

# Federal Register

Briefings on How To Use the Federal Register  
For information on briefings in Washington, DC, see  
announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the Federal Register shall be judicially noticed.

The Federal Register is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the Federal Register is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. It is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. The annual subscription fee for a single workstation is \$375. Six-month subscriptions are available for \$200 and one month of access can be purchased for \$35. Discounts are available for multiple-workstation subscriptions. To subscribe, Internet users should telnet to swais.access.gpo.gov and login as newuser (all lower case); no password is required. Dial-in users should use communications software and modem to call (202) 512-1661 and login as swais (all lower case); no password is required; at the second login prompt, login as newuser (all lower case); no password is required. Follow the instructions on the screen to register for a subscription for the Federal Register Online via *GPO Access*. For assistance, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids.gpo.gov, or a fax to (202) 512-1262, or by calling (202) 512-1530 between 7 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.

The annual subscription price for the Federal Register paper edition is \$494, or \$544 for a combined Federal Register, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the Federal Register including the Federal Register Index and LSA is \$433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is \$8.00 for each issue, or \$8.00 for each group of pages as actually bound; or \$1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250-7954.

There are no restrictions on the republication of material appearing in the Federal Register.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

## THE FEDERAL REGISTER WHAT IT IS AND HOW TO USE IT

- FOR:** Any person who uses the Federal Register and Code of Federal Regulations.
- WHO:** Sponsored by the Office of the Federal Register.
- WHAT:** Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
  2. The relationship between the Federal Register and Code of Federal Regulations.
  3. The important elements of typical Federal Register documents.
  4. An introduction to the finding aids of the FR/CFR system.
- WHY:** To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

### WASHINGTON, DC

[Two Sessions]

- WHEN:** October 17 at 9:00 am and 1:30 pm
- WHERE:** Office of the Federal Register Conference Room, 800 North Capitol Street NW., Washington, DC (3 blocks north of Union Station Metro)
- RESERVATIONS:** 202-523-4538

# Rules and Regulations

Federal Register

Vol. 60, No. 189

Friday, September 29, 1995

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

#### 7 CFR Parts 300 and 319

[Docket No. 94-114-2]

#### Importation of Fruits and Vegetables

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** We are allowing a number of previously prohibited fruits and vegetables to be imported into the United States from certain parts of the world. All of the fruits and vegetables, as a condition of entry, will be subject to inspection, disinfection, or both, at the port of first arrival as may be required by a U.S. Department of Agriculture inspector. In addition, some of the fruits and vegetables will be required to undergo prescribed treatments for fruit flies or other injurious insects as a condition of entry, or to meet other special conditions. This action will provide the United States with additional kinds and sources of fruits and vegetables while continuing to provide protection against the introduction and dissemination of injurious plant pests by imported fruits and vegetables.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Mr. Frank E. Cooper or Mr. Peter Grosser, Senior Operations Officers, Port Operations, PPQ, APHIS, 4700 River Road Unit 139, Riverdale, MD 20737-1236; (301) 734-8645.

#### SUPPLEMENTARY INFORMATION:

##### Background

The regulations in 7 CFR 319.56 through 319.56-8 (referred to below as the regulations) prohibit or restrict the importation of fruits and vegetables into

the United States from certain parts of the world to prevent the introduction and dissemination of injurious insects that are new to or not widely distributed within and throughout the United States.

On May 24, 1995, we published in the Federal Register (60 FR 27428-27437, Docket No. 94-114-1) a proposal to amend the regulations by allowing additional fruits and vegetables to be imported into the United States from certain parts of the world under specified conditions. The importation of these fruits and vegetables had been prohibited because of the risk that the fruits and vegetables could introduce injurious insects into the United States. We proposed to allow these importations at the request of various importers and foreign ministries of agriculture, and after conducting pest risk assessments that indicated that the fruits or vegetables could be imported under certain conditions without significant pest risk.

We solicited comments concerning our proposal for 30 days ending June 23, 1995. We received two comments by that date. They were from a State agency and an industry group. Both commenters had reservations to specific provisions of the proposed rule. The comments are discussed below by topic:

##### Papayas From Belize

*Comment:* The Animal and Plant Health Inspection Service (APHIS) did not indicate in the proposal how it would ensure that cartons of papayas marked "Not for importation into or distribution in HI" would not enter Hawaii.

*Response:* Papayas from Belize may not be imported into Hawaii. All importations into Hawaii from foreign countries are inspected by APHIS officials, and any papaya from Belize arriving in Hawaii would be seized or rejected. Belizean papayas shipped from the mainland United States would be intercepted by State of Hawaii Department of Agriculture inspectors, who routinely inspect cargo arriving from the mainland. The State inspectors would inform APHIS of the violation, and APHIS would seize the shipment and determine whether enforcement procedures should be initiated.

Ya Pears From the Peoples Republic of China

*Comment:* APHIS has not indicated in the proposal how the conditions for the importation of Ya pears from China would be maintained. Also, China has not yet developed a program for pest-free areas for phytosanitary certification, and there is no indication that the current farming and packing practices will lend themselves to the incorporation of a systems approach to attain pest-free status. Should the proposed conditions not be met, what resources does APHIS have to detect pests prior to dissemination in the United States?

*Response:* The results of APHIS personnel visits to Hebei Province in China to study production and safeguarding procedures for Ya pears led us to propose the requirements explained in the proposal. We believe that the required safeguards will be observed by the Chinese. All shipments will be inspected at the U.S. port of arrival. Any findings of significant quarantine pests will be an indication that the required safeguards are not being applied adequately and will be cause for action by APHIS to ensure that corrective measures are taken. As is our practice, repeated findings of significant quarantine pests will be cause for prohibiting future shipments of the produce. In addition, APHIS intends to make periodic visits to the growing area in Hebei Province to monitor production and safeguarding procedures.

*Comment:* The agency's pest risk assessment explains that some of the pathogens that attack pears in China differ from those in Japan and Korea. Therefore, the agency's experience with dealing with the disease risk involved in the importation into the United States of produce from Japan and Korea does not account for the added disease risks involved in the importation into the United States of Ya pears from China. The conditions, regulatory capabilities (infrastructure), and differing pests and diseases should be considered when assessing the pest risk of the importation into the United States of Ya pears from China. It should not be assumed by the agency that the systems approach can work for exports from every country.

