TITLE V—ESTIMATES OF DIRECT SPENDING IN THE HOUSE OF REPRESENTATIVES

SEC. 5001. DIRECT SPENDING.

(a) MEANS-TESTED DIRECT SPENDING.—

(1) FINDINGS.—The House of Representatives finds the following:

(A) For means-tested direct spending, the average rate of growth in the total level of outlays during the 10-year period preceding fiscal year 2016 is 6.8 percent.

(B) For means-tested direct spending, the estimated average rate of growth in the total level of outlays during the 10-year period beginning with fiscal year 2016 is 4.6 percent under current law.

(2) PROPOSED REFORMS.—The following reforms are proposed under this concurrent resolution by the House of Representatives for means-tested direct spending:

(A) In 1996, a Republican Congress and a Democratic President reformed welfare by limiting the duration of benefits, giving States more control over the program, and helping recipients find work. In the 5 years following passage, child-poverty rates fell, welfare caseloads fell, and

workers' wages increased. This budget assumes the enactment of proposals to reduce poverty and increase opportunity and upward mobility for struggling Americans on the road to personal and financial independence. Based on the successful welfare reforms of the 1990s, these proposals would improve work requirements and provide flexible funding for States to help those most in need find gainful employment, escape poverty, and move up the economic ladder.

(B) For Medicaid, this budget is predicated on a framework proposed by the chairmen of the committees of jurisdiction of the House of Representatives and the Senate, to modernize and improve the program while increasing State flexibility and protecting the most vulnerable populations. This budget also assumes the repeal of the Medicaid expansions in the President's health care law.

(b) **NONMEANS-TESTED DIRECT SPENDING.—**

(1) **FINDINGS.—**The House of Representatives finds the following:

(A) For nonmeans-tested direct spending, the average rate of growth in the total level of outlays during the 10-year period preceding fiscal year 2016 is 5.4 percent.

(B) For nonmeans-tested direct spending, the estimated average rate of growth in the total level of outlays during the 10-year period beginning with fiscal year 2016 is 5.5 percent under current law.

(2) **MEDICARE REFORMS.—**For Medicare, this budget advances policies to put seniors, not the Federal Government, in control of their health care decisions. Putting seniors in charge of how their health care dollars are spent will encourage providers to compete against each other on price and quality. Improvements to Medicare are necessary to extend the life of the Federal Hospital Insurance Trust Fund and protect the program for future generations.

TITLE VI—POLICY STATEMENTS

Subtitle A—Policy Statements in Both Houses

SEC. 6101. POLICY STATEMENT ON BALANCED BUDGET AMENDMENT.

It is the policy of this concurrent resolution that Congress should pass, and send to the States for their approval, a joint resolution amending the Constitution of the United States to require an annual balanced Federal budget.

SEC. 6102. POLICY STATEMENT ON SOCIAL SECURITY.

It is the policy of this concurrent resolution that the President and Congress should work together on a bipartisan basis to preserve Social Security for current and future generations. To achieve that goal—

(1) Congress should enact legislation to prevent the near-term insolvency of the Disability Insurance program, improve the administration and coordination of benefits, and increase employment opportunities for disabled workers; and

(2) the President should submit legislation to Congress addressing the long-term insolvency of both the Old-Age and Survivors Insurance program and the Disability Insurance program, and such legislation should achieve a sustainable annual cash-flow balance between taxes and benefits over the foreseeable future, rather than temporarily increasing and then depleting the balance of Government securities held by each program's trust fund.

Subtitle B—Policy Statement in the House of Representatives

SEC. 6201. POLICY STATEMENT ON BUDGET PROCESS AND BASELINE REFORM.

(a) **FINDINGS.**—

(1) In 1974, after more than 50 years of executive dominance over fiscal policy, Congress acted to reassert its “power of the purse”, and passed the Congressional Budget and Impoundment Control Act.

(2) The measure explicitly sought to establish congressional control over the budget process, to provide for annual congressional determination of the appropriate level of taxes and spending, to set important national budget priorities, and to find ways in which Members of Congress could have access to the most accurate, objective, and highest quality information to assist them in discharging their duties.

(3) Far from achieving its intended purpose, however, the process has instituted a bias toward higher spending and larger government. The behemoth of the Federal Government has largely been financed through either borrowing or taking ever greater amounts of the national income through high taxation.

(4) The process does not treat programs and policies consistently and shows a bias toward higher spending and higher taxes.

(5) It assumes extension of spending programs (of more than \$50 million per year) scheduled to expire.

(6) Yet it does not assume the extension of tax policies in the same way. consequently, extending existing tax policies that may be scheduled to expire is characterized as a new tax reduction, requiring offsets to “pay for” merely keeping tax policy the same even though estimating conventions would not require similar treatment of spending programs.

(7) The original goals set for the congressional process are admirable in their intent, but because the essential mechanisms of the process have remained the same, and “reforms” enacted over the past 40 years have largely taken the form of layering greater levels of legal complexity without reforming or reassessing the very fundamental nature of the process.

(b) **POLICY STATEMENT.**—It is the policy of this concurrent resolution on the budget that as the primary branch of Government, Congress must:

(1) Restructure the fundamental procedures of budget decision making.

(2) Reassert Congress's “power of the purse”, and reinforce the balance of powers between Congress and the President, as the 1974 Act intended.

(3) Create greater incentives for lawmakers to do budgeting as intended by the Congressional Budget Act of 1974, especially adopting a budget resolution every year.

(4) Encourage more effective control over spending, especially currently uncontrolled direct spending.

(5) Consider innovative fiscal tools such as: zero based budgeting, which would require a department or agency to justify its budget as if it were a new expenditure; and direct spending caps to enhance oversight of automatic pilot spending that increases each year without congressional approval.

(6) Promote efficient and timely budget actions, so that lawmakers complete their budget actions by the time the new fiscal year begins.

(7) Provide access to the best analysis of economic conditions available and increase awareness of how fiscal policy directly impacts overall economic growth and job creation.

(8) Remove layers of complexity that have complicated the procedures designed in 1974, and made budgeting more arcane and opaque.

(9) Remove existing biases that favor higher spending.

(10) Include procedures by which current tax laws may be extended and treated on a basis that is not different from the extension of entitlement programs.

(c) BUDGET PROCESS REFORM.—Comprehensive budget process reform should also remove the bias in the baseline against the extension of current tax laws in the following ways:

(1) Permanent extension of tax laws should not be used as a means to increase taxes on other taxpayers.

(2) For those expiring tax provisions that are proposed to be permanently extended, Congress should use a more realistic baseline that does not require them to be offset.

(3) Tax-reform legislation should not include tax increases just to offset the extension of current tax laws.

