PURPOSE AND SUMMARY

The purpose of H.R. 2583, the Physician Workforce Enhancement Act of 2008, is to establish a loan program for eligible hospitals to establish residency training programs in allopathic and osteopathic medicine, with a preference for hospitals located in rural areas.

BACKGROUND AND NEED FOR LEGISLATION

Recent trends in the physician workforce demonstrate that the growth in the physician workforce is not keeping pace with general population growth. Certain areas of practice, including primary care and pediatrics, are expected to have more critical shortages in the future. In 2006, the American College of Physicians released a report entitled “The Impending Collapse of Primary Care Medicine and Its Implications for the State of the Nation’s Health Care.” According to that report, as the demand has grown for primary care due to growth in the number of people with chronic diseases and long-term care needs of an aging population, there has been a decline in the number of medical students and training opportunities for primary care. This problem will only be further exacerbated by the decline of the physician workforce in years to come.

Residency training programs are an integral way to attract physicians, particularly in hard-to-serve areas such as rural areas. In the 16th report of the Council of Graduate Medical Education, entitled, “Physician Workforce Policy Guidelines for the United States,

2000–2020,” the Council recommended that the number of physicians entering residency training each year should be increased to 27,000 by 2015 to meet projected demand of medical services. The Council recommends a multifaceted approach to achieve this increase, and one important part of that plan is to facilitate a modest increase in medical education and training capacity over the next decade.

One important source of funding for residency training programs is Medicare. The Medicare program, however, caps the number of residents and fellows eligible for Medicare reimbursement. This can narrow the number of resources available to some smaller hospitals that have the need for residents that will later serve the community as physicians. That cap was implemented at a time when it appeared that the physician workforce would enjoy surpluses for some time and that the use of managed health care services would reduce the demand for medical services. Both trends have significantly reversed in recent years, precipitating the need for a new strategy to improve the health and vitality of the U.S. physician workforce.

U.S. CONGRESS,

Enclosure.

H.R. 2583—Physician Workforce Enhancement Act of 2008

H.R. 2583, the Physician Workforce Enhancement Act of 2008, would allow eligible hospitals to receive a no-interest loan to establish a residency training program. Eligible hospitals are public or nonprofit hospitals that are not currently operating and have not previously operated a residency training program. Loans to individual hospitals could not exceed \$250,000 annually. Loans could only be for costs directly related to certain residency programs in one of (or a combination of) the following areas: family medicine, internal medicine, obstetrics and gynecology, behavioral or mental health, and pediatrics.

Assuming appropriation of the necessary amounts, CBO estimates that implementing the bill would cost an additional \$1 million in 2010 and \$4 million over the 2010–2013 period. Enacting H.R. 2583 would not affect direct spending or revenues.

H.R. 2583 contains no intergovernmental or private-sector mandates as defined in the Unfunded Mandates Reform Act. Public hospitals in rural areas that establish residency training programs would benefit from loans authorized in the bill.

Under H.R. 2583, hospitals would be required to enter into an agreement with the Administrator of the Health Resources and Services Administration (HRSA) to repay the loan in installments beginning 18 months after the loan is disbursed. H.R. 2583 would require that loans be repaid no later than 24 months after the loan repayment begins. Under the bill, if a hospital receives a loan and then terminates the residency training program before repaying the loan, the hospital would have 45 days to repay the loan after terminating the residency program. In making loans to eligible hospitals, the HRSA Administrator would be required to establish guidelines that give preference to hospitals in rural areas.

Lastly, H.R. 2583 would establish the loan program no later than October 1, 2010. No loans could be made under this program after December 31, 2013.

H.R. 2583 would authorize the appropriation of such sums as may be necessary to provide \$8 million in loans for 2010 and \$34 million in loans over the 2009–2013 period. Under the Federal Credit Reform Act of 1990, the cost of a loan program is measured as the net present value of cash flows over the life of the loan. Hospitals would begin to repay the loan 18 months after disbursement and would repay the entire loan amount within 24 months after repayments begin. CBO estimates that the subsidy cost for the no-interest loans would total about \$1 million per year over the 2010–2013 period.

The estimated cost of H.R. 2583 is shown in the following table. The costs of this legislation fall within budget function 550 (health).

The CBO staff contact for this estimate is Kirstin Nelson. This estimate was approved by Keith J. Fontenot, Deputy Assistant Director for Health and Human Resources, Budget Analysis Division.

The Committee adopts as its own the estimate of Federal mandates regarding H.R. 2583 prepared by the Director of the Congressional Budget Office pursuant to section 423 of the Unfunded Mandates Reform Act.

ADVISORY COMMITTEE STATEMENT

No advisory committees within the meaning of section 5(b) of the Federal Advisory Committee Act would be created by H.R. 2583.

CONSTITUTIONAL AUTHORITY STATEMENT

Pursuant to clause 3(d)(1) of rule XIII of the Rules of the House of Representatives, the Committee finds that the Constitutional authority for H.R. 2583 is provided in the provisions of Article I, section 8, clause 1, that relate to expending funds to provide for the general welfare of the United States.

APPLICABILITY TO LEGISLATIVE BRANCH

The Committee finds that H.R. 2583 does not relate to the terms and conditions of employment or access to public services or accommodations within the meaning of section 102(b)(3) of the Congressional Accountability Act of 1995.

SECTION-BY-SECTION ANALYSIS OF THE LEGISLATION

Section 1. Short title

Section 1 establishes the short title as the Physician Workforce Enhancement Act of 2008.

Section 2. Hospital residency loan program

Section 2 establishes the date of establishment for the program as October 1, 2010; clarifies that an eligible hospital means a public or non-profit hospital; establishes the list of eligible professions as family medicine, internal medicine, obstetrics or gynecology, behavioral or mental health, pediatrics, or a combination of such professions; extends the preference for loans to be given to rural areas, as defined by section 1886(d)(2)(D) of the Social Security Act; makes clear that permissible uses of loan funds are only meant to cover direct costs that are determined by the Administrator of the Health Resources and Services Administration to be necessary to run the residency training program; establishes the date to commence repayment as 18 months and the repayment period as 24 months; sets the limitation on the total amount of the loan, so that no annual dollar amount may exceed \$250,000; establishes a penalties provision so that the Secretary may collect interest, together with any other penalties, on defaulted loans (thereby making the restriction in subsection (f) subject to the authority to collect interest); and establishes the authorization of appropriations (\$8 million for fiscal year (FY) 2009, \$8.4 million for FY 2010, \$8.82 million for FY 2011, \$9.261 million for FY 2012; and \$9,724,050 for FY 2013); and terminates the program after December 31, 2013.