*Response:* The pest list does differ between Japan, Korea, and China.

Although the lists are different, we believe that the safeguards are sufficient to exclude the pests that could ordinarily move with the fruit.

*Comment:* The pest risk assessment for Ya pears from China indicates that *Alternaria alternata*, brown rot, and pear scab are present in China and could be introduced into the United States through the importation of Ya pears. Therefore, APHIS should not allow the importation of Ya pears from China until a detailed plan to prevent the introduction and dissemination of these diseases has been developed and reviewed.

*Response:* *Alternaria alternata* is considered a cosmopolitan organism and is widespread within the United States. As such, it falls outside of the scope of the regulatory authority of APHIS. *Alternaria gaisen*, considered by some mycologists to be part of the *Alternaria alternata* species complex, does infect sandpear fruits; however, bagging of the fruits, which will be required for Ya pears imported into the United States from China, prevents infection. In addition, studies in Japan and the United States have shown that the fungus only sporulates in cracked fruits; therefore, we expect it to sporulate only in cracked fruits in China also. Cracked fruits are clearly visible and will be excluded from shipping during packing house operations.

Brown rot and pear scab are reported in China. The bagging of the fruits prevents infection, and the culling and inspections of the fruit in the packing house will exclude from shipping fruits that show signs of rot or scabbing.

#### Grapes From India

We received one comment concerning the pest risk assessment for grapes from India. In addition, since the publication of the proposed rule, new information has become available that indicates that grapes from India are attacked by a fruit fly, *Bactrocera correcta*, which is not found in the United States. At present, there is no acceptable quarantine treatment for this fruit fly. Therefore, we are taking no action at this time to allow grapes from India to be imported into the United States, and the provisions found in the proposed rule concerning grapes from India are not included in this final rule.

#### Litchi From Peoples Republic of China

*Comment:* The litchi proposed for importation into the United States from China presents a risk of introducing *Peronophythora litchii*, which is difficult to detect visually and would present a pest risk to the domestic tomato industry. APHIS should review

this pest risk more thoroughly before allowing the importation of litchi. Also, there are no cold treatment facilities on the west coast of the United States authorized to perform the cold treatment designated in the proposed rule for litchi. Where will APHIS require that the cold treatment be performed? Will irradiation be allowed?

*Response:* *Peronophythora litchii* causes a white cottony mold to appear on infected fruit. As this mold is quite evident, inspectors can easily identify infected fruit and exclude them from shipping during the packing process. Although this fungus has caused serious losses in Taiwan and China during favorable years for the disease, no field infections on other crops have been reported.

We anticipate that litchi from China and from India will undergo cold treatment en route to the United States aboard ships with cold treatment facilities approved by APHIS. APHIS continues to encourage the development of alternative treatments and will consider irradiation treatment for litchi when procedures and schedules are presented for study.

#### Lettuce From Israel

*Comment:* APHIS has not indicated how it will ensure that all of the provisions included in the proposal concerning the importation of lettuce from Israel into the United States are carried out. Also, in the event that the proposed procedures are not followed, APHIS has not indicated the level of resources necessary and available to inspect the product for pests prior to importation into the United States.

*Response:* The Israeli Ministry of Agriculture will certify on a phytosanitary certificate that the specified conditions have been met. Inspection at the port of entry will also serve to determine whether the conditions were carried out. If pests are found, actions will be taken on the affected shipment, and additional actions can be taken to correct, adjust, or modify the safeguards used to prevent pest infestation.

Many variables can affect the level of resources APHIS can apply to any given program at any given time. APHIS intends to allocate the number of staff hours necessary to inspect Israeli lettuce to provide the level of inspection and enforcement required to protect U.S. agriculture. Apricots, Peaches, Plums, and Nectarines from Zimbabwe

*Comment:* The proposed conditions for the importation of fruit from Zimbabwe do not adequately address the risk presented by pathogens reported to occur on peaches and

nectarines in Zimbabwe. Additionally, there is a risk that *Taphrina mume* could be introduced into the United States on fruit imported from Zimbabwe.

*Response:* No quarantine-significant pathogens that would move with the fruits from Zimbabwe were identified in the pest risk assessment. *Taphrina mume* has not been reported to occur in Zimbabwe or to infect peaches or nectarines.

#### Root Crops

*Comment:* Because low-level nematode infestation cannot be readily detected by visual inspection, APHIS should more adequately address the potential for nematode introduction presented by imported root crops that could be planted or otherwise propagated.

*Response:* We have long recognized that some products imported for consumption are capable of being propagated and that occasionally individuals, out of curiosity, may plant them. While we do not believe that the extent of this practice makes it a significant pest risk, we have in the past explored three ways of preventing this practice: (a) prohibit the importation of all commodities that could potentially be propagated, (b) treat all commodities capable of propagation with sprout inhibitor, or (c) devitalize the products prior to export. We believe that the first option, prohibition, should be applied only to products that pose pest risks that cannot be mitigated in other ways. We have experimented with the second option, using sprout inhibitors, but they do not offer sufficient quarantine security for high-risk products and are not registered for most products. The third option, devitalization, in most cases renders a product unacceptable for the fresh fruit and vegetable market.

Countries are becoming more and more sophisticated in their production and phytosanitary practices; therefore, the quality of fruits and vegetables in general is increasing. Products are graded and inspected during packing and prior to export, and the products are inspected again upon arrival in the United States. All of this reduces the likelihood of a pest entering the United States. If a person chooses to try to propagate a commodity that has been imported into the United States, that person would likely choose the healthiest-looking material, thus further reducing the probability that a plant pest would be spread. We believe this limited degree of risk is insignificant.

### Trapping Program

*Comment:* In the proposed rule, APHIS has not provided specifics on the Mediterranean fruit fly (Medfly) trapping program conducted within the designated Medfly-free districts. APHIS may want to provide additional discussion in the final rule substantiating the establishment of the pest free zone.

