles B. Rangel Center, which will be housed in a magnificent Harlem limestone townhouse adjacent to The City College campus, and include the Rangel Library, the Rangel Conference Center, and offices for visiting scholars;

5. The Charles B. Rangel Fellows: A Mid-Career Program in Leadership and Policy Innovation, offering professional advancement training for mid-career, minority government and other public service employees of particular accomplishment and promise for a term of study ranging from eight weeks to an academic year.

Proposal Information (continued)

What primary results are you committed to achieving? (continued)

Number of people reaching the primary desired program result

1000

Number of people reaching the primary desired result without this program/project

Are there broader gains or benefits that will be realized for organizations if you achieve your results, and that we should be aware of when considering your program/project?

How will you know when your expected results have been achieved? What information or evidence will you use to verify success?

Students participating in the Verizon Foundation Literacy in Technology Program at the Rangel Center will:

* develop knowledge, ability and responsibility in the use of information technology
* acquire, organize, analyze, evaluate, and present information using appropriate information technology
* use information technology to expand their range and effectiveness of communication
* solve problems, accomplish tasks, and express creativity, both individually and collaboratively, using technology
* understand the role and impact of technology, and apply ethical, responsible, and legal standards in its use

In order to evaluate the success of the program, determine a true and measurable outcome, and assess the benefits to The College, the Rangel Center, and the community, the Rangel Center will keep records and track:

* the number of students per year who participate in the Verizon Foundation Literacy in Technology Program,
* a student breakout by public service area/discipline and the associated technology learnings and levels achieved
* the professional development and technology curriculum developed and offered through the program,
* the number of technology uses before and after completing the curriculum, and
* the number of uses of computerized presentations before and after completing the curriculum.

At the end of years 1, 2 and 3, the Rangel Center will ask Verizon Foundation Literacy in Technology Program participants to fill out a questionnaire regarding their experiences with the program and the Center. The College will survey and analyze findings based on:
* usage of new technological skills,
* satisfaction with the learning experience before and after access to the program/Center.

After five years, The College's surveys of Rangel Center alumni will quantify:
* how many entered public service,
* in which capacities, and
* how they felt the Verizon Foundation Literacy in Technology Program assisted them in the long term.

How will you know if participants are on course to get to the stated results within time and budget?

Proposal Information (continued)

Key People

List the people who will be responsible for the program/project

What attributes of these people most predict success?

Are there any partners who must play a key role for you to achieve success?

Are there any intermediaries who must play a key role for you to achieve success?

Could you possibly use Verizon employees or retirees as volunteers in this or other programs/projects?

Yes

If so, how might volunteers help you?

Communications

Both during and after the project/program, which are the groups/audiences you most want to reach. What kinds of messages do you want to give them? How will you deliver these resources? What do you want them to do with these messages?

What approaches will you use to communicate Verizon¿s role as your partner in this work?

MARKETING, COMMUNICATIONS AND BRANDING

We have developed a relationship with the Alliance for Downtown New York, which represents thousands of businesses and not-for-profits in lower Manhattan. Through the Alliance we will be reaching out to organizations to promote the program. We also continue to work with unions like Local 1549 of DC37 and Teamsters Local 237 who represent workers in government agencies who would be potential students.

DWE is in a prime geographic location for many potential students for this program who are working in city and state offices. City Hall and 250 Broadway, where many legislative and governmental offices are located, are just blocks away, and we have frequent contact with the staff in those offices. In fact, we have recruited a number of students from them already. Furthermore, downtown New York, the financial district in particular, is now the location for many non-governmental public service organizations. We advertise in the local newspapers, including the Downtown Express, which reaches this part of the city. City Council members also feature the Division of Worker Education in their newsletters to constituents.

We will work in collaboration with Verizon to recognize and publicize the Verizon Literacy in Technology Program. Marketing of this program can be done with an announcement in City College publications, a press release to major media, e-mail and web site announcements to all CCNY alumni and friends, CCNY's own newsletters and publications, and possibly a press conference with Congressman Rangel. The City College of New York will also notify Verizon about any public use of its name and the Program's name.

Project Budget Breakdown

The overall budget process helps to strategize, manage and monitor your organization's course of action. A comprehensive budget acts as a long-range financial plan and operations guide. It is another effective way of communicating your organization's mission, goals, programs, activities of your staff, and the communities you serve. This form is intended to help you communicate both the resources and expenses for this project.

Please populate the table below with a detailed breakdown of your total project budget for a minimum of two years. Enter all appropriate line items that correspond to aspects of your project. Not all items will necessarily pertain to your project or are requested here, so you may add or delete these items. When you have finished completing this form, save it locally on your computer and then click the Upload button and follow the instructions to finish attaching it to your application.

All requests that are for $10,000 or more should include this Project Budget Breakdown form.

HOUSE OF REPRESENTATIVES
WASHINGTON, D.C. 20515

CHARLES B. RANGEL
15TH DISTRICT, NEW YORK

March 7, 2007

Mr. Hank Greenberg
399 Park Ave.
17th Floor
New York, NY 10022

Dear Mr. Greenberg:

I would appreciate the opportunity to schedule a meeting at a time that is convenient for you in order to discuss with you my vision for the Charles B. Rangel Center for Public Service.

The City College of New York will be home to the Center, whose purpose will be to train and educate the next generation of our nation's public servants. It is a personal dream of mine to see this Center at City College, which resides in my congressional district and where so many talented young men and women from the community have gotten an excellent education. As I'm sure you know, CCNY's mission is one of excellence and access and many of our nation's leaders from every ethnic, racial, and economic group have earned their degrees there.

I have asked City College of New York Vice President Shelly Butler to contact your office and arrange a time that is convenient for us to come together. I am eager for you to meet City College President Gregory H. Williams, a man who has overcome many obstacles to achieve success—as with so many CCNY graduates in the past and the present.

Thank you very much for your consideration.

Sincerely,

Charles B. Rangel
Member of Congress

CBR/djb

Cc: President Gregory H. Williams, CCNY
VP Shelly Butler, CCNY

Subject: Charles B. Rangel Center Needs and Naming Opportunities

Dear Florence,

It was great talking with you today and I appreciate your lightning fast follow-up to the conversation Congressman Charles B. Rangel, CCNY President Gregory H. Williams and I had with Mr. Greenberg.

We are delighted to send you something for your board meeting on June 12 and I have already over-nighted to you our 501c3 IRS determination letter and our audited financial statements for 2004 and 2005, plus some additional information on The City College of New York and the Charles B. Rangel Center for Public Service. You should receive everything by tomorrow morning.

Attached here are our list of donors and pledge-givers to the Rangel Center and a list of our needs with naming opportunities beginning with $10 million. I am happy to say that gifts and pending pledges to the Rangel Center now total $20,055,000.

Confirmed gifts and grants come to $6,625,000 from:

The Ford Foundation
Eugene Isenberg
Josh Weston
The City Council
The Kheel Foundation
The Rodobeck Foundation
Transportation appropriation
Congressional seed money

Pending pledges of $13,430,000 include:

The Verizon Foundation
The Altman Foundation
The Community Trust
The Heron Foundation
A major corporation with a 1:2 match from CUNY for capital projects

Our needs include the naming opportunities as follows (I have used the Starr Foundation name and Mr. Greenberg's name interchangeably for illustration's sake but of course the naming is up to you); all of these funds are endowed and all will retain their name at City College in perpetuity:

The Maurice R. Greenberg Fund for Excellence, Rangel Center $10,000,000

An endowed fund, whose income will provide unrestricted support for the Charles B. Rangel Center in perpetuity; support may be used for academic and administrative needs, faculty development, student scholarships and internships, mid-career fellowships, and program expansion.

EXHIBIT
Exhibit 293

COS.CCNY.234

CSOC.CBR.00010382

This gift will also include:

The Maurice R. Greenberg Distinguished Lecture Series, Rangel Center and The Starr Chair in Public Service at the Rangel Center

The Starr Endowed Fund for Academic Distinction, Rangel Center $ 5,000,000

An endowed fund, whose income will be used for faculty and administrative support at the Rangel Center in perpetuity, including the Center director, research fellows, librarian, internship coordinator, visiting scholars, and student scholarships and internships

The Maurice R. Greenberg Library and Archives, Rangel Center $5,000,000

An endowed fund, whose income will be used to collect, conserve, and archive the documents, photos and memorabilia donated to the Center by Congressman Rangel that relate to his life and career, and to provide a library to the Rangel Center for this purpose; this collection will be made available to scholars in the field for research

The Starr Chair in Public Service at the Rangel Center $3,000,000

An endowed professorship, whose income will be used to attract and retain a nationally known scholar in the field; while the scholar holding the chair may change, the chair's name will remain in perpetuity

The Maurice R. Greenberg Distinguished Lecture Series, $2,000,000
At the Rangel Center

An endowed fund, whose income will be used to attract visibility to the Rangel Center through a series of lectures by distinguished individuals in the fields of business, international studies, policy and public service

Thanks again for your help and I look forward to talking with you soon.
Best regards,
Shelly

Hank, they are sending over a list of other major donors and a budget, with their audited financials. I spoke with the development person who was at your meeting. Their dream amount—and the amount they never got around to mentioning at the meeting—is $10 million over whatever period of time we want.

I will write it up for $5 million for the June 12 board meeting, but I will let you know if the donor list and budget suggest another amount.

Florence

Call Report
Date: June 5, 2007
To: File
From: Shelly
Re: Meeting with Hank Greenberg

Yesterday, Congressman Rangel, President Williams and I met with Maurice "Hank" Greenberg at C. V. Starr, Inc. He is the chairman of the Starr Foundation and we intended to ask for a gift of $10 million from Mr. Greenberg for the Rangel Center.

He met us in a magnificent office with three genuine Frederic Remingtons on the wall and several very fine Chinese artifacts. He first went to China in 1972 and has visited several times each year. He knows the current Chinese leadership and the future leadership, apparently.

Congressman Rangel spoke for about 10 minutes about Hank's expertise in China and expressed his concern that future competition for the world's markets would leave American behind, especially as our educational system is so poor. Hank said we have the finest colleges in the world but the worst K-12; he has discussed this issue with Chancellor Klein and has participated (I think) in some corrective measures.

Mention of the idea of competition brought his own unpleasant experience with then-Attorney General Spitzer to his mind and for some minutes, he railed against regulation. His policy was "principles not rules," and he deplored how his reputation had suffered, "and no one said a word." He mentioned several times that AIG, a multi-billion dollar company that he had founded and built, was fined $1.6 billion. He said that Spitzer had done the same thing to Sandy Weill and that was why Weill had left Citicorp and Prince came in. The Congressman mentioned that he thought that Ned Cloonan at AIG had spoken in his defence, but Greenberg was not mollified. Then Congressman Rangel said that he guessed this wasn't a good day to come about this purpose. Hank said he would "give us something" and that he knew City College was a good school. After that, we took our leave.

Five minutes after I returned to campus, Florence Davis, president of the Starr Foundation, called to tell me that the chairman wanted a request for funds to the Rangel Center on the Starr Foundation Board's agenda for the June 12 meeting. I sent her the 501c3 IRS designation letter, the 21st Century audited financials, and a selection of CCNY materials, including the Rangel Center brochure. I also asked if I could send her a list of naming opportunities and needs and she said, yes. She asked if a number had been mentioned; I said they were mostly talking about China, but that President Williams was going to ask for $10 million and the Congressman thought that was about right. She said OK and I emailed her a selection of naming opps and needs beginning at $10 million.

Later, President Williams told me that Congressman Rangel had spoken with Hank who had called him, who said he would give $5 million.

First item for supllemental agenda.

The City University of New York/CCNY

The City University of New York (CUNY) is the largest urban university in the United States and its third-largest public university system, enrolling 200,000 students in degree programs on 19 campuses in all boroughs of New York City. CUNY consists of 10 senior colleges, six community colleges, a four-year technical college, a doctorate-granting graduate school, a law school, an accelerated medical program and a medical school.

For over 100 years CUNY has been a stepping stone to achievement for immigrants and the economically disadvantaged, offering them access and academic quality. Today it enrolls students from 145 countries who speak 115 native languages; its student body is 32% black, 31% white, 25% Hispanic and 12% Asian.

City College of New York (CCNY) is one of the four-year colleges, founded in 1847. It was the New York City Ivy League equivalent in its past, with alumni such as Ira Gershwin, Jonas Salk, Colin Powell and eight Nobel Laureates.

Matthew Goldstein was named Chancellor of CUNY in July 1999 and undertook to reverse the slide in quality at the CUNY schools. CUNY undertook a painful review of its faltering academic reputation and recognized that 28 years of open admissions, and lenient remedial requirements, had eroded its intellectual stature. Since 1999, requirements for entry into the senior colleges have been tightened and remediation has been generally concentrated in the two-year, community colleges. The entire CUNY system has been transformed, including CCNY.

CCNY is one of the five CUNY schools participating in the CUNY Honors College program, which we have supported.
In one year CCNY itself leaped an unprecedented 31 places in the U.S. News and World Report rankings of colleges and universities.

Two of the newest programs at CCNY are the Colin Powell Center for Policy Studies and the Charles B. Rangel Center for Public Service. The Rangel Center offers a combined BA/MA is public service and an MA in public service (with interdisciplinary specializations in concert with the CCNY's schools of architecture, engineering, education, biomedical engineering, and special programs in waste management, transportation and urban public health).

In addition, the Rangel Center offers mid-career fellowships targeted to minorities in government or other public service.

The Rangel Center will be housed in Harlem near the CCNY campus and will include a library devoted to Rep. Rangel's papers, a conference center, and space for visiting scholars.

Financial: CCNY Foundation financials--FY05: $4.1 million, "institutional support" 4%.

The Rangel Center has received more than $20 million in gifts and pledges from the following funders: The Ford Foundation, Eugene Isenberg, Josh Weston (ADP), Rhodebeck Charitable Trust, federal and city government, the Verizon Foundation, the Altman Foundation, New York Community Trust and an unnamed corporation that has made a challenge grant for capital projects.

Request: Unspecified. Naming opportunities are at the $10 million, $5 million, $3 million and $2 million levels. They expressed a hope for $10 million.

Purpose: Rangel Center for Public Service at CCNY.

History: Our support for CUNY and its constituents has been: $3 million for the Honors College; $10.09 million for Baruch College (including C.V. Starr Scholarship); $700,000 to Brooklyn College and $550,000 for other programs at CUNY.

Recommendation: $5 million over 3 years. This would allow us to name the Library and Archives at the Center ($5 million), or a chair in Public Service ($3 million) and a Distinguished Lecture Series ($2 million). We can, if the Board prefers, create a C.V. Scholarship Fund with some or all of the grant.

(F. A. Davis ext.)

Dear Ms. Butler:

In keeping with our 2007 pledge of $5,000,000.00 to The City College 21st Century Foundation, Inc. for The Charles Rangel center for Public Service, we are pleased to enclose a check for $1,669,374.70 representing the second installment of our 3-year grant ($1,500,000.00) and supplemental payment to compensate for the loss in value of the stock on first payment ($169,374.70).

We would appreciate an official receipt for our records. By endorsing and depositing this check, you warrant that there has been no change in your I.R.S. tax classification as an organization described in Internal Revenue Service Code sections 501 (c) (3) and 509 (a) (1), (2) or (3).

To fulfill The Starr Foundation's reporting requirements, we request that, at the end of each year of this grant, you send us a concise report on the activities the grant has funded. We will not make any subsequent payment on this grant unless we receive a report satisfactory to us concerning the use of the paid portion of the grant. In addition, whenever your new audited financial statements become available, please send us a copy for our records.

Memo
Date: May 14, 2008
To: President Williams
From: Shelly
Re: Conversation with Congressman Rangel re Hank Greenberg

1. With the fall of AIG, we are very short of funds to fix up the building and make it the Rangel Center.

2. We have a $5 million gift from the Starr Foundation to create the C.V. Starr Library

3. For a total gift of $10 million, or $5 million more, he could name the building either as Greenberg Hall or in the name of the Foundation or company, as Starr Hall.

4. Normally, we would ask $10 million from anyone else, but only $5 million more from him—a bargain!

5. info on Starr's previous grants to buildings

The Starr grant kicks off the public phase of The Campaign for Cooper Union, a critical institutional fundraising effort that seeks to raise $250 million to support student scholarships, faculty development and academic programs, together with a substantial capital investment in Cooper Union's new state-of-the-art academic building. The Starr grant will be divided among a number of projects at The Cooper Union:

$6 million toward constructing and equipping the college's new academic building, which will house the C.V. Starr Research Foundation, within the Albert Nerken School of Engineering. The engineering school is ranked among the top three undergraduate engineering schools in the nation. The gift will enable the creation of research facilities as well as provide necessary furnishings for state-of-the-art laboratories.

6. Would it be all right with the Congressman if we did this? in fact, is there anything he could do to forward this? ask for another appointment with Hank Greenberg by letter? ask him to go along? or should we just call his office or Florence Davis and ask for another appointment?

CSOC.CBR.00024725

Created to promote diversity in the management ranks of the government and the non-profit sectors, the Charles B. Rangel Center for Public Service at The City College of New York is working diligently to ensure that students in the Public Service Management (PSM) Program at The City College of New York have the resources, support—financial and academic, and the professional development experience—to succeed. The C. V. Starr Library, made possible by the grant awarded by the Starr Foundation, will be the central source of research critical to the study of public service careers of members of groups underrepresented in public service. The library will be a repository of documents, archives and memorabilia from Congressman Rangel's lifetime, and as such, the C. V. Starr Library will preserve the legacy of a distinguished career spanning more than 40 years in public service.

The City College and the Rangel Center for Public Service have already launched a strong research and visiting scholar program focused on addressing the issue of promoting diversity in the public sector and continues to expand the academic opportunities for students enrolled in the College's PSM Program. In fact, this year, through the generous support of individuals and foundations, all of the graduate students in the PSM Program received stipends to cover their tuition costs as well as assistantships for books, supplies, transportation and additional education-related expenses that allowed them to focus on research. In addition, all of the students interested and available to take internship assignments in Washington, DC were found placements and received stipends to assist with the associated cost, including housing.

Following is information on the major developments over the past year at the Center

THE C. V. STARR LIBRARY

Still under construction, the Charles B. Rangel Center will also house the C. V. Starr Library, which will be the locus of sponsored research and conferences concerning barriers to full participation in public service by underserved minorities. The Library will be an archive of important documents pertaining to the public service careers of members of groups underrepresented in public service, beginning with the papers of Congressman Rangel. Beyond the wealth of information that will come from housing the product of a lifetime of public service, the C. V. Starr will trace the nature of government, the growth and development of minorities in the United States, and the contributions of underrepresented populations in government and public service.

Serving as a an important research tool for CCNY students *and* the greater New York community, the C. V. Starr Library will encourage study of and research in the wide-ranging fields of public service prominent in Congressman Rangel's long and varied career. In

CSOC.CBR.00024726

particular, the Library will inspire new generations of students from underrepresented populations to enter and excel in public service.

A Rangel archivist/librarian will organize, index, and preserve for posterity, documents, photographs, and memorabilia relating to Congressman Rangel's career.

Archive categories will include:

Foreign policy
Government
The economy
Community and the family
New York City and its environs
The 15th Congressional District
Race and ethnicity

The position of archivist/librarian will be held by a Rangel Post-Doctoral Fellow, selected following a national search. The archivist will provide assistance to visiting scholars, CCNY students, and the Harlem community, while pursuing her/his own research.

Visiting scholars from other cities, states, and nations will be welcomed and integrated into the life of the Center.

MAJOR DEVELOPMENTS

The Charles B. Rangel Center strives to serve as an important source of information, research, and analysis on the topic of promoting the involvement of under-served individuals in the leadership of the public service.

Research Efforts Well Advanced

The current effort is under the direction of visiting scholar Dr. Geva-May who was recruited to the Center in 2007. Professor Geva-May is also Chair of the International Comparative Policy Analysis Forum and founding editor-in-chief of the *Journal of Comparative Policy Analysis*, which is sponsoring the comparative aspects of ongoing work. She is joined in her efforts by Meghna Sabharwal, a Post Doctoral Fellow, and Shawn Drake, a PhD candidate and research fellow.

Center research continues through surveys and data analysis examining:

- The level of enrollment in graduate programs of public service, public policy, and public administration of students from populations currently underrepresented at the managerial and executive levels of public service.
- The procedures found by these programs to be effective in recruiting and graduating students from such populations.

CSOC.CBR.00024727

- The degree to which policy and public administration instruction in schools of public policy and administration include core topics addressing the skills and knowledge base required to advance minority representation in the leadership ranks of public service.

In addition, Rangel Center staff completed a number of studies, some of which were presented at major national conferences and all which are available on the Rangel Center Web Site and will be part of the C.V. Starr Library's collection. The major titles are listed below:

Directory of College and University Research Centers Dealing With Issues of Diversity
Author: Iris Geva-May

The Categorization of Minority Groups in Academic Science and Engineering

Authors: Meghna Sabharwal

Major Conference Planned

The Rangel Center is currently planning the Center's first major conference here at the City College of New York. Scheduled for October 29-30, the conference is titled "*Public Service Education, Underserved Populations and the Future of the Federal Workforce.*" The symposium will bring together practitioners and academics to review current practices and discuss future efforts to improve the representation of underserved groups in the federal civil service.

The program includes presentations by Nancy Kichak, the Associate Director of the US Office of Personnel Management, and Professor Michael O'Hare, of the University of California, Berkeley. The Rangel Center will also present the results of the Ford-sponsored first-of-its-kind

CSOC.CBR.00024728

survey of schools of public administration and public affairs and their practices regarding educating members of underserved groups.

The Rangel Center has secured a commitment to attend from top-level federal officials and national academic experts.

Website Upgraded

Our website is one of the major tools we use to disseminate information on our research and other efforts. We will shortly launch a re-vamped site that is more user friendly, and better reflects the current efforts of the Rangel Center. The site can be viewed at http://www1.ccny.cuny.edu/ci/rangel/index.cfm.

Internship Program Expanded

The Rangel Center believes providing public service internships at CCNY is a method of inspiring a wide-range of students to consider careers in the public sector. The Rangel Center continues to coordinate public service internships under:

- ***The Ann S. Kheel Scholars Program in Community Service***

  Established in 2005, provides support for City College students from every school and division of the College who face financial pressures that prevent them from becoming more actively engaged in community service and activities, enabling them to develop their leadership skills and explore career options through community-service activities.

- ***The Rosenberg/Humphrey Internships in Public Policy***

  Open to undergraduates from all academic majors, the Program supports paid summer internships in New York City and Washington DC. Students must complete 400 hours of work in a public service organization and be on campus to take a 3-credit public policy course during the semester following the internship.

- ***The Josh and Judy Weston Public Service Scholarships***

  Josh and Judy Weston Public Service Scholarships support undergraduates who work while studying. The program pays students who commit to performing 400 hours per year of public service. The program is open to full-time sophomores, juniors, and seniors from all majors.

We have experienced overwhelming interest in these public service programs. Accordingly, this summer we launched a new Charles Rangel Public Service Internships Program that will allow us to provide even more opportunities to broaden student interest in public policy and public service.

CSOC.CBR.00024729

All told, we will be providing assistance and internships to about 75 students. This summer alone, 11 students are participating in internships in Washington, DC.

PUBLIC SERVICE MANAGEMENT PROGRAM

The City College's graduate program in Public Service Management (PSM), supported by the Rangel Center, just completed its first academic year. Members of the inaugural class, many who might otherwise have been unable to pursue a graduate degree, were provided with tuition assistance and stipends. At the end of the first year, the Program graduated its first student and 17 others continue their studies.

This coming fall the second cohort of 24 students will begin their graduate studies in the PSM Program. Although we had anticipated the start of the BA/MPA program this fall, currently, the program only covers graduate students. Recently, we started a new internship program for undergraduates. The new program will be part of our recruitment efforts with the goal of encouraging students who will be inspired by their experience and consider entering the PSM program for their graduate studies.

The master's degree in public administration has long served as the entry ticket for individuals interested in management level jobs in public service. Consistent with our goal of recruiting a diverse group of students, we have, for the second year, admitted a student body that in terms of diversity is significantly above national norms. Their participation furthers the Rangel Center's goal of promoting the representation of the underserved in public service.

Following are brief profiles of just a few members of the inaugural class of MPA students in the Public Services Management Program.

CSOC.CBR.00024730

Public Service Management Program
2008 MPA Scholars

***Deryck Barker**, BS, Psychology*

Deryck earned his Bachelor of Science degree from Utica College in 2002. He has spent several years working for New York State in rehabilitation services, drug treatment, and alcohol and substance abuse prevention. Deryck attended fulltime his first semester and reduced to three-quarter time in the spring. He is doing well and remains on track to graduate in 2010.

***Jennifer Czirr**, BA, Sociology*

Jennifer graduated with honors from Hunter College in 2007. She was captain of the Hunter College basketball team and won two CUNY basketball championships. She is now the Assistant Women's Basketball Coach at City College. She excelled in her first year in the PSM Program and plans to specialize in social policy.

Jennifer Czirr
MPA, Class of 2010

***Reuben Quansah**, BA, Sociology*

Reuben graduated with a Regents diploma from Cardinal Hayes High School in the Bronx. Following that, he attended Bucknell University where he earned his bachelor's degree in sociology. He spent semester breaks working with media affiliated institutions such as HarlemLIVE, Bloomberg Financial, and the Charlie Rose Show. Presented the opportunity, Rueben makes the best of the "now" while planning for the future. With 32 credits toward his MPA degree, he will be one of the Program's first graduates.

Reuben Quansah
MPA, Class of 2010

***Jamillah Richards**, BA, Sociology*

Jamillah holds a Bachelor of Arts degree in psychology from City College. She has seven years of experience working in advertising and healthcare. After earning her MPA, she plans to continue her service in the health field.

***Juan Rosa**, BA, Political Science*

Juan received his Bachelor of Arts degree in political science from The City College of New York in 2008. Throughout his career at City College Juan worked as an after-school teacher in the Washington Heights area of Manhattan and the Highbridge section of the Bronx. Juan was one of three graduate students who spent this summer in Washington, DC as an intern. He worked in the office of Senator Gillibrand. Upon completion of his MPA, Juan is plans to begin the pursuit of a PhD in political science or sociology.

Juan Rosa
MPA, Class of 2010

CSOC.CBR.00024731

PLANS FOR THE COMING YEAR

The second class has been admitted to the Public Service Management Program. In only one year's time, we nearly doubled the number of applicants to the program. In terms of both the diversity of the student body and student retention rates, the program performed above both other CCNY programs and national standards.

With one year behind us, we have a better understanding of the content of each course and will use the knowledge to better coordinate tutoring efforts and provide our students with academic support they need to excel. Research efforts will continue as will the expansion of the C.V. Starr Library's collection.

This semester the core management course will be taught by Rona Affoumado, one of New York City's leading authorities on non-profit management and strategic planning. Patrick Lespinass will teach the core course on race, gender and inequality. Patrick is VP for governmental affairs at Verizon and has held many posts in and out of government, including one with Charlie Rangel's office. The new course on sustainability will be taught by Caroline Hermans, who is a research scientist working at CCNY's Environmental Cross-Roads Initiative.

We are close to finalizing the speaker series for fall. Kimberly Gamble-Payne of UNICEF New York will be speaking on international policies covering children. Kathy Ruffing of the National Center on Policy Priorities will be on campus to test students "Social Security IQ." Washington Post journalist and CCNY alumnus Terrence Samuel will be on campus to discuss media and its impact on the health care debate. Policy writing expert Carolyn Sherman will return to give a lecture on effective policy writing.

We have hired two new post doctoral researchers to advance to advance the Center's research efforts. Lamar Bennett has a PhD from American University and has done research on public program performance. Zach Oberfield has a PhD from the University of Wisconsin and has done research in the participation of minorities in political parties.

We look forward the October Conference and to completing the survey of schools of public administration and public affairs and their practices regarding educating members of underserved groups and announcing its findings.

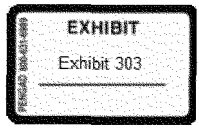
RE: Charles Rangel Center for Public Service

I met today with a representative from the Charles P. Rangel Center for Public Service at the City College of New York. You will recall that Starr awarded a grant of $5 million over three years for the Library and Archives at the Center.

The Rangel Center has established a solid undergraduate and graduate program for public service, and the first class of students graduated this spring. The school is helping to place them in public service jobs and has succeeded in securing employment in the New York City Council and the Environmental Protection Agency, among other public institutions. Additionally, it has established multiple internships for students, including one at The White House and one in the Mayor's Office. The school awards more than $600,000 in financial support to a largely minority population of students who otherwise would be unable to afford the education. It will admit its third class this fall.

In light of current economic conditions, and because Congressman Rangel cannot legally turn over many of his papers and other materials until he is out of office, the Center has scaled back its plans for the Library and Archives. It still anticipates being the major repository of documents and related materials, but it will not need a separate building (as was originally thought), and with current technology and off-site storage, officials think they can properly archive the materials and provide easy and quick access at a lower cost.

As a result, the Center is inquiring whether it may use half of the original Starr grant for operating support for the public service program, while continuing to use the remaining half for archival purposes. Up to now, the educational program has been funded with a combination of private and public dollars, but the federal earmark that provided substantial support will not be renewed, and school officials are concerned that funds will be depleted faster than they can raise money. With more time, and an improved economy, officials feel confident they will succeed in sustaining the Center.



If there is concern about the long term viability of the Center, presumably Starr dollars could be restricted for an endowed scholarship, which could revert to the City College of New York if the Center ceased to exist.

Please let me know how you would like to proceed.

Thank you.

Hi,

I just spoke to David Rockefeller's office. They said he is fully booked for Monday and would not be able to be at Ford. When I asked on the Congressman's behalf if we could set up an appointment with Mr. Rockefeller, one of his assistants suggested that Congressman Rangel send Mr. Rockefeller a note about it.

If you need help drafting it, please let me know, but I think the simpler the better!
Thanks

CHARLES B. RANGEL
15TH DISTRICT, NEW YORK

March 7, 2007

Mr. David Rockefeller
30 Rockefeller Plaza
Suite 5600
New York NY 10112

Dear Mr. David

I would appreciate the opportunity to schedule a meeting at a time that is convenient for you in order to discuss with you my vision for the Charles B. Rangel Center for Public Service.

The City College of New York will be home to the Center, whose purpose will be to train and educate the next generation of our nation's public servants. It is a personal dream of mine to see this Center at City College, which resides in my congressional district and where so many talented young men and women from the community have gotten an excellent education. As I'm sure you know, CCNY's mission is one of excellence and access and many of our nation's leaders from every ethnic, racial, and economic group have earned their degrees there.

I have asked City College of New York Vice President Shelly Butler to contact your office and arrange a time that is convenient for us to come together. I am eager for you to meet City College President Gregory H. Williams, a man who has overcome many obstacles to achieve success—as with so many CCNY graduates in the past and the present.

Thank you very much for your consideration.

Sincerely,

Charles B. Rangel
Member of Congress

Exhibit 306

Confidential Memorandum

To:	Congressman Charles B. Rangel
From:	President Gregory Williams, Shelly Butler
Date:	October 17, 2007
Re:	Briefing – David Rockefeller

MEETING LOGISTICS:

Prospect:	David Rockefeller Marnie Pillsbury, Executive Director of The David Rockefeller Fund and Philanthropic Advisor to Mr. Rockefeller Peter Johnson, Associate Rockefeller Family and Associates
Date and Time:	Monday, October 22, 2007, 11:00am
Location:	David Rockefeller's Office—30 Rockefeller Plaza, Suite 5600 on the 56th Floor (West 49th Street, between Avenue of the Americas and Fifth Avenue)
Contact:	Iyo Roche, (212) 649-

OBJECTIVES:

- Interest Mr. Rockefeller in making a substantial contribution to the Rangel Center.
  - Focus on Mr. Rockefeller's relationship with Congressman Rangel (nephew Jay is a Democrat in the US Senate serving West Virginia).
  - Share Congressman Rangel's personal commitment to CCNY and his vision for the Center.
- Gauge interest level and answer questions.
- Close meeting by finding out what financial range Mr. Rockefeller would consider. We will follow-up with a written proposal in that range.

GIVING OPPORTUNITIES:

1. **$ 2.5 million to create the David Rockefeller Endowed Chair** at the Rangel Center (Political Science or Economics). An endowed gift at this level will produce $100K in annual income to attract a top scholar. The Rockefeller name will allow us to recruit a true star.
2. **$1.5M to create the David Rockefeller Fund for Excellence.** An endowed gift at this level will provide $75K in income to advance the mission of the Rangel Center and support its highest priorities.
3. **$1M to create the David Rockefeller Leadership Fellows Fund** at the Rangel Center. An endowed gift at this level will provide $50K in income to recruit the most promising students for the program.

PHILANTHROPY OF NOTE

- Limits giving to institutions directly or indirectly related to the family.
  - Family funding established: Spelman College; University of Chicago; Rockefeller University; Rockefeller Foundation; Rockefeller Brothers Fund; Museum of Modern Art; Colonial Williamsburg.
- **$900M** in total charitable giving (estimated by NY Times in Nov. 2006)
- Although many of his gifts bear his name, Mr. Rockefeller has been quoted that he prefers to make donations to a group's endowment without putting a lot of restrictions

EXHIBIT
Exhibit 307

on his gifts, "If you pick a good cause that's run by capable people, they're apt to know more about what is needed and how it should be used than an outside giver. Therefore it seems to me to give flexibility to good managers at causes is a good idea."

- **$100M pledged to MOMA** for endowment upon death and **$5M annual gifts** during his lifetime (as if MOMA already had $100M endowment gift).
- **$225M to Rockefeller Brothers Fund** (RBF) upon death (pledged 2006). Largest gift in fund's history. RBF was created by David Rockefeller and his four brothers. For David Rockefeller Global Development Fund, to support projects that improve access to health care, conduct research on international finance and trade, fight poverty, and support sustainable development, as well as to a program that fosters dialogue between Muslim and Western nations
- **$100M to Rockefeller University**--$30M of gift named the Graduate Program and $70M for restoration of labs and to support research (2005).
- **$10M to Harvard for the David Rockefeller Center for Latin American Studies** (2006). Helped establish the Center in 1995 with a $15M gift.
- **$5M pledged to International House** (2006).
- **$5M to the Peter G. Peterson Institute for International Economics** (2006).

BIO AND CAREER HISTORY:
Mr. Rockefeller is a prominent American banker, philanthropist, world statesman, and the current patriarch of the Rockefeller family. He is the youngest and only surviving child and grandchild of the prominent philanthropist John D. Rockefeller, Jr. and the billionaire oil tycoon John D. Rockefeller, founder of Standard Oil. His five deceased siblings are: Abby, John D. III, Nelson, Laurance and Winthrop.

EDUCATION:

- Attended the experimental *Lincoln School*, at 123rd Street, in Harlem.
- Harvard, graduated cum laude in 1936
- London School of Economics, one year post-graduate work
- University of Chicago, earned PhD in 1940

CCNY RELATIONSHIPS:

Corvena Francis, a senior majoring in Psychology at CCNY was one of 25 undergraduates nationwide awarded the 2007 Rockefeller Brothers Fund Fellowships for Aspiring Teachers of Color.

Rockefeller Brothers Fund

- $650K total to support City College Architecture Center (2002-2007).

Rockefeller Foundation

- $104K to support Dominican Studies Institute (2000-2002)
- $20KConference Transnationalization of Everyday Life (2001)
- $50K Toward a More Perfect UN (1987)

Sources: LexisNexis, www.google.com, Forbes, Chronicle of Philanthropy

SPEAKING POINTS - RECOMMENDATIONS

1. Congressman Rangel will introduce the Rangel Center by talking about his vision to have the face of government and public service represent the diverse population in the United States.

2. President Williams will speak about the history and mission of CCNY.
   - Access and Excellence.
   - Diverse population.

3. Vice President Shelly Butler will cover the following key components about the Rangel Center:
   - Harlem limestone townhouse.
   - The Charles B. Rangel Library ($5M Starr Foundation)
   - Two Degree Programs
     1. The Master's Program in Public Service, interdisciplinary.
     2. Combined BA/MA Program in Public Service – fast track program.
   - Charles B. Rangel Fellows: A Mid-Career Program in Leadership and Policy Innovation

4. Potential Questions and Answers (only if asked):
   Q. What is the timeline for fund-raising?
   A. There are three soft phases of the fundraising campaign for the Rangel Center.
   1. Phase I: Congressman Rangel submitting a bill to Congress for seed money. $3.5M
   2. Phase II: Public/private partnership that Congress requires for such projects.
   3. Phase III: Congress provides the balance of the funds after a successful second phase.

   Q. Commitments...who, how much?
   A. $5M Starr Foundation; $1M Gene Isenberg; $1M Ford Foundation (hosted a meeting breakfast to introduce the project to other foundation leaders); $500K Verizon Foundation; $130K New York Community Trust.

   Meetings with the following: AIG ($10M request to close), Heron Foundation, Altman Foundation, Rockefeller Foundation, Rockefeller Brothers Fund.

   Congressman Charles B. Rangel will be presenting a bill to Congress for seed money for $2 million. It is assumed that this bill will be successful.

5. Close with the Next Steps
   - Funding range
   - Scholarship or general operating support to educate and train students from underrepresented populations for careers in public service.

BIOS FOR MR. ROCKEFELLER'S ASSOCIATES

Marnie S. Pillsbury has been the Executive Director of The David Rockefeller Fund and Philanthropic Advisor to Mr. Rockefeller since 1990. She is a Trustee of The Rockefeller University and serves on the board of the Women's Campaign Fund, the Edward John Noble Foundation, and Rockefeller Philanthropy Advisors. She is also a member of the Council on Foreign Relations, the Advisory Committee for the David Rockefeller Fellows Program at the New York City Partnership, and the International Council for The Museum of Modern Art. Ms. Pillsbury served for many years as a Trustee of World Learning, formerly The Experiment in International Living, which operates in more than 40 countries around the world. She is also an advisor to a small grants program serving HIV/AIDS orphans and vulnerable children in South Africa. A graduate of Wellesley College (1965), Ms. Pillsbury received an MBA from the New York University Stern School of Business in 1987.

Peter J. Johnson has worked for the Rockefeller Family since 1976, most closely with John D. Rockefeller 3rd, Laurance Rockefeller and currently with David Rockefeller, as an advisor on political and economic issues. He is the co-author, with John Ensor Harr, of The Rockefeller Century (Scribner's, 1988) and The Rockefeller Conscience (Macmillan, 1991). He has worked closely with David Rockefeller for more than a decade on his Memoirs, which was published in October 2002, and has now been translated, into ten foreign languages. Mr. Johnson contributed articles on members of the Rockefeller Family to the Encyclopedia of New York City History (Yale University Press, 1994), and has written for other scholarly and popular journals, including the Colonial Williamsburg Journal. He and his wife authored articles on the history of Schoharie County, New York for the new Encyclopedia of New York State History, which will be published in 2005. His major areas of interest are politics, economic development and philanthropy in the United States and the modernization process in East Asia and Latin America during the twentieth century

Mr. Johnson is a graduate of Syracuse University, and holds advanced degrees in American History and British History from the Maxwell School of Citizenship and Public Affairs at Syracuse.

Meeting with David Rockefeller, Congressman Rangel and Marnie Pilsbury- 10.22.2007
Iyo Roche, (212) 649- (LM)– Marnie Pillsbury – 212 649-

President Williams
Ted Gershon (Congressman Rangel)
1971 First time DR + CR have met
Signac and Gaugin in his office

CR spoke of importance of education, employees rights, environment
Don't just import them, help your gov't to train them
Exercise influence in working with our private sector- .... Said that not educating other students in minority and poor communities, not graduating them.

With charter schools, excitement in learning
disappointed that prestige at CCNY had dropped until GHW came.
If ... could see public service as an alternative, bring successful people from the community(there will soon be a model charter school in Harlem) working with the private sector
The Rangel Center earmark passed the U.S. Senate and the House
Then GHW spoke of disadvantaged minorities and that he knows what its like to have doors of opportunities closed

Diversity at CCNY more than 50 percent of our students family income of under $30k, the College has represented NYC for 160 years; Rock visited it in 1906; this was David's grandfather.

Train students to change the face of government, professional and personal background make CCNY part of the Harlem community.

When CR first visited with Kissinger andAlbright, there were no Blacks or Browns in the State Dept.- he studied program at Harvard, grads are all over the world, Rangel Fellows, Rise doubled the funding

In Syracuse, doing a great job getting tax credits, greatest asset was Syracuse U.

Ted is working w.the business round Cable with Secy, Spelling; put together a natl trust as relates to training and jobs workers with H Paulson and C Rice, working w. Teachers College w. 10 schools

Spoke about health care for kids, education is the other thing

15th district mentioned as one of top 10 economics curriculum in the country.

GHW- suggestion re others to contact
Unrestricted- work w. Marnie

CSOC.CBR.00024466

Mr. Rockefeller said that in tribute to the Congressman, he would give him $100,000 to put toward any program he wished and that it would be unrestricted as he believes in that.

Dear Marnie,
Thanks so much for your gracious call today. I think the best way to address your gift would be to:

President Gregory H. Williams
The City College of New York
160 Convent Avenue, A300
New York, NY 10031

And please state in your letter that this is for the benefit of:

The Charles B. Rangel Center for Public Service

If you wish, you may like to copy Congressman Rangel on the letter, but you may be sure that we will copy him on your letter in any case. And, of course, it will come to me so I can provide any kind of receipt you prefer.

I know how limited your time is and appreciate that you want to help us open some doors. Ideally, we would love to bring you to campus and meet with some of our students. I think you would understand why we are so passionate about helping them.

My very best regards,
Shelly

Dear Shelly,

Thank you for sending me the press release about City University's formal approval of the naming of the Charles B. Rangel Center for Public Service.

As we learned from President Williams in our good meeting with Congressman Rangel, the Center will be a fine addition to CCNY and will serve as an invaluable resource for Harlem and New York City. David Rockefeller is very pleased to support this important new initiative in honor of Congressman Rangel's lifetime of public service. Accordingly, it is a pleasure to enclose his check in the amount of $100, 000, made payable to The City College 21st Century Foundation, and designated for The Charles B. Rangel Center.

Mr. Rockefeller hopes this support will help to leverage other private support and sends his best wishes and congratulations.

WASHINGTON, D.C. 20515

Tue Oct 11
12 noon

CHARLES B. RANGEL
15TH DISTRICT, NEW YORK

September 22, 2005

Mr. Donald Trump
The Trump Organization
725 Fifth Avenue
New York, NY 10022

Dear Donald,

I would like to meet with you, the virtual king of New York real estate, to request your advice and assistance concerning how to approach the renovation of a unique building and project described in the enclosed presentation. A limestone townhouse near The City College of New York is being restored for this new center. I want it to resonate with the work that will be conducted within it and have it be an impressive and effective space. I would deeply appreciate your input.

This initiative has me quite excited. The City College of New York plans to create the Charles B. Rangel Center for Public Service to provide an opportunity for education and training for careers in public service for underprivileged students. I want you to know of my personal interest in, and enthusiasm for, the creation of this Center and my pride in the decision of the City University to name it for me.

The Rangel Center at the City College of New York will be alive with the work of scholars and students working on public policy issues and studying the political dimensions of change. It will not be a Library or a Museum, but a living institution brimming with ideas and stimulating debate.

I will be exploring with my Congressional colleagues how best to move this idea through the appropriations process and am optimistic about securing funds for the planning phase of the creation of the Center. I am turning to you for your guidance on the next phase.

I will have someone in my office contact you to set up a meeting.

Sincerely,

Charles B. Rangel
Member of Congress

So great that I did not have this information at our last meeting, but I am glad that you left materials

MEMORANDUM

TO: Congressman Rangel
FROM: Dan Berger
DATE: October 7, 2005
RE: **Meeting with Donald Trump**

On Tuesday, October 11th, you are scheduled to meet with Donald Trump.

Per your request, I have compiled some information about Mr. Trump's previous philanthropic ventures.

In 2000, the Donald J. Trump Foundation's tax return, filed with the IRS, showed that the billionaire gave $160,000 to philanthropic causes. In 2002, it was $287,000, and in 2001 it was $306,000.

For your information I have attached several articles that discuss Mr. Trump's involvement in city projects from the Wollman Skating Rink in the late 80s to his most recent offer to rebuild the U.N. this July.

The proposal for the Charles B. Rangel Center for Public Policy is in the inside flap of this binder.

Telephone report
Date: October 7, 2005
To: File
From: Shelly
Re: George Dalley

George called today to tell me that Charlie has a meeting with Donald Trump on Tuesday—Charlie is intending to talk about the Center—Trump has been sent the proposal. I reminded George that Trump had stepped in a renovated Wollman Rink for Mayor Koch in under three months and under budget and he thought that was useful info, also that Ed Koch was a CCNY grad.

I later spoke to George and asked if the three letters we had drafted—to Trump and the presidents of the Mellon and Carnegie foundations had been sent, and he said yes and that he would send copies to us. I asked if he was going to call or if we should and he asked if it would be better if they did. I replied that in these two cases, we would ask them to do it as these were very big foundations and it would help us.

From: Shelly
Re: call to trump January 26, 2007

I called 212) 832- and reached Donald Trump's assistant, Kelly Stengele (kstengele). She didn't appear to know anything about this invitation, so I emailed her the version I had been sent by Maureen Caruso and mentioned that the Congressman had asked me to call. If Mr. Trump couldn't make it on Monday, could we meet with him at another time?

I called David Rockefeller's office and he is fully booked for Monday. When I asked if we could set up an appointment with Congressman Rangel, they suggested that Charlie write David a note.

HOUSE OF REPRESENTATIVES
WASHINGTON, D.C. 20515

CHARLES B. RANGEL
15TH DISTRICT, NEW YORK

March 7, 2007

Mr. Donald Trump
Trump Organization
725 Fifth Ave.
New York, NY 10022

Dear Mr. Trump,

I would appreciate the opportunity to schedule a meeting at a time that is convenient for you in order to discuss with you my vision for the Charles B. Rangel Center for Public Service.

The City College of New York will be home to the Center, whose purpose will be to train and educate the next generation of our nation's public servants. It is a personal dream of mine to see this Center at City College, which resides in my congressional district and where so many talented young men and women from the community have gotten an excellent education. As I'm sure you know, CCNY's mission is one of excellence and access and many of our nation's leaders from every ethnic, racial, and economic group have earned their degrees there.

I have asked City College of New York Vice President Shelly Butler to contact your office and arrange a time that is convenient for us to come together. I am eager for you to meet City College President Gregory H. Williams, a man who has overcome many obstacles to achieve success—as with so many CCNY graduates in the past and the present.

Thank you very much for your consideration.

Sincerely,

Charles B. Rangel
Member of Congress

CBR/djb

Subject: Trump responds to CBR on Rangel Center
Importance: High

Vivian, Jim, Rhona Grass of the Trump organization (212) 715 called to say that in response to Charlie's letter requesting support of the Rangel Center at City College Mr. Trump would like to meet with Charlie and is available for a meeting in New York during the Easter recess.

Please ask Charlie if he is willing to do this during the Easter recess and if he is, please coordinate the scheduling of a meeting between Charlie and Donald Trump.

Confidential Memorandum

To:	Congressman Charles B. Rangel
From:	CCNY President Gregory Williams CCNY Vice President Shelly Butler
Date:	May 1, 2007
Re:	Briefing – Donald Trump

MEETING LOGISTICS:

Prospect:	Donald Trump, CEO Trump Organization
Attendees:	Congressman Charles Rangel, President Gregory Williams, and Vice President Shelly Butler
Date and Time:	Friday, May 4, 2007 9-10 AM
Location:	725 Fifth Avenue, between 56th and 57th Streets
Contact:	Vivian E. Jones, 212-663

OBJECTIVES:

- Interest Mr. Trump in making a substantial contribution to the Charles B. Rangel Center.
  - Focus on shared values of Trump and CCNY. **Both = New York.**
  - Focus on vision to have more diverse public servants reflecting U.S. and unique factors at CCNY.
- Gauge interest level and answer questions.
  - Note: Mr. Trump has the financial capacity to make a 10-figure gift; however $1M is the largest gift that has been publicly reported (to United Way, initiated by Billie Tisch).
- Close by finding out what financial range Mr. Trump would consider. We will follow-up with a proposal.

GIVING OPPORTUNITIES: Below options present a relatively low cost way to have the Trump name in Harlem; also will be recognized nationally with Congressman Charles Rangel.

1. **$10M gift for the Rangel Center to create Trump Hall**
2. **$3 million to create the Charles Rangel or Donald J. Trump Chair**
3. **$ 2.5 million to create the Trump Leadership Fellowship Program** at the Rangel Center. An endowed gift at this level would produce $100K in annual income to support BA/MA students.
4. **$1M to create the Donald J. Trump Visiting Professorship**

BACKGROUND

Forbes estimates net worth at $2.9 billion. The estimate has been disputed with Mr. Trump reporting "I'm worth $6 billion," and a New York Times reporter estimating it to be "$250 million at most." Mr. Trump has been criticized for level of philanthropic contributions. Mr. Trump is the son of a Brooklyn real estate developer (a German immigrant; mother from Scotland) and went immediately into the family business after receiving his undergraduate degree in economics from the University of Pennsylvania.

WEALTH INDICATORS

- Personal residence in Trump Tower with approximately 30,000 square feet of space has been reported to be **worth as much as $50 million.**
- Palm Beach estate was purchased for **$40 million** at a bankruptcy auction in 2004. The Wall Street Journal reports that Mr. Trump is currently trying to sell it for **$125 million.**
- Mar-A-Lago, resort in Palm Beach Florida. Landmark property valued **at $200 million.**
- In late 2003, Trump, along with his siblings, sold their late father's real estate empire to a group of investors that included Bain Capital, Kolberg Kravis Roberts and Company, and Lambo Nuni Bank for a reported $600 million. **Mr. Trump's share was $200 million**, which he later used to finance Trump Casino & Resorts.
- The Trump Building at40 Wall Street. Bought and renovated building in 1996 for about $35 million. Trump claims it is worth **$400 million and New York tax assessors value it $90 million.** Mr. Trump has taken out a $145 million mortgage on this property to use for other investments.
- 2,212 shares of Trump Entertainment **stock valued at $36K** (as of 4/25/07)
- 3,675,000 shares of Premiere Publishing Group **stock valued at $735K** (as of 4/25/07)

PROPERTIES

- Grand Hyatt: Park Ave at Grand Central, New York City, NY. First major project by Trump. Sold 50% interest to Hyatt Corporation for a reported $140 million dollars in 1996
- Trump Palace: 200 East 69th Street, New York, NY
- Trump Parc: 106 Central Park South, New York, NY
- Trump Park Avenue: Park Avenue & 59th Street
- Trump Tower: 725 Fifth Ave, New York, NY 10022 Trump owns the retail and office space on the lower half of this building.
- Trump World Tower: 845 United Nations Plaza, New York, NY
- Trump Tower at City Center: 10 City Place, White Plains, NY
- Trump Plaza of the Palm Beaches: Trump Plaza: 167 East 61st Street, New York, NY

PHILANTHROPY

- United Way of New York City $1M 2002-2004
  - Pledged to match gifts over 4 years to the agency's NYC community fund. **Gift was reportedly initiated by trustee Billie Tisch.**
- Trump Pavilion for Nursing and Rehabilitation on the Campus of Jamaica Hospital Medical Center
  - Public information on this gift is not available. When Mr. Trump's mother, Mary Trump, died in 2000 an obituary asked that gifts be made to the Trump Pavilion.
  - Naming for this space is estimated to be in the $1-5 million range.
- $100K to Police Athletic League and Damon Runyon Cancer Research Fnd.
- Grants Under $25K to:
  - White Plains Hospital Center , National Children's Dental Foundation, Intrepid Fallen Heroes Fund, American Jewish Historical Society, Boys and Girls Clubs of Tampa Bay, Museum of Jewish Heritage, Kaleida Health Foundation, Education Alliance, New York Blood Center

Donald J. Trump Foundation
2005: $82K in assets; $655K in grants distributed
2004: $2K in assets; $736K in grants distributed
2003: $15K in assets; $185K in grants distributed

SPEAKING POINTS - RECOMMENDATIONS

1. Congressman Rangel will introduce the Rangel Center by talking about his vision to have the face of government and public service represent the diverse population in the United States.

2. President Williams will speak about the history and mission of CCNY.
   - Access and Excellence.
   - Diverse population.

3. Vice President Shelly Butler will cover the following key components about the Rangel Center:
   - Harlem limestone townhouse.
   - The Charles B. Rangel Library
   - Two Degree Programs
     1. The Master's Program in Public Service, interdisciplinary.
     2. Combined BA/MA Program in Public Service – fast track program.
   - Charles B. Rangel Fellows: A Mid-Career Program in Leadership and Policy Innovation

4. Potential Questions and Answers (only if asked):
   Q. What is the timeline for fund-raising?
   A. There are three soft phases of the fundraising campaign for the Rangel Center.
   1. Phase I: Congressman Rangel submitting a bill to Congress for seed money. $3.5M
   2. Phase II: Public/private partnership that Congress requires for such projects.
   3. Phase III: Congress provides the balance of the funds after a successful second phase.

   Q. Pending commitments...who, how much?
   A. Gene Isenberg $1M. Ford just made $1 million grant and hosted a meeting breakfast to introduce the project to other foundation leaders. Meetings with the following: AIG, Heron Foundation, Altman Foundation, Rockefeller Foundation, Rockefeller Brothers Fund, New York Community Trust.

   Congressman Charles B. Rangel will be presenting a bill to Congress for seed money for $3.5 million. It is assumed that this bill will be successful.

5. Close with the Next Steps
   - Funding range
   - Building or general operating support to educate and train students from underrepresented populations for careers in public service or specific funding for scholarships or building.

9/28/2007

May 15, 2007

Mr. Donald Trump
Chief Executive Officer
Trump Organization
725 Fifth Avenue
New York, NY 10022

Dear Mr. Trump,

It was such a privilege to meet with you earlier this month with Congressman Charles B. Rangel and Vice President Shelly Butler. I appreciate your giving us the opportunity to talk to you about our vision for The Charles B. Rangel Center for Public Service at The City College of New York.

This is one of the most exciting initiatives at the College and we would be honored to have you be a part of it. I know you are good friends with the Congressman and that he would be thrilled to have you involved with this project, which is so close to his heart. It is truly the culmination of his lifetime of public service.

We are proud to partner with Congressman Rangel to educate the next generation of public servants--young people who like himself never thought they could be a part of that "castle on the hill." Your leadership will make it possible for City College to educate the future Charlie Rangels for our nation. Below is a menu of giving opportunities for your consideration:

- **A gift of $3 million will create the Donald J. Trump Chair** at the Rangel Center. An endowed chair is one of the highest honors that a college can award to its faculty. A gift at this level will enable us to conduct a nationwide search to hire a preeminent scholar and will bring additional prestige to the Center. The Trump Chair will remain in perpetuity at City College.
- **A gift of $ 2.5 million will establish the Donald J. Trump Leadership Fellowship Program** at the Rangel Center. An endowed gift at this level will produce enough income in perpetuity to support an annual cohort of students in the BA and MA Program in Public Service. In addition, it will give the Center the resources necessary to recruit the best students to the program, regardless of their financial situation.
- **A gift of $1 million will fund the Donald J. Trump Visiting Professorship** at the Rangel Center. A gift at this level will allow the Center to engage a distinguished academic or practitioner with the Center for a short period of time. This scholar will be a leader in his/her field and will bring a new perspective to the work of the Center. This chair will remain at the Center in perpetuity.

The above are just a sampling of opportunities for your support; we of course would be thrilled to have you play a transformational role with a gift at the $10 million level as we discussed in your office. As one of the most diverse colleges in the country, CCNY is the perfect host for the Charles B. Rangel Center for Public Service. This fact enhances our evolving academic success story and has drawn the increasing attention of prominent government and civic leaders, giving our public service programs the spotlight they deserve. The Rangel Center is one way City College is addressing the need for America's "governing class" to reflect our nation's rich tapestry of cultures, faiths and ethnicities—an area the Congressman has devoted considerable energies to over the course of his career.

Thank you again for considering how you would like to become involved with the Charles B. Rangel Center for Public Service at The City College of New York. I look forward to hearing from you. Please do not hesitate to call me with any questions.

Sincerely,

Gregory H. Williams
President

cc: Congressman Charles B. Rangel

T: 212-686-0010 F: 212-532-8528
www.nycommunitytrust.org

March 1, 2006

The Honorable Charles B. Rangel
163 West 125 Street
New York, NY 10027-4419

Dear Congressman Rangel:

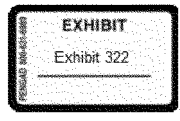
I am writing to you as a member of the conference committee on H.R. 4297 and S. 2020—and as the founder of a donor-advised fund in The New York Community Trust, the Ralph J. Rangel Fund.

The House bill is largely silent on many of the reform proposals in the Senate version. We support many of them—and, in fact, several proposals reflect long-standing Trust policies and practices—but some proposed provisions for donor-advised funds would have a chilling affect on community philanthropy.

We are particularly concerned about restrictions on gifts of non-publicly traded appreciated property; the Senate proposal makes a distinction between those contributed to donor-advised funds in public charities and those donated to other public charities. Community foundations such as ours have developed significant expertise in accepting illiquid assets for the benefit of charity. A number of New York donors have much of their wealth in limited partnerships interests and other illiquid assets that they use to support charity. Last year, our donor-advisors made grants—most to New York City nonprofits—totaling $90 million. If the distinction is put into law, those donors who contribute these complicated assets will look elsewhere, with the likely result that their generosity will go to the large institutions that can deal with these assets—hospitals and universities, for example—rather than to the many small and medium-sized nonprofits that work in neighborhoods throughout New York.

I have attached two documents. The first contains a memorandum from our general counsel explaining the provisions that most concern us. The second is a long and detailed analysis of the Senate version prepared by the Council on Foundations for the Joint Committee on Taxation, which we hope you will give to your legislative aide.

Confidential Treatment Requested
By NYCT Pursuant to FOIA



I would be happy to meet with you or talk with your staff to explain further our concerns about S.2020. You have been an advocate for community philanthropy for as long as I can remember, and your voice on these troubling provisions needs to be heard. The ability of community foundations like The New York Community Trust to continue to support local communities and neighborhood organizations is vital.

Sincerely yours,

Lorie A. Slutsky
President

Re: Tax Conference on H.R. 4297 and S. 2020

As the tax conference work on H.R. 4297 and S. 2020 begins, I wanted to remind you of a few provisions that particularly affect The New York Community Trust. As you know, the charitable reform proposals in the Senate bill are extensive, and the House bill is largely silent on most of these items.

I am troubled that, despite the involvement of dozens of members of the nonprofit community, the Senate bill disregards a number of the recommendations of the Panel on the Nonprofit Sector, especially in view of the fact that the Panel was formed at the request of Chairman Grassley and Ranking Member Baucus. I direct your attention to two principal concerns below that affect donor-advised funds. An excellent, but highly technical, discussion of these and other provisions is provided in the letter dated February 21, 2006, from the Council on Foundations to the Joint Committee on Taxation.

1. Illiquid Assets Held in Donor-Advised Funds.

This issue has two parts: (i) the distinction between donor-advised funds in community foundations and other public charities regarding gifts of illiquid assets, and (ii) the special payout rules proposed for donor-advised funds with these assets.

(i) There is a fundamental unfairness in treating gifts to public charities for donor-advised funds differently than gifts to other public charities. The Panel on the Nonprofit Sector recommended that reforms with respect to gifts of so-called qualified appraisal property should apply uniformly to all charitable donees. Gifts of these assets that are not immediately marketable are a significant source of support for many charities, including The Trust.

There is no evidence that donor-advised funds and other public charities liquidate gifts of appreciated property differently from each other, and, there are legitimate circumstances under which valuable gifts simply can't be liquidated quickly. It may be that the property itself is difficult to sell, such as complex gifts of real property or closely held stock, and it may take time to find a buyer at the best price. Selling to meet an artificial deadline

Confidential Treatment Requested
By NYCT Pursuant to FOIA

could result in a board breaching its fiduciary responsibility. In addition, some assets are subject to restrictions on sale, such as shares of a publicly traded company subject to a lock-up agreement with an underwriter, or Rule 144 or 145 restrictions under federal securities laws, or stock in a closely held company subject to a shareholders' agreement limiting sales by any shareholder. In these cases, the value of the gift already reflects the restriction on marketability.

As a practical matter, small grass-roots organizations are not staffed to accept these gifts. Unfortunately, by increasing the difficulty in accepting and holding such gifts for donor-advised funds, it seems likely that these assets will instead go to major institutions such as hospitals and universities.

If the concern is one of a mismatch of the deduction claimed by the donor and the value received by charity, current law requires charities to report sales of this type of property within two years, which allows the IRS to track whether the proceeds of the sale of a gift approximate the value of the deduction claimed. Certainly this 2-year time period could be extended.

(ii) The Senate proposals also would create special payout rules for individual donor-advised funds holding more than 10% in illiquid assets: each such donor-advised fund would be required to pay out 5% of the fund's assets annually. In addition, one proposal, with which we agree, would impose an overall 5% payout requirement on the total assets in donor-advised funds held by the sponsor public charity. If the charity can meet that payout requirement, there is no compelling reason to impose a different rule for a fund that has an interest in, for example, restricted stock that equals 15% of the fund's assets. This provision also may apply to all donor-advised funds invested in a charity's investment pool that includes commonly-held illiquid assets, such as hedge funds, private equity, and venture capital assets.

These proposed restrictions that treat gifts of property to public charities for donor-advised fund differently than gifts to public charities for other charitable purposes should be eliminated because they would limit community charity.

2. Grants from Donor-Advised Funds.

Donor-advised funds would be precluded from making grants to organizations other than those described in IRC § 501(c)(3). Other kinds of charitable grants would be prohibited, such as grants to civic organizations, volunteer fire departments, and foreign organizations (unless the grantmaking charity can determine that the recipient is the equivalent of a U.S. charity). As a result, grants from donor-advised funds to the small civic organizations that address a broad array of issues would be precluded. Donors to many community foundations (including The New York Community Trust) and other sponsoring charities are interested in supporting these kinds of charitable efforts, and the sponsoring charities follow extensive due diligence procedures to reduce the risk that the grants would be used for non-charitable purposes.

Confidential Treatment Requested
By NYCT Pursuant to FOIA

This provision should be revised to permit the sponsoring charity to make grants for charitable purposes provided it follows reasonable procedures to ensure the grants are used for charity, such as procedures akin to the expenditure responsibility procedures used by private foundations.

COUNCIL *on* FOUNDATIONS

February 21, 2006

Roger Colinvaux
Gordon Clay
Joint Committee on Taxation
Room 1015
Longworth House Office Building
Washington, D.C. 20515

Dear Roger and Gordon:

I appreciated the opportunity to discuss with Gordon the Council's concerns with provisions of S. 2020 addressing donor-advised funds, supporting organizations and private foundations. As you know, the Council on Foundations has supported the need for reasonable reform measures to address areas of documented abuse. We very much appreciate the work and thought that both you and members of the Senate Finance Committee staff have given to crafting reform proposals. However, the sweeping nature and complexity of those proposals, particularly as they address donor-advised funds and supporting organizations, has given rise to a significant number of critical issues that we believe must be addressed before the reform measures are adopted. Given the technical nature of some of our concerns, I thought it might be helpful to provide you with a written summary.

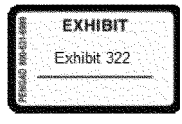
Donor-Advised Funds

Illiquid Asset Donor-advised Funds

The Council continues to oppose restrictions on gifts of property that treat those gifts differently when made to fund donor-advised funds than when made for other charitable purposes. In this regard, we support the recommendation of the Panel on the Nonprofit Sector that reforms with respect to qualified appraisal property should apply uniformly to all charitable donees. While well-intentioned, the inclusion of special rules for illiquid assets creates numerous critical issues. Therefore, we recommend that these provisions be dropped, a step that would greatly simplify the administration of a new regulatory framework for donor-advised funds. However, if this provision continues to be included in the bill, the following issues must be addressed:

1828 L STREET, NW, SUITE 300, WASHINGTON, DC 20036-5168 • 202/466-6512 • www.cof.org

Confidential Treatment Requested
By NYCT Pursuant to FOIA



1. Page 203, lines 1-7:[1] The provisions of S. 2020 regulating illiquid asset donor-advised funds appear to us to be intended to regulate situations in which a particular donor-advised fund holds a particular asset that is illiquid. If the provision becomes law, each such fund will be subject to individual payout requirements. It is the practice at community foundations to attribute donated assets to particular funds until liquidated. Accordingly, although we disagree strongly with the need for the provision, we understand how it would operate in the case of donated assets that have not been liquidated or have been liquidated but replaced by other illiquid assets attributed only to that fund.

However, the definition of an illiquid asset donor-advised fund includes any fund in which the value of illiquid assets exceeded 10 percent of the fund's total assets at the end of the preceding tax year. This raises the question of whether the definition applies to donor-advised funds the assets of which are entirely invested in the community foundation's investment pool or pools. The common practice at community foundations, and presumably at other charities, is that once contributed assets have been liquidated, the donor-advised fund participates in the community foundation's pooled investments, receiving its pro-rata share of the pool's income and appreciation. Some community foundations offer donors a choice among investment pools with different investment strategies, but donors do not participate in the design or investment of the pools. These pools generally also include assets attributable to other kinds of funds, including the community foundation's unrestricted endowment.

The Council's most recent survey of community foundations' asset allocation mix and investment strategies found that more than 10 percent of the value of investment pools at some community foundations is in alternative investments including real estate, venture capital and hedge funds. This is particularly true of larger community foundations with access to more sophisticated investment managers and mirrors investment strategies being used by other institutional investors. To prevent a result in which each donor-advised fund at these community foundations becomes an illiquid asset donor-advised fund, we would appreciate a clarification of the definition to exclude funds the assets of which consist solely of an undivided interest in one or more investment pools maintained by the sponsoring charity.

2. Page 203, lines 8-12: The definition of an illiquid asset states that an illiquid asset is anything other than cash or marketable securities, the value of which is held for the entire year as such asset. This is reasonably clear. However, the definition then adds that it includes "any other illiquid asset." There does not seem to be any need for this additional statement and it adds confusion to the definition. We recommend that it be dropped.

3. Page 203, lines 8-12: The definition of illiquid asset is sufficiently broad to include gifts of remainder interests in personal residences/farms. These gifts cannot be liquidated until the expiration of the life estate and the deduction afforded to donors already is reduced to take this into account. The definition should be amended to exclude gifts of remainder interests prior to the expiration of the life interest.

[1] Page references are to S. 2020 as it passed the Senate on Nov. 18, 2005.

EXHIBIT
Exhibit 322

NYCT_0000225

CSOC.CBR.00015660

4. Page 203, lines 8-12: The definition of illiquid asset also would include gifts of life insurance policies during the life of the insured. Donors generally intend that the donee charity hold these policies until the donor's death, enabling the charity to collect the policy's face value, and many charities do so. When contributed to create a donor-advised fund, donors generally nominate their children or grandchildren to be the fund's advisors. Donors who contribute these policies receive a deduction equal to approximately the policy's cash surrender value, not the policy's face value. The definition should also be amended to exclude gifts of life insurance policies.

Qualifying Distributions

1. Page 205, lines 20-21. The proposed limitation on permissible grantees to organizations described in section 170(b)(1)(A) will create major problems for community foundations and other public charities that hold donor-advised assets.

A. Domestic Grantmaking: As allowed under current law, many public charities with donor-advised funds, including many community foundations, routinely make grants, including grants from donor-advised assets, to noncharitable organizations using procedures designed to ensure that grant funds are used solely for a charitable purpose. For example, a community foundation may make a donor-advised grant to a local service organization, such as the Elks or the Moose, to support a charitable activity such as the delivery of meals or presents to needy individuals at a holiday. Similarly, a community foundation may make a donor-advised grant to a local Chamber of Commerce to support a job-training program. These grants would no longer be permitted if S. 2020 is adopted without change.

B. International Grantmaking: Some community foundations and several other public charity members of the Council use the donor-advised mechanism to make grants to foreign nongovernmental organizations. As we have noted previously, these charities have augmented their existing due diligence procedures for grantmaking to ensure that grants are not used for any noncharitable purpose, including support for terrorists. S. 2020 would permit international grants using assets in donor-advised fund only if the foreign NGO has obtained an IRS determination that it is a public charity or if the sponsoring charity determined that it is the equivalent of a public charity and so is described in section 170(b)(1)(A). As you are aware, private foundations have found the equivalence process cumbersome and expensive and many opt, instead, to use expenditure responsibility, an option that is not provided in S. 2020. An additional problem is that having equivalence determinations as the sole option will preclude grants to support charitable projects of overseas organizations that are not the equivalent of US public charities.

Both these problems can be solved by letting sponsoring organizations make donor-advised grants using either procedures similar to the section 4945 expenditure rules for private foundations or equivalence determinations.

Confidential Treatment Requested
By NYCT Pursuant to FOIA

2. Page 205, lines 16-19: We recommend clarifying the definition of a qualifying distribution to include distributions that would be program-related investments if made by a private foundation. Although somewhat uncommon, a distribution from assets held in a donor-advised fund may take the form, for example, of a loan to a charity rather than an outright grant. Clarification is also needed to ensure that the resulting indebtedness is not considered an "illiquid asset."

3. Page 206, lines 5-8: What are "procedures similar to those described in section 4942(g)(2)?" Will IRS approval be required or will it be sufficient if the sponsoring charity's board determines that the proposed set-aside meets the substance of the private foundation requirements?

4. Page 206, beginning at line 13: What is a "charitable program?" Some community foundations ask donors, including advised-fund donors, to contribute to funds that help pay the operating expenses of the community foundation. These may be annual gifts or gifts to an endowment fund maintained for the support of the community foundation and are in addition to the fee levied against the fund to cover the administrative costs directly attributable to the fund. Will these gifts be excluded as qualifying distributions because they are not to a "charitable program?" Similarly, instead of collecting a fee from each advised fund for administrative expenses, some community foundations require each donor-advised fund to make an annual distribution to the community foundation's general fund or its general endowment in addition to grants recommended by the fund's advisors. Are these distributions not to a "charitable program" if the community foundation uses a portion of them to help defray its operating costs?

5. Page 214, lines 9-17: Conforming changes would be needed to new section 4968(c)(1) to ensure that distributions described above are not prohibited acts.

Valuation Rules

1. Page 208, lines 4-8: The section requires that securities be valued monthly and that cash be determined on an average monthly basis. Most community foundations make these determinations on a quarterly, rather than a monthly, basis. We recommend that sponsoring charities be permitted to use quarterly valuations.

2. Page 208, line 9 to page 209, line 2: The assumed 5 percent increase in the value of illiquid assets is arbitrary. In some cases it will overstate the increase, while in others the value will be understated. The required 5 percent increase is particularly troublesome for illiquid assets, such as limited partnership interests, the value of which is reported each year to the Internal Revenue Service on Schedule K-1. There does not appear to us to be any compelling reason to use a different value for donor-advised purposes than the one otherwise being reported to the IRS. If the illiquid asset provisions are not dropped, we recommend that charities be permitted to use valuations reported to the IRS on the prior year's Schedule K-1, where applicable.

NYCT_0000227

CSOC.CBR.00015662

Definition of Advised Fund

1. Page 209: We recommend the inclusion of a definition of donor. Some advised funds, such as memorial funds, have multiple donors, only one of whom is afforded advisory privileges. Tying the definition of donor to the receipt of advisory privileges is particularly important to avoid a result in which numerous small donors to a fund become disqualified persons of the sponsoring charity.

2. Page 209 line 22 to page 210 line 3: We recommend that the definition of advisor be clarified to exclude individuals who are designated by donors to be members of committees solely by reference to their title or position. Many existing fund agreements for scholarship funds specify the members of the committee by reference to a person's title or position. For example, a fund to provide scholarships in math and science might provide that the committee will include the heads of the science and math departments at a local high school. If these individuals are considered to be designated by the donor, the fund will not fit within the exclusion on page 210.

3. Page 210, lines 19-23: We would appreciate clarification that "requirements similar to those described in section 4945 (g)" do not include the need to seek advance approval from the Secretary. There are tens of thousands of existing funds at community foundations alone that provide grants to individuals for the described purposes. Some of these funds operate under a common set of rules, but many have individual requirements and separate committees. If advance approval is required, the predictable result will be that sponsoring charities will incur substantial expense in preparing and submitting descriptions of their procedures to the IRS and that the applications will then be deemed automatically approved because the IRS will lack the capacity to review the submissions within the required 45 days. Even on a prospective basis, an advance approval requirement will be a significant burden both on the sponsoring charity and the IRS.

4. Page 210: Many community foundations have disaster relief and emergency hardship funds that make grants to individuals in times of need. Some of these funds clearly are not donor-advised. Others, however, are advised by committees that may include the donor or persons appointed by a donor. For example, in the aftermath of Hurricanes Katrina, Rita, and Wilma, several community foundations established disaster-relief funds to provide assistance to employees of various businesses. These funds operate under the strict guidelines prescribed for similar funds operated by corporate private foundations, with the added safeguard that they are overseen by a public charity that is not controlled by the employer. An exception is needed to preserve the ability to use donor-advised funds as a mechanism to make grants to individuals to alleviate hardship.

5. Page 211, lines 1 to 9: While we appreciate that S. 2020 will permit the Secretary to exclude other types of funds, the need for him to do so through regulation raises the issue of whether the types of fund described must be considered donor-advised until such time as the regulation issues. Given the extreme backlog with respect to guidance and the need of sponsoring charities for certainty on the effective date of the new measures as to which funds

Confidential Treatment Requested
By NYCT Pursuant to FOIA

EXHIBIT
Exhibit 322

NYCT_0000228

CSOC.CBR.00015663

are advised and which are not, we ask that the funds described in lines 1 to 9 not be considered donor-advised until the Secretary issues guidance on the definition.

6. Page 211, lines 1-9: Community foundations frequently hold funds that are created by transfers from a governmental entity or another charitable entity subject to fund agreements that specify that the transferring entity is to be the sole beneficiary of distributions from the fund. Although often referred to as "agency endowments," these funds may be endowed or non-endowed. Because the transferring charity or government is the donor, and the fund agreements often permit donor charities to request distributions in particular situations, such as a capital campaign, that exceed what would normally be allowed under the community foundation's spending policy, these funds could be construed as "donor-advised.". We ask that the definition of advised fund be clarified to exclude these funds, perhaps by excluding charitable organizations and governmental entities from the proposed new definition of "donor." Otherwise, the funds will be precluded from making distributions to the charities that established them.

7. Page 211, lines 1-9. Similarly, community foundations often hold funds established by transfers from a non-charitable entity such as a local chapter of the Elks or a local Chamber of Commerce. While many of these funds are used primarily or exclusively to make grants to public charities, some make grants to the organization that created them to enable that organization to carry out a charitable activity. These funds either need to be exempted from the definition of donor-advised or changes need to be made to the provisions of the bill addressing qualifying distributions, taxable distributions, and prohibited benefits to permit distributions to the donor organization as long as the sponsoring charity follows procedures similar to those describe in section 4945(h) to assure that the grant is used for charitable purposes.

Prohibited Acts

Page 214, lines 15-16: Donors occasionally ask that their advised funds be terminated by a grant of the assets to another public charity to create a new donor-advised fund or add to an existing one. Some donors make this request because they have moved to a different part of the country and wish to have their new community foundation assist them with grantmaking. Some advised funds are transferred when a fund being incubated at a community foundation for a neighboring geographic area grows large enough to become a separate charitable entity. Some donors request a transfer of assets from an advised fund at a public charity that is not a community foundation in order to make their grantmaking more effective by gaining access to the community foundation's knowledge of local charitable organizations. We recommend that these transfers be permitted, although we understand that distributions may need to be excluded as qualifying distributions in determining whether the original sponsoring charity has met its distribution requirement.

Exhibit 322

NYCT_0000229

CSOC.CBR.00015664

Prohibited Benefits

1. Page 215, lines 18 to 23: This section of S. 2020 imposes excise tax penalties on donors and advisors who derive "a more than incidental benefit" from a distribution from an advised fund. We would appreciate clarification that a benefit is incidental if the donor could disregard the benefit in claiming a deduction for a direct charitable gift. We would further appreciate clarification that a donor does not receive "a more than incidental benefit" if a donor pays the nondeductible portion of a ticket to an event, while a grant from a donor-advised fund pays the amount the donor would have been able to deduct if the donor had made the payment directly.

2. Pages 215 – 219: There is a need for coordination provisions with section 4958 and within new section 4969 to ensure that the same individual is not subjected to multiple penalties for the same act. For example, as drafted, an advisor who recommends a grant that results in a private benefit to the advisor potentially is subject to a 25 percent excise tax penalty under section 4958 for an excess benefit transaction, a 25 percent excise tax penalty under section 4969 for advice that resulted in a private benefit, and another 25 percent penalty under section 4969 as the recipient of the benefit. As an example, without coordination provisions, and depending on whether and how the concept of 'incidental benefit" is clarified, a donor who recommended a $10,000 distribution to a museum that resulted in the donor receiving two tickets to a dinner (valued at $150) could be penalized more than $5,000 -- $2,500 for advising the distribution, $2,500 for receiving the benefit, and $187.50 for the excess benefit transaction ($37.50 excise tax plus $150 to correct the transaction). In this connection, we note that new section 4969 should include a correction requirement.

3. Pages 218-219: By making donors, advisors, and persons related to them disqualified persons for purposes of section 4958, section 332(a) of S. 2020 greatly expands the number of disqualified persons, making oversight of transactions with such individuals difficult or impossible to manage. Assuming an average of four disqualified persons per fund, which is likely on the low side, a charity with as few as 500 donor-advised funds could find itself with upwards of 2,000 new disqualified persons. Since S. 2020 separately prohibits and penalizes payments from advised fund assets to or for the benefit of donors, advisors, and persons related to them, there does not seem to be any reason to also extend section 4958 to those transactions.

Definition of "Investment Advisor"

Page 219, line 18 to page 220, line 2: Does the definition include all advisors/managers for the community foundation's pooled investments if the pools include assets attributed to donor-advised funds or just those advisors/managers that directly manage assets attributed to an individual donor-advised fund?

Confidential Treatment Requested
By NYCT Pursuant to FOIA

Prohibited Transactions

Page 221, lines 1-10: Gifts of closely-held business interests often can be liquidated only by sale to the donor or related parties. The term "excess benefit transaction" needs to be clarified so that it excludes transfers of donated interests to the donor or related parties in exchange for a payment that reflects the fair market value of the asset.

Supporting Organizations

Page 237, line 17 – 18: The determination of 'distributable amount' based on the entity's fair market value at a single point in time ("the last day of the preceding taxable year") fails to recognize market fluctuation during the course of a taxable year. This methodology also fails to take into account the impact of gift additions to the entity that may be concentrated at the end of the entity's taxable year, thus producing little or no investment return to support the distributable amount without the invasion of gift principal. Supporting organizations that are endowed will be subject to the Uniform Management of Institutional Funds Act (UMIFA) or other state law that may restrict distributions from such endowed assets where the value has fallen below historic principal. These two legal constructs unnecessarily conflict. In this connection, we recommend that the determination of the 'distributable amount' be based on the applicable percentage of the average fair market value of the aggregate assets of such organization on the last day of the three preceding taxable years.

Page 239, lines 1 – 5: The caption reads "administrative and operating expenses," but the amended language addresses only administrative expenses. For clarity, the words, "and operating," should be inserted before the word, "expenses," on line three.

Page 243, Line 1: The prohibition on payments to disqualified persons should be amended to exclude transfers of donated assets to disqualified persons in exchange for payment of fair market value for those assets. Otherwise, supporting organizations will be largely precluded from accepting gifts of closely-held business interests or will be unable to liquidate those gifts.

Page 244, lines 19-22: The exception from the definition of "substantial contributor" excludes only public charities (other than supporting organizations). This exclusion should be extended to include private foundations in order not to preclude otherwise appropriate relationships between private foundations and supporting organizations such as when a supporting organization leases space from a contributing private foundation and reimburses the foundation for its out-of-pocket costs associated with the occupancy.

Page 250, line 18: The Council opposes the provision prohibiting grants from private foundations to supporting organizations. There are numerous supporting organizations established by public charities for a variety of reasons, such as community foundation supporting organizations that provide services to adjoining geographical communities, that would be significantly disadvantaged if they were unable to receive support from private foundations.

Private Foundations

Section 322 of S. 2020 overturns the result in the case of *Zemurray Foundation v. United States*, making a foundation's income from sources such as notional principal contracts subject to tax and clarifying that section 4940's prohibition on carryovers applies to carrybacks. These are reasonable changes. However, section 322 also makes capital gains from the disposition of exempt use property subject to tax. This will unfairly penalize foundations that, for example, sell a building used to house the foundation's staff in order to acquire a larger (or smaller) building more suited to its needs. Section 322 should exclude (or at least defer) gains from the disposition of exempt use assets if the net proceeds from the sale continue to be used for exempt purposes.

I would be happy to meet with you to clarify any of these points.

Sincerely,

Janne Gallagher
Vice President and General Counsel

Ms. Lorie Slutsky, President
New York Community Trust
909 Third Avenue
New York, NY 10022

Dear Ms. Slutsky:

I want to thank you for attending the presentation hosted by the Ford Foundation that Congressman Charles B. Rangel and I made on behalf of The City College of New York's Charles B. Rangel Center on Monday. We are very grateful that you made time in your busy schedule to come and hear about this exciting new project at the College.

As you know, CCNY has long been an avenue of advancement for generations of New Yorkers and that mission is still going strong. Through the Rangel Center, we will be able to train and prepare people from underrepresented populations for government and public service. The master's degree programs in public service and the mid-career program for working public servants will enable talented individuals to take their place at the managerial and policy-making levels in our public institutions. Also, as the stewards of the Congressman's papers, we hope to be a resource for understanding the barriers to public service encountered by those seeking to overcome them.

We would very much like to meet with you and discuss ways that the New York Community Trust can play a role in the wonderful plans we have under way. We look forward to having the opportunity to work with you in making Congressman Rangel's dream a reality.

Sincerely,

Gregory H. Williams
President

cc: Congressman Charles B. Rangel

New York Community Trust Public Service Scholars

The Charles B. Rangel Center

at

The City College of New York

Executive Summary

The Charles B. Rangel Center for Public Service was created to enhance opportunities for individuals from underrepresented populations to enter and advance in public service at the policymaking and managerial levels. This proposal requests a grant of $65,000 for 15 students, to be named the New York Community Trust Public Service Scholars. They will be members of the inaugural class of Charles B. Rangel Center students who will earn either the BA/MA in Public Service or the MA in Public Service at The City College of New York. The grant will assist these talented students with tuition and other educational expenses and enable them to take unpaid internships in government and public service organizations. These internships, a core element of the program, will both give them the hands-on experience they need to succeed and also help them reduce the number of hours they need to work at employment that does not further their career goals.

A Profile of the New York Community Trust Public Service Scholars

The Community Trust Scholars will be selected from City College's exceedingly diverse student population. Ranked by *US News and World Report* as one of the most diverse colleges in the US, last year, more than 87% of CCNY students describe themselves as members of a minority group.

Most CCNY students come primarily from New York City public schools or CUNY community colleges. Following a tradition that reflects the pattern of generations of CCNY alumni whose achievements became the model for their own families, City College students are often the first in their families to go to college, and most have very limited financial resources.

Financial Need

Approximately 58% of City's students come from families with combined incomes of $30,000 or less; three-quarters work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial reasons. City's tradition of providing a high quality low cost education to talented students who might otherwise not be able to attend college is alive and well. The City College mission is Access and Excellence.

Confidential Treatment Requested
By NYCT Pursuant to FOIA

Scholarships for Rangel Center Aspirants

While CUNY undergraduate tuition, fees and books (approximately $5,000/year) and graduate tuition (approximately $8,500/year) are moderate by comparison with costs at private and many public colleges, they are high when considered together with the low family income of most City College students. When the fact that many CCNY students not only support themselves but also help support their families is factored in, the tuition and the other costs of attending college appear daunting. The purchase of a computer, engineering and science textbooks, transportation to and from the College---from Staten Island or the farthest reaches of Queens or Brooklyn to participate in City's unique programs---all of these costs bear heavily on CCNY's students.

That is why the College seeks $10,000 per undergraduate and $12,500 per graduate student to enable them to complete successfully the rigorous curricula of the Grove School of Engineering, or the Sophie Davis School of Biomedical Education, or the School of Architecture, or many other challenging academic courses. The funds pay for tuition, fees, books, a computer, and other costs of attending college plus they enable the students to work fewer hours at part-time or even full-time jobs than they would otherwise have to do. With the hours that are saved, they can take the unpaid internships and apprenticeships at major government and non-profit organization offices that are crucial to the Rangel Center program's success and the vehicle through which they can move into public service.

Almost all CCNY students take out loans where possible to help with other expenses resulting from college attendance.

Plans for the fall of 2007

Dean Brett Silverstein of the Division of Social Science expects that the new MA in Public Service--literally the new master's degree in public administration—will be made official during the 2007-2008 academic year. CCNY's Official Letter of Intent was approved by the City University and Vice Chancellor for Academic Affairs Selma Botman. Conditional upon formal approval by the CUNY Board of Trustees, Rangel Center programming will go forward at City College and the inaugural class of students will be accepted provisionally for the BA/MA and stand-alone MA degree coursework for the fall of 2007.

In fall 2007, there will be 15 students in the pre-BA/MPA minor in public policy. After that, the numbers will increase. By fall 2008, there will be approximately 20 in the BA/MPA and at least 10 in the stand alone MPA.

The undergraduates will be sophomores and juniors, and their total of five-years' work will be a mixture of undergraduate and master's level courses, depending upon their majors. One of the strengths of the program is its interdisciplinarity and its flexibility. All majors can combine their specific coursework with preparation for public service.

Our need for the fall, therefore, is for $10,000 for each of 15 students ($150,000) of which part will be paid by two other gifts/grants.

How does his break down to undergraduate & graduate

Confidential Treatment Requested
By NYCT Pursuant to FOIA

Other Foundation Support

The two gifts from the Ford Foundation and a private donor include $85,000 for research assistantships and internships. If we use that sum for these 15 students, our remaining need for fall of 2007 is $65,000.

Therefore, The City College of New York requests a grant of $65,000 for scholarship/internship support for the New York Community Trust Scholars at the Charles B. Rangel Center for Public Service for 2007-08.

On behalf of the aspiring students of The City College of New York, we thank you for your thoughtful consideration of this request. If you have any questions or need further information, please contact President Gregory H. Williams, Dean Brett Silverstein or Vice President Shelly Butler.

EXHIBIT
Exhibit 324

The Charles B. Rangel Center for Public Service

In a distinguished career spanning more than four decades, The Honorable Charles B. Rangel has done as much as any single person in public service to help the least powerful among our citizens to achieve their goals and to change their lives, their communities, and the nation. He has done so with the clear vision that all of America's citizens must be empowered in order for America to be herself. He has thought and acted locally and globally to ensure that the laws and policies of this nation embody her best instincts and her highest promise.

Fundamental to Congressman Rangel's lifelong service is a belief that America's "governing class" – those men and women who make our laws and policies – must mirror the rich tapestry of cultures, faiths, and ethnicities that make us who we are as a country. Today, non-whites make up nearly thirty percent of the U.S. population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top managerial, supervisory and policy-making positions in the U.S. federal government are members of minority groups.

By 2050, minority groups in the United States will comprise 50% of its population. This proposal builds up on The City College of New York (CCNY) mission of access and excellence and Congressman Rangel's legacy of public service to ensure that those who run our nation will reflect our citizenry.

The Center will accomplish this through the establishment of a rigorous graduate program for students from underrepresented groups that will prepare them for public service, including elective office and careers in government, at the policy-making level. The new master's program will be coordinated with programs on the undergraduate level, many unique to City College, to encourage and inspire our best students to move into the master's program and pursue careers in public service. Located in a restored Harlem mansion adjacent to The City College campus, the Charles B. Rangel Center will also house the Charles B. Rangel Library, an archival repository of documents, photographs, and memorabilia that records the life of one of America's most important public servants and serves as a rich repository of knowledge and experience for students and scholars alike.

Confidential Treatment Requested
By NYCT Pursuant to FOIA

The Master's Program in Public Service at The City College of New York will recruit and prepare young people for careers in government and public service. The program will include participation in internships or apprenticeships arranged and paid for by the Rangel Center, in service organizations, and will offer interdisciplinary specializations in concert with The City College Schools of Architecture, Engineering, Education, and Biomedical Education, plus its special programs in transportation, waste management, and urban public health.

Upon completion of the degree, graduates will be eligible for a program analogous to the Federal Career Intern Program, entering government service for a two-year temporary appointment with eligibility for a permanent assignment upon completion. This program will encourage the involvement of members of underrepresented minority groups and those with financial need;

The Combined BA/MA Program in Public Service will work together with several undergraduate programs unique to City College that are particularly suited to draw outstanding students into public service. The BA/MA Program will attract students capable of and interested in an intensive "fast-track" program leading to the master's degree. It will prepare them for public service with high-level coursework, experienced government personnel mentors, and hands-on training in internships and service learning courses.

The City College of New York—The Choice For The Rangel Center

The City College of New York offers a unique and fitting environment for The Charles B. Rangel Center for Public Service. Located in Harlem, the heart of Congressman Rangel's constituency, The City College of New York was founded through a public referendum in 1847 as a free academy to serve " the children of the whole people." One of a young America's great democratic experiments, it remains one her great democratic achievements, and the most important avenue to upward mobility and social advancement for generations of New Yorkers.

City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented young men and women with few material resources and opportunities. For more than 160 years, The College has provided access to a world-class education to underrepresented populations, preparing them to enter those fields with the expert skills to change their own futures, and shape the world.

Diversity at City College

- In fall 2006, CCNY's undergraduate ethnic makeup was Hispanic 37.2%, Black 26.5%,
  Asian 23.2%, White 12.9% and American Indian/Alaskan Native 0.1%. (*The Chronicle of Higher Education*2 reported ethnic enrollment distributions in American colleges as White 75.1%, Black 12.3%, Hispanic 11.0% and Asian 3.6%.)
- Among CCNY's undergraduates, 87.1% (8,994) are members of a minority group.
- Among CCNY's graduate students, 85.9% (2,517) are members of a minority group.
- Our graduate ethnicity percentages are 31.5% Hispanic, 29.8% were Black, 24.7% Asian/Pacific Islanders, 14.1% White and 0.1% American Indian/Alaskan Natives.
- Of the 1,097 Bachelors degrees awarded in 2005-2006, Blacks received 30.1% (330), Hispanics 33.0% (362), Asian/Pacific Islanders 11.9% (170), Whites 12.4% (130), and Non-Resident Aliens 9.6% (105). (Nationally, *The Chronicle of Higher Education Almanac* reported 1,399,542 Bachelors degrees were earned in 2003-04 by these ethnic groups: Whites 73.3% (10,261,114),Blacks 9.4% (131,241), Hispanics 6.8% (94,644), Asian/Pacific Islanders 6.6% (92,073),Non-Resident Aliens 3.2% (44,832), and other 0.8% (10,638).
- Of all the degrees earned, women earned 58.0% (1,112).
- Manhattan was home to 24.7% (3,276) of our students, with Brooklyn 17.6% (2,336), Queens 17.4% (2,298) and the Bronx 15.3% (2,027).
- In fall 2006, the median and mode age of new Freshmen was 18; 93.2% (1,457) of CCNY new Freshmen were 19 years old or younger; 27.7% (2,862) of all CCNY Undergraduates were 19 years old or younger. The median age for this group was 22 and the mode was 18.
- The median and the mode ages for fall 2006 new, entering graduate students and 22 respectively. For all graduate students, the median was 29 and the mode 26.

EDUCATION

RECIPIENT: CITY COLLEGE OF CUNY
Charles B. Rangel Center for Public Service
160 Convent Avenue
New York, New York 10031
(212) 650-7125
Benno Schmidt – CUNY Board Chair
Gregory H. Williams – Paid Staff Head
Brett Silverstein – Project Director
(Funds administrator: City College 21st Century Foundation, Inc.)

AMOUNT: $130,000 (two years—$65,000 each year)

PURPOSE OF GRANT: For fellowships to prepare 15 financially needy students for careers in public service.

NATURE OF PROJECT: Minorities are severely underrepresented at the higher levels of American government. Non-whites make up nearly 30 percent of the U.S. population, but according to a report by the Equal Economic Opportunity Commission, only 13.8 percent of the men and women in top managerial, supervisory, and policymaking positions in the federal government are members of minority groups. As the country becomes increasingly diverse, it is critical that those who make our national laws and policies reflect our citizenry.

City College, the flagship institution of the City University of New York, was founded through a public referendum in 1847 to serve "the children of the whole people." For 160 years, City College has provided educational opportunities to hundreds of thousands of talented young men and women with few financial resources. Since 1907, the College has been located in Harlem, and today 87 percent of its students are minorities. City College students are usually the first in their families to go to college; 58 percent come from families with incomes under $30,000, and three-quarters work while attending school.

Now, City College has established the Charles B. Rangel Center for Public Service to enhance opportunities for minority students to enter and advance in public service at the policymaking and managerial levels. The Center is named for Congressman Rangel, the dean of the New York State Congressional delegation, who is beginning his 19th year representing New York's 15th District (upper Manhattan). The Center will offer three fellowship programs in

Confidential Treatment Requested
By NYCT Pursuant to FOIA

CITY COLLEGE OF CUNY (Cont.)

public service: a five-year combined BA/MA, a Master's program for college graduates, and a mid-career fellows program for individuals in government and public service jobs. It also will administer the Rangel Library, which will hold documents, archives, and memorabilia from the Congressman's long career in public service. The Center will be located in a restored Harlem townhouse adjacent to the College, which will house the Library, a conference center, and offices for visiting scholars.

The inaugural class for the BA/MA program will begin in fall 2007 with 15 outstanding City College sophomores and juniors who are committed to careers in public service. The students will enroll in courses to prepare for the MA degree in public service at the same time that they continue in their college majors. They will include students in the social sciences and those working in other disciplines who will be able to prepare for the Master's degree while maintaining their technical emphasis in fields such as engineering and architecture. Over five years, the students will satisfy a demanding program that includes undergraduate and graduate courses. They also will participate in government and public service internships (e.g., congressional offices, Department of State, March of Dimes). Graduates will be eligible for the Federal Career Intern Program and other highly selective public service opportunities. In fall 2008, the College will enroll a second class in the BA/MA program, and begin the stand-alone Master's program.

The budget to provide fellowships for 15 students for two years is $300,000 ($150,000 each year). This provides $10,000 per year to each student: $4,000 for tuition, $1,000 for books and fees, and $5,000 for an internship stipend. Contributions from the Ford Foundation and a private donor will provide $170,000, leaving a balance of $130,000. The College has begun an ambitious campaign to fund the fellowship programs, as well as the other costs of the Rangel Center, over the long run.

This exciting project will prepare outstanding young people for careers in government. It is an excellent match for our Berri Fund, which defrays the expenses of financially needy students and which we have targeted to minority students underrepresented in various fields. We recommend a two-year grant of $130,000, $65,000 each year, to complete the fellowship budget for the Rangel Center's inaugural BA/MA class.

The current operating expenses of the Rangel Center are $150,000. In the future, it expects to have an annual budget of $1 million.

GRANTS IN LAST 5 YEARS: None.

Thanks All Around

Ms. Slutsky wrote to Congressman Charles Rangel, who is a Trust donor and the chairman of the powerful House Ways and Means Committee, about a grant awarded at our last meeting to the City University of New York for the Rangel Center for Public Service—and included biographical sketches of the donors whose funds supported the grant. His reply thanks us and also acknowledges the usefulness of these biographies. In addition, Mr. Rangel, having received our regular letter about grants awarded in his district, sent congratulatory letters to all 16 nonprofits. Ms. Slutsky's letter, Mr. Rangel's reply, and one of the letters he sent to grantees are in Appendix K.

Submission to the Subcommittee on Oversight,
Committee on House Ways and Means
Comments on Provisions Relating to Tax-Exempt Organization
in the Pension Protection Act of 2006

Submitted by:
Lorie A. Slutsky, President
The New York Community Trust

Introduction

For almost a century, community foundations have been building permanent charitable resources to meet the current needs of their communities and the unforeseen needs of the future. And for more than 80 years, The New York Community Trust (The Trust), through the generosity of donors past and present, has supported nonprofit organizations in the New York metropolitan area that work daily to ensure that our community is a vital and healthy place in which to live and work—for all residents. When we started in 1924, our sole mission was to distribute to nonprofit organizations the income from charitable trusts set up by will and held by New York City banks. The Trust's founders were men of vision who understood the power of an institution that could employ the combined charitable passions of individuals to meet a broad variety of community needs. They also understood that contemporary donors could not anticipate the compelling issues that would confront their successors—and they were committed to ensuring that adequate resources would be available for the future. In those early days, our donors set up unrestricted or broad field-of-interest funds through bequests, trusting tomorrow's leaders to spend it wisely. Today, The Trust has assets of $2 billion; $700 million of that total is held in more than 1,000 donor-advised funds, which range in size from $5,000 up to $99 million. Those funds routinely pay out more than 10 percent of their assets to charity annually. The remaining $1.3 billion rests in permanent unrestricted or field-of-interest funds.

We opened our first "donor-advised" fund in 1934, before there was even a name for it—and long before there were any specific laws or regulations. During her lifetime, this first "donor advisor" made suggestions to the staff of The Trust as to charitable distributions from the fund. When she died, the assets remaining in the advised fund became part of The Trust's discretionary grantmaking program—a program that relies on a professional staff that assesses community needs, investigates nonprofits, vets their projects and finances, and recommends grants to our distinguished volunteer board. Grants we make from the fund she created, which

Confidential Treatment Requested
By NYCT Pursuant to FOIA

now has $64 million in assets, support projects to help low-income elders keep their homes and apartments, train poor, young women to become licensed day-care providers, reduce environmental health hazards in substandard housing, and much more.

A profoundly important social contract was established with that first donor-advisor that continues to this day: in consideration for the privilege of making grant recommendations, money would be left in the fund for future generations. That is still our expectation and is characteristic of our relationship with most donors to The Trust.

The philanthropic world has changed since 1934 and 21st century donors have significantly more choice than they did years ago. When the IRS gave public charity status to donor-advised funds sponsored by financial institutions, donor expectations changed. The notion of community philanthropy pioneered by community foundations morphed into individual charitable checking accounts, with little expectation of, commitment to, or mechanism for permanence.

Nonetheless, The Trust and its donors support a dazzling array of charitable activity. So it was with dismay that we greeted the tax advantages offered for Hurricane Katrina giving and the IRA charitable rollover because those incentives were not available for contributions to donor-advised funds. In addition, other provisions of the Pension Reform Act of 2006 imposed burdens that seem designed to discourage charitable giving and based on assumptions that donor-advised funds are inherently flawed and that contributions to these funds are not, in fact, completed gifts. We recognize that there have been some egregious misuses, but we believe that enforcement of existing regulations can surely find and punish those individuals who violate the law without penalizing generous people who use their funds to do good. Indeed, the 1976 Treasury regulations implementing the Tax Reform Act of 1969, and the so-called "Section 507 regs," set out in careful detail the facts and circumstances needed for a completed gift. Guided by the Section 507 regulations, The Trust, and our community foundation colleagues, instituted policies to make sure that our charitable institutions and our donor-advisors are in compliance.

In short, donor-advised funds are not a new-fangled tool to avoid taxes; they are a long-standing approach developed by community foundations and addressed in Treasury Regulations to enhance and encourage donors to invest charitably in the immediate and future needs of communities. They are one of many ways that permanent charitable institutions are able to both consolidate many grants from different funds—restricted, unrestricted, and donor-advised—to support community programs and to build their assets for the future health and well-being of their communities.

This is the prism through which we respond to the Committee's request for comments on how the Pension Protection has affected community foundations.

Definition of Donor-Advised Funds

The Trust considers the definition of donor-advised fund under Code Section 4966(d)(2) to be overly broad in that it includes donor-advised funds established by governments, public charities, and private foundations. As a result, donor-advised funds established by governmental and tax-exempt entities are prevented from indirectly supporting the types of programs that they are still permitted to operate or for which they may provide direct support. This result seems at best unintended and at worst counterproductive.

Confidential Treatment Requested
By NYCT Pursuant to FOIA

Treasury Regulation Section 1.507-2(a)(8) sets out in detail the requirements for a private foundation that terminates its existence and transfers "all of its right, title, and interest in and to all of its net assets" to one or more Code Section 170(b)(l)(A) organizations. The Section 507 regulations provide clear rules, and have been looked to since their promulgation in the mid 1970s as the legal anchor not only for the proper termination of private foundations into donor-advised funds of public charities, but also for the establishment of donor-advised funds within public charities. In fact, the regulations under Section 170 governing component funds of community trusts specifically cross reference Treasury Regulation Section 1.507-2(a)(8) in defining how a transferor private foundation may transfer its assets to a fund at a community trust that would qualify as a component fund. Until the mid-1950s, The New York Community Trust existed solely in trust form, and the various funds that constituted The Trust met the requirement of being a "component fund" as prescribed in the special community foundation regulations under Code Section 170 and adopted by Treasury in 1976. Twenty years before the '69 Tax Act, The New York Community Trust created a sister not-for-profit corporation, Community Funds, Inc., to which donors could make contributions for all the same purposes and in analogous forms as contributions to The Trust. The two entities are treated as one organization for tax purposes. Most
community foundations formed in recent years have taken the form of not-for-profit corporations rather than trusts, and virtually all community foundations, regardless of the structure, have looked to the Code Section 507 regulations for guidance in establishing and operating donor-advised fund programs.

The PPA also sweeps up in its definition a fund where the advisors are "appointed" by the donor—even when they are named in the instrument. As a result, a fund set up by will is deemed to be a donor-advised fund if the decedent named unrelated individuals to an advisory committee. In addition, the broad definition of what constitutes advisory privileges pulls in relationships so minor that the donor cannot be viewed as controlling the fund, for example, where the donor's advice is limited to the amount of money to be expended each year.

Applying Private Foundation Rules to Donor-Advised Funds

Donor-advised funds encourage charitable giving by individuals who want to engage regularly in thoughtful, responsible philanthropy and want to be part of a permanent charitable institution that will respond to the community's needs now and in the future. They offer a community, with all of its complexity and diversity, the opportunity to receive support from an array of donors whose passions and commitments reflect that very diversity and complexity: popular vs. unpopular causes, general support vs. project support; liberal vs. conservative; direct services vs. policy work; immediate needs vs. future needs.

As a "sponsoring organization" under the new nomenclature of the Pension Protection Act of 2006, The Trust (and other community foundations) provides its donor-advisors with professional grantmaking staff and knowledge of the community and its needs. Its board can hardly be viewed as controlled by its donors. At The Trust, staff also brings a high level of diligence to its review of potential grantees prior to approving grant recommendations. In this respect, the Trust performs an independent investigation of any charity recommended for support, including support from a donor-advised fund at The Trust. The charitable sector as a whole benefits from this kind of review because it imposes a discipline on prospective grantees, who know that both their fiscal and program operations are being scrutinized.

Confidential Treatment Requested
By NYCT Pursuant to FOIA

In addition to providing guidance on the selection of grantees, the sponsoring organization provides an extra layer of oversight and necessary administration that is otherwise difficult for individual donors or unstaffed family foundations to manage. A sponsoring organization is responsible for determining that grantees have current financial statements and or audits, operate with independent boards of directors, have timely filed their Forms 990 with the IRS, and have an organizational structure adequate to the projects being undertaken. Because the Trust, as a sponsoring organization, has legal title and control over all of its assets, including donor-advised funds, it assumes the responsibility for charitable assets and assures that these assets are used exclusively for tax-exempt charitable purposes. Being part of a major charitable institution that is equipped to manage and oversee grants to hundreds of organizations empowers donors to hold grantees accountable
for the quality of their work.

The law governing charitable contribution deductions (Section 170 of the Code and the accompanying Treasury Regulations, court cases and so forth) quite clearly provides that a gift to a charity that provides impermissible private benefit to the donor or another private individual is not tax-deductible. To create special rules and regulations for contributions to donor-advised funds that are part of a functioning public charity does not add anything material to existing law. The need is for best practices and oversight by sponsoring organizations and donors and for enforcement by the IRS: new and redundant special rules will only create a maze of foot faults.

Rules restricting certain grants, described more fully below, also treat donor-advised funds like private foundations, including restrictions on grants to foreign organizations, 501(c)(4) organizations for charitable purposes, and individuals. The likely effect will be to drive more donors to private foundations, rather than to the more cost-effective donor advised funds at a professionally staffed sponsoring organization.

Prohibition on Certain Types of Grants from Donor-Advised Funds

Scholarship Funds: Complex rules about when a donor is deemed to control the advisory committee to a scholarship fund are overly broad. The PPA should have excluded from the definition those funds established for scholarships and awards, regardless of composition of committee. Congressional concern about inappropriate benefits to the donor or her family is already addressed by other rules prohibiting personal benefit. And the prohibition on grants from donor-advised funds to individuals should not have included funds with a specific charitable purpose such as scholarships and awards, regardless of the composition of the advisory committee. Many of our scholarship funds are small, but important, and function efficiently *only* because they are advised by the families or individuals who created them. We have reconstituted these committees in compliance with PPA, but we are concerned that they will not function as well as they have, and discourage future donors who want to involve their families in philanthropy.

Grants to Foreign Charities and 501(c)4s: Many of our donors support charities abroad. Requiring the sponsoring organization to exercise full expenditure responsibility imposes an unreasonable burden, and has compelled us to prohibit donors from suggesting these grants. Similarly, many 501(c)4s have charitable missions, including volunteer fire departments and rotary clubs. The burden of exercising expenditure responsibility for what are often modest grants is excessive, and we no longer permit them.

Confidential Treatment Requested
By NYCT Pursuant to FOIA

Supporting Organization: The rules precluding grants from donor-advised funds to non-functionally integrated type III supporting organizations also make the sponsoring organization responsible for determining which organizations meet the type III definition. This imposes an unreasonable burden on a sponsoring organization with hundreds of donor-advised funds. Such determinations should be the responsibility of the IRS.

Penalties on Certain Transactions

Section 4967 imposes a tax on a donor or advisor who recommends to the sponsoring organization a distribution from a donor-advised fund if the distribution results in a donor, donor-advisor, or related person receiving a more than an "incidental benefit." A tax also is imposed on the donor, donor-advisor or related person who receives the benefit and fund managers of the sponsoring organization who knowingly agree to make the distribution, with no concomitant burden on the grantee that improperly provides the benefit.

This new provision will require a sponsoring organization to devote more of its resources to the administrative task of identifying those individuals and entities that might be related to the donor or donor-advisor.

Section 4958 (Intermediate Sanctions)

The inclusion of investment advisors as disqualified persons is overly broad, picking up all investment advisors for many sponsoring organizations, whether they are independent or have a relationship with a donor to a donor-advised fund. Compensation to any vendor should be reasonable, but to create an additional category of disqualified persons solely for sponsoring organizations makes no sense. If Congress considers investment advisors and their fees suspect, then they should be suspect for all public charities.

