

8. AID TO STATE AND LOCAL GOVERNMENTS

State and local governments have a vital constitutional responsibility to provide government services. They have the major role in providing domestic public services, such as public education, law enforcement, roads, water supply, and sewage treatment. The Federal Government contributes to that role by promoting a healthy economy. It also provides grants, loans, and tax subsidies to State and local governments.

Federal grants help State and local governments finance programs covering most areas of domestic public spending, including income support, infrastructure, education, and social services. Federal grant outlays were \$443.8 billion in 2007 and are estimated to be \$466.6 billion in 2008 and \$476.1 billion in 2009. These amounts include the value of loan subsidies for loans to State and local governments.

Grant outlays to State and local governments for payments to individuals, such as Medicaid payments, are estimated to be 66 percent of total grants in 2009; grant outlays for physical capital investment, 16 percent; and grant outlays for all other purposes, largely education, training, and social services, 18 percent.

Some tax expenditures also constitute Federal aid to State and local governments. Tax expenditures stem from special exclusions, exemptions, deductions, credits, deferrals, or tax rates in the Federal tax laws.

The deductibility of State and local personal income and property taxes from gross income for Federal income tax purposes and the exclusion of interest on State and local bonds from Federal taxation comprise the two largest categories of tax expenditures benefiting State and local governments. In 2009, these provisions are estimated to be worth \$85.0 billion. Chapter 19, "Tax Expenditures," of this volume provides a detailed discussion of the measurement and definition of tax expenditures and a complete list of the estimated costs of specific tax expenditures. Tax expenditures that especially aid State and local governments are displayed separately at the end of Tables 19-1 and 19-2.

This chapter also includes information on the performance of selected grant programs based on the Program Assessment Rating Tool. An Appendix to this chapter includes State-by-State estimates of major grant programs.

Table 8-1. FEDERAL GRANT OUTLAYS BY AGENCY

(In billions of dollars)

Agency	2007 Actual	Estimate	
		2008	2009
Department of Agriculture	26.2	28.6	28.6
Department of Commerce	0.4	0.8	0.8
Department of Education	40.2	41.6	40.6
Department of Energy	0.2	0.1	*
Department of Health and Human Services	256.1	268.7	279.4
Department of Homeland Security	8.8	8.2	7.6
Department of Housing and Urban Development	40.0	41.4	38.1
Department of the Interior	4.1	4.7	5.4
Department of Justice	4.0	3.9	3.9
Department of Labor	7.0	6.9	6.9
Department of Transportation	47.9	52.9	56.1
Department of the Treasury	0.5	0.6	0.6
Department of Veterans Affairs	0.6	0.7	0.7
Environmental Protection Agency	4.0	3.2	3.6
Other agencies	3.7	4.1	3.9
Total	443.8	466.6	476.1

*\$50 million or less.

Table 8-1 shows the distribution of grants by agency. Grant outlays by the Department of Health and Human Services are estimated to be \$279.4 billion in 2009, almost 60 percent of total grant outlays. Most of the remaining grant spending is in the Departments of Agriculture, Education, Housing and Urban Development, and Transportation, which account for another 34 percent of grant outlays.

HIGHLIGHTS OF THE FEDERAL AID PROGRAM

Several proposals in the 2009 Budget affect Federal aid to State and local governments and the important relationships between the levels of government. In addition to the proposals relating to specific grant programs discussed below, the Administration intends to work with State and local governments to make the Federal system more efficient and effective and to improve the design, administration, and financial management of Federal grant programs through reducing improper payments and assessing performance of grants with the

Program Assessment Rating Tool (PART), as discussed in a later section of this chapter.

Highlights of proposals affecting grants to State and local governments are presented below. For additional information on these proposals, see discussions in the main *Budget* volume.

Homeland Security

The 2009 Budget provides \$2.2 billion in support, primarily in the form of grants to the Federal Government's State and local partners in homeland security

and continues to emphasize programs which distribute grant awards on the basis of risk. In addition, the Budget introduces a new competitive grant program designed to address national vulnerabilities; this program supports REAL ID implementation and infrastructure protection projects in 2009.

The Budget also strengthens border security and interior enforcement by partnering with State and local law enforcement to expand the 287(g) program. This program improves coordination and provides assistance and training in immigration law for State and local law enforcement officials.

Natural Resources and Environment

Grant outlays for natural resources and environment programs are estimated to be \$5.9 billion in 2009.