*Response:* The Medfly trapping techniques, including the type of trap, type of lures, placement of trap, monitoring of trap, etc., used to establish the Medfly-free area in Belize are in accordance with written guidelines patterned after recommendations of the California Department of Food and Agriculture (CDFA) Pest Detection Guide. (To obtain a copy of the CDFA Pest Detection Guide, write to Dr. Isi A. Siddiqui, California Department of Food and Agriculture, 1220 N Street, Sacramento, CA 95814.) Compliance is routinely verified by APHIS personnel.

### Treatment Required

*Comment:* It is essential, given the possible economic impact of fruit fly introduction, that any required treatment be conducted at the point of origin, as opposed to the point of arrival, to ensure that none of the fruit flies are imported into the United States. Also, APHIS should cite its basis for the conclusion that climatic conditions at the port of Wilmington, NC, are unsuitable for the establishment of fruit flies.

*Response:* APHIS encourages cold treatments in the country of origin or en route to the United States aboard vessels with approved cold treatment facilities. However, our experience shows that cold treatments can be successfully carried out at U.S. ports of arrival without significant risk of fruit fly escape. Therefore, three options are usually available for cold treated fruit: treatment in the country of origin, treatment en route to the United States, and treatment upon arrival in the United States.

When we approved cold treatment at Wilmington, NC, in a final rule published in the Federal Register on August 10, 1994 (59 FR 40794-40797, Docket No. 93-121-3), we imposed additional safeguards not required for cold treatment at more northern locations. A detailed explanation of the additional conditions appears in the preamble of the proposed rule published in the Federal Register on May 13, 1994 (59 FR 24968-24971, Docket No. 93-121-2). The additional conditions are:

1. Bulk shipments (those shipments which are stowed and unloaded by the case or bin) of fruit arriving for cold treatment must be packaged in fruit fly-proof packaging that prevents the escape of adult, larval, or pupal fruit flies.

2. Bulk and containerized shipments of fruit arriving at the port of Wilmington, NC, for cold treatment must be cold treated within the port, that is, the area over which the Bureau of Customs is assigned the authority to accept entries of merchandise, to collect duties, and to enforce the various provisions of the customs and navigation laws in force.

3. Advance reservations for cold treatment space at the port of Wilmington, NC, must be made prior to the departure of a shipment from its port of origin.

We believe that the conditions established for cold treatment at Wilmington, NC, including these additional conditions, are adequate to prevent the introduction of certain plant pests into the United States.

### Pest Risk Assessments

*Comment:* The pest risk assessments supporting this proposal appear to consist only of a cursory look at the interception histories and a brief review of the available literature. Approval of a number of the commodities proposed for entry should be postponed until additional review can take place.

*Response:* We believe that the pest risk assessments performed and the safeguards proposed are adequate to prevent the introduction of pests by the commodities proposed for entry. In addition, APHIS is developing a more transparent pest risk assessment process to offer outside reviewers a clearer and more detailed explanation of how we determine pest risk, thereby enhancing public understanding of the pest risk involved with each commodity proposed for entry. This new pest risk assessment process follows the guidelines provided by the international plant protection organizations (e.g. North American Plant Protection Organization and United Nations' Food and Agricultural Organization) and will provide written documentation on the pest risk potential for organisms that rank high for the likelihood of introduction and establishment.

Therefore, based on the rationale set forth in the proposed rule and in this document, we are adopting the provisions of the proposal as a final rule with the changes noted above.

### Effective Date

This is a substantive rule that relieves restrictions and, pursuant to the

provisions of 5 U.S.C. 553, may be made effective less than 30 days after publication in the Federal Register. Immediate implementation of this rule is necessary to provide relief to those persons who are adversely affected by restrictions we no longer find warranted. Therefore, the Administrator of the Animal and Plant Health Inspection Service has determined that this rule should be effective upon publication in the Federal Register.

### Executive Order 12866 and Regulatory Flexibility Act

This rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

In accordance with 5 U.S.C. 601 *et seq.*, we have performed a Final Regulatory Flexibility Analysis, set forth below, regarding the economic impact of this rule on small entities.

This rule amends the regulations governing the importation of fruits and vegetables by allowing a number of previously prohibited fruits and vegetables to be imported into the United States from certain foreign countries and localities under specified conditions. The importation of these fruits and vegetables had been prohibited because of the risk that they could have introduced injurious plant pests into the United States. This final rule revises the status of certain commodities from certain countries and localities, allowing their importation into the United States for the first time.

These changes are based on pest risk assessments that were conducted by APHIS at the request of various importers and foreign ministries of agriculture. The pest risk assessments indicate that the fruits or vegetables listed in this rule can, under certain conditions, be imported into the United States without significant pest risk. All of the fruits and vegetables, as a condition of entry, will be subject to inspection, disinfection, or both, at the port of first arrival as may be required by a USDA inspector. In addition, some of the fruits and vegetables will be required to undergo mandatory treatment for fruit flies or other injurious insects as a condition of entry, or to meet other special conditions. This action will provide the United States with additional kinds and sources of fruits and vegetables while continuing to provide protection against the introduction into the United States of injurious plant pests by imported fruits and vegetables. Papayas from Belize

The United States produced 71.3 million pounds of papayas in 1993. Papayas are produced commercially on approximately 300 farms, the majority of which are in Hawaii. Nearly 65 percent of those farms are owned by individuals whose major occupation is not farming, while the balance are operated by individuals whose major occupation is farming. All of the farms are considered to be small entities according to Small Business Administration (SBA) size standards.

The United States imported 31.3 million pounds of papayas, valued at \$8,883,000, in 1993. Most of the imported papayas came from Mexico (66.6 percent), Jamaica (14.4 percent), and Belize (13.7 percent). The United States exported 16.7 million pounds of fresh papayas, worth \$14,245,000, in 1993. The major importers were Japan (73.4 percent) and Canada (24.6 percent). Almost all exports of domestically grown papayas are from Hawaii, while all imports of foreign-origin papayas come into the continental United States.