(d) LEGISLATION.—The Committee on the Budget of the House of Representatives intends to draft legislation during the 114th Congress that will rewrite the Congressional Budget and Impoundment Control Act of 1974 to fulfill the goals of making the congressional budget process more effective in ensuring taxpayers' dollars are spent wisely and efficiently.

SEC. 6202. POLICY STATEMENT ON ECONOMIC GROWTH AND JOB CREATION.

(a) FINDINGS.—The House of Representatives finds the following:

(1) Although the United States economy technically emerged from recession more than 5 years ago, the subsequent recovery has felt more like a malaise than a rebound. Real gross domestic product GDP growth over the past 5 years has averaged slightly more than 2 percent, well below the 3.2 percent historical trend rate of growth in the United States. Although the economy has shown some welcome signs of improvement of late, the Nation remains in the midst of the weakest economic recovery of the modern era.

(2) Looking ahead, CBO expects the economy to grow by an average of just 2.3 percent over the next 10 years. That level of economic growth is simply unacceptable and insufficient

to expand opportunities and the incomes of millions of middle-income Americans.

(3) Sluggish economic growth has also contributed to the country's fiscal woes. Subpar growth means that revenue levels are lower than they would otherwise be while government spending (e.g. welfare and income-support programs) is higher. Clearly, there is a dire need for policies that will spark higher rates of economic growth and greater, higher-quality job opportunities.

(4) Although job gains have been trending up of late, other aspects of the labor market remain weak. The labor force participation rate, for instance, is hovering just under 63 percent, close to the lowest level since 1978. Long-term unemployment also remains a problem. Of the roughly 8.7 million people who are currently unemployed, 2.7 million (more than 30 percent) have been unemployed for more than 6 months. Long-term unemployment erodes an individual's job skills and detaches them from job opportunities. It also undermines the long-term productive capacity of the economy.

(5) Perhaps most important, wage gains and income growth have been subpar for middle-class Americans. Average hourly earnings of private-sector workers have increased by just 1.6 percent over the past year. Prior to the recession, average hourly earnings were tracking close to 4 percent. Likewise, average income levels have remained flat in recent years. Real median household income is just under \$52,000, one of the lowest levels since 1995.

(6) The unsustainable fiscal trajectory has cast a shadow on the country's economic outlook. Investors and businesses make decisions on a forward-looking basis. They know that today's large debt levels are simply tomorrow's tax hikes, interest rate increases, or inflation and they act accordingly. This debt overhang, and the uncertainty it generates, can weigh on growth, investment, and job creation.

(7) Nearly all economists, including those at the CBO, conclude that reducing budget deficits (thereby bending the curve on debt levels) is a net positive for economic growth over time. The logic is that deficit reduction creates long-term economic benefits because it increases the pool of national savings and boosts investment, thereby raising economic growth and job creation.

(8) CBO analyzed the House Republican fiscal year 2016 budget resolution and found it would increase real output per capita (a proxy for a country's standard of living) by about \$1,000 in 2025 and roughly \$5,000 by 2040 relative to the baseline path. That means more income and greater prosperity for all Americans.

(9) In contrast, if the Government remains on the current fiscal path, future generations will face ever-higher debt service costs, a decline in national savings, and a "crowding out" of private investment. This dynamic will eventually lead to a decline in economic output and a diminution in our country's standard of living.

(10) The key economic challenge is determining how to expand the economic pie, not how best to divide up and redistribute a shrinking pie.

(11) A stronger economy is vital to lowering deficit levels and eventually balancing the budget. According to CBO, if annual real GDP growth is just 0.1 percentage point higher over the budget window, deficits would be reduced by \$326 billion.

(12) This budget resolution therefore embraces pro-growth policies, such as fundamental tax reform, that will help foster a stronger economy, greater opportunities and more job creation.

(b) **POLICY ON ECONOMIC GROWTH AND JOB CREATION.**—In the House of Representatives, it is the policy of this concurrent resolution to promote faster economic growth and job creation. By putting the budget on a sustainable path, this concurrent resolution ends the debt-fueled uncertainty holding back job creators. Reforms to the tax code will put American businesses and workers in a better position to compete and thrive in the 21st century global economy. This concurrent resolution targets the regulatory red tape and cronyism that stack the deck in favor of special interests. All of the reforms in this concurrent resolution serve as means to the larger end of helping the economy grow and expanding opportunity for all Americans.

SEC. 6203. POLICY STATEMENT ON TAX REFORM.

(a) **FINDINGS.**—The House of Representatives finds the following:

(1) A world-class tax system should be simple, fair, and promote (rather than impede) economic growth. The United States tax code fails on all three counts: It is notoriously complex, patently unfair, and highly inefficient. The tax code's complexity distorts decisions to work, save, and invest, which leads to slower economic growth, lower wages, and less job creation.

(2) Over the past decade alone, there have been 4,107 changes to the tax code, more than one per day. Many of the major changes over the years have involved carving out special preferences, exclusions, or deductions for various activities or groups. These loopholes add up to more than \$1 trillion per year and make the code unfair, inefficient, and highly complex.

(3) In addition, these tax preferences are disproportionately used by upper-income individuals.

(4) The large amount of tax preferences that pervade the code end up narrowing the tax base. A narrow tax base, in turn, requires much higher tax rates to raise a given amount of revenue.

(5) It is estimated that American taxpayers end up spending \$160 billion and roughly 6 billion hours a year complying with the tax code waste of time and resources that could be used in more productive activities.

(6) Standard economic theory shows that high marginal tax rates dampen the incentives to work, save, and invest, which reduces economic output and job creation. Lower economic output, in turn, mutes the intended revenue gain from higher marginal tax rates.

(7) Roughly half of United States active business income and half of private sector employment are derived from business entities (such as partnerships, S corporations, and sole

proprietorships) that are taxed on a “pass-through” basis, meaning the income flows through to the tax returns of the individual owners and is taxed at the individual rate structure rather than at the corporate rate. Small businesses, in particular, tend to choose this form for Federal tax purposes, and the top Federal rate on such small business income can reach nearly 45 percent. For these reasons, sound economic policy requires lowering marginal rates on these pass-through entities.

(8) The United States corporate income tax rate (including Federal, State, and local taxes) sums to slightly more than 39 percent, the highest rate in the industrialized world. Tax rates this high suppress wages and discourage investment and job creation, distort business activity, and put American businesses at a competitive disadvantage with foreign competitors.

(9) By deterring potential investment, the United States corporate tax restrains economic growth and job creation. The United States tax rate differential with other countries also fosters a variety of complicated multinational corporate behaviors intended to avoid the tax, which have the effect of moving the tax base offshore, destroying American jobs, and decreasing corporate revenue.