The 2009 Budget promotes the efficient use of water by partnering with State and local agencies to fund Water Conservation and Water Supply Studies through a competitive grant process. These studies will conserve water by improving water-use efficiency, increase water availability by assessing the impact of increased water demand and changing demographics on water supply, and prevent the decline of species by proactively addressing adverse environmental impacts on habitats.

The Budget also helps States and communities finance wastewater and drinking water infrastructure needs. The Budget:

- Adds 50 partners to the Water Lab Alliance network while continuing to provide training and technical assistance to improve the capabilities and capacity of the water sector.
- Provides \$555 million to meet the Administration's commitment to provide \$6.8 billion total between 2004–2011 for the Clean Water State Revolving Fund (SRF). Over the long term this will result in the Clean Water SRF providing an annual average of \$3.4 billion in loans for wastewater infrastructure.
- Provides \$842 million for the Drinking Water SRF to continue the President's commitment to capitalize the program until 2018. Over the long term this will result in the Drinking Water SRF providing an annual average of \$1.2 billion in loans for drinking water infrastructure.
- Removes the State volume cap on private activity bonds (PABs) issued for public purpose drinking water and wastewater facilities if the entity using the PABs implements full-cost pricing within five years.

Community and Regional Development

Grant outlays for community and regional development programs are estimated to be \$17.1 billion in 2009.

The 2009 Budget provides \$2.8 billion in budget authority for the Community Development Block Grant program. This program needs reform and has been reduced from \$3.9 billion in regular funding in 2008 because it is not well-targeted to the neediest commu-

nities and its results have not been adequately demonstrated.

Education

Grant outlays for elementary, secondary, and career and technical education are estimated to be \$37.3 billion in 2009.

The 2009 Budget continues to support reauthorization of the *No Child Left Behind Act* (NCLB), building on the Administration's 2007 blueprint for reauthorizing and strengthening the law. The Budget provides \$14.3 billion for Title I, a 63 percent increase since 2001; \$1.0 billion for effective, research-based literacy instruction through Reading First; and \$491 million for School Improvement Grants. With these grants, along with over \$570 million reserved from Title I, States can help turn around low-performing schools. Additionally, the Budget supports expanded school choice for students at risk of being left behind including \$236 million in Federal grants to charter schools (a \$25 million increase), \$300 million in Pell Grants for Kids to enable low-income students enrolled in low-performing schools to attend a private or out of district school, and \$800 million available in new scholarships for low-income students to participate in afterschool programs of their choice. The Budget also provides extra assistance for students most at risk of being left behind, including migrant students, students in state-run institutions, and limited English proficient students.

The Budget also ensures the Nation's future competitiveness by supporting the education components of the President's American Competitiveness Initiative including providing \$70 million to train teachers to teach Advanced Placement/International Baccalaureate courses and expand low-income students' access to them, \$95 million for Math Now to improve instruction in mathematics, and \$10 million for an Adjunct Teacher Corps to bring math and science professionals into high-need schools as teachers.

Transportation

Federal grants support State and local highway, transit, and airport construction programs. For 2009, grant outlays are estimated to be \$56.1 billion for transportation programs.

Specifically, the Budget provides \$39.4 billion in obligation limitation for the Federal Aid Highway program to support authorized highway programs through 2009, the end of the current authorization law. This amount will contribute to satisfying the President's 2005 agreement to provide \$286.4 billion for surface transportation programs through the authorization period. The \$10.1 billion contained in the Budget for transit assistance is also included in this total. In addition, the Budget requests \$2.75 billion in budget authority for capital grants to States through the Federal Aviation Administration's Airport Improvement Program.

The 2009 Budget also provides \$100 million for State matching grants for intercity passenger rail capital projects to empower States to address their transportation goals and priorities. It further includes \$34 mil-

lion for grants from the Pipeline and Hazardous Materials Safety Administration to State pipeline agencies.

Training and Employment

Grant outlays for training and employment are estimated to be \$4.2 billion in 2009.

The 2009 Budget reforms the Department of Labor's job training grant programs to increase significantly the number of workers trained while saving taxpayer dollars. The Budget consolidates several similar grant programs, eliminates unnecessary administrative expenditures, and proposes a State match to leverage more State resources for workforce investment. The Budget also creates Career Advancement Accounts, worker-directed accounts that help workers develop their skills and compete for 21st Century jobs.

Social Services

Grant outlays for social service programs are estimated to be \$14.7 billion in 2009.