The total annual production of papayas in Belize is approximately 4.5 million pounds. Its current exports account for about 4.2 million pounds. The additional amount expected to be exported to the United States will be approximately 300,000 pounds of fresh papayas. Even if all the available supply were exported to the United States, it will increase the U.S. supply of papayas by only about 0.34 percent. A 0.34 percent increase in supply is unlikely to have any impact on prices or on producers or consumers.

#### Cantaloupes From Brazil

The United States produced about 1,910 million pounds of cantaloupes, with a total value of \$310 million, in 1993. Cantaloupes are produced commercially on about 7,500 farms, nearly 97 percent of which are considered to be small entities, according to SBA size standards. The United States is a net importer of cantaloupes. Imports totaled approximately 458 million pounds of cantaloupes. The major sources of imported cantaloupes include Mexico (32.8 percent), Honduras (26 percent), Costa Rica (17.5 percent), Guatemala (16 percent), and the Dominican Republic (2.8 percent). There were 116 million pounds of cantaloupes exported from the United States in 1993, of which nearly 95 percent went to Canada, while about 4 percent went to Mexico.

The commercial production of cantaloupe is in the infant stage in Brazil. Most of the Brazilian production is concentrated in the states of Rio

Grande do Norte and São Paulo. Production occurs mainly during the months of October through March, while U.S. production occurs during the months of May through September. Thus, any export from Brazil will be supplementary to, rather than competitive with, the U.S. supply. Total production of cantaloupes in Brazil was about 5,000 metric tons, or 11 million pounds, in 1994. Currently all cantaloupe production in Brazil is for domestic consumption. However, even if all Brazilian production were to be exported to the United States, the U.S. cantaloupe supply will increase by less than 0.5 percent. Because this final rule will allow the importation of cantaloupe from only part of Brazil—that area considered by APHIS to be free of the South American cucurbit fly—any increase in the U.S. cantaloupe supply will be even smaller. Such an increase will not be expected to impact U.S. producer prices.

#### Ya Pear From the Peoples Republic of China

The United States produced 860,000 metric tons (1,895 million pounds) of pears in 1993. The United States is a net exporter of pears, having exported 244 million pounds and imported 143 million pounds in 1993. Most of the pears imported into the United States came from Chile (57.3 percent), Argentina (30.4 percent), South Africa (6.1 percent), and New Zealand (3.9 percent). The main importers of U.S. pears are Canada (32.9 percent) and Mexico (34.9 percent), with the remaining quantities distributed among 45 destinations. There are approximately 9,800 farms producing pears in the United States, about 98 percent of which are considered to be small entities, according to SBA size standards.

China produced about 30,000 metric tons (or 66 million pounds) of Ya pears in 1993. It exported about 5,700 metric tons (or 12,562,800 pounds). Exports are to several countries in Europe, the Middle East, and Southeast Asia. The Ya pears that will be imported from the Peoples Republic of China are of a different variety than pears produced in the United States; because they are considered to be different products, they are not expected to be competitive with domestically grown pears.

#### Litchi From the Peoples Republic of China

The U.S. produced about 700,000 pounds of Litchi in 1993. There are 205 farms that produced litchi, most of which are considered to be small entities according to SBA criteria.

China produced approximately 27,000 metric tons (or 59.5 million pounds) of litchi in 1994, exporting about 25 percent (about 15 million pounds) of its production. Most of China's litchi exports went to several countries in Western Europe, the Middle East, and Southeast Asia, as well as to Canada. What proportion of China's domestic litchi production will be exported to the United States is not clear. In the event that a significant proportion of China's production is exported to the United States, U.S. producers will most likely be negatively impacted in the short run, since the increased supply will drive the market price of litchi down. U.S. consumers, on the other hand, will benefit from the lower price as well as the increased choice. In the long run, as a result of foreign competition in the U.S. litchi market, more competitive and cost-effective producers may emerge. Lower prices may also result in an increased demand for litchi. Which of these effects will outweigh the other cannot be stated definitely.

#### Basil From Ecuador and El Salvador

The United States imported 5,397,091 pounds of fresh or dried basil in 1993 (the ratio of fresh to dried cannot be ascertained). The major sources of import were Egypt (77.7 percent), Mexico (16.1 percent), France (2.2 percent), and Taiwan (1.2 percent). No information was obtained on potential production and imports of basil from Ecuador and El Salvador.

#### Pak Choi From Jamaica

There are no published data on the U.S. production of pak choi and no record of trade. Jamaica's current production of pak choi is estimated to be 3,825 metric tons (8.43 million pounds). Most production takes place between January and April. Although the exact amount that will be shipped to the United States is not known, approximately 50–75 percent of total production is expected to be exported to the United States. This is expected to expand the variety of choices available to vegetable consumers.

#### Chives From Israel

Israel produces approximately 100 metric tons of chives. Production takes place mainly from October to the end of March. Currently about 95 percent of production is exported to Europe. About 20 to 40 metric tons is expected to be exporter to the United States. Both producer prices and consumer prices will likely be unaffected by the importation of chives from Israel.

#### Dill From Israel

The United States imported 1,828,359 pounds of dill in 1993 (trade records do not clearly indicate whether the dill was fresh or dried). The major sources were India (68 percent), Pakistan (13.2 percent), Egypt (10 percent), Sweden (3.2 percent), and Turkey (2.5 percent). The United States is a net importer of dill. Israel produced about 520 metric tons (1,146,000 pounds) of dill in 1994 and exported about 46 metric tons of dill during the same period. Israel expects that it will export about 30 metric tons of dill to the United States within the next 3 to 5 years. Both producer prices and consumer prices will likely be unaffected by the importation of dill from Israel.

#### Lettuce From Israel

Total U.S. production of head, leaf, and romaine lettuce in 1993 was 3,756,350 metric tons (or 8,279 million pounds). There are approximately 2,660 producers of lettuce in the United States, about 97 percent of which are considered to be small entities according to SBA size standards.

The United States is a net exporter of lettuce. It imported 32,738,000 pounds of lettuce in 1993, mainly from Mexico and Canada, which together accounted for 99.2 percent of the imports. The United States exported 693,354,000 pounds of lettuce in 1993. Canada received approximately 82 percent of those exports, while the remaining destinations were highly varied.