Section 4943 (Excess Business Holdings)

The Pension Protection Act extends the application of the excess business holdings rules to donor-advised funds. In applying the rules, each donor-advised fund's holdings are aggregated with the holdings of disqualified persons with respect to the donor-advised fund, as defined by Code Section 4943(e)(2). A sponsoring organization will now be required to devote considerable staff and financial resources to compliance with these rules—no small undertaking in light of the breadth of the aggregation rules. A sponsoring organization must monitor the holdings of each donor-advised fund to determine whether it falls within the 2 percent *de minimus* rule and, if not, additionally identify the disqualified persons and their investment holdings that are in common with the donor-advised fund. This is a daunting task because of the endless string of relatedness constituting disqualified persons. There is no rational way that an institution with numerous donor-advised funds can gather and track this information in any meaningfully accurate way; the result is likely to be significant noncompliance or meaningless attempted compliance.

IRA Charitable Rollover

Because of the estate tax rates on IRA assets left to heirs other than a spouse, and because many donors can afford to forego these assets, we applauded the charitable rollover provision of the PPA. However, donor-advised funds should *not* have been excluded. Indeed, donor-advised

Confidential Treatment Requested
By NYCT Pursuant to FOIA

funds at a community foundation, with the oversight and grantmaking experience explained above, are the ideal vehicles for the rollover; investment managers that hold IRA assets do not have this expertise. The Trust also believes that the rollover should be made permanent.

Form 990T

The PPA requires that Form 990T be made public. Unlike the Form 990, the information return, which is public information, the 990T is a tax return. Individuals' and corporations' tax returns are not public documents, and this provision puts public charities, and any taxable companies in which they have an interest, at a disadvantage.

* * *

As explained in the Introduction, community foundations and similar charitable institutions have twin goals: to serve living donors and meet immediate community needs; and to be permanent endowments that have the resources to respond to the needs we cannot now imagine. Encouraging donors to think in terms of contributing to a permanent fund buttresses both goals. At The Trust, all donor-advised funds, if not fully expended after two successions of advisors, become unrestricted funds of The Trust. And with our other component funds, they provide irreplaceable support for the voluntary institutions that are a vital part of American democracy.

Rachelle Butler, Vice President
City College 21st Century Foundation, Inc.
160 Convent Avenue, S-154
New York, NY 10031

Dear Ms. Butler:

It is my pleasure to inform you that a two-year grant of $130,000, $65,000 each year, has been authorized, effective immediately, to the Charles B. Rangel Center for Public Service, City College of CUNY. A copy of my letter to Mr. Gregory H. Williams is enclosed for your information.

It is my understanding that the City College 21st Century Foundation, Inc. has agreed to administer the funds for the City College of CUNY. Payment of the first installment of this commitment in the amount of $65,000 is now being processed and will be forwarded to you upon receipt of a signed copy of this letter and acceptance by the grantee.

You will note in my letter to Mr. Williams that a fiscal accounting of grant expenditures is to be submitted to us by July 15, 2008 and July 31, 2009. It is understood that any funds not used for the purposes described in these letters will revert to The New York Community Trust.

This grant is subject to financial audit upon our notification during or immediately following the grant period. A separate bank account is not required, but it is necessary that a separate accounting of this grant be maintained.

We appreciate your assistance in the administration of this grant.

Sincerely,

Joyce Bove

RECEIVED
NEW YORK COMMUNITY TRUST

July 31, 2007

Gregory H. Williams, President
City College of CUNY
Admin. Building, Room 300
160 Convent Avenue
New York, NY 10031

Dear Mr. Williams:

It is my pleasure to inform you that a two-year grant of $130,000, $65,000 each year, has been authorized, effective immediately, to the Charles B. Rangel Center for Public Service, City College of CUNY. This grant is to be used for fellowships to prepare 15 financially needy students for careers in public service, as described in your proposal of April 26, 2007.

As agreed, our grant will be transmitted through the City College 21st Century Foundation, Inc. as funds administrator for the City College of CUNY. A copy of our letter to Ms. Rachelle Butler is enclosed for your information.

This commitment will be paid in two installments. Payment of the first installment of $65,000 will be forwarded to the City College 21st Century Foundation, Inc. upon receipt of a signed copy of this letter and acceptance by the funds administrator. The second installment of $65,000 will be payable by August 5, 2008 upon receipt by us of a satisfactory interim report.

It is understood that these grant funds will be used substantially in accordance with the budget included in your proposal. It is further understood that no substantial changes in the budget or the grant period may be made without prior written approval from The Trust. Any funds not used for the purposes described in this letter will revert to The New York Community Trust.

A condition of this grant is that you submit to us an interim and a final report. The interim report should be submitted by July 15, 2008 and a final report by July 31, 2009. These reports should contain a fiscal accounting of grant expenditures and a narrative describing the following: (a) the objectives of the project supported by the grant, (b) activities carried out to meet each objective, (c) results accomplished and (d) any problems encountered and how they were resolved. They should also include a detailed discussion of activities carried out to secure funding to continue this project once our grant expires. Please note that reports are an integral part of our monitoring and evaluation process; release of any future payment or review of any

Confidential Treatment Requested
By NYCT Pursuant to FOIA

future grant request will be contingent upon our receipt and satisfactory review of the information provided. All reports should be addressed to Ms. Judith Lopez.

This grant is subject to financial audit upon our notification during or immediately following the grant period. A separate bank account for the grant is not required, but it is necessary that a separate accounting of this grant be maintained.

The funds making up this grant commitment are derived from our William H. Berri Fund, Lucy Wortham James Memorial, and Esther Jean Arnhold Fund. Biographical sketches of Mr. Berri and Mmes. James and Arnhold are enclosed.

It is requested that, in any publicity given this grant, acknowledgement be made that funds were received from The New York Community Trust. Please enclose copies of any publicity when you send us the final report.

We appreciate the cooperation extended to Jane Stern in connection with the evaluation leading to this grant. Best wishes for the success of this effort.

Sincerely,

Joyce Bove

The Honorable Charles B. Rangel
163 West 125th Street
New York, NY 10027-4419

Dear Congressman Rangel:

I am delighted to let you know that The New York Community Trust just approved a $130,000 grant for fellowships for the Rangel Center for Public Service's inaugural class. I have enclosed the grant write-up we prepared for our board.

Because you have a fund with us, I thought you might be interested in the donors whose funds are the sources for this grant. I have enclosed three brief biographies: Jean Arnhold set up her fund to help needy students; Lucy Wortham James left her fund for unrestricted purposes. The third donor, William H. Berri, created his fund to defray the costs of college for poor students.

We are looking forward to significant contributions from the Rangel Center's graduates.

Sincerely,

Lorie A. Slutsky

THE CHARLES B. RANGEL CENTER FOR PUBLIC SERVICE
MID-CAREER PROGRAM IN PUBLIC SERVICE AND POLICY INNOVATION
THE CITY COLLEGE OF NEW YORK/CUNY

Seed Funding for Program Services

The City College of New York/CUNY (CCNY) seeks funding from Rockefeller Brothers Fund to help nonprofit leaders from underrepresented groups to engage in public service best practices and to present symposia for dialogue on community change occurring in Upper Manhattan. CCNY is located in Upper Manhattan's West Harlem area near the border of Washington Heights, within the federal Congressional district represented by Congressman Charles B. Rangel. Both Harlem and Washington Heights neighborhoods are integral to the Pivotal Place program area of New York City targeted by Rockefeller Brothers Fund.

CCNY requests $50,000 in seed funding for program services to be provided by the Mid-Career Program in Public Service and Policy Innovation based at the Charles B. Rangel Center for Public Service. The purpose of the Rangel Center is to promote greater diversity in public service and to overcome barriers to full participation in the public sphere faced by underrepresented populations. The funding for program services will help CCNY train nonprofit leaders who are Mid-Career Fellows of the Rangel Center to manage dramatic community change such as that occurring in Harlem.

Program Need

Successful community transformation is often reduced to a single catalyst, education, and increased education has a documented favorable impact on household income and community change. CCNY has consistently applied this knowledge and produced graduates who raise their family's income, are involved in neighborhood improvement, and participate in community action. The Rangel Center's Mid-Career Program in Leadership and Policy Innovation offers an approach that targets leaders and leadership training from underrepresented backgrounds—those African Americans and Latinos/as already engaged in public service at the helm or in the top ranks of public agencies and nonprofit organizations. Funding for program services is needed to:

1. Develop relationships and methods to identify mid-career leaders who need training,
2. Coordinate internships, sabbaticals, and other co-curricular enhancement activities, and
3. Produce symposia and events to help leaders and groups resolve local issues.

CSOC.CBR.00024677

Program Benefit

As part of the Center's goal to increase the number of underrepresented groups in public service and to strengthen these group's ability to overcome barriers to full participation, Mid-Career Rangel Fellows will receive the knowledge, technical assistance, and access to academic perspectives necessary to successfully navigate and lead community change. Selected Rangel Fellows will take a sabbatical from their jobs and spend time with other leaders and academics at City College and deliberate on issues of leadership and public policy.

In addition, Rangel Fellows, students and the public will be provided with the opportunity for greater service to their communities through training, networking and dialogue on public service and policy issues of major importance to them. Increased public awareness and access to public service and policy programs at CCNY will help to establish the Rangel Center as an important public service career pipeline. This in itself is a critical contribution for CCNY to make as a public institution giving back to its resident community of Harlem in the midst of change.

Conclusion

The Charles B. Rangel Center for Public Service Mid-Career Program in Leadership and Policy Innovation will provide a platform to help leaders, organizations and residents resolve local issues. It will provide training to the leadership of agencies and nonprofits that are involved in community change and demonstrate that trained, diverse leadership in public service can avert the sometimes harsh effects of rapid demographic change while also promoting beneficial dialogue about managing and leading change:

- Nonprofit leaders from underrepresented groups will be armed with sharpened skills and insights into community change best practices,
- The Rangel Center will become established as a central and neutral place for leaders, scholars, students and the public to articulate public service and policy issues affecting them, and
- The Mid-Career Program in Leadership and Policy Innovation activities will appreciably heighten the value and opportunity of a career in public service for Rangel Fellows, students and the public at large.

CSOC.CBR.00024678

Our Request of Rockefeller Brothers Fund

Given the Rockefeller Brothers Fund's commitment to transformative community change in New York City and its record of success in supporting programs that effect social and community change, The City College of New York would like Rockefeller Brothers Fund to consider a gift of $50,000 to assist in establishing The Mid-Career Program in Leadership and Policy Innovation at The Charles B. Rangel Center for Public Service.

Seed funding for program services will support:

Program development – internships and service learning placements

Coordination -- workshops and enhancements such as web interactivity

Symposia -- academic and public forums

On behalf of the Rangel Mid-Career Fellows and public service majors who will benefit, we thank you for your thoughtful consideration of this request. If you have questions or need additional information please contact:

Niamo Mu'id, Director of Development
CCNY Office of Development & Institutional Advancement

CSOC.CBR.00024679

PUBLIC SERVICE STUDIES AT THE CITY COLLEGE OF NEW YORK / CUNY

The Charles B. Rangel Center for Public Service is the centerpiece of City College's efforts to promote greater diversity in public service and to generate a more effective leadership representative of the entire U.S. population in the policy-making arena. As it evolves into a national hub for public service policy and research relative to underrepresented populations, the Center will provide co-curricular, academic excellence and public education modules in five program areas:

- The Charles B. Rangel Center, to be housed in a restored Convent Avenue mansion off of the main City College campus with a conference center and offices for visiting scholars;
- The C. V. Starr Library, consisting of Congressman Rangel's documents, archives, memorabilia and related items;
- The Master's Program in Public Service;
- A Combined BA/MA Program in Public Service, and
- The Charles B. Rangel Fellows: A Mid-Career Program in Leadership and Policy Innovation.

In fall 2007, CCNY hired Iris Geva-May as the Rangel Center's Senior Scholar responsible for directing research into public service and policy relating to underrepresented populations (a bio sketch is attached). The Rangel Center has received the financial support of the New York City Council, CUNY system, a few individuals, and the Starr, Ford, Verizon and Kheel Foundations.

In addition to the Rangel Center, a number of existing CCNY programs help to diversify public service in Upper Manhattan by training students to deliver social, health, youth, arts and culture, and senior citizen services in addition to technical assistance services. Information about these programs is attached. The most prominent and relevant programs are:

The Rosenberg-Humphrey Program in Public Policy, which provides summer internships at government agencies in Washington, DC and New York in executive and Congressional offices, house and Senate committees, labor unions, advocacy groups and policy research organizations (interns have served in Congressman Rangel's office on 125th Street in Harlem.);

The Colin Powell Leadership Program, which is an interdisciplinary program of instruction and co-curricular support designed to give a select group of CCNY students with leadership potential service learning courses and opportunities that allow them to learn in under-served communities;

CSOC.CBR.00024680

The Pre-Law Program that includes the *D'Agostino-Greenberg Program in Law and Public Policy*, which is a lecture series that comprises panel discussions, colloquia, and legal internships for student;

The City College Architectural Center, which provides internships for architecture, urban design and landscape architecture students and also serves as a community design clinic responding to the planning, education and advocacy needs of local leaders and nonprofits groups, at minimal cost to these organizations, and

The Dominican Studies Institute, which is an interdisciplinary research unit of the City University of New York at City College. Activities include lectures featuring scholars at various stages of their careers discussing the Dominican experience. The Institute promotes linkages between the academy and the community such that residents have the opportunity to participate in an academic dialogue about them and express their opinions.

ABOUT THE CITY COLLEGE OF NEW YORK / CUNY

The City College of the City University of New York offers a unique and fitting environment for programs aimed at increasing diversity in the public service field, lifting new populations to career success and abating poverty. The College was founded by public referendum in 1847 as a free academy to serve "the children of the whole people." One of a young America's great democratic experiments, the College remains one of her great democratic achievements, and the most important avenue to upward mobility and social advancement for generations of New Yorkers.

Historically, City College student populations have included waves of immigrants originating from Ireland, Italy, Germany, Russia, Africa, the Caribbean, Asia, Latin America and more. Today, more than 90 languages are spoken on campus. Approximately 58% come from families with combined incomes of $30,000 or less, and three-quarters work while attending school. Most are the first in their families to go to college, and over half of CCNY's students attend part-time.

For over 160 years the College has provided unsurpassed educational opportunity to hundreds of thousands of talented young men and women with few material resources, preparing them for jobs in the professions and public service with the expert skills needed to change their own future and shape the world.

CSOC.CBR.00024681

CCNY/CUNY CHARLES B. RANGEL CENTER SENIOR SCHOLAR

IRIS GEVA-MAY

Iris Geva-May is tenured full professor of policy studies in the Doctoral Leadership Program, Graduate Program of Public Policy and Department of Political Science at Simon Fraser University, Vancouver, Canada. She was affiliated with the Department of International Affairs, School of Political Science, Haifa University, Israel until 2000. She has been Visiting Professor at a number of Graduate Schools of Public Policy such as UC Berkeley (1993, 1995), Carleton University, Ottawa (1997, 1998), Kyoto University, Japan (2000), National University of Singapore (1999), Central European University, Budapest (1999), Tel Aviv University, Israel (2000), Hebrew University, Jerusalem (2004). She has been Honorary Professor at Plymouth University, UK 2000-2006.

Her PhD is from the University of Manchester, UK (1986) and Post-doctorate from UC Berkeley, Graduate School of Public Policy (with Aaron Wildavsky). She served as Director of the Department of Policy Evaluation, Analysis and Planning, Ministry of Education; advisor, policy analysis and planning, Ministry of Immigrant Absorption, Ministry of Science and Technology, the Government Commission, Prime Minister's Office, Jerusalem; she advised to Governor's Office, MYE Province, Japan, and others. She served as advisor for the planning or re-organization of several programs of policy analysis/studies.

Among others, she is Fulbright Fellowship recipient 1995, Canadian Enrichment Program (Canadian "Fulbright") recipient 1995, 1997, 2000, British Council award recipient 1999 and 1983, ORS, UK in 1984 and Hornby Award, UK, 1985. In recent years she has been Fiocruz Foundation Fellow (Brazil, 2003), Japanese Government Fellow (2000) and Canadian Studies Halbert Fellow, Jerusalem (2004).

She is the founder and editor-in-chief of the international Journal of Comparative Policy Analysis: Research and Practice, Routledge/Taylor and Francis, Oxford, UK and founder of the International Comparative Policy Analysis-Forum network dedicated to promoting the dialogue on comparative policy studies (http://www.jcpa.ca). She is consulting editor of the Journal of Public Affairs Education (NASPAA); editorial board member of the International Journal of Public Management; International Public Management Review, Elsevier; Public Policy Review, Blackwell; and, scientific reviewer for the EU Commission - Research Committee and INTAS. She has a considerable number of funded research reports, articles in refereed journals, chapters in books, and work-papers, several published books and a long list of talks and international conference presentations on various aspects of policy analysis methodology, policy evaluation, comparative policies, as well as immigration, higher education and health care policies. The focus of her current research is comparative (a) the impact of cultures/political cultures on policy analysis and policy planning, (b) immigration policies, (c) implementation models, (d) developments and trends in policy programs in Europe, US and Canada, e) clinical reasoning in policy analysis processes.

Her most recent books are devoted to the methodology of policy analysis and its application to various policy fields: Thinking Like a Policy Analyst: Policy Analysis as a Clinical Profession, Palgrave McMillan, New York, 2005 was defined by a book reviewer "a cutting edge book" in policy analysis literature; The second edition of An Operational Approach to Policy Analysis: The Craft, Kluwer Academic Pbl. (1997, 2000) is forthcoming with Palgrave Macmillan, New York and a translation in Chinese with Wunan Publishers, Taiwan. Her forthcoming book on Immigration Policies summarizing fifteen years of study on the subject, is forthcoming with Kluwer Academic Publishers in 2008 and so is Comparative Policy Analysis Studies with Routledge.

Rockefeller Brothers Fund
Philanthropy for an Interdependent World

MAR 2 0 2008

March 20, 2008

Dear Niamo:

It is a pleasure to confirm that on March 14, 2008, the president of the Rockefeller Brothers Fund approved a grant of $50,000 to The City College 21st Century Foundation, Inc., designated as a contribution to the Charles B. Rangel Center for Public Service Mid-Career Program in Leadership and Policy Innovation. This grant may only be used for the charitable purposes and activities that are specified in your proposal. If your organization expends or commits any part of the grant funds for purposes or activities other than those for which this grant is made, your organization must repay to the Fund an amount equal to the amount of grant funds so expended.

The Fund requires with respect to each of its grant payments a report on the use of the grant funds, including a financial accounting and a narrative statement that assess the value of the grant in helping to achieve the objectives of the program of activities for which the grant funds were used. Please include our grant reference number (08-83) on any correspondence related to this grant. We request that the report on the use of grant funds be submitted by March 31, 2009.

We would appreciate if you would signify your agreement to the terms of this grant by signing below and returning this letter to us. Upon receipt of a signed copy, the Fund will forward a check made payable to The City College 21st Century Foundation, Inc., in the in the amount of $50,000, representing full payment of this grant.

With best wishes for the success of this important endeavor.

Sincerely,

Ben Rodriguez-Cubeñas

The undersigned organization agrees to the terms and conditions set forth in this letter.

Re: Rhodebeck Fund

Dear Bob:

As Advisor of the above fund at Community Funds, Inc. I would like to recommend a grant of $25,000 to the Charles B. Rangel Center at City College of New York. The check should be sent to Rachelle Butler, Vice President, Office of Development and Institutional Advancement, The City College of New York, 138th Street and Convent Avenue, S-154, New York, NY 10021.

I am enclosing a copy of Congressman Rangel's letter to me of July 26, 2006 which will give you more information concerning the Center.

Thank you for your favorable consideration.

Sincerely yours,

Huyler C. Held

Josh and Judy Weston
217 Christopher St
Montclair, NJ 07042-4205

Dear Josh,

I want to thank you for agreeing to provide support for not one but two wonderful programs at The City College of New York over the next five years. I have spoken to President Williams about your commitment and he is delighted, as are Dr. Marina Fernando, director of our International Studies Program, and Dr. Brett Silverstein, Dean of Social Science.

The two projects are:

The Josh and Judy Weston Master's Program Scholarships (or any other name that might sound more mellifluous!):

Scholarships @ $10,000 each for a cohort of five BA/MPA or MPA (CCNY grads only) students per year for five years in the program leading to the anticipated master's degree in public administration/public service, beginning in spring of 2008. The decision as to how many students will be chosen in each program will be made by the academic selection committee that the dean will bring together. [Should an unexpected number of the students require the third year (BA/MPA students), and increase the cost of the program beyond the anticipated budget, as you kindly suggested, we will bring this to your attention as the cohorts progress] and;

The Josh and Judy Weston International Student Travel Program

Support for a cohort of six CCNY students going abroad as part of the International Studies major each summer for five summers. Students will be sent only to developing countries as you prefer. Advising and other needed support are included in your pledge.

I understand that you will pledge $1 million over five years at $200,000 per year. As I mentioned, we are in possession of $180,000 of your funds on deposit, $10,000 of which we will apply to your table purchase for the 2007 gala. That leaves $170,000 of the first year's $200,000 to begin funding the programs.

CSOC.CBR.00024896

In order to ensure a fifth cohort in each program at the total cost above, City College commits either to reduce the anticipated costs or to find the necessary funding elsewhere. Please review the suggested timeline below for your projected pledge payments, make any changes you wish, and if you are comfortable with the provisions, sign and return this letter to us for our records. You will note that after this year, I have suggested going on a fiscal year ending, in case we have one cohort beginning in January 2008 and one in September 2008.

Pledge payments:

$200,000 by January 31, 2008 Pd $170,000 **Balance remaining $30,000**

$200,000 by January 31, 2009

$200,000 by January 31, 2010

$200,000 by January 31, 2011

$200,000 by January 31, 2012

BY: Josh Weston Date: 5/25/07

Josh, as always, you are ahead of the curve—just as we are putting together new great ideas, you are right there with us, helping us to implement them and advance City College. Our deepest gratitude to you and Judy for partnering with us in these two exciting new initiatives—I think it's going to be terrific.

Warmest wishes to you both,

Shelly Butler
Vice President

P.S. A return envelope is enclosed for your convenience. Thanks

Mr. Robert Catell
Chairman
National Grid (US)
One Metrotech Center
Brooklyn, NY 11201

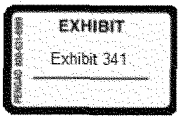
Dear Bob,

I want to thank you for this wonderful gift of $1,000,000 ($1 million), $500,000 of which will be designated for the Colin Powell Center for Policy Studies and $500,000 of which will be designated for the Charles B. Rangel Center for Public Service, both at The City College of New York (CCNY). By directing your gift to these Centers of Excellence at the College, you enable your alma mater to strengthen these two fine programs dedicated to helping City College students enter public service. You have contributed so much of your time and energy to making the world a better place, you are a wonderful role model for our students. Your gift will help others to continue your record of public service, especially our talented CCNY students who are so much like you were.

I know that both General Powell and Congressman Rangel will be thrilled by these wonderful commitments and will look forward to your announcement on the occasions when they will be present to hear it. We will arrange to meet some of the very fine Powell Fellows and Rangel Scholars so you can see the tangible results of your generosity.

Your pledge may be paid in one lump sum or in payments over as many as five years. We would like to endow your gift so that only the annual income will be used. In this way, your gift will provide for future generations of City College students *in perpetuity*. ***The Robert Catell Endowed Fund at the Colin L. Powell Center*** and the ***Robert Catell Endowed Fund at the Charles B. Rangel Center*** will remain at the College forever.

We do ask that should this gift not be paid in full during your lifetime, you agree that your estate will complete the gift up to the full $1,000,000 after your death either in a lump sum or at the same schedule as you have indicated below. We ask that your will be modified to include this commitment and a copy of the relevant section dealing with the bequest be given to City College for its records. If the criteria and the terms above are in accord with your wishes, please sign and date this letter and return it to us for our records.



Bob, on behalf of President Gregory H. Williams, General Colin L. Powell, Congressman Charles B. Rangel, and the students and faculty of your alma mater, The City College of New York, I would like to express our deepest gratitude and appreciation for this transformative gift.

I look forward to celebrating with you in Washington, DC and at the CCNY Presidential Awards Dinner on May 7. By the way, thank you again for so generously agreeing to be our co-honoree at the gala. By this commitment, you have just elevated that event to an historic level!

Warmest regards,

Shelly Butler
Vice President

Please indicate your preferred schedule of payments.

I prefer to make one lump sum payment by: (Date) June 1, 2008

I prefer to make my payments as follows:

Susan V. Beresford, President
The Ford Foundation
320 East 43rd Street
New York, NY 10017-4890

Dear Ms. Beresford:

I am writing to you as a leader in the philanthropic community with a shared vision and commitment to public service, to share news of an initiative with a potential that has me quite excited. The City College of the City University of New York plans to create the Charles B. Rangel Center for Public Service at the City College to provide an opportunity for education and training for careers in public service for the underprivileged students the College has traditionally served. I want you to know of my personal interest in and enthusiasm for the creation of this Center and my pride in the decision of the City University to name it for me.

As you know, throughout my public career I have believed in the special strength derived from our racial and ethnic diversity and that we as lawmakers must lead in assuring that opportunity for public service be made available to all with the goal of achieving a policymaking community that reflects the rich tapestry of cultures, faiths, colors and ethnicities that make us who we are as a great nation. I am asking you to join me in the creation of a public policy center that will motivate and prepare young people presently underrepresented in public life to pursue careers in public service.

Today, non-whites make up nearly thirty percent of the US population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top

managerial, supervisory, and policy-making positions in the US Federal government are members of minority groups. And by 2050, minority groups in the US will comprise more than 50% of our population.

The Charles B. Rangel Center in the City College of New York, a school in the most ethnically diverse city in our nation and with an unparalleled history of supporting the empowerment of immigrant ethnic groups, will help to ensure that those who run our nation will be reflective of our diversity. I have embraced the College's concept because it will allow me to locate the inspirational aspects of my legacy in my home Harlem community.

As you will see from the enclosed presentation, the Rangel Center at the City College of New York will be alive with the work of scholars and students working on public policy issues and studying the political dimension of change. It will not be a Library or a Museum, but a living institution brimming with ideas and stimulating debate.

I will be exploring with my Congressional colleagues how best to move this idea through the appropriations process and am optimistic about securing funds for the planning phase of the creation of the Center. I request your advice and assistance concerning how to approach the donor community, particularly private and corporate foundations interested in education. I look forward to entering into a dialogue with you on the funding of the Rangel Center concept in the coming weeks and months.

Sincerely,

Charles B. Rangel
Member of Congress

Harlem Inst'l Studies
Diversity in Pipeline — Make it happen

Confidential Memorandum

To:	Congressman Charles B. Rangel
From:	CCNY President Gregory Williams CCNY Vice President Shelly Butler
Date:	September 8, 2005
Re:	Briefing – Ford Foundation

MEETING LOGISTICS:

Prospect:	Susan V. Berresford, President, Ford Foundation
Attendees:	Congressman Charles Rangel, President Gregory Williams, and Vice President Shelly Butler
Date and Time:	Friday, September 9, 2005 3-4 PM
Location:	320 E. 43rd Street, between 1st and 2nd Avenues, 10th floor
Contact:	Verna or Radica 212-573-4630

OBJECTIVES:

- Interest the Ford Foundation in making a substantial contribution to the Charles B. Rangel Center at The City College of New York. Focus on Congressman Rangel's vision to have a more diverse population of public servants that reflects the diversity in the United States, and the unique factors at City College that makes this the place to train such future leaders.
- Talk about having the Ford Foundation play a key role in the creation of the Rangel Center. The program section of the Rangel Center budget is $23 million (Ford is not likely to cover the building portion of $7 million).
- Gauge interest level and answer questions.
- Close meeting by finding out what financial range Ms. Berresford would consider. We will follow-up with a written proposal in that range. Experience with the Ford Foundation shows that Susan Berresford prefers to state the grant range that she will consider towards the end of the meeting. If specific numbers are discussed, our priority is:

1. **$5 million in funding (unrestricted) "to educate and train students from underrepresented populations for careers in public service."**
2. IF and only if during the meeting there is pressure to identify a designated funding opportunity, then the recommended strategy is to ask for $5.2 million to endow the student scholarships and internships. The proposal budget on page 18 outlines the 20 annual scholarships and 20 annual paid internships. Total cost each year is $260,000.

Category	# $ Amount	Total
Student Scholarships First Year	10 @ $10,000	$100,000
Student Scholarships Second Year	10 @ $10,000	$100,000
Paid Internships First Year	10 @ $3,000	$30,000
Paid Internships First Year	10 @ $3,000	$30,000
Total		$260,000

GREGORY H. WILLIAMS
President

September 15, 2005

The Honorable Charles B. Rangel
Congressman
Adam Clayton Powell Jr. State Office Building
163 West 125th Street, Suite 737
New York, NY 10027

Dear Charlie,

What a fabulous meeting we had at the Ford Foundation on Friday and I must say, we couldn't have done it without you. You spoke so movingly of the need for education—I don't think any of us will ever forget how you brought it home to everyone there with such power and conviction that to be without an education is to be in danger of dying--that the people who didn't have a car or couldn't buy gas and escape Katrina were the people without education.

Your commitment to seeing that the Charles B. Rangel Center at The City College of New York is established was also very clear and I believe that the Ford leadership was convinced of the importance of making sure it happens.

I can't imagine a better partner in this endeavor than you, Charlie, and when the Rangel Center opens, it will be the proudest day of my life.

Your friend,

Gregory H. Williams

CSOC.CBR.00011903

A Proud History and Mission – The Children of the Whole People

The City College of New York was founded in 1847 by Townsend Harris to offer higher education to the children of the working class and immigrants. The College has produced great scientists, captains of industry, public servants, teachers, doctors, lawyers, architects and engineers, opening doors for young men and women with few material resources and opportunities.

Today's City College is a microcosm of New York City, with one of the most diverse student bodies of any college in America. Its more than 12,000 students carry on a tradition of excellence as they win prestigious awards and fellowships, gain acceptance to leading graduate and professional schools, and make their marks in the sciences, in the arts, in community service, in industry, and in education.

Access and Excellence

For 158 years, The City College of New York has symbolized the union of excellence and public higher education. The most important avenue to upward mobility and social advancement for generations of New Yorkers, City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented but needy students. With particular focus on meeting the needs of "the children of the whole people," The College provides unique opportunities for underrepresented populations to enter fields new to them with expert skills and education.

Diversity and Need

Many schools talk about diversity; City College lives it

Last year, *US News and World Report* ranked City College first in diversity in the nation, with African-Americans as the largest minority. This year, City College was ranked first with Hispanic-Americans as the largest minority. The 2004-2005 issue of CCNY's *City Facts* states that 87% of CCNY students describe themselves as members of a minority group.

The *Chronicle of Higher Education 2003 Almanac* reports that nationally, within the category of bachelor's degrees earned at all colleges, White students earn 75% of the total, Blacks 8.5%, Hispanics 6.5%, and Asian-Pacific Islanders 6.2%. The same year at City College, however, Blacks received 34.1%, Hispanics 30.1% and Asian/Pacific Islanders 11% of the total, an incredible record of success in populations underrepresented in bachelor's degrees earned. Many of these degrees are awarded in exceptionally demanding programs unique to City College, which do not exist elsewhere in the City University system, such as engineering, architecture, biomedical education, and certain science programs.

EXHIBIT
Exhibit 346

Most of CCNY's students come from the New York City public schools. Many are immigrants or children of immigrants; they speak 91 languages other than English and were born in 147 countries. City College students are usually the first in their families to go to college, following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families.

Founded to provide children of the poor and new immigrants access to the American dream

Now still, as in its storied past, CCNY students are financially needy. Approximately 59% come from families with combined incomes of less than $30,000; three-quarters of the students work while attending school, some at more than one job. Over half of the students attend part time, most often for financial reasons. They pay $5,000/year in tuition, books, and fees. Because they frequently need to support themselves and sometimes even help support their families, few have the time for community or public service, but many strive to do it nevertheless.

A Tradition of Community and Public Service at City College

City College proudly claims many students who, regardless of tremendous financial and family pressures, take the time to provide service to their communities. A few examples are:

- The Rosenberg/Humphrey internship program, in which students take summer internships at government agencies in Washington, DC, and New York in executive and Congressional offices, House and Senate committees, labor unions, governmental agencies, advocacy groups and policy research organizations;
- The service learning program that has provided internships for City College students to go to the Central African country of Rwanda, where they spent the summer working in the Rwanda Ministry of Finance's Poverty Alleviation program, the Ministry of Gender and Development, and the Ministry of Health's Psycho-Social Trauma unit;
- All students at the Sophie Davis School of Biomedical Education make a commitment to enter community medicine in underserved and disadvantaged communities; part of their commitment is to engage in volunteer work in those neighborhoods during their school years.

CSOC.CBR.00011905

The Charles B. Rangel Center at The City College of New York

Long a vision of Congressman Rangel, this Center will initiate programs designed to prepare students and mid-career leaders from underrepresented populations to take the helm in public life. The program will build on City College's tradition of public service, its diverse student body, and its mission of excellence and access.

City College is in Congressman Rangel's own district in Harlem, his home for almost 40 years. It is fitting for this enterprise to have its beginnings in the community where the Congressman has worked for so long to bring the benefits of American society to its entire people. The Center will include The Charles B. Rangel Library, a combined BA/MA program in public service, a stand alone MA program in public service, and The Charles B. Rangel Fellows: A Mid-Career Program in Leadership and Policy Innovation

The Ford Investment

We would like to propose that the Ford Foundation invest in the Charles Rangel Center through support of The Master's Program in Public Service, which will recruit and prepare young people from underrepresented populations for careers in government and public service. As a critical component of their degree program, students will participate in internships and research assistantships. The internship locations offered will span the wide range of service organizations and government offices in New York City and Washington DC. Professors and postdoctoral fellows studying the range of topics examining underrepresented minorities in public service will direct the research assistantships. The Rangel Center's Internship/Research Coordinator will organize both of these projects.

The program will also offer interdisciplinary specializations in conjunction with The City College Schools of Architecture, Engineering, Education, and Biomedical Education, plus CCNY's special programs in transportation, waste management and urban public health. Upon completion of the degree, graduates will be eligible for programs like the Federal Career Intern Program, entering government service on a two-year temporary appointment with eligibility for a permanent assignment upon completion. These and other opportunities will encourage applications by members of underrepresented minority groups to apply to public service positions.

During the startup phase, The Center and its director will introduce new courses, develop a strategic plan of action, coordinate internships for the students, assemble teaching and research staff, begin planning for the Rangel Library and Archives, and initiate research by postdoctoral fellows and their research assistants examining underrepresented populations in public service.

CSOC.CBR.00011906

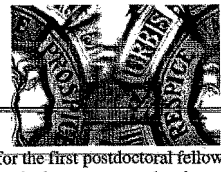
Funding the Center

City College anticipates that the United States Congress will support this initiative with a seed grant. It then expects that during the second fundraising phase, The College will bring together the public and private resources necessary to forward the Center. It is with this in mind that CCNY brings this pioneering program to the Ford Foundation. CCNY believes that the goals of the Rangel Center resonate with the Foundation's mission of strengthening democratic values, reducing poverty and injustice, and advancing human achievement. In addition, other foundations that have expressed interest in the project will be pleased to see investment in the Rangel Center by the world's leading foundation. Once this partnership is assured, it is expected that Congress will provide additional funds.

The $30 million overall budget for the Rangel Center was devised with conservative financial planning in mind. Rather than fundraising annually for operating expenses, the campaign to fund the Rangel Center focuses on building an endowment that will sustain the Center into the future. Mounting this program and demonstrating its success will enable The College to fundraise effectively for its endowment. In order to develop a program that will remain in perpetuity, CCNY needs a period of time during which it can build a record of accomplishment that will attract additional investments by other foundations, corporations, and individuals.

As discussed during the November 18th meeting, a grant of $750,000 will enable The College and the Rangel Center to introduce the Master's Degree in Public Service program and build the above-mentioned record of accomplishment. During this time, as the first objectives are achieved, the College will continue to secure funds for the Rangel Center's endowment and renovation.

Funding from the Ford Foundation will assist with the program budget for three years, enabling The College to recruit the first director, a leading scholar with a public service background. The director will initiate the program, market it to new students and faculty, direct research and publications, raise endowment funds and help build its reputation.



Ford Foundation funding will also cover the salary and benefits for the first postdoctoral fellow, a stipend of $5000 for each student intern and research assistant and other program-related expenses. The postdoctoral fellow will engage in research and teaching at the Center, and provide guidance to the Master's students. The students will integrate their classroom learning with internships and research. City College faculty in the areas of sociology, political science, international relations, etc. will also supervise student research assistantships. The critical stipends will enable these students to gain vital hands-on work experience to prepare them for public service. The funding will allow the students to work fewer hours at jobs unrelated to their career paths in favor of voluntary work experience in the public sector or of groundbreaking research.

Memo
Date: January 11, 2006
To: President Williams
From: Shelly
Re: Letter from Congressman Rangel

We can only use the $450k grant from Congress for renovating a facility, but nowhere does it state that it can only be used for the Alumni House building. I think we should put it into a fund and wait. If we are able to collect the Verizon $500k and other construction funds, we can then renovate the Alumni House; if not, we can consider another location for the Rangel Center.

I spoke with Brett, who feels he can put a BA/MA program together if we are awarded the $750k grant from the Ford Foundation. The program will be somewhat different, making the MA in Sociology now a Public Service master's.

I have a call in to the Ford Foundation and I'm hoping they will still be interested even though Congress gave us very little seed money. We're hoping to get the Ford grant and that our presentation there will help us get others. If not, I think we're done! Of course, if the Democrats take back the House, it's a different story and we will certainly want to hang in for that.

Lisa spoke to Ray about the letter from Rangel and he thinks that we should continue to work on both Rangel and Powell projects simultaneously, and not worry that one might know about the other.

Float it with capel—we're wringing our hands—you guys have to come up with some more money—maybe we could use $400k in some other place

Hoping we can move forward—looking forward to see what happens next
Greg buttonholed jim and told him we need more money to make this happen

SVB- I just got off the phone with Shellee Butler re a tentative date for a briefing here at the FF on the Rangel Public Service initiative at City College. The date of May 5th was put on my calendar and yours. Unfortunately, Congress has not taken any step towards funding -- they still have only the $450,000 earmark they always had when they started talking with us. I am beginning to think that such a briefing is pre-mature given the slow pace of Congressional action. What is your assessment? Do you still want us to go forward? Remember they are looking for big bucks from Congress. I think it might make more sense to postpone until early summer or the fall. AB

President Williams,

I had called Jim Capel after getting a slightly annoyed response from the Ford Foundation re the smaller-than-expected Congressional support so far. Jim took it to the Congressman and called me yesterday. He said that we're going to be getting a letter from the Congressman re actions they are proposing for this year's appropriations—the '07 year—which total about $10 million this year. He thinks they'll probably be successful, at least to the tune of several million.

I then called Alison Bernstein and told her this. She said that Susan had just gotten back and said that even if Congress fails in its commitment, Ford will do something, but a much more scaled-back version. They're interested in doing the project whether or not Congress steps up, but they can't replace Congress' commitment. She said to "tell Greg that we will try to help in a modest way even if we don't get help from Congress."

When I told Alison about the letter, however, she said "That's good enough for us. If, in fact, there was no movement on the Congressional front, we should postpone until we get it or, we decide to scale back. If this means that we can pull off enough of a commitment by May 5, then it will be fine." I said the appropriations bills are going in from spring through fall and I didn't know whether we would have commitments by May but that we would send her the letter as soon as we received it.

She said that May 5 is still a possibility, not a probability, but that after they receive the letter, they will determine whether it serves our purposes better to do it on May 5 or in the fall. I said we would be happy to go with their decision.

So, now we're just waiting for the letter. The encouraging thing is the Congressman's response, I think.

Shelly

Congress of the United States
House of Representatives
Washington, DC 20515-3215

March 16, 2006

The Honorable Joseph Knollenberg
Chairman
Subcommittee on Transportation, Treasury and Housing and Urban Development
B-307 Rayburn House Office Building
Washington, DC 20515

Dear Mr. Chairman:

I seek your support for a an Economic Development Initiative Grant for a project very important to me and I believe very much necessary

Today non-whites make up nearly 30% of the United States population. Yet only about 13.8% of the men and women who occupy top management, supervisory and policy making positions in the federal government are members of minority groups. By 2050, minority groups in the United States will comprise 50% of the population.

It is apparent to me that we need to do more to bring more minority Americans into public service. That is why I am asking for your Committee to provide $6 million to help establish a Center for Public Service at the City College of New York in my Congressional District.

The Center will offer interdisciplinary programs for bachelors, bachelors/masters and mid career programs to prepare underrepresented groups for careers in public service at management and policy making levels.

It is appropriate that this Center be established at the City College of New York. City College has been a gateway for low and moderate income New Yorkers from immigrants and other underrepresented groups and their children. CCNY is the alma mater of thousands of business people, professionals, military leaders, and public servants who came from the most modest means. CCNY's ability to be the springboard make it the ideal choice for the task at end.

I look forward to discussing this request which is very important to me.

Sincerely,

CHARLES B. RANGEL
Member of Congress

Dear Maureen,

I wanted to get a final confirmation from you about the date for President Susan Berresford, Dr. Bernstein and others at the Foundation, would be meeting with Congressman Charles B. Rangel, President Gregory H. Williams and me. Right now, the date and time we have been given is May 5 from 10 am to 2 pm, including lunch and we would like to firm up the arrangements.

President Berresford had suggested that the Ford Foundation invite other foundations to hear City College's presentation, and had kindly offered to contact several, including New York Community Trust President Laurie Slotsky. President Berresford had also recommended the Carnegie Foundation for our project and we were hoping to invite them and any others that the Ford Foundation suggested to us.

Thanks for all your help with this and I look forward to hearing from you.

Subject: Charles Rangel Policy Center
Importance: High

Hi Janice,

Way back in September, you asked me to note 500K from your budget for the Charles Rangel Policy Center, which SVB would reimburse you for later. I never did put in that amount. I can still hold the 500K from Director's Discretionary for this, if the grant is still going to be done. It seems a liitle strange to hold 500K for something you will be reimbursed for later--that's probably why I didn't hold it in the first place. Should I just make a note of it in GM Consideration, so it won't actually deduct from your DD budget?

Thanks,
Irene

Subject: letter from Rangel

Alison,

Hope the Alaska trip is going well.

My office sends stuff out to me here and among this week's set is a letter (a form letter) from Congressman Rangel to Paul Allaire. Correspondence control sent it to me and then it comes to you.

I know you have been talking to his staff about the progress they have made. Given that this is a formal letter of request, I think Maureen should acknowledge it in your absense with words like " AB is away on business and she has asked me to acknowledge the letter to Mr. Allaire. She says she hopes to conclude discussions with you before long, as the other support for the program becomes clear. " Or some way of indicating that we are committed to it but a few hurdles remain.

Incidentally, his letter says they have the $3. 6 million from congress.

Thanks. SVB

Importance: High

Shelley- Thanks for this update. I have talked with President Berresford and we can now encourage you to submit a proposal for $1 million (over 4 years to begin when you have approval for the program) to help put in place the academic program structure for the Masters' Degree component... I would assume that Dean Silverstein would be the project coordinator/manager? The proposal can be initiatively addressed to me, Thomasina Williams and my colleague, Dr. Janice Petrovich. Please remember that we do not provide full time support for faculty lines but can help with visiting scholars, research projects and assistants and internships for students.

Moving on to your plans for the lunch... pls provide a few dates in mid December or early January when President Williams, and Congressman Rangel can attend the lunch. Susan thinks the pitch requires both of them to be there. I'll work on Susan's calendar once I have a few dates from you. We can talk next month about the shape of the luncheon and invitees -- I will need a complete list of names and addresses from you to get the ball rolling. Best, Alison

Subject: Update on the Rangel Center at City College

Hi Alison,

It was good talking to you and I appreciate the time you took to chat after your very arduous but wonderful trip east and west. I want to apprise you of what's going on with the Master's Degree component of the Charles B. Rangel Center for Public Service. Social Science Dean Brett Silverstein reports as follows:

"In CUNY, the first step for starting a new program is to write a Letter of Intent describing it and then pass it through the Social Science Curriculum Committee and the Review Committee. It then goes on to 80th Street, CUNY headquarters. (Actually the Social Science Committee, of which I am a member, meets at the Graduate Center.) Once the questions raised made by these committees are answered, the Social Science Committee asks for a complete proposal, that is, the Letter of Intent plus many details (syllabuses, CVs of instructors, estimated tuition revenue, costs etc.).

The Social Science Curriculum Committee has already received our Letter of Intent with all its accompanying information. They will be meeting within two weeks; changes will be made and the Social Science Committee will meet again within two weeks after that to give its endorsement. Finally, within two weeks after that, (early December) the Review Committee will vote on it. It will then proceed to the CUNY Board of Trustees, which will vote on a resolution we present.

I cannot guarantee it, but it is very likely that by the end of this semester or by the beginning of the spring semester, permission to expand the Letter of Intent into a full proposal will be given. In anticipation of this, we have completed most of the work needed to create the full proposal and we should be able to accept students for fall, 2007."

Brett Silverstein
Dean of Social Science

I also want to give the update on our fundraising and where we stand with the three phases we had described earlier: the seed money from Congress; foundation, corporation and individual fundraising; and finally the completion of the project by Congressional appropriation.

As we discussed, attached please find a spreadsheet showing the current fundraising totals for the Charles B. Rangel Center, both confirmed and pending. As you see, we have made good progress since we last met. We have the seed money the Congressman promised and we are making headway in the second fundraising phase, approaching foundations, corporations, and individual donors. The Congressman has been a little busy lately, but we hope to have more of his time after November 7.

We are very pleased that the Ford Foundation will host a presentation for the Rangel Center at its headquarters. I don't have to tell you how important that is to the Rangel Center and to City College.

When we met with President Susan Berresford, she suggested that we would want to reach out to the Carnegie Foundation as they might have an interest in the Rangel Library. Also, she suggested that we include Lorie Slutsky at the New York Comm[redacted]he knows. So, of course, we would love to have ther[redacted]

In addition, if possible, we would very much appreciate Ford inviting representatives from these foundations whose missions we feel will be in accord with that of the Rangel Center:

Starr
Peter Jay Sharp Foundation
(They have given City College two grants here totaling $1.3 million)
Wallace
Sloan
MacArthur
Pew Charitable Trust
Robert Woods Johnson
William Randolph Hearst
Altman
Revson
Mellon

I have looked over the foundations that received the Congressman's letter (albeit a form letter), and the most important ones were the Rockefeller Foundation and the Atlantic Foundation. Again, we would love to meet with representatives of those foundations. President Williams does know the president of the Rockefeller Foundation, and perhaps if she knows that Ford is behind this project, she might attend.

Any foundation in addition to the list above that you feel should be in the room that day, please suggest to us. Also, we would be happy to include corporate foundations and corporations if you feel it would be appropriate. We have a number that we would like to include.

Regarding strategies for the presentation, as soon as we have set a date that is convenient for you and President Berresford (if possible), Congressman Rangel, and President Williams, I would like to meet with you to develop the agenda.

It would be wonderful if the establishment of our new program in public service coincided with the upcoming 2007 Centenary of City College's Harlem campus and the 160th anniversary of CCNY's creation. We remain very grateful for the Ford Foundation's interest in advancing this program and we look forward to working with you on it.

Thanks so much,
Shelly

SVB -I called Shelley Butler earlier in the week to see where things stand. This is her reply... it looks as if we need to move on $1m from unit reserves in the next two months or so. It also means that we should plan your luncheon with other donors for right after the beginning of the calendar year. Does that make sense to you? Alison ps- I am thinking that this is a joint KCF/PSJ reserve request. On our side, either Greg Anderson or Cyrus should be the PO but I will let Janice Petrovich mull that one over.

the City College of New York

A Proposal to
The Ford Foundation

for

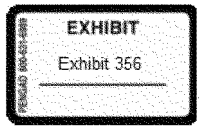
The Charles B. Rangel Center for Public Service at
The City College of New York

November 13, 2006

Open the doors to all.

Let the children of the rich and the poor take their seats together and know of no distinction save that of industry, good conduct, and intellect.

Townsend Harris, Founder,
The City College of New York



CSOC.CBR.00011155

Executive Summary

The City College of New York requests a grant of $1,000,000 from the Ford Foundation to implement its new graduate program in public service and whose focal point will be the CCNY Charles B. Rangel Center for Public Service. The Center will prepare students, particularly from underserved and underrepresented populations, for careers as leaders in government and public service. The public service curriculum emphasizes a combination of classroom instruction and practical training through internships.

Ford Foundation grant funds will be used to help provide support for:

- research fellowships in public service for doctoral and post-doctoral fellows;
- a post-doctoral research fellowship for the Rangel Library;
- support for visiting scholars;
- master's level research assistantships; and
- public service school-year and summer internships.

The City College Mission

The City College of New York was founded through a public referendum in 1847 as a free academy to serve "the children of the whole people." One of a young America's great democratic experiments, it remains one her great democratic achievements, and the most important avenue to upward mobility and social advancement for generations of New Yorkers.

City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented young men and women with few material resources and opportunities. For almost 160 years, The College has opened up access to a world-class education to underrepresented populations, preparing them to enter those fields with the expert skills to change their own futures, and shape the world. Often the children of immigrants or immigrants themselves, often the first ones in the family to attend college, and often working while taking on challenging academic programs, these talented students make their way toward success with diligence and determination.

Today's City College is a microcosm of New York City, with one of the most diverse student bodies of any college in America. Its more than 13,000 students carry on a tradition of excellence as they win prestigious awards and fellowships, gain acceptance to leading graduate and professional schools, and make their marks in the sciences, in the arts, in public service, in industry, and in education.

Diversity at City College

Two years ago, *US News and World Report* ranked City College first in diversity in the nation, where African-Americans are the largest group. Last year, City College was ranked first where Hispanic Americans are the largest group. Today, more than 87% of CCNY students describe themselves as members of a minority group and 80 languages other than English are spoken on campus.

The *Chronicle of Higher Education 2003 Almanac* reports that of the total number of overall bachelor's degrees earned in the United States as a whole, white students earned 75% of the total, blacks 8.5%, Hispanics 6.5%, and Asian-Pacific Islanders 6.2%. The same year at City College, however, blacks earned 34.1% of the total bachelor's degrees awarded, Hispanics 30.1% and Asian/Pacific Islanders 11% -- an unparalleled record of success for underrepresented populations.

Following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families, most City College students have very limited financial resources. Approximately 58% come from families with combined incomes of $30,000 or less; three-quarters work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial reasons.

The Lack of Diversity in Public Service in the US

Today, non-whites make up nearly thirty percent of the U.S. population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top managerial, supervisory and policy-making positions in the U.S. federal government are members of minority groups.

By 2050, minority groups in the United States will comprise 50% of its population. This proposal builds upon The City College of New York (CCNY) mission of access and excellence and Congressman Charles B. Rangel's legacy of public service to ensure that those who direct our nation's affairs will reflect our citizenry.

The Charles B. Rangel Center's Objectives

City College's Rangel Center will accomplish this through the establishment of a rigorous graduate program for students from underrepresented groups that will prepare them for public service, including elective office and careers in government, at the decision-making level. The new master's program will be coordinated with programs on the undergraduate level, many unique to City College, to encourage and inspire our best students to move into the master's program and pursue careers in public service.

Located in a restored Harlem mansion adjacent to The City College campus, the Charles B. Rangel Center will also house the Charles B. Rangel Library, an archive that records the life of one of America's most important public servants and serves as a rich repository of knowledge and experience for students and scholars alike. Research Fellows and Visiting Scholars will utilize its resources while sharing and imparting new knowledge in the field.

Public Service at City College and Recruitment and Potential for the Master's Program in Public Service at the Rangel Center

The City College of New York offers a unique and fitting environment for The Charles B. Rangel Center for Public Service. Located in Harlem, the heart of Congressman Rangel's constituency, a number of City College programs attract outstanding undergraduate students, most from minority populations, who are excellent candidates for public service careers. The presence of these already excellent programs on campus affords CCNY an opportunity open to very few colleges in the nation for early identification, recruitment, and preparation of students from underrepresented populations for the Master's and BA/MA Programs in Public Service at The Charles Rangel Center for Public Service. The College anticipates that some of these students will be among the first class to enter one of the master's degree programs that are expected to begin in fall of 2007.

THE CHARLES B. RANGEL CENTER FOR PUBLIC SERVICE AT CITY COLLEGE

A Career in Public Service
The Rangel Center for Public Service will prepare students, particularly from underserved and underrepresented populations, for careers as leaders in government and public service. At the heart of that effort is a curriculum that emphasizes a combination of classroom instruction, practical training through internships, and opportunities for vibrant co-curricular interaction with the Rangel Mid-Career Fellows on leave from public service careers.

BA/MA Program in Public Service
The program is designed to attract students at both the graduate and undergraduate levels. For undergraduates, a unique, seamless five-year 150-credit BA/MA Program in Public Service will attract current CCNY students and new students from New York City and around the country who come to City College for the specific purpose of enrolling in the Rangel Program. The BA/MA Program will attract students capable of and interested in an intensive "fast-track" program leading to the master's degree. It will prepare them for public service with high-level coursework, experienced government personnel mentors, and hands-on training through internships and service learning.

MA Program in Public Service
For graduate students, the new 45-credit Master's Program in Public Service will provide the capstone of conceptual and service learning needed for a career in public service. The MA Program's distinctive combination of classroom instruction, internship placements, and intensive interaction with mid-career professionals will attract both recent college graduates and older students interested in advancing their skills and potential as leaders in public service. The program will include participation in internships or apprenticeships arranged for by the Rangel Center in government and service organizations, and will offer interdisciplinary specializations in concert with The City College Schools of Architecture, Engineering, Education, and Biomedical Education, plus its special programs in transportation, waste management, and urban public health.

Upon completion of the degree, graduates will be eligible for a program analogous to the Federal Career Intern Program, entering government service for a two-year temporary appointment with eligibility for a permanent assignment upon completion. This program will encourage the involvement of members of underrepresented minority groups and those with financial need through the availability of employment upon completion of the program.

The Charles B. Rangel Library
The Library will consist of documents, archives, and memorabilia from Congressman Rangel's lifetime of public service. These papers will be made available to scholars nationally, and particularly to scholars within The City College and the City University, and will serve as a locus of sponsored research and conferences concerning barriers to full participation in public service by underserved minorities.

The Program

A vital element of the City College program in public service will be the creation of research fellowships for doctoral and post-doctoral fellows, support for visiting scholars, master's level research assistantships, and public service student internships. In tribute to the Ford Foundation's longstanding commitment to scholarship, City College asks the Foundation to consider supporting these initiatives at CCNY:

Research Fellows in Public Service
Fellowships for doctoral and post-doctoral scholars to study at the Rangel Center and work with the archives and other materials available at the Rangel Library will be critical to its reputation in the academic community. The College expects that Fellows will want to spend one or two semesters at the Rangel Center researching issues relating to minority contributions to US policy and history. A research fellowship of $30k/year will enable these scholars to serve in residence at the Center, also serving as guides and mentors to master's degree students. In selecting Doctoral and Post-Doctoral Fellows, priority will be given to Fellows who propose to do research on diversity in public service. We request two research grants per year for a total of $60,000/year.

Post-Doctoral Fellow for the Rangel Library
The access at the Rangel Center to the collected papers of Congressman Charles B. Rangel will be a valuable resource that will greatly add to the reputation of the Center and help it to realize its goals. A Post-Doctoral Fellow will be selected to organize these papers, digitize them, and do research with them and assist other scholars in using them. We request one Library Fellowship at a cost of $30,000/year.

Master's Degree Assistantships
The Master's Degree Assistantship program will institutionalize the opportunity for student participation and development through research. Each year, five assistants in the Master's Program who elect to do supervised research will receive support (supplementing other scholarships) to participate in an intensive research program, with $5,000/year in assistantship support. (Total of $25,000/year).

Visiting Scholars
Members of academia, think tanks, the public sector, and community organizations from New York City, the nation, and around the world, who have experience with the contemporary challenges faced in public service, will come to City College to provide context, background, and advice on steps needed to solve the problems. Visiting scholars with expertise in leadership will be sought, with at least one with research experience in the barriers that deter many students with minority and immigrant backgrounds from careers in public service. A Visiting Scholarship of $75,000/year is requested.

Public Service Internships
More than 50% of City College students come from families with a combined income of less than $30,000 per year, and almost all CCNY students must work, many at more than one job. Students from more affluent backgrounds can benefit from the kind of unpaid internships and service learning opportunities available at agencies, companies, and government offices that will give them a leg up in their careers. CCNY students often do not have the luxury of taking advantage of those unpaid opportunities.

To level the playing field and give CCNY students the same competitive edge that more materially comfortable students have, the Rangel Center wants to enable these students to work fewer hours at jobs that are unrelated to their future professions, spend more time on their studies, discover what fields interest them, and graduate with the kind of specialized expertise essential to getting that first critical job.

In fall 2007, the Rangel Center will begin a yearly program for outstanding students that provides them with $5,000/year stipends to enable them to take unpaid internships in government and public service placements. Some students will want and/or need to take their internships over the summer. This program will provide twelve students with $5,000 each to design and carry out summer projects that unite service and learning to address public service priorities. ($60,000/year)

Goals

As the purpose of the program is to encourage men and women from underrepresented populations to enter government and public service careers and seek leadership and management positions within those careers, the program will:

- foster interest in public service among current CCNY students who undertake volunteer work or internships successfully and encourage them to continue on to the master's degree;
- ensure practical hands-on experience in public-service settings with inter-disciplinary academic training;
- provide mentoring by current public service partners, a Visiting Scholar, and Mid-Career Rangel Fellows;
- measure the program's impact by tracking how long program participants remain in it and their satisfaction level with it;

- establish effective career connections leading to job placements in government and public service upon graduation; and
- track how many graduates from underrepresented populations enter government and public service in both the short and long term.

Impact

A successful program will create a pipeline of well-prepared young men and women who intend to make government and public service their life work. With continued success, they will reach back and bring others into their midst, serving as mentors themselves. Through their increasing participation, America's governing class will eventually reflect the full breadth of the nation's citizens, their perspectives and their needs, more accurately and fairly. With the assistance of the Ford Foundation, The City College of New York, historically a citadel of higher education for those with talent and determination, but few financial resources, will provide the tools with which these men and women can empower themselves and enter that governing class.

Program Budget Model

The proposed budget model is a snapshot of the program when it is fully operational; it may not be fully implemented by fall of 2007, and it may differ in details, but this model is intended to serve as a general guide to CCNY's objectives. The requested grant of $1,000,000 over four years will help start up the research and master's degree programs in the early years. These funds will not be used for endowment, nor will any part of them be used for the Rangel Center building.

Purpose	Amount	Annual Total
Research Fellows in Public Service	**2 @ $30k each**	**$60,000**
Library Research Fellow	**1 @ $30k**	**$30,000**
Visiting Scholar	**1 @ $75k**	**$75,000**
Master's Degree Assistants	**5 @ $5k each**	**$25,000**
Public Service Interns—school year and summer	**12 @ $5k each**	**$60,000**
TOTAL		**$250,000**

President Williams and Dean Silverstein,

We are confirmed at the Ford Foundation for Monday, January 29, from 11:30 to 2 pm. The other date, February 26, can be released. This date has been cleared and confirmed for Congressman Rangel, Ford Foundation President Susuan Berresford and Ford VP Dr. Alison Bernstein.

We will make a presentation of 45 minutes in total, including remarks by President Williams and Congressman Rangel, and a Power Point presentation by Dean Silverstein. Then there will be questions, then lunch.

They want us to invite everyone who has funded the Rangel Center, those we asked for funding but have not yet succeeded with, and those who have not yet been asked. Included in this last category are a number of foundations we have compiled at the president level, plus two that Congressman Rangel wants invited--John D. Rockefeller and Donald Trump.

More on this later.

Shelly

Thanks Maureen,

I'll see that everyone has the right times
By the way, Congressman Rangel told me that David Rockefeller has expressed interest. I am putting him on our list as well as Donald Trump.

Thanks

Hi Shelly,

Hope you enjoyed a lovely Thanksgiving.

I **confirmed** with Alison Bernstein and Verna Gray (Susan Berresford's Assistant) that this event will take place on **Monday, Jan. 29, 2007, from 12:00-2:00 p.m. (or 2:30, if necessary).** Because of another speaking engagement at the Foundation, Susan is not available before 12:00.

Please let me know how many participants you expect at this event and the type of equipment you anticipate will be used, as I must reserve the room.

Thanks very much,

Maureen

Subject: RE: CCNY Rangel Presentation and Lunch on 1/29/07

Hi Maureen,

Thanks for sending the confirmation and the date is correct. City College is thrilled that President Berresford and Dr. Bernstein will be hosting Congressman Rangel and President Williams' presentation for The College. I did notice, however, that the time differs slight from what Dr. Bernstein and I had discussed. I thought we agreed that the presentation would begin at 11:30 and would take a maximum of 45 minutes, there would then be questions and then lunch. The whole thing would end at 2:00 pm. Can we double check on that?

Yes, I will be sending you the list of invitees—I do have a few updates to make and then will send to you.

I also hope to put together some language that can be included in the Ford Foundation's invitation regarding the project.

Have a wonderful Thanksgiving everyone and our thanks to all.

Shelly

Hi Shelly,

Just to confirm that Susan Berresford and Alison Bernstein have agreed to host the presentation and lunch with Charles Rangel on **Monday, Jan. 29, 2007, from 12:00 – 2:30 p.m. at the Ford Foundation.**

I understand from Alison that you will be sending me a list of invitees.

Thanks,

Maureen

Hi,
Dinner last evening was good. Rangel,s aid George Ranney spoke. I had a good exchange with him. Also with the staffer who will cover philannthropy. Ranney knew we are hhaving the lunch for rangel's center.

Got an invite to be a nonresident scholar at Brookings, whatever that means. Also great meeting with Lois Rice about diversity in think tanks. Her daughter, susan rice, who spoke to the board is interested in the ff job

Have a good day. Svb

RE Update on the Rangel Center at City College

Subject: RE: Update on the Rangel Center at City College

Hi Alison,

Thanks for keeping me in the loop on this. I wonder whether the recent developments with the Democrats taking control of Congress and Congressman Rangel soon to assume the Chairmanship of the House Ways and Means Committee will result in even more funding for the Center.

Thomasina

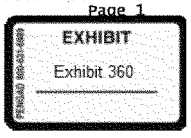
Shelley- Thanks for this update. I have talked with President Berresford and we can now encourage you to submit a proposal for $1 million (over 4 years to begin when you have approval for the program) to help put in place the academic program structure for the Masters' Degree



RE Update on the Rangel Center at City College
component... I would assume that Dean Silverstein would be the project coordinator/manager? The proposal can be initiatively addressed to me, Thomasina Williams and my colleague, Dr. Janice Petrovich. Please remember that we do not provide full time support for faculty lines but can help with visiting scholars, research projects and assistants and internships for students.

Moving on to your plans for the lunch... pls provide a few dates in mid December or early January when President Williams, and Congressman Rangel can attend the lunch. Susan thinks the pitch requires both of them to be there. I'll work on Susan's calendar once I have a few dates from you. We can talk next month about the shape of the luncheon and invitees -- I will need a complete list of names and addresses from you to get the ball rolling. Best, Alison

Subject: Update on the Rangel Center at City College

Hi Alison,

It was good talking to you and I appreciate the time you took to chat after your very arduous but wonderful trip east and west. I want to apprise you of what's going on with the Master's Degree component of the Charles B. Rangel Center for Public Service. Social Science Dean Brett Silverstein reports as follows:

"In CUNY, the first step for starting a new program is to write a Letter of Intent describing it and then pass it through the Social Science Curriculum Committee and the Review Committee. It then goes on to 80th Street, CUNY headquarters. (Actually the Social Science Committee, of which I am a member, meets at the Graduate Center.) Once the questions raised made by these committees are answered, the Social Science Committee asks for a complete proposal, that is, the Letter of Intent plus many details (syllabuses, CVs of instructors, estimated tuition revenue, costs etc.).

The Social Science Curriculum Committee has already received our Letter of Intent with all its accompanying information. They will be meeting within two weeks; changes will be made and the Social Science Committee will meet again within two weeks after that to give its endorsement. Finally, within two weeks after that, (early December) the Review Committee will vote on it. It will then proceed to the CUNY Board of Trustees, which will vote on a resolution we present.

I cannot guarantee it, but it is very likely that by the end of this semester or by the beginning of the spring semester, permission to expand the Letter of Intent into a full proposal will be given. In anticipation of this, we have completed most of the work needed to create the full proposal and we should be able to accept students for fall, 2007."

Brett Silverstein
Dean of Social Science

I also want to give the update on our fundraising and where we stand with the three phases we had described earlier: the seed money from Congress; foundation, corporation and individual fundraising; and

RE Update on the Rangel Center at City College
finally the completion of the project by Congressional appropriation.

As we discussed, attached please find a spreadsheet showing the current fundraising totals for the Charles B. Rangel Center, both confirmed and pending. As you see, we have made good progress since we last met. We have the seed money the Congressman promised and we are making headway in the second fundraising phase, approaching foundations, corporations, and individual donors. The Congressman has been a little busy lately, but we hope to have more of his time after November 7.

We are very pleased that the Ford Foundation will host a presentation for the Rangel Center at its headquarters. I don't have to tell you how important that is to the Rangel Center and to City College.

When we met with President Susan Berresford, she suggested that we would want to reach out to the Carnegie Foundation as they might have an interest in the Rangel Library. Also, she suggested that we include Lorie Slutsky at the New York Community Trust, whom she knows. So, of course, we would love to have them there.

In addition, if possible, we would very much appreciate Ford inviting representatives from these foundations whose missions we feel will be in accord with that of the Rangel Center:

Starr
Peter Jay Sharp Foundation
(They have given City College two grants here totaling $1.3 million)
Wallace
Sloan
MacArthur
Pew Charitable Trust
Robert Woods Johnson
William Randolph Hearst
Altman
Revson
Mellon

I have looked over the foundations that received the Congressman's letter (albeit a form letter), and the most important ones were the Rockefeller Foundation and the Atlantic Foundation. Again, we would love to meet with representatives of those foundations. President Williams does know the president of the Rockefeller Foundation, and perhaps if she knows that Ford is behind this project, she might attend.

Any foundation in addition to the list above that you feel should be in the room that day, please suggest to us. Also, we would be happy to include corporate foundations and corporations if you feel it would be appropriate. We have a number that we would like to include.

Regarding strategies for the presentation, as soon as we have set a date that is convenient for you and President Berresford (if possible), Congressman Rangel, and President Williams, I would like to meet with you to develop the agenda.

It would be wonderful if the establishment of our new program in public service coincided with the upcoming 2007 Centenary of City College's Harlem campus and the 160th anniversary of CCNY's creation. We remain very grateful for the Ford Foundation's interest in advancing this program and we look forward to working with you on it.

Thanks so much,
Shelly

Gang:

Great work and a great report. We might want to do a bit of investigative work to see if we could determine a bit more history reflecting the role (or lack there-of) of philanthropy in Cong. Rangel's district. I sensed in my conversations with both George and Sonja at our board dinner that they are really big on the commitment of a partnership between growing philanthropy and encouraging growth in our partnership in their communities.

I'm copying Susan Berresford on this email because we need to visit with Susan, Lori and others to get their input and participation in building a COF-NYC partnership for this effort.

Thanks and let me know what I can do to help.

Steve

From: Flahaven, Brian

Cc: Emery, Rodney; Gallagher, Janne; Maldonado, Luis; Pembroke, Mary Dwyer
Subject: Recap of Today's Meeting with Rangel's Staff

Janne and I met today with George Dalley, Chairman-Elect Rangel's Chief of Staff, and Sonja Nesbit, a member of the Democratic staff on the Ways and Means Committee. After I

gave a brief introduction to the Council and our members located in New York's 15th congressional district, Janne outlined our remaining concerns with the donor-advised fund and supporting organization reforms included in the PPA. George and Sonja offered to have Rangel weigh in with the IRS on the need to issue further guidance. They also said that fixing these issues would be a priority once they take charge.

George said that Rangel had not yet determined his charitable giving agenda, but asked what we thought would be our #1 priority in terms of increasing charitable giving. Janne mentioned the extension and expansion of the IRA charitable rollover and increasing the percentage limits on amount an individual can deduct for charitable purposes from adjusted gross income. George did raise a concern about an NPR report that quoted former Labor Secretary Robert Reich as saying that only 10% of charitable gifts each year go to poor and low-income causes. Janne noted that 10% seemed very low and thought that Secretary Reich must be assuming that all religious gifts and gifts to universities benefit the wealthy, which is not necessarily true.

Sonja mentioned that the Ways and Means Committee has hired an additional tax lawyer who will handle charitable issues for the committee. She wants to set up another meeting for us all in January that would include this new staffer. We said that we would follow up with them after the New Year and would keep them updated on our progress with the IRS.

After the meeting, Rodney and I talked about how we could help Rangel's office shape their charitable giving agenda. Rodney will discuss these ideas when he meets with you on January 8.

Importance: High

SVB- this is the list Shelley Butler from CCNY sent us right before christmas. I have looked it over and think its overly ambitious, not to mention the fact that she has David Heintz, not Steven Heintz from RBF! For starters, I'd eliminate out of towners like Jonathan and Becky Rimel. Could we go over this quickly on Monday? Once we have the final list, Maureen will send out two types of invites -- an email and a formal letter. Hope that's ok. Thanks, Alison ps I don't think Trump and Morganthau ought to be there either!

Priority List of Foundations and individuals to invite to presentation by President Williams and Congressman Rangel at the Ford Foundation-

Thomasina and Greg—just to keep both of you in the loop – This luncheon is going to happen on the 29th. I hope its on your calendar, but if not, pls. put in on. SVB agreed to host this thing and I will find someone to write up the grant rec'd... give me a shout if you have any lingering concerns about this "special". AB ps – we are holding $1m in unitreserve for it so there's negative impacto n your budgets. AB pps- Mike and Mary- it would be wonderful if you could attend but there's no obligation to do so. SVB and I are doing the heavy lifting on this one!

SVB- Here's my suggestion for the invitation for Rangel. Rachelle Butler sent a very weak draft which I have fiddled with. Please edit at will and we will get these off asap. Thanks, AB

SUGGESTED DRAFT INVITATION TO RANGEL CENTER PRESENTATION AT THE FORD FOUNDATION

Name

10/21/2009

Address
Address

Dear Name:

On Monday, January 29, from 12:00 noon to 2:00 pm, I will be hosting a luncheon presentation at the Ford Foundation focused on exciting new plans for the development of the Charles B. Rangel Center on Public Service at the City College of New York (CCNY). The presentation will be led by Congressman Rangel, and City College of New York President Gregory H. Williams. A buffet lunch will be served in a private dining room at the Foundation which is located at 320 E. 43rd Street. Immediately following lunch, we will have a brief presentation followed by discussion and Q. and A.

The development of the Rangel Center comes at a propitious time in the history of City College. CCNY is celebrating its 160th anniversary and the centenary of its Harlem campus in 2007. There is no more fitting tribute to the decades of service this institution has offered to New York City than to enable students of varying ages to prepare for careers in public service. The Rangel Center is named for one of the greatest African-American statesmen of the 20th century and the US Congressman representing the 15th Congressional District in which the College is located. Through the Rangel Center, CCNY hopes to inspire new generations of individuals from its highly diverse student body to enter and remain in government and public service.

In particular, the Center will be the home of CCNY's new Master's Degree in Public Service which will be inaugurated in the 2007-2008 academic year. This five-year BA/MA program, along with a stand-alone two-year MA program, the Mid-Career Leadership Fellows program, the Rangel Library and Archives, will all be located at the Rangel Center. In addition, the Center will offer a post-doctoral research program which will also focus on public service, with a special emphasis on the contributions, both past and future from populations currently underrepresented in government and public service.

I welcome you to join us as we explore the Rangel Center's development plans and funding needs. I have asked our Vice President for the Knowledge, Creativity and Freedom Program (KC&F), Dr. Alison Bernstein to serve as liaison for the luncheon. Her assistant, Ms. Maureen Caruso, who can be reached at 212-573- or through email at m.caruso will follow up with you regarding your availability. Please RSVP to Maureen know if you are able to attend by January 25.

I look forward to seeing you on the 29th for a presentation which promises to be lively and highly informative.

Sincerely,
Susan V. Berresford
President

Subject: Rangel Lunch

Susan:

Sharon King of the Heron Foundation heard about the Rangel lunch because they changed the date of the BoardSource meeting to accommodate my schedule and asked if she could come. I am not sure she understands the primary purpose of the lunch, but if I explain and she remains interested, do you have a seat at the table? She represents a New York foundation and she will add to the diversity. Let me know.

Susan:

Thanks. I knew you had a board meeting in the future - so pleas do not feel obligated to deal with this issue now. And as I said in my earlier email, we need to raise the issue of the excise tax at our next public policy committee meeting (March 1) because it came in with the second highest number of requests for simplicity in our survey. So, even if we end up doing nothing we must at least discuss it.

That being said, I want to make sure before going into those discussions that I fully understand the impact of this on larger foundations with much more complicated systems of giving. I sense from my original discussions with some of the hill folks that some type of a formula might head off increased payout requirements. If we can gear the excise tax rate to the percentage payout for that year, we sort-of incentivize payouts while neither penalizing the foundation who rises to the occasion in a given year (Tsunami or Katrina), nor mandating a specific payout. This can work for the smaller foundation with straightforward annual giving patterns. I just want to make sure I understand it from a more complex process of giving, like the Ford Foundation.

No hurry on this.

Thanks.

Steve

Subject: Excise tax

Steve,

I have a board meeting this week -- wed and thurs. But as you can imagine, the whole week is take up with preparation and followup. So I offer these thoughts now.

We at the FF have always thought there were huge risks to pushing on the excise tax -- risks that others less familiar with the legislative process tend not to see. We don;t believe the tax will ever be simply eminiated. Tinkering with the tax has huge risks of generating a quid pro quo of raising the payout. With all the talk of the new donors timelimiting their foundations enlarges these risks. The flat 1% is appealing and was endorsed by the Joint Committee on Taxation. The revenue neutral option is attractive but still has the risks of the others re payout etc.

I guess it comes down to what people like Zerbe, Rangel etc say they are willing to fight for and what we believe about their determination to struggle and not fade. Do you have any measure of that? Susan

Sharon:

It would be great to have you at the Rangel lunch and I can arrange for Susan Berresford's office to send one. I just need to do a bit of full disclosure here. The lunch is at Rangel's request to talk to New York foundations about funding the new Rangel Center for Public Service being established at CCNY. The proposal has been floating around for some time and the lunch finally get set by the Congressman's scheduler. The importance of the event is two-fold: First to demonstrate to him that not all private foundations are non=responsive to him and uninterested in projects for disadvantaged kids; and second, it is a small group for lunch to get to know him better. And of course his new catbird seat certainly makes folks want to do that.

Let me know if you'd like to be included-we would be delighted to have you.

Hi Lorie,

God will bless you -- for your ongoing work with BoardSource. Just when you thought that it was over ...

Got the notice for the Sunday BoardSource meeting. I hadn't heard about the Rangel meeting for NY foundations. Is this one I should try to attend, is it closed, or should I do all that I can not to be invited. Just asking.

Confidential Memorandum

To:	President Gregory Williams, Dean Brett Silverstein
From:	Shelly Butler, Lisa Silverman
Date:	January 26, 2007
Re:	Briefing – Ford Foundation Meeting with Other Foundations

MEETING LOGISTICS:

Prospects:	Susan V. Berresford, President, Ford Foundation and all other attendees (see pages 4 & 5)
CCNY Attendees:	Congressman Charles Rangel, President Gregory Williams, Vice President Shelly Butler, Dean Brett Silverstein, Rosemary Weiss, Niamo Mu'id, Lisa Silverman
Date and Time:	Monday, January 29, 2007 12-2 PM
Location:	320 E. 43rd Street, between 1st and 2nd Avenues, 11th floor dining room
Contact:	212 573- Maureen Caruso (Berresford's asst)

OBJECTIVES:

1. Interest the foundation attendees in making substantial contributions to the Charles B. Rangel Center at The City College of New York. Focus on Congressman Rangel's vision to have a more diverse population of public servants that reflects the diversity in the United States, and the unique factors at City College that makes this the place to train such future leaders.

2. Invite the foundations represented to play a key role in the development of the Rangel Center, particularly in funding the program area. The program area of the Rangel Center budget is just over $1 million per year, $23 million (endowed).

   - Only if either David Rockefeller or Donald Trump attends, discuss the opportunities to renovate the building. Otherwise focus on programming, students, internships, fellowships, etc.

   - The foundations represented do not fund building or endowments. Most of them support only specific projects. The Heron foundation may be willing to consider general support.

3. Gauge interest level and answer questions.

4. Set the stage to schedule individual meetings with each foundation afterwards.

EXHIBIT
Exhibit 371

COS.CCNY.144

CSOC.CBR.00010292

SPEAKING POINTS - RECOMMENDATIONS

Allison Bernstein, from the Ford Foundation requested that Congressman Rangel speaks for 10 minutes, followed by President Williams for 10 minutes and then a Q&A session:

1. **Congressman Rangel will introduce the Rangel Center by talking about:**
   - **Why is This Important? Vision to have the face of government and public service represent the diverse population in the United States.**
   - **Why should it be at City College?**
   - **Include personal story where relevant**

2. President Williams:
   - Two Degree Programs
     1. The Master's Program in Public Service, which will offer interdisciplinary specialization with CCNY Schools of Architecture, Engineering, Education, and Biomedical Education.
     2. Combined BA/MA Program in Public Service – fast track program with high-level coursework, experienced government personnel mentors, and hands-on training in internships and service learning.
   - Charles B. Rangel Fellows: A Mid-Career Program in Leadership and Policy Innovation, offering professional advancement training for mid-career, minority government and other public service employees of particular accomplishment and promise for a term of study ranging form eight weeks to an academic year.
   - The Rangel Center will be housed in a magnificent Harlem limestone townhouse adjacent to The City College campus.
   - The Charles B. Rangel Library – consisting of documents, archives and memorabilia from Congressman Rangel's lifetime of public service. These papers will be made available to scholars nationally and particularly to scholars within The City College and CUNY. It will serve as a focus of research and conferences concerning barriers to full participation in public service by underserved minorities.

"Why City College?"
- For 160 years, The College has provided access to a world-class education to students from underrepresented populations, preparing them to shape the world.
- City College's diverse population. Ranked number one in diversity with Hispanic-Americans as the largest group in 2006, ranked number one in diversity with African-Americans as the largest group in 2003. Four existing programs that will complement The Rangel Center
  1. The Rosenberg-Humphrey Program in Public Policy – summer internships in Washington DC and New York in government agencies, executive and Congressional offices and committees, labor unions, advocacy groups and research organizations.
  2. The International Studies Program at City College – in service learning internships in Rwanda and study abroad programs in China, Morocco, the United Kingdom and Germany.
  3. The Pre-Law Program – lecture series in law and public policy, panel discussions, colloquia, and legal internships.

3. Potential Questions and Answers (only if asked):

Q. What is the timeline for fund-raising?
A. There are two phases of the fundraising campaign for the Rangel Center. The first phase consists of cementing the public/private partnership that Congress requires for such projects as these. This includes securing commitments from individual, foundation and corporate supporters. The second phase, scheduled for 2008, consists of Congressman Rangel submitting a bill to Congress for seed money. Obviously, there will be overlap in the phases, as we will begin the second phase before the first phase is completed.

Q. Financial commitments...who, how much?
A.

$1 million from Gene Isenberg (½ indiv, ½ from Nabors Industries)
$400k from a foundation for student scholarships, internships in public service
$400k Congressional appropriation
$25k from a foundation

Pending proposals include:
$5 million for building from a corporation
$2.5 million matching grant upon receipt of corporate $5 million gift
$500k from corporate foundation

Q. What is your budget?
A. The annual program budget for the Rangel Center is just over $1 million. We are simultaneously raising funds to solidify the annual program and build the endowment.

Q. What would you like from the group of us here today?
A. We deeply appreciate Susan and her staff hosting everyone here today and that all of you joined us. Thank you for allowing us the opportunity to share with you both the vision and some of the plans for the Rangel Center. Going forward, we would like to set up one-on-one meetings with each of you to discuss areas of interest within the Center.

Q. What is the timeline for the Center?
A. The master's program will start with its first student body in Fall 2007

Q. What is the timeline for the Center construction?
A. Estimated Starting Date – Fall 2007 Build-out date - Spring 2007
Date it becomes operational - Fall 2008

Q. What are the contingency plans if construction is delayed?
A. Our plans call for an opening in fall of 2008 and the entire construction should take no more than six-nine months, which should leave ample time for extenuating circumstances.

BACKGROUND

Confirmed Attendees

	Name	Foundation	CCNY History	Interest Areas
1.	Lorie Slutsky	New York Community Trust	$250 contribution to '06 gala in honor of Sy Sternberg	• Children, Youth, and Families • Community Development and the Environment • Education, Arts, and the Humanities • Health and People with Special Needs • Almost never makes grants for endowment, building, or general operation
2.	Karen Rosa	Altman Foundation	1st meeting	• NYC • System-wide improvement • Preventive and early intervention • Self-sufficiency, high-quality services • Vulnerable populations • Does not fund bricks and mortar
3.	Susan Sullivan	Verizon Foundation	• Shelly is cultivating and solicited • Fund annual engineering scholarships	Pending $500k proposal for Rangel/CWE advancing technological training
4.	Sandy Wilson			
5.	Nancy Laing	Carroll and Milton Petrie Fdn	Have endowed past gifts to CCNY and CUNY	
6.	Sharon B. King	F.B. Heron Foundation	1st meeting	• Wealth creation strategies for low-income families • No endowments or construction • Does general support for mission related work
7.	Darren Walker	Rockefeller Foundation	President Williams met with Dr. Judith Rodin, President, Rockefeller Foundation in 2005	Global health, agricultural productivity, innovation for development, economic resilience and urban life. No endowments
8.	Robert M. Morgenthau	District Attorney – NY County	Brought Gene Isenberg to table for $1 million gift to Rangel Center

2. Al Beckett, Assistant to CR
3. President Gregory H. Williams
4. VP Shelly Butler
5. Dr. Brett Silverstein, Dean of Social Science
6. Rosemary Weiss, Executive Director, Development
7. Niamo Mu'id, Director of Development
8. Lisa Silverman, Managing Consultant to the Campaign for City College

Ford Foundation Background:

Assets:	Over $10 billion
Goals:	To strengthen democratic values, reduce poverty and injustice, promote international cooperation and advance human achievement
Funding areas:	Encourages initiatives by those living and working closest to where problems are located; promotes collaboration among the nonprofit, government, and business sectors; and assure participation by men and women from diverse communities. 1. Asset Building and Community Development 2. Education, Media, Arts, and Culture 3. Peace and Social Justice
History:	Started in 1936 by Henry Ford. No connection to the Ford Motor Company today.
Grants:	More than $12 billion in past grants and loans, about 40% of that abroad. Makes about $500 million in grants each year. Awarded $34.7 million to institutions of higher learning in the US in 2003.
Offices:	12 offices provide support in 35 countries. Headquarters are in New York.

Susan Berresford (from Forbes):
Susan Berresford, 63, led the Ford Foundation's recent launch of TrustAfrica, a $30 million initiative that will target violence, discrimination and economic isolation in Africa. TrustAfrica took five years to develop and is part of Berresford's efforts to help build local philanthropies around the globe. President of the renowned $11.6 billion foundation since 1996, as well as the president of its board,

Berresford oversaw last year's investment of more than $100 million in third-world countries and took the lead in 2006 to condemn academic boycotts internationally. She was ranked # 77 in the 2006 — Forbes listing of most powerful women.

SUSAN V. BERRESFORD
PRESIDENT

January 30, 2007

The Honorable Charles B. Rangel
United States House of Representatives
163 West 125th Street, Suite #737
New York, NY 10027

Dear Congressman Rangel,

We all enjoyed being with you yesterday at the Ford Foundation and hearing plans for the Rangel Center on Public Service. As you heard, many in the room have personal ties to City College and its great history and promise. They believe the Rangel Center will help many young people find rewarding careers serving the public as you have done so effectively.

I am pleased that Ford will be an early donor to the Center and look forward to working with you on its launch.

Sincerely,

Susan V. Berresford

Subject: Rangel Center

Alison and Greg -

I know this is a priority grant so please give me some guidance on how much assistance I should give them in submitting in the proper format.

City College will need to submit additional technical information and reformat a few things for the grant to proceed. For one, they don't have an official cover letter for their request.

Should I send them the vector III budget requirements? They technically don't have to fill this out because their grant was originally submitted in November, but it would probably be a good idea and they are going to have to reformat their budget anyway.

Thanks,

Garret

Dear Ms. Berrefrod:

Thank you for your kind note dated January 30.

I thoroughly enjoyed sharing with you and your colleagues in philanthropy my vision for the Rangel Center on Public Service. I am so pleased you see why I believe City College is the perfect institution for the Center.

Thank you for hosting such a lovely luncheon and thank you for your continued support. Together, with teamwork and vision, we will be able to have the Center be the pillar of continuing education for future generations.

Sincerely,

Charles B. Rangel

CONGRESSMAN CHARLES B. RANGEL

Now beginning his 19th term as U.S. Congressman from New York's 15th Congressional District, Congressman Rangel has combined a dedication to the specific needs of his Harlem and Washington Heights constituency with an expansive viewpoint that has led him to leadership on a broad range of national and international issues in the House of Representatives. From Harlem to South Africa, from affordable housing to help for the unemployed, from tax legislation to international trade, his work is characterized by a fundamental commitment to equity, justice and inclusion.

The Chairman of the 2007 Congressional Committee on Ways and Means, Congressman Rangel has been a major voice for equity in the Internal Revenue Code and proposed tax legislation. As a Congressional advisor to the U.S. Trade Representative and a member of the President's Export Council, he has worked tirelessly to build consensus on international trade matters. In addition, he authored: the $5 billion Federal Empowerment Zone demonstration project to revitalize urban neighborhoods throughout America; the Low Income Housing Tax Credit, which helped finance 90% of the affordable housing built in the U.S. in the last 10 years; and the Work Opportunity Tax Credit, which has provided thousands of jobs for underprivileged young people, veterans, and ex-offenders.

As chairman of the Congressional Narcotics Abuse and Control Caucus, Congressman Rangel leads the nation's efforts to reduce the flow of drugs into the United States and to solve the nation's continuing drug abuse crisis.

He is a founding member and former chairman of the Congressional Black Caucus. He also served as chairman of the New York State Council of Black Elected Democrats and as a member of the House Judiciary Committee during the hearings on the articles of impeachment of President Richard Nixon.

Awarded the Purple Heart and Bronze Star for his service in the Korean War, Congressman Rangel has authored several pieces of legislation to benefit minority and women veterans, including a successful bill that established the Office of Minority Affairs within the Department of Veterans Affairs. In the area of foreign affairs, he played a vital role in ending the apartheid regime in South Africa and restoring the democratic government in Haiti.

Exhibit 377

CSOC.CBR.00011133

The Charles B. Rangel Center for Public Service at The City College of New York will strive to become a national center for the promotion of greater diversity in public service, consisting of five major elements:

The Charles B. Rangel Library, consisting of documents, archives, and memorabilia from Congressman Rangel's lifetime of public service. These papers will be made available to scholars nationally, and particularly to scholars within The City College and the City University, and will serve as a locus of sponsored research and conferences concerning barriers to full participation in public service by underserved minorities;

The Master's Program in Public Service, which will recruit and prepare young people for careers in government and public service. The program will include participation in internships in service organizations, arranged by the Rangel Center. It will also offer interdisciplinary specializations in concert with The City College Schools of Architecture, Engineering, Education, and Biomedical Education, plus CCNY's special programs in transportation, waste management, and urban public health;

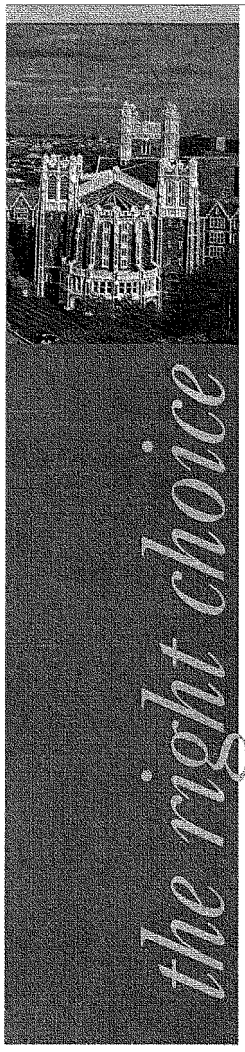
Upon completion of the degree, graduates will be eligible for programs like the Federal Career Intern Program, entering government service for a two-year temporary appointment with eligibility for a permanent assignment upon completion. These opportunities will encourage the involvement of members of underrepresented minority groups and those with financial need;

A Combined BA/MA Program in Public Service, which will work together with several undergraduate programs unique to City College that are particularly suited to draw outstanding students into public service. The BA/MA Program will attract students capable of and interested in an intensive "fast-track" program leading to the master's degree. It will prepare them for public service with high-level coursework, experienced government personnel mentors, and hands-on training in internships and service learning;

The Charles B. Rangel Center, which will be housed in a magnificent Harlem limestone townhouse adjacent to The City College campus, and include the Rangel Library, the Rangel Conference Center, and offices for visiting scholars;

The Charles B. Rangel Fellows: A Mid-Career Program in Leadership and Policy Innovation, offering professional advancement training for mid-career, minority government and other public service employees of particular accomplishment and promise for a term of study ranging from eight weeks to an academic year.

EXHIBIT
Exhibit 377



The City College of New York
The Choice for the Rangel Center

The City College of New York offers a unique and fitting environment for The Charles B. Rangel Center for Public Service. Located in Harlem, the heart of Congressman Rangel's constituency, The City College of New York was founded through a public referendum in 1847 as a free academy to serve "the children of the whole people." One of a young America's great democratic experiments, it remains one of her great democratic achievements, and the most important avenue to upward mobility and social advancement for generations of New Yorkers.

City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented young men and women with few material resources and opportunities. For 160 years, The College has provided access to a world-class education to underrepresented populations, preparing them to enter those fields with the expert skills to change their own futures and shape the world. The College has been located in Harlem since 1907; the Rangel Center heralds City College's centennary on this landmarked campus.

DIVERSITY AT CITY COLLEGE

City College is one of the most truly diverse campuses in America. More than 87% of CCNY students describe themselves as members of a minority group. Following a tradition that reflects the pattern of generations of CCNY alumni whose achievements became the model for their own families, City College students are often the first in their families to go to college, and most have very limited financial resources. Approximately 58% come from families with combined incomes of $30,000 or less; three-quarters work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial reasons.

2.

EXHIBIT
Exhibit 377

The Charles B. Rangel Library

Designed to hold the product of 50 years of public service by the major African-American statesman of the 20th and early 21st centuries, the Charles B. Rangel Library at The City College of New York will rank with the Clinton and Carter Libraries in historic importance to the government and academic communities.

The Rangel Library not only tells the story of one great man, but also of a nation's progress during the last half of the 20th century and the beginning of the 21st, including papers on the Watergate and impeachment proceedings. It will trace the nature of government, the growth and development of minorities in the United States, and the contributions of underrepresented populations in government and public service. It will not be frozen in time but rather the heart of a living, growing center -- a productive environment for emerging ideas, thoughtful advocacy, and visionary projects.

Serving simultaneously as a resource for scholars, CCNY students, and the greater New York community, the Charles B. Rangel Library will encourage study of and research in the wide-ranging fields of public service prominent in Congressman Rangel's long and varied career. In particular, the Charles B. Rangel Library will inspire new generations of students from under-represented populations to enter and excel in public service. The archives will be accessible to all interested scholars, but especially those who come to study at The Rangel Center.

The Rangel archivist/librarian will organize, index, and preserve for posterity all documents, photographs, and memorabilia relating to Congressman Rangel's career. This will be a full time position, which will be held by a Rangel post-doctoral Fellow, chosen through a national search. The archivist will provide assistance to other scholars, CCNY students, and the Harlem community, while pursuing his/her own research.

The Rangel Library could include such archive categories as: foreign policy, government, the economy, community and the family, New York City and its environs, the 15th Congressional District, and race and ethnicity. Visiting scholars from other cities, states, and nations will be welcomed and integrated into the life of the Center.

CSOC.CBR.00011136

the programs

THE MASTER'S & BA/MA PROGRAMS IN PUBLIC SERVICE

The Rangel Center for Public Service will prepare students, particularly from underserved and underrepresented populations, for careers as leaders in public service. At the heart of that effort is a curriculum that emphasizes a combination of classroom instruction, practical training, and opportunities for vibrant co-curricular interaction with the Rangel Leadership Fellows.

The program is designed to attract students at both the graduate and undergraduate levels. For undergraduates, a unique, seamless five-year BA/MA Program in Public Service will attract current CCNY students and new students who come to City College specifically to enroll in the Rangel Program.

For graduate students, the new Master's Program in Public Service will provide the capstone of conceptual and service learning needed for a career in public service. The MA Program's distinctive combination of classroom instruction, internships and intensive interaction with mid-career professionals will attract both recent college graduates and older students who are potential leaders in public service.

Both programs will benefit from the unique resources of The College's many schools and divisions, which may provide more focused attention in one area of public service. CCNY's Schools of Architecture, Engineering, Education, and Biomedical Education, plus its special programs in transportation, waste management, and urban public health, to name only a few, will be available to Rangel Center students for interdisciplinary concentrations in content areas and technical matters.

THE BA/MA PROGRAM

An integrated BA/MA degree program provides a vehicle to recruit excellent students into the Rangel Program by assuring them a seamless transition from undergraduate to graduate degrees with practical experience along the way.

Undergraduate education at the Rangel Center is designed primarily to secure student commitment to careers in public service. To provide a foundation for the MA program, and to recruit the best students, the program will expand existing undergraduate offerings in public policy, governance and management. Students interested in public service careers from non-social science fields (such as engineering, architecture, and science and technology) will be able to enroll in courses to prepare them to pursue the MA degree, while maintaining their technical emphasis

4.

EXHIBIT
Exhibit 377

CSOC.CBR.00011137

Many excellent undergraduate students interested in issues of public policy and equity will enroll in the 150-credit, five-year CCNY BA/MA Program in Public Service. Undergraduates in this program will begin to take master's-level seminars when they reach 90 credits; by their 120th credit, they must have completed 15 credits from the MA Program, and their courses will consist entirely of master's-level courses and service internships. (In most cases, the initial MA courses will be the required core courses.)

Engineering, science and architecture students will receive credit in the BA/MA program for courses in those fields, allowing them to move directly into associated policy courses. (See category III courses listed on the following page.) For these students, courses in categories I and III will most occupy their attention once they pass the 120-credit mark.

Thus it will be possible for a non-social science student at CCNY to complete the BA/MA in roughly the same amount of time it would take a social science major. In either event, students who complete 15 credits of BA/MA work within 120 undergraduate credits will begin working completely in MA courses thereafter. Students in the BA/MA program will have at least one service learning or internship experience during the course of the program.

The final three semesters in the BA/MA program will consist of seminar classes focusing on specific political and technical issues of important public policy concerns. Seminars, many of which will include service learning, will allow students to develop particular areas of expertise, both in policy questions and related technical matters. It is also at this level that the students are expected to have the most substantial interactions with the Center's Rangel Leadership Fellows.

THE MASTER'S PROGRAM IN PUBLIC SERVICE

College graduates will enroll directly in the 45-credit MA Program in Public Service without the BA component. This program will take two years of full time study, including a minimum of one semester of intensive internship work.

The stand-alone MA program is a 45-credit program (including the internship). As with the BA/MA Program, students are expected to concentrate on core courses at the outset, reserving their seminar courses in specific areas of policy or technical concern for their second and third semesters of study.

The curriculum for the both the programs in public service at The City College is found on the following page.

5.

CSOC.CBR.00011138

curriculum

STUDENTS IN BOTH THE BA/MA & THE MA PROGRAM WILL TAKE COURSES FROM EACH OF THE FOLLOWING CATEGORIES:

CATEGORY I

Core Courses – all students
(18 credits):

Introduction to Public Policy and Policy Analysis
Organizations and Management
Public Economics and Finance
Communication in Public Settings
Poverty, Ethnicity, and Diversity
Ethics in Public Service Leadership
Best Practices Seminar

CATEGORY II

Substantive policy concerns
(four classes for 12 credits):

Racism, Public Policy and the Law
Power, Inequality, and Social Welfare Policy
Immigration Policy
United States Foreign Policy
Healthcare Policy
Transportation and Communication Policy
Pollution and Environmental Policy
International Business Economic Policy

CATEGORY III

Courses that offer instruction in content areas and technical matters that lie at the heart of key policy concerns
(four classes for 12 credits):

Experts from CCNY's Schools of Engineering, Architecture and Education, and the departments of political science, sociology, etc., will teach these courses, designed specifically for those preparing for public service careers. Selection of these courses will be made with the agreement of an advisor in order to create thematic areas of specialization, such as Urban, International, Ethnicity, and Environment.

Examples include:
Urban Public Health
Environmental Engineering
Urban Public Transportation
Sociology of Immigration
Problems in Criminology
Psychology of Prejudice and Racism
International Law
International Organizations
Urban Schools in a Diverse Society
Urban Design
Sociology of Politics and Collective Behavior
Computer Security
Solid Waste Management
People of the City of New York

CATEGORY IV

Internships (may be taken in summer)
(3 or more credits)

6.

EXHIBIT
Exhibit 377

CSOC.CBR.00011139

the center

THE HOME OF THE CHARLES B. RANGEL CENTER

Originally conceived as The City College of New York's President's House and later used as the CCNY Alumni House, the limestone mansion on 141st Street and Convent Avenue harks back to City College's earliest days in the mid-1800s. A gracious four-story structure with a full below-sidewalk level and parking area, the stately townhouse features two and sometimes three tiled fireplaces on each floor, high ceilings, decorative plaster, fine woodwork throughout, and ornamental ironwork on every window and surrounding the building. It is particularly appropriate housing for The Rangel Center for Public Service as it includes space for confrences, seminar rooms, study areas, smart classrooms, reception rooms and computerized archives.

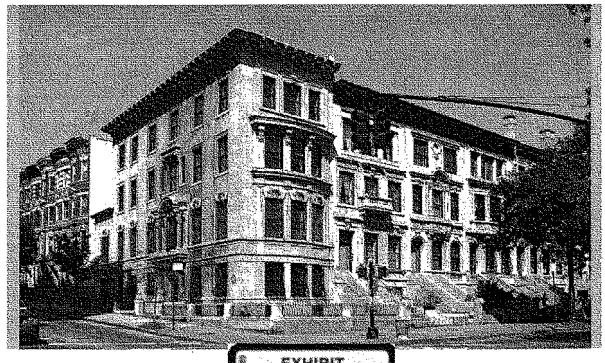
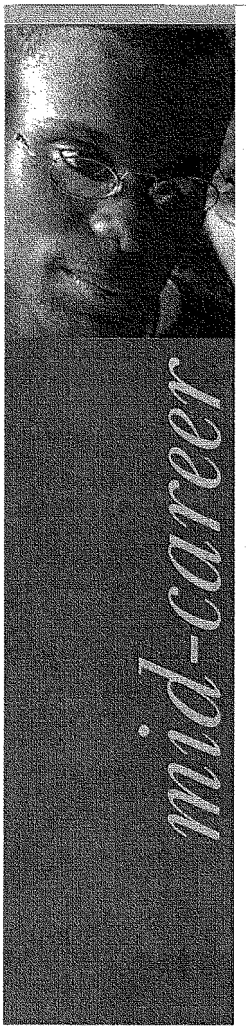


EXHIBIT
Exhibit 377

CSOC.CBR.00011140



THE RANGEL LEADERSHIP FELLOWS

A Mid-Career Program in Leadership and Policy Innovation

The Center will be the home of a unique program that brings together mid-career leaders in the public sector for seminars, workshops, and fellowship for periods that range from eight weeks to an entire academic year. These outstanding public servants will receive, in essence, a sabbatical from their leadership positions and will spend their time at CCNY considering new directions for public service leadership, policy innovation, and assistance to communities in need.

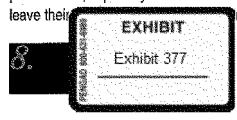
The Mid-Career Program will be targeted especially at outstanding leaders from communities underrepresented in public service. In addition to their work with one another, Rangel Leadership Fellows will be engaged in opportunities to teach and mentor Rangel participants in the BA/MA and MA Programs in Public Policy and Public Service. The mid-career participants become an essential resource for students, especially undergraduates, who are being prepared for careers in public service.

PROGRAM STRUCTURE

Recent studies suggest that the frustrations of public service lead too many government and other public sector leaders to leave these sectors early in their careers. A common complaint is that these leaders rarely have time to stop and think about where their organizations and the issues to which they are devoted are headed over the medium- and long-term. The day-to-day tasks of running organizations preclude taking the time to consider how other organizations do their work and what models exist for policy and leadership success.

In each case, a sponsoring organization will continue to provide the financial support for a Rangel Leadership Fellow. It will be considered an honor to participate and a reward for top performance, much like participation in an executive MBA program is considered in the business world, where employees are selected and sponsored by their companies.

The Rangel Center's Mid-Career Program in Leadership and Policy Innovation will permit leaders at the middle stage of their careers in the public sector, especially men and women from underrepresented groups, to leave their [illegible] place of their customary jobs,



8.

they will spend time with other leaders and members of the City College community and consider issues of leadership and public policy. The experience will provide participants with both the time to reflect and with the specialized education in specific policy areas that will contribute to their advancement within their respective institutions.

Participants will spend between eight weeks and a full academic year at the Rangel Center in individual programs of study and reflection under the mentorship of one of the Center's professors.

City College faculty will lead sessions with the Rangel Leadership Fellows about issues of public sector leadership and policy innovation. Each group of Fellows will work with a select group of Rangel students in Public Policy and Public Service on projects aimed at proposing ways of restructuring or reforming policy — or ways of delivering policy — in some issue area. These group projects provide an opportunity to involve Rangel BA/MA and MA students in the work of mid-career leaders — giving them first-hand knowledge of the potential of careers in public service.

RANGEL MID-CAREER LEADERSHIP FELLOWS

These Fellows will receive varying levels of support, depending on the workforce from which they are drawn. Almost all federal agencies already have mid-career training programs, which allow a limited number of employees to receive a one-year sabbatical and full salary for post-baccalaureate study at an institution of higher education.

The Rangel Center will reach out to human resources offices that oversee these programs in specific agencies to ensure that the Rangel Center becomes a premier destination for their employees, especially their mid-career leaders from underrepresented populations. The Rangel Center will provide each federal Rangel Leadership Fellow an individualized academic program tuition-free, and offer 10 $7,500 cost-of-living and travel packages, to ensure that mid-career employees who live outside New York City can take advantage of this important opportunity.

Each Rangel Leadership Fellow who works at the Center for at least one semester will each teach one seminar. Rangel Leadership Fellows will also participate in the Best Practices Seminar, along with guest speakers from academia, think tanks, the public sector, and community organizations. This seminar will focus on practical issues pertaining to careers in public service, including the art of building coalitions, techniques for communicating effectively to the public, lessons on making useful connections, and career issues particular to members of underrepresented populations. Finally, to maximize the e[illegible]s, students will evaluate them under the guidance of e[illegible]ip Fellows.

EXHIBIT
Exhibit 377

CSOC.CBR.00011142

March 15, 2007

Mr. Garret Batten
The Ford Foundation
320 East 43rd Street
New York, NY 10017

Dear Garret,

Attached are the revised budget and additional information requested.

Grant amount requested:	$1,000,000
Proposed grant term:	Four years @ $250k/year
Proposed start and end:	May 1, 2007-April 30, 2010

Proposal Narrative

Description of the project:

The proposed grant is to implement The City College of New York's new program in public service, leading to the Master's Degree in Public Service, and whose focal point will be the CCNY Charles B. Rangel Center for Public Service. The Center will prepare students, particularly from underserved and underrepresented populations, for careers as leaders in government and public service. The public service curriculum emphasizes a combination of classroom instruction, practical training through internships, mentoring by professionals in the field, and participation by visiting scholars. In addition, research in issues restricting full access to government and public service by underserved populations will be centered around the Rangel Archives and Library.

Proposed Activities:

Ford Foundation grant funds will be used to help provide support for:

- research fellowships in public service for doctoral and post-doctoral fellows;
- a post-doctoral fellowship for the Rangel Library;
- support for visiting scholars;
- master's level research assistantships;
- CCNY faculty fellowships for public service projects; and

- public service school-year and summer internships.

Results or Goals, both short and long-term:

The long-term goals of the project are to be a source of research to other centers and universities regarding issues related to public service participation of members of underrepresented groups and with the products of this research to encourage men and women from underrepresented populations to enter government and public service careers and seek leadership and management positions within those careers.

The short-term goals are to:

- focus research on analyses of the factors influencing achievement, political participation, and representation in government of members of underrepresented groups (African-Americans, Latino(a)s, Asian-Americans, women);
- focus research on analyses of programs, policies, and practices that are effective in increasing participation of members of these groups;
- foster interest in research in public service through undergraduate and graduate research assistantships;
- provide mentoring by current public service partners, a Visiting Scholar, and Mid-Career Rangel Fellows;
- establish effective career connections leading to job placements in government and public service upon graduation; and
- track how many graduates from underrepresented populations enter government and public service in both the short and long term.

Success Indicators:

The indicators would include:

- publications of research,
- reports put out by the center,
- presentations at scholarly conferences,
- conferences sponsored by the center,
- participation by students in all research activities, and
- symposia and colloquia sponsored by the Center.

CSOC.CBR.00011084

Grant Budget Model For Project

An annual budget of $250,000 for each of the four years details for which are included on the attached budget worksheet.

Currently, funding is as follows:

Rangel Center Fundraising

Confirmed	
Kheel Foundation Scholarships	$400,000
Transportation appropriation	$400,000
Congressional seed money	$3,000,000
Ford Foundation	$1,000,000
Private donor	$1,000,000
Rodobeck Foundatin	$25,000
Sub-Total	**$5,825,000**
Pending	
Verizon Foundation	$500,000
Corporate donor	$5,000,000
CUNY match	$2,500,000
Additional Congressional Appropriation anticipated	
Sub-Total	**$8,000,000**
Total confirmed and pending	**$13,825,000**

Proposed Payment Schedule:

Annually, with each installment paid on or before May 1st beginning May 1, 2007

Organizational Profile:

The City College of New York is the oldest and most distinguished of the City University's 23 colleges and is a mini-university itself, with separate schools of Liberal Arts and Science, Architecture, Engineering, Biomedical Education., and Education. Founded in 1847 to provide a no cost education to the children of the "whole people," it still fulfills that function today. With a comparatively low tuition, the City College remains one of the most diverse institutions in higher education in the nation, with more than 87% of CCNY students describe themselves as belonging to a minority group. Following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families, most City College students have very limited financial resources. Approximately 58% come from families with combined incomes of $30,000 or less; three-quarters work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial reasons.

The Charles B. Rangel Center at The City College of New York is being established to create opportunities for CCNY's diverse student population to achieve a graduate degree and move into government and public service at the policy- and decision-making levels. It is also providing a venue for mid-career professionals from underrepresented populations to return for a graduate degree to help advance their careers. Finally, Congressman Charles B. Rangel is gifting his papers to the Center's archives to offer scholars the prospect of research into the barriers preventing underrepresented minorities from entering government and public service.

The City College 21st Century Foundation:

The City College 21st Century Foundation is a 501c3 public charity established in 1997 to enable City College to receive gifts to The Campaign for The City College of New York. All gifts and non-governmental grants to CCNY are now being deposited into this fiscal entity. A copy of the organization's 501c3 IRS determination letter is attached. Currently, the City College 21st Century Foundation has $75 million in assets and provides $3 million toward CCNY's annual budget of $100,000,000. The Ford Foundation's grant would represent approximately 50% of the Ford project's annual budget and .25% of the institution's budget as a whole. The URL maintained by The City College of New York is the following: www.ccny.cuny.edu.