(10) The “worldwide” structure of United States international taxation essentially taxes earnings of United States firms twice, putting them at a significant competitive disadvantage with competitors with more competitive international tax systems.

(11) Reforming the United States tax code to a more competitive international system would boost the competitiveness of United States companies operating abroad and it would also greatly reduce tax avoidance.

(12) The tax code imposes costs on American workers through lower wages, on consumers in higher prices, and on investors in diminished returns.

(13) Revenues have averaged about 17.4 percent of the economy throughout modern American history. Revenues rise above this level under current law to 18.3 percent of the economy by the end of the 10-year budget window.

(14) Attempting to raise revenue through new tax increases to meet out-of-control spending would sink the economy and Americans’ ability to save for their retirement and their children’s education.

(15) This concurrent resolution also rejects the idea of instituting a carbon tax in the United States, which some have offered as a new source of revenue. Such a plan would damage the economy, cost jobs, and raise prices on American consumers.

(16) Closing tax loopholes to fund spending does not constitute fundamental tax reform.

(17) The goal of tax reform should be to curb or eliminate loopholes and use those savings to lower tax rates across the board not to fund more wasteful Government spending. Washington has a spending problem, not a revenue problem.

(18) Many economists believe that fundamental tax reform (i.e. a broader tax base and lower tax rates) would lead to

greater labor supply and increased investment, which, over time, would have a positive impact on total national output.

(19) Heretofore, the congressional scorekeepers the Congressional Budget Office (CBO) and the Joint Committee on Taxation (JCT).

(20) Static scoring implicitly assumes that the size of the economy (and therefore key economic variables such as labor supply and investment) remains fixed throughout the considered budget horizon. This is an abstraction from reality.

(21) A new House of Representatives rule was adopted at the beginning of the 114th Congress to help correct this problem. This rule requires CBO and JCT to incorporate the macroeconomic effects of major legislation into their official cost estimates.

(22) This rule seeks to bridge the divide between static estimates and scoring that incorporates economic feedback effects by providing policymakers with a greater amount of information about the likely economic impact of policies under their consideration while at the same time preserving traditional scoring methods and reporting conventions.

(b) POLICY ON TAX REFORM.—In the House of Representatives, it is the policy of this concurrent resolution that Congress should enact legislation that provides for a comprehensive reform of the United States tax code to promote economic growth, create American jobs, increase wages, and benefit American consumers, investors, and workers through fundamental tax reform that—

(1) simplifies the tax code to make it fairer to American families and businesses and reduces the amount of time and resources necessary to comply with tax laws;

(2) substantially lowers tax rates for individuals and consolidates the current seven individual income tax brackets into fewer brackets;

(3) repeals the Alternative Minimum Tax;

(4) reduces the corporate tax rate; and

(5) transitions the tax code to a more competitive system of international taxation.

SEC. 6204. POLICY STATEMENT ON TRADE.

(a) FINDINGS.—The House of Representatives finds the following:

(1) Opening foreign markets to American exports is vital to the United States economy and beneficial to American workers and consumers. The Commerce Department estimates that every \$1 billion of United States exports supports more than 5,000 jobs here at home.

(2) The United States can increase economic opportunities for American workers and businesses through the expansion of trade, adherence to trade agreement rules by the United States and its trading partners, and the elimination of foreign trade barriers to United States goods and services.

(3) Trade Promotion Authority is a bipartisan and bicameral effort to strengthen the role of Congress in setting negotiating objectives for trade agreements, to improve consultation with Congress by the Administration, and to provide a clear framework for congressional consideration and implementation of trade agreements.

(4) Global trade and commerce is not a zero-sum game. The idea that global expansion tends to “hollow out” United States operations is incorrect. Foreign-affiliate activity tends to complement, not substitute for, key parent activities in the United States such as employment, worker compensation, and capital investment. When United States headquartered multinationals invest and expand operations abroad it often leads to more jobs and economic growth at home.

(5) Trade agreements have saved the average American family of four more than \$10,000 per year, as a result of lower duties. Trade agreements also lower the cost of manufacturing inputs by removing duties.

(6) American businesses and workers have shown that, on a level playing field, they can excel and surpass the international competition.

(7) When negotiating trade agreements, United States laws on Intellectual Property (IP) protection should be used as a benchmark for establishing global IP frameworks. Strong IP protections have contributed significantly to the United States status as a world leader in innovation across sectors, including in the development of life-saving biologic medicines. The data protections afforded to biologics in United States law, including 12 years of data protection, allow continued development of pioneering medicines to benefit patients both in the United States and abroad. To maintain the cycle of innovation and achieve truly 21st century trade agreements, it is vital that our negotiators insist on the highest standards for IP protections.

(8) The status quo of the current tax code also undermines the competitiveness of United States businesses and costs the United States economy investment and jobs.

(9) The United States currently has an antiquated system of international taxation whereby United States multinationals operating abroad pay both the foreign-country tax and United States corporate taxes. They are essentially taxed twice. This puts them at an obvious competitive disadvantage. A modern and competitive international tax system would facilitate global commerce for United States multinational companies and would encourage foreign business investment and job creation in the United States.

(10) The ability to defer United States taxes on their foreign operations, which some erroneously refer to as a “tax loophole,” cushions this disadvantage to a certain extent. Eliminating or restricting this provision (and others like it) would harm United States competitiveness.

(11) This budget resolution advocates fundamental tax reform that would lower the United States corporate rate, now the highest in the industrialized world, and switch to a more competitive system of international taxation. This would make the United States a much more attractive place to invest and station business activity and would chip away at the incentives for United States companies to keep their profits overseas (because the United States corporate rate is so high).

(b) POLICY ON TRADE.—In the House of Representatives, it is the policy of this concurrent resolution to pursue international trade, global commerce, and a modern and competitive United States international tax system to promote job creation in the

United States. The United States should continue to seek increased economic opportunities for American workers and businesses through the expansion of trade opportunities, adherence to trade agreements and rules by the United States and its trading partners, and the elimination of foreign trade barriers to United States goods and services by opening new markets and by enforcing United States rights. To that end, Congress should pass Trade Promotion Authority to strengthen the role of Congress in setting negotiating objectives for trade agreements, to improve consultation with Congress by the Administration, and to provide a clear framework for congressional consideration and implementation of trade agreements.

SEC. 6205. POLICY STATEMENT ON REPEALING THE PRESIDENT'S HEALTH CARE LAW AND PROMOTING REAL HEALTH CARE REFORM.