Israel produced about 10 million pounds of insect-free lettuce, which is grown inside insect-proof screenhouses, during 1993. About 10 percent of the production is exported to Europe and the rest is consumed domestically. The amount of lettuce that will be exported to the United States is expected to be about 1,600,000 pounds, which represents less than 0.02 percent of U.S. production. This amount will not have a significant impact upon U.S. market supply. Additionally, the marketing target for this lettuce, both in Israel's domestic market as well as in the export market, is the ultra-orthodox religious community, members of which will not consume lettuce produced in any other way. Importation of this specialty product is not expected to compete with domestic production. Both producer prices and consumer prices will likely be unaffected by the importation of insect-free lettuce from Israel.

#### Radishes From The Netherlands

The United States produced about 122.4 million pounds of radishes in 1993. Radishes are produced on about

760 farms, all of which are considered to be small entities. The United States is a net importer of radishes and it imported 35,121,976 pounds of fresh and chilled (the proportion of fresh to chilled cannot be ascertained) radishes in 1993. Over 94 percent of these imported radishes came from Mexico and 5.5 percent from Canada.

The Netherlands currently produces about 68 million pounds of radishes. Exports are expected to increase in stages, from 1.1 million pounds in the first year, to 2.2 million pounds during the second year, to about 4.4 million pounds (about 3 percent of U.S. supply) the third year and thereafter. Exports of radishes are expected to be spread equally over a 12-month period, with no significant peak period.

#### Oca From New Zealand

There is no known commercial production of oca in the United States. Additionally, there is no record of oca imports into the United States. Oca is a specialty crop and only minor production is carried on in New Zealand. Most production occurs between the months of March and October. Annual production is about 110,000 pounds. Current oca exports from New Zealand to the rest of the world equal about 440 pounds. Allowing the importation of oca from New Zealand into the United States will provide additional choice to vegetable consumers.

#### Apricots, Peaches, Plums, and Nectarines From Zimbabwe

In 1993 the United States produced 87,430 metric tons (192.7 million pounds) of apricots on 3,353 farms; 1,130,00 metric tons (2,490.6 million pounds) of peaches on 19,106 farms; 182,395 metric tons (402 million pounds) of nectarines on 2,488 farms; and 176,710 metric tons (390 million pounds) of plums on 8,006 farms. About 98 percent of these farms are considered to be small entities according to SBA size standards.

The United States is a net exporter of all four of these commodities. Imports of these four commodities into the United States are largely from Chile, while most of the U.S. exports are destined for Canada, Mexico, Taiwan, Hong Kong, and the United Kingdom. Although relevant volume data is not available, the addition of Zimbabwe as a new trading partner in apricots, peaches, plums, and nectarines is unlikely to shift the favorable balance of trade that the United States currently enjoys for these four commodities.

#### Summary

The United States produces large amounts of grapes, cantaloupes, pears, papayas and radishes. The importations of these and other listed commodities will likely increase supply. However, since potential imports will represent a very small proportion of the total domestic production of each product, no significant negative impact on U.S. producers is expected from such importations. Although increased supply generally results in lower prices, no information is currently available about the magnitude of price responses to changes in supply. Overall, the benefits to consumers of any resulting price decline will likely outweigh the small losses to producers. Additionally, importation of oca and pak choi will increase the availability of new products. Both oca and pak choi have a limited market and are unlikely to compete with other products. Similarly, the Ya pears and cantaloupes for importation are also unlikely to compete with other products. Ya pears are a different variety than any domestically produced pear, while cantaloupes from Brazil will be imported during the off season for U.S. cantaloupes. Other products such as basil and dill are very minor products. Some of these products are grown to supplement other farm income.

The aggregate economic impact of this rule is expected to be positive. U.S. consumers will benefit from a greater availability of fruits and vegetables. U.S. importers will also benefit from a greater availability of fruits and vegetables to import.

The alternative to this final rule was to make no changes in the fruits and vegetables regulations. After consideration, we rejected this alternative since there was no pest risk reason to maintain the prohibitions on the affected produce.

In the course of rulemaking, we came across evidence that indicated that the importation of grapes from India posed a significant risk of plant pest introduction, and, therefore, we are continuing to prohibit the importation of grapes from India. If we had come across evidence indicating that the importation of any of the other concerned fruits or vegetables would pose a significant risk of plant pest introduction, we would have considered either developing alternative requirements regarding that importation or continuing to prohibit the importation of that fruit or vegetable. However, our pest risk assessments and our review of public comments on the proposal indicated that importation of

any of the concerned fruits and vegetables other than grapes from India would not pose a significant risk of introducing or disseminating plant pests.

Executive Order 12778

This rule allows certain fruits and vegetables to be imported into the United States from certain parts of the world. State and local laws and regulations regarding the importation of fruits and vegetables under this rule will be preempted while the fruit is in foreign commerce. Fresh fruits and vegetables are generally imported for immediate distribution and sale to the consuming public, and will remain in foreign commerce until sold to the ultimate consumer. The question of when foreign commerce ceases in other cases must be addressed on a case-by-case basis. No retroactive effect will be given to this rule, and this rule will not require administrative proceedings before parties may file suit in court challenging this rule.

National Environmental Policy Act

An environmental assessment and finding of no significant impact have been prepared for this rule. The assessment provides a basis for the conclusion that the importation of fruits and vegetables under the conditions specified in this rule will not present a significant risk of introducing or disseminating plant pests and will not have a significant impact on the quality of the human environment. Based on the finding of no significant impact, the Administrator of the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

The environmental assessment and finding of no significant impact were prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321 *et seq.*), (2)

Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500–1508), (3) USDA Regulations Implementing NEPA (7 CFR part 1b), and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Copies of the environmental assessment and finding of no significant impact are available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. In addition, copies may be obtained by writing to the individuals listed under **FOR FURTHER INFORMATION CONTACT.**

The regulations of the Council on Environmental Quality that implement NEPA require preparation of environmental documentation for all actions that are not categorically excluded by agencies in accordance with 40 CFR 1501.4(b). In a final rule published by APHIS on February 1, 1995, and effective March 3, 1995, APHIS categorically excluded a number of actions for the purposes of NEPA. This rule meets the criteria for categorical exclusion. Accordingly, this rule (initiated prior to the effective date of the agency's NEPA procedures), as well as future amendments in this regulatory series, are categorically excluded.

