

last two bills. Certainly that is in the spirit of cooperation that we bring this legislation to the House floor.

Mr. Speaker, I yield 1½ minutes to the gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON), a member of the Science Committee.

Ms. EDDIE BERNICE JOHNSON of Texas. Let me proceed to thank my colleagues for bringing this rule to the House so that we can rise above the gathering storm.

Mr. Speaker, this is not to insult anyone. I know what it feels like not to be given the opportunity to offer an amendment, I truly do.

But this is a well-substantiated reason because we are in a crisis in this Nation, and we must rise to the occasion. We are moving backwards right now, or standing still. The measure is an investment in America's future, and we must move it.

We must support our American scholars so that we can get the leadership and the thoughts we need to convey to other young people. Our young scholars are not getting the support they need now. They really need more, because they are the future.

The alternative to this bill is to become a Third World nation with all the low-paying jobs, because all of the other ones will leave this country to go where the talent is. We must move fast.

We are in a crisis, and I would hope that we would accept this rule as it is.

Mr. HASTINGS of Washington. Mr. Speaker, I reserve the balance of my time.

Mr. CARDOZA. Mr. Speaker, I yield 3 minutes to the gentleman from New York (Mr. ISRAEL), a member of the Appropriations Committee.

Mr. ISRAEL. I thank the gentleman for his leadership.

Mr. Speaker, not to quibble over a rule, but to get to the heart of this very important legislation, in 1957 the American people were terrorized when Sputnik orbited the Earth, and it looked like the Soviet Union had beat us into outer space. What we did then, in the face of that very grave threat to our national security, was to launch a new generation of engineers and scientists.

What we did then was went into our classrooms and nurtured a new generation of people who could engineer, research, develop, manufacture and mobilize. That generation of engineers landed us on the Moon.

People say that NASA landed man on the Moon. I have a very high regard for NASA, but NASA didn't land us on the Moon. The Grumman Corporation landed us on the Moon. NASA provided the incentives and the support and acted as a catalyst to help mobilize that generation of engineers that figured out how to get us to the Moon. We won the Cold War with that generation.

I believe that today our dependence on foreign oil is just as grave a threat as Sputnik was; just as grave a threat to our security, and my children's se-

curity, as the Cold War was. We need to engineer again, to research and develop, to mobilize and motivate and inspire a new generation of engineers who can develop plug-in hybrids and fuel cells, hydrogen fuel cells and batteries and cellulosic ethanol.

I was in China just 2 months ago on an energy security congressional delegation. The seventh wealthiest person in China is manufacturing solar panels in China and selling them to Germany; not here, but selling them to Germany.

In Brazil, seven out of every 10 cars is running on flex fuel. We beat Germany and Japan in World War II. They are now ahead of us in solar energy.

If we could win the Cold War and World War II, if we could defeat Germany and Japan in World War II, we should be able to get ahead of them in solar energy. If Brazil can do it, we can do it. It starts in the classroom. It starts with our schools. It starts with that generation.

We can no longer afford to turn our backs on the future. It is time to harness that energy so that generation can provide us with the energy and security we need. It is time to stop borrowing money from China in order to fund our military, to buy oil from the Persian Gulf to fuel our weapons to protect us from China and the Persian Gulf.

This is a national security issue, and it's time for us to treat it as that and invest in that next generation of engineers and scientists. That is what this bill does, and that is why I am so proud to support it.

Mr. HASTINGS of Washington. Mr. Speaker, I ask my friend from California if he has any more requests for time.

Mr. CARDOZA. We have no more requests for time and are prepared to close.

Mr. HASTINGS of Washington. Mr. Speaker, I simply want to say this is a very good bill. It's a bill that has been worked on in the past Congress, and, obviously, in this Congress. It has strong bipartisan support, and all of the points that my friend from New York made in his previous remarks, I would like to associate myself with them. We need that.

It just seems to me that during their whole process, when you have strong bipartisan support, under the rules of the House, all Members ought to have an opportunity to have some say in legislation as important as this that comes to the floor of the House, and not just those members within the committee of jurisdiction.

I am simply pointing that out. It is a promise that was made by the new majority in the last election. I will withhold judgment, obviously, until after this first session is over to see if, in fact, those promises were kept. But as we go along here, seeing structured rules on bills that could very well be on a Suspension Calendar, I just think it's another opportunity missed.

Mr. Speaker, I yield back the balance of my time.

Mr. CARDOZA. Mr. Speaker, I first want to acknowledge the fantastic remarks of my colleague, Mr. ISRAEL, from the great State of New York.

I also want to respond to my colleague in closing, that while we hear continued complaints about the rule process this session, we have granted the vast majority of amendments that have been offered on these last two bills. In fact, I think every amendment that was offered was granted to the minority. There is certainly no shortage of allowing the minority to have input, both in the committee and here on the floor.

I just get to the heart of the topic at hand today, and that is, quite simply, we must, we must reinvigorate America's commitment to discovery. Where there is research to be done, we must undertake it. There is opportunity to be pursued. This country has always pursued the opportunities presented. We have been an innovator in the last 225 years that we have been in existence, and we must continue to pursue it.

When a technological breakthrough lies far away on the horizon, we must seek it and discover it. I urge a 'yes' vote on the rule and on the previous question.

Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. SALAZAR). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the yeas appeared to have it.

Mr. CARDOZA. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, further proceedings on this question will be postponed.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 8 of rule XX, proceedings will resume on questions previously postponed. Votes will be taken in the following order: H. Res. 327, H. Res. 318, H. Res. 299, H. Res. 289, H. Res. 119, each by the yeas and nays.

The first electronic vote will be conducted as a 15-minute vote. Remaining electronic votes will be conducted as 5-minute votes.

PROVIDING FOR CONSIDERATION OF H.R. 362, 10,000 TEACHERS, 10 MILLION MINDS SCIENCE AND MATH SCHOLARSHIP ACT

The SPEAKER pro tempore. The unfinished business is the vote on adoption of House Resolution 327, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the resolution.

The vote was taken by electronic device, and there were—yeas 220, nays 188, not voting 24, as follows:

[Roll No. 248]

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (during the vote). Members are advised that there are 2 minutes remaining in the vote.

□ 1435

Messrs. HELLER of Nevada, FEENEY, HERGER, and REYNOLDS changed their vote from "yea" to "nay."

So the resolution was agreed to.

A motion to reconsider was laid on the table.

The result of the vote was announced as above recorded.

PROVIDING FOR CONSIDERATION OF H.R. 363, SOWING THE SEEDS THROUGH SCIENCE AND ENGINEERING RESEARCH ACT

The SPEAKER pro tempore. The unfinished business is the vote on adoption of House Resolution 318, on which the yeas and nays were ordered.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. The question is on the resolution.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 219, nays 187, not voting 26, as follows:

[Roll No. 249]