Diversity Information:

As the mission of the Rangel Center is to advance the numbers of individuals from populations that are underrepresented in government and public service, diversity is perhaps the Rangel Center's defining issue. Not only will the undergraduate and graduate students be drawn from a student body that has been ranked by US News as one of the most diverse in the nation, but also the Rangel Center's Mid-Career Program will bring in individuals from underrepresented populations who are already in public service. In addition, diversity issues will be the primary subject of scholarly research at the Rangel Center. In order to provide role models for CCNY students, the program will invite successful government and public servants from underrepresented populations to serve as visiting scholars. In addition, the faculty and staff who will serve on the Rangel Advisory Council will also reflect this diversity.

Because the new CCNY master's degree in public service will draw upon an already diverse group of candidates, ensuring diversity or increasing diversity is a non-issue.

The 15 board members of the City College 21st Century Foundation reflect some diversity in gender, race, ethnic background and culture. While volunteer members of the Advisory Council have not yet been selected, a diverse group of faculty members for the Rangel Center Advisory Council have been recruited as below:

	Under-represented(*)		Total	
	Female	Male	Female	Male
City College 21st Century Foundation Board	0	3	2	15
Rangel Center Advisory Council/professional staff	3	1	3	1
Support staff	1	1	1	1

Gregory H. Williams

President

Gregory H. Williams is the 11th president of The City College of New York, the flagship college of The City University of New York and one of the oldest public universities in the United States, established in1847. City College includes among its graduates nine Nobel Prize winners, former Secretary of State Colin Powell, Dr. Jonas Salk, and the founder of Intel, Andy Grove.

Since his arrival in August of 2001, President Williams' leadership has brought the College increased national recognition. In a single year, the College increased its enrollment by 15% - including an increase in new freshman, under new, more rigorous admissions standards, of 40%. These numbers add to a student body that, according to *US News and World Reports*, is tied for second as the most diverse college campus in the nation, at the same time that it produced a 2005 Rhodes Scholar, and includes the 2005 Intel Science Prize winner.

In addition, The City College moved from the third to the second tier among its peer institutions in the *U.S. News and World Reports*' 2003 issue of "America's Best Colleges," and ranks solidly in the first tier on such factors as academic reputation, faculty, and student selectivity. Under his leadership, the State of New York is investing more than a quarter of a billion dollars in new science facilities and a new home for the CCNY School of Architecture. President Williams is leading the first capital campaign in the College's history, and has already raised more than $160,000,000.

Dr. Williams has five earned degrees, including the J.D. and a Ph.D. from George Washington University, and he is the holder of three honorary doctorates. He has been a university administrator for over thirty years, holding a wide variety of posts at The George Washington University, The University of Iowa, and The Ohio State University. Immediately prior to assuming the presidency of The City College of New York, Dr. Williams served as Dean of the Law School and Carter C. Kissell Professor of Law, The Ohio State University. Early in his career Dr. Williams was a Deputy Sheriff, and later worked as an aide to a United States Senator.

Dr. Williams has published three books and a number of articles and book reviews for *The New York Times, The Los Angeles Times*, and The *Washington Post*. He is best known for his award-winning and best selling memoir, *Life on the Color Line: The True Story of a White Boy Who Discovered He Was Black*. As a result of his autobiography he has been featured on a number of national programs, including *Oprah, Dateline NBC with Tom Brokaw, Larry King Live, ABC's Nightline with Ted Koppel* and Fresh Air with Terri Gross of National Public Radio. In 1995, Life on the Color Line was selected as Book of the Year by the Los Angeles Times. In 1996 the Gustavus Myers Center for the Study of Human Rights in North America named *Life on the Color Line* an "Outstanding Book on the Subject of Human Rights," and it is often required reading for many entering students at the nation's colleges and universities.

EXHIBIT
Exhibit 378

CSOC.CBR.00011089

In 2004 Dr. Williams received the "Governor's Tribute to African-American Leaders of Excellence in State Service" from Governor George Pataki for his significant contributions to the people of New York. In 1999 he was named the first recipient of the National Bar Association's A. Leon Higginbotham, Jr. Award for Outstanding Contributions to the Preservation of Human and Civil Rights. Also in 1999 he was selected as "Dean of the Year" by the National Association of Public Interest Law. In 2006, he received the Austrian Cross of Honor in Science and Art, First Class.

President William Jefferson Clinton invited Dr. Williams to the White House in 1998 as part of his "Call to Action" to promote pro bono work and diversity in the legal profession. The Chair of the Commission on Human Resources and Social Change of the National Association of State Universities and Land-Grant Colleges. He is a past President of the Association of American Law Schools.

Rachelle Butler

Summary of Qualifications

More than 20 years of experience in not-for-profit and for-profit environments, with an emphasis on strong interpersonal, managerial and communications skills. Fifteen years in development, with leadership experience in capital campaigns, planned giving and major gifts.

Professional Experience

1/03-present **Vice President for Development & Institutional Advancement**
The City College of New York

- Working with the president, helped direct capital campaign, including increasing overall total from $45 million upon arrival to current total of $186 million;
- Assisted with a $26 million gift, largest ever to the college; raised largest corporate gift in CUNY of $10 million; first foundation gift of $3.6M, and many gifts over $1 million;
- Supervised full time staff of eight plus campaign consultant, four part time staff
- Integrated and focused all development and advancement functions;
- Trained and directed major gifts officers; they now each raise $1 million+ per year;
- Instituted annual fundraising gala grossing $1million+ for the president;

EXHIBIT
Exhibit 378

CSOC.CBR.00011094

- Professionalized scholarship and stewardship administration procedures;
- Increased foundation and corporation gifts into $1M+ range;
- Produced capital campaign case statement, upgraded office publications, proposals, and development PR materials to have distinctive brand and quality look;
- Instituted and produced many high quality cultivation and donor recognition events;
- Introduced first planned giving donor recognition society at CCNY;
- Upgraded Raiser's Edge database system and trained all staff;
- Worked closely with other development and alumni groups on campus and with CUNY;
- Worked closely with other vice presidents, deans, and chairs;
- Helped develop President's advisory board.

5/92-12/02: **Columbia University School Of Social Work**
Assistant Dean and Director, Development & Alumni Relations
Acting Director
Associate Director

- Worked with the dean on capital campaign to successfully raise $50 million;
- Personally raised $6M+ in individual gifts and pledges, including $3M for CUSSW's new building;
- Raised annuities, trusts and pooled income funds, including several at the $1 million+ level; plus bequests totaling $5 million;
- Wrote successful foundation and corporation grant proposals for $1M+, including 2nd Kresge Foundation grant awarded to Columbia University;
- Developed grass-roots scholarships for minority students with alumni committees;
- Introduced one of Columbia's first secure online giving sites on alumni Web site;
- Served as editor-in-chief and writer of *Alumni Newsletter* for 14,000 alumni;
- Worked with dean to develop long-term strategic plan for capital campaign;
- Planned and supervised fund-raising receptions, auctions and theater benefits;
- Planned and supervised donor recognition and cultivation events;
- Worked closely with dean's Advisory Council and Alumni Association leadership;
- Developed and supervised regional events, programs and services
- Planned and supervised implementation of programs and services for 14,000 alumni;
- Planned and implemented CUSSW alumni response to Sept. 11 tragedy;
- Worked with University Office of Public Affairs to increase school's prominence;
- Directed office of seven permanent and four rotating staffers in dual role of development and alumni relations; directed volunteer staff of 20 committees;
- Customized University alumni and development database for school use;
- Co-directed CUSSW Centennial Celebration for more than 900 participants;
- Produced all Centennial exhibits for Columbia University libraries and all publications;
- Directed Annual Fund: Solicited donors, designed mailing, telemarketing campaigns;
- Designed, implemented and supervised new gift processing procedures.

1980-1992: **Rory Butler Systems, Inc.**
Vice President

- Corresponded and interacted extensively with clients, government agencies and the public;
- Maintained records for all tax filings, employee payroll, accounts payable and receivable;
- Administered employee pension and medical plans;
- Evaluated potential consultants, developed resumes;
- Wrote informational materials for clients.

CSOC.CBR.00011095

1978-1980: Mendik Realty, Inc.
Commercial property manager

- Organized and supervised engineering and maintenance staff of more than 80;
- Worked closely with all tenants to ensure tenant satisfaction;
- Managed new building renovation and maintained building security;
- Monitored all ongoing facilities contracts.

Education

- Certificate, Computer Studies. Columbia University.
- MA, Music. Columbia University.
- BA, With Honors, French and English. UCLA.

Subject: rangel delays

Dear Greg,

There are several reasons for the delay with the grant for the Rangel Center. They all relate to the difficulty that City College's Development Office had in submitting a full and complete grant proposal. In order to get the grant proposal finished, I had to offer them assistance that is not normally extended to grantees and the foundation accepted a proposal that can only be characterized as weak (confirmed by more than one P.O.).

1) Their initial document did not meet most of the requirements for a grant proposal. In addition to being material weak, it lacked a cover letter, c.v.s, board information, diversity information, and information about what entity would actually receive the funds.

2) On 2/13, I contacted Shelly Butler, VP for Development & Institutional Advancement at City College, and explained that their initial submission would need to be revised to comply with foundation guidelines.

A revised proposal was not submitted by City College until 2/26.

3) Upon review of their 2/26 submission, it was discovered that they had still failed to follow the proposal checklist which had been supplied on 2/13. Their proposal again lacked a cover letter, c.v.s, board information, a proper diversity table and other required information.

4) In addition, the 2/26 submission was more of an addendum to their initial proposal than a complete proposal. They made no attempt to integrate the two (this is something that was overlooked in order to get the grant made).

The required information was finally received on 3/19.

Best,

Garret

RECOMMENDATION FOR PRESIDENTIAL-APPROVAL ORGANIZATIONAL GRANT

TO:	Susan V. Berresford
VIA:	Barron M. Tenny
FROM:	Janice Petrovich / Michael A. Edwards
PROGRAM:	KC & F / Education, Sexuality, Religion PSJ / Governance and Civil Society
RESPONSIBLE PROGRAM OFFICER:	Gregory Anderson / Thomasina Williams
	Approval Date:
GRANTS ADMINISTRATOR:	Monica Hilliard
	Request No.: 0104845
GRANTEE:	The City College 21st Century Foundation Inc
	Grant No.: NEW
	(40750) (NEW YORK, NY)
AMOUNT:	$1,000,000
TERM:	Four years beginning May 1, 2007
DESCRIPTION:	For support for undergraduate internships, research fellowships, and visiting scholars at The Charles B. Rangel Center of Public Service at The City College of New York
SOURCE OF FUNDS:	$1,000,000 from Appropriation 620 (Unit Reserve)
RESPONSIBLE COST CENTER:	(431) Education, Sexuality, Religion (422) Governance and Civil Society
FIELD:	(604) Education and Scholarship (KC & F) (722) Governance (PSJ)
INITIATIVES:	Opportunity Democracy and Diversity
GEOGRAPHIC AREA OF CONCERN:	(520) United States
TAX STATUS:	501(c)(3)
TAX CLASSIFICATION:	Publicly Supported - Section 509(a)(1)
ESTIMATED PAYMENT SCHEDULE:	4 Annual Installments from May 1, 2007

Grantee: The City College 21st Century Foundation; **Amount:** $1,000,000; **RPO:** Gregory Anderson

Grant Activities

Following the Civil Rights Movement and the introduction of affirmative action policies, positions in public service offered underrepresented minorities an important path to the middle class. Over the past two decades however, it has been increasingly more difficult to attract young people of color to careers in public service in the United States. The capacity of underserved populations to avail themselves of educational opportunities is restricted by financial necessity, which to a large degree accounts for the low representation of minority groups among the top echelon of managers, supervisors and policy experts in the federal government. In fact, while minorities make up nearly 30% of the U.S. population, they only occupy 13.8% of such high level government positions.

The recommended grant to The City College of New York would support research fellows (doctoral and post-doctoral) and visiting scholars at The Charles B. Rangel Center for Public Service (hereafter the center). The Ford Foundation has a rich history of working to improve access in higher education for low-income and/or minority students, including the Campus Diversity Initiative and other projects which have sought to enhance the development of leaders from underrepresented groups, both in the United States and abroad. This recommended grant would continue the foundation's tradition of enhancing access to higher education as well as deepening a longstanding commitment to public service.

These fellowships are part of an integrated curriculum created to offer a combined BA/MA program in public services and to prepare underserved groups for greater leadership roles at the federal level. This program will allow first year undergraduate students to pursue a five year (150 credit) joint BA/MA in Public Service. The program will offer advanced course work, mentors with a background in government service, professional development through internships and service learning. In addition, students will be given co-curricular opportunities to interact with the Rangel Mid-Career Fellows, who will be on temporary leave from public service careers. The integrated program should give students the skills, training, and mentoring opportunities they need to succeed at careers in public service. In addition, a 45 credit Master's program is also being created that will serve recent graduates as well as those with related work experience who wish to advance their skills and potential for leadership positions in public service.

The grant will facilitate the following:

- Fellowships for doctoral and post-doctoral research at the Rangel Center.
- Post-doctoral fellows to work with Congressman Charles B. Rangel's papers.
- Master's level assistantships.
- An annual senior Scholar-in-Residence to work with faculty and students.
- Public service internships for undergraduates.

Benchmarks include the successful development of integrated programs of study and training in order to nurture and educate future leaders and especially future leaders of color. Benchmarks also include the recruitment and retention of disadvantaged minority students at both the undergraduate and graduate level. The center should be able to demonstrate that the $5,000 undergraduate stipends furnished by the program will enable students to work at these stipends are awarded to qualified

students with the greatest financial need. Furthermore, another important benchmark involves generating evidence of the relevancy of these stipend positions for future employment in public service as the program matures over time. Finally, enrollment into a post graduation intern program for employment at the Federal level is both expected and necessary. The Foundation does not expect to provide future funding for this program.

Organizational Profile (www.ccny.cuny.edu)

The City College of New York (CCNY) is the oldest and one of the most distinguished of the City University's 23 colleges. The CCNY is a mini-university itself, with separate schools of Liberal Arts and Science, Architecture, Engineering, Biomedical Education., and Education. Founded in 1847 to provide a no cost education to the children of the "whole people," it still fulfills that function today. With a comparatively low tuition, the City College remains one of the most diverse institutions in higher education in the nation, with more than 87% of CCNY students describing themselves as belonging to a minority group. Following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families, most City College students have very limited financial resources. Indeed, approximately 58% come from families with combined incomes of $30,000 or less; three-quarters of the students work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial and familial reasons.

The City College 21st Century Foundation is a 501c3 public charity established in 1997 to enable City College to receive gifts to The Campaign for The City College of New York. Currently, the City College 21st Century Foundation has $75 million in assets and provides $3 million toward CCNY's annual budget of $100,000,000. The Ford Foundation's grant would represent approximately 50% of the Ford project's annual budget and .25% of the institution's budget as a whole.

Diversity Table and Interpretation

	Under-Represented		Total	
	Female	Male	Female	Male
CUNY Board of Trustees	4	1	9	16
City College 21st Century Board	0	3	2	15
Rangel Center Advisory Council/Professional staff	3	1	6	2
Support staff	1	1	2	2

While the advisory council and support staff show a good degree of diversity. The City College 21st Century Board lacks adequate female and minority representation. While the CUNY Board of Trustees shows better representation of both females and minorities, there is further room for improvement.

Estimated Budget

Salaries and Benefits (Visiting Scholar)	$300,000
Fellowships	$360,00
Assistantships and Internships	$340,00
Total	$1,000,000

House Committee on Ways and Means

Statement of Susan V. Berresford, President and CEO, The Ford Foundation, New York, New York

Testimony Before the Subcommittee on Oversight
of the House Committee on Ways and Means

September 25, 2007

Chairman Lewis and members of the Subcommittee, thank you very much for the opportunity to appear before you today. I am Susan Berresford, President and CEO of the Ford Foundation, an independent, nonprofit, nongovernmental organization. Ford's mission is to strengthen democratic values, reduce poverty and injustice, promote international cooperation and advance human achievement.

We commit approximately 75 percent of our US funding to the reduction of poverty and injustice. In the last fiscal year, this totaled nearly $220 million of our $300 million US allocation. We fund people and organizations tackling systemic injustice in education, employment, housing, asset accumulation and other areas. Since poverty disproportionately affects women, minorities, immigrants and rural communities, they are at the center of our work.

This year the Ford Foundation celebrates 70 years of delivering on a promise to improve lives and create opportunity. It has provided over $13 billion for grants, projects and loans. These funds derive from an investment portfolio that began with gifts and bequests of Ford Motor Company stock by Henry and Edsel Ford. The foundation operated as a local philanthropy in the state of Michigan until 1950, when it expanded to become a national and international foundation. The foundation no longer owns Ford Motor Company stock and has no formal ties to the company. Its diversified portfolio is managed to provide a perpetual source of support for the foundation's programs and operations which are headquartered in New York, with offices in Africa, Asia, Latin America, the Middle East and Russia.

I would like to begin by making a distinction between charity and strategic philanthropy. Philanthropy encompasses charity that provides resources to deal with immediate needs such as sheltering the homeless, feeding the hungry, healing the sick and other acts of basic generosity. Ford, for example, has made grants in the aftermath of natural disasters in the Gulf Coast region and we helped nonprofits in New York and Washington respond to the events of September 11.

But there is another kind of philanthropy, one that offers the prospect of curing, rather than simply alleviating, problems. It involves the strategic use of resources to search for new ideas that can address root causes. Both charitable and strategic philanthropy have been present in U.S. philanthropy for many decades, and both will always be needed.

Most of Ford's work is in the category of strategic philanthropy. We see our role as a resource for innovative people and institutions worldwide, providing risk capital for pilot programs, research, institution building and developmental activity. Strategic philanthropy recognizes that bringing innovations to scale requires partners such as government, business and civil society which have capacity and reach far beyond the abilities of any single philanthropic endeavor.

Before I outline some of the ways in which we serve diverse communities I would like to provide you with a sense of who makes up the leadership and staff of the foundation and how the Ford Foundation makes allocation decisions.

EXHIBIT
Exhibit 381

Diversity of Leadership

Ford's Trustees select the president, set policy and overall spending targets. They ensure that the foundation's policies are implemented effectively. The composition of Ford's board and staff reflects our intent to draw on diverse talent. Among our Trustees who are US citizens, 40 percent are minorities. Twenty three percent are citizens of other countries, primarily representing the regions in which we work. Sixty two percent of our Trustees are female. Our Trustees bring experience in business, nonprofit and governmental work. The next president of the foundation, Luis Ubiñas, will be the first Hispanic president in Ford's history. I was the first female president and my predecessor, Franklin Thomas, who served for 17 years, was the first African American president.

Today 46 percent of our professional US grant makers are minorities – up from 27 percent in 1996 when I became president. Fifty percent of all grant making staff are female. This diversity helps to ensure that we bring a variety of perspectives to our operations and grant making.

Allocation Decisions and Strategies

Our mission drives the programmatic and substantive nature of our work. The board and staff explore problems to which Ford resources can be applied, each bringing ideas to the table. Ultimately, the board approves the subject areas in which we work, the broad strategies in which we invest, and the allocation of funds to those topics and to our worldwide offices. The board delegates to the president the authority to approve grants from those allocations.

Program officers, our key grant makers, explore how foundation grants can have the greatest impact, supporting people with innovative and promising ideas. Program staff and grantees regularly report to the board on how strategies are working and board members travel each year to review program work on the ground in the US and overseas.

The strategies for which we seek board approval most often aim to alter or build systems and organizations that can deliver lasting benefits to disadvantaged people. We offer patient capital and partnership, often sticking with people and organizations for years as they refine and test ideas and build to scale and significance.

I would like to offer a few examples of Ford support for systemic change led by courageous men and women who share our values and aims. This work extends to both rural and urban America and represents efforts in a variety of areas, including education, economic opportunity, the arts, media, civil rights, and philanthropy.

Creating Access to Opportunity

People matter, so we try to ensure diversity in talent pools from which the US draws leadership in various domains. Since the early 1960's, Ford has supported the largest private fellowship program that fosters diversity in the American professoriate. Originally called the Ford Minority Fellows program, now the Ford Diversity Fellows Program, it has provided over $175 million for fellowships and related support for approximately 5,000 scholars from rural and urban areas, most of whom who now hold positions in academe. Fifty five percent are African American, 38 percent are Hispanic, and 6 percent are Native American. The program is run by the National Academy of Sciences, whose distinguished reputation lends prestige to the fellows' fine work.

In K-12 education, Ford has devoted more than $35 million to Project Grad, developed in Houston

schools under the civic leadership of Jim Kettleson, former Tenneco CEO. GRAD improves high school graduation rates and college-going in poor, urban communities. It has expanded from Houston to Los Angeles, Atlanta, Newark and other locations. Ford also invested heavily in research to determine how and where GRAD worked best. Our principal grantee was GRAD USA, led by a Hispanic educator.

Community colleges serve as a gateway to higher education among minority communities. More than 50 percent of Latinos and 40 percent of African Americans in higher education are enrolled in community colleges. Since 1996, we have provided over $33 million for these vital institutions. This support has focused on making them more accessible, improving the way students credits are transferred, keeping tuition low, and helping students, particularly students of color, stay in school and prepare to enter the workforce. In California, we've recently provided nearly $1 million to study how community colleges are serving diverse communities and to propose ways they can improve.

We have also provided $100 million to historically black colleges and universities (HBCUs). And we have supported the United Negro College Fund with grants totaling over $20 million since the early 1950s.

Developing Innovations that Improve Lives

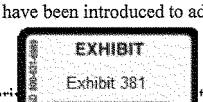
The foundation believes that giving people a fair chance to build assets is critical to breaking the cycle of poverty and dependence. Our grantees create an infrastructure of financial and workforce development services that reach poor, remote and marginalized communities that the market has served poorly.

In housing, Ford committed $50 million as a guarantee so Fannie Mae would purchase mortgage loans made to families with low income or low credit scores. Leveraging $4.3 billion from Fannie Mae, 50,000 new homeowners have been created, 44 percent of them minority families with 15 percent located in rural communities. Now in its sixth year, this 10 year initiative is demonstrating that it is possible to identify low-income families who pay their bills reliably and can support mortgages that build family assets. The program is changing banking practice in communities across the US. This idea came to Ford from the Center for Community Self-Help in North Carolina, a leader in innovation related to home ownership and prevention of predatory lending.

In rural America, manufactured housing accounts for two-thirds of all housing starts, yet it often fails to be the dependable asset most urban homes are. The foundation invests in a variety of rural initiatives that enable people to own the land their homes sit on and seek to improve the building standards for manufactured housing. One grantee, the New Hampshire Community Loan Fund, has received $8.4 million in grants and $5 million in loans for this asset-building work. With over $9 million in grants, the Corporation for Enterprise Development in Washington D.C. is working to improve building standards and financing mechanisms for manufactured-home owners.

One of the most innovative ideas to help low income families accumulate assets is the creation of Children's Saving Accounts. These accounts are seeded at birth by nonprofits and government and built up over time at key life intervals by contributions from families themselves and other donors. We support an ongoing national demonstration program in 11 urban and rural locations that includes 1,300 accounts, 78 percent of which are held by minority children. The accounts can be accessed only after age 18, building – through compound interest and deposits – assets that can then be applied to school fees, home down payments or other significant investments.

Since 2005, several legislative bills have been introduced to advance this idea. As we receive results of



the multi-year experiment it is sure to be a resource for longer-term policy innovation. It has already prompted the creation of the Child Trust Fund program in the United Kingdom. This program came to the Ford Foundation from The Corporation for Enterprise Development, and a professor at Washington University in St Louis.

Strengthening Urban and Rural Communities

Since the 1960s Ford has been committed to community development in distressed urban and rural communities. We support efforts to create healthy, safe and strong neighborhoods where people can access employment, education and essential services. Early investments gave rise to Community Development Corporations (CDC) formed by residents, small business owners, congregations and other local stakeholders. Today there are 4,600 CDCs operating across the country. Additionally, nearly $60 million has been invested in the creation of the Local Initiatives Support Corporation, or LISC, providing services to inner city residents. We also commit to long-term revitalization efforts in regions that are in economic transition and distress such as the Gulf Coast, Camden,, New Jersey and Detroit, Michigan.

Nearly $70 million has been invested in rural communities in recent years. With loans of $6.5 million, we support Southern Bancorp, the largest rural development bank in Arkansas and Mississippi to address the needs of the poor. In Maine, we provided $4 million in grants and $7.75 million in loans to help Coastal Enterprises develop the Portland Fish Pier, enabling fisherman and fishing co-ops to gain efficiency that makes them more competitive in domestic and international markets. We have supported the First Nations Development Institute with $11 million over the past 10 years to invest in economic development in Native areas.

Supporting Civil Rights

Ford has also been at the forefront with decades of funding for the legal advocacy organizations that have helped establish standards of fairness in our country. We have funded the NAACP Legal Defense and Educational Fund, Mexican American Legal Defense and Educational Fund, the Native American Rights Fund, the Puerto Rican Legal Defense and Education Fund and Asian American Legal Defense and Education Fund. Our support to these and other key civil rights organizations since the 1950s exceeds $265 million.

We support work in the area of voter registration and participation that also helps ensure that our diverse populations can be heard in public fora. Since the early 1980s over $13 million has been granted to support the Leadership Conference on Civil Rights Education Fund for these and other efforts. Ford also granted $3.2 million to the National Coalition on Black Civic Participation, a network of 80 membership organizations committed to increasing civic participation. They operate in 12 states, including California, Georgia, Ohio and Wisconsin. Support has also been extended to organizations such as Asian and Pacific Islander American Vote, Inc.

In southern rural areas, grassroots work on civil rights includes $6.5 million to lift black rural women out of persistent poverty. The Southern Rural Black Women's Initiative focuses resources on leadership and economic development, along with training to ensure women's full participation in economic, civic and social life. More than 1000 women are participating across Georgia, Alabama and Mississippi. In eight southern states, black land ownership has dropped from 19 million acres to 1.5 million acres over the last 70 years. A foundation initiative totaling over $2.3 million is focused on helping African American families retain, manage and add value to these natural assets.

CSOC.CBR.00025901

The foundation has also launched the Four Freedoms Fund, to support grassroots organizations working to promote civic, social, economic integration and civil rights for immigrant communities. We have invested nearly $10 million in this donor fund which has already provided support to over 65 organizations in 28 states.

Giving Voice to Diverse Cultural Expression

In a free society artistic and cultural expression contributes to our understanding of human experience. Over the last five years more than $20 million has supported minority-led arts organizations and projects. Ford helped found the Dance Theatre of Harlem and its community outreach programs, helping it to grow with nearly $7.7 million over the years. We are the nation's largest and most enduring private funder of Native American communities, with more than $80 million in support over the past 20 years. This includes a recent commitment of $13 million to establish a Native American Arts and Culture Fund. A recent grant to the National Association of Latino Arts will support the Fund for the Arts, a national grant program to benefit Latino artists and small to mid-size Latino arts organizations.

Over $9 million was granted to support the development of the memorable award-winning documentary "Eyes on the Prize," and recently we provided funds to renew copyrights to keep the series publicly available. In the last five years $12 million has gone to the support of minority filmmakers.

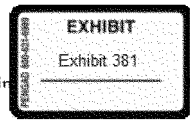
Recognizing the importance of a robust, diverse media to American democracy, the foundation has supported media initiatives that reflect and give voice to America's diverse communities, and that promote diversity in the newsroom. We support media outlets serving diverse populations, granting $3.3 million in the past two years to the growth of ethnic media. This includes New America Media, a network of 700 ethnic news organizations. In all we have committed $60 million over five years to spark innovation in public media, focused on diversifying sources of programming and reaching new audiences.

The last area I would like to touch upon is philanthropy itself. Ford has invested in strengthening the voice of minorities within philanthropy, providing more than $22 million in grants to professional associations and networks working to increase philanthropic support for minority communities and to expand minority leadership throughout philanthropy. Leading this effort are Hispanics in Philanthropy, Native Americans in Philanthropy, National Center on Black Philanthropy, the Association of Black Foundation Executives, Asia American/Pacific Islanders in Philanthropy, First Nations Development Institute and many others.

Ford's Enduring Commitment

I have had the privilege of working at the Ford Foundation for 38 of its 70 years. The Ford timeline you have received displays the many ways that Ford has dedicated resources to reduction of poverty and injustice, and other aims. I am proud that we have a diversity of grantee partners doing this work with us – partners from distinguished public agencies such as the National Academy of Sciences and nonprofit non-governmental groups like GRAD USA, the Center for Community Self-Help, the NAACP and MALDEF, to universities, academics, and leaders from American business. Only when all sectors of our society align resources for equality and fairness will we see lasting results.

Ford's board and staff are proud to be a resource for the idealistic social movements of our time and the innovative ideas of diverse people.



CSOC.CBR.00025902

I want to thank Chairman Lewis and the members of the Subcommittee for bringing attention to the contributions of foundations and other nonprofits to our American ideals and to struggles for equality among our diverse people.

CSOC.CBR.00025903

To: Bloom, Deborah; Mischiu, Rodica
Subject: FW: Charles Rangel

Deborah—Can we do a run of grants for 2005, 2006, and 2007 similar to what Lorie Slutsky did? I assume we can't do it for his Congressional District. In that case, what geographic area would you suggest? I'd like to have this on Wednesday if possible.

Rodica—Have we done grant runs before for Rangel?

Thanks. Buzz

From: Lorie Slutsky [redacted]
Sent: Monday, February 11, 2008 5:37 PM
To: Gunderson, Steve; Berresford, Susan; Tenny, Buzz
Cc: Emery, Rodney; Kies, Ken
Subject: RE: Charles Rangel

We did a quick run of grants made in the Congressman district for 2005, 2006, 2007, including those from donor-advised funds and the discretionary grant program. We supported 134 different organizations for a total of $13,355,945. We also supported the first class of Rangel fellows at the program Susan described at CCNY which I don't think is included in the above numbers. While there are substantial grants to Columbia (a bit over $2 million) the rest are to great Harlem organizations including Aaron Davis Hall, Abyssinian Development Corp, Apollo Theater, Cristo Rey New York HS, Dance Theater of Harlem, East Harlem Tutorial, Gay Men of African Descent, Harlem Academy, Harlem Children's Zone, and on and on. I can send the full list if you need it.
I should also note that the Congressman and his wife, Alma, set up a field of interest advised fund in NYCT in 1989 with about 15k. The fund supports community-based programs, principally in the Harlem community, that are serving minority youth, including scholarships and training programs. The fund has more than doubled from good investment performance.

Susan, Lorie and Buzz:

We're hoping you might be able to help us with a quick bit of information. As you know, Charles Rangel has not yet spoken to any national philanthropic organization since becoming Chair of the Ways and Means Committee. We have extended to him an invitation to speak at our mini-summit on "Philanthropy and the Economy" on Tuesday, May 6th as part of the larger Leadership Summit.

We have not been turned down. But we haven't yet had an acceptance either. So, we're about to put on a full-court press with his office – especially those who make the decisions about what invitations he might accept. In our recent meeting to develop our strategies, Ken Kies pointed out that it would be very helpful if we could have some knowledge of what philanthropy has done for the Congressman and his district. Knowing that both the Ford Foundation and the New York Comm[redacted]pful to him, we were wondering if any of you

EXHIBIT
Exhibit 382

could share with us a quick list of such items. We won't be giving it to anyone. Rather, we'll just use it as the background conversational information we need to make the case that he should accept our invitation.

(Now of course, if you or anyone you know is close to him and could also be helpful with making such a pitch, we welcome the help!)

Thanks for any information you can provide.

CHARLES B. RANGEL CENTER FOR PUBLIC SERVICE AT THE CITY COLLEGE OF NEW YORK

Ford Foundation
Grant Number: 107-0570

Created to promote diversity in the management ranks of the government and the non-profit sector, the Charles B. Rangel Center for Public Service at The City College of New York is working diligently to ensure that students in the Public Service Management (PSM) Program at The City College of New York have the resources, support—financial and academic, and the professional development experience—to succeed. Thanks in great part to the generous support of the Ford Foundation, The City College and the Rangel Center for Public Service launched a strong research and visiting scholar program that addresses the issue of promoting diversity in the public sector and continues to expand the academic opportunities for students enrolled in City College's PSM Program.

This year, through the generous support of individuals and foundations, all of the graduate students in the PSM Program received stipends to assist with tuition costs as well as research assistantships. In addition, students taking internship assignments in Washington, DC received internship stipends and temporary housing stipends.

Following is information on the major developments over the past year at the Center.

MAJOR DEVELOPMENTS

The Charles B. Rangel Center strives to serve as an important source of information, research, and analysis on the topic of promoting the involvement of under-served individuals in the leadership of the public service.

Research Efforts Well Advanced

The current effort is under the direction of visiting scholar Dr. Geva-May who was recruited to the Center in 2007. Professor Geva-May is also Chair of the International Comparative Policy Analysis Forum and founding editor-in-chief of the *Journal of Comparative Policy Analysis*, which is sponsoring the comparative aspects of ongoing work. She is joined in her efforts by Meghna Sabharwal, a Post Doctoral Fellow, and Shawn Drake, a PhD candidate and research fellow.

Center research continues through surveys and data analysis examining:

- The level of enrollment in graduate programs of public service, public policy, and public administration of students from populations currently underrepresented at the managerial and executive levels of public service.
- The procedures found by these programs to be effective in recruiting and graduating students from such populations.
- The degree to which policy and public administration instruction in schools of public policy and administration include core topics addressing the skills and knowledge base required to advance minority representation in the leadership ranks of public service.

In addition, Rangel Center staff completed a number of studies, some of which were presented at major national conferences and all which are available on the Rangel Center Web Site. The major titles are listed below:

Directory of College and University Research Centers Dealing With Issues of Diversity
Author: Iris Geva-May

The Categorization of Minority Groups in Academic Science and Engineering

Major Conference Planned

The Rangel Center is currently planning the Center's first major conference here at the City College of New York. Scheduled for October 29-30, the conference is titled "*Public Service Education, Underserved Populations and the Future of the Federal Workforce.*" The symposium will bring together practitioners and academics to review current practices and discuss future efforts to improve the representation of underserved groups in the federal civil service.

The program includes presentations by Nancy Kichak, the Associate Director of the US Office of Personnel Management, and Professor Michael O'Hare, of the University of California, Berkeley. The Rangel Center will also present the results of the Ford-sponsored first-of-its-kind survey of schools of public administration and public affairs and their practices regarding educating members of underserved groups.

The Rangel Center has secured a commitment to attend from top-level federal officials and national academic experts.

The C. V. Starr Library — no activity here yet.

Still under construction, the Charles B. Rangel Center will also house the C. V. Starr Library, which will be the locus of sponsored research and conferences concerning barriers to full participation in public service by underserved minorities. The Library will be an archive of important documents pertaining to the public service careers of members of groups underrepresented in public service, beginning with the papers of Congressman Rangel. Beyond the wealth of information that will come from housing the product of a lifetime of public service, the C. V. Starr will trace the nature of government, the growth and development of minorities in the United States, and the contributions of underrepresented populations in government and public service.

Serving as a an important research tool for CCNY students *and* the greater New York community, the C. V. Starr Library will encourage study of and research in the wide-ranging fields of public service prominent in Congressman Rangel's long and varied career. In particular, the Library will inspire new generations of students from underrepresented populations to enter and excel in public service.

A Rangel archivist/librarian will organize, index, and preserve for posterity, documents, photographs, and memorabilia relating to Congressman Rangel's career. The position of archivist/librarian will be held by a Rangel Post-Doctoral Fellow, selected following a national search. The archivist will provide assistance to visiting scholars, CCNY students, and the Harlem community, while pursuing her/his own research.

Visiting scholars from other cities, states, and nations will be welcomed and integrated into the life of the Center.

Exhibit 384

Website Upgraded

Our website is one of the major tools we use to disseminate information on our research and other efforts. We will shortly launch a re-vamped site that is more user friendly, and better reflects the current efforts of the Rangel Center. The site can be viewed at http://www1.ccny.cuny.edu/ci/rangel/index.cfm.

Internship Program Expanded

The Rangel Center believes providing public service internships at CCNY is a method of inspiring a wide-range of students to consider careers in the public sector. The Rangel Center continues to coordinate public service internships under:

- ***The Ann S. Kheel Scholars Program in Community Service***

  Established in 2005, provides support for City College students from every school and division of the College who face financial pressures that prevent them from becoming more actively engaged in community service and activities, enabling them to develop their leadership skills and explore career options through community-service activities.

- ***The Rosenberg/Humphrey Internships in Public Policy***

  Open to undergraduates from all academic majors, the Program supports paid summer internships in New York City and Washington DC. Students must complete 400 hours of work in a public service organization and be on campus to take a 3-credit public policy course during the semester following the internship.

- ***The Josh and Judy Weston Public Service Scholarships***

  Josh and Judy Weston Public Service Scholarships support undergraduates who work while studying. The program pays students who commit to performing 400 hours per year of public service. The program is open to full-time sophomores, juniors, and seniors from all majors.

We have experienced overwhelming interest in these public service programs. Accordingly, this summer we launched a new Charles Rangel Public Service Internships Program that will allow us to provide even more opportunities to broaden student interest in public policy and public service.

All told, we will be providing assistance and internships to about 75 students. This summer alone, 11 students are participating in internships in Washington, DC.

PUBLIC SERVICE MANAGEMENT PROGRAM

The City College's graduate program in Public Service Management (PSM), supported by the Rangel Center, just completed its first academic year. Members of the inaugural class, many who might otherwise have been unable to pursue a graduate degree, were provided with tuition assistance and stipends. At the end of the first year, the Program graduated its first student and 17 others continue their studies.

This coming fall the second cohort of 24 students will begin their graduate studies in the PSM Program. Although we had anticipated the start of the BA/MPA program this fall, currently, the program only covers graduate students. Recently, we started a new internship program for undergraduates. The new program will be part of our recruitment efforts with the goal of encouraging students who will be inspired by their experience and consider entering the PSM program for their graduate studies.

The master's degree in public administration has long served as the entry ticket for individuals interested in management level jobs in public service. Consistent with our goal of recruiting a diverse group of students, we have, for the second year, admitted a student body that in terms of diversity is significantly above national norms. Their participation furthers the Rangel Center's goal of promoting the representation of the underserved in public service.

Following are brief profiles of just a few members of the inaugural class of MPA students in the Public Services Management Program.

***Deryck Barker**, BS, Psychology*

Deryck earned his Bachelor of Science degree from Utica College in 2002. He has spent several years working for New York State in rehabilitation services, drug treatment, and alcohol and substance abuse prevention. Deryck attended fulltime his first semester and reduced to three-quarter time in the spring. He is doing well and remains on track to graduate in 2010.

***Jennifer Czirr**, BA, Sociology*

Jennifer graduated with honors from Hunter College in 2007. She was captain of the Hunter College basketball team and won two CUNY basketball championships. She is now the Assistant Women's Basketball Coach at City College. She excelled in her first year in the PSM Program and plans to specialize in social policy.

***Reuben Quansah**, BA, Sociology*

Reuben graduated with a Regents diploma from Cardinal Hayes High School in the Bronx. Following that, he attended Bucknell University where he earned his bachelor's degree in sociology. He spent semester breaks working with media affiliated institutions such as HarlemLIVE, Bloomberg Financial, and the Charlie Rose Show. Presented the opportunity, Rueben makes the best of the "now" while planning for the future. With 32 credits toward his MPA degree, he will be one of the Program's first graduates.

***Jamillah Richards**, BA, Sociology*

Jamillah holds a Bachelor of Arts degree in psychology from City College. She has seven years of experience working in advertising and healthcare. After earning her MPA, she plans to continue her service in the health field.

***Juan Rosa**, BA, Political Science*

Juan received his Bachelor of Arts degree in political science from The City College of New York in 2008. Throughout his career at City College Juan worked as an after-school teacher in the Washington Heights area of Manhattan and the Highbridge section of the Bronx. Juan was one of three graduate students who spent this summer in Washington, DC as an intern. He worked in the office of Senator Gillibrand. Upon completion of his MPA, Juan is plans to begin the pursuit of a PhD in political science or sociology.

PLANS FOR THE COMING YEAR

The second class has been admitted to the Public Service Management Program. In only one year's time, we nearly doubled the number of applicants to the program. In terms of both the diversity of the student body and student retention rates, the program performed above both other CCNY programs and national standards.

With one year behind us, we have a better understanding of the content of each course and will use the knowledge to better coordinate tutoring efforts and provide our students with academic support they need to excel. Research efforts will continue as will the expansion of the C.V. Starr Library's collection.

This semester the core management course will be taught by Rona Affoumado, one of New York City's leading authorities on non-profit management and strategic planning. Patrick Lespinass will teach the core course on race, gender and inequality. Patrick is VP for governmental affairs at Verizon and has held many posts in and out of government, including one with Charlie Rangel's office. The new course on sustainability will be taught by Caroline Hermans, who is a research scientist working at CCNY's Environmental Cross-Roads Initiative.

We are close to finalizing the speaker series for fall. Kimberly Gamble-Payne of UNICEF New York will be speaking on international policies covering children. Kathy Ruffing of the National Center on Policy Priorities will be on campus to test students "Social Security IQ." Washington Post journalist and CCNY alumnus Terrence Samuel will be on campus to discuss media and its impact on the health care debate. Policy writing expert Carolyn Sherman will return to give a lecture on effective policy writing.

We have hired two new post doctoral researchers to advance to advance the Center's research efforts. Lamar Bennett has a PhD from American University and has done research on public program performance. Zach Oberfield has a PhD from the University of Wisconsin and has done research in the participation of minorities in political parties.

We look forward the October Conference and to completing the survey of schools of public administration and public affairs and their practices regarding educating members of underserved groups and announcing its findings.

Grant Financial Report

This is a protected worksheet. Complete only those sections that are shaded. See additional instructions below, indicated by corresponding number.

Organization: [1] City College 21st Century Foundation

Grant Number: [5] 1070/0570-0

Total received to date (US $): [7] 250,000

Grant Term: [2] 48 Months

Total Received to Date (local currency): [8]

Grant Start / End Dates: [3] 5/1/2007 to 4/30/2011

Report Period: [6] 5/1/2008 to 4/30/2009

Exchange rate (weighted average): 0
Local currency per US Dollar

Approved Grant Amount: [4] $1,000,000 (in US$)

Budget Category [9]	<A> Approved Ford Fdn Budget [10]	<B> Amount Spent in Previous Periods [11]	<C> Amount Spent in Current Period [12]	<D> = B + C Total Spent to Date	<E> = A - D Unexpended Balance	<F> Please explain significant budget variances where indicated [13]
Salaries and Benefits (Visiting Scholar)	$ 300,000	$ 24,738	$ 90,778	$ 115,516	$ 184,484	
Fellowships	$ 360,000				$ 360,000	
Assistantships and Internships	$ 340,000				$ 340,000	
	$ 1,000,000	$ 24,738	$ 90,778	$ 115,516	$ 884,484	

The line-by-line budget should match those specified in your proposal.
A red "*" indicates that you must include an explanation of the budget variance. This variance will require Foundation approval.
A yellow "‡" indicates that you must include an explanation of the budget variance.

By submission of this report you hereby certify that the individual submitting this report is authorized to submit it on behalf of your organization, that the organization is in compliance with the requirements of the grant letter, and that any funds expended have been expended in accordance with the purposes of the grant.

Grant Financial Report

Instructions

1. Enter the organization's legal name.
2. Enter the duration of the grant in the Grant Term field.
   2.A. Enter the number of periods in cell C6.
   2.B. Select the type of periods (months or years) in cell E6. When you click on the cell, a dropdown box will appear. Use this tool to make your selection.
3. Enter the approved start date of the grant. The end date will be calculated automatically. Check to make sure it is correct.
4. Enter the approved grant amount.
5. Enter your grant number as it appears on your Grant Notification Letter.
6. Enter the current reporting period from and to dates.
7. Enter the total amount of Ford Foundation funds received through the end of the reporting period. Specify amount in US$.
8. If you track funds in currency other than US$, enter the total amount of Ford Foundation funds received through the end of the reporting period specified in local currency.
   The weighted average exchange rate will be computed automatically. Check it for reasonableness. If you manage funds in US$, leave this field blank.
9. Enter Budget Categories as they appear on the grant budget in the Grant Notification Letter.
10. Enter the approved Ford Foundation budget for each budget category. All figures should be reported in US$.
11. Enter the sum of amounts spent in each budget category for all previous reporting periods. All figures should be reported in US$.
12. Enter the amount spent in each budget category for this reporting period. All figures should be reported in US$.
    The total spent to date and unexpended balances will be computed automatically.
13. If the expended amount in a budget category sigificantly exceeds its budget, an explanation is required. Lines requiring explanations will be indicated by a yellow "‡" or a red "*".
    A yellow "‡" indicates that the budget category was exceeded by the greater of 20% of the category's budget or $5,000.
    A red "*" indicates that the budget category was exceeded by the greater of 20% of the total grant budget or $50,000. This will require Foundation approval and your narrative report must include a request for a formal modification along with the justification.
14. Enter the name and title of the individual who certified the information contained in the report.
15. Enter the E-mail Address for that person.
16. Enter the Phone Number for that person.

New York, NY 10022

January 30, 2004

Congressman Charles B. Rangel
163 West 125th Street, Rm 737
New York, NY 10027

Dear Charlie:

Ann and I greatly valued our friendship with you and Alma. We also admired your readiness to help those in need. Ann was similarly motivated. In her memory, our family has decided to create an Ann S. Kheel Charitable Trust to support organizations in disadvantaged communities in New York and to fund the Trust with an initial contribution of a million dollars. We would be greatly honored if you agreed to be Chairman of the Board of Trustees.

We have also asked our long time friends Gabe Pressman, Veronica Kelly, Gail Sheehy and Luis Alvarez to serve with you as Trustees. They have readily agreed.

The Board of Trustees will have sole authority to decide how the money should be used to serve the Charitable Trust's purposes. Our eldest daughter,,Ellen Margaret, has volunteered to assist the Trustees at their pleasure on condition she does not receive more than a dollar a year for her services.

You are, of course, privileged to make such public mention of the Ann S. Kheel Charitable Trust as you believe will serve its best interests.

Sincerely,

Theodore W. Kheel

ANN S. KHEEL CHARITABLE TRUST

AGREEMENT OF TRUST, made as of the 12th day of February, 2004, between THEODORE W. KHEEL, of Bronx, New York, as Grantor (herein "the Grantor"), and CHARLES RANGEL, GABRIEL S. PRESSMAN, GAIL SHEEHY, VERONICA KELLY and LUIS ALVAREZ, as Trustees (herein collectively "the Trustees" and individually "the Trustee").

W I T N E S S E T H:

The Grantor hereby assigns, transfers and sets over to the Trustees the property described in Schedule "A" annexed hereto, receipt of which property the Trustees hereby acknowledge, to have and to hold the property IN TRUST, upon the following terms and conditions:

FIRST: The name of this trust shall be "ANN S. KHEEL CHARITABLE TRUST".

SECOND: This trust is created and shall be operated exclusively for scientific, charitable, religious, literary or educational purposes. All or part of the net income and principal of this trust may be paid (i) directly for the conduct of any of the charitable purposes of this trust (as defined below), (ii) to or for the use of any charitable organization (as defined below) or (iii) to the United States, any state or any political subdivision of the United States or any state (but only for public charitable purposes, as defined below), all in such amounts or proportions and at such time or times as the Trustees, in their discretion, deem advisable. Income or principal derived from

contributions by corporations shall be distributed by the Trustees for use solely within the United States or its possessions. No part of this trust or its assets or income shall inure or be payable to or for the benefit of the Grantor, any Trustee or any private individual, and no substantial part of the activities of this trust shall be the carrying on of propaganda or otherwise attempting to influence legislation, or the participation or intervention in any political campaign on behalf of any candidate for public office (including publishing or distributing statements). Notwithstanding anything to the contrary herein contained, this trust shall not conduct or carry on any activities not permitted to be conducted or carried on by any organization which is tax exempt under Section 501(c)(3) of the Internal Revenue Code of 1986, as amended (hereinafter the "Code"), or of any corresponding provision of any successor law, or by any organization to which donations are deductible under Section 170 of the Code.

THIRD: (A) References in this Agreement of Trust and in any amendments thereto to "charitable organization" or "charitable organizations" mean corporations, trusts, funds, foundations, or community chests created or organized in the United States or in any of its possessions, provided that all such organizations must be those which are operated exclusively for charitable purposes (as defined below) and which are entitled to exemption under Section 501(c)(3) of the Code. References to "charitable purposes" or "public charitable purposes" shall refer to charitable, educational, religious, scientific or literary purposes provided all such purposes shall be within the scope of Sections 170(c)(1) or (c)(2)(B) of the Code.

(B) The Trustees, in the disposition of the income or principal of the trust, should be guided by the following charitable purpose: the trust is established to provide financial assistance to charitable organizations that provide for New York's disadvantaged communities.

(C) It is the Grantor's intention that the Trustees shall, in the disposition of the income of the trust, be guided by the charitable purposes described in paragraph (B) above. The income of the trust should be expended wherever possible in furtherance of the purposes as hereinabove set forth. The principal of the trust should, to the extent possible, be held in perpetuity but may be expended, from time to time, together with the income, in furtherance of the purposes of the trust.

FOURTH: The Trustees may receive and accept property, whether real, personal, or mixed, by way of gift, bequest, or devise, from any person, firm, trust or corporation, to be held, administered, and disposed of in accordance with the provisions of this Agreement of Trust; but no such gift, bequest or devise shall be received and accepted if it be conditioned or limited in such manner as shall require the disposition of the income or principal thereof to any recipient to whom distributions could not be made as provided in Articles SECOND or THIRD hereof. All property received and accepted by the Trustees shall be administered and disposed in accordance with this Trust Agreement.

FIFTH: This trust is intended to qualify as a charitable trust and, notwithstanding any other provision of this Agreement of Trust, this trust is subject to the following provisions:

(A) The Trustees shall not engage in any act of self-dealing as defined in Section 4941(d) of the Code, nor make any taxable expenditures as defined in Section 4945(d) of the Code.

(B) The Trustees shall not retain any excess business holdings (as defined in Section 4943(c) of the Code) which would subject the trust to tax under Section 4943 of the Code, nor shall the Trustees acquire any assets which would subject the trust to tax under Section 4944 of the Code or retain any assets which would, if acquired by the Trustees, subject the trust to tax under Section 4944 of the Code.

(C) The Trustees shall distribute such amounts for each taxable year at such time and in such manner as not to subject the trust to tax under said Section 4942 of the Code.

SIXTH: This trust shall continue in perpetuity unless the Trustees terminate it and distribute all of the principal and income to charitable organizations, which action may be taken by the Trustees, in their discretion, at any time. On termination of this trust, the then remaining principal and any balance of net income of the trust shall be paid over and distributed to or for the use of such one or more charitable organizations (as

defined above), in such amounts and for such charitable purposes (as defined above), as the Trustees, in their discretion, shall then select and determine.

SEVENTH: (A) This Trust Agreement and the trust established hereunder are hereby declared to be irrevocable and this Trust Agreement may not be modified, amended or revoked in any way whatsoever, except as provided in paragraph (B) below.

(B) It is the Grantor's intention to create a trust conferring a charitable interest which qualifies for the federal gift and income tax charitable deductions and which trust qualifies as an entity exempt from federal income tax. Accordingly, the Grantor directs that all provisions of this Trust Agreement shall be construed in a manner consistent with, and the trust administered solely in conformity with Sections 170, 501(c)(3) and 2522 of the Code and with Regulations and rulings which from time to time may be promulgated thereunder. The Grantor hereby grants to the Trustees all of the administrative powers necessary to act in compliance with the requirements of the Code as in effect at this time and from time to time hereafter. Should any provision of this Trust Agreement be inconsistent or conflict with the Sections of the Code and the Regulations and rulings promulgated under such Sections, then such Sections, Regulations and rulings shall be deemed to override and supersede such inconsistent or conflicting provision. If such Sections, Regulations and rulings at any time require that charitable trusts to which the Sections, Regulations and rulings relate contain provisions which are not expressly set forth in this Trust Agreement, then such provisions are hereby incorporated by reference, and shall be deemed to be a part hereof to the same extent as

though they had been expressly set forth herein. If such Sections, Regulations and rulings at any time require that charitable trusts to which such Sections, Regulations and rulings relate contain provisions which are not expressly set forth herein, then notwithstanding paragraph (A) above, the Trustees are authorized to amend this Trust Agreement, by an instrument signed, acknowledged and filed with the trust records for the sole purpose of permitting this trust to qualify as a trust described in Sections 170, 501(c)(3) and 2522 of the Code; except that the definition of "charitable organization" shall not be changed.

EIGHTH: The Trustees, and any successor, shall have, with respect to any and all property held hereunder, the following powers, in addition to those conferred by law:

1. Subject to Section 4944 of the Code, to retain any such property and to receive, acquire, invest in and retain stocks, whether common or preferred, bonds, notes, mutual funds, securities, undivided interests in investment trusts, any common trust fund, and any property, real or personal, foreign or domestic, whether or not such property is a wasting or non-income producing asset, without any duty to diversify and without any restrictions placed upon fiduciaries by any present or future applicable law, rule of court or court decision.

2. To sell any such property at either public or private sale for cash or on credit, and/or to exchange any such property.

3. To participate in any plan of corporate reorganization, consolidation, merger or similar plan.

4. To exercise all conversion, subscription, voting and other rights of whatsoever nature pertaining to trust investments and to grant proxies, discretionary or otherwise.

5. To manage any real property held hereunder as if the absolute owner thereof, including the power to lease, or grant options to lease, for periods to begin presently or in the future, without regard to statutory restrictions or the probable duration

of any trust; to erect, demolish or alter buildings and improve and manage property; to make ordinary and extraordinary repairs; to grant easements and charges; to subdivide; to adjust boundary lines; to partition, mortgage and convey property.

6. Subject to Section 4941 of the Code, to borrow money for any purpose incidental to the administration of the trust hereunder, and to mortgage or pledge any securities or other property held hereunder as security therefor and no Trustee shall be personally liable, but any such loan shall be payable only out of assets of the trust created hereunder.

7. To purchase securities at a premium and to charge such premium against either principal or income, or partly against principal and partly against income.

8. To determine whether or to what extent receipts should be deemed income or principal, whether or to what extent expenditures should be charged against principal or income and what other adjustments should be made between principal and income.

9. To hold any securities or other property in any form or name, with or without disclosing the fiduciary relationship, and their liability shall not be increased thereby.

10. To compromise and settle any liabilities of the trust created hereunder, and any claims that the trust created hereunder shall have against others.

11. To execute and deliver any and all representations, warranties, indemnities and guarantees incidental to the administration of the trust or with respect to any stocks, securities or property, real or personal, at any time held in the trust, including, without limitation by the specification thereof, the power to execute and deliver representations, warranties, indemnities and guarantees of every and any nature whatsoever deemed advisable in connection with any public or private offering or sale of any securities at any time held in the trust.

12. Subject to Section 4941 of the Code, to engage and remunerate agents, including legal counsel, accountants, investment counsel, custodians, appraisers and other experts and to the extent permitted by law to establish discretionary investment accounts.

13. To insure with companies and against such hazards as is deemed advisable.

14. Severally to authorize, by instrument in writing, any person or corporation, including any co-fiduciary, bank or trust company, to act in the place of the Trustees with respect to specified transactions, to sign a particular check or checks, or to execute any other specifically stated instruments in the name of the Trustees.

NINTH: Persons dealing with the Trustees need not inquire as to the application of any money or property paid or delivered to the Trustees, nor inquire into the expediency or propriety of any action taken by the Trustees, or the authority of the Trustees to effect any transaction upon such terms as the Trustees decide.

TENTH: (A) A Trustee may resign at any time by an instrument in writing which shall specify the date as of which such resignation is to take effect and which shall be delivered or mailed, at least thirty (30) days prior to the date so specified, to the other Trustees and to the Grantor. The resigning Trustee shall be discharged from all further duty or obligation to act as Trustee under this Trust Agreement after the effective date of resignation, except the duty and obligation to execute all such instruments of transfer or conveyance as may be appropriate or necessary. The expenses of a resigning Trustee's accounting shall be a proper charge against the trust estate.

(B) (1) If a Trustee shall for any reason cease to act hereunder, other than pursuant to paragraph (D) below, the Grantor is authorized to appoint a successor Trustee.

(2) The Grantor, acting alone, may from time to time appoint one or more additional Trustees, which appointment shall take effect upon such appointee's written acceptance of the office of Trustee.

(C) Subject to the provisions of paragraph (B) above, each Trustee is authorized to appoint a successor Trustee to act in his or her place as Trustee upon his or

her death, resignation or disability. Such appointment hereunder shall be by an instrument in writing signed and acknowledged by the person making such appointment and filed with the Trustees then in office, or if none, with the successor Trustee or such appointment may be made by such person's Last Will and Testament duly admitted to probate by a court of competent jurisdiction. Any appointment of a successor Trustee pursuant to this paragraph (C) to take effect in the future may be revoked at any time prior to the happening of the event upon which such appointment is to take effect by his filing a subsequent designation in the manner hereinabove provided.

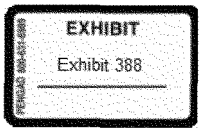
(D) (1) The Grantor, may at any time and from time to time, remove and replace any Trustee then in office with or without cause by an instrument in writing which shall specify the date as of which such removal is to take effect and which shall be delivered or mailed at least sixty (60) days prior to the date so specified, to the removed Trustee with a copy to any other Trustee acting hereunder. The successor Trustee shall be such person as designated by the Grantor within fourteen (14) days after notice of removal was delivered to the removed Trustee.

(2) The removed Trustee shall be discharged from all further duty or obligation to act as Trustee under this Trust Agreement after the effective date of removal, except the duty and obligation to execute all such instruments of transfer or conveyance as may be appropriate or necessary and deliver all trust property to the other Trustees.

(3) The expenses of a removed Trustee's accounting shall be a proper charge against the trust estate.

(E) Unless otherwise provided in this Article, any appointment, qualification or revocation hereunder shall be by an instrument in writing signed and acknowledged by the person or persons making such appointment, qualification or revocation and filed with the Trustees then in office or, if none, with the successor Trustee. Any appointment made pursuant to this provision of a successor Trustee to take effect in the future may be revoked at any time prior to the happening of the event upon which such appointment is to take place.

(F) Unless otherwise provided in this Article, the Trustees shall act by a vote of a majority of the Trustees then in office. Any instrument required to be executed by this trust shall be valid if executed in the name of this trust by a majority of the Trustees. All actions of the Trustees shall be taken either by resolution at a meeting or by written record without a meeting. The Trustees may appoint from among themselves a secretary who keeps a record of all actions of the Trustees. A copy of any resolution or action taken by the Trustees certified by any one of the Trustees may be relied upon by any person dealing with this trust. The Trustees may appoint an advisory board to investigate and report to the Trustees, provided that no member of the advisory board who is not serving as a Trustee shall vote on any action to be taken by the Trustees.



(G) No Trustee hereunder, whether named or successor, shall be required to give any bond or other security for the faithful performance of his or her duties in any jurisdiction in which he or she may be called upon to act.

ELEVENTH: This Trust Agreement, and the trust created hereunder, shall be construed, governed and regulated in all respects under the laws of the State of New York.

TWELFTH: This Trust Agreement shall become effective upon the execution thereof by the Grantor and any one Trustee.

IN WITNESS WHEREOF, the Grantor, THEODORE W. KHEEL, and the Trustees, CHARLES RANGEL, GABRIEL S. PRESSMAN, GAIL SHEEHY, VERONICA KELLY and LOUIS ALVAREZ, have hereunto set their hands and seals all as of the day and year first above written.

SCHEDULE A

To Agreement of Trust made as of the day of February, 2004 between THEODORE W. KHEEL, as Grantor, and CHARLES RANGEL, GABRIEL S. PRESSMAN, GAIL SHEEHY, VERONICA KELLY and LUIS ALVAREZ, as Trustees.

$100

NY55/343045.2

DRAFT

Ann S. Kheel Charitable Trust
Minutes of the Organizational Meeting
Carriage House
February 19, 2004

Present: Congressman Charles E. Rangel, Chairman, Luis Alvarez, Veronica Kelly, Trustees. Also present were Ted Kheel, Jake Kheel, Miranda McCloud representing Trustee Gail Sheehy, Ellen K. Jacobs, Executive Director. Trustee Gabe Pressman was unable to attend because of a television assignment he was required to fulfill.

1. Congressman Rangel called the meeting to order at 9:05 AM.

2. Ted Kheel reported that he had transferred on behalf of the Kheel Family, one million dollars consisting of $885,000 in United States Treasuries bearing an interest rate 6.5% and $115,000 in cash to the Ann S. Kheel Charitable Trust account at Deutsche Bank. He pointed out that the Trust would not be formally in existence until all Trustees had signed on and the Trust agreement was filed with the State of New York. An application would then be made to the U.S. Internal Revenue Service for tax exempt status. It is virtually certain the application will be granted. Contributions in advance would be approved retroactively when the application was granted.* Ted Kheel also explained that contributions to the Trust would be tax deductible to the donor.

3. It was agreed that the Trust would be for New York City residents only. It was suggested and agreed that the mission statement be modified to allow grants "up to $50,000," thus enabling the Trustees to make smaller grants at their discretion.

4. There was a discussion about raising additional funds. It was decided that a mention of the Trust would be inserted at the bottom of the program to be given out at Ann S. Kheel's memorial service.

5. Ted Kheel suggested that the Trust look to do something unique for disadvantaged neighborhoods given the relevant qualifications of the membership of the Board of Trustees.

6. Congressman Rangel suggested that an Ann S. Kheel Scholarship program be created for potential leaders in disadvantaged

communities. Veronica Kelly concurred, saying that it would be a living monument--a way to say "thank you Ann Kheel." It was also suggested that scholarships be awarded to students of the 19 colleges of the City University of New York (CUNY) virtually all of whose 400,000 students live in the City. Ted Kheel agreed to make contact with CUNY to discuss such a scholarship program.

7. It was suggested that the New York or National Urban League and and Alpha Kappa Alpha Sorority be contacted about working with the Trust to administer the Scholarship Program. Congressman Rangel agreed to make the contacts.

8. In response to a suggestion from Veronica Kelly about postponing any linkage between Christo and Jeanne-Claude's Gates Project for Central Park and the Ann S. Kheel Charitable Trust, Ted Kheel explained that there was no formal linkage, but simply an agreement to cooperate. The artists, he pointed out, had given the newly created not-for-profit foundation entitled Nurture New York's Nature, Inc. (NNYN) an exclusive, world-wide, royalty-free license to use their intellectual property on products and events commemorating and memorializing The Gates on condition that all net proceeds are used to benefit New York. He also explained that Gary Hattem of Deutsche Bank had suggested that NNYN support organizations in disadvantaged neighborhoods, precisely the mission of the Ann S. Kheel Charitable Trust. It was agreed, under those circumstances, that NNYN would cooperate with the Ann S. Kheel Charitable Trust in supporting organizations in disadvantaged neighborhoods.

9. Congressman Rangel also mentioned the gardens Bette Midler established in empty lots and the possibility of Ann S. Kheel Charitable Trust supporting such parks.

10. It was agreed that the next meeting of the Trust be held in March. Luis Alvarez, Vice-President of Deutsche Bank, agreed to arrange to have the meeting at the offices of Deutsche Bank on Wall Street.

Respectfully submitted,

Ellen K. Jacobs, Executive Director
February 23, 2004

056

Ann S. Kheel Charitable Trust

Minutes of April 7, 2004 meeting
at Deutsche Bank, 60 Wall Street

Present:
Congressman Charles B. Rangel, Chairman
Luis Alvarez-Vila and Veronica Kelly, Trustees.
Also present were:
Gary Hattem of Deutsche Bank
Ellen K. Jacobs, Executive Director
Theocore W. Kheel and Jake Kheel
Darwin M. Davis and Vie Kaufman of the New York and National Urban League attended for a presentation on the proposed Ann S. Kheel Urban League Scholarship.

Not present:
Trustees Gail Sheehy and Gabe Pressman.

1. Congressman Rangel called the meeting to order at 9:15 a.m.

2. Minutes of the last meeting were summarized by Congressman Rangel and approved.

3. Theodore Kheel reported that the Trust has earned $70,000 in interest and received over $15,000 in contributions, making it close to $1.1 million.

4. Gary Hattem was introduced to advise on the best way to spend the Trust's money.

5. There was a discussion of the Ann S. Kheel Urban League Scholarship, how it would work and its presentation at the 39th annual Frederick Douglass Awards Dinner on May 6. Someone from the Board will announce the scholarship at the Dinner--Theodore Kheel nominated Congressman Rangel.

057

6. The scholarship recipient will be chosen by the Urban League in accordance with guidelines set down by the Trust. The scholarship will be awarded yearly, but continue throughout the 4 college years so that ultimately there will be 4 concurrent scholarships. The Urban League will choose the student within the guidelines given and administer the scholarship.

7. Darwin Davis will send the Urban League scholarship guidelines to Congressman Rangel so they can be adapted for the Ann S. Kheel scholarship. The Urban League explained how it recruits for its scholarships.

8. Gary Hattem, who has worked in not-for-profits and now runs the Deutsche Bank Foundation, said there are 4 things to consider:

I. This is to honor the memory of Ann Kheel--consider her interests.

II. How much money do we want to give yearly.

III. The life-time of the Trust (how long will it take to spend the money). Possible time-frames suggested were 5 and 10 years.

IV. The importance of the board as far as its own individual and collective interests--its ability to mentor, fund-raise, and make connections for the Trust and the recipients.

9. Gary Hattem further pointed out that if the Board wants to reach the needy it can do so through community organizations, by endowing internships for people who want to remain and help the community--perhaps summer jobs. Organizations could be invited to compete and submit 2 page proposals ("request for proposals") . There could be an annual luncheon for the grantees and they could be brought into the offices of Board members as a broadening experience to see how that sector works. Individuals who get Trust grants (through the chosen organizations) should also be told that they need to become independent as the Trust will not be around forever.

10. Gary Hattem was asked to permanently advise the Trust and agreed. Robin Ince, his assistant, Luis Alvarez-Vila, and Gary Hattem will give Congressman Rangel a memo to circulate among the Board to help structure the Trust.

11. There was discussion about choosing intermediary organizations that would then identify the people to be helped, based on the Board's requirements, as well as discussion about how many scholarships to give. There was a concensus that proposals should be short.

12. Gary Hattem raised the question of whether the Board wants to target individuals or organizations. There was an interest in reaching individuals, especially through scholarships.

13. It was also suggested that for the first year the Trust give away limited money (only the Urban League Scholarship) while the Trust establishes its guidelines.

14. It was agreed that no other proposals would be funded until guidelines have been developed.

15. For this reason, it was agreed not to fund the CERC and CUNY proposals at this time.

16. In preparing guidelines for organizations to identify individuals, the Board is trying to convey the flavor of what it wants, perhaps with an introductory paragraph about Ann S. Kheel.

17. The next meeting will be on a Monday or Friday in June. In the interim Board members will consider memos from Gary Hattem and the Urban League.

Respectfully submitted

Ellen K. Jacobs

Ann S. Kheel Charitable Trust
Agenda for Meeting
September 20, 2004

1. **Approval of Minutes**
2. **Report on donations and bank account**
3. **Consider draft of guidelines suggested by Gary Hattem**
4. **Status of Urban League scholarships**
5. **Status of deferred proposals from CUNY and CERC**
6. **Other business**

060

Ann S. Kheel Charitable Trust
Minutes
September 20, 2004

Present
Congressman Charles B. rangel, Chairman
Veronica Kelly, Trustee
Luis Alvarez-Vila, Trustee by phone
Also present were
Gary Hattem and Robin Brady Ince of Deutsche Bank
Ellen K. Jacobs, Executive Director
Theodore W. Kheel

Absent: Trustees Gail Sheehy and Gabe Pressman

The minutes of the previous meeting were approved.

The Board agreed on the following:
1. The board will receive contributions, but not solicit contributions.
2. The Trust is to preserve the memory of Ann Kheel. This will be both through the scholarships and mentoring by the Trustees who are equipped to open doors, set examples and advise the Ann S. Kheel Scholarship holders. This will make the Ann S. Kheel Trust scholarships different from ordinary scholarships and memorable.
3. For planning purposes, it is assumed that the money in theTrust will last about 10 years (although its effect should be indefinite). Gary Hattem will recommend an amount to spend each year and the school(s) or organization(s) will let us know how many students can receive scholarships given that amount. It is hoped that the first of those schools will be CUNY and that the Urban League will also establish an Ann S. Kheel Scholarship(s).
4. Scholarships will be awarded for 4 years.
5. Robin Brady Ince will work out a preliminary plan for partnering with CUNY and the New York Urban League for presentation to the Board.
6. Once these two organizations are in place, the Board may consider establishing internships and summer jobs. Another possibility is an annual dinner where students get to know each other and the Board and possibly an outside dignitary.
7. The Board will establish criteria for the schools to use in choosing scholarship students. The organizations will select the students.

061

8. It was decided that the program is needs to be established before addressing when to award the scholarships.
9.It was decided that CERC is not the right program for the Trust. However, Ted Kheel suggested that Punta Cana could take an intern from the scholarship awardees and would absorb the cost.
10. The Trust is not restricted to scholarships and can be used for other things as well. Ellen Jacobs was asked to circulate the mission statement.

During discussion:
Luis Alvarez suggested that some of the money be targeted for younger students, perhaps at risk and perhaps through a program Deutsche Bank sponsors. He also liked the idea of using some of the money to help students pay off loans.
Veronica Kelly said she favored using the Trust for scholarships because they bring Ann's ideals to fruition. They carry her memory to another generation and plant a seed that can be carried on to future generations. She also endorsed the idea of helping at-risk High School students as suggested by Luis Alvarez.
Ted Kheel reported that the Trust is held by Deutsche Bank and initially consisted of $150,000 cash and 800,000 in 6% government bonds (Dad:Is this the correct amount?)
Congressman Rangel asked Luis Alvarez to report at the next meeting on how the Trust's money is being invested.
Congressman Rangel asked Ellen Jacobs to put together Ann Kheel's ideals for the Board to work with, as well as for inspiration for the students.
Ted Kheel suggested that the Board meet with the Urban League and CUNY to discuss how they can work together.
Congressman Rangel suggested that those meetings be held after the Board has decided what its role could be.
It was agreed that the next meeting will be in mid-November, a dinner at Ted Kheel's new apartment. At that time the partnering with CUNY and the New York Urban League will be considered.

Ellen K Jacobs, Exec. Director

This is to advise that the next breakfast meeting of the Board of Trustees has been scheduled for December 7, 2004 at 9:00 a.m. at 800 Fifth Avenue, Apt. 24F.

Also enclosed, for your records, are copies of the Mission Statement dated October 19, 2004 together with the Minutes of the last meeting on September 20.

066

MEMO

From: Ellen K. Jacobs
To: Trustees, Gary Hattem, Robin Ince, Ted Kheel
Date: October 19, 2004
Re: Mission statement for Trust and Ann S. Kheel's ideals (preliminary statement).

Mission Statement

The mission statement we agreed upon on February 19th at our organizational meeting was:

"The Ann S. Kheel Charitable Trust supports organizations dedicated to improving the lives of disadvantaged New Yorkers, with a particular focus on adult and child education, racial equality and the environment... Grants will be up to $50,000."

Ideals of Ann S. Kheel
Some of the ideals my mother lived by were expressed in John Donne's poem which she had framed:

No man is an island,
entire of itself; every man
is a piece of the continent,
a part of the main...
.
any man's death diminishes me,
because I am involved in mankind.

She also believed in excellence--do the best that you can.

Ann S. Kheel Charitable Trust
Minutes
September 20, 2004

Present
Congressman Charles B. Rangel, Chairman
Veronica Kelly, Trustee
Luis Alvarez-Vila, Trustee by phone
Also present were
Gary Hattem and Robin Brady Ince of Deutsche Bank
Ellen K. Jacobs, Executive Director
Theodore W. Kheel

Absent: Trustees Gail Sheehy and Gabe Pressman

The minutes of the previous meeting were approved.

The Board agreed on the following:

1. The Board will receive contributions, but not solicit contributions.

2. The Trust is to preserve the memory of Ann Kheel. This will be both through the scholarships and mentoring by the Trustees who are equipped to open doors, set examples and advise the Ann S. Kheel Scholarship holders. The Trust will be set up to take advantage of our unique board members in devising programs of help to disadvantaged neighborhoods. This will make the Ann S. Kheel Trust scholarships different from ordinary scholarships and memorable.

3. For planning purposes, it is assumed that the money in the Trust will last about 10 years (although its effect should be indefinite). Gary Hattem will recommend an amount to spend each year and the school(s) or organization(s) will let us know how many students can receive scholarships given that amount. It is hoped that the first of those schools will be CUNY and that the Urban League will also establish an Ann S. Kheel Scholarship(s).

4. Scholarships will be awarded for 4 years.

068

CSOC.CBR.00009641

5. Robin Brady Ince will work out a preliminary plan for partnering with CUNY and the New York Urban League for presentation to the Board.

6. Once these two organizations are in place, the Board may consider establishing internships and summer jobs. Another possibility is an annual dinner where students get to know each other and the Board and possibly an outside dignitary.

7. The Board will establish criteria for the schools to use in choosing scholarship students. The organizations will select the students.

8. It was decided that the program needs to be established before addressing when to award the scholarships.

9.It was decided that CERC is not the right program for the Trust. However, Ted Kheel suggested that Punta Cana could take an intern from the scholarship awardees and would absorb the cost.

10. The Trust is not restricted to scholarships and can be used for other things as well. Ellen Jacobs was asked to circulate the mission statement.

During discussion:

Luis Alvarez suggested that some of the money be targeted for younger students, perhaps at risk and perhaps through a program Deutsche Bank sponsors. He also liked the idea of using some of the money to help students pay off loans. Veronica Kelly said she favored using the Trust for scholarships because they bring Ann's ideals to fruition. They carry her memory to another generation and plant a seed that can be carried on to future generations. She also endorsed the idea of helping at-risk High School students as suggested by Luis Alvarez.

Ted Kheel reported that the Trust is held by Deutsche Bank and initially consisted of $885,000 in U.S. Treasuries bearing an interest rate of 6.5% and $115,000 in cash. There have been some donations since then.

2/

069

Congressman Rangel asked Luis Alvarez to report at the next meeting on how the Trust's money is being invested.
Congressman Rangel asked Ellen Jacobs to put together Ann Kheel's ideals for the Board to work with, as well as for inspiration for the students.

Ted Kheel suggested that the Board meet with the Urban League and CUNY to discuss how they can work together.
Congressman Rangel suggested that those meetings be held after the Board has decided what its role could be.
It was agreed that the next meeting will be in mid-November, a dinner at Ted Kheel's new apartment. At that time the partnering with CUNY and the New York Urban League will be considered.

Respectfully submitted,

Ellen Kheel Jacobs, Executive Director

MINUTES OF MEETING

Ann S. Kheel Trustees Meeting
Minutes 12/23/04

Present: Congressman Charles B. Rangel, chairman; Luis Alvarez; Gabe Pressman; Veronica Kelly, Trustees. Gary Hattem and Robin Ince from Deutsche Bank. Theodore Kheel; Ellen K. Jacobs, executive director.
Not present: Gail Sheehy

Minutes from the previous meeting were summarized by Congressman Rangel and approved.

The Hunter Proposal from the Public Service Scholar Program was discussed. This program allows women, minorities and immigrants to work in the not-for-profit or government sectors by giving them funds so they do not have to hold other jobs for a one-year period. A decision was needed so that Ms. Walsh could begin recruiting for the Fall program.

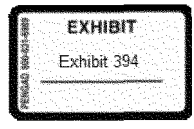
The trustees decided to award f $50,000 in each of two years (the second dependent on performance the first year) to fund 7 scholarships each year. The Trustees expressed a preference that the scholars to be juniors so they can be mentored in their senior year as well as when they are in the program. he trustees want the scholars identified as Ann S. Kheel Scholars.

The trustees are interested in learning the criteria used to choose the students and how the program is publicized.

Congressman Rangel expressed interest in an intern in New York.

Ellen will speak to Dr. Walsh about the trustees' requests.

There was interest in establishing Ann S. Kheel scholarships at the CUNY School for Professional Studies. The trustees need to know how much a four year scholarship costs to make an educated decision. Congressman Rangel will talk to CUNY and get some information about funding scholarships there. Ellen will distribute any written information.



071

It was decided to give $10,000 a year for 10 years to a promising student selected by the Urban League. The Board will periodically review the grant. The student(s) would be announced at the annual Urban League dinner. The scholarship would serve as a way of memorializing Ann S. Kheel. Congressman Rangel will speak to the Urban League about how this can be done. Ellen will distribute any written information.

Discussion of the Student Sponsor Partners program was postponed.

Veronica Kelly brought a proposal for $10,000 to help the Bowery Mission refurbish a new transitional house for women. The money was granted.

The meeting was adjourned.

December 30, 2004

Hon. Charles B. Rangel
Member, U.S. House of Representatives
163 West 125th Street
New York, New York 10027

Dear Congressman Rangel:

Thank you for your letter and the opportunity to submit a proposal to the Ann S. Kheel Charitable Trust to create the Ann S. Kheel Scholars Program at The City College of New York.

All of us at The City College are very excited about the opportunity this program would provide to our students. The College and the Trust share a common mission, to improve the lives of disadvantaged New Yorkers through education. Ann Kheel's life was dedicated to helping poverty-stricken members of our society, particularly minorities, rise up through education to become full participants in making our world a better place. From its inception, The City College has been providing the finest higher education to low-income New Yorkers, enabling them to become world-class scientists, engineers, writers, doctors, lawyers, and other leaders in society. It seems to me that there is no better way for the Trust to achieve its objective, and secure Ann Kheel's legacy, than through supporting needy students seeking a City College diploma.

I have spoken with Chancellor Goldstein and he approved in principle of the dedication of all of the proceeds of this grant to The City College.

I look forward to working with you on this and other endeavors. My best wishes for a happy New Year.

Sincerely,

Gregory H. Williams
President

Executive Summary

The Ann S. Kheel Scholars Program at The City College of New York (CCNY) will provide each of 48 needy students with a four-year scholarship of $5,000 per year to cover tuition, fees and books at CCNY. In addition, there would be up to four two-year scholarships for qualified transfer students. The Kheel Scholars Program will enable the 52 committed, needy students selected for the Kheel Scholarships to attend City College and complete their bachelor's degrees by reducing or eliminating the financial barriers to their success and also to engage in public service.

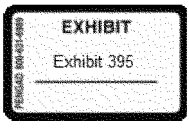
A Proud History and Mission – The Children of the Whole People

The City College of New York was founded in 1847 by Townsend Harris to offer higher education to the children of the working class and immigrants. The College has produced great scientists, captains of industry, public servants, teachers, doctors, lawyers, architects and engineers, opening doors for young men and women with few material resources and opportunities.

Today's City College is a microcosm of New York City, with one of the most diverse student bodies of any college in America. Its more than 12,000 students carry on a tradition of excellence as they win prestigious awards and fellowships, gain acceptance to leading graduate and professional schools, and make their marks in the sciences, in the arts, in public service, in industry, in education.

Access and Excellence

For 157 years, The City College of New York has symbolized the union of excellence and public higher education. The most important avenue to upward mobility and social advancement for generations of New Yorkers, City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented but needy students. With particular focus on meeting the needs of "the children of the whole people," The College provides unique opportunities for underrepresented populations to enter fields new to them with expert skills and education.



Diversity and Need

Many schools talk about diversity; City College lives it
Last year, *US News and World Report* ranked City College first in diversity in the nation, with African-Americans as the largest minority. This year, City College was ranked first with Hispanic-Americans as the largest minority. The 2004 issue of CCNY's *City Facts* states that in the voluntary section of the admissions application, 87% of CCNY students describe themselves as members of a minority group.

The *Chronicle of Higher Education 2003 Almanac* reports that nationally, within the category of bachelor's degrees earned at all colleges, White students earn 75% of the total, Blacks 8.5%, Hispanics 6.5%, and Asian-Pacific Islanders 6.2%. The same year at City College, however, Blacks received 34.1%, Hispanics 30.1% and Asian/Pacific Islanders 11%, an incredible record of success in populations underrepresented in bachelor's degrees earned. Many of these degrees are awarded in exceptionally demanding programs unique to City College which do not exist elsewhere in the City University system, such as engineering, architecture, biomedical education, and certain science programs.

Most of CCNY's students come from the New York City public schools. Many are immigrants or children of immigrants; they speak 91 languages other than English and were born in 147 countries. City College students are usually the first in their families to go to college, following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families.

Founded to provide children of the poor and new immigrants access to the American dream
Now still, as in its storied past, CCNY students are financially needy. ***Approximately 58% come from families with combined incomes of $25,000 or less;*** three-quarters of the students work while attending school, some at more than one job. Over half of the students attend part time, most often for financial reasons. They pay $5,000/year in tuition, books, and fees. While the comparatively low tuition narrowly makes it possible for them to attend a top quality college, the cost is high when compared to the

EXHIBIT
Exhibit 395

income many of them, or their families, earn. Because they frequently need to support themselves and sometimes even help support their families, they often take longer to graduate, sometimes having to leave before they earn the bachelor's degree. Working longer hours takes away valuable time from their studies, making it that much more difficult to attain the success they strive for and merit. Few have the time for public service, but many strive to do it nevertheless.

The number of students at City College who require financial aid has grown dramatically. According to the *2003-2004 City Facts*, the total amount of federal, state, and city aid in 2001-2002 needed at City College was $32,364,000. Just two years later, that number rose by 35% to $43,683,000 as the number of students requesting and needing aid continued to increase significantly.

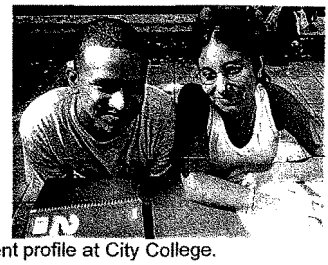
Currently, more than 90% of CCNY students qualify for financial aid; most get something, but it is rarely enough. The other four original senior colleges in the system—Brooklyn, Queens, Hunter, and Baruch—are based in more affluent communities and serve more advantaged populations. City College serves the Harlem community, whose students make up a large portion of the CCNY student body. There are other reasons, also, why City College's talented students are often the neediest.

Why Students Come to City College

A small university, with unique courses of study, 40 graduate degree programs and 10 of CUNY's doctoral programs.
City College draws many of the neediest applicants to the City University system. Why? Because The City College of New York is the only college in the CUNY system with Schools of Architecture, Engineering, and Biomedical Education, and many innovative programs in environmental engineering and science, graphic design, media arts production, publishing, and urban legal studies. Indeed, in most cases, these are the only public schools or programs of their kind in New York City. Consequently, City College is the sole gateway for these students to enter these professions, as they cannot afford to attend private institutions that may offer a comparable course of study. Most have meager financial resources but great resolve.

Profiles in Determination
The 2003 valedictorian, Sylvia Arrendondo, worked as a housekeeper while she completed her demanding chemical engineering program here. She now has a full graduate fellowship at the University of Texas in engineering. Zhanna Soushko, the 2004 CCNY valedictorian, worked as a waitress during her entire time at City College.

After graduation, she entered the Ph.D. program at the University of Denver on a full fellowship.

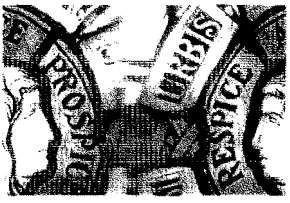


City College also has the biggest undergraduate science research program in the New York Metropolitan area, including Columbia and NYU. Rhodes Scholar Lev Sviridov, who was homeless when he first came to this country from Russia a mere 10 years ago, participates in this program, exemplifying the kind of student City College attracts and nourishes. These stories are not unique; in fact, they are characteristic of the typical student profile at City College.

The Ann S. Kheel Charitable Trust

Formed to honor Ann S. Kheel's lifetime of work in the fight for social and racial justice, The Ann S. Kheel Charitable Trust's mission is to support "organizations dedicated to improving the lives of disadvantaged New Yorkers with a particular focus on adult and child education, racial equality, and the environment."

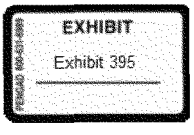
The City College of New York is dedicated to those same ideals, advancing social and racial equality through the most powerful means possible—by providing higher education to minorities and the disadvantaged.



The Ann S. Kheel Scholars Program

The late Ann S. Kheel, who devoted much of her life to fighting for equality of opportunity for all people through her passionate civic leadership in the New York Urban League, the Schomburg Center for Black Culture, and many other organizations, cared deeply about social justice, the rights of women and minorities, and New York City public education.

The City College of New York, founding college and flagship of CUNY, boasts a lifelong heritage of educating refugee, immigrant, minority and disadvantaged populations. Establishing a major scholarship program at CCNY in Ann S. Kheel's memory would be both fitting and productive. The College already has students in place who want to succeed and who are committed to social justice and public service.



Student Public Service at City College

City College proudly claims many students who, regardless of tremendous financial and family pressures, take the time to provide service to their communities. A few examples are:

- The neighborhood tutoring program through which students provide on- and off-campus assistance to the community at local public elementary, junior high and high schools;
- The Rosenberg/Humphrey internship program, in which students take summer internships at government agencies in Washington, DC, and New York in executive and Congressional offices, House and Senate committees, labor unions, governmental agencies, advocacy groups and policy research organizations;
- The service learning program that has provided internships for City College students to go to the Central African country of Rwanda, where they spent the summer working in the Rwanda Ministry of Finance's Poverty Alleviation program, the Ministry of Gender and Development, and the Ministry of Health's Psycho-Social Trauma unit.
- All students at the Sophie Davis School of Biomedical Education make a commitment to enter community medicine in underserved and disadvantaged communities; part of their commitment is to engage in volunteer work in those neighborhoods during their school years;
- Many CCNY Student Clubs and Co-Curricular activities encourage community service, such as the following:

  City College International Medical Relief Team To coordinate student participation in international medical missions; and to fundraise and coordinate medical supply relief efforts with sister clinics and agencies in disadvantaged countries.

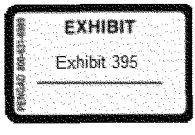
  Dominican Club To emphasize unity and education, promote culture and serve voluntarily within our communities.

  The Messenger To expose students to their community and inspire a sense of social responsibility.

  Students Helping Out! Shout! is established to provide students with volunteer activities in communities in NYC. Volunteer sites include soup kitchens, churches, hospitals, and local schools.

Although 75% of CCNY students must work at full or part time jobs in order to help pay for their tuition, living costs, and in some cases, family needs, many students have nevertheless taken the time to participate in these and other programs, along with their very demanding academic schedules.

Because of these circumstances, these dedicated students have been unable to devote as much time as they would like to public service, although many have expressed



CSOC.CBR.00009599

interest in becoming more intensively involved. What The College has not had so far is a yearlong public service program with funding sufficient to enable these committed students to work fewer hours so that they can concentrate on their studies, and still be able to spend more time over the entire year pursuing public service. *The Ann S. Kheel Scholars Program* could fill this very great need.

This historic undertaking will enable City College's most civic-minded students to take the lead, as so many CCNY students have before them, in public service. They will graduate as part of a new cadre of scholar/public servants, bring honor to their alma mater, and carry on its highest traditions. They will be associated with the Ann S. Kheel Charitable Trust in a venture intended to open the hearts and minds of CCNY students as they provide service to all the varied communities The College serves.

Kheel Scholars Program Goals

1. Make it financially feasible possible for students at The City College of New York to experience the rewards that can come from time spent performing public service.
2. Provide opportunities for these students to work at a variety of not-for-profit, community, government, and educational agencies.
3. Reward and encourage civic-minded young people by helping them with their City College education for the four years they will be involved in the program.
4. Encourage some of City College's best students to consider devoting additional time – or even their careers – to public service-oriented work.
5. Provide a benefit (in the form of volunteer workers) for educational, non-profit and government-based organizations that cannot afford to pay for interns or service aids.

CCNY's Greatest Need

What is needed is major financial support to enable these dedicated and determined students to achieve the goals for which they strive. The **Ann S. Kheel Scholars Program** would provide a $5,000 scholarship/year per student for CCNY applicants who demonstrate need, engage in public service to disadvantaged communities, make satisfactory progress, and maintain The College's required GPA throughout the four years. A program that would serve 12 new students per year and support them through to the bachelor's degree would make an important difference in those students' lives.

Budgeted at a total of $1,000,000, the **Ann S. Kheel Scholars Program** would provide full four-year scholarships for 12 students each year for four successive years. At the end of the program, a total of 48 students will have

CSOC.CBR.00009600

benefited from the Kheel four-year Scholarships. This would leave City College with $40,000 to be allocated as two-year scholarships for up to four dedicated needy transfer students during the grant period.

While some Kheel Scholars may need to continue to supplement their income with paid employment, it is anticipated that the generosity of the Ann S. Kheel Charitable Trust would allow them to at least reduce the number of hours they might need to work, providing the extra study time they need to excel, permitting them to engage more fully in public service, and significantly easing the economic burdens they bear.

CCNY's Responses to the Kheel Foundation's Questions

1. How will the Ann S. Kheel Scholars Program be promoted among potential applicants?
    a. The Ann S. Kheel Scholars Program will be publicized on the City College website, in all freshman materials, and in the high school visits made by CCNY admissions officers. It will also be publicized through posters, emails, at the Finley Student Center, and in the Office of Financial Aid.
    b. Applicants must submit a letter of interest, stating why they want to do public service and describing community service they have already provided.
    c. Applicants must provide expressly written documentation/job descriptions from at least two qualifying organizations interested in retaining the student for unpaid employment or a volunteer position.
2. What experience does the institution have in identifying and supporting students engaged in public service to disadvantaged communities?
    a. Many CCNY students are already actively engaged in public service through many of the voluntary, co-curricular, and academic programs (see Student Public Service at City College above).
    b. City College encourages these groups by providing space, faculty advising, some staff support, some paid internships, and wherever possible, some funds.
    c. City College will provide a faculty program director.
3. What other support, financial and in services, will the institution provide to the selected students?
    a. Students will be assigned to one or more faculty advisors for the time they are Kheel Scholars. They will meet regularly with these advisors both individually and as a group.
        i. The advisor will help students become oriented to their new working culture.

ii. The advisor will help students balance their public service work with class work.
iii. The advisor will be available to address other concerns and questions that may arise during the course of the year.

b. The Kheel Scholars will be provided with a special meeting place on campus where they can discuss freely their common experiences and form the kinds of social bonds that are often scarce at commuter schools.

4. How many students would the given funds be able to support?

a. A cohort of 12 students each year would receive a four-year $5,000 per year Kheel Scholarships.
b. A new cohort would begin each year for four years.
c. Up to four transfer students would receive two-year Kheel Scholarships.

5. What criteria would the institution use to select the students and who will be making the recommendations of selected students?

a. A committee, composed of faculty, financial aid officers, and administrators would be formed to make recommendations to the Trustees.
b. Faculty, staff, high school teachers, community leaders, and past volunteer supervisors would be invited to make nominations to the committee.
c. Students would be recommended to the Trustees on the basis of past interest and experience in public service, although students new to public service will also be selected based on a personal interview.

6. How will the institution determine the financial need, academic performance and demonstration of civic leadership of candidates in making their selections?

a. Grade point average will determine academic performance.
b. Students should be in good standing academically when they enter the program and must remain in good standing academically throughout.
c. Financial need will be determined by the Financial Aid Office (see below).
d. Civic leadership will be determined through demonstrated past experience and the personal interview.

CSOC.CBR.00009602

7. How will the institution measure performance of the scholars?

    a. Students will agree to maintain their grades at the required level, and seek out their advisor if the public service work becomes too onerous or time-consuming.
    b. Students will be encouraged to maintain a journal.
    c. Once each year, all students will provide a written and verbal presentation summarizing their work and its value to society, and highlighting experiences and skills they feel especially proud to have achieved.

8. Who within the institution will manage the program and who will be assigned to interface with the Trust's directors?

    a. The City College of New York will appoint a faculty director of the program, who will meet with students' faculty advisors and ensure the smooth running of the program. This faculty member will report to Zeev Dagan, City College Provost.
    b. The faculty director will interface directly with the Trustees.
    c. In addition, Trustees may contact Rachelle Butler, Vice President for Development and Institutional Advancement.
    d. Regular meetings between students and Trustees will be an important element of the Program.

The CCNY Financial Aid Selection Process

The City College of New York Office of Financial Aid helps CCNY students obtain the maximum aid possible through a highly organized, confidential, yet individualized combination of information sessions and personal advising. Through this process, which involves a structured set of steps directed toward the selection of the neediest students, City College is able to determine which students require additional funding beyond federal, state, and city sources to be able to attend The College. Then, first making certain that those students closest to graduation will be able to complete their degrees, the Office of Financial Aid works to match needy students with privately funded scholarship assistance. In this way, those most in need will get help meeting their economic challenges first. This enables The College to identify those students who would benefit most from a scholarship program.

Conclusion

At the end of seven years, more than 50 students will have graduated and gone on to careers or graduate school. These 50+ students will serve as a living memorial to Ann S. Kheel and her lifetime of work dedicated to education and opportunity. At the same time, the Kheel Scholarships will serve as a front-end transfusion of support and further advance The City College of New York in its vital mission of excellence and access.

CSOC.CBR.00009603

Our request of the Ann S. Kheel Charitable Trust

THEREFORE: On behalf of The City College of New York, in order to create:

The Ann S. Kheel Scholars Program
at
The City College of New York

We ask the Ann S. Kheel Charitable Trust to consider a gift of $1,000,000 or $200,000 per year for five years, for a total gift of $1,000,000.

On behalf of the aspiring students of The City College of New York, we thank you for your thoughtful consideration of this request. If you have any questions or need further information, please contact President Gregory H. Williams or Vice President Rachelle Butler at the Office of Development and Institutional Advancement at the numbers below.

MEMORANDUM

TO: The Trustees
FROM: Ellen K. Jacobs
Date: January 24, 2005 EKJ

Happy New Year!

Enclosed are the minutes from the meeting on December 23, 2004. I have also enclosed a second draft of guidelines for use in selecting organizations to give scholarships. We edited it at the September meeting and did not have time to reconsider it in December.

Please look at both so we can discuss them at our next meeting--at a date to be announced.

Thank you.

MINUTES OF MEETING

Ann S. Kheel Trustees Meeting
Minutes 12/23/04

Present: Congressman Charles B. Rangel, chairman; Luis Alvarez; Gabe Pressman; Veronica Kelly, Trustees. Gary Hattem and Robin Ince from Deutsche Bank. Theodore Kheel; Ellen K. Jacobs, executive director.
Not present: Gail Sheehy

Minutes from the previous meeting were summarized by Congressman Rangel and approved.

The Hunter Proposal from the Public Service Scholar Program was discussed. This program allows women, minorities and immigrants to work in the not-for-profit or government sectors by giving them funds so they do not have to hold other jobs for a one-year period. A decision was needed so that Ms. Walsh could begin recruiting for the Fall program.

The trustees decided to award f $50,000 in each of two years (the second dependent on performance the first year) to fund 7 scholarships each year. The Trustees expressed a preference that the scholars to be juniors so they can be mentored in their senior year as well as when they are in the program. he trustees want the scholars identified as Ann S. Kheel Scholars.

The trustees are interested in learning the criteria used to choose the students and how the program is publicized.

Congressman Rangel expressed interest in an intern in New York.

Ellen will speak to Dr. Walsh about the trustees' requests.

There was interest in establishing Ann S. Kheel scholarships at the CUNY School for Professional Studies. The trustees need to know how much a four year scholarship costs to make an educated decision. Congressman Rangel will talk to CUNY and get some information about funding scholarships there. Ellen will distribute any written information.

It was decided to give $10,000 a year for 10 years to a promising student selected by the Urban League. The Board will periodically review the grant. The student(s) would be announced at the annual Urban League dinner. The scholarship would serve as a way of memorializing Ann S. Kheel. Congressman Rangel will speak to the Urban League about how this can be done. Ellen will distribute any written information.

Discussion of the Student Sponsor Partners program was postponed.

Veronica Kelly brought a proposal for $10,000 to help the Bowery Mission refurbish a new transitional house for women. The money was granted.

The meeting was adjourned.

"DRAFT"

The Ann S. Kheel Scholars
For Community Development

Background

The Ann S. Kheel Charitable Trust (the Trust) is making available philanthropic resources for scholarships to benefit disadvantaged New Yorkers pursuing college degrees. The Trust seeks to reach students who have demonstrated a commitment to their local communities through civic leadership. The scholarships will be awarded to students at a selected New York City institution(s) based on financial need, academic performance and promise, and community involvement. Through invitation only, selected colleges, universities and nonprofit organizations are asked to respond to this request for proposals and describe how they would manage and support The Ann S. Kheel Scholars program.

The Ann S. Kheel Charitable Trust was established by Theodore Kheel in honor of his wife Ann to celebrate her personal legacy of community activism and as a champion of tolerance and cultural diversity. Prominent New Yorkers and close friends of Ann S. Kheel who serve as directors of the Trust, and as stewards of this endowment, include Congressman Charles Rangel, Luis Alvarez, Veronica Kelly, Gabe Pressman and Gail Sheehy. The executive director of the Trust is Ann's daughter, Ellen Jacobs.

The Commitment

The Trust will provide funds annually in support of the scholars. The Trust's directors have committed their own time to serve as mentors and role models to the selected scholars. It is intended the scholars will meet at least once in a given academic year with the directors to learn about their careers and commitments to public service.

076

Request for Proposals

Institutions responding to the Request for Proposals should offer a program description as to how they would manage the Ann S. Kheel Scholars initiative. Proposals should specifically respond to the following questions:

1) How will the Ann S. Kheel Scholars program be promoted among potential applicants?
2) What experience does the institution have in identifying and supporting students engaged in public service to disadvantaged communities?
3) What other support, financial and in services, will the institution provide to the selected students?
4) How many students would the given funds be able to support?
5) What criteria would the institution use to select the students and who will be making the recommendations of selected students?
6) How will the institution determine the financial need, academic performance and demonstration of civic leadership of candidates in making their selections?
7) How will the institution measure performance of the scholars?
8) Who within the institution will manage the program and who will be assigned to interface with the Trust's directors?

Selection Process

Based on the proposals submitted, the Trust's directors will select one or more institutions for support. The commitment will be for at least two years and reviewed annually for performance and renewal. The directors will ratify the selection of students based on the recommendation of the selected institution(s).

ANN S. KHEEL CHARITABLE TRUST

Re: Upcoming Charitable Trust breakfast Meeting on March 22, 2005
To be held at 9:00 a.m. at 800 Fifth Avenue Apt. 24F

At our March meeting we should consider:

1. The enclosed CUNY proposal. Although they ask for more money than we have available, I am sure they will be happy with whatever we choose to give. There is a paragraph-long executive summary at the beginning and a table of contents showing where their actual proposal is.

2. Finalizing the guidelines for applicants to the Trust. A draft is enclosed.

3. Time-line for awarding money.

I have also enclosed Elaine Walsh's (Hunter's) response to our question about recruitment of students and agencies and the admissions process and her thank you letter to me.

Enclosures: CUNY proposal; Draft of guidelines for applicants to the Trust; Hunter College response and thank you.

Ann S. Kheel Charitable Trust
Memo

From: Ellen K. Jacobs
To: Board of Trustees; Gary Hattem; Robin Ince; Theodore W. Kheel
Re: Minutes; Talking points for May meeting; Hunter College Public Service Scholars Program.

Enclosed are the minutes from the March meeting and the talking points to consider at the May meeting. They are being forwarded to President Williams.

Additional information: The Hunter College Public Service Scholars Program has a newsletter which is doing an article on Ann Kheel , her ideals and the Charitable Trust.

Ann S. Kheel Charitable Trust Meeting
March 22, 2005 Minutes

Present: Congressman Charles B. Rangel; Veronica Kelly; Gabe Pressman; Gail Sheehy, Trustees. Gary Hattem; Robyn Brady-Ince; Ted Kheel; Ellen K. Jacobs, executive director

Not present: Luis Vila-Alvarez

1. **Minutes of prior meeting were approved.**
2. **Ellen stated that the Trust has awarded $210,000 dollars in grants.**
3. **The CCNY proposal was considered. The Trustees liked that it was a full-service program. The amount of money ($1,000,000) requested was a concern as this is a small foundation. One suggestion was to start the program with a 2-year grant totalling about $300,000, with a mix of students from each year (6 freshmen, 6 sophomores, 6 juniors and 6 seniors). This would both jump-start the program and give a mix of students. The second year would be conditional on performance during the first year.**
4. **There was discussion about what could be done to make a grant from the Ann S. Kheel Charitable Trust especially meaningful since this is a small foundation with a distinguished board. One thought was to capitalize on the Board itself. The Board would like to inspire students to go into public service as people such as Congressman Rangel and Ray Kelly have done. There is concern that the Board not take on more than they can handle.**
5. **There was discussion about the fact that it is notable that this board is choosing to give something to CCNY rather than to a private college and that perhaps the CCNY could use the grant for public relations purposes as well.**

The names of the Board might also be used at a fund-raiser for the program once it has a track record. The Great Hall would be an ideal place for it.

6. **There is increasing recognition of the importance of CCNY in educating the youth of New York City. Congress has agreed to fund a school of public affairs at CCNY. The Board discussed the possibility of building on Congress' agreement. In addition, the City Council has awarded $1,000,000 to establish a Dominican Studies Institute at CCNY in recognition of the large Dominican population in New York City.**
7. **It was decided that inspiring students to go into public service would be a theme for the Charitable Trust grants. The Trust has already given one such grant to Hunter College's Public Service Scholar Program. Both Theodore Kheel and Ellen said that Ann Kheel would have liked such a program.**
8. **A dinner meeting in May with Gregory Williams, President of the City College of New York, will be scheduled to work out the scholarship program. Ellen will put together some talking points to be sent to President Williams prior to the meeting.**
9. **No additional proposals will be considered until this one has been finalized.**
10. **To be considered next time: finalizing draft of our guidelines; budge; time-line for disbursing committed funds.**

Respectfully submitted,
Ellen K. Jacobs

Draft of talking points to send to President Williams in preparation for our meeting with him in May:

1. **Redefine the mix of students so there is a 4-year mix (freshman through senior) in the first group.**
2. **An initial grant of about $300,000 will be given to cover a 2-year term to with 6 students in each of 4 classes. The second year is conditional on the successful completion of the first.**
3. **This is a seed. How can the Board help to get the message to other New Yorkers and help get them involved in CCNY**
4. **Does CCNY have a fund-raising mechanism that the Board could supplement?**

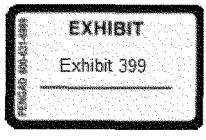
MEMO

To: Trustees of Ann S. Kheel Charitable Trust
From: Ellen K. Jacobs
Date: April 14, 2005
Re: Enclosures

In addition to the minutes, I have enclosed 2 things for your consideration:

1. The talking points to send Gregory Williams, President of City College, so that he will be ready for discussion at our May meeting (date still to be determined). If there is something else I should include, please let me know.

2. Our draft guidelines for giving to Ann S. Kheel Scholars' programs should be finalized. Does anyone have anything that needs to be added or changed to those?



Minutes
Ann S. Kheel Charitable Trust Meeting
March 22, 2005

Present:
Trustees: Congressman Charles B. Rangel
Veronica Kelly
Gabe Pressman
Gail Sheehy

Others in attendance: Robyn Brady Ince
Gary Hattem
Theodore W. Kheel
Ellen K. Jacobs, Executive Director

Not present: Luis Alvarez-Vila, Trustee.

1. Minutes of prior meeting of December 23, 2004 were approved.

2. Ellen stated that the Trust has awarded $210,000 dollars in grants ($100,000 to Hunter's Public Service Scholars' Program over 2 years and $100,000 to the Urban League over 10 years and $10,000 to Bowery Mission).

3. The CCNY proposal was considered. The proposal requests funds to assist and support needy students from disadvantaged neighborhoods who choose to make careers in the public sector - - a purpose similar to that of the proposed Rangel Center at CCNY. The Trustees liked that it was a full-service program. The amount of money requested ($1,000,000) was a concern as this is a small Trust. One suggestion was to start the program with a 2-year grant totaling about $300,000, with a mix of students from each year (6 freshmen, 6 sophomores, 6 juniors and 6

seniors). This would both jump-start the program and give a mix of students. The second year of funding would be conditional on performance during the first year.

4. There was discussion about what could be done to make a grant from the Ann S. Kheel Charitable Trust especially meaningful since this is a small foundation with a distinguished board. One thought was to capitalize on the Board itself. The Board would like to inspire students to go into public service as people such as Congressman Rangel and Ray Kelly have done. There is concern that the Board not take on more than they can handle.

5. There was discussion about the Rangel Center for Public Service that is being established at CCNY. Since the goals are the same, perhaps the Ann. S. Kheel Charitable Trust can work with the Rangel Center.

6. There was discussion about the fact that it is notable that this Board is choosing to give something to CCNY rather than to a private college and that perhaps the CCNY could leverage the grant for public relations purposes as well.

7. The Board members might also lend their clout to fund-raising efforts for the program. The Great Hall would be an ideal place for it.

8. There is increasing recognition of the importance of CCNY in educating the youth of New York City. Congress has agreed to fund a school of public affairs at CCNY. The Board discussed the possibility of building on this opportunity. In addition, the City Council has awarded $1,300,000 to support the Dominican Studies Institute at CCNY in recognition of the large Dominican population in New York City.

9. It was decided that inspiring students to go into public service would be a theme for the Charitable Trust grants. The Trust has already given one such grant to Hunter College's Public Service Scholar Program. Both Theodore Kheel and Ellen said that Ann Kheel would have liked such a program.

10. A dinner meeting in May with Gregory Williams, President of the City College of New York, will be scheduled to work out the scholarship program. Ellen will put together some points for discussion to be sent to President Williams prior to the meeting.

11. No additional proposals will be considered until this CCNY program and funding have been finalized.

12. To be considered at the next Trustee Meeting (date, to be determined):

(a) CCNY Proposal
(b) finalizing draft of our guidelines;
(c) budget
(d) timeline for disbursing committed funds.

Respectfully submitted,

Ellen K. Jacobs

Points to Discuss at Dinner Meeting

Points to discuss relating to the proposal from CCNY that we are considering and discussed at our last meeting. These will be forwarded to President Williams so he can come prepared.

1. Magnitude of the grant

2. Fund Raising. In conjunction with the Rangel Center?

3. Publicity

4. Redefinition of student mix

5. How the Ann S. Kheel Charitable Trust can work with the Rangel Center in their mutual goal of encouraging and assisting students to pursue public service careers.

May 18, 2005

Theodore Kheel, Esq.
75 East 55th Street
5th floor
New York City, NY 10022

Dear Ted:

I am writing you as a longtime friend with a shared vision and commitment to public service, to share an initiative that has me quite excited. The City College of the City University of New York plans to create the Charles B. Rangel Center for Public Service at the City College to provide an opportunity for education and training for careers in public service for the underprivileged students the College has traditionally served. I want to make you aware of my personal interest in and enthusiasm for the creation of this Center and my pride in the decision of the City University to name it for me.

