#### Establishment of the Pesticide Program Dialogue Committee

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** As required by section 9(a)(2) of the Federal Advisory Committee Act, this notice announces the establishment of a Pesticide Program Dialogue Committee. This Committee is being established to provide a forum for a diverse group of individuals to provide advice and assistance to EPA's Office of Pesticide Programs (OPP) regarding pesticide regulatory development and reform initiatives, evolving public policy and program implementation issues, and science issues associated with evaluating and reducing risks from use of pesticides. The Agency has determined that this is in the public interest and will assist the Agency in performing its duties as prescribed in the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Copies of the Committee Charter will be filed with the appropriate committees of Congress and the Library of Congress. The Committee's first meeting will be scheduled in the Fall of 1995 and will be open to the public.

#### FOR FURTHER INFORMATION CONTACT:

Persons needing further information or seeking to obtain a copy of the Committee Charter should contact: Margie Fehrenbach, Office of Pesticide Programs, Environmental Protection Agency, Mail Code 7501C, 401 M St., SW., Washington, DC 20460, Telephone: (703) 305-7090, e-mail: fehrenbach.margie@epamail.epa.gov.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

EPA's Office of Pesticide Programs (OPP) is entrusted with the responsibility of ensuring the safety of the American food supply; the protection from unreasonable risk or exposure of those who apply pesticides, or are exposed to pesticides occupationally or through use of products; and, general protection of the environment and special ecosystems from potential risks posed by pesticides. OPP must also make sure that pesticides are regulated fairly and help ensure that effective measures for controlling pests are available through careful balancing of pesticide risks and benefits.

Pesticides are used in a remarkably diverse array of products, including insect repellents, agricultural weed killers, household disinfectants, swimming pool chemicals, to name a few. They are likely to be found or used in nearly every home and business in the United States, where over one billion pounds of pesticide chemicals are used each year. Thus, public concern over potential risks to human health and the environment from pesticides is significant.

While several mechanisms are in place to try to involve the public in pesticide decisionmaking activities, the Pesticide Program Dialogue Committee will bring together a broad cross-section of knowledgeable individuals from organizations representing divergent views to discuss pesticide regulatory, policy and implementation issues. EPA proposed the establishment of a dialogue committee to foster the exchange of ideas and information so that feasible regulatory and policy changes could be developed. Dialogue with outside groups is essential if OPP is to be responsive to the needs of the affected public and industry organizations.

The creation of a Pesticide Program Dialogue Committee under the Federal Advisory Committee Act (FACA) will provide the structured environment for meaningful information exchanges and consensus building discussions.

##### II. Participants

The Group will have approximately 20 members. OPP will carefully monitor membership to ensure that there is a balanced representation from industry/trade associations; pesticide user and commodity groups; consumer and environmental/public interest groups; and others.

EPA anticipates that the committee will contain the following types of representatives: environmental/public interest groups, chemical industry/trade associations, commodity and user groups, State and Regional representatives, other Federal agencies, the public health community, congressional committees, academia, and the general public.
