(5) Continued access to the special use airspace and lands that comprise the Utah Test and Training Range, under the terms and conditions described in this subtitle, is a national security priority and is not incompatible with the protection and proper management of the natural, environmental, cultural, and other resources of such lands.

Peak, King Top, Wah Wah Mountain, and Conger Mountain units designated by the Department of Interior, so long as the Secretary of the Interior, after consultation with the Secretary of the Air Force, determines that the installation and maintenance of such systems, when considered both individually and collectively, comply with section 603 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782).

(c) *MAP AND DESCRIPTION.*—

(1) *TRANSMITTAL.*—As soon as practicable after the date of the enactment of this Act, the Secretary of the Interior shall transmit a map and legal description of the Cedar Mountain Wilderness Area to the Committee on Resources of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

Rept. 101–405).

(h) *BUFFER ZONES.*—Congress does not intend for the designation of the Cedar Mountain Wilderness Area to lead to the creation of protective perimeters or buffer zones around the wilderness area. The fact that nonwilderness activities or uses can be seen or heard within the wilderness area shall not, of itself, preclude such activities or uses up to the boundary of the wilderness area.

(i) *RELEASE FROM WILDERNESS STUDY AREA STATUS.*—The lands identified as the Browns Spring Cherrystem on the map entitled “Proposed Browns Spring Cherrystem” and dated May 11, 2004, are released from their status as a wilderness study area, and shall no longer be subject to the requirements of section 603(c) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1782(c)) pertaining to the management of wilderness study areas in a manner that does not impair the suitability of those areas for preservation of wilderness.

“(h) ABUSIVE SEXUAL CONTACT.—Any person subject to this chapter who engages in or causes sexual contact with or by another person, if to do so would violate subsection (c) (aggravated sexual assault) had the sexual contact been a sexual act, is guilty of abusive sexual contact and shall be punished as a court-martial may direct.

“(j) *INDECENT LIBERTY WITH A CHILD.*—Any person subject to this chapter who engages in indecent liberty in the physical presence of a child—

“(1) with the intent to arouse, appeal to, or gratify the sexual desire of any person; or

“(2) with the intent to abuse, humiliate, or degrade any person;

“(o) *AGE OF CHILD.*—

“(1) *TWELVE YEARS.*—In a prosecution under subsection (b) (rape of a child), subsection (g) (aggravated sexual contact with a child), or subsection (j) (indecent liberty with a child), it need not be proven that the accused knew that the other person engaging in the sexual act, contact, or liberty had not attained the age of 12 years. It is not an affirmative defense that the accused reasonably believed that the child had attained the age of 12 years.

“(2) *SIXTEEN YEARS.*—In a prosecution under subsection (d) (aggravated sexual assault of a child), subsection (f) (aggravated sexual abuse of a child), subsection (i) (abusive sexual contact with a child), or subsection (j) (indecent liberty with a child), it need not be proven that the accused knew that the other person engaging in the sexual act, contact, or liberty had not attained the age of 16 years. Unlike in paragraph (1), however, it is an affirmative defense that the accused reasonably believed that the child had attained the age of 16 years.

“(p) *PROOF OF THREAT.*—In a prosecution under this section, in proving that the accused made a threat, it need not be proven that the accused actually intended to carry out the threat.

“(q) *MARRIAGE.*—

“(1) *IN GENERAL.*—In a prosecution under paragraph (2) of subsection (c) (aggravated sexual assault), or under subsection (d) (aggravated sexual assault of a child), subsection (f) (aggravated sexual abuse of a child), subsection (i) (abusive sexual contact with a child), subsection (j) (indecent liberty with a

child), subsection (m) (wrongful sexual contact), or subsection (n) (indecent exposure), it is an affirmative defense that the accused and the other person when they engaged in the sexual act, sexual contact, or sexual conduct are married to each other.

“(2) DEFINITION.—For purposes of this subsection, a marriage is a relationship, recognized by the laws of a competent State or foreign jurisdiction, between the accused and the other person as spouses. A marriage exists until it is dissolved in accordance with the laws of a competent State or foreign jurisdiction.

“(3) EXCEPTION.—Paragraph (1) shall not apply if the accused’s intent at the time of the sexual conduct is to abuse, humiliate, or degrade any person.

“(r) CONSENT AND MISTAKE OF FACT AS TO CONSENT.—Lack of permission is an element of the offense in subsection (m) (wrongful sexual contact). Consent and mistake of fact as to consent are not an issue, or an affirmative defense, in a prosecution under any other subsection, except they are an affirmative defense for the sexual conduct in issue in a prosecution under subsection (a) (rape), subsection (c) (aggravated sexual assault), subsection (e) (aggravated sexual contact), and subsection (h) (abusive sexual contact).

“(s) OTHER AFFIRMATIVE DEFENSES NOT PRECLUDED.—The enumeration in this section of some affirmative defenses shall not be construed as excluding the existence of others.

“(t) DEFINITIONS.—In this section:

“(1) SEXUAL ACT.—The term ‘sexual act’ means—

“(A) contact between the penis and the vulva, and for purposes of this subparagraph contact involving the penis occurs upon penetration, however slight; or

“(B) the penetration, however slight, of the genital opening of another by a hand or finger or by any object, with an intent to abuse, humiliate, harass, or degrade any person or to arouse or gratify the sexual desire of any person.

“(2) SEXUAL CONTACT.—The term ‘sexual contact’ means the intentional touching, either directly or through the clothing, of the genitalia, anus, groin, breast, inner thigh, or buttocks of another person, or intentionally causing another person to touch, either directly or through the clothing, the genitalia, anus, groin, breast, inner thigh, or buttocks of any person, with an intent to abuse, humiliate, or degrade any person or to arouse or gratify the sexual desire of any person.

“(3) GRIEVOUS BODILY HARM.—The term ‘grievous bodily harm’ means serious bodily injury. It includes fractured or dislocated bones, deep cuts, torn members of the body, serious damage to internal organs, and other severe bodily injuries. It does not include minor injuries such as a black eye or a bloody nose. It is the same level of injury as in section 928 (article 128) of this chapter, and a lesser degree of injury than in section 2246(4) of title 18.

“(4) DANGEROUS WEAPON OR OBJECT.—The term ‘dangerous weapon or object’ means—

“(A) any firearm, loaded or not, and whether operable or not;

“(B) any other weapon, device, instrument, material, or substance, whether animate or inanimate, that in the manner it is used, or is intended to be used, is known to be capable of producing death or grievous bodily harm; or

“(C) any object fashioned or utilized in such a manner as to lead the victim under the circumstances to reasonably believe it to be capable of producing death or grievous bodily harm.

“(5) FORCE.—The term ‘force’ means action to compel submission of another or to overcome or prevent another’s resistance by—

“(A) the use or display of a dangerous weapon or object;

“(B) the suggestion of possession of a dangerous weapon or object that is used in a manner to cause another to believe it is a dangerous weapon or object; or

“(C) physical violence, strength, power, or restraint applied to another person, sufficient that the other person could not avoid or escape the sexual conduct.

“(6) THREATENING OR PLACING THAT OTHER PERSON IN FEAR.—The term ‘threatening or placing that other person in fear’ under paragraph (3) of subsection (a) (rape), or under subsection (e) (aggravated sexual contact), means a communication or action that is of sufficient consequence to cause a reasonable fear that non-compliance will result in the victim or another person being subjected to death, grievous bodily harm, or kidnapping.

“(7) THREATENING OR PLACING THAT OTHER PERSON IN FEAR.—

“(A) IN GENERAL.—The term ‘threatening or placing that other person in fear’ under paragraph (1)(A) of subsection (c) (aggravated sexual assault), or under subsection (h) (abusive sexual contact), means a communication or action that is of sufficient consequence to cause a reasonable fear that non-compliance will result in the victim or another being subjected to a lesser degree of harm than death, grievous bodily harm, or kidnapping.

“(B) INCLUSIONS.—Such lesser degree of harm includes—

“(i) physical injury to another person or to another person’s property; or

“(ii) a threat—

“(I) to accuse any person of a crime;

“(II) to expose a secret or publicize an asserted fact, whether true or false, tending to subject some person to hatred, contempt or ridicule; or

“(III) through the use or abuse of military position, rank, or authority, to affect or threaten to affect, either positively or negatively, the military career of some person.

“(8) BODILY HARM.—The term ‘bodily harm’ means any offensive touching of another, however slight.

“(9) CHILD.—The term ‘child’ means any person who has not attained the age of 16 years.

“(10) LEWD ACT.—The term ‘lewd act’ means—

“(A) the intentional touching, not through the clothing, of the genitalia of another person, with an intent to abuse, humiliate, or degrade any person, or to arouse or gratify the sexual desire of any person; or

“(B) intentionally causing another person to touch, not through the clothing, the genitalia of any person with an intent to abuse, humiliate or degrade any person, or to arouse or gratify the sexual desire of any person.

“(11) INDECENT LIBERTY.—The term ‘indecent liberty’ means indecent conduct, but physical contact is not required. It includes one who with the requisite intent exposes one’s genitalia, anus, buttocks, or female areola or nipple to a child. An indecent liberty may consist of communication of indecent language as long as the communication is made in the physical presence of the child. If words designed to excite sexual desire are spoken to a child, or a child is exposed to or involved in sexual conduct, it is an indecent liberty; the child’s consent is not relevant.

“(12) INDECENT CONDUCT.—The term ‘indecent conduct’ means that form of immorality relating to sexual impurity which is grossly vulgar, obscene, and repugnant to common propriety, and tends to excite sexual desire or deprave morals with respect to sexual relations. Indecent conduct includes observing, or making a videotape, photograph, motion picture, print, negative, slide, or other mechanically, electronically, or chemically reproduced visual material, without another person’s consent, and contrary to that other person’s reasonable expectation of privacy, of—

“(A) that other person’s genitalia, anus, or buttocks, or (if that other person is female) that person’s areola or nipple; or

“(B) that other person while that other person is engaged in a sexual act, sodomy (under section 925 (article 125)), or sexual contact.

“(13) ACT OF PROSTITUTION.—The term ‘act of prostitution’ means a sexual act, sexual contact, or lewd act for the purpose of receiving money or other compensation.

“(14) CONSENT.—The term ‘consent’ means words or overt acts indicating a freely given agreement to the sexual conduct at issue by a competent person. An expression of lack of consent through words or conduct means there is no consent. Lack of verbal or physical resistance or submission resulting from the accused’s use of force, threat of force, or placing another person in fear does not constitute consent. A current or previous dating relationship by itself or the manner of dress of the person involved with the accused in the sexual conduct at issue shall not constitute consent. A person cannot consent to sexual activity if—

“(A) under 16 years of age; or

“(B) substantially incapable of—

“(i) appraising the nature of the sexual conduct at issue due to—

“(I) mental impairment or unconsciousness resulting from consumption of alcohol, drugs, a similar substance, or otherwise; or

“(II) mental disease or defect which renders the person unable to understand the nature of the sexual conduct at issue;

“(ii) physically declining participation in the sexual conduct at issue; or

“(iii) physically communicating unwillingness to engage in the sexual conduct at issue.

“(15) MISTAKE OF FACT AS TO CONSENT.—The term ‘mistake of fact as to consent’ means the accused held, as a result of ignorance or mistake, an incorrect belief that the other person consented in the sexual conduct consented. The ignorance or mistake must have existed in the mind of the accused and must have been reasonable under all the circumstances. To be reasonable the ignorance or mistake must have been based on information, or lack of it, which would indicate to a reasonable person that the other person consented. Additionally, the ignorance or mistake cannot be based on the negligent failure to discover the true facts. Negligence is the absence of due care. Due care is what a reasonably careful person would do under the same or similar circumstances. The accused’s state of intoxication, if any, at the time of the offense is not relevant to mistake of fact. A mistaken belief that the other person consented must be that which a reasonably careful, ordinary, prudent, sober adult would have had under the circumstances at the time of the offense.

“(16) AFFIRMATIVE DEFENSE.—The term ‘affirmative defense’ means any special defense which, although not denying that the accused committed the objective acts constituting the offense charged, denies, wholly, or partially, criminal responsibility for those acts. The accused has the burden of proving the affirmative defense by a preponderance of evidence. After the defense meets this burden, the prosecution shall have the burden of proving beyond a reasonable doubt that the affirmative defense did not exist.”

Subtitle D—Intelligence-Related Matters

SEC. 931. DEPARTMENT OF DEFENSE STRATEGY FOR OPEN-SOURCE INTELLIGENCE.

(a) *FINDINGS.*—Congress makes the following findings:

(1) *Open-source intelligence (OSINT) is intelligence that is produced from publicly available information and is collected, exploited, and disseminated in a timely manner to an appropriate audience for the purpose of addressing a specific intelligence requirement.*

(2) *With the Information Revolution, the amount, significance, and accessibility of open-source information has expanded significantly, but the intelligence community has not expanded its exploitation efforts and systems to produce open-source intelligence.*

(3) *The production of open-source intelligence is a valuable intelligence discipline that must be integrated into intelligence tasking, collection, processing, exploitation, and dissemination to ensure that United States policymakers are fully and completely informed.*

(4) *The dissemination and use of validated open-source intelligence inherently enables information sharing since open-source intelligence is produced without the use of sensitive sources and methods. Open-source intelligence products can be shared with the American public and foreign allies because of the unclassified nature of open-source intelligence.*

(5) *The National Commission on Terrorist Attacks Upon the United States (popularly referred to as the "9/11 Commission"), in its final report released on July 22, 2004, identified shortfalls in the ability of the United States to use all-source intelligence, a large component of which is open-source intelligence.*

(6) *In the Intelligence Reform and Terrorism Prevention Act of 2004 (Public Law 108-458), Congress calls for coordination of the collection, analysis, production, and dissemination of open-source intelligence.*

(7) *The Commission on the Intelligence Capabilities of the United States Regarding Weapons of Mass Destruction, in its report to the President released on March 31, 2005, found that "the need for exploiting open-source material is greater now than ever before," but that "the Intelligence Community's open source programs have not expanded commensurate with either the increase in available information or with the growing importance of open source data to today's problems".*

(b) *DEPARTMENT OF DEFENSE STRATEGY FOR OPEN-SOURCE INTELLIGENCE.*—

(1) *DEVELOPMENT OF STRATEGY.*—The Secretary of Defense shall develop a strategy for the purpose of integrating open-source intelligence into the Defense intelligence process. The strategy shall be known as the “Defense Strategy for Open-Source Intelligence”. The strategy shall be incorporated within the larger Defense intelligence strategy.

(3) A description of the tools, systems, centers, organizational entities, and procedures to be used within the Department of Defense to perform open-source intelligence tasking, collection, processing, exploitation, and dissemination.

(4) A description of proven tradecraft for effective exploitation of open-source intelligence, to include consideration of operational security.

(5) A detailed description on how open-source intelligence will be fused with all other intelligence sources across the Department of Defense.

(6) A description of—

(A) a training plan for Department of Defense intelligence personnel with respect to open-source intelligence; and

(B) open-source intelligence guidance for Department of Defense intelligence personnel.

(7) A plan to incorporate the function of oversight of open-source intelligence—

(A) into the Office of the Undersecretary of Defense for Intelligence; and

(B) into service intelligence organizations.

(8) A plan to incorporate and identify an open-source intelligence specialty into personnel systems of the Department of Defense, including military personnel systems.

SEC. 1023. SENSE OF CONGRESS REGARDING DRUG TRAFFICKING DETERRENCE.

(a) FINDINGS.—Congress finds the following:

(1) According to the Department of State, drug trafficking organizations shipped approximately nine tons of cocaine to the United States through the Dominican Republic in 2004, and are increasingly using small, high-speed watercraft.

(2) Drug traffickers use the Caribbean corridor to smuggle narcotics to the United States via Puerto Rico and the Dominican Republic. This route is ideal for drug trafficking because of its geographic expanse, numerous law enforcement jurisdictions, and fragmented investigative efforts.

(3) The tethered aerostat system in Lajas, Puerto Rico, contributes to deterring and detecting smugglers moving illicit drugs into Puerto Rico. The aerostat’s range and operational capabilities allow it to provide surveillance coverage of the eastern Caribbean corridor and the strategic waterway between Puerto Rico and the Dominican Republic, known as the Mona Passage.

(4) Including maritime radar on the Lajas aerostat will expand its ability to detect suspicious vessels in the eastern Caribbean corridor.

(b) SENSE OF CONGRESS.—Given the findings contained in subsection (a), it is the sense of Congress that—

(1) Congress and the Department of Defense should fund the Counter-Drug Tethered Aerostat program; and

(2) the Department of Defense should install maritime radar on the Lajas, Puerto Rico, aerostat.

SEC. 1234. THE UNITED STATES-CHINA ECONOMIC SECURITY REVIEW COMMISSION.

(a) **FINDINGS.**—Congress finds the following:

(1) The 2004 Report to Congress of the United States-China Economic and Security Review Commission states that—

(A) China's State-Owned Enterprises (SOEs) lack adequate disclosure standards, which creates the potential for United States investors to unwittingly contribute to enterprises that are involved in activities harmful to United States security interests;

(B) United States influence and vital long-term interests in Asia are being challenged by China's robust regional economic engagement and diplomacy;

(C) the assistance of China and North Korea to global ballistic missile proliferation is extensive and ongoing;

(D) China's transfers of technology and components for weapons of mass destruction (WMD) and their delivery systems to countries of concern, including countries that support acts of international terrorism, have helped create a new tier of countries with the capability to produce WMD and ballistic missiles;

(E) the removal of the European Union arms embargo against China that is currently under consideration in the European Union would accelerate weapons modernization and dramatically enhance Chinese military capabilities;

(F) China is developing a leading-edge military with the objective of intimidating Taiwan and deterring United

States involvement in the Taiwan Strait, and China's qualitative and quantitative military advancements have already resulted in a dramatic shift in the cross-Strait military balance toward China; and

(G) China's growing energy needs are driving China into bilateral arrangements that undermine multilateral efforts to stabilize oil supplies and prices, and in some cases may involve dangerous weapons transfers.

(2) On March 14, 2005, the National People's Congress approved a law that would authorize the use of force if Taiwan formally declares independence.

(b) SENSE OF CONGRESS FOR COMPREHENSIVE STRATEGY.—It is the sense of Congress that the President should present to Congress quickly a comprehensive strategy to—

(1) address the emergence of China economically, diplomatically, and militarily;

(2) promote mutually beneficial trade relations with China; and

(3) encourage China's adherence to international norms in the areas of trade, international security, and human rights.

(c) CONTENTS OF STRATEGY.—The strategy referred to in subsection (b) should address the following:

(1) Actions to address China's policy of undervaluing its currency, including—

(A) encouraging China to continue to upwardly revalue the Chinese yuan against the United States dollar;

(B) allowing the yuan to float against a trade-weighted basket of currencies; and

(C) concurrently encouraging United States trading partners with similar interests to join in these efforts.

(2) Actions to make better use of the World Trade Organization (WTO) dispute settlement mechanism and applicable United States trade laws to redress China's trade practices, including—

(A) exchange rate manipulation;

(B) denial of trading and distribution rights;

(C) insufficient intellectual property rights protection;

(D) objectionable labor standards;

(E) subsidization of exports; and

(F) forced technology transfers as a condition of doing business.

(3) The United States Trade Representative should consult with United States trading partners regarding any trade dispute with China.

(4) Actions to encourage United States diplomatic efforts to identify and pursue initiatives to revitalize United States engagement in East Asia. The initiatives should have a regional focus and complement bilateral efforts. The Asia-Pacific Economic Cooperation forum (APEC) offers a ready mechanism for pursuit of such initiatives.

(5) Actions by the administration to work with China to prevent proliferation of prohibited technologies and to secure China's agreement to renew efforts to curtail commercial export by North Korea of ballistic missiles.

(6) *Actions by the Secretary of State and the Secretary of Energy to consult with the International Atomic Energy Agency with the objective of upgrading the current loose experience-sharing arrangement whereby China engages in some limited exchanges with the organization to a more structured arrangement.*

(7) *Actions by the administration to develop a coordinated, comprehensive national policy and strategy designed to maintain United States scientific and technological leadership and competitiveness, in light of the rise of China and the challenges of globalization.*

(8) *Actions to review laws and regulations governing the Committee on Foreign Investment in the United States (CFIUS), including exploring whether the definition of national security should include the potential impact on national economic security as a criterion to be reviewed, and whether the chairmanship of CFIUS should be transferred from the Secretary of the Treasury to a more appropriate executive branch agency.*

(9) *Actions by the President and the Secretary of State and Secretary of Defense to press strongly their counterparts in the European Union and its member states to maintain and strengthen the embargo on selling arms to China.*

(10) *Actions by the administration to discourage foreign defense contractors from selling sensitive military-use technology or weapons systems to China.*

SEC. 2836. SENSE OF CONGRESS REGARDING INFRASTRUCTURE AND INSTALLATION REQUIREMENTS FOR TRANSFER OF UNITS AND PERSONNEL FROM CLOSED AND REALIGNED MILITARY INSTALLATIONS TO RECEIVING LOCATIONS.

(a) FINDINGS.—Congress finds the following:

(1) The decisions of the 2005 round of base closures and realignments and the Integrated Global Presence and Basing Strategy will result in the permanent change of station and relocation of hundreds of thousands of members of the Armed Forces and their families over the next six years.

(2) Critical quality-of-life concerns for military families related to the infrastructure and installation requirements to support the restructuring of the Armed Forces include adequate housing and continued access to quality education facilities and child care, health care, and other services.

(3) By ensuring that facilities and infrastructure are maintained at closing installations pending the actual change of station and relocation of members of the Armed Forces and their families and that adequate permanent facilities and infrastructure await them at the receiving installations, disruptions to unit operational effectiveness will be minimized and the quality of life of military families will be protected.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of Defense should seek to ensure that the permanent facilities and infrastructure necessary to support the mission of the Armed Forces and the quality-of-life needs of members of the Armed Forces and their families are ready for use at receiving locations before units are transferred to such locations as a result of the 2005 round of base closures and realignments and the Integrated Global Presence and Basing Strategy.

(b) STUDY OF SURFACE TRANSPORTATION INFRASTRUCTURE OF AFFECTED INSTALLATIONS.—The Secretary of Defense shall conduct a study—

(1) to identify each military installation, if any, that will be significantly impacted by an increase in the number of members of the Armed Forces assigned to the installation as a result of

the 2005 round of defense base closure and realignment under the Defense Base Closure and Realignment Act of 1990 or the Integrated Global Presence and Basing Strategy; and

(2) to determine whether the existing surface transportation infrastructure at each installation identified under paragraph (1) is adequate to support the increased vehicular traffic associated with the increase in the number of defense personnel described in that paragraph.

(c) REPORT.—Not later than April 15, 2007, the Secretary shall submit to the congressional defense committees a report containing the results of the study conducted under subsection (b).

SEC. 2838. SENSE OF CONGRESS ON REVERSIONARY INTERESTS INVOLVING REAL PROPERTY AT NAVY HOMEPORTS.

It is the sense of Congress that, in implementing the decisions made with respect to Navy homeports as part of the 2005 round of defense base closures and realignments, the Secretary of the Navy should, when consistent with Federal policy supporting cost-free conveyances of Federal surplus property suitable for use to provide a public benefit, release or otherwise relinquish any entitlement to receive, pursuant to any agreement providing for such payment, compensation from any holder of a reversionary interest in real property used by the United States for improvements made to the property.

(a) FINDINGS.—Congress makes the following findings:

(1) In 1943 and 1944, the United States Armed Forces operated a rest and relaxation facility in Mackay, Queensland, Australia, for troops serving in the Pacific Theater during World War II.

(2) On June 14, 1943, a Boeing B-17C was transporting 6 crew members and 35 servicemen from Mackay to Port Moresby, New Guinea, to return the servicemen to duty after 10 days of rest and relaxation leave at an Army/Red Cross facility.

(3) The aircraft crashed shortly after take-off at Bakers Creek, Australia, killing all 6 crew members and 34 of the 35 servicemen being transported in what was at that point the worst crash in American air transport history, and what remains the worst air disaster in Australian history.

(4) Due to wartime censorship rules related to the movement of troops, the tragic crash and loss of life were not reported to the Australian or United States public.

(5) Many family members of those killed did not learn the circumstances of the troops deaths until they were contacted by the Bakers Creek Memorial Foundation beginning in 1992.

(6) As of May 2005, the Bakers Creek Memorial Foundation had contacted 36 of the 40 families that lost loved ones in the tragic crash, and was continuing efforts to locate the remaining four families to inform them of the true events of the crash at Bakers Creek.

(7) The Australian people marked the tragic crash at Bakers Creek with a memorial established in 1992, but no similar memorial has been established in the United States.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 1815) to authorize appropriations for fiscal year 2006 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The Senate amendment struck out all of the House bill after the enacting clause and inserted a substitute text.

The House recedes from its disagreement to the amendment of the Senate with an amendment that is a substitute for the House bill and the Senate amendment. The differences between the House bill, the Senate amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clarifying changes.

SUMMARY STATEMENT OF CONFERENCE ACTIONS

The Conferees recommend authorization of appropriations for fiscal year 2006 for the Department of Defense for procurement; research and development; test and evaluation; operation and maintenance; working capital funds; military construction and family housing; and for weapons and environmental restoration programs of the Department of Energy; that have a budget authority implication of \$441.5 billion for the national defense function.

The Conferees recommend the merging authorization of appropriations for the Department of Defense of \$50.0 billion for costs associated with ongoing contingency operations in Iraq and Afghanistan; \$6.6 billion for costs associated with Hurricane Katrina; \$130.0 million for costs associated with Avian Flu; and \$40.0 million for costs associated with Pakistan Earthquake relief efforts.

Summary table of authorizations

The defense authorization act provides authorizations for appropriations, but does not generally provide budget authority. Budget authority is provided in the appropriations act.

In order to relate the conference recommendations to the budget resolution, matters in addition to the dollar authorizations contained in this bill must be taken into account. A number of programs in the national defense function are authorized in other legislation.

The following table summarizes authorizations included in the bill for fiscal year 2006 and, in addition, summarizes the implications of the conference action for the budget authority totals for national defense (budget function 050).

Procurement, Defense-wide overview

The budget request for fiscal year 2006 included an authorization of \$2,677.8 million in Procurement, Defense-wide for the Department of Defense.

The House bill would authorize \$2,715.4 million.

The Senate amendment would authorize \$2,784.8 million.

The conferees recommend an authorization of \$2,647.0 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

ITEMS OF SPECIAL INTEREST

Joint Combat Pistol program

The conferees are aware the U.S. Special Operations Command (SOCOM) has a requirement for a new .45 caliber pistol, the Joint Combat Pistol (JCP) program. The conferees understand that the SOCOM requirement is under review through the Joint Capabilities Integration and Development System process, and that the Army and the Marine Corps have expressed interest in the JCP program. The conferees note that SOCOM has issued a draft request for proposals (RFP) for the procurement of these new pistols and that this draft RFP contains an addendum for a potentially large quantity procurement. The conferees are not only concerned with the potential procurement of pistols in excess of the SOCOM requirement but also concerned with the proliferation of service programs to acquire a new combat pistol. The conferees expect the Department of Defense to acquire the JCP and any other new pistol in accordance with Department acquisition regulations and full and open competition. The conferees direct the Secretary of Defense to provide a report to the congressional defense committees, no later than April 1, 2006, on the acquisition strategy for pistols. The report would include an analysis of alternatives for the JCP program and details on the Joint Combat Pistol, Close Quarter Battle, Personal Defense Weapon, and any other Department acquisition program relating to military pistols. The report would also include an evaluation of the costs of utilizing the current inventory of serviceable M1911A1 pistols still in storage and the potential option of refurbishing unserviceable M1911A1 pistols.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations

Authorization of appropriations (secs. 101–104)

The House bill contained provisions (secs. 101–104) that would authorize the recommended fiscal year 2006 funding levels for procurement Army, Navy, Marine Corps, Air Force, and Defense-wide activities.

The Senate amendment contained similar provisions (secs. 101–104).

The conference agreement includes these provisions.

Subtitle B—Army Programs

Multiyear procurement authority for utility helicopters (sec. 111)

The House bill contained a provision (sec. 111) that would authorize the Secretary of the Army to enter into a multiyear procurement contract, beginning with fiscal year 2007, for procurement of up to 461 helicopters in the UH–60M configuration and, acting as the executive agent for the Department of the Navy, in the MH–60S configuration.

The Senate amendment contained a similar provision (sec. 113).

The House recedes with an amendment that would authorize the Secretary to enter into a multiyear contract, beginning with fis-

cal year 2007, for the procurement of UH-60M Black Hawk utility helicopters and, acting as the executive agent for the Department of the Navy, enter into a multiyear contract for the procurement of MH-60S Sea Hawk utility helicopters. The conferees understand that the Department of the Army and the Department of the Navy intend to procure 461 H-60 helicopters.

Multiyear procurement authority for Modernized Target Acquisition Designation Sight/Pilot Night Vision Sensors for AH-64 Apache attack helicopters (sec. 112)

The House bill contained a provision (sec. 112) that would authorize the Secretary of the Army to enter into a multiyear procurement contract, beginning with fiscal year 2006, for procurement of the Apache Modernized Target Acquisition Designation Sight/Pilot Night Vision Sensor (MTADS/PNVS).

The Senate amendment contained a similar provision (sec. 112).

The Senate recedes with an amendment that would authorize the Secretary to enter into a multiyear procurement contract, beginning with fiscal year 2006, for procurement of the Apache MTADS/PNVS, with a 4 year limitation on the length of the contract.

Multiyear procurement authority for conversion of AH-64A Apache attack helicopters to the AH-64D Block II configuration (sec. 113)

The House bill contained a provision (sec. 113) that would authorize the Secretary of the Army to enter into a multiyear procurement contract, beginning with fiscal year 2006, for procurement of the conversion of 96 Apache helicopters to the Block II configuration.

The Senate amendment contained a similar provision (sec. 111).

The Senate recedes with an amendment that would authorize the Secretary to enter into a multiyear procurement contract, beginning with fiscal year 2006, for procurement of the conversion of AH-64A Apaches to the AH-64D Block II configuration, with a 4 year limitation on the length of the contract. The conferees understand that the Department of the Army intends to convert at least 96 AH-64A Apache helicopters to the AH-64D Block II configuration.

