

113TH CONGRESS  
1ST SESSION

# S. RES. 162

Expressing the sense of the Senate with respect to childhood stroke and recognizing May 2013 as “National Pediatric Stroke Awareness Month”.

---

## IN THE SENATE OF THE UNITED STATES

JUNE 4, 2013

Mr. BLUMENTHAL (for himself, Mr. CHAMBLISS, and Mr. MURPHY) submitted the following resolution; which was considered and agreed to

---

# RESOLUTION

Expressing the sense of the Senate with respect to childhood stroke and recognizing May 2013 as “National Pediatric Stroke Awareness Month”.

Whereas a stroke, also known as cerebrovascular disease, is an acute neurologic injury that occurs when the blood supply to a part of the brain is interrupted by a clot in the artery or a burst of the artery;

Whereas a stroke is a medical emergency that can cause permanent neurologic damage or even death if not promptly diagnosed and treated;

Whereas stroke occurs in approximately 1 out of every 3,500 live births, and has an overall annual incidence of 4.6 per 100,000 children age 19 and under;

Whereas a stroke can occur before birth;

Whereas stroke is among the top 12 causes of death for children between the ages of 1 and 14 in the United States;

Whereas 20 to 40 percent of children who have suffered a stroke die as a result;

Whereas stroke recurs within 5 years in 10 percent of children who have had an ischemic or hemorrhagic stroke;

Whereas the death rate for children who experience a stroke before the age of 1 year is the highest out of all child age groups;

Whereas there are no approved therapies for the treatment of acute stroke in infants and children;

Whereas approximately 60 percent of infants and children who have a pediatric stroke will have serious, permanent neurological disabilities, including paralysis, seizures, speech and vision problems, and attention, learning, and behavioral difficulties;

Whereas those disabilities may require ongoing physical therapy and surgeries;

Whereas the permanent health concerns and treatments resulting from strokes that occur during childhood and young adulthood have a considerable impact on children, families, and society;

Whereas not enough is known about the cause, treatment, and prevention of pediatric stroke;

Whereas medical research is the only means by which the people of the United States can identify and develop effective treatment and prevention strategies for pediatric stroke; and

Whereas early diagnosis and treatment of pediatric stroke greatly improves the chances that the affected child will

recover and not experience a recurrence: Now, therefore,  
be it

1       *Resolved*, That the Senate—

2               (1) recognizes May 2013 as “National Pediatric  
3               Stroke Awareness Month”;

4               (2) urges the people of the United States to  
5               support the efforts, programs, services, and organi-  
6               zations that work to enhance public awareness of pe-  
7               diatric stroke;

8               (3) supports the work of the National Institutes  
9               of Health in pursuit of medical progress on the mat-  
10               ter of pediatric stroke; and

11               (4) urges continued coordination and coopera-  
12               tion between the Federal Government, State and  
13               local governments, researchers, families, and the  
14               public to improve treatments and prognoses for chil-  
15               dren who suffer strokes.
