

§ 60.590

40 CFR Ch. I (7-1-08 Edition)

(d) The requirements of this subsection remain in force until and unless the Agency, in delegating enforcement authority to a State under section 111(c) of the Act, approves reporting requirements or an alternative means of compliance surveillance adopted by such States. In that event, affected sources within the State will be relieved of the obligation to comply with this subsection, provided that they comply with requirements established by the State.

unit” is stayed, owners or operators should use the following definition:

Process unit means components assembled to produce intermediate or final products from petroleum, unfinished petroleum derivatives, or other intermediates; a process unit can operate independently if supplied with sufficient feed or raw materials and sufficient storage facilities for the product.

[49 FR 22606, May 30, 1984, as amended at 72 FR 64895, Nov. 16, 2007; 73 FR 31380, June 2, 2008]

Subpart GGG—Standards of Performance for Equipment Leaks of VOC in Petroleum Refineries for which Construction, Reconstruction, or Modification Commenced After January 4, 1983, and on or Before November 7, 2006

EFFECTIVE DATE NOTES: 1. At 73 FR 31380, June 2, 2008, §60.590 was amended by adding paragraph (e), effective June 2, 2008 to Aug. 1, 2008.

2. At 73 FR 31376, June 2, 2008, §60.590 was amended by adding paragraph (e), effective Aug. 1, 2008. For the convenience of the user, the new paragraph (e) is set forth below.

SOURCE: 49 FR 22606, May 30, 1984, unless otherwise noted.

§ 60.590 Applicability and designation of affected facility.

§ 60.590 Applicability and designation of affected facility.

* * * * *

(a)(1) The provisions of this subpart apply to affected facilities in petroleum refineries.

(e) *Stay of standards.* Owners or operators are not required to comply with definition of “process unit” in §60.590 of this subpart until the EPA takes final action to require compliance and publishes a document in the FEDERAL REGISTER. While the definition of “process unit” is stayed, owners or operators should use the following definition:

(2) A compressor is an affected facility.

Process unit means components assembled to produce intermediate or final products from petroleum, unfinished petroleum derivatives, or other intermediates; a process unit can operate independently if supplied with sufficient feed or raw materials and sufficient storage facilities for the product.

(3) The group of all the equipment (defined in §60.591) within a process unit is an affected facility.

§ 60.591 Definitions.

(b) Any affected facility under paragraph (a) of this section that commences construction, reconstruction, or modification after January 4, 1983, and on or before November 7, 2006, is subject to the requirements of this subpart.

As used in this subpart, all terms not defined herein shall have the meaning given them in the act, in subpart A of part 60, or in subpart VV of part 60, and the following terms shall have the specific meanings given them.

(c) Addition or replacement of equipment (defined in §60.591) for the purpose of process improvement which is accomplished without a capital expenditure shall not by itself be considered a modification under this subpart.

Alaskan North Slope means the approximately 69,000 square mile area extending from the Brooks Range to the Arctic Ocean.

(d) Facilities subject to subpart VV, subpart VVa, or subpart KKK of this part are excluded from this subpart.

Asphalt (also known as Bitumen) is a black or dark brown solid or semi-solid

(e) *Stay of standards.* Owners or operators are not required to comply with the definition of “process unit” in §60.590 of this subpart until August 1, 2008. While the definition of “process