Acquisition strategy for tactical wheeled vehicle programs (sec. 114)

The House bill contained a provision (sec. 114) that would require the Secretary of the Army and the Secretary of the Navy to enter into a joint service program for the procurement of a new vehicle class of tactical wheeled vehicles.

The Senate amendment contained no similar provision.

The Senate recedes.

The conferees support the Army's revised strategy for acquiring tactical wheeled vehicles and understand the Army intends to recapitalize, modernize, and eventually replace the Army's existing light, medium, and heavy tactical wheeled vehicles with either a new next generation vehicle class or more capable current force

tactical wheeled vehicles. The conferees are aware that, in some areas, the Army and Marine Corps are cooperating in the development of tactical wheeled vehicle replacements. However, the conferees also understand that the Marine Corps has its own program to replace an aging fleet of battlefield resupply vehicles, the Logistics Vehicle System-Replacement program, even though it appears that the Army's Palletized Load System could be an adequate replacement for Marine Corps resupply vehicles. The conferees believe that the Army and Marine Corps can do more to coordinate tactical wheeled vehicle requirements and execute a joint service program to acquire tactical wheeled vehicles. The conferees encourage the Army-Marine Corps Board to review the current requirements for Army and Marine Corps tactical wheeled vehicles with the intent to converge tactical wheeled vehicle requirements and acquisition.

Report on Army modular force initiative (sec. 115)

The House bill contained a provision (sec. 115) that would place a \$3.0 billion limitation on the obligation or expenditure of funds available for the acquisition programs for the Army modular force initiative until the Secretary of the Army submits a report to the congressional defense committees that outlines the full scope and funding levels of the programs considered part of the modular force initiative, and a detailed accounting of the use of funds provided for the modular force initiative in the 2005 emergency supplemental request.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would remove the funding limitation as contained in the House provision and directs the Secretary of the Army to submit a report to the congressional defense committees no later than 30 days after the date of the submission of the fiscal year 2006 request for emergency supplemental appropriations for the Department of Defense to the Congress.

The conferees have strongly supported and will continue to support the Army's modular force initiative. However, the conferees are concerned with modularity costs and the Army's ability to support current year and outyear funding for the modular force initiative. In March 2005, the Army's cost estimates for its modular force initiative was \$48.0 billion. However, in a September 2005 report, the Government Accountability Office (GAO) found that the Army's cost estimate for the modularity initiative did not include \$27.5 billion in personnel and construction costs, bringing potential known costs to \$75.5 billion. Minimal information has been provided to the congressional defense committees on defined requirements and budget detail primarily because the Army modular force initiative has been funded through the use of emergency supplemental requests for the Department of Defense. The conferees require a greater level of detail to understand the Army's modular force initiative, and direct the Secretary of the Army to submit a report that would specify each program in the modular force initiative and the requirements, acquisition objective, funding profile, and unfunded requirements for each program specified as part of the Army's modular force initiative. The conferees expect the Army to provide the requested information aggregated by Army component.

Subtitle C—Navy Programs

Virginia-class submarine program (sec. 121)

The House bill contained a provision (sec. 121) that would limit the total procurement end costs for five *Virginia*-class submarines (SSN-779, SSN-780, SSN-781, SSN-782, and SSN-783) to the cost estimates submitted for those vessels with the fiscal year 2006 budget request. The provision would allow the Secretary of the Navy to adjust the limitation amounts for economic inflation and for changes in federal, state, or local laws enacted after September 30, 2005. The provision would also require the Secretary to notify Congress of any adjustments made to the limitation amounts annually, with the submission of the budget request for the following fiscal year.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would raise the amounts of the limitation for the same five *Virginia*-class submarines to the contract ceiling prices for those five submarines. In addition to the two reasons for which the House bill would allow the Secretary to submit adjustments to the cost limitations, the Senate amendment would allow the Secretary to make adjustments for the amounts of outfitting and post-delivery costs, and the amounts of increases or decreases in costs of those submarines that are attributable to the insertion of new technology. The amendment would, however, limit those technologies that could be used for cost adjustment to those that would either lower life cycle costs or meet an emerging threat.

The conferees direct the Secretary to submit a report to the congressional defense committees, upon submission of the budget request for fiscal year 2007, including a list of items and activities, and their estimated costs, that would be required during the outfitting and post-delivery of each of the five submarines covered by this provision.

LHA replacement (LHA(R)) amphibious assault ship program (sec. 122)

The House bill contained a provision (sec. 122) that would limit the total amount obligated or expended for procurement of each ship of the LHA replacement (LHA(R)) amphibious assault ship program to \$2.0 billion. The provision would allow the Secretary of the Navy to adjust the amount for certain reasons, and report on those adjustments annually with the submission of the budget request. The provision would also prohibit the obligation or expenditure of any funds for procurement of the LHA(R) until the Secretary of Defense certifies to the congressional defense committees that: (1) a detailed Operational Requirements Document had been approved by the Joint Requirements Oversight Council; and (2) a stable design exists for the LHA(R) class of vessels.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would prohibit expenditure of more than 70 percent of the funds available in Shipbuilding and Conversion, Navy, for the LHA(R) program, until the Secretary of the Navy certifies in writing to the congressional de-

fense committees that there is an approved operational requirement and a stable design for the LHA(R) class of vessels.

Cost limitation for next-generation destroyer program (sec. 123)

The House bill contained a provision (sec. 123) that would limit the amount of procurement funds obligated or expended for each future major surface combatant, destroyer type, to \$1.7 billion. The provision would allow the Secretary of the Navy to adjust this amount for economic inflation and for changes in federal, state, or local laws enacted after September 30, 2005. The provision would also require the Secretary to notify Congress of any adjustments made to this limitation annually, with the submission of the annual budget request. The provision would authorize \$700.0 million in the Research, Development, Test, and Evaluation, Navy account for technology development and demonstration for this ship. The provision would also require the Secretary to ensure that the acquisition plan for this ship would: (1) use technologies from the DD(X) and CG(X) programs, as well as any other technology the Secretary considers appropriate; (2) require the ship to have an overall capability not less than that of the flight IIA version of the *Arleigh Burke* (DDG-51) class destroyer; and (3) posture the program to be ready for lead ship procurement not later than fiscal year 2011.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit the cost of the fifth vessel in the next-generation destroyer program to \$2.3 billion. In addition to the two reasons the House bill would allow the Secretary to submit adjustments to the cost limitation, the Senate amendment would allow the Secretary to make adjustments for the amount of outfitting and post-delivery costs, and the amounts of increases or decreases in costs of the vessel that are attributable to the insertion of new technology. The amendment would, however, limit those technologies that could be used for cost adjustment to those that would either lower life cycle costs or meet an emerging threat. The amendment would require the Secretary to start reporting any adjustment to the cost limitation with the submission of the budget request for the year in which a contract for detail design and construction of the fifth vessel of the next-generation destroyer is expected to be awarded.

The conferees direct the Secretary to submit a report to the congressional defense committees, which would accompany the first report of cost limitation adjustment, that includes a list of items and activities, and their estimated costs, that would be required during the outfitting and post-delivery for this vessel.

Littoral combat ship (LCS) program (sec. 124)

The House bill contained a provision (sec. 124) that would limit the amounts obligated or expended for each ship of the Littoral Combat Ship (LCS) class, to include the amounts for mission modules, to \$400.0 million. The provision would allow the Secretary of the Navy to adjust this amount for economic inflation and for changes in federal, state, or local laws enacted after September 30, 2005. The provision would also require the Secretary of the Navy to notify Congress of any adjustments made to this limitation annually, with the submission of the annual budget request. The pro-

vision would further prevent the Navy from requiring any LCS vessels or LCS mission modules until the Secretary of Defense submits the results of an operational evaluation of the first four LCS vessels, conducted by the Director of Operational Test and Evaluation, and a certification that there is a stable design for LCS to the congressional defense committees.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit the cost of the fifth and sixth vessels of the LCS-class to \$220.0 million, excluding amounts for elements designated by the Secretary of the Navy as a mission package. In addition to the two reasons the House bill would allow the Secretary of the Navy to submit adjustments to the cost limitation, the Senate amendment would include the amount of outfitting the post-delivery costs, and the amounts of increases or decreases in cost of the vessels that are attributable to the insertion of new technology. The amendment would, however, limit those technologies that could be used for cost adjustment to those that would either lower life cycle costs or meet an emerging threat. The amendment would require the Secretary to start reporting any adjustment to the cost limitation with the submission of the budget request for the year in which a contract for detail design and construction of the fifth vessel of the next-generation destroyer is expected to be awarded. The amendment would also require the Secretary of the Navy to report, with the submission of the annual budget request, those elements that are designated as mission packages for the LCS-class of vessels, and their estimated cost. The amendment would limit the use of funds for any LCS vessels or mission packages, after the first four vessels, until the Secretary of the Navy submits a certification to the congressional defense committees that the LCS design is stable.

The conferees direct the Secretary of the Navy to submit a report to the congressional defense committees, which would accompany the first report of cost limitation adjustment, that includes a list of items and activities, and their estimated costs, that would be required during the outfitting and post-delivery for these vessels.

Prohibition on acquisition of next-generation destroyer through a single shipyard (sec. 125)

The Senate amendment contained a provision (sec. 121) that would prohibit the acquisition of the next-generation destroyer (DD(X)) through a winner-take-all acquisition strategy. The provision would also prohibit the obligation or expenditure of funds for the purpose of pursuing a winner-take-all acquisition strategy. The provision would define a winner-take-all acquisition strategy as one leading to the acquisition, including both design and construction, of the next-generation of destroyers through a single shipyard.

The House bill contained no similar provision.

The House recedes with an amendment that would not specify the DD(X) as the next-generation destroyer, but instead define the next-generation destroyer program as that which will acquire and deploy a new class of destroyers as the follow-on to the Arleigh Burke-class of destroyers.

Aircraft carrier force structure (sec. 126)

The House bill contained a provision (sec. 128) that would amend section 5062 of title 10, United States Code, by inserting a new subsection that would require the naval combat forces of the Navy to have no less than 12 operational aircraft carriers, and would clarify that an operational aircraft carrier could be one which is temporarily unavailable for worldwide deployment due to routine or scheduled maintenance or repair. The provision would also require the Secretary of Defense to take all necessary actions to ensure that the U.S.S. *John F. Kennedy* (CV-67) is maintained in a fully mission capable status, and would authorize \$60.0 million in the Operations and Maintenance, Navy account for the operation and routine maintenance of the U.S.S. *John F. Kennedy*.

The Senate amendment contained a provision (sec. 321) that would authorize \$288.0 million in the Operations and Maintenance, Navy account from this Act and any other Act for fiscal years 2005 and 2006, only for the repair and maintenance to extend the life of the U.S.S. *John F. Kennedy*. The provision would prohibit the Secretary of the Navy from reducing the number of active aircraft carriers of the Navy below 12 until the later of: (1) 180 days after submission of the 2005 Quadrennial Defense Review, as required by section 118 of title 10, United States Code; or (2) the date on which the Secretary of Defense, in consultation with the Chairman of the Joint Chiefs of Staff, certifies to the congressional defense committees that agreements have been entered into to provide port facilities for the permanent forward deployment of such number of aircraft carriers as is necessary in the Pacific Command Area of Responsibility.

The Senate recedes with an amendment that would amend section 5062 of title 10, United States Code, by inserting a new subsection that would require the naval combat forces of the Navy to include no less than 12 operational aircraft carriers, and would specify that an operational aircraft carrier includes an aircraft carrier that is temporarily unavailable for worldwide deployment due to routine or scheduled maintenance or repair. The amendment would also authorize up to \$288.0 million in the Operations and Maintenance, Navy account for repair and maintenance to extend the life of the U.S.S. *John F. Kennedy*.

Refueling and complex overhaul of the U.S.S. Carl Vinson (sec. 127)

The House bill contained a provision (sec. 126) that would authorize approximately \$1.5 billion from the Shipbuilding and Conversion, Navy account as the first increment of the nuclear refueling and complex overhaul (RCOH) of the U.S.S. *Carl Vinson*. The provision would authorize the Secretary of the Navy to enter into a contract during fiscal year 2006 for this RCOH, but would also require as a condition of this contract that any obligation of the United States to make a payment under the contract for a fiscal year after fiscal year 2006 is subject to the availability of appropriations.

The Senate amendment contained a similar provision (sec. 124).

The Senate recedes with an amendment that would authorize \$1.5 billion for the RCOH, but would acknowledge the fact that the

contract has already been entered into, using the authority of Public Law 109–104, enacted on November 19, 2005. The amendment would also clarify that the \$89.0 million made available by Public Law 109–104 is part of the \$1.5 billion authorized for fiscal year 2006.

CVN–78 aircraft carrier (sec. 128)

The Senate amendment contained a provision (sec. 122) that would authorize the Secretary of the Navy to fund the detail design and construction of the aircraft carrier designated CVN–78 using split funding in the Shipbuilding and Conversion, Navy account in fiscal years 2007, 2008, 2009, and 2010. The provision would direct that the contract for this ship provide that any obligation of the United States to make a payment for a fiscal year after 2006 would be subject to the availability of appropriations.

The House bill contained no similar provision.

The House recedes with an amendment that would reduce the number of years the funding could be split to fiscal years 2007, 2008, and 2009.

LHA replacement (LHA(R)) ship (sec. 129)

The Senate amendment contained a provision (sec. 123) that would authorize \$325.4 million in the Shipbuilding and Conversion, Navy, account in fiscal year 2006 for design, advance procurement, advance construction, detail design, and construction for the lead ship of the LHA(R) class of vessels. The provision would also approve incremental funding for the lead ship in fiscal years 2007 and 2008. The provision would also authorize the Secretary of the Navy to enter into a contract for design, advance procurement, and advance construction for the lead LHA(R) in fiscal year 2006, and to enter another contract for the detail design and construction for the lead LHA(R) in fiscal year 2006. The provision would provide that any obligation of the United States to make a payment under these contracts for a fiscal year after 2006 would be subject to the availability of appropriations for that purpose for that fiscal year.

The House bill contained no similar provision.

The House recedes with an amendment that would lower the authorized amount of funds in Shipbuilding and Conversion, Navy, to \$200.5 million for LHA(R) in fiscal year 2006.

Report on alternative propulsion methods for surface combatants and amphibious warfare ships (sec. 130)

The House bill contained a provision (sec. 127) that would require the Secretary of the Navy to submit a report to the congressional defense committees not later than the submission of the fiscal year 2007 budget request. The report would include the results of a 2005 study, directed by the Chief of Naval Operations, on alternative propulsion methods for Navy surface combatant vessels. The provision would require that the report include the study objectives, methodology, description of alternatives, conclusions, and the Secretary's intended actions based on the conclusion of the study.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would extend the date for the submission of the report until November 1, 2006. The amendment would also require the contents of the report to examine the life cycle costs of the various alternatives, including nuclear power alternatives, in the report.

The conferees expect the Navy to brief the congressional defense committees on the organization and study plan for the preparation of this report by April 1, 2006.

Subtitle D—Air Force Programs

C-17 aircraft program and assessment of intertheater airlift requirements (sec. 131)

The House bill contained a provision (sec. 131) that would authorize the Secretary of the Air Force to enter into a multiyear contract, beginning with fiscal year 2006, for the procurement of up to 42 additional C-17 aircraft.

The Senate amendment contained a provision (sec. 131) that would authorize a similar multiyear contract authority, but would require the Secretary of Defense to certify to the congressional defense committees that the requirement for up to 42 additional C-17 aircraft is consistent with the Quadrennial Defense Review (QDR) before procuring additional C-17 aircraft under that multiyear authority. The Senate amendment would further require the Secretary of Defense to carry out an assessment of the intertheater airlift capabilities required to support the national defense strategy as part of the QDR. In the assessment, the Secretary of Defense would be required to explain how the future airlift force structure requirements in the QDR take into account: (1) the increased airlift demands associated with the Army modular brigade combat teams; (2) the objective to deliver a brigade combat team anywhere in the world within 4 to 7 days, a division within 10 days, and multiple divisions within 20 days; (3) the increased airlift demands associated with the expanded scope of operational activities of the Special Operations Forces; (4) the realignment of the overseas basing structure in accordance with the Integrated Presence and Basing Strategy; (5) adjustments in the force structure to meet homeland defense requirements; (6) the potential for simultaneous homeland defense activities and major combat operations; and (7) potential changes in requirements for intratheater airlift or sealift capabilities. The Senate amendment would also encourage the Secretary of the Air Force to procure sufficient C-17 aircraft to maintain the C-17 production at not less than the minimum sustaining rate in the event the Secretary of Defense is unable to make the multiyear certification, until sufficient flight test data has been obtained to validate the improved C-5 mission capability rates used in the Mobility Capabilities Study as a result of the C-5 Reliability Enhancement and Reengining Program and Avionics Modernization Program.

The House recedes with an amendment that would require the Secretary of Defense to provide an additional explanation on how the future airlift force structure requirements in the QDR take into account the capability of the Civil Reserve Air Fleet to provide adequate augmentation in meeting global mobility requirements. The

House amendment would further allow the intratheater airlift assessments to be submitted to the Committees on Armed Services of the Senate and the House of Representatives up to 45 days after submission of the QDR, if the Department is unable to submit them with the budget request.

Prohibition on retirement of KC-135E aircraft (sec. 132)

The Senate amendment contained a provision (sec. 132) that would prohibit the Secretary of the Air Force from retiring any KC-135E aircraft of the Air Force in fiscal year 2006.

The House bill contained no similar provision.
The House recesses.

Prohibition on retirement of F-117 aircraft during fiscal year 2006 (sec. 133)

The Senate amendment contained a provision (sec. 134) that would prohibit the Secretary of the Air Force from retiring any F-117 Nighthawk stealth attack aircraft of the Air Force in fiscal year 2006.

The House bill contained no similar provision.
The House recesses.

Prohibition on retirement of C-130E/H tactical airlift aircraft during fiscal year 2006 (sec. 134)

The Senate amendment contained a provision (sec. 135) that would prohibit the Secretary of the Air Force from retiring any C-130E/H tactical airlift aircraft of the Air Force in fiscal year 2006.

The House bill contained no similar provision.
The House recesses.

Procurement of C-130J/KC-130J aircraft after fiscal year 2005 (sec. 135)

The Senate amendment contained a provision (sec. 136) that would require any C-130J/KC-130J procured after fiscal year 2005, including any C-130J/KC-130J aircraft procured through a multiyear contract continuing in force from a fiscal year before fiscal year 2006, to be procured through a contract under part 15 of the Federal Acquisition Regulation, relating to items by negotiated contract, rather than through a contract under part 12 of the Federal Acquisition Regulation, relating to acquisition of commercial items.

The House bill contained no similar provision.
The House recesses.

Report on Air Force aircraft aeromedical evacuation programs (sec. 136)

The Senate amendment contained a provision (sec. 137) that would require the Secretary of the Air Force to procure up to two aircraft dedicated to the aeromedical evacuation mission and capable of providing nonstop aeromedical evacuations across the Atlantic Ocean. The provision would also authorize \$200.0 million in aircraft procurement funds for the procurement and equipping of these aircraft.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary to submit to the congressional defense committees a report on aeromedical evacuation programs of the Air Force not later than 90 days after the date of the enactment of this Act. The report should provide a comprehensive evaluation and overall assessment of the current aeromedical evacuation program, carried out through the use of designated aircraft, compared to the former aeromedical evacuation program, carried out through the use of dedicated aircraft. The report would include: (1) a description of challenges and capability gaps of the current aircraft aeromedical evacuation program compared to the challenges and capability gaps of the former program; (2) a description of possible means by which to best mitigate or resolve the challenges and capability gaps with respect to the current program; (3) a specification of medical equipment or upgrades needed to enhance the current program; (4) a specification of aircraft equipment or upgrades needed to enhance the current program; (5) a description of the advantages and disadvantages of the current program compared to the advantages and disadvantages of the former program; (6) a cost comparison analysis of the current program compared to the former program; and (7) a description of the manner in which customer feedback is obtained and applied to the current program.

The conferees agree that transitioning from a dedicated aircraft aeromedical evacuation (AE) program to a designated aircraft AE program is not without challenges, some of which are annotated in the Senate report accompanying S. 1042 (S. Rept. 109–69) of the National Defense Authorization Act for Fiscal Year 2006. Therefore, the conferees encourage the Secretary to address in the report all challenges and capability gaps related to the designated aircraft AE program and to outline explicitly the manner in which those challenges and capability gaps will be resolved. Furthermore, if the Secretary determines from the results of the report that dedicated AE aircraft are needed to augment the current AE program, the conferees encourage the Air Force to consider basing those aircraft at locations that have previous expertise in performing the dedicated aircraft AE mission.

Subtitle E—Joint and Multiservice Matters

Requirement that tactical unmanned aerial vehicles use specified standard data link (sec. 141)

The House bill contained a provision (sec. 141) that would direct the Secretary of Defense to ensure that all service tactical unmanned aerial vehicles (UAV) be equipped with the standard tactical UAV data link known as the Tactical Common Data Link (TCDL) and configured to data formats consistent with the architectural standard for tactical UAVs, known as STANAG 4586. The provision would not allow the Department of Defense to expend funds on tactical UAVs that do not include the TC DL or STANAG 4586 standards. Finally, the provision would direct the secretary of each military department to submit a report to Congress providing the Secretary's certification as to whether or not all tactical UAVs are in compliance with the standard data link.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the House provision by providing the Undersecretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) with the authority to waive the standards directed in this provision, if the USD(AT&L) determines and certifies to the congressional defense committees that it would not be technologically feasible or economically acceptable to integrate a tactical data link into a specific tactical UAV.

The conferees understand that there is a class of UAVs, such as the Marine Corps Dragon Eye UAV and the Army Raven UAV, that are not large enough to carry the equipment required to integrate the TCDL standard. The conferees believe that the TCDL standard should be applied to all UAVs to the maximum extent possible.

Limitation on initiation of new unmanned aerial vehicle systems (sec. 142)

The House bill contained a provision (sec. 142) that would preclude procurement of new unmanned aerial vehicle (UAV) systems by the military services without the written approval of the Under Secretary of Defense for Acquisition, Technology and Logistics (USD(AT&L)).

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would exempt UAV programs under contract as of the date of enactment of this Act or for which funds have been appropriated for procurement before the date of enactment of this Act from the requirement to have written approval from the USD(AT&L).

Advanced SEAL Delivery System (sec. 143)

The Senate amendment contained a provision (sec. 151) that would direct no amount of the \$71.7 million authorized to be appropriated for advance procurement of the Advanced SEAL Delivery System (ASDS) in fiscal year 2006 be expended until after a favorable Milestone C decision.

The House bill contained no similar provision.

The House recedes with a clarifying amendment that would restructure the program. On 22 November 2005, the U.S. Special Operations Command (SOCOM) announced and briefed the conferee's staff on a decision to restructure the ASDS program. The restructuring would focus on improving the reliability of the first boat, which was delivered to the Navy in June 2003. The ASDS Reliability Action Panel, comprised of government and industry technical experts, recommended restructuring the program.

The conferees commend the decision by SOCOM to focus on developing an operationally reliable first boat. The conferees have expressed their concern about technical challenges, contractor performance, and cost growth that have occurred in the ASDS program for several years, and have urged SOCOM, the Department of the Navy, and the Secretary of Defense to take a stronger management role with regard to the program.

The original program budget request has been reduced by \$32.0 million. The restructuring reallocates an additional \$21.0 million to research and development, an additional \$10.1 million to

operations and maintenance, and a reduction of \$63.0 million in procurement. The conferees agree to authorize the restructured program, with some modifications. Although the restructured budget request included \$11.0 million to fabricate and test one set of universal pylons for use on the *Virginia*-Class and *Ohio*-Class SSGN submarines, the conferees believe this is premature as the command expects the critical system review of the boat to take at least 1 year.

In addition, the conferees are not confident that the command will be able to conduct the additional field testing for the first boat now planned for fiscal year 2006. Therefore, the conferees direct that no amount of the \$10.1 million increase in operation and maintenance funds authorized to be appropriated be obligated or expended until the Secretary revalidates to the congressional defense committees the requirement for the ASDS.

The conferees further direct the Secretary to submit a report on the conclusions of the Quadrennial Defense Review concerning the ASDS; the number of boats required and the manner of their employment; an updated cost estimate for the ASDS program; and a timeline for addressing the technological challenges faced by the program by March 1, 2006. Furthermore, the conferees direct that the Secretary report the conclusions of the ongoing critical systems review being conducted by the command to the congressional defense committees by January 1, 2007.

LEGISLATIVE PROVISIONS NOT ADOPTED

Authorization of two additional Arleigh Burke-class destroyers

The House bill contained a provision (sec. 125) that would authorize \$2.5 billion in Shipbuilding and Conversion, Navy, for the construction of two additional *Arleigh Burke*-class destroyers, which would be constructed under a single, competitively awarded contract.

The Senate amendment contained no similar provision.

The House recesses.

The outcome is reflected in the tables of this report in Shipbuilding and Conversion, Navy, line 14.

C-37B aircraft

The Senate amendment contained a provision (sec. 138) that would authorize an increase of \$45.0 million for the procurement of one C-37B aircraft for the Air Force.

The House bill contained no similar provision.

The Senate recesses.

The conference outcome is reflected in the tables of this report in Aircraft Procurement, Air Force, line number 36.

Contingent transfer of additional funds for CVN-21 carrier replacement program

The House bill contained a provision (sec. 129) that would direct the transfer of \$86.7 million from Operations and Maintenance, Defense-wide, to Shipbuilding and Conversion, Navy, for the purpose of accelerating the CVN-21 aircraft carrier replacement program. The provision would direct this transfer only if the Direc-

tor, Program Analysis and Evaluation, of the Department of Defense, certifies that this addition of \$86.7 million would allow the construction of CVN-21 to begin in fiscal year 2007, and would be limited to those amounts appropriated for fiscal year 2006.

The Senate amendment contained no similar provision.

The House recedes.

Contract requirement for Objective Individual Combat Weapon—increment one

The House bill contained a provision (sec. 116) that would require the Secretary of the Army to ensure that the contractor for the Objective Individual Combat Weapon—increment one (OICW-1) is selected through a full and open competition.

The Senate amendment contained no similar provision.

The House recedes.

The conferees understand that the Army has terminated the existing competition and requests for proposal (RFP) for the OICW-1 program until further review by the Joint Requirements Oversight Council (JROC). The conferees are aware the JROC expects to convene to complete the Joint Capabilities Integration and Development System process for the OICW-1 capability development document sometime in fiscal year 2006 to be followed by an RFP that reflects OICW-1 requirements. The conferees expect that any new competition for the OICW program be conducted in a fair and open manner. Upon completion of the review by the JROC, the conferees direct the Secretary of the Army to submit a detailed report, to the congressional defense committees, that would outline the path forward for the OICW program. The report should include: (1) the planned acquisition strategy in meeting any new requirements as set forth by the JROC; (2) the cost and schedule impacts, if any, to the OICW—increment two and three programs based on validated JROC requirements; and (3) the results of analysis of alternatives used in the JROC and Army's decision-making process.

Rapid intravenous infusion pumps

The Senate amendment contained a provision (sec. 125) that would authorize \$1.0 million for the procurement of rapid intravenous pumps for the Marine Corps.

The House bill contained no similar provision.

The Senate recedes.

The conference outcome is reflected in the tables elsewhere in this report in Procurement, Marine Corps, line number 78.

Second source for production and supply of tires for the Stryker combat vehicle

The Senate amendment contained a provision (sec. 116) that would require the Secretary of the Army to conduct a study on the feasibility and costs and benefits for the second source for the production and supply of tires for the Stryker combat vehicle.

The House bill contained no similar provision, but did contain funding in Procurement of Weapons and Tracked Combat Vehicles, Army, to qualify a second source for the production and supply of tires for the Stryker combat vehicle.

The Senate recedes.

The conferees recognize that tires are currently the highest sustainment demand item for the Stryker. The majority of tire failures are being caused by wear-out from high operational tempo; from increased pressure due to the weight associated with the addition of Slat add-on armor for protection against rocket propelled grenades; and damage from improvised explosive devices attacks. The conferees direct the Secretary of the Army to submit a report to the congressional defense committees, no later than 90 days after the enactment of this Act, that would evaluate Stryker tire availability and the need, if any, to qualify a second source for the tires of the Stryker vehicle.

UH-60 Black Hawk helicopter procurement in response to attrition

The Senate amendment contained a provision (sec. 105) that would authorize \$40.6 million for the procurement of two additional helicopters that were attrited in fiscal year 2006.

The House bill contained no similar provision.

The Senate recesses.

The conference outcome is reflected in the tables of this report in Aircraft Procurement, Army, title XV.

Use of Tanker Replacement Transfer Fund for modernization of aerial refueling tankers

The Senate amendment contained a provision (sec. 132) that would allow funds in the Tanker Replacement Transfer Fund to be used for the modernization of existing aerial refueling tankers, in addition to using the funds for a tanker acquisition program, if the modernization of those aircraft is consistent with the results of the analysis of alternatives for meeting the aerial refueling requirements of the Air Force.

The House bill contained no similar provision.

The Senate recesses.

TITLE II—RESEARCH, DEVELOPMENT, TEST, AND
EVALUATION

Research, Development, Test, and Evaluation overview

The budget request for fiscal year 2006 included an authorization of \$69,356.0 million in Research and Development for the Department of Defense.

The House bill would authorize \$69,469.0 million.

The Senate amendment would authorize \$69,840.6 million.

The conferees recommend an authorization of \$70,199.9 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Advanced submarine system development

The budget request included \$163.0 million in PE 63561N for advanced submarine system development. Of this amount, \$50.0 million is for the design of a future undersea superiority system.

The House bill would authorize the budget request.

The Senate amendment would authorize \$123.0 million in PE 63561N, a decrease of \$40.0 million since no specific plans on the use of these funds had been provided to the committee.

The conferees agree to authorize \$163.0 million in PE 63561N, the budget request. The Navy has provided a detailed plan on the use of these funds. The objectives of this plan include: (1) reduce long-term costs in the construction of Virginia-class submarines; (2) perform ship concept studies; (3) perform independent studies of the submarine design and build base; and (4) identify submarine construction cost drivers and develop improved submarine cost models. The conferees would expect that the funds authorized for the undersea superiority system would be used in a manner consistent with the plan that was presented.

*Air Force**Research, Development, Test, and Evaluation, Air Force overview*

The budget request for fiscal year 2006 included an authorization of \$22,612.4 million in Research Development, Test, and Evaluation, Air Force for the Department of Defense.