The 2009 Budget strengthens programs for children by providing \$7.0 billion in budget authority for Head Start to provide comprehensive, high-quality educational, health, nutritional, and social services to approximately 895,000 disadvantaged children and families and \$20 million in budget authority for adoption incentives to build on the substantial increases in the number of adoptions since the mid-nineties.

Health

Grant outlays for health related programs are estimated to be \$232.3 billion in 2009.

In 2009, the Department of Health and Human Service's Federal Medicaid outlays are estimated to be \$215.7 billion. Medicaid is an open-ended means-tested entitlement program that is financed jointly by the Federal government and States. Medicaid provides health coverage and services to low-income children, pregnant women, elderly persons, and disabled individuals. The 2009 Budget enhances and reforms Medicaid by extending coverage for welfare recipients transitioning to work and continuing Medicare Part B premium assistance for qualified low-income seniors through September 30, 2009. Additionally, the Budget enhances States' ability to implement premium assistance programs under Medicaid. Lastly, the Budget proposes reforms to improve program integrity, increase State flexibility, and promote cost-effective management of Medicaid dollars.

The State Children's Health Insurance Program (SCHIP) was established in 1997 to provide health care coverage for low-income, uninsured children who do not qualify for Medicaid. The Budget proposes to reauthorize SCHIP through 2013 and increase funding above current levels by \$19.7 billion over the same period to meet anticipated State needs in covering low-income, uninsured children. This proposal includes Federal outreach grants of \$50 million in 2009 and \$100 million in each of the following four years to reach eligible, uninsured children.

The Access to Recovery program has provided substance abuse treatment and recovery support services

to more than 199,000 people since 2004. The 2009 Budget supports faith-based community programs by providing \$98 million to enhance this program. Additionally, the Budget proposes \$204 million to prevent teenage pregnancy, pre-marital sexual activity, and the incidence of sexually transmitted disease through abstinence-only education.

The 2009 Budget will expand care for vulnerable populations by strengthening access to drug treatment and prevention activities. The Budget provides \$40 million for drug court services and \$56 million to integrate screening, brief intervention and referral to treatment of drug abuse in emergency departments and other health care settings.

Income Security

Grant outlays for income security programs are estimated to be \$94.9 billion in 2009.

The 2009 Budget reauthorizes the Food Stamp Program and increases funding for the Special Supplemental Nutrition Program for Women, Infants and Children (WIC). Since 2001, the Department of Agriculture has provided food and nutrition benefits to an additional 9.1 million people participating in the Food Stamp program, and approximately one million women, infants and children participating in WIC.

The Budget provides \$6.1 billion in budget authority for WIC services, reaching an estimated 8.6 million beneficiaries in 2009. In keeping with the Administration's promotion of childhood wellness and fitness, the Department is issuing updated WIC food packages that reduce maximum allowances of certain foods and promote the intake of fresh fruits and vegetables.

The 2009 Budget expands affordable housing and minority homeownership by providing \$2 billion for the HOME Investment Partnerships program (HOME), including \$50 million for the American Dream Downpayment Initiative, which provides flexible housing assistance and increases affordable housing and minority homeownership. Since the inception of the HOME program sixteen years ago, almost 812,000 units of affordable housing have been created. The Budget also:

- Funds Housing Choice Vouchers for over two million extremely low- to low-income families, while removing the cap on the maximum number of housing units Public Housing Authorities can assist.
- Supports Public Housing Operating Fund by providing \$4.3 billion, a 2½ percent increase over last year and the highest proposed funding level in history. This funding will provide the necessary operating expenses for 1.2 million public housing units.
- Expands Homeless Assistance Grants by providing over \$1.6 billion in budget authority for funding at least 160,000 beds for homeless individuals. Aided by this Administration initiative, the Department of Housing and Urban Development documented an unprecedented 11.5 percent decline in homelessness from 2005 to 2006.

Administration of Justice

Grant outlays for administration of justice programs are estimated to be \$4.2 billion in 2009.

The 2009 Budget supports State and local law enforcement by reforming the Byrne Public Safety and Protection Program to provide money for State and local criminal justice needs, including Project Safe Neighborhoods, the DNA Initiative, Prisoner Re-entry, and other priorities, to be funded through competitive grants. The Budget also funds the Violent Crime Reduction Partnership Initiative which is targeted to support multi-jurisdictional task forces to help communities that have experienced an increase in violent crime.