(a) FINDINGS.—The House of Representatives finds the following:

(1) The President's health care law put Washington's priorities first, and not patients'. The Affordable Care Act (ACA) has failed to reduce health care premiums as promised; instead, the law mandated benefits and coverage levels, denying patients the opportunity to choose the type of coverage that best suits their health needs and driving up health coverage costs. A typical family's health care premiums were supposed to decline by \$2,500 a year; instead, according to the 2014 Employer Health Benefits Survey, health care premiums have increased by 7 percent for individuals and families since 2012.

(2) The President pledged, "If you like your health care plan, you can keep your health care plan." Instead, the non-partisan Congressional Budget Office now estimates 9 million Americans with employment-based health coverage will lose those plans due to the President's health care law, further limiting patient choice.

(3) Then-Speaker of the House, Pelosi, said that the President's health care law would create 4 million jobs over the life of the law and almost 400,000 jobs immediately. Instead, the Congressional Budget Office estimates that the reduction in hours worked due to Obamacare represents a decline of about 2.0 to 2.5 million full-time equivalent workers, compared with what would have occurred in the absence of the law. The full impact on labor represents a reduction in employment by 1.5 percent to 2.0 percent, while additional studies show less modest results. A recent study by the Mercatus Center at George Mason University estimates that Obamacare will reduce employment by up to 3 percent, or about 4 million full-time equivalent workers.

(4) The President has charged the Independent Payment Advisory Board, a panel of unelected bureaucrats, with cutting Medicare by an additional \$20.9 billion over the next ten years, according to the President's most recent budget.

(5) Since ACA was signed into law, the administration has repeatedly failed to implement it as written. The President has unilaterally acted to make a total of 28 changes, delays, and exemptions. The President has signed into law another 17 changes made by Congress. The Supreme Court struck down

the forced expansion of Medicaid; ruled the individual “mandate” could only be characterized as a tax to remain constitutional; and rejected the requirement that closely held companies provide health insurance to their employees if doing so violates these companies’ religious beliefs. Even now, almost five years after enactment, the Supreme Court continues to evaluate the legality of how the President’s administration has implemented the law. All of these changes prove the folly underlying the entire program—health care in the United States cannot be run from a centralized bureaucracy.

(6) The President’s health care law is unaffordable, intrusive, overreaching, destructive, and unworkable. Its complex structure of subsidies, mandates, and penalties perversely impact individuals, married couples, and families. The law should be fully repealed, allowing for real, patient-centered health care reform: the development of real health care reforms that puts patients first, that make affordable, quality health care available to all Americans, and that build on the innovation and creativity of all the participants in the health care sector.

(b) POLICY ON PROMOTING REAL HEALTH CARE REFORM.—In the House of Representatives, it is the policy of this concurrent resolution that the President’s health care law should be fully repealed and real health care reform promoted in accordance with the following principles:

(1) IN GENERAL.—Health care reform should enhance affordability, accessibility, quality, innovation, choices and responsiveness in health care coverage for all Americans, putting patients, families, and doctors in charge, not Washington, DC. These reforms should encourage increased competition and transparency. Under the President’s health care law, government controls Americans’ health care choices. Under true, patient-centered reform, Americans would.

(2) AFFORDABILITY.—Real reform should be centered on ensuring that all Americans, no matter their age, income, or health status, have the ability to afford health care coverage. The health care delivery structure should be improved, and individuals should not be priced out of the health insurance market due to pre-existing conditions, but nationalized health care is not only unnecessary to accomplish this, it undermines the goal. Individuals should be allowed to join together voluntarily to pool risk through mechanisms such as Individual Membership Associations and Small Employer Membership Associations.

(3) ACCESSABILITY.—Instead of Washington outlining for Americans the ways they cannot use their health insurance, reforms should make health coverage more portable. Individuals should be able to own their insurance and have it follow them in and out of jobs throughout their career. Small business owners should be permitted to band together across State lines through their membership in bona fide trade or professional associations to purchase health coverage for their families and employees at a low cost. This will increase small businesses’ bargaining power, volume discounts, and administrative efficiencies while giving them freedom from State-mandated benefit packages. Also, insurers licensed to sell policies in one State should be permitted to offer them to residents in any other State, and consumers should be permitted to shop for

health insurance across State lines, as they are with other insurance products online, by mail, by phone, or in consultation with an insurance agent.

(4) **QUALITY.**—Incentives for providers to deliver high-quality, responsive, and coordinated care will promote patient outcomes and drive down health care costs. Likewise, reforms that work to restore the patient-physician relationship by reducing administrative burdens and allowing physicians to do what they do best—care for patients.

(5) **CHOICES.**—Individuals and families should be free to secure the health care coverage that best meets their needs, rather than instituting one-size-fits-all directives from Federal bureaucracies such as the Internal Revenue Service, the Department of Health and Human Services, and the Independent Payment Advisory Board.

(6) **INNOVATION.**—Instead of stifling innovation in health care technologies, treatments, medications, and therapies with Federal mandates, taxes, and price controls, a reformed health care system should encourage research, development and innovation.

(7) **RESPONSIVENESS.**—Reform should return authority to States wherever possible to make the system more responsive to patients and their needs. Instead of tying States' hands with Federal requirements for their Medicaid programs, the Federal Government should return control of this program to the States. Not only does the current Medicaid program drive up Federal debt and threaten to bankrupt State budgets, but States are better positioned to provide quality, affordable care to those who are eligible for the program and to track down and weed out waste, fraud and abuse. Beneficiary choices in the State Children's Health Insurance Program (SCHIP) and Medicaid should be improved. States should make available the purchase of private insurance as an option to their Medicaid and SCHIP populations (though they should not require enrollment).

(8) **REFORMS.**—Reforms should be made to prevent lawsuit abuse and curb the practice of defensive medicine, which are significant drivers increasing health care costs. The burden of proof in medical malpractice cases should be based on compliance with best practice guidelines, and States should be free to implement those policies to best suit their needs.

SEC. 6206. POLICY STATEMENT ON MEDICARE.

(a) **FINDINGS.**—The House of Representatives finds the following:

(1) More than 50 million Americans depend on Medicare for their health security.

(2) The Medicare Trustees Report has repeatedly recommended that Medicare's long-term financial challenges be addressed soon. Each year without reform, the financial condition of Medicare becomes more precarious and the threat to those in or near retirement becomes more pronounced. According to the Medicare Trustees Report—

(A) the Hospital Insurance Trust Fund will be exhausted in 2030 and unable to pay scheduled benefits;

(B) Medicare enrollment is expected to increase by over 50 percent in the next two decades, as 10,000 baby boomers reach retirement age each day;

(C) enrollees remain in Medicare three times longer than at the outset of the program;

(D) current workers' payroll contributions pay for current beneficiaries;

(E) in 2013, the ratio was 3.2 workers per beneficiary, but this falls to 2.3 in 2030 and continues to decrease over time;

(F) most Medicare beneficiaries receive about three dollars in Medicare benefits for every one dollar paid into the program; and

(G) Medicare spending is growing faster than the economy and Medicare outlays are currently rising at a rate of 6.5 percent per year over the next 10 years. According to the Congressional Budget Office's 2014 Long-Term Budget Outlook, spending on Medicare is projected to reach 5 percent of gross domestic product (GDP) by 2043 and 9.3 percent of GDP by 2089.