The House bill would authorize \$22,418.2 million.

The Senate amendment would authorize \$22,653.6 million.

The conferees recommend an authorization of \$22,305.0 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Transformational satellite communications

The budget request included \$835.8 million in PE 63845F for transformational military satellite communications (TSAT).

The House bill would authorize \$435.8 million in PE 63845F, a decrease of \$400.0 million.

The Senate amendment would authorize \$635.8 million in PE 63845F, a decrease of \$200.0 million.

The conferees agree to authorize \$435.8 million in PE 63845F, a decrease of \$400.0 million for the TSAT program.

The conferees would like to be clear that the reduction to the amount requested for the TSAT program should not be construed as a lack of support for the program, but rather a reflection of continuing concerns related to the TSAT acquisition approach. Several independent reviews of the TSAT program, some prompted by Congress, provide reason to believe the TSAT program can, with proper attention, avoid the pitfalls of so many prior military space programs including schedule delays, cost overruns, and poor management.

The October 20, 2005 report of the TSAT Program Review Group, chaired by Mr. Tom Young, complimented the TSAT program both for its comprehensive risk reduction program focused on critical technologies, and for efforts to assure that final requirements are executable and consistent with program resources. Of continuing concern to the group, however, was that the TSAT program office was inadequately staffed in terms of the number of experienced people, program cost estimates appeared to be unrealistic, and system requirements needed substantial additional refinement. Similarly, the Government Accountability Office, in its September 7, 2005, briefing to congressional staff on TSAT, found there to be “no fundamental discoveries or breakthroughs required for TSAT, but the level of difficulty in integrating these technologies is an unknown.”

According to Air Force estimates, the \$400.0 million reduction to the TSAT program recommended by the conferees will result in a delay to the systems design review and authority to proceed by 1 year. The conferees believe this schedule adjustment could help mitigate program risk by allowing time for the integration of critical technologies, refinement of requirements, and allow the TSAT program office time to get fully staffed. The conferees also emphasize the importance of risk reduction and system engineering efforts up front and strongly urge the Air Force to ensure adequate support for these efforts. With these changes, the TSAT program has the opportunity to be the first military space program in a decade to meet mission requirements within budget and on schedule.

The conferees assessed the need to direct the Department of Defense to acquire a fourth Advanced Extremely High Frequency (AEHF) space vehicle, and have decided to continue with the current planned program. The decision resulted from the conclusion that the planned constellation will provide protected communications until 2017. The launch of the first TSAT is expected in 2015 and provides a 2 year margin to mitigate against any additional unexpected delays to TSAT. However, the conferees direct the Secretary of Defense, as required in section 912, to prepare alternatives should the current margin disappear, and to identify when

acquisition of an additional AEHF would have to be initiated to avoid a break in production.

Space Radar

The budget request included \$225.8 million in PE 63858F for Space Radar.

The House bill would authorize \$100.0 million in PE 63858F, a decrease of \$125.8 million.

The Senate amendment would authorize \$150.8 million in PE 63858F, a decrease of \$75.0 million.

The conferees agree to authorize \$100.0 million in PE 63858F, a decrease of \$125.8 million.

The conferees direct that fiscal year 2006 program funds be invested in the demonstration of the following:

- (1) ground exploitation capability;
- (2) horizontal integration;
- (3) continued radar technology maturation; and
- (4) new technology breakthroughs that will lower the payload weight and cost.

The conferees recommend that the Air Force thoroughly plan a demonstration program maximizing the use of ground, airborne, and existing space assets before committing to the new development of a subscale spacecraft. The conferees direct the Secretary of the Air Force, in coordination with the Director of the National Geospatial Intelligence Agency and the Director of the National Reconnaissance Office, to develop and submit a report to the congressional defense committees and congressional intelligence committees by March 15, 2006. The report should cover fiscal years 2006 through 2010 and include a detailed space radar program plan that would incorporate the above direction and focus on: (1) risk reduction, modeling, and simulation; (2) ground and air demonstrations and tests; and (3) the use of all planned or existing space assets. The Space Radar program plan, as reported to Congress, should provide annual technical and cost milestones that if met will provide confidence in a technically feasible and affordable program plan for space radar.

The nation requires a radar capability, and its users will have little concern about which platform collects the data. The conferees believe that the future success and stability of the space radar program rests in the demonstration, development, and deployment of a national radar capability consisting of fully integrated space, air, and surface components. As such, the conferees direct the Secretary of Defense and the Director of National Intelligence to perform a detailed national utility study; develop a joint concept of operations for a future horizontally integrated radar capability highlighting the use of the suggested components; and submit a report to the congressional defense committees and congressional intelligence committees by November 1, 2006, on the utility study and the concept of operations.

Additional direction is contained in the classified annex to this report.

Penetrator study

The budget request included no funding in PE 64327F for the Hard and Deeply Buried Target Defeat system.

The House bill would authorize an increase of \$4.0 million in PE 64327F for a penetrator study.

The Senate amendment contained no similar authorization.

The conferees agree to authorize \$4.0 million in PE 64327F to conduct a sled test and a study on the physics of penetrating geologic media, to be completed by the end of fiscal year 2006.

E-8C joint surveillance and target attack radar system reengining

The budget request included \$15.5 million in aircraft procurement for E-8C joint surveillance and target radar system (JointSTARS) modifications and \$78.1 million for JointSTARS research and development, but included no funding for reengining of the JointSTARS aircraft fleet.

The House bill would authorize the budget request.

The Senate amendment would authorize the budget request for research and development, and an increase of \$44.4 million in aircraft procurement to complete the non-recurring engineering (NRE) activities required to initiate a reengining program for the E-8C aircraft fleet.

The conferees agree to authorize the budget request in aircraft procurement, and an increase of \$13.5 million in research and development, as included in the Air Force Chief of Staff's unfunded priority list for fiscal year 2006, to begin the NRE activities required to initiate a reengining program for the E-8C aircraft fleet. The conferees encourage the Secretary of the Air Force to complete funding of the NRE in the fiscal year 2007 budget request.

The conferees note that in January 2005 the Under Secretary of Defense for Acquisition, Technology, and Logistics announced the Department of Defense's intent to request quotes from industry on the costs to purchase or lease new engines and understand that the Department has completed evaluation of these quotes. If leasing new engines is the recommended alternative, the conferees expect the Secretary of the Air Force to propose an appropriate leasing arrangement that complies with the Office of Management and Budget guidance to implement this recommendation.

Defense-wide

Research, Development, Test, and Evaluation, Defense-wide overview

The budget request for fiscal year 2006 included an authorization of \$18,803.4 million in Research, Development, Test, and Evaluation, Defense-wide for the Department of Defense.

The House bill would authorize \$19,092.8 million.

The Senate amendment would authorize \$18,868.3 million.

The conferees recommend an authorization of \$19,108.9 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Ballistic missile defense

The budget request included \$7.8 billion for the Missile Defense Agency for ballistic missile defense.

The conferees agree to authorize \$7.8 billion for ballistic missile defense.

The conferees note that while fully funding the budget request level for missile defense, funds were reallocated from longer-term efforts in order to enhance the testing, fielding, and improvement of the current generation of missile defense capabilities. The conferees believe the most important mission for the Missile Defense Agency (MDA) at this time is to successfully develop, field, and improve those initial capabilities selected for deployment by the President in December 2002, including: ground-based interceptors, sea-based interceptors, additional Patriot (PAC-3) units, and sensors based on land, sea, and in space. The conferees direct the Director of the Missile Defense Agency to provide a report to the congressional defense committees by January 30, 2006, indicating specifically how the increases noted below will be allocated.

Ground-based midcourse defense

The budget request included \$2.3 billion in PE 63882C for the ground-based midcourse defense (GMD) segment.

The House bill would authorize an increase of \$125.0 million in PE 63882C for the GMD segment.

The Senate amendment would authorize an increase in \$100.0 million in PE 63882C for the GMD segment.

The conferees agree to authorize \$2.4 billion in PE 63882C for the GMD segment, an increase of \$100.0 million.

The conferees direct that this increase be used for implementing the recommendations of the Independent Review Team and the Mission Readiness Task Force to enhance the GMD testing program.

Aegis ballistic missile defense

The budget request included \$836.0 million in PE 63882C for Aegis ballistic missile defense (BMD).

The House bill would authorize an increase of \$45.0 million in PE 63882C for Aegis BMD.

The Senate amendment would authorize an increase of \$75.0 million in PE 63882C for Aegis BMD.

The conferees agree to authorize \$911.0 million in PE 63882C for Aegis BMD, an increase of \$75.0 million.

The conferees direct this increase be used for the following activities: (1) enhanced development and production of the Aegis BMD signal processor; (2) purchase of additional test equipment necessary to accelerate SM-3 production rates; (3) accelerated integration of the two-color seeker for the SM-3 kill vehicle; (4) long-lead funding for additional SM-3 missiles; (5) development of the throttleable divert and attitude control system; and (6) accelerated implementation of the engage-on-remote and launch-on-remote upgrades.

Ballistic missile defense system interceptor

The budget request included \$229.7 million in PE 63886C for the ballistic missile defense (BMD) system interceptor.

The House bill would authorize the budget request.

The Senate amendment would authorize a decrease of \$50.0 million in PE 63886C for the BMD system interceptor.

The conferees agree to authorize \$179.7 million in PE 63886C, a decrease of \$50.0 million for the BMD system interceptor.

The conferees are aware that the Kinetic Energy Interceptor (KEI) program has been restructured by the MDA to serve as risk mitigation for the primary boost-phase missile defense system, the Airborne Laser (ABL). As such, the conferees believe the funding request for KEI to be excessive and recommend remaining funds be directed toward reducing high-risk technology challenges. By continuing to address these technology challenges, the KEI program can remain in a position to become the focus of MDA boost-phase efforts should the ABL program fail to perform as expected.

Tactical exploitation of innovative sensors

The budget request included no funding for a joint program between the Naval Air Systems Command (NAVAIR) and the National Geospatial-Intelligence Agency (NGA) to support experimentation with innovative sensors in a tactical environment. The NAVAIR and the NGA have decided that a partnership to accelerate development and fielding of transformational capabilities to both the NGA and the Navy Department would be beneficial.

The House bill would authorize an increase of \$15.0 million in PE 35102BQ to support this program.

The Senate amendment would authorize the budget request.

The conferees agree to authorize the budget request.

However, the conferees view this program as a promising start for accelerating development and fielding on innovative sensors for supporting tactical operations. The conferees support this partnership as part of a broader effort to improve collection, tasking, processing, exploitation, and dissemination activities for enhancing support to such operations. Therefore, the conferees urge the NGA and the NAVAIR to continue this collaboration and expand their efforts to additional concept developments.

Test and Evaluation

Operational Test and Evaluation, Defense overview

The budget request for fiscal year 2006 included an authorization of \$168.5 million in Operational Test and Evaluation, Defense for the Department of Defense.

The House bill would authorize \$168.5 million.

The Senate amendment would authorize \$168.5 million.

The conferees recommend an authorization of \$168.5 million.

Unless noted explicitly in the statement of managers, all changes are made without prejudice.

ITEMS OF SPECIAL INTEREST

Fuel Cell Vehicles

The conferees are aware that the Army's National Automotive Center has taken steps to develop and deploy fuel cell powered vehicles as a means to increase fuel efficiency, minimize thermal and noise signature, and provide mobile power on the battlefield. The conferees further understand that the Army is developing fuel cell powered vehicles to support special operations missions. The conferees direct the Army to provide the Committees on Armed Services of the Senate and of the House of Representatives with a progress report on the development and deployment of these vehicles no later than April 1, 2006.

Joint Service Combat Feeding Technology

The conferees note that the Joint Service Combat Feeding Technology Demonstration program matures and demonstrates advanced techniques for the preparation and processing of combat rations. The conferees note that this research effort supports the goals of Army transformation by working to develop combat feeding technology with the potential to reduce logistics burdens, while improving the quality of food service for deployed troops. The conferees urge the Department of Defense to continue to adequately support research efforts in this area.

Report on naval surface fire support

The conferees are concerned about whether sufficient capability for naval surface fire support exists to support joint operations. The conferees direct the Secretary of the Navy to submit a report to the congressional defense committees no later than April 1, 2006, on the Navy's capabilities to meet the joint force requirement for naval surface fire support. The conferees would expect the Secretary to take into account, in the preparation of this report, the views and recommendations of the Chief of Naval Operations and the Commandant of the Marine Corps, and direct the Secretary to include these written views and recommendations as attachments to the report. At a minimum, the report will include: (1) an analysis of the current capability to support expeditionary operations in the littorals with existing naval surface fire support; (2) a discussion of the alternatives available, including known research and development projects, to maintain or increase naval surface fire support capabilities within the future years defense program (FYDP), and within the 10 years following the FYDP; and (3) an estimate of the resources that would be required to accelerate promising near-term technologies that would enhance naval surface fire support.

Slow rotor concept

The conferees are aware of preliminary efforts to develop a heavy-lift, long-range, high-speed aircraft capable of operating from unimproved locations. The conferees encourage the Army to assess the value of slow rotor concepts, which could improve logistics and flexible basing options in support of combat operations.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations

Authorization of appropriations (sec. 201)

The House bill contained a provision (sec. 201) that would authorize the recommended fiscal year 2006 funding levels for the Research, Development, Test, and Evaluation accounts for the Army, Navy, Marine Corps, Air Force, Defense-wide activities, and the Director of Operational Test and Evaluation.

The Senate amendment contained a similar provision (sec. 201).

The conference agreement includes this provision.

Amount for defense science and technology (sec. 202)

The House bill contained a provision (sec. 202) that would authorize \$11,436.6 million for defense science and technology (S&T) programs.

The Senate amendment contained a similar provision (sec. 202) that would authorize \$10,990.6 million for defense S&T programs.

The conferees agree to authorize \$11,363.0 million for S&T programs, an increase of \$840.9 million over the budget request.

The conferees are aware of recent studies on the role of basic science, and particularly defense basic research, in maintaining U.S. competitiveness and national security. The conferees have authorized an increase of over \$75.0 million for defense basic research, including an increase of \$10.0 million for the Science, Mathematics, and Research for Transformation scholarship program and \$30.0 million for competitively-awarded university research programs within the military departments and computer science programs at DARPA.

Subtitle B—Program Requirements, Restrictions, and Limitations

Annual Comptroller General report on Future Combat Systems program (sec. 211)

The House bill contained a provision (sec. 211) that would establish an annual review of the Future Combat Systems program by the Comptroller General to be submitted to the congressional defense committees by March 15 of each year.

The Senate amendment contained no similar provision.

The Senate recesses.

Contract for the procurement of the Future Combat System (FCS) (sec. 212)

The Senate amendment contained a provision (sec. 211) that would direct the Secretary of the Army to procure the Future Combat System through a contract under part 15 of the Federal Acquisition Regulation, rather than through a transaction under section 2371 of title 10, United States Code.

The House bill contained no similar provision.

The House recesses.

Limitations on systems development and demonstration of manned ground vehicles under Armored Systems Modernization program (sec. 213)

The House bill contained a provision (sec. 213) that would require the Secretary of Defense to complete an independent analysis and to submit a report to the congressional defense committees by February 1, 2006, on the Future Combat Systems (FCS) key performance parameter transportability requirement for the manned ground vehicles (MGV). The House bill also contained a provision (sec. 215) that would prohibit the use of any funds for MGV systems development and demonstration (SDD) until the objective requirements for those vehicles with respect to lethality and survivability have been met and demonstrated in a relevant environment to be at least equal to the lethality and survivability for the MGV to be replaced by such ground vehicles.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would limit funds available for the MGV SDD until the following is provided to the congressional defense committees:

(1) The Secretary of Defense certifies that the threshold requirements for MGV variants with respect to lethality and survivability have been met and demonstrated, in accordance with applicable regulations, in a relevant environment to be at least equal to the lethality and survivability for the MGV to be replaced by those variants;

(2) the Secretary of Defense submits the results of an independent analysis carried out with respect to the transportability requirement for the MGV under the FCS program;

(3) the Under Secretary of Defense for Acquisition, Technology, and Logistics submits the results of an independent cost estimate, prepared by the cost analysis improvement group of the Office of the Secretary of Defense, with respect to the FCS program;

(4) the Secretary of the Army submits a report containing the organizational design, quantities, and fielding plans for each of the current force brigade combat teams and FCS brigade combat teams; the research, development, test, and evaluation and procurement plan; and budgets for each of the FCS MGV variants; and

(5) the Secretary of Defense submits a report describing and evaluating the requirements and budgets of the Army technology insertion program for integrating FCS capabilities into the current force.

With regard to the certification of the threshold requirements for the survivability and lethality of the FCS MGV, the conferees believe that the Secretary of Defense should be able to demonstrate those capabilities in accordance with applicable regulations, to include, but not limited to, using modeling and simulation. The conferees expect the Secretary of Defense to include the views of the Chief of Staff of the Army in the report on his certification to Congress.

Separate program elements required for significant systems development and demonstration projects for Armored Systems Modernization program (sec. 214)

The House bill contained a provision (sec. 214) that would specify the amount authorized for appropriation in section 201 for the Armored Systems Modernization program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would (1) direct the Secretary of Defense to ensure that, beginning with the fiscal year 2008 budget submission, a separate, dedicated program element is assigned to each of the systems development and demonstration (SDD) projects of the Armored Systems Modernization; (2) direct the Secretary of the Army to submit, beginning with the fiscal year 2007 budget submission, budget justification material for the SDD projects of the Armored Systems Modernization program as if the projects were separate program elements; (3) direct the Secretary of the Army to submit to the congressional defense committees not later than June 1, 2006, a report describing the manner in which the costs of integrating Future Combat Systems (FCS) capabilities into the current force could be assigned to a separate program element; and (4) submit budget justification material for the insertion of FCS capabilities into the current force under the Armored Systems Modernization program.

Initiation of program to design and develop next-generation nuclear attack submarine (sec. 215)

The House bill contained a provision (sec. 217) that would require the Secretary of the Navy to carry out a program to design and develop a class of submarines that would serve as a successor to the *Virginia*-class. The objective of the provision would be to develop a submarine with capabilities meeting or exceeding those of the *Virginia*-class at a dramatically lower cost, with procurement commencing in fiscal year 2014. The provision would require the Secretary to submit a report on this program, with the submission of the budget request for fiscal year 2007, that would include: (1) an outline of the management approach to be used in executing the program; (2) the goals for the program; and (3) a schedule for the program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to initiate a cost-effective program to improve the capability of the next-generation nuclear attack submarine. The amendment states that the objective of the program may be met either by establishing a separate and independent design and development effort or by incorporating new technologies into the planned fleet of *Virginia*-class submarines. The amendment would also require the Secretary to recommend a schedule for the program, but would remove the requirement for the program to begin procurement in fiscal year 2014.

Extension of requirements relating to management responsibility for naval mine countermeasures programs (sec. 216)

The House bill contained a provision (sec. 218) that would amend section 216 of the National Defense Authorization Act for

Fiscal Years 1992 and 1993 (Public Law 102–190; Public Law 102–484), as most recently amended by section 212 of the Bob Stump National Defense Authorization Act for Fiscal Year 2003 (Public Law 107–314). The provision would extend the requirement for the reporting on the naval mine countermeasures programs from 2008 until 2011, and make certain other changes to the management of, and reporting on, the program. The provision would also require the Secretary of Defense to submit a plan for the sustainment of the MHC–51–class mine countermeasures ship and supporting dedicated mine countermeasures systems until the Littoral Combat Ship (LCS) and next generation mine countermeasures systems are deployed.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would remove the requirement for sustainment of the MHC–51 mine countermeasures vessels until the LCS and next generation mine countermeasures systems are deployed. Instead, the amendment would prohibit the Secretary of the Navy from decommissioning any vessel of the MHC–51 mine countermeasures class before the end of its service life, until 30 days after submitting a report on existing capabilities to assume the MHC–51 mission, and certifying that the capabilities of the MHC–51 mine countermeasures class are no longer required.

Single set of requirements for the Army and Marine Corps heavy lift rotorcraft program (sec. 217)

The House bill contained a provision (sec. 219) that would prohibit a new program start for a heavy lift helicopter until the Secretary of the Army and the Secretary of the Navy develop a single, common Joint Heavy Lift (JHL) requirement approved by the Joint Requirements Oversight Council (JROC) and the Secretary of Defense.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would exclude the CH–53X Heavy Lift Replacement (HLR) program from the requirement for a single set of requirements for a heavy lift helicopter. The conferees agree that the Army and Marine Corps should jointly develop any next generation heavy lift helicopter and that the foundation of any such program must focus on a single, joint requirement validated by the JROC and approved by the Secretary of Defense. However, the conferees also understand that the Army's JHL concept is centered on a rotorcraft capable of lifting a Future Combat System platform, while the Marine Corps' HLR program is intended as a CH–53E replacement.

Requirements for development of tactical radio communications systems (sec. 218)

The House bill contained a provision (sec. 220) that would direct the Secretary of Defense to provide a comprehensive report on the immediate requirements for tactical radio communications and whether these requirements may be satisfied with the purchase of legacy radios. The provision would require that the Secretary ensure that Department of Defense (DOD) users rapidly acquire tactical radio communications utilizing existing technologies or ma-

ture systems readily available in the commercial marketplace; and apply DOD Instruction 5000.2 to the Joint Tactical Radio System (JTRS) in a manner that does not permit the Milestone B entrance requirements to be waived. The provision would also give the JTRS Joint Program Executive Officer (JPEO) the authority and control of execution year research and development funding for all the clusters and the waveform developments for JTRS.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to submit the comprehensive report, as required by the House provision, and apply DOD Instruction 5000.2 to the JTRS program unless the Secretary certifies that the Department is unable to meet critical national security objectives. The amendment would also require the head of the JPEO to certify the JTRS program of each of the services and submit a report, no later than May 1, 2006, through the Secretary, to the congressional defense committees, on the adequacy of the proposed JTRS budget and the actions taken to address any inadequacies in the proposed JTRS budgets.

The conferees have supported the JTRS program in the past, although the conferees have questioned the JTRS program structure and the inability of the Department to deliver a software programmable radio. The conferees endorse the designation of a JPEO for the JTRS program, and believe that the JPEO should have the authority to successfully manage a program of this size and cost, once the JTRS program is reevaluated and restructured by the Secretary. In the interim, the conferees agree that the JTRS JPEO should review and certify the current and proposed service JTRS budgets to ensure the programs can meet the requirements of the combatant commanders. Although the conferees encourage the Department to procure legacy radios, the conferees also believe that interim radio communication capabilities should be evolutionary and be able to transition to the long-term system solution with maximum hardware and software reuse.

Limitation on systems development and demonstration of personnel recovery vehicle (sec. 219)

The House bill contained a provision (sec. 221) that would prevent the expenditure of funds for systems development and demonstration of the Personnel Recovery Vehicle (PRV) until 30 days after the Secretary of Defense submits to the congressional defense committees a certification that the requirements and schedule for the PRV have been validated by the Under Secretary of Defense for Acquisition, Technology, and Logistics. The provision would also require the Secretary to certify that all technologies required for the PRV are mature and demonstrated in a relevant environment, and that no other aircraft, or modification of an aircraft, in the Department of Defense can meet the requirements of the PRV. Finally, the provision would require the Secretary to provide a statement setting forth the independent cost estimate and manpower estimate for the PRV.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would allow the expenditure of no more than 40 percent of the funds made avail-

able for systems development and demonstration of the PRV pending the submission of a certification by the Secretary that the Joint Requirements and Oversight Council has validated the requirement for the PRV program and that the Under Secretary of Defense for Acquisition, Technology, and Logistics has validated the acquisition schedule. The amendment would also require the Secretary to provide an explanation of the reasons why the chosen PRV system would be more effective or less expensive in terms of total life-cycle costs in the event the Department chooses a PRV system not in the Department's inventory.

Limitation on VXX helicopter program (sec. 220)

The House bill contained a provision (sec. 227) that would limit the obligation of research, development, test, and evaluation funds, or procurement funds, for acquisition of pilot production helicopters for the VXX helicopter program until the Secretary of the Navy certifies to the congressional defense committees that the results of the tests conducted by the fleet of test article helicopters for the VXX program demonstrate that VXX helicopters in the VXX mission configuration can be produced without significant further design modification.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would withhold 25 percent of the amount authorized to be appropriated for the system development and demonstration of the VXX helicopter until the Secretary of the Navy submits to the congressional defense committees an event-driven acquisition strategy for increment two of the VXX program that includes the completion of at least one phase of operational testing on production representative test vehicles before the initiation of aircraft production. The provision would require that the acquisition strategy be developed by the Secretary of the Navy in coordination with the Director of Operational Test and Evaluation of the Department of Defense.

The conferees strongly support the VXX program, but believe that the current program schedule for concurrent development and production of both three test articles and pilot production helicopters includes too much risk. The conferees understand that existing EH-101 test vehicles are engaged in flight activities, including engine upgrade certification tests, pilot training, mission profile evaluation, and communications suite test and evaluation. The conferees also understand that increment one pilot-production aircraft will be utilized for specific communications, mission systems, and survivability testing; and the procurement and testing of pilot-production aircraft in 2006 will help reduce the risk in increment two. The conferees believe that it would be prudent for the Department of the Navy to develop an event-driven acquisition strategy that includes (1) a list of the critical technologies required for the production and operation of increment two aircraft for the VXX executive helicopter program; (2) a schedule that accepts no more than moderate risk in either cost or schedule for the demonstration and test of each critical technology listed in the event-driven acquisition strategy; (3) a description of the event-based decision points and associated decision criteria that will occur before the initiation of production of increment two aircraft; (4) a description of a proposed

operational evaluation using production representative test vehicles to occur before the initiation of production of increment two aircraft; and (5) an evaluation of the acquisition strategy provided by the Director of Operational Test and Evaluation of the Department of Defense.

Report on testing of Internet Protocol version 6 (sec. 221)

The House bill contained a provision (sec. 216) that would mandate the testing of Internet Protocol version 6 (IPv6) by the Naval Research Laboratory.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Chairman of the Joint Chiefs of Staff to certify the adequacy of the IPv6 network. The amendment would also require the Director of Operational Test and Evaluation be responsible for the oversight of the test program. The amendment would further require the Department to submit annual reports to the congressional defense committees.

The conferees note that the recently released IPv6 Master Test Plan details a testing plan that consolidates and coordinates all planned IPv6 related testing activities across the Department to ensure that the highest priority testing requirements are addressed. The conferees direct the Department to ensure that this testing is done in an independent, systematic manner and includes rigorous, realistic, end-to-end testing of IPv6. The conferees note that the Naval Research Laboratory's Global Information Grid Evaluation Facility can perform a significant amount of this mandated testing in an effective and independent manner and should be utilized accordingly.

The conferees are also concerned that the Department has not adequately estimated the costs for the transition of Department systems to IPv6 and therefore has not budgeted for these costs. The conferees note that the Department did not include the overall cost estimates required by section 331 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) in the IPv6 Transition Plan, although the plan did note that "the availability of 'new' dollars to support IPv6 transition is not expected." Therefore, the conferees direct the Director of the Congressional Budget Office to provide a realistic estimate by service and agency for the cost of completing the conversion of Department systems to IPv6, and report the results to the congressional defense committees no later than January 1, 2007.

Subtitle C—Missile Defense Programs

Report on capabilities and costs for operational boost/ascent-phase missile defense systems (sec. 231)

The House bill contained a provision (sec. 231) that would require the Secretary of Defense to conduct an assessment of the missile defense programs, which are designed to protect against boost/ascent-phase ballistic missile attacks, and to submit a report to the congressional defense committees by October 1, 2006.

The Senate amendment contained no similar provision.

The Senate recedes.

One-year extension of Comptroller General assessments of ballistic missile defense programs (sec. 232)

The Senate amendment contained a provision (sec. 221) that would extend until fiscal year 2007 the requirement for the Comptroller General to provide an assessment of ballistic missile defense programs.

The House bill contained no similar provision.

The House recesses.

Fielding of ballistic missile defense capabilities (sec. 233)

The Senate amendment contained a provision (sec. 222) that would authorize the use of funds, authorized to be appropriated for fiscal year 2006 or 2007 for research, development, test, and evaluation for the Missile Defense Agency, for the development and fielding of ballistic missile defense capabilities.

The House contained no similar provision.

The House recesses with a technical amendment.

Plans for test and evaluation of operational capability of the ballistic missile defense system (sec. 234)

The Senate amendment contained a provision (sec. 223) that would direct the appropriate operational test and evaluation components of the Department of Defense, in coordination with the Missile Defense Agency, to prepare a plan to test, evaluate, and characterize the operational capability of each block of the missile defense system.

The House bill contained no similar provision.

The House recesses with a technical amendment.

Subtitle D—High-Performance Defense Manufacturing Technology Research and Development

High-performance defense manufacturing technology research and development (secs. 241–245)

The Senate amendment contained a set of provisions (secs. 231–235) that would direct the Department of Defense to undertake research and development on innovative manufacturing processes and disseminate those processes into the defense industrial base.

The House bill contained no similar provision.

The House recesses with an amendment that would establish a pilot program to develop innovative manufacturing processes and disseminate them into industry.

The conferees believe that rapidly developing technology coupled with an increasingly competitive global economic and security environment makes the importance of maintaining a robust domestic manufacturing base a continuing national security concern. The conferees note that the Defense Manufacturing Technology (ManTech) program is a transformational program intended to keep the defense manufacturing base on the cutting edge of innovative processes and technologies. The conferees believe that a reinvigorated ManTech program could lead to a stronger defense manufacturing base and enhance our national security.

Subtitle E—Other Matters

Comptroller General report on program element structure for research, development, test, and evaluation projects (sec. 251)

The House bill contained a provision (sec. 222) that would require the Department of Defense to assign a separate program element for each research, development, test, and evaluation (RDT&E) project with estimated expenditures and proposed appropriations of \$100.0 million or more over the future years defense program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would direct the Comptroller General to conduct a study of the current program element structure.

The conferees recognize the need for flexibility in planning and managing complex RDT&E programs and projects. The program element (PE) structure used to budget and allocate resources to RDT&E projects was created over 4 decades ago and has not been recently evaluated or updated. Congress has required incremental adjustments to the budget detail presented by the Department to ensure proper oversight, but has become increasingly frustrated with the incorrect application of directives in the classification of programs and projects by budget activity, the addition of large new projects under existing PEs, the resulting lack of transparency in planning and budgeting, and reduced visibility into sub-elements and projects.