Overall, more than 70 State and local law enforcement assistance programs representing over \$2 billion in spending are proposed for consolidation into four flexible and competitive grants, which will eliminate earmarks and formulas, and improve the ability of States, localities, and Tribes to respond to increases in violent crime by better targeting funds to key criminal justice priorities. These four competitive grant programs include the Violent Crime Reduction Partnership, the Byrne Public Safety and Protection Program, the Violence Against Women Program, and the Child Safety and Juvenile Justice Program.

PERFORMANCE OF GRANTS TO STATE AND LOCAL GOVERNMENTS

The Administration is committed to measuring and improving the performance of Government programs. The Congress mandated in the Government Performance and Results Act of 1993 that performance plans be developed and that the agencies report annual progress against these plans.

In addition, this Administration began in the 2004 Budget to assess every Federal program over a five-year period using the Program Assessment Rating Tool, or PART. With this budget, the sixth year of using the PART, the Administration has evaluated about 98 percent of the Budget.

The PART assesses each program on four components (purpose, planning, management, and results/accountability) and gives a score for each of the components. The scores for each component are then weighted—with results/accountability carrying the greatest weight—and the program is given an overall score. A program is rated effective if it receives an overall score of 85 percent or more, moderately effective if the score is 70 to 84 percent, adequate if the score is 50 to 69 percent, and inadequate if the score is 49 percent or lower. The program is given a rating “Results Not Demonstrated” if the program does not have good performance measures or lacks data for existing measures. Chapter 2 of this volume discusses the PART in more detail.

As shown in Table 8–2, 280 of the programs that have been assessed are primarily grants to State and local governments. Of these 280, 97 programs, or 35 percent of all grant programs assessed, received a rating of “Results Not Demonstrated”. This is higher than for all programs, in which 19 percent were given this rating. Factors that hinder the ability of some grant programs to demonstrate results include the wide breadth of purpose of some grants, lack of agreement among grantees and Federal parties on the purpose and performance measures, and therefore lack of focused planning to achieve common goals.

Table 8–2 also shows that the average rating for the 280 grant programs was “adequate.”

- 22 were rated effective;
- 66 were rated moderately effective;
- 79 were rated adequate; and

- 16 were rated ineffective.

- 97 were rated “results not demonstrated”;

If the 97 programs rated “Results Not Demonstrated” are excluded, the average rating was “adequate”; the same as the rating for all 280 grants.

The ratings of the largest five of these 280 grant programs are summarized here, with funding estimates from the 2007 spring update of PART programs. More complete summaries of these and other programs can be found at www.ExpectMore.gov.

- *Department of Health and Human Services: Medicaid (\$190.6 billion in 2007). Rating: Adequate.* Medicaid is a means-tested, Federal-State funded entitlement program that provides medical assistance, including acute and long-term care, to families with dependent children as well as aged, blind, or disabled individuals. The Centers for Medicare and Medicaid Services (CMS) provides Federal oversight of this program. In 2007, the number of Medicaid enrollees was 49.1 million. Nearly one in every four children in America relies on Medicaid for health coverage. Two-thirds of all Medicaid enrollees are in low-wage working families. Medicaid also pays for six out of every ten beds in nursing homes. Center for Medicare and Medicaid Services (CMS) created new performance measures that assess health quality and focus on improving program management. More work needs to be done; CMS is working on a national strategy to improve the quality of care across State Medicaid programs and is developing a national payment error rate for Medicaid. The Federal government matches all allowable State dollars spent on Medicaid, regardless of the amount or quality of service. This funding structure leaves Medicaid vulnerable, and has enabled States to shift costs to Medicaid that may not be appropriate.

- *Department of Transportation: Highway Infrastructure (\$38.3 billion in 2007). Rating: Adequate.* The purpose of the FHWA’s Highway Infrastructure Program is to provide financial grants and technical assistance to States to construct, maintain, and improve the performance of the Nation’s

Table 8-2. SUMMARY OF PART RATINGS AND SCORES FOR GRANTS TO STATE AND LOCAL GOVERNMENTS

Component	Average Scores	
	All grant programs (280 programs)	Programs excluding grants rated "results not demonstrated" (183 programs)
Purpose	85%	87%
Planning	65%	79%
Management	78%	84%
Results/Accountability	36%	49%
Average rating ¹	Adequate	Adequate
Rating ¹		Number of grant programs
Effective		22
Moderately effective		66
Adequate		79
Ineffective		16
Results not demonstrated		97
Total number of grant programs rated		280