(3) Failing to address this problem will leave millions of American seniors without adequate health security and younger generations burdened with enormous debt to pay for spending levels that cannot be sustained.

(b) **POLICY ON MEDICARE REFORM.**—In the House of Representatives, it is the policy of this concurrent resolution to preserve the program for those in or near retirement and strengthen Medicare for future beneficiaries.

(c) **ASSUMPTIONS.**—This concurrent resolution assumes reform of the Medicare program such that—

(1) current Medicare benefits are preserved for those in or near retirement;

(2) permanent reform of the sustainable growth rate is responsibly accounted for to ensure physicians continue to participate in the Medicare program and provide quality health care for beneficiaries;

(3) when future generations reach eligibility, Medicare is reformed to provide a premium support payment and a selection of guaranteed health coverage options from which recipients can choose a plan that best suits their needs;

(4) Medicare will maintain traditional fee-for-service as a plan option;

(5) Medicare will provide additional assistance for lower income beneficiaries and those with greater health risks; and

(6) Medicare spending is put on a sustainable path and the Medicare program becomes solvent over the long-term.

SEC. 6207. POLICY STATEMENT ON MEDICAL DISCOVERY, DEVELOPMENT, DELIVERY AND INNOVATION.

(a) **FINDINGS.**—The House of Representatives finds the following:

(1) For decades, the Nation's commitment to the discovery, development, and delivery of new treatments and cures has made the United States the biomedical innovation capital of the world, bringing life-saving drugs and devices to patients and well over a million high-paying jobs to local communities.

(2) Thanks to the visionary and determined leadership of innovators throughout America, including industry, academic medical centers, and the National Institutes of Health (NIH), the United States has led the way in early discovery. The United States leadership role is being threatened, however, as other countries contribute more to basic research from both public and private sources.

(3) The Organisation for Economic Co-operation and Development predicts that China, for example, will outspend the United States in total research and development by the end of the decade.

(4) Federal policies should foster innovation in health care, not stifle it. America should maintain its world leadership in medical science by encouraging competitive forces to work through the marketplace in delivering cures and therapies to patients.

(5) Too often the bureaucracy and red-tape in Washington hold back medical innovation and prevent new lifesaving treatments from reaching patients. This concurrent resolution recognizes the valuable role of the NIH and the indispensable contributions to medical research coming from outside Washington.

(6) America is the greatest, most innovative Nation on Earth. Her people are innovators, entrepreneurs, visionaries, and relentless builders of the future. Americans were responsible for the first telephone, the first airplane, the first computer, for putting the first man on the moon, for creating the first vaccine for polio and for legions of other scientific and medical breakthroughs that have improved and prolonged human health and life for countless people in America and around the world.

(b) POLICY ON MEDICAL INNOVATION.—

(1) In the House of Representatives, it is the policy of this concurrent resolution to support the important work of medical innovators throughout the country, including private-sector innovators, medical centers and the National Institutes of Health.

(2) At the same time, the budget calls for continued strong funding for the agencies that engage in valuable research and development, while also urging Washington to get out of the way of researchers, discoverers and innovators all over the country.

SEC. 6208. POLICY STATEMENT ON FEDERAL REGULATORY REFORM.

(a) FINDINGS.—The House of Representatives finds the following:

(1) Excessive regulation at the Federal level has hurt job creation and dampened the economy, slowing the Nation's recovery from the economic recession.

(2) Since President Obama's inauguration in 2009, the administration has issued more than 468,500 pages of regulations in the Federal Register including 70,066 pages in 2014.

(3) The National Association of Manufacturers estimates the total cost of regulations is as high as \$2.03 trillion per year. Since 2009, the White House has generated more than \$494 billion in regulatory activity, with an additional \$87.6 billion in regulatory costs currently pending.

(4) The Dodd-Frank financial services legislation (Public Law 111-203) has resulted in more than \$32 billion in compliance costs and saddled job creators with more than 63 million hours of compliance paperwork.

(5) Implementation of the Affordable Care Act to date has added 132.9 million annual hours of compliance paperwork, imposing \$24.3 billion of compliance costs on the private sector and an \$8 billion cost burden on the States.

(6) The highest regulatory costs come from rules issued by the Environmental Protection Agency (EPA); these regulations are primarily targeted at the coal industry. In June 2014, the EPA proposed a rule to cut carbon pollution from the Nation's power plants. The proposed standards are unachievable with current commercially available technology, resulting in a de-facto ban on new coal-fired power plants.

(7) Coal-fired power plants provide roughly 40 percent of the United States electricity at a low cost. Unfairly targeting the coal industry with costly and unachievable regulations will increase energy prices, disproportionately disadvantaging energy-intensive industries like manufacturing and construction, and will make life more difficult for millions of low-income and middle class families already struggling to pay their bills.

(8) Three hundred and thirty coal units are being retired or converted as a result of EPA regulations. Combined with the de-facto prohibition on new plants, these retirements and conversions may further increase the cost of electricity.

(9) A recent study by the energy market analysis group Energy Ventures Analysis Inc. estimates the average energy bill in West Virginia will rise \$750 per household by 2020, due in part to EPA regulations. West Virginia receives 95 percent of its electricity from coal.

(10) The Heritage Foundation found that a phase-out of coal would cost 600,000 jobs by the end of 2023, resulting in an aggregate gross domestic product decrease of \$2.23 trillion over the entire period and reducing the income of a family of four by \$1,200 per year. Of these jobs, 330,000 will come from the manufacturing sector, with California, Texas, Ohio, Illinois, Pennsylvania, Michigan, New York, Indiana, North Carolina, Wisconsin, and Georgia seeing the highest job losses.

(b) POLICY ON FEDERAL REGULATORY REFORM.—In the House of Representatives, it is the policy of this concurrent resolution that Congress should, in consultation with the public burdened by excessive regulation, enact legislation that—

(1) promotes economic growth and job creation by eliminating unnecessary red tape and streamlining and simplifying Federal regulations;

(2) requires the implementation of a regulatory budget to be allocated amongst Government agencies, which would require congressional approval and limit the maximum costs of regulations in a given year;

(3) requires congressional approval of all new major regulations (those with an impact of \$100 million or more) before enactment as opposed to current law in which Congress must expressly disapprove of regulation to prevent it from becoming

law, which would keep Congress engaged as to pending regulatory policy and prevent costly and unsound policies from being implemented and becoming effective;

(4) requires a three year retrospective cost-benefit analysis of all new major regulations, to ensure that regulations operate as intended;

(5) reinforces the requirement of regulatory impact analysis for regulations proposed by executive branch agencies but also expands the requirement to independent agencies so that by law they consider the costs and benefits of proposed regulations rather than merely being encouraged to do so as is current practice; and

(6) requires a formal rulemaking process for all major regulations, which would increase transparency over the process and allow interested parties to communicate their views on proposed legislation to agency officials.