As you know, throughout my public career I have believed in the special strength derived from our racial and ethnic diversity and that we as lawmakers must lead in assuring that opportunity for public service be made available to all with the goal of achieving a policymaking community that reflects the rich tapestry of cultures, faiths, colors and ethnicities that make us who we are as a great nation. I am asking you to join me in the creation of a public policy center that will motivate and prepare young people presently underrepresented in public life to careers in public service.

Today, non-whites make up nearly thirty percent of the US population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top managerial, supervisory, and policy-making

EXHIBIT
Exhibit 401

positions in the US Federal government are members of minority groups. By 2050, minority groups in the US will comprise more than 50% of our population.

The Charles B. Rangel Center, located at the City College of New York, a school in the most ethnically diverse city in our nation and with an unparalleled history of supporting the empowerment of immigrant ethnic groups, will help to ensure that those who run our nations will be reflective of our diversity. After being approached by the leadership of the College with the idea of the Rangel Institute I was receptive because it will allow me to locate the inspirational aspects of my legacy in my home Harlem community.

As you will see from the enclosed presentation, the Rangel Center at the City College of New York will be alive with the work of scholars and students working on public policy issues and studying the political dimension of change. It would not be a Library or a Museum, but a living institution brimming with ideas and stimulating debate.

I will be exploring with my Congressional colleagues how best to move this idea through the appropriations process and ask that you share with me your thoughts on how to develop an approach to the private sector donor community. I look forward to continuing our conversations on the Rangel Center concept in the coming weeks and months.

Sincerely,

Charles B. Rangel
Member of Congress

EXHIBIT
Exhibit 401

CSOC.CBR.00009803

CONGRESSMAN CHARLES B. RANGEL

Through 17 terms as U.S. Congressman from New York's 15th Congressional District, Congressman Rangel has combined a dedication to the specific needs of his Harlem and Washington Heights constituency with an expansive viewpoint that has led him to leadership on a broad range of national and international issues in the House of Representatives. From Harlem to South Africa, from affordable housing to help for the unemployed, from tax legislation to international trade, his work is characterized by a fundamental commitment to equity, justice and inclusion.

The senior Democratic member of the Committee on Ways and Means, Congressman Rangel has been a major voice for equity in the Internal Revenue Code and proposed tax legislation. As a Congressional advisor to the U.S. Trade Representative and a member of the President's Export Council, he has worked tirelessly to build consensus on international trade matters. In addition, he authored: the $5 billion Federal Empowerment Zone demonstration project to revitalize urban neighborhoods throughout America; the Low Income Housing Tax Credit, which helped finance 90% of the affordable housing built in the U.S. in the last 10 years; and the Work Opportunity Tax Credit, which has provided thousands of jobs for underprivileged young people, veterans, and ex-offenders.

As chairman of the Congressional Narcotics Abuse and Control Caucus, Congressman Rangel leads the nation's efforts to reduce the flow of drugs into the United States and to solve the nation's continuing drug abuse crisis.

He is a founding member and former chairman of the Congressional Black Caucus. He also served as chairman of the New York State Council of Black Elected Democrats and as a member of the House Judiciary Committee during the hearings on the articles of impeachment of President Richard Nixon.

Awarded the Purple Heart and Bronze Star for his service in the Korean War, Congressman Rangel has authored several pieces of legislation to benefit minority and women veterans, including a successful bill that established the Office of Minority Affairs within the Department of Veterans Affairs. In the area of foreign affairs, he played a vital role in ending the apartheid regime in South Africa and restoring the democratic government in Haiti.

CSOC.CBR.00009804

letter from the president

To the Reader:

In his distinguished career, The Honorable Charles B. Rangel has done as much as any single person in public service to help the least powerful among our citizens to achieve their goals and to change their lives, their communities, and the nation. He has done so with the clear vision that all of America's citizens must be empowered in order for America to be herself. He has thought and acted locally and globally to ensure that the laws and policies of this nation embody her best instincts and her highest promise.

Fundamental to Congressman Rangel's lifelong service is a belief that America's "governing class" – those men and women who make our laws and policies – must mirror the rich tapestry of cultures, faiths, and ethnicities that make us who we are as a country. We at The City College of New York are proud to share that vision and that commitment.

Today, non-whites make up nearly thirty percent of the U.S. population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top managerial, supervisory and policy-making positions in the U.S. federal government are members of minority groups. By 2050, minority groups in the United States will comprise 50% of its population. The Charles B. Rangel Center for Public Service at The City College of New York will help to ensure that those who run our nation will reflect our citizenry.

The Center will accomplish this through the establishment of a rigorous graduate program for students from underrepresented groups that will prepare them for public service, including elective office and careers in government at the policy-making level. The new master's program will be coordinated with programs on the undergraduate level, many unique to City College, to encourage and inspire our best students to move into graduate work and pursue careers in public service. Located in a restored Harlem mansion adjacent to The City College campus, the Charles B. Rangel Center will also house the Charles B. Rangel Library, an archival repository of documents, photographs, and memorabilia that records the life of one of America's most important public servants and serves as a rich repository of knowledge and experience for students and scholars alike.

GREGORY H. WILLIAMS
PRESIDENT, THE CITY COLLEGE OF NEW YORK

232

The Charles B. Rangel Center for Public Service at The City College of New York will strive to become a national center for the promotion of greater diversity in public service, consisting of five major elements:

THE CHARLES B. RANGEL CENTER, which will be housed in a magnificent Harlem limestone townhouse adjacent to The City College campus, and include the Rangel Library, the Rangel Conference Center, and offices for visiting scholars;

THE CHARLES B. RANGEL LIBRARY, consisting of documents, archives, and memorabilia from Congressman Rangel's lifetime of public service. These papers will be made available to scholars nationally, and particularly to scholars within The City College and the City University, and will serve as a locus of sponsored research and conferences concerning barriers to full participation in public service by underserved minorities;

THE MASTER'S PROGRAM IN PUBLIC SERVICE, which will recruit and prepare young people for careers in government and public service. The program will include participation in internships in service organizations, arranged by the Rangel Center. It will also offer interdisciplinary specializations in concert with The City College Schools of Architecture, Engineering, Education, and Biomedical Education, plus CCNY's special programs in transportation, waste management, and urban public health;

Upon completion of the degree, graduates will be eligible for programs like the Federal Career Intern Program, entering government service for a two-year temporary appointment with eligibility for a permanent assignment upon completion. These opportunities will encourage the involvement of members of underrepresented minority groups and those with financial need;

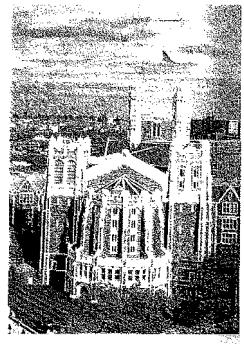
A COMBINED BA/MA PROGRAM IN PUBLIC SERVICE, which will work together with several undergraduate programs unique to City College that are particularly suited to draw outstanding students into public service. The BA/MA Program will attract students capable of and interested in an intensive "fast-track" program leading to the master's degree. It will prepare them for public service with high-level coursework, experienced government personnel mentors, and hands-on training in internships and service learning;

THE CHARLES B. RANGEL FELLOWS: A MID-CAREER PROGRAM IN LEADERSHIP AND POLICY INNOVATION, offering professional advancement training for mid-career, minority government and other public service employees of particular accomplishment and promise for a term of stud[illegible] an academic year.

EXHIBIT
Exhibit 401

CSOC.CBR.00009806

THE CITY COLLEGE OF NEW YORK
THE CHOICE FOR THE RANGEL CENTER



The City College of New York offers a unique and fitting environment for The Charles B. Rangel Center for Public Service. Located in Harlem, the heart of Congressman Rangel's constituency, The City College of New York was founded through a public referendum in 1847 as a free academy to serve "the children of the whole people." One of a young America's great democratic experiments, it remains one of her great democratic achievements, and the most important avenue to upward mobility and social advancement for generations of New Yorkers.

City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented young men and women with few material resources and opportunities. For more than 157 years, The College has provided access to a world-class education to underrepresented populations, preparing them to enter those fields with the expert skills to change their own futures and shape the world.

DIVERSITY AT CITY COLLEGE

Last year, *US News and World Report* ranked City College first in diversity in the nation, where African-Americans are the largest group. This year, City College was ranked first where Hispanic Americans are the largest group. More than 87% of CCNY students describe themselves as members of a minority group.

The Chronicle of Higher Education 2003 Almanac reports that of the total number of bachelor's degrees awarded in the United States as a whole, white students earned 75% of the total, blacks 8.5%, Hispanics 6.5%, and Asian-Pacific Islanders 6.2%. The same year at City College, however, blacks earned 34.1% of the total bachelor's degrees awarded, Hispanics 30.1% and Asian/Pacific Islanders 11% — an unparalleled record of success for underrepresented populations.

Following a tradition that reflects the pattern of generations of CCNY alumni whose achievements became the model for their own families, City College students are often the first in their families to go to college, and most have very limited financial resources. Approximately 58% come from families with combined incomes of $30,000 or less; three-quarters work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial reasons.

PUBLIC SERVICE AT CITY COLLEGE AND RECRUITMENT POTENTIAL
FOR THE MASTER'S PROGRAM IN PUBLIC SERVICE

A number of existing City College programs attract outstanding undergraduate students, most from minority populations, who are excellent candidates for public service careers. The presence of these already excellent programs on campus affords CCNY an opportunity open to very few colleges in the nation for early identification, recruitment, and preparation of students from underrepresented populations for the Master's and BA/MA Programs in Public Service at The Charles B. Rangel Center for Public Service. They include:

THE ROSENBERG-HUMPHREY PROGRAM IN PUBLIC POLICY, which provides summer internships at government agencies in Washington, DC, and New York in executive and Congressional offices, House and Senate committees, labor unions, government agencies, advocacy groups and policy research organizations;

THE COLIN POWELL LEADERSHIP PROGRAM, an interdisciplinary program of instruction and co-curricular support designed to give a select group of qualified CCNY students who have demonstrated potential for leadership the resources and experience necessary to develop that potential; with a major emphasis on service learning courses that allow students to combine practical experience in underserved communities with coursework relevant to that experience;

THE INTERNATIONAL STUDIES PROGRAM AT CCNY, which exposes students to a global perspective in their coursework and through study abroad in China, Morocco, the United Kingdom, and Germany; in service learning internships in Rwanda, students spend the summer working in the Rwanda Ministry of Finance's Poverty Alleviation program, the Ministry of Gender and Development, and the Ministry of Health's Psycho-Social Trauma unit;

THE PRE-LAW PROGRAM, which includes the D'Agostino-Greenberg Program in Law and Public Policy, a lecture series in law and public policy, and comprises panel discussions, colloquia, and legal internships for students.

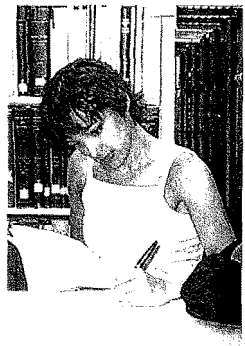
Exhibit 401

CSOC.CBR.00009808

The Charles B. Rangel Library



Designed to hold the product of 50 years of public service by the major African-American statesman of the 20th and early 21st centuries, the Charles B. Rangel Library at The City College of New York will rank with the Clinton and Carter Libraries in historic importance to the government and academic communities.

The Rangel Library not only tells the story of one great man, but also of a nation's progress during the last half of the 20th century and the beginning of the 21st, including papers on the Watergate and impeachment proceedings. It will trace the nature of government, the growth and development of minorities in the United States, and the contributions of underrepresented populations in government and public service. It will not be frozen in time but rather the heart of a living, growing center -- a productive environment for emerging ideas, thoughtful advocacy, and visionary projects.

Serving simultaneously as a resource for scholars, CCNY students, and the greater New York community, the Charles B. Rangel Library will encourage study of and research in the wide-ranging fields of public service prominent in Congressman Rangel's long and varied career. In particular, the Charles B. Rangel Library will inspire new generations of students from under-represented populations to enter and excel in public service. The archives will be accessible to all interested scholars, but especially those who come to study at The Rangel Center.

The Rangel archivist/librarian will organize, index, and preserve for posterity all documents, photographs, and memorabilia relating to Congressman Rangel's career. This will be a full time position, which will be held by a Rangel post-doctoral Fellow, chosen through a national search. The archivist will provide assistance to other scholars, CCNY students, and the Harlem community, while pursuing his/her own research.

The Rangel Library could include such archive categories as: foreign policy, government, the economy, community and the family, New York City and its environs, the 15th Congressional District, and race and ethnicity. Visiting scholars from other cities, states, and nations will be welcomed and integrated into the life of the Center.

Exhibit 401

CSOC.CBR.00009809

THE MASTER'S & BA/MA PROGRAMS IN PUBLIC SERVICE

The Rangel Center for Public Service will prepare students, particularly from underserved and underrepresented populations, for careers as leaders in public service. At the heart of that effort is a curriculum that emphasizes a combination of classroom instruction, practical training, and opportunities for vibrant co-curricular interaction with the Rangel Leadership Fellows.

The program is designed to attract students at both the graduate and undergraduate levels. For undergraduates, a unique, seamless five-year BA/MA Program in Public Service will attract current CCNY students and new students who come to City College specifically to enroll in the Rangel Program.

For graduate students, the new Master's Program in Public Service will provide the capstone of conceptual and service learning needed for a career in public service. The MA Program's distinctive combination of classroom instruction, internships and intensive interaction with mid-career professionals will attract both recent college graduates and older students who are potential leaders in public service.

Both programs will benefit from the unique resources of The College's many schools and divisions, which may provide more focused attention in one area of public service. CCNY's Schools of Architecture, Engineering, Education, and Biomedical Education, plus its special programs in transportation, waste management, and urban public health, to name only a few, will be available to Rangel Center students for interdisciplinary concentrations in content areas and technical matters.

THE BA/MA PROGRAM

An integrated BA/MA degree program provides a vehicle to recruit excellent students into the Rangel Program by assuring them a seamless transition from undergraduate to graduate degrees with practical experience along the way.

Undergraduate education at the Rangel Center is designed primarily to secure student commitment to careers in public service. To provide a foundation for the MA program, and to recruit the best students, the program will expand existing undergraduate offerings in public policy, governance and management. Students interested in public service careers from non-social science fields (such as engineering, architecture, and science and technology) will be able to enroll in courses to prepare them to pursue the MA degree, while maintaining their technical emphasis.

EXHIBIT
Exhibit 401

CSOC.CBR.00009810

Many excellent undergraduate students interested in issues of public policy and equity will enroll in the 150-credit, five-year CCNY BA/MA Program in Public Service. Undergraduates in this program will begin to take master's-level seminars when they reach 90 credits; by their 120th credit, they must have completed 15 credits from the MA Program, and their courses will consist entirely of master's-level courses and service internships. (In most cases, the initial MA courses will be the required core courses.)

Engineering, science and architecture students will receive credit in the BA/MA program for courses in those fields, allowing them to move directly into associated policy courses. (See category III courses listed on the following page.) For these students, courses in categories I and III will most occupy their attention once they pass the 120-credit mark.

Thus it will be possible for a non-social science student at CCNY to complete the BA/MA in roughly the same amount of time it would take a social science major. In either event, students who complete 15 credits of BA/MA work within 120 undergraduate credits will begin working completely in MA courses thereafter. Students in the BA/MA program will have at least one service learning or internship experience during the course of the program.

The final three semesters in the BA/MA program will consist of seminar classes focusing on specific political and technical issues of important public policy concerns. Seminars, many of which will include service learning, will allow students to develop particular areas of expertise, both in policy questions and related technical matters. It is also at this level that the students are expected to have the most substantial interactions with the Center's Rangel Leadership Fellows.

THE MASTER'S PROGRAM IN PUBLIC SERVICE

College graduates will enroll directly in the 45-credit MA Program in Public Service without the BA component. This program will take two years of full time study, including a minimum of one semester of intensive internship work.

The stand-alone MA program is a 45-credit program (including the internship). As with the BA/MA Program, students are expected to concentrate on core courses at the outset, reserving their seminar courses in specific areas of policy or technical concern for their second and third semesters of study.

The curriculum for the both the programs in public service at The City College is found on the following page.

CSOC.CBR.00009811

STUDENTS IN BOTH THE BA/MA & THE MA PROGRAM WILL TAKE COURSES FROM EACH OF THE FOLLOWING CATEGORIES:

CATEGORY I

Core Courses – all students (18 credits):

Introduction to Public Policy and Policy Analysis
Organizations and Management
Public Economics and Finance
Communication in Public Settings
Poverty, Ethnicity, and Diversity
Ethics in Public Service Leadership
Best Practices Seminar

CATEGORY II

Substantive policy concerns (four classes for 12 credits):

Racism, Public Policy and the Law
Power, Inequality, and Social Welfare Policy
Immigration Policy
United States Foreign Policy
Healthcare Policy
Transportation and Communication Policy
Pollution and Environmental Policy
International Business Economic Policy

CATEGORY III

Courses that offer instruction in content areas and technical matters that lie at the heart of key policy concerns (four classes for 12 credits):

Experts from CCNY's Schools of Engineering, Architecture and Education, and the departments of political science, sociology, etc., will teach these courses, designed specifically for those preparing for public service careers. Selection of these courses will be made with the agreement of an advisor in order to create thematic areas of specialization, such as Urban, International, Ethnicity, and Environment.

Examples include:
Urban Public Health
Environmental Engineering
Urban Public Transportation
Sociology of Immigration
Problems in Criminology
Psychology of Prejudice and Racism
International Law
International Organizations
Urban Schools in a Diverse Society
Urban Design
Sociology of Politics and Collective Behavior
Computer Security
Solid Waste Management
People of the City of New York

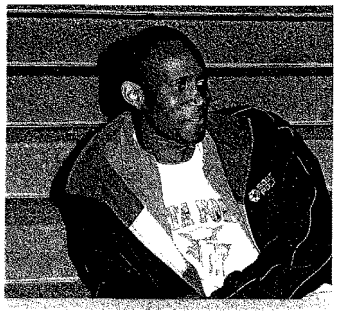
CATEGORY IV

Internships (may be taken in summer) (3 or more credits)

EXHIBIT
Exhibit 401

CSOC.CBR.00009812

ELIGIBILITY



US citizens and green card holders (permanent residents) will be considered as applicants;

Applicants for the MA Program in Public Service must be in the senior year of their undergraduate study or have completed their undergraduate degree by June, in order to enter graduate school by the following fall;

Applicants for the both the MA Program and the BA/MA Program must have a cumulative grade point average of 3.2 or higher on a 4.0 scale at the time of application.

SELECTION OF THE STUDENT SCHOLARS

- Scholarships will be awarded to ensure that the best candidates for the program are able to apply and attend. Consideration will be given to qualified applicants who, in addition to outstanding leadership skills and academic achievement, demonstrate financial need. At least 10 $10,000 Rangel Scholarships will be awarded each year; these scholarships will cover full tuition and other educational expenses;
- Applicants may be in their senior year at City College or at another college or may have recently graduated from college and/or are engaged in a public service career;
- Candidates for the BA/MA Program will need to state their intention of applying for this Program at the time when they declare their major or earlier as coursework will need to be planned on an individualized basis. Candidates for this Program may apply for a two-year Rangel Scholarship in their junior year.
- A candidate's community, academic, other extracurricular, and leadership activities will be considered during the selection process;
- Students from underrepresented populations are especially encouraged to apply;
- Two letters of recommendation, a personal statement, and examples of writing skills will be required; A selection committee composed of the president of The City College, members of The Rangel Center faculty and the Division of Social Science, and a representative from Congressman Rangel's office;
- Candidates selected for final consideration will meet with the selection committee and Congressman Rangel for the final selection.

EXHIBIT
Exhibit 401

240

THE RANGEL LEADERSHIP FELLOWS

A Mid-Career Program in Leadership and Policy Innovation

The Center will be the home of a unique program that brings together mid-career leaders in the public sector for seminars, workshops, and fellowship for periods that range from eight weeks to an entire academic year. These outstanding public servants will receive, in essence, a sabbatical from their leadership positions and will spend their time at CCNY considering new directions for public service leadership, policy innovation, and assistance to communities in need.

The Mid-Career Program will be targeted especially at outstanding leaders from communities underrepresented in public service. In addition to their work with one another, Rangel Leadership Fellows will be engaged in opportunities to teach and mentor Rangel participants in the BA/MA and MA Programs in Public Policy and Public Service. The mid-career participants become an essential resource for students, especially undergraduates, who are being prepared for careers in public service.

PROGRAM STRUCTURE

Recent studies suggest that the frustrations of public service lead too many government and other public sector leaders to leave these sectors early in their careers. A common complaint is that these leaders rarely have time to stop and think about where their organizations and the issues to which they are devoted are headed over the medium- and long-term. The day-to-day tasks of running organizations preclude taking the time to consider how other organizations do their work and what models exist for policy and leadership success.

In each case, a sponsoring organization will continue to provide the financial support for a Rangel Leadership Fellow. It will be considered an honor to participate and a reward for top performance, much like participation in an executive MBA program is considered in the business world, where employees are selected and sponsored by their companies.

The Rangel Center's Mid-Career Program in Leadership and Policy Innovation will permit leaders at the middle stage of their careers in the public sector, especially men and women from underrepresented groups, to leave their p[illegible] place of their customary jobs,

EXHIBIT
Exhibit 401

241

they will spend time with other leaders and members of the City College community and consider issues of leadership and public policy. The experience will provide participants with both the time to reflect and with the specialized education in specific policy areas that will contribute to their advancement within their respective institutions.

Participants will spend between eight weeks and a full academic year at the Rangel Center in individual programs of study and reflection under the mentorship of one of the Center's professors.

City College faculty will lead sessions with the Rangel Leadership Fellows about issues of public sector leadership and policy innovation. Each group of Fellows will work with a select group of Rangel students in Public Policy and Public Service on projects aimed at proposing ways of restructuring or reforming policy — or ways of delivering policy — in some issue area. These group projects provide an opportunity to involve Rangel BA/MA and MA students in the work of mid-career leaders — giving them first-hand knowledge of the potential of careers in public service.

RANGEL MID-CAREER LEADERSHIP FELLOWS

These Fellows will receive varying levels of support, depending on the workforce from which they are drawn. Almost all federal agencies already have mid-career training programs, which allow a limited number of employees to receive a one-year sabbatical and full salary for post-baccalaureate study at an institution of higher education.

The Rangel Center will reach out to human resources offices that oversee these programs in specific agencies to ensure that the Rangel Center becomes a premier destination for their employees, especially their mid-career leaders from underrepresented populations. The Rangel Center will provide each federal Rangel Leadership Fellow an individualized academic program tuition-free, and offer 10 $7,500 cost-of-living and travel packages, to ensure that mid-career employees who live outside New York City can take advantage of this important opportunity.

Each Rangel Leadership Fellow who works at the Center for at least one semester will each teach one seminar. Rangel Leadership Fellows will also participate in the Best Practices Seminar, along with guest speakers from academia, think tanks, the public sector, and community organizations. This seminar will focus on practical issues pertaining to careers in public service, including the art of building coalitions, techniques for communicating effectively to the public, lessons on making useful connections, and career issues particular to members of underrepresented populations. Finally, to maximize the educational value of internships, students will evaluate them under the guidance of experienced Rangel Leadership Fellows.

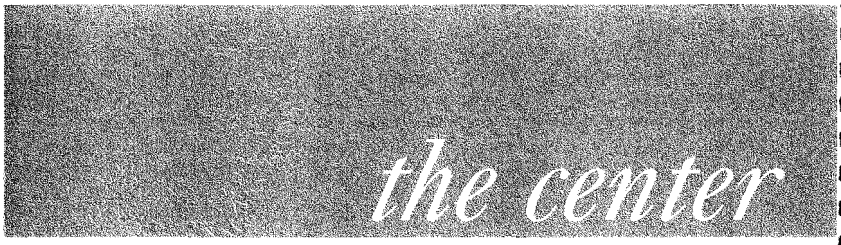
CSOC.CBR.00009815



THE HOME OF THE CHARLES B. RANGEL CENTER

Originally conceived as The City College of New York's President's House and later used as the CCNY Alumni House, the limestone mansion on 141st Street and Convent Avenue harks back to City College's earliest days in the mid-1800s. A gracious four-story structure with a full below-sidewalk level and parking area, the stately townhouse features two and sometimes three tiled fireplaces on each floor, high ceilings, decorative plaster, and fine woodwork throughout, and ornamental ironwork on every window and surrounding the building.

Because of a fire in the late 1970s and cutbacks in public financing of the City University at that time, the building has not been in use and will need repair to bring it to its former grandeur. When completely restored, however, the townhouse will regain its position as one of the most beautiful portions of the historic City College campus.

It is especially appropriate housing for The Rangel Center for Public Service as it includes space for conferences, seminar rooms, study areas, and smart classrooms. In addition, it can accommodate reception rooms and potentially computerized archives. In fact, this project will represent a unique opportunity to design the space inside The Rangel Center for its specific use prior to the building's renovation.

A survey and report from 1995 already exists and details the building's renovation needs. A new report recalculating renovation costs in 2005 dollars has been prepared and will itemize and budget the required work in detail. Current estimates based on the 1995 costs are included below. When finished, The Rangel Center's home will be a beautiful addition to the Harlem urban landscape.

CSOC.CBR.00009816

THE CENTER BUILDING WILL INCLUDE:

The Rangel Library to house the Rangel archives, which will be digitized; it may also be possible to provide digital access from the main library at City College to the Center if it is determined that the archives should be housed there;

A communications network center/smart classroom for video-conferencing, facilities for computerized presentations, digital archival access, ability to collaborate with other schools, including the Henry Jackson Center at the University of Washington, and other similar academic partners;

A large conference room, with room for meetings with community groups, researchers, and participating students;

Two small meeting rooms for Rangel Leadership Fellows to meet with community stakeholders in the course of their work with community organizations; these rooms can also serve as the venue for workshops;

Offices for the Director/Rangel Chair, archivist/librarian, resident and visiting faculty, internship coordinator, administrative assistant, post-doctoral fellows;

A well-furnished office for Congressman Rangel;

One large and one small reception room;

Kitchen facilities for receptions and working lunches;

A Rangel Program publications office where working papers can be printed and stored;

One or more sleepin[EXHIBIT Exhibit 401] visiting scholars.

244

Staffing of the Rangel Center & Programs

Director, Charles B. Rangel Chair, and Dedicated Rangel Center Faculty
In addition to The City College of New York faculty lines dedicated to the Rangel Center programs, three new faculty will be hired with the support of the Rangel Center: the director, one senior, and one junior faculty member.

Requirements for selection as the Rangel Center's director will include an international reputation, experience in public service, and respect within the academic community. The Director will also hold the endowed Charles B. Rangel Chair. The opportunity to appoint the director to the prestigious Rangel Chair, named for one of the most eminent government leaders of this generation, will enable the Center to attract and retain a distinguished scholar/public servant.

One other senior faculty member and one junior faculty member, each with experience in public service, will also be hired as part of the Rangel Center's budget. A scholar with expertise in leadership will be sought, as well as one with research experience in the barriers that deter many students with minority and immigrant backgrounds from careers in public service.

Current and New Full-time Faculty
The Rangel Center will draw on the knowledge and strengths of current full-time faculty at City College, particularly those in the departments of political science, economics, management, and sociology. Faculty from the City College Schools of Architecture, Education, Engineering, and Biomedical Education will also teach in the Rangel programs, highlighting the connections between their areas of substantive expertise and public policymaking. CCNY will also use college faculty lines to hire new faculty working in some of the areas central to the Rangel Center's mission, especially in the areas of public policy, public service, management, and ethnicity. These faculty will be jointly based in the Rangel Center and academic departments.

Archivist/Librarian
The collected papers of Congressman Charles B. Rangel will constitute a valuable resource that will greatly add to the reputation of the Center and help it to realize its goals. A Rangel Post-Doctoral Fellow will be hired to organize these papers, to digitize them, and to assist scholars in using them. These will include visiting scholars, post-doctoral fellows hired by the Center, and students in the Master's Program who elect to do supervised research.

Administrative Assistant
To assist the Director of the Rangel Center, a full time administrative assistant will be hired.

EXHIBIT
Exhibit 401

CSOC.CBR.00009818

Internship Coordinator
Internships are central to fulfilling the goals of the Rangel Center because they not only provide students with practical experience but also permit them to make the contacts that are so important in building successful careers. A full-time staff member will be hired for the Center to locate organizations willing to host internships for students from the Master's Program and to ensure that the internships are useful both for the students and the host organizations.

Rangel Post-Doctoral Fellows
In addition to the Fellow working to organize and study the Rangel Archives, two Post-Doctoral Fellows will be hired to do research at the Center. In selecting Rangel Post-Doctoral Fellows, priority will be given to recent PhDs who propose to do research on diversity in public service.

Rangel Leadership Fellows
Rangel Leadership Fellows will participate in the Mid-Career Program in Leadership and Policy Innovation. Those who live outside New York City will be offered stipends to cover travel expenses.

Guest Speakers
Members of academia, think tanks, the public sector, and community organizations from New York City, the nation, and around the world, who have experience with the contemporary challenges faced in public service, will be brought to City College to provide context, background, and advice on steps needed to solve the problems.

Webmaster
A part-time webmaster will develop and maintain the website for the Rangel Center.

CSOC.CBR.00009819

BUDGET ELEMENTS

Staff

Rangel chair
One senior faculty member
One junior faculty member
Archivist/librarian/Rangel post-doctoral fellow
Full-time internship coordinator
Administrative assistant
Part-time webmaster
Two visiting scholars
Two additional Rangel post-doctoral fellows

Support and incentives for current CCNY faculty:

1) Support for City College faculty affiliated with the Center to present research specifically supported by the Center at academic conferences. This helps disseminate the knowledge gained through Center activities and promote the name of the Center.
2) Support for CCNY faculty research associated with topics the Center touches on. These can be one-semester research grants or summer-long residence research grants that will provide summer support for faculty who take up offices at the Center and pursue some focused research project.
3) Some support for faculty working on the Center's curricula and programs.

Restoration of the Rangel Center building

The City College Office of Facilities has taken the November 1995 DASNY Report on the Building Condition Assessment of the CCNY Alumni House and provided an interim estimate of the costs in 2005 dollars. It is anticipated that the cost of bringing the building up to code, installing the elevator now required by the Americans with Disabilities Act, restoring the historic and architectural features of the building, and designing the interior specifically for the Rangel Center's needs will come to $4.7 million in today's dollars.

A sum to endow the building's ongoing maintenance will ensure that the Rangel Center's home will remain pristine and also permit future improvements. Therefore, a sum of $2.3 million will be set aside as an endowment, from which only the income will be used annually, to preserve the Rangel Center's magnificent Harlem home in perpetuity, and provide a living environment for study and discourse appropriate [illegible] the Center itself.

EXHIBIT
Exhibit 401

247

Expenses other than for staff and the building

1) Each cohort will contain 20 students. In order to make it feasible for the best students to enroll in the Rangel MA Program, it will be advisable to plan financial support for tuition and other educational expenses of $10,000 each year for two years for at least 10 students;

2) All students in the MA program will participate in internships, some of which will be funded by the sponsoring organizations. The Rangel Center will also provide support for students in unpaid internships. Additional practical experience will come in the form of service learning components added to the courses. Note that internships/service learning experiences for undergraduates will be provided through other CCNY programs including: The Rosenberg-Humphrey Program in Public Policy, the International Studies Service Learning Program, the Pre-Law Program and D'Agostino-Greenberg internships, and the Colin Powell Leadership Program;

3) Honoraria and travel for speakers;

4) Food for conferences and speaker series;

5) Computers and computer maintenance;

6) Preparation and materials for recruitment and publicity;

7) Travel and living expenses for internships;

8) Publications.

BUDGET NOTES

1. The first budget section below, Programmatic Costs, is based upon an endowment of $23,000,000, and a conservative expectation of income of $1,150,000 per year, which will meet the Center's programmatic needs.

2. The second budget section illustrates how Building Costs will be met through the investment of $4.7 million for construction/start-up costs, and a $2.3 million endowment for maintenance.

May 23, 2005

Gabe Pressman
322 Central Park West
New York, NY 10025

Dear Gabe:

I am writing to you as a colleague Trustee of the Ann S. Kheel Charitable Trust and a friend with a shared commitment to public service, to share news of an initiative with a potential that has me quite excited. The City College of the City University of New York plans to create the Charles B. Rangel Center for Public Service at the City College to provide an opportunity for education and training for careers in public service for the underprivileged students the College has traditionally served. I want you to know of my personal interest in and enthusiasm for the creation of this Center and my pride in the decision of the City University to name it for me.

As you know, throughout my public career I have believed in the special strength derived from our racial and ethnic diversity and that we as lawmakers must lead in assuring that opportunity for public service be made available to all with the goal of achieving a policymaking community that reflects the rich tapestry of cultures, faiths, colors and ethnicities that make us who we are as a great nation. I am asking you to join me in the creation of a public policy center that will motivate and prepare young people presently underrepresented in public life to pursue careers in public service.

Today, non-whites make up nearly thirty percent of the US population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top

managerial, supervisory, and policy-making positions in the US Federal government are members of minority groups. And by 2050, minority groups in the US will comprise more than 50% of our population.

The Charles B. Rangel Center in the City College of New York, a school in the most ethnically diverse city in our nation and with an unparalleled history of supporting the empowerment of immigrant ethnic groups, will help to ensure that those who run our nation will be reflective of our diversity. I have embraced the College's concept because it will allow me to locate the inspirational aspects of my legacy in my home Harlem community.

As you will see from the enclosed presentation, the Rangel Center at the City College of New York will be alive with the work of scholars and students working on public policy issues and studying the political dimension of change. It will not be a Library or a Museum, but a living institution brimming with ideas and stimulating debate.

Since we are developing a relationship between the Ann Kheel Charitable Trust and the City College and City University of New York, I want to make you aware, through this letter and the enclosed proposal, of the Rangel Center for Public Service as another promising development at the City College.

Sincerely,

Charles B. Rangel
Member of Congress

Gail Sheehy
39 West 67th Street, #302
New York, NY 10023

Dear Gail:

I am writing to you as a colleague Trustee of the Ann S. Kheel Charitable Trust and a friend with a shared commitment to public service, to share news of an initiative with a potential that has me quite excited. The City College of the City University of New York plans to create the Charles B. Rangel Center for Public Service at the City College to provide an opportunity for education and training for careers in public service for the underprivileged students the College has traditionally served. I want you to know of my personal interest in and enthusiasm for the creation of this Center and my pride in the decision of the City University to name it for me.

As you know, throughout my public career I have believed in the special strength derived from our racial and ethnic diversity and that we as lawmakers must lead in assuring that opportunity for public service be made available to all with the goal of achieving a policymaking community that reflects the rich tapestry of cultures, faiths, colors and ethnicities that make us who we are as a great nation. I am asking you to join me in the creation of a public policy center that will motivate and prepare young people presently underrepresented in public life to pursue careers in public service.

Today, non-whites make up nearly thirty percent of the US population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top

managerial, supervisory, and policy-making positions in the US Federal government are members of minority groups. And by 2050, minority groups in the US will comprise more than 50% of our population.

The Charles B. Rangel Center in the City College of New York, a school in the most ethnically diverse city in our nation and with an unparalleled history of supporting the empowerment of immigrant ethnic groups, will help to ensure that those who run our nation will be reflective of our diversity. I have embraced the College's concept because it will allow me to locate the inspirational aspects of my legacy in my home Harlem community.

Memo

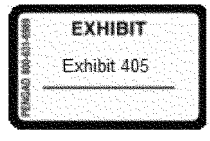
To: Trustees; Gary Hattem; Robyn Brady-Ince; Theodore W. Kheel

From: Ellen K. Jacobs

Re: Minutes of May 31 meeting, CCNY proposal, agenda for meeting on June 3 at 8:00 at Deutsche Bank 280 Park Ave.

Date: June 1, 2005

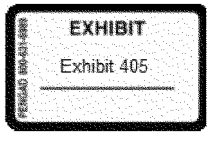
Number of pages: 18 (not including cover)
Note: Enclosed are the agenda and The City College proposal dated December 30, 2004.



The Ann S. Kheel Charitable Trust
75 East 55 Street
New York, NY 10022

Agenda for June 3, 2005 meeting
8:00
At Deutsche Bank
280 Park Ave. 6th floor
48-49th Street on Park Ave.

1. **Discussion of CCNY proposal including amount to commit, trustee involvement (mentoring) and fund-raising.**
2. **We need to make a decision about parameters if the program is to start this Fall.**
3. **Meeting must end no later than 9:00**

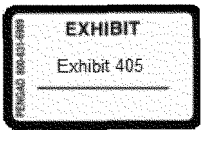


Minutes
The Ann S. Kheel Charitable Trust
May 31, 2005

Present:
Trustees: Congressman Charles B. Rangel
Luis Alvarez-Vila
Veronica Kelly
Gabe Pressman
Gail Sheehy

Others in attendance:
Robyn Brady-Ince
Theodore W. Kheel
Gregory Williams, President CCNY
Ellen K. Jacobs, Executive Director

1. **The minutes of the last meeting were summarized and approved.**
2. **The Draft of the Ann S. Kheel Trust Guidelines was accepted. Called The Ann S. Kheel Scholars for Community Development, it describes the purpose, commitment and application/selection process for the Trust and can be sent to people asking about the Trust.**
3. **Congressman Rangel described the Rangel Center which will be part of CCNY. Although the Rangel Center's goals are the same as those of the Trust, the two are separate entities at this time. Congressman Rangel wants to be sure that Trustees know about his other involvement with CCNY.**
4. **Luis Alvarez reported that the Trust has $1,084,138 in its account which is managed by Brian Convey. The Trustees have already made,but not paid out, 3 grants totalling $210,000: $100,000 to the Hunter College**



CSOC.CBR.00009673

Public Service Scholars ($50,000 per year for 2 years); $100,000 to the New York Urban League for scholarships ($10,000 a year for 10 years) although the Urban League has never applied and has never been given a monetary figure; and $10,000 to The Bowery Mission Women's Center.

5. President Gregory Williams joined the meeting at this point (12:45). He said that the proposed program would allow students to cut back on jobs so that they can become part of the community. To the extent that Trustees want to meet with students and mentor them, he is sure that it would be a welcome addition.
6. Veronica Kelly presented the Trustees position that there be fewer students and a mix of grades. The program would start with 6 freshmen and 6 sophomores and add 6 freshmen each year until the money runs out or there is a new infusion. Advantages of this model include: everyone(students, trustees and administrators) can develop a comfort level with the program; it keeps the costs manageable for the Trust. The cost of the program is $5,000 per year per student. Of that, $4,000 is tuition; the rest fees, books, etc.
7. Williams felt that a larger cohort was better and that the students need to serve with agencies over time. Students serving with agencies need to have a positive experience.
8. The question of fund-raising to keep the Trust alive was discussed. CCNY would help, but not provide lists (those would need to come from the Trustees). There was some hesitation to take on fund-raising. Ted Kheel said that his initial idea did not include using the Trustees as fund-raisers. Any fund-raising would need significant support from CCNY which would be willing to help with office work, but not give lists. Robyn Brady Ince described the Deutsche Bank model in which seed money is given to an organization and, after several

CSOC.CBR.00009674

years, a presentation is made to possible sponsors showing how well the program is doing and the responsibility to pick up future funding then falls to the organization.

9. **Mentoring was discussed. It is flexible and could mean anything from a luncheon with the students to regular meetings. Some people do not have the time to mentor in any significant way. CCNY would have a staff person who would do guidance and agency placement for students.**
10. **To start the program this year, CCNY will need to know the parameters soon. The Trustees agreed to meet on Friday to finalize this grant. The meeting will take place Friday, June 3, 2005 at 8 a.m. at Deutsche Bank, 280 Park Ave, 6th floor. Deutsche Bank is between 48-49th St. Luis Alvarez will make the arrangements.**

Respectfully submitted,

Ellen K. Jacobs

Executive Summary

The Ann S. Kheel Scholars Program at The City College of New York (CCNY) will provide each of 48 needy students with a four-year scholarship of $5,000 per year to cover tuition, fees and books at CCNY. In addition, there would be up to four two-year scholarships for qualified transfer students. The Kheel Scholars Program will enable the 52 committed, needy students selected for the Kheel Scholarships to attend City College and complete their bachelor's degrees by reducing or eliminating the financial barriers to their success and also to engage in public service.

A Proud History and Mission – The Children of the Whole People

The City College of New York was founded in 1847 by Townsend Harris to offer higher education to the children of the working class and immigrants. The College has produced great scientists, captains of industry, public servants, teachers, doctors, lawyers, architects and engineers, opening doors for young men and women with few material resources and opportunities.

Today's City College is a microcosm of New York City, with one of the most diverse student bodies of any college in America. Its more than 12,000 students carry on a tradition of excellence as they win prestigious awards and fellowships, gain acceptance to leading graduate and professional schools, and make their marks in the sciences, in the arts, in public service, in industry, in education.

Access and Excellence

For 157 years, The City College of New York has symbolized the union of excellence and public higher education. The most important avenue to upward mobility and social advancement for generations of New Yorkers, City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented but needy students. With particular focus on meeting the needs of "the children of the whole people," The College provides unique opportunities for underrepresented populations to enter fields new to them with expert skills and education.

CSOC.CBR.00009678

Diversity and Need

Many schools talk about diversity; City College lives it

Last year, *US News and World Report* ranked City College first in diversity in the nation, with African-Americans as the largest minority. This year, City College was ranked first with Hispanic-Americans as the largest minority. The 2004 issue of CCNY's *City Facts* states that in the voluntary section of the admissions application, 87% of CCNY students describe themselves as members of a minority group.

The *Chronicle of Higher Education 2003 Almanac* reports that nationally, within the category of bachelor's degrees earned at all colleges, White students earn 75% of the total, Blacks 8.5%, Hispanics 6.5%, and Asian-Pacific Islanders 6.2%. The same year at City College, however, Blacks received 34.1%, Hispanics 30.1% and Asian/Pacific Islanders 11%, an incredible record of success in populations underrepresented in bachelor's degrees earned. Many of these degrees are awarded in exceptionally demanding programs unique to City College which do not exist elsewhere in the City University system, such as engineering, architecture, biomedical education, and certain science programs.

Most of CCNY's students come from the New York City public schools. Many are immigrants or children of immigrants; they speak 91 languages other than English and were born in 147 countries. City College students are usually the first in their families to go to college, following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families.

Founded to provide children of the poor and new immigrants access to the American dream

Now still, as in its storied past, CCNY students are financially needy. ***Approximately 58% come from families with combined incomes of $25,000 or less;*** three-quarters of the students work while attending school, some at more than one job. Over half of the students attend part time, most often for financial reasons. They pay $5,000/year in tuition, books, and fees. While the comparatively low tuition narrowly makes it possible for them to attend a top quality college, the cost is high when compared to the

EXHIBIT
Exhibit 405

CSOC.CBR.00009679

income many of them, or their families, earn. Because they frequently need to support themselves and sometimes even help support their families, they often take longer to graduate, sometimes having to leave before they earn the bachelor's degree. Working longer hours takes away valuable time from their studies, making it that much more difficult to attain the success they strive for and merit. Few have the time for public service, but many strive to do it nevertheless.

The number of students at City College who require financial aid has grown dramatically. According to the *2003-2004 City Facts*, the total amount of federal, state, and city aid in 2001-2002 needed at City College was $32,364,000. Just two years later, that number rose by 35% to $43,683,000 as the number of students requesting and needing aid continued to increase significantly.

Currently, more than 90% of CCNY students qualify for financial aid; most get something, but it is rarely enough. The other four original senior colleges in the system—Brooklyn, Queens, Hunter, and Baruch—are based in more affluent communities and serve more advantaged populations. City College serves the Harlem community, whose students make up a large portion of the CCNY student body. There are other reasons, also, why City College's talented students are often the neediest.

Why Students Come to City College

A small university, with unique courses of study, 40 graduate degree programs and 10 of CUNY's doctoral programs.

City College draws many of the neediest applicants to the City University system. Why? Because The City College of New York is the only college in the CUNY system with Schools of Architecture, Engineering, and Biomedical Education, and many innovative programs in environmental engineering and science, graphic design, media arts production, publishing, and urban legal studies. Indeed, in most cases, these are the only public schools or programs of their kind in New York City. Consequently, City College is the sole gateway for these students to enter these professions, as they cannot afford to attend private institutions that may offer a comparable course of study. Most have meager financial resources but great resolve.

Profiles in Determination

The 2003 valedictorian, Sylvia Arrendondo, worked as a housekeeper while she completed her demanding chemical engineering program here. She now has a full graduate fellowship at the University of Texas in engineering. Zhanna Soushko, the 2004 CCNY valedictorian, worked as a waitress during her entire time at City College.

CSOC.CBR.00009680

After graduation, she entered the Ph.D. program at the University of Denver on a full fellowship.

City College also has the biggest undergraduate science research program in the New York Metropolitan area, including Columbia and NYU. Rhodes Scholar Lev Sviridov, who was homeless when he first came to this country from Russia a mere 10 years ago, participates in this program, exemplifying the kind of student City College attracts and nourishes. These stories are not unique; in fact, they are characteristic of the typical student profile at City College.

The Ann S. Kheel Charitable Trust

Formed to honor Ann S. Kheel's lifetime of work in the fight for social and racial justice, The Ann S. Kheel Charitable Trust's mission is to support "organizations dedicated to improving the lives of disadvantaged New Yorkers with a particular focus on adult and child education, racial equality, and the environment."

The City College of New York is dedicated to those same ideals, advancing social and racial equality through the most powerful means possible—by providing higher education to minorities and the disadvantaged.

The Ann S. Kheel Scholars Program

The late Ann S. Kheel, who devoted much of her life to fighting for equality of opportunity for all people through her passionate civic leadership in the New York Urban League, the Schomburg Center for Black Culture, and many other organizations, cared deeply about social justice, the rights of women and minorities, and New York City public education.

The City College of New York, founding college and flagship of CUNY, boasts a lifelong heritage of educating refugee, immigrant, minority and disadvantaged populations. Establishing a major scholarship program at CCNY in Ann S. Kheel's memory would be both fitting and productive. The College already has students in place who want to succeed and who are committed to social justice and public service.

EXHIBIT
Exhibit 405

Student Public Service at City College

City College proudly claims many students who, regardless of tremendous financial and family pressures, take the time to provide service to their communities. A few examples are:

- The neighborhood tutoring program through which students provide on- and off-campus assistance to the community at local public elementary, junior high and high schools;
- The Rosenberg/Humphrey internship program, in which students take summer internships at government agencies in Washington, DC, and New York in executive and Congressional offices, House and Senate committees, labor unions, governmental agencies, advocacy groups and policy research organizations;
- The service learning program that has provided internships for City College students to go to the Central African country of Rwanda, where they spent the summer working in the Rwanda Ministry of Finance's Poverty Alleviation program, the Ministry of Gender and Development, and the Ministry of Health's Psycho-Social Trauma unit.
- All students at the Sophie Davis School of Biomedical Education make a commitment to enter community medicine in underserved and disadvantaged communities; part of their commitment is to engage in volunteer work in those neighborhoods during their school years;
- Many CCNY Student Clubs and Co-Curricular activities encourage community service, such as the following:

  City College International Medical Relief Team To coordinate student participation in international medical missions; and to fundraise and coordinate medical supply relief efforts with sister clinics and agencies in disadvantaged countries.

  Dominican Club To emphasize unity and education, promote culture and serve voluntarily within our communities.

  The Messenger To expose students to their community and inspire a sense of social responsibility.

  Students Helping Out! Shout! is established to provide students with volunteer activities in communities in NYC. Volunteer sites include soup kitchens, churches, hospitals, and local schools.

Although 75% of CCNY students must work at full or part time jobs in order to help pay for their tuition, living costs, and in some cases, family needs, many students have nevertheless taken the time to participate in these and other programs, along with their very demanding academic schedules.

Because of these circumstances, these dedicated students have been unable to devote as much time as they would like to public service, although many have expressed

CSOC.CBR.00009682

interest in becoming more intensively involved. What The College has not had so far is a yearlong public service program with funding sufficient to enable these committed students to work fewer hours so that they can concentrate on their studies, and still be able to spend more time over the entire year pursuing public service. *The Ann S. Kheel Scholars Program* could fill this very great need.

This historic undertaking will enable City College's most civic-minded students to take the lead, as so many CCNY students have before them, in public service. They will graduate as part of a new cadre of scholar/public servants, bring honor to their alma mater, and carry on its highest traditions. They will be associated with the Ann S. Kheel Charitable Trust in a venture intended to open the hearts and minds of CCNY students as they provide service to all the varied communities The College serves.

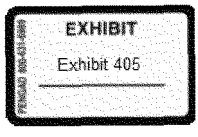
Kheel Scholars Program Goals

1. Make it financially feasible possible for students at The City College of New York to experience the rewards that can come from time spent performing public service.
2. Provide opportunities for these students to work at a variety of not-for-profit, community, government, and educational agencies.
3. Reward and encourage civic-minded young people by helping them with their City College education for the four years they will be involved in the program.
4. Encourage some of City College's best students to consider devoting additional time – or even their careers – to public service-oriented work.
5. Provide a benefit (in the form of volunteer workers) for educational, non-profit and government-based organizations that cannot afford to pay for interns or service aids.

CCNY's Greatest Need

What is needed is major financial support to enable these dedicated and determined students to achieve the goals for which they strive. The **Ann S. Kheel Scholars Program** would provide a $5,000 scholarship/year per student for CCNY applicants who demonstrate need, engage in public service to disadvantaged communities, make satisfactory progress, and maintain The College's required GPA throughout the four years. A program that would serve 12 new students per year and support them through to the bachelor's degree would make an important difference in those students' lives.

Budgeted at a total of $1,000,000, the **Ann S. Kheel Scholars Program** would provide full four-year scholarships for 12 students each year for four successive years. At the end of the program, a total of 48 students will have



CSOC.CBR.00009683

benefited from the Kheel four-year Scholarships. This would leave City College with $40,000 to be allocated as two-year scholarships for up to four dedicated needy transfer students during the grant period.

While some Kheel Scholars may need to continue to supplement their income with paid employment, it is anticipated that the generosity of the Ann S. Kheel Charitable Trust would allow them to at least reduce the number of hours they might need to work, providing the extra study time they need to excel, permitting them to engage more fully in public service, and significantly easing the economic burdens they bear.

CCNY's Responses to the Kheel Foundation's Questions

1. How will the Ann S. Kheel Scholars Program be promoted among potential applicants?

    a. The Ann S. Kheel Scholars Program will be publicized on the City College website, in all freshman materials, and in the high school visits made by CCNY admissions officers. It will also be publicized through posters, emails, at the Finley Student Center, and in the Office of Financial Aid.
    b. Applicants must submit a letter of interest, stating why they want to do public service and describing community service they have already provided.
    c. Applicants must provide expressly written documentation/job descriptions from at least two qualifying organizations interested in retaining the student for unpaid employment or a volunteer position.

2. What experience does the institution have in identifying and supporting students engaged in public service to disadvantaged communities?

    a. Many CCNY students are already actively engaged in public service through many of the voluntary, co-curricular, and academic programs (see Student Public Service at City College above).
    b. City College encourages these groups by providing space, faculty advising, some staff support, some paid internships, and wherever possible, some funds.
    c. City College will provide a faculty program director.

3. What other support, financial and in services, will the institution provide to the selected students?

    a. Students will be assigned to one or more faculty advisors for the time they are Kheel Scholars. They will meet regularly with these advisors both individually and as a group.
        i. The advisor will help students become oriented to their new working culture.

CSOC.CBR.00009684

ii. The advisor will help students balance their public service work with class work.
iii. The advisor will be available to address other concerns and questions that may arise during the course of the year.

b. The Kheel Scholars will be provided with a special meeting place on campus where they can discuss freely their common experiences and form the kinds of social bonds that are often scarce at commuter schools.

4. How many students would the given funds be able to support?

a. A cohort of 12 students each year would receive a four-year $5,000 per year Kheel Scholarships.
b. A new cohort would begin each year for four years.
c. Up to four transfer students would receive two-year Kheel Scholarships.

5. What criteria would the institution use to select the students and who will be making the recommendations of selected students?

a. A committee, composed of faculty, financial aid officers, and administrators would be formed to make recommendations to the Trustees.
b. Faculty, staff, high school teachers, community leaders, and past volunteer supervisors would be invited to make nominations to the committee.
c. Students would be recommended to the Trustees on the basis of past interest and experience in public service, although students new to public service will also be selected based on a personal interview.

6. How will the institution determine the financial need, academic performance and demonstration of civic leadership of candidates in making their selections?

a. Grade point average will determine academic performance.
b. Students should be in good standing academically when they enter the program and must remain in good standing academically throughout.
c. Financial need will be determined by the Financial Aid Office (see below).
d. Civic leadership will be determined through demonstrated past experience and the personal interview.

CSOC.CBR.00009685

7. How will the institution measure performance of the scholars?

    a. Students will agree to maintain their grades at the required level, and seek out their advisor if the public service work becomes too onerous or time-consuming.
    b. Students will be encouraged to maintain a journal.
    c. Once each year, all students will provide a written and verbal presentation summarizing their work and its value to society, and highlighting experiences and skills they feel especially proud to have achieved.

8. Who within the institution will manage the program and who will be assigned to interface with the Trust's directors?

    a. The City College of New York will appoint a faculty director of the program, who will meet with students' faculty advisors and ensure the smooth running of the program. This faculty member will report to Zeev Dagan, City College Provost.
    b. The faculty director will interface directly with the Trustees.
    c. In addition, Trustees may contact Rachelle Butler, Vice President for Development and Institutional Advancement.
    d. Regular meetings between students and Trustees will be an important element of the Program.

The CCNY Financial Aid Selection Process

The City College of New York Office of Financial Aid helps CCNY students obtain the maximum aid possible through a highly organized, confidential, yet individualized combination of information sessions and personal advising. Through this process, which involves a structured set of steps directed toward the selection of the neediest students, City College is able to determine which students require additional funding beyond federal, state, and city sources to be able to attend The College. Then, first making certain that those students closest to graduation will be able to complete their degrees, the Office of Financial Aid works to match needy students with privately funded scholarship assistance. In this way, those most in need will get help meeting their economic challenges first. This enables The College to identify those students who would benefit most from a scholarship program.

Conclusion

At the end of seven years, more than 50 students will have graduated and gone on to careers or graduate school. These 50+ students will serve as a living memorial to Ann S. Kheel and her lifetime of work dedicated to education and opportunity. At the same time, the Kheel Scholarships will serve as a front-end transfusion of support and further advance The City College of New York in its vital mission of excellence and access.

Our request of the Ann S. Kheel Charitable Trust

THEREFORE: On behalf of The City College of New York, in order to create:

The Ann S. Kheel Scholars Program
at
The City College of New York

We ask the Ann S. Kheel Charitable Trust to consider a gift of $1,000,000 or $200,000 per year for five years, for a total gift of $1,000,000.

On behalf of the aspiring students of The City College of New York, we thank you for your thoughtful consideration of this request. If you have any questions or need further information, please contact President Gregory H. Williams or Vice President Rachelle Butler at the Office of Development and Institutional Advancement at the numbers below.

Gregory H. Williams, President

Executive Summary

The Ann S. Kheel Scholars Program in Community Service at The City College of New York (CCNY) in year 2005-2006 will provide each of six freshman and six sophomore students who demonstrate need with a scholarship of $5,000 per year for four years to cover tuition, fees and books at CCNY. In year 2006-2007, the Program will add six new freshmen; in 2007-2008, it will again add six new freshmen. The Kheel Scholars Program will enable the 24 committed, needy students selected for the Kheel Scholarships to attend City College, earn their bachelor's degree, and engage in community service by reducing or eliminating the financial barriers to their success. The initial phase will cost $270,000 for two years; full scholarships for the 24 students will eventually total $450,000. Each year, reports will be sent to the Foundation. In year 2007-2008, there will be a full evaluation of the Program which will determine the Program's future.

A Proud History and Mission – The Children of the Whole People

The City College of New York was founded in 1847 by Townsend Harris to offer higher education to the children of the working class and immigrants. The College has produced great scientists, captains of industry, public servants, teachers, doctors, lawyers, architects and engineers, opening doors for young men and women with few material resources and opportunities.

Today's City College is a microcosm of New York City, with one of the most diverse student bodies of any college in America. Its more than 12,000 students carry on a tradition of excellence as they win prestigious awards and fellowships, gain acceptance to leading graduate and professional schools, and make their marks in the sciences, in the arts, in community service, in industry, in education.

Access and Excellence

For 157 years, The City College of New York has symbolized the union of excellence and public higher education. The most important avenue to upward mobility and social advancement for generations of New Yorkers, City College has provided an unsurpassed educational opportunity to hundreds of thousands of talented but needy students. With particular focus on meeting the needs of "the children of the whole people," The College

EXHIBIT
Exhibit 406

provides unique opportunities for underrepresented populations to enter fields new to them with expert skills and education.

Diversity and Need

Many schools talk about diversity; City College lives it
Last year, *US News and World Report* ranked City College first in diversity in the nation, with African-Americans as the largest minority. This year, City College was ranked first with Hispanic-Americans as the largest minority. The 2004 issue of CCNY's *City Facts* states that in the voluntary section of the admissions application, 87% of CCNY students describe themselves as members of a minority group.

The *Chronicle of Higher Education 2003 Almanac* reports that nationally, within the category of bachelor's degrees earned at all colleges, White students earn 75% of the total, Blacks 8.5%, Hispanics 6.5%, and Asian-Pacific Islanders 6.2%. The same year at City College, however, Blacks received 34.1%, Hispanics 30.1% and Asian/Pacific Islanders 11%, an incredible record of success in populations underrepresented in bachelor's degrees earned. Many of these degrees are awarded in exceptionally demanding programs unique to City College which do not exist elsewhere in the City University system, such as engineering, architecture, biomedical education, and certain science programs.

Most of CCNY's students come from the New York City public schools. Many are immigrants or children of immigrants; they speak 91 languages other than English and were born in 147 countries. City College students are usually the first in their families to go to college, following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families.

Founded to provide children of the poor and new immigrants access to the American dream
Now still, as in its storied past, CCNY students are financially needy. ***Approximately 58% come from families with combined incomes of $25,000 or less;*** three-quarters of the students work while attending school, some at more than one job. Over half of the students attend part time, most often for financial reasons. They pay $5,000/year in tuition, books, and fees. While the comparatively low tuition narrowly makes it possible for them to attend a top quality college, the cost is high when compared to the income many of them, or their

EXHIBIT
Exhibit 406

CSOC.CBR.00009581

families, earn. Because they frequently need to support themselves and sometimes even help support their families, they often take longer to graduate, sometimes having to leave—before they earn the bachelor's degree. Working longer hours takes away valuable time from their studies, making it that much more difficult to attain the success they strive for and merit. Few have the time for community service, but many strive to do it nevertheless.

The number of students at City College who require financial aid has grown dramatically. According to the *2003-2004 City Facts*, the total amount of federal, state, and city aid in 2001-2002 needed at City College was $32,364,000. Just two years later, that number rose by 35% to $43,683,000 as the number of students requesting and needing aid continued to increase significantly.

Currently, more than 90% of CCNY students qualify for financial aid; most get something, but it is rarely enough. The other four original senior colleges in the system—Brooklyn, Queens, Hunter, and Baruch—are based in more affluent communities and serve more advantaged populations. City College serves the Harlem community, whose students make up a large portion of the CCNY student body. There are other reasons, also, why City College's talented students are often the neediest.

Why Students Come to City College

A small university, with unique courses of study, 40 graduate degree programs and 10 of CUNY's doctoral programs.

City College draws many of the neediest applicants to the City University system. Why? Because The City College of New York is the only college in the CUNY system with Schools of Architecture, Engineering, and Biomedical Education, and many innovative programs in environmental engineering and science, graphic design, media arts production, publishing, and urban legal studies. Indeed, in most cases, these are the only public schools or programs of their kind in New York City. Consequently, City College is the sole gateway for these students to enter these professions, as they cannot afford to attend private institutions that may offer a comparable course of study. Most have meager financial resources but great resolve.

Profiles in Determination

The 2003 valedictorian, Sylvia Arrendondo, worked as a housekeeper while she completed her demanding chemical engineering program here. She now has a full graduate fellowship at the University of Texas in engineering. Zhanna Soushko, the 2004 CCNY valedictorian, worked as a waitress during her entire time at City College. After graduation, she entered the Ph.D. program at the University of Denver on a full fellowship.

This historic undertaking will enable City College's most civic-minded students to take the lead, as so many CCNY students have before them, in community service. They will graduate as part of a new cadre of scholar/public servants, bring honor to their alma mater, and carry on its highest traditions. They will be associated with the Ann S. Kheel Charitable Trust in a venture intended to open the hearts and minds of CCNY students as they provide service to all the varied communities The College serves.

Kheel Scholars Program Goals

1. Make it financially feasible possible for students at The City College of New York to experience the rewards that can come from time spent performing community service.
2. Provide opportunities for these students to work at a variety of not-for-profit, community, government, and educational agencies.
3. Reward and encourage civic-minded young people by helping them with their City College education while they are involved in the program.
4. Encourage some of City College's best students to consider devoting additional time – or even their careers – to community service-oriented work.
5. Provide a benefit (in the form of volunteer workers) for educational, non-profit and government-based organizations that cannot afford to pay for interns or service aids.

CCNY's Greatest Need

What is needed is major financial support to enable these dedicated and determined students to achieve the goals for which they strive. The **Ann S. Kheel Scholars Program** will provide a four-year $5,000 scholarship/year per student for CCNY applicants who demonstrate need, engage in community service to disadvantaged communities, make satisfactory progress, and maintain The College's required GPA. A program that will serve six ~~freshman~~ and six ~~sophomore~~ students in the first year and add six new ~~freshmen~~ each year will make an important difference in those students' lives.

Budgeted at an initial cost of ~~$270,000~~ the **Ann S. Kheel Scholars Program** will provide scholarships of $5,000 for 12 students in year one, and then add six new freshmen each year for two more years. Each year, The City College of New York will report to the Ann S. Kheel Foundation on the accomplishments of the students and their progress in their studies and their community service. At the end of the initial phase, in 2007-2008, The College will file a final report for review by the Ann S. Kheel Foundation that will serve as the basis for potential additional funding.

EXHIBIT
Exhibit 406

While some Kheel Scholars may need to continue to supplement their income with paid employment, it is anticipated that the generosity of the Ann S. Kheel Charitable Trust would allow them to at least reduce the number of hours they might need to work, providing the extra study time they need to excel, permitting them to engage more fully in community service, and significantly easing the economic burdens they bear.

Roles for the Ann S. Kheel Foundation

The City College of New York would welcome the participation of members of the board of the Ann S. Kheel Foundation in implementing the Ann S. Kheel Scholars Program and enabling it to continue and expand through some or all of the following means:

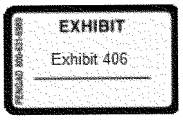
1. Serve as mentors to the Ann S. Kheel Scholars;
2. Suggest and facilitate community service placements for Scholars;
3. Promote increased visibility to the Program through media contacts;
4. Work with the CCNY Office of Development & Institutional Advancement in fundraising for the Ann S. Kheel Scholars Program through leadership in fundraising events, such as galas and private dinners for interested individuals;
5. Provide professional contacts at the highest levels to other interested foundations, corporations, and individuals who could be approached for funding.

CCNY's Responses to the Kheel Foundation's Questions

1. How will the Ann S. Kheel Scholars Program be promoted among potential applicants?

   a. The Ann S. Kheel Scholars Program will be publicized:
      1) on the City College website,
      2) in all freshman materials,
      3) in the high school visits made by CCNY admissions officers,
      4) through posters, emails, at the Finley Student Center, and in the Office of Financial Aid, and
      5) through a major new brochure especially designed and printed for distribution city-wide.
   b. Applicants must submit a letter of interest, stating why they want to do public service and describing community service they have already provided.
   c. Applicants must provide expressly written documentation/job descriptions from at least two qualifying organizations interested in retaining the student for unpaid employment or a volunteer position.

2. What experience does the institution have in identifying and supporting students engaged in community service to disadvantaged communities?



CSOC.CBR.00009584

a. Many CCNY students are already actively engaged in community service through many of the voluntary, co-curricular, and academic programs (see Student Community service at City College above).
b. City College encourages these groups by providing space, faculty advising, some staff support, some paid internships, and wherever possible, some funds.
c. City College will provide a faculty program director.

3. What other support, financial and in services, will the institution provide to the selected students?

   a. Students will be assigned to one or more faculty advisors who specialize in community service programs for the time they are Kheel Scholars. They will meet regularly with these advisors both individually and as a group.
      i. The advisor will help students become oriented to their new working culture.
      ii. The advisor will help students balance their community service work with class work.
      iii. The advisor will be available to address other concerns and questions that may arise during the course of the year.

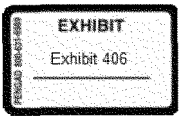
   b. The Kheel Scholars will be provided with a special meeting place on campus where they can discuss freely their common experiences and form the kinds of social bonds that are often scarce at commuter schools.

4. How many students will the given funds be able to support?

   a. The first cohort of six freshmen and six sophomore students will receive $5,000 per year Kheel Scholarships.
   A new group of six freshmen would begin in each of the next two years.

5. What criteria would the institution use to select the students and who will be making the recommendations of selected students?

   a. A committee, composed of faculty, financial aid officers, and administrators would be formed to make recommendations to the Trustees.
   b. Faculty, staff, high school teachers, community leaders, and past volunteer supervisors would be invited to make nominations to the committee
   c. Selected students will be recommended to the Trustees on the basis of past interest and experience in community service; students new to community service will also be selected based on a personal interview.



6. How will the institution determine the financial need, academic performance and demonstration of civic leadership of candidates in making their selections?

    a. Grade point average will determine academic performance.
    b. Students should be in good standing academically when they enter the program and must remain in good standing academically throughout.
    c. Financial need will be determined by the Financial Aid Office (see below).
    d. Civic leadership will be determined through demonstrated past experience and the personal interview.

7. How will the institution measure performance of the scholars?

    a. Students will agree to maintain their grades at the required level, and seek out their advisor if the community service work becomes too onerous or time-consuming.
    b. Students will be encouraged to maintain a journal.
    c. Once each year, all students will provide a written and verbal presentation summarizing their work and its value to society, and highlighting experiences and skills they feel especially proud to have achieved.

8. Who within the institution will manage the program and who will be assigned to interface with the Trust's directors?

    a. The City College of New York will appoint a faculty director of the program, who will meet with students' faculty advisors and ensure the smooth running of the program. This faculty member will report to Zeev Dagan, City College Provost.
    b. The faculty director will interface directly with the Trustees.
    c. In addition, Trustees may contact Rachelle Butler, Vice President for Development and Institutional Advancement.
    d. Regular meetings between students and Trustees will be an important element of the Program.

The CCNY Financial Aid Selection Process

The City College of New York Office of Financial Aid helps CCNY students obtain the maximum aid possible through a highly organized, confidential, yet individualized combination of information sessions and personal advising. Through this process, which involves a structured set of steps directed toward the selection of the neediest students, City College is able to determine which students require additional funding beyond federal, state, and city sources to be able to attend The College. Then, first making certain that those students closest to graduation will be able to complete their degrees. The Office of Financial Aid works to match needy students with privately funded scholarship assistance. In this way, those most in need will get help meeting their economic challenges first. This enables The College to identify those students who would benefit most from a scholarship program.

Conclusion

At the end of three years, 24 students will have received Ann S. Kheel Scholarships. These students will serve as a living memorial to Ann S. Kheel and her lifetime of work dedicated to education and opportunity. At the same time, the Kheel Scholarships will serve as a front-end transfusion of support and further advance The City College of New York in its vital mission of excellence and access.

The Office of Financial Aid works to match needy students with privately funded scholarship assistance. In this way, those most in need will get help meeting their economic challenges first. This enables The College to identify those students who would benefit most from a scholarship program.

Our request of the Ann S. Kheel Charitable Trust

THEREFORE: On behalf of The City College of New York, in order to create:

The Ann S. Kheel Scholars Program in Community Service
at
The City College of New York

We ask the Ann S. Kheel Charitable Trust to consider a gift of $$120,000 per year for two years, for a total gift of $240,000 during the Program's initial phase. At the end of the initial phase, The College would like to return to the Foundation for funds to continue the Program.

On behalf of the aspiring students of The City College of New York, we thank you for your thoughtful consideration of this request. If you have any questions or need further information, please contact President Gregory H. Williams or Vice President Rachelle Butler at the Office of Development and Institutional Advancement at the numbers below.

Mrs. Ellen Kheel Jacobs
108 East 82nd Street, #7A
New York, NY

Dear Mrs. Jacobs:

Enclosed are 10 copies of the revised proposal from The City College of New York to the Ann S. Kheel Foundation according to their recommendations to President Gregory H. Williams.

Thank you so much for your assistance with this and for considering The College for a grant from the Kheel Foundation. We are very appreciative.

Sincerely,

Rachelle Butler
Vice President

DATE: **June 13, 2005**

Enclosed are copies of the minutes from the meeting on June 3 and the letter to President Williams.

CSOC.CBR.00009689

Minutes
The Ann S. Kheel Charitable Trust Meeting
June 3, 2005

Present: Trustees:
Congressman Charles B. Rangel
Luis Alvarez
Veronica Kelly
Gail Sheehy

Also present: Theodore W. Kheel, Ellen Kheel Jacobs

1. The updated proposal from CCNY was discussed. Instead of beginning in the freshman year, it was decided that six scholars should begin in their sophomore and six in their junior year (totaling 12 scholars in year #1) to allow them time to mature and the university time to get to know them. Six new scholars would start the next year in their sophomore year and there would be 3 grades of scholars. An additional advantage of this plan is that publicity within the University would allow some more reticent students to hear about the program.

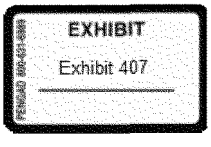
2. It was suggested that the program focus on more than public service since Ann Kheel was a wife and mother as well as a community activist.

3. As a result, the focus was broadened from "public service" to "community involvement." This involvement could be small and not associated with an organization. The guidelines will be changed to reflect this change of focus. The CCNY proposal will be modified.

4. It was decided to give enough money to see 4 classes of sophomores and one initial class of juniors through to graduation. Half ($220,000) of this would be given now; the other half would be given in 2 years when the program is reviewed.

5. CCNY can reapply at the end two years when the program is reviewed.

6. How does this inter-relate with the Rangel Center? It is very similar and could, in years to come, become part of the Rangel Center but at present there is no interrelation.



7. Mentoring was discussed. It was decided that there would be periodic meetings with the students. The initial meeting would present the ideals of Ann Kheel, perhaps using the video from the memorial service. Other ideas discussed included: bringing in "outside" people as inspiration and only a few Trustees meeting with groups at each meeting.

8. Ellen will contact CCNY to let them know of our decisions.

Respectfully submitted,
Ellen K. Jacobs

June 10, 2005

Gregory H. Williams, President
The City College of New York
138th Street and Convent Avenue,
A-300
New York, NY 10031

Dear President Williams:

The Ann S. Kheel Charitable Trust is pleased to make a grant of $440,000 based on your proposal of June 2, 2005. There will be a review of this initial commitment after the second year and a decision about extending the program (with or without changes) will be made at that time.

We make this grant with the following changes to your proposal:

Scholarships will begin in the sophomore year, not the freshman year. Our grant will cover the entering class of 2005: 6 sophomores and 6 juniors plus an additional 3 classes of sophomores (one each year in 2006, 2007, 2008) for a total of four years. The grant allows for 2 transfer students (juniors or seniors) and will cover the four entering classes through to graduation.

To qualify, students will not need to do "public service" but will instead have some sort of "community involvement" in order to make eligible all students who are interested in helping others. This involvement need not be with an organization.

The Trustees will meet with the selected Ann S. Kheel scholars periodically during the year. Our goal is to share her vision and her ideals.

The first installment of $220,000 will be paid upon receipt of your adjusted proposal. The balance will be paid at the end of the second year.

We look forward to working with you in the years ahead.

Sincerely,

Ellen K. Jacobs
Executive Director

"DRAFT"

Amended as agreed on 6/14/05

The Ann S. Kheel Scholars
For Community Development

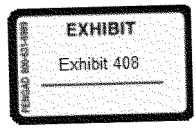
Background

The Ann S. Kheel Charitable Trust (the Trust) is making available philanthropic resources for scholarships to benefit disadvantaged New Yorkers pursuing college degrees. The Trust seeks to reach students who have demonstrated a commitment to their local communities through civic leadership. The scholarships will be awarded to students at a selected New York City institution(s) based on financial need, academic performance and promise, and community involvement. Through invitation only, selected colleges, universities and nonprofit organizations are asked to respond to this request for proposals and describe how they would manage and support The Ann S. Kheel Scholars program.

The Ann S. Kheel Charitable Trust was established by Theodore Kheel in honor of his wife Ann to celebrate her personal legacy of community activism and as a champion of tolerance and cultural diversity. Prominent New Yorkers and close friends of Ann S. Kheel who serve as directors of the Trust, and as stewards of this endowment, include Congressman Charles Rangel, Luis Alvarez, Veronica Kelly, Gabe Pressman and Gail Sheehy. The executive director of the Trust is Ann's daughter, Ellen Jacobs.

The Commitment

The Trust will provide funds annually in support of the scholars. The Trust's directors have committed their own time to serve as mentors and role models to the selected scholars. It is intended the scholars will meet at least once in a given academic year with the directors to learn about their careers and commitments to public service.



CSOC.CBR.00009698

Request for Proposals

Institutions responding to the Request for Proposals should offer a program description as to how they would manage the Ann S. Kheel Scholars initiative. Proposals should specifically respond to the following questions:

1) How will the Ann S. Kheel Scholars program be promoted among potential applicants?
2) What experience does the institution have in identifying and supporting students engaged in public service to disadvantaged communities?
3) What other support, financial and in services, will the institution provide to the selected students?
4) How many students would the given funds be able to support?
5) What criteria would the institution use to select the students and who will be making the recommendations of selected students?
6) How will the institution determine the financial need, academic performance and demonstration of civic leadership of candidates in making their selections?
7) How will the institution measure performance of the scholars?
8) Who within the institution will manage the program and who will be assigned to interface with the Trust's directors?

Selection Process

Based on the proposals submitted, the Trust's directors will select one or more institutions for support. The commitment will be for at least two years and reviewed annually for performance and renewal. The directors will ratify the selection of students based on the recommendation of the selected institution(s).

June 24, 2005

Mrs. Ellen K. Jacobs
Executive Director
Ann S. Kheel Charitable Trust
75 East 55th Street
New York, NY 10022

Dear Ellen,

On behalf of President Gregory H. Williams and the talented, dedicated students of The City College of New York, I would like to thank you and the committed trustees of the Ann S. Kheel Charitable Trust for your wonderful grant. This historic undertaking will enable CCNY students to engage in unpaid but vital community service of all kinds while permitting them to devote important hours to their studies.

Enclosed is a revised version of the proposal that includes the changes mentioned in your letter of June 6, 2005. Please let me know if anything further needs to be adjusted. Of course, please also feel free to be in touch with me by phone at 212 650- or by email at rbutler

Our deepest gratitude to you and the Foundation for your vision and fidelity to the ideals of Ann S. Kheel. It will be our privilege at City College to be a living memorial to those ideals.

Sincerely,

Rachelle Butler
Vice President

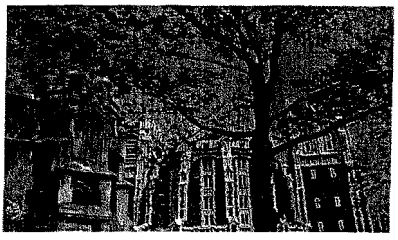
Executive Summary

The Ann S. Kheel Scholars Program in Community Service at The City College of New York (CCNY) in year 2005-2006 will provide each of six sophomore and six junior students who demonstrate need with a scholarship of $5,000 per year for two-three years to cover tuition, fees and books at CCNY through to graduation. In year 2006-2007, the Program will add six new sophomores; in 2007-2008, it will again add six new sophomores; and in 2008-2009, it will again add six new sophomores. The grant will also allow for two transfer students, junior or seniors, and will cover them through graduation. The Kheel Scholars Program will enable the 32 committed, needy students selected for the Kheel Scholarships to attend City College, earn their bachelor's degree, and engage in community service by reducing or eliminating the financial barriers to their success. Scholarships for the 32 students in this part of the Program will eventually total $440,000. Each year, reports will be sent to the Foundation. Following year 2007-2008, there will be a full evaluation of the Program which will determine whether the Program will be extended and, of so, whether changes should be made.

A Proud History and Mission – The Children of the Whole People

The City College of New York was founded in 1847 by Townsend Harris to offer higher education to the children of the working class and immigrants. The College has produced great scientists, captains of industry, public servants, teachers, doctors, lawyers, architects and engineers, opening doors for young men and women with few material resources and opportunities.



Today's City College is a microcosm of New York City, with one of the most diverse student bodies of any college in America. Its more than 12,000 students carry on a tradition of excellence as they win prestigious awards and fellowships, gain acceptance to leading graduate and professional schools, and make their marks in the sciences, in the arts, in community service, in industry, in education.

Access and Excellence

For 157 years, The City College of New York has symbolized the union of excellence and public higher education. The most important avenue to upward mobility and social

EXHIBIT
Exhibit 409

CSOC.CBR.00024485

educational opportunity to hundreds of thousands of talented but needy students. With particular focus on meeting the needs of "the children of the whole people," The College provides unique opportunities for underrepresented populations to enter fields new to them with expert skills and education.

Diversity and Need

Many schools talk about diversity; City College lives it

Last year, *US News and World Report* ranked City College first in diversity in the nation, with African-Americans as the largest minority. This year, City College was ranked first with Hispanic-Americans as the largest minority. The 2004 issue of CCNY's *City Facts* states that in the voluntary section of the admissions application, 87% of CCNY students describe themselves as members of a minority group.

The *Chronicle of Higher Education 2003 Almanac* reports that nationally, within the category of bachelor's degrees earned at all colleges, White students earn 75% of the total, Blacks 8.5%, Hispanics 6.5%, and Asian-Pacific Islanders 6.2%. The same year at City College, however, Blacks received 34.1%, Hispanics 30.1% and Asian/Pacific Islanders 11%, an incredible record of success in populations underrepresented in bachelor's degrees earned. Many of these degrees are awarded in exceptionally demanding programs unique to City College which do not exist elsewhere in the City University system, such as engineering, architecture, biomedical education, and certain science programs.

Most of CCNY's students come from the New York City public schools. Many are immigrants or children of immigrants; they speak 91 languages other than English and were born in 147 countries. City College students are usually the first in their families to go to college, following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families.

Founded to provide children of the poor and new immigrants access to the American dream

Now still, as in its storied past, CCNY students are financially needy. ***Approximately 58% come from families with combined incomes of $25,000 or less;*** three-quarters of the students work while attending school, some at more than one job. Over half of the students attend part time, most often for financial reasons. They pay $5,000/year in tuition, books, and fees. While the comparatively low tuition

EXHIBIT
Exhibit 409

CSOC.CBR.00024486

CSOC.CBR.00024486

narrowly makes it possible for them to attend a top quality college, the cost is high when compared to the income many of them, or their families, earn. Because they frequently need to support themselves and sometimes even help support their families, they often take longer to graduate, sometimes having to leave before they earn the bachelor's degree. Working longer hours takes away valuable time from their studies, making it that much more difficult to attain the success they strive for and merit. Few have the time for community service, but many strive to do it nevertheless.

The number of students at City College who require financial aid has grown dramatically. According to the *2003-2004 City Facts*, the total amount of federal, state, and city aid in 2001-2002 needed at City College was $32,364,000. Just two years later, that number rose by 35% to $43,683,000 as the number of students requesting and needing aid continued to increase significantly.

Currently, more than 90% of CCNY students qualify for financial aid; most get something, but it is rarely enough. The other four original senior colleges in the system—Brooklyn, Queens, Hunter, and Baruch—are based in more affluent communities and serve more advantaged populations. City College serves the Harlem community, whose students make up a large portion of the CCNY student body. There are other reasons, also, why City College's talented students are often the neediest.

Why Students Come to City College

A small university, with unique courses of study, 40 graduate degree programs and 10 of CUNY's doctoral programs.

City College draws many of the neediest applicants to the City University system. Why? Because The City College of New York is the only college in the CUNY system with Schools of Architecture, Engineering, and Biomedical Education, and many innovative programs in environmental engineering and science, graphic design, media arts production, publishing, and urban legal studies. Indeed, in most cases, these are the only public schools or programs of their kind in New York City. Consequently, City College is the sole gateway for these students to enter these professions, as they cannot afford to attend private institutions that may offer a comparable course of study. Most have meager financial resources but great resolve.

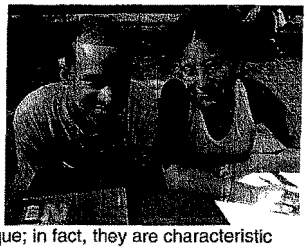
Profiles in Determination

The 2003 valedictorian, Sylvia Arrendondo, worked as a housekeeper while she completed her demanding chemical engineering program here. She now has a full graduate fellowship at the University of Texas in engineering. Zhanna Soushko, the 2004 CCNY valedictorian,

CSOC.CBR.00024487

CSOC.CBR.00024487

worked as a waitress during her entire time at City College. After graduation, she entered the Ph.D. program at the University of Denver on a full fellowship.

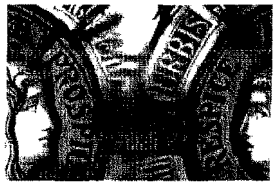


City College also has the biggest undergraduate science research program in the New York Metropolitan area, including Columbia and NYU. Rhodes Scholar Lev Sviridov, who was homeless when he first came to this country from Russia a mere 10 years ago, participates in this program, exemplifying the kind of student City College attracts and nourishes. These stories are not unique; in fact, they are characteristic of the typical student profile at City College.

The Ann S. Kheel Charitable Trust

Formed to honor Ann S. Kheel's lifetime of work in the fight for social and racial justice, The Ann S. Kheel Charitable Trust's mission is to support "organizations dedicated to improving the lives of disadvantaged New Yorkers with a particular focus on adult and child education, racial equality, and the environment."

The City College of New York is dedicated to those same ideals, advancing social and racial equality through the most powerful means possible—by providing higher education to minorities and the disadvantaged.



The Ann S. Kheel Scholars Program

The late Ann S. Kheel, who devoted much of her life to fighting for equality of opportunity for all people through her passionate civic leadership in the New York Urban League, the Schomburg Center for Black Culture, and many other organizations, cared deeply about social justice, the rights of women and minorities, and New York City public education.

The City College of New York, founding college and flagship of CUNY, boasts a lifelong heritage of educating refugee, immigrant, minority and disadvantaged populations. Establishing a major scholarship program at CCNY in Ann S. Kheel's memory would be both fitting and productive. The College already has students in place who want to succeed and who are committed to social justice and community service.

EXHIBIT
Exhibit 409

CSOC.CBR.00024488

Student Community Service at City College

City College proudly claims many students who, regardless of tremendous financial and family pressures, take the time to provide service to their communities. A few examples are:

- The neighborhood tutoring program through which students provide on- and off-campus assistance to the community at local public elementary, junior high and high schools;
- The Rosenberg/Humphrey internship program, in which students take summer internships at government agencies in Washington, DC, and New York in executive and Congressional offices, House and Senate committees, labor unions, governmental agencies, advocacy groups and policy research organizations;
- The service learning program that has provided internships for City College students to go to the Central African country of Rwanda, where they spent the summer working in the Rwanda Ministry of Finance's Poverty Alleviation program, the Ministry of Gender and Development, and the Ministry of Health's Psycho-Social Trauma unit.
- All students at the Sophie Davis School of Biomedical Education make a commitment to enter community medicine in underserved and disadvantaged communities; part of their commitment is to engage in volunteer work in those neighborhoods during their school years;
- Many CCNY Student Clubs and Co-Curricular activities encourage community service, such as the following:

  City College International Medical Relief Team To coordinate student participation in international medical missions; and to fundraise and coordinate medical supply relief efforts with sister clinics and agencies in disadvantaged countries.

  Dominican Club To emphasize unity and education, promote culture and serve voluntarily within our communities.

  Students Helping Out! Shout! is established to provide students with volunteer activities in communities in NYC. Volunteer sites include soup kitchens, churches, hospitals, and local schools.

Although 75% of CCNY students must work at full or part time jobs in order to help pay for their tuition, living costs, and in some cases, family needs, many students have nevertheless taken the time to participate in these and other programs, along with their very demanding academic schedules.

Because of these circumstances, these dedicated students have been unable to devote as much time as they would like to community service, although many have expressed interest in becoming more intensively involved. What The College has not had so far is a yearlong community service program with funding sufficient to enable these committed students to work fewer hours so that they can concentrate on their studies, and still be able to spend

CSOC.CBR.00024489

CSOC.CBR.00024489

more time over the entire year pursuing community service. ***The Ann S. Kheel Scholars Program in Community Service*** could fill this very great need.

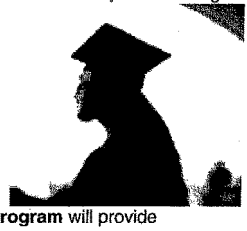
This historic undertaking will enable City College's most civic-minded students to take the lead, as so many CCNY students have before them, in community service. They will graduate as part of a new cadre of scholar/public servants, bring honor to their alma mater, and carry on its highest traditions. They will be associated with the Ann S. Kheel Charitable Trust in a venture intended to open the hearts and minds of CCNY students as they provide service to all the varied communities The College serves.

Kheel Scholars Program Goals

1. Make it financially feasible possible for students at The City College of New York to experience the rewards that can come from time spent performing community service.
2. Provide opportunities for these students to work at a variety of not-for-profit, community, government, and educational agencies, plus encourage personal commitment to service outside of a formal organization.
3. Reward and encourage civic-minded young people by helping them with their City College education while they are involved in the program.
4. Encourage some of City College's best students to consider devoting additional time – or even their careers – to community service-oriented work.
5. Provide a benefit (in the form of volunteer workers) for educational, non-profit and government-based organizations that cannot afford to pay for interns or service aids; provide assistance to those who need help in students' own communities.

CCNY's Greatest Need

What is needed is major financial support to enable these dedicated and determined students to achieve the goals for which they strive. The **Ann S. Kheel Scholars Program** will provide a $5,000 scholarship/year per student for selected CCNY sophomores and juniors through to graduation who demonstrate need, engage in community service to disadvantaged communities or individuals, make satisfactory progress, and maintain The College's required GPA. A program that will serve six sophomore and six junior students in the first year and add six new sophomores each year will make an important difference in those students' lives.



Budgeted at a cost of $440,000 the **Ann S. Kheel Scholars Program** will provide scholarships of $5,000 for 12 students in year one, and then add six new sophomores each year for three more years. In addition, scholarships will be provided for two additional transfer students in their junior or senior year. Each year, The City College of New York will report to

EXHIBIT
Exhibit 409

CSOC.CBR.00024490

CSOC.CBR.00024490

the Ann S. Kheel Foundation on the accomplishments of the students and their progress in their studies and their community service. At the end of the initial phase, in 2007-2008, The College will file a final report for review by the Ann S. Kheel Foundation that will serve as the basis for potential additional funding.

While some Kheel Scholars may need to continue to supplement their income with paid employment, it is anticipated that the generosity of the Ann S. Kheel Charitable Trust will allow them to at least reduce the number of hours they might need to work, providing the extra study time they need to excel, permitting them to engage more fully in community service, and significantly easing the economic burdens they bear.

Roles for the Ann S. Kheel Foundation

The City College of New York would welcome the participation of the trustees of the Ann S. Kheel Foundation in implementing the Ann S. Kheel Scholars Program and enabling it to continue and expand through some or all of the following means:

1. Serve as mentors to the Ann S. Kheel Scholars by meeting with the Scholars periodically during the year to share Ann S. Kheel's vision and her ideals;
2. Suggest and facilitate community service placements for Scholars;
3. Promote increased visibility to the Program through media contacts;
4. Work with the CCNY Office of Development & Institutional Advancement in fundraising for the Ann S. Kheel Scholars Program through leadership in fundraising events, such as galas and private dinners for interested individuals;
5. Provide professional contacts at the highest levels to other interested foundations, corporations, and individuals who could be approached for funding.

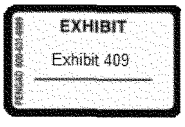
CCNY's Responses to the Kheel Foundation's Questions

How will the Ann S. Kheel Scholars Program be promoted among potential applicants?

a. The Ann S. Kheel Scholars Program will be publicized:
   1) on the City College website,
   2) in all freshman materials,
   3) in the high school visits made by CCNY admissions officers,
   4) through posters, emails, at the Finley Student Center, and in the Office of Financial Aid, and
   5) through a major new brochure especially designed and printed for distribution city-wide.

b. Applicants must submit a letter of interest, stating why they want to do public service and describing community service they have already provided.

c. Applicants must provide expressly written documentation/job descriptions from at least two qualifying organizations interested in retaining the student for unpaid employment or a volunteer position.



CSOC.CBR.00024491

2. What experience does the institution have in identifying and supporting students engaged in community service to disadvantaged communities?

    a. Many CCNY students are already actively engaged in community service through many of the voluntary, co-curricular, and academic programs (see Student Community service at City College above).
    b. City College encourages these groups by providing space, faculty advising, some staff support, some paid internships, and wherever possible, some funds.
    c. City College will provide a faculty program director.

3. What other support, financial and in services, will the institution provide to the selected students?

    a. Students will be assigned to one or more faculty advisors who specialize in community service programs for the time they are Kheel Scholars. They will meet regularly with these advisors both individually and as a group.
        i. The advisor will help students become oriented to their new working culture.
        ii. The advisor will help students balance their community service work with class work.
        iii. The advisor will be available to address other concerns and questions that may arise during the course of the year.

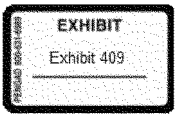
    b. The Kheel Scholars will be provided with a special meeting place on campus where they can discuss freely their common experiences and form the kinds of social bonds that are often scarce at commuter schools.

4. How many students will the given funds be able to support?

    a. The first cohort of six sophomore and six junior students will receive $5,000 per year Kheel Scholarships.
    b. A new group of six sophomores would begin in each of the next three years.
    c. Two transfer students will also receive funding for their junior and/or senior year.
    d. The total number of students assisted will be 32.

5. What criteria would the institution use to select the students and who will be making the recommendations of selected students?

    a. A committee, composed of faculty, financial aid officers, and administrators would be formed to make recommendations to the Trustees.
    b. Faculty, staff, high school teachers, community leaders, and past volunteer supervisors would be invited to make nominations to the committee
    c. Selected students will be recommended to the Trustees on the basis of past interest and experience in community service; students new to community service will also be selected based on a personal interview.



CSOC.CBR.00024492

6. How will the institution determine the financial need, academic performance and demonstration of civic leadership of candidates in making their selections?

   a. Grade point average will determine academic performance.
   b. Students should be in good standing academically when they enter the program and must remain in good standing academically throughout.
   c. Financial need will be determined by the Financial Aid Office (see below).
   d. Civic leadership will be determined through demonstrated past experience and the personal interview.

7. How will the institution measure performance of the scholars?

   a. Students will agree to maintain their grades at the required level, and seek out their advisor if the community service work becomes too onerous or time-consuming.
   b. Students will be encouraged to maintain a journal.
   c. Once each year, all students will provide a written and verbal presentation summarizing their work and its value to society, and highlighting experiences and skills they feel especially proud to have achieved.

8. Who within the institution will manage the program and who will be assigned to interface with the Trust's directors?

   a. The City College of New York will appoint a faculty director of the program, who will meet with students' faculty advisors and ensure the smooth running of the program. This faculty member will report to Zeev Dagan, City College Provost.
   b. The faculty director will interface directly with the Trustees.
   c. In addition, Trustees may contact Rachelle Butler, Vice President for Development and Institutional Advancement.
   d. Regular meetings between students and Trustees will be an important element of the Program.

9. Does a student have to work in an organization to qualify?

   a. No, involvement with the community and the individuals in it need not be restricted to organizations. This service can also be through personal commitment, including such things as helping a disabled or elderly neighbor clear snow during the winter, or assisting the home-bound with shopping or other tasks.

CSOC.CBR.00024493

The CCNY Financial Aid Selection Process

The City College of New York Office of Financial Aid helps CCNY students obtain the maximum aid possible through a highly organized, confidential, yet individualized combination of information sessions and personal advising. Through this process, which involves a structured set of steps directed toward the selection of the neediest students, City College is able to determine which students require additional funding beyond federal, state, and city sources to be able to attend The College. Then, first making certain that those students closest to graduation will be able to complete their degrees. The Office of Financial Aid works to match needy students with privately funded scholarship assistance. In this way, those most in need will get help meeting their economic challenges first. This enables The College to identify those students who would benefit most from a scholarship program.

Conclusion

At the end of three years, 32 students will have received Ann S. Kheel Scholarships. These students will serve as a living memorial to Ann S. Kheel and her lifetime of work dedicated to education and opportunity. At the same time, the Kheel Scholarships will serve as a front-end transfusion of support and further advance The City College of New York in its vital mission of excellence and access.

The Office of Financial Aid works to match needy students with privately funded scholarship assistance. In this way, those most in need will get help meeting their economic challenges first. This enables The College to identify those students who would benefit most from a scholarship program.

Our request of the Ann S. Kheel Charitable Trust

THEREFORE: On behalf of The City College of New York, in order to create:

The Ann S. Kheel Scholars Program in Community Service
at
The City College of New York

We ask the Ann S. Kheel Charitable Trust to consider a total gift of $$440,000 during the Program's initial phase, to be paid in two installments.

On behalf of the aspiring students of The City College of New York, we thank you for your thoughtful consideration of this request. If you have any questions or need further information, please contact President Gregory H. Williams or Vice President Rachelle Butler at the Office of Development and Institutional Advancement at the numbers below.

Gregory H. Williams, President
The City College of New York

75 East 55 Street
New York, NY 10022

Dear Ellen,

It was great chatting with you last week—I hope we will soon be able to get together so I can thank you for this wonderful program in person.

I understand completely your wish to revise the payment schedule for the Ann S. Kheel Scholars Program at The City College of New York and we are very happy to do that. Please see the dates and figures below and let me know if this will be better for the Kheel Foundation. Hopefully, that will be the case.

As we discussed, here is the revised schedule:

$100,000	by June 30, 2006
$100,000	by June 30, 2007
$ 90,000	by June 30, 2008
$ 90,000	by June 30, 2009

380

If you are comfortable with this, please sign below and send it to us in the enclosed envelope for our records. Our deepest appreciation to everyone at the Kheel Foundation for this generous support; we are deeply grateful.

Sincerely,

Shelly

Shelly Butler

April 17, 2006

Ms. Ellen Jacobs
Executive Director
Ann S. Kheel Charitable Trust
75 East 55th Street
New York, NY 10022

Dear Ellen:

I've received your new pledge with the revised payment schedule for the Ann S. Kheel Scholars Program in Community Service at The City College of New York. I'm so glad this schedule works well for the Kheel Foundation.

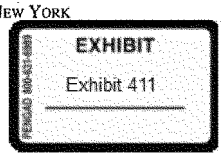
The Kheel Scholars Program has already enhanced City College's mission of access and excellence. Thanks to the Kheel Charitable Trust, these fine Kheel Scholars will not only overcome financial barriers to their academic progress, but also will be able provide the community service they desire. It was a pleasure to write last summer about their academic achievements and the work they have done in the community--all of which would not have been possible without the Kheel Scholars Program. We will be sending an update on their progress once the semester ends.

Again, my deep thanks, and my hope to see you again soon.

Best wishes,

Shelley

Rachelle Butler
Vice President



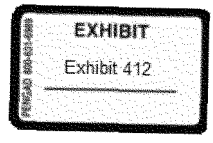
Ann S. Kheel Charitable Trust Meeting
March 5, 2007

Agenda

Overview: We will discuss how to and whether to commit the $585,000 we have left in our account. An additional $280,000 is already committed to City College for next year through 2011. It is paid yearly. I deducted that amount from what we will consider.

1.Renewal of the Hunter internship program (Public Service Scholars Program).
Issues: We need to decide on this now so they can get the right students if we say "yes." We initially awarded a 2 year grant ($50,000 per year for 2 years) giving 8 scholars each year (juniors and seniors) scholarship money so they could spend a year working for not-for-profit organizations. The grant ends this May. The program hopes that this experience will make them more community minded.

Hunter initially requested $130,000 to give 8 students per year stipends ($48, 000 per year) and with additional money to give limited stipends, follow-up, and guidance for students who have finished their internships. Another option I discussed with them would be a few additional slots for second year students. If we allot this money ($60,000 a year for 6 internships plus $5,000 for administrative expenses and follow-up and mentoring or other programs), we would have $455,000 left in our account.



Ann S. Kheel Charitable Trust Meeting
March 5, 2007

Minutes

Board members present: Luis Alvarez-Vila; Veronica Kelly; Gabe Pressman,
Others present: Theodore Kheel; Ellen Kheel Jacobs
Not present: Chairman Charles B. Rangel; Gail Sheehy; Gary Hattem; Nicole Campbell

1. The Hunter College Public Service Scholar Program was awarded $130,000 to continue to memorialize Ann S. Kheel for another 2 years. Details will be worked out by Ellen and Veronica, but there will be a cohort of scholars who continue for a second year, mentoring for all students, some workshops and at least 10 fully-funded students (some first year and some second year).

2. City College:
The decision about extending the City College grant was postponed until next year.

3. It was decided that the Charitable Trust would not do a fundraiser as a way of keeping the Trust funded. Rather, Ted Kheel (perhaps with others from the Board) would meet with President Gregory Williams of City College to discuss the fact that the Kheels have given many grants to City College and would like to discuss what City College can do to help perpetuate the ideals and work of Ann S. Kheel in a way that continues to include her name. Ted Kheel might consider further funding to make that happen either at Hunter or at City College.

I am attaching the photograph of the students and some board members taken at our mentoring breakfast in January.
Respectfully submitted by Ellen K. Jacobs, Executive Director

OFFICE OF THE VICE PRESIDENT FOR DEVELOPMENT
& INSTITUTIONAL ADVANCEMENT

August 18, 2008

Ms. Ellen K. Jacobs
Executive Director
Ann S. Kheel Charitable Trust
75 East 55th Street, Fifth Floor
New York, NY 10022

Dear Ellen,

In August 2001, The City College of New York gained a tremendous leader when Gregory H. Williams became its 11th President. Through his visionary leadership and with the wonderful support of dedicated alumni and friends like the Ann S. Kheel Charitable Trust, CCNY is in the midst of its second golden age.

Academic standards have been raised and our students are thriving. The tremendous strides we have made in recent years are because of initiatives like the Ann S. Kheel Scholars Program in Community Service. The Kheel Scholarships have made it possible for a bright and ambitious group of students to concentrate on their studies and pursue their dreams of obtaining a college degree, while participating in community service projects throughout the city.

The Kheel Scholars Program demonstrates the Trust's commitment to CCNY's most fundamental priority – our students. I am pleased to send you an update on this important program in the enclosed 2007-2008 annual report.

On behalf of President Gregory H. Williams and the entire City College community, I thank the trustees of the Ann S. Kheel Charitable Trust for their enduring commitment to our students' future. We know that the Kheel Scholars are going to make meaningful contributions to the world and will make all of us very proud.

Sincerely,

Shelley

Rachelle Butler
Vice President

The City College of New York

2007-2008
Annual Report

August 18, 2008

We are pleased to submit our 2007-2008 Annual Report on the progress of Ann S. Kheel Scholars Program in Community Service at The City College of New York. This has been a terrific year for our Scholars, marked by challenges and significant accomplishments. This report details their activities and achievements. In September 2008, we will welcome an additional five City College students to the program thanks to the ongoing generosity of the Ann S. Kheel Charitable Trust. These wonderful individuals join a cohort of 13 continuing Kheel Scholars, all of whom were selected previously for their academic achievements and commitment to community service.

Since September 2005, Kheel Scholars have provided more than 10,800 hours of volunteer service to more than two dozen organizations throughout New York City.

Below is an update on the activities of continuing and newly selected candidates, as well as recent graduates of the Kheel Scholarship Program.

New Kheel Scholars

Fall 2008-present (supported through Spring 2011)

Jay-Sheree Allen, a sophomore majoring in psychology, currently volunteers as an adult mentor/group facilitator for WEST (Women of Excellence, Strength and Tenacity) Jay-Sheree founded the program in April 2007--in partnership with PS 57 in Harlem--to strengthen the leadership skills of high-school girls from disadvantaged backgrounds.

***Joanna Bonfiglio*:** Joanna is pursuing a B.S. in Civil Engineering. As a Kheel Scholar, she plans to volunteer with the CCNY Chapter of Engineers without Borders, a non-profit humanitarian organization established to partner with developing communities worldwide in order to improve their quality of life. This partnership involves the implementation of

CSOC.CBR.00009734

sustainable engineering projects, while involving and training internationally responsible engineers and engineering students.

***Betty Sa*:** Born in Guinea Baussa, West Africa, Betty emigrated with her family to the United States when she was two-years old. She has been involved in community service since high-school when, as a junior ROTC member, she mentored youth through a program called Adopt a Coub. At CCNY she is an active member of the Ghanaian Students Association (GSA) and is majoring in Biology and pre-medical studies.

Nicole Sample is second year student in the Sophie Davis School of Biomedical Education where she is an active member of the Student National Medical Association. As a Kheel Scholar she plans to volunteer at Harlem Hospital.

Bing Lin Shao is pursuing a double major in Biochemistry and Psychology. Bing has been committed to community service and volunteerism since high-school where she started Helping Hands, a collaborative project between her high-school and the Community Food Resources Center to help distribute food to needy families in Harlem. As a Kheel Scholar, Bing plans to volunteer her time at Kitty Kind, a pet rescue and adoption center in Brooklyn.

Continuing Kheel Scholars

Fall 2007-present (supported through Spring 2010)

***Ismail Ahmed*:** currently volunteers at Masjid Nur-al-Islam Inc., a non-profit organization where he has been a teaching Arabic and the Quran to youth since 2002. As a volunteer, he also helps the organization with fund-raising events and community outreach. He is currently majoring in Biology at CCNY.

Adrienne Alimasa: is a Biomedical Engineering student at CCNY and volunteers her time generously. She currently volunteers at Mt. Sinai's Child Life Center, where she provides piano lessons to youth.

Aklima Begum: is presently volunteering at Woodside Pediatric Center, an off-site clinic of Elmhurst Hospital where she helps to take the vital signs of elderly patients. At Elmhurst, she developed a passion for taking care of people, especially children and adolescents. She is currently pursuing an undergraduate degree in Biology and plans to attend medical school to study pediatric medicine.

Alejandra Carvajal: is currently volunteering at The Jewish Home and Hospital Life Care System, where she helps elderly patients who have been diagnosed with dementia. While the process of remembering how to eat, walk and talk is very slow, she ensures that each individual is treated with patience and respect. As a Kheel scholar, she plans to continue helping the elderly while also tutoring or mentoring at-risk youth. Alejandra is currently pursuing a BA in Advertising and Public Relations.

CSOC.CBR.00009735

Therezia Gaal: is majoring in Music at CCNY and since 2004 has been involved in cat rescue and adoption at Francis' Friends. As a volunteer, she fosters homeless cats and kittens and helps the organization to find permanent homes for stray and abandoned animals.

Adam Jerozolim is a sophomore studying Mechanical Engineering and is passionate about helping teens in their search to find "meaning and purpose" in their lives. He currently volunteers with The National Conference of Synagogue Youth where he helps facilitate weekend retreats designed to encourage Jewish teens to stay connected to their religious roots and cultural heritage.

Eric Rightmyer: Eric has volunteered for the past seven years with The Samaritans of New York Suicide Prevention Hotline, an anonymous 24-hour service, which provides support and counseling services. He is currently pursuing a degree in Childhood Education. His goal as a teacher is to ensure that children's self-esteem, curiosity, and potential for learning is nurtured and maintained.

Fall 2006-present (supported through Spring 2009)

Zalmon Aminov: Zalmon is majoring in Electrical Engineering. For the past five years he has been teaching Hebrew to under-privileged children enrolled in Sunday School at a local synagogue in Forest Hills, Queens. As a regular volunteer, he also helps to organize special events, publishes the synagogue's weekly newsletter and is involved in various fundraising activities. He plans to continue these activities as a Kheel Scholar.

Priya Chokshi: Priya will be entering her fourth year this fall at the academically demanding Sophie Davis School of Biomedical Education. She has been actively engaged in community service since high-school, spending over 300 hours volunteering at local organizations throughout New York City. Volunteering at the Lutheran Medical Center was one of her most formative experiences—one that played a major role in her decision to enroll in medical school. As a Kheel Scholar, Priya plans to continue her volunteer work at the Lutheran Medical Center while also volunteering with McKinley Park Branch Library in Brooklyn.

Guiseppe Cruciata: Guiseppe is also enrolled in the Sophie Davis School of Biomedical Education. He is a representative of the CCNY American Medical Student Association and a member of the Physicians National Health Program. He currently works as a dispatcher for the BRAVO Volunteer Ambulance Service in Brooklyn. As a Kheel Scholar, he plans continue his work there, while also volunteering at the Methodist Hospital in Brooklyn.

Maria Komartsova: Maria is pursuing a double major in International Studies and Jewish Studies. She currently works with Jumpstart, a national program that brings at-risk preschool children and college students together through one-to-one relationships that focus on building literacy in combination with social and emotional readiness.

CSOC.CBR.00009736

Donguk Nam: Donguk has been involved in community service since high-school. Among other activities, he has volunteered with the New York Hospital of Queens and regularly serves as an organist at St. Paul Roman Catholic Church. In 2002, Donguk received the Matthew Segal Memorial Scholarship Award in honor of outstanding scholarship and service to the community. He is currently enrolled in the Sophie Davis School of Biomedical Education and plans to continue his volunteer work with the New York Hospital of Queens.

Martin Nolan: As a Mechanical Engineering major, Martin has been extensively involved with the CCNY campus chapter of Engineers without Borders, a non-profit humanitarian organization which partners with developing communities worldwide to improve their quality of life. This partnership involves the implementation of sustainable engineering projects while involving and training internationally responsible engineers and engineering students. Martin plans to continue his involvement with EWB, working with fellow CCNY students to raise money for future engineering projects in the developing world.

Kheel Graduates

Rita Abdelmessih: Rita started volunteering in junior high- school, when she became a mentor at her local church and worked in patient care at Long Island Jewish University Hospital. Last year, she served as a mentor at the Holcombe Rucker Center, an after-school program for middle-school youth in Harlem. As a Kheel Scholar, Rita volunteered with In Arms Reach Inc., a non-profit organization that seeks to strengthen family ties and to provide emotional support to children of incarcerated parents. She is also a member of the Physicians for a National Health Care Program, the Student National Medical Association and the American Medical Students Association. Rita will graduate from the Sophie Davis School of Bio-Medical Education in May 2009.

Kerry Farias: As a Kheel Scholars, Kerry volunteered with the New York Jewish Community Relations Council, where she worked with a group of ethnically diverse high school students involved in a leadership and community service programs. Kerry was also awarded the Colin Powell Center's Community Engagement Scholarship in summer 2006 to implement *The Jews of Sosua, A Visual History on the Human Diaspora, a* youth-led/youth-directed film-making project which partnered CCNY students with youth at the New York Jewish Community Relations Council. Kerry graduated with a BA in International Studies and Jewish Studies in May 2007.

