

§ 382.39

14 CFR Ch. II (1-1-02 Edition)

alternative method not specified in paragraphs (b) through (d) of this section. A carrier wishing to do so shall obtain the written concurrence of the Department of Transportation (Office of the Secretary) before implementing the alternative method.

(f) The carrier shall assign a seat providing an accommodation requested by an individual with a disability, as specified in this section, even if the seat is not otherwise available for assignment to the general passenger population at the time of the individual's request.

(g) If the carrier has already provided a seat to an individual with a disability to furnish an accommodation required by paragraph (a) or (c) of this section, the carrier shall not reassign that individual to another seat in response to a subsequent request from another individual with a disability, without the first individual's consent.

(h) In no case shall any individual be denied transportation on a flight in order to provide accommodations required by this section.

(i) Carriers are not required to furnish more than one seat per ticket or to provide a seat in a class of service other than the one the passenger has purchased.

(j) In responding to requests from individuals for accommodations required by this section, carriers shall comply with FAA safety rules, including those pertaining to exit seating (see 14 CFR 121.585 and 135.129).

(k) Carriers are required to comply with this section beginning September 30, 1998.

[Doc. No. OST-96-1880, 63 FR 10535, Mar. 4, 1998; 63 FR 11954, Mar. 11, 1998]

§ 382.39 Provision of services and equipment.

Carriers shall ensure that qualified individuals with a disability are provided the following services and equipment:

(a) Carriers shall provide assistance requested by or on behalf of qualified individuals with a disability, or offered by air carrier personnel and accepted by qualified individuals with a disability, in enplaning and deplaning. The delivering carrier shall be responsible for assistance in making flight

connections and transportation between gates.

(1) This assistance shall include, as needed, the services personnel and the use of ground wheelchairs, boarding wheelchairs, on-board wheelchairs where provided in accordance with this part, and ramps or mechanical lifts.

(2) Boarding shall be by level-entry loading bridges or accessible passenger lounges, where these means are available. Where these means are unavailable, assistance in boarding aircraft with 30 or fewer passenger seats shall be provided as set forth in §382.40, and assistance in boarding aircraft with 31 or more seats shall be provided as set forth in §382.40a. In no case shall carrier personnel hand-carry a passenger in order to provide boarding or deplaning assistance (i.e., directly pick up the passenger's body in the arms of one or more carrier personnel to effect a change of level that the passenger needs to enter or leave the aircraft). Hand-carrying of passengers is permitted only for emergency evacuations.

(3) Carriers shall not leave an individual with a disability unattended in a ground wheelchair, boarding wheelchair, or other device, in which the passenger is not independently mobile, for more than 30 minutes.

(b) Carriers shall provide services within the aircraft cabin as requested by or on behalf of individuals with a disability, or when offered by air carrier personnel and accepted by individuals with a disability as follows:

(1) Assistance in moving to and from seats, as part of the enplaning and deplaning processes;

(2) Assistance in preparation for eating, such as opening packages and identifying food;

(3) If there is an on-board wheelchair on the aircraft, assistance with the use of the on-board wheelchair to enable the person to move to and from a lavatory;

(4) Assistance to a semiambulatory person in moving to and from the lavatory, not involving lifting or carrying the person; or

(5) Assistance in loading and retrieving carry-on items, including mobility aids and other assistive devices stowed on board in accordance with §382.41.

(c) Carriers are not required to provide extensive special assistance to qualified individuals with a disability. For purposes of this section, extensive special assistance includes the following activities:

- (1) Assistance in actual eating;
- (2) Assistance within the restroom or assistance at the passenger's seat with elimination functions;
- (3) Provision of medical services.

[55 FR 8046, Mar. 6, 1990, as amended by Amdt. 6, 61 FR 56422, 56423, Nov. 1, 1996; 62 FR 17, Jan. 2, 1997; 66 FR 22115, May 3, 2001]

§ 382.40 Boarding assistance for small aircraft.

(a) Paragraphs (b) and (c) of this section apply to air carriers conducting passenger operations with aircraft having 19–30 seat capacity at airports with 10,000 or more annual enplanements.

(b) Carriers shall, in cooperation with the airports they serve, provide boarding assistance to individuals with disabilities using mechanical lifts, ramps, or other suitable devices that do not require employees to lift or carry passengers up stairs.

(c)(1) Each carrier shall negotiate in good faith with the airport operator at each airport concerning the acquisition and use of boarding assistance devices. The carrier(s) and the airport operator shall, by no later than September 2, 1997, sign a written agreement allocating responsibility for meeting the boarding assistance requirements of this section between or among the parties. The agreement shall be made available, on request, to representatives of the Department of Transportation.

(2) The agreement shall provide that all actions necessary to ensure accessible boarding for passengers with disabilities are completed as soon as practicable, but no later than December 2, 1998 at large and medium commercial service hub airports (those with 1,200,000 or more annual enplanements); December 2, 1999 for small commercial service hub airports (those with between 250,000 and 1,199,999 annual enplanements); or December 4, 2000 for non-hub commercial service primary airports (those with between 10,000 and 249,999 annual enplanements). All air carriers and airport operators involved

are jointly responsible for the timely and complete implementation of the agreement.

(3) Under the agreement, carriers may require that passengers wishing to receive boarding assistance requiring the use of a lift for a flight using a 19–30 seat aircraft check in for the flight one hour before the scheduled departure time for the flight. If the passenger checks in after this time, the carrier shall nonetheless provide the boarding assistance by lift if it can do so by making a reasonable effort, without delaying the flight.

(4) Boarding assistance under the agreement is not required in the following situations:

- (i) Access to aircraft with a capacity of fewer than 19 or more than 30 seats;
- (ii) Access to float planes;
- (iii) Access to the following 19-seat capacity aircraft models: the Fairchild Metro, the Jetstream 31, and the Beech 1900 (C and D models);
- (iv) Access to any other 19-seat aircraft model determined by the Department of Transportation to be unsuitable for boarding assistance by lift on the basis of a significant risk of serious damage to the aircraft or the presence of internal barriers that preclude passengers who use a boarding or aisle chair to reach a non-exit row seat.

(5) When boarding assistance is not required to be provided under paragraph (c)(4) of this section, or cannot be provided as required by paragraphs (b) and (c) of this section for reasons beyond the control of the parties to the agreement (e.g., because of mechanical problems with a lift), boarding assistance shall be provided by any available means to which the passenger consents, except hand-carrying as defined in § 382.39(a)(2) of this part.

(6) The agreement shall ensure that all lifts and other accessibility equipment are maintained in proper working condition.

(d)(1) The training of carrier personnel required by § 382.61 shall include, for those personnel involved in providing boarding assistance, training to proficiency in the use of the boarding assistance equipment used by the carrier and appropriate boarding assistance procedures that safeguard the safety and dignity of passengers.
