

other similar organizational unit including departmental or unit supervision.

(2) If there are separate work units or lines of progression within a department, a separate list must be provided for each such work unit, or line, including unit supervisors. For lines of progression there must be indicated the order of jobs in the line through which an employee could move to the top of the line.

(3) Where there are no formal progression lines or usual promotional sequences, job titles should be listed by department, job families, or disciplines, in order of wage rates or salary ranges.

(4) For each job title, the total number of incumbents, the total number of male and female incumbents, and the total number of male and female incumbents in each of the following groups must be given: Blacks, Hispanics, Asians/Pacific Islanders, and American Indians/Alaskan Natives. The wage rate or salary range for each job title must be given. All job titles, including all managerial job titles, must be listed.

§ 60-2.12 Job group analysis.

(a) Purpose: A job group analysis is a method of combining job titles within the contractor's establishment. This is the first step in the contractor's comparison of the representation of minorities and women in its workforce with the estimated availability of minorities and women qualified to be employed.

(b) In the job group analysis, jobs at the establishment with similar content, wage rates, and opportunities, must be combined to form job groups. Similarity of content refers to the duties and responsibilities of the job titles which make up the job group. Similarity of opportunities refers to training, transfers, promotions, pay, mobility, and other career enhancement opportunities offered by the jobs within the job group.

(c) The job group analysis must include a list of the job titles that comprise each job group. If, pursuant to §§60-2.1(d) and (e) the job group analysis contains jobs that are located at another establishment, the job group

analysis must be annotated to identify the actual location of those jobs. If the establishment at which the jobs actually are located maintains an affirmative action program, the job group analysis of that program must be annotated to identify the program in which the jobs are included.

(d) Except as provided in §60-2.1(d), all jobs located at an establishment must be reported in the job group analysis of that establishment.

(e) Smaller employers: If a contractor has a total workforce of fewer than 150 employees, the contractor may prepare a job group analysis that utilizes EEO-1 categories as job groups. EEO-1 categories refers to the nine occupational groups used in the Standard Form 100, the Employer Information EEO-1 Survey: Officials and managers, professionals, technicians, sales, office and clerical, craft workers (skilled), operatives (semiskilled), laborers (unskilled), and service workers.

§ 60-2.13 Placement of incumbents in job groups.

The contractor must separately state the percentage of minorities and the percentage of women it employs in each job group established pursuant to §60-2.12.

§ 60-2.14 Determining availability.

(a) Purpose: Availability is an estimate of the number of qualified minorities or women available for employment in a given job group, expressed as a percentage of all qualified persons available for employment in the job group. The purpose of the availability determination is to establish a benchmark against which the demographic composition of the contractor's incumbent workforce can be compared in order to determine whether barriers to equal employment opportunity may exist within particular job groups.

(b) The contractor must separately determine the availability of minorities and women for each job group.

(c) In determining availability, the contractor must consider at least the following factors:

(1) The percentage of minorities or women with requisite skills in the reasonable recruitment area. The reasonable recruitment area is defined as the

§ 60-2.15

geographical area from which the contractor usually seeks or reasonably could seek workers to fill the positions in question.

(2) The percentage of minorities or women among those promotable, transferable, and trainable within the contractor's organization. Trainable refers to those employees within the contractor's organization who could, with appropriate training which the contractor is reasonably able to provide, become promotable or transferable during the AAP year.

(d) The contractor must use the most current and discrete statistical information available to derive availability figures. Examples of such information include census data, data from local job service offices, and data from colleges or other training institutions.

(e) The contractor may not draw its reasonable recruitment area in such a way as to have the effect of excluding minorities or women. For each job group, the reasonable recruitment area must be identified, with a brief explanation of the rationale for selection of that recruitment area.

(f) The contractor may not define the pool of promotable, transferable, and trainable employees in such a way as to have the effect of excluding minorities or women. For each job group, the pool of promotable, transferable, and trainable employees must be identified with a brief explanation of the rationale for the selection of that pool.

(g) Where a job group is composed of job titles with different availability rates, a composite availability figure for the job group must be calculated. The contractor must separately determine the availability for each job title within the job group and must determine the proportion of job group incumbents employed in each job title. The contractor must weight the availability for each job title by the proportion of job group incumbents employed in that job group. The sum of the weighted availability estimates for all job titles in the job group must be the composite availability for the job group.

41 CFR Ch. 60 (7-1-02 Edition)

§ 60-2.15 Comparing incumbency to availability.

(a) The contractor must compare the percentage of minorities and women in each job group determined pursuant to § 60-2.13 with the availability for those job groups determined pursuant to § 60-2.14.

(b) When the percentage of minorities or women employed in a particular job group is less than would reasonably be expected given their availability percentage in that particular job group, the contractor must establish a placement goal in accordance with § 60-2.16.

§ 60-2.16 Placement goals.

(a) Purpose: Placement goals serve as objectives or targets reasonably attainable by means of applying every good faith effort to make all aspects of the entire affirmative action program work. Placement goals also are used to measure progress toward achieving equal employment opportunity.

(b) A contractor's determination under § 60-2.15 that a placement goal is required constitutes neither a finding nor an admission of discrimination.

(c) Where, pursuant to § 60-2.15, a contractor is required to establish a placement goal for a particular job group, the contractor must establish a percentage annual placement goal at least equal to the availability figure derived for women or minorities, as appropriate, for that job group.

(d) The placement goal-setting process described above contemplates that contractors will, where required, establish a single goal for all minorities. In the event of a substantial disparity in the utilization of a particular minority group or in the utilization of men or women of a particular minority group, a contractor may be required to establish separate goals for those groups.

(e) In establishing placement goals, the following principles also apply:

(1) Placement goals may not be rigid and inflexible quotas, which must be met, nor are they to be considered as either a ceiling or a floor for the employment of particular groups. Quotas are expressly forbidden.