Maurice Good volunteered at Encore Senior Center, a community partner of City Meals on Wheels, where he packaged and delivers meals to the elderly; Part of the Solution (POTS), a homeless shelter in the Bedford section of the Bronx and the South Bronx and the Overall Economic Development Corporation (SoBRO) where he provided academic tutoring and mentoring to youth and young adults. Maurice received his BA in Communications in May 2008. He plans to enroll in the new Masters in Public Administration program sponsored by the Charles B. Rangel Center for Public Service at CCNY beginning in fall 2008.

CSOC.CBR.00009737

Jia Huang: As a Kheel Scholar, Jia volunteered with Project Contact, a volunteer-driven program based in the Emergency Department of the New York Methodist Hospital in Brooklyn, where she provides emotional and physical support to patients awaiting treatment in the ER. In recognition of her work, Jia received awarded the Mary Velez Emergency Room Award. She graduated from CCNY's Sophie Davis School of Biomedical Education in May 2008.

Lisa Beatrice Jones: Lisa provided more than 400 hours of service to the Harlem-YMCA, where, as a Kheel Scholars, she created and delivered wellness and disaster preparedness workshops targeted at children, teens, adults and seniors. She also worked extensively with the executive director to develop a how-to manual in disaster preparedness. Lisa recently graduated from CCNY's Center for Worker Education with a BA in Liberal Arts in May 2007.

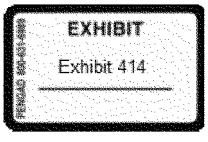
Ayanna Elaine Lewis worked as a volunteer mentor with In Arms Reach, Inc., a non-profit art, music, prison visitation and educational mentoring organization that services children whose parents are or were formerly offenders of the criminal justice system. Ayanna graduated from CCNY's Sophie Davis School of Biomedical Education in May 2008 and will begin medical school at Dartmouth University in the fall.

Susan Lien volunteered with the Reach out and Read of Greater New York, a national non-profit organization that promotes early literacy. In this role, she read to children in the pediatric waiting room at the Harlem Hospital Center. She also received the Leonard Davis Scholarship for medical school.

Hassan Oubei: As a Kheel scholar, Hassan volunteered with the Peer Mentoring Program at the Borough of Manhattan Community College (BMCC), where he provided free academic tutoring for under-performing students. He received a B.S. in Mathematics in May 2007.

Heather Palenschat: Before receiving the CCNY's Weston Public Service Fellowship, Heather volunteered her time at the Gate Way Academy, a CCNY-based program that seeks to raise student retention at City College by providing students with one-to-one assistance in navigating through the complex bureaucracy typically found on large college campuses. In this role, she single-handedly designed and launched the Academy's new Peer-Mentoring Program which matches incoming freshman with upper-level students who serve as positive role models and mentors. Heather graduated from CCNY with a BA in Political Science in May 2007 and is currently pursuing a Masters in Public Health at the University of Minnesota.

Sana Shahid: As a Kheel Scholar, Sana volunteered at Student World Assembly (SWA) in New York, an international membership group that promotes youth leadership and global democracy. While there, she worked with the Executive Director to organize the organization's annual international convention, a forum that brings members from all over the world to meet and discuss pressing policy issues affecting the international community. Sana was also named a Rosenberg Humphrey Fellow. She graduated from



CCNY with a BA in International Studies and Political Science and a minor in Public Policy in May 2007.

Jessica Tibbets: As a Kheel Scholar, Jessica helped to create the new After School Homework Help Program for immigrant children through the Yemeni American Association in Brooklyn—an experience that informed her decision travel to Yemen this summer to volunteer as an English-as-a-Second-Language instructor. Most recently, Jessica received the 2007-2008 Fulbright Scholars Award to study Arabic and learn about the deaf community in Yemen. As part of her research, she will produce an ethnography and documentary about deaf people in Yemen to show to hearing and non-hearing people in Yemen and abroad. Jessica graduated from CCNY magna cum laude in June 2007 with a B.A. in International Studies with a concentration in Culture and Communications

Shrushti Vanjari is a member of the Asian American Support, Relief and Advancement Foundation (AASRA), a non-profit organization based in Queens that offers transitional support to immigrants. Shrushti has been actively involved with the organization over the past year, providing counseling, English-as-a-Second-Language (ESL) instruction and general acculturation support to its many clients. During summer 2007, Shrushti also volunteered in the Child Development Center of the Jewish Board of Family and Children's Services. As a volunteer there, she assisted teachers in a therapeutic nursery classroom attended by children with a variety of developmental delays and special education needs. Shrusthi graduated with a BA in Psychology and pre-medical studies in December 2007.

James Winslow volunteered his time at the Computer Resource Center of the Parks Department of New York, where he taught basic computer classes to youth. As a Kheel Scholar, he also taught English-as-a-Second-Language (ESL) to a small group of students at the New York office of the International Rescue Committee, one of the largest refugee resettlement organizations in the country. James graduated with a BA in International Studies in May 2007.

Organizations Served by Kheel Scholars

Since its inception in 2005, the Ann S. Kheel Scholars Program in Community Service has served as a vehicle to reward and encourage students committed to community service. Below is a listing of more than 30 organizations that Kheel Scholars have worked with:

- BRAVO Volunteer Ambulance Service
- Computer Resource Center of the Parks Department of New York
- Encore Senior Center
- Engineers Without Borders
- Francis' Friends
- Gate Way Academy
- Harlem Hospital
- Harlem-YMCA

CSOC.CBR.00009739

- Holcombe Rucker Center
- In Arms Reach, Inc.
- International Rescue Committee
- The Jewish Home and Hospital Life Care System
- Jumpstart
- Kitty Kind
- Lutheran Medical Center
- McKinley Park Branch Library
- Masjid Nur-al-Islam, Inc.
- Methodist Hospital in Brooklyn
- Mt. Sinai's Child Life Center
- The National Conference of Synagogue Youth
- New York Hospital of Queens
- New York Jewish Community Relations Council
- Overall Economic Development Corporation
- Part of the Solution
- Peer Mentoring Program at the Borough of Manhattan Community College
- Reach Out and Read of Greater New York
- The Samaritans of New York Suicide Prevention Hotline
- Student World Assembly
- WEST (Women of Excellence, Strength and Tenacity)
- Woodside Pediatric Center
- Yemeni American Association

Summary

We received applications from more than 30 highly-qualified students for the 2008 round of Kheel scholarships, a strong testament to the on-going financial needs of many of our students, as well as a demonstration of their commitment to community service and volunteerism. Once again, we are grateful to the Ann S. Kheel Charitable Trust for its generous support.

Kheel Scholars Program Director: Professor Andrew Rich, Department of Political Science and Colin Powell Center for Policy Studies, City College of New York.

Kheel Scholars Program Administrator: Ms. Nora Heaphy, Service Learning Program Director, Colin Powell Center for Policy Studies, City College of New York.

Dad
Please read the Trust minutes and give your blessing or comments. I am sending them both in the body of the email and as an attachment (in case formatting does not come through and to both your emails so you may get this twice) i will attach picture when I send them out--that is a good idea.
Enjoyed being with you last night.

Mr. Eugene Isenberg
c/o Robert Morgenthau, District Attorney
New York County
Office of the District Attorney
1 Hogan Place
New York, NY 10013

Dear Mr. Isenberg:

Thank you very much for your interest in The Charles B. Rangel Center at The City College of New York. We anticipate that this Center will become a leading educational resource for students from populations currently underrepresented in public service to obtain the skills, training, and experience they need to enter public service professions. Enclosed are the formal Rangel Center brochure and a proposal for you to review and consider.

This Center reflects the City College mission of access and excellence, a mission that has educated generations of young men and women who have walked up the hill to study. CCNY's alumni grace very field and calling and include such luminaries as Felix Frankfurter, Jonas Salk, Andrew Grove, Colin Powell, Lev Sviridov, our 2005 Rhodes Scholar (now at Oxford), Claudio Simpkins, our 2005 Truman Scholar (now at Harvard Law), and David Bauer, the 2005 Intel Science Prize Winner, (now a sophomore at CCNY).

I would be happy to welcome you to the City College campus any time at your convenience and would enjoy introducing you to some of our stellar students—the reason we are all so committed to the CCNY mission. Please also feel free to call me at (212) 650-7285 or email me at gwilliams[redacted] with any questions you may have. Thank you again.

Sincerely,

Gregory H. Williams

Gregory H. Williams
President

Enc.

A Proposal for Eugene Isenberg

The City College of New York Mission – Excellence and Access

For over 158 years, City College has provided an avenue of upward mobility for talented students seeking a quality education. And for over 158 years, the College has educated generations of leaders in every profession. Following a tradition that reflects the pattern of these generations of CCNY alumni, whose achievements became the model for their own families, City College students are often the first in their families to go to college, and most have very limited financial resources.

Approximately 58% come from families with combined incomes of $30,000 or less; three-quarters work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial reasons. Now, as in its historic past, City College is the place where talented "New Americans"—immigrants and the children of immigrants—go to be educated. Possessed of every gift save that of means, CCNY students represent the "bootstraps" attitude toward achievement that has built America. Working their way up the professional ladder from economically disadvantaged backgrounds, they show grit, dedication, and determination in realizing their dreams. As one gifted student going on to graduate school in biological research said recently, "at City College, the American Dream is alive and well."

The Charles B. Rangel Center for Public Service

Nowhere is this clearer than at the forthcoming Charles B. Rangel Center for Public Service to be established at City College. Named for the pre-eminent African-American statesman of the 20th Century, and located in Congressman Rangel's district, this project symbolizes his hopes for the young men and women of this generation.

The Congressman's vision has always been to see America's "gorgeous mosaic" of nationalities, ethnicities, religions, and races represented in public service by men and women from those backgrounds. City College's diverse student body and varied academic disciplines offer the ideal proving ground for that vision.

Through the Rangel Center, students studying at the only public schools of engineering, architecture, and biomedical education in New York City, and in unique programs in science, public policy, international relations, the arts, and teaching, will prepare themselves to enter public service in a tremendous variety of fields, including Public Health, Environmental Engineering, Public Transportation, International Law, Foreign Policy, Urban Public Education, and many others.

The Rangel Center provides four main programs:

The BA/MA Program in Public Service
The stand-alone Master's Degree Program in Public Service
The Mid-Career Rangel Leadership Fellows and
The Charles B. Rangel Library, containing the Rangel archives.

Lodged in a magnificent limestone mansion adjacent to the landmarked City College campus, the Rangel Center will soon become the means by which new generations of CCNY students will advance themselves and enrich our nation.

The Center will include:

- a communications network center and smart classroom for video-conferencing;
- a large conference room;
- two smaller meeting rooms;
- offices;
- reception rooms; and a
- publications center.

Funds supporting the Center will be used for:

- scholarships for needy students pursuing their BA/MA or MA degrees;
- professorships that will bring distinguished faculty to the College and promote important research;
- faculty development resources that will enable talented younger faculty to grow;
- the physical environment to enhance the students' experience and provide a real home for the Center; and
- unrestricted funds, that can be used where they are most needed.

Gifts toward the Center's endowment and/or current use can also be used to name important spaces *in perpetuity,* leaving an inspiring legacy for CCNY students.

Our request:

Therefore, in order to help sustain:

The Charles B. Rangel Center
at The City College of New York

and to provide new avenues of opportunities for CCNY students, we respectfully ask you to consider a gift of:

$200,000/year for five years,

which will allow us to support all of the above.

On behalf of The City College of New York, we thank you for your thoughtful consideration of this request. If you have any questions or need further information, please contact President Gregory H. Williams at the numbers below or Vice President Rachelle Butler at the Office of Development and Institutional Advancement. Once again, thank you.

Subject: Our meeting yesterday

Dear Gene,

Thanks so much to you and Steve for meeting with District Attorney Morgenthau, Congressman Rangel, President Williams, and me yesterday. I was very interested in hearing about your philanthropic support of such wonderful institutions as U Mass Amherst and the Parkside School and also discussing with you the importance of public education in which all of us so ardently believe.

You know City College's mission and its history of graduating generations of Nobel Laureates and leaders in every field, from business to the arts. You heard President Williams describe our student body--enormously talented, but poor. We all heard Congressman Rangel eloquently describe how critical education is and his intention of making it an issue of national security. Our students are determined to obtain that education and we are delighted that you are interested in helping us achieve their goals and also in honoring Congressman Rangel's lifelong commitment to serving society through the Charles B. Rangel Center at City College.

Thank you, first, for offering to provide paid internships in Alaska and Houston for qualified students. Thank you, too, for suggesting that the folks at U Mass can assist with introducing graduate courses in business here at City.

As we mentioned, we do have a very vibrant new undergraduate management/administration concentration here at the school and we have long been considering the possibility of advancing into the business area, both at the undergrad and graduate levels.

I was delighted but not surprised to hear that you had read about and clearly absorbed the plans for our MA, BA/MA, and Mid-Career Leadership programs in Public Service that, together with the Rangel Libary, will be the most essential parts of the Rangel Center for Public Service. The interdisciplinary programming that is one of the Rangel Center's greatest strengths will provide avenues for students to enter the wide range of professions available within public service and to obtain the training and experience they will need to succeed.

I would be very happy to work with you going forward and I hope you and Steve will feel free to call me at (212) 650-[redacted] (general office number (212)650-[redacted]) or email me at any time if I can be of assistance.

Again, thank you for that wonderful meeting--I felt very privileged to be there.

Best regards,
Shelly

Call Report
Date; September 19, 2006
To: File
From: Shelly
Re; Meeting with District Attorney Robert Morgenthau, Congressman Charles B. Rangel, Eugene Isenberg, Steve Kaufman (his attorney), Gregory H. Williams, Shelly Butler

Maria is Gene's assistant. gene.isenberg skaufman
President Williams and I met with DA Morgenthau, Congressman Rangel, Gene Isenberg and Steve Kaufman yesterday at Mr. Morgenthau's office. I learned that the Congressman and Steve had both been appointed to DA positions by him.

Gene is interested in public education and has established the Isenberg School (for Management?) at his undergrad alma mater, U Mass Amherst, where there are inter-disciplinary programs in mt/engineering and mt/math.. He does not give $ to Princeton where he earned his MA. He knows a dollar goes further at our institutions. He also helped the Parkside School buy a former nun's residence in Manhattan.

I talked with them about public education and that CCNY had originated that; President Williams described the demographics of our student body. They asked me what % was minorities and I said 87%; Gene thought that McCauley had told him 50%, but I think he was confusing our number with CUNY. He also asked me now much of an endowment we had and I said $100M counting our share of the CUNy endowment (also CCF). He said that was pretty good and that he was head of the campaign at U Mass to raise $350M.

He said his company would offer paid internships ($3-4k/mo) in Alaska and also in Houston. His company does oil drilling. He also suggested having folks from U Mass, who are experienced in introducing graduate business courses (MA) come to City to help us. He will put us in touch with them. He said he would also do something at CCNY but did not specify the amount although apparently Mr Morgenthau had told GHW that it would be $100k/year for five years.

He knows Lois Pope very well and said we should tell her that she should give $ to the Rangel Center; he also thought he would introduce us to Bill McCauley but then heard that Bill had just give $30M to CUNY, which he knew was the umbrella group.

Gene asked me to send him an email so he would have mine and Steve also asked for my card. I sent them a ty by email this morning.

Next steps: draft ty from GHW; my email sent; yes, let's meet bill McCauley; send Congressman Rangel info about the $25k gift sent in by the Rhodebeck Charitable Fund (via NY Community Trust): Huyler C. Held.

Dear Mr. Chairman:

It was really a great pleasure to meet with you in Bob's office on Monday, September 18, 2006. I believe we have extraordinarily similar views of the possibilities that education presents to both the students and the society; for the students to become the best they can be and the society a much better place for all of us. I have, in the past, supported these views with my resources and hope to continue to do so in the future.

I very much admire the objectives of the Center for Public Services at the Community College of New York and I'd like to start as soon as possible in seeing whether any of your students (preferably in engineering, science or economics) have an interest in interning with Nabors in the summer of 2007, with a possible move to employment the summer thereafter. I am also prepared to place a couple of your students in our Alaska operations in the summer of 2007. In addition, we can explore the possibility of utilizing the Parkside School to further your program either in a possible apprenticeship, internship, training, or part-time teaching.

I'll also be calling Gregory Williams relatively soon to talk about a multi-year gift to your foundation.

Hope to see you again soon.

Best regards,

Eugene M. Isenberg

Call Report
Date: November 9, 2006
To: File
From: Shelly
Re: Eugene Isenberg

As Eugene could not come to campus on Friday, November 3, President Williams and I went to his home. We met his wife Ronnie and she sat in on the discussion. Gene seemed ill but was only going to stay home for a week before going to Florida.

He said he would give the Rangel Center $500k over several years and that he hoped it would be matched by Nabors—he thought it would be but didn't guarantee it. He did not restrict the gift in any way.

He also asked about the interships and I gave him five resumes and told him there were two others. He asked me to send them to him and to tell him which students wanted a hot muggy summer in Houston in an analytic business unit possibly leading to employment after graduation and which students wanted an easy summer in Alaska doing maintenance. The payment would be $3500/4500/month plus expenses.

He asked about the Parkside School and I told him that we could both provide teacher training on site and at the school leading to the master's and also bring in teaching interns. He said, "so it could go both ways?" I said yes, gave him Al's contact number, and he said Leslie Thorne would call Al.

He then asked if the UMass Isenberg School of Management could help Brett—I said yes, that we were working on several management and business programs. He said he hoped that there could be a business-specific course in the Rangel Center. He took Brett's telephone number and told him that either the dean of the Isenberg School, Soren Bisgard, or the Isenberg Professor, Mike Malone, from the department of engineering, would call Brett.

I then said we would like to name something at the Rangel Center for him and suggested the Congressman's office; he was very happy at the idea.

Next steps:

TY from president
TY and letter of agreement from Shelly
send him two additional student resumes with a list of which students want Houston and which Alaska
ask Al for input re Parkside
speak to Brett re business-specific course at Rangel Center

Dear Gene,

It was wonderful to see you again although I am sorry that you were not well. Shelly and I also enjoyed meeting your lovely wife, Ronnie.

Gene, Congressman Rangel is absolutely delighted about your wonderful contribution to the Rangel Center at City College and I am so pleased that we will be naming his office for you. That will be in perpetuity and we are so happy to be able to recognize your generosity and foresight in making this gift. It also reminds our students, alumni, and friends of how people are willing to step forward and lend a helping hand to our talented young people who are seeking a quality education.

Because of your history of many philanthropies, I am not surprised that you want to take a leadership role at the Center and I cannot overstate how very much it will mean to City College and to the nation when these young people from underrepresented populations take their place in leadership positions in government and public service.

Thank you for your commitment to public education and to public service. We are deeply grateful.

With warm appreciation and best wishes for a speedy recovery,

Dear Gene,

Thank you so much for meeting with President Williams and me last week even though you were ill. My thanks to Ronnie as well for all her help. We are thrilled that you want to participate in this great effort that is taking place at The City College of New York—The Charles B. Rangel Center for Public Service—and very touched that you want to reach out to our students and faculty in so many ways.

We told Congressman Rangel of your wonderful pledge and he was delighted. I know that as soon as things quiet down a little for him that he will be in touch with you. He was also very pleased at naming his office in your honor in recognition of what you are doing for the Center and for the students of City College. So, right next to the sign that says, Office of Congressman Charles B. Rangel, there will be another that says, The ~~Eugene~~ Isenberg Suite.

Gene + Ronnie

I hope that by now you have received confirmation that Nabors will match your generous pledge of $500,000 with an additional $500,000, and therefore CCNY will record this pledge as a total of $1,000,000 including the matching funds--$100,000 from you and $100,000 in matching funds from Nabors each year for five years. If this letter correctly reflects our conversation, and the payment schedule below accords with your preference, please sign this letter of agreement and return it to us in the enclosed envelope for our records.

As with all of our pledge agreements, we kindly ask that in the unlikely event that this pledge is not fulfilled during your lifetime, that it be completed through your estate, that your will be revised to include this pledge, and that City College be given a copy of the relevant part of your will for its files.

I have enclosed several additional resumes from CCNY students interested in applying for internships in both Alaska and Houston, and have indicated their preference at the

The Charles B. Rangel Center

MEMORANDUM

FROM: Shelly Butler, VP

RE: Rangel Center Activities and the Isenberg Gift

The Isenberg Gift

According to Dean Brett Silverstein, Director of the Rangel Center, Robby Nelson from Nabors visited City College for two days and interviewed many students, all with very fine resumes and all of them very eager to take an internship with Nabors. Robby selected four students for internships this summer, all of whom are engineers. They will begin their tour in Houston and be given several different assignments. The students are:

- Alket Mici – Civil Engineering
- Artur Chrostowski – Chemical Engineering
- Herman Kam – Mechanical Engineering
- Neranjan de Silva – Biomedical Engineering

In addition, Dean Silverstein reports that funds from the first installment of Gene Isenberg's gift have been used so far to:

- hire an internship coordinator who will find internships for Rangel Center students, train them to apply, and supervise them.
- bring in a part-time publicity/events coordinator. She has arranged for the Rangel Center to participate in Harlem Week and is arranging a brunch for the fall. More on this very soon. She is also working on a contact list for organizations in the community so that as many as possible will participate.
- produce materials for public relations initiatives and student recruitment for the Rangel Center.

CSOC.CBR.00003115

Update on the Rangel Center

This summer, we will complete the proposal to open the Master's and combined BA/MPA Programs officially for the Rangel Center and will begin to schedule courses. Public policy minors will enroll in these in the fall as a prelude to joining the BA/MPA Program. We will also schedule master's degree courses for the spring.

In addition, we are beginning a project with a noted expert in public policy. We will work with him to make the Rangel Center website the place where programs throughout the country go to find links, databases, and reports regarding how schools train students to perform policy analyses on issues related to underserved populations.

As part of our outreach and recruiting methods, we are about to send e-mails to City College graduates of recent years informing them about the new Master's program. When the publicity materials are ready, we will start to mail to interested populations.

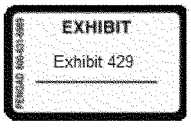
The Eugene Isenberg Suite

Congressman Rangel had expressed himself as very pleased at City College naming his office in your honor in recognition of what you are doing for the Center and for the students of CCNY. So, to reiterate, when the Rangel Center is renovated, right next to the sign that says, Office of Congressman Charles B. Rangel, there will be another that says, The Eugene Isenberg Suite.

Fundraising for the Rangel Center

Fundraising has gone extremely well, with more than $11, 665,000 in confirmed gifts and pledges. This includes your own very generous gift, $1 million from the Ford Foundation, $5 million from an as yet confidential donor, $100,000 from the City Council for the Rangel Center building, $700,000 from Josh Weston, a CCNY alumnus who is supporting students who are earning the master's degree in public service, and $3.4 million in anticipated Congressional support.

In addition, there is another $13,580,000 in pending gifts, most of which are close to completion. The total confirmed and pending is $25,245,000.



Rangel Center Campaign		
Confirmed		
Kheel Foundation Schols	$440,000	comes in on a rolling basis; see Andy Rich
Trans. appropriation	$ 400,000	not in yet for the building
Congressional seed $	$ 3,000,000	not in yet
Ford Foundation	$1,000,000	$250k in
Eugene Isenberg	$ 1,000,000	$200k in
Rodobeck Foundation	$ 25,000	in
NEW FOR 2007		
City Council	$ 100,000	**The City Council has (privately) approved a $100,000 request from CCNY to complete restora**
Weston	$ 700,000	**For students earning the MPA at the Rangel Center**
Starr (confirmed)	$ 5,000,000	**C.V. Starr Library and Archives; we are just awating the confirming letter--**
Sub-total:	**$ 11,665,000**	
Pending		
Verizon Foundation	$ 500,000	(may be for the Division of Worker Education and the Rangel Center combined)
AIG	$ 10,000,000	very close; OTS approved; CEO of AIG approved; just writing up, but this should be kept VERY Con
CUNY match	$ 2,500,000	will come in once we have AIG
Additional Congress approp. anticipated		
Community Trust	$ 135,000	(will hear at end of July)

NEW YORK, NY 10022

FLORENCE A. DAVIS
PRESIDENT

TEL NO: 212 909 8601
FAX NO: 212 750 3830

June 27, 2007

Rachelle D. Butler
Vice President of Development
The City College 21th Century Foundation, Inc.
Shepard Hall, Room 152
138th Street and Convent Avenue
New York, NY 10031

Dear Ms. Butler:

We are pleased to advise that our directors have authorized a grant of $5,000,000 payable over a period of three years to The City College 21th Century Foundation, Inc. in support of the Charles B. Rangel center for Public Service. The first installment in the amount of $2,000,000 is paid as follows:

28,090 shares of AIG stock @ $71.19	$1,999,727.10
Check enclosed	272.90
	$2,000,000.00

According to the New York Times today, AIG shares were traded on the New York Stock Exchange on June 25, 2007, at $71.70 high and $70.68 low, resulting in a mean price of $71.19 per share. Our grant of 28,090 shares is, therefore, valued at $1,999,727.10 as shown above.

A stock certificate for 28,090 shares of the Common Stock of American International Group (AIG) is in the process of being issued in favor of The City College 21th Century Foundation, Inc. and will be sent directly to you under separate cover.

Meanwhile on advice of counsel, we enclose herewith, in connection with the AIG shares, an investment letter for the purpose of satisfying certain requirements of the Securities Act of 1933. Should you have any questions with regard to the shares you have received, please contact the office of AIG Corporate Secretary at (212) 770-5123.

Our check for the above amount is enclosed and we would appreciate an official receipt for our records. By endorsing and depositing this check, you warrant that there has been no change in your I.R.S. tax classification as an organization described in Internal Revenue Service Code sections 501 (c) (3) and 509 (a) (1), (2) or (3).

To fulfill The Starr Foundation's reporting requirements, we request that, at the end of each year of this grant, you send us a concise report on the activities the grant has funded. We will not make any subsequent payment on this grant unless we receive a report satisfactory to us concerning the use of the paid portion of the grant. In addition, whenever your new audited financial statements become available, please send us a copy for our records.

With best wishes,

Yours sincerely,

Florence A. Davis

6/28/07 -Update to President Williams:

1. AIG – I wasn't able to reach Ed today but perhaps I might hear from him by email. Last I heard, he was writing it up.

2. Spitzer proposal—I sent you a draft proposal and budget for your review and feedback; also waiting for feedback from Zeev, Joe and Maria

3. Lehman Brothers proposal –I sent you the latest proposal and cover letter for your feedback; Andy is doing further revisions this weekend and I will incorporate them and your thoughts for the formatted version for Mary Lou. Carlos has promised a 1:2 CUNY match for the building if we get it.

4. Haines gift – Allan Dobrin postponed the meeting I was going to have with him, Rick and Carlos today. I sent Rick and Carlos all my emails, documentation, and attorney and planned giving opinions dating from January 3, 2007. In return, Tony Martignetti of Future Funds sent me three documents dating from late April indicating where CUNY was in this gift. I have attached them. I spoke with Tom and told him that we were working jointly on this to fulfill his dream and that all was well. He sounded very relieved. I spoke with Carlos this morning and.....

5. Flom concept paper reaction – I have not heard from Joe, but I think it would be a good idea to follow up.

6. [redacted] (CCS) –I met him today and I was not impressed. I asked Ray to find us someone with more experience.

7. I have shared with Carlos all updates on AIG and our plans for Lehman Brothers. So that nothing like the Haines gift situation can occur again, I will keep them fully informed of our active solicitations.

8. Just FYI, Congressman Rangel asked for a briefing for Gene Isenberg as he was visiting him. I provided the attached update for him to share and the attached status of Rangel fundraising for his review only.

9. I left a message with Juan Carlos to find out from Ambassador Cassinello if Salamanca went well. Cassinello supposedly told them about the planned Prince of Asturias Chair and will tell us who was interested. We are still waiting for a date for the dinner and the royal visit.

10. President's Circle Dinner has been scheduled for October 17 at the Lotos Club. Only $1 million and up donors are being invited.

Table of Contents

Our internet address is www.nabors.com. We make available free of charge through our website our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission (the "SEC"). In addition, a glossary of drilling terms used in this document and documents relating to our corporate governance (such as committee charters, governance guidelines and other internal policies) can be found on our website. The SEC maintains an internet site (www.sec.gov) that contains reports, proxy and information statements and other information regarding issuers that file electronically with the SEC.

FORWARD-LOOKING STATEMENTS

We often discuss expectations regarding our future markets, demand for our products and services, and our performance in our annual and quarterly reports, press releases, and other written and oral statements. Statements that relate to matters that are not historical facts are "forward-looking statements" within the meaning of the safe harbor provisions of Section 27A of the Securities Act of 1933 (the "Securities Act") and Section 21E of the Exchange Act. These "forward-looking statements" are based on an analysis of currently available competitive, financial and economic data and our operating plans. They are inherently uncertain and investors should recognize that events and actual results could turn out to be significantly different from our expectations. By way of illustration, when used in this document, words such as "anticipate," "believe," "expect," "plan," "intend," "estimate," "project," "will," "should," "could," "may," "predict" and similar expressions are intended to identify forward-looking statements.

You should consider the following key factors when evaluating these forward-looking statements:

- fluctuations in worldwide prices of and demand for natural gas and oil;
- fluctuations in levels of natural gas and oil exploration and development activities;
- fluctuations in the demand for our services;
- the existence of competitors, technological changes and developments in the oilfield services industry;
- the existence of operating risks inherent in the oilfield services industry;
- the existence of regulatory and legislative uncertainties;
- the possibility of changes in tax laws;
- the possibility of political instability, war or acts of terrorism in any of the countries in which we do business; and
- general economic conditions including the capital and credit markets.

Our businesses depend, to a large degree, on the level of spending by oil and gas companies for exploration, development and production activities. Therefore, a sustained increase or decrease in the price of natural gas or oil, which could have a material impact on exploration, development and production activities, could also materially affect our financial position, results of operations and cash flows.

The above description of risks and uncertainties is by no means all-inclusive, but is designed to highlight what we believe are important factors to consider. For a more detailed description of risk factors, please see Part I, Item 1A. — Risk Factors .

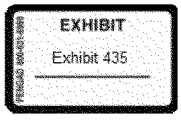
Unless the context requires otherwise, references in this Annual Report on Form 10-K to "we," "us," "our," "Company," or "Nabors" means Nabors Industries Ltd. and, where the context requires, includes our subsidiaries.

PART I

ITEM 1. BUSINESS

Introduction

Nabors is the largest land drilling contractor in the world, with approximately 528 actively marketed land drilling rigs. We conduct oil, gas and geothermal land drilling operations in the U.S. Lower 48 states, Alaska, Canada, South America, Mexico, the Caribbean, the Middle East, the Far East, Russia and Africa. We are also one of the largest land well-servicing and workover contractors in the



CSOC.CBR.00026195

United States and Canada. We actively market approximately 592 land workover and well-servicing rigs in the United States, primarily in the southwestern and western United States, and actively market approximately 171 land workover and well-servicing rigs in Canada. Nabors is a leading provider of offshore platform workover and drilling rigs, and actively markets 37 platform rigs, 13 jack-up units and 3 barge rigs in the United States and multiple international markets. These rigs provide well-servicing, workover and drilling services. We have a 51% ownership interest in a joint venture in Saudi Arabia, which owns and actively markets 9 rigs in addition to the rigs we lease to the joint venture. We also offer a wide range of ancillary well-site services, including engineering, transportation, construction, maintenance, well logging, directional drilling, rig instrumentation, data collection and other support services in selected domestic and international markets. We provide logistics services for onshore drilling in Canada using helicopters and fixed-winged aircraft. We manufacture and lease or sell top drives for a broad range of drilling applications, directional drilling systems, rig instrumentation and data collection equipment, pipeline handling equipment and rig reporting software. We also invest in oil and gas exploration, development and production activities and have 49-50% ownership interests in the U.S., Canada and International areas.

Nabors was formed as a Bermuda-exempt company on December 11, 2001. Through predecessors and acquired entities, Nabors has been continuously operating in the drilling sector since the early 1900s. Our principal executive offices are located at Mintflower Place, 8 Par-La-Ville Road, Hamilton, HM08, Bermuda. Our phone number at our principal executive offices is (441) 292-1510.

Our Fleet of Rigs

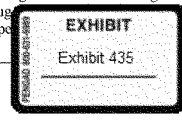
- Land Rigs. A land-based drilling rig generally consists of engines, a drawworks, a mast (or derrick), pumps to circulate the drilling fluid (mud) under various pressures, blowout preventers, drill string and related equipment. The engines power the different pieces of equipment, including a rotary table or top drive that turns the drill string, causing the drill bit to bore through the subsurface rock layers. Rock cuttings are carried to the surface by the circulating drilling fluid. The intended well depth, bore hole diameter and drilling site conditions are the principal factors that determine the size and type of rig most suitable for a particular drilling job.

  A land-based workover or well-servicing rig consists of a mobile carrier, engine, drawworks and a mast. The mobile workover or well-servicing rig is specially designed for periodic maintenance as well as major repairs and modifications of oil and gas wells for which service is required to maximize the productive life of such wells. Workovers may be required to remedy failures, modify well depth and formation penetration to capture hydrocarbons from alternative formations, clean out and recomplete a well when production has declined, repair leaks or convert a depleted well to an injection well for secondary or enhanced recovery projects. The primary function of a workover or well-servicing rig is to act as a hoist so that pipe, sucker rods and down-hole equipment can be run into and out of a well. Because of size and cost considerations, well-servicing and workover rigs are used for these operations rather than the larger drilling rigs. Land-based drilling rigs are moved between well sites and between geographic areas of operations by using our fleet of cranes, loaders and transport vehicles or those from a third-party service vendor. Well-servicing rigs are generally self-propelled units and heavier capacity workover rigs are either self-propelled or trailer mounted and include auxiliary equipment, which is either transported on trailers or moved with trucks.

- Platform Rigs. Platform rigs provide offshore workover, drilling and re-entry services. Our platform rigs have drilling and/or well-servicing or workover equipment and machinery arranged in modular packages that are transported to, and assembled and installed on, fixed offshore platforms owned by the customer. Fixed offshore platforms are steel tower-like structures that either stand on the ocean floor or are moored floating structures. The top portion, or platform, sits above the water level and provides the foundation upon which the platform rig is placed.

- Jack-up Rigs. Jack-up rigs are mobile, self-elevating drilling and workover platforms equipped with legs that can be lowered to the ocean floor until a foundation is established to support the hull, which contains the drilling and/or workover equipment, jacking system, crew quarters, loading and unloading facilities, storage areas for bulk and liquid materials, helicopter landing deck and other related equipment. The rig legs may operate independently or have a mat attached to the lower portion of the legs in order to provide a more stable foundation in soft bottom areas. Many of our jack-up rigs are of cantilever design — a feature that permits the drilling platform to be extended out from the hull, allowing it to perform drilling or workover operations over adjacent, fixed platforms. Nabors' shallow workover jack-up rigs generally are subject to a maximum water depth of approximately 125 feet, while some of our jack-up rigs may drill in water depths as shallow as 13 feet. Nabors also has deeper water depth capacity jack-up rigs that are capable of drilling at depths between eight feet and 150 to 250 feet. The water depth limit of a particular rig is determined by the length of the rig's legs and the operating environment. Moving a rig from one drill site to another involves lowering the hull down into the water until it is afloat and then jacking up its legs with the hull floating. The rig is then towed to the new drilling site.

- Inland Barge Rigs. One of Nabors' barge rigs is a full-size drilling unit. Nabors also owns two workover inland barge rigs. These barges are designed to perform plug service or workover services in shallow inland, coastal or offshore waters. Our barge rigs can op and 20 feet.



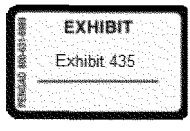


EXHIBIT
Exhibit 435

Table of Contents

Additional information regarding the geographic markets in which we operate and our business segments can be found in Note 20 in Part II, Item 8. — Financial Statements and Supplementary Data.

Customers: Types of Drilling Contracts

Our customers include major oil and gas companies, foreign national oil and gas companies and independent oil and gas companies. No customer accounted for greater than 10% of consolidated revenues in 2008 or in 2007.

On land in the U.S. Lower 48 states and Canada, we have historically been contracted on a single-well basis, with extensions subject to mutual agreement on pricing and other significant terms. Beginning in late 2004, as a result of increasing demand for drilling services, our customers started entering into longer term contracts with durations ranging from one to three years. Under these contracts, our rigs are committed to one customer over that term. Increasingly, these contracts are being signed for three-year terms for newly constructed rigs. Contracts relating to offshore drilling and land drilling in Alaska and international markets generally provide for longer terms, usually from one to five years. Offshore workover projects are often on a single-well basis. We generally are awarded drilling contracts through competitive bidding, although we occasionally enter into contracts by direct negotiation. Most of our single-well contracts are subject to termination by the customer on short notice, but some can be firm for a number of wells or a period of time, and may provide for early termination compensation in certain circumstances. The contract terms and rates may differ depending on a variety of factors, including competitive conditions, the geographical area, the geological formation to be drilled, the equipment and services to be supplied, the on-site drilling conditions and the anticipated duration of the work to be performed.

In recent years, all of our drilling contracts have been daywork contracts. A daywork contract generally provides for a basic rate per day when drilling (the dayrate for us providing a rig and crew) and for lower rates when the rig is moving, or when drilling operations are interrupted or restricted by equipment breakdowns, adverse weather conditions or other conditions beyond our control. In addition, daywork contracts may provide for a lump sum fee for the mobilization and demobilization of the rig, which in most cases approximates our incurred costs. A daywork contract differs from a footage contract (in which the drilling contractor is paid on the basis of a rate per foot drilled) and a turnkey contract (in which the drilling contractor is paid for drilling a well to a specified depth for a fixed price).

Well-Servicing and Workover Services

Although some wells in the United States flow oil to the surface without mechanical assistance, most are in mature production areas that require pumping or some other form of artificial lift. Pumping oil wells characteristically require more maintenance than flowing wells because of the operation of the mechanical pumping equipment installed.

- Well-Servicing/Maintenance Services. We provide maintenance services on the mechanical apparatus used to pump or lift oil from producing wells. These services include, among other things, repairing and replacing pumps, sucker rods and tubing. We provide the rigs, equipment and crews for these tasks, which are performed on both oil and natural gas wells, but which are more commonly required on oil wells. Maintenance services typically take less than 48 hours to complete. Well-servicing rigs generally are provided to customers on a call-out basis. We are paid an hourly rate and work typically is performed five days a week during daylight hours.

- Workover Services. Producing oil and natural gas wells occasionally require major repairs or modifications, called "workovers." Workovers normally are carried out with a well-servicing rig that includes additional specialized accessory equipment, which may include rotary drilling equipment, mud pumps, mud tanks and blowout preventers. A workover may last anywhere from a few days to several weeks. We are paid an hourly rate and work is generally performed seven days a week, 24 hours a day.

- Completion Services. The kinds of activities necessary to carry out a workover operation are essentially the same as those that are required to "complete" a well when it is first drilled. The completion process may involve selectively perforating the well casing at the depth of discrete producing zones, stimulating and testing these zones and installing down-hole equipment. The completion process may take a few days to several weeks. We are paid an hourly rate and work is generally performed seven days a week, 24 hours a day.

- Production and Other Specialized Services. We also can provide other specialized services, including onsite temporary fluid-storage facilities, the provision, removal and disposal of specialized fluids used during certain completion and workover operations, and the removal and disposal of salt water that often is produced in conjunction with the production of oil and natural gas. We also provide plugging services for wells from which the oil and natural gas has been depleted or further production has become uneconomical. We are paid an hourly or a per unit rate, as applicable, for these services.

Table of Contents

Oil and Gas Investments

Through our wholly owned Ramshorn business unit, Nabors makes investments in oil and gas exploration, development and production operations in the United States, Canada and internationally. In addition in late 2006, we entered into an agreement with First Reserve Corporation to form select joint ventures to invest in oil and gas exploration opportunities worldwide. During 2007, three joint ventures were formed for operations in the United States, Canada and international areas. We hold 49.7% ownership interests in the U.S. and international entities and a 50% ownership interest in the Canadian entity and account for these investments using the equity method of accounting. Each joint venture pursues development and exploration projects with both existing customers of ours and with other operators in a variety of forms including operated and non-operated working interests, joint ventures, farm-outs and acquisitions. The U.S. joint venture business is focused on the exploration for and the acquisition, development and production of natural gas, oil and natural gas liquids in Texas, Montana, Utah and North Dakota. Outside of the United States, our joint venture entities own or have interests in the Alberta and British Columbia Provinces of Canada and internationally in Colombia.

Additional information about recent activities for this segment can be found in Part II, Item 7. — Management's Discussion and Analysis of Financial Condition and Results of Operations — Oil and Gas.

Other Services

Canrig Drilling Technology Ltd., our drilling technologies and well services subsidiary, manufactures top drives, which are installed on both onshore and offshore drilling rigs. Our top drives are marketed throughout the world. During the last three years, approximately 53% of our top drive sales were made to other Nabors companies. We also rent top drives and provide top drive installation, repair and maintenance services to our customers. We also offer rig instrumentation equipment, including sensors, proprietary RIGWATCH® software and computerized equipment that monitors the real-time performance of a rig. In addition, we specialize in daily reporting software for drilling operations, making this data available through the internet on the website www.mywells.com. We also provide mudlogging services. Canrig Drilling Technology Canada Ltd., one of our Canadian subsidiaries, manufactures catwalks and wrenches which are installed on both onshore and offshore drilling rigs. During the 31 months of operations since acquisition, approximately 62% of the equipment sales were made to other Nabors companies. Ryan Energy Technologies, Inc., another one of our subsidiaries, manufactures and sells directional drilling and rig instrumentation and data collection services to oil and gas exploration and service companies. Nabors has a 50% interest in Peak Oilfield Service Company, a general partnership with a subsidiary of Cook Inlet Region, Inc., a leading Alaskan native corporation. Peak Oilfield Service Company provides heavy equipment to move drilling rigs, water, other fluids and construction materials, primarily on Alaska's North Slope and in the Cook Inlet region. The partnership also provides construction and maintenance for ice roads, pads, facilities, equipment, drill sites and pipelines. Nabors also has a 50% membership interest in Alaska Interstate Construction, L.L.C., a limited liability company whose other member is a subsidiary of Cook Inlet Region, Inc. Alaska Interstate Construction is a general contractor involved in the construction of roads, bridges, dams, drill sites and other facility sites, as well as providing mining support in Alaska. Revenues are derived from services to companies engaged in mining and public works. Our subsidiary, Peak USA Energy Services, Ltd., provides hauling and maintenance services for customers in the U.S. Lower 48 states. Nabors Blue Sky Ltd. leases aircraft used for logistics services for onshore drilling in Canada using helicopters and fixed-winged aircraft.

Our Employees

As of December 31, 2008, Nabors employed approximately 26,912 persons, of whom approximately 3,920 were employed by unconsolidated affiliates. We believe our relationship with our employees generally is good.

Certain rig employees in Argentina and Australia are represented by collective bargaining units.

Seasonality

Our Canadian and Alaskan drilling and workover operations are subject to seasonal variations as a result of weather conditions and generally experience reduced levels of activity and financial results during the second calendar quarter of each year. Seasonality does not have a material impact on the remaining portions of our business. Our overall financial results reflect the seasonal variations experienced in our Canadian and Alaskan operations.

Research and Development

Research and development constitutes a growing part of our overall business. The effective use of technology is critical to the maintenance of our competitive position within the drilling industry. As a result of the importance of technology to our business, we expect to continue to develop technology internally or to acquire technology through strategic acquisitions.

CSOC.CBR.00026199

Table of Contents

Industry/Competitive Conditions

To a large degree, Nabors' businesses depend on the level of capital spending by oil and gas companies for exploration, development and production activities. A sustained increase or decrease in the price of natural gas or oil could have a material impact on exploration, development and production activities by our customers and could also materially affect our financial position, results of operations and cash flows. See Part I, Item 1A. — Risk Factors — Fluctuations in oil and natural gas prices could adversely affect drilling activity and our revenues, cash flows and profitability.

Our industry remains competitive. Historically, the number of rigs has exceeded demand in many of our markets. From 2005 through most of 2008, as a result of improved demand for drilling services driven by a sustained increase in the level of commodity prices, supply of and demand for land drilling services have been in balance in the United States and international markets, with demand actually exceeding supply in some of our markets. This economic reality resulted in an increase in rates being charged for rigs across our North American, Offshore and International markets. Furthermore, the dramatic increase in rates along with our domestic customers' willingness to enter into firm three-year commitments has resulted in our building of new rigs in significant quantities for the first time in over 20 years. Internationally, we compete directly with various contractors in areas where we operate. We believe that our international markets will continue to be competitive for the foreseeable future. However, as many existing rigs can be readily moved from one region to another in response to changes in levels of activity and many of the total available contracts are currently awarded on a bid basis, competition based on price for both existing and new rigs still exists across all of our markets.

In all of our geographic market areas, we believe price and availability and condition of equipment are the most significant factors in determining which drilling contractor is awarded a job. Other factors include the availability of trained personnel possessing the required specialized skills; the overall quality of service and safety record; and domestically, the ability to offer ancillary services. Increasingly, the ability to deliver rigs within certain timeframes is becoming a competitive factor. In international markets, experience in operating in certain environments and customer alliances, also have been factors in the selection of Nabors.

Certain competitors are present in more than one of Nabors' operating regions, although no one competitor operates in all of these areas. In the U.S. Lower 48 states, we compete with Helmerich and Payne, Inc. and Patterson-UTI Energy, Inc. and there are several hundred other competitors with national, regional or local rig operations. In domestic land workover and well-servicing, we compete with Basic Energy Services, Inc., Key Energy Services, Inc., Complete Energy Services and with numerous other competitors having smaller regional or local rig operations. In Canada and Offshore, Nabors competes with many firms of varying size, several of which have more significant operations in those areas than Nabors. Internationally, Nabors competes directly with various contractors at each location where it operates. Nabors believes that the market for land drilling, workover and well-servicing contracts will continue to be competitive for the foreseeable future.

Our other operating segments represent a relatively smaller part of our business, and we have numerous competitors in each area. Our Canrig subsidiary is one of the four major manufacturers of top drives. Its largest competitors in that market are National Oilwell Varco, Tesco and MH Pyramid. Its largest competitors in the manufacture of rig instrumentation systems are Pason and National Oilwell Varco's Totco subsidiary. Mudlogging services are provided by a number of entities that serve the oil and gas industry on a regional basis. In the U.S. Lower 48 states, there are hundreds of rig transportation companies, and there are at least three or four that compete with Peak USA in each of its operating regions. In Alaska, Peak Oilfield Service principally competes with Alaska Petroleum Contractors for road, pad and pipeline maintenance, and is one of many drill site and road construction companies, the largest of which is VECO Corporation, and Alaska Interstate Construction principally competes with Wilder Construction Company and Pah River Construction for the construction of roads, bridges, dams, drill sites and other facility sites.

Our Business Strategy

Since 1987, with the installation of our current management team, Nabors has adhered to a consistent strategy aimed at positioning our Company to grow and prosper in good times and to mitigate adverse effects during periods of poor market conditions. We have maintained a financial posture that allows us to capitalize on market weakness and strength by adding to our business base, thereby enhancing our upside potential. The principal elements of our strategy have been to:

- Maintain flexibility to respond to changing conditions.
- Maintain a conservative and flexible balance sheet.
- Build cost effectively a base of premium assets.
- Build and maintain low operating costs through economies of scale.
- Develop and maintain long-term, mutually attractive relationships with key customers and vendors.
- Build a diverse business in long-term, sustainable and worthwhile geographic markets.

CSOC.CBR.00026200

Table of Contents

- Recognize and seize opportunities as they arise.
- Continually improve safety, quality and efficiency.
- Implement leading-edge technology where cost effective to do so.
- Build shareholder value by an expansion of our oil and gas reserves and production.

Our business strategy is designed to allow us to grow and remain profitable in any market environment. The major developments in our business in the past three years illustrate our implementation of this strategy and its continuing success. Specifically during 2006, 2007 and the first half of 2008, we took advantage of the robust rig market in the United States and internationally to obtain a high volume of contracts for newly constructed rigs. A large proportion of these rigs are subject to long-term contracts with creditworthy customers with the most significant impact occurring in our International operations. This will not only expand our operations with the latest state-of-the-art rigs, which should better weather downturns in market activity, but eventually replace the oldest least capable rigs in our existing fleet. However, this positive trend slowed in the fourth quarter of 2008, due to the continued steady decline in natural gas and oil prices. As a result of lower commodity prices, many of our customers' drilling programs have been reduced and the demand for additional rigs has been substantially reduced.

Acquisitions and Divestitures

We have grown from a land drilling business centered in the U.S. Lower 48 states, Canada and Alaska to an international business with operations on land and offshore in many of the major oil, gas and geothermal markets in the world. At the beginning of 1990, our fleet consisted of 44 actively marketed land drilling rigs in Canada, Alaska and in various international markets. Today, our worldwide fleet of actively marketed rigs consists of approximately 528 land drilling rigs, approximately 592 domestic and 171 international land workover and well-servicing rigs, 37 offshore platform rigs, 13 jack-up units, 3 barge rigs and a large component of trucks and fluid hauling vehicles. This growth was fueled in part by strategic acquisitions. Although Nabors continues to examine opportunities, there can be no assurance that attractive rigs or other acquisition opportunities will continue to be available, that the pricing will be economical or that we will be successful in making such acquisitions in the future.

On January 3, 2006, we completed an acquisition of 1183011 Alberta Ltd., a wholly owned subsidiary of Airborne Energy Solutions Ltd., through the purchase of all common shares outstanding for cash for a total purchase price of Cdn. $41.7 million (U.S. $35.8 million). In addition, we assumed debt, net of working capital, totaling approximately Cdn. $10.0 million (U.S. $8.6 million). Nabors Blue Sky Ltd. (formerly 1183011 Alberta Ltd.) owns 42 helicopters and fixed-wing aircraft and owns and operates a fleet of heliportable well-service equipment. The purchase price has been allocated based on final valuations of the fair value of assets acquired and liabilities assumed as of the acquisition date and resulted in goodwill of approximately U.S. $18.8 million. During the fourth quarter of 2008, the results of our year end impairment test of goodwill and intangible assets indicated a permanent impairment to goodwill and to an intangible asset of Nabors Blue Sky Ltd. As such, we recorded a non-cash impairment charge and writedown of intangible assets of $4.6 million and $4.6 million, respectively. See Note 2 Summary of Significant Accounting Policies in Part II, Item 8 — Financial Statements and Supplementary Data.

On May 31, 2006, we completed an acquisition of Pragma Drilling Equipment Ltd.'s business, which manufactures catwalks, iron roughnecks and other related oilfield equipment, through an asset purchase consisting primarily of intellectual property for a total purchase price of Cdn. $46.1 million (U.S. $41.5 million). The purchase price has been allocated based on final valuations of the fair market value of assets acquired and liabilities assumed as of the acquisition date and resulted in goodwill of approximately U.S. $10.5 million.

On August 8, 2007, we sold our Sea Mar business which had previously been included in Other Operating Segments. The assets included 20 offshore supply vessels and certain related assets, including a right under a vessel construction contract. The operating results of this business for all periods presented are accounted for as a discontinued operation in the accompanying audited consolidated statements of income.

From time to time, we may sell a subsidiary or group of assets outside of our core markets or business, if it is economically advantageous for us to do so.

Environmental Compliance

Nabors does not presently anticipate that compliance with currently applicable environmental regulations and controls will significantly change its competitive position, capital spending or earnings during 2009. Nabors believes it is in material compliance with applicable environmental rules and regulations, and the cost of such compliance is not material to the business or financial

CSOC.CBR.00026201

Table of Contents

condition of Nabors. For a more detailed description of the environmental laws and regulations applicable to Nabors' operations, see Part I, Item 1A. — Risk Factors — Changes to or noncompliance with governmental regulation or exposure to environmental liabilities could adversely affect Nabors' results of operations.

ITEM 1A. RISK FACTORS

In addition to the other information set forth elsewhere in this Form 10-K, the following factors should be carefully considered when evaluating Nabors. The risks described below are not the only ones facing Nabors. Additional risks not presently known to us or that we currently deem immaterial may also impair our business operations.

Our business, financial condition or results of operations could be materially adversely affected by any of these risks.

Uncertain or negative global economic conditions could adversely affect our results of operations

During recent months, there has been substantial volatility and a decline in oil and natural gas prices due, at least in part, to the deteriorating global economic environment. In addition, there has been substantial uncertainty in the capital markets and access to financing is uncertain. These conditions could have an adverse effect on our industry and our business, including our future operating results and the ability to recover our assets, including goodwill, at their stated values. Many of our customers have curtailed their drilling programs, which, in many cases, has resulted in a decrease in demand for drilling rigs and a reduction in dayrates and utilization. Additionally, some customers have terminated drilling contracts prior to the expiration of their terms. A prolonged period of lower oil and natural gas prices could result in a continued decline in demand and/or dayrates. In addition, certain of our customers could experience an inability to pay suppliers, including our Company, in the event they are unable to access the capital markets to fund their business operations. Likewise, our suppliers may be unable to sustain their current level of operations, fulfill their commitments and/or fund future operations and obligations. Each of these could adversely affect our operations.

Fluctuations in oil and natural gas prices could adversely affect drilling activity and our revenues, cash flows and profitability

Our operations are materially dependent upon the level of activity in oil and gas exploration and production. Both short-term and long-term trends in oil and natural gas prices affect the level of such activity. Oil and natural gas prices and, therefore, the level of drilling, exploration and production activity can be volatile. Worldwide military, political and economic events, including initiatives by the Organization of Petroleum Exporting Countries, may affect both the demand for, and the supply of, oil and natural gas. Weather conditions, governmental regulation (both in the United States and elsewhere), levels of consumer demand, the availability of pipeline capacity, and other factors beyond our control may also affect the supply of and demand for oil and natural gas. The recent volatility and the effects of the recent significant decline in natural gas and oil prices is likely to continue in the near future, especially given the general contraction in the world's economy that began during 2008. We believe that any prolonged suppression of oil and natural gas prices would continue to depress the level of exploration and production activity. This would likely result in a corresponding decline in the demand for our services and could have an adverse effect on our revenues, cash flows and profitability. Lower oil and natural gas prices could also cause our customers to seek to terminate, renegotiate or fail to honor our drilling contracts; affect the fair market value of our rig fleet which in turn could trigger a write-down for accounting purposes; affect our ability to retain skilled rig personnel; and affect our ability to obtain access to capital to finance and grow our business. There can be no assurances as to the future level of demand for our services or future conditions in the oil and natural gas and oilfield services industries.

We operate in a highly competitive industry with excess drilling capacity, which may adversely affect our results of operations

The oilfield services industry in which we operate is very competitive. Contract drilling companies compete primarily on a regional basis, and competition may vary significantly from region to region at any particular time. Many drilling, workover and well-servicing rigs can be moved from one region to another in response to changes in levels of activity and market conditions, which may result in an oversupply of rigs in an area. In many markets in which we operate, the number of rigs available for use exceeds the demand for rigs, resulting in price competition. Most drilling and workover contracts are awarded on the basis of competitive bids, which also results in price competition. The land drilling market generally is more competitive than the offshore drilling market because there are larger numbers of rigs and competitors.

The nature of our operations presents inherent risks of loss that, if not insured or indemnified against, could adversely affect our results of operations

Our operations are subject to many hazards inherent in the drilling, workover and well-servicing industries, including blowouts, cratering, explosions, fires, loss of well control, loss of hole, damaged or lost drilling equipment and damage or loss from inclement weather or natural disasters. Any of these hazards could result in personal injury or death, damage to or destruction of equipment and facilities, suspension of operations, environmental damage and damage to the property of others. Our offshore operations are also

CSOC.CBR.00026202

subject to the hazards of marine operations including capsizing, grounding, collision, damage from hurricanes and heavy weather or sea conditions and unsound ocean bottom conditions. In addition, our international operations are subject to risks of war, civil disturbances or other political events. Generally, drilling contracts provide for the division of responsibilities between a drilling company and its customer, and we seek to obtain indemnification from our customers by contract for certain of these risks. To the extent that we are unable to transfer such risks to customers by contract or indemnification agreements, we seek protection through insurance. However, there is no assurance that such insurance or indemnification agreements will adequately protect us against liability from all of the consequences of the hazards described above. The occurrence of an event not fully insured or indemnified against, or the failure or inability of a customer or insurer to meet its indemnification or insurance obligations, could result in substantial losses. In addition, there can be no assurance that insurance will be available to cover any or all of these risks, or, even if available, that it will be adequate or that insurance premiums or other costs will not rise significantly in the future, so as to make such insurance prohibitive. It is possible that we will face continued upward pressure in our upcoming insurance renewals, our premiums and deductibles will be higher, and certain insurance coverage either will be unavailable or more expensive than it has been in the past. Moreover, our insurance coverage generally provides that we assume a portion of the risk in the form of a deductible. We may choose to increase the levels of deductibles (and thus assume a greater degree of risk) from time to time in order to minimize the overall cost to the Company.

Future price declines may result in a write-down of our asset carrying values

We follow the successful efforts method of accounting for our consolidated subsidiaries' oil and gas activities. Under the successful efforts method, lease acquisition costs and all development costs are capitalized. Our provision for depletion is based on these capitalized costs and is determined on a property-by-property basis using the units-of-production method, with costs being amortized over proved developed reserves. Proved oil and gas properties are reviewed when circumstances suggest the need for such a review and, if required, the proved properties are written down to their estimated fair value. Unproved properties are reviewed periodically to determine if there has been impairment of the carrying value, with any such impairment charged to expense in that period. The estimated fair value of our proved reserves generally declines when there is a significant and sustained decline in oil and natural gas prices. Because of the low natural gas prices at December 31, 2008, we performed an impairment test on our oil and gas properties of our wholly owned Ramshorn business unit. As a result, we recorded a non-cash pre-tax impairment to our oil and gas properties which totaled $21.5 million. A sustained decrease in oil and natural gas prices could require a write-down of the value of our proved oil and gas properties if the estimated fair value of these properties falls below their net book value.

Our oil and gas joint ventures, which we account for under the equity method of accounting, utilize the full-cost method of accounting for costs related to oil and natural gas properties. Under this method, all such costs (for both productive and nonproductive properties) are capitalized and amortized on an aggregate basis over the estimated lives of the properties using the units-of-production method. However, these capitalized costs are subject to a ceiling test which limits such pooled costs to the aggregate of the present value of future net revenues attributable to proved oil and natural gas reserves, discounted at 10%, plus the lower of cost or market value of unproved properties. The full-cost ceiling is evaluated at the end of each quarter using then current prices for oil and natural gas, adjusted for the impact of derivatives accounted for as cash flow hedges. Our U.S., international and Canadian joint ventures have recorded non-cash pre-tax full cost ceiling test writedowns of which $228.3 million represents our proportionate share of the writedowns recorded during the three months ended December 31, 2008. Any sustained further decline in oil and natural gas prices, or other factors, without other mitigating circumstances, could cause other future write-downs of capitalized costs and non-cash asset impairments that could adversely affect our results of operations.

The profitability of our international operations could be adversely affected by war, civil disturbance, or political or economic turmoil, fluctuation in currency exchange rates and local import and export controls

We derive a significant portion of our business from international markets, including major operations in Canada, South America, Mexico, the Caribbean, the Middle East, the Far East, Russia and Africa. These operations are subject to various risks, including the risk of war, civil disturbances and governmental activities that may limit or disrupt markets, restrict the movement of funds or result in the deprivation of contract rights or the taking of property without fair compensation. In certain countries, our operations may be subject to the additional risk of fluctuating currency values and exchange controls. In the international markets in which we operate, we are subject to various laws and regulations that govern the operation and taxation of our business and the import and export of our equipment from country to country, the imposition, application and interpretation of which can prove to be uncertain.

Changes to or noncompliance with governmental regulation or exposure to environmental liabilities could adversely affect our results of operations

The drilling of oil and gas wells is subject to various federal, state, local and foreign laws, rules and regulations. Our cost of compliance with these laws, rules and regulations may be substantial. For example, federal law imposes a variety of regulations on "responsible parties" related to the prevention of oil spills and liability for damages from such spills. As an owner and operator of onshore and offshore rigs and transportation equipment, we may be deemed to be a responsible party under federal law. In addition,

Table of Contents

our well-servicing, workover and production services operations routinely involve the handling of significant amounts of waste materials, some of which are classified as hazardous substances. Our operations and facilities are subject to numerous state and federal environmental laws, rules and regulations, including, without limitation, laws concerning the containment and disposal of hazardous substances, oilfield waste and other waste materials, the use of underground storage tanks and the use of underground injection wells. We generally require customers to contractually assume responsibility for compliance with environmental regulations. However, we are not always successful in allocating to customers all of these risks nor is there any assurance that the customer will be financially able to bear those risks assumed.

We employ personnel responsible for monitoring environmental compliance and arranging for remedial actions that may be required from time to time and also use consultants to advise on and assist with our environmental compliance efforts. Liabilities are recorded when the need for environmental assessments and/or remedial efforts become known or probable and the cost can be reasonably estimated.

Laws protecting the environment generally have become more stringent than in the past and are expected to continue to become more so. Violation of environmental laws and regulations can lead to the imposition of administrative, civil or criminal penalties, remedial obligations, and in some cases injunctive relief. Such violations could also result in liabilities for personal injuries, property damage, and other costs and claims.

Under the Comprehensive Environmental Response, Compensation and Liability Act, also known as CERCLA or Superfund, and related state laws and regulations, liability can be imposed jointly on the entire group of responsible parties or separately on any one of the responsible parties, without regard to fault or the legality of the original conduct on certain classes of persons that contributed to the release of a "hazardous substance" into the environment. Under CERCLA, such persons may be liable for the costs of cleaning up the hazardous substances that have been released into the environment and for damages to natural resources.

Changes in federal and state environmental regulations may also negatively impact oil and natural gas exploration and production companies, which in turn could have an adverse effect on us. For example, legislation has been proposed from time to time in Congress which would reclassify certain oil and natural gas production wastes as hazardous wastes, which would make the reclassified wastes subject to more stringent handling, disposal and clean-up requirements. Also, there are regulatory developments occurring in the domestic and international sectors in which we operate that are focused on restricting the emission of carbon dioxide, methane and other greenhouse gases that may be contributing to warming of the Earth's atmosphere, including the United Nations Framework Convention on Climate Change, also known as the "Kyoto Protocol" (an internationally applied protocol but one that the United States is not a participating member), the Regional Greenhouse Gas Initiative in the Northeastern United States, the Western Regional Climate Action Initiative in the Western United States, and the 2007 U.S. Supreme Court decision in *Massachusetts, et al. v. EPA* that greenhouse gases are an "air pollutant" under the federal Clean Air Act and thus subject to future regulation. The enactment of such hazardous waste legislation or future or more stringent regulation of greenhouse gases could dramatically increase operating costs for oil and natural gas companies and could reduce the market for our services by making many wells and/or oilfields uneconomical to operate.

The Oil Pollution Act of 1990, as amended, contains provisions specifying responsibility for removal costs and damages resulting from discharges of oil into navigable waters or onto the adjoining shorelines. In addition, the Outer Continental Shelf Lands Act provides the federal government with broad discretion in regulating the leasing of offshore oil and gas production sites.

As a holding company, we depend on our subsidiaries to meet our financial obligations

We are a holding company with no significant assets other than the stock of our subsidiaries. In order to meet our financial needs, we rely exclusively on repayments of interest and principal on intercompany loans made by us to our operating subsidiaries and income from dividends and other cash flow from such subsidiaries. There can be no assurance that our operating subsidiaries will generate sufficient net income to pay upstream dividends or cash flow to make payments of interest and principal to us in respect of their intercompany loans. In addition, from time to time, our operating subsidiaries may enter into financing arrangements which may contractually restrict or prohibit such upstream payments to us. There may also be adverse tax consequences associated with making dividend payments upstream.

We do not currently intend to pay dividends

We have not paid any cash dividends on our common shares since 1982. Nabors does not currently intend to pay any cash dividends on its common shares. However, we can give no assurance that we will not reevaluate our position on dividends in the future.

Because our option, warrant and convertible securities holders have a considerable number of common shares available for issuance and resale, significant issuances or resales in the future may adversely affect the market price of our common shares

CSOC.CBR.00026204

Table of Contents

As of February 23, 2009, we had 800,000,000 authorized common shares, of which 282,930,433 shares were outstanding. In addition, 42,276,821 common shares were reserved for issuance pursuant to option and employee benefit plans, and 78,013,925 shares were reserved for issuance upon conversion or repurchase of outstanding senior exchangeable notes. In addition, up to 104,520 of our common shares could be issuable on exchange of the shares of Nabors Exchangeco (Canada) Inc. We also plan to file a shelf registration statement to replace our shelf registration which expired in December 2008. The new shelf registration statement will automatically become effective on filing with the SEC and will permit us to sell various types of securities from time to time. The sale, or availability for sale, of substantial amounts of our common shares in the public market, whether directly by us or resulting from the exercise of warrants or options (and, where applicable, sales pursuant to Rule 144 of the Securities Act) or the conversion into common shares, or repurchase of debentures and notes using common shares, would be dilutive to existing security holders, could adversely affect the prevailing market price of our common shares and could impair our ability to raise additional capital through the sale of equity securities.

Provisions of our organizational documents and executive contracts may deter a change of control transaction and decrease the likelihood of a shareholder receiving a change of control premium

Our Board of Directors is divided into three classes, with each class serving a staggered three-year term. In addition, our Board of Directors has the authority to issue a significant amount of common shares and up to 25,000,000 preferred shares and to determine the price, rights (including voting rights), conversion ratios, preferences and privileges of the preferred shares, in each case without further vote or action by the holders of the common shares. Although we have no present plans to issue preferred shares, the classified Board and our Board's ability to issue additional preferred shares may discourage, delay or prevent changes in control of Nabors that are not supported by our Board, thereby possibly preventing certain of our shareholders from realizing a possible premium on their shares. In addition, the requirement in the indenture for our $2.75 billion senior exchangeable notes due 2011 to pay a make-whole premium in the form of an increase in the exchange rate in certain circumstances could have the effect of making a change in control of Nabors more expensive.

The Company has existing employment contracts with Nabors' Chairman and Chief Executive Officer, Eugene M. Isenberg, and its Deputy Chairman, President and Chief Operating Officer, Anthony G. Petrello. These employment contracts have Change of Control provisions that could result in significant cash payments to Messrs. Isenberg and Petrello.

We have a substantial amount of debt outstanding

As of December 31, 2008, we have long-term debt of approximately $4.1 billion, including current maturities of $225.0 million, and cash and cash equivalents and investments of $826.1 million, including $240.0 million of long-term investments and other receivables. Long-term investments and other receivables include $224.2 million in oil and gas financing receivables. If our $2.75 billion 0.94% senior exchangeable notes are exchanged, the required cash payment could have a significant impact on our level of cash and cash equivalents and investments available to meet our other cash obligations. We have a gross funded debt to capital ratio of 0.44:1 and a net funded debt to capital ratio of 0.39:1. The gross funded debt to capital ratio is calculated by dividing funded debt by funded debt plus deferred tax liabilities net of deferred tax assets plus capital. Funded debt is defined as the sum of (1) short-term borrowings, (2) current portion of long-term debt and (3) long-term debt. Capital is defined as shareholders' equity. The net funded debt to capital ratio is calculated by dividing net funded debt by net funded debt plus deferred tax liabilities net of deferred tax assets plus capital. Net funded debt is defined as the sum of (1) short-term borrowings, (2) current portion of long-term debt and (3) long-term debt reduced by the sum of cash and cash equivalents and short-term and long-term investments. Capital is defined as shareholders' equity. Both of these ratios are methods for calculating the amount of leverage a company has in relation to its capital.

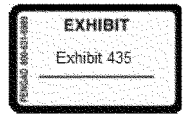
During January and through February 23, 2009, we purchased $427.7 million par value of our $2.75 billion 0.94% senior exchangeable notes due 2011 in the open market for cash totaling $370.6 million, leaving $2.22 billion par value outstanding.

On January 12, 2009, Nabors Industries, Inc., our wholly owned subsidiary, ("Nabors Delaware") issued $1.125 billion aggregate principal amount of 9.25% senior notes due 2019 that are fully and unconditionally guaranteed by Nabors Industries Ltd. See Note 22 Subsequent Event in Part II, Item 8. — Financial Statements and Supplementary Data.

In January and through February 23, 2009 we repurchased $56.6 million par value of our $225 million principal amount of 4.875% senior notes due August 2009 in the open market for cash totaling $56.8 million.

Our access to borrowing capacity could be affected by the recent instability in the global financial markets

Our ability to access capital markets or to otherwise obtain sufficient financing is enhanced by our senior unsecured debt ratings as provided by Dominion Bond Rating Service ("DBRS"), Fitch Ratings, Moody's Investor Service and Standard & Poor's, which are currently "BBB+," "BBB+," "Baa1" and "BBB+ (Negative Watch)", respectively, and our historical ability to access those markets as



needed. However, recent instability in the global financial markets has resulted in a significant reduction in the availability of funds from capital markets and other credit markets and as a result our ability to access these markets at this time may be significantly reduced. In addition, Standard & Poor's recently affirmed its "BBB+" credit rating on Nabors, but revised its outlook to negative from stable due primarily to worsening industry conditions. A credit downgrade by Standard & Poor's may impact our future ability to access credit markets.

Our ability to perform under new contracts and to grow our business as forecasted depends to a substantial degree on timely delivery of rigs and equipment from our suppliers

The operating revenues and net income for our Contract Drilling subsidiaries depend to a substantial degree on the timely delivery of rigs and equipment from our suppliers as part of our recently expanded capital programs. We can give no assurances that our suppliers will meet expected delivery schedules for delivery of these new rigs and equipment or that the new rigs and equipment will be free from defects. Delays in the delivery of new rigs and equipment and delays incurred in correcting any defects in such rigs and equipment could cause us to fail to meet our operating forecasts and could subject us to late delivery penalties under contracts with our customers.

We may have additional tax liabilities

We are subject to income taxes in the United States and numerous foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. In the ordinary course of our business, there are many transactions and calculations where the ultimate tax determination is uncertain. We are regularly under audit by tax authorities. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different than that which is reflected in income tax provisions and accruals. Based on the results of an audit or litigation, a material effect on our financial position, income tax provision, net income, or cash flows in the period or periods for which that determination is made could result.

It is possible that future changes to tax laws (including tax treaties) could have an impact on our ability to realize the tax savings recorded to date as well as future tax savings, resulting from our 2002 corporate reorganization.

On September 14, 2006, Nabors Drilling International Limited, one of our wholly owned Bermuda subsidiaries ("NDIL"), received a Notice of Assessment (the "Notice") from the Mexican Servicio de Administracion Tributaria (the "SAT") in connection with the audit of NDIL's Mexican branch for tax year 2003. The Notice proposes to deny depreciation expense deductions relating to drilling rigs operating in Mexico in 2003. The notice also proposes to deny a deduction for payments made to an affiliated company for the procurement of labor services in Mexico. The amount assessed by the SAT was approximately $19.8 million (including interest and penalties). Nabors and its tax advisors previously concluded that the deduction of said amounts was appropriate and more recently that the position of the SAT lacks merit. NDIL's Mexican branch took similar deductions for depreciation and labor expenses in 2004, 2005, 2006, 2007 and 2008. It is likely that the SAT will propose the disallowance of these deductions upon audit of NDIL's Mexican branch's 2004, 2005, 2006, 2007 and 2008 tax years.

Proposed tax legislation could mitigate or eliminate the benefits of our 2002 reorganization as a Bermuda company

Various bills have been introduced in Congress which could reduce or eliminate the tax benefits associated with our reorganization as a Bermuda company. Legislation enacted by Congress in 2004 provides that a corporation that reorganized in a foreign jurisdiction on or after March 4, 2003 shall be treated as a domestic corporation for United States federal income tax purposes. Nabors' reorganization was completed June 24, 2002. There have been and we expect that there may continue to be legislation proposed by Congress from time to time applicable to certain companies that completed such reorganizations on or after March 20, 2002 which, if enacted, could limit or eliminate the tax benefits associated with our reorganization.

Because we cannot predict whether legislation will ultimately be adopted, no assurance can be given that the tax benefits associated with our reorganization will ultimately accrue to the benefit of the Company and its shareholders. It is possible that future changes to the tax laws (including tax treaties) could have an impact on our ability to realize the tax savings recorded to date as well as future tax savings resulting from our reorganization.

Legal proceedings could affect our financial condition and results of operations

We are from time to time subject to legal proceedings or governmental investigations which include employment, tort, intellectual property and other claims, and purported class action and shareholder derivative actions. We also are subject to complaints or allegations from former, current or prospective employees from time to time, alleging violations of employment-related laws. Lawsuits or claims could result in decisions against us which could have an adverse effect on our financial condition or results of operations.

CSOC.CBR.00026206

Table of Contents

Our financial results could be affected by changes in the value of our investment portfolio

We invest our excess cash in a variety of investment vehicles, many of which are subject to market fluctuations resulting from a variety of economic factors or factors associated with a particular investment, including without limitation, overall declines in the equity markets, currency and interest rate fluctuations, volatility in the credit markets, exposures related to concentrations of investments in a particular fund or investment, exposures related to hedges of financial positions, and the performance of particular fund or investment managers. As a result, events or developments which negatively affect the value of our investments could have an adverse effect on our results of operations.

The loss of key executives could reduce our competitiveness and prospects for future success

The successful execution of our strategies central to our future success will depend, in part, on a few of our key executive officers. We have entered into employment agreements with our Chairman and Chief Executive Officer, Mr. Eugene M. Isenberg and our Deputy Chairman, President and Chief Operating Officer, Mr. Anthony G. Petrello, to secure their employment through September 30, 2010. We do not carry key man insurance. The loss of Mr. Isenberg or Mr. Petrello could have an adverse effect on our financial condition or results of operations.

ITEM 1B. UNRESOLVED STAFF COMMENTS

Not applicable.

ITEM 2. PROPERTIES

Many of the international drilling rigs and certain of the Alaska rigs in our fleet are supported by mobile camps which house the drilling crews and a significant inventory of spare parts and supplies. In addition, we own various trucks, forklifts, cranes, earth moving and other construction and transportation equipment and own various helicopters, fixed-wing aircraft and heliportable well-service equipment, which are used to support drilling and logistics operations.

Nabors and its subsidiaries own or lease executive and administrative office space in Hamilton, Bermuda (principal executive office); Houston, Texas; Anchorage, Alaska; New Iberia and Youngsville, Louisiana; Bakersfield, California; Alice, Bridgeport, Corpus Christi, Kilgore, Longview, Magnolia, Midland and Odessa, Texas; Casper, Wyoming; Alberta, Canada; Oklahoma City and Pocola, Oklahoma; Billings, Montana; Williston, North Dakota; Fort Lupton and Fruita, Colorado; Dubai, U.A.E.; Dhahran, Saudi Arabia; Hassi-Messaoud, Algeria; Almaty, Kazakhstan; Ahmadi, Kuwait; Kuala Lumpur, Malaysia; Pointe Noire, Congo; Moscow, Russia; and Ploeisti, Romania. We also own or lease a number of facilities and storage yards used in support of operations in each of our geographic markets.

Nabors and its subsidiaries own certain mineral interests in connection with their investing and operating activities. Nabors does not consider these properties to be material to its overall operations.

Additional information about our properties can be found in Notes 2 and 7 (each, under the caption Property, Plant and Equipment) and 15 (under the caption Operating Leases) in Part II, Item 8. – Financial Statements and Supplementary Data. The revenues and property, plant and equipment by geographic area for the fiscal years ended December 31, 2006, 2007 and 2008, can be found in Note 20 in Part II, Item 8. — Financial Statements and Supplementary Data. A description of our rig fleet is included under the caption Introduction in Part I, Item 1. — Business.

Nabors' management believes that our existing equipment and facilities and our planned expansion of our equipment and facilities through our capital expenditure programs currently in process are adequate to support our current level of operations as well as an expansion of drilling operations in those geographical areas where we may expand.

ITEM 3. LEGAL PROCEEDINGS

Nabors and its subsidiaries are defendants or otherwise involved in a number of lawsuits in the ordinary course of business. We estimate the range of our liability related to pending litigation when we believe the amount and range of loss can be estimated. We record our best estimate of a loss when the loss is considered probable. When a liability is probable and there is a range of estimated loss with no best estimate in the range, we record the minimum estimated liability related to the lawsuits or claims. As additional information becomes available, we assess the potential liability related to our pending litigation and claims and revise our estimates. Due to uncertainties related to the resolution of lawsuits and claims, the ultimate outcome may differ from our estimates. In the opinion of management and based on liability accruals provided, our ultimate exposure with respect to these pending lawsuits and

CSOC.CBR.00026207

claims is not expected to have a material adverse effect on our consolidated financial position or cash flows, although they could have a material adverse effect on our results of operations for a particular reporting period.

On July 5, 2007, we received an inquiry from the U.S. Department of Justice relating to its investigation of one of our vendors and compliance with the Foreign Corrupt Practices Act. The inquiry relates to transactions with and involving Panalpina, a vendor which provides freight forwarding and customs clearance services to certain of our affiliates. To date, the inquiry has focused on transactions in Kazakhstan, Saudi Arabia, Algeria and Nigeria. The Audit Committee of our Board of Directors has engaged outside counsel to review certain transactions with this vendor, and their review is ongoing. The Audit Committee of our Board of Directors has received periodic updates at its regularly scheduled meetings and the Chairman of the Audit Committee has received updates between meetings as circumstances warrant. The investigation includes a review of certain amounts paid to and by Panalpina in connection with the obtaining of permits for the temporary importation of equipment and clearance of goods and materials through customs. Both the SEC and the U.S. Department of Justice have been advised of the Company's investigation. The ultimate outcome of this review or the effect of implementing any further measures which may be necessary to ensure full compliance with the applicable laws cannot be determined at this time.

A court in Algeria has entered a judgment against the Company related to certain alleged customs infractions. The Company believes it did not receive proper notice of the judicial proceedings against it, and that the amount of the judgment is excessive. We intend to assert the lack of legally required notice as a basis for challenging the judgment on appeal. Based upon our understanding of applicable law and precedent, we believe that this challenge will be successful. We do not believe that a loss is probable and have not accrued any amounts related to this matter. However, the ultimate resolution of this matter, and the timing of such resolution, is uncertain. If the Company is ultimately required to pay a fine or judgment related to this matter, the amount of the loss could range from approximately $140,000 to $20 million.

STOCK PERFORMANCE GRAPH

The following graph illustrates comparisons of five-year cumulative total returns among Nabors, the S&P 500 Index and the Dow Jones Oil Equipment and Services Index. Total return assumes $100 invested on December 31, 2003 in shares of Nabors, the S&P 500 Index, and the Dow Jones Oil Equipment and Services Index. It also assumes reinvestment of dividends and is calculated at the end of each calendar year, December 31, 2004 to December 31, 2008.

	2004	2005	2006	2007	2008
Nabors Industries Ltd.	124	183	144	132	**58**
S&P 500 Index	111	116	135	142	**90**
Dow Jones Oil Equipment and Services Index	135	205	233	338	**138**

I. Market and Share Prices

Our common shares are traded on the New York Stock Exchange under the symbol "NBR". At February 23, 2009, there were approximately 1,575 shareholders of record. We have not paid any cash dividends on our common shares since 1982. Nabors does not currently intend to pay any cash dividends on its common shares. However, we can give no assurance that we will not reevaluate our position on dividends in the future.

On December 13, 2005, our Board of Directors approved a two-for-one stock split of our common shares to be effectuated in the form of a stock dividend. The stock dividend was distributed on April 17, 2006 to shareholders of record on March 31, 2006. For all balance sheets presented, capital in excess of par value was reduced by $.2 million and common shares were increased by $.2 million.

CSOC.CBR.00026209

Table of Contents

The following table sets forth the reported high and low sales prices of our common shares as reported on the New York Stock Exchange for the periods indicated.

	Share Price	
Calendar Year	High	Low
2007 First quarter	32.74	27.53
Second quarter	36.42	29.59
Third quarter	34.10	27.05
Fourth quarter	31.23	26.00
2008 First quarter	34.14	23.61
Second quarter	50.58	33.06
Third quarter	50.35	22.50
Fourth quarter	24.88	9.72

The following table provides information relating to Nabors' repurchase of common shares during the three months ended December 31, 2008:

Period (In thousands, except per share amounts)	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program(1)
October 1 – October 31, 2008	46 (2)	$22.59	—	$35,458
November 1 – November 30, 2008	1 (2)	$22.59	—	$35,458
December 1 – December 31, 2008	953 (2)	$22.59	—	$35,458

(1) In July 2006 our Board of Directors authorized a share repurchase program under which we may repurchase up to $500 million of our common shares in the open market or in privately negotiated transactions. This program supersedes and cancels our previous share repurchase program. Through December 31, 2008, $464.5 million of our common shares have been repurchased under this program. As of December 31, 2008, we had the capacity to repurchase up to an additional $35.5 million of our common shares under the July 2006 share repurchase program.

(2) In September 2008 we entered into a three-month written put option for 1 million of our common shares with a strike price of $25 per common share. We settled this contract during the fourth quarter of 2008 and paid cash of $22.6 million, net of the premium received on this contract.

See Part III, Item 12. for a description of securities authorized for issuance under equity compensation plans.

II. Dividend Policy

See Part I, Item 1A. — Risk Factors — We do not currently intend to pay dividends.

III. Shareholder Matters

Bermuda has exchange controls which apply to residents in respect to the Bermudian dollar. As an exempt company, Nabors is considered to be nonresident for such controls; consequently, there are no Bermuda governmental restrictions on the Company's ability to make transfers and carry out transactions in all other currencies, including currency of the United States.

There is no reciprocal tax treaty between Bermuda and the United States regarding withholding taxes. Under existing Bermuda law there is no Bermuda income or withholding tax on dividends paid by Nabors to its shareholders. Furthermore, no Bermuda tax is levied on the sale or transfer (including by gift and/or on the death of the shareholder) of Nabors common shares (other than by shareholders resident in Bermuda).

Balance Sheet Data (2) (In thousands, except ratio data)	As of December 31, 2008	2007	2006	2005	2004
Cash, cash equivalents, short-term and long-term investments and other receivables (5)	$ 826,063	$ 1,179,639	$1,653,285	$1,646,327	$1,411,047
Working capital	1,037,734	710,980	1,650,496	1,264,852	821,120
Property, plant and equipment, net	7,282,042	6,632,612	5,410,101	3,886,924	3,275,495
Total assets	10,467,982	10,103,382	9,142,303	7,230,407	5,862,609
Long-term debt	3,887,711	3,306,433	4,004,074	1,251,751	1,201,686
Shareholders' equity	$ 4,692,119	$ 4,514,121	$3,536,653	$3,758,140	$2,929,393
Funded debt to capital ratio:					
Gross (6)	0.44:1	0.44:1	0.50:1	0.32:1	0.38:1
Net (7)	0.39:1	0.36:1	0.37:1	0.08:1	0.15:1

(1) All periods present the Sea Mar business as a discontinued operation.

(2) Our acquisitions' results of operations and financial position have been included beginning on the respective dates of acquisition and include Pragma Drilling Equipment Ltd. assets (May 2006), 1183011 Alberta Ltd. (January 2006), Sunset Well Service, Inc. (August 2005), Alexander Drilling, Inc. assets (June 2005), Phillips Trucking, Inc. assets (June 2005), and Rocky Mountain Oil Tools, Inc. assets (March 2005).

(3) Represents capital expenditures and the portion of the purchase price of acquisitions allocated to fixed assets and goodwill based on their fair market value.

(4) The interest coverage ratio from continuing operations is computed by calculating the sum of income from continuing operations before income taxes, interest expense, depreciation and amortization, depletion expense, goodwill and intangible asset impairments and our proportionate share of non-cash pre-tax full cost ceiling writedowns from our oil and gas joint ventures less investment income (loss) and then dividing by interest expense. This ratio is a method for calculating the amount of operating cash flows available to cover interest expense. The "interest coverage ratio from continuing operations" is not a measure of operating performance or liquidity defined by accounting principles generally accepted in the United States of America ("GAAP") and may not be comparable to similarly titled measures presented by other companies.

(5) The December 31, 2008 and 2007 amounts include $1.9 million and $53.1 million, respectively, in cash proceeds receivable from brokers from the sale of certain long-term investments that are included in other current assets and $224.2 million and $123.3 million, respectively, in oil and gas financing receivables that are included in long-term investments and other receivables.

(6) The gross funded debt to capital ratio is calculated by dividing funded debt by funded debt plus deferred tax liabilities, net of deferred tax assets plus capital. Funded debt is defined as the sum of (1) short-term borrowings, (2) current portion of long-term debt and (3) long-term debt. Capital is defined as shareholders' equity. The "gross funded debt to capital ratio" is not a measure of operating performance or liquidity defined by GAAP and may not be comparable to similarly titled measures presented by other companies.

(7) The net funded debt to capital ratio is calculated by dividing net funded debt by net funded debt plus deferred tax liabilities, net of deferred tax assets plus capital. Net funded debt is defined as the sum of (1) short-term borrowings, (2) current portion of long-term debt and (3) long-term debt reduced by the sum of cash and cash equivalents and short-term and long-term investments and other receivables. Capital is defined as shareholders' equity. The "net funded debt to capital ratio" is not a measure of operating performance or liquidity defined by GAAP and may not be comparable to similarly titled measures presented by other companies.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management Overview

The following Management's Discussion and Analysis of Financial Condition and Results of Operations is intended to help the reader understand the results of our operations and our financial condition. This information is provided as a supplement to, and should be read in conjunction with, our consolidated financial statements and the accompanying notes to our consolidated financial statements.

Nabors is the largest land drilling contractor in the world. We conduct oil, gas and geothermal land drilling operations in the U.S. Lower 48 states, Alaska, Canada, South America, Mexico, the Caribbean, the Middle East, the Far East, Russia and Africa. Nabors also is one of the largest land well-servicing and workover contractors in the United States and Canada and is a leading provider of offshore platform workover and drilling rigs in the United States and multiple international markets. To further supplement and complement our primary business, we offer a wide range of ancillary well-site services, including engineering, transportation, construction, maintenance, well logging, directional drilling, rig instrumentation, data collection and other support services, in selected domestic and international markets. We offer logistics services for onshore drilling in Canada using helicopter and fixed-winged aircraft. We manufacture and lease or sell top drives for a broad range of drilling applications, directional drilling systems, rig instrumentation and data collection equipment, pipeline handling equipment and rig reporting software. We also invest in oil and gas exploration, development and production activities worldwide.

The majority of our business is conducted through our various Contract Drilling operating segments, which include our drilling, workover and well-servicing operations, on land and offshore. Our oil and gas exploration, development and production operations are included in a category labeled Oil and Gas for segment reporting purposes. Our operating segments engaged in drilling technology and top drive manufacturing, directional drilling, rig instrumentation and software, and construction and logistics operations are aggregated in a category labeled Other Operating Segments for segment reporting purposes.

Our businesses depend, to a large degree, on the level of spending by oil and gas companies for exploration, development and production activities. Therefore, a sustained increase or decrease in the price of natural gas or oil, which could have a material impact on exploration, development and production activities, could also materially affect our financial position, results of operations and cash flows.

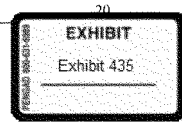
The magnitude of customer spending on new and existing wells is the primary driver of our business. The primary determinate of customer spending is the degree of their cash flow and earnings which are largely determined by natural gas prices in our U.S. Lower 48 Land Drilling and Canadian Drilling operations, while oil prices are the primary determinate in our Alaskan, International, U.S. Offshore (Gulf of Mexico), Canadian Well-servicing and U.S. Land Well-servicing operations. The following table sets forth natural gas and oil price data per Bloomberg for the last three years:

	Year Ended December 31,			Increase / (Decrease)			
	2008	2007	2006	2008 to 2007		2007 to 2006	
Commodity prices:							
Average Henry Hub natural gas spot price ($/million cubic feet (mcf))	$ 8.89	$ 6.97	$ 6.73	$ 1.92	28%	$0.24	4%
Average West Texas intermediate crude oil spot price ($/barrel)	$99.92	$72.23	$66.09	$27.69	38%	$6.14	9%

Beginning in the second half of 2008, there has been a significant decrease in natural gas and oil prices. Natural gas prices, which averaged $10.03 per mcf during the first half of 2008, declined significantly, averaging only $7.74 per mcf during the second half of 2008 and $5.84 per mcf during December 2008. The decline has continued as natural gas prices have averaged $4.96 per mcf during the period January 1, 2009 through February 23, 2009.

Oil prices also declined in the second half of 2008 with average prices of $111.14 per barrel during the first half of 2008, decreasing to average prices of $88.88 per barrel during the second half of 2008 and $41.44 per barrel during December 2008. Oil prices remain depressed and have averaged $40.22 per barrel during the period January 1, 2009 through February 23, 2009.

This significant decline in commodity prices has, at least in part, been driven by the significant deterioration of the global economic environment including the extreme volatility in the capital and credit markets. All of these factors are having an adverse effect on our customers' spending plans for exploration, production and development activities which has had a significant negative impact on our operations beginning in December 2008.



CSOC.CBR.00026213

Table of Contents

Operating revenues and Earnings from unconsolidated affiliates for the year ended December 31, 2008 totaled $5.3 billion, representing an increase of $325.5 million, or 7% as compared to the year ended December 31, 2007. Adjusted income derived from operating activities and net income for the year ended December 31, 2008 totaled $1.0 billion and $551.2 million ($1.93 per diluted share), respectively, representing decreases of 15% and 41%, respectively, compared to the year ended December 31, 2007. Operating revenues and Earnings from unconsolidated affiliates for the year ended December 31, 2007 totaled $5.0 billion, representing an increase of $228.7 million, or 5% as compared to the year ended December 31, 2006. Adjusted income derived from operating activities and net income for the year ended December 31, 2007 totaled $1.2 billion and $930.7 million ($3.25 per diluted share), respectively, representing decreases of 13% and 9%, respectively, compared to the year ended December 31, 2006.

Our operating results were negatively impacted as a result of non-cash, pre-tax charges arising from oil and gas full cost ceiling test writedowns and goodwill and intangible asset impairments. Our Earnings (losses) from Unconsolidated Affiliates line in our income statement includes $228.3 million, representing our proportionate share of non-cash pre-tax full cost ceiling test writedowns from our U.S., international and Canadian joint ventures during the three months ended December 31, 2008. Additionally, we recorded non-cash pre-tax impairment charges of $21.5 million related to our wholly owned Ramshorn business unit under application of the successful efforts method of accounting related to oil and gas properties during the three months ended December 31, 2008. Charges from our U.S., international and Canadian joint ventures and our wholly owned Ramshorn business unit are included in our Oil and Gas operating segment results. Our Canada Well-servicing and Drilling operating segment and Nabors Blue Sky Ltd., one of our Canadian subsidiaries reported in our Other Operating Segments include $145.4 million and $4.6 million non-cash pre-tax goodwill and intangible asset impairment charges to reduce the carrying value of these assets to their estimated fair value due to the duration of the economic downturn in Canada and the lack of certainty regarding eventual recovery. Excluding these charges, our operating results were slightly higher primarily due to our U.S. Lower 48 Land Drilling, International Drilling and Other Operating segments resulting from higher average dayrates and activity levels resulting from sustained higher natural gas and oil prices throughout 2007 and the majority of 2008, partially offset by increased operating costs and higher depreciation expense due to our capital expenditures.

The decrease in our adjusted income derived from operating activities from 2006 to 2007 related primarily to our U.S. Lower 48 Land Drilling, Canada Drilling and Well-servicing, and our U.S. Well-servicing operations, where activity levels decreased despite slightly higher natural gas prices and higher oil prices. Operating results were further negatively impacted by higher levels of depreciation expense due to our capital expenditures. Partially offsetting the decreases in our adjusted income derived from operating activities were the increases in operating results from our International operations and to a lesser extent by our Alaska operations, driven by high oil prices. In addition, our net income and earnings per share for 2007 has decreased compared to 2006 as a result of investment net losses during 2007 only partially offset by a lower effective tax rate and a lower number of average shares outstanding.

Our operating results for 2009 are expected to decrease from levels realized during 2008 given our current expectation of the continuation of lower commodity prices during 2009 and the related impact on drilling and well-servicing activity and dayrates. The decrease in drilling activity and dayrates is expected to have a significant impact on our U.S. Lower 48 Land Drilling and our U.S. Land Well-servicing operations. In our U.S. Lower 48 Land Drilling operations, our rig count has decreased from its peak during October 2008 of 273 rigs to 162 rigs currently operating as of February 23, 2009. Our Well-servicing activity is down approximately 45% from its October 2008 peak of 105,872 hours when compared to estimated rig hours for February 2009. We expect our International operations to increase during 2009 resulting from the deployment of additional rigs under long-term contracts and the renewal of existing contracts at higher dayrates.

The following tables set forth certain information with respect to our reportable segments and rig activity:

(In thousands, except percentages and rig activity)	Year Ended December 31,			Increase/(Decrease)			
	2008	2007	2006	2008 to 2007		2007 to 2006	
Reportable segments:							
Operating revenues and Earnings (losses) from unconsolidated affiliates from continuing operations: [1]							
Contract Drilling: [2]							
U.S. Lower 48 Land Drilling	$ 1,878,441	$ 1,710,990	$ 1,890,302	$ 167,451	10%	$ (179,312)	(9%)
U.S. Land Well-servicing	758,510	715,414	704,189	43,096	6%	11,225	2%
U.S. Offshore	252,529	212,160	221,676	40,369	19%	(9,516)	(4%)
Alaska	184,243	152,490	110,718	31,753	21%	41,772	38%
Canada	502,695	545,035	686,889	(42,340)	(8%)	(141,854)	(21%)

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED SHAREHOLDER MATTERS

The Company maintains five different equity compensation plans: 1996 Employee Stock Plan, 1997 Executive Officers Incentive Stock Plan, 1998 Employee Stock Plan, 1999 Stock Option Plan for Non-Employee Directors and 2003 Employee Stock Plan pursuant to which it may grant equity awards to eligible persons from certain plans. The terms of the Company's equity compensation plans are described more fully below.

The following table gives information about these equity compensation plans as of December 31, 2008:

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	18,114,684	$21.7965	14,752,029(1)(2)
Equity compensation plans not approved by security holders	7,743,321	$22.4308	886,000
Total	25,858,005		15,638,029

(1) The 1996 Employee Stock Plan incorporated an evergreen formula pursuant to which on each January 1, the aggregate number of shares reserved for issuance under the 1996 Employee Stock Plan were increased by an amount equal to 1 1-3 % of the common shares outstanding on December 31 of the immediately preceding fiscal year. The 1996 Employee Stock Plan expired on January 17, 2006, and no additional shares were reserved for issuance during fiscal 2006.

(2) The 2003 Employee Stock Plan provides, commencing on June 1, 2006 and thereafter for a period of four (4) years on each January 1, for an automatic increase in the number of shares reserved and available for issuance under the Plan by an amount equal to two percent (2%) of the Company's outstanding common shares as of each June 1 or January 1 date.

Following is a brief summary of the material terms of the plans that have not been approved by our shareholders. Unless otherwise indicated, (1) each plan is administered by an independent committee appointed by the Company's Board of Directors; (2) the exercise price of options granted under each plan shall be no less than 100% of the fair market value per common share on the date of the grant of the option; (3) the term of an award granted under each plan may not exceed ten years; (4) options granted under the plan are nonstatutory options not intended to qualify under Section 422 of the Internal Revenue Code of 1986, as amended (NSOs); and (5) unless otherwise determined by the committee in its discretion, options may not be exercised after the optionee has ceased to be in the employ of the Company.

1997 Executive Officers Incentive Stock Plan

The plan reserves for issuance up to 4,900,000 common shares of the Company pursuant to the exercise of options granted under the plan. Options may be granted under the plan to executive officers of the Company. No optionee may receive grants in excess of 50% of the total number of common shares authorized to be issued under the plan.

1998 Employee Stock Plan

The plan reserves for issuance up to 35,000,000 common shares of the Company pursuant to the exercise of options granted under the plan. The persons who shall be eligible to participate in the plan are employees and consultants of the Company. Options granted to employees may either be awards of shares, non-qualified stock options (each, an "NQSO"), incentive stock options (each, an "ISO") or stock appreciation rights (each, an "SAR"). An optionee may reduce the option exercise price by paying the Company in cash, shares, options, or the equivalent, an amount equal to the difference between the exercise price and the reduced exercise price of the option. The committee shall establish performance goals for stock awards in writing not later than the date required for compliance under IRC Section 162(m) and the vesting of such shares shall be contingent upon the attainment of such performance goals. Stock awards shall vest over a period determined by the Committee, which period shall expire no later than January 18, 2006. The committee may grant ISOs of not less than 100% of the fair market value per common share on the date of grant; except that in the

CSOC.CBR.00026315

event the optionee owns on the date of grant, securities possessing more than 10% of the total combined voting power of all classes of securities of the Company or of any subsidiary of the Company, the price per share shall not be less than 110% of the fair market value per common share on the date of the grant and such option shall expire five years from the date such option is granted. SARs may be granted in conjunction with all or part of any option granted under the plan, in which case the exercise of the SAR shall require the cancellation of a corresponding portion of the option and the exercise of the option will result in cancellation of a corresponding portion of the SAR. In the case of a NQSO, such rights may be granted either at or after the time of grant of such option. In the case of an ISO, such rights may be granted only at the time of grant of such option. A SAR may also be granted on a stand alone basis. The term of a SAR shall be established by the committee. The exercise price of a SAR shall in no event be less than 100% of the fair market value per common share on the date of grant. The committee shall have the authority to make provisions in its award and grant agreements to address vesting and other issues arising in connection with a change of control.

1999 Stock Option Plan for Non-Employee Directors

The plan reserves for issuance up to 3,000,000 common shares of the Company pursuant to the exercise of options granted under the plan. The plan is administered by the Company's Board of Directors, provided that the Board may appoint a committee to administer the plan. In no event shall an eligible director consider or vote on the administration of this plan or serve as a member of the committee. Options may be granted under the plan to non-employee directors of the Company. Options shall vest and become non-forfeitable on the first year anniversary of the day on which such option was granted, if the optionee has continued to serve as a director until that day, unless otherwise provided. In the event of termination of an optionee's service as a director by reason of voluntary retirement, declining to stand for re-election or becoming a full time employee of the Company or a subsidiary of the Company, all unvested options granted pursuant to this Plan shall automatically expire and shall not be exercisable and all options unexercised shall continue to be exercisable until the stated expiration date of such options. In the event of death or disablement of an optionee while the optionee is a director, the then-outstanding options of such optionee shall be exercisable for two years from the date of the death or disablement of the optionee or by his/her successors in interest. All unvested options shall automatically vest and become non-forfeitable as of the date of death or disablement and shall be exercisable for two years from the date of the death of the optionee or until the stated grant expiration date, whichever is earlier, by the optionee or by his/her successors in interest. In the event of the termination of an optionee's service as a director by the Board of Directors for cause or the failure of such director to be re-elected, the administrator of the plan in its sole discretion can cancel the then-outstanding options of such optionee, including those options which have vested and such options shall automatically expire and become non-exercisable on the effective date of such termination.

The remainder of the information called for by this item will be contained in our definitive Proxy Statement to be distributed in connection with our 2009 annual meeting of shareholders under the caption " *Share Ownership of Management and Principal Shareholders* " and is incorporated into this document by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

The information called for by this item will be contained in our definitive Proxy Statement to be distributed in connection with our 2009 annual meeting of shareholders under the caption " *Certain Relationships and Related Transactions* " and is incorporated into this document by reference.

ITEM 14. PRINCIPAL ACCOUNTING FEES AND SERVICES

The information called for by this item will be contained in our definitive Proxy Statement to be distributed in connection with our 2009 annual meeting of shareholders under the caption *"Principal Accounting Fees and Services"* and is incorporated into this document by reference.

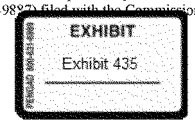
(b) Exhibits

Exhibit No.	Description
2.1	Agreement and Plan of Merger among Nabors Industries, Inc., Nabors Acquisition Corp. VIII, Nabors Industries Ltd. and Nabors US Holdings Inc. (incorporated by reference to Annex I to the proxy statement/prospectus included in Nabors Industries Ltd.'s Registration Statement on Form S-4 (File No. 333-76198) filed with the Commission on May 10, 2002, as amended).
2.2	Amended and Restated Acquisition Agreement, dated as of March 18, 2002, by and between Nabors Industries, Inc. and Enserco Energy Service Company Inc. (incorporated by reference to Exhibit 2.1 to Nabors Industries, Inc.'s Registration Statement on Form S-3 (File No. 333-85228)).
2.3	Form of Plan of Arrangement Under Section 192 of the Canada Business Corporations Act Involving and Affecting Enserco Energy Service Company Inc. and its Security holders (included in Schedule B to Exhibit 2.2).
2.4	Arrangement Agreement dated August 12, 2002 between Nabors Industries Ltd. and Ryan Energy Technologies Inc. (incorporated by reference to Exhibit 2.4 to Nabors Industries Ltd.'s Form 10-K for the year ended December 31, 2002 (File No. 000-49887)).
2.5	Asset Purchase Agreement dated July 20, 2007, by and among Nabors US Finance LLC, Nabors Well Services Co. (inclusive of its Sea Mar Division), Sea Mar Management LLC and Hornbeck Offshore Services, Inc. (incorporated by reference to Exhibit 2.5 to Nabors Industries Ltd.'s Form 10-Q (File No. 001-32657) filed with the Commission on August 2, 2007).
3.1	Memorandum of Association of Nabors Industries Ltd. (incorporated by reference to Annex II to the proxy statement/prospectus included in Nabors Industries Ltd.'s Registration Statement on Form S-4 (Registration No. 333-76198) filed with the Commission on May 10, 2002, as amended).
3.2	Amended and Restated Bye-Laws of Nabors Industries Ltd. (incorporated by reference to Exhibit 4.2 to Nabors Industries Ltd.'s Form 10-Q (File No. 000-49887) filed with the Commission on August 3, 2005).
3.3	Amendment to Amended and Restated Bye-Laws of Nabors Industries Ltd. (incorporated by reference to Exhibit A of Nabors Industries Ltd. Notice of Special General Meeting and Proxy Statement (File No. 001-32657) filed February 24, 2006).
3.4	Form of Resolutions of the Board of Directors of Nabors Industries Ltd. authorizing the issue of the Special Voting Preferred Share (incorporated by reference to Exhibit 3.3 to Nabors Industries Ltd.'s Post-Effective Amendment No. 1 to Registration Statement on Form S-3 (Registration No. 333-85228-99) filed with the Commission on June 11, 2002).
4.1	Indenture dated as of February 5, 2001 between Nabors Industries, Inc. and Bank One, N.A., as trustee, in connection with $1,382,200,000 principal amount at maturity of Zero Coupon Convertible Senior Debentures due 2021 (incorporated by reference to Exhibit 4.11 to Nabors Industries, Inc.'s Form 10-K (File No. 1-9245) filed with the Commission on March 30, 2001).
4.2	First Supplemental Indenture, dated as of June 21, 2002, among Nabors Industries, Inc., as issuer, Nabors Industries Ltd. as guarantor, and Bank One, N.A. as trustee, with respect to Nabors Industries, Inc.'s Zero Coupon Convertible Senior Debentures due 2021 (incorporated by reference to Exhibit 4.5 to Nabors Industries Ltd.'s Form 10-Q (File No. 000-49887) filed with the Commission on August 14, 2002).
4.3	Second Supplemental Indenture dated as of October 25, 2004, by and among Nabors Industries, Inc., as issuer, Nabors Industries Ltd., as guarantor, and J.P. Morgan Trust Company, National Association (as successor to Bank One, N.A.), as Trustee, to the Indenture, dated as of February 5, 2001, as amended, with respect to Nabors Industries, Inc.'s Zero Coupon Convertible Senior Debentures due 2021 (incorporated by reference to Exhibit 4.1 to Nabors Industries Ltd.'s Current Report on Form 8-K (File No. 000-49887) filed with the Commission on October 27, 2004).



4.4	Indenture, dated August 22, 2002, among Nabors Industries, Inc., as issuer, Nabors Industries Ltd., as guarantor, and Bank One, N.A., with respect to Nabors Industries, Inc.'s Series A and Series B 5.375% Senior Notes due 2012 (incorporated by reference to Exhibit 4.1 to Nabors Industries, Inc.'s Registration Statement on Form S-4 (Registration No. 333-10049201) filed with the Commission on October 11, 2002).
4.5	Indenture, dated August 22, 2002, among Nabors Holdings 1, ULC, as issuer, Nabors Industries, Inc. and Nabors Industries Ltd., as guarantors, and Bank One, N.A., with respect to Nabors Holdings 1, ULC's Series A and Series B 4.875% Senior Notes due 2009 (incorporated by reference to Exhibit 4.1 to Nabors Holdings 1, ULC's Registration Statement on Form S-4 (Registration No. 333-10049301) filed with the Commission on October 11, 2002).
4.6	Form of Provisions Attaching to the Exchangeable Shares of Nabors Exchangeco (Canada) Inc. (incorporated by

EXHIBIT 31.1

Certification of Chief Executive Officer
Pursuant to Exchange Act Rule 13a-14(a) or 15d-14(a)

I, Eugene M. Isenberg, certify that:

1. I have reviewed this annual report on Form 10-K of Nabors Industries Ltd.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

   (a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

   (b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

   (c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

   (d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

   (a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

   (b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350,
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002

In connection with the Annual Report on Form 10-K of Nabors Industries Ltd. (the "Company") for the year ended December 31, 2008 as filed with the Securities and Exchange Commission on the date hereof (the "Report"), I, Eugene M. Isenberg, Chairman and Chief Executive Officer of the Company, and I, Bruce P. Koch, Vice President and Chief Financial Officer of the Company, each certify, pursuant to 18 U.S.C. Section 1350, as adopted pursuant to § 906 of the Sarbanes-Oxley Act of 2002, that to the best of my knowledge:

(1) the Report fully complies with the requirements of section 13(a) or 15(d) of the Securities Exchange Act of 1934; and

(2) the information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

Committee/Subcommittee:	Activity:
Senate Finance	Origin, Reporting, Markup

SUMMARY AS OF:
1/22/2007--Reported to Senate without amendment, 1st committee reporting. (There is 1 other summary)

(This measure has not been amended since it was introduced. The summary has been expanded because action occurred on the measure.)

Small Business and Work Opportunity Act of 2007 - **Title I: Small Business Tax Relief Provisions - Subtitle**

EXHIBIT
Exhibit 438

CSOC.CBR.00032336

A: General Provisions - (Sec. 101) Amends the Internal Revenue Code to extend through 2010 the increased expensing allowance for small business assets.

(Sec. 102) Extends through March 2008 accelerated depreciation of qualified leasehold and restaurant improvement property. Revises the definition of "qualified restaurant property" to eliminate the requirement that improvements to restaurant property must be placed in service more than three years after the original building is placed in service.

Allows accelerated depreciation (i.e., 15-year recovery period, using the straight line method) for qualified retail improvement property placed in service before April 1, 2008. Defines "qualified retail improvement property" as improvements to the interior portion of a nonresidential building used as a retail trade or business serving the general public. Excludes as an improvement the enlargement of the building, any elevator or escalator, common area structures, or the internal structural framework of the building.

(Sec. 103) Exempts certain small businesses from the requirement of using the accrual method of accounting (thus permitting such businesses to use a cash method of accounting). Limits such exemption to businesses which have annual gross receipts of not more than $10 million (increased from $5 million). Indexes the gross receipts amount for inflation after 2008. Exempts such small businesses eligible to use cash accounting methods from the requirement to use inventories.