¹ Weighted as follows: Purpose (20%), Planning (10%), Management (20%), Results/Accountability (50%). The rating of effective indicates a score of 85 percent or more; moderately effective, 70–85 percent; adequate, 50–70 percent; and ineffective, 49 percent or less.

highway system in accordance with federal policy goals. The majority of funds are allocated to States, which ultimately use the funds directly for highway maintenance and construction. However, projects are chosen by the States themselves and are not based on need or the value-added to the Nation's highway system. In 2004, 42 percent of Federal funds (\$13 billion) was spent on projects off of the National Highway System which were not determined to have national significance. The program's long-term trends do show improvement for all strategic outcome measures. The program, with the State departments of transportation, has recently implemented a financial integrity review and evaluation procedure as a remedy to longstanding issues. As a result of the new initiative, the Agency eliminated a grants management material weakness in the Highway Trust Fund 2006 financial statements and is working next to eliminate additional internal control weaknesses.

- *Department of Health and Human Services: Temporary Assistance for Needy Families (TANF) (\$17.1 billion in 2007). Rating: Moderately Effective.* This program provides time-limited cash assistance to needy families with children while working toward achieving the goals of ending dependence by promoting work and marriage, preventing out-of-wedlock births, and encouraging the formation and maintenance of two-parent families. The program has produced modest, but statistically significant increases in employment and earnings among welfare recipients as well as reduced caseloads, poverty, and welfare dependency.

It is inconclusive whether the program has promoted marriage or reduced the incidence of out-of-wedlock births, but the program has a new performance measure to increase the number of children living in married couple households.

- *Department of Housing and Urban Development (HUD): Housing Vouchers (\$15.9 billion in 2007). Rating: Moderately Effective.* The Housing Choice Voucher Program assists two million extremely low to low-income households across the country to afford housing. The program purpose is to help these families afford decent, safe, and sanitary housing. Tenants, who may otherwise pay over 50 percent of their income to rent an apartment in the private market, pay 30 percent of their income under this program. A variety of studies show housing vouchers to be a cost-effective means of delivering affordable housing for very low-income families. Because these housing subsidies are portable, the program allows families access to often better housing, in better neighborhoods. As a part of the 2009 Budget, the Administration proposes reforms that include a rental funding structure that simplifies the program and decreases the likelihood of improper payments, and allocates program funding on a budget, rather than on a unit basis. The Administration will also continue to work with Congress to streamline the program, giving more flexibility to Public Housing Agencies to administer the program to serve more families and better address local needs and market conditions.

- *Department of Education: Title I Grants to Local Educational Agencies (\$12.8 billion for 2007). Rat-*

ing: Moderately Effective. This program provides supplemental education funding, especially in high-poverty areas, for local activities that help improve the performance of low-achieving students or, in the case of school-wide programs, to help all students in high-poverty schools to meet challenging State academic standards. The program has developed meaningful long-term performance measures, established baselines, and set annual targets required to meet ambitious statutory academic proficiency goals. First-year data show a rate of progress consistent with meeting annual performance targets. The Department of Education has expanded and strengthened its monitoring of State and local program implementation, including compliance with statutory requirements and fiscal management practices.

Block Grants. One of the most common tools used by the Federal Government is the block grant, particularly in the social services area where States and localities are the service providers. Block grants are embraced for their flexibility to meet local needs, but are also criticized because accountability for results can be difficult when funds are allocated based on formulas and population counts rather than achievements or

needs. In addition, block grants pose performance measurement challenges precisely because they can be used for a wide range of activities. The obstacles to measuring and achieving results through block grants are reflected in PART scores: they receive the lowest average score of the seven PART types, 5 percent of block grant programs assessed to date were rated “ineffective”, and 30 percent were rated “results not demonstrated.”

Nonetheless, the PART shows that some Federal block grant programs are achieving results better than others, effectively combining the flexibility that localities need with the results that taxpayers deserve. The Administration continues its analysis and evaluation of block grant programs and will apply the lessons learned from the effective programs to those performing inadequately. Results of the evaluation will identify the methods used to manage highly rated block grant programs and adapt and implement those practices in large, low-scoring programs. Each of the programs targeted for improvement will develop an action plan and implementation timeline that will be tracked quarterly. The targeted programs will be re-analyzed through the PART over the next several years to assess whether implementing the block grant “best practices” results in improved performance.