Paperwork Reduction Act

This rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects

7 CFR Part 300

Incorporation by reference, Plant diseases and pests, Quarantine.

7 CFR Part 319

Bees, Coffee, Cotton, Fruits, Honey, Imports, Incorporation by reference, Nursery stock, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Rice, Vegetables.

Accordingly, 7 CFR parts 300 and 319 are amended as follows:

**PART 300—INCORPORATION BY REFERENCE**

1. The authority citation for part 300 continues to read as follows:

Authority: 7 U.S.C. 150ee, 154, 161, 162, and 167; 7 CFR 2.17, 2.51, and 371.2(c).

2. In § 300.1, paragraph (a) is revised to read as follows:

**§ 300.1 Materials incorporated by reference; availability.**

(a) *Plant Protection and Quarantine Treatment Manual.* The Plant Protection and Quarantine Treatment Manual, which was reprinted November 30, 1992, and includes all revisions through September 1995, has been approved for incorporation by reference in 7 CFR chapter III by the Director of the Office of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51.

\* \* \* \* \*

**PART 319—FOREIGN QUARANTINE NOTICES**

3. The authority citation for part 319 continues to read as follows:

Authority: 7 U.S.C. 150dd, 150ee, 150ff, 151–167, 450, 2803, and 2809; 21 U.S.C. 136 and 136a; 7 CFR 2.17, 2.51, and 371.2(c).

4. In § 319.56–2t, the table is amended by adding, in alphabetical order, the following:

**§ 319.56–2t Administrative instructions: conditions governing the entry of certain fruits and vegetables.**

\* \* \* \* \*

Country/locality	Common name	Botanical name	Plant part(s)
Belize	Papaya .....	<i>Carica papaya</i> .....	Fruit (Must be accompanied by a phytosanitary certificate issued by the Belizean department of agriculture stating that the fruit originated in the district of Cayo, Corozal, or Orange Walk. Papayas from other districts enterable only with treatment—see § 319.56–2x). Prohibited entry into Hawaii due to <i>Toxotrypana curvicauda</i> . Cartons in which fruit is packed must be stamped “Not for importation into or distribution within HI.”
Ecuador			

Country/locality	Common name	Botanical name	Plant part(s)
*	Basil .....	<i>Ocimum</i> spp. ....	Above ground parts.
El Salvador .....	Basil .....	<i>Ocimum</i> spp. ....	Above ground parts.

5. In § 319.56-2u, the section heading is revised and paragraph (a) is added to read as follows:

**§ 319.56-2u Conditions governing the entry of lettuce and peppers from Israel.**

(a) Lettuce may be imported into the United States from Israel without fumigation for leafminers, thrips, and *Sminthuris viridis* only under the following conditions:

(1) *Growing conditions.* (i) The lettuce must be grown in insect-proof houses covered with 50 mesh screens, double self-closing doors, and hard walks (no soil) between the beds;

(ii) The lettuce must be grown in growing media that has been sterilized by steam or chemical means;

(iii) The lettuce must be inspected during its active growth phase and the inspection must be monitored by a

representative of the Israeli Ministry of Agriculture;

(iv) The crop must be protected with sticky traps and prophylactic sprays approved for the crop by Israel;

(v) The lettuce must be moved to an insect-proof packing house at night in plastic containers covered by 50 mesh screens;

(vi) The lettuce must be packed in an insect-proof packing house, individually packed in transparent plastic bags, packed in cartons, placed on pallets, and then covered with shrink wrapping; and

(vii) The lettuce must be transported to the airport in a closed refrigerated truck for shipment to the United States.

(2) Each shipment of lettuce must be accompanied by a phytosanitary certificate issued by the Israeli Ministry of Agriculture stating that the

conditions of paragraph (a)(1) of this section have been met.

\* \* \* \* \*

6. In § 319.56-2x, paragraph (a) is amended as follows:

a. In the table, in the entry for Israel, the entry for lettuce is amended in the fourth column under the heading *Plant part(s)* by adding the words “(Treatment for leafminers, thrips, and *Sminthuris viridis* not required if the lettuce is imported in accordance with § 319.56-2u(a))” after the word “Leaf”.

b. The table is amended by adding, in alphabetical order, the following:

**§ 319.56-2x Administrative instructions; conditions governing the entry of certain fruits and vegetables for which treatment is required.**

(a) \* \* \*

Country/locality	Common name	Botanical name	Plant part(s)
Belize .....	Papaya .....	<i>Carica papaya</i> .....	Fruit (Treatment for Medfly not required for fruit grown in the districts of Cayo, Corozal, and Orange Walk - see § 319.56-2t). Papayas prohibited entry into Hawaii due to <i>Toxotrypana curvicauda</i> . Cartons in which fruit is packed must be stamped “Not for importation into or distribution in HI”.
China .....	Litchi .....	<i>Litchi chinensis</i> .....	Fruit (Prohibited entry into Florida due to litchi rust mite. Cartons in which litchi are packed must be stamped “Not for importation into or distribution in FL”).

Country/locality	Common name	Botanical name	Plant part(s)
India	Litchi	<i>Litchi chinensis</i>	Fruit (Prohibited entry into Florida due to litchi rust mite. Cartons in which litchi are packed must be stamped "Not for importation into or distribution in FL").
Zimbabwe	Apricot	<i>Prunus armeniaca</i>	Fruit.
	Nectarine	<i>Prunus persica</i>	Fruit.
	Peach	<i>Prunus persica</i>	Fruit.
	Plum	<i>Prunus domestica</i>	Fruit.

**§ 319.56-2aa [Amended]**

7. In § 319.56-2aa, the section heading and the introductory text are amended by adding the words "and cantaloupe" after the word "melons".