(Sec. 104) Extends the work opportunity tax credit through 2012. Expands the veterans eligible for such credit to include veterans with service-connected disabilities incurred after September 10, 2001. Increases the amount of disabled veteran first year wages eligible for the credit from $6,000 to $12,000.

Establishes as a new targeted group under such credit designated community residents (in lieu of high risk youth). Requires such residents to be between the ages of 18 and 40 and have a principal place of abode in an empowerment zone, enterprise community, or renewal community.

Modifies the definition of vocational rehabilitation referral for purposes of such credit to include certain individual work plans developed and implemented by an employment network under the Social Security Act.

(Sec. 105) Provides rules for the treatment of certified professional employer organizations as employers for purposes of employment tax liability and other employment tax obligations. Sets forth requirements applicable to certified professional employer organizations, including bond and independent financial review requirements.

Subtitle B: Subchapter S Provisions - (Sec. 111) Redefines "passive investment income" for purposes of S corporation revocation rules to exclude gains from the sale or exchange of stock or securities as an item of passive investment income.

(Sec. 112) Excludes restricted bank director stock from treatment as S corporation stock.

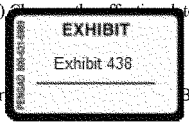
(Sec. 113) Sets forth a special accounting rule for banks that become S corporations and that change from the reserve method of accounting for bad debts.

(Sec. 114) Revises the tax treatment of sales of stock of wholly-owned subsidiaries of S corporations.

(Sec. 115) Sets forth a special rule for the treatment of the pre-1983 accumulated earnings and profits of certain corporations described by the Small Business Jobs Protection Act of 1996.

(Sec. 116) Permits a nonresident alien to be a potential current beneficiary of an electing small business trust (ESBT).

Title II: Revenue Provisions - (Sec. 201) Changes the effective date (to taxable years beginning after



CSOC.CBR.00032337

December 31, 2006) of certain loss deferral rules applicable to leases entered into with a foreign person or entity on or before March 12, 2004.

(Sec. 202) Applies rules treating certain foreign corporations as domestic corporations for tax purposes for inversion transactions (sales or transfers of more than 80% of a domestic corporation's stock or assets to a foreign subsidiary for tax avoidance purposes) occurring after March 20, 2002, and before March 4, 2003.

(Sec. 203) Denies a tax deduction for punitive damages paid or incurred resulting from a judgment or settlement of a claim.

(Sec. 204) Revises tax rules that deny a tax deduction for fines and penalties paid to a government for the violation of any law to provide that no deduction shall be allowed for any fine or penalty paid (whether by suit, agreement, or otherwise) to, or at the direction of, a government or nongovernmental regulatory entity for a violation or for the investigation or inquiry into a potential violation.

Allows exceptions to the general rule of nondeductibility for: (1) certain restitution payments or payments required to come into compliance with law; (2) court-ordered payments not involving a government or nongovernmental regulatory entity; and (3) amounts paid or incurred as taxes due.

Requires governmental agencies involved in a settlement with a taxpayer to report information about such settlement to the Secretary of the Treasury and the taxpayer, including the amount of the settlement, the amount paid as restitution or remediation of property, and the amount paid to come into compliance with law.

(Sec. 205) Sets forth rules for the tax treatment of U.S. citizens and permanent resident aliens (expatriates) who terminate their citizenship or residency to avoid U.S. taxation. Taxes such expatriates on their property as if sold on the day before expatriation at its fair market value. Allows an exclusion of the first $600,000 (adjusted annually for inflation) of such gain.

Allows expatriates to elect to continue being taxed as U.S. citizens. Allows a deferral of any tax owed resulting from such election, but requires the posting of adequate security for payment of any deferred amount.

Sets forth rules for the tax treatment of retirement plans, interests in trusts, gifts, and inheritances of expatriates.

Amends the Immigration and Nationality Act to render inadmissible to the United States (deny reentry to) expatriates who fail to comply with their tax obligations as set forth in this Act. Requires the Secretary of Homeland Security to disclose to the Attorney General whether an expatriate is in compliance.

(Sec.206) Limits the annual aggregate amounts which may be deferred under a nonqualified deferred compensation plan.

(Sec. 207) Increases criminal fines and prison terms for attempting to evade or defeat tax, willful failure to file tax returns or pay tax, aggravated failure to file tax returns, and making fraud and false statements in connection with a tax return.

(Sec. 208) Doubles tax penalties, fines, and interest on underpayments of tax related to tax shelters involving offshore financial arrangements. Allows the Secretary to waive such penalties for certain businesses that use offshore payments in the ordinary course of business.

(Sec. 209) Increases the penalty for tendering a bad check or money order for payment of tax.

(Sec. 210) Sets forth requirements for regulations governing contingent payment convertible debt instruments.

CSOC.CBR.00032338

(Sec. 211) Extends the authorization for charging Internal Revenue Service (IRS) user fees through FY2016.

(Sec. 212) Allows tax levies for federal employment taxes without pre-levy collection due process hearings.

(Sec. 213) Modifies requirements for the IRS whistleblower program. Reduces from $2 million to $20,000 the required amount of tax in dispute for granting whistleblower awards.

Establishes in the IRS a Whistleblower Office and authorizes appropriations. Requires the Secretary to report to Congress on its establishment and operation.

Authorizes the Tax Court to adopt rules to preserve the confidentiality of whistleblowers who appeal awards.

(Sec. 214) Redefines "covered employee" for purposes of the limitation on the tax deduction for excessive employee remuneration.

June 13, 2005

Sy Sternberg, Chair
New York Life Foundation
51 Madison Avenue, Suite 604
New York, NY 10010-1655

Dear Mr. Sternberg,

I am writing to you, as a leader in the corporate philanthropic community with a shared vision and commitment to public service, to share news of an initiative with a potential that has me quite excited. The City College of the City University of New York plans to create the Charles B. Rangel Center for Public Service at the City College to provide an opportunity for education and training for careers in public service for the underprivileged students the College has traditionally served. I want you to know of my personal interest in and enthusiasm for the creation of this Center and my pride in the decision of the City University to name it for me.

As you know, throughout my public career I have believed in the special strength derived from our racial and ethnic diversity and that we as lawmakers must lead in assuring that opportunity for public service be made available to all with the goal of achieving a policymaking community that reflects the rich tapestry of cultures, faiths, colors and ethnicities that make us who we are as a great nation. I am asking you to join me in the creation of a public policy center that will motivate and prepare young people presently underrepresented in public life to pursue careers in public service.

Today, non-whites make up nearly thirty percent of the US population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top

CBR 002705

EXHIBIT
Exhibit 445

CSOC.CBR.00003007

managerial, supervisory, and policy-making positions in the US Federal government are members of minority groups. And by 2050, minority groups in the US will comprise more than 50% of our population.

The Charles B. Rangel Center in the City College of New York, a school in the most ethnically diverse city in our nation and with an unparalleled history of supporting the empowerment of immigrant ethnic groups, will help to ensure that those who run our nation will be reflective of our diversity. I have embraced the College's concept because it will allow me to locate the inspirational aspects of my legacy in my home Harlem community.

As you will see from the enclosed presentation, the Rangel Center at the City College of New York will be alive with the work of scholars and students working on public policy issues and studying the political dimension of change. It will not be a Library or a Museum, but a living institution brimming with ideas and stimulating debate.

I will be exploring with my Congressional colleagues how best to move this idea through the appropriations process and am optimistic about securing funds for the planning phase of the creation of the Center. I request your advice and assistance concerning how to approach the donor community, particularly private and corporate foundations interested in education. I look forward to entering into a dialogue with you on the funding of the Rangel Center concept in the coming weeks and months.

Sincerely,

Charles B. Rangel
Member of Congress

Naming Opportunities for the Rangel Center

A small group of the original founders who have named spaces in the Rangel Center will be recognized not only with a plaque in their particular space, but also with a marble commemorative tablet in the Welcome Center.

When the Rangel Center opens, a special reception will be held for the founders, local, national, and international leaders, Congressman Rangel, and The City College of New York.

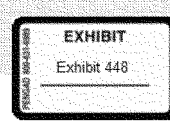
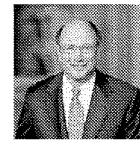
Policyholders may request a copy of the GAAP basis consolidated unabridged financial statements (which are incorporated by reference into the Annual Report) and the statutory financial statements applicable to their respective companies by contacting the Secretary of the parent company, New York Life Insurance Company, 51 Madison Avenue, New York, New York 10010. The audited financial statements above are also available on our Web site (www.newyorklife.com).

** See Glossary of Terms on page 52. For complete information, see pages 32–47.*

† Net income in 2005, excluding net realized capital gains and losses, increased 18 percent to $1,035 million. The Company's GAAP net income (including realized capital gains and losses) totaled $855 million in 2005, compared with $1.20 billion in 2004. These results included net realized capital losses of $180 million in 2005, contrasted with net realized capital gains of $420 million in 2004. The 2005 net capital losses include a $312 million loss attributable to an effective risk management strategy that does not qualify for hedge accounting. For a detailed reconciliation of the Company's GAAP performance measures to its non-GAAP performance measures, see page 47.



to our policyholders



SY STERNBERG
Chairman of the Board and Chief Executive Officer

As 2005 drew to a close, one of the nation's most prominent ratings agencies, Moody's Investors Service, elevated New York Life Insurance Company's long-term financial strength rating to Aaa – the highest rating Moody's assigns, reserved only for insurers who offer their policyholders "exceptional financial security." In its discussion of the ratings upgrade, Moody's cited New York Life's:

- "leading position in the domestic life insurance market"
- "productive career agency system"
- "mutual form of ownership"
- "growing international presence"

Although it was gratifying to receive this independent validation of our fundamental business strategies, the proof, as they say, lies in performance. In 2005, New York Life's surplus and asset valuation reserves – the funds that ensure our ability to meet future obligations to policyholders and finance our growth – increased by over $1 billion to the record amount of $12.9 billion.

The Company also achieved record-setting results in both total insurance sales and total investment sales. Combined domestic and international insurance sales exceeded $2.2 billion, while total investment sales in 2005 grew to $28.3 billion, a $4 billion increase over 2004.

"We continue to be pleased by the solid performance and strong momentum of our international business."

We continue to be pleased by the solid performance and strong momentum of our international business. In 2005, double-digit sales growth was achieved in India, Mexico, Thailand, South Korea, China and Argentina. Building on this success, we are continuing to expand New York Life's presence in key global markets. In China, Haier New York Life (the joint venture between New York Life Insurance Company and China's Haier Group) opened a new branch in Qingdao, a city noted for its strong economic growth. This follows the successful launch of operations in Shanghai and Chengdu, and we expect to announce openings in three more cities by the end of 2006. Max New York Life, our joint venture with Max India, Ltd., entered nine additional cities in 2005, now establishing us in 29 cities throughout India. The Company also received an operating license in Vietnam, where we expect to commence operations in the near future.

FRED SIEVERT
President

New York Life Investment Management (NYLIM) turned in an exceptional performance in 2005, with another year of record-breaking sales, operating revenues and earnings. NYLIM ended the year with more than $200 billion in assets under management, another significant milestone for this business.

Since 1994, New York Life has partnered with AARP as the sole endorsed provider of life insurance to the group's 36 million members. 2005 was highlighted by a $33 million increase in sales – up more than 30 percent over 2004 – and an agreement to extend the AARP program through the year 2014. Just as significant was AARP's selection of New York Life as the exclusive provider of immediate annuities through the association's "Lifetime Income Program," which launches in 2007. The endorsement of the nation's largest membership organization, which serves Americans age 50 and over, will also further establish New York Life's reputation as one of the most trusted names in this rapidly emerging product category.

"New York Life remains, first and foremost, a life insurance company."

New York Life is developing more ways to provide income security for retirees with the rollout of an important new business: Guaranteed Lifetime Income. This is a line of income annuities that delivers guaranteed monthly retirement paychecks for life – and that features important options, such as access to cash for unexpected expenses, inflation protection and legacy benefits. These products represent a significant new business opportunity for our Company – but, more than that, they offer a practical, meaningful solution to the uncertainties now faced by so many older Americans. An introduction to New York Life's latest retirement income innovations begins on page 5 of this *Report*.

Now, more than ever, retirees need the certainty of a regular paycheck for as long as they live, from an organization they can trust. New York Life has been in the business of making – and keeping – lifetime promises for more than 160 years.

Our Guaranteed Lifetime Income products are simply one more way of fulfilling New York Life's core mission: We are in the business of helping our customers and their families secure long-term protection for their financial future. New York Life remains, first and foremost, a life insurance company, and our continued leadership in this field is a reflection of the quality and breadth of

our product offerings, our commitment to best-in-class customer service and the dedication and high standards of our sales professionals. With more than 10,000 agents in all 50 states, New York Life has one of the nation's largest networks of dedicated life insurance experts.

The values and culture of our Company owe much to the farsighted governance of New York Life's Board of Directors. It saddens us to report we will be without the guidance of two of our most esteemed Directors as we move into the new year.

When Richard Pivirotto retired from the Board last April, he had contributed more than 30 years of service to New York Life. During his distinguished business career, he provided guidance and governance to institutions as diverse as CBS, Gillette and Princeton University. Four New York Life chairmen have relied upon him for his great intellect and strong ethical convictions. We are grateful to Richard Pivirotto for all he has done to help shape the culture of our Company.

Hector Ortino, a member of New York Life's Board of Directors since 2002, passed away last November, at age 63. Mr. Ortino, who also served as chairman and chief executive officer of Ferro Corporation, possessed extensive global business experience that greatly benefited Company management and his fellow Directors. We shall deeply miss his wise counsel, his warmth and his profound sense of humanity.

The strength of New York Life has always rested upon the quality of our people. We were reminded of this again last August, when Hurricane Katrina cut its destructive path across the Gulf Coast, claiming hundreds of lives and prompting the largest forced migration of Americans in history.

From all over the Company, New York Life people poured tens of thousands of dollars into a matching fund benefiting hurricane victims. But even before the Home Office could launch its relief campaign, agents and employees in the stricken areas were organizing grassroots efforts to bring whatever help they could to their colleagues and their communities.

There was the manager who jumped into her four-wheel drive vehicle to navigate the flooded streets – after arming herself with a chainsaw to get past fallen tree limbs – and set out to deliver food, water and fuel to our crippled Hattiesburg, Mississippi, sales office.

CSOC.CBR.00031568

There was the agent who set up free barbecue dinners at evacuee centers and churches, giving many storm victims their first real meal in days.

In some small communities, New York Life agents were the first responders on the scene. One woman in Mississippi told us, "Before the government emergency teams arrived, before any of the relief agencies showed up, New York Life people were here to help us."

The promise of financial safety and security is the very essence of New York Life. Our agents and employees will be there for you when you and your family need them...to pay a claim on a life insurance policy...to help defray the expenses of long-term care...and now, to help take the financial fear and uncertainty out of retirement.

Even as our business evolves, our values – the **financial strength** essential for keeping our promises and the **integrity** and **humanity** essential for earning your trust – remain our contract with you. Thank you for making us "The Company You Keep."

SY STERNBERG
Chairman of the Board and Chief Executive Officer

CSOC.CBR.00031571

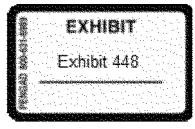
There's so much less we can rely on

It used to be pretty simple. At age sixty-five, you could usually count on pension and Social Security checks to begin rolling in every month, like clockwork. Maybe you also had some money put aside, earning a nice return in solid, blue chip investments. Without much effort, you could have been set for life.

Unfortunately, many of us can no longer rely on yesterday's retirement strategies. Traditional pension plans are far less common today: Only one in five Americans works for a company that offers a guaranteed lifetime retirement income. Monthly Social Security checks cover just a fraction of the average retiree's living expenses – and some are questioning how long even current benefit levels can be maintained.

With a shrinking retirement safety net, some financial advisors recommend building a much larger nest egg of stocks, bonds and other investments. But do you really want to bet your retirement on how your portfolio will be performing 10, 20 or 30 years from now?

* *Source: U.S. Bureau of Labor Statistics, 2005 Report.*



CSOC.CBR.00031572

why?

IS RETIREMENT PLANNING DIFFICULT

EXHIBIT
Exhibit 448

We're all living longer

What are the most serious financial risks for tomorrow's retirees? Inflation? Soaring medical bills? Excessive debts?

Add to that list of possible concerns another one that is absolutely certain: If you are about to retire, one of the greatest threats to your continued financial well-being is your own longevity.

Thanks to medical advances and healthier lifestyles, average life spans are longer than ever before. For example, if you and your spouse are both in your mid-sixties and are both healthy, there is an even chance that one of you will live beyond your 91st birthday.* That's great – unless, of course, your retirement nest egg barely lasts to your 80th!

With so many retirements spanning 30 years or more, a growing number of people may face the very real prospect of outliving their savings. The good news: There is a way to protect yourself.

CSOC.CBR.00031575

The return of guaranteed lifetime income

Through a new generation of *Lifetime Income Annuity* products, there are now several excellent ways to convert part of a retirement nest egg into a guaranteed monthly income for life.

You might think of these new products as insurance policies that provide protection against the risk of outliving your savings. No matter how long you live, you'll continue to receive the monthly payments promised you – payments that can, in many cases, exceed the monthly income you could achieve through your own prudent investing (see the chart at left).

Lifetime Income Annuities also provide protection against losing retirement savings in poorly performing investments. Regardless of the ups and downs of the financial markets, you can be confident that your annuity income is locked in and guaranteed. That's why a *Lifetime Income Annuity* can be such an important part of a broader retirement strategy. Knowing that basic living expenses are safely covered, you may feel you have greater flexibility in what you do with the rest of your savings, whether it's investing your nest egg more aggressively, or just finding ways to better enjoy life.

Promises that last a lifetime

When it's time to shop for the right lifetime income annuity, *The Wall Street Journal* offers this advice: "Stick with insurers that have a top rating for financial strength."*

At New York Life, we couldn't agree more. When you purchase an income annuity, you are really buying a promise – a promise that the company you are doing business with today will still be there for you decades from now, strong, solvent and keeping your retirement secure.

New York Life has been keeping promises to its policyholders for over 160 years. With surplus and asset valuation reserves totaling nearly $13 billion, our financial strength is the reason why we are one of the top-ranked life insurers in America by the major independent ratings agencies.

New York Life is America's largest mutual life insurance company.† Being mutual means our primary focus is on creating long-term financial safety and stability for our policyholders, rather than the short-term gains favored by Wall Street. Plus, in an era when so many publicly owned insurance companies have been sold, merged or acquired, it's reassuring to know we can't be bought. When we say New York Life is "The Company You Keep," that's a promise for life.

CSOC.CBR.00031579

Innovative solutions for your retirement needs

The **Guaranteed Lifetime Income** products offered by our subsidiary, New York Life Insurance and Annuity Corporation, are specifically tailored to meet the financial challenges of today's retirees.

For example, unlike traditional income annuities, New York Life's *Lifetime Income Annuities* offer optional features that give you access to cash for unexpected expenses. Another option – so unique it has a patent pending – guarantees money will be paid to your heirs, no matter how many years you've received monthly annuity payments. You can even protect yourself against the long-term risk of inflation with an option that provides annual income step-ups.

Our latest innovation, called the *Changing Needs Option*, provides a monthly payment that can increase – up to five times the original amount – after a pre-selected number of years. With the assurance of a more generous income during their later years, seniors can spend their own savings more confidently – and live much more comfortably – during the earlier, more active years of retirement.

Another new product, the *New York Life Personal Pension*, gives individuals who do not have the security of a traditional employer-sponsored pension the opportunity to create and fund their own guaranteed retirement income plan while still actively employed.

CSOC.CBR.00031580

principal businesses of new york life

Life and Annuity

The Life and Annuity business offers a broad array of innovative insurance and annuity products that help provide peace of mind and help protect the quality of life of our policyholders and their loved ones – through life insurance benefits, asset growth and guaranteed retirement income.

We offer fixed and variable insurance and annuity products, including whole life, universal life, variable universal life, term insurance, fixed and variable deferred annuities, and income annuities.

AGENCY ORGANIZATION The majority of our life insurance and annuity sales are through New York Life agents, located in nearly every community throughout the United States. Our agents stand out as the most highly skilled advisors in the life insurance industry, supported with career-long training, professional development programs and state-of-the-art technology.

SUPPLEMENTAL DISTRIBUTION To complement our Agency distribution, we also offer our life and annuity products through select supplemental distribution channels. For example, through the Advanced Markets Network – a nationwide network of select brokers – we offer life insurance products to specialized market segments including high net worth consumers, corporations and banks. We also sell annuities through a select group of banks. And we directly market both life insurance and annuities through our relationship with AARP (see Special Markets).

New York Life Investment Management

INSTITUTIONAL ASSET MANAGEMENT With investment management capabilities across the entire spectrum of asset classes, New York Life Investment Management (NYLIM), with affiliates MacKay Shields and McMorgan & Company, manages money for some of the country's largest institutions, including a substantial portion of the *Fortune* 100.

INDIVIDUAL INVESTMENT MANAGEMENT NYLIM delivers its institutional-quality investment expertise to individual investors through the MainStay® and McMorgan mutual fund families and through the MainStay Investments Wealth Strategies portfolios.

GUARANTEED PRODUCTS We provide a full array of guaranteed products to both the qualified and nonqualified markets. One of the premier providers of GICs (guaranteed investment contracts), NYLIM has successfully expanded its specialty fixed income products to include European and Global Medium Term Notes.

RETIREMENT PLAN SERVICES NYLIM Retirement Plan Services provides comprehensive services for more than 2,100 retirement plans, including defined contribution – such as 401(k) – defined benefit and executive benefit plans. With over 30 years of experience in retirement plan consulting and management, NYLIM Retirement Plan Services provides employer and employee services for the retirement programs of small and mid-sized companies, as well as unions throughout the United States.

New York Life International

ARGENTINA New York Life has two joint ventures with partner HSBC, marketing life insurance through HSBC New York Life and pensions through Maxima.

CHINA In 2002, New York Life launched its joint venture life insurance company, Haier New York Life, in Shanghai. Two more offices, in the cities of Chengdu and Qingdao, were opened in 2004 and 2005, respectively.

HONG KONG SAR Having opened for business in 1988, New York Life Insurance Worldwide Ltd. in Hong Kong is our oldest international operation.

INDIA Max New York Life Insurance Company, Ltd., a joint venture with Max India, Ltd., began operations in 2001. Out of the nine international markets where we do business, it has the largest career agency force with nearly 11,000 licensed agents.

MEXICO In 2000, New York Life purchased leading Mexican insurer Seguros Monterrey Aetna. Today, Seguros Monterrey New York Life S.A. is number one in sales of individual life first-year premium in the country. Our other operation in Mexico, Fianzas Monterrey New York Life, is a surety institution that has captured more than 25 percent of the Mexican surety bond market.

PHILIPPINES New York Life entered the Philippine life insurance market in 2001, with operations based in Manila. Our joint venture partner is Allied Bank Corporation.

SOUTH KOREA New York Life has been serving the life insurance needs of South Koreans since 1992 exclusively through its career agency force.

TAIWAN With more than 40 offices, New York Life has operated a successful business in Taiwan since 1992.

THAILAND A joint venture with Siam Commercial Bank, Siam Commercial New York Life has branches in 27 provinces throughout the kingdom.

Special Markets

AARP LIFE INSURANCE PROGRAM For the past 11 years, New York Life has had an exclusive endorsement from AARP to sell life insurance to its 36 million members. By virtue of this relationship, New York Life has become the largest direct marketer of life insurance to the 50-plus market in the United States. In 2005, the AARP/New York Life relationship was renewed through the year 2014 and the Company was awarded rights to be the exclusive provider of lifetime income annuity products to AARP members. This exciting new offering will be coming to market in the summer of 2007.

LONG-TERM CARE A relatively new type of insurance, long-term care coverage is designed to protect people from the extended costs of a chronic illness. Our long-term care insurance policies offer our clients a rich set of benefits and a variety of inflation protection options, all backed by the financial strength of New York Life.

GROUP MEMBERSHIP This unit of New York Life underwrites and administers group life, health and disability income programs for professional associations and other affinity groups, such as the American Bar Endowment, the Uniformed Services Benefit Association and the American Veterinary Medical Association. Serving the members of more than 500 associations, we are the leading provider of life insurance programs for this market and, for the fifth consecutive year, this business achieved 100 percent client retention.

CSOC.CBR.00031582

life and annuity 2005 business update

In 2005, our core life and annuity businesses showcased the strengths that have distinguished New York Life for generations – including the range and quality of our product offerings, the professionalism of our Agency sales force and the excellence of our customer service.

ANOTHER YEAR OF STRONG RESULTS Sales of life insurance through our Agency field force totaled $845 million in premium in 2005, spurred by gains in our flagship Whole Life product and strong sales of Universal Life. In the Advanced Markets Network (comprised of select producers and marketing organizations active in the upscale wealth transfer and executive benefits markets), retail sales and sales of bank-owned life insurance were both stronger than expected.

New York Life has emerged as a leader in retirement income solutions, with a focus on products that provide a guaranteed lifetime income stream. Sales of our flagship product in this marketplace – our Lifetime Income Annuity – grew 50 percent in 2005, while the market as a whole grew only 5 percent. As a result of this performance, our share of the fixed immediate annuity marketplace grew from 6.4 percent to 9.4 percent – outpacing all the top competitors – moving us into third place.*

We also enjoyed market share gains in investment annuities (fixed and variable deferred annuities). In particular, sales of our fixed deferred annuities through banks were again strong, and we moved into third place, as the other top companies lost ground.*

PRODUCTS DESIGNED AROUND CUSTOMER NEEDS Product design, focused on consumers' needs and preferences, played an important part in our strong sales results in 2005. As more Americans plan for or enter retirement, they are increasingly seeking guarantees in their financial portfolios. We responded to this growing desire for guarantees, while avoiding the dangers posed by the proliferation of aggressively priced no-lapse guarantees in the marketplace, by redesigning our Pinnacle Universal Life product for the high net-worth segment.

In addition, we are developing a suite of life products geared for middle-income consumers. These innovative products are being carefully designed to meet specific consumer needs, such as affordable protection for young families.

In the retirement income market, we enhanced our Lifetime Income Annuity, adding innovative options to provide increased flexibility. And, for consumers who are still in their working years, we introduced Personal Pension, a deferred income annuity that enables them to purchase guaranteed lifetime income for the future.

* *Source: 2005 LIMRA Annuity Market Share Report.*

THE BEST SALES PROFESSIONALS One of the Company's biggest competitive advantages is the professionalism of our approximately 10,000 agents across the United States. With the growing complexity of insurance and other financial products, New York Life's emphasis on training and development for our agents throughout their careers is more of a differentiator every year.

In 2005, the success of our educational focus was recognized when *Training* magazine named NYLIC University – our multi-platform training and development program for agents and field managers – one of the top 100 training organizations in the country. In addition to their participation in NYLIC University, many agents also earn master's degrees and professional designations through The American College, a national leader in financial services education.

A symbol of the professionalism of our sales force is our continued leadership in the Million Dollar Round Table (MDRT), a membership organization reserved for the industry's most accomplished professionals. About 2,300 New York Life agents in the United States now qualify for MDRT membership, ranking us number one in this elite category for the 51st consecutive year.

In 2005, Council President Michael P. Daly, CLU, ChFC, CFP, FLMI, MSFS (top, right), of Cincinnati, Ohio, and Council Vice President Gerald Thomason (bottom, right) of Eastern Washington achieved the top honors we bestow upon our agents. For both agents, the importance of building their business is surpassed only by the emphasis they place on their families and the value of helping other people.

CUSTOMER SERVICE EXCELLENCE In addition to the personal service provided by our agents, our policyholders can also rely on the professionals in our service centers throughout the country. For the sixth consecutive year, our annuities service team captured the DALBAR Service Award, a mark of distinction in the financial services industry. And for the third year running, a DALBAR award also went to our variable products service center.

On the Internet, customers can process fund allocation changes, transfers, cash loans and address changes through New York Life's highly regarded Virtual Service Center at www.newyorklife.com.

For its ongoing efforts to enhance service, New York Life has preserved its high ranking in customer service among life insurance companies, as reported by the American Customer Satisfaction Index, an independent measure of consumer opinion.

New York Life's universal life products and retirement income annuities are issued by New York Life Insurance and Annuity Corporation (NYLIAC), a wholly owned subsidiary of New York Life Insurance Company. Variable annuities a *E Distributors LLC, Member NASD.*

Exhibit 448

CSOC.CBR.00031584

investment management 2005 business update

2005 was a year of significant growth for New York Life Investment Management LLC (NYLIM), with sales climbing to a record $22.1 billion – an increase of 20 percent over 2004 sales. Total assets under management reached $200 billion* as of December 31, 2005, up more than $10 billion from 2004 and another important milestone for this business.

Most important is the fact that these results have been achieved through solid growth in all of NYLIM's businesses. The following summarizes some of the key accomplishments within each area.

RETAIL INVESTMENTS In late 2004, external forces created an opportunity for NYLIM's Retail Markets business (MainStay Investments) to pursue a strategy of significant distribution and marketing expansion. Through 2005, NYLIM put a new senior wholesaling team in place, expanded its internal sales desk and continued to differentiate MainStay Investments through unique marketing tools. This build-out was largely completed by the end of 2005, and the early results have been remarkable. Sales in our outside broker-dealer channel, where this initiative is focused, were up 63 percent, with even larger increases at our key focus firms.

New York Life agents remain MainStay Investments' largest distribution partner. In April 2005, NYLIM's retail mutual fund wholesalers were merged into the Individual Annuity Department (IAD) of New York Life, creating a larger, better coordinated team of product specialists tasked with marketing both annuities and mutual funds to our agents. We will continue to work closely with our partners in IAD to enhance our training on NYLIM's products, with particular emphasis on the MainStay Asset Allocation funds, which were successfully launched in 2005.†

WHOLESALE AND INSTITUTIONAL NYLIM's Institutional business manages assets for retirement plans, corporations, municipalities, endowments and foundations. We also offer these capabilities at the wholesale level, managing the investment portfolio of New York Life and, on a sub-advisory basis, the assets of other institutions.

Sales in our Wholesale business were up 50 percent over 2004, a clear indicator of our success in leveraging our investment management capabilities to raise assets from third parties. Significant transactions included the issuance of a sixth collateralized debt obligation (CDO), bringing CDO assets under management to over $2 billion as of December 31, 2005; a third private equity fund; a second real estate mezzanine fund; and the launch of a new India investment fund.

Institutional sales expanded across a number of products. NYLIM affiliate MacKay Shields LLC's integration of a high yield active core management team led to over $700 million in gross new sales, and assets were also raised through NYLIM affiliate McMorgan & Company LLC's pooled real estate fund and NYLIM Equity Investors' large cap enhanced product. NYLIM's diverse capabilities enable us to reach a broad spectrum of client needs, and our efforts to leverage those skills are gaining momentum that will serve us well in the coming years.

* *With affiliates.*

† *Securities distributed by NYLIFE Distributors LLC, 169 Lack*

RETIREMENT PLAN SERVICES (RPS) NYLIM has gained a reputation for industry-leading client service in both the defined-contribution and defined-benefit retirement plan markets. More sales records were achieved in 2005, with $4.4 billion in sales – with new plan sales up 50 percent over 2004. Additionally, sales in its defined benefit plan business rose by 70 percent year over year. On the new product side, *OnTarget*[sm*], RPS's professionally managed advice product for 401(k) plan participants, was rolled out last year. Over 20 percent of RPS's large market corporate clients have already signed up for this new offering. RPS culminated its record-setting year by being named the top rated Mid-Market Fund Manager and Plan Administrator based on client responses to an annual study by industry research firm 401kExchange.

GUARANTEED PRODUCTS Guaranteed Products continues to serve the needs of institutional investors seeking stable returns and superior credit quality. The latter was most recently confirmed by New York Life's upgrade to Aaa by Moody's, reflecting New York Life's financial strength. NYLIM sold a record $7.7 billion of guaranteed products in 2005, as institutional investment managers utilized the array of products the Company offers to meet their portfolio needs.

NYLIM's finance company, Madison Capital Funding, provides capital to middle market private equity investors seeking to acquire new companies as well as grow existing portfolio businesses. This is accomplished through providing financing to facilitate mergers, acquisitions and capital investment. Building on this successful business model, Madison Capital Funding completed 87 transactions, providing over $1.4 billion of net funded committed capital in 2005. Madison Capital Funding has provided over $4.3 billion of net funded committed capital to private equity sponsors since its formation in 2001.

* *OnTarget is a discretionary investment management service that invests retirement plan participant assets in fund-specific portfolios. New York Life Investment Management serves as the investment*

CSOC.CBR.00031586

international 2005 business update

New York Life International made significant progress on its path toward becoming a premier life insurer in the markets where it does business in Asia and Latin America. Insurance sales grew by 20 percent over 2004 to $583 million. Insurance and investment sales led to a 21 percent increase in operating revenue, which closed the year at $1.8 billion. Our operation in Mexico, Seguros Monterrey New York Life, was the largest contributor to these strong results.

We also strengthened and grew our distribution reach in 2005. Our career agency organization remains our primary channel and now counts more than 22,000 licensed agents. Agency sales in 2005 grew nearly 30 percent over 2004, with strong performance in India, China, South Korea, Taiwan and Mexico. In certain markets, our career agency system is complemented by other distribution channels, which include mainly bancassurance, corporate agencies and telemarketing. This past year, our operation in Thailand, in its exclusive distribution relationship with its banking partner Siam Commercial Bank, became the largest bancassurance operation in that country and in the top three in Southeast Asia.* And in Taiwan, we entered into a new exclusive partnership with the Bank of Overseas Chinese.

On the product front, recurring premium life insurance continues to make up the majority of the insurance sales in all markets. In 2005, we expanded our variable (unit- or investment-linked) products to new markets and saw an overall increase in sales with particularly strong results generated in India, South Korea and Taiwan. We continuously look for ways to strengthen our existing product portfolio and, in certain markets, we are exploring opportunities to expand into new areas, such as pension and retirement product lines and mutual funds.

* *Source: Watson Wyatt, Hong Kong, 2005.*

In addition to growing our existing operations organically, we also expanded geographically during the past year. We were one of the very few foreign life insurers to be granted an operating license by the government of Vietnam for a wholly owned life insurance subsidiary. We expect to open for business in that country during 2007. In China, we opened a new office in the city of Qingdao, where our partner Haier's headquarters is located. We also received licenses in Yantai, Deyang and Nanjing, and plan to commence operations in those cities in the near future. By far, the largest expansion story in 2005 emerged out of India, where our joint venture company, Max New York Life, opened 13 offices in nine new cities (bringing us to a total of 46 offices) and further increased our reach to rural areas through new corporate agency relationships.

A critical part of our international expansion is promoting the values and reputation of New York Life and increasing the Company's visibility within each market. To that end, our local operations demonstrate New York Life's commitment to humanity by supporting charitable organizations in the communities in which they do business – with an emphasis on helping those who bring much needed services to children. Our Thailand operation provides ongoing support for an orphanage housing more than 600 children, many of whom were born with HIV. In Mexico, the Mexican Center for Philanthropy has, for three consecutive years, recognized Seguros Monterrey New York Life as a "Socially Responsible Company" for its annual grants and employee and agent donations to EDUCA, a nonprofit foundation that serves the needs of public schools. Max New York Life in India supports the SOS Children's Villages, a national orphanage that receives a portion of the premium from the sales of certain products in that country.

The growth of our international operations remains an important component of our overall strategy for maintaining New York Life's long-term financial strength and stability. The markets in which we operate, where significant portions of the population do not have adequate life insurance coverage, offer tremendous sources for revenue growth and profitability in the years ahead.

CSOC.CBR.00031588

special markets 2005 business update

Special Markets is comprised of three businesses: the AARP Life Insurance Program, which markets group life insurance products to AARP members; Long-Term Care insurance sold through our agents; and the Group Membership Association division, which markets to members of professional associations. In 2005, Special Markets posted double-digit growth in sales and revenue. Sales grew 20 percent over 2004 to $212 million, while operating revenue climbed to $1.3 billion. If Special Markets were a stand-alone company, its revenues would rank in the top 5 percent of all domestic life insurance carriers, according to A.M. Best.

AARP LIFE INSURANCE PROGRAM Through an exclusive marketing arrangement with AARP, New York Life offers life insurance to the association's 36 million members. The AARP Life Insurance Program established new records in sales, revenue and earnings with double-digit growth for each key financial indicator. Sales climbed to $137 million, up 31 percent over 2004's record sales. This strong sales performance further strengthened our position as the number one direct marketer of life insurance to individuals over 50. In 2005, our AARP Operations Center in Tampa, Florida, received, on average, more than 14,000 new applications for insurance per week. More than 1.2 million people are now insured through this program.

A number of new initiatives helped drive this growth, including the introduction of our newest Level Benefit Term life insurance product. We also continued to expand our marketing to non-AARP members, offering them the opportunity to join the association in conjunction with purchasing insurance. In 2005, more than 90,000 men and women took advantage of this, simultaneously enrolling for AARP membership and New York Life's coverage.

At year-end, AARP selected New York Life as the exclusive, endorsed provider of lifetime income annuities to AARP members. The new AARP Lifetime Income Program will complement and leverage New York Life's broader participation in the guaranteed lifetime income marketplace.

LONG-TERM CARE New York Life is now the nation's eighth largest seller of individual long-term care insurance products,* following an 11 percent growth in sales during 2005. This was particularly significant in light of the fact that the rest of the industry reported a 5 percent decline in sales of long-term care insurance for the year, according to LIMRA (an industry association providing research and consulting to financial services companies). Our success with this product reflects our commitment to offering quality coverage that is responsibly priced, backed by the financial strength of New York Life.

Our strategic focus on prudent risk management in the long-term care business has made us one of the few carriers that has never raised rates on existing customers – and the first insurance company in the long-term care market to pay a dividend on long-term care policies. This is in sharp contrast to many competitors who have raised rates on their in-force or new business, or exited the market altogether.

GROUP MEMBERSHIP ASSOCIATION Our Group Membership Association division provides life, health and disability insurance programs for more than 500 associations, including many of the nation's most prominent professional associations. We celebrated our 50th anniversary in the business in 2005. Two of our original clients from 1955 are also celebrating the 50th consecutive year of their relationship with us: the American Bar Endowment and the Ontario Medical Association.

In 2005, we further strengthened the Company's already dominant position in the association marketplace. We placed our largest single new case sale in eight years, the American Chemical Society, and for the fifth consecutive year, we retained 100 percent of our in-force clients.

We continue to lead the market in product innovation, a key factor that has contributed to strong sales growth. New York Life is one of the few carriers to realize growth in the association marketplace, which we attribute in large part to product innovation. This is evidenced by the success of our new 10- and 20-year level term products, which are designed with features tailored to meet the needs of our clients.

* *2005 long-term care sales, LIMRA reported. Adjusted for level pay life*

CSOC.CBR.00031590

2005 investment review

New York Life Insurance Company and its Domestic Insurance Subsidiaries

The following investment review presents information for New York Life Insurance Company and its domestic insurance subsidiaries, New York Life Insurance and Annuity Corporation and NYLIFE Insurance Company of Arizona, which represent most of the invested assets of the Company. The cash and invested asset information below is presented on a statutory accounting basis. New York Life's equity investment in its international insurance affiliates and domestic non-insurance affiliates, valued on a GAAP basis, is included in the Equities section of the table below. NYL International, the largest affiliate in asset size, had cash and invested assets of $4.6 billion. A reconciliation of cash and invested assets from a GAAP basis to a statutory basis is presented on page 46.

Broad Asset Allocation

New York Life and its domestic insurance subsidiaries ("NYL Domestic") maintained a well-diversified portfolio in 2005, with strong growth in private investment grade bonds and a stable position in mortgage loans. Cash and invested assets rose nearly $8 billion to $130 billion, due to strong cash flow generated from NYL Domestic insurance operations.

CASH AND INVESTED ASSETS

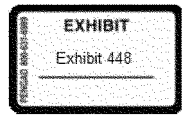
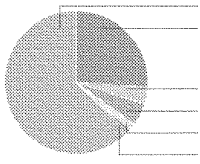
** Includes cash primarily received on financing transactions of $3,852 million and $4,077 million for 2004 and 2005, respectively.*



Fixed Income Securities

QUALITY OF INVESTMENTS The fixed income securities portfolio continues to be dominated by high-quality investments, with 92 percent being investment grade, up from 91 percent in 2004. The increase in investment grade assets was primarily driven by new investments in the highest-quality fixed income (NAIC 1) assets, as those assets provided attractive relative value. Below investment grade assets decreased from 2004 levels due to a positive ratings adjustment on a middle market commercial lending affiliate (Madison Capital Funding).



FIXED INCOME SECURITIES BY QUALITY

(DOLLARS IN MILLIONS)				DECEMBER 31, 2005	
1	NAIC 1	AAA TO A–	HIGHEST QUALITY	$64,625	66%
2	NAIC 2	BBB+ TO BBB–	HIGH QUALITY	24,811	26%

3	NAIC 3	BB+ TO BB–	MEDIUM QUALITY	3,310	3%
4	NAIC 4	B+ TO B–	LOW QUALITY	3,617	4%
5	NAIC 5	CCC+ TO CCC–	LOWER QUALITY	988	1%
6	NAIC 6	CC TO D	IN OR NEAR DEFAULT	98	–
BELOW INVESTMENT GRADE				$ 8,013	8%
TOTAL FIXED INCOME SECURITIES				$97,449	100%

CSOC.CBR.00031592

2005 investment review

New York Life Insurance Company and its Domestic Insurance Subsidiaries

DIVERSIFICATION OF INVESTMENTS The fixed income portfolio remains well diversified across the broad industry spectrum and is comprised of securities issued by more than 2,000 individual issuers. The mortgage-backed sector continues to have the highest allocation, as high-quality commercial mortgage-backed securities provided value. Allocation to the bank and finance sector increased from 2004 levels, as the sector offered strong deal flow and was attractively priced relative to other corporate sectors.

DIVERSIFICATION OF FIXED INCOME SECURITIES

(DOLLARS IN MILLIONS)	DECEMBER 31, 2005	
MORTGAGE-BACKED	$19,211	20%
BANK AND FINANCE	14,734	15%
CONSUMER GOODS	11,812	12%
CAPITAL GOODS	11,596	12%
UTILITIES	11,289	12%
ASSET-BACKED	9,125	9%
ENERGY	5,092	5%
U.S. GOVERNMENTS AND AGENCIES	4,907	5%
MEDIA	2,940	3%
SOVEREIGN/FOREIGN GOVERNMENT	2,631	3%
TRANSPORTATION	1,590	2%
OTHER*	2,522	2%
TOTAL FIXED INCOME SECURITIES	$97,449	100%

** Other category is made up of industry concentrations of less than 2 percent.*

NYL Domestic limits exposure to individual issuers according to credit quality, with no single corporate exposure greater than $210 million. The ten largest holdings in the portfolio represent less than two percent of cash and invested assets. In 2005, more than $19 billion in new money was invested in fixed income securities. Continuing NYL Domestic's effort to diversify both the public and private corporate bond portfolios, more than 225 new issuers were added during 2005.

Mortgage Loans

PERFORMANCE OF INVESTMENTS The strong real estate market was the backdrop for the continued solid performance of NYL Domestic's mortgage loan portfolio. For the seventh year in a row, less than 1 percent of the portfolio was classified in the problem loan category, as defined by delinquency, restructure and foreclosure rates.

QUALITY OF COMMERCIAL MORTGAGE LOANS

	DECEMBER 31, 2005
DELINQUENCY RATE	0.00%
RESTRUCTURE RATE	0.00%
FORECLOSURE RATE	0.43%
TOTAL PROBLEM LOAN RATE	0.43%

DIVERSIFICATION OF INVESTMENTS The mortgage loan portfolio is broadly diversified by both property type and geographic region. NYL Domestic's mortgage loan investment practices emphasize conservatively underwritten, high-quality properties. As a result, the portfolio is weighted toward investments in office buildings and retail space, due to the large proportion of high-quality assets in these two groups relative to other commercial mortgage asset types. Allocation to office buildings decreased from 2004 levels primarily due to a high level of both scheduled and unscheduled repayments exceeding new fundings. This decrease was offset by small increases across all other property types.

MORTGAGE LOANS BY PROPERTY TYPE

(DOLLARS IN MILLIONS)	DECEMBER 31, 2005	
OFFICE BUILDINGS	$ 3,626	32%
RETAIL	2,783	25%
INDUSTRIAL	2,027	18%
MULTI-FAMILY RESIDENTIAL	1,447	13%
SINGLE-FAMILY RESIDENTIAL	1,162	10%
HOTEL/MOTEL	225	2%
OTHER COMMERCIAL PROPERTY	6	–
TOTAL MORTGAGE LOANS	$11,276	100%

NYL Domestic's strategy of focusing on office and retail properties leads to a high weighting in geographic regions with dense populations. The mix of geographic diversification changed slightly from 2004 with increased opportunities in the Pacific region, offset by lower investment in the North Central region primarily due to a high level of scheduled repayments.

MORTGAGE LOANS BY GEOGRAPHIC REGION

(DOLLARS IN MILLIONS)	DECEMBER 31, 2005	
SOUTHEAST	$ 2,818	25%
PACIFIC	2,397	21%
MID-ATLANTIC	2,298	20%
SOUTH CENTRAL	1,400	12%
NORTH CENTRAL	1,192	11%
NEW ENGLAND	839	8%
MOUNTAIN	327	3%
CANADA	5	–
TOTAL MORTGAGE LOANS	$11,276	100%

Equities

While the equity markets were relatively flat in the first half of the year, a stronger second half resulted in the S&P 500 index up 4.9 percent for 2005. NYL Domestic's combined equity portfolios outperformed the S&P 500. Strong performance in equity types such as real estate investment trusts (REITs), mid-cap and international equity enhanced overall performance.

EQUITY BY TYPE

(DOLLARS IN MILLIONS)	DECEMBER 31, 2005	
PUBLIC EQUITY	$2,707	31%
PRIVATE EQUITY	2,334	27%
REITs	679	8%
REAL ESTATE	501	6%
CONVERTIBLE PREFERREDS	92	1%
UNCONSOLIDATED SUBSIDIARIES	2,403	27%
TOTAL EQUITY	$8,716	100%

CSOC.CBR.00031594

2005 investment review

New York Life Insurance Company and its Domestic Insurance Subsidiaries

DIVERSIFICATION OF INVESTMENTS NYL Domestic's equity assets are diversified across many different types of equity, including public common stock, private equity, real estate investment trusts (REITs) and convertible preferreds. Diversification within public equity was further enhanced in 2005 with the addition of small-cap equity. Unconsolidated subsidiaries increased in value primarily due to the market appreciation on publicly traded common stock of certain affiliates (Express Scripts).

The public common stock equity portfolio is managed by experienced portfolio managers, who make use of active and passive styles combined with quantitative and fundamental analysis. The private equity allocation provides further diversification because of its low correlation with fixed income securities and public equities. The equity assets are also diversified across many different industry sectors and geographic regions, thereby limiting exposure to cyclical or systematic problems within any given sector or region. By ensuring adequate diversification, NYL Domestic expects to realize more stable equity returns.

Asset/Liability and Investment Risk Management

The asset portfolio has potential exposure to several investment risks, including liquidity, interest rate, credit and equity price risks. NYL Domestic has established comprehensive policies and procedures at both the corporate and business segment levels to minimize overall risk exposures. The Investment Committee of the Board of Directors annually approves NYL Domestic's general authorization, which defines the authority to make and execute decisions, the limits by asset class and the overall effective limit on asset risks. One of the key measures to quantify and control overall investment risk is to assess the potential exposure of statutory surplus to adverse changes in financial market and credit conditions over a 12-month period.

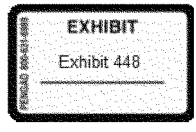
A substantial positive operating cash flow supports NYL Domestic's strong liquidity and ability to meet its liabilities when due. Primary sources of cash include sales of insurance and investment products, investment income, maturities and calls, and dividends. Additional liquidity to meet unexpected cash demands can be provided by NYL Domestic's portfolio of liquid assets, which include U.S. Treasury securities, short-term money market investments, government agency bonds and mortgage-backed securities. Funds are also available through a commercial paper program administered by New York Life Capital Corporation, an indirect, wholly owned subsidiary of New York Life, and a bank revolving credit facility, which is used to back up the commercial paper issuance program.

Management evaluates the impact of various stress events on the Company's liquidity on a regular basis using the analysis of stress scenarios. Based on the results of these stress tests, management believes that the Company has more than ample liquidity and financial strength to provide for foreseeable cash requirements, including unanticipated cash outflows in extreme stressed conditions. This view was reaffirmed in an October 2005 report from Moody's, which referred to New York Life Insurance Company as having "very strong liquidity." Various liquidity risk indicators are tracked regularly to provide management with an early indication of any potential liquidity issues.

Earnings and cash flows relating to fixed-rate investments are sensitive to interest rate changes. NYL Domestic manages interest rate risk as part of its asset/liability management process and product design procedures. Asset/liability management strategies include segmentation of investments by product line and the construction of investment portfolios designed to specifically satisfy the projected cash needs of the underlying product liability. Interest rate risk is also assessed and controlled by modeling asset and liability cash flows, on a product-by-product basis, under current and projected interest rate scenarios. NYL Domestic's asset/liability position is monitored regularly, enabling management to adjust asset portfolios or alter liability cash flows in an effort to prudently balance profitability and risk for each product segment and for the aggregate portfolio.

NYL Domestic's investments in corporate bonds and mortgage loans expose it to potential losses from the uncertainty of default experience to the underlying credits. Credit risk is managed by applying disciplined credit evaluation and underwriting standards; aligning allocations to lower-quality, higher-yielding investments with our risk-return tolerances; and diversifying exposures by industry, issuer and property type.

The market value of the holdings of public and private equity securities will fluctuate with changes in equity prices. Equity price risk is managed on an integrated basis with other risks through NYL Domestic's asset/liability management strategies. This risk is also managed through industry and issuer diversification and asset allocation techniques.



CSOC.CBR.00031596

2005 financial overview

In 2005, New York Life generated $934 million in operating earnings, nearly matching the company's record-setting 2004 operating earnings, which were positively impacted by a number of nonrecurring items. Solid operating earnings were generated by all lines of business in 2005.

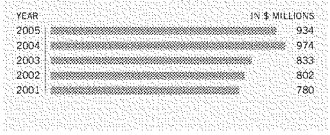
Surplus and asset valuation reserves, the funds that ensure we can meet future obligations to policyholders and finance our growth, increased by more than $1 billion and reached a new high of $12.9 billion, providing a superb cushion of safety and security for our policyholders. Since 2001 surplus and asset valuation reserves have increased by over $4.1 billion. Total surplus is one of the key indicators of the Company's long-term financial strength and stability.

Our primary management reporting system is based on accounting principles generally accepted in the United States of America (GAAP), with certain adjustments that we believe result in a more appropriate tracking of operating results. In addition, statutory results are tracked as an important measure of capital adequacy.

For a detailed reconciliation of the Company's GAAP performance measures to its non-GAAP performance measures, see page 47.

For definitions of the Company's performance measures, see page 52.

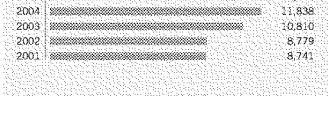
OPERATING EARNINGS



OPERATING EARNINGS (LOSS) BY LINE OF BUSINESS

(DOLLARS IN MILLIONS)	2004	2005
LIFE AND ANNUITY	$698	**$619**
INVESTMENT MANAGEMENT	146	**156**
SPECIAL MARKETS	56	**62**
INTERNATIONAL	(7)	**22**
CORPORATE	81	**75**
OPERATING EARNINGS	$974	**$934**

SURPLUS AND ASSET VALUATION RESERVES



OPERATING REVENUE

YEAR	IN $ BILLIONS
2005	11.1
2004	10.3
2003	9.3
2002	8.9
2001	8.5

This chart shows the revenue the Company has generated from its domestic and international business during the last five years – primarily premium and fee income, deposits included in policyholder account balances for life and annuity products, and net margins on guaranteed products. Operating revenue has grown steadily since 2001.

ASSETS UNDER MANAGEMENT

YEAR	IN $ BILLIONS
2005	225.2
2004	214.9
2003	202.1
2002	179.8
2001	178.3

This chart shows the growth of assets under management since 2001. The Company's assets under management rose 4.8 percent over 2004, reflecting the strength of the Company's diversified products and distribution channels.

INSURANCE SALES

YEAR	IN $ MILLIONS
2005	2,237
2004	2,027
2003	1,761
2002	1,861
2001	1,436

This chart shows the growth of new insurance sales and includes results from both our domestic and international operations. This represents another record performance for the Company. Since 2001, our insurance sales have grown at a compound annual rate of 12 percent.

INDIVIDUAL LIFE INSURANCE IN FORCE

YEAR	IN $ BILLIONS
2005	651.6
2004	616.1
2003	556.0
2002	523.8
2001	490.8

This chart shows the growth of the Company's individual life insurance in force. Our steady growth – $160.8 billion since 2001 – is the sign of a strong and vibrant company.

INVESTMENT SALES

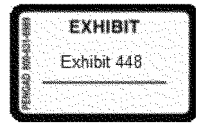
YEAR	IN $ MILLIONS
2005	28,265
2004	24,230
2003	22,329
2002	21,699
2001	20,000

Investment sales include new sales of annuities, (other than immediate annuities, which are included in insurance sales), mutual funds and other investment-related products by both our domestic and international operations. 2005 investment sales increased over $4 billion from 2004 due to growth of our third-party asset management business.

POLICYHOLDER BENEFITS AND DIVIDENDS

YEAR	IN $ BILLIONS
2005	10.7
2004	9.3
2003	8.4
2002	7.9
2001	7.5

This chart illustrates policyholder benefits and dividends incurred by the Company over the last five years. Benefits include death claims paid to beneficiaries, accident and health benefits, surrender benefits, interest on death claims and annuity payments. Dividends are payments made to policyholders eligible to participate in the Company's earnings.



CSOC.CBR.00031598

report of independent auditors

To the Board of Directors of New York Life Insurance Company

We have audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of New York Life Insurance Company and its subsidiaries as of December 31, 2005 and 2004, and the related consolidated statements of income, of equity and of cash flow for the years then ended; and in our report dated March 15, 2006, we expressed an unqualified opinion on those consolidated financial statements.

In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

As described in Note 3 to the consolidated financial statements, effective January 1, 2004, the Company adopted Statement of Position 03-1, *Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts*, and Statement of Financial Accounting Standards No. 133, *Accounting for Derivative Instruments and Hedging Activities* Implementation Issue No. B36, *Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor Under Those Instruments.*

Note 1

NATURE OF OPERATIONS AND BASIS OF PRESENTATION

NATURE OF OPERATIONS New York Life Insurance Company and its subsidiaries ("the Company") offer a wide range of insurance and investment products and services including life and health insurance, long-term care, annuities, pension products, mutual funds, and other investments and investment advisory services. The Company is comprised of four primary business operations: Life and Annuity, Investment Management, International operations and Special Markets. Life and Annuity operations are conducted through New York Life Insurance Company ("NYLIC"), the parent company, and its wholly owned insurance subsidiaries New York Life Insurance and Annuity Corporation ("NYLIAC") and NYLIFE Insurance Company of Arizona ("NYLIFE of Arizona"). Investment Management activities are conducted primarily through NYLIC and various registered investment advisory subsidiaries of its wholly owned subsidiary, New York Life Investment Management Holdings LLC ("NYLIM Holdings"). The Company markets individual insurance and investment products in Asia and Latin America through New York Life International, LLC ("NYL International"), a wholly owned subsidiary of NYLIC. Special Markets is a niche business area of NYLIC that markets group life and health insurance to membership associations, long-term care insurance and is the exclusive provider of life insurance to AARP. NYLIFE LLC is a wholly owned subsidiary of NYLIC, and is a holding company for certain subsidiaries of NYLIC. NYLIFE LLC, through its subsidiaries, offers securities brokerage, financial planning and investment advisory services, trust services and capital financing.

BASIS OF PRESENTATION The accompanying consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") and reflect the consolidation of the parent company with its majority-owned and controlled subsidiaries, as well as variable interest entities in which the Company is considered the primary beneficiary: principally NYLIAC, NYLIFE of Arizona, NYLIFE LLC, NYL International and NYLIM Holdings. All intercompany transactions have been eliminated in consolidation. The New York State Insurance Department (the "Department") recognizes only statutory accounting practices for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the New York Insurance Law, and for determining whether its financial condition warrants the payment of a dividend to its policyholders. In addition, the Company is also subject to reporting requirements with the Delaware and Arizona Insurance Departments. No consideration is given by any of the State Insurance Departments to financial statements prepared in accordance with GAAP in making such determinations.

Certain amounts in prior years have been reclassified to conform to the current year presentation. These reclassifications had no effect on net income or equity as previously reported.

Accounting practices used to prepare statutory financial statements for regulatory filings of life insurance companies differ in certain instances from GAAP.

CSOC.CBR.00031602

notes to condensed consolidated financial statements

New York Life Insurance Company and its Subsidiaries, December 31, 2004 and 2005

The following reconciles consolidated GAAP net income to the statutory net income of NYLIC, as reported to regulatory authorities:

STATUTORY CAPITAL†	$11,838	$12,853

* *Statutory net income excludes the net income of NYLIC only, and excludes the net income of its domestic insurance subsidiaries of $213 million and $223 million for the years ended December 31, 2004 and 2005, respectively.*

† *Statutory capital includes statutory surplus and the asset valuation reserve ("AVR") on a consolidated basis of the Company. NYLIC's statutory surplus was $9,708 million and $10,549 million at December 31, 2004 and 2005, respectively. AVR for NYLIC and its domestic insurance subsidiaries was $2,130 million and $2,304 million at December 31, 2004 and 2005, respectively.*

Note 2

SIGNIFICANT ACCOUNTING POLICIES

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

INVESTMENTS Fixed maturity investments, which the Company has both the ability and the intent to hold to maturity, are stated at amortized cost and classified as held-to-maturity. Investments classified as available-for-sale or trading are reported at fair value. For publicly traded fixed maturities, estimated fair value is determined using quoted market prices. For fixed maturities without a readily ascertainable fair value, the Company has determined an estimated fair value using a discounted cash flow approach, broker-dealer quotations or management's pricing model. Unrealized gains and losses on available-for-sale securities are reported in other comprehensive income, net of deferred taxes and related adjustments. Unrealized gains and losses from investments classified as trading fixed maturities are reflected in net investment gains in the accompanying Consolidated Statement of Income.

Changes in future anticipated cash flows on mortgage and asset-backed securities from the original purchase assumptions are accounted for using the retrospective yield adjustment method.

Unaffiliated equity securities are carried at fair value. The estimated fair value of equity securities has been determined using quoted market prices for publicly traded securities and management's pricing model for private placement securities. Equity securities classified as available-for-sale reflect unrealized gains and losses in other comprehensive income, net of deferred taxes and related adjustments. Unrealized gains and losses from investments in equity securities classified as trading are reflected in net investment gains in the accompanying Consolidated Statement of Income.

Affiliated equity securities represent holdings in entities where there is at least 20 percent ownership or where the Company has the ability to exercise significant influence through its relationship, and are accounted for by the equity method of accounting. Accordingly, respective net earnings or losses are included in other income in the accompanying Consolidated Statement of Income.

The cost basis of fixed maturities and equity securities is adjusted for impairments in value deemed to be other than temporary, with the associated realized loss reported in net investment gains in the accompanying Consolidated Statement of Income. Factors considered in evaluating whether a decline in value is other than temporary include: (i) whether the decline is substantial; (ii) the amount of time that the fair value has been less than cost; (iii) the financial condition and near-term prospects of the issuer; and (iv) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value.

Mortgage loans on real estate are carried at unpaid principal balances, net of discounts/premiums and valuation allowances, and are secured. Specific valuation allowances are established for the excess carrying value of the mortgage loan over its estimated fair value, when it is probable that, based on current information and events, the Company will be unable to collect all amounts due under the contractual terms of the loan agreement. Specific valuation allowances are based upon the fair value of the collateral or present value of expected future cash flows discounted at the loan's original effective interest rate. The Company also has a general valuation allowance for estimated future credit losses on currently performing mortgages. The general allowance is based on the Company's historical loss experience for the mortgage loan portfolio.

Policy loans are stated at the aggregate balance due, which approximates fair value since loans on policies have no defined maturity date and reduce amounts payable at death or surrender.

Derivative financial instruments are accounted for at fair value. The treatment of changes in the fair value of derivatives depends on the character of the transaction, including whether it has been designated and qualifies as part of a hedging relationship.

Limited partnership investments included in other long-term investments in the accompanying Consolidated Balance Sheet are accounted for by the equity method of accounting.

Net investment gains (losses) on sales are generally computed using the specific identification method.

notes to condensed consolidated financial statements

New York Life Insurance Company and its Subsidiaries, December 31, 2004 and 2005

DEFERRED POLICY ACQUISITION COSTS The costs of acquiring new and maintaining renewal business and certain costs of issuing policies that vary with, and are primarily related to, the production of new and renewal business have been deferred and recorded as an asset in the accompanying Consolidated Balance Sheet. These costs consist primarily of commissions, certain expenses of underwriting and issuing contracts, and certain agency expenses.

For traditional participating life insurance policies, such costs are amortized over 25 years in proportion to estimated gross margins, basing amortization initially on pricing assumptions and updating periodically for actual results. For universal life and deferred annuity contracts, such costs are amortized in proportion to estimated gross profits over the effective life of those contracts, which is assumed to be 25 years for universal life contracts and 15 years for deferred annuities. The Company uses a pricing-based approach for projections of future gross margins, which include original pricing earned rates. Changes in assumptions for all policies and contracts are reflected as retroactive adjustments in the current year's amortization. For the above described contracts, the carrying amount of the deferred policy acquisition cost asset is adjusted at each balance sheet date as if the unrealized investment gains or losses had been realized and included in the gross margins or gross profits used to determine current period amortization. The increase or decrease in the deferred policy acquisition cost asset due to unrealized investment gains or losses is recorded in other comprehensive income.

Deferred acquisition costs for term contracts, annuity policies with life contingencies, and group life and health contracts are amortized in proportion to premium income over the effective premium-paying period of the contract. Assumptions as to anticipated premiums are made at the date of policy issuance and are consistently applied during the life of the contract. Deviations from estimated experience are included in operating expenses in the accompanying Consolidated Statement of Income when they occur.

RECOGNITION OF INCOME AND RELATED EXPENSES Premiums from traditional participating life insurance policies, term life policies, annuity policies with life contingencies and group life and health contracts are recognized as income when due. The associated benefits and expenses are matched with income so as to result in the recognition of profits over the life of the contracts. This match is accomplished by providing for liabilities for future policy benefits and the deferral and subsequent amortization of policy acquisition costs.

Amounts received under universal life-type contracts and investment contracts are reported as deposits to policyholders' account balances. Revenues from these contracts consist of amounts assessed during the period for mortality and expense risk, policy administration and surrender charges, and are included as fee income in the Consolidated Statement of Income. Amounts previously assessed to compensate the Company for services to be performed over future periods are deferred and recognized into income over the period benefited, using the same assumptions and factors used to amortize deferred policy acquisition costs. Policy benefits and claims that are charged to expense include benefit claims incurred in the period in excess of related policyholders' account balances.

Premiums for contracts with a single premium, or a limited number of premium payments due over a significantly shorter period than the total period over which benefits are provided, are recorded as income when due. Any excess profit is deferred and recognized as income in a constant relationship to insurance in force and, for annuities, in relation to the amount of expected future benefit payments.

POLICYHOLDERS' ACCOUNT BALANCES Policyholders' account balances on universal life-type contracts and investment contracts are equal to cumulative deposits plus interest credited less mortality and expense charges and withdrawals.

FUTURE POLICY BENEFITS Reserves for traditional life insurance policies are estimated using a net level premium method based on the dividend fund interest rate and mortality rates guaranteed in calculating the cash surrender values. Term life insurance policies are estimated using a net level premium method on the basis of actuarial assumptions established at policy issue.

Individual annuities are calculated on the basis of actuarial assumptions established at policy issue. Group annuity reserves are generally calculated using the present value of expected future payments at rates expected at issue.

POLICYHOLDERS' DIVIDENDS The amount of dividends to be paid to NYLIC participating policyholders is determined annually by NYLIC's Board of Directors. The aggregate amount of policyholders' dividends is based on NYLIC's statutory results and past experience, including investment income, net realized investment gains and losses over a number of years, mortality experience, and other factors.

BENEFIT PLANS NYLIC maintains the New York Life Insurance Company Pension Plan (the "Pension Plan"). The Pension Plan is a qualified defined benefit pension plan covering substantially all eligible full-time and part-time employees of NYLIC and certain eligible employees of subsidiaries that adopt the Pension Plan. NYLIC also maintains the New York Life Excess Benefit Plan, which is a nonqualified, unfunded arrangement, which provides benefits in excess of the maximum benefits that may be paid or accrued under the Pension Plan. Agents are not eligible for benefits under the Pension Plan or the New York Life Excess Benefit Plan.

NYLIC also maintains the NYLIC Retirement Plan (the "Retirement Plan"). The Retirement Plan is a qualified defined benefit pension plan covering substantially all eligible agents under contract to NYLIC or its domestic life insurance subsidiaries on or after the effective date of the Plan, January 1, 1982. NYLIC also maintains nonqualified, unfunded arrangements to provide benefits in excess of maximum benefits that may be paid or accrued under the NYLIC Retirement Plan.

The plans described above are non-contributory and are accounted for in accordance with Statement of Financial Accounting Standards No. 87 ("SFAS 87"), "Employers' Accounting for Pensions." NYLIC provides certain health care and life insurance benefits ("postretirement benefits") under separate arrangements for eligible retired employees and agents including their eligible dependents. NYLIC accrues the expected cost of postretirement benefits during the period of employee and agent eligible service.

The Company also maintains a qualified defined contribution plan for employees as well as a separate plan for agents.

The Company provides certain benefits to eligible employees and agents during employment for paid absences. These benefits include, but are not limited to, salary continuation during medical and maternity leaves, disability-related benefits, and continuation of benefits such as health care and life insurance coverage.

FEDERAL INCOME TAXES NYLIC files a consolidated federal income tax return with certain of its domestic insurance and non-insurance subsidiaries. The consolidated income tax liability is allocated among the members of the group in accordance with a tax allocation agreement. The tax allocation agreement provides that each member of the group is allocated its share of the consolidated tax provision or benefit, determined generally on a separate company basis. Current federal income taxes are charged or credited to operations based upon amounts estimated to be payable or recoverable as a result of taxable operations for the current year and any adjustments to such estimates from prior years. Deferred income tax assets and liabilities are recognized for the future tax consequence of temporary differences between financial statement carrying amounts and income tax bases of assets and liabilities.

notes to condensed consolidated financial statements

New York Life Insurance Company and its Subsidiaries, December 31, 2004 and 2005

Note 3

RECENT ACCOUNTING PRONOUNCEMENTS

Effective January 1, 2004, the Company adopted Statement of Position 03-1, "Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts" ("SOP 03-1"). SOP 03-1 provides guidance on (i) the classification and valuation of long-duration contract liabilities; (ii) the accounting for sales inducements; and (iii) separate account presentation and valuation. In accordance with SOP 03-1's guidance for the reporting of certain separate accounts, the Company reclassified $4,038 million of separate account assets to general account assets and $3,941 million of separate account liabilities to policyholders' account balances and other liabilities at January 1, 2004. The Company currently offers enhanced crediting rates or day-one bonus payments to contractholders on certain of its annuity products. Effective January 1, 2004, upon the Company's adoption of SOP 03-1, the expense associated with offering a day-one bonus continues to be deferred and amortized over the life of the related contract using the same methodology and assumptions used to amortize deferred policy acquisition costs. Enhanced crediting rates offered in certain annuity products will no longer be eligible for capitalization. Effective January 1, 2004, amortization associated with expenses previously deferred remains unchanged. The cumulative effect of the adoption of SOP 03-1, as of January 1, 2004, resulted in no impact to net income and a $2 million increase in other comprehensive income.

Effective January 1, 2004, the Company adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("SFAS 133") Implementation Issue No. B36, "Embedded Derivatives: Modified Coinsurance Arrangements and Debt Instruments That Incorporate Credit Risk Exposures That Are Unrelated or Only Partially Related to the Creditworthiness of the Obligor Under Those Instruments" ("B36"). B36 indicates that certain reinsurance arrangements, and other similar contracts in which funds are withheld by the ceding insurer and a return on those withheld funds is paid based on the ceding company's return on certain of its investments, generally contain an embedded derivative feature that should be separately identified and fair-valued. The liabilities for these reinsurance arrangements and other similar contracts that contain an embedded derivative were adjusted to reflect the fair value of the invested assets and are included in interest credited to policyholders' account balances and other income in the accompanying Consolidated Statement of Income. To mitigate the financial impact of marking the liabilities to market, the Company transferred its fixed maturities portfolio backing certain modified coinsurance agreements and group pension participating contracts from available-for-sale into the trading portfolio. The financial impact of establishing a trading portfolio as of January 1, 2004, was a $214 million after-tax increase in net income and a $214 million after-tax decrease to other comprehensive income, and is not included as part of the cumulative impact, as of January 1, 2004. The cumulative effect of the adoption of B36, as of January 1, 2004, resulted in a $240 million after-tax decrease in net income and a $151 million after-tax increase in other comprehensive income. The total impact on net income for B36, including the establishment of a trading portfolio, was a charge of $26 million.

The Company's total cumulative effect of the adoption of B36 and SOP 03-1, as of January 1, 2004, resulted in a $240 million decrease in net income and a $153 million increase in other comprehensive income, after-tax.

The Company has adopted the provisions of Financial Accounting Standards Board Interpretation No. 46(R) "FIN 46(R)." In January 2003, the FASB issued FIN No. 46, "Consolidation of Variable Interest Entities" "FIN 46." FIN 46 requires a variable interest entity ("VIE") to be consolidated by a company if that company is subject to a majority of the risk of loss from the VIEs activities or entitled to receive a majority of the entity's residual returns. On December 17, 2003, the FASB issued FIN 46(R) ("Revised Interpretation" of FIN 46), which amended certain aspects of FIN 46. For all VIEs created before December 31, 2003, the Company was required to adopt FIN 46(R) as of January 1, 2005. For VIEs created after December 31, 2003, the Company applied FIN 46(R) in 2004. At December 31, 2004, the Company held $174 million of invested assets issued by a VIE, created after December 31, 2003, and determined it to be a significant variable interest under FIN 46(R). These investments consist of fixed maturities (asset-backed securitizations totaling

$73 million, and private placement structured notes totaling $93 million) and other equity investments (asset-backed securitizations totaling $8 million). This VIE did not require consolidation because management determined that the Company was not the primary beneficiary. Accordingly, this VIE is subject to ongoing review for impairment and the investment in this VIE represents the maximum exposure to losses from the Company's direct involvement with the VIE. The Company has no additional economic interest in this VIE in the form of derivatives, commitments, related guarantees, credit enhancement or similar instruments and obligations. At December 31, 2004, the Company had identified one VIE that required consolidation under existing accounting rules; however, it did not require consolidation at December 31, 2005, under FIN 46(R). Consequently, this resulted in $365 million of assets included in the accompanying Consolidated Balance Sheet at December 31, 2004, but excluded from the Consolidated Balance Sheet at December 31, 2005.

In 2005, the Company was determined to be the primary beneficiary for (i) a trust established for certain of the Company's synthetic guaranteed investment contracts; (ii) two entities established as part of the Company's securitization program; and (iii) an LLC whose primary objective is to invest in privately negotiated equity investments in companies based in, or with significant operations in, India. Consolidation of these VIEs resulted in $507 million of assets included in the accompanying Consolidated Balance Sheet at December 31, 2005.

At December 31, 2005, the Company also held $380 million of invested assets issued by VIEs and determined them to be significant variable interests under FIN 46(R). These investments consist of fixed maturities (asset-backed securitizations totaling $38 million and private placement structured notes totaling $291 million) and other long-term investments (equity in asset-backed securitizations totaling $25 million, limited partnership interests totaling $9 million and investment in a synthetic fuel plant totaling $17 million). These VIEs did not require consolidation at January 1, 2005, or throughout the year because management determined that the Company was not the primary beneficiary. Accordingly, these VIEs are subject to ongoing review for impairment, and investments in these VIEs represent the maximum exposure to losses from the Company's direct involvement with the VIEs. The Company has no additional economic interest in these VIEs in the form of derivatives, commitments, related guarantees, credit enhancement or similar instruments and obligations. There was no material impact to consolidated net income from adoption of FIN 46(R).

In September 2005, the Accounting Standards Executive Committee (AcSEC) of the American Institute of Certified Public Accountants (AICPA) issued Statement of Position (SOP) 05-1, Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts ("SOP 05-1"). SOP 05-1 provides guidance on accounting by insurance enterprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in Statement of Financial Accounting Standards (SFAS) No. 97. The SOP defines an internal replacement as a modification in product benefits, features, rights or coverages that occurs by the exchange of a contract for a new contract, or by amendment, endorsement or rider to a contract, or by the election of a feature or coverage within a contract. This SOP is effective for internal replacements occurring in fiscal years beginning after December 15, 2006. The Company will adopt SOP 05-1 on January 1, 2007. The Company is currently assessing the impact of SOP 05-1 on the Company's consolidated statements at the date of adoption.

In November 2005 the FASB issued a Staff Position Paper ("FSP") No. 115-1, which is entitled "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments." This FSP addresses the determination as to when an investment is considered impaired, whether that impairment is other than temporary and the measurement of an impairment loss. It also includes accounting considerations subsequent to the recognition of an other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The provisions of FSP No. 115-1 are effective January 1, 2006, and it is not expected to have a material impact on the Company's Consolidated Statement of Income at the date of adoption.

Note 4

DEBT

For the years ended December 31, 2004 and 2005, the fair value of debt was $2,534 million and $2,316 million, respectively. The carrying amount for commercial paper approximates fair value. The fair value of the Company's other debt is estimated based on the quoted market prices for the same or similar issues or on the current rates offered to the Company for debt of the same remaining maturities. Debt, generally carried at unpaid principal balance, consisted of the following at December 31, 2004 and 2005:

(DOLLARS IN MILLIONS)	2004	2005
CAPITAL CORPORATION'S COMMERCIAL PAPER DEBT ISSUANCE VARIOUS MATURITY DATES THROUGH FEBRUARY 2005 AND FEBRUARY 2006 FOR 2004 AND 2005, RESPECTIVELY (THE WEIGHTED AVERAGE INTEREST RATE IS APPROXIMATELY 2.34% AND 4.27% FOR 2004 AND 2005, RESPECTIVELY)	$ 498	$ 498
SHARED APPRECIATION INCOME LINKED SECURITIES DUE AUGUST 22, 2011 (COUPON RATE OF 3.3%)	206	211
SHARED APPRECIATION INCOME LINKED SECURITIES II DUE APRIL 28, 2008 (IMPLICIT COUPON RATE OF 2.27%)	264	276
7.50% SURPLUS NOTES DUE DECEMBER 15, 2023	125	–
5.875% SURPLUS NOTES DUE MAY 15, 2033	990	991
NON-RECOURSE DEBT	313	216
OTHER (PRIMARILY CAPITAL LEASE)	59	53
TOTAL DEBT	$2,455	$2,245

New York Life Capital Corporation ("Capital Corporation"), an indirect wholly owned subsidiary of NYLIC, is engaged in capital financing operations and issues commercial paper.

The Shared Appreciation Income Linked Securities ("SAILS") and the Shared Appreciation Income Linked Securities II ("SAILS II") refer to agreements entered into by the Company. Under these agreements, the Company has entered into forward sales of certain of its shares of Express Scripts, Inc. ("ESI"), an investment of the Company accounted for under the equity method. Under these agreements, the Company may settle its obligation at maturity by delivering the contractual amount of ESI shares or settling in cash. (See Note 5 – ESI Derivative- for additional information.)

At December 31, 2005, the Company was required to consolidate two asset-backed investment vehicles (commonly referred to as collateralized debt obligations, or "CDOs"). At December 31, 2004, the Company was required to consolidate one CDO, which did not require consolidation in 2005. For the years ended December 31, 2004 and 2005, the debt outstanding relating to the consolidated CDOs was $313 million and $216 million, respectively, all of which is non-recourse to the Company.

LINE OF CREDIT The Company has entered into a $1.5 billion revolving credit facility with a consortium of banks effective July 27, 2005. The new agreement is a five-year revolving credit facility that pays an annual facility fee of 4 bps, based on the volume of short-term notes issued during the year. The borrowing rate is 16 bps over LIBOR. If borrowings exceed 50 percent of the total facility, the borrowing rate will be 16 bps over LIBOR plus 5 bps. Annual facility fees and borrowing rates could increase if New York Life's Standard & Poor's and Moody's Financial Strength ratings are downgraded.

This new revolving credit facility replaced both the $500 million, 364-day revolving credit facility, which expired on July 27, 2005, and the $500 million, 3-year revolving credit facility, which was scheduled to expire on July 30, 2006.

To date, the Company has not utilized any of these credit facilities.

Note 5

ESI DERIVATIVE

In 2003 and 2001, the Company entered into forward sale agreements (embedded derivatives) to minimize its downside risk on the Company's investment in ESI while still maintaining rights to share in future appreciation (SAILS and SAILS II, as discussed above in Note 4 – Debt). The Company's obligations associated with these embedded derivatives are fully collateralized by its investment in ESI. However, since the Company's investment in ESI is valued using the equity method of accounting and these embedded derivatives are valued at fair value, the Company is precluded from using hedge accounting. This creates accounting volatility in both the consolidated balance sheet and income statement because the change in the actual fair value of the underlying investment in ESI shares is not recognized through net income or equity. For the years ended December 31, 2004 and 2005, the change in fair value resulted in the Company recording an after-tax accounting loss of $39 million and $512 million, respectively. While the accounting for this transaction resulted in an accounting loss in earnings, the derivative performed as expected on an economic basis.

Note 6

COMMITMENTS AND CONTINGENCIES

LITIGATION The Company and/or its subsidiaries are defendants in individual and/or alleged class action suits arising from their agency sales force, insurance (including variable contracts registered under the federal securities law), investment, retail securities, employment and/or other operations, including actions involving retail sales practices. The Company is also a defendant in a suit regarding employee and agent benefits where a portion of the case, specifically the breach of fiduciary claims, has been certified as a class by agreement of the parties. The remainder of the claims in that suit have not been certified. Most of the actions seek substantial or unspecified compensatory and punitive damages. The Company and/or its subsidiaries are also from time to time involved in various governmental, administrative, and investigative proceedings and inquiries.

Notwithstanding the uncertain nature of litigation and regulatory inquiries, the outcome of which cannot be predicted, the Company believes that, after provisions made in the financial statements, the ultimate liability that could result from litigation and proceedings would not have a material adverse effect on the Company's financial position; however, it is possible that settlements or adverse determinations in one or more actions or other proceedings in the future could have a material adverse effect on the Company's operating results for a given year.

CSOC.CBR.00031610

Note 7

RELATED PARTY TRANSACTIONS

COMPANY-MANAGED MUTUAL FUNDS NYLIM Holdings, through its subsidiaries, is responsible for providing investment advisory and certain related administrative services to the MainStay Funds, MainStay VP Series Fund, Inc., Eclipse Funds and Eclipse Funds, Inc. (formerly The MainStay Institutional Funds, Inc.) – collectively, the "NYLIM Funds." McMorgan & Company LLC, a wholly owned subsidiary of NYLIM Holdings, is the investment advisor to the McMorgan Funds (collectively with the NYLIM Funds, "the Funds"). As a result, NYLIM Holdings, through its subsidiaries, earns investment management, accounting, administration and service fees related to the Funds, which aggregated $306 million and $326 million for the years ended December 31, 2004 and 2005, respectively, and are included in other income in the accompanying Consolidated Statement of Income. The receivable balance at December 31, 2004 and 2005, was $29 million and $35 million, respectively, and is included in other assets in the accompanying Consolidated Balance Sheet.

OTHER TRANSACTIONS As of December 31, 2005, an executive and a retired executive of the Company were directors of ESI. ESI periodically performs services for or has other transactions with the Company. Such transactions are entered into on terms comparable to those that would be available to unrelated third parties and are not material to the Company's consolidated financial condition or results of operations.

reconciliation of cash and invested assets: GAAP basis to statutory basis

(DOLLARS IN MILLIONS)	2004	2005

OPERATING REVENUE†	$10,264	$11,072

* *Interest Maintenance Reserve ("IMR"): In accordance with statutory accounting principles, interest-related net realized capital gains on all types of fixed income investments are accumulated in this reserve. These capital gains are then amortized into operating earnings over the remaining life (period to maturity) of the investments sold.*

† *Refer to Glossary of Terms on page 52.*

CSOC.CBR.00031612

management's discussion of financial responsibility

Management is responsible for the preparation and integrity of the financial information presented in the *Annual Report*. The Company's consolidated financial statements incorporated by reference herein have been prepared in conformity with accounting principles generally accepted in the United States of America. In Management's opinion, the consolidated statements present fairly the Company's financial position, results of operations and cash flows as of, and for the years ended, December 31, 2005 and 2004.

The Company maintains a strong system of internal accounting controls, monitored by our corporate staff of professionally trained internal auditors. We encourage strong and effective corporate governance from our Board of Directors, continuously review our business results and strategic choices and focus on financial stewardship. The Company's controls are designed to provide reasonable assurance that assets are safeguarded and that transactions and events are recorded properly. The Company has evaluated the effectiveness of its controls and procedures for financial reporting purposes as of December 31, 2005 and 2004, and has concluded that they are effective.

PricewaterhouseCoopers LLP, the Company's independent auditors, has audited the consolidated financial statements of the Company in accordance with auditing standards generally accepted in the United States of America. Their report appears on page 34.

The Audit Committee of the Board of Directors of New York Life Insurance Company, which is comprised exclusively of Directors who are not officers or employees of the Company, meets regularly with management, the internal auditors and the independent auditors to provide oversight so that management fulfills its responsibilities for accounting controls and preparation of financial statements.

Although we are not an SEC registrant, we have elected to comply voluntarily with Section 302 of the Sarbanes-Oxley Act of 2002, which identifies management's responsibilities over its financial statements and requires management to certify as to the integrity of the financial statements and the effectiveness of internal controls. Our statement to that effect can be viewed on the Company's Web site, www.newyorklife.com.

Sy Sternberg Elected as a Director in 1995, he is chairman of the board and chief executive officer of New York Life. Mr. Sternberg is a member of the Board's Insurance & Operations and Investment Committees.

Hector R. Ortino Elected as a Director in 2002, he was chairman and chief executive officer of Ferro Corporation. In 2005, Mr. Ortino was a member of the Board's Audit, Insurance & Operations and Investment Committees.

Betty C. Alewine Elected as a Director in 1998, she is a retired president and chief executive officer of COMSAT Corporation. Mrs. Alewine is vice chair of the Board's Audit Committee and is a member of the Governance and Investment Committees.

Robert M. Baylis Elected as a Director in 1996, he is a retired vice chairman of CS First Boston, Inc. Mr. Baylis chairs the Board's Investment Committee and is a member of the Audit and Governance Committees.

BACK, LEFT TO RIGHT: *Leslie C. McCraw, Jr.; Admiral Joseph W. Prueher; Frederick J. Sievert; Kent B. Foster; Frederick O. Terrell; James L. Broadhead* **FRONT, LEFT TO RIGHT:** *Christina A. Gold; Conrad K. Harper; Sy Sternberg; Hector R. Ortino; Betty C. Alewine; Robert M. Baylis*

In Memoriam: Hector R. Ortino

We mourn the loss of Hector R. Ortino, a member of New York Life's Board of Directors since 2002. Mr. Ortino's wide-ranging business knowledge and global experience helped guide the Company during a period of sustained domestic and international growth. We shall deeply miss his wise counsel and profound sense of humanity. Hector Ortino passed away in November 2005.

glossary of terms

Growth

INSURANCE SALES – represent annualized first-year premium on products with significant mortality or morbidity risk, where a sale is counted when the policy is paid. All BOLI sales and COLI Private Placement Variable Universal Life (where the premium is not expected to recur annually) are counted at 10 percent. Insurance sales are generated from both our domestic and international businesses.*

INVESTMENT SALES – represent current-year purchase of products primarily having market risk, where a sale is counted when money is received. Investment sales include individual accumulation annuities, guaranteed products, mutual funds and third-party asset management.†

INDIVIDUAL LIFE INSURANCE IN FORCE – the sum of the face amounts of domestic and international life insurance contracts outstanding at a given time.

POLICYHOLDER BENEFITS AND DIVIDENDS – include domestic and international insurance operations and are presented on a statutory basis. Benefits include death claims paid to beneficiaries, accident and health benefits, surrender benefits, interest on death claims and annuity payments.

TOTAL REVENUE – represents consolidated GAAP revenue.

OPERATING REVENUE – includes statutory premiums for life and annuity products, net margins on guaranteed products and fee income associated with asset management business. Premiums on most life insurance products and considerations on immediate annuity products (defined as "Guaranteed Lifetime Income Insurance") are weighted at 100 percent. Annuity considerations on investment income products, all BOLI policies and certain PPVUL policies where the premium is not expected to recur annually are weighted at 10 percent.‡

ASSETS UNDER MANAGEMENT – consists of assets of the Company's domestic and international insurance operations and assets the Company manages for third-party investors, including mutual funds and pension plans.

Profitability

NET INCOME – represents consolidated GAAP net income.

NET INCOME EXCLUDING NET INVESTMENT GAINS/LOSSES – represents consolidated GAAP net income adjusted for the exclusion of net investment gains and losses, net of tax and DAC.

OPERATING EARNINGS – the key measure used for management purposes to track the Company's profitability from ongoing operations. Operating earnings equals GAAP net income adjusted for the exclusion of: (i) net investment gains and losses, net of tax and DAC; (ii) the portion of dividends on participating policies related to capital gains and prior years' equity base tax releases, net of tax and DAC; (iii) the equity in earnings of ESI; (iv) charges associated with Mexican subsidiary purchased net operating losses; (v) other gains on limited partnerships included in net investment income, and adjusted to include (vi) certain interest maintenance reserve amortization, net of tax and DAC.§

Financial Position

EQUITY – represents consolidated GAAP equity.

SURPLUS AND ASSET VALUATION RESERVES – includes statutory surplus and the asset valuation reserve (AVR) of the Company on a consolidated basis. Statutory surplus represents assets minus liabilities of the Company on a consolidated basis based on the accounting rules specified by the state insurance regulators. The AVR is required by insurance regulators to stabilize surplus from defaults on bonds, mortgage loans and real estate along with fluctuations in the market value of equity securities. Changes in the AVR are accounted for as direct increases or decreases in surplus.

* *2001–2004 insurance sales were revised to conform to the Company's change in definition of insurance sales effective 1/1/2005, which (i) moves immediate annuities from investment sales to insurance sales; (ii) records all BOLI cases at 10 percent instead of 100 percent; and (iii) moves China endowments from insurance sales to investment sales.*

† *2004 investment sales include $1.23 billion of sales related to an acquisition of an investment subsidiary in 2004. 2001–2004 investment sales were revised to conform to the Company's change in definition of investment sales effective 1/1/2005, which (i) moves immediate annuities from investment sales to insurance sales and (ii) moves China endowments from insurance sales to investment sales.*

‡ *2001–2004 operating revenue has been revised to conform to the Company's change in definition of operating revenue effective 1/1/2005, relating to the (i) weighting of all BOLI premium at 10 percent, as opposed to only certain BOLI products, and (ii) the inclusion of Guaranteed Lifetime Income Insurance immediate annuity products at 100 percent rather than 10 percent, as previously reported.*

§ *2001–2004 operating earnings have been revised to conform to the Company's change in definition of operating earnings effective 1/1/2005, relating to a reduction in operating earnings as a result of policyholder di[illegible] of the mutual company equity-based tax.*

Memorandum

Sy Sternberg	June 15, 2006
To	**Date**
Bill Mattox	June 19th Fundraiser Lunch with Rep. Charlie Rangel
From	**Subject**

You are scheduled to attend a fundraiser luncheon for Rep. Charlie Rangel on Monday, June 19th at 12:30 p.m. at 11 Madison Park restaurant.

This is a personal money fundraiser that will raise $15,000 for Rep. Rangel. NYLPAC already has maxed out to his 2006 re-election.

You will be joined at the luncheon by: Fred Sievert, Jessie Colgate, Jeff Boyce, Greg Deavens, JJ Jaramillo, George Nichols, Mel Feinberg, David Harland, Bud Schiff, Anne Pollack, Bill Mattox, Jon Paone.

The group will be small enough to be seated around one table, so a formal introduction of Charlie will not be necessary. Charlie would appreciate it if attendees would introduce themselves and describe what roles they play in the company.

LUNCHEON AGENDA:

1. It would be nice to refer to him as "Mr. Chairman" signaling the possibility that he would become Chairman of the House Ways and Means Committee should the Democrats gain control of the Congress in November. In any event, he and Rep. Jim McCrery (the likely Chairman if the Republicans keep control) seem to work well together. McCrery has already suggested that the Committee needs to be more bi-partisan. In what direction would Charlie take the committee if he becomes Chairman?

2. Thank him for his help on fighting estate tax repeal. John Buckley (House Ways and Means Democratic Tax Counsel) has been providing background numbers and statistics for the articles such as those in the Washington Post and elsewhere that have been opposing repeal. Buckley is the lead thinker for the Democrats on estate tax and a real friend to us on the issue.

3. You should ask his opinion as to the status of the Pension conference, which includes our COLI best practices changes. Importantly, there has been discussion about including a so-called "tax trailer bill" in the package. This includes items dropped from the recently passed reconciliation bill, such as expiring tax provisions and could be the vehicle for the Senate charitable provisions, which includes the IOLI provisions we oppose.

Maintain as Confidential: Contains Confidential and Proprietary Information

4. This fundraising lunch offers an opportunity for you to share your geopolitical framework for engaging China and pursuing free trade agreements alongside a domestic competitiveness agenda. You might also note your support for Vietnam PNTR legislation and, if time permits, seek Rangel's views on the subject of Trade Promotion Authority renewal.

5. Invite Charlie to come to the home office and speak to our employees right after the election. If Democrats take control, it could be one of his first speeches as new Chairman. Or alternatively, if Republicans continue control (with likely reduced margins) he can talk about his close working relationship with likely Chairman McCrery.

6. If time permits, I would begin to discuss the issue of tax reform. While it may be a year or two away, I think it's important that we get commitment from Rangel that he opposes major tax changes that would devastate the life insurance industry - a major NY constituency.

LEGISLATIVE UPDATE

1. Trade: The House and Senate bills to extend PNTR to Vietnam were introduced on June 13th. USTR Susan Schwab, Vietnamese Ambassador Chien (who recently reminded Rep. Rangel how Vietnam gave NYL a license) and Vietnamese National Assembly member Ton Nu Thi Ninh attended the legislative roll-out event as did multiple bill sponsors and cosponsors, including Rep. Meeks (D-NY) and Crowley (D-NY). Rep. Rangel is not currently a co-sponsor of the bill, but other New York co-sponsors include Democratic Reps. Carolyn Maloney and Jose Serrano. Our goal is to see passage of Vietnam PNTR before the August recess, but there are concerns that Republicans will try to hold up the Vietnam bill unless the Democrats relent in their opposition to the Oman and Peru FTAs over what they see as weak labor provisions. On May 26, Rep. Rangel and Ways and Means Trade Subcommittee Ranking Member Ben Cardin (D-MD) sent a letter to then-USTR Rob Portman noting they were not prepared to support the Oman FTA because of the lack of ILO-consistent labor standards.

2. Pension Bill: Chairman Grassley and Chairman Thomas both said on Thursday that the target is to get a package by the July 4th Congressional Recess. House and Senate Democrats have consistently complained that they have been shut out of many of the conference meetings. NYL is closely following two key provisions.

   a. IOLI - The ACLI met with Rep. Thomas' top tax staffer this week, Bob Winters, to brief him on our IOLI concerns. Winters agreed to recommend to Thomas that the language be dropped. On the larger issue, Thomas still believes that the entire charitable section (which contains IOLI) needs hearings and should be removed from the package. However, Chairman Grassley still argues that he wants this section included in the final pension package.

Maintain as Confidential: Contains Confidential and Proprietary Information

b. COLI - Because the COLI provision is not in the House package, Chairman Thomas asked if a Senator could call him to request its inclusion. This week Senator Trent Lott (R-MS) called Thomas. Senator Orin Hatch (R-UT) is also slated to call Thomas. This means that Thomas is on record as accepting the Senate conference provision.

3. Estate Tax Repeal

a. Senator Baucus met with Democratic moderates this week, but thus far have reached no agreement on a compromise. Senator Grassley said on Thursday that he did not think the Democrats wanted a deal, because they believe that they will pick up seats in November and could negotiate a better deal next year. Grassley said it was unlikely Majority Leader Frist would schedule a vote on a compromise unless he had 61 to 62 votes (he feels they would lose one or two Democrats at the last minute.) Minority Leader Harry Reid (D-NV) has said that this is a true test of his leadership and has been trying to keep his Democratic voting bloc solidly against any compromise. As an example, during the 57-41 vote on the motion to proceed he "guarded" the well in the Senate to see how Democrat Senators were voting. NYL continues to work actively with AALU by focusing on Senator Maria Cantwell (D-Wash.) who is facing a tough re-election campaign and getting immense pressure from constituents to compromise. Cantwell is seen as a pivotal vote on the issue.

b. Chairman Thomas made several interesting comments at a breakfast on Thursday morning. First, he is pushing to get a pension conference report approved by the July 4 Congressional Recess. He suggested, however, that it is not necessary to include the so-called "tax trailer issues" (very popular expiring tax provisions, and importantly the charitable tax section) in the final pension package. In fact, he suggested that he might take these provisions out and write his own estate tax compromise and send that to the Senate. Word is that the House Republican Leadership has told Thomas that if he can work out a reform deal with the Senate (Baucus) then the House will accept reform.

c. Some have suggested that after the pension conference is cleared off the agenda, then there will be another run at trying to get an estate tax compromise.

I maybe reached on 202-841-[redacted] if you have questions.

$10 Million Grant From New York Life to Support Expansion of Colin Powell Center For Policy Studies At CCNY

Scholarships and Programming to Focus on Emerging African-American Issues

NEW YORK, N.Y., December 5, 2006 — Gen. Colin L. Powell, USA (ret.) and President Gregory H. Williams of The City College of New York (CCNY) announced today that the New York Life Foundation is giving $10 million to establish The New York Life Endowment for Emerging African-American Issues at the Colin Powell Center for Policy Studies. The gift, the largest to date to the Powell Center, will provide permanent funding for scholarships and programming at this unique think tank that engages CCNY students in all aspects of its activities.

Sy Sternberg, chairman and chief executive officer of New York Life Insurance Company and chairman of the New York Life Foundation, joined General Powell, the Center's Founder and Distinguished Scholar, at a press conference at CCNY today to announce the grant. The gift is the largest single grant ever made by the New York Life Foundation, as well as the largest corporate foundation gift ever received by CCNY.

"There is a tremendous need to conduct policy research on issues of importance to African Americans and other underserved populations. Equally important, we need to bring African Americans and other minorities into the policy-making process, by attracting them to and preparing them for policy careers at all levels," said General Powell. "This generous gift from the New York Life Foundation empowers the Powell Center to address these needs, and puts City College squarely at the forefront of a national effort to build a new model for public policy education."

"The New York Life Endowment begins to cement the future of the Colin Powell Center by providing a strong, permanent financial foundation that will significantly increase the Center's ability to serve our students," President Williams said. "The Center is rapidly becoming a national think tank that has as one of its priorities a focus on issues that affect underserved populations in New York, across America and in the global community. CCNY is deeply grateful that New York Life, one of New York City's most prestigious corporations, has recognized the quality of this Center and chosen to invest in its bold expansion."

"This forward-looking initiative will significantly advance the Colin Powell Center's efforts to educate the future leaders of America," Mr. Sternberg added. "New York Life is proud to support the Center's mission and contribute to its vitality, permanence and expansion. By joining hands today New York Life hopes to help the Powell Center prepare more students — African Americans and others — for a seat at the policy table at the national and international level." Mr. Sternberg pointed out that hundreds of New York Life employees over the years have graduated from CCNY. General Powell and Mr. Sternberg are both CCNY graduates.

"The University is deeply appreciative of this extraordinary grant by the New York Life Foundation, the largest one ever made by the foundation. We gratefully recognize the generous, longtime support of CUNY by the foundation and by Mr. Sternberg, the chairman of CUNY's Business Leadership Council, which has advanced the University's mission in so many ways," said Chancellor Matthew Goldstein. "The University takes great pride in the work of City College's Powell Center and is delighted that through this endowment so many deserving students will benefit from the Center's innovative approaches to policy research and education."

EXHIBIT
Exhibit 451

CSOC.CBR.00029354

CSOC.CBR.00029354

The Colin Powell Center for Policy Studies is a university-based policy center that produces policy research and introduces students to the world of policymaking. The Center enables CCNY students to take the lead in important public discussions on local, national and global issues, training them to become "big-picture" thinkers in a variety of public policy fields. One of its great strengths is the interdisciplinary nature of its focus and programs. The Powell Center serves students with a variety of majors, introducing not only political scientists and liberal arts and sciences specialists but also students in City College's prestigious professional schools of engineering, architecture and education to the process of policymaking in their disciplines.

Each year, The New York Life Endowment for Emerging African-American Issues will fund 21 scholarships — 16 for undergraduates and five for graduate students — as well as eight summer internships. Through the internships, the endowment directly addresses the reality that, for financial reasons, many students are unable to accept unpaid internships that provide valuable hands-on experience and career development.

In addition, the endowment supports a Leader-in-Residence program that will bring to the City College campus proven leaders who focus on African-American issues. It also provides funding so students can participate in outside conferences and meetings with professional policymakers.

About New York Life and the New York Life Foundation

New York Life Insurance Company, a Fortune 100 company founded in 1845, is the largest mutual life insurance company in the United States and one of the largest life insurers in the world. Headquartered in New York City, New York Life's family of companies offers life insurance, annuities and long-term care insurance. New York Life Investment Management LLC provides institutional asset management and retirement plan services. Other New York Life affiliates provide an array of securities products and services, as well as institutional and retail mutual funds. Please visit New York Life's Web site at www.newyorklife.com for more information.

The New York Life Foundation is the major vehicle through which New York Life Insurance Company channels contributions to national and local nonprofit organizations. The New York Life Foundation's grant to the Colin Powell Center at The City College is representative of its commitment and support of all levels of public education in New York City. Through its Nurturing the Children initiative, the Foundation supports organizations, programs and services that target young people, particularly in the areas of mentoring, safe places to learn and grow, and educational enhancement opportunities.

About The Colin Powell Center for Policy Studies

The Colin Powell Center for Policy Studies cultivates and expands the links between City College and the applied worlds of politics and policymaking, connecting the classic research and educational activities of the academy and the policy efforts of practitioners in New York City and the nation, and around the world. Unlike other think tanks, it takes a student-centric approach with students engaged in all aspects of its activities, including undertaking of research projects. Center programs provide unique resources to a diverse student body, support educational innovation on the part of CCNY faculty and promote research and discussion on issues of pressing policy concern. By bringing together practitioners and analysts with college students and the campus community, the Center fosters civil discussion and public engagement.

The Powell Center Advisory Council, which is chaired by General Powell, includes: former Secretaries of State Henry A. Kissinger, James A. Baker, III and Madeleine K. Albright; Nobel Peace Prize winner Elie Wiesel; Tom Brokaw, Robert Catell, Fulvio Dobrich, Harold M. Evans, Carly Fiorina, Vartan Gregorian, Richard N. Haass, Vernon E. Jordan, Jr., Lois Pope, Linda Powell, Jack Rudin, Stephen Schwarzman, Linda Kaplan Thaler, Barbara Walters, Gregory H. Williams, Charles B. Wang, Fareed Zakaria, Mort Zuckerman, and Mr.

CSOC.CBR.00029355

Sternberg.

About The City College of New York

For over 159 years, The City College of New York has provided low-cost, high-quality education for New Yorkers in a wide variety of disciplines. Over 13,000 students pursue undergraduate and graduate degrees in the College of Liberal Arts and Sciences, the School of Architecture, the School of Education, the Grove School of Engineering, the Center for Worker Education and the Sophie Davis School of Biomedical Education.

Subject: Sy Rangel meeting
2F0E4EFE1E2238DE8525729B00715830

I gave George a more detailed telephone run-down of Sy's meeting with Rangel this morning, but in short, we got a full hour with Rangel (about 15 mins on domestic/45 mins on trade) and the chemistry was terrific between the two men. At one point, Rangel said he wanted to clone Sy. Rep Kendrick Meek of FL happened to be there and joined our meeting.
On estate tax, Sy noted it needed to be fixed and the question was just when to do it. He made the case that it gets more expensive to wait. Rangel said Sy needs to talk to Reid.
On deferred comp, Sy said he was aware of this week's hearing (Rangel: "We're only having it to embarrass them.") and said he'd told Baucus of the bill's unintended consequences. But Sy lay some of the blame on Grassley, whom he called a populist. He then went through the arguments for not including the earnings on deferrals or the non-elective contributions. Though he told Rangel his staff had the background papers, he also gave a copy to Rangel himself.
On trade, we had a discussion on ILO standards after Rangel asked why we can't put them in trade agreements ("who's going to sue us, foreign govts?"). Sy had done his homework and explained the areas where our law falls short of the standards and said the US is not a country that signs on to standards it can't meet. Rangel seemed genuinely interested in the shortcomings in US law and we gave him a copy of the Stewart and Stewart memo.
Sy did a great job on the geopolitical importance of FTAs and how supporting the Peru and Colombia FTAs is vital to undercut Chavez's appeal in the region. Rangel said he never hears that argument.
Finally, Rangel made a big appeal for the private sector to step up and do more in terms of community investment, scholarships, health care recommendations, visa/essential worker issues, etc. Secretary Paulson has apparently started some conversations with a small group of CEOs on this score and Rangel said "I need what they're doing.".
Sy committed to call Jim Owens of Caterpillar (chair of BRT Trade Task Force) to see what the group might do. Rangel said, "So far I've done more to pass Peru and Colombia than the BRT."
Finally, Sy wants to use tomorrow's 12pm call re Dempsey follow-up to do some fly-in prep as well. In particular, he's concerned that his message on lifetime annuities is tougher to deliver if he doesn't know if/when Pomeroy's bill is going in, etc. He'll want to talk about that tomorrow. He also made a comment that it's not enough to go into a member's office and talk about mutuality, etc.
Regards, Leslie

Subject: Update on Deferred Comp for your meeting with Rangel

Sy:
We wanted to give you the latest information on deferred comp in preparation for your meeting with Charlie.
The House Ways and Means Committee will be holding a hearing on the deferred comp issue on Wednesday. No public announcement of witnesses has been released. However, word has leaked that the National Association of Manufacturers (NAM) will be a major witness. (NAM is the coordinator of the industry coalition opposed to the provision.)
Our latest intelligence is that both Rangel and McCrery still are of the mind to keep the entire deferred comp provision out of the minimum wage package. Some believe that the committee hearing on deferred comp on Wednesday will give the Ways and Means Committee cover because it may publicly address the points that the Senate provision affects thousands of middle

Maintain as Confidential: Contains Confidential and Proprietary Information

managers and not just those individuals who defer more than $1 million.
Senator Grassley recently stated at a press event that he thought his provision only affected those individuals who deferred more than a $1 million. Principal Financial has arranged for meetings with Iowa clients with the Senator, but to this point have been unsuccessful in gaining a commitment to delete the provision.
We understand that Chairman Baucus continues to say that he will push for the Senate version in conference; however, there is speculation that he may modify the provision (no details yet). You will be meeting with Baucus late Tuesday afternoon and we have suggested after we make our fly-in points with our agents, we would leave the room and let you have a private conversation with Max on this topic.
The major stumbling point in House and Senate negotiations on the minimum wage bill is the issue of where to draw the line on revenues to finance the small business tax credits. The Senate package is about $8.3 billion and the House is $1.3 billion. The Senate deferred comp provisions have been scored in the $800 million range. Rangel and McCrery both are advocating a small package which helps us. Grassley says that he needs to get closer to $8 billion to satisfy Senate Republicans - thus the log-jam.
FYI, last week we hand-delivered the Oleske deferred comp white papers to John Buckley, House Ways and Means Committee Chief Counsel, Mildeen Worrell, House Ways and Means Tax Counsel, and Jon Sheiner, tax aide to Rangel's personal office, as well as to Judy Miller, Senate Finance Professional Staff Member for Pensions (she handles this issue and both Mike Oleske and George have talked to her) and Russ Sullivan, Senate Finance Majority Staff Director. In addition, the white papers where hand-delivered to the following trades: ACLI, Chamber, BRT, NAM, American Benefits Council, the AALU and the ERISA Industry Council.
Good luck in your meeting with Charlie. Leslie will meet you at Rangel's office on Monday morning. If you need anything else my cell is 202-841-[illegible]

Subject AALU Visit to Capitol Hill

Sy -

Earlier this week, I attended the AALU Conference in Washington. One of the programs of the meeting is to send groups of agents to Capitol Hill to lobby for issues important to the AALU. I tagged along with a small agent group that visited with several members of Congress from New York State.

The three issues identified by AALU for our discussions were Deferred Compensation Legislation, Estate Tax Reform (the Tax Reform approach that the AALU supports is a $3.5 million exemption and a 45% tax rate) and Broad Tax Reform (inside build-up).

We went first to Congressman Jerrold Nadler's office (my Representative) where we met with John Doty, of Nadler's staff. He was not familiar with the three above issues. Although sympathetic, he stated that the Congressman would be taking guidance on these issues from Congressman Rangel.

We went next to meet with Senator Hillary Clinton, who, although not available for the meeting, stopped by briefly for a photo op. Her legislative assistant, Michael Szymanski, met with us and was more knowledgeable about the three issues on the AALU agenda. He stated that Senator Clinton's position on these issues was in synch with the AALU's. He believes that Estate Tax Reform will not be addressed "by this Congress", meaning not until 2009.

Our last visit was to Congressman Rangel, who stopped by briefly to meet us. When I mentioned that I

Maintain as Confidential: Contains Confidential and Proprietary Information

was from New York Life, the Congressman told me to tell you he's working on your trade package. We spent more than an hour discussing insurance and tax issues with Congressman Rangel's staffer, Jonathan Sheiner. He said that:

(1) Don't worry about inside build-up,
(2) Estate tax reform will not be done until 2009 and
(3) Deferred Compensation issues will be addressed in a more focused way than was done with the recent proposal.