The study should include an analysis of the current structure and content and an assessment of the effectiveness of program element and budget justification materials in providing necessary data for congressional oversight and budget transparency. These recommendations should balance the needs of Congress, other governmental organizations, and the public to ensure visibility into the Department's budgets and programs with the need for the Department to retain sufficient management flexibility. The report should include: (1) recommendations on program element size and content; (2) budget justification material content; (3) appropriate reprogramming authorities within and between program elements; and (4) recommendations regarding the structure of program elements as they relate to highly complex research and development programs, particularly those that employ the system of systems concept. The report should be submitted to the congressional defense committees no later than February 1, 2007, with potential implementation in the fiscal year 2009 budget submission.

Research and development efforts for purposes of small business research (sec. 252)

The House bill contained a provision (sec. 223) that would establish a pilot program to expand the role of small business concerns in defense acquisition.

The Senate amendment contained a similar provision (sec. 814) that would revise criteria and procedures for identification of Small Business Innovation Research (SBIR) topic areas and establish a Commercialization Pilot Program to accelerate transition of SBIR programs into the acquisition process.

The House recedes with an amendment that would modify the reporting requirement of this provision.

Revised requirements relating to submission of Joint Warfighting Science and Technology plan (sec. 253)

The House bill contained a provision (sec. 224) that would require submission of the Joint Warfighting Science and Technology plan to Congress every 2 years, rather than annually, and would repeal the requirement for the plan to contain technology area review and assessment summaries.

The Senate amendment contained a similar provision (sec. 1041).

The Senate recedes with an amendment that would require submission of the technology area review and assessment upon completion.

Report on efficiency of naval shipbuilding industry (sec. 254)

The House bill contained a provision (sec. 225) that would require the Secretary of the Navy to establish a program, and to provide funds that are made available to: (1) qualified applicants to facilitate and develop innovative design and production technologies and processes for naval vessels and the development of modernized shipbuilding infrastructure; and (2) private shipyards to facilitate their acquisition of such technologies, processes, and infrastructure. The provision would outline the purpose of the program, how the development funding could be applied for, how the participating entities would be selected, and how the shipyards would incorporate the technologies or processes. The provision would also require the Secretary to conduct an assessment of certain shipbuilding phases at least annually. The provision would provide \$100.0 million from the Research, Development, Test, and Evaluation, Navy, account in fiscal year 2006 to establish this program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary to conduct an assessment of the U.S. naval shipbuilding industry to determine how worldwide shipbuilding industry best practices for innovation, design, and production technologies, processes, and infrastructure could be adopted. The amendment would require the assessment to identify those best practices that have not been adopted by the U.S. naval shipbuilding industry; estimate the costs to adopt and the return on investment by adopting these best practices; and any recommendations the Secretary may have to increase naval shipbuilding efficiencies. The amendment would require this assessment to occur subsequent to, and take into consideration the results of, the study of the cost effectiveness of the Navy shipbuilding program required by section 1014 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375). The amendment would require the Secretary to submit a report to the congressional defense committees by April 1, 2006, which would include the Secretary's findings and conclusions based on this assessment.

Technology transition (sec. 255)

The Senate amendment contained a provision (sec. 242) that would clarify the role of the Technology Transition Council.

The House bill contained no similar provision.

The House recedes with a clarifying amendment that would ensure that the required report includes an assessment of the Department of Defense requirements, budgeting and planning process on technology transition and modify the deadline for submission of the report to not later than 9 months after the enactment of this Act.

Prevention, mitigation, and treatment of blast injuries (sec. 256)

The Senate amendment contained a provision (sec. 243) that would require the Secretary of Defense to designate an executive agent to coordinate and manage a comprehensive blast injury prevention, mitigation, and treatment program. The provision would require review and assessment of a coordinated, department-wide research effort to include: blast characterization; modeling and simulation of safe stand-off distances; explosive detect and defeat capabilities; and armor design and material testing for blast, ballistic, and fire protection. The provision would also require support for emerging military medical technologies, devices, and treatments specific to blast injuries including traumatic brain injury.

The House bill contained no similar provision.

The House recedes with an amendment that would revise the responsibilities of the executive agent required by this section. The amendment would also require the Director, Defense Research and Engineering to work in coordination with the executive agent and the Director, Joint Improvised Explosive Device Task Force on research for the prevention and mitigation of blast injuries.

The conferees intend to ensure a focused effort on providing the best treatment and protection for U.S. soldiers, sailors, airmen, marines, and National Guardsmen as they confront evolving threats in unpredictable environments. The Department of Defense acquisition system should incorporate emerging health hazards data produced by efforts under this section into the human systems integration assessments conducted for all acquisition programs.

Modification of requirements for annual report on DARPA program to award cash prizes for advanced technology achievements (sec. 257)

The Senate amendment contained a provision (sec. 244) that would clarify reporting requirements on utilization of authority granted by the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106-65) to run competitions and award prizes for achievements in research and technology development.

The House bill contained no similar provision.

The House recedes with technical amendments.

Designation of facilities and resources constituting the major range and test facility base (sec. 258)

The Senate amendment contained a provision (sec. 245) that would update the Bob Stump National Defense Authorization Act of Fiscal Year 2003 (Public Law 107-314) to reflect changes in the

Test Resource Management Center oversight of major research and test facilities. The provision would designate the Secretary of Defense, rather than the Director, Operational Test and Evaluation, as the official in charge of major range and test facility designations.

The House bill contained no similar provision.

The House recesses.

Report on cooperation between Department of Defense and National Aeronautics and Space Administration on research, development, test, and evaluation activities (sec. 259)

The Senate amendment contained a provision (sec. 246) that would require a joint Department of Defense and National Aeronautics and Space Administration assessment of research, development, test, and evaluation cooperation.

The House bill contained no similar provision.

The House recesses with an amendment that would ensure that the assessment of space access and operations includes a focus on responsive space launch and small satellite development.

Delayed effective date for limitation on procurement of systems not GPS-equipped (sec. 260)

The Senate amendment contained a provision (sec. 247) that would delay the effective date by which the military services must complete equipping their forces with the global positioning system (GPS) from 2005 to 2007.

The House bill contained no similar provision.

The House recesses with a technical amendment.

The conferees recognize that the Department of Defense is still working toward compliance with section 152(b) of the National Defense Authorization Act for Fiscal Year 1994 (Public Law 103-160) with regard to equipping all aircraft, ships, armored vehicles, and indirect fire systems with GPS capability. The current program calls for Army compliance by the end of fiscal year 2007 and for Air Force compliance in fiscal year 2015. The conferees believe there may not be value added to modifying certain platforms currently planned for modification after 2007. Therefore, the conferees direct the Secretary of Defense to perform an assessment of all Department of Defense aircraft, ships, armored vehicles, and indirect fire system that will not be equipped with GPS capability by the end of fiscal year 2007 to determine whether the operational value of modifying each system with GPS is worth the cost of so doing. A report of the results of this assessment is due to the congressional defense committees by February 1, 2007.

Report on development and use of robotics and unmanned ground vehicle systems (sec. 261)

The Senate amendment contained a provision (sec. 248) that would require a report on the development and utilization of robotics and unmanned ground vehicle systems.

The House bill contained no similar provision.

The House recesses with an amendment to expand and clarify the requirements of the report.

The conferees note that the Joint Robotics Program (JRP) produces a Joint Robotics Program Master Plan that details JRP activities, progress, and budgets. The conferees intend for the report required by this provision to expand on the JRP effort to include a detailed description of all the relevant robotics and unmanned ground vehicle efforts undertaken by all of the elements of the Department of Defense, as well as other required elements indicated in the provision.

The conferees continue to support the goal established by the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398) that, by 2015, one-third of operational ground combat vehicles be unmanned. The conferees direct the Secretary of Defense to provide a cost estimate for research, development, testing, and procurement to achieve this goal along with the submission of a report to the congressional defense committees not later than 9 months after the enactment of this Act, as required by this provision.

Renewal of University National Oceanographic Laboratory System fleet

The House bill contained a provision (sec. 226) that would require the Secretary of the Navy to develop a plan for a program to construct ships for the University National Oceanographic Laboratory System (UNOLS) fleet.

The Senate amendment contained no similar provision.

The House recesses.

The conferees are concerned with the Navy's plans to fund the construction of academic research vessels in the basic research account in fiscal year 2007. While the *Ocean*-class research vessel provides the Navy with a robust understanding of its battlespace, diversion of fundamental science funds to design and construct

such ships would adversely affect the goals of the innovative research account and is an inappropriate use for scarce Navy basic research funds. The conferees direct the Navy to fund design work for future ships in PE 63564N, the Ship Preliminary Design and Feasibility Studies program.

Released with the fiscal year 2006 budget request, the fiscal year 2007 budget projection included \$25.0 million for UNOLS ship construction. The conferees direct the Navy to request ship construction funds in the Shipbuilding and Conversion, Navy (SCN) account. The committee expects that the Navy will continue to use the SCN account to provide for the recapitalization of *Ocean*-class research vessels in the future-years defense program.

Finally, the conferees direct the Navy to update its plan for renewal of the UNOLS fleet to reflect current fiscal realities, schedules, missions, and research priorities. ITEMS OF SPECIAL INTEREST

Unjustified base support cost growth

The budget request included \$2,286.5 million for Air Force base support programs.

The House bill would authorize a decrease of \$82.6 million from Air Force base support programs, including a \$65.0 million decrease in base services related supplies and materials.

The Senate amendment would authorize the budget request.

The conferees agree to authorize a decrease of \$80.0 million for Air Force base support programs.

The conferees acknowledge the need for force enablers such as mess attendants, gymnasiums, and libraries and are aware of the impact these services have on quality of life. However, the conferees believe that tripling funding in order to replace gym equipment such as cardio machines and food service items such as silverware and cooking utensils is unjustified.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations

Authorization of appropriations (secs. 301–303)

The House bill contained provisions (secs. 301–303) that would authorize fiscal year 2006 funding levels for all operation and maintenance accounts, working capital funds, and other Department of Defense programs, including the Defense Inspector General, the Chemical Demilitarization Program, and the Defense Health Program.

The Senate amendment contained similar provisions (secs. 301–303).

The conference agreement includes these provisions.

Subtitle B—Environmental Provisions

Elimination and simplification of certain items required in the annual report on environmental quality programs and other environmental activities (sec. 311)

The House bill contained a provision (sec. 311) that would eliminate and simplify certain items required to be included in the annual report on environmental quality programs and other environmental activities.

The Senate amendment contained a similar provision (sec. 311).

The House recedes with an amendment that would require the Department of Defense to provide in the report a list of environmental fines or penalties that exceed \$1.0 million.

Payment of certain private cleanup costs in connection with Defense environmental restoration program (sec. 312)

The House bill contained a provision (sec. 314) that would amend section 2701 of title 10, United States Code, to authorize the Secretary of Defense to reimburse a private landowner for costs incurred assisting the Department of Defense in meeting its covenant responsibilities pursuant to section 120(h) of the Comprehen-

sive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980 (42 U.S.C. 9620(h)). This section would not affect, alter, or diminish the responsibility and legal obligation of the Department to conduct cleanup under section 120(h) of CERCLA.

The Senate amendment contained a similar provision (sec. 312).

The Senate recedes with an amendment that would clarify that in those instances where the property is disposed of pursuant to a base closure law, the sole source of funds for environmental restoration services under section 2701(d)(1), title 10, United States Code, would be the base closure account until the closure of the applicable base closure account. Other Department environmental remediation accounts would become the source of funding for such cleanups after the base closure account has been closed.

Subtitle C—Workplace and Depot Issues

Modification of authority of Army working-capital funded facilities to engage in cooperative activities with non-Army entities (sec. 321)

The House bill contained a provision (sec. 321) that would authorize Army industrial facilities to retain the working capital funds received from the sale of unique goods or services.

The Senate amendment contained a similar provision (sec. 330).

The House recedes with a technical amendment.

Limitation on transition of funding for east coast shipyards from funding through Navy Working Capital Fund to direct funding (sec. 322)

The Senate amendment contained a provision (sec. 322) that would prohibit the Secretary of the Navy from using direct funding for east coast Naval shipyards. The Navy would be required to continue funding these shipyards until the later of 6 months after providing a complete report to the congressional defense committees on the use of direct funding at the Puget Sound Naval Shipyard, or October 1, 2006.

The House bill contained no similar provision.

The House recedes with an amendment that would prohibit the Secretary from using direct funding for the east coast Naval Shipyards until October 1, 2006. The conferees direct the Secretary to provide an assessment of the conversion of the Puget Sound Naval Shipyard from funding through the working capital fund of the Navy to funding on a direct basis by March 1, 2006. The conferees also direct the Secretary to provide a report on proposed congressional budget exhibits for Navy mission-funded shipyards by March 1, 2006.

The conferees direct the Comptroller General and the Director of the Congressional Budget Office to review the reports required of the Navy and report back detailed findings no later than 60 days after receipt of the reports to the congressional defense committees.

Armament Retooling and Manufacturing Support Initiative matters
(sec. 323)

The Senate amendment contained a provision (sec. 340) that would add government-owned, contractor-operated depots that store, maintain, renovate, or demilitarize ammunition, as eligible facilities for the purposes of participating in the Armament Retooling and Manufacturing Support Initiative. The provision would also make such facilities eligible for the initiative's loan guarantee program.

The House bill contained no similar provision.

The House recedes with an amendment that would include encouragement of the commercial use of government-owned, contractor-operated ammunition storage, maintenance, renovation, and demilitarization facilities as additional policy objectives under the Armament Retooling and Manufacturing Support Initiative. The amendment would also broaden the purpose of the initiative with respect to work force skills.

Sense of Congress regarding depot maintenance (sec. 324)

The Senate amendment contained a provision (sec. 331) that would make several findings regarding the effectiveness of the Air Force's Depot Maintenance Strategy and Master Plan and the importance of its efforts to modernize its depots. The provision also commends the Air Force for its implementation of the Depot Maintenance Strategy and Master Plan, particularly the commitment to invest \$150.0 million per year for 6 years to modernize its depots. Finally, the provision encourages the Air Force to maintain that commitment throughout the 6-year period, which ends in 2009.

The House bill contained no similar provision.

The House recedes with an amendment that would delete reference to specific funding figures, and instead encourage the Air Force to remain committed to the process improvement initiatives and the investment and recapitalization projects contained in the Depot Maintenance Strategy and Master Plan.

Subtitle D—Extension of Program Authorities

Extension of authority to provide logistics support and services for weapon systems contractors (sec. 331)

The House bill contained a provision (sec. 331) that would extend, for an additional 3 years, a program by which the Defense Logistics Agency could provide logistics support and services to a contractor in support of its performance on a contract for the construction, modification, or maintenance of a weapons system. The Secretary of Defense has not finalized the required program regulations. The current authority expires on September 30, 2007. Moving the expiration date to 2010 would correspond to the originally envisioned 5-year pilot period.

The Senate amendment contained an identical provision (sec. 326).

The conference agreement includes this provision.

Extension of period for reimbursement for certain protective, safety, or health equipment purchased by or for members of the Armed Forces deployed in contingency operations (sec. 332)

The Senate amendment contained a provision (sec. 333) that would repeal the requirement in section 351 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375) that the Secretary of Defense establish a program to reimburse members of the Armed Forces for personal protection equipment purchased by or for members when such equipment was not issued to the member, under rules to be promulgated by the Secretary, and replace it with a requirement to reimburse such members on the determination of their unit commander that such equipment was critical. The provision would also establish a fund for such reimbursements, specify equipment that would be covered, including vehicle armor, and extend the date for which eligible purchases could be made until September 30, 2006.

The House bill contained no similar provision.

The House recedes with an amendment that would extend the period during which equipment eligible for reimbursement could be purchased from July 31, 2004, until April 1, 2006.

The conferees urge the Department of Defense to expand the list of eligible items published on October 4, 2005, to include del-toid or side plate body armor, gloves, and knee or elbow pads, to the extent those items meet the requirements of this Act.

Subtitle E—Outsourcing

Public-private competition (sec. 341)

The House bill contained a provision (sec. 322) that would: (1) codify the existing prohibition on converting a function to private sector performance unless the conversion would result in savings of at least 10 percent or \$10.0 million; (2) prohibit the Secretary of Defense from breaking up a function to avoid applicable thresholds for conducting a public-private competition; and (3) require the Secretary to conduct a competition, including an agency tender, a most efficient organization plan, and a formal cost comparison for any function performed by 10 or more civilian employees.

The Senate amendment contained a similar provision (sec. 809F).

The Senate recedes with an amendment that would: (1) incorporate the requirements of the House and Senate provisions into the text of section 2461 of title 10, United States Code; and (2) revise sections 2461, 2461a, 2462, and 2463 of title 10, United States Code to streamline and update the text of these provisions.

Contracting for procurement of certain supplies and services (sec. 342)

The Senate amendment contained a provision (sec. 809H) that would amend section 8014 of the Department of Defense Appropriations Act for Fiscal Year 2005 (Public Law 108–287) to clarify the treatment of health care costs in public-private competitions under such Act.

The House bill contained no similar provision.

The House recedes.

Performance of certain work by federal government employees (sec. 343)

The House bill contained a provision (sec. 323) that would establish a pilot program for public-private competition for work that is currently performed by contractors.

The Senate amendment contained a provision (sec. 809G) that would require the Secretary of Defense to prescribe guidelines and procedures to ensure that consideration is given to using federal government employees for work that is currently performed under Department of Defense contracts and new requirements.

The House recedes with an amendment that would require the Secretary to prescribe guidelines and procedures to ensure that consideration is given to using federal government employees for work that would otherwise be performed under Department of Defense contracts, but could be performed by federal government employees. The conferees expect these guidelines to provide for the assignment of work to federal government employees (and for hiring new federal government employees) in appropriate circumstances, without the requirement to perform public-private competition under Office of Management and Budget Circular A-76 or any other provision of law or regulation.

Extension of temporary authority for contractor performance of security guard functions (sec. 344)

The House bill contained a provision (sec. 332) that would extend by 2 years the authority for contractor performance of security guard functions under section 332 of the Bob Stump National Defense Authorization Act for Fiscal Year 2003 (Public Law 107-314), and require the Secretary of Defense and the secretaries of the military departments to conduct new full and open competitions pursuant to section 2304 of title 10, United States Code, for security guard requirements under this section.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would provide for a 1-year extension of section 332 of the Bob Stump National Defense Authorization Act.

Subtitle F—Analysis, Strategies, and Reports

Report on Department of Army programs for prepositioning of equipment and other materiel (sec. 351)

The House bill contained a provision (sec. 355) that would require the Secretary of the Army to conduct an assessment of Department of the Army programs for the prepositioning of equipment and other materiel stocks. The assessment would focus on how those programs are configured to support the evolving goals of the Department of the Army and their ability to support wartime requirements. The Secretary would submit to Congress, not later than January 1, 2006, a report on this assessment. The provision would also require the Comptroller General to submit to Congress a review of the Secretary of the Army's assessment not later than 120 days after receipt of the Secretary of the Army's report.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would change the date of the Secretary of the Army's report to March 1, 2006, and make a clarification to the legislative text.

Reports on budget models used for base operations support, sustainment, and facilities recapitalization (sec. 352)

The House bill contained a provision (sec. 354) that would require a report during each of the next 5 fiscal years from the Secretary of Defense on the Department of Defense's models for base operations support, sustainment, and facilities recapitalization budgets.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

Army training strategy for brigade-based combat teams and functional supporting brigades (sec. 353)

The Senate amendment contained a provision (sec. 327) that would direct the Secretary of the Army to develop and implement a training strategy, including performance goals and metrics, for the Army's new modular force. The provision would also require the Secretary to submit a report to the congressional defense committees within 1 year after the enactment of this Act on the elements necessary to implement this training strategy, including funding. The provision would also direct the Comptroller General to monitor the implementation of the strategy and to submit a report to the congressional defense committees within 18 months after the enactment of this Act. The report would contain an assessment of the Army's progress in implementing the training strategy.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary to develop and implement this training strategy as soon as practicable, and change the date of the Comptroller General's report to the congressional defense committees to 180 days after the Secretary's report is submitted.

Report regarding effect on military readiness of undocumented immigrants trespassing upon operational ranges (sec. 354)

The House bill contained a provision (sec. 356) that would require the Secretary of Defense and the Secretary of Homeland Security to submit a report to Congress by March 15, 2006, on a joint plan to eliminate incursions of undocumented immigrants into military training areas near international borders. The report would also include an assessment of the impact on military readiness caused by such incursions. This provision would also require the Secretary of Defense to submit to Congress semi-annual reports on mitigation measures implemented since the previous report.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the assessment of the impact of undocumented immigrant incursions into training areas on military readiness to be made only by the Secretary of Defense, not the Secretary of Defense and the Secretary of Homeland Security jointly. The amendment would also

change the date the initial report is due to Congress to April 15, 2006.

Report regarding Management of Army Lodging (sec. 355)

The House bill contained a provision (sec. 358) that would require the Secretary of Defense to report to Congress on the results of a study evaluating the merits of allowing the Army and Air Force Exchange System (AAFES) to manage Army lodging. The Army would also be prohibited from soliciting qualifications that would privatize Army lodging beyond Group A until the Secretary's report was submitted to Congress.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require two reports, one by the Secretary of the Army evaluating the merits of privatization of Army lodging, and one by the Army and Air Force Exchange Service commenting on the feasibility of its participation in privatization of Army lodging. The amendment requires two additional elements in each report: the potential costs and benefits of each approach, and the number of Army lodging personnel that would be impacted and the total personnel-related costs which would occur as a result of either approach.

The conferees believe that AAFES should be allowed fair consideration in any competitive procurement of lodging management and services within the Department of Defense.

Comptroller General report on corrosion prevention and mitigation programs of the Department of Defense (sec. 356)

The Senate amendment contained a provision (sec. 1043) that would direct the Comptroller General to conduct a report on the effectiveness of the corrosion prevention and mitigation programs of the Department of Defense. The report would include assessments of the following: (1) the Department's November 2004 'Long-Term Strategy to Reduce Corrosion and the Effects of Corrosion on the Military Equipment and Infrastructure of the Department of Defense'; (2) the adequacy of the funding requested in the budget proposal for fiscal year 2006; (3) the adequacy and effectiveness of the Department's organizational structure in implementing that strategy; (4) the progress made to date in establishing common corrosion-related metrics, definitions, and procedures throughout the Department; (5) the progress made to date in establishing a baseline estimate of the scope of the Department's corrosion problem; (6) the extent to which the Department's strategy has been revised to incorporate the recommendations of the October 2004 Defense Science Board report on corrosion control; (7) the implementation of the Department's corrosion prevention and mitigation programs during fiscal year 2006; and (8) the Comptroller General's recommendations for addressing any shortfalls or areas of potential improvement identified in the course of preparing the report. The provision would require the Comptroller General to submit the report to the congressional defense committees not later than April 1, 2007.

The House bill contained no similar provision.

The House recedes with an amendment that would add a requirement for an assessment of the adequacy of the funding requested in the budget proposal for fiscal year 2007 to the report.

Study on use of biodiesel and ethanol fuel (sec. 357)

The House bill contained a provision (sec. 315) that would require a study by the Secretary of Defense on the use of biodiesel and ethanol fuel by the Armed Forces and the defense agencies and any measures that can be taken to increase such use. The study would include a review of potential future requirements for biodiesel and ethanol; an assessment of commercial availability of the fuels; a review of Department of Defense efforts to coordinate with nonfederal entities for the expansion and use of alternative fuel refueling stations; and an assessment of military fueling infrastructure that could be converted for use of biodiesel and ethanol fuel. The provision would also require a report on this study to the congressional defense committees not later than February 1, 2006.

The Senate amendment contained a similar provision (sec. 329), but did not address biodiesel.

The Senate recedes with an amendment that would change the date of the report to the Committees on Armed Services of the Senate and the House of Representatives to 270 days after the date of enactment of this Act. The amendment would also require an assessment of the cost and the feasibility of adapting defense fueling infrastructure to handle biodiesel and ethanol.

The conferees encourage the Secretary to make use of previously available reports and data, where feasible, to complete the assessment of commercial biodiesel and ethanol fuel availability and other appropriate elements of this study.

Report on effects of windmill farms on military readiness (sec. 358)

The Senate amendment contained a provision (sec. 346) that would make a congressional finding regarding a report from the Ministry of Defence of the United Kingdom on the effect of windmill farms on military readiness. The provision would also require the Secretary of Defense to submit to the Committees on Armed Services of the Senate and the House of Representatives, within 180 days, a report on the effects of windmill farms on military readiness and of technologies that could mitigate any adverse effects on military operations identified.

The House bill contained no similar provision.

The House recedes with an amendment that would strike the congressional finding and change the requirement for submission of the report to 120 days after the enactment of this Act.

Report on space-available travel for certain disabled veterans and gray-area retirees (sec. 359)

The House bill contained a provision (sec. 678) that would require the Secretary of Defense, in consultation with the Secretary of Veterans Affairs, to submit a report on the feasibility of providing transportation on military aircraft on a space-available basis for veterans with a service-connected disability rating of 50 percent or higher.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the report to also address the feasibility of authorizing space-available travel for gray-area retirees, i.e., members or former members of a reserve component under 60 years of age who, but for age, would be eligible for retired pay, and to the dependents of specified veterans and gray-area reservists.

Report on joint field training and experimentation on stability, security, transition, and reconstruction operations (sec. 360)

The Senate amendment contained a provision (sec. 212) that would direct the Secretary of Defense to execute a joint field experiment to address matters relating to stability and security operations in fiscal year 2006.

The House bill contained no similar provision.

The House recedes with an amendment that would recognize that the Department of Defense has developed and is already executing a program to improve its joint and interagency stability operations planning, exercises, and operational capabilities. As a result, a single field experiment in fiscal year 2006 does not appear to be required. The conferees urge the Department to more fully incorporate other federal departments and agencies, as well as allies and coalition partners. The amendment would require that the Department report on the progress and findings of the joint field training and experimentation conducted in fiscal years 2005 and 2006 not later than February 1, 2007.

Reports on budgeting relating to sustainment of key military equipment (sec. 361)

The Senate amendment contained a provision (sec. 1049) that would require the Secretary of Defense to submit to Congress each year, near the time of the submission of the President's budget request, a report on the Department of Defense funding for key military equipment. This report would contain a description of the Department's strategy and funding requirements necessary to sustain and modernize key military equipment. In those instances where the Department does not request full funding for the above strategy, the Department would identify the risks that would be taken and actions necessary to mitigate such risks.

The House bill contained no similar provision.

The House recedes with an amendment that would require this report only in 2006, 2007, and 2008.

Repeal of Air Force report on military installation encroachment issues (sec. 362)

The Senate amendment contained no similar provision.

The Senate recedes.

The House bill contained a provision (sec. 351) that would prohibit annual expenditures greater than \$1.0 million to modify an aircraft, weapon, ship, or other item of equipment that will be retired or otherwise disposed of within 5 years after completion of the modification. The secretary of a military department may waive this restriction if the waiver is necessary on the basis of national security, and he so notifies the congressional defense committees in writing. Safety modifications will not require waivers.

The Senate amendment contained a similar provision (sec. 842).

The Senate recesses with an amendment that would prohibit expenditures greater than \$100,000 for equipment modifications or greater than \$1.0 million if the equipment will be removed, refurbished, and installed on another platform prior to the disposal of an aircraft, weapon, ship, or other item of equipment, unless the requirement is waived.

The Senate amendment contained a provision (sec. 343) that would amend section 2601 of title 10, United States Code, to authorize the Secretary of Defense under certain conditions to accept gifts that are given for the benefit of members of the Armed Forces, civilian employees of the U.S. Government (or their dependents or survivors), who are wounded or killed while serving in Operation Iraqi Freedom, Operation Enduring Freedom, or any other military operation, activity, or geographic area designated by the Secretary of Defense. The provision would authorize periodic Comptroller General audits of gifts accepted under this authority. The authority would expire on December 31, 2007.

The House bill contained no similar provision.

The House recesses with an amendment that, in addition to gifts of real and personal property and money, would authorize the Secretary to accept gifts of services made on the condition that they be used for the benefit of members of the Armed Forces and civilian employees of the Department of Defense (and their dependents or survivors). Gifts from foreign governments or international organizations could only be accepted if they are not designated for a specific individual and could not include services. The amendment would authorize the establishment of a Department of Defense General Gift Fund.

The conferees, by adding authority to accept gifts to benefit certain members, dependents, and civilian employees, do not intend to limit the existing general gift authority.

Inclusion of packet based telephony in Department of Defense telecommunications benefits (sec. 375)

The Senate amendment contained a provision (sec. 345) that would include technology that allows the use of a broadband Internet connection for making telephone calls within the Department of Defense telecommunications benefit.

The House bill contained no similar provision.

The House recesses with an amendment that would clarify that the Department may continue to fund activities directed exclusively at assessing the adequacy of internal controls and remediating any inadequacies identified pursuant to such assessments.

The provision would not authorize the construction of new housing or medical treatment facilities. The provisions of chapter 13 of title 31, United States Code, would not apply to the obligation or expenditure of funds for the general welfare of such persons prior to the date of enactment of this Act.

The House bill contained no similar provision.

The House recedes with a technical amendment.

Commemoration of success of the Armed Forces in Operation Enduring Freedom and Operation Iraqi Freedom (sec. 378)

It would also authorize the issuance of a proclamation calling on the people of the United States to observe that day with appropriate ceremonies and activities. The provision would authorize the use of appropriated funds up to \$20.0 million and the acceptance of gifts to pay the costs of the day of celebration. It would also authorize the presentation of recognition items under section 2261 of title 10, United States Code, to individuals who served honorably as a member of the Armed Forces in OEF and OIF.

The House bill contained a provision (sec. 343) that would require the Secretary of the Interior, in consultation with the Secretary of Defense, to develop land use plans for federal lands in the Utah Test and Training Range. The provision would also prohibit the Secretary of the Interior from granting rights-of-way under the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1761) upon certain federal lands.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would eliminate the limitation on the authority of the Secretary of the Interior to grant or issue authorizations for rights-of-way under the Federal Land Policy and Management Act of 1976 upon certain federal lands.