SEC. 6209. POLICY STATEMENT ON HIGHER EDUCATION AND WORKFORCE DEVELOPMENT OPPORTUNITY.

(a) FINDINGS ON HIGHER EDUCATION.—The House of Representatives finds the following:

(1) A well-educated workforce is critical to economic, job, and wage growth.

(2) Roughly 20 million students are enrolled in American colleges and universities.

(3) Over the past decade, tuition and fees have been growing at an unsustainable rate. Between the 2004–2005 Academic Year and the 2014–2015 Academic Year—

(A) published tuition and fees at public 4-year colleges and universities increased at an average rate of 3.5 percent per year above the rate of inflation;

(B) published tuition and fees at public two-year colleges and universities increased at an average rate of 2.5 percent per year above the rate of inflation; and

(C) published tuition and fees at private nonprofit 4-year colleges and universities increased at an average rate of 2.2 percent per year above the rate of inflation.

(4) Federal financial aid for higher education has also seen a dramatic increase. The portion of the Federal student aid portfolio composed of Direct Loans, Federal Family Education Loans, and Perkins Loans with outstanding balances grew by 119 percent between fiscal year 2007 and fiscal year 2014.

(5) This spending has failed to make college more affordable.

(6) In his 2012 State of the Union Address, President Obama noted: “We can’t just keep subsidizing skyrocketing tuition; we’ll run out of money”.

(7) American students are chasing ever-increasing tuition with ever-increasing debt. According to the Federal Reserve Bank of New York, student debt now stands at nearly \$1.2 trillion. This makes student loans the second largest balance of consumer debt, after mortgage debt.

(8) Students are carrying large debt loads and too many fail to complete college or end up defaulting on these loans due to their debt burden and a weak economy and job market.

(9) Based on estimates from the Congressional Budget Office, the Pell Grant Program will face a fiscal shortfall beginning in fiscal year 2017 and continuing in each subsequent year in the current budget window.

(10) Failing to address these problems will jeopardize access and affordability to higher education for America's young people.

(b) **POLICY ON HIGHER EDUCATION AFFORDABILITY.**—In the House of Representatives, it is the policy of this concurrent resolution to address the root drivers of tuition inflation, by—

(1) targeting Federal financial aid to those most in need;

(2) streamlining programs that provide aid to make them more effective;

(3) maintaining the maximum Pell grant award level at \$5,775 in each year of the budget window; and

(4) removing regulatory barriers in higher education that act to restrict flexibility and innovative teaching, particularly as it relates to non-traditional models such as online coursework and competency-based learning.

(c) **FINDINGS ON WORKFORCE DEVELOPMENT.**—The House of Representatives finds the following:

(1) 8.7 million Americans are currently unemployed.

(2) Despite billions of dollars in spending, those looking for work are stymied by a broken workforce development system that fails to connect workers with assistance and employers with trained personnel.

(3) The House Education and Workforce Committee successfully consolidated 15 job training programs in the recently enacted Workforce Innovation and Opportunity Act.

(d) **POLICY ON WORKFORCE DEVELOPMENT.**—In the House of Representatives, it is the policy of this concurrent resolution to address the failings in the current workforce development system, by—

(1) further streamlining and consolidating Federal job training programs; and

(2) empowering states with the flexibility to tailor funding and programs to the specific needs of their workforce, including the development of career scholarships.

SEC. 6210. POLICY STATEMENT ON DEPARTMENT OF VETERANS AFFAIRS.

(a) **FINDINGS.**—The House of Representatives finds the following:

(1) For years, there has been serious concern regarding the Department of Veterans Affairs (VA) bureaucratic mismanagement and continuous failure to provide veterans timely access to health care and benefits.

(2) In 2014, reports started breaking across the Nation that VA medical centers were manipulating wait-list documents to hide long delays veterans were facing to receive health care. The VA hospital scandal led to the immediate resignation of then-Secretary of Veterans Affairs Eric K. Shinseki.

(3) In 2015, for the first time ever, VA health care was added to the “high-risk” list of the Government Accountability Office (GAO), due to management and oversight failures that have directly resulted in risks to the timeliness, cost-effectiveness, and quality of health care.

(4) In response to the scandal, the House Committee on Veterans' Affairs held several oversight hearings and ultimately enacted the Veterans' Access, Choice and Accountability Act of 2014 (VACAA) (Public Law 113–146) to address these problems. VACAA provided \$15 billion in emergency resources to fund internal health care needs within the department and provided veterans enhanced access to private-sector health care under the new Veterans Choice Program.

(b) **POLICY ON THE DEPARTMENT OF VETERANS AFFAIRS.**—This budget supports the continued oversight efforts by the Committee on Veterans' Affairs of the House of Representatives to ensure the VA is not only transparent and accountable, but also successful in achieving its goals in providing timely health care and benefits to America's veterans. The Committee on the Budget of the House of Representatives will continue to closely monitor the VA's progress to ensure resources provided by Congress are sufficient and efficiently used to provide needed benefits and services to veterans.

SEC. 6211. POLICY STATEMENT ON FEDERAL ACCOUNTING METHODOLOGIES.

(a) **FINDINGS.**—The House of Representatives finds the following:

(1) Given the thousands of Federal programs and trillions of dollars the Federal Government spends each year, assessing and accounting for Federal fiscal activities and liabilities is a complex undertaking.

(2) Current methods of accounting leave much to be desired in capturing the full scope of government and in presenting information in a clear and compelling way that illuminates the best options going forward.

(3) Most fiscal analysis produced by the Congressional Budget Office (CBO) is conducted over a relatively short time horizon: 10 or 25 years. While this time frame is useful for most purposes, it fails to consider the fiscal consequences over the longer term.

(4) Additionally, current accounting methodology does not provide an analysis of how the Federal Government's fiscal situation over the long run affects Americans of various age cohorts.

(5) Another consideration is how Federal programs should be accounted for. The "accrual method" of accounting records revenue when it is earned and expenses when they are incurred, while the "cash method" records revenue and expenses when cash is actually paid or received.

(6) The Federal budget accounts for most programs using cash accounting. Some programs, however, particularly loan and loan guarantee programs, are accounted for using accrual methods.

