§ 404.1519a When we will purchase a consultative examination and how we will use it.

(a)(1) *General.* The decision to purchase a consultative examination for you will be made after we have given full consideration to whether the additional information needed (e.g., clinical findings, laboratory tests, diagnosis, and prognosis) is readily available from the records of your medical sources. See § 404.1512 for the procedures we will follow to obtain evidence from your medical sources. Before purchasing a consultative examination, we will consider not only existing medical reports, but also the disability interview form containing your allegations as well as other pertinent evidence in your file.

(2) When we purchase a consultative examination, we will use the report from the consultative examination to try to resolve a conflict or ambiguity if one exists. We will also use a consultative examination to secure needed medical evidence the file does not contain such as clinical findings, laboratory tests, a diagnosis or prognosis necessary for decision.

(b) *Situations requiring a consultative examination.* A consultative examination may be purchased when the evidence as a whole, both medical and nonmedical, is not sufficient to support a decision on your claim. Other situations, including but not limited to the situations listed below, will normally require a consultative examination:

(1) The additional evidence needed is not contained in the records of your medical sources;
