NOT VOTING—7

□ 1225

So the resolution was agreed to.  
The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated against:  
Mr. FORD. Mr. Speaker, on rollcall vote 307, I unfortunately missed the vote somehow or another. I wanted to declare that if indeed I would have voted, I would have voted "no" on rollcall 307.

THE JOURNAL

The SPEAKER pro tempore (Mr. OSE). Pursuant to clause 8 of rule XX, the pending business is the question of the Speaker's approval of the Journal of the last day's proceedings.

The question is on the Speaker's approval of the Journal.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

RECORDED VOTE

Mr. McNULTY. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.  
The SPEAKER pro tempore. This is a 5-minute vote.

The vote was taken by electronic device, and there were—ayes 343, noes 65, answered "present" 2, not voting 23, as follows:

## IN THE COMMITTEE OF THE WHOLE

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4) to enhance energy conservation, research and development and to provide for security and diversity in the energy supply for the American people, and for other purposes, with Mr. Bonilla in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the bill is considered as having been read the first time.

The gentleman from Louisiana (Mr. TAUZIN) and the gentleman from Michigan (Mr. DINGELL) each will control 15 minutes.

The gentleman from New York (Mr. BOEHLERT), the gentleman from Texas (Mr. HALL), the gentleman from California (Mr. THOMAS), the gentlewoman from Florida (Mrs. THURMAN), the gentleman from Utah (Mr. HANSEN), and the gentleman from West Virginia (Mr. RAHALL) each will control 10 minutes.

The Chair recognizes the gentleman from Louisiana (Mr. TAUZIN).

Mr. TAUZIN. Mr. Chairman, I yield myself such time as I may consume.

Today we do something in this House we have not done in a decade. We enact a comprehensive energy policy for our country. After years of indifference toward America's energy future, we are about to take a giant leap forward.

The bill we are considering today, the Securing America's Future Energy Act, the SAFE Act, will be the first major energy legislation of the 21st century, and it reflects 21st century values and ideas. It advances a balanced approach to energy production and use by encouraging a responsible, diverse mix of energy sources along with a significant investment in conservation and increased efficiency. The SAFE Act charts a path to increased energy security and a cleaner environment; secure, reliable, affordable energy for Americans.

Americans last winter saw their natural gas heating bills rise in the Midwest 73 percent, saw the Northeast heating bills rise 27 percent, saw gasoline prices rise 40 and 50, in some cases 70 cents a gallon. Americans are pleased to know that today we begin a short-term and long-term permanent energy policy to correct those security deficiencies.

I am proud of the bipartisan work our committee did. The core of the bill passed the Committee on Energy and Commerce. It passed subcommittee by a vote of 29 to 1 and the full committee by a vote of 50 to 5. Big bipartisan support for the bulk of this bill.

I owe a great deal of compliments and thanks to my subcommittee chairman, the gentleman from Texas (Mr. BARTON), for helping to craft the legislation, and particularly to ranking members, the gentleman from Michigan (Mr. DINGELL), and the subcommittee ranking member, the gentleman from Virginia (Mr. BOUCHER), for the extraordinary cooperation and assistance and hard work and the willingness to work together they exhibited.

Today I hope this bipartisan spirit continues. This is not traditionally partisan legislation. This is about all Americans having affordable, reliable sources and supplies of energy, and all Americans believing enough in conservation and efficiency to play a role in making sure that our country is safe for the future.

This bill does some amazing things in conservation. First of all, it does something we have not done literally in 17 years. It reduces light truck fuel consumption, the SUVs and minivans, by 5 billion gallons over the next 6 years. That is like parking 2 years' production of minivans and SUVs, for 2 years out of that 6-year period. This increases funding for programs to assist low-income families.

I do not know if my colleagues realize it, but the number of families applying for LIHEAP help to pay their energy bills has been rising dramatically as the costs are going up, and