(7) GAO has indicated that accrual accounting may provide a more accurate estimation of the Federal Government's liabilities than cash accounting for some programs specifically those that provide some form of insurance.

(8) Where accrual accounting is used, it is almost exclusively calculated by CBO according to the methodology outlined in the Federal Credit Reform Act of 1990 (FCRA). CBO uses fair value methodology instead of FCRA to measure the cost of Fannie Mae and Freddie Mac, for example.

(9) FCRA methodology, however, understates the risk and thus the true cost of Federal programs. An alternative is fair value methodology, which uses discount rates that incorporate the risk inherent to the type of liability being estimated in addition to Treasury discount rates of the proper maturity length.

(10) The Congressional Budget Office has concluded that “adopting a fair-value approach would provide a more comprehensive way to measure the costs of Federal credit programs and would permit more level comparisons between those costs and the costs of other forms of federal assistance” than the current approach under FCRA.

(b) **POLICY ON FEDERAL ACCOUNTING METHODOLOGIES.**—In the House of Representatives, it is the policy of this concurrent resolution that Congress should, in consultation with the Congressional Budget Office and the public affected by Federal budgetary choices, adopt Government-wide reforms of budget and accounting practices so the American people and their representatives can more readily understand the fiscal situation of the Government of the United States and the options best suited to improving it. Such reforms may include but should not be limited to the following:

(1) Providing additional metrics to enhance our current analysis by considering our fiscal situation comprehensively, over an extended time horizon, and as it affects Americans of various age cohorts.

(2) Expanding the use of accrual accounting where appropriate.

(3) Accounting for certain Federal credit programs using fair value accounting as opposed to the current approach under the Federal Credit Reform Act of 1990.

SEC. 6212. POLICY STATEMENT ON REDUCING UNNECESSARY, WASTEFUL, AND UNAUTHORIZED SPENDING.

(a) **FINDINGS.**—The House of Representatives finds the following:

(1) The Government Accountability Office (GAO) is required by law to identify examples of waste, duplication, and overlap in Federal programs, and has so identified dozens of such examples.

(2) In its report to Congress on Government Efficiency and Effectiveness, the Comptroller General has stated that addressing the identified waste, duplication, and overlap in Federal programs could “lead to tens of billions of dollars of additional savings.”

(3) In 2011, 2012, 2013, and 2014 the GAO issued reports showing excessive duplication and redundancy in Federal programs including—

(A) two hundred nine Science, Technology, Engineering, and Mathematics education programs in 13 different Federal agencies at a cost of \$3 billion annually;

(B) two hundred separate Department of Justice crime prevention and victim services grant programs with an annual cost of \$3.9 billion in 2010;

(C) twenty different Federal entities administer 160 housing programs and other forms of Federal assistance for housing with a total cost of \$170 billion in 2010;

(D) seventeen separate Homeland Security preparedness grant programs that spent \$37 billion between fiscal years 2011 and 2012;

(E) fourteen grant and loan programs, and three tax benefits to reduce diesel emissions;

(F) ninety-four different initiatives run by 11 different agencies to encourage “green building” in the private sector; and

(G) twenty-three agencies implemented approximately 670 renewable energy initiatives in fiscal year 2010 at a cost of nearly \$15 billion.

(4) The Federal Government spends more than \$80 billion each year for approximately 1,400 information technology investments. GAO has identified broad acquisition failures, waste, and unnecessary duplication in the Government’s information technology infrastructure. experts have estimated that eliminating these problems could save 25 percent or \$20 billion.

(5) GAO has identified strategic sourcing as a potential source of spending reductions. In 2011 GAO estimated that saving 10 percent of the total or all Federal procurement could generate more than \$50 billion in savings annually.

(6) Federal agencies reported an estimated \$106 billion in improper payments in fiscal year 2013.

(7) Under clause 2 of rule XI of the Rules of the House of Representatives, each standing committee must hold at least one hearing during each 120 day period following its establishment on waste, fraud, abuse, or mismanagement in Government programs.

(8) According to the Congressional Budget Office, by fiscal year 2015, 32 laws will expire, possibly resulting in \$693 billion in unauthorized appropriations. Timely reauthorizations of these laws would ensure assessments of program justification and effectiveness.

(9) The findings resulting from congressional oversight of Federal Government programs should result in programmatic changes in both authorizing statutes and program funding levels.

(b) POLICY ON REDUCING UNNECESSARY, WASTEFUL, AND UNAUTHORIZED SPENDING.—

(1) Each authorizing committee of the House of Representatives annually should include in its Views and Estimates letter required under section 301(d) of the Congressional Budget Act of 1974 recommendations to the Committee on the Budget of the House of Representatives of programs within the jurisdiction of such committee whose funding should be reduced or eliminated.

(2) Committees of jurisdiction should review all unauthorized programs funded through annual appropriations to determine if the programs are operating efficiently and effectively.

(3) Committees should reauthorize those programs that in the committees’ judgment should continue to receive funding.

(4) For those programs not reauthorized by committees, the House of Representatives should enforce the limitations on funding such unauthorized programs in the House rules. If the strictures of the rules are deemed to be too rapid in prohibiting spending on unauthorized programs, then milder

measures should be adopted and enforced until a return to the full prohibition of clause 2(a)(1) of rule XXI of the Rules of the House.

SEC. 6213. POLICY STATEMENT ON DEFICIT REDUCTION THROUGH THE CANCELLATION OF UNOBLIGATED BALANCES.

(a) **FINDINGS.**—The House of Representatives finds the following:

(1) According to the most recent estimate from the Office of Management and Budget, Federal agencies were expected to hold \$844 billion in unobligated balances at the close of fiscal year 2015.

(2) These funds represent direct and discretionary spending previously made available by Congress that remains available for expenditure.

(3) In some cases, agencies are granted funding and it remains available for obligation indefinitely.

(4) The Congressional Budget and Impoundment Control Act of 1974 requires the Office of Management and Budget to make funds available to agencies for obligation and prohibits the Administration from withholding or cancelling unobligated funds unless approved by an Act of Congress.

(5) Greater congressional oversight is required to review and identify potential savings from canceling unobligated balances of funds that are no longer needed.

(b) **POLICY ON DEFICIT REDUCTION THROUGH THE CANCELLATION OF UNOBLIGATED BALANCES.**—In the House of Representatives, committees should through their oversight activities identify and achieve savings through the cancellation or rescission of unobligated balances that neither abrogate contractual obligations of the Government nor reduce or disrupt Federal commitments under programs such as Social Security, veterans' affairs, national security, and Treasury authority to finance the national debt.