LEGISLATIVE PROVISIONS NOT ADOPTED

Child and family assistance benefits for members of the Armed Forces

The Senate amendment contained a provision (sec. 332) that would authorize an additional \$60.0 million for Operation and Maintenance, Defense-wide activities, for child and family assistance benefits for members of the Armed Forces. Of the total amount authorized, \$50.0 million would be available for child care services, and \$10.0 million would be available for family assistance.

The House bill contained no similar provision.
The Senate recesses.

The increased amounts for child care and family assistance are reflected in the tables of this report in Operation and Maintenance, Defense-wide.

The conferees applaud the significant increases in child care services and family assistance provided by supplemental appropriations, and urge the Department of Defense to make the additional funding available immediately to the families of members on active duty who require such services.

Congressional notification requirements regarding placement of liquefied natural gas facilities, pipelines, and related structures on defense lands

The House bill contained a provision (sec. 357) that would require, that not less than 30 days before the Secretary of Defense or the secretary of a military department issues a final decision regarding the placement of any liquefied natural gas facility, pipeline, or related structure on or in the vicinity of a military installation, range, or other lands under the jurisdiction of the Department of Defense, the secretary concerned to submit to Congress a report detailing the justification for the decision, including the potential long-term effects on military readiness.

The Senate amendment contained no similar provision.

The House recesses. This matter was addressed in section 311(c) of the Energy Policy Act of 2005 (Public Law 109-58), and the provision is no longer required.

Grants for local workforce investment boards for services for certain spouses of members of the Armed Forces

The Senate amendment contained a provision (sec. 341) that would authorize the Secretary of Defense to make grants to local workforce investment boards established under section 117 of the Workforce Investment Act of 1998 (29 U.S.C. 2832) for the purpose of providing employment assistance to certain military spouses.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that the Department of Defense and the Department of Labor entered into a Memorandum of Understanding in 2003 that provides a framework for a broad range of continuing and new partnership efforts to help military spouses establish careers, despite having to transition among job markets due to frequent relocations. The conferees applaud this effort and encourage the Department of Labor and the Department of Defense to continue such collaboration in order to leverage their individual and combined resources to strengthen the quality of life for members of the Armed Forces and their families.

Identification of additional Bureau of Land Management land in Utah as trust land for Skull Valley Band of Goshutes

The House bill contained a provision (sec. 345) that would identify approximately 640 acres of Bureau of Land Management land in Utah to be administered in trust for the benefit of the Skull Valley Band of Goshutes.

The Senate amendment contained no similar amendment.

The House recesses.

Legal standing and bid protests by federal employees in actions under Office of Management and Budget Circular A-76

The House bill contained a provision (sec. 324) that would express the sense of Congress on equitable legal standing for civilian employees in public-private competitions.

The Senate amendment contained a provision (sec. 1109) that would provide legal standing for certain representatives of civilian employees in public-private competitions.

The conference report does not include either provision.

The conferees believe that to ensure public-private competitions are conducted as fairly, effectively, and efficiently as possible, both Department of Defense civilian employees (or their representatives) and contractors (or their representatives) should receive fair treatment throughout the competition regarding access to relevant information and legal standing to challenge the way a competition has been conducted.

The conferees note that this issue was specifically addressed in section 326 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375). The conferees believe that there is insufficient data on the implementation of section 326 to determine whether changes to that provision are needed, or would be appropriate.

Long Arm High-Intensity Arc Metal Halide Handheld Searchlight

The Senate amendment contained a provision (sec. 336) that would authorize \$4.5 million for the Long Arm High-Intensity Arc Metal Halide Handheld Searchlight.

The House bill contained no similar provision.

The Senate recesses.

The conference outcome is reflected in the tables of this report in Operation and Maintenance, Army.

Navy human resources benefits call center

The Senate amendment contained a provision (sec. 304) that would authorize \$1.5 million from Navy operation and maintenance funds for civilian manpower and personnel for a human resources benefit call center.

The House bill contained no similar provision.

The Senate recesses.

The conference outcome is reflected in the tables of this report in Operation and Maintenance, Navy.

The conferees note that the Navy currently is conducting a human resources benefit call center pilot program in Machias, Maine. Navy officials have stated that the pilot program is "very successful" in delivering high customer satisfaction. Because of this success, the Navy intends to transition this call center to a permanent program. This is largely due to the hard work and commitment to excellence of the personnel who work at the call center in Machias.

Pilot project on compatible use buffers on real property bordering Fort Carson, Colorado

The House bill contained a provision (sec. 312) that would require the Secretary of Defense to carry out a pilot project at Fort Carson, Colorado, to evaluate the effectiveness of conservation easements and leases entered into with willing entities to limit property development that would be incompatible with Fort Carson's mission. Conservation easements and leases are currently authorized under section 2684a of title 10, United States Code.

The Senate amendment contained no similar provision.

The House recesses.

The conferees have added \$20.0 million to the Readiness and Environmental Protection Initiative to support the Department of Defense's highest priority buffer zone projects. The conferees expect the Secretary of Defense to enter into agreements with willing entities to prevent or limit the use of property in the vicinity of a military installation that would impede the mission of that military installation. The conferees believe that the Secretary of Defense, in coordination with the Secretary of the Army, should utilize available authority and funding to ensure that conservation easements and leases are entered into as quickly as possible at the high-priority sites identified as part of the Army's Compatible Use Buffer Program, including Fort Campbell; Fort Carson; Fort A. P. Hill; Fort Hood; Fort Sill; and Camp Ripley. With respect to Fort Carson, Colorado, the conferees understand that Fort Carson is one of the Army's highest priority sites for implementation of compatible use buffer zones.

Point of Maintenance/Arsenal/Depot AIT Initiative

The Senate amendment contained a provision (sec. 335) that would authorize \$10.0 million for the Point of Maintenance/Arsenal/Depot AIT (AD-AIT) Initiative.

The House bill contained no similar provision.

The Senate recedes.

The conference outcome is reflected in the tables of this report in Operation and Maintenance, Army.

Provision of Department of Defense support for certain paralympic sporting events

The House bill contained a provision (sec. 353) that would amend section 2564 of title 10, United States Code, to exempt certain paralympic sporting events conducted in the United States, its territories, or commonwealths, from prescribed conditions for Department of Defense-provided security and safety assistance. These conditions would include determinations that such security and safety needs cannot reasonably be met by other sources and, if provided, would not adversely affect military preparedness of the Armed Forces. Additionally, requesting organizations must agree to provide reimbursement. Under the provision, up to \$1.0 million could be expended in any fiscal year to provide support for qualifying paralympic sporting events.

The Senate amendment contained a similar provision (sec. 338) that would provide funding from the Support for International Sporting Competitions (SISC) Defense account, which was established by section 5802 of the Omnibus Consolidated Appropriations Act, 1997 (Public Law 104-208).

The conference agreement does not include these provisions.

The conferees support Department-provided security and safety assistance to qualifying sporting events and endorse participation by eligible military personnel and veterans in paralympic sporting events. A separate provision in this Act amends section 717 of title 10, United States Code, to specifically authorize members of the Armed Forces to train for, attend, and participate in the Paralympic Games. The conferees note that the quadrennial Paralympic Games are already exempted from certification and reimbursement requirements in connection with the use of the SISC account funds. However, the need for, and impact of, expansion of Department support for events of this type are not clear. The average annual number of events of this type, the anticipated size of events of this type, and the associated scope of assistance requested from the Department under this expanded authority could not be determined. Consequently, no assessment of the resulting increase to the personnel tempo of both active and reserve component forces could be made.

The conferees, therefore, direct the Secretary of Defense, in consultation with the U.S. Olympic Committee, to identify and submit a report to the congressional defense committees by August 31, 2006, detailing the effect of amending section 2564 of title 10, United States Code, to include the Paralympic Military Program and paralympic sporting events, at various participation levels, in the category of events that would qualify for Department support

without having to meet the conditions in subsections (a) and (b) of that section.

This report shall include an analysis of: (1) the estimated number of events that would qualify for nonreimbursable assistance; (2) the impact of such increased Department support on the operational or personnel tempo of active duty, guard, and reserve forces; (3) the type and scope of assistance that is likely to be needed or requested outside the realm of security and safety; (4) the estimated annual cost to the Department for such assistance; (5) whether support for such events would constitute appropriate inactive duty training; (6) whether Department support for such events should be contingent on the participation of current or former military personnel as athletes; and (7) whether Department support for such events should be contingent on the size of the event based on a minimum level of participation.

Report on aircraft to perform High-Altitude Aviation Training Site

The Senate amendment contained a provision (sec. 337) that would require the Secretary of the Army to submit a report to the congressional defense committees that contains an evaluation on the type of aircraft available in the Army inventory that is most suited to perform the High-Altitude Aviation Training Site (HAATS) mission, and a determination of when such aircraft may be available for assignment to the HAATS.

The House bill contained no similar provision.

The Senate recedes.

The conferees are aware that the HAATS at Eagle, Colorado is the primary site for training military aviators on operations in all season weather conditions in hostile, high altitude, power limited environments. The training site currently uses UH-1 Huey and OH-58 Kiowa aircraft that are being phased out of the inventory within the future-years defense program. The conferees are aware that the Secretary of the Army has begun an evaluation of the Army inventory and aircraft availability to determine the most appropriate schedule for assigning suitable aircraft to HAATS. The conferees look forward to delivery of the report of this evaluation to the congressional defense committees no later than December 15, 2005.

The Senate recedes with an amendment that would authorize an end strength as of September 30, 2006, of 512,400 for the Army and 179,000 for the Marine Corps, subject to the condition that costs for end strength in excess of 482,400 for the Army, and in excess of 175,000 for the Marine Corps, shall be paid out of funds authorized to be appropriated for fiscal year 2006 for a contingent emergency reserve fund or as an emergency supplemental appropriation.

The House bill also contained a provision (sec. 1521(b)) that would increase the minimum active-duty end strengths for the Army by 30,000 to 512,400, and for the Marine Corps by 4,000 to 179,000.

The Senate amendment contained a similar provision (sec. 402) that would establish minimum active-duty end strengths for the Army, 522,400, and for the Marine Corps, 178,000. Minimum end strengths for the Navy and Air Force would be identical to those in the House provision.

The House recedes with an amendment that would authorize the minimum active-duty end strength for the Army, 502,400, and for the Marine Corps, 179,000.

The conferees recommend minimum end strength levels for active forces as set forth in the following table:

Additional authority for increases of Army and Marine Corps active-duty end strengths for fiscal years 2007 through 2009 (sec. 403)

The House bill contained a provision (sec. 1522) that would authorize additional increases of active-duty end strength for the Army equal to the number otherwise authorized by law for fiscal year 2006, plus up to 20,000 for each fiscal year 2007 through 2009. The House provision would also authorize increases of active-duty end strength for the Marine Corps of the number otherwise authorized by law for fiscal year 2006, plus up to 5,000 for each fiscal year 2007 through 2009.

The Senate amendment contained no similar provision. The Senate recedes with a technical amendment.

Subtitle B—Reserve Forces

End strengths for Selected Reserve (sec. 411)

The House bill contained a provision (sec. 411) that would authorize the following end strengths for Selected Reserve personnel, including the end strengths for reserves on active duty in support of the reserves as of September 30, 2006: the Army National Guard of the United States, 350,000; the Army Reserve, 205,000; the Naval Reserve, 73,100; the Marine Corps Reserve, 39,600; the Air National Guard of the United States, 106,800; the Air Force Reserve, 74,000; and the Coast Guard Reserve, 10,000.

TITLE V—MILITARY PERSONNEL POLICY

ITEMS OF SPECIAL INTEREST

Department of Defense Policy on Transportation of Military Remains

The conferees are aware that, pursuant to Department of Defense policy, the remains of military personnel, when air transport is necessary, are transported with an assigned escort officer by commercial airlines from Dover Air Force Base to their hometowns. The remains of our military men and women should be transported with the utmost ceremony, honors, and respect, and the conferees believe that examination of this issue with an eye toward improvement is called for. The conferees direct the Secretary to establish a system that would ensure that upon arrival at the ultimate destination, the flag-draped coffin is removed and that appropriate military honors are rendered by a small honor guard. The conferees believe that use of military aircraft for transportation of deceased members may be a preferable means of transportation and direct the Secretary to submit a report, no later than February 1, 2006,

discussing the feasibility of such a requirement. The conferees believe that for those who make our freedom possible, this final honor is reasonable and justified by their sacrifice.

The amendment would also require a report by the Secretary within 120 days of enactment of this Act for ensuring the

availability of supplies and trained personnel and resources for responding to sexual assaults occurring in deployed units. LEGISLATIVE PROVISIONS NOT ADOPTED

Administrative censures of members of the Armed Forces

The Senate amendment contained a provision (sec. 554) that would codify the authority of the Secretary of Defense and the service secretaries to issue administrative censures in writing to members of the Armed Forces. An administrative censure is a statement of adverse opinion or criticism with respect to the conduct or performance of duty by a military member. Such administrative censures are not subject to appeal and are final when issued.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that the Secretary of Defense and the Secretaries of the Army, Navy, and Air Force possess inherent authority, wholly apart from the provisions of the Uniform Code of Mili-

tary Justice, to administratively censure members of the Armed Forces when facts and circumstances so require. While the conferees believe that codification of the authority to administratively censure is not required, it is important that senior civilian and military leaders who are responsible for ensuring accountability in the aftermath of failures and deficiencies in performance by military personnel understand the availability of this authority and use it when warranted.

The House bill contained no similar provision.
The Senate recedes.

The conferees are grateful for the enormous contributions of reservists and National Guardsmen in prosecuting the global war on terrorism. The central role of the reserve components in Operations Noble Eagle, Enduring Freedom, and Iraqi Freedom have demonstrated the critical importance of transformation of the reserve components aimed at establishing a flexible continuum of service that will allow the nation's citizen-soldiers to continue to perform vital missions in the Armed Forces while successfully pursuing civilian careers. A key element in achieving success in this regard is a reserve retirement system that enhances mobilization readiness,

supports recruiting and retention, and equitably rewards those who serve on active duty for extended periods, particularly volunteers

The Commission on the National Guard and Reserves, established by section 513 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) has been established and is currently at work. The conferees expect the commission, consistent with its charter, to closely examine issues relating to the eligibility age for receipt of retired pay and to recommend alternatives that recognize the role of the National Guard and reserve and that may create new incentives for ready reservists to volunteer for active service, thereby materially contributing to military readiness and enhanced mission capability.

The House recedes.

The conferees note that a requirement is included elsewhere in this report for the Secretary of Defense to report on the feasibility of providing space-available travel eligibility to gray-area retirees and their dependents.

National Call to Service program

The Senate amendment contained a provision (sec. 576) that would remove the Peace Corps from those national service programs through which National Call to Service participants may, after an initial period of active duty, complete their period of obligated service. The provision would also amend section 510 of title 10, United States Code, to make certain technical corrections related to the eligibility of National Call to Service participants for educational benefits under titles 10 and 38, United States Code, and clarify that educational assistance earned through the National Call to Service program would be provided through the Department of Veterans Affairs under an agreement entered into by the Secretary of Defense and the Secretary of Veterans Affairs.

Up to \$10.0 million in any fiscal year of funds available to the Army for multiyear purposes in appropriations for Research, Development, Test, and Evaluation, and for procurement, would be authorized to be transferred to a reserve component military personnel account in the amounts necessary to reimburse that account for the costs of military pay and allowances of reservists participating in this program.

The Senate amendment contained a provision (sec. 652) that would require the Secretary of the Army to conduct a pilot program in order to assess the extent to which contributions by the Army to the Thrift Savings Plan on behalf of first term enlistees would assist in recruiting non-prior service enlistees and result in establishing habits of financial responsibility.

Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. § 5170). The amount of the temporary increase in BAH would be determined based on the amount by which the costs of adequate housing for civilians have increased in designated areas as a result of the disaster, but may not exceed an amount equal to 20 percent of the applicable rate of BAH.

The House bill contained no similar provision.

The House recedes with an amendment that would also authorize the Secretary to approve a temporary increase in BAH to members stationed in areas experiencing a sudden increase in the number of members of the Armed Forces assigned and would authorize temporary lodging expenses for these areas for up to 20 days. This authority would appropriately be exercised in areas in which a rapid influx of military personnel due to such factors as base realignment and closure, global re-basing, and other force structural changes cause sudden increases in the cost of housing in designated areas.

Basic allowance for housing for reserve component members (sec. 610)

The House bill contained a provision (sec. 606) that would eliminate the requirement to pay a reduced rate of basic allowance for housing (BAH) to reserve component members when mobilized to serve on active duty for periods greater than 30 days and less than 140 days. The provision would also require the services to provide information about the new allowance to service members preparing to deploy to OEF or OIF.

The Senate amendment contained a similar provision (sec. 641(b)(3)) that would authorize the amount of the government-provided insurance to cover the cost of \$150,000 of coverage.

The Senate recedes with an amendment that would require, in the case of members who have insurance coverage under the SGLI and who serve in the theater of operations of OEF or OIF, payment of an allowance in an amount that would fund the first \$150,000 of SGLI coverage. The Secretary of Defense would be authorized,

but not required, by this provision, to pay for an additional \$250,000 of coverage or any portion thereof.

Income replacement payments for reserves experiencing extended and frequent mobilization for active duty service (sec. 614)

The House bill contained a provision (sec. 608) that would require payment to involuntarily mobilized reserve members of an amount that would replace the differential between their regular military compensation, plus any special or incentive pays and allowances, and the average monthly income they received during the 12 months preceding the month during which they were mobilized. Reservists and National Guardsmen who have private sector income exceeding their active duty income would be eligible for the income replacement payment for any full month following the date that the member completes 18 continuous months of service on active duty, or 24 months on active duty during the previous 60 months, or for any month during mobilization that occurs within 6 months of the member's last active duty tour. Payments would be limited to a minimum of \$50 and a maximum of \$3,000 each month. The provision would be effective after December 2005.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would allow eligible members of the Selected Reserve to consecutively complete earned periods of TRICARE coverage; allow a member of the Individual Ready Reserve to retain eligibility for coverage for 1 year while finding a position in the Selected Reserve; authorize 6 months of extended health care coverage for family members following the death of a reserve member; and allow 90 days after release from active duty for an eligible member of the Selected Reserve to elect participation in TRICARE Reserve Select.

Expanded eligibility of members of the Selected Reserve under the TRICARE program (sec. 702)

The Senate amendment contained a provision (sec. 705) that would expand eligibility for nearly all members of the Selected Reserve to enroll in TRICARE Standard while in a non-active duty status, whether or not the member had served on extended active duty in support of a contingency. The member would pay a premium equal to 28 percent of the annual premium established by the Secretary of Defense as the basis for such coverage.

The House bill contained no similar provision.

The House recedes with an amendment that would authorize TRICARE Standard coverage for all members of the Selected Reserve, and their families, who commit to continued service in the Selected Reserve. The amendment would also set the level of government subsidy based on new categories of eligibility.

The amendment, combined with enhancements to TRICARE Reserve Select authorized elsewhere in this Act, would establish a multi-tier TRICARE benefit. The highest tier of TRICARE coverage would be for reserves who have served on extended periods of active duty in support of a contingency operation since September 11, 2001, and who commit to continued service in the Selected Reserve.

The amendment would expand eligibility for government-subsidized TRICARE coverage by creating two additional tiers of coverage. One new tier of coverage would authorize members of the Selected Reserve who are not eligible for coverage under TRICARE Reserve Select and who receive unemployment compensation or who do not have access to employer-provided insurance to obtain coverage under the Standard option of TRICARE while in a non-active duty status. The member would pay 50 percent of the annual premium established by the Secretary for such coverage. The coverage would be available as long as the member continues to serve in the Selected Reserve, and would include all benefits of the TRICARE Standard option, including access to military treatment facilities on a space-available basis.

The amendment would further authorize a third tier of coverage for members of the Selected Reserve in a non-active duty status who, though they have not served on extended active duty in support of a contingency and have access to employer-provided health care coverage, elect coverage under TRICARE Standard. In this instance, the member would pay 85 percent of the annual premium established by the Secretary and coverage would be available, as is true for all health care options available to reserves, only as long as the member continues as a drilling member of the Selected Reserve.

The amendment would require that the Secretary implement the new benefits for members of the Selected Reserve not later than October 1, 2006.

The conferees view expanded benefits for members of the Selected Reserve as an opportunity for members of the Selected Reserve and their families, who commit to continued service in the Selected Reserve, to have access to high quality health care coverage under TRICARE while they are in a non-active duty status. The amendment is not intended to replace employer-provided health insurance, or for the member to be made ineligible for or to be persuaded to opt out of employer-provided health insurance based on membership in the reserves.

Subtitle B—TRICARE Program Improvements

Additional information required by surveys on TRICARE Standard (sec. 711)

The House bill contained a provision (sec. 702) that would expand the scope of the survey of the TRICARE Standard health care program that is required by section 723 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136).

The House bill contained no similar provision.

The House recesses.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that the TRICARE regional offices would be responsible for the monitoring, oversight, and improvement of the Standard option. The amendment would require an annual report to the Committees on Armed Services of the Senate and the House of Representatives on those activities, including actions taken by the Department of Defense to address challenges that have been identified by health care providers and beneficiaries with respect to use of the TRICARE Standard option.

Qualifications for individuals serving as TRICARE regional directors (sec. 717)

The House bill contained no similar provision.

The House recedes with an amendment that would require that the qualifications apply to persons selected for such positions as of the date of enactment of this Act, and clarify that a non-Department of Defense civilian who possesses the required experience may be selected to serve in the position of TRICARE Regional Office Director.

Elsewhere in this Act, the Department of Defense Task Force on Mental Health is required to identify the projects in its report. A pilot project to facilitate Internet-based diagnosis and treatment of Post-Traumatic Stress Disorder and other mental health conditions is required elsewhere in this act.

Department of Defense task force on mental health (sec. 723)

The Senate amendment contained a provision (sec. 733) that would require the Secretary of Defense to establish a task force to examine mental health issues in the Armed Forces. The task force would consist of 14 members appointed by the Secretary, and would be required to develop a long-term plan to improve mental health services provided to members of the Armed Forces.

The House bill contained no similar provision.

The House recedes with an amendment that would require that persons appointed to the task force have expertise in national mental health policy and military personnel matters, and that such members would include at least one family member of a member of the Armed Forces who has experience working with military families. The amendment would also require the task force to identify pilot projects on early diagnosis and treatment of Post-Traumatic Stress Disorder and other mental health conditions authorized elsewhere in this Act, as well as to evaluate the efficacy of programs to ensure a seamless transition of care for members on active duty from the Department to the Department of Veterans Affairs. The amendment would require a report on the efficiency of pre- and post- deployment mental health screening, including mental health screenings for members of the Armed Forces who have experienced multiple deployments. The amendment would require the Secretary to develop a plan based on the recommendations of the task force, and submit the plan to the Committees on Armed Services of the Senate and House of Representatives not later than 6 months after receipt of the task force report.

The House recedes with an amendment that would remove the requirement for the report to include a description of the amounts obligated and required for the system, and to incorporate the new name, AHLTA, of the Department of Defense electronic health record system.

The conferees applaud the Department for its development of an electronic health record system for the military health care system, and join in support of the Department's vision for a continuously updated digital medical record that would be completely transferable electronically to the Veterans' Health Administration. The conferees believe it is critical that the Department adhere to the schedule for full implementation of the AHLTA system in 800 military health clinics and 70 military hospitals throughout the world by December 2006.

Comptroller General study and report on Vaccine Healthcare centers (sec. 736)

The House bill contained no similar provision.

The House recedes with an amendment to require that the study include a comparison of health and mental health events, which may be associated with different anti-malarial drugs. The conferees expect that in conducting the study the Secretary will consult with epidemiological and clinical researchers from other governmental organizations, as well as with researchers outside of the Federal Government.

Report on Reserve dental insurance program (sec. 738)

The Senate amendment contained a provision (sec. 1508) that would require the Secretary of Defense to study and report to the congressional defense committees by February 1, 2007, on the most effective mechanism or mechanisms for paying premiums for the Reserve dental insurance program, and to assess the effectiveness of mechanisms utilized to inform members of the reserve components of the availability and benefits of the program.

The Senate amendment contained a similar provision (sec. 717).

The Senate recesses.

Modification of health care quality information and technology enhancement reporting requirement (sec. 742)

The House bill contained a provision (sec. 712) that would modify the annual health care quality reporting requirement of the Department of Defense as required by section 723 of the National Defense Authority Act for Fiscal Year 2000 (Public Law 106-65) to better align the report with current standards in health care quality.

The Senate amendment contained a similar provision (sec. 716).

The Senate recedes with an amendment that would add a reporting requirement on measures of timeliness and accessibility of health care.

The conferees are concerned that military medical leaders at all levels must continue to emphasize accountability and vigilance concerning the quality of military health care services, including the prompt and just disposition of adverse events. Emphasis on cost should never rise to a higher level of priority than the quality of services provided.

The conferees are also concerned that the services provided by civilian networks and other contracted civilian providers be of equally high quality, and encourages the Department to examine health care staffing standards such as those promulgated by the Joint Commission on the Accreditation of Healthcare Organizations to ensure continued high quality standards by civilian providers of care.

Correction to eligibility of certain reserve officers for military health care pending active duty following commissioning (sec. 743)

The House bill contained a provision (sec. 713) that would ensure that Reserve Officers' Training Corps (ROTC) graduates have access to military health benefits while awaiting active duty orders.

The Senate amendment contained a similar provision (sec. 701).

The Senate recedes.

Prohibition on conversions of military medical and dental positions to civilian medical positions until submission of certification (sec. 744)

The House bill contained a provision (sec. 714) that would prohibit the secretary of a military department from converting any military medical position to a civilian medical position until the Secretary of Defense submits a certification to the Committees on Armed Services of the Senate and the House of Representatives that such conversions will not affect health care quality or access. The provision would also require the Comptroller General to conduct a study on the effect of such conversions on the Defense Health Program, and report those findings to Congress not later than March 1, 2006.

The Senate amendment contained a similar provision (sec. 572) that would prohibit the conversion of any medical or dental military position to a civilian position until 90 days after receipt by Congress of a certification by the Secretary of Defense that such conversions did not increase civilian health care costs; that the con-

versions were in support of joint medical and dental readiness requirements of the uniformed services; and that adequate numbers of civilian providers were available to fill civilian positions based on market surveys.

The Senate recedes with an amendment that would require the certification of both medical and dental military position conversions, and would require that the Secretary of Defense submit a report to Congress along with the required certification on actions taken in response to the recommendations of the Comptroller General study.

Clarification of inclusion of dental care in medical readiness tracking and health surveillance program (sec. 745)

The House bill contained a provision (sec. 715) that would clarify that dental readiness is included in the requirement for medical tracking and surveillance activities authorized in the Ronald W. Reagan National Defense Authorization Act for Fiscal year 2005 (Public Law 108-375).

The Senate amendment contained no similar provision.

The House bill contained a provision (sec. 716) that would require the Secretary of the Navy, in coordination with the Secretary of Veterans Affairs, to conduct an outreach program to contact members and former members of the naval service who may have increased risk of sarcoidosis as a result of having been exposed to particles resulting from the removal of nonskid coating used on naval ships.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify that the Secretary of the Navy shall attempt to reach as many members and former members of the naval service as possible who may have had such exposure.

The House bill contained no similar provision.

The House recedes with an amendment that would expand the report requirements to include acceleration of medical research and development activities.

Follow up assistance for members of the Armed Forces after pre-separation physical examinations (sec. 749)

The Senate amendment contained a provision (sec. 1603) that would require the Secretary of Defense, in consultation with the Secretary of Veterans Affairs, to assist a member of the Armed Forces in obtaining necessary follow-up health care services, which are required as a result of a pre-separation physical examination. The provision would also require the Secretary to provide information on private sector sources of care and assistance to enroll in the health care system of the Department of Veterans Affairs.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that the follow-up services would be obtained from the Department of Veterans Affairs.

Policy on role of military medical and behavioral science personnel in interrogation of detainees (sec. 750)

The Senate amendment contained a provision (sec. 1071) that would require the Secretary of Defense to establish a policy on the role of military medical and behavioral science personnel in the interrogation of persons detained by the Armed Forces.

The House bill contained no similar provision.

The House recedes.

The conferees note that the Department of Defense has published Department of Defense Directive 3115.09, "DoD Intelligence Interrogations, Detainee Debriefings and Tactical Questioning" (November 3, 2005), which provides limited guidance on detainee medical issues and refers to standards and procedures set forth by the Assistant Secretary of Defense for Health Affairs (ASD (HA)). The conferees are concerned that the policy on "Medical Program Principles and Procedures for the Protection and Treatment of Detainees in the Custody of the Armed Forces of the United States," dated June 3, 2005, which was issued by the ASD (HA), does not fully address all medical issues, including the role of medical and behavioral personnel in interrogation, and the use and release of detainee medical information.

The conferees expect that in the development of the policy required by this section, the Secretary of Defense will consult with and consider the views of national and international medical and health care professional organizations that are examining the professional ethics that govern their members' work.

The conferees expect that any policy promulgated by the Secretary of Defense concerning the role of medical or behavioral science personnel in interrogation-related matters will reflect the same applicability to DoD civilians, DoD contractors and non-DoD civilians as required by Department of Defense Directive 3115.09.

LEGISLATIVE PROVISIONS NOT ADOPTED

The Senate amendment contained a provision (sec. 723) that would require the Comptroller General to provide a report to the appropriate committees of Congress that would contain an overview of the current health care systems of the Department of Defense and the Department of Veterans Affairs; a comparative analysis of the characteristics of each system; and an assessment of the advantages and disadvantages of an expanded partnership between the two Departments for the purpose of providing health care services to military retirees and their dependents.

The House bill contained no similar provision.

The Senate recesses.

Early identification and treatment of mental health and substance abuse disorders

The House bill contained a provision (sec. 717) that would authorize the Secretary of Defense to carry out activities to foster the early identification and treatment of mental health and substance abuse problems experienced by members of the Armed Forces, with emphasis on those who have served in a theater of combat operations in the preceding 12 months. The activities would focus on changing attitudes within the Armed Forces regarding mental health and substance abuse treatment, and would include informational messages directed to military members, their family members, commanders, and supervisory personnel.

The Senate amendment contained no similar provision.

The House recesses.

The Department of Defense Task Force on Mental Health authorized elsewhere in this Act is directed to assess the adequacy of early identification and treatment of mental health and substance abuse problems through the use of internal mass media communication, as well as to assess other tools intended to change attitudes within the Armed Forces regarding mental health and substance abuse treatment.