HISTORICAL PERSPECTIVES

In recent decades, Federal aid to State and local governments has become a major factor in the financing of certain government functions. The rudiments of the present system date back to the Civil War. The Morrill Act, passed in 1862, established the land grant colleges and instituted certain federally-required standards for States that received the grants, as is characteristic of the present grant programs. Federal aid was later initiated for agriculture, highways, vocational education and rehabilitation, forestry, and public health. In the depression years, Federal aid was extended to meet in-

come security and other social welfare needs. However, Federal grants did not become a significant factor in Federal Government expenditures until after World War II.

Table 8-3 displays trends in Federal grants to State and local governments since 1960. Section A shows Federal grants by function. Functions with a substantial amount of grants are shown separately. Grants for the national defense, energy, social security, and veterans benefits and services functions are combined in the “other functions” line in the table.

¹*50 million or less.¹Grants that are both payments for individuals and capital investment are shown under capital investment.²Excludes national defense, international affairs, net interest, and undistributed offsetting receipts

Federal grants for transportation increased to \$3.0 billion, or 43 percent of all Federal grants, in 1960 after initiation of aid to States to build the Interstate Highway System in the late 1950s.

By 1970 there had been significant increases in the relative amounts for education, training, employment, social services, and health (largely Medicaid).

In the early and mid-1970s, major new grants were created for natural resources and environment (con-

struction of sewage treatment plants), community and regional development (community development block grants), and general government (general revenue sharing).

Since the late 1970s changes in the relative amounts among functions reflect steady growth of grants for health (Medicaid) and income security. The functions with the largest amount of grants are health; income security; education, training, employment, and social

services; and transportation, with combined estimated grant outlays of \$405.3 billion, or more than 90 percent of total grant outlays in 2007.

The increase in total outlays for grants overall since 1990 has been driven by increases in grants for health, which have increased more than four-fold from \$43.9 billion in 1990 to \$208.3 billion in 2007. The income security; education, training, employment, and social services; and transportation functions also increased substantially, but at a slower rate than the increase for health.

Section B of the Table shows the distribution of grants divided into mandatory and discretionary spending.

Funding for grant programs classified as mandatory is determined in authorizing legislation. Funding levels for mandatory programs can only be changed by changing eligibility criteria or benefit formulas established in law and are usually not limited by the annual appropriations process. Outlays for mandatory grant programs were \$259.0 billion in 2007. The three largest mandatory grant programs are Medicaid, with outlays of \$190.6 billion in 2007, Temporary Assistance for Needy Families, \$16.9 billion, and child nutrition programs, \$12.9 billion.

The funding level for discretionary grant programs is determined annually through appropriations acts. Outlays for discretionary grant programs were \$184.8 billion in 2007. Table 8-4 at the end of this chapter identifies discretionary and mandatory grant programs separately. For more information on these categories, see Chapter 26, "The Budget System and Concepts" in this volume.

Section C of Table 8-3 shows the composition of grants divided into three major categories: payments for individuals, grants for physical capital, and other grants. Grant outlays for payments for individuals, which are mainly entitlement programs in which the Federal Government and the States share the costs,

have grown significantly as a percent of total grants. They increased from about a third of the total in 1960 to slightly less than two-thirds in the mid-1990s, and have remained about that proportion since then.

These grants are distributed through State or local governments to provide cash or in-kind benefits that constitute income transfers to individuals or families. The major grant in this category is Medicaid. Temporary Assistance for Needy Families, child nutrition programs, and housing assistance are also large grants in this category.

Grants for physical capital assist States and localities with construction and other physical capital activities. The major capital grants are for highways, but there are also grants for airports, mass transit, sewage treatment plant construction, community development, and other facilities. Grants for physical capital were almost half of total grants in 1960, shortly after grants began for construction of the Interstate Highway System. The relative share of these outlays has declined, as payments for individuals have grown. In 2007, grants for physical capital were \$70.8 billion, 16 percent of total grants.

The other grants are primarily for education, training, employment, and social services. These grants were 20 percent of total grants in 2007.

Section D of this table shows grants as a percentage of Federal outlays, State and local expenditures, and gross domestic product. Grants have increased as a percentage of total Federal outlays from 11 percent in 1990 to 16 percent in 2007. Grants as a percentage of domestic programs were 22 percent in 2007. As a percentage of total State and local expenditures, grants have increased from 19 percent in 1990 to 23 percent in 2007.