Mel

Cc: Joseph Gilmour, sheila_davidson, leslie_griffin, sandy_kristoff, william_mattox, ronald_lefrancois, jonathan_paone Show Details

Sy, last night, Jon Paone attended an event for Charlie Rangel and had an opportunity to say hello and extend greetings from you. Jon sent the note below that I wanted to bring to your attention:

Attended a Rangel fund-raiser last night.
I congratulated Charlie on his trade agreement with the WH. Charlie then told me that Sy needs to keep his end of the bargain and lobby just as hard to win approval for Korea and Colombia FTAs. Charlie then said that now the BRT needs to live up to its commitment by supporting education improvements (presumably increased funding). He pointedly asked me to deliver that message to Sy and the BRT. I told him I would and that Sy would be at the BRT meeting next week. Charlie said he may invite himself to that BRT meeting.
During his remarks to the crowd, most of his comments were about trade:
- He does not want a level playing field, but rather he wants an unfair advantage for US companies so as to grow more jobs here.
- He hates the reliance on bringing in foreigners to take high skill jobs as we could teach kids in Harlem to do those jobs.
- Trade cannot just benefit shareholders of multinational corps, but must also help ordinary Americans on Lenox Avenue in Harlem. It is the responsibility of MNCs to make this case in their deeds and in their words.
Jon

BRT is already working to schedule a meeting with Charlie next Wednesday afternoon for you, Terry McGraw, Jim Owens, and Art Ryan of Prudential. I will ask Jon to go back to Charlie's staffer Walter to inform him of the pending BRT request and seek his support for the meeting. Leslie will be sure BRT is aware of the points Charlie made last night and the role we're playing in reinforcing the meeting request. Separately, you should also know that Joe Gilmour is attending the US-China Business Council board meeting on Wednesday morning and Rangel and McCrery are due to address the group at 9:00 a.m. on US-China trade issues.

Thank you.

Rep. Shelley Berkley (D-NV) - George and I tag-teamed this event. He was there the first half hour. I was there the next half hour . Both of us told the Congresswoman we were looking forward to the fly-in. I spent time with the COS, Legislative Director and the Tax aide. All were familiar with Rep. Tubbs-Jones GLI bill which the Congresswoman has cosponsored.
Senator John Sununu (R-NH) - The Senator is very concerned about his re-election. He used former Rep. Jeb Bradley's upset last year as an example. Unsolicited, he mentioned that he had talked to Chairman Dodd about having a hearing on OFC "sometime this year."
Rep. Chip Pickering R-MS) - The Congressman talked about how different it was to be in the minority. But, interestingly, has a close working relationship with Chairman Dingell (D-MI) and Rep. Jane Harman (D-CA) constantly calls about issues.
Rep. Charlie Rangel (D-NY) - George introduced the Chairman at this ACLI hosted event and thanked him for his help in defeating the Senate deferred compensation provision. Rangel was asked what he thought about tax reform and revenues needed to pay for AMT, expiring provisions, Medicaid, SCHIP, etc. Rangel responded that he would look to increasing the tax rates on the highest 1 million taxpayers to give AMT and middle class relief for 35 million taxpayers. He noted about $356 billion in fraud and loophole closers. He said that he had instructed staff to review many outdated provisions in the tax code, and, in particular, in the non-profit area. He noted that" no one was talking about going after inside build-up or annuities."

Chris,

Thanks for discussing the Rangel Center with Sy. I think we should do something for Rangel for the reasons stated by Sheila. Additionally, Rangel has been a friend of the company for 25+ years and yes we have contributed to his political causes. But, we have also benefited from his position, policy decisions and legislation.

I will wait to receive something or hear from the Rangel people and I would like to make one more run at Sy on this issue.

Chris, can you find out what The Rangel's Centers total funding is currently and who are his biggest donors and how much they gave?

Thanks.

Hello Sheila. I hope you are having a good week.
I spoke with Steve about the Rangel Policy Center at City University. As I understand it, Congressman Rangle was apparently with George Nichols this week and mentioned it to him.
In speaking with Peter about this to see if there was any history, I came to learn that about a year ago, before the Powell proposal began working its way through the system, the Foundation team did respond to an inquiry by the Rangel Center for support. They took it to Sy and he declined it. Peter reports that at the time Sy felt we had done enough for Congressman Rangel. Let us know if you think we should reopen the conversation at this point. The $10M donation to the Powell Policy Center represents an awfully large commitment to City University. It may be that we can use that as a reason to hold off for the time being. I will take no action if I don't hear from you.

The Company You Keep®

July 31, 2007

The Honorable Charles Rangel, Chairman
Committee on Ways and Means
United States House of Representatives
Washington, DC 20515

Dear Mr. Chairman:

I applaud your leadership in championing the May 10 bipartisan agreement that paves the way for Congressional advancement of the U.S. trade agenda. As you and I have discussed, the pending free trade agreements are not only commercially significant, they are a vital tool for sustaining American geopolitical influence.

The United States and Latin America have shared interests in broadening and deepening hemispheric relations. Trade agreements that help shore up market-oriented, democratic voices in this region are essential to fostering U.S. national security interests.

In particular, the agreement with Colombia is one of the most important facing the Congress. Our Western Hemisphere neighborhood is incredibly fragile and we should not turn our backs on this friend and ally. While concerns about violence in Colombia must be addressed, I urge you to take into account the progress already made in this area and the continued commitments made by President Uribe to strengthen the rule of law. Passage of this agreement enhances Uribe's chances for success. On the other hand, failure to pass the Colombia agreement would undermine American credibility, harm the credibility of Uribe among his peers, and send the wrong message to other friends in the region. The FTA with Colombia offers other important benefits to the United States, moving the trade relationship with Colombia from one-way preferences to reciprocity. For example, eighty percent of U.S. consumer and industrial products and more than two-thirds of current U.S. farm exports will enter Colombia duty-free immediately under the terms of the agreement.

You have spoken eloquently to me on many occasions of your desire to create a new bipartisan consensus to advance America's trade agenda. The three Latin American agreements to be considered by the Congress are the best opportunity for the United States to demonstrate its commitment to this region, secure new economic benefits for American business, workers and farmers and remain a leader in the global economy. With 95 percent of the world's consumers living outside of the United States, we cannot afford to sit on the sidelines or to disengage from the world. I hope Congress will not take the politically expedient shortsighted approach at this critical juncture in our trade policy.

I assure you I will do all I can to support the vision you expressed in your May 10 announcement, and I look forward to continuing to work closely with you on these important trade initiatives.

Sincerely,

I know where your heart is —
Try your Best

OPERATING REVENUE	11,895	12,992
ASSETS UNDER MANAGEMENT	261,528	280,046
PROFITABILITY		
NET INCOME†	2,298	1,497
NET INCOME EXCLUDING NET INVESTMENT GAINS†	1,093	1,301
OPERATING EARNINGS	1,090	1,275
FINANCIAL POSITION		
EQUITY	18,696	20,199
SURPLUS AND ASSET VALUATION RESERVES	13,859	14,680

†**SPECIAL NOTE ON NET INCOME:** The Company's GAAP net income totaled $1.5 billion in 2007, compared with $2.3 billion in 2006, when a one-time extraordinary gain skewed the results. The 2006 results included a $1 billion gain from the Company's investment in Express Scripts, Inc. ("ESI"), largely driven by a one-time change in accounting methodology. Adjusted for that one-time gain from ESI, and excluding other net investment gains, GAAP net income in 2007 increased 19 percent to $1.3 billion. For a detailed discussion of ESI, see Note 5 on page 37. For a detailed reconciliation of the Company's GAAP performance measures to its non-GAAP performance measures, see page 39.

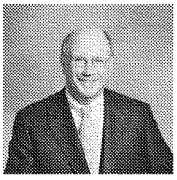
TO OUR POLICYHOLDERS



SY STERNBERG
Chairman of the Board and Chief Executive Officer

TED MATHAS
President and Chief Operating Officer

New York Life realized exceptional gains in 2007, in terms of both financial performance for the year and the Company's long-term financial strength.

Operating revenues grew to $13 billion in 2007, a nine percent increase over 2006. For the second consecutive year, operating earnings grew by more than 16 percent, totaling nearly $1.3 billion in 2007.

Despite the onset of significant turbulence in the financial markets, New York Life's financial strength has never been greater. In 2007, we added more than $800 million to our surplus and asset valuation reserves, which now total nearly $14.7 billion. These funds, which are a key indicator of long-term strength and stability, support the Company's long-term financial strength and are also available to pay future claims and finance growth.

More than a year before the credit crisis emerged, New York Life's investment management team, led by Chief Investment Officer Gary Wendlandt, began closely monitoring what they believed to be an unfavorable market environment. Observing a trend toward weaker underwriting standards for all forms of debt, as well as investment returns that were not commensurate with the risk, they recommended a strategy that called for temporarily allocating a larger portion of the Company's investments into safe U.S. Treasury bonds.

By adhering to our time-proven principles of conservative financial stewardship, the Company avoided the large losses and write-downs suffered by other institutions. Not only have we maintained a sound investment portfolio, but New York Life's strong balance sheet and liquidity (now over $11 billion) also enable us to take advantage of opportunities in the market when a better investment climate returns – a double win for our policyholders.

Given the importance of this strategy, we have asked Gary Wendlandt to report to you on the steps we took to safeguard the Company's financial strength, and the criteria we use to make prudent investment decisions. His analysis begins on page 6 of this *Report*.

The year was also notable for significant sales gains across all lines of business.

New York Life's 2007 combined domestic and international insurance sales grew to more than $3 billion, a 15 percent increase over 2006, and a remarkable follow-up to the 26 percent 2006 year-over-year sales gain.

In the United States, New York Life posted new life insurance sales totaling over $1.2 billion, generated by our first-in-class team of more than 10,000 New York Life career agents and a network of specialized advanced market professionals. Our newest life insurance product, Custom Whole Life, which gives policyholders the ability to select how long they will be required to pay premiums, set sales records as one of the most successful product launches in Company history.

New York Life is the nation's number one seller of Guaranteed Lifetime Income products,* income annuities that help people lock in a secure stream of income for their retirement. Sales momentum in 2007 continued to be very strong, growing 25 percent to $796 million.

Our relationship with AARP, the nation's largest membership organization, has helped New York Life become the number one direct marketer of life insurance in the United States.† We now insure more than 1.5 million AARP members. This program achieved another important milestone in 2007, declaring its first dividend to be paid in 2008. New York Life also expanded its relationship with AARP in 2007 with the launch of the AARP Lifetime Income Program. Sales of these income annuities reached almost $100 million in the first year of operation.

Our international business had a strong year, with sales up 25 percent over 2006, reflecting double-digit growth in Mexico, China, India, Korea and Thailand. Our two largest markets, India and Mexico, recorded significant growth, with 69 percent and 22 percent increases in sales, respectively. We see substantial room for business expansion throughout our international markets for many years to come. In India, for example, we are tailoring products to meet the needs of millions of underserved low-income consumers.

New York Life Investment Management ("NYLIM") sales totaled more than $29 billion, with very strong growth in our Retail and Retirement Plan Services lines of business. Retirement Plan Services, which oversees more than 2,100 full-service retirement plans for corporate and union clients, had its best sales year ever, and continues to be top ranked for customer service excellence.

We reluctantly bade farewell to two distinguished members of our Board of Directors who retired from New York Life in 2007 following more than a decade of service. Les McCraw, Jr., a former chairman and chief executive officer of Fluor Corporation, joined the New York Life Board of Directors in 1995. He has served as

CSOC.CBR.00031624

chairman of the Board's Insurance and Operations Committee since 2002 and has been instrumental in shaping the Company's business planning and new business acquisition strategies.

2007 also marked the final chapter in the brilliant New York Life career of former President Fred Sievert, who retired from the Company in June. Fred had a profound influence, not just on the strategic direction of the business, but on the culture and character of the Company. His sound judgment and deep sense of humanity will be missed.

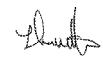
Elected as a new director in 2007, Chief Investment Officer and NYLIM Chairman Gary Wendlandt was named vice chairman of the Board. Gary's stewardship of the Company's $140 billion investment portfolio has been a key factor in maintaining New York Life's long tradition of financial strength and stability. He is a valuable and timely addition to the Board as we navigate the choppy waters of the current world economy.

Throughout this *Report* you will see several references to the principles that have, from the beginning, guided the management of our business. One of those principles bears repeating here: The number one reason for choosing a life insurance company is financial strength. And that has never been more true than today.

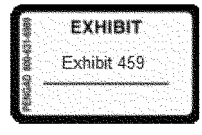
We believe it is worth noting that, in August 2007, just as the U.S. credit markets were experiencing their most severe deterioration in a decade, Standard & Poor's announced its upgrade of New York Life's financial strength rating to AAA, their highest possible ranking. With this upgrade, New York Life is now top-rated by all four of the major ratings agencies: Standard & Poor's, Moody's Investors Service, Fitch Ratings and A.M. Best. Among the more than 1,000 life insurance companies in the United States, only three can now claim this unanimous vote of confidence.

Even as the economy and the financial markets rise and fall in their perpetual cycles, New York Life's financial strength endures. In both good times and bad, we will be here, stable and sound, to honor the promises we make to you – today, tomorrow and for decades to come.

SY STERNBERG
Chairman of the Board and Chief Executive Officer



TED MATHAS
President and Chief Operating Officer



A Special Message for Our Policyholders

I am pleased to inform you that, shortly before this *Report* went to press, the Board of Directors unanimously voted to name President and Chief Operating Officer Ted Mathas as Chief Executive Officer-elect of New York Life Insurance Company.

Upon my retirement on June 30, 2008, Ted will assume the title of President and CEO, and I will remain Chairman of the Board of Directors in a non-executive capacity for a transition period.

As we looked ahead toward my scheduled retirement at age 65, the Board had time to plan – and I had time to assist in – an orderly and seamless transition. Ted Mathas is a superb choice for CEO. Since joining New York Life in 1995, Ted has contributed to virtually all areas of the Company, including our life and annuity products, distribution systems and services, and our international operations. As Chief Operating Officer, Ted led us to new records in 2007 in nearly every business area. New York Life is fortunate to have a leader of Ted's energy, intellect and vision taking the reins as chief executive in July.

As the 18th chief executive in the Company's 163-year history, Ted Mathas will carry forward New York Life's tradition of strong executive stewardship. He will be supported by a senior management group whose leadership has helped guide New York Life through more than a decade of sound, sustained growth. With their demonstrated commitment to serving the best interests of our policyholders, this superb team, along with the entire New York Life family of employees, agents and partners, will stand ready to serve you in the decades ahead.

SY STERNBERG

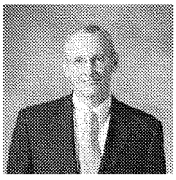
Investing for Strength and Safety



A Special Report
by Gary Wendlandt,
Vice Chairman of
the Board and
Chief Investment Officer

2007 was a year of considerable turmoil in the credit markets. What began with an increase in defaults in the subprime residential mortgage market has now developed into a full-scale credit crisis, impacting financial institutions around the globe. At New York Life, we have thus far been able to sidestep the major damage wrought by this crisis. In contrast to the very sizable investment losses and write-downs reported by many other financial institutions, we had one of our lowest levels of credit losses ever, allowing us to again report record levels of capital and surplus for 2007. The purpose of this report is to describe our investment process and the resulting actions we took long before the credit crisis roiled the world's financial markets.

1937

Our $140 billion investment portfolio is very well diversified and largely comprises fixed income assets like bonds and mortgage loans. For several years leading up to the summer of 2007, the markets for all types of fixed income investments – at least on the surface – appeared to be exceptionally robust and safe. Defaults were remarkably low. Even below investment grade bonds (those issued by companies judged to have a lower level of creditworthiness than investment grade companies) had a default rate of less than 1.5 percent, a ratio that has historically averaged around five percent. (Later, it would become evident that many companies that normally might have defaulted were instead obtaining fresh infusions of cash, thanks to the easy availability of credit.)

As with most things in life, when things seem too good to be true, there's usually a problem lurking. The credit markets, like the stock market, go through periodic bull and bear cycles. Investor optimism feeds upon itself, fueling a bull market that can, in the blink of an eye, beat a hasty retreat to pessimism and fear.

A bullish credit market is characterized by overly aggressive lending practices. And, in fact, over the last few years, loan issuance – for real estate, home equity, consumer credit, leveraged buyout activity, and so on – skyrocketed, while underwriting standards for approving loans weakened substantially. However, in the exceedingly opti-

About the illustrations: *The New York Life advertisements from the past 70 years that accompany this article serve as a reminder that, in good times and bad – throughout economic recessions, depressions and market tremors – New York Life has always stood strong and secure, ready to protect our policyholders.*

mistic climate that then prevailed, the market turned a blind eye to the obvious dangers of these lending activities. Worse yet, due to the optimistic climate, investors were – in our judgment – demanding too little payment for the risks they were assuming.

"New York Life invests for the long term, always mindful of providing safety and security for our policyholders."

Although these weak lending practices were not confined to sub-prime mortgages, the cracks first started to show there, and sub-prime loans, therefore, served as the catalyst for the broader credit crisis that is now unfolding. Between 2002 and 2006, the issuance of sub-prime residential real estate loans grew more than fourfold. In the rush to originate loans, proper underwriting procedures were often sidestepped, meaning many loans were funded without income and asset verification or other critical documentation. Other lending areas had similar experiences.

These bad lending practices were exacerbated by the rise of loan securitization – the repackaging of loans into "trading" vehicles, such as mortgage-backed securities and collateralized debt obligations ("CDOs"). Historically, lenders, such as banks, retained the loans they originated. In recent years, it has become common practice for lenders to quickly package and resell loans in the securitization market, essentially leaving them with no skin in the game and little reason to pay careful attention to the quality of the loans they were originating.

Credit market cycles run a predictable course, beginning with irrational optimism and ending with large defaults and write-offs. New York Life has, since its founding, witnessed many of these cycles, and as a result of this long experience, we know better than to get caught up in the frenzy. Rather than accept outsized risks coupled with inadequate rewards for a particular investment, we can choose to move to the sidelines. Our rationale is simple: What you don't own can't hurt you.

Based on our belief that the markets were acting irrationally, in February 2007, New York Life management approved a proposal to divert a portion of the Company's investable cash flow from our normal credit market investments into U.S. Treasurys. U.S. Treasurys are not only entirely safe, but offer excellent liquidity, positioning us to take advantage of attractive investment opportunities when risk/reward relationships improve.

By August 2007, the credit market problems we had feared were front page news. The crisis has not been confined to the housing market, as the unsound lending practices were considerably more widespread. For example, as credit has tightened, similar problems are emerging in commercial real estate, home equity, credit card and leveraged buyout lending.

Financial institutions around the globe recorded credit-related losses and write-downs exceeding $100 billion during the second half of 2007. Many observers expect this number to more than double by the end of 2008.

"Each year, New York Life invests approximately $20 billion on behalf of our policyholders."

1968

Fortunately for our policyholders, New York Life is well positioned for the current environment. Consider the composition of our investment portfolio: Only seven percent of the Company's cash and invested assets is placed in residential mortgage loans and related securities. Less than one-half of one percent of our total assets is sub-prime mortgage-backed securities. Of these securities, the overwhelming majority are rated AAA and have fixed interest rates. (Adjustable rate mortgages has been the sector with most of the problems.) Our portfolio's exposure to hedge funds is virtually non-existent. And our short-term holdings have not been affected by the problems encountered in the commercial paper market.

"By August 2007, the credit market problems we had feared were front page news."

Each year, New York Life invests approximately $20 billion on behalf of our policyholders. Our investment process is based upon careful risk-return analysis. There are a number of other guiding principles and disciplines we believe form the basis for sound investment. Here are some of the most important ones, including several that may be useful to you in your own personal investment planning:

We maintain diversification. A diversified portfolio, across a spectrum of asset classes and issuers, protects us against problems in specific areas.

We conduct our own research. We don't take any third-party endorsements or ratings for granted. We only take risks we fully understand and underwrite ourselves. Complicated investment structures often serve to obfuscate risk.

We insist on getting paid for taking risk. Risk is an inherent part of the investment process. The risk premium we are paid must be commensurate with that risk.

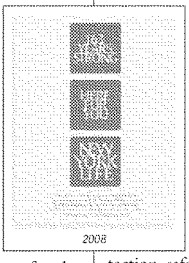
We take a long-term view. We are not traders. We look for investments that have a margin of safety and can stand the test of time.

We maintain ample liquidity. The benefits that we promise to our policyholders must be paid in cash, irrespective of the market environment.

We don't blindly follow the crowd. History has proven that jumping on an investment bandwagon yields, at best, mediocre results. More often than not, it results in significant pain.

New York Life Insurance Company is the largest mutual life insurance company in the United States.* As a mutual company, New York Life invests for the long term, always mindful of providing safety and security for our policyholders. We do not have shareholders who might want us to maximize short-term profit, an objective that carries increased risk and greater potential for significant losses.

1991



2008

"NEW YORK LIFE'S EXCEPTIONALLY STRONG BALANCE SHEET IS THE PRODUCT OF A DISCIPLINED INVESTMENT PROCESS, CONSERVATIVE PORTFOLIO CONSTRUCTION AND RIGOROUS RISK CONTROLS."

New York Life's exceptionally strong balance sheet is the product of a disciplined investment process, conservative portfolio construction and rigorous risk controls. While many financial institutions are continuing to experience losses, New York Life has earned the highest possible ratings for financial strength from all four of the major credit rating agencies.

Our pledge to you has never been more relevant: For financial protection, safety and peace of mind, you can place your trust in "The Company You Keep."

Life and Annuity 2007 Business Update

Through a comprehensive portfolio of life insurance and annuity products, we help clients provide their families with income protection during their working years, while also offering innovative ways to grow their wealth. During clients' retirement years, many of our products offer the security of an income stream, while others provide the means to leave a lasting legacy.

Our product lineup comprises fixed and variable insurance and annuity products, including whole life, universal life, variable universal life and term insurance; fixed and variable deferred annuities; and income annuities. Through innovative features and a wide range of riders, these products can be customized to meet individual needs.

Another year of solid growth Building on the strong gains posted in 2006, nearly all measures of current performance for Life and Annuity were again positive in 2007. Total insurance sales – comprising life insurance and Guaranteed Lifetime Income ("GLI") insurance – advanced eight percent over 2006. Life insurance sales totaled $1.25 billion, while GLI sales increased 25 percent year over year to $796 million, ranking New York Life number one in fixed immediate annuity market share.* Sales of investment annuities through our Agency channel were up 10 percent over 2006, while our deferred annuity sales through banks outpaced the industry, which allowed us to move up to the number two market share position.† All told, operating earnings from Life and Annuity grew nine percent year over year.

The industry's most professional, productive agents For more than a century, our nationwide network of agents has been at the core of New York Life's success. With offices in cities and towns across America, New York Life's team of 10,000 professional agents helps clients identify what is most important to them and then design effective solutions to achieve their goals.

Our agents are supported by career-long training, professional development programs and state-of-the-art technology. Perhaps nowhere is our industry leadership more evident than in our dominance of the Million Dollar Round Table ("MDRT"). Qualifying for MDRT ranks an

agent among the top one percent of life insurance professionals in the world, and MDRT membership is a widely recognized sign of superior technical knowledge, client service and ethical standards. For the 53rd consecutive year, New York Life led all U.S. insurers in MDRT membership, with a record-high 2,453 agent members.

In 2007, Rich Schwartz *(top, right)* of Indiana and Jim Adkins, Jr. *(bottom, right)* of our Greater Washington office achieved the top honors we bestow on our agents – the Council Presidency and the Council Vice Presidency, respectively. When Rich joined New York Life in 2000, he had already built a successful career at another insurer, but he was attracted by "what New York Life brings to the table – the humanity, the values, and always doing right by our clients." Jim, meanwhile, has been part of the New York Life family almost since birth; his father headed New York Life's Greater Washington General Office for nearly three decades. While they took different paths to the top of New York Life's sales force, Rich and Jim share a passion for serving their clients with in-depth knowledge and integrity.

Customer service excellence In addition to the personal service provided by our agents, our policyholders can also rely on the professionals in our service centers throughout the country for customer service that is second to none. For the eighth consecutive year, our bank distribution annuities service team captured the DALBAR Service Award, a mark of distinction in the financial services industry. And for the fifth year running the DALBAR award also went to our agent distribution variable products service center. On the Internet, customers can process fund allocation changes, transfers, cash loans and address changes through New York Life's highly regarded Virtual Service Center at www.newyorklife.com.

Investment Management 2007 Business Update

New York Life Investment Management LLC ("NYLIM") ranks among the largest asset management firms in the United States.* Through its multiple boutique investment structure, NYLIM delivers investment performance through an array of products designed for both institutional and retail clients. And with its MainStay Investments brand, NYLIM distributes mutual funds and wrap accounts through agents and advisors to retail investors.

NYLIM is a leading provider of retirement plans for corporations, multi-employer trusts and individuals, and is recognized as one of the nation's top providers of guaranteed products to both the qualified and non-qualified markets. Together with its affiliates and over 1,500 employees, NYLIM manages over $249 billion in assets (as of December 31, 2007), up more than $14 billion from the previous year.

NYLIM's team of investment professionals focuses on virtually every sector of the capital markets.

2007 was another year of record success. With over $29.2 billion in gross sales, NYLIM exceeded its 2006 record by four percent. NYLIM's operating revenue exceeded $1.1 billion. Operating earnings were up 28 percent to $219 million – with all lines of NYLIM's business contributing.

The following summarizes some of the key accomplishments within NYLIM's business lines.

Guaranteed Products NYLIM's Guaranteed Products business serves the needs of institutional investors seeking stable returns and superior credit quality.

Guaranteed Products achieved record operating earnings of $132 million, with over $7.5 billion in sales. In addition, Guaranteed Products had success with selective credit issuance, and posted record operating revenues and earnings by Madison Capital Funding.

Institutional NYLIM's Institutional business manages assets for retirement plans, corporations, municipalities, endowments and foundations.

The Institutional line of business achieved $180 million in operating revenue for 2007, up from $135 million in the previous year. This increase was due in large part to the full-year impact of the acquisition (in June 2006) of the Institutional Capital Corporation ("ICAP"), a leading large-cap value equity boutique.

Retail Investments The Retail Markets business exceeded last year's sales record by 15 percent, increased its presence and won new business on key platforms such as Morgan Stanley, Smith Barney, Wachovia and LPL Financial.

For the year, MainStay's assets under management grew by six percent, exceeding $37 billion.

MainStay ICAP Select Equity and MainStay ICAP International Funds were named "Top Fund Analyst Picks" in 2007 by Morningstar in the Large Value and Foreign Large Value categories, respectively. In selecting Analyst Picks, Morningstar not only takes long-term performance into consideration, but also looks for other attributes that will be key to a fund's future success: sensible strategies, successful management, good stewardship and low costs.

Retirement Plan Services ("RPS") RPS oversees more than 2,100 comprehensive defined contribution, defined benefit and deferred compensation plans.

RPS achieved $3.7 billion in new sales for 2007, and ended the year with $151 million in operating revenue -- a 16 percent increase over 2006.

RPS has consistently been recognized for superior client service, and 2007 was no exception. RPS earned eight first-place rankings in the Boston Research Group's 13 key service categories, with all eight categories earning 100 percent satisfaction scores. RPS also led PLANSPONSOR magazine's 2007 DC Survey with 42 "Best in Class" awards.

Wholesale At the Wholesale level, NYLIM manages the investment portfolio of New York Life Insurance Company and the assets of other financial institutions.

In 2007, the Wholesale business successfully deployed $16 billion into a variety of asset classes for New York Life's business units. Wholesale achieved record gross sales of $3.3 billion, grew third-party assets under management to over $9.7 billion and earned $35 million in performance fees within its general and third-party accounts.

New York Life Capital Partners ("NYLCAP") closed its second mezzanine fund with $800 million of total capital commitments.

NYLIM Real Estate Group ("REG") sales totaled $224 million in various funds and co-investments.

* *New York Life Investment Management LLC is ranked number 25 in worldwide assets under management. Source:* Pension & Investment, *May 28, 2007.*

International 2007 Business Update

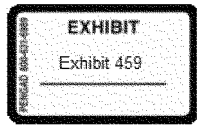
New York Life International is the global arm of the Company, with operations in Argentina, China, Hong Kong, India, Mexico, South Korea, Taiwan and Thailand. In July 2007, New York Life sold its equity interest in the Philippines to its joint venture partner, Allied Banking Corporation, and certain of Allied Banking Corporation's shareholders.

New York Life International's share of insurance sales in our eight international operations totaled over $650 million, a 25 percent increase over the prior year. Our international business now contributes 22 percent of New York Life's worldwide insurance sales.

While our primary channel of distribution is through our career agency system, comprising more than 40,000 registered agents, we pursue a multi-distribution strategy using additional channels such as bancassurance, corporate agencies and telemarketing.

Among the year's highlights:

- With more than 67 years of experience in Mexico, Seguros Monterrey New York Life had an outstanding year, with insurance sales topping $212 million, an increase of 22 percent over 2006. Seguros Monterrey New York Life won the prestigious State of Queretaro Quality Award in 2007, another indication of the Company's commitment to quality customer service. Ours is the only insurance company to receive the award and the only company to have earned the award three times.
- Max New York Life, our Indian joint venture with Max India Ltd., continued its strong growth with a 69 percent increase in life insurance sales in 2007. Max New York Life now has nearly 28,000 licensed agents and has expanded its network of offices to 192 nationwide. To date, more than 2 million individual life policies have been sold by Max New York Life. In light of the significant growth potential in the Indian life insurance market, Max New York Life has embarked on a strategic initiative that will further expand its distribution reach, accelerate the introduction of new products and strengthen the brand.



- In China, Haier New York Life, our joint venture with Haier Group, posted a 44 percent increase in sales as we entered six new cities, including the provincial capital of Hubei.
- In Thailand, our joint venture Siam Commercial New York Life ("SCNYL") has an exclusive distribution relationship with our banking partner Siam Commercial Bank. SCNYL achieved 22 percent sales growth in 2007. The impressive results solidified our position as one of the top three life insurance companies in the Thai insurance industry in terms of new business. SCNYL also maintained the market leader position in bancassurance for the fourth consecutive year in a highly competitive environment.
- In Korea, there was robust insurance sales growth of 35 percent over 2006.

New York Life International remains committed to providing philanthropic support to charities and nonprofits in all of the markets in which we do business. The focus of our efforts is on helping organizations that provide services to children. Our India operation provides ongoing support to the SOS Children's Villages, a national orphanage, by donating a portion of the revenue that it receives from the sales of certain products. In Taiwan, our operation continued its multi-year partnership with the Maria Social Welfare Foundation, providing grants and other programs to help this agency in its service to children. In Korea, we aim to make a difference in the lives of underprivileged children and their families through both grants and volunteer support. And in Mexico, more than 10,000 children have benefited from our support of EDUCA, a nonprofit foundation that works to improve the education of children in low-income families.

Our growing operations in Asia and Latin America offer significant and profitable growth opportunities. In many of these markets, only a small percentage of the population has adequate life insurance protection. By leveraging our vast experience as a leader in the U.S. life insurance market, we are well positioned to deliver the products, services and peace of mind people in these emerging markets are seeking – just as we've been doing at home for more than 160 years.

Special Markets 2007 Business Update

Special Markets comprises four businesses: the AARP Life Insurance Program, which markets group life insurance products to AARP members; the AARP Lifetime Income Program, which markets guaranteed lifetime income annuities to AARP members; Long-Term Care insurance sold through our agents; and the Group Membership Association Division, which sells life insurance and related products to members of professional associations.

AARP Life Insurance Program Through an exclusive marketing arrangement with AARP, New York Life offers life insurance to the association's 39 million members. In 2007, the AARP Life Insurance Program strengthened its leading market share position as the largest direct response marketer of life insurance,* establishing new records in sales, revenue and earnings, and ending the year insuring more than 1.5 million AARP members.

Equally as impressive, we paid out nearly $300 million in life claims in 2007, reaching $1.3 billion paid since the program began in 1994. The AARP Life Insurance Program reached another important milestone: As a result of favorable financial experience, the program's first dividend was declared and will be paid in 2008.

AARP Lifetime Income Program Through an exclusive marketing arrangement with AARP, New York Life offers guaranteed lifetime income annuities to the AARP membership.† AARP's endorsement of this program recognizes New York Life's financial strength and superior reputation as a provider of long-term insurance guarantees. In its first full year of operation, the AARP Lifetime Income Program achieved almost $100 million in sales, demonstrating the potential to distribute guaranteed lifetime income annuities through direct response channels.

Both the AARP Life Insurance and AARP Lifetime Income Programs help AARP members secure their financial futures through best-in-class products and superior customer service.

* *Survey source: LIMRA International, Direct Response Life Insurance Sales, Fourth Quarter YTD 2007 results, SEC filings and annual statements.*

† *New York Life's guaranteed lifetime income annuities are issued by New York Life Insurance and Annuity Company ("NYLIAC"), a wholly owned subsidiary of New York Life Insurance Company.*

Long-Term Care Our Long-Term Care business achieved record sales and revenue, with double-digit growth in each indicator. Sales grew 14 percent, compared to marketplace growth of three percent, especially notable as the industry ended a four-year run of sales declines. By virtue of this performance, we moved up one slot to the number six market share position.*

Continuing our commitment of integrity and financial stability to our policyholders, we paid a dividend in 2007 for the third consecutive year, and early in 2008 declared a fourth consecutive dividend. We remain one of the few key players in the individual long-term care insurance market that has not raised the rates of in-force customers.

Group Membership Association Our Group Membership Association Division provides life, health and disability income insurance programs to many of the nation's most prominent professional, military, educational and alumni groups. In 2007, we sustained and strengthened our leadership position in the association industry, despite a sluggish new-case market environment. Operating revenue remains strong, and we now insure more than 1 million individuals in our portfolio of business.

Our success in this mature, niche market is due to our continuous development of innovative products tailored to the association marketplace and solid, long-standing relationships with our distribution partners.

* *Survey source: LIMRA International, Individual Long-term Care Sales, Fourth Quarter YTD 2007 results. Adjusted for level pay plus 10 percent of limited pay premium.*

2007 INVESTMENT REVIEW

New York Life Insurance Company and Its Domestic Insurance Subsidiaries

The following investment review presents information for New York Life Insurance Company and its domestic insurance subsidiaries, New York Life Insurance and Annuity Corporation and NYLIFE Insurance Company of Arizona, assets of which represent most of the invested assets of the Company. The cash and invested asset information below is presented on a statutory accounting basis. New York Life's investment in its international insurance affiliates and domestic non-insurance affiliates is included in the Equities line of the table below. New York Life International, the largest affiliate in asset size, had cash and invested assets of $6 billion. Cash and invested assets are presented on a GAAP basis on the balance sheet on page 27. A reconciliation of cash and invested assets from a GAAP basis to a statutory basis is presented on page 38.

Cash and Invested Assets

On the strength of New York Life's U.S. insurance operations, during 2007, cash and invested assets grew by more than $10 billion to $149 billion. New York Life and its domestic insurance subsidiaries maintained a well-diversified investment portfolio in 2007.

CASH AND INVESTED ASSETS*

(DOLLARS IN MILLIONS)	DECEMBER 31, 2006		DECEMBER 31, 2007

† *Includes cash primarily received on financing transactions of $4,012 million and $6,382 million for 2006 and 2007, respectively.*

Fixed Income Assets

The fixed income portfolio continues to be dominated by high-quality investments, with 92 percent being investment grade. Realizing that the market was not pricing certain fixed income securities properly during 2007, we directed a portion of our investable cash to U.S. Treasurys and other highly rated public bonds. Consequently, the proportion of fixed income assets rated highest-quality ("NAIC 1") increased two percentage points to represent 69 percent of total fixed income assets. The fixed income portfolio remains well diversified across the broad industry spectrum and comprises securities issued by more than 2,300 individual issuers. As of the end of 2007, the Bank and Finance category represented 13 percent of total fixed income assets, a decline of two percentage points from a year ago, while U.S. Treasurys and agencies increased by the same amount and represented seven percent.

The fixed income portfolio is managed to limit exposure to individual issuers according to credit quality and other factors. No single corporate exposure was greater than $290 million. The 10 largest holdings in the portfolio represented less than 1.5 percent of cash and invested assets.

* *Includes $38,216 million of assets related to New York Life Insurance and Annuity Corporation.*

Non-Agency Residential Securities

As of year-end 2007, New York Life and its domestic insurance subsidiaries owned $8 billion in non-agency residential securities, representing 5.4 percent of cash and invested assets. The mortgage loans underlying these securities were held predominantly by prime borrowers. The overwhelming majority of these securities were rated AAA and are collateralized by fixed-rate mortgage loans. Only $407 million, or less than 0.3 percent of cash and invested assets, are collateralized by sub-prime mortgage loans.

NON-AGENCY RESIDENTIAL SECURITIES BY TYPE AND RATING CATEGORY*†

(DOLLARS IN MILLIONS)				DECEMBER 31, 2007	
	AAA	AA	A	BBB OR LOWER	TOTAL
PRIME	$5,901	$187	$39	$14	$6,141
MID-PRIME	1,371	88	34	8	1,501
SUB-PRIME	335	57	15	–	407
TOTAL	$7,607	$332	$88	$22	$8,049

* *Includes $3,685 million of assets related to New York Life Insurance and Annuity Corporation.*

† *Security types are categorized using rating agency classifications based upon weighted-average credit scores of borrowers in the underlying mortgage loan pools.*

Mortgage Loans

As of year-end 2007, the $14,199 million of mortgage loans represented $12,704 million of loans on commercial real estate properties and $1,495 million of loans on single-family residential properties.

Commercial Mortgage Loans

The performance of the commercial mortgage loan portfolio remained very strong. All commercial mortgage loans were in good standing. The commercial mortgage loan portfolio is broadly diversified by both property type and geographic region. The Company's mortgage loan investment practices emphasize conservative underwriting and focus on high-quality properties. The portfolio is weighted toward investments in office buildings and retail properties, two sub-sectors with large proportions of high-quality properties. Allocations to these two categories remained constant from the 2006 levels.

COMMERCIAL MORTGAGE LOANS BY PROPERTY TYPE*

(DOLLARS IN MILLIONS)	DECEMBER 31, 2007	
OFFICE BUILDINGS	$ 3,940	31%
RETAIL	3,205	25%
INDUSTRIAL	2,750	22%

SOUTH CENTRAL	1,726	14%
NORTH CENTRAL	1,354	10%
NEW ENGLAND	667	5%
MOUNTAIN	472	4%
CANADA	4	–
TOTAL MORTGAGE LOANS	$12,704	100%

** Includes $3,796 million of assets related to New York Life Insurance and Annuity Corporation.*

Single-family Residential Loans

In addition to the non-agency residential securities highlighted earlier, New York Life and its domestic insurance subsidiaries owned $1,495 million in geographically diversified single-family residential loans. These investments have had and continue to have strong performance and do not contain any subprime loans.

2007 INVESTMENT REVIEW

New York Life Insurance Company and Its Domestic Insurance Subsidiaries

Equities

As of year-end 2007, New York Life and its domestic insurance subsidiaries had $8 billion invested in public and private equities, while subsidiaries and affiliates totaled $3 billion.

The public equity investment portfolios are managed by experienced portfolio managers, who make use of active and passive styles combined with quantitative and fundamental analyses. The equity assets are diversified across the broad U.S. equity market and also include an allocation to international equities. Allocations to private equity provide further diversification and an opportunity to exceed the returns of public equity over the long term.

EQUITY BY TYPE*

(DOLLARS IN MILLIONS)	DECEMBER 31, 2007	
PUBLIC EQUITY	$ 2,602	24%
PRIVATE EQUITY	4,350	40%
REITs	470	4%
REAL ESTATE	464	4%
CONVERTIBLE PREFERRED STOCKS	68	–
SUBSIDIARIES AND AFFILIATES	3,038	28%
TOTAL EQUITY	$10,992	100%

* *Includes $480 million of assets related to New York Life Insurance and Annuity Corporation.*

Derivatives

As of year-end 2007, New York Life and its domestic insurance subsidiaries had outstanding derivative contracts with a market value of $851 million. The derivative transactions are entered into to meet the hedging needs of the Company or replicate permissible investments. The single largest derivative activity involves cross-currency swaps entered into to convert assets or liabilities of the Company that are designated in a foreign currency into U.S. dollars. Interest rate swaps are used primarily to convert fixed rate investments to floating rate investments in support of floating rate liabilities.

Derivative trades may expose New York Life and its domestic insurance subsidiaries to counterparty credit risk. This risk is controlled through the establishment of collateral support agreements, which require the posting of cash collateral by derivative counterparties if and when the market value of derivative positions with a counterparty exceeds a predetermined dollar limit. Derivative credit exposure to a counterparty is combined with other direct credit risk to the same counterparty and managed against prudent credit risk limits.

Asset/Liability and Investment Risk Management

The investment portfolio has potential exposure to various sources of investment risk, including liquidity, interest rate, credit and equity price risks. New York Life has established comprehensive policies and procedures at both the corporate and business segment levels to minimize overall risk exposures. The Investment Committee of the Board of Directors provides oversight over New York Life's investment activity,

including review of various risk factors and establishment of investment policies. One of the key measures used to quantify and control overall investment risk is the Statutory Surplus-at-Risk metric that measures the impact of adverse changes in financial market and credit conditions over a 12-month period.

A substantial positive operating cash flow supports New York Life's strong liquidity and ability to meet its liabilities when due. Primary sources of cash include sales of insurance and investment products, investment income, maturities, prepayments and dividends. Additional liquidity to meet unexpected cash demands can be provided by New York Life's portfolio of liquid assets, which includes U.S. Treasury securities, short-term money market investments, agency bonds and mortgage-backed securities. Funds are also available through a commercial paper program administered by New York Life Capital Corporation, an indirect, wholly owned subsidiary of New York Life, and a bank revolving credit facility, which is used to back up the commercial paper issuance program.

Management evaluates the impact of various stress events on the Company's liquidity on a regular basis using the analysis of various stress scenarios. Based on the results of these stress tests, management believes that the Company has more than ample liquidity and financial strength to provide for foreseeable cash requirements, including cash outflows in extreme stressed conditions. This view was reaffirmed in an October 2007 report from Standard & Poor's, which referred to New York Life Insurance Company as having "very strong liquidity." Various liquidity risk indicators are tracked regularly to provide management with an early indication of any potential liquidity issues.

Earnings and cash flows relating to fixed rate investments are sensitive to interest rate changes. New York Life manages interest rate risk as part of its asset/liability management process and product design procedures. Asset/liability management strategies include segmentation of investments by product line and the construction of investment portfolios designed to specifically satisfy the projected cash needs of the product lines. Interest rate risk is also assessed and controlled by modeling asset and liability cash flows on a product-by-product basis, under current and various other projected interest rate scenarios. New York Life's asset/liability position is monitored regularly, enabling management to adjust asset portfolios through dynamic hedging or option purchases, or to alter liability cash flows, in order to efficiently mitigate risk exposures exceeding management's risk tolerances.

New York Life's investments in corporate bonds and mortgage loans expose it to potential credit losses. Credit risk is managed by applying disciplined credit evaluation and underwriting standards; aligning allocations to lower-quality, higher-yielding investments with our risk-return tolerances; and diversifying exposures by industry, issuer and property type.

New York Life's holdings of public and private equity securities are subject to market risk. These holdings are diversified and managed against risk tolerance limits established by individual product lines and at the aggregate corporate level.

2007 FINANCIAL OVERVIEW

The following pages present the consolidated financial results for NewYork Life Insurance Company and its subsidiaries ("the Company"). Our primary management reporting system is based on accounting principles generally accepted in the United States of America ("GAAP"), with certain adjustments that we believe result in a more appropriate tracking of operating results. Results reported on this basis are referred to as "non-GAAP performance measures." In addition, statutory results are tracked as an important measure of capital adequacy.

For a detailed reconciliation of the Company's GAAP performance measures to its non-GAAP performance measures, see page 39.

For definitions of the Company's performance measures, see Glossary of Terms on page 48.

OPERATING EARNINGS

YEAR	IN $ MILLIONS
2007	1,275
2006	1,090
2005	939
2004	976
2003	836

Operating earnings is the measure used for management purposes to highlight the Company's results from ongoing operations and the underlying profitability of our business. In 2007, New York Life achieved a record-setting $1.28 billion in operating earnings.

SURPLUS AND ASSET VALUATION RESERVES*

YEAR	IN $ MILLIONS
2007	14,680
2006	13,859
2005	12,853
2004	11,838
2003	10,810

Surplus and asset valuation reserves, the funds that ensure we can meet future obligations to policyholders and finance our growth, increased in 2007 by more than $800 million to nearly $14.7 billion. Total surplus is one of the key indicators of the Company's long-term financial strength and stability.

**See second footnote (†) on page 30.*

OPERATING REVENUE

YEAR	IN $ BILLIONS
2007	13.0
2006	11.9
2005	10.8
2004	10.1
2003	9.1

This chart shows the revenue the Company has generated from its domestic and international business during the last five years – primarily premium and fee income, deposits included in policyholder account balances for life and annuity products, and net margins on guaranteed products. Operating revenue has grown steadily since 2003.

ASSETS UNDER MANAGEMENT

YEAR	IN $ BILLIONS
2007	280.0
2006	261.5
2005	222.8
2004	213.0
2003	200.2

This chart shows the growth of assets under management since 2003. The Company's assets under management rose seven percent over 2006, reflecting the strength of the Company's diversified products and distribution channels.

INSURANCE SALES

YEAR	IN $ MILLIONS
2007	3,031
2006	2,645
2005	2,098
2004	1,955
2003	1,726

This chart shows the growth of new insurance sales since 2003, and includes results from both our domestic and international operations. 2007 was another record year for the Company, exceeding $3 billion for the first time. Over the past four years, our insurance sales have grown at a compound annual rate of 15.1 percent.

INDIVIDUAL LIFE INSURANCE IN FORCE

YEAR	IN $ BILLIONS
2007	750.9
2006	694.8
2005	647.7
2004	611.2
2003	552.9

This chart shows the growth of the Company's individual life insurance in force over the last four years. Our steady growth – $198 billion since 2003 – is the sign of a strong and vibrant company.

INVESTMENT SALES

YEAR	IN $ MILLIONS
2007	35,579
2006	34,671
2005	28,069
2004	24,031
2003	22,204

Investment sales include new sales of investment annuities, mutual funds and other investment-related products by both our domestic and international operations. In 2007, investment sales increased by more than $900 million from 2006 due to growth of our third-party asset management business.

POLICYHOLDER BENEFITS AND DIVIDENDS

YEAR	IN $ BILLIONS
2007	14.1
2006	12.6
2005	10.9
2004	9.5
2003	8.4

This chart illustrates policyholder benefits and dividends incurred by the Company over the last five years. Benefits include death claims paid to beneficiaries and annuity payments. Dividends are payments made to policyholders eligible to participate in the Company's earnings.

Report of Independent Auditors

To the Board of Directors of New York Life Insurance Company

We have audited, in accordance with auditing standards generally accepted in the United States of America, the consolidated balance sheet of New York Life Insurance Company and its subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of income, of equity and of cash flow for the years then ended; and in our report dated March 19, 2008, we expressed an unqualified opinion on those consolidated financial statements.

In our opinion, the information set forth in the accompanying condensed consolidated financial statements is fairly stated, in all material respects, in relation to the consolidated financial statements from which it has been derived.

As described in Note 3 of the condensed consolidated financial statements, the Company changed its method of accounting for uncertainty in income taxes and for deferred acquisition costs in connection with modifications or exchanges of insurance contracts and changed its measurement date for defined benefit pension and other postretirement plans on January 1, 2007. Also as discussed in Note 3, the Company changed its method of accounting for defined benefit pension and other postretirement plans on December 31, 2006.

Notes to Condensed Consolidated Financial Statements

New York Life Insurance Company and Subsidiaries, December 31, 2006 and 2007

Note 1

Nature of Operations

NATURE OF OPERATIONS New York Life Insurance Company and its subsidiaries ("the Company") offer a wide range of insurance and investment products and services including life and health insurance, long-term care, annuities (including guaranteed lifetime income annuities), pension products, mutual funds, and other investments and investment advisory services. The Company comprises four primary business operations: Life and Annuity, Investment Management, International Operations and Special Markets. Life and Annuity operations are conducted through New York Life Insurance Company ("NYLIC"), the parent company, and its wholly owned insurance subsidiaries: New York Life Insurance and Annuity Corporation ("NYLIAC") and NYLIFE Insurance Company of Arizona ("NYLIFE of Arizona"). Investment Management activities are conducted primarily through NYLIC and various registered investment advisory subsidiaries of its wholly owned subsidiary, New York Life Investment Management Holdings LLC ("NYLIM Holdings"). The Company markets individual insurance and investment products in Asia and Latin America through New York Life International, LLC ("NYL International"), a wholly owned subsidiary of NYLIC. Special Markets is a niche business area of NYLIC and NYLIAC that markets group life and health insurance to membership associations, long-term care insurance and is the exclusive provider of life insurance and guaranteed lifetime income annuity products to members of AARP. NYLIFE LLC is a wholly owned subsidiary of NYLIC, and is a holding company for certain non-insurance subsidiaries of NYLIC. NYLIFE LLC, through its subsidiaries, offers securities brokerage, financial planning and investment advisory services, trust services and capital financing.

BASIS OF PRESENTATION The accompanying consolidated financial statements have been extracted from the Company's unabridged consolidated financial statements and prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP") and reflect the consolidation of the parent company with its majority owned and controlled subsidiaries, as well as variable interest entities in which the Company is considered the primary beneficiary: principally NYLIAC, NYLIFE of Arizona, NYLIFE LLC, NYL International and NYLIM Holdings. All intercompany transactions have been eliminated in consolidation. The New York State Insurance Department (the "Department") recognizes only statutory accounting practices for determining and reporting the financial condition and results of operations of an insurance company, for determining its solvency under the New York State Insurance Law, and for determining whether its financial condition warrants the payment of a dividend to its policyholders. In addition, the Company is also subject to reporting requirements with the Delaware and Arizona Insurance Departments. No consideration is given by any of the State Insurance Departments to financial statements prepared in accordance with GAAP in making such determinations.

Certain amounts in prior years have been reclassified to conform to the current year presentation. These reclassifications had no effect on net income or equity as previously reported.

Accounting practices used to prepare statutory financial statements for regulatory filings of life insurance companies differ in certain instances from GAAP.

Notes to Condensed Consolidated Financial Statements

New York Life Insurance Company and Subsidiaries, December 31, 2006 and 2007

The following reconciles consolidated GAAP net income to the statutory net income of NYLIC, as reported to regulatory authorities:

(DOLLARS IN MILLIONS)	2006	2007
CONSOLIDATED GAAP NET INCOME	$ 2,298	$ 1,497
REMOVAL OF SUBSIDIARIES' NET INCOME	(767)	(563)

STATUTORY CAPITAL†	$13,859	$14,680

* *Statutory net income includes the net income of NYLIC only, and excludes the statutory net income of its domestic insurance subsidiaries of $251 million and $285 million for the years ended December 31, 2006 and 2007, respectively.*

† *Statutory capital includes statutory surplus and the asset valuation reserve ("AVR") on a consolidated basis of the Company. NYLIC's statutory surplus was $11,300 million and $11,959 million at December 31, 2006 and 2007, respectively. Included in NYLIC's statutory surplus is NYLIAC's statutory surplus totaling $2,324 million and $2,650 million at December 31, 2006 and 2007, respectively. AVR for NYLIC was $2,087 million and $2,257 million at December 31, 2006 and 2007, respectively. AVR for NYLIAC was $472 million and $464 million at December 31, 2006 and 2007, respectively.*

Note 2

Significant Accounting Policies

The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

INVESTMENTS Fixed maturity investments, which the Company has both the ability and the intent to hold to maturity, are stated at amortized cost and classified as held-to-maturity. Investments classified as available-for-sale or trading are reported at fair value. For publicly traded fixed maturities, estimated fair value is determined using quoted market prices. For fixed maturities without a readily ascertainable fair value, the Company has determined an estimated fair value using a discounted cash flow approach, broker-dealer quotations or management's pricing model. Unrealized gains and losses on available-for-sale securities are reported in other comprehensive income, net of deferred taxes and related adjustments. Unrealized gains and losses from investments classified as trading fixed maturities are reflected in net investment gains in the accompanying Consolidated Statement of Income.

Changes in future anticipated cash flows on mortgage and asset-backed securities from the original purchase assumptions are accounted for using the retrospective yield adjustment method.

Unaffiliated equity securities are carried at fair value. The estimated fair value of equity securities has been determined using quoted market prices for publicly traded securities and management's pricing model for private placement securities. Unrealized gains and losses on equity securities classified as available-for-sale are reflected in net unrealized investment gains in other comprehensive income, net of deferred taxes and related adjustments. Unrealized gains and losses from investments in equity securities classified as trading are reflected in net investment gains in the accompanying Consolidated Statement of Income.

Affiliated equity securities represent holdings in entities where there is at least 20 percent ownership or where the Company has the ability to exercise significant influence through its relationship, and are accounted for by the equity method of accounting. Accordingly, respective net earnings or losses are included in net income in the accompanying Consolidated Statement of Income.

The cost basis of fixed maturities and equity securities is adjusted for impairments in value deemed to be other than temporary, with the associated realized loss reported in net investment gains in the accompanying Consolidated Statement of Income. Factors considered in evaluating whether a decline in value is other than temporary include: (i) whether the decline is substantial; (ii) the amount of time that the fair value has been less than cost; (iii) the financial condition and near-term prospects of the issuer; and (iv) the Company's ability and intent to retain the investment for the period of time sufficient to allow for an anticipated recovery in value.

Mortgage loans on real estate are carried at unpaid principal balances, net of discounts/premiums and valuation allowances, and are secured. Specific valuation allowances are established for the excess carrying value of the mortgage loan over its estimated fair value, when it is probable that, based on current information and events, the Company will be unable to collect all amounts due under the contractual terms of the loan agreement. Specific valuation allowances are based upon the fair value of the collateral or present value of expected future cash flows discounted at the loan's original effective interest rate. The Company also has a general valuation allowance for estimated future credit losses on currently performing mortgages. The general allowance is based on the Company's historical loss experience for the mortgage loan portfolio.

Policy loans are stated at the aggregate balance due, which approximates fair value since loans on policies have no defined maturity date and reduce amounts payable at death or surrender.

Cash equivalents include investments that have remaining maturities of three months or less at date of purchase and are carried at amortized cost, which approximates fair value.

Short-term investments include investments with remaining maturities of one year or less, but greater than three months, at the time of acquisition and are stated at amortized cost, which approximates fair value. Short-term investments are included in fixed maturities on the Consolidated Balance Sheet.

Other investments consist primarily of direct investments in limited partnerships, limited liability companies, derivatives, real estate and collateralized third-party commercial loans. Investments in limited partnerships and limited liability companies are accounted for by the equity method of accounting.

Notes to Condensed Consolidated Financial Statements

New York Life Insurance Company and Subsidiaries, December 31, 2006 and 2007

Derivative financial instruments are accounted for at fair value. The treatment of changes in the fair value of derivatives depends on the characteristics of the transaction, including whether it has been designated and qualifies as part of a hedging relationship. Derivatives that do not qualify for hedge accounting are carried at fair value with changes in value included in net investment gains.

Net investment gains and losses on sales are generally computed using the specific identification method.

In many cases, investment in limited partnerships and limited liability companies qualify as investment companies and apply specialized accounting practices, which result in unrealized gains and losses being recorded in the income statement. The Company retains this special accounting practice. For such consolidated limited partnerships, the unrealized gains and losses from the underlying investments are reported in net investment gains in the accompanying Consolidated Statement of Income. For such limited partnerships accounted for under the equity method, the unrealized gains and losses from the underlying investments are reported in net investment income.

DEFERRED POLICY ACQUISITION COSTS ("DAC") The costs of acquiring new and maintaining renewal business and certain costs of issuing policies that vary with and are primarily related to the production of new and renewal business have been deferred and recorded as an asset in the accompanying Consolidated Balance Sheet. These costs consist primarily of commissions, certain expenses of underwriting and issuing contracts and certain agency expenses.

For traditional participating life insurance policies, such costs are amortized over the life of the contracts, which is assumed to be 25 years in proportion to estimated gross margins, basing amortization initially on pricing assumptions and updating periodically for actual results. For universal life and deferred annuity contracts, such costs are amortized in proportion to estimated gross profits over the effective life of those contracts, which is assumed to be 25 years for universal life contracts and 15 years for deferred annuities. The Company uses a pricing-based approach for projections of future gross margins, which include original pricing earned rates. Changes in assumptions for all policies and contracts are reflected as retroactive adjustments in the current year's amortization. For these contracts the carrying amount of the DAC asset is adjusted at each balance sheet date as if the unrealized investment gains or losses had been realized and included in the gross margins or gross profits used to determine current period amortization. The increase or decrease in the DAC asset due to unrealized investment gains or losses is recorded in other comprehensive income.

DAC for term contracts, annuity policies with life contingencies, and group life and health contracts are amortized in proportion to premium income over the effective premium-paying period of the contract. Assumptions as to anticipated premiums are made at the date of policy issuance and are consistently applied during the life of the contract. Deviations from estimated experience are included in operating expenses in the accompanying Consolidated Statement of Income when they occur.

Effective January 1, 2007, the Company adopted a new accounting standard for deferred acquisition costs on internal replacements of certain insurance and investment contracts. See Note 3 – Recent Accounting Pronouncements.

POLICYHOLDERS' ACCOUNT BALANCES The Company's liability for policyholders' account balances represents the contract value that has accrued to the benefit of the policyholder as of the balance sheet date. This liability is generally equal to the accumulated account deposits, plus interest credited, less policyholder withdrawals and other charges assessed against the account balance. This liability also includes amounts that have been assessed to compensate the insurer for services to be performed over future periods, and the fair value of embedded derivatives in the above contracts.

FUTURE POLICY BENEFITS The Company's liability for future policy benefits primarily comprises the present value of estimated future payments to or on behalf of policyholders, where the timing and amount of payment depends on policyholder mortality or morbidity, less the present value of future net premiums. For traditional individual participating life insurance products, the mortality assumptions applied are those used to calculate the policies' guaranteed cash surrender values. The interest rate assumptions are based on the dividend guarantees. For non-participating traditional life insurance and annuity products, expected mortality and lapse or surrender are generally based on the Company's historical experience or standard industry tables including a provision for the risk of adverse deviation. Interest rate assumptions are based on factors such as market conditions and expected investment returns. Although mortality and interest rate assumptions are "locked in" upon the issuance of new insurance or annuity business with fixed and guaranteed terms, significant changes in experience or assumptions may require the Company to provide for expected future losses on a product by establishing premium deficiency reserves. Premium deficiency reserves, if

required, are determined based on assumptions at the time the premium deficiency reserve is established and do not include a provision for the risk of adverse deviation. The Company's liability for future policy benefits also includes a liability for unpaid claims and claim adjustment expenses. The Company does not establish loss reserves until a loss has occurred. However, unpaid claims and claim adjustment expenses include estimates of claims that the Company believes have been incurred but have not yet been reported as of the balance sheet date. The Company's liability for future policy benefits also includes liabilities for guarantee benefits related to certain nontraditional long-duration life and annuity contracts and unearned revenues.

DEBT Debt is generally carried at unpaid principal balance. The carrying amount for commercial paper approximates fair value. The fair value of the Company's other debt is estimated based on the quoted market prices for the same or similar issues or on the current rates offered to the Company for debt of the same remaining maturities.

RECOGNITION OF INCOME AND RELATED EXPENSES Premiums from traditional participating life insurance policies, term life policies, annuity policies with life contingencies and group life and health contracts are recognized as income when due. The associated benefits and expenses are matched with income so as to result in the recognition of profits over the life of the contracts. This match is accomplished by providing for liabilities for future policy benefits and the deferral and subsequent amortization of policy acquisition costs.

Amounts received under universal-life-type contracts and investment contracts are reported as deposits to policyholders' account balances. Revenues from these contracts consist of amounts assessed during the period for mortality and expense risk, policy administration and surrender charges, and are included as fee income in the Consolidated Statement of Income. In addition to fees, the Company earns investment income from the investment of policyholders' deposits in the Company's general account portfolio. Amounts previously assessed to compensate the Company for services to be performed over future periods are deferred and recognized into income over the period benefited, using the same assumptions and factors used to amortize DAC costs. Policy benefits and claims that are charged to expense include benefit claims incurred in the period in excess of related policyholders' account balances.

Premiums for contracts with a single premium or a limited number of premium payments due over a significantly shorter period than the total period over which benefits are provided, are recorded as income when due. Any excess profit is deferred and recognized as income in a constant relationship to insurance in force and, for annuities, in relation to the amount of expected future benefit payments.

Premiums, universal life fee income, benefits and expenses are stated net of reinsurance ceded. Estimated reinsurance ceding allowances are recognized over the life of the reinsured policies using assumptions consistent with those used to account for the underlying policies.

POLICYHOLDERS' DIVIDENDS The amount of dividends to be paid to NYLIC participating policyholders is determined annually by NYLIC's Board of Directors. The aggregate amount of policyholders' dividends is based on NYLIC's statutory results and past experience, including investment income, net realized investment gains and losses over a number of years, mortality experience and other factors. NYLIC accrues dividends to policyholders when they are due to the policyholder.

The amount of dividends to be paid to the Company's NYL International policyholders is determined by means of formulas specific to each country's regulations that reflect the relative contribution of each group's policies to the results of operations.

BENEFIT PLANS NYLIC maintains the New York Life Insurance Company Pension Plan (the "Pension Plan"). The Pension Plan is a qualified defined benefit pension plan covering substantially all eligible full-time and part-time employees of NYLIC and certain eligible employees of subsidiaries that adopt the Pension Plan. NYLIC also maintains the New York Life Excess Benefit Plan, which is a nonqualified, unfunded arrangement, which provides benefits in excess of the maximum benefits that may be paid or accrued under the Pension Plan.

NYLIC also maintains the NYLIC Retirement Plan (the "Retirement Plan"). The Retirement Plan is a qualified defined benefit pension plan covering substantially all eligible agents under contract to NYLIC or its domestic life insurance subsidiaries on or after the effective date of the Plan, January 1, 1982. The Company established the NYLIC 415 and 401(a)(17) Excess Benefit Plan, which is a nonqualified, unfunded arrangement to provide benefits in excess of maximum benefits that may be paid or accrued under the NYLIC Retirement Plan.

Notes to Condensed Consolidated Financial Statements

New York Life Insurance Company and Subsidiaries, December 31, 2006 and 2007

NYLIC maintains the Employee Progress-Sharing Investment Plan ("EPSI"), which is a qualified defined contribution plan covering substantially all salaried United States full-time and part-time employees of NYLIC and certain eligible employees of subsidiaries that adopt EPSI.

NYLIC also maintains the Agents Progress-Sharing Investment Plan, which is a qualified defined contribution plan covering substantially all contracted United States full-time agents.

The Company provides certain benefits to eligible employees and agents during employment for paid absences. These benefits include, but are not limited to, salary continuation during medical and maternity leaves, disability-related benefits and continuation of benefits such as health care and life insurance coverage.

FEDERAL INCOME TAXES Current federal income taxes are charged or credited to operations based upon amounts estimated to be payable or recoverable as a result of taxable operations for the current year and any adjustments to such estimates from prior years. Deferred federal income tax assets ("DTAs") and liabilities ("DTLs") are recognized for expected future tax consequences of temporary differences between GAAP and taxable income. Temporary differences are identified and measured using a balance sheet approach whereby GAAP and tax balance sheets are compared. Deferred income taxes are generally recognized based on enacted tax rates, and a valuation allowance is recorded if it is more likely than not that any portion of the deferred tax asset will not be realized.

NYLIC files a consolidated federal income tax return with certain of its domestic insurance and non-insurance subsidiaries. The consolidated income tax liability is allocated among the members of the group in accordance with a tax allocation agreement. The tax allocation agreement provides that each member of the group is allocated its share of the consolidated tax provision or benefit, determined generally on a separate company basis, but may, where applicable, recognize the tax benefits of net operating losses or capital losses utilizable in the consolidated group. Intercompany tax balances are generally settled quarterly on an estimated basis with a final settlement within 30 days of the filing of the consolidated return.

Effective January 1, 2007, the Company adopted a new accounting standard for uncertain tax positions. See Note 3 – Recent Accounting Pronouncements.

Note 3

Recent Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans – an amendment of FASB Statements No. 87, 88, 106 and SFAS No. 132(R)" ("SFAS 158"). This statement requires an employer to prospectively recognize the overfunded or underfunded status of its defined benefit pension and postretirement plans as an asset or liability in its statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income, and to make additional disclosures. This standard was effective for fiscal years ending after June 15, 2007 for non-public companies, with early adoption permitted. The Company decided to adopt the recognition and disclosure provisions of SFAS 158 as of December 31, 2006. Accordingly, the adoption of SFAS 158 resulted in a reduction in accumulated other comprehensive income in the accompanying Consolidated Balance Sheet of approximately $805 million, net of income taxes.

SFAS 158 also requires an employer to measure the funded status of its plans as of its fiscal year-end. Previously, employers were permitted to measure the funded status of their plans within three months of its fiscal year-end. This requirement is effective for fiscal years ending after December 15, 2008, with early adoption permitted. The Company adopted the measurement date provision of SFAS 158, as of January 1, 2007. Accordingly, the January 1, 2007 impact of changing the measurement date from September 30 to December 31 resulted in a reduction to retained earnings of $38 million, net of income taxes, and an increase in accumulated other comprehensive income of $99 million, net of income taxes, in the accompanying Consolidated Balance Sheet.

In July 2006, the FASB issued FASB Interpretation ("FIN") No. 48, "Accounting for Uncertainty in Income Taxes" an interpretation of FASB Statement No. 109. This Interpretation prescribes a comprehensive model for how a company should recognize, measure, present and disclose in its financial statements uncertain tax positions that it has taken or expects to take on a tax return. This Interpretation is effective for fiscal years beginning after December 15, 2006. On February 1, 2008 the FASB issued FASB Staff Position ("FSP") No. 48-2, "Effective Date of FIN 48 for Certain Nonpublic Enterprises," which delayed the effective date for non-public entities to periods beginning after December 15, 2007, with early adoption permitted. The Company early adopted FIN No. 48 on January 1, 2007. The cumulative effect of the adoption of FIN No. 48 as of January 1, 2007 resulted in a decrease to retained earnings of $56 million.

In September 2005, the Accounting Standards Executive Committee ("AcSEC") of the American Institute of Certified Public Accountants ("AICPA") issued Statement of Position ("SOP") 05-1, "Accounting by Insurance Enterprises for Deferred Acquisition Costs in Connection With Modifications or Exchanges of Insurance Contracts" ("SOP 05-1"). SOP 05-1 provides guidance on accounting by insurance enteprises for deferred acquisition costs on internal replacements of insurance and investment contracts other than those specifically described in Statement of Financial Accounting Standards ("SFAS") No. 97. The SOP defines an internal replacement as a modification in product benefits, features, rights or coverages that occurs by the exchange of a contract for a new contract, or by amendment, endorsement or rider to a contract, or by the election of a feature or coverage within a contract. SOP 05-1 is effective for internal replacements occurring in fiscal years beginning after December 15, 2006. Under SOP 05-1, DAC written off at date of lapse cannot be restored when a policy subsequently reinstates. In addition, exchanges of deferred annuity contracts are generally considered substantially unchanged contracts and DAC is not written off. The Company adopted SOP 05-1 on January 1, 2007, which resulted in an increase in retained earnings of $10 million, net of income taxes.

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Instruments – an amendment of FASB Statements No. 133 and 140." This statement removes an exception from the requirement to bifurcate an embedded derivative feature from a beneficial interest in securitized financial assets. This statement also provides an irrevocable election to measure at fair value an entire hybrid financial instrument that contains an embedded derivative requiring bifurcation, on an instrument-by-instrument basis, rather than measuring only the embedded derivative on a fair value basis. The Company has used the exception for investments made in securitized financial assets in the normal course of operations, and thus has not previously had to consider whether such investments contain an embedded derivative. The new requirement to identify embedded derivatives in beneficial interests is required to be applied on a prospective basis only to beneficial interests acquired, issued or subject to certain remeasurement conditions after the adoption date of the new guidance. The Company adopted SFAS No. 155 effective January 1, 2007. The Company's adoption of SFAS No. 155 did not have a material effect on the Company's consolidated financial statements. The Company elected to measure at fair value certain financial instruments that contained an embedded derivative that would otherwise require bifurcation. These amounts were included in "fixed maturities - trading securities" and totaled $298 million at December 31, 2007.

Notes to Condensed Consolidated Financial Statements

New York Life Insurance Company and Subsidiaries, December 31, 2006 and 2007

Note 4

Debt

For the years ended December 31, 2006 and 2007, the fair value of debt was $2,542 million and $2,620 million, respectively. Debt consisted of the following at December 31, 2006 and 2007:

(DOLLARS IN MILLIONS)	2006	2007
CAPITAL CORPORATION'S COMMERCIAL PAPER DEBT ISSUANCE, VARIOUS MATURITY DATES THROUGH FEBRUARY 2007 AND MARCH 2008 FOR 2006 AND 2007, RESPECTIVELY (THE WEIGHTED-AVERAGE INTEREST RATE IS APPROXIMATELY 5.31% AND 4.32% FOR 2006 AND 2007, RESPECTIVELY)	$ 492	$ 990
SHARED APPRECIATION INCOME LINKED SECURITIES, DUE AUGUST 22, 2011 (COUPON RATE OF 3.3%)	216	222
SHARED APPRECIATION INCOME LINKED SECURITIES II, DUE APRIL 28, 2008	288	301
5.875% SURPLUS NOTES, DUE MAY 15, 2033	991	991
NON-RECOURSE DEBT	455	54
OTHER	64	56
TOTAL DEBT	$2,506	$2,614

On August 16, 2001, the Company entered into an agreement with Credit Suisse ("CS"), referred to as Shared Appreciation Income Linked Securities ("SAILS") in the above table. Under the agreement, the Company has entered into a forward sale of certain of its shares of Express Scripts, Inc. ("ESI"), an investment of the Company. The Company may deliver up to 18 million shares of ESI common stock on August 22, 2011 or settle the transaction in cash instead of delivering shares.

On April 28, 2003, the Company entered into another agreement with CS, referred to as Shared Appreciation Income Linked Securities II ("SAILS II") in the above table. Under this agreement, the Company has entered into a forward sale of certain of its shares of ESI. The Company may deliver up to 22 million shares of ESI common stock on April 28, 2008 or settle the transaction in cash instead of delivering shares.

On May 5, 2003, NYLIC issued Surplus Notes ("Notes") with a principal balance of $1 billion, at a discount of $9.8 million, bearing interest at 5.875 percent, with a maturity date of May 15, 2033. The notes were issued pursuant to Rule 144A under the Securities Act of 1933, as amended and are administered by a U.S. bank as registrar/paying agent. Interest on these Notes is scheduled to be paid semi-annually on May 15 and November 15 of each year.

The Notes are unsecured and subordinated to all present and future indebtedness, policy claims and other creditor claims of NYLIC. The Notes do not repay principal prior to maturity. Each payment of interest or principal may be made only with the prior approval of the Superintendent of the New York Department of Insurance and only out of surplus funds, which the Superintendent determines to be available for such payments under New York State Insurance law.

At December 31, 2006, the Company was required to consolidate one CDO (subsequently liquidated in 2007) and one LP with an outstanding debt balance. At December 31, 2007, the Company was required to consolidate one limited partnership ("LP") with an outstanding debt balance. For the year ended December 31, 2006, the debt outstanding relating to the consolidated CDO and LP was $455 million. For the year ended December 31, 2007, the debt outstanding relating to the consolidated LP was $54 million.

LINE OF CREDIT The Company has entered into a $1.5 billion revolving credit facility with a consortium of banks effective July 27, 2005. The agreement is a five-year revolving credit facility that charges an annual facility fee of 4 bps. The borrowing rate is 16 bps over LIBOR. If borrowings exceed 50 percent of the total facility, the borrowing rate will be 16 bps over LIBOR plus 5 bps. The annual facility fees and borrowing rates could increase if New York Life's Standard & Poor's and Moody's financial strength ratings are downgraded.

To date, the Company has not utilized this credit facility.

Note 5

ESI

In 2006, the Company sold 4 million shares of ESI and the Company's representation on ESI's board of directors was reduced. As a result, the Company was no longer deemed to have the ability to exercise significant influence, as defined by Accounting Principles Board No. 18, "The Equity Method of Accounting for Investments in Common Stocks," on ESI. Accordingly, during 2006 the Company changed its accounting methodology for its investment in ESI from the equity method of accounting to SFAS No. 115, "Accounting for Certain Investments in Debt and Equity Securities" ("SFAS 115") market value accounting. The Company then classified its investment in ESI as trading securities, which allows the mark-to-market of the shares that the Company continues to hold to be recorded in net investment gains in the accompanying Consolidated Statement of Income.

For the year ending December 31, 2006, an after-tax gain of $855 million was realized through earnings, representing the gain on sale of 4 million unencumbered shares and the mark-to-market valuation (including the initial conversion to market value approach) on the remaining encumbered shares. In addition, the decrease in the fair value of the ESI derivative resulted in an after-tax gain of $156 million. The total impact on 2006 Consolidated GAAP Net Income was an increase of $1,011 million.

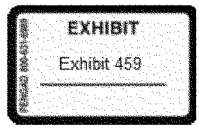
For the year ended December 31, 2007, an after-tax gain of $967 million was realized through earnings representing the change in market value on the Company's ESI shares. This was offset by an increase in the ESI derivative, which resulted in an after-tax loss of $875 million. The total impact on 2007 Consolidated GAAP Net Income was an increase of $92 million.

Note 6

Commitments and Contingencies

LITIGATION The Company and/or its subsidiaries are defendants in individual and/or alleged class action suits arising from their agency sales force, insurance (including variable contracts registered under the federal securities law), investment, retail securities, employment and/or other operations, including actions involving retail sales practices. The Company is also a defendant in a suit regarding employee and agent benefits where a portion of the case, specifically the breach of fiduciary claims, has been certified as a class action by agreement of the parties. The remainder of the claims in that suit have not been certified. Most of the actions seek substantial or unspecified compensatory and punitive damages. The Company and/or its subsidiaries are also from time to time involved in various governmental, administrative and investigative proceedings and inquiries.

Notwithstanding the uncertain nature of litigation and regulatory inquiries, the outcome of which cannot be predicted, the Company believes that, after provisions made in the financial statements, the ultimate liability that could result from litigation and proceedings would not have a material adverse effect on the Company's financial position; however, it is possible that settlements or adverse determinations in one or more actions or other proceedings in the future could have a material adverse effect on the Company's operating results for a given year.



Note 7

Related Party Transactions

COMPANY MANAGED MUTUAL FUNDS NYLIM Holdings, through its subsidiaries, is responsible for providing investment advisory and certain related administrative services to the MainStay Funds, MainStay VP Series Fund, Inc., Eclipse Funds, Eclipse Funds, Inc., the McMorgan Funds and the ICAP Funds, Inc. (collectively, the "Funds"). As a result, NYLIM Holdings, through its subsidiaries, earns investment management, accounting, administration and service fees related to the Funds, which aggregated $336 million and $380 million for the years ended December 31, 2006 and 2007, respectively, and are included in other income in the accompanying Consolidated Statement of Income. The receivable balances at December 31, 2006 and 2007 were $37 million and $43 million, respectively, and are included in other assets in the accompanying Consolidated Balance Sheet.

OTHER TRANSACTIONS As of December 31, 2007, an executive of the Company was a director of ESI. ESI provides the majority of the prescription drug administrative services for the Company. Such arrangements are entered into on terms comparable to those that would be available to unrelated third parties.

Reconciliation of Cash and Invested Assets: GAAP Basis to Statutory Basis

(DOLLARS IN MILLIONS)	DECEMBER 31, 2006	DECEMBER 31, 2007
GAAP CONSOLIDATED INVESTED ASSETS	$147,368	$157,978

Management's Discussion of Financial Responsibility

Management is responsible for the preparation and integrity of the financial information presented in the *Annual Report*. The Company's consolidated financial statements, incorporated by reference herein, have been prepared in conformity with accounting principles generally accepted in the United States of America. In Management's opinion, the consolidated statements present fairly the Company's financial position, results of operations and cash flows as of, and for the years ended, December 31, 2007 and 2006.

The Company maintains a strong system of internal accounting controls, monitored by our corporate staff of professionally trained internal auditors. We encourage strong and effective corporate governance from our Board of Directors, continuously review our business results and strategic choices and focus on financial stewardship. The Company's controls are designed to provide reasonable assurance that assets are safeguarded and that transactions and events are recorded properly. The Company has evaluated the effectiveness of its controls and procedures for financial reporting purposes as of December 31, 2007 and 2006, and has concluded that they are effective.

PricewaterhouseCoopers LLP, the Company's independent auditor, has audited the consolidated financial statements of the Company in accordance with auditing standards generally accepted in the United States of America. The report appears on page 26.

The Audit Committee of the Board of Directors of New York Life Insurance Company, which exclusively comprises Directors who are not officers or employees of the Company, meets regularly with management, the internal auditors and the independent auditors to provide oversight so that management fulfills its responsibilities for accounting controls and preparation of financial statements.

Although we are not an SEC registrant, we have elected to comply voluntarily with section 302 of the Sarbanes-Oxley Act of 2002, which identifies management's responsibilities over its financial statements and requires management to certify as to the integrity of the financial statements and the effectiveness of internal controls. Our statement to that effect can be viewed on the Company's Web site, www.newyorklife.com.

Glossary of Terms

Growth

INSURANCE SALES – represent annualized first-year premium on products with significant mortality or morbidity risk, where a sale is generally counted when the policy is paid. All BOLI sales and COLI Private Placement Variable Universal Life ("PPVUL") (where the premium is not expected to recur annually) are counted at 10 percent. Insurance sales are generated from both our domestic and international businesses.*†

INVESTMENT SALES – represent current year purchase of products primarily having market risk, where a sale is counted when money is received. Investment sales include individual accumulation annuities, guaranteed products, mutual funds and third-party asset management.*‡

INDIVIDUAL LIFE INSURANCE IN FORCE – the sum of the face amounts of domestic and international life insurance contracts outstanding at a given time.*

POLICYHOLDER BENEFITS AND DIVIDENDS - include domestic and international insurance operations and are presented on a statutory basis. Benefits include death claims paid to beneficiaries, accident and health benefits, surrender benefits, interest on death claims and annuity payments.*§

TOTAL REVENUE – represents consolidated GAAP revenue.

OPERATING REVENUE – includes statutory premiums for life and annuity products, net margins on guaranteed products and fee income associated with asset management business. Premiums on most life insurance products and considerations on immediate annuity products (defined as "Guaranteed Lifetime Income Insurance") are weighted at 100 percent. Annuity considerations on investment income products, all BOLI policies and certain PPVUL policies where premium is not expected to recur annually are weighted at 10 percent.*††

ASSETS UNDER MANAGEMENT – consists of assets of the Company's domestic and international insurance operations and assets the Company manages for third-party investors, including mutual funds, separately managed accounts and retirement plans.*

Profitability

NET INCOME – represents consolidated GAAP net income.

NET INCOME EXCLUDING NET INVESTMENT GAINS – represents consolidated GAAP net income adjusted for the exclusion of net investment gains and losses, net of tax, DAC and related adjustments.

OPERATING EARNINGS – the key measure used for management purposes to track the Company's profitability from ongoing operations. Operating earnings equals GAAP net income adjusted for the exclusion, net of tax, of: (i) net investment gains and losses, net of DAC and related adjustments; (ii) other gains on limited partnerships included in net investment income; (iii) the equity in earnings of ESI (not applicable in 2007); (iv) charges associated with Mexican subsidiary purchased deferred tax assets; (v) ICAP LLC acquisition related expenses; (vi) ICAP key-man insurance proceeds, net of amortization; (vii) Philippines discontinued operations (not applicable in 2007), and adjusted to include, net of tax, (viii) capital gains and prior years' equity base tax releases supporting dividends on participating policies; (ix) certain interest maintenance reserve amortization; and (x) DAC on management adjustments.**

Financial Position

EQUITY – represents consolidated GAAP equity.

SURPLUS AND ASSET VALUATION RESERVES – Includes statutory surplus and the asset valuation reserve ("AVR") of the Company on a consolidated basis. Statutory surplus represents assets minus liabilities of the Company on a consolidated basis based on the accounting rules specified by the state insurance regulators. The AVR is required by insurance regulators to stabilize surplus from defaults on bonds, mortgage loans and real estate along with fluctuations in the market value of equity securities. Changes in the AVR are accounted for as direct increases or decreases in surplus.

* *This indicator has been revised for years 2003–2006 to conform to the Company's change in definition, effective 1/1/2007, to reflect the Company's international operations at percentage ownership.*

† *2003–2006 insurance and investment sales have been revised to conform to the Company's change in definition effective 1/1/2007, relating to the reclassification of Argentina's annuity sales from investment sales to insurance sales.*

‡ *2006 investment sales include $1.1 billion of sales related to an acquisition of an investment subsidiary in 2006. 2004 investment sales include $1.25 billion of sales related to an acquisition of an investment subsidiary in 2004.*

§ *NYLIC's policyholder benefits and dividends were $7.8 billion and $8.1 billion at December 31, 2006 and 2007, respectively. NYLIAC's policyholder benefits and dividends were $4.3 billion and $5.4 billion at December 31, 2006 and 2007, respectively.*

†† *2003–2006 operating revenue has been revised to conform to the Company's change in definition, effective 1/1/2007, relating to certain premiums on Argentina's annuity sales and China's single premium products.*

** *2003–2006 operating earnings has been revised to conform to the Company's change in definition, effective 1/1/2007, relating to the exclusion of Philippines Operations, which were discontinued in 2006.*

COMMITTEE(S):

Committee/Subcommittee:	Activity:
House Ways and Means	Referral, In Committee
Subcommittee on Trade	Referral
House Rules	Referral, In Committee

SUMMARY AS OF:
2/14/2007--Introduced.

Trade Promotion Authority Extension and Enhancement Act of 2007 - Amends the Bipartisan Trade Promotion Authority Act of 2002 to extend the President's authority until July 1, 2011 (or until July 1, 2016, and July 1 of each fifth year thereafter if the President extends such authority and the Congress approves) to enter into trade agreements with foreign countries whose tariff and nontariff policies unduly burden or restrict U.S. trade or adversely affects the U.S. economy. Extends trade authorities procedures (congressional approval) to bills implementing trade agreements entered into during the five-year period beginning on July 1, 2011, and during each five-year period thereafter, unless Congress disapproves after April 1, and before July 1, of the year in which any such five-year period begins.

COMMITTEE(S):

Committee/Subcommittee:	Activity:
House Ways and Means	Referral, Hearings, In Committee
Subcommittee on Trade	Referral
House Rules	Referral, In Committee

SUMMARY AS OF:
2/28/2007--Introduced.

Nonmarket Economy Trade Remedy Act of 2007 - Amends the Tariff Act of 1930 to apply countervailing duties to nonmarket economies.

Authorizes the use of alternative methodologies in determining whether a subsidy is countervailable with respect to the People's Republic of China (PRC).

Requires congressional approval for revocation of nonmarket economy country determinations made by the administering authority.

CSOC.CBR.00032454

Requires a United States International Trade Commission study of how the PRC uses government intervention to promote investment, employment, and exports.

Title: Retirement Security for Life Act of 2007
Sponsor: Rep Jones, Stephanie Tubbs [D-OH-11] (introduced 5/8/2007) **Cosponsors:** 79
Committees: House Ways and Means
Related Bills: S.1010
Latest Major Action: 5/8/2007 Referred to House committee. Status: Referred to the House Committee on Ways and Means.

Jump to: Titles, Major Actions, Committees, Summary

TITLE(S): (*italics indicate a title for a portion of a bill*)

- SHORT TITLE(S) AS INTRODUCED:
  Retirement Security for Life Act of 2007

- OFFICIAL TITLE AS INTRODUCED:
  To amend the Internal Revenue Code of 1986 to encourage guaranteed lifetime income payments from annuities and similar payments of life insurance proceeds at dates later than death by excluding from income a portion of such payments.

MAJOR ACTIONS: [SELECTED] *(dates in italics indicate Senate actions)* For more details, see: Bill Status Display.

NONE

COMMITTEE(S):

Committee/Subcommittee:	Activity:
House Ways and Means	Referral, In Committee

SUMMARY AS OF:
5/8/2007--Introduced.

Retirement Security for Life Act of 2007 - Amends the Internal Revenue Code to allow an exclusion from gross income for 50 percent of the amount otherwise includible in gross income as guaranteed payments from certain annuity or life insurance contracts. Limits the amount of such exclusion to $20,000 in any taxable year. Provides for an inflation adjustment of the $20,000 limitation beginning in 2009.

- SHORT TITLE(S) AS INTRODUCED:
  Currency Reform for Fair Trade Act of 2007
- OFFICIAL TITLE AS INTRODUCED:
  To provide for identification of misaligned currency, require action to correct the misalignment, and for other purposes.

MAJOR ACTIONS: [SELECTED] *(dates in italics indicate Senate actions)* For more details, see: Bill Status Display.

NONE

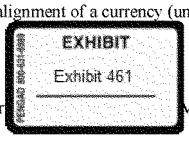
COMMITTEE(S):

Committee/Subcommittee:	Activity:
House Ways and Means	Referral, In Committee
Subcommittee on Trade	Referral
House Financial Services	Referral, In Committee
House Foreign Affairs	Referral, In Committee

SUMMARY AS OF:
6/28/2007--Introduced.

Currency Reform for Fair Trade Act of 2007 - Amends the Tariff Act of 1930 to expand the authority of the administering authority or the International Trade Commission (ITC) to impose countervailing duties on products from a nonmarket economy country that have been provided a countervailable subsidy. Requires, when measuring subsidy benefits, the use of benchmarks outside of a nonmarket economy country when benchmarks in such a country are not available or are inappropriate.

Includes fundamental and actionable misalignment of a currency (undervaluation of a foreign currency) by a



foreign country as a countervailable subsidy.

Directs the Secretary of the Treasury (Secretary) to: (1) report annually to Congress on international monetary policy and currency exchange rates (including fundamentally misaligned currencies); (2) analyze semiannually the prevailing real exchange rates between the U.S. dollar and foreign currencies and to designate fundamentally misaligned foreign currencies for priority action; and (3) seek bilateral consultations with fundamentally misaligned currency countries designated for priority action to eliminate such misalignment.

Requires the United States to inform the Managing Director of the International Monetary Fund (IMF) of countries that fail to eliminate fundamentally misaligned currencies designated for priority action and to request the IMF Managing Director to consult with such countries regarding their observance of the IMF Articles of Agreement and to report the results of such consultations to the IMF Executive Board. Prohibits the Overseas Private Investment Corporation (OPIC) from, and instructs multilateral banks to oppose, financing projects in countries that issue fundamentally misaligned currencies designated for priority action.

Requires: (1) the Secretary to take certain actions with respect to countries that fail to eliminate fundamentally misaligned currencies designated for priority action; and (2) the United States Trade Representative (USTR) to request consultations in the World Trade Organization (WTO) with such countries regarding the consistency of their actions with regard the WTO Agreement.

Establishes an Advisory Committee on International Exchange Rate Policy.

Repeals the Exchange Rates and International Economic Policy Coordination Act of 1988.

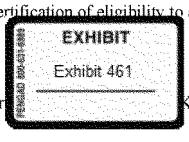
Committee/Subcommittee:	Activity:
House Ways and Means	Referral, In Committee
Subcommittee on Trade	Referral
House Education and Labor	Referral, In Committee
House Energy and Commerce	Referral, In Committee
House Oversight and Government Reform	Referral, In Committee

SUMMARY AS OF:
10/10/2007--Introduced.

Trade Adjustment Assistance Improvement Act - Amends the Trade Act of 1974 to allow the filing of a petition with the Secretary of Labor for certification of eligibility to apply for trade adjustment assistance



CSOC.CBR.00032460

(TAA) by adversely affected workers in a service sector firm, its subdivision, or a public agency.

Revises group eligibility requirements for TAA to cover: (1) a shift, by a public agency to a foreign country, of production of articles or in provision of services, like or directly competitive with articles which are produced, or services which are provided by the workers' firm, subdivision, or public agency; and (2) instances where the workers' firm, subdivision, or public agency obtains or is likely to obtain such services from a foreign country.

Provides for industry-wide certification of adversely affected workers for TAA.

Increases the amount of payments for training of adversely affected workers under the Act.

TAA Health Coverage Improvement Act of 2007 - Amends the Internal Revenue Code to increase the tax credit for the health insurance costs of certain TAA workers and Pension Benefit Guaranty Corporation (PBGC) pension recipients.

Sets forth requirements to prevent a lapse of health care coverage for TAA workers and their families.

Replaces alternative trade adjustment assistance for older workers provisions with eligibility requirements for wage insurance benefits to older workers who have received an industry-wide certification to apply for TAA.

Increases the maximum allowance to cover costs of an adversely affected worker for job search expenses and relocation expenses.

Establishes an Office of the Trade Adjustment Assistance Ombudsman.

Extends the TAA program for workers through FY2012.

Revises the TAA program for communities negatively impacted by trade. Establishes a TAA for communities program to coordinate the federal response.

Allows the filing of a petition with the Secretary of Commerce for certification of eligibility to apply for TAA by a service sector firm. Extends the TAA program for firms through FY2012.

Extends the TAA program for farmers through FY2012.

House Ways and Means	Referral, In Committee
Subcommittee on Trade	Referral
House Financial Services	Referral, In Committee
Subcommittee on Domestic and International Monetary Policy, Trade, and Technology	Referral
House Foreign Affairs	Referral, In Committee
House Armed Services	Referral, In Committee

SUMMARY AS OF:
1/31/2007--Introduced.

CSOC.CBR.00032462

Fair Currency Act of 2007 - Amends the Tariff Act of 1930 to expand the authority of the administering authority or the International Trade Commission (ITC) to impose countervailing duties on products from a nonmarket economy country that have been provided a countervailable subsidy. Includes exchange-rate misalignment (undervaluation of a foreign currency) by a country as a countervailable subsidy. Requires the administering authority to use methodologies that measure certain benchmarks outside of a nonmarket economy country where exchange-rate misalignment exists when measuring the benefit of a countervailable subsidy bestowed on a product by such country in a countervailing duty proceeding.

Amends the Trade Act of 1974 to include exchange-rate misalignment by the People's Republic of China as a condition in determining market disruption to the domestic producers of a like or directly competitive product from products imported from China.

Prohibits the Department of Defense (DOD) from procuring defense articles imported from China if such articles are competitive with domestic industry articles critical to the defense industrial base of the United States.

Applies provisions of this Act to goods from Canada and Mexico.

Amends the Exchange Rates and International Economic Policy Coordination Act of 1988 to direct the Secretary of the Treasury to consider in the annual analysis of foreign exchange rate policies whether countries have a currency that is in fundamental misalignment, and if so, to initiate bilateral corrective negotiations.

Directs the Secretary, prior to U.S. approval of a change in an international financial institution's governance, to determine whether a member who would benefit from such change has a currency that is manipulated or in fundamental misalignment, and if so, oppose such change.

Amends the Tariff Act of 1930 to require the administering authority, in determining whether a country is a nonmarket economy country, to consider whether such country's manipulation or fundamental misalignment of its currency adversely affects the U.S. economy.

SUMMARY AS OF:
2/28/2007--Introduced.

Nonmarket Economy Trade Remedy Act of 2007 - Amends the Tariff Act of 1930 to apply countervailing duties to nonmarket economies.

Authorizes the use of alternative methodologies in determining whether a subsidy is countervailable with respect to the People's Republic of China (PRC).

Requires congressional approval for revocation of nonmarket economy country determinations made by the administering authority.

CSOC.CBR.00032473

Requires a United States International Trade Commission study of how the PRC uses government intervention to promote investment, employment, and exports.

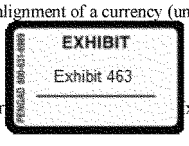
COMMITTEE(S):

Committee/Subcommittee:	Activity:
House Ways and Means	Referral, In Committee
Subcommittee on Trade	Referral
House Financial Services	Referral, In Committee
House Foreign Affairs	Referral, In Committee

SUMMARY AS OF:
6/28/2007--Introduced.

Currency Reform for Fair Trade Act of 2007 - Amends the Tariff Act of 1930 to expand the authority of the administering authority or the International Trade Commission (ITC) to impose countervailing duties on products from a nonmarket economy country that have been provided a countervailable subsidy. Requires, when measuring subsidy benefits, the use of benchmarks outside of a nonmarket economy country when benchmarks in such a country are not available or are inappropriate.

Includes fundamental and actionable misalignment of a currency (undervaluation of a foreign currency) by a



foreign country as a countervailable subsidy.

Directs the Secretary of the Treasury (Secretary) to: (1) report annually to Congress on international monetary policy and currency exchange rates (including fundamentally misaligned currencies); (2) analyze semiannually the prevailing real exchange rates between the U.S. dollar and foreign currencies and to designate fundamentally misaligned foreign currencies for priority action; and (3) seek bilateral consultations with fundamentally misaligned currency countries designated for priority action to eliminate such misalignment.

Requires the United States to inform the Managing Director of the International Monetary Fund (IMF) of countries that fail to eliminate fundamentally misaligned currencies designated for priority action and to request the IMF Managing Director to consult with such countries regarding their observance of the IMF Articles of Agreement and to report the results of such consultations to the IMF Executive Board. Prohibits the Overseas Private Investment Corporation (OPIC) from, and instructs multilateral banks to oppose, financing projects in countries that issue fundamentally misaligned currencies designated for priority action.

Requires: (1) the Secretary to take certain actions with respect to countries that fail to eliminate fundamentally misaligned currencies designated for priority action; and (2) the United States Trade Representative (USTR) to request consultations in the World Trade Organization (WTO) with such countries regarding the consistency of their actions with regard the WTO Agreement.

Establishes an Advisory Committee on International Exchange Rate Policy.

Repeals the Exchange Rates and International Economic Policy Coordination Act of 1988.

SUMMARY AS OF:
12/14/2007--Public Law. (There are 2 other summaries)

(This measure has not been amended since it was introduced. The expanded summary of the Senate passed version is repeated here.)

United States-Peru Trade Promotion Agreement Implementation Act - **Title I: Approval of, and General Provisions Relating to, the Agreement** - (Sec. 101) Approves the United States-Peru Trade Promotion Agreement entered into on April 12, 2006 (and amended on June 24 and June 25, 2007) with the government of Peru and the statement of administrative action proposed to implement the Agreement, both submitted to Congress on September 27, 2007. Provides for the Agreement's entry into force upon certain conditions being met on or after January 1, 2008.

(Sec. 103) Authorizes the President to proclaim actions, and other appropriate officers of the U.S. government to issue regulations, necessary to ensure appropriate implementation of any provision of this Act that takes effect on the date the Agreement enters into force. Declares that proclaimed actions that are not subject to consultation and layover requirements under this Act shall not take effect before the 15th day after the text of the proclamation is published in the Federal Register. Provides that presidential proclamations calling for action under this Act may be proclaimed only if: (1) the President has obtained advice regarding the proposed action from the appropriate advisory committees and the U.S. International Trade Commission (ITC); (2) the President has reported to specified congressional committees with respect to such action; (3) a period of 60 days has expired; and (4) the President has consulted with the appropriate congressional committees during such 60-day period.

(Sec. 105) Authorizes the President to establish or designate within the Department of Commerce an office to provide administrative assistance to dispute settlement panels established under the Agreement. Authorizes appropriations.

(Sec. 106) Authorizes the United States to resolve any claim against it covered by the Agreement, pursuant to the Investor-State Dispute Settlement procedures set forth in the Agreement.

Title II: Customs Provisions - (Sec. 201) Authorizes the President to proclaim necessary or appropriate modifications or continuation of duty, continuation of duty-free or excise treatment, or additional duties to carry out the Agreement.

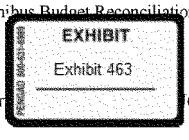
Requires the President to terminate the designation of Peru as a beneficiary developing country for purposes of the General System of Preferences program under the Trade Act of 1974 on the date the Agreement enters into force.

Authorizes the President, subject to the consultation and layover requirements of this Act, to deem as necessary or appropriate to maintain the general level of reciprocal and mutually advantageous concessions provided for by the Agreement such: (1) modifications or continuation of any duty; (2) modifications as the United States may agree to with Peru regarding the staging of any duty treatment specified in the Agreement; (3) continuation of duty-free or excise treatment; or (4) additional duties.

(Sec. 202) Provides for additional duties, under specified conditions, on certain agricultural safeguard goods.

(Sec. 203) Prescribes certain rules of origin with respect to the reduction and elimination of duties imposed by the United States and Peru on certain goods wholly obtained or produced entirely in the territory of the other country. Specifies content requirements allowing certain textile and apparel goods to be considered originating goods. Prescribes a special rule for certain automotive goods.

(Sec. 204) Amends the Consolidated Omnibus Budget Reconciliation Act of 1985 to prohibit the charge of a



CSOC.CBR.00032478

fee for certain customs services with respect to originating goods under the Agreement. Prohibits any service exempted from such fees from being funded with money from the Customs User Fee Account.

(Sec. 205) Amends the Tariff Act of 1930 to exempt: (1) an importer from penalties for making an incorrect claim that a good qualifies as an originating good under the Agreement if the importer voluntarily and promptly makes a corrected declaration and pays any duties owing; and (2) an exporter or producer from penalties for making false certifications of origin under the Agreement if such person, promptly after issuing such certification, has reason to believe that it contains or is based on incorrect information, and voluntarily provides a written notice to every recipient of it. Exempts persons from penalties if: (1) the information was correct at the time it was provided in a Peru Trade Promotion Agreement (PTPA) certification of origin but was later rendered incorrect because of a change in circumstances; and (2) the person promptly and voluntarily provides written notice of the change in circumstances to all recipients of such certification.

Provides that, if the U.S. Customs and Border Protection (CBP) or U.S. Immigration and Customs Enforcement of the Department of Homeland Security finds indications of a pattern of conduct by an importer, exporter, or producer of false or unsupported representations that goods qualify under the rules of origin, CBP may suspend preferential tariff treatment under the Agreement for entries of identical goods covered by subsequent representations by the individuals until it determines that the representations conform with such rules.

(Sec. 206) Authorizes the Customs Service to reliquidate an entry and refund any excess duties (including merchandise processing fees) paid on a good qualifying under the rules of origin for which no claim for preferential treatment was made at the time of importation if the importer takes certain actions within one year after such importation.

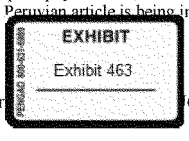
(Sec. 207) Requires a person who issues a PTPA certification of origin for a good exported from the United States to make, keep for at least five years after such certification is issued, and render for examination and inspection all records and supporting documents related to such certification.

(Sec. 208) Authorizes the President to direct the Secretary of the Treasury, during the period of a verification procedure by the government of Peru, to determine: (1) that an exporter or producer in Peru is complying with applicable customs laws, regulations, and procedures regarding trade in textile or apparel goods; or (2) that a claim is accurate that such a good exported or produced by the exporter or producer qualifies as an originating good, or is a good of Peru.

Requires the Secretary to: (1) suspend preferential tariff treatment under the Agreement of any textile or apparel good that a person subject to such verification has produced or exported if the Secretary believes there is insufficient information to sustain a claim for such treatment; (2) deny preferential treatment to such goods if the Secretary decides that a person has provided incorrect information to support a claim for such treatment; (3) detain such goods if the Secretary considers there is insufficient information to determine their country of origin; and (4) deny entry to such goods if the Secretary determines that a person has provided erroneous information of their origin.

Authorizes: (1) the President to deny preferential treatment and entry into the United States to such textile and apparel goods, if the Secretary determines that the information obtained from verification is insufficient to make a determination; and (2) the Secretary to publish the name of any person engaged in circumvention of applicable laws, regulations, or procedures affecting trade in such goods, or who has failed to demonstrate that it produces or is capable of producing them.

Title III: Relief From Imports - Subtitle A: Relief From Imports Benefiting From the Agreement - (Sec. 311) Authorizes an entity (including a trade association, firm, certified or recognized union, or group of workers) to petition the ITC for an adjustment to U.S. obligations under the Agreement. Requires the ITC, upon the filing of a petition, to investigate promptly whether, as a result of the reduction or elimination of a duty provided for under the Agreement, a Peruvian article is being imported into the United States in such



CSOC.CBR.00032479

increased quantities as to be a substantial cause or threat of serious injury to the domestic industry producing an article like, or directly competitive with, the imported article. Exempts from such an investigation any Peruvian articles receiving import relief under the Agreement.

(Sec. 313) Requires the President, after receiving an affirmative injury determination from the ITC, to provide (including the extension) in the aggregate up to four-years of import relief to remedy or prevent such injury and to facilitate efforts of the domestic industry to make a positive adjustment to import competition. Includes among such relief measures: (1) suspension of any further reduction provided by the Agreement in the duty imposed on such article; and (2) an increase in the rate of duty imposed on such article to a level that does not exceed an amount determined according to a specified formula.

(Sec. 314) Prohibits any import relief 10 years after the Agreement enters into force, except for articles whose period for tariff elimination exceeds 10 years.

(Sec. 315) Applies to the four-year import relief provided by the President (see section 313, above) the compensation authority of the Trade Act of 1974 which authorizes the President to grant Peru new concessions as compensation for the imposition of import relief in a bilateral safeguard investigation in order to maintain the general level of reciprocal concessions under the Agreement.

(Sec. 316) Amends the Trade Act of 1974 to apply to ITC investigations conducted under this Act the procedural requirements of the Tariff Act of 1930 concerning release of confidential business information.

Subtitle B: Textile and Apparel Safeguard Measures - (Sec. 321) Authorizes an interested party to request the President to adjust U.S. obligations under the Agreement. Requires the President, pursuant to such a request, to determine whether, as a result of the elimination of a duty under the Agreement, a Peruvian textile or apparel article is being imported into the United States in such increased quantities as to constitute a substantial cause or threat of serious damage to a domestic industry producing an article like, or directly competitive with, the imported article.

(Sec. 322) Authorizes the President, if an affirmative serious damage determination is made, to provide certain import relief to remedy or prevent the damage and to facilitate adjustment by the domestic industry, including to increase the rate of duty imposed on the article to a level that does not exceed an amount determined according to a specified formula.

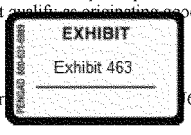
(Sec. 323) Limits such relief (including the extension) in the aggregate to three years.

(Sec. 326) Prohibits any import relief under this subtitle with respect to any article five years after the Agreement enters into force.

(Sec. 327) Applies to any import relief provided by the President under this subtitle the compensation authority of the Trade Act of 1974, which authorizes the President to grant Peru new concessions as compensation for the imposition of import relief in a textile and apparel safeguard proceeding, in order to maintain the general level of reciprocal concessions under the Agreement.

(Sec. 328) Prohibits the President from releasing confidential business information received in connection with an investigation or determination under this subtitle unless the submitting party had notice, at the time of submission, that such information would be released, or the party subsequently consents to such release. Requires any party submitting such confidential business information also to provide a nonconfidential version of the information, in which the confidential business information is summarized or, if necessary, deleted.

Subtitle C: Cases Under Title II of the Trade Act of 1974 - (Sec. 331) Requires the ITC, whenever it makes an affirmative determination that an imported article constitutes a substantial cause or threat of serious injury to a domestic industry producing an article like or directly competitive with it, also to find (and report to the President) whether imports from Peru that qualify as originating goods are a substantial cause or threat of



CSOC.CBR.00032480

serious injury to such industry. Authorizes the President to exclude goods of Peru from any import relief action if they are not a substantial cause or threat of serious injury to the domestic industry.

Title IV: Procurement - (Sec. 401) Amends the Trade Agreements Act of 1979 to make eligible for U.S. government procurement products or services of a foreign country or instrumentality that is a party to the Agreement.

Title V: Trade in Timber Products of Peru - (Sec. 501) Directs the President to establish an Interagency Committee to oversee and obtain verification whether the producer or exporter of Peruvian timber products to the United States has complied with applicable laws of Peru governing the harvest of, and trade in, such products. Authorizes the Committee to direct CBP to take certain action including to detain or deny entry of shipments of Peruvian timber products pending verification.

(Sec. 502) Requires the United States Trade Representative (USTR) to report to Congress on steps taken by the United States and Peru on carrying out the Agreement with respect to trade in timber products of Peru.

Title VI: Offsets - (Sec. 601) Amends the Consolidated Omnibus Budget Reconciliation Act of 1985 to extend certain customs fees for the processing of merchandise entered into the United States through December 13, 2014.

(Sec. 602) Amends the Tax Increase Prevention and Reconciliation Act of 2005 to increase the amount of any corporate estimated tax installment otherwise due by a corporation with assets of not less than $1 billion in July, August, or September 2012 to 115.75% of such amount.

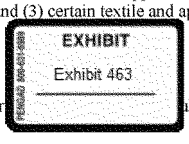
SUMMARY AS OF:
4/8/2008--Introduced.

United States-Colombia Trade Promotion Agreement Implementation Act - Approves the United States-Colombia Trade Promotion Agreement (the Agreement) entered into with the government of Colombia. Provides for the Agreement's entry into force upon certain conditions being met on or after January 1, 2009.

Authorizes the President to proclaim actions, and other appropriate officers of the U.S. government to issue regulations, necessary to ensure appropriate implementation of any provision of this Act that takes effect on the date the Agreement enters into force.

Provides for: (1) administration of dispute settlement proceedings; (2) arbitration of certain claims against the United States; and (3) specified tariff modifications.

Prescribes requirements for: (1) enforcement of textile and apparel rules of origin; (2) actions for relief from imports benefiting from the Agreement; and (3) certain textile and apparel safeguard measures.



Amends the Trade Agreements Act of 1979 to make eligible for U.S. government procurement products or services of a foreign country or instrumentality that is a party to the Agreement.

Provides for the following offsets: (1) amends the Consolidated Omnibus Budget Reconciliation Act of 1985 to extend the authority for the collection of customs user fees for a specified period; and (2) amends the Tax Increase Prevention and Reconciliation Act of 2005 to increase by one percentage point the current increased percentage of any required installment of corporate estimated tax otherwise due in July, August, or September 2012, and by two percentage points the amount of any required installment of corporate estimated tax otherwise due in July, August, or September 2013.

SUMMARY AS OF:
9/23/2008--Passed Senate amended. (There are 3 other summaries)

Energy Improvement and Extension Act of 2008 - Amends the Internal Revenue Code to extend and modify expiring provisions related to energy production and conservation and to provide for revenue enhancements.

Title I: Energy Production Incentives - Subtitle A: Renewable Energy Incentives - (Sec. 101) Extends the tax credit for the production of electricity from renewable resources: (1) through 2009 for wind and refined coal facilities; and (2) through 2010 for closed and open-loop biomass, geothermal or solar energy, small irrigation power, landfill gas, trash combustion, and hydropower facilities. Modifies tax credit rules for refined coal, trash, and biomass facilities and for hydropower production.

(Sec. 102) Includes marine and hydrokinetic renewable energy as a resource for purposes of the tax credit for producing electricity from renewable resources.

(Sec. 103) Extends through 2016 the energy tax credit for solar energy, fuel cell, and microturbine property. Allows a new energy tax credit for combined heat and power system property. Increases to $1,500 the credit limitation for fuel cell property. Modifies energy tax credit rules to allow: (1) offsets of tax credit amounts against alternative minimum tax (AMT) liabilities; and (2) public utility property to qualify for such credit.

(Sec. 104) Allows an energy tax credit through 2016 for qualified small wind energy property. Defines "qualified wind energy property" as property which uses a small wind turbine which has a nameplate capacity of not more than 100 kilowatts to generate electricity.

(Sec. 105) Allows an energy tax credit through 2016 for equipment which uses ground or ground water as a thermal energy source for heating or cooling (geothermal heat pump systems).

(Sec. 106) Extends through 2016 the tax credit for residential energy efficient property. Eliminates the limitation on the tax credit for solar electric property. Allows a residential energy tax credit for 30% of small wind energy and geothermal heat pump property expenditures.