Limitation on deductible and copayment requirements for nursing home residents under the pharmacy benefits program

The Senate amendment contained a provision (sec. 702) that would limit the out-of-pocket pharmacy expenses for a beneficiary who is a resident of a nursing home and who is required, by state law, to use nursing home pharmacy services that are not part of the pharmacy network under TRICARE.

The House bill contained no similar provision.

The Senate recesses.

Mental health screening of members of the Armed Forces for Post-Traumatic Stress Disorder and other mental health conditions

The Senate amendment contained a provision (sec. 574) that would require the Secretary of Defense to perform mental health screenings on each member of the Armed Forces who is deployed

in a combat operation or to a combat zone. Such screenings would occur prior to deployment, and at 30 and 120 days after the date of the member's return from the deployment.

The House bill contained no similar provision.

The Senate recedes.

A requirement to assess the efficacy of pre- and post-deployment mental health screening is included in the Department of Defense Task Force on Mental Health authorized elsewhere in this Act.

Services of mental health counselors

The House bill contained a provision (sec. 701) that would allow mental health counselors to be reimbursed for services provided to TRICARE beneficiaries without prior physician referral or supervision. The provision would also permit mental health counselors to enter into personal service contracts with the Department of Defense and require that such counselors meet the licensure or certification requirements for "health care professional" established by section 1094 of title 10, United States Code.

The Senate amendment contained a provision (sec. 721) that would authorize mental health counselors who are licensed by a State to provide services without physician referral or supervision in "medically underserved areas" pursuant to section 332 of the Public Health Service Act (42 U.S.C. 254e). The amendment would authorize personal services contracts, and also require the Secretary of Defense to establish rules concerning credentialing or certification of participating mental health counselors and payment rates.

The conference report does not include either provision.

The conferees recognize the valuable services that mental health counselors provide for valid mental health disorders under the TRICARE program. The Department of Defense estimates that, on an annual basis, 28,000 TRICARE beneficiaries have an average of seven visits to mental health counselors, in accordance with existing requirements for physician referral and supervision. The conferees encourage the Department to promote even greater utilization of licensed mental health counselors, where appropriate, as part of an integrated health care team, and to examine ways to make as efficient as possible the method of communication among primary care and mental health care providers involved in the treatment of valid mental health disorders in the TRICARE program.

The conferees direct the Department report to the Committees on Armed Services of the Senate and the House of Representatives within 120 days of the date of enactment of this Act on actions taken to improve the efficiency and effectiveness of procedures facilitate physician referral and supervision of licensed mental health counselors. The report shall include a description of "best practices" employed throughout the military health system to ensure access to services provided by mental health counselors under the TRICARE program. The conferees encourage the Department to monitor closely the progress within the mental health community toward achievement of a national standard for graduate education accreditation and national professional accreditation, to include

uniform professional credentials for licensed mental health counselors. The report should also review the quality of care being provided under the program.

Study and report on civilian and military partnership project

The Senate amendment contained a provision (sec. 724) that would require the Secretary of Defense to conduct a study on the feasibility of conducting a military and civilian partnership project in which Department of Defense and civilian health care providers would provide services to military personnel and civilians at a military medical facility.

The House bill contains no similar provision.

The Senate recesses.

TITLE VIII—ACQUISITION POLICY, ACQUISITION
MANAGEMENT, AND RELATED MATTERS

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Provisions Relating to Major Defense Acquisition
Programs

Requirement for certification before major defense acquisition program may proceed to Milestone B (sec. 801)

The House bill contained a provision (sec. 801) that would require the Secretary of Defense to certify that a major defense acquisition program meets certain criteria (including technological maturity requirements) before it receives Milestone B approval, or key Decision Point B approval in the case of a space program. The Secretary could waive the certification requirement for national security reasons.

The Senate amendment contained two similar provisions (sections 809 and 858). Section 809 would require the Department of Defense to complete an analysis of alternatives before commencing a major defense acquisition program. Section 858 would extend an existing requirement for annual reports on major defense acquisition programs that fail to meet technological maturity requirements.

The Senate recesses with an amendment that would: (1) incorporate the requirement for an analysis of alternatives into the House provision; (2) require certification or waiver by the milestone decision authority, rather than the Secretary; and (3) authorize waiver of the certification requirement only if, absent the waiver, the Department of Defense would be unable to meet critical national security objectives.

Requirements applicable to major defense acquisition programs exceeding baseline costs (sec. 802)

The House bill contained two provisions (secs. 802 and 803) that would modify the oversight requirements for major defense acquisition programs (MDAPs) in sections 2433 and 2435 of title 10, United States Code. Section 802 would require that the Secretary of Defense conduct an analysis of alternatives for any MDAP for which the program acquisition unit cost or the procurement unit cost rises by 15 percent over the baseline estimate. Section 803

would restrict the circumstances in which the Secretary may modify a baseline estimate.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) amend section 2435 to add a new term—“original Baseline Estimate”—and to restrict the circumstances in which an original baseline estimate may be modified; (2) add two new terms—“significant cost growth” and “critical cost growth”—to section 2433; (3) define significant cost growth and critical cost growth by reference to both the current baseline estimate for an MDAP and the original baseline estimate for the program; and (4) require additional analysis and explanation (but not a formal analysis of alternatives) for any MDAP that experiences critical cost growth.

Taken together, these changes would tighten requirements for flagging programs that are experiencing problematic cost growth and ensure more rigorous review and analysis of these programs. The conferees believe that the added discipline imposed by these provisions should encourage the Department of Defense both to establish more realistic and achievable cost and performance estimates at the outset of MDAPs and to more aggressively manage MDAPs to avoid undesirable cost growth on these programs.

Requirements for determination by Secretary of Defense and notification to Congress before procurement of major weapon systems as commercial items (sec. 803)

The Senate amendment contained a provision (sec. 804) that would prohibit the purchase of a major weapon system as a commercial item unless such purchase is specifically authorized by Congress.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary of Defense, prior to any major weapon system being purchased under procedures established for the procurement of commercial items, to: (1) determine that a weapon system meets the definition of a commercial item; (2) determine that it is necessary to meet national security objectives to purchase such weapon system as a commercial item; and (3) notify congressional defense committees at least 30 days prior to the purchase or the treatment of the major weapon system as a commercial item.

Reports on significant increases in program acquisition unit costs or procurement unit costs of major defense acquisition programs (sec. 804)

The Senate amendment contained a provision (sec. 807) that would require the Secretary of Defense to report to the congressional defense committees on the acquisition status of major defense acquisition programs whose costs have exceeded by more than 50 percent the original baseline projection of such costs.

The House recedes with an amendment that would rewrite section 2330 of title 10, United States Code, to strengthen the requirement for the Secretary to implement a management structure for the procurement of contract services for the Department of Defense.

Section 2330, as amended, would establish a senior official responsible for the management of the acquisition of contract services for each of the military departments and for the defense agencies and components outside the military departments. Under the amended section 2330, the Under Secretary of Defense for Acquisition, Technology, and Logistics would be responsible for developing and maintaining policies, procedures, and best practices guidelines for the acquisition of contract services, while the senior officials responsible for the acquisition of contract services would be responsible for the implementation of those policies, procedures, and guidelines by the military departments and defense agencies. Each senior official would be required to assign responsibility for the review and approval of procurements to specific individuals in the Department, subject to the direction, supervision, and oversight of the senior official. This provision would give the Department flexibility as to the number, qualifications, and location of officers and employees authorized to make day-to-day decisions regarding the acquisition of contract services while ensuring that, in making such decisions, these officers and employees are subject to the direction, supervision, and control of an acquisition chain of command.

The Senate recedes.

The conferees note that section 2533a (b)(1)(B) of title 10, United States Code, as modified by this section, does not cover small arm protective inserts (“SAPI plates”) for body armor because these inserts are “added to, and not normally associated with, clothing”.

The provision would give the civilian board jurisdiction over contract appeals from non-defense agencies and ensure that the board could, with the concurrence of the heads of affected agencies, assume responsibility for any other functions previously performed by the boards of contract appeals for civilian agencies.

The conference agreement would make no change to the Armed Services Board of Contract Appeals (ASBCA), because the ASBCA already has consolidated jurisdiction for contract appeals from the Department of Defense, the Department of the Army, the Department of the Navy, the Department of the Air Force, and the National Aeronautics and Space Administration.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that the Senate provision adding a new category of statutes and regulations that are waivable to prevent combat fatalities was not necessary, because the Department may already waive any provision of law, policy, directive, or regulation addressing the solicitation and selection of sources pursuant to the authority in section 811 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375) for the procurement of equipment urgently needed to eliminate a combat deficiency that has resulted in combat fatalities.

The Senate amendment contained a provision (sec. 812) that would authorize the Secretary of Defense to annually determine whether a foreign country with a reciprocal defense procurement Memorandum of Understanding or agreement with the United States has qualitatively or quantitatively increased defense exports to China. If it is determined that no qualitative or quantitative increase has occurred in the previous year, the Secretary may on an annual basis waive the application of statutory domestic source requirements and domestic content requirements, provided that: (1) the application of the requirements would impede the reciprocal procurement of defense items under a Memorandum of Under-

standing between the United States and another country; and (2) the other country does not discriminate against items produced in the United States to a greater degree than the United States discriminates against items produced in that country.

The House bill contained no similar provision.

The Senate recesses.

Contractors on the battlefield

The House bill contained a title (title XVI) that would establish certain requirements for contractors on the battlefield, including contractors accompanying the force and contractors not accompanying the force.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that subsequent to action on the House bill, the Secretary of Defense issued regulations addressing the issue of contractors on the battlefield. However, the regulations issued by the Secretary apply only to contractors accompanying the force.

The conferees believe that it is important for the Department of Defense to address issues raised by the presence on the battlefield of contractors not accompanying the force. This term includes contractors and subcontractors at any tier under a contract with any federal government agency, if the work to be performed is related to private security, reconstruction, humanitarian assistance, peacekeeping, or other activities in an area of responsibility of a commander of a combatant command in which there are ongoing combat operations or there is a significant risk that contractor employees could come under hostile fire.

Accordingly, the conferees direct the Secretary to revise all relevant policy, guidance, and instructions issued pursuant to section 1205 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) to address security issues raised by contractors not accompanying the force. The re-

vised guidance should, at a minimum, address the following issues: (1) measures to ensure that security issues raised by contractors not accompanying the force are addressed in integrated planning by the combatant commanders; (2) measures to ensure visibility and accountability of employees of contractors not accompanying the force (including accounting for U.S. nationals, local nationals, and third-party nationals); (3) measures to ensure the communication of relevant threat information to contractors not accompanying the force; (4) measures addressing force protection and weapons issuance issues for contractors not accompanying the force (including accounting for the number and qualifications of all personnel carrying weapons); and (5) measures to ensure that the data gathered in the implementation of this guidance is kept and maintained in a central location for a reasonable period of time.

GAO subsequently issued a June 1, 2004, report entitled "Rebuilding Iraq: Fiscal Year 2003 Contract Award Procedures and Management Challenges". The Senate amendment contained a provision (sec. 809I) that would extend and modify the authority to conduct share-in-savings contracts at the Department of Defense.

The conferees direct the Secretary of Defense to submit a report to the Committees on Armed Services of the Senate and the House of Representatives regarding the utility of share-in-savings contracts and any steps that may be necessary and appropriate to make share-in-savings contracting a viable, effective, and desirable contracting method for use by the Department. The report shall be submitted by October 1, 2006.

The provision would also require the Secretary to report to the congressional defense committees on the status of efforts to establish requirements for radio frequency identifier technology for Department of Defense contracting.

The House bill contained no similar provision.

The Senate recesses.

The conferees direct the Secretary to: (1) develop and implement a strategy to educate the small business community on radio frequency identifier technology requirements; and (2) report to the congressional defense committees not later than October 1, 2006, on the strategy and the extent to which it has been implemented.

The House bill contained no similar provision.

The Senate recedes.

The conferees expect the General Accountability Office to address the need, if any, for a reporting requirement of this type in the context of the review of the Department's efforts to identify contract fraud, waste, and abuse, as required by section 841.

Review of certain contractor ethics matters

The Senate amendment contained a provision (sec. 822) that would require the Secretary of Defense to review certain contractor ethics matters.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the advisory panel on acquisition laws, regulations, and practices established pursuant to the Services Acquisition Reform Act of 2003 (title XIV of Public Law 108-136) (the "SARA panel") is currently considering these issues. The Senate amendment contained a provision (sec. 809J) that would express the sense of the Senate on the circumstances in which the Secretary of Defense may provide financial assistance to the Army National Guard for the performance of certain duties without the use of competitive procedures.

The House bill contained no similar provision.

The Senate recedes.

The conferees agree that section 806 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) already makes the competition requirement in section 113 of title 32, United States Code, subject to the exceptions in section 2304(c) of title 10, United States Code. Section 806 ensures that procedures other than competitive procedures are available for the selection of National Guard activities in the same cir-

cumstances and to the same extent as such procedures are available for the selection of any other entity.

The House bill contained a provision (sec. 812) that would require the use of commercially available online procurement services, including reverse auction services, to purchase commercial items to the maximum extent practicable.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that online procurement services, such as reverse auction services, are appropriate for the acquisition of some types of commercial items, but may not be suitable for others. For example, items that call for technical solutions, require modification, or will be acquired on a basis other than low-cost are unlikely to be suited to acquisition through reverse auction methods. There may be cases in which the use of commercially available online procurement services could limit access to federal agency contracts.

The conferees direct the Administrator for Federal Procurement Policy, in consultation with the Federal Acquisition Regulatory Council established pursuant to section 25 of the Office of Federal Procurement Policy Act (41 U.S.C. 421), to review the use of online procurement services, such as reverse auction services, and identify: (1) types of commercial item procurements that are suitable for the use of such services; and (2) features that should be provided by online procurement services that are used by federal agencies.

TITLE IX—DEPARTMENT OF DEFENSE ORGANIZATION AND MANAGEMENT

ITEMS OF SPECIAL INTEREST

The current state of military space

Despite the opportunities identified for the future of military space highlighted by the 2001 Space Commission, the conferees believe the Department of Defense response has been disappointing. The conferees see fundamental shortfalls and a lack of sufficient improvement in three areas that diminish U.S. preeminence in space and threaten national security. These areas include the development of a fully qualified and competent space cadre; improvements in the acquisition system that will restore confidence in the development of our space systems; and the creation of Operationally Responsive Space (ORS) systems.

The development of a qualified and competent space cadre has received growing attention, particularly in the Air Force. Initiatives such as National Security Space Institute and Space Education Consortium at Air Force Space Command as well as the Joint Space Studies Center at Air University are commendable efforts. The conferees are concerned, however, about the breadth and depth of the current plan for development of a space cadre, specifically in the area of education and training, in addressing the role of academia and industry in a space cadre. The conferees believe the accumulation of skills and competencies of government, academia, and industry represent a comprehensive view of the military space community for the United States. As such, the conferees recommend that the Department be more aggressive in developing programs and partnerships across the U.S. government, industry, and academia.

While the Department has taken positive steps to improve the current space acquisition system, it is not yet apparent what impact these initiatives might have on the performance of space acquisition. As a result, the conferees will maintain this issue at the forefront of congressional interests. Moreover, the conferees rec-

ommend that the Department engage those issues not yet fully addressed. Those include the requisite workforce size and skills, subcontractor management, and technical maturity of acquisition projects. Additionally, the conferees recommend that the Department develop an alternative and complementary business model for space acquisition and system deployment that will increase the production rate of space systems and lower costs.

The conferees believe ORS, the ability to assemble and launch a desired space-based capability on demand in a cost effective manner, has the potential to truly transform military space. The conferees believe that ORS will provide many new benefits to the military space community. The conferees also believe that ORS will stimulate the production of simpler, shorter living satellites, thus dramatically reducing current costs and shortening schedules. Additionally, low cost launch and “plug and play” satellite development will create the ability to refresh systems with new technology and fly constellations optimized for theater commanders. The conferees are disappointed in the progress achieved and are concerned about a lack of vision and initiative by the Department in this area. The conferees believe ORS will transform the battlefield and the way the warfighter thinks of space and, as such, strongly encourage the Air Force to embrace this concept and the Department to consider this in the development of the Quadrennial Defense Review.

The House bill contained no similar provision.

The House recesses with a clarifying amendment.

The conferees note that this provision provides unusual flexibility to the Department of Defense. It was included in response to a late request from the Department in order to permit important chemical demilitarization activities to proceed without further delay. The provision permits a one-time authorization to use fiscal year 2006 research, development, test, and evaluation funds for military construction at the ACWA sites. The conferees expect the Department to request funding for these projects in the proper military construction accounts in the fiscal year 2007 and future years budget submissions. The conferees also expect the Department to submit the required 1391 forms for these military construction projects.

The conferees strongly urge the Department and the administration to take all steps necessary to ensure that the chemical demilitarization programs receive the management attention, priority, and resources required to ensure that the United States meets its obligations under the Chemical Weapons Convention to destroy its chemical weapons stockpile by April 2012, and that it does so safely and efficiently.

struction or memorandum issued by the General Counsel of the Department of the Air Force in reliance upon the May 15, 2003, order.

On July 14, 2005, the Acting Secretary of the Air Force issued a new order on the subject of the functions and duties of the General Counsel and the Judge Advocate General. This order by its terms supersedes the May 15, 2003, order, and does not contain the objectionable language contained in the earlier order. It appears that no final instruction or memorandum was ever issued by the General Counsel of the Department in reliance on the May 15, 2003, order.

The conferees will continue to monitor the situation in the Department to ensure that the Secretary of the Air Force, the Chief of Staff of the Air Force, and commanders continue to have access to independent legal advice from the Judge Advocate General and judge advocates in the field, as required by section 574 of the Ronald W. national emergency pursuant to the National Emergencies Act (50 U.S.C. 1601 et seq.), and upon request of the Secretary of Defense, return the respective vessel to the United States. In such a case, the amendment would require that the terms of the agreement require that the title to the vessel or vessels revert immediately to the United States, unless otherwise notified by the Secretary of Defense.

Transfer of ex-U.S.S. Forrest Sherman (sec. 1015)

The House bill contained a provision (sec. 1015) that would require the Secretary of the Navy to transfer the decommissioned destroyer ex-U.S.S. *Forrest Sherman* to the U.S.S. *Forrest Sherman* DD-931 Foundation, Inc., a non-profit organization under the laws of Maryland, subject to the submission of a donation application for that vessel that is satisfactory to the Secretary. The provision would allow the President to waive this prohibition, when the President determines this waiver to be in the national security interest.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would instead require that the Secretary of Defense submit a report, no later than March 1, 2006, on leasing of vessels to meet national defense sealift requirements to the Committees on Armed Services of the Senate and the House of Representatives. Oklahoma Memorial Foundation has sufficient funding to complete construction of the memorial and that the memorial and other future memorials at Pearl Harbor meet the requirements set forth in the “Pearl Harbor Naval Complex Design Guidelines and Evaluation Criteria for Memorials of April 2005.” The amendment would also authorize the Secretary of the Interior to establish and operate a transportation system linking the U.S.S. Arizona Memorial Visitor Center with historic sites and visitor attractions within the Pearl Harbor Naval Complex, including Ford Island.

The House bill contained a provision (sec. 1023) that would clarify that a joint task force supporting law enforcement agencies conducting counterdrug activities may use funds available for that activity to also support counterterrorism activities by those law enforcement agencies. The fiscal authority provided here is a clarification of authority for joint task forces to support law enforcement agencies in both counterdrug and counterterrorism missions originally provided by Congress in the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136).

The Senate amendment contained a similar provision (sec. 1032) that would limit the use of funds authorized to be appropriated for counterdrug activities to also support counterterrorism activities to the borders and territorial waters of the United States.

The Senate recedes with an amendment that would make this funding available for fiscal years 2006 and 2007, and require the Secretary of Defense to report on the effect of the availability of such funding on counterdrug and counterterrorism activities and objectives. The conferees believe the Secretary should ensure that counterdrug funding is utilized to fund counterterrorist activities where there is overlap between counterdrug and counterterrorist objectives.

Sense of Congress regarding drug trafficking deterrence (sec. 1023)

The Senate amendment contained a provision (sec. 1081) that would express a sense of the Senate that the Department of Defense fully fund the Counterdrug Tethered Aerostat program and that the Department install a maritime radar on the Lajas, Puerto Rico aerostat.

Subtitle E—Reports and Studies

Review of Defense Base Act insurance (sec. 1041)

The Senate amendment contained a provision (sec. 1042) that would require the Secretary of Defense to review current and future needs, options, and risks associated with Defense Base Act (DBA) (42 United States Code, sections 1651–1654) insurance.

The House bill contained no similar provision.

The House recesses.

The conferees note that the Department of Defense recently initiated a 1-year pilot program for a single insurer to provide DBA insurance for all Army Corps of Engineers contractors performing overseas. On November 22, 2005, the Army announced that it had entered a contract under which insurance rates would range from \$5.00 to \$8.50 per \$100.00 of salary cost. This represents considerable savings over the DBA insurance rates between \$10.00 and \$21.00 per \$100.00 of salary cost previously paid by the Department of Defense, as reported by the Government Accountability Office. The conferees believe that the pilot program is an important first step. The report required by this section can help build on that program to develop a DBA contracting mechanism that provides the greatest benefits to the federal government and its contractor employees overseas.

The conferees note that Department missions and strategies depend heavily on semiconductor microelectronics. These microelectronics range from extremely high performance military unique systems to commodity microelectronics that are used in standard commercial computers, radios, and other electronics equipment. Given the broad application and importance of ensuring an adequate supply of these components, the conferees urge the Secretary of Defense to consult with other federal departments and agencies, industry, and academic organizations in development of the report required by this provision.

The Department of Energy coal-to-liquid fuel program, conducted at the Department of Energy National Energy Technology Laboratory, will be one of the primary programs that will support near-term options to develop clean domestic fuel sources for turbine engines in use by the Department of Defense. The conferees support this collaboration and direct the Secretary of Defense and the Secretary of Energy to report on the progress of their efforts and to develop a plan for the future.

The Department of State, through the Office of the Under Secretary of State for Public Diplomacy, would coordinate the implementation of the strategy.

The conferees commend the interagency working group, which was responsible for developing the strategy, for considering the recommendations made at the National Language Conference held on August 17, 2004, by over 300 leaders and practitioners from federal, state, and local government agencies; academic institutions; business and industry; foreign language interest groups; and foreign nations. The conferees note that:

(1) Consistent with warhead levels agreed to in the Moscow Treaty, the United States is modifying the capacity of the Minuteman III intercontinental ballistic missile (ICBM) from its prior capability to carry up to 3 independent reentry vehicles (RVs) to carry as few as a single RV, a process known as downloading.

(2) The 2001 Nuclear Posture Review (NPR) confirmed the need for 500 ICBMs.

(3) In a potential nuclear crisis, it is important that the nuclear weapons systems of the United States be configured so as to discourage other nations from making a first strike.

(4) The ICBM force is currently being considered as part of the deliberations of the Department of Defense for the Quadrennial Defense Review.

The conferees note that the policy of the United States, as set out in the 2001 NPR, is to deploy a force of 500 ICBMs. The conferees further note that unanticipated strategic developments may compel the United States to make changes to this force structure in the future.

Repeal of requirement for report to Congress regarding global strike capability

The House bill contained a provision (sec. 1045) that would repeal the requirement in section 1032 of the National Defense Authorization Act for fiscal year 2004 (Public Law 108-136) for the Secretary of Defense to submit a report on Global Strike for fiscal year 2006.

The Senate amendment contained no similar provision.

The House recesses.

The conferees, after reviewing the June 2005 Prompt Global Strike Plan submitted by the Secretary, concur with the need to explore a wide range of capabilities for responding rapidly to emerging threats to the United States and its strategic interests. The report noted a capability gap of particular concern: "for the near future, in the event of rapidly developing crisis, the Department of

Defense will not have non-nuclear, long-range precision strike options for consideration by the national leadership.” The conferees believe it is important to close this gap as soon as technically possible.

The conferees understand from the 2005 report that the evaluation of a wide range of current and future global strike capabilities is ongoing, and will be in the capabilities mix examined in the 2005 Quadrennial Defense Review. However, in the section of the 2005 report defining global strike assets, the Department appears to limit global strike to capability delivered by aircraft or naval platforms, neglecting land-based options. As such, the conferees are concerned that ample consideration is not being given to the full spectrum of options to provide a robust and cost-effective capability to strike time-urgent targets around the globe. The conferees, therefore, want to emphasize the importance of a complete evaluation, considering all air, sea, and land-based capabilities, not limited to intercontinental ballistic missiles, and including mobile, land-based boost glide capabilities. The conferees also direct the Department to include in their 2006 annual report on Prompt Global Strike a full discussion of how the Department plans to close the non-nuclear, long-range precision strike gap.

The Senate amendment contained a provision (sec. 1047) that would require the Director of National Intelligence to provide the members of the Select Committee on Intelligence of the Senate and the Permanent Select Committee on Intelligence of the House of Representatives a detailed report on the cost and operations of any clandestine prison or detention facility currently or formerly operated by the U.S. Government, regardless of location, where detainees in the global war on terrorism are or were held.

emergency supplemental appropriations for the Department of Defense for fiscal year 2006.

The Senate recesses.

The conferees have strongly supported and will continue to support the development and employment of remote weapon stations on combat vehicles such as the Stryker and on tactical wheeled vehicles such as the M1114 Up-Armored High Mobility Multipurpose Wheeled Vehicle and the Armored Security Vehicle. The conferees understand the benefits provided by remote weapon station platforms such as providing day and night target detection, recognition, and engagement at long distances, while allowing the soldier or marine to remain protected by the confines of an armored vehicle. In particular, the conferees agree with the findings in section 1091 regarding the benefits of remote weapon station platforms to include the CROWS platform.

The conferees agree to authorize an additional \$4.0 million in PE 64601A for the continued development of a reduced weight and size configuration of the CROWS platform and an additional \$2.0 million in PE 63640M for additional CROWS platforms systems for the U.S. Marine Corps.

The provision would also authorize waiver of the limitation on the number of family members of an employee who could receive such assistance, under circumstances determined to be appropriate by the head of the agency.

The Senate amendment contained a similar provision (sec. 631(b)(1)) that would authorize travel and per diem allowances for

up to three family members of federal civilian employees who are repatriated after being held captive.

The House recedes to section 631(b)(1) of the Senate amendment with a technical amendment.

The conferees understand that the Director of National Intelligence has entered into a contract with the Department of Defense for services to carry out the pilot project, as authorized under section 613 of the Intelligence Authorization Act of 2005 (Public Law 108–487).

The House recedes with an amendment that would limit the authorized increase to 50. The conferees believe any further increases must be accompanied by greater justification that addresses increases in intelligence flag and general officer positions, growth in Defense Intelligence Senior Leader positions, and the affect these increases would have on the GS–15 and military 06 inventories in the affected defense agencies.

LEGISLATIVE PROVISIONS NOT ADOPTED

Authority for heads of agencies to allow shorter length of required service by federal employees after completion of training

The House bill contained a provision (sec. 1104) that would provide the heads of executive agencies the authority to determine the appropriate length of service an employee must perform in return for training paid for by the U.S. government. The Senate amendment contained no similar provision. The House recedes.

TITLE XII—MATTERS RELATING TO FOREIGN NATIONS

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Assistance and Training

Extension of humanitarian and civic assistance provided to host nations in conjunction with military operations (sec. 1201)

The House bill contained a provision (sec. 1201) that would increase funding in support of activities to detect and clear landmines. It would also expand medical, dental, and veterinary care to include related education, training, and technical assistance.

The Senate amendment contained a similar provision (sec. 1202). The Senate recedes.

Commanders' Emergency Response Program (sec. 1202)

The House bill contained a provision (sec. 1202) that would authorize the Secretary of Defense to use up to \$500.0 million in fiscal year 2006 operations and maintenance funding for increased

costs due to Operation Iraqi Freedom and Operation Enduring Freedom for the Commanders' Emergency Response Program (CERP). The CERP program provides commanders in Iraq and Afghanistan funds for use in small humanitarian and reconstruction projects in their areas of responsibility. The provision would require quarterly reports on the source and use of funds pursuant to this program. The provision would prohibit the use of CERP funds for training and equipping the Iraq and Afghanistan national armies, police, and security forces, and it would require the Secretary to issue guidance to the Commander, U.S. Central Command, on the use of CERP funds.

The Senate amendment contained a similar provision (sec. 1201), but provided 2-year authority for the CERP program. The provision did not include a prohibition on use of CERP funds for specified purposes, nor did it require the Secretary to issue CERP guidance.

The House recedes with an amendment that would provide the Secretary authority to waive any provision of law that would prohibit, restrict, limit, or otherwise constrain implementation of the CERP program in Iraq and Afghanistan. The amendment would also require the Secretary to submit to the congressional defense committees within 30 days of enactment the current guidance for CERP, and to submit to those committees any changes to the CERP guidance within 15 days of the issuance of such modified guidance.

It is the understanding of the conferees that the CERP program is currently being implemented pursuant to the guidance issued by the Comptroller on July 27, 2005. That guidance explicitly prohibits, among other things, the use of CERP funds for providing goods, services, or funds to national armies, National Guard forces, border security forces, civil defense forces, infrastructure protection forces, highway patrol units, police, special police, or intelligence or other security forces. The conferees expect this element of the current CERP guidance to remain in any subsequently issued CERP guidance. The Congress has appropriated significant funds for the specific purpose of training and equipping the Iraq and Afghanistan national armies, police, and security forces, and therefore CERP funds are specifically not intended to be used for that purpose.

It has come to the attention of the conferees that, as a result of the bidding process for larger CERP projects, some CERP projects have been carried out using foreign labor. Because one of the purposes of CERP is to employ Iraq and Afghanistan residents in local humanitarian and reconstruction projects, the conferees urge that, whenever possible, CERP projects be carried out using local citizens or residents of the country in which the projects are being carried out. The conferees recommend that the CERP guidance be modified to reflect this preference.

Modification of geographic restriction under bilateral and regional cooperation programs for payment of certain expenses of defense personnel of developing countries (sec. 1203)

The House bill contained a provision (sec. 1204) that would provide the Secretary of Defense flexibility to pay expenses for per-

sonnel from developing countries to attend a conference, seminar, or similar meeting, even if the conference, seminar, or similar meeting takes place in a location that is outside of the combatant commander's area of responsibility in which the developing country is located.