8. Section 319.56-2aa is amended by adding the words "or cantaloupe" after the word "melons" in the following places:

(a) In paragraph (a) in the first sentence and both times it appears in the second sentence.

(b) In paragraph (b).

(c) In paragraph (c).

9. A new § 319.56-2ee is added to read as follows:

**§ 319.56-2ee Administrative instructions: conditions governing the entry of Ya variety pears from China.**

Ya variety pears may be imported into the United States from China only under the following conditions:

(a) *Growing and harvest conditions.*

(1) The pears must have been grown by growers registered with the Chinese Ministry of Agriculture in an APHIS-approved export growing area in Hebei Province.

(2) Field inspections for signs of pest infestation must be conducted by the Chinese Ministry of Agriculture during the growing season.

(3) The registered growers shall be responsible for following the phytosanitary measures agreed upon by APHIS and the Chinese Ministry of Agriculture, including applying pesticides to reduce the pest population and bagging the pears on the trees to reduce the opportunity for pests to attack the fruit during the growing season. The bags must remain on the pears through the harvest and during their movement to the packing house.

(4) The packing houses in which the pears are prepared for exportation shall not be used for any fruit other than Ya

variety pears from registered growers during the pear export season. The packing houses shall accept only those pears that are in intact bags as required by paragraph (a)(3) of this section. The pears must be loaded into containers at the packing house and the containers then sealed before movement to the port of export.

(b) *Treatment.* The pears must be cold treated for *Bactrocera dorsalis* in accordance with the Plant Protection and Quarantine Treatment Manual, which is incorporated by reference at § 300.1 of this chapter.

(c) Each shipment of pears must be accompanied by a phytosanitary certificate issued by the Chinese Ministry of Agriculture stating that the conditions of paragraphs (a) and (b) of this section have been met.

Done in Washington, DC, this 26th day of September 1995.

Lonnie J. King,

*Administrator, Animal and Plant Health Inspection Service.*

BILLING CODE 3410-34-P

**ACTION:** Interim rule with request for comments.

**SUMMARY:** This interim rule amends the Immigration and Naturalization Service (Service) regulations: To allow for implementation of additional land border inspection fee projects designed to facilitate the entry of identified, low-risk, legitimate border crossers on the northern border; to allow for the implementation of a pilot dedicated commuter lane (DCL) to facilitate the entry of identified, low-risk, legitimate border crossers on the California-Mexico border; to incorporate into 8 CFR 235.13 those provisions currently set forth in 8 CFR 286.8 pertaining to port designations and inspections of persons applying for admission to the United States; to increase the pool of eligible participants in pilot projects; and to clarify fee and application requirements of project participants. This rule is necessary to enhance inspection services at land border Ports-of-Entry (POEs) on the northern border and on the California-Mexico border, while still safeguarding those borders.

**DATES:** This interim rule is effective September 29, 1995. Written comments must be received on or before November 28, 1995.

**ADDRESSES:** Please submit written comments, in triplicate, to the Policy Directives and Instructions Branch, Immigration and Naturalization Service, 425 I Street, NW., Room 5307, Washington, DC 20536, Attn: Public Comment Clerk. To ensure proper handling, please reference INS No. 1675-94 on your correspondence. Comments are available for public inspection at this location by calling (202) 514-3048 to arrange for an appointment.

**DEPARTMENT OF JUSTICE**

**Immigration and Naturalization Service**

[INS No. 1675-94]

RIN 1115-AD82

**Collection of Fees Under the Dedicated Commuter Lane Program; Port Passenger Accelerated Service System (PORTPASS) Program**

**AGENCY:** Immigration and Naturalization Service, Justice.

**FOR FURTHER INFORMATION CONTACT:**

Robert A. Mocny, Assistant Chief Inspector, Inspections Division, Immigration and Naturalization Service, 425 I Street, NW., Room 7228, Washington, DC 20536, telephone (202) 514-3275.

**SUPPLEMENTARY INFORMATION:** The provisions of Public Law 101-515, dated November 5, 1990, authorized the establishment of pilot projects at land border POEs for which a fee may be charged and collected for inspection services provided at land border POEs. The implementing regulation which established pilot programs for the charging of a land border user fee for inspection services was published by the Service on May 13, 1991, at 56 FR 21917-21920. The interim rule placed all eligibility requirements, application processes, and compliance requirements pertaining to inspection user fees in § 286.6.

All land border pilot projects were originally scheduled to terminate on September 30, 1993. This deadline was extended to September 30, 1996, by Public Law 103-121, October 27, 1993. Public Law 103-121 also limited land border pilot projects to the northern border of the United States. On August 26, 1994, Congress passed Public Law 103-217, permitting land border pilot projects on the California-Mexico border. This interim rule, therefore, also amends Service regulations as necessary to implement a pilot DCL on the California-Mexico border.

In addition to adding a variety of border inspection pilot projects to selected POEs on the northern and southern land borders, this rule will move application and eligibility requirements for those persons seeking to participate in any of the pilot projects to part 235 of this chapter. By expanding and testing pilot projects on land borders, the entry of low-risk, legitimate border crossers will be facilitated and integrity of the United States land borders maintained.

#### Port Passenger Accelerated Service System (PORTPASS) Program

This rule seeks to expand the testing of land border inspection pilot programs, hereinafter collectively known as the Port Passenger Accelerated Service System (PORTPASS) Program. It will add a new § 235.13, in which general criteria used by the Service to establish pilot inspection programs on the northern and California-Mexico border will be set forth. PORTPASS program eligibility requirements, application procedures, and compliance requirements will be included in the new § 235.13 because

these program elements are inspection functions. The present provisions in § 286.8, relating to the collection of land border inspection pilot program fees, will be retained in the immigration user fee section only for the purposes of clarity and uniformity.

By identifying eligible, low-risk border crossers and providing a means for rapid entry of those individuals into the United States, PORTPASS will lessen the time required for all persons to cross the border at large POEs. PORTPASS will also benefit those persons who typically use the smaller, more geographically remote POEs which have limited hours of operation by designating certain POEs as Automated Permit Ports (APPs). Eligible persons who apply for, and are approved for use of, an APP may enter the United States when the APP is not staffed.