Section E shows the relative contribution of physical capital grants in assisting States and localities with gross investment. Federal capital grants are estimated to be 21 percent of State and local gross investment in 2007.

OTHER INFORMATION ON FEDERAL AID TO STATE AND LOCAL GOVERNMENTS

Additional information regarding aid to State and local governments can be found elsewhere in this budget and in other documents.

Major public physical capital investment programs providing Federal grants to State and local governments are identified in Chapter 6, "Federal Investment."

Data for summary and detailed grants to State and local governments can be found in many sections of a separate budget volume entitled *Historical Tables*. Section 12 of that document is devoted exclusively to grants to State and local governments. Additional information on grants can be found in Section 6 (Composition of Federal Government Outlays); Section 9 (Federal Government Outlays for Investment: Major Physical Capital, Research and Development, and Education and Training); Section 11 (Federal Government Payments

for Individuals); and Section 15 (Total (Federal and State and Local) Government Finances).

Current and updated grant receipt information by State and local governments can be found on USAspending.gov. This public website also contains contract and loan information and is updated monthly.

In addition to these sources, a number of other sources of information are available that use slightly different concepts of grants, provide State-by-State information, provide information on how to apply for Federal aid, or display information about audits.

The Bureau of the Census in the Department of Commerce provides data on public finances, including Federal aid to State and local governments. The Bureau's major reports and databases on grant-making include:

- *Federal Aid to States*, a report on Federal spending by State for grants for the most recently completed fiscal year.

- *The Consolidated Federal Funds Report* is an annual document that shows the distribution of Federal spending by State and county areas and by local governmental jurisdictions.
- The Federal Assistance Awards Data System (FAADS) provides computerized information about current grant funding. Data on all direct assistance awards are provided quarterly to the States and to the Congress.
- The Federal Audit Clearinghouse maintains an on-line database (harvester.census.gov/sac) that provides access to summary information about audits conducted under OMB Circular A-133, "Audits to States, Local Governments, and Non-Profit Organizations." Information is available for each audited entity, including the amount of Federal money expended by program and whether there were audit findings.

The Bureau of Economic Analysis, also in the Department of Commerce, publishes the monthly *Survey of Current Business*, which provides data on the national income and product accounts (NIPA), a broad statistical concept encompassing the entire economy. These accounts include data on Federal grants to State and local governments. Data using the NIPA concepts appear in this volume in Chapter 14, "National Income and Product Accounts."

The *Catalog of Federal Domestic Assistance* is a primary reference source for communities wishing to apply for grants and other domestic assistance. The *Catalog* is prepared by the General Services Administration and contains a detailed listing of grant and other assistance programs; discussions of eligibility criteria, application procedures, and estimated obligations; and related information. The *Catalog* is available on the Internet at www.cfda.gov.

DETAILED FEDERAL AID TABLE

Table 8-4, "Federal Grants to State and Local Governments-Budget Authority and Outlays," provides detailed budget authority and outlay data for grants, in-

cluding proposed legislation. This table displays discretionary and mandatory grant programs separately.

APPENDIX: SELECTED GRANT DATA BY STATE

This Appendix displays State-by-State spending for the selected grant programs to State and local governments shown in the following table, "Summary of Programs by Agency, Bureau, and Program." The programs selected here cover more than 80 percent of total grant spending.

The first summary table shows the obligations for each program. The second summary table, "Summary of Programs by State," shows the amounts for each State for these programs. The individual program tables display obligations for each program on a State-by-State basis, consistent with the estimates in this budget. Each table reports the following information:

- The Federal agency that administers the program.
- The program title and number as contained in the *Catalog of Federal Domestic Assistance*.

- The budget account number from which the program is funded.
- Actual 2007 obligations by State, Federal territory, and Indian tribes in thousands of dollars. Undistributed obligations shown at the bottom of each page are generally project funds that are not distributed by formula, or programs for which State-by-State data are not available.
- Estimates of 2008 obligations by State from previous budget authority, from new budget authority, and total obligations.
- Estimates of 2009 obligations by State, which are based on the 2009 Budget request, unless otherwise noted.
- The percentage share of 2009 estimated program funds distributed to each State.

Table 8–5. Summary of Programs by Agency, Bureau, and Program
(obligations in millions of dollars)

Agency, Bureau, and Program	FY 2007 (actual)	Estimated FY 2008 obligations from:			FY 2009 (estimated)