The Senate amendment contained a similar provision (sec. 1203).

The Senate recesses with a technical amendment.

Authority for Department of Defense to enter into acquisition and cross-servicing agreements with regional organizations of which the United States is not a member (sec. 1204)

The House bill contained a provision (sec. 1205) that would authorize the Department of Defense to enter into acquisition and cross-servicing agreements with regional organizations of which the United States is not a member.

The Senate amendment contained a similar provision (sec. 803).

The Senate recesses.

Two-year extension of authority for payment of certain administrative services and support for coalition liaison officers (sec. 1205)

The House bill contained a provision (sec. 1206) that would extend the authority to fund certain administrative services for coalition liaison officers until September 30, 2007.

The Senate bill contained a similar provision (sec. 1204).

The Senate recesses.

Authority to build the capacity of foreign military forces (sec. 1206)

The Senate amendment contained a provision (sec. 1206) that would provide the Secretary of Defense authority to transfer up to \$750.0 million in a fiscal year in funds available to the Department of Defense to the Department of State for the purpose of building the capacity of partner nations' military or security forces to disrupt or destroy terrorist networks, close safe havens, or participate in or support U.S., coalition, or international military or stability operations.

The House bill contained no similar provision.

The House recesses with an amendment that would provide the President with authority to direct the Secretary of Defense to conduct or support a program to build the capacity of a foreign nation's military forces in order for that nation to conduct counter-terrorist operations and to participate in or support military and stability operations in which the United States is a participant. The program could include the provision of equipment, supplies, and training, and shall promote observance of and respect for human rights and fundamental freedoms and respect for legitimate civilian authority. This authority could not be used to provide assistance that is otherwise prohibited by any provision of law, nor could it be used to provide assistance to any foreign nation that would otherwise be prohibited from receiving such assistance. The provision further requires the Secretary of Defense to jointly formulate with the Secretary of State any program conducted under this authority, and to coordinate with the Secretary of State in its implementa-

tion. The provision requires the Secretary of Defense to provide a notification to specified congressional committees before initiating any activities under this authority. This authority would expire on September 30, 2007.

The provision would also require a report from the President on the strengths and weaknesses of current laws governing and relating to the provision of this type of assistance; recommended changes, if any, to those laws; any organizational and procedural changes that should be made in the Department of Defense and the Department of State to improve their ability to conduct such programs; and the resources and funding mechanisms required to assure adequate funding for such programs.

The conferees note that under current law, foreign military training programs are conducted exclusively under the authority of the Secretary of State. The conferees believe it is important that any changes in statutory authorities for foreign military assistance do not have unintended consequences for the effective coordination of U.S. foreign policy writ large, nor should they detract from the Department of Defense's focus on its core responsibilities, particularly the warfighting tasks for which it is uniquely suited. The conferees view the provision under this section of limited new authorities for the President to direct the Secretary of Defense to conduct such programs as a 2-year pilot program. The conferees intend to review carefully how that authority is exercised so as to have a basis for determining whether and, if so, in what precise manner, to reauthorize this or provide other authority after the conclusion of the pilot program. An important factor in the conferees' future consideration of this matter will be the report that is to be provided under this section.

Security and stabilization assistance (sec. 1207)

The Senate amendment contained a provision (sec. 1207) that would provide the Secretary of Defense authority to use or transfer defense articles, services, training or other support, including support acquired by contract or otherwise, to provide immediate reconstruction, security or stabilization assistance to a foreign country for the purpose of restoring or maintaining peace and security in that country. The provision would permit the Secretary of Defense to transfer funds to the Department of State or any other federal agency for this purpose. The aggregate value of assistance provided or funds transferred under this authority could not exceed \$200.0 million in a fiscal year.

The House bill contained no similar provision.

The House recedes with an amendment that would clarify that the Secretary of Defense may provide to the Secretary of State services, defense articles, and funding up to the amount of \$100.0 million in a fiscal year to facilitate the provision by the Secretary of State of reconstruction, security, or stabilization assistance to a foreign country. The amendment would limit this authority to fiscal years 2006 and 2007. The amendment would require the Secretary of Defense, in coordination with the Secretary of State, to notify specified congressional committees of the use of this authority. Any services, defense articles, and funding transferred to the Secretary of State under this authority shall be subject to the Foreign Assist-

ance Act, the Arms Export Control Act, and other laws under which the Secretary of State is authorized to provide such assistance.

The conferees commend the administration for the steps it is taking to improve U.S. capacity and interagency coordination in planning for, supporting, and conducting stability operations in post-conflict situations. The conferees support the steps the Secretary of Defense is taking to place greater emphasis on the stability operations mission in Department of Defense planning and guidance so that the mission is fully integrated across all Department activities.

In authorizing this provision, the conferees also express their support for the Department of State Office of the Coordinator for Reconstruction and Stabilization (S/CRS). The mission of S/CRS is to lead, coordinate and institutionalize U.S. government civilian capacity to prevent or prepare for post-conflict situations, and to help stabilize and reconstruct societies in transition from conflict or civil strife. The conferees commend the Department of Defense's active support of and cooperation with S/CRS, and urge the Department of Defense to continue to deepen its coordination with the Department of State on planning for and participating in post-conflict stability operations and reconstruction efforts.

The conferees view this provision as a temporary authority to provide additional resources, if needed, to the Department of State until S/CRS is fully stood up and adequately resourced. The conferees do not believe it is appropriate, and are not inclined, to provide long-term funding from the Department of Defense to the Department of State so that the Department of State can fulfill its statutory authorities. The conferees urge the administration to request the necessary resources for S/CRS in fiscal year 2007 and future years budget submissions for the Department of State.

Reimbursement of certain coalition nations for support provided to United States military operations (sec. 1208)

The House bill contained a provision (sec. 1531) that would authorize the Secretary of Defense to reimburse any key cooperating nation for logistical and military support provided by that nation to, or in connection with U.S. military operations in Iraq, Afghanistan, and the global war on terrorism. The total amount of payments made under the authority of this section during fiscal year 2006 may not exceed \$1.5 billion. The Secretary may not enter into any contractual obligation to make payment under the authority of this provision without congressional notification. The Secretary shall notify congressional defense committees not less than 15 days before making any payment under the authority of this section.

The Senate amendment contained no similar provision.
The Senate recesses.

Authority to transfer defense articles and provide defense services to the military and security forces of Iraq and Afghanistan (sec. 1209)

The conferees included a provision that would provide the President authority during fiscal year 2006 to transfer defense articles from the stocks of the Department of Defense, and to provide

defense services in connection with the transfer of such defense articles, to the military and security forces of Iraq and Afghanistan in order to support their efforts to restore and maintain peace and security in those countries. The provision would limit to \$500,000,000 the aggregate value of defense articles to be transferred and defense services to be provided. This authority would be subject to certain authorities and limitations, as specified in this provision, that are applicable to the transfer of excess defense articles under the Foreign Assistance Act (22 U.S.C. 2321j). The provision would require the President to submit to specified congressional committees a notification 15 days prior to the exercise of this authority. The notification would include: (1) information that is required by specified provisions of the Foreign Assistance Act; (2) the amount and type of defense articles to be transferred and services to be provided, and the brigade-level units from which the defense articles are to be transferred or defense services provided; and (3) the element of the military or security force that is the proposed recipient of each defense article to be transferred or defense service to be provided.

The conferees note that this provision would require the President to make an assessment that the proposed transfer of defense articles or provision of defense services will not have an adverse impact on the military readiness of the United States. The conferees understand this to mean that the overall readiness of the U.S. Armed Forces would not be adversely impacted. The conferees understand that the readiness of a particular unit could be temporarily impacted following the transfer of defense articles under this provision, and would not expect that fact to prevent the President from exercising this authority.

The conferees further note that the authority provided by this provision would not permit the transfer of defense articles or the provision of defense services to nongovernmental or irregular forces such as private militias.

Subtitle B—Nonproliferation Matters and Countries of Concern

Prohibitions on procurements from Communist Chinese military companies (sec. 1211)

The House bill contained a provision (sec. 1213) that would prohibit the Secretary of Defense from purchasing goods or services from any foreign person connected to the Chinese military or security forces.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) limit the prohibition to goods and services that are on the U.S. Munitions List; (2) provide for an exception for goods and services procured in connection with a visit by a vessel or an aircraft of the U.S. Armed Forces, for testing, or for the purposes of gathering intelligence; and (3) authorize the Secretary of Defense to waive the prohibition for national security purposes.

Report on nonstrategic nuclear weapons (sec. 1212)

The Senate amendment contained a provision (sec. 1208) that would direct the Secretary of Defense, in consultation with the Sec-

retary of State, to conduct a review of United States and Russian nonstrategic nuclear weapons and to submit a report of the results of that review within 6 months of enactment of this Act.

The House bill contained no similar provision.

The House recedes with an amendment that would add the Secretary of Energy to the reporting requirement.

Subtitle C—Reports and Sense of Congress Provisions

War-related reporting requirements (sec. 1221)

The House bill contained a provision (sec. 1223) that would direct the Secretary of Defense to submit to the congressional defense committees war-related reports on costs, reconstitution, and military construction for Operation Iraqi Freedom, Operation Enduring Freedom, and Operation Noble Eagle. In addition, the Secretary shall submit to the Comptroller General, no later than 45 days after the end of each reporting month, the Department of Defense Supplemental and Cost of War Execution reports. Based on these reports, the Comptroller General shall provide Congress quarterly updates on war costs.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the report to differentiate costs by operation.

Quarterly reports on war strategy in Iraq (sec. 1222)

The Senate amendment contained a provision (sec. 1049a) that would require that at the same time the Secretary of Defense submits to Congress required reports on stability and security in Iraq, the Secretary and appropriate personnel from the Central Intelligence Agency (CIA) shall provide the appropriate committees of Congress a briefing on the strategy for the war in Iraq.

The House bill contained no similar provision.

The House recedes with an amendment that would include the House Permanent Select Committee on Intelligence and the Senate Select Committee on Intelligence in the briefings and that these briefings terminate after 12 of the quarterly briefings have been provided, or December 31, 2008, whichever is later. The conferees acknowledge that the portion of the briefing presented by the CIA will focus on the latest intelligence assessments regarding the war in Iraq.

Report on records of civilian casualties in Afghanistan and Iraq (sec. 1223)

The Senate amendment contained a provision (sec. 1048) that would require the Secretary of Defense to submit a report to appropriate committees of Congress with information on records of civilian casualties in Afghanistan and Iraq. The report shall be submitted not later than 90 days after the enactment of this Act. This provision does not require U.S. Armed Forces to collect any additional information on civilian casualties other than what is currently collected.

The House bill contained no similar provision.

The House recedes with amendment.

Annual report on Department of Defense costs to carry out United Nations resolutions (sec. 1224)

The House bill contained no similar provision.

The House recedes.

The House bill contained a provision (sec. 1224) that would express the sense of Congress that cooperation between the United States and Russia with regard to missile defense is in the interest of the United States and that the United States should explore innovative and nontraditional means of cooperation with Russia in the area of missile defense.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would include implementation of the Moscow Joint Data Exchange Center as an additional possibility for cooperation with Russia with respect to missile defense.

United States policy on Iraq (sec. 1227)

The Senate amendment contained a provision (sec. 1211) that would express a sense of the Senate about the policy on Iraq that included, among other provisions, a recognition that the members of the U.S. armed forces who are serving or have served in Iraq and their families deserve the utmost respect and the heartfelt gratitude of the American people; that the Iraqi people have made enormous sacrifices; that calendar year 2006 should be a period of significant transition to Iraqi sovereignty, with the security forces taking the lead, thereby creating the conditions for the phased redeployment of U.S. forces from Iraq; and that the administration should tell the leaders of all groups and political parties in Iraq that they need to make the compromises necessary to achieve a broad-based and sustainable political settlement.

The provision would also direct that not later than 90 days after the date of the enactment of this Act, and every 3 months thereafter, the President shall submit to Congress a report on U.S. policy and military operations in Iraq. This report is in addition to the various reports, briefings, and updates the President and his other senior officials have provided on a routine basis. The provision contained a list of conditions that shall be addressed in the report.

The House bill contained no similar provision.

The House recesses with an amendment that would permit the President to submit a classified annex, recognizes the progress of the Iraqi Security Forces, and that the professional military judgment of our senior military should be a key factor in future decisions.

The conferees acknowledge that the President has delivered over 24 major speeches on Iraq and provided Congress and the American people with a National Strategy for Victory in Iraq on November 30, 2005.

Subtitle D—Other Matters

Purchase of weapons overseas for force protection purposes in countries in which combat operations are ongoing (sec. 1231)

The House bill contained a provision (sec. 1221) that would permit the Secretary of Defense to purchase weapons from any foreign person, foreign government, international organization, or other entity located in a country in which U.S. combat personnel are engaged in military operations for the purpose of protecting those personnel. The provision would limit the amount expended during any fiscal year for this purpose to \$15.0 million. The provision would also require an annual report on the use of this authority.

The Senate amendment contained a similar provision (sec. 324) that would permit weapons purchased under this authority to be destroyed, and would require the Secretary of Defense to promptly notify the congressional defense committees of any use of this authority.

The Senate recesses with an amendment that would require a semiannual report on the use of this authority.

The conferees note that this provision does not provide the Secretary of Defense authority to transfer weapons purchased under this authority to military and security forces of a foreign country. The conferees further note that authority in this section is intended for use by the U.S. Armed Forces during ongoing military operations. On those occasions when the Secretary of Defense uses this authority during military operations in a country in which a wider internationally-led disarmament, demobilization, and reintegration (DDR) program, such as those that took place in Bosnia or Afghanistan, is taking place, the conferees believe that the Secretary of Defense should closely consult and coordinate with the Secretary of State to ensure that actions taken pursuant to the authority of this section complements, or is integrated with, such an internationally-led program or utilizes best practices for such DDR programs.

Riot control agents (sec. 1232)

The Senate amendment contained a provision (sec. 1080) that would restate current U.S. policy on riot control agents, and require a report on the use of riot control agents by members of the Armed Forces.

The House bill contained no similar provision.

The House recesses with a clarifying amendment.

The conferees note that the report required by this provision should include a description of the doctrinal publications and any

other resources made available to members of the Armed Forces regarding the tactical employment of riot control agents. The report should also include a discussion of whether riot control agent inventories are sufficient in numbers and type to meet existing requirements.

Requirement for establishment of certain criteria applicable to Global Posture Review (sec. 1233)

The House bill contained a provision (sec. 1222) that would require the Secretary of Defense to develop criteria, as part of the Global Posture Review, for assessing the costs and benefits of deploying to particular overseas locations and for establishing new overseas facilities.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would clarify the reporting requirements. The amendment would also add a requirement for the Secretary to notify the congressional defense committees within 30 days after the United States enters into an agreement with a foreign country to support the deployment of elements of the U.S. Armed Forces in that country.

The conferees are concerned that the implementation of the Integrated Global Basing and Presence Strategy (IGPBS) may result in higher costs for the Department of Defense, new requirements for strategic mobility assets, and an increased deployment tempo for military units and personnel. The conferees intend for the Secretary to develop criteria and a mechanism for the analysis of alternatives to assess the impact of basing decisions on various aspects of military operations and to submit a report to Congress detailing these considerations by March 30, 2006. The conferees also expect the Secretary to include in the annual budget submission of the Department a clear account of all proposed expenditures associated with the implementation of the IGPBS.

The conferees note that certain factors to be assessed in the report required by this provision apply to agreements with host nations, while other factors depend on the specific nature of the overseas facility. The conferees expect the Secretary to develop criteria and to provide the most comprehensive assessment possible for each overseas facility subject to a new basing arrangement.

The United States-China Economic Security Review Commission (sec. 1234)

The Senate amendment contained a provision (sec. 1210) that would note certain findings of the 2004 Report to Congress of the United States-China Economic and Security Review Commission. The provision would also express the sense of Congress that the President should take immediate steps to establish a plan to address the emergence of China economically, diplomatically, and militarily; to promote mutually beneficial trade relations with China; and to encourage China's adherence to international norms in the areas of trade, international security, and human rights.

The House bill contained no similar provision.

The House recedes with a clarifying amendment.

The provision would also require the Secretary of Defense and the Chairman of the Joint Chiefs of Staff to provide a report assessing the strategic implications of Iranian acquisition of nuclear weapons.

The Senate amendment contained no similar provision.
The House recesses.

Sense of Congress on support for Nuclear Non-Proliferation Treaty

The Senate amendment contained a provision (sec. 1209) that would express a sense of the Congress on support for the Nuclear Non-Proliferation Treaty (NPT).

The House bill contained no similar provision.
The Senate recesses.

The conferees reaffirm their support for the objectives of the NPT and for all appropriate measures to strengthen the NPT and to attain its objectives. The conferees call on all parties to the NPT:

(1) to support compliance with treaty obligations and to undertake effective enforcement measures against states that are in violation of their obligations under the Treaty;

(2) to agree to establish more effective controls on enrichment and reprocessing technologies that can be used to produce materials for nuclear weapons;

(3) to expand and support the International Atomic Energy Agency efforts to inspect and monitor compliance with safeguards and standards to which all states should adhere through existing authority and the additional protocols signed by the states party to the NPT;

(4) to demonstrate the international community's unified opposition to a nuclear weapons program in Iran by supporting efforts of the United States and the European Union to prevent the Government of Iran from acquiring a nuclear weapons capability and using all appropriate diplomatic means at their disposal to convince the Government of Iran to abandon its uranium enrichment program;

(5) to support strongly the ongoing U.S. diplomatic efforts in the context of the six-party talks that seek the verifiable and irreversible disarmament of North Korea's nuclear weapons programs and to use all appropriate diplomatic means to achieve this result;

(6) to pursue diplomacy designed to address the underlying regional security problems in Northeast Asia, South Asia, and the Middle East, which would facilitate non-proliferation and disarmament efforts in those regions;

(7) to accelerate, wherever practicable, programs to safeguard and eliminate nuclear weapons-usable material to the highest standards to prevent access by terrorists and governments;

(8) to halt the use of highly enriched uranium in civilian reactors;

(9) to strengthen national and international export controls and relevant security measures as required by United Nations Security Council Resolution 1540;

(11) to call for reduction in the world's stockpile of nuclear weapons consistent with obligations and commitments under the Treaty, for a moratorium on production of weapons grade fissile materials, and for progress on negotiation of a fissile material cut-off treaty; and (12) to strengthen and expand support for the Proliferation Security Initiative.

TITLE XIII—COOPERATIVE THREAT REDUCTION WITH STATES OF THE FORMER SOVIET UNION

LEGISLATIVE PROVISIONS ADOPTED

Specification of Cooperative Threat Reduction programs and funds (sec. 1301)

The House bill contained a provision (sec. 1301) that would define the programs that are Cooperative Threat Reduction (CTR) programs, define the funds for CTR programs as those authorized

to be appropriated in section 301 of this Act, and specify that CTR funds shall remain available for obligation for three fiscal years.

The Senate amendment contained an identical provision (sec. 1301).

The conference agreement includes this provision.

Funding allocations (sec. 1302)

The House bill contained a provision (sec. 1302) that would authorize \$415.5 million for the Cooperative Threat Reduction (CTR) program. The provision would also authorize specific amounts for each CTR program element, require notification to Congress 30 days before the Secretary of Defense obligates and expends fiscal year 2006 funds for purposes other than those specifically authorized, and provide limited authority to obligate amounts for a CTR program element in excess of the amount specifically authorized for that purpose.

The Senate amendment contained a similar provision (sec. 1302).

The House recedes.

Permanent waiver of restrictions on use of funds for threat reduction in states of the former Soviet Union (sec. 1303)

The House bill contained a provision (sec. 1304) that would provide the President with the authority for calendar years 2005, 2006, and 2007 to waive a former Soviet Union state's eligibility requirements for receiving Cooperative Threat Reduction (CTR) funds, provided that the President certifies to Congress that a waiver is important to the national security interests of the United States, and submits a more detailed report that describes both the activity or activities that prevent eligibility and a strategy, plan, or policy for addressing eligibility shortfalls.

The Senate amendment contained a provision (sec. 1303) that would make permanent the President's authority to waive, on an annual basis, a former Soviet Union state's eligibility requirements for receiving CTR funds, provided that the President certifies to Congress that a waiver is important to the national security interests of the United States, and submits a more detailed report that describes both the activity or activities that prevent eligibility and a strategy, plan, or policy for addressing eligibility shortfalls.

The House recedes.

Report on elimination of impediments to threat-reduction and non-proliferation programs in the former Soviet Union (sec. 1304)

The House bill contained a provision (sec. 1305) that would require the President to submit to the Congress a report on impediments to the effective execution of threat reduction programs in the states of the former Soviet Union.

The Senate amendment contained no similar provision.

The Senate recedes with a clarifying amendment.

The conferees note that despite the importance of programs and activities to assist in securing weapons of mass destruction and related materials in the states of the former Soviet Union, the effective conduct of such programs has been impeded by numerous legal and administrative disagreements regarding a variety of

issues, including access to sites, liability, and taxation. However, in some cases it has been possible to resolve such disagreements through committed and high-level discussions between governments.

Repeal of requirement for annual Comptroller General assessment of annual Department of Defense report on activities and assistance under Cooperative Threat Reduction programs (sec. 1305)

The Senate amendment contained a provision (sec. 1305) that would repeal the requirement for the Comptroller General to provide to Congress an assessment of the annual Department of Defense report to Congress on the Cooperative Threat Reduction programs.

The House bill contained a provision (sec. 1303) that would authorize the Secretary of Defense to obligate fiscal year 2006 funds appropriated for the Cooperative Threat Reduction (CTR) weapons of mass destruction proliferation prevention initiative for nuclear storage security, provided that the Secretary provides 15 day advance written notification and justification to Congress.

The Senate amendment contained no similar provision.

The House recesses.

The conferees note that in a February 2005 joint statement, the President of the United States and the President of the Russian Federation declared their intent to expand and deepen cooperation on nuclear security with the goal of enhancing the security of nuclear facilities. If the United States and Russia reach agreement on additional projects in this area, it may be necessary for the Department of Defense to allocate additional CTR funds for the nuclear weapons storage security program. The Department may choose to obligate funds authorized for weapons of mass destruction proliferation prevention for nuclear weapons storage security, subject to the notification and justification process described in section 1302 of this Act.

Modification of authority to use Cooperative Threat Reduction funds outside the former Soviet Union

The Senate amendment contained a provision (sec. 1304) that would modify the authority of the Department of Defense to use Cooperative Threat Reduction funds outside the former Soviet Union by changing the existing requirement for a presidential determination and certification to a requirement for a determination and certification made by the Secretary of Defense, with the concurrence of the Secretary of State.

The House bill contained no similar provision.

The Senate recedes.

Title XIV—Matters Relating to Detainees

LEGISLATIVE PROVISION ADOPTED

Matters relating to detainees (secs. 1401–1406)

The Senate amendment contained three provisions (secs. 1074, 1075, and 1092) relating to detainees. The first provision (sec. 1074) would provide uniform standards for the interrogation of persons under the detention of the Department of Defense. The second provision (sec. 1075) would prohibit cruel, inhuman, or degrading treatment or punishment of persons under the custody or control of the U.S. Government. The third provision (sec. 1092) would provide procedures for the legal review of detainees held by the Department at Guantanamo Bay, Cuba.

The House bill contained no similar provisions.

The House recedes with an amendment that would establish a new title of the bill addressing matters relating to detainees.

Section 1401 would designate the title as the “Detainee Treatment Act of 2005.”

Section 1402 contains the text of Senate section 1074 without change.

Section 1403 contains the text of Senate section 1075 without change.

Section 1404 is a new provision.

Subsection (a) would provide an affirmative defense in any civil action or criminal prosecution against an officer, employee, member of the armed forces, or other agent of the U.S. Government, who is a U.S. person, arising out of the person’s engaging in specific operational practices involving detention or interrogation of aliens who the President or his designees have determined are believed to be engaged in or associated with international terrorist activity that poses a serious, continuing, threat to the U.S., its interests, or its allies. If the practices were officially authorized and determined to be lawful at the time they were conducted, it would be a defense that the person did not know that the practices were unlawful and that a person of ordinary sense and understanding would not know that they were unlawful. Good faith reliance on advice of counsel would be an important factor, among others, to consider in assessing whether a person of ordinary sense and understanding would have known the practices to be unlawful. Nothing in this section is to be construed to limit or extinguish any defense or protection otherwise available to any person or entity from suit or civil or criminal liability, or to provide immunity from prosecution for any criminal offense by the proper authorities.

Subsection (b) would authorize the United States Government to provide or employ counsel, pay counsel fees, court costs, bail, and other expenses incident to the representation of any such person with respect to any civil action or criminal prosecution arising out of practices described in subsection (a), whether brought inside or outside the U.S., under the same conditions and to the same extent to which such services and payments are authorized under section 1037 of title 10, United States Code.

Section 1405 would address the procedures for legal review of detainees held by the Department.

Subsection (a) would require the Secretary of Defense to submit the Department of Defense procedures for status review of detainees at Guantanamo Bay, Cuba, and in Afghanistan, and Iraq to the appropriate congressional committees. It would also require that the official designated by the President or Secretary of Defense to be the final review authority with respect to the determinations of the administrative tribunals (the "Designated Civilian Official") be a civilian officer of the Department of Defense who is appointed by the President with the advice and consent of the Senate. The conferees expect the Designated Civilian Official to accomplish final review of the decisions of the tribunals in an expeditious fashion.

Subsection (b) would require that a Combatant Status Review Tribunal and an Administrative Review Board (or similar or successor administrative tribunal or board) for detainees at Guantanamo Bay, Cuba determine whether any statement derived from or relating to a detainee was obtained as a result of coercion and if so, the probative value (if any) of any such statement.

Subsection (c) would require the Secretary of Defense to submit a report on any modification to the procedures submitted under subsection (a).

Subsection (d) would require the Secretary of Defense to submit to Congress an annual report on the annual review process for aliens in the custody of the Department of Defense outside the United States.

Subsection (e) would provide for judicial review of detainees held at Guantanamo Bay, Cuba.

Paragraph (1) would amend section 2241 of title 28, United States Code, to provide that, except as provided in this section, no court, justice, or judge shall have jurisdiction to hear or consider: (1) an application for a writ of habeas corpus filed by or on behalf of an alien detained by the Department at Guantanamo Bay, Cuba; or (2) any other action against the United States or its agents relating to any aspect of such detention by an alien who remains in military custody or for whom the U.S. Court of Appeals for the District of Columbia Circuit has determined that such detention was proper.

Paragraph (2) would provide for direct judicial review, in the U.S. Court of Appeals for the District of Columbia Circuit, of the validity of any final decision of a Combatant Status Review Tribunal that an alien detained by the Department of Defense at Guantanamo Bay, Cuba is properly detained as an enemy combatant.

Paragraph (3) would provide for direct judicial review, in the U.S. Court of Appeals for the District of Columbia Circuit, of the validity of any final decision pursuant to Military Commission Order No. 1 dated August 31, 2005, (or any successor military order) regarding an alien detained by the Department at Guantanamo Bay, Cuba.

Paragraph (4) would provide that the Secretary shall be the named respondent in any appeal under this provision.

Subsection (f) would provide that nothing in section 1705 shall be construed to confer any constitutional right on an alien detained as an enemy combatant outside the United States.

Subsection (g) would define the term "United States."

Subsection (h) would establish the effective date of the provision.

Section 1406 is a new provision that would require the Secretary to prescribe policies to ensure that all personnel of Iraqi military forces who are trained by Department personnel or contractors receive training regarding the international obligations and laws applicable to the humane detention of detainees, including protections afforded under the Geneva Conventions and the Convention against Torture. It would also require that the unclassified portions of the Army Field Manual on Intelligence Interrogation be translated into Arabic and other appropriate languages for use by the Iraqi security forces, and be distributed to appropriate officials of the Iraqi government. American military personnel are trained and encouraged to lead by example. The conferees intend that our personnel set the example for the new Iraqi democracy by demonstrating the commitment to the rule of law that is essential to armed forces in a democratic state. The conferees also urge that the translated version of the Field Manual be given broad distribution throughout the Iraqi security forces, including to field and company-grade officers and noncommissioned officers.

Advanced First Responder Network

The conferees are aware of the efforts to deploy the Advanced First Responder Network (AFRN) in Iraq which will begin to address: (1) the requirement of mission-critical public-safety communications capabilities and allow for coordination of security planning and execution; (2) rapid data collection and analysis of changing security threats; (3) rapid coordination and deployment of security assets to address threats; (4) effective planning to prevent and reduce future security threats; and (5) a more secure environment that will foster democracy and economic development. The AFRN infrastructure in Iraq has been designed to accommodate the entire country, and critical infrastructure such as pipelines. The conferees support this effort and, with funds available in this legislation and prior appropriations acts, encourage that reconstruction efforts to continue to place a high value on completion of an integrated security network with the deployment of AFRN and related advanced networks.

DIVISION B—MILITARY CONSTRUCTION AUTHORIZATIONS

Explanation of funding tables

Division B of this Act authorizes funding for military construction projects of the Department of Defense. It includes funding authorizations for the construction and operation of military family housing and military construction for the reserve components, the defense agencies, and the North Atlantic Treaty Organization Security Investment program. It also provides authorization for the base closure account that funds environmental cleanup and other activities associated with the implementation of base closure rounds.

The budget request for fiscal year 2006 included authorization of appropriations for military construction and housing programs totaling \$12,051.6 million. Of this amount, the budget request included authorization of appropriations for \$1,880.5 million to implement the results of the 2005 defense base closure and realignment round. The amount authorized for appropriation is included in the following table in a line designated Base Realignment and Closure V.

The House bill would authorize appropriations totaling \$12,146.6 million for military construction and family housing programs.

The Senate amendment would authorize appropriations totaling \$12,044.5 million for military construction and family housing programs.

The conferees agree to authorize appropriations of \$12,419.5 million for the military construction and family housing accounts of the Department for fiscal year 2006. When the impact of \$252.9 million in prior year rescissions enacted in the Military Construction, Quality of Life, and Veterans Appropriations Act, 2006 (Public Law 109–114) is included, the conference agreement is consistent with a budget authority level of \$12,166.6 million for military construction and family housing programs.