(c) **DEFICIT REDUCTION.**—The House of Representatives, with the assistance of the Government Accountability Office, the Inspectors General, and other appropriate agencies should continue to make it a high priority to review unobligated balances and identify savings for deficit reduction.

SEC. 6214. POLICY STATEMENT ON AGENCY FEES AND SPENDING.

(a) **FINDINGS.**—Congress finds the following:

(1) A number of Federal agencies and organizations have permanent authority to collect fees and other offsetting collections and to spend these collected funds.

(2) The total amount of offsetting fees and offsetting collections is estimated by the Office of Management and Budget to be \$525 billion in fiscal year 2016.

(3) Agency budget justifications are, in some cases, not fully transparent about the amount of program activity funded through offsetting collections or fees. This lack of transparency prevents effective and accountable government.

(b) **POLICY ON AGENCY FEES AND SPENDING.**—In the House of Representatives, it is the policy of this concurrent resolution that Congress must reassert its constitutional prerogative to control spending and conduct oversight. To do so, Congress should enact legislation requiring programs that are funded through fees, offsetting receipts, or offsetting collections to be allocated new budget authority annually. Such allocation may arise from—

S. Con. Res. 11—98

(1) legislation originating from the authorizing committee of jurisdiction for the agency or program; or

(2) fee and account specific allocations included in annual appropriation Acts.

SEC. 6215. POLICY STATEMENT ON RESPONSIBLE STEWARDSHIP OF TAXPAYER DOLLARS.

(a) FINDINGS.—The House of Representatives finds the following:

(1) The budget for the House of Representatives is \$188 million less than it was when Republicans became the majority in 2011.

(2) The House of Representatives has achieved significant savings by consolidating operations and renegotiating contracts.

(b) POLICY ON RESPONSIBLE STEWARDSHIP OF TAXPAYER DOLLARS.—In the House of Representatives, it is the policy of this concurrent resolution that:

(1) The House of Representatives must be a model for the responsible stewardship of taxpayer resources and therefore must identify any savings that can be achieved through greater productivity and efficiency gains in the operation and maintenance of House services and resources like printing, conferences, utilities, telecommunications, furniture, grounds maintenance, postage, and rent. This should include a review of policies and procedures for acquisition of goods and services to eliminate any unnecessary spending. The Committee on House Administration should review the policies pertaining to the services provided to Members and committees of the House of Representatives, and should identify ways to reduce any subsidies paid for the operation of the House gym, barber shop, salon, and the House dining room.

(2) No taxpayer funds may be used to purchase first class airfare or to lease corporate jets for Members of Congress.

(3) Retirement benefits for Members of Congress should not include free, taxpayer-funded health care for life.

SEC. 6216. POLICY STATEMENT ON “NO BUDGET, NO PAY”.

In the House of Representatives, it is the policy of this concurrent resolution that Congress should agree to a concurrent resolution on the budget every year pursuant to section 301 of the Congressional Budget Act of 1974. If by April 15, the House of Representatives has not agreed to a concurrent resolution on the budget, the payroll administrator of the House of Representatives should carry out this policy in the same manner as the provisions of Public Law 113–3, the No Budget, No Pay Act of 2013, and should place in an escrow account all compensation otherwise required to be made for Members of the House of Representatives. Withheld compensation should be released to Members of the House of Representatives the earlier of the day on which the House of Representatives agrees to a concurrent resolution on the budget, pursuant to section 301 of the Congressional Budget Act of 1974, or the last day of that Congress.

SEC. 6217. POLICY STATEMENT ON NATIONAL SECURITY FUNDING.

(a) FINDINGS.—The House of Representatives finds the following:

(1) Russian aggression, the growing threats of the Islamic State of Iraq and the Levant in the Middle East, North Korean

and Iranian nuclear and missile programs, and continued Chinese investments in high-end military capabilities and cyber warfare shape the parameters of an increasingly complex and challenging security environment.

(2) All four current service chiefs testified that the National Military Strategy could not be executed at sequestration levels.

(3) The independent and bipartisan National Defense Panel conducted risk assessments of force structure changes triggered by the Budget Control Act of 2011 (BCA) and concluded that in addition to previous cuts to defense dating back to 2009, the sequestration of defense discretionary spending has “caused significant shortfalls in U.S. military readiness and both present and future capabilities”.

(4) The President’s fiscal year 2016 budget irresponsibly ignores current law and requests a defense budget \$38 billion above the caps for rhetorical gain. By creating an expectation of spending without a plan to avoid the BCA’s guaranteed sequester upon breaching of its caps, the White House’s proposal compounds the fiscal uncertainty that has affected the military’s ability to adequately plan for future contingencies and make investments crucial for the Nation’s defense.

(5) The President’s budget proposes \$1.8 trillion in tax increases, in addition to the \$1.7 trillion in tax hikes the Administration has already imposed. The President’s tax increases would further burden economic growth and is not a realistic source for offsets to fund defense sequester replacement.

(b) POLICY ON FISCAL YEAR 2016 NATIONAL DEFENSE FUNDING.—In fiscal year 2015, the House-passed budget resolution anticipated \$566 billion for national defense in the discretionary base budget for fiscal year 2016. With no necessary statutory change yet provided by Congress, the BCA statute would require limiting national defense discretionary base funding to \$523 billion in fiscal year 2016. However, in total with \$90 billion, the House of Representatives Budget estimate for Overseas Contingency Operations funding for the Department of Defense, the fiscal year 2016 budget provides over \$613 billion total for defense spending that is higher than the President’s budget request for the fiscal year.

(c) DEFENSE READINESS AND MODERNIZATION FUND.—(1) The budget resolution recognizes the need to ensure robust funding for national defense while maintaining overall fiscal discipline. The budget resolution prioritizes our national defense and the needs of the warfighter by providing needed dollars through the creation of the “Defense Readiness and Modernization Fund”.

(2) The Defense Readiness and Modernization Fund provides the mechanism for Congress to responsibly allocate in a deficit-neutral way the resources the military needs to secure the safety and liberty of United States citizens from threats at home and abroad. The Defense Readiness and Modernization Fund will provide the chair of the Committee on the Budget of the House of Representatives the ability to increase allocations to support legislation that would provide for the Department of Defense warfighting capabilities, modernization, training and maintenance associated with combat readiness, activities to reach full auditability of the Department of Defense’s financial statements, and implementation of military and compensation reforms.

S. Con. Res. 11—100

(d) SEQUESTER REPLACEMENT FOR NATIONAL DEFENSE.—This concurrent resolution encourages an immediate reevaluation of Federal Government priorities to maintain the strength of America's national security posture. In identifying policies to restructure and stabilize the Government's major entitlement programs which, along with net interest, will consume all Federal revenue in less than 20 years, the budget also charts a course that can ensure the availability of needed national security resources.