(Sec. 107) Allows a new tax credit for investment in new clean renewable energy bonds for capital expenditures for renewable energy facilities.

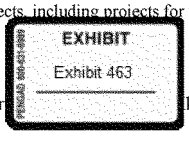
Extends through 2009 the authority to issue clean renewable energy bonds.

(Sec. 108) Includes steel industry fuel as a renewable resource for purposes of the tax credit for producing electricity from renewable resources. Defines "steel industry fuel" as fuel that: (1) is produced by liquefying coal waste sludge and distributing it on coal; and (2) is used as a feedstock for the manufacture of coke.

(Sec. 109) Extends through 2009 the deferral of tax on the gain on sales of transmission property by vertically-integrated electric utilities to independent transmission companies approved by the Federal Energy Regulatory Commission (FERC).

Subtitle B: Carbon Mitigation and Coal Provisions - (Sec. 111) Allows a 30% investment tax credit rate for advanced coal-based generation technology projects and increases the maximum credit amounts allocable for such projects to $2.55 billion.

Authorizes additional carbon energy projects, including projects for the capture and and sequestration of



CSOC.CBR.00032485

carbon dioxide.

(Sec. 112) Increases to 30% the investment tax credit rate for coal gasification projects and the aggregate credit amount for such projects.

(Sec. 113) Extends the excise tax on coal until the earlier of December 31, 2018, or the day after the first December 31st after December 31, 2007, on which there is no balance of repayable advances made to the Black Lung Disability Trust Fund and no unpaid interest on such advances. Makes a one-time appropriation to the Trust Fund to pay the difference between the market value of outstanding repayable advances (plus accrued interest), and the proceeds from the obligations issued by such Trust Fund to the Secretary of the Treasury.

(Sec. 114) Sets forth special rules for refund claims of the coal excise tax by certain coal producers and exporters.

(Sec. 115) Allows a new tax credit for carbon dioxide sequestration.

(Sec. 116) Provides for the treatment of certain income and gains from industrial source carbon dioxide as qualifying income for publicly traded partnerships.

(Sec. 117) Directs the Secretary of the Treasury to contract with the National Academy of Sciences for a comprehensive review of Internal Revenue Code provisions that have the largest effects on carbon and other greenhouse gas emissions and to estimate the magnitude of those effects. Requires the Academy to report to Congress on the results of such study not later than two years after the enactment of this Act. Authorizes appropriations.

Title II: Transportation and Domestic Fuel Security Provisions - (Sec. 201) Includes cellulosic biofuel within the definition of biomass ethanol plant property for purposes of bonus depreciation.

(Sec. 202) Extends through 2009 income and excise tax credits for biodiesel and renewable diesel used as fuel. Increases the rates of such credits.

(Sec. 203) Disqualifies foreign-produced fuel that is used or sold for use outside the United States from the income and excise tax credits for alcohol, biodiesel, and alternative fuel production.

(Sec. 204) Extends through 2009 the excise tax credit for alternative fuel and fuel mixtures. Requires such fuels to include compressed or liquefied biomass gas and to meet certain carbon capture requirements.

(Sec. 205) Allows a new tax credit for new qualified plug-in electric drive motor vehicles. Limits the amount of such credit based upon the gross vehicle weight rating of such vehicles. Terminates such credit after 2014.

(Sec. 206) Allows an exclusion from the heavy truck excise tax for idling reduction devices and advanced insulation used in certain heavy trucks and trailers.

(Sec. 207) Extends through 2010 the tax credit for alternative fuel vehicle refueling property expenditures. Includes electricity as a clean-burning fuel for purposes of such tax credit.

(Sec. 208) Provides for the treatment of certain income and gains from alcohol, biodiesel, and alternative fuels and mixtures as qualifying income for publicly traded partnerships.

(Sec. 209) Extends through 2013 the taxpayer election to expense the costs of certain refinery property.

(Sec. 210) Extends the suspension of the taxable income limit on percentage depletion for oil and natural gas produced from marginal properties.

CSOC.CBR.00032486

(Sec. 211) Allows employees to exclude reimbursements for bicycle commuting expenses from gross income.

Title III: Energy Conservation and Efficiency Provisions - (Sec. 301) Allows a new tax credit for investment in qualified energy conservation bonds for capital expenditures to reduce energy consumption in public buildings, implement green community programs, develop alternative and renewable energy sources, and promote mass commuting facilities.

(Sec. 302) Extends through 2009 the tax credit for nonbusiness energy property expenditures. Includes energy-efficient biomass fuel stoves as property eligible for such tax credit. Modifies tax credit standards for water heaters, geothermal heat pumps, and energy efficiency improvements.

(Sec. 303) Extends through 2013 the tax deduction for energy efficient commercial buildings.

(Sec. 304) Extends through 2009 the tax credit for residential energy efficiency improvements.

(Sec. 305) Modifies the tax credit amounts for energy efficient household appliances produced after 2007.

(Sec. 306) Allows an accelerated 10-year recovery period for the depreciation of qualified smart electric meters and smart electric grid systems.

(Sec. 307) Extends through FY2012 the authority to issue tax-exempt bonds for qualified green building and sustainable design projects.

(Sec. 308) Allows a 50% depreciation allowance for reuse and recycling property used to collect, distribute, or recycle certain materials, including scrap, fibers, and metals.

Title IV: Revenue Provisions - Sec. 401) Reduces by 3% the tax deduction for income attributable to domestic production activities for taxpayers with income derived from activities related to oil, gas, or any primary products thereof.

(Sec. 402) Revises the tax treatment of foreign oil and gas extraction income and foreign oil related income for purposes of the foreign tax credit.

(Sec. 403) Includes within the reporting requirements of investment brokers the adjusted basis of any publicly traded security owned by customers of such brokers.

(Sec. 404) Extends through 2009 the 0.2% Federal Unemployment Tax Act (FUTA) surtax.

(Sec. 405) Increases the Oil Spill Liability Trust Fund financing rate and extends such rate through 2017.

Division B: Tax Extenders and Alternative Minimum Tax Relief - Tax Extenders and Alternative Minimum Tax Relief Act of 2008 - **Title I: Alternative Minimum Tax Relief** - (Sec. 101) Amends the Internal Revenue Code to extend through 2008 for individual taxpayers: (1) the offset of nonrefundable personal tax credits against regular and alternative minimum tax (AMT) liability; and (2) the increased AMT exemption amounts.

Increases the AMT refundable credit amount for individuals who have long-term unused minimum tax credits from prior taxable years. Abates any underpayment of tax attributable to the application of special AMT rules for the treatment of incentive stock options.

Title II: Extension of Individual Tax Provisions - (Sec. 201) Extends through 2009: (1) the tax deduction for state and local sales taxes in lieu of state and local income taxes; (2) the tax deduction for qualified tuition and related expenses; (3) the tax deduction for certain expenses of elementary and secondary school teachers; (4)

CSOC.CBR.00032487

the additional standard tax deduction from gross income for real property taxes; (5) tax-free distributions from individual retirement plans for charitable purposes; (6) the exemption from withholding of tax of interest-related and short-term capital gain dividends received from a regulated investment company (RIC) and the special rule for RIC stock held in the estate of a nonresidents; and (7) the inclusion of a RIC within the definition of "qualified investment entity" for income tax purposes.

Title III: Extension of Business Tax Provisions - (Sec. 301) Extends through 2009: (1) the tax credit for increasing research activities; (2) the new markets tax credit; (3) the subpart F income exemption for active financing income; (4) special rules for related controlled foreign corporations and for the tax treatment of certain payments to tax-exempt organizations by a controlled subsidiary; (5) accelerated depreciation for qualified leasehold and restaurant improvements and for certain improvements to retail space; (6) the special rule for reductions in the basis of S corporation stock for charitable contributions of property; (7) the increase in alcohol excise taxes payable to Puerto Rico and the Virgin Islands; (8) the economic development credit for American Samoa; (9) tax incentives for mine rescue team training and advanced mine safety equipment; (10) the tax deduction for income attributable to domestic production activities in Puerto Rico; (11) issuance authority for qualified zone academy bonds; (12) the Indian employment tax credit; (13) accelerated depreciation of business property on Indian reservations and of motorsports racing track facilities; (14) the tax credit for railroad track maintenance; (15) expensing allowances for environmental remediation costs; (16) work opportunity tax credit eligibility for Hurricane Katrina employees (through August 28, 2009); (17) the increased rehabilitation tax credit for property in the Gulf Opportunity (GO) Zone; (18) the tax deduction for corporate contributions of computer technology and equipment for educational purposes; (19) tax incentives for investment in the District of Columbia; and (20) the expanded tax deductions for charitable contributions of food and book inventories by noncorporate taxpayers.

(Sec. 325) Extends through 2014: (1) the suspension of tariff duties on certain wool products; and (2) the Wool Research, Promotion, and Development Trust Fund.

Title IV: Extension of Tax Administration Provisions - (Sec. 401) Makes permanent the authority of the Internal Revenue Service (IRS) to: (1) conduct undercover operations; and (2) disclose tax return information related to terrorist activities.

Title V: Additional Tax Relief and Other Tax Provisions - Subtitle A: General Provisions - (Sec. 501) Lowers in 2008 (from $10,000 to $8,500) the earned income threshold amount for determining the refundable portion of the child tax credit.

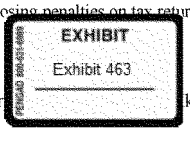
(Sec. 502) Amends Internal Revenue Code provisions relating to the tax deduction for domestic film and television productions to: (1) include within the income base for such deduction compensation for services performed in the United States by actors, production personnel, directors, and producers and any copyrights, trademarks, or other intangibles with respect to a film production; and (2) allow a deduction for partners or S corporation shareholders who own at least a 20% interest in a film project.

(Sec. 503) Exempts from the excise tax on bows and arrows certain shafts consisting of all natural wood that after assembly measure 5/16 of an inch or less in diameter and that are not suitable for use with bows that would otherwise be subject to such tax (having a peak draw weight of 30 pounds or more).

(Sec. 504) Allows taxpayers who are plaintiffs in the civil action *In re Exxon Valdez*, No. 89-095-CV (HRH) (Consolidated) (D. Alaska), or their heirs or dependents, to: (1) elect to average, for income tax purposes, income received in settlement of such civil action; and (2) make a limited contribution of such settlement income to certain tax-exempt retirement plans in the year such income is received.

(Sec. 505) Allows accelerated depreciation (i.e., five-year recovery period) for certain farming business machinery or equipment placed in service before January 1, 2010.

(Sec. 506) Modifies the standards for imposing penalties on tax return preparers for understatements of tax to



CSOC.CBR.00032488

require: (1) substantial authority for a position with respect to an item on a tax return if such position was not disclosed with the return; and (2) a reasonable basis for a position that was disclosed with the return.

Requires tax return preparers to have a reasonable belief that a position with respect to a tax shelter or a reportable transaction (a transaction having a potential for tax avoidance or evasion) will more likely than not be sustained on its merits.

Subtitle B: Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008 - Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008 - (Sec. 512) - Amends the Employee Retirement Income Security Act of 1974 (ERISA), the Public Health Service Act, and the Internal Revenue Code to require a group health plan that provides both medical and surgical benefits and mental health or substance use disorder benefits to ensure that: (1) the financial requirements, such as deductibles and copayments, applicable to such mental health or substance use disorder benefits are no more restrictive than the predominant financial requirements applied to substantially all medical and surgical benefits covered by the plan; (2) there are no separate cost sharing requirements that are applicable only with respect to mental health or substance use disorder benefits; (3) the treatment limitations applicable to such mental health or substance use disorder benefits are no more restrictive than the predominant treatment limitations applied to substantially all medical and surgical benefits covered by the plan; and (4) there are no separate treatment limitations that are applicable only with respect to mental health or substance use disorder benefits.

Requires the criteria for medical necessity determinations and the reason for any denial of reimbursement or payment for services made under the plan with respect to mental health or substance use disorder benefits to be made available by the plan administrator.

Requires the plan to provide out-of network coverage for mental health or substance use disorder benefits if the plan provides coverage for medical or surgical benefits provided by out-of network providers.

Exempts from the requirements of this Act a group health plan if the application of this Act results in an increase for the plan year of the actual total costs of coverage with respect to medical and surgical benefits and mental health and substance use disorder benefits by an amount that exceeds 2% for the first plan year and 1% for each subsequent plan year. Requires determinations as to increases in actual costs under a plan to be made and certified by a qualified and licensed actuary.

Requires determinations for such an exemption to be made after such plan has complied with this Act for the first six months of the plan year.

Sets forth requirements for notifications of exemptions under this Act, including notification of the Secretary of Health and Human Services, the appropriate state agencies, and participants and beneficiaries in the plan.

Authorizes the Secretary and the appropriate state agency to audit the books and records of a group health plan relating to an exemption.

Directs the Secretary to: (1) report to the appropriate congressional committees on compliance of group health plans with the requirements of this Act; and (2) publish guidance and information concerning the requirements of this Act and provide assistance concerning such requirements and the continued operation of applicable state law.

Requires the Comptroller General to report to Congress on the specific rates, patterns, and trends in coverage and exclusion of specific mental health and substance use disorder diagnoses by health plans and health insurance.

Title VI: Other Provisions - (Sec. 601) Revises the provisions of the Secure Rural Schools and Community Self-Determination Act of 2000.

CSOC.CBR.00032489

Provides for: (1) calculating payments to eligible states, counties, and territories for FY2008-FY2011 and; (2) the making of transition payments for FY2008-FY2010 to California, Louisiana, Oregon, Pennsylvania, South Carolina, South Dakota, Texas, and Washington. Sets forth distribution, election, and expenditure rules.

Permits eligible electing counties to expend a portion of funds received for the protection, restoration, and enhancement of fish and wildlife habitat, and other consistent resource objectives upon project approval.

Sets forth requirements for a merchantable timber contracting pilot program.

Revises provisions concerning resource advisory committees and the use and availability of project funds for projects submitted by such committees. Terminates authority to initiate projects on September 30, 2011.

Revises provisions for the use of county funds for certain projects. Requires certification by participating counties that county funds have been expended only for authorized uses. Terminates authority to initiate such projects on September 30, 2011.

Authorizes appropriations for FY2008-FY2011 to carry out the Secure Rural Schools and Community Self-Determination Act of 2000.

Amends the Act of May 23, 1908, and the Weeks Law to prescribe that an amount equal to the annual average of 25% of all amounts received for the applicable fiscal year and each of the preceding six fiscal years from each national forest (under current law, 25% of all moneys received during any fiscal year) be paid at the end of such year to eligible states and counties for the benefit of public schools and public roads in which such forests are situated.

Amends federal law regarding payment in lieu of taxes to provide, for FY2008-FY2012, for each county or other eligible unit of local government to be entitled to payment for entitlement land (certain land owned by the U.S. government).

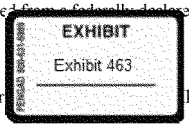
(Sec. 602) Amends the Surface Mining Control and Reclamation Act of 1977 to require the transfer of $9 million on October 1, 2010, to the United Mine Workers of America Combined Benefit Fund to provide for refunds of certain health benefit premiums, death benefit premiums, and unassigned beneficiaries premiums.

Title VII: Disaster Relief - Subtitle A: Heartland and Hurricane Ike Disaster Relief - Heartland Disaster Tax Relief Act of 2008 - Makes certain provisions of the Internal Revenue Code providing tax benefits to residents of the Gulf Opportunity (GO) Zone and the Hurricane Katrina disaster areas, including provisions for tax-exempt bond financing, the low-income housing tax credit, an increased rehabilitation tax credit, education and housing tax benefits, employee retention tax credits, and tax-exempt bond financing, applicable to residents of the Midwestern disaster area on a similar basis. Defines "Midwestern disaster area" as an area in which a major disaster has been declared by the President on or after May 20, 2008, and before August 1, 2008, under the Robert T. Stafford Disaster Relief and Emergency Assistance Act by reason of severe storms, tornados, or flooding occurring in any of the states of Arkansas, Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, and Wisconsin.

(Sec. 703) Includes within the reporting requirements of tax-exempt public charities information about disaster relief activities and contributions received for those purposes.

(Sec. 704) Extends through 2010 tax-exempt bond financing and low-income housing tax credit benefits to the Hurricane Ike disaster area. Defines the "Hurricane Ike disaster area" as an area in Texas or Louisiana that was declared a major disaster area by the President by reason of Hurricane Ike and that was determined by the President to warrant federal assistance.

Subtitle B: National Disaster Relief - (Sec. 706) Waives the 10% adjusted gross income limitation on personal casualty losses for losses sustained from a federally declared disaster occurring before January 1,



CSOC.CBR.00032490

2010. Defines "federally declared disaster" as any disaster determined by the President to warrant federal assistance under the Robert T. Stafford Relief and Emergency Assistance Act.

Increases the standard tax deduction by a taxpayer's net disaster loss (i.e., personal casualty losses in a disaster area over personal casualty gains).

Increases until December 31, 2009, the threshold for deductible casualty losses from $100 to $500.

(Sec. 707) Allows the expensing of business-related costs incurred due to a federally declared disaster for: (1) the abatement or control of hazardous substances; (2) removal of debris or demolition of damaged structures; or (3) repair of damaged property.

(Sec. 708) Provides for a five-year carryback period for net operating losses attributable to a federally declared disaster. Allows such losses as a deduction in computing alternative minimum taxable income.

(Sec. 709) Modifies certain mortgage revenue bond requirements for principal residences damaged or destroyed in a federally declared disaster occurring before January 1, 2010.

(Sec. 710) Allows accelerated depreciation and increases the expensing allowance for qualified disaster assistance property. Defines "qualified disaster assistance property" to include nonresidential real or residential rental property in a federally declared disaster area.

Title VIII: Spending Reductions and Appropriate Revenue Raisers for New Tax Relief Policy - (Sec. 801) Requires the inclusion in gross income for income tax purposes of employee compensation deferred under a nonqualified deferred compensation plan of a nonqualified entity when there is no substantial risk of forfeiture of the rights to such compensation. Defines "nonqualified entity" as any foreign corporation unless substantially all of its income is: (1) effectively connected with a trade or business in the United States; or (2) subject to a comprehensive foreign income tax. Includes certain partnerships within such definition.

RE: Attached Letter - Vietnam

3 Pages

Brad,

As discussed, attached is a draft of a letter that we hope Speaker Hastert and Congressman Rangel might consider signing off on. Please let me know what I need to do as far as follow-up is concerned.

If Speaker Hastert and Congressman Rangel would agree to the letter, it would be greatly appreciated if we could get a copy of the signed letters.

Thank you.

DRAFT

H.E. Phan Van Khai
Prime Minister
Socialist Republic of Vietnam

Dear Prime Minister Phan Van Khai:

We are writing to bring your attention to a matter that is of great concern to us as Vietnam conducts bilateral negotiations, including with the United States, to enter the World Trade Organization (WTO). It is our understanding that no U.S. company has yet received a general insurance license to operate in Vietnam. It will be difficult for us to support any U.S.-Vietnam bilateral agreement if Vietnam does not first grant a general insurance license to a U.S. company.

We understand that American International Group (AIG) -- a leading U.S. insurance company -- is seeking a 100% owned general insurance license in Vietnam, and that its application has been pending for more than 12 years before your government. We also understand that a German and a French company have already received 100% owned general insurance licenses. The immediate approval of AIG's general insurance application would send a strong signal to the U.S. Congress that Vietnam is serious about providing U.S. companies the same market opportunities as other foreign companies.

AIG was one of the leading early supporters of normalized political and economic relations between the U.S. and Vietnam, and is currently a strong supporter of Vietnam's bid to join the WTO. We also understand that AIG has been active in Vietnam for more than a decade, supporting training and other philanthropic activities to help Vietnam and its citizens reach key economic development objectives. AIG has even supported fellowship programs for Vietnamese officials to visit the U.S. to receive specialized training in economic management.

As you know, our two countries have enjoyed an increasingly strong trading relationship since the U.S.-Vietnam Bilateral Trade Agreement went into effect in 2001. In fact, the United States is now Vietnam's largest export market. We hope to continue building upon this strong trade relationship by supporting Vietnam's accession to the WTO. However, this will be difficult if U.S. companies continue to be excluded from the general insurance market in Vietnam. We understand that there are difficult domestic political considerations that accompany economic liberalization, but we strongly believe that fully opening a major service sector like insurance will benefit the Vietnamese economy, and further strengthen the economic relationship between the United States and Vietnam.

We appreciate your attention to the matter.

Sincerely,

4/20/05

Description of AIG's Priority Tax Concerns

1) Pending technical correction to section 965--the foreign earnings repatriation provision

The American Jobs Creation Act of 2004 (JOBS Act) added section 965 to the Internal Revenue Code to encourage U.S. multinationals to repatriate earnings currently held offshore back to the U.S. in an effort to foster domestic re-investment. House Ways and Means Committee Bill Thomas (R-CA) and Senate Finance Committee Chairman Chuck Grassley (R-IA) are preparing a technical corrections bill that would clarify certain JOBS Act provisions, including section 965. Section 965 provides multinationals a special one-time 85% dividends received deduction that has the effect of taxing such qualifying dividends at a rate of only 5.25%. For calendar year taxpayers, earnings must be repatriated in one of two years, either 2004 or 2005. As currently drafted, the provision provides no benefit to AIG, since a significant portion of AIG's prior foreign earnings have already been subject to U.S. tax under the subpart F regime and repatriated as earnings previously subject to U.S. taxation. In effect, AIG is penalized because a substantial portion of its offshore earnings is subject to current taxation under subpart F, and because those earnings have already been repatriated to the U.S., without additional U.S. tax cost.

The AIG Tax Department drafted a statutory amendment and accompanying explanation intended to make AIG eligible for section 965. Until recently, Mike Murphy and the Washington office have been coordinating a number of meetings with the tax staffs of each tax committee and the Treasury Department to address AIG's unique position. However, at this juncture, several political and legislative hurdles remain. Specifically, the tax committees have raised concerns about the "technical" nature of our suggested amendment and the possible revenue cost, although we believe that our proposed change would have a net positive revenue effect for the U.S. Treasury. At our request, Congressman Kevin Brady (R-TX) has asked the Joint Committee of Taxation (JCT) to prepare a formal revenue estimate for our proposed amendment. The JCT is the final arbiter of any proposed amendments revenue gain or loss. Assuming the revenue estimate is acceptable (i.e., little or no revenue loss), we will still need to address the political concerns raised by pressing an amendment that is very specific to AIG.

Written Testimony of The Honorable Frank G. Wisner
Vice Chairman External Affairs
American International Group, Inc. (AIG)
October 3, 2005

Chairman Thomas, Ranking Member Rangel and Members of the Committee, thank you for the opportunity to submit testimony on the proposed United States-Bahrain Free Trade Agreement, on behalf of American International Group, Inc.

American International Group, Inc. has both life and non-life insurance operations in the Kingdom of Bahrain and has a long commercial history in the Middle East region as a whole. For this reason, AIG has joined the U.S. Middle East Free Trade Coalition and fully supports its agenda in support of bilateral trade agreements between the United States and its trading partners in the Middle East, with a view to achieving the President's vision of a Middle East Free Trade Area by 2013.

AIG has had a presence in Bahrain since 1959. As an American business that enjoys a historical relationship with the Kingdom, we strongly support this agreement. This agreement builds on the existing Bilateral Investment Treaty and offers increased investor protection, improved transparency and increased access to a market where American business is already made welcome. The improved conditions that this agreement offers will provide American companies, already licensed in Bahrain, with the opportunity to expand their client base and business.

It is to United States' strategic and commercial advantage to enter into the proposed Free Trade Agreement. Bahrain, a U.S. naval base since 1947, is currently home to the U.S. Navy's 5th Fleet and the United States has long enjoyed a strong strategic relationship with the Kingdom of Bahrain. In addition, the Kingdom has provided a stable and predictable commercial operating environment for American businesses in the Gulf region for many years.

The Government of Bahrain is not only committed to market liberalization but also to social change that offers increased opportunity to members of its population to actively participate in and benefit from improved business prospects. Over the last two years, Bahrain has made extraordinary efforts to institute democratic reforms. Bahrain is now a constitutional monarchy with an elected lower chamber of parliament. Its Judiciary is independent and women are afforded the right to vote and to stand for political office.

The Kingdom of Bahrain, a member of the Gulf Cooperation Council, has a historic tradition of commerce within the region and with nations worldwide. Therefore, the proposed Agreement offers regional business opportunities to American exporters of goods and services that may select Bahrain as their regional port of entry. As such, this Agreement is equally about the boosting of regional trade and thereby about the creation of meaningful job opportunities in the Kingdom and the Middle East region, all of which will ultimately assist in the improvement of political stability.

A free trade agreement with the Kingdom of Bahrain will provide a strong platform for increased business enterprise and job creation in this troubled region. The United States can only benefit from the conclusion of such an agreement with this well-seasoned and reliable trading partner, which offers abundant opportunities for American business. It is

therefore only right that the proposed Agreement, an instrument reflecting our relationship with the Kingdom, is before you for consideration.

AIG and its Middle East operations and their employees, look forward to Congress' approval of the proposed United States – Bahrain Free Trade Agreement that will provide them and other American businesses a privileged place in this important economy. I would be pleased to come before you and provide any additional information the Committee may request.

MEMORANDUM

DATE: May 15, 2006

TO: Ned Cloonan

FROM: James Chin
Ed Lee

RE: Trip Report: May 10, 2006

REDACTED

Congressman Charlie Rangel (D-NY)
We met with Chief of Staff George Dalley and talked about our math/science mandate and our discussion with City College. We also spent a few minute with Rangel who asked for you. George asked for occasional updates on our discussion on the Rangel Center.

American International Group, Inc.
70 Pine Street
New York, NY 10270

Dear Mssrs. Cloonan, Lee, and Chin:

On behalf of The City College of New York, I would like to thank you for the opportunity to present a proposal to American International Group, Inc. Our mutual friend, Congressman Charles B. Rangel, was kind enough to introduce us to each other and all of us at the College look forward to forging a partnership that will both attain your goals and meet CCNY's needs.

I understand that you seek to increase the number of young people entering science, technology, engineering, and mathematics (STEM) careers in the US, especially those from underrepresented populations. We seek that as well and have been one of the nation's foremost leaders in doing it.

Congressman Rangel, one of the greatest statesmen of our time, shares our goals and, because of that, has decided that City College is where he will establish the Charles B. Rangel Center to help train those very students in public service. We applaud your wish to honor him and his career and we would very much like to see AIG become an integral part of the Rangel Center.

RECEIVED
MAY 18 2006
J. CHIN

CONFIDENTIAL

EXHIBIT
Exhibit 468

In the enclosed proposal, we have drawn up a plan that will enable AIG to both support STEM students from underrepresented groups—the AIG STEM Program, and also perpetuate AIG's name and support through a permanent naming of the Charles B. Rangel Center's home—AIG Hall.

AIG's support of the AIG STEM Program will demonstrate its commitment to increasing the number of US-trained STEM professionals, and also signify an important commitment to diversity. AIG's naming of the Charles B. Rangel Center's home, AIG Hall, will stand as a tribute to this extraordinary individual and the values which define his personal and professional life.

The announcement of this commitment by AIG to The City College of New York and to the Charles B. Rangel Center would result in enormous visibility for AIG in the Harlem community. Friends of CCNY from within and outside of New York will join us, first when we announce these pioneering initiatives, and then, as we celebrate AIG's support of STEM, diversity, and Congressman Rangel at AIG Hall's groundbreaking ceremony.

Thank you very much for considering our proposal and I look forward to meeting you all soon.

Sincerely,

Gregory H. Williams
President

THE CITY COLLEGE MISSION

"Open the doors to all. Let the children of the rich and the poor take their seats together and know of no distinction save that of industry, good conduct, and intellect."

Townsend Harris
Founder

For over 157 years, City College has provided an avenue of upward mobility for talented students seeking a quality education. And for over 157 years, the College has educated generations of leaders in every profession. Often the children of immigrants or immigrants themselves, often the first ones in the family to attend college, and often working while taking on challenging academic programs, these talented students make their way toward success with diligence and determination.

Today's City College is a microcosm of New York City, with one of the most diverse student bodies of any college in America. Its more than 12,000 students carry on a tradition of excellence as they win prestigious awards and fellowships, gain acceptance to leading graduate and professional schools, and make their marks in the sciences, in the arts, in public service, in industry, and in education.

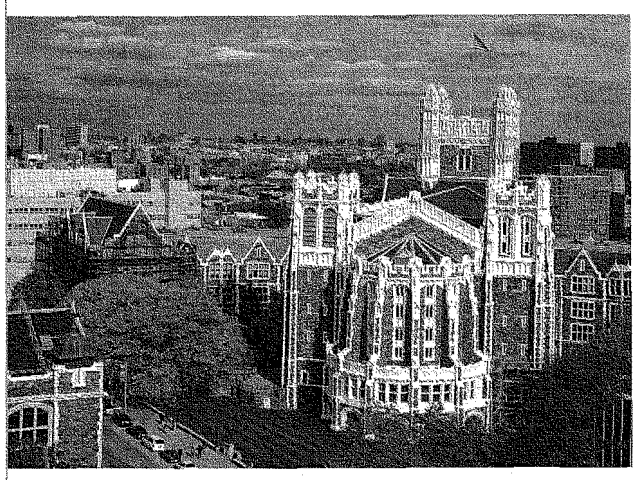
EXECUTIVE SUMMARY



City College seeks to attract and retain more high-achieving students in science, technology, engineering, and mathematics (STEM) through a combination of financial awards for tuition and other educational expenses, and academic student support services. CCNY especially wishes to encourage and support potential students from diverse populations underrepresented in STEM fields to apply to the College and graduate in those areas.

The growing need for graduates in these fields, coupled with declining numbers of such graduates produced in the US, provides an opportunity for City College to sustain its longstanding mission while also advancing institutional excellence and serving society's needs. To increase the overall number of excelling students in these much-needed fields, The City College of New York proposes a landmark program in partnership with American International Group to bring a select group of top students from US populations underrepresented in STEM to the College and help meet America's need for scientists and engineers. The program will be known as **the AIG STEM Program** and the participating students will be known as the AIG Scholars.

In addition, some of these AIG Scholars will continue on into the Charles B. Rangel Center for Public Service to earn their master's degree, so that they will be qualified to enter professions in government and public service requiring knowledge of science and engineering as well as an understanding of policy. CCNY's request to establish the AIG STEM Program is $1 million per year for five years.

CSOC.CBR.00024640

CSOC.CBR.00024640

They will study at **AIG Hall** at the Charles B. Rangel Center, named for American International Group, whose gift to restore the magnificent landmark mansion adjacent to the CCNY campus which will house the entire Rangel Center, will be AIG's investment in the future of this unique relationship between two vital programs. AIG Hall at CCNY will be a permanent and prominent fixture in Harlem, giving great visibility to AIG. CCNY's request to establish AIG Hall at the Charles B. Rangel Center is $1 million per year for five years.

The two interlinked programs come to a total gift of $10 million over five years.

Public Recognition of the AIG STEM Program

A commitment from American International Group to help meet these important needs and to name this important Center's home will command notice from New York City and New York State government officials, from the media, and from other corporate and individual leaders. City College will hold a press conference announcing the total gift, and together with the AIG leadership, invite the noteworthy figures below who are friends of CCNY to attend. The official opening of AIG Hall at the Rangel Center will be a resplendent and celebratory event, attended by City College's distinguished alumni and friends.

These include:

Former President William Jefferson Clinton
Former President George G. W. Bush
Governor George Pataki
Senators Hilary Clinton and Charles Schumer,
Congressman Charles B. Rangel
Attorney General Eliot Spitzer
General Colin L. Powell
His Excellency Kofi Anan, UN Secretary General
His Excellency Daniel Ayalon, Israeli Ambassador to the United States
Schools Chancellor Joel Klein
Mayor Michael Bloomberg
State Senator David Patterson, minority leader of the New York State Senate
The Honorable Basil Patterson, long time New York and Harlem political leader
New York State Harlem Assemblyman Keith Wright
Former Manhattan Borough President Percy Sutton
Former New York City Mayor David Dinkins
New York State Harlem Assemblyman Denny Farrell
Greater Harlem Chamber of Commerce President Lloyd Williams.

As benefactors of the City College of New York, AIG will become a part of the CCNY community and honored guests at all dinners, receptions, and events. As City College has become the important stop in Harlem for visiting dignitaries and political leaders, this visibility will attest to and demonstrate publicly AIG's support for higher education and greater opportunities for underrepresented minorities.

CSOC.CBR.00024641

The Critical Need for More U.S. Graduates in STEM

The increased national need for skilled technology workers is linked to ongoing strides in science, technology, engineering, and math, and the fact that America is now a digitized society. Many of the most important challenges we will face in the future require technological and scientific superiority. U.S. institutions of higher education, however, have not been able to meet the need and there is a critical shortage.

- The National Science Board, an independent body that advises Congress and oversees the National Science Foundation, recently warned of a 'troubling decline' in the number of U.S. citizens studying to become scientists and engineers, even as the number of jobs requiring science and engineering training grows. (August 6, 2004, article on the Computer Network web site entitled, "Brain Drain in Tech's Future?")

- The United States is facing a crisis in science and engineering talent and expertise. For decades, U.S. scientific and technological production and innovation flourished, largely because of the nation's ability to recruit talented American students into the science and engineering disciplines, and when domestic talent was unavailable, to import the best scientists and engineers from around the world. (*Envisioning a 21st Century Science and Engineering Workforce for the United States: Tasks for University, Industry, and Government* (2003) at the Government-University-Industry Research Roundtable at the University of Wisconsin)

- Harvard's Richard Freeman reported that in spite of the current U.S. leadership in scientific research and in "applying the results of research and development to practical economic problems... U.S. science and engineering would be in crisis" if they depended solely upon US graduates in these areas." (August 24, 2004, issue of the *Institute of Electronics and Electrical Engineers' Spectrum* magazine)

CSOC.CBR.00024642

As the nation seeks to locate these crucially needed scientists and engineers, one largely untapped resource are populations hitherto underrepresented in these fields. The current scarcity of US residents versed in technological fields is apparent to an even greater extent among minorities, allowing valuable talent to go unused and losing the advantages to society that diversity brings. In the post-9/11 era, this shortage has become increasingly critical as scientists and engineers from outside the US, on whom industry formerly relied to fill American commercial and academia deficiencies, are finding it more difficult to enter and remain in the US.

- Although more than a quarter of the American school-age population in the United States is made up of minority students, the working population of U.S. engineers is predominately white non-Hispanic, with a fair representation of Asians, but only a sprinkling of African-American, Hispanic and Native American participants. Despite a greater awareness of the need for diversity in engineering that occurred over the past decade, the historic pattern of under-representation for African-Americans, Hispanic-Americans, and Native Americans has changed very little. It will be a loss to the nation if America fails to capitalize today on the wealth of talent and ability represented by its increasingly diverse population. (July 2001 study undertaken by the Commission on Professionals in Science and Technology for the American Association for the Advancement of Science Making Strides entitled "Under-represented minorities in Engineering")

Similar statistics exist for minority scientists.

- The demographics of the United States are changing. Women and minorities together make up 60 percent of the total workforce, but they are dramatically underrepresented in Science and Engineering (S&E). Women comprise 46 percent of the total labor force, but only 23 per cent of the S&E labor force. African-Americans and ethnic minorities constitute 24 percent of the total population but only 7 percent of the S&E labor force. This means the majority of Americans is underrepresented in S&E. ("Envisioning a 21st Century Science and Engineering Workforce for the United States: Tasks for University, Industry, and Government," 2003)

- My argument is essentially that the quality of engineering is affected by diversity (or the lack of it). To support that argument, I am going to share with you some very deep beliefs about the nature of engineering, some of which run counter to stereotypes of engineers and engineering. The argument in a nutshell hinges on the notion that engineering is a profoundly creative profession — not the stereotype, I know, but something I believe deeply. The psychological literature tells us that creativity is not something that just happens. It is the result of making unexpected connections between things we already know. Hence, creativity depends on our life experiences. Without diversity, the life experiences we bring to an engineering problem are limited. (William A. Wulf, President, National Academy of Engineering, in "Diversity in Engineering: Managing the Workforce of the Future," 2002)

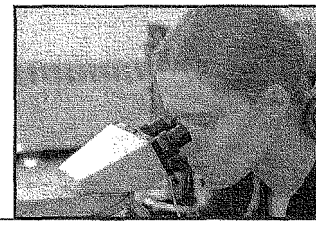

EXHIBIT
Exhibit 469

CSOC.CBR.00024643

CSOC.CBR.00024643

The City College of New York continues to play an important role in helping to fill the need for more STEM graduates and addressing the shortage. Poised to become one of the nation's leaders in education and research in these fields, City College proudly claims flagship programs in science, technology, engineering, and mathematics on its campus. City College, the oldest and most eminent among the City University's 19 member colleges, is the acknowledged leader in these fields of education and research. The City College campus was selected by CUNY for the new Center for Science, Technology, Engineering, and Mathematics Education, and City College faculty were chosen to staff the Center. CCNY has also been chosen to host the CUNY $175M Advanced Science Research Center.

City College Science and Engineering Faculty

Last year, City College hired 53 new full-time professors, including a patent-holding research chemist who is a member of the National Academy of Engineering and the National Research Council. According to the 2003 rankings of The University of Florida's Center for University Research, this brings the number of City College faculty members who are members of one of the three American scientific academies to 10, placing the College 36th among all public institutions of higher education nationwide.

Of these, eleven CCNY faculty members have been elected to the National Academy of Sciences or the National Academy of Engineering. With his election to the National Institute of Health, CUNY Distinguished Professor of Engineering Sheldon Weinbaum became one of only eight living members to be elected to all three. Distinguished Professor of Physics Miriam Sarachik joined the ranks of Hans Bethe and J. Robert Oppenheimer as president of the American Physical Society last year.

A Research Powerhouse

Always a great teaching institution, City College is also a research powerhouse in fields as various as molecular modeling, transportation infrastructure, nanotechnology, laser optics, and AIDS and cancer research. This past academic year, the College's faculty received research grants totaling over $42 million. That figure represents an increase of 50% over a two-year period. The College expects that amount to continue to rise, putting it on track to become one of the top 100 research universities in the nation within the next five years. New York State shares this vision for City College. Even in the midst of tight budgets, it has committed more than a quarter of a billion dollars in capital funding for CCNY - including new science facilities and a shining new home for the School of Architecture.

NASA has selected City College as a Center for Optical Sensing and Imaging - bringing $6 million to the College for research and development of instruments for sensing and imaging the earth and its environment. Like the $7.5 million awarded last year by the Department of Commerce to establish a Center for Remote Sensing at CCNY, the NASA award reflects not only the world-class talent of City College faculty, but also highlights CCNY's success in recruiting, mentoring and graduating minority students in STEM. The City College supports 21 regional and national advanced research centers and institutes.

CSOC.CBR.00024644

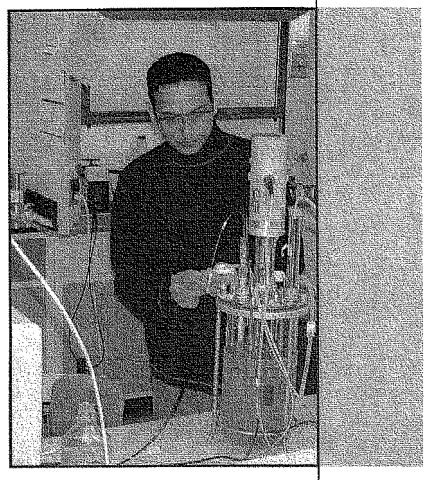
CCNY's Undergraduate Research Program

City College faculty members participate in a program that offers a unique opportunity to talented undergraduates in STEM. CCNY has the largest undergraduate research program in the New York metropolitan area, larger than that of Columbia or NYU. As undergraduates, CCNY students work with the best science and engineering faculty and publish papers in academic journals. In 2004-05, the College mounted what may have been the very first academic conference showcasing student research, "Einsteins in the City." Four CCNY alumni Nobel Laureates attended as part of a panel discussion and encouraged the young scientists and engineers in their goals.

One of the many CCNY alumni who participated in the undergraduate research program is African-American Kurt James '03 EE, a National Aeronautics and Space Administration/National Action Council for Minorities in Engineering Scholar now pursuing his doctorate. As an undergraduate, he co-authored an article with Distinguished Professor Miriam Sarachick, president of the American Physical Society, "In-plane Magnetconductivity of Si MOSFETs: A Quantitative Comparison of Theory and Experiment," which was published in the *Physical Review* this year.

In April 2006, Members of the CCNY chapter of Engineers Without Borders traveled to Nueva Suiza, a small village in a mountainous region of Honduras, over their spring break to conduct preliminary work for designing a water collection, distribution and treatment for that community. The CCNY Chapter, which was chartered last fall and has 40 members, was selected for the project after submitting a proposal to the national organization. "We submitted ideas on how to fix the problem and had to show we had knowledge of the country and could create a sustainable project," explained Yurintzy Estrada, a senior civil engineering major who is manager of the project.



Fellow chapter members Miguel Matos, Rebecca Pizarro and 20 other students visited Nueva Suiza from April 13 - 20.

In 2005, Lev Sviridov became City College's first Rhodes Scholar since 1939 and is now studying at Oxford. Phillipa Njau won the coveted Goldwater Prize in science. And in 2005, David Bauer won first prize in the national Intel Science Talent Competition and is currently a freshman at City College. Lev and Phillipa had participated in CCNY's undergraduate research program for four years. David had worked with a CCNY professor for two years on his research as a high school student!

Exhibit 469
CSOC.CBR.00024645

CSOC.CBR.00024645

The Grove School of Engineering at The City College of New York

The only public school of engineering in the New York metropolitan area, and one of only four in New York State, the CCNY Grove School of Engineering holds a position of national preeminence among public schools of engineering and computer science. It is recognized for the excellence of its instructional and research programs, particularly in technologies with relevance to New York City, its metropolitan region, and New York State. The school offers seven different bachelor's degrees and master of science/master of engineering degrees in seven fields: civil, electrical, mechanical, biomedical, and computer engineering, and computer science. Twelve PhD programs in engineering are located on campus and the degrees are jointly conferred with the CUNY Graduate Center.

The Grove School of Engineering is academically demanding; its curriculum requires 135 rather than the usual 120 credits for graduation, and a fifth undergraduate year is frequently required to complete the Bachelor in Engineering degree. Last year, more than 400 entering freshman chose engineering as their major, and in 2003-2004, more than 2000 students chose engineering and technology majors.

A research leader, the CCNY Grove School of Engineering hosts 13 engineering research institutes:

- Center for Advanced Engineering Design and Development
- Cooperative Remote Sensing Science and Technology Center
- CUNY Institute for Municipal Waste Research/ Center for Water Resources and Environmental Research
- CUNY Institute for Transportation Systems
- CUNY Institute for Urban Systems
- Earthquake Engineering Center
- International Center for Environmental Resources and Development
- Institute for Ultrafast Spectroscopy and Lasers
- Benjamin Levich Institute for Physico-Chemical Hydrodynamics
- NY Center for Biomedical Engineering
- NYS Center for Advanced Technology-Ultrafast Photonic Materials and Applications
- Telecommunications and Information Networks Laboratory
- University Transportation Research Center

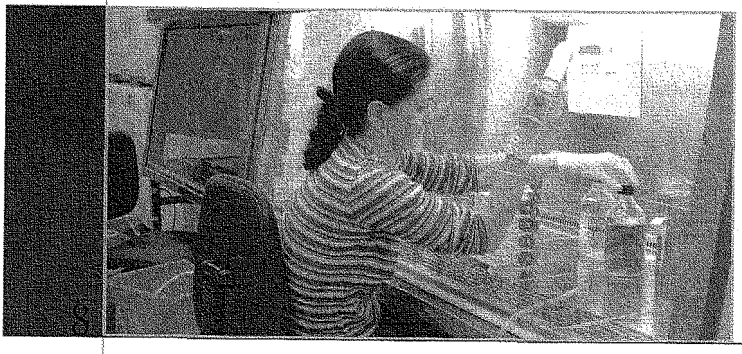

EXHIBIT
Exhibit 469

CSOC.CBR.00024646

The City College of New York Division of Science

Former home to nine Nobel Laureate CCNY alumni, the City College Division of Science maintains its supremacy today and is considered among the best in the country. Students may major in mathematics, biology, earth systems science, physics, chemistry, and pre-medical studies. More than 160 students enter science each year and in 2003-2004, more than 900 students majored in science.

Each major has several options for undergraduate research: for example, mathematics majors may choose among pure math, applied math, or math education. Earth Systems Science students study geosphere, biosphere and atmosphere interactions. Ongoing faculty research projects in which earth science undergraduates may participate include: visiting the Colorado Rockies to evaluate the atmospheric particles drifting east from Los Angeles; studying the bacterial treatment of radioactive waste; monitoring volcanoes in Nevada; carrying out field research in the Caribbean to study the intersection of the earth's large tectonic plates; and collecting cloud and atmospheric data at Storm Peak Laboratory in the northern Colorado Rockies for study. Research opportunities in each of the other disciplines are equally rich.

The Division of Science Research Centers and Institutes include:

- The CCNY-Memorial Sloan Kettering Partnership
- The Center for Algorithms & Interactive Scientific Software
- The Center for Analysis of Structures and Interfaces (Nanotechnology)
- The Center for Information Networking and Telecommunications
- The Center for Mesoscopic Modeling and Simulation
- The Center for Study of Cellular & Molecular Basis of Development
- The Financial Mathematics Research Group
- The Molecular Beam Epitaxy Program

Investment in STEM at City College

The State of New York has allocated $250 million to build a new City College Science Center and a CUNY Advanced Science Center — these are in addition to the renovation of Marshak, City College's current science building. CCNY's leadership in science consortia include:

- The CUNY Center for Advanced Technology, ranked #1 in the New York State, ahead of Cornell and Columbia. Nationally known for its work in photonics and led by City University Distinguished Professor Robert Alfano, who holds 60 US patents, it recently received a $10 million grant for renewed funding;
- The Research Center in Minority Institutions (RCMI) initiative thrives at CCNY. The Center, built on the existing strengths of the College in the RCMI-supported areas, was enriched by the addition of new research in three scientific areas: Biomolecular Structure and Function, Cancer and Neurobiology, and Immunology. RCMI recently received an $11 million grant from NIH.
- The Grove School of Engineering recently received a gift of $26 million from CCNY alumnus Andrew Grove, founder of Intel Corporation, to advance faculty research, attract talented students and scholars, and create new programs.

CSOC.CBR.00024647

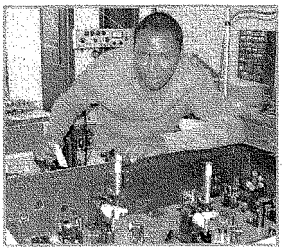
City College's Record of Diversity and STEM

Other colleges talk of diversity, but City College truly lives it. Two years ago, in *US News and World Report*, City College ranked #1 in diversity where African-Americans were the largest group. Last year, CCNY ranked #1 in diversity where Hispanic-Americans were the largest group. More than 87% of CCNY students describe themselves as members of a minority group.

The Chronicle of Higher Education 2003 Almanac reports that of the total number of overall bachelor's degrees earned in the United States as a whole, white students earned 75% of the total, blacks 8.5%, Hispanics 6.5%, and Asian-Pacific Islanders 6.2%. The same year at City College, however, blacks earned 34.1% of the total bachelor's degrees awarded, Hispanics 30.1% and Asian/Pacific Islanders 11% — an unparalleled record of success for underrepresented populations. Many of these students majored in STEM.

Following a tradition that reflects the pattern of generations of CCNY alumni, whose achievements became the model for their own families, City College students are often the first in their families to go to college, and most have very limited financial resources. Approximately 58% come from families with combined incomes of $30,000 or less; three-quarters work while attending school, some at more than one job. Over half of CCNY's students attend part time, most often for financial reasons. Now, as in its historic past, City College is the place where talented "New Americans" — immigrants and the children of immigrants — go to be educated. More than 90 languages besides English are spoken on the campus and every ethnic group is represented.

What is more important, CCNY's record in graduating scientists and engineers from minority groups is stellar



and unique within New York State. The National Action Council for Minorities in Engineering (NACME), reports these statistics from its most recent findings dating from 2001:

- The City College of New York ranked among the top 15 colleges nationally in producing minority engineering baccalaureates; *NO OTHER COLLEGE IN NEW YORK STATE RANKED IN THIS GROUP AT ALL.*
- City College ranked 16th in producing African-American baccalaureates in engineering; *NO OTHER COLLEGE IN NEW YORK STATE RANKED HIGHER*; RPI ranked 33rd.
- City College ranked 18th nationally in producing Hispanic baccalaureates in the physical sciences; again, *NO OTHER COLLEGE IN NEW YORK STATE RANKED HIGHER*; Hunter College ranked 33rd.
- City College ranked 21st nationally in producing African-American baccalaureates in the biological and life sciences; *NO OTHER COLLEGE IN NEW YORK STATE RANKED HIGHER*; SUNY Stony Brook ranked 48th.

EXHIBIT
Exhibit 469
CSOC.CBR.00024648
CSOC.CBR.00024648

More than 50% of CCNY students come from families where the combined income is less than $30,000/year. As a result of this, more than 75% of City College students work, many at more than one job. Those who undertake science, technology, engineering, and mathematics carry exceptionally heavy laboratory and homework responsibilities. A $10,000 annual sum per student will provide a powerful recruitment tool for the College. With demanding majors such as those above, offering funds for full tuition, fees, books, and computers, plus an additional stipend for transportation, housing, food, and other costs students must pay for by working will be a real inducement for the students to choose and remain at CCNY. The AIG STEM awards will make it possible for them to work fewer hours and graduate in a timely way with more time to spend on and excel in their challenging academic work.

The American International Group awards will be crucial to City College because they will assist CCNY in:

- attracting the best and the brightest students to City College, particularly those from groups underrepresented in science and engineering;
- enabling CCNY to offer to its very diverse student body a real incentive to enter and remain in STEM fields;
- making it possible for these students to work fewer hours at outside jobs and perform better in school, and
- retaining them at City College, enabling them to graduate, enter the work force, and help meet the need for STEM experts in the US workforce.

Ensuring Success

The College seeks to increase the number of high-achieving students accepted in STEM, particularly those from populations underrepresented in these areas. Awards such as those available from the American International Group are indispensable in this undertaking.

Grant funds will:

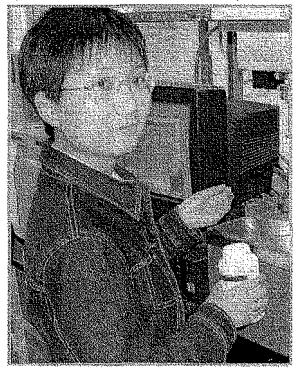
- attract those high-achieving students in STEM majors with an award of $10,000, to cover tuition, fees, computers, and books, and will assist with living expenses related to the cost of attendance, including transportation, housing, food and other needs;
- create funds to promote academic excellence for high-achieving transfer students to City College who enter the engineering and/or science majors during their sophomore or junior year; and for AIG STEM students who wish to earn a Master's Degree in Public Service through the Rangel Center; and
- provide academic support services, which will reinforce the challenging curricula and assist science, technology, engineering, and mathematics students to excel in their programs.

Improving Retention

These students need three things in order to remain in their majors and graduate on time:

- funds for tuition and other educational expenses;
- small, sequential seminars with top-notch faculty who require independent projects and provide a high level of academic advising; and
- targeted use of resources to provide mentoring and counseling, which have been shown to help retain and graduate these students, by creating a real sense of intellectual and social community.

CSOC.CBR.00024649



Pre-college, Pre-transfer & In-college Programs at City College that Ensure Success

Nationally, engineering students have an attrition rate of 70% — that is, they leave the engineering major in huge numbers. Although students at City College generally show a lower rate of attrition in STEM majors than nationally, the College wants to provide enough support to these students so that those who want to remain in these majors will have the academic skills and support services to do so.

That is why funds for support services make up an essential part of any successful scholarship program. These services include faculty advisors and instructors, mentors, study groups/peer tutors, and other support services designed to help lower attrition rates.

In pre-college programs, the students learn good study habits, goal setting, and time management before coursework starts. The City College Academy for Professional preparation (CCAPP) and the Program for the Retention of Engineering Students (PRES), both national programs in which CCNY participates, provide pre-enrollment summer immersion activities, and prepare minority students to take on the rigors of science and engineering and improve retention of STEM Majors.

In-college programs provide academic enrichment, professional and career preparation, and community.

The City College Academy for Professional Preparation (CCAPP)

The CCAPP program provides science, architecture and pre-medical and allied health professions students with a supportive community of fellow students, faculty and staff that enriches their lives, promotes their academic success and prepares them for entry into professional careers and/or graduate programs. CCAPP serves students throughout their college careers. It includes:

- A summer program for entering students
- Academic support and enrichment activities in college
- Professional and career development

Other City College programs include:

- Science, Technology, Engineering and Mathematics (STEM) Institute
- Science and Engineering Summer Program at City College's Center for Analysis of Structures and Interfaces (CASI)
- Science and Engineering Summer Program at City College's Center for Biomedical Engineering (CBE)
- Transfer Recruitment and Achievement at City College - (TRACC Summer Program)

CSOC.CBR.00024650

CSOC.CBR.00024650

Program for the Retention of Engineering Students (PRES)

The Program for Retention of Engineering Students (PRES) at CCNY, the first nationally recognized mentoring program for technology and engineering in CUNY, and funded by foundation support, is another program that has served as a model for other mentoring, attrition, and retention programs statewide. Many students participate in the program by recommendation of their advisors or at their own request.

Organized in 1987, the goal of PRES is to increase retention, enhance academic performance, encourage graduate study, and prepare students for engineering careers. It is especially valuable for those talented math/science students from backgrounds lacking the level of mathematical and scientific proficiency required for these majors, and for students whose native language is not English. All STEM students, however, benefit from these services.

These services include:

- a pre-freshman summer enrichment program;
- courses in problem-solving;
- enrichment courses in math, physics and chemistry;
- academic advisement;
- a group study center;
- career orientation and professional development; as well as
- summer internships at companies such as Corning, GE, Con Ed, KeySpan, Motorola, Ford, Merck and Alcoa.

Resulting data show that:

- currently, more than 500 students each year benefit from PRES services;
- at CCNY, valedictorians and salutatorians are frequently from engineering, and recently several of them have participated in the PRES program;
- students maintain from ½ to a full GPA point higher than non-participants;
- the retention rate in the academic year 2002-2003 was higher among PRES participants majoring in science and engineering than the non-PRES participant rate; and
- for the advanced math/science courses required for engineering, data for PRES participants versus non-participants show higher pass rates.

2002 / 2003 — 500 Students		
Non-PRES Participants		**PRES Participants**
GPA	2.5	3.0–3.5
Retention Rate	64%	88%
Math Pass Rate	51%	77%
Chemistry Pass	55%	83%
Physics Pass Rate	61%	85%

The MARC/RISE Programs at the City College of New York.

The MARC: Honor's Undergraduate Research Training Program and RISE: Research Support for Biomedical Careers at CCNY are programs for academically qualified undergraduates interested in pursuing biomedical careers. They provide research opportunities for minority undergraduates at City College. These programs offer: courses in emerging areas of human genomics, biotechnology and genetic engineering, stipends, laboratory research and travel to scientific meetings.

EXHIBIT
Exhibit 469
CSOC.CBR.00024651

CSOC.CBR.00024651

Scholarships

- Every year, 14 talented entering students in these fields (one cohort) will be selected as recipients of the American International Group awards. As many science and most engineering programs require five years of course work, they will each receive $10,000/year for five years ($50,000/student/scholarship).
- A new freshman cohort of AIG award recipients will be chosen every year.
- Approximately 9 engineering and 5 science students will receive awards each year; this assumes a 2:1 ratio of engineering to science awards each year, based on past enrollment data.
- A fund for transfer students will also be designated for talented students coming from other colleges, who have a record of excellence and who wish to enter City College in these majors;
- additional funds will be used for STEM students who wish to continue their studies and earn a Master's Degree in Public Service through the Rangel Center.
- At the end of five years, five full cohorts of at least 14 engineering and science students each, will be enrolled in these challenging majors at CCNY with high grades and degrees in their various subjects; in addition, five smaller cohorts of transfer students and MA candidates, will also be enrolled.

Other Program Elements

Note: The AIG STEM Program includes support to the institution to make this program work, to provide more guidance and assistance with study habits, time allocation, and academic acclimation to college, and to help with retention and attrition. Each year, depending on the number of students served, funds will be dedicated to the 14 to 86 students annually for the important elements of:

- Pre-college programs, such as CCAPP
- Support for in-college programs such as PRES
- An advanced design and research projects fund

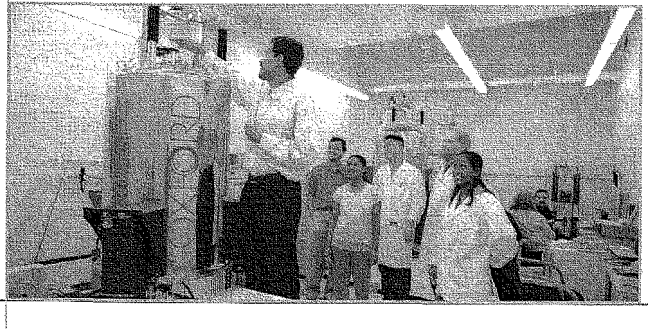


EXHIBIT
Exhibit 469

CSOC.CBR.00024652

CSOC.CBR.00024652

- Special faculty advising and program enrichment. The proportion needed each year will vary slightly;
  - For example, in the first years, fewer faculty researchers and advisors, peer tutors, and mentors will be needed.
  - As the number of cohorts builds to a maximum of five each year and the academics become more demanding, more funds for academic support services will be needed.
  - As each cohort faces graduate school exams, a higher percentage of funds will be dedicated to exam preparation.
- Awards will be made for five-year periods, and will be renewed each year so long as the student maintains high academic standing.
- An academic advisory board consisting of representatives from science, technology, engineering, and mathematics will be created to make the final decision on all prospective participants, to determine the minimum grades needed for grant recipients to retain their awards, and to resolve any issues that arise on a case-by-case basis.

Final Outcomes

Long before the final cohort completes its degrees, the College expects the following results:.

- CCNY will increase its already strong standing in graduating the leaders of tomorrow's economy with STEM preparation, especially from populations underrepresented in these fields.
- A solid cadre of City College graduates will go on to excel in their chosen fields, representing the very best in scholarship and training.
- Public attention will focus on the great need for training in these programs and will stimulate support from other foundations, corporations, and alumni.
- The AIG STEM Program: American International Group Program in Science, Technology, Engineering, and Mathematics will garner important public visibility as a landmark educational initiative.

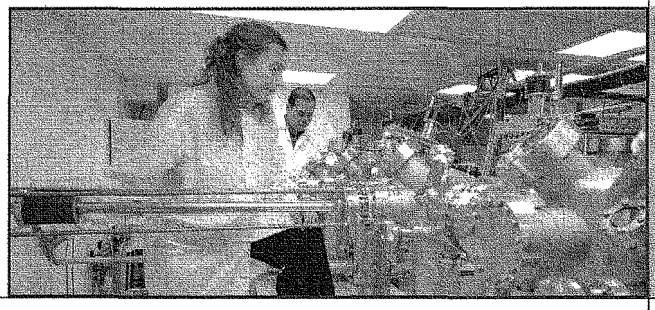


EXHIBIT
Exhibit 469
CSOC.CBR.00024653
CSOC.CBR.00024653

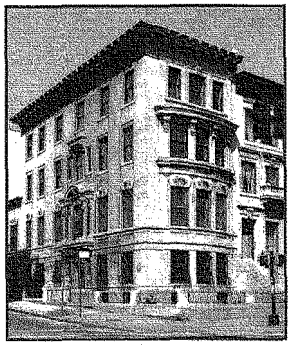
The Honorable Charles B. Rangel

In a distinguished career spanning more than four decades, The Honorable Charles B. Rangel has always held the belief that America's "governing class" - those men and women who make our laws and policies - must mirror the rich tapestry of cultures, faiths, and ethnicities that make us who we are as a country. Today, non-whites make up nearly thirty percent of the U.S. population. Yet, according to the Equal Economic Opportunity Commission's 2003 report on the federal workforce, only 13.8% of the men and women who occupy the top managerial, supervisory and policy-making positions in the U.S. federal government are members of minority groups. By 2050, minority groups in the United States will comprise 50% of its population. This initiative builds on The City College of New York (CCNY) mission of access and excellence and Congressman Rangel's legacy of public service to ensure that those who run our nation will reflect our citizenry.

AIG Hall at The Charles B. Rangel Center

Originally conceived as The City College of New York's President's House and later used as the CCNY Alumni House, the magnificent limestone mansion on 141st Street and Convent Avenue harks back to City College's earliest days in the mid-1800s. A gracious four-story structure with a full below-sidewalk level and parking area, the stately townhouse features two and sometimes three tiled fireplaces on each floor, high ceilings, decorative plaster, and fine woodwork throughout, and ornamental ironwork on every window and surrounding the building.

City College proposes to name this building **AIG HALL** in tribute to CCNY's important collaboration with American International Group. AIG's name will remain on this building *in perpetuity*, for future generations to honor. By naming this splendid structure,



home of the Rangel Center, created in honor of one of the most important statesmen of our time, AIG will commemorate not only his achievements but also its historic partnership with the City College of New York.

Because of a fire in the late 1970s, and cutbacks in public financing of the City University at that time, the building has not been in use and will need repair to bring it to its former grandeur. When completely restored, however, the townhouse will regain its position as one of the most beautiful portions of the historic City College campus.

The proposed AIG Hall at the Charles B. Rangel Center includes space for conferences, seminar rooms, study areas, and smart classrooms. In addition, it can accommodate reception rooms and potentially computerized archives. In fact, this project will represent a unique opportunity to design the space inside The Rangel Center for its specific use prior to the building's renovation. When finished, AIG Hall, the Rangel Center's home, will be a beautiful addition to the Harlem urban landscape.

CSOC.CBR.00024654

AIG Hall will include:

- The Rangel Library to house the Rangel archives, which will be digitized; it may also be possible to provide digital access from the main library at City College to the Center if it is determined that the archives should be housed there;
- A communications network center/smart classroom for video-conferencing, facilities for computerized presentations, digital archival access, ability to collaborate with other schools, including the Henry Jackson Center at the University of Washington, and other similar academic partners;
- A large conference room and other rooms, for meetings with community groups, researchers, and participating students;
- Offices for Congressman Rangel, the Director/Rangel Chair, archivist/librarian, resident and visiting faculty, internship coordinator, and post-doctoral fellows;
- A Rangel Program publications office where working papers can be printed and stored.

Restoration of AIG HALL

The City College Assistant Vice President for Facilities has taken the November 1995 Dormitory of the State of New York (DASNY) Report on the Building Condition Assessment of the CCNY Alumni House and provided an interim estimate of the costs in 2006 dollars. It is anticipated that the cost of bringing the building up to code, installing the elevator now required by the Americans with Disabilities act, restoring the historic, architectural features of the building, and designing the interior specifically for the Rangel Center's needs will come to $5.0 million in today's dollars. For this gift, City College will be able to restore the Center's magnificent Harlem home and name it AIG HALL in perpetuity, and provide a living environment for study and discourse appropriate to the inspiring goals set for the Center itself.

Synergy between the AIG STEM Program & AIG Hall at the Rangel Center

To capitalize on the unique joint opportunities afforded by the relationship between the AIG STEM Program and the Rangel Center, STEM majors will be encouraged to consider career options in the public sector. For those wanting to formalize their desire to serve the public good, CCNY will create a special track to identify these students and enable them to undertake a master's degree in public service linked to their STEM training. They can participate either in the combined BA/MA Program in Public Service with specializations in STEM or the stand-alone Master's Program in Public Service with specializations in STEM fields through the Rangel Center.

Candidates for the AIG STEM awards who want to continue on to the Rangel Center master's degree will have to have completed a full undergraduate STEM major for the stand-alone MA program, or at least three years of an undergraduate STEM major, are on track to earn a BS or BE in their major, and wish to combine their technical knowledge with a Master's Degree in Public Service. They will then be eligible for the many careers in government that require solid engineering or scientific training. These will include jobs in such agencies and departments as:

National Science Foundation
Department of Agriculture
Department of Defense
Bureau of Land Management
National Geospatial-Intelligence Agency
Department of Interior
Environmental Protection Agency
Army Corps of Engineers
Department of Energy
Department of Health and Human Services
Center for Disease Control

These STEM graduates will attend graduate courses in AIG Hall at the Rangel Center.

CSOC.CBR.00024655

CCNY'S REQUEST TO AMERICAN INTERNATIONAL GROUP

THEREFORE, in order to create the largest program for STEM students from underrepresented populations in the New York City metropolitan area,

The American International Group Program in Science, Technology, Engineering, and Mathematics — The AIG STEM Program

and

In order to restore the Rangel Center's home and name it

AIG HALL, in perpetuity,

The City College of New York asks AIG to consider a gift of:

$1,000,000/year for five years to create the AIM STEM Program, and

$1,000,000/year for five years to name AIG Hall in perpetuity

for a total gift of $10 million over five years.

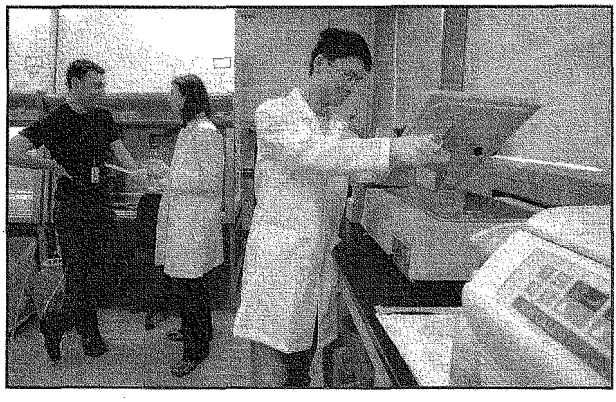
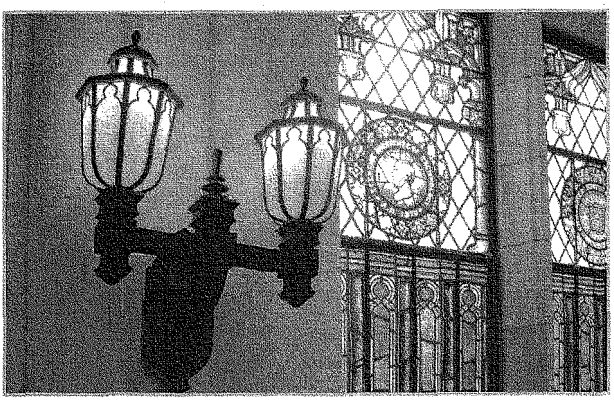


EXHIBIT
Exhibit 469

CSOC.CBR.00024656



CONCLUSION

The AIG STEM Program will be a transformative initiative at City College, advancing its historic mission of access and excellence. As a targeted response to the urgent need for more STEM professionals, especially those who reflect America's diversity, The AIG STEM Program will be a model for educators in public and private colleges everywhere.

AIG HALL at the Charles B. Rangel Center will remain in perpetuity at City College, a symbol of the vision for the future created by an historic partnership between AIG and City College.

On behalf of the aspiring students of The City College of New York, we thank you for your thoughtful consideration of this request. If you have any questions or need further information, please contact President Gregory H. Williams at the numbers below or Vice President Rachelle Butler at the Office of Development and Institutional Advancement. Once again, thank you.

APPENDIX: BUDGET EXPLANATION

The complete program would provide funds from the American International Group for:

1. Scholarship awards of $10,000 each to cover tuition and other educational expenses, such as books and computers, for approximately 14 STEM students annually, for a total of $140,000 per cohort for five years;

Tuition:	$ 4,000/year
Fees:	$ 500/year
Books:	$ 500/year
Computer	$ 1,500 (one-time expense)
Software	$ 100/year
Printer/other hardware	$ 100/year
Transportation	$ 800/year
Housing/food	$ 2,500/year one
Total:	**$10,000**

Tuition, fees & Books	$5,000 years two-five
Housing/food/trans	$5,000 years two-five *
Total:	**$10,000**

*(The $1500 not allocated to the one-time computer purchase will go toward housing and food, providing the student with the opportunity to work fewer hours during the more intensive academic program years)

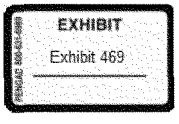
2. awards of $10,000 annually for up to four high-achieving STEM students who decide to earn a master's degree at the Rangel Center and/or for STEM students who transfer to City College in their sophomore or junior year for the remaining three or four years until they earn their degrees, for a total of $10,000 - $40,000/year;

3. a supplementary stipend of $5,000/year/cohort for part-time faculty members in one or more of the above fields to coordinate the programs for and advise students; this is needed to encourage faculty members to take on this extra responsibility;

4. a research fund of $10,000/year/cohort to help cover laboratory equipment and other supplies needed by faculty research instructors who will work with advanced students on special research projects;

5. Fees for instructors in graduate and professional school exams preparation (GRE, LSAT, GMAT) at a cost of $5,000/year/cohort;

6. a lecturers' fund of $1,000/year/cohort for seminar series and roundtables, including: outside lecturers in these professions, career and graduate school opportunities, and special academic topics; and



CSOC.CBR.00024658

7. the sum of $3,000/year/cohort to fund student participation and presentations at regional and national conferences;

8. support of $5-15,000/year for CCAPP and other pre-college programs; and

9. support of $10,000-$25,000/year for PRES and other in-college programs.

Costs/Resources Provided by City College to Sustain The AIG STEM Program Include:

10. release time @ $7,500 per class period per cohort for faculty advisor and all instructors;

11. partial release time @ $3,500 per class per cohort to professors who work with students on research projects;

12. group study leaders/peer tutors for reinforcement of classroom curricula, at a cost of $2,000 per year per cohort;

13 mentoring and pairing students with field professionals, including former AIG Scholars at a cost of $2,000 per year per cohort; and

14. all supplies, equipment, duplicating, printing, and other miscellaneous costs, at a cost of $2,000 per year per cohort.

City College is providing a total of $17,000 per cohort per year of in-kind resources.

Subject: AIG Corporate Giving

Dear Ned,

It was a pleasure meeting with you and Ed last Friday. I am truly impressed with your vision for the AIG corporate giving program and would be honored to join your team. Building upon your well established reputation and extensive network, I believe this program has the potential to enhance the AIG corporate image, increase brand awareness and "do a lot of good along the way"!

I reviewed the City College proposal. From my understanding, you have already established several things: Yes, you want to support science, tech,engineering and math minority students; Yes, you want to create a relationship with City College; Yes, you want AIG presence in Harlem; Yes, you want to be associated with Charles Rangel. While the proposal is strong and there is clearly a match, the ask is very bold. A few things to consider: rather than support scholarships at $1 million per year for the next five years have you considered establishing an endowment?
I would be hesitant to grant a gift of such a considerable amount with a new partner over more than two years. I would suggest $1 million gift to establish the AIG Endowed Scholarship Fund for STEM Students. This gift is therefore in perpetuity with the option to increase the endowment after we receive some results on how these kids are doing.

As for AIG Hall at the Charles Rangel Center - while this is an excellent partnership opportunity, there are several naming opportunities within the hall at lower pricetags if the $5 mill is too high for the corporate giving budget. On page 17, City College has several rooms within the "Hall" that probably range from $500K - the $5 mill. This is of course your call, but I would ask City College to come back to you with several options (including recognition) before you make a final decision.

I hope this is helpful and look forward to working with you soon.

Jamie D. Godfrey

Re: Ed Lee from AIG 212 770-[redacted]

Ed Lee called me back today and we discussed the current status of the CCNY proposal to AIG. He said that Ned and he and others all like it, except for a few things that they'd like to tweak with us. The Rockefeller Foundation liked the merits of the scholarship program, but wanted to know what naming the Rangel Center had to do with scholarships for minorities in science and engineering. Ed says that when he told them that there was a political target, they were not pleased. I said that maybe AIG should just consider it two proposals; he said he had no problem with that. But they were pleased that the Rock Fdn liked the merits of the scholarship. We also agreed that a program that serves both our needs is excellent.

The Rockefeller Foundation also asked if AIG wanted to consider a broader program, such as one training teachers to help students, but Ed said that AIG liked the direct assistance to students. I said the other way was valuable but more indirect; this way, they could meet the students and get immediate satisfaction. He also said he knew that not all of them would make it. I replied that it would be great for those that did and we had a very good track record in graduating minority engineers and scientists.

He said that he needs to get something called "micro-lending contracts" out of the way, which he hopes to do in the next few weeks. He thought that perhaps by early July or August, they could take the next steps and set up a meeting to come visit City College and either then or in September have President Williams meet Ned (Cloonan—VP) and Martin (Martin J. Sullivan, CEO).

I asked if there were any other proposals before them and he said there were not. He said he would get back to me, but that I shouldn't worry-- it was definitely on the table. In a previous conversation

If I would be willing to come down again and discuss the Rangel Center—bricks and mortar. Wants to discuss the Rangel thing more. Someone on staff who is more familiar with these kinds of proposals: Ned, Ed, maybe James, and Kate.

Subject Fw: Need your help on Verizon Dominicana

George

Many thanks to Charlie and to you, for his support on final passage of the Barton-Rush Telecom bill. Net Neutrality was a gutting amendment for us. Fortunately it failed and final passage took on added significance.

On separate topic, attached below is a backgrounder on the sale of a Telecom property in the Dominican Republic. There is a serious problem developing between the government there and the two companies, including Verizon, who are buying and selling the property.

Knowing of Charlie's interest in the DR wanted to send this along. Any help you can render in terms of inquiry calls to State or Dominican and US Ambassadors are appreciated.

Thanks Roger

MEMORANDUM

DATE: July 24, 2006

TO: Ned Cloonan

FROM: Kate deRosset

CC: Ed Lee
James Chin

RE: City College STEM/Rangel Center Proposal Questions
Meeting with Shelley Butler
Tuesday, July 25, 2006, 10 AM

Proposal: $10M, divided as follows:

- $5M in capital funding for the naming of AIG Hall, to house the Charles B. Rangel Center for Public Service
- $5M for scholarships and program support for science, technology, engineering, and math students over nine years (the "STEM" program)

Open Questions on Rangel Center

- Coupling a corporate name with that of a currently elected official is exceedingly rare, and fraught with headline risk.
- We may want to consider discussing other projects that demonstrate AIG's commitment to Rangel, that do not include a naming component.
- The DASNY assessment, on which the $5M capital renovation budget is based, is eleven years old and not reflective of the latest updates in building code and technology requirements. City College should provide a detailed capital renovation plan for the facility, including reliable budget estimates.
- The link between the STEM program and the Charles B. Rangel Center is tenuous, at best. City College needs to better flesh out their vision for this piece of the proposal.
- How will the operations of the Charles B. Rangel Center be funded? What is the annual operating budget? How will it be staffed? The maintenance budget looks low for this facility.

Open Questions on the STEM Program

- One of the goals of the program is additional funding for this area. What other corporations or foundations are being approached?
- Does City College anticipate this program continuing beyond the period of the AIG grant?
- How will CCNY measure the success of this scholarship program? Presumably, retention, job placement and GPA would all be quantifiers of success.
- How will CCNY determine the pool of AIG scholars? Will there be a separate application process? Will participants be chosen based on need, merit, or a combination of both?
- Can AIG leverage the application process to maximize our visibility among "thought leaders"?
- Could we develop a job placement/internship link with AIG?
- If we proceed, could we consider hosting an annual gathering of AIG scholars, perhaps at the end of each spring semester, to which local politicians, students, their families, and other stakeholders would be invited? Such a gathering would help generate community goodwill throughout the life of the grant (rather than a "one shot").

Call Report
Date: July 26, 2006
To: File
From: Shelly
Re: Visit to AIG

Yesterday, at Ed Lee's request, I returned to AIG to talk with a new AIG employee, Kate DeRosset, who has had experience in corporate grants. She had worked for the city in the dept of cultural affairs and knew Kate Levin. I met with Ed, James Chin, and Kate for 11/2 hours and it was a good meeting.

I came with printed proposals, but Kate had already read the AIG proposal and the Rangel Center proposal. I also brought copies of emails from Rich Slawski, the January 2005 of which described methods #1 and #2 of updating the 1995 DASNY proposal to renovate the former Alumni House at CCNY, proposed as the AIG Hall for the Rangel Center. The second email from Rich described a March 2005 estimate by Hoffman, a construction company, which stated a sum of $3.8M without the elevator, furniture, inside design, etc. I gave out copies to confirm why we had chosen the sum of $5M.

Kate wanted to know what would happen if, after an AIG grant, we didn't have enough. I told them that we would get a 1:2 match from CUNY and that we already had $450k from a federal transportation grant designated for the building. That would give us $8M, which should be enough. She asked what the nexus was between the Rangel Center and the AIG Scholars Program and I described the interdisciplinary program for scientists and engineers at the Rangel Center that would prepare them for jobs in government agencies such as the Depts of the Interior and Land Management and the Army Corps of Engineers.

Kate wanted to know about whether or not we would give them ongoing publicity for AIG and I said we would certainly try to pitch other stories to the press about outstanding students in the program, the Rangel Center, etc.
We then spoke more about the other part of the program, the funds for minority science and engineering students and she seemed very much on board with it. Ed again said how much he feels that AIG and CCNY share a great deal in the kinds of institutions that they are.

They asked me if I had a timetable and I told them we'd love to have the funds for recruitment this fall; they said we would know by the fall. I also mentioned that Congressman Rangel would be happy to come by and they said they would only set up a meeting with Rangel and GHW if they were going to give the grant.

when Kate or Ed asked me if these were spend-down funds, I raised the possibility of endowment, mentioning that then AIG would have its name here in perpetuity and that there would still be a number of students benefited.

CSOC.CBR.00024442

Next steps: TY with info from ML about publicity and further details on endowment. Also, check with Rangel's office to find out if anything new. Any problem

Events at the Hall—lecture, speaker, conference—Rangel Library—any time something comes out of the library—all publicity about the collection; opening of it; exhibits. What takes place in the building; always mention the building.

Every time –the launch, the first class, any time they make an interesting contribution.

Kate: August 2, 2006
do you know of any case where a corporation has been paired with a sitting politician they need to do due diligence—there is some slight "headline risk"

Are we being crazy trying to make the link the two? "I don't think anyone's going to buy it." If there's not a demand for this kind of training

what's driving us? a relationship with Rangel

a sense of timing—on our end, we're in the baby stages of figuring out what our math/science initiative will look like

bricks and mortar—what is timeline? would cuny dasny be doing it? for next fall

if we had $5M in the bank tomorrow, what would our timing be? ribbon-cutting event, lots of press; a total understanding of

what is capital process like at cuny? what is the design process? architect?

call Robert Santos and Rich Slawski

Kate de Rosset 212 770[redacted]; kate.derosset[redacted]

$50k/student—could recruit the number of students—community or public service

what they would want to see from the rangel center is a commitment from them—administrator for the RC, would need to make sure that this is a part of the mix—

taking the technical students and integrating them into the activities of the RC

afford to do the unpaid internships

I'll get back to you with more details about it might work—RC—

send you some of the public service stuff—don't want to create too much work

how this could work, if it could work,

CSOC.CBR.00024443

CSOC.CBR.00024443

intd in supporting the rangel center and in filling a gap in science/engineering; we have made a compelling case with the financial support for these scholarships frees them up for their studies

if there's something equally compelling about funneling them through the ps program—"we'd be just be just as thrilled to see a diverse pool of ccny grads come to work at aig and deutsche bank and citigroup and not just government service"

told kate that ccny does the naming and we are comfortable with it; and that if it worked, that was fine and if not, not

don't make it a hard sell, just pitch it; we don't need to be totally straight up with rangel, just let them know when they call, we made an honest effort; is that they want it to go straight to science and engineering

what's in the best interest for the student

$30M if it's distributed where we need it—allows us to hire people and do all the things we need to do

where we need to get comfortable is on the bricks and mortar—is $5M enough

timeline for conceptual design, schematic design and construction –when ribbon-cutting

will bring in consultant for conceptual design, then approved by cuny, schematics then, hire contractors

August 7, 2006
spoke to lois today—she had spoken with rich slawski who said that from beginning to end, it would be about 1.5 to two years as follows:

DESIGN – 9-12 months

1.a. Conceptual phase—put out an RFP, get architect—idea and rough drawings 2-3 months

1.b. Schematics—architect makes renderings of his concept—another 3 months

1.c. Construction documents—will take six months to produce agreed-upon docs

CONSTRUCTION
1.A. Put out another RFP for general contractor; we would go back and forth, he would price it out, do some value engineering, and construct—about one year

in today's dollars: $4.5-$5M including the elevator

CSOC.CBR.00024444

NB—spoke with Matt Sapienza, budget manager at CUNY, who recommended that I speak with Carlos Flynn about whether or not CUNY would match a gift to the Rangel Center building named after a corporation. Carlos said "yes," and that the application process starts again in September—he mentioned that only two matches had been given out this past year.

September 21, 2006
Called Ed today
hating story about AIG on A1 New York Times
quite honestly trying to collect some other ideas; working with dept of education—
a couple of weeks away; we'll get back to you with some revisions

I told him we're flexible
it's going to be a question of math/science, scholarships, teaching; I asked about the rangel center building—at the end of the day, we're either going to have to link it or de-link it

STEM math/science

Rangel program – more political—is that bad?

It probably works in our favor to de-link it; if we're doing math/science, scholarship sits in there; doing due diligence; math/science being pushed now; we all like the stem program—need to see what else is out there; may take a couple of weeks

Clinton global initiative—going to announce with Martin Sullivan

October 25, 2006

spoke to ed lee—was on jury duty—

it's sitting there—stuck in the aig bureaucracy; they're unsure what they should do with the program—after next Wednesday—their CEO likes elementary ed

November 15, 2006

if I send it, martin will refer it to ned, who knows Charlie rangel

the way it needs to be done here, chances are martin wouldn't do it—he needs to be prepped

overnighted letter and book from ghw for martin Sullivan to ed –he will show it to ned and they can then decide whether or not to bring it to martin

Mr. Edmund J. Lee, Assistant Vice President
Mr. James Y. Chin, Director
Ms. Kate De Rosset
American International Group, Inc.
70 Pine Street
New York, NY 10270

Dear Ed, James, and Kate,

Thanks so much for meeting with me this week; I enjoyed our conversation and appreciated the opportunity to discuss The City College of New York's proposal to AIG in even more detail. I was especially touched Ed, by your expressing how close a kinship you feel CCNY has with AIG. I, too, feel that we have a lot in common and that the partnership would feel very natural.

I wanted to respond in more depth to a couple of questions that came up in our meeting.

Publicity
Kate, you asked about ongoing publicity and I approached Mary Lou Edmondson, our VP for Communications, and a very experienced publicist, for her views. She suggested that AIG Hall could be featured in newsworthy articles of course when the Hall is inaugurated but also whenever there are important events at the Hall taking place there—a lecture, a conference, or a gathering of important public figures—something that is likely to happen frequently around Congressman Rangel and the work of the Center.

I also mentioned to you that the Rangel Library would be an important part of the Rangel Center and Mary Lou said that whenever something noteworthy arises with reference to the library—the opening, publicity about the collection, regular exhibits—we will always highlight AIG Hall to the media. So far as the AIG Scholars Program is concerned, we would certainly pitch articles to the media about the Program's launch, the first class, and every time that one of the AIG Scholars makes an interesting contribution. So, as you see, there will be many public relations opportunities on an ongoing basis.

Endowment Opportunity
I also wanted to discuss endowment again very briefly. I did some calculations and I found that if the same $5 million grant endowed the AIG Scholars Program, that it could fund 20 students who each receive a 5-year scholarship, every year, in perpetuity. Here is a table that illustrates how that would work:

	2007	2008	2009	2010	2011	2012	2013	2014	2015	2016
	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6 and every year thereafter	Year 7	Year 8	Year 9	Year 10
Cohort	4	4	4	4	4	**Cohort**	4 stdts	4 stdts	4 stdts	4 stdts

#1	stdts	stdts	stdts	stdts	stdts	**#6** 4 stdts				
Cohort #2		4 stdts	4 stdts	4 stdts	4 stdts	4 stdts	**Cohort** #7 4 stdts	4 stdts	4 stdts	4 stdts
Cohort #3			4 stdts	4 stdts	4 stdts	4 stdts	4 stdts	**Cohort** #8 4 stdts	4 stdts	4 stdts
Cohort #4				4 stdts	4 stdts	4 stdts	4 stdts	4 stdts	**Cohort** #9 4 stdts	4 stdts
Cohort #5					4 stdts	4 stdts	4 stdts	4 stdts	4 stdts	**Cohort #10** 4 stdts
Total Students	4	8	12	16	20	20	20	20	20	20

Comparing this to the proposal, you can see that the spend-down program will fund 84 students in 9 years, while the endowment program will take 21 years to fund the same 84 students. However, the endowment will continue to support 20 students per year and graduate four students per year forever with the same kind of support services the spend-down program offers. And, there would always be 20 AIG Scholars at City College. It's really a question of preference for you: to make a tremendous immediate impact on this generation of students or a more long-term impact for generations to come.

Government Funding
I contacted Congressman Rangel's office and he believes we will get the $3 million that came out of committee. I will let you know as soon as I do.

University Buildings Named for Corporations
I asked President Williams about this and he has no concerns about it at all. We would need to present a resolution to the CUNY's Board of Trustees to name this building, as all the 19 campuses would with any campus naming, but please be assured that every one of our naming resolutions has passed without any difficulty, including five resolutions for City College in this past year alone.

In addition, the precedent has already been set nationally. Two examples are: the FedEx Global Education Center at University of North Carolina at Chapel Hill, which will be dedicated in 2007 in honor of a recent gift, and the University of Maryland's Comcast Center, which has an arena and athletic facilities.

Please give me a call or email if I can answer any further questions and if any of you are able to come to campus in the next few weeks, we would be happy to host you, show you around, have you meet some of our students, and end with lunch at Sylvia's! Thank you again for the opportunity to talk with you and I look forward to speaking again soon.

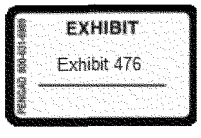
Sincerely,

Shelly Butler
Vice President

Notes on Rangel Meeting- 8.2.2006

Jim Capel, Ted Gershon, Michelle Sherwood

1. 40% Discount on heating oil for poor in this country
2. Phase 2- a social fund by President of Venezuela- a personal commitment to Harlem
3. Percentage of funds from oil for the poor program
4. Went to Rangel to ask how best to utilize the funds
5. What percentage of Tap and Pell grants eligible
6. Students who live in this district Harlem; anyone living in Mr. Rangel's district
7. Citgo a subsidiary of P……? owned by government of Venezuela
8. Students could pay back w. community service
9. Want a focus on
10. Focus through the Rangel Center
11. Visiting professorship from Venezuela?
12. How many students at CCNY in 15th district zip codes?
13. Grad rates for African-Americans and Latinos
14. Should include transfer students
15. Chavez feels change has to come from poor
16. a program for under-credited and overage- no high school diploma, may have passed Regents exam – Citywide- 63,000-
    Want to pass entrance exams do we have?
17. Could be $2 Million, possibly endowment
18. A lot of schools fund above eligible Tap and Pell loans
19. How many students get 100% Tap + Pell; whats the cost above Tap and Pell
20. Part II- What kind of programs do we have to bring in high school students
21. Is College engaged with Board of Education- re under-credited, overage group- mayor funded $14 Million
22. Broaden opportunity for average kid?
23. Charlie Rangel was a high school dropout
24. Week of August 10- meeting with Venezuela
25. 200 Faculty have gone through service learning
26. How many from Rangel's district in it?
27. What percentage of students African-American
28. PRES, CCAPP, other support programs get stats
29. Stats on graduating African-Americans and Hispanic-Americans
30. Can we do something about Drop-outs
31. Support the ones that are already in CCNY
32. che ee ce bme me
33. Marina Fernando, Juan Carlos
34. Focus on people from 15th District, majority Hispanic, then African-American
35. Send them AIG proposal without names
36. First week in November, Oil for the Poor program announcement before election
37. They want to announce this too
38. Ted will write to Pres of CCNY



CSOC.CBR.00024457

39. Go to August 9th Event

No remediation
We would have to get them a GED- they're ineligible to receive TAP money and the school would have to pick that up.

But programs at CUNY Academy focused on drop-outs- Michael R.

A. Phillip Randolph- a number of programs CCMSE
City College Academy in Washington Heights
80 Students/ year started last year in 9th grade- segment focused on later met withthe
Congressman wants whole $10 Million for Rangel Center
Sci/Eng students with public service
(do we have to make them take the curriculum?
Ask Bill..?

He is talking $20 Million- will get Trump, mayor- City Council, get something from Chancellor Klein?

I should set up meeting with Ford for after election
Heavy schedule ps related to their coursework

Charlie didn't like Chavez' remarks about our president
Is there a problem for CCNY to accept and run program?
To Accept and run program
Engineers without borders build robots and water supply in Honduras
Greg OK with doing community service define it loosely
Get Lois and Zeev and Michael
Run it through Harlem 40 Program

Set up a meeting- tomorrow afternoon

Lisa.. check with Serrano

Another discussion

Congressman Serrano from the Bronx
GED Business
The funding for the Harlem 40-50 - If its done through Continuing Education
Do through consortium

Jay says hold it off until after the election

Do we want to touch it?

Prez always wants to think about new ideas concerned that it takes us in a little different direction.

We don't really do any GED stuff different avenue
CITGO to CCNY

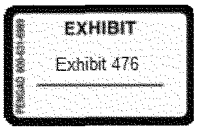
Get back to Capel- we floated it- some works, some doesn't

We don't do GED, we want to explore school

We have some concerns- not sure that this would work
Investigating
Want to continue to work with the Congressman delay it stall
Growing emphasis on public service issues one of the things we are trying to institute in all our students
We recruit them
In our mission statement accreditation
Less and less criticism about technical aspects
More emphasis on communication and P.S.

Opportunity to take people in tech areas and influence them w. spirit of PS

ted gershon's thing—under-credited, over-aged without a high school diploma—
"we realize that the standards for ccny won't be changed; it may be that the students need to do work" need to have another conversation about how we can help them



CSOC.CBR.00024459

November 30, 2006

He spoke to ned about this thing—I wonder if we just did something for the rangel center; forget about the scholarships; the naming thing is not that important—not make or break

$5M over 5 years – go to the building -

Ned meets with Martin once a week on philanthropic stuff – wants to bring up with Martin—

later on

I can write something up for $1M/year for five years—just for the building—could be naming –

ned will take it to martin

January 11, 2007

talked with Ed Lee today—he said some slight movement; I told him about Jan 29 and that all three people at AIG would receive invitations. I told him other funders would be there and if they offered more to name the building, we'd have to go with them. He said fine, AIG didn't need the naming. I said that was great and we could use the money for anything they like, including scholarships. He said we were closer and that he thought the next move would be to get the presidents together. I also said it would be wonderful if AIG could be at the Ford Foundation presentation as a funder and that I thought the Congress would appreciate that.

January 26, 2007
spoke to ed lee today—he said he had hoped to get me an answer before ford but martin Sullivan went to the davos conference; ned didn't want the wrong message sent to Charlie by coming to the ford presentation; they also feel that they're way past that point

they go way back with Charlie and had worked with him on many issues; they had done democratic fundraisers for him when the dems were way down

they're a little concerned about how it would look and they're discussing it

RE: **DC Trip Report**

As you know, we were in DC on Monday for a number of meetings. Below is a summary of our trip.

Congress

REDACTED

- **Congressman Wally Herger (R-CA).** Herger is the Ranking Member on Ways and Means Subcommittee on Trade. We met with Dan Maclean, Legislative Director responsible for tax and trade matters. We talked about the Republican trade agenda, which appears to be stalled, although Maclean thinks Korea FTA could be approved before TPA expires in June. He confirmed that Rangel is trying to design a mechanism/process that folds labor and environmental issues into the FTA adoption process.

REDACTED

- **Congressman Rangel (D-NY).** We met with his Chief of Staff George Dalley. We talked about your invitation to Rangel to the Geneva Association gathering. He said he would encourage Rangel to give the keynote. Dalley also asked about the math/science initiative at the CUNY/Rangel center. He also asked that we meet with Rangel's education advisor for other grant ideas. We are scheduled to see him next Monday.

Douglas L. Poling
Executive Vice President
AIG Financial Products Corp
50 Danbury Road
Wilton, CT 06897-4444

Dear Mr. Poling,

Thank you for taking the time to meet with my Committee staff. Kase Jubboori and Mildeen Worrell have briefed me on your concerns regarding the nonqualified deferred compensation provision contained in Section 206 of the "Small Business and Work Opportunity Act of 2007". As you know, the bill was approved by the Senate Finance Committee, and subsequently passed the Senate. On Wednesday, the Committee on Ways and Means held a hearing on the revenue raising provisions contained in the bill. The nonqualified compensation provisions were the central focus of the hearing.

My staff has shared with me your concerns of the affect the provision would have on arrangements currently maintained by AIG Financial Products and its ability to accumulate capital. They have briefed me on your thoughts and recommendations regarding possible improvements to the proposal.

I will certainly consider your views on this proposal as we prepare for a conference on this legislation. Please feel free to contact me or my staff on this or any future issues of interest to you.

Sincerely,

Charles B. Rangel
Chairman

Confidential Memorandum

To:	President Williams
From:	Amanda Wilson
	Shelly Butler
Date:	April 20, 2007
Re:	Briefing – AIG

MEETING LOGISTICS:

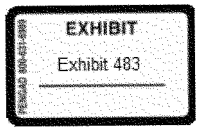
Prospect:	Ed Lee, Assistant Vice President, International & Corporate Affairs
	Ned Cloonan, Vice President
Date, Time:	Wednesday, April 25, 2007, 12:00pm
Participants:	President Williams, Shelly Bulter
Location:	70 Pine Street (between William and Water Street)
Contact:	Ned Cloonan, 212-770

OBJECTIVES:

- Ask AIG to make a substantial contribution to the Charles B. Rangel Center at The City College of New York.
- **$10M gift for the Rangel Center to create AIG Hall.** NOTE: We will get a 1:2 match from CUNY.
    - Focus on the partnership that this will create and the shared values between AIG and CCNY. A commitment to diversity is a guiding business principle at AIG and is the primary vision of the Rangel Center. Goal is to have a more diverse population of public servants that reflects the diversity in the United States. Unique factors at CCNY make this the place to train such future leaders.
    - AIG Hall will be the physical home of the Rangel Center and will present opportunities for publicity. Examples include: Center's Inauguration, gathering of public figures, lectures, conferences, and receptions.
    - Two examples of university buildings named for corporations: $20M gift to University of Maryland for Comcast Center (athletics) and $5 million gift to University of North Carolina, Chapel Hill to create FedEx Global Education Center (houses the university's international programs).
- Note: AIG is also interested in scholarships and minorities.
- Background: Original request was for $10 million; then it was two parts–STEM and the building; then $5 million.
- Finalize next steps to get this project approved by CEO, Martin Sullivan. Mr. Sullivan already likes the project.

FINANCIAL INFORMATION

- AIG reported $113 billion in sales for 2007. Firm's net worth is reported at $101 billion. 106,000 employees.
- Martin J. Sullivan , CEO and President. Pay: $7.5M; Stock exercised: $158K
- Steven J. Bensinger Chief Financial Officer and Exec. VP. Pay: $ 2.95M



CSOC.CBR.00024602

- Edmund S.W. Tse, Jr. Sr. Vice Chairman of Life Insurance. Pay: $2.3 M; Stock exercised: $1.43 M.
- Rodney O. Martin, Exec. VP of Life Insurance. Pay: $ 1.79M; Stock exercised: $346K.

PHILANTHROPY

- Corporate philanthropy falls under the Corporate Responsibility umbrella and is directed at the company's strategic focus: entrepreneurship and economic empowerment; emergency preparedness and disaster relief; strategic education and health initiatives; and independence for people with disabilities.
- In 2001 AIG created the AIG Disaster Relief Fund in response to the events of September 11. In 2006 the fund disttributed $7.6M in response to Hurricane Katrina and Tsunami in Asia
- $5 million pledge in March 2007 to ORBIS International for Blindness prevention in five countries. Edward T. Cloonan is on the board of ORBIS, which recently launched a $100M campaign.
- $100,000 commitment in February 2007 National Organization on Disability's Emergency Preparedness Initiative.
- Starr Foundation has long been the philanthropic arm of AIG. The Foundation has $3.5 billion in assets. Since 2005 when the AIG board forced Maurice "Hank" Greenberg to resign from his post as Chairman and CEO under fraud allegations, there has been greater separation between AIG and the foundation.

Subject: US KOREA FTA

Rich, Kevin
You will both have seen the announcement from Pelosi, Hoyer, Rangel, and Levin Statement on Trade issued on Friday in which they state that they cannot support the Korea agreement as negotiated. The agreement was signed on Saturday. Minister Kim was very upset with the announcement just prior to the signing and took it as a personal affront. He did not say anything publicly (he looked very grim) but mentioned it to several people present, but Rangel was and I understand that Nancy Pelosi would have followed his lead. Everyone is wondering what happened and what might need to be done at least to get Rangel back on board---what does he need to see. Or alternatively, what can we do in the way of education or otherwise to allow him to take a different position. I know both of you know Tim Reif well, and was wondering if you could give him a call, or alternatively, if you would mind if I called to ask the question. We may not get the answer but it could be worth a try.

Re: Conversation with Ned Cloonan of AIG – 212 770[redacted] Maureen

I had left Ned a phone message yesterday and then sent him an email. Today, he returned my call and it was very friendly. He asked me about the Post article and "how did it get out?" I said a low-level staffer at the Congressman's office had released a document that was supposed to be confidential and not shared. The document itself listed gifts that were in and pending requests from potential donors. I said that AIG was listed under the latter and that the Post had decided to put it in the article as a gift already in. The College, I said, contemplated sending in a letter but felt that was the Post wanted and it would certainly help to blow up story that seemed to have no legs. I repeated what I said in my email that we had never reported a gift from AIG as confirmed. He said, "we receive hundreds of proposals every month and yours is one of them, but no action has been taken yet."

I told him about the California Congressman who proposed amendments to every single earmark in the $170 billion health and human services bill, but that they had all been resoundingly voted down, 3 to 1, by most Republicans as well. He said they all thought that it was politically motivated and that he had told his CEO and their VP for Communications the same thing.

He then said, "having said that, we like City College very much and feel there is a real link with AIG there—we are both international and global." I said we also felt very connected to AIG. He said he thought there might be a problem only with some unpleasant board member about our proposal. I reminded him that there were two professorships in there—one in economics education and one in consumer understanding or something or other and that those might help. He agreed and said and they are all relevant to a community that's underserved.

He said City College is a very good place and that we should maybe slow it down a little and low key it until the dust settles. I said I thought was a good idea. He said let's keep the discussions going and I said absolutely.

RE: Cong. Charlie Rangel (D-NY)
Luncheon, Monday, September 24, 2007

I would like to invite you to a luncheon with Congressman Charlie Rangel on Monday, September 24, 2007 at 12:30PM on the 60th Floor of 70 Pine Street.

Congressman Rangel is a good friend and frequent visitor to AIG. He is Chairman of the House Ways and Means Committee, one of the most powerful positions in Congress. This Committee has jurisdiction over a wide range of issues important to AIG including, taxes, trade and social security.

Congressman Rangel, is one of the most influential and respected officials in Washington and in the Democratic Party. His insight on legislation, the Middle East, and the Presidential election are always unique and interesting.

I hope you will be able to join us. Please R.S.V.P. to Ayanna Phillip at 212-770-[redacted] or ayanna.phillip[redacted]

Subject: FW: Mother Of All Tax Bills Update

Phil: Ned asked me to share some insights from our friends in Grassley's office. You might already know of this, but in case not, FYI.

To W&M GOP Tax Aides:
In case you or your boss were not able to be at the bipartisan caucus on the Mother of All Tax Bills, here are the highlights.
Chairman Rangel said that he would introduce his bill tomorrow but indicated he would soon move - likely next week - a stand-alone extenders bill. No paper was provided, but here is a summary of what was orally described to the Members. The Mother Bill will have three sections, each of which will be self-contained in terms of offsets (i.e., they claim they will not be using revenues raised from the corporate side to pay for the individual reforms and vice-versa).
I. Individual Tax:
· Repeal AMT for 2008 and beyond
· Expanded tax benefits for low-income individuals (EITC expansion, increase in the standard deduction, increase refundability of the child tax credit).
· Offset by a surtax on AGI (not taxable income) on single people with AGI over $150,000 and married couples filing jointly with AGI over $200,000. The surtax will start at 4% but rise to 4.6% for incomes over $500,000 (not clear if that is the attachment point for singles, marrieds, or both).
II. Extenders:
· One year AMT patch for 2007
· One year extension of all provisions that expire at the end of 2007 · Paid for with carried interest, taxing deferred compensation plans of offshore hedge funds, and basis reporting on securities. · Additional money will be raised by enforcing requirements that S Corps that provide services pay payroll taxes.
· No specifics were given on the policy, but the staff did indicate that the carried interest and deferred compensation changes, together, would raise something above $40 billion.
III. Corporate Title:
· Lower the corporate tax rate to 30.5% · Repeal Section 199 manufacturing deduction · Repeal accounting method (which we assume to mean repeal LIFO and require current LIFO users to trigger their LIFO reserves and pay taxes on those amounts).
· Defer deductions for certain expenses of foreign subsidiaries of U.S. companies

Cc: gwilliams [redacted]; edmondsor [redacted]
Subject: New York Times and the Rangel Center

Dear George, Jim, and Dan,

I spoke with Marilyn Thompson (Johnson?) of the Times this morning and wanted to give you a basic digest of what she asked. According to Mary Lou Edmondson, our VP for Communications, Marilyn was interested in whether the Congressman was "inappropriately involved" in any of our discussions about the Rangel Center or soliciting a gift.

I told her that the Center came out of discussions between the Congressman and President Williams at least as early as 2004 and that in June of 2005, a general letter of inquiry (Dear Sir or Madam) from the Congressman was written to about 125 foundations and corporations in the New York area. She asked for the letter and I faxed it to her. I told her that my office followed up on every one of these letters to try to get appointments. It just gave us a foot in the door but we did the legwork. The Ford Foundation sent us a letter and the Congressman, President Williams and I visited Ford. Ford was very interested and said they would host a presentation to which they would invite some foundations, which they did, and then we followed up with those foundations. Gifts from the Verizon Foundation and the New York Community Trust resulted and we are still talking with other foundations.

She asked about AIG and I said that early in 2006, the Congressman suggested I call them, which I did, but that the Congressman never visited AIG with me, nor did I ever meet with AIG's CEO. I began sending proposals to AIG in 2006 and am still doing so, but they have not accepted anything as yet. This is very standard operating procedure for our office, which speaks to foundations, corporations and individuals all the time. We have a conversation with them in which we try to find common ground between what they want to fund and what are our needs are and of course, we have to meet their guidelines for funding.

They also asked about whether we had met with Maurice Greenberg and I told them that Congressman Rangel, President Williams and I did, and that we were referred to the Starr Foundation. I spoke several times with the Starr Foundation, which is one of the largest funders in higher education, and tried to find a fit within their guidelines and their mission, which we did, resulting in a gift. They asked about Gene Isenberg and I said President Williams, Congressman Rangel and I had met with Gene in District Attorney Morgenthau's office in October of 2006 and then that President Williams and I met with Gene later. I mentioned that Mr. Morgenthau had been something of a mentor to the Congressman and had given him his first job out of law school when the Congressman came up against racial barriers. She was very interested in that story. I also told her that Gene was interested in having our economics and engineering students apply for internships at Nabors, which they did and four did internships in Houston and Alaska last summer—also other connections with the Isenberg school of Management and our Dean of Social Science.

She wanted to know if I ever had any questions about the appropriateness of AIG giving to CCNY or any qualms

EXHIBIT
Exhibit 492

and I said absolutely not, that we were talking about the mission of the Rangel Center in which we believed and so did everyone.

Give me a call if you have any questions.
Best
Shelly

House Ways and Means	Referral, In Committee

SUMMARY AS OF:
6/22/2007--Introduced.

Amends the Internal Revenue Code to treat as ordinary income (i.e., income taxed at regular income tax rates) income received by a partner from an investment services partnership interest. Defines "investment services partnership interest" as any interest in a partnership held by a person who provides services to a partnership by: (1) advising the partnership as to the value of specified assets (e.g., real estate, commodities, or options or derivative contracts); (2) advising the partnership about investing in, purchasing, or selling specified assets; (3) managing, acquiring, or disposing of specified assets; or (4) arranging financing with respect to acquiring specified assets.

Active Financing Working Group

1001 Pennsylvania Ave. NW Suite 601 *Washington DC*

January 18, 2008

The Honorable Nancy Pelosi
Speaker of the House
Washington, D.C. 20515

The Honorable John Boehner
House Minority Leader
Washington, D.C. 20515

The Honorable Harry Reid
Senate Majority Leader
Washington, D.C. 20510

The Honorable Mitch McConnell
Senate Minority Leader
Washington, D.C. 20510

The Honorable Charles Rangel
Chairman
Ways and Means Committee
Washington, D.C. 20515

The Honorable Jim McCrery
Ranking Member
Ways and Means Committee
Washington, D.C. 20515

The Honorable Max Baucus
Chairman
Finance Committee
Washington, D.C. 20510

The Honorable Charles Grassley
Ranking Member
Finance Committee
Washington, D.C. 20510

Dear Madame Speaker and Messrs. Reid, Boehner, McConnell, Rangel, Baucus, McCrery and Grassley:

The members of the Active Financing Working Group are collectively a critical part of the U.S. economy and provide hundreds of thousands of U.S. jobs. We applaud your efforts to develop a fiscal stimulus package that will provide an immediate boost to the U.S. economy. Any such package should include an immediate extension of the subpart F rules applicable to financial services business income.

In addition to temporary provisions designed to "jump start" the economy, it is critical to recognize the need to provide certainty to the financial services industry. The recent turmoil in financial markets poses a risk to our economy and to our workers. The credit situation threatens to deteriorate unless specific steps are taken to stabilize the U.S. financial services sector. Thus, an important component of any economic stimulus package should be to buttress this essential component of the U.S. economy.

A failure to extend the active financial services rules would be a significant tax increase on U.S. financial services firms. The shadow of this looming tax increase is already being felt as U.S. financial concerns make long-term financial decisions, including pricing decisions, acquisition activity and maintenance of employment levels.

For manufacturers, the economic situation makes foreign markets even more critical to U.S. manufacturing jobs. Indeed, many U.S. manufacturers are relying on their exports and foreign sales to sustain and even grow jobs here at home. Failure to extend the active financial services rules would result in a tax hike that would increase the cost of financing many export sales. At this critical time, American workers cannot afford that tax increase.

Thus, an extension of current law is critical to maintain competitive balance and quality long-term U.S. jobs in both the manufacturing and financial services sectors. If current law lapses, foreign firms are likely to fill the void and thousands of supporting U.S. jobs may be lost. Already, only three U.S. banks are currently ranked amongst the world's top 25 banks.

Maintaining robust U.S. financial firms and markets is of paramount concern. Businesses and households must be able to finance their spending in order to make economic investments. Extending the active financial services provision as part of the economic stimulus package will ensure that U.S.-based financial services business are able to continue to operate competitively and provide the funds needed for investment and economic growth. In short, an extension of the active financial services rules now will provide a significant economic boost at a critical time for an industry facing significant challenges.

We cannot emphasize enough the need for quick action on this provision.

Sincerely,

The Active Financing Working Group