The following tables provide the project-level authorizations for the military construction funding authorized in division B of this Act and summarize that funding by account.

ITEMS OF SPECIAL INTEREST

Army use of alternate authorities to acquire unaccompanied housing

The conferees note that the Department of the Army is carrying out programs to transform its force structure and global presence within the next five years. The Department of the Army is currently in the process of developing an investment strategy to fund the construction of permanent facilities to support these transformation initiatives.

The conferees also note that Congress has granted authority to the Department of the Army to enter into agreements with eligible entities to provide for the acquisition or construction of military unaccompanied housing units on or near military installations. Similar authorities have been used to dramatically improve the quality of family housing for the nation’s military personnel.

TITLE XXVIII—GENERAL PROVISIONS

ITEMS OF SPECIAL INTEREST

Joint urban operations training facilities

The conferees note that on November 10, 2005, the Under Secretary of Defense for Personnel and Readiness (OUSD (P&R)) submitted the report requested by the Senate Committee on Armed Services three years ago on Department of Defense requirements for military operations in urban terrain (MOUT) training facilities.

The Department reported that it had established a Joint Urban Training Working Group under Joint Forces Command to

identify requirements and a Joint Urban Operations Training Review Group to prioritize budget requests for Joint Urban Operations facilities and capabilities.

The conferees commend the Department for establishing these new joint policy groups. However, the conferees are concerned that it has taken three years to do so and agree with the Department's report that "much more needs to be done." The conferees are disappointed that, despite the efforts of the Department to date, the Department has yet to establish a strategy for urban operations training, a requirements baseline, or to prioritize MOUT projects and capabilities across the Department in its budget requests.

The conferees further note that on December 8, 2005, the Government Accountability Office (GAO) released its assessment of this effort and stated that "Since 2002, the Department has made limited progress in developing an overall joint strategy for urban operations training and related facility and training requirements". The GAO review found that the Department still lacks an agreed strategy, and facility and training requirements for joint urban operations training, and that there are few opportunities today for truly joint training under joint headquarters, despite longstanding Department policy that forces train as they fight.

The conferees urge the Department, in particular (OUSD (P&R)) and Joint Forces Command, to develop as soon as possible a joint training strategy for urban operations that will allow the total force to make the best possible use of existing and planned MOUT facilities to improve joint and interagency capabilities in this critical area; to develop a requirements baseline for MOUT facilities based on that strategy; and to assess and prioritize the MOUT projects requested by the services or Special Operations Command in the fiscal year 2007 budget, and in future budget requests, against this baseline, in order to eliminate unnecessary duplication of facilities.

The conferees intend for this provision to facilitate the business transformation and financial management reform initiatives established by the Department of Defense to improve the transparency and real-time access to the Department's cost accounting and contract management information using state-of-the-art technology and web-based software programs. The conferees expect that increased oversight of construction contract information will result in a greater degree of diligence in the management of contract cost growth and a more efficient use of taxpayer dollars. The conferees encourage the Secretary to make the information required by this provision available on the Department's website.

Modification of cost variation authority (sec. 2804)

The Senate amendment contained a provision (sec. 2802) that would amend section 2853 of title 10, United States Code, to clarify that the cost of a military construction project or a project for the construction, improvement, or acquisition of a military family housing cannot be decreased or increased by more than 25 percent.

The House bill contained no similar provision.

The House recesses with a clarifying amendment that would prohibit a service secretary from entering into an agreement under the alternative authority for acquisition and improvements of military housing with a private entity to operate child development centers in competition with Department of Defense activities at the installation.

The provision would also extend by one year the termination date for the temporary authority.

The House bill contained no similar provision.

The House recesses with a clarifying amendment.

One-year extension of temporary, limited authority to use operation and maintenance funds for construction projects outside the United States (sec. 2809)

The House bill contained a provision (sec. 2805) that would extend the authority provided by section 2808 of the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) for 1 year and amend the reporting requirement for the authority.

The Senate amendment contained a provision (sec. 2804) that would direct the Secretary of Defense to carry out a temporary program for the construction of child development centers operated by the Department of Defense. This provision would increase thresholds in section 2805(a)(1) of title 10, United States Code, to facilitate the construction of child development centers.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would direct the secretary of each military service to submit a report by March 16, 2006, on the inventory and management of GFO housing in the NCR.

Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108-375) did not satisfy the intent of the conferees. The conferees intend for the secretary of each military department to submit a report containing an analytical assessment of requirements for general and flag officer housing in the National Capital Region, including unique force protection concerns, the potential to rely on the local commercial real estate market, and possible alternate methods for the acquisition, operations, and maintenance of GFO houses. These assessments should not rely upon the presumption that the existing inventory of government-owned housing units must be retained. The conferees expect that the reports will provide a basis for further deliberations to address GFO housing requirements over the long-term, while reducing costs associated with these units.

Subtitle B—Real Property and Facilities Administration

Consolidation of Department of Defense land acquisition authorities and limitations on use of such authorities (sec. 2821)

The House bill contained a provision (sec. 2811) that would consolidate provisions of chapter 159 of title 10, United States Code, which govern the acquisition of land by the Department of Defense, and make several technical corrections.

The Senate amendment contained a similar provision (sec. 2881)

The Senate recedes with a technical amendment.

Modification of authorities on agreements to limit encroachments and other constraints on military training, testing, and operations (sec. 2822)

The Senate amendment contained a provision (sec. 2822) that would modify section 2684a of title 10, United States Code, to clarify that agreements to limit encroachments and other constraints on military training, testing, and operations authorized under that section may include real property that is in the vicinity of, or ecologically related to, a military installation or the airspace of such installation. The provision would require that agreements authorized under that section between the Secretary of Defense, or the service secretaries, and eligible third party entities provide for

equal sharing of the acquisition costs of the real property and real property interests between the Department of Defense and the partner entities. The Senate provision would allow the Secretary concerned to waive the requirement for equal sharing of the acquisition costs if the Secretary concerned determined that the agreement is essential to accomplish the mission of the installation and the Secretary concerned provided 21-days advance notice to Congress. The Senate provision would provide that the acquisition cost of any lesser interest in real property would not exceed 70 percent of the appraised value of the property. The Senate provision would also include an annual reporting requirement on implementation of projects undertaken pursuant to this authority.

The House bill contained no similar provision.

The House recedes with an amendment that would require the Secretary concerned to determine the appropriate portion of the acquisition costs to be borne by the United States. The conference amendment would also provide that the acquisition costs borne by the United States would not exceed the fair market value of the property interest that could be transferred to the United States upon the request of the Secretary concerned under the statute. The conference amendment would specify that the contribution of third-party entities to the acquisition costs would include, with the approval of the Secretary concerned, any combination of the following: the provision of funds (including funds received by such entity or entities from a federal, state, or local agency outside the Department in connection with a federal, state, or local program); the provision of in-kind services (including services related to the acquisition or maintenance of such real property or interest in real property); or the exchange or donation of real property or any interest in real property. The House bill contained a provision (sec. 2812) that would suspend the use of current authorities related to the privatization of utility systems until enactment of the National Defense Authorization Act for Fiscal Year 2007, or one year after receipt of a report on the program, whichever is later. The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would require the Secretary concerned to submit to Congress an economic analysis which demonstrates the economic benefit of the conveyance to the government, before entering into a contract for the conveyance of all or part of a utility system. The amendment would amend section 2688(c)(1) of Title 10, United States Code, to change the requirement for the Secretary concerned to receive fair market value for conveyed utility systems. The amendment would also limit the contract term for a contract to convey utility systems to 10 years,

and would provide authorization for the Secretary concerned to exceed 10 years, but not to exceed 50 years, if the Secretary concerned determined the longer term to be cost effective as demonstrated in the economic analysis. The amendment would also limit in fiscal years 2006 and 2007 the number of contracts to be entered into under Section 2688 of Title 10, United States Code. The amendment would also amend reporting requirements contained in the provision in the House bill and would add a requirement for the Government Accountability Office to submit to the congressional defense committees by August 1, 2006 a report evaluating the changes made by the Department of Defense in the management of the utilities privatization program.

The House bill contained no similar provision.

The House recedes with an amendment that would change the date that the Secretary is required to submit the report to the congressional defense committees to September 30, 2006.

The House recesses.

The Department of Defense's request to Congress for authorization to expand the types of proceeds received from the disposal of surplus property is consistent with Congressional intent to allow the Department of Defense to efficiently manage facility and infrastructure assets. While the conferees support additional flexibility in the manner in which it seeks value in the disposal of its assets, the conferees are concerned that the expanded authority could potentially result in adverse effects, such as reduced Department and congressional oversight of the military construction program, and decisions to carry out land disposals specifically to receive military construction projects, rather than with consideration to military requirements over the long-term. The conferees are also concerned that the expanded authority would impose complex requirements on the General Services Administration in the process of carrying out property disposals in exchange for military construction. As such, the conferees direct the Secretary of Defense to fully consider the potential effects of expanding the land exchange program, and, if warranted, to resubmit a legislative proposal in the future which addresses such concerns.

Identification of environmental conditions at military installations closed or realigned under 2005 round of defense base closure and realignment

The Senate amendment contained a provision (sec. 2893) that would require the Secretary of Defense, in consultation with the Administrator of the Environmental Protection Agency, other appropriate federal agencies, and state, tribal, and local government officials, to complete an identification not later than May 31, 2007, of the environmental conditions of the real property of each military installation approved for closure or realignment under the 2005 round of defense base closure and realignment in accordance with section 120(h)(4) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, (42 U.S.C. 9620(h)(4)). The Senate provision would also require the Secretary to coordinate with appropriate federal, state, tribal, and local government officials to expedite the environmental response at military installations approved for closure or realignment under the

2005 round of defense base closure and realignment. The provision would also require the Secretary to report the progress made in carrying out this section in the annual environmental report to Congress.

The House bill contained no similar provision.

The Senate recesses.

Increase in thresholds for unspecified minor military construction projects

The Senate amendment contained a provision (sec. 2801) that would amend section 2805(a)(1) of title 10, United States Code, by raising the threshold of the cost of a construction project authorized by this section from \$1.5 million to \$2.5 million. This provision would also raise the threshold of the cost of a construction project intended solely to correct a deficiency that is life-threatening, health-threatening, or safety-threatening from \$3.0 million to \$4.0 million.

The House bill contained no similar provision.

The Senate recesses.

One-year extension of Department of Defense laboratory revitalization program

The Senate amendment contained a provision (sec. 2885) that would extend by 1 year the authorization provided by section 2891 of the Military Construction Authorization Act for Fiscal Year 2005 (division B of Public Law 108–375) for the Secretary of Defense to carry out a program for the revitalization of laboratories operated by the Department of Defense.

The House bill contained no similar provision.

The Senate recesses.

Sense of Congress regarding consideration of national defense industrial base interests during Base Closure and Realignment Commission review of Department of Defense base closure and realignment recommendations

The House bill contained a provision (sec. 2824) that would express the sense of Congress that national defense industrial base interests are part of military value and that the Base Closure and Realignment Commission should consider such interests when reviewing and analyzing the Secretary of Defense's closure and realignment recommendations.

The Senate amendment contained no similar provision.

The House recesses.

DIVISION C—DEPARTMENT OF ENERGY NATIONAL SECURITY AUTHORIZATIONS AND OTHER AUTHORIZATIONS

TITLE XXXI—DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS

Overview

Title XXXI authorizes appropriations for atomic energy defense activities of the Department of Energy for fiscal year 2006, including: the purchase, construction, and acquisition of plant and capital

equipment; research and development; nuclear weapons activities; defense nuclear nonproliferation; naval nuclear propulsion; environmental restoration and waste management; operating expenses; and other expenses necessary to carry out the purposes of the Department of Energy Organization Act (Public Law 95–91). The title would authorize appropriations in five categories: National Nuclear Security Administration (NNSA); defense environmental cleanup (formerly defense environmental management); other defense activities; defense nuclear waste disposal; and energy supply.

The budget request for atomic energy defense activities at the Department totaled \$16.4 billion, a 1.4 percent decrease below the fiscal year 2005 appropriated level. Of the total amount requested, \$9.4 billion would be for NNSA, of which \$6.6 billion would be for weapons activities, \$1.6 billion would be for defense nuclear nonproliferation activities, \$786.0 million would be for naval reactors, and \$343.9 million would be for the Office of the Administrator; \$6.0 billion would be for defense environmental management, of which \$5.2 billion would be for defense site acceleration completion, and \$831.3 million would be for defense environmental services; \$636.0 million would be for other defense activities; \$351.4 million would be for defense nuclear waste disposal; and \$12.0 million would be for energy supply.

The conferees agree to authorize \$16.4 billion for atomic energy defense activities at the Department, a decrease of \$18.9 million below the budget request. The conferees agree to authorize \$9.2 billion for NNSA, a decrease of \$200.8 million below the budget request. Of the amounts authorized for the NNSA, \$6.4 billion would be for weapons activities, a decrease of \$196.2 million; \$1.6 billion would be for defense nuclear nonproliferation activities, a decrease of \$6.1 million; \$789.5 million would be for naval reactors, an increase of \$3.5 million; and \$341.9 million would be for the Office of the Administrator, a decrease of \$2.0 million below the budget request. The conferees agree to authorize \$6.2 billion for defense environmental cleanup (formerly defense environmental management), an increase of \$177.3 million above the budget request. The conferees agree to authorize \$642.0 million for other defense activities, an increase of \$6.0 million above the budget request. The conferees agree to authorize \$350.0 million for defense nuclear waste disposal, a decrease of \$1.4 million below the budget request. The conferees agree to authorize \$12.0 million for energy supply, the amount of the budget request.

The following table summarizes the budget request and the authorizations:

ITEMS OF SPECIAL INTEREST

Disposition of weapons-usable plutonium at Savannah River, South Carolina

The conferees note that section 4306 of the Atomic Energy Defense Act (50 U.S.C. 2566) requires the Secretary of Energy to make impact assistance payments to the State of South Carolina, if the Department of Energy fails to achieve certain interim and long-term milestones in the conversion of plutonium stored at the Savannah River Site. The conferees remain supportive of this program and of the commitments made to the State of South Carolina. The conferees urge the Department to remain mindful of these impending payments and to request a budget for fiscal year 2007 and thereafter that would keep the mixed oxide fuel facility construction on a schedule to make the payment of impact assistance unnecessary.

Nanotechnology Enterprise Development Center

The conferees direct the Secretary of Energy to submit a report to the Committees on Armed Services of the Senate and the House of Representatives within 30 days after the date of enactment of this Act setting forth the contribution, if any, of the Nanotechnology Enterprise Development Center to the Stockpile Stewardship Program or to the programmatic activities of the National Nuclear Security Administration (NNSA). The report shall include a description of any contribution of the center to the national security of the United States and a justification for using atomic energy defense funds available to the NNSA for the establishment of the center.

National laboratory work on force protection technologies

The conferees note that the Department of Energy national laboratories have provided exceptional technical assistance to the Department of Defense in testing and fielding various types of equipment to improve force protection for U.S. military personnel engaged in combat operations. The conferees urge the Departments of Energy and Defense to continue to work together to utilize the expertise resident in the national laboratories to research, develop, and field those force protection technologies that can improve combat capabilities and reduce combat casualties. The conferees support the continued use by the Department of Energy of its existing authority to waive, where appropriate, certain overhead charges associated with national laboratory work conducted for the Department of Defense.

In the event that the Department of Energy makes the decision, under existing authorities, to waive any charges other than the federal administrative charge, the Secretary of Energy shall provide notification to the congressional defense committees within 30 days of issuing such a decision. The notification shall include a description of the force protection technologies work, the fees waived, and the impact, if any, to overhead rates for other programs at the national laboratory.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—National Security Programs Authorizations

National Nuclear Security Administration (sec. 3101)

The House bill contained a provision (sec. 3101) that would authorize \$9.1 billion for the National Nuclear Security Administration (NNSA), including funds for weapons activities, defense nuclear nonproliferation programs, naval reactor programs, and the Office of the Administrator.

The Senate amendment contained a similar provision (sec. 3101) that would authorize \$9.4 billion.

The conferees agree to authorize \$9.2 billion for the NNSA.

The budget request included \$6.6 billion for weapons activities. The House bill would authorize \$6.5 billion, a decrease of \$174.4 million below the budget request. The Senate amendment would authorize \$6.6 billion, a decrease of \$39.8 million below the budget request. The conferees agree to authorize \$6.4 billion, a decrease of \$196.2 million below the budget request. Within weapons activities, the conferees agree to authorize \$605.8 million for advanced simulation and computing, a decrease of \$55.0 million below the budget request. The conferees note that this reduction is without prejudice. Within weapons activities, the conferees also agree to authorize \$2.1 billion for campaigns, an increase of \$64.2 million above the budget request. The conferees agree to authorize a budget realignment of \$140.6 million within campaigns to allow funding adjustments across the program elements which make up campaigns.

The budget request included \$174.4 million for environmental projects and operations within NNSA. The House bill and the Senate amendment would authorize no funds for these activities within the NNSA. The conferees believe that the defense environmental cleanup program exists to address the environmental legacy from Cold War missions at Department of Energy sites. The conferees agree to authorize no funds within NNSA for these activities but to authorize funds for these activities within defense environmental cleanup, elsewhere in this Act. The conferees agree that this action is consistent with the provisions of title 32 of the National Defense Authorization Act for Fiscal Year 2000 (Public Law 106–65), which established the NNSA.

The budget request included \$1.6 billion for defense nuclear nonproliferation. The conferees agree to authorize \$1.6 billion, a decrease of \$6.1 million below the budget request. The conferees agree to provide an additional \$83.6 million in funding for international nuclear materials protection and cooperation to implement the agreements entered into by the Russian Federation and the United States at the Bratislava Summit to accelerate improvements to security at certain Russian nuclear weapons storage sites. The conferees agree to authorize \$13.0 million for Project 06–D–180, National Security Laboratory at the Pacific Northwest National Laboratory, an increase of \$8.0 million above the budget request. The additional funds are to be used to complete project engineering and design and to initiate construction on the research facility needed to replace facilities being vacated due to the environmental cleanup activities at the Hanford Site 300 Area.

Defense environmental cleanup (sec. 3102)

The House bill contained a provision (sec. 3102) that would authorize \$6.3 billion for the Department of Energy for defense environmental management (EM) activities for fiscal year 2006, including funds for defense site acceleration completion and defense environmental services.

The Senate amendment contained a similar provision (sec. 3102) that would authorize \$6.2 billion for defense environmental management.

The conferees agree to authorize \$6.2 billion for defense environmental cleanup, an increase of \$177.3 million above the budget request. Defense environmental cleanup comprises those activities formerly termed defense environmental management.

The conferees note that the statement of managers accompanying the Energy and Water Appropriations Act for Fiscal Year 2006 (Public Law 109–103) provides funding for defense environmental cleanup in a new budget structure, which provides funding by site rather than by the program elements contained in the President's budget request for fiscal year 2006. The conferees direct the Department to submit with the budget request for fiscal year 2007 a funding crosswalk between the budget structure as requested and as appropriated for fiscal year 2006. The conferees also direct the Department to prepare a 5-year funding plan for the environmental cleanup program.

Other defense activities (sec. 3103)

The House bill contained a provision (sec. 3103) that would authorize \$636.0 million for the Department of Energy for other defense activities for fiscal year 2006, the amount of the budget request.

The Senate amendment contained a similar provision (sec. 3103) that would authorize \$563.4 million for the Department for other defense activities, a decrease of \$72.6 million below the budget request.

The conferees agree to authorize \$642.0 million, an increase of \$6.0 million above the budget request.

Defense nuclear waste disposal (sec. 3104)

The House bill contained a provision (sec. 3104) that would authorize \$351.4 million for defense nuclear waste disposal.

The Senate amendment contained a similar provision (sec. 3104) that would authorize \$301.4 million for defense nuclear waste disposal.

The conferees agree to include a provision that would authorize \$350.0 million, a decrease of \$1.4 million below the budget request.

Subtitle B—Other Matters

Reliable Replacement Warhead program (sec. 3111)

The House bill contained a provision (sec. 3111) that would authorize the Secretary of Energy to carry out a Reliable Replacement Warhead program. The provision would establish objectives for the program and require reports to Congress.

The Senate amendment contained no similar provision. In the Senate report accompanying S. 1042 (S. Rept. 109–69) of the National Defense Authorization Act for Fiscal Year 2006, the Senate authorized funds for the program and specified goals for the program.

The Senate recedes with a technical amendment that would add the Secretaries of Defense and Energy to the reporting requirement.

The conferees support the goal of continuing to ensure that the nuclear weapons stockpile remains safe, secure, and reliable. The conferees believe that the Reliable Replacement Warhead program is essential to the achievement of this goal and support its establishment with the objectives as defined in the provision, and as further described in the committee reports of the Committees on Armed Services of the Senate and the House of Representatives for fiscal year 2006.

Rocky Flats Environmental Technology Site (sec. 3112)

The Senate amendment contained a provision (sec. 3116) that would authorize up to \$10.0 million for the purchase of certain mineral rights at the Department of Energy Rocky Flats Environmental Technology Site by the Secretary of Energy and for payment to extinguish all natural resource damage liability at the site.

The House bill contained no similar provision.

The House recedes with an amendment that would specify section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (42 U.S.C. 9607) as the provision of law applicable to natural resource damage liability.

Report on compliance with Design Basis Threat issued by Department of Energy in 2005 (sec. 3113)

The Senate amendment contained a provision (sec. 3111) that would require the Secretary of Energy to submit to the congressional defense committees a report describing plans for upgrading the security posture of the Department of Energy and the National Nuclear Security Administration in response to the design basis threat issued by the Secretary in October 2004.

The House bill contained no similar provision.

The House recedes with a clarifying amendment that would: (1) identify the design basis threat issued by the Department in November 2005 as the design basis threat to be analyzed in the report; (2) require a comparison of the security requirements contained in the design basis threat issued in May 2003 with those contained in the design basis threat issued in November 2005; and (3) require a review by the Government Accountability Office not later than 1 year after enactment of this Act of the Department's plan for complying with the design basis threat of November 2005.

The conferees further direct the Secretary to notify the congressional defense committees 30 days prior to the restart of those construction activities that were suspended due to the revision of the seismic criteria for either the High-Level Waste facility or the Pretreatment facility of the Waste Treatment and Immobilization Plant Project.

LEGISLATIVE PROVISIONS NOT ADOPTED

Prohibition on use of funds for robust nuclear earth penetrator

The Senate amendment contained a provision (sec. 3117) that would prohibit the use of any funds authorized to be appropriated to the Department of Energy to be made available for the robust nuclear earth penetrator (RNEP).

The House bill contained no similar provision. The House authorized a related study effort for penetrators to hold at risk hard and deeply buried targets within the Department of Defense elsewhere in this Act.

The Senate recedes.

The conferees agree to authorize no funding for the RNEP study under the Department of Energy, but instead authorize a related study effort within the Department of Defense elsewhere in this Act. The conference outcome is reflected in the tables of this report.

Report on advanced technologies for nuclear power reactors in the United States

The Senate amendment contained a provision (sec. 3119) that would require the Secretary of Energy to submit to Congress a report containing a description and assessment of technologies under development that offer the potential to further enhance the safety and proliferation-resistance of nuclear power reactors.

The House bill contained no similar provision.

The Senate recedes.

The conferees note that the Department of Energy leads the federal government's efforts to develop new nuclear energy generation technologies to meet energy goals, to develop advanced, proliferation-resistant nuclear fuel technologies that maximize energy from nuclear fuel, and to maintain and enhance the national nuclear technology infrastructure. The conferees support these objectives for the purpose of enhancing both the energy and economic security of the United States and seek to further efforts to better communicate the advancements being made towards these objectives to the general public.

The Secretary of Energy shall submit to Congress a report on advanced technologies for nuclear power reactors in the United States. The report shall include a description and assessment of the following: (1) technologies under development for advanced nuclear power reactors that offer the potential for further enhancements of the safety performance of nuclear power reactors, and (2) technologies under development for advanced nuclear power reactors that offer the potential for further enhancements of proliferation-resistant nuclear power reactors. The information in the report shall be presented in a manner and format that facilitates the dissemination of such information to, and the ready understanding of such information by, members of the general public, not later than six months after the date of enactment of this Act.

Sense of the Senate regarding interim reports on residual beryllium contamination at Department of Energy vendor facilities

The Senate amendment contained a provision (sec. 3118) that would state the sense of the Senate regarding interim reports on residual beryllium contamination at Department of Energy vendor facilities, and would urge the Director of the National Institute for Occupational Safety and Health (NIOSH) to provide to Congress interim reports on residual beryllium contamination at such facilities not later than 14 days after completing the internal review of such reports.

The House bill contained no similar provision.

The Senate recesses.

The conferees note that section 3169 of the Ronald W. Reagan National Defense Authorization Act for Fiscal Year 2005 (Public Law 108–375; 42 U.S.C. 7384 note) requires NIOSH to submit not later than December 31, 2006, an update to the October 2003 report of NIOSH on residual beryllium contamination at Department vendor facilities.

The conferees note that workers at Department vendor facilities who were potentially exposed to beryllium contamination should be informed at the earliest opportunity once the results of the site-specific study are available. The conferees note that NIOSH has completed its evaluation of residual beryllium contamination at some Department vendor facilities. The conferees direct the Secretary of Energy to request the Director of NIOSH: (1) to provide to Congress and the Department Office of Environment, Safety and Health interim reports on residual beryllium contamination at Department vendor facilities not later than 14 days after completing the internal review of such reports; and (2) to publish in the Federal Register summaries of the findings of such reports, including the dates of any significant residual beryllium contamination, at such time as the reports are provided to the Department Office of Environment, Safety and Health.

This additional disposal of ferromanganese may take place only if the Secretary of Defense submits written certification to the Committees on Armed Services of the Senate and the House of Representatives, not later than 30 days before the commencement of disposal, that: (1) the disposal of the additional ferromanganese is in the interest of national defense; (2) the disposal will not cause undue disruption to the usual markets of producers and processors of ferromanganese in the United States; and (3) the disposal is consistent with the requirements and purpose of the National Defense Stockpile.

TITLE XXXIV—NAVAL PETROLEUM RESERVES

TITLE XXXV—MARITIME ADMINISTRATION

LEGISLATIVE PROVISIONS ADOPTED

Maritime administration (secs. 3501–3510)

The House bill contained provisions (sec. 3501–3505) that would authorize funds for fiscal year 2006, authorize payments for State and regional maritime academies, make modifications to the maintenance and repair pilot program, authorize improvements to the National Defense Tank Vessel Construction Assistance Program, and authorize improvements to the Maritime Administration (MARAD) vessel disposal program.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment that would: (1) authorize appropriations for fiscal year 2006 for operations and training, administrative expenses related to loan guarantee commitments under the title XI program, and for expenses to dispose of obsolete vessels in the National Defense Reserve Fleet; (2) authorize payments for State and regional maritime academies; (3) modify the maintenance and repair pilot program; (4) authorize improvements to the National Defense Tank Vessel Construction Assistance Program; (5) authorize improvements to the MARAD vessel disposal program; (6) authorize a new program to assist small shipyards and maritime communities; (7) transfer authority over the title XI non-fishing vessel loan guarantee decisions to the Maritime Administrator and make other improvements to the title XI program; (8) provide for a technical correction related to certain intermodal facilities; (9) provide for expanded use of the United States Maritime Service; and (10) provide certain awards and medals free of charge.

Section 3503 would direct the Secretary of Transportation to carry out the domestic maintenance and repair pilot program authorized in the National Defense Authorization Act for Fiscal Year 2004 (Public Law 108–136) for at least one vessel under a Military Security Program (MSP) contract. The amendment would allow for reimbursement of the cost differential between performing qualified maintenance and repair work in the United States as opposed to performing it overseas. Qualified maintenance or repair work would include work identified before and during the Coast Guard-required vessel inspection and survey process, including, but not limited to, cutting out and replacing the hull structure; removal, repair, or replacement of machinery and equipment of all types; and repair of internal and external coatings. This section authorizes the Secretary to issue an interim rule, and the conferees urge the Secretary to work with the MSP contractors to establish a viable, sustainable program capable of accommodating more vessels, in addition to providing contractors' assistance in locating qualified maintenance and repair facilities in the U.S. in the geographic area in which a contracted vessel normally operates.

Section 3504 requires the Secretary of Transportation, to the extent of the availability of appropriations, to enter into a contract with a proposed purchaser and proposed shipbuilder for the construction of a product tank vessel under the National Defense Tank Vessel Construction Program. This section also eliminates the limi-

tation that only allows the program to fund up to 75 percent of the actual construction costs of the vessel.

Section 3505 would repeal obsolete requirements of title 35 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Public Law 106-398), and would require the development of a comprehensive management program consistent with recommendations made by the Government Accountability Office. The plan for implementation of this program is due to the Committees on Armed Services of the Senate and the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate 180 days from enactment of this Act. If this plan is not delivered within 180 days, the Secretary would be required to award a contract for the private management of the obsolete vessel disposal program after an open, competitive bid process. The amendment would authorize the title transfer of obsolete vessels for disposal as artificial reefs at a time deemed appropriate by the Secretary.

Section 3506 would authorize the MARAD to establish a loan, loan guarantee, and grant program to assist small shipyards to make capital improvements and improve maritime training programs for small communities largely served by the maritime industry. The conferees encourage the Secretary to administer the program established by this section in a manner that is consistent with procedural safeguards contained in section 1104A of the Merchant Marine Act, such as those providing for assessing economic soundness, monitoring, review of applications, and agreements with obligors under that section, and with other Federal laws and standards applicable to similar Federal programs as determined appropriate by the Secretary.

Section 3507 would make technical and substantive amendments to title XI of the Merchant Marine Act, 1936 (46 U.S.C. App. 1274), which authorizes the Maritime Guaranteed Loan Program. The conferees intend for the MARAD to retain adequate resources with sufficient expertise to perform all functions of this program without requiring assistance from the Department of Transportation or other agencies. The conferees also agree that the decision to subject loan guarantee applications to a third-party independent analysis should be based on risk factors enumerated in section 1104A(f) of the Merchant Marine Act, 1936, as amended by this Act. The conferees agree there should be no rule, regulation, or procedure governing the Maritime Guaranteed Loan Program that requires a third-party independent analysis for all applications without regard to these risk factors. When an independent analysis is required, the conferees would expect only experts in maritime finance or operations be funded to conduct the analysis.