Participation in PORTPASS, including advance screening, inspection and identification, and subsequent lawful entry through a DCL or APP by an enrolled participant, will satisfy the reporting requirement of 8 CFR 235.1(a), which states that “[a]pplication to enter the United States shall be made in person to an immigration officer at a U.S. port of entry enumerated in 8 CFR part 100 at a time when the immigration office at the port is open for inspection.”

PORTPASS participants will not be permitted to import merchandise or transport controlled or restricted items through the PORTPASS program. Violation of the rules governing the PORTPASS program, or violating any immigration, customs, agricultural or other law or regulation, may result in revocation of the permit access authorization and other sanctions, including, but not limited to, criminal and/or administrative prosecution and deportation, seizure of goods and/or vehicles.

The Form I-823, entitled, “Application—Dedicated Commuter Lane Program,” has been revised and retitled to, “Application—Inspections Facilitation Program.” Each applicant applying for use of a Dedicated Commuter Lane as part of the PORTPASS program on the northern or California-Mexico border will be required to file the new form and submit the required application fee, currently \$25. Under certain circumstances, the \$25 application fee may be waived by the district director having jurisdiction over the POE where the applicant requests access. This rule will also amend §§ 299.1 and 299.5 to reflect the change in the title of the application. In establishing the Land Border Inspection Pilot Program, Congress identified the need to counterbalance the inspection of

passengers and vehicles with the need to halt the flow of illegal drugs and illegal aliens into the United States. Therefore, in addition to filing the I-823, applicants may be required to submit fingerprints in order to determine eligibility as a low-risk border crosser. If a fingerprint check is required, the applicant will be assessed the additional processing fee.

This rule expands the pool of eligible persons who may be permitted to use the PORTPASS system. One of the stated purposes of the land border inspections pilot program is the alleviation of traffic congestion at land border POEs. Therefore, it is necessary to allow the greatest number of identified, low-risk border crossers to participate. Currently, only citizens and legal permanent residents of the United States and citizens of Canada and landed immigrants of Canada who are citizens of the commonwealth nations are eligible applicants for the DCL project on the northern border. This rule would also make other non-immigrants as determined by the Commissioner of the Service, eligible for participation in all PORTPASS projects. Many third-country citizens and nationals are admitted to the United States for extended periods of time and may live in the United States but commute across the border to work, attend school, or conduct business. Third-country nationals who are citizens of countries other than the commonwealth nations are admitted to Canada as permanent residents and may also require access to the United States for similar purposes. Through the application process set forth in the regulation, admissibility and suitability of an applicant for entry to the United States will readily be determined. The application process will be more thorough than that required by any person who applies for admission at a land border POE, and will include a check of computer databases. Additionally, each applicant will be personally inspected and positively identified by an immigration officer to further determine admissibility prior to approval of his or her application. The applicant will also be required to permit random checks and inspections to be conducted by the Service at any time or location, to ensure compliance.

Currently, only the principal applicant must pay the required fee upon approval for the DCL application, although other persons may be listed on the principal's application. This rule will amend the regulation by requiring a separate application and application fee from all applicants to a PORTPASS project, including DCL programs

currently operable. A family cap of \$50, family defined to include husband, wife and/or children under the age of 18 years of age, will be imposed so as to not unduly burden families who often travel together across the border. Applicants under the age of 14 will be required to complete and submit the application, but will not be required to pay the application fee. Additionally, a "system costs fee" will be assessed to approved applicants who wish to participate in the system to cover the costs of additional technology. Information about the fee, including the amount, will be included in publications made available to the public prior to and/or during the application process. Law enforcement and security concerns peculiar to the southern border of the United States, in addition to the additional documentation required of Mexican nationals by the Immigration and Nationality Act, augments the degree that specialized devices, decals, technologies, and other methods are necessary to inspect applicants for entry. The use of technology, decals, and other devices or methods used to identify and inspect persons through DCL's on the southern border increases the cost to the INS of a DCL on that border. By charging a system costs fee for each vehicle using the DCL, the cost of operating the DCL will be fairly distributed among users of the DCL. All revenue generated by the PORTPASS program will directly support inspections on the land border, and facilitate traffic flow through designated POEs. Fees collected will cover the costs of:

- (1) Hiring additional immigration inspectors, including all associated personnel costs;
- (2) Expanding, operating and maintaining information systems for nonimmigrant control;
- (3) Construction costs, including those associated with the addition of new primary traffic lanes (with the concurrence of the General Services Administration);
- (4) Procuring detection devices and conducting training in the identification of fraudulent documents used by applicants for illegal entry into the United States;
- (5) Other costs associated with the operation of the PORTPASS program; and
- (6) Costs associated with the administration of the Land Border Inspection Fee Account.

The Service's implementation of this rule as an interim rule, with provision for post-promulgation public comment, is based on the "good cause" exception

found at 5 U.S.C. 553(d)(3). The reason and necessity for immediate implementation of this interim rule are as follows: Expanding the pilot program will directly benefit the traveling public by expediting their entry into the United States. In order to evaluate the effectiveness and utility of the PORTPASS project, and make a determination whether to continue and/or expand such projects, data must be collected. Pilot projects are due to expire September 30, 1996. Therefore, it is in the best interest of the traveling public to expand the land border user fee pilot program as soon as possible. All pilot projects are focused on the traveling public as customers and are designed to directly benefit large populations. Proceeding with an interim regulation at this time will allow the affected agencies and the public to gain maximum benefits from the pilot program.

#### Regulatory Flexibility Act

The Commissioner of the Immigration and Naturalization Service, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and, by approving it, certifies that the rule will not have a significant economic impact on a substantial number of small entities because of the following factors. The rule applies to individuals, not small entities, and provides a clear benefit to participants by allowing expeditious passage through a POE. Although there is a fee charged for this service, participation is voluntary.

#### Executive Order 12866

This rule is not considered by the Department of Justice, Immigration and Naturalization Service, to be a "significant regulatory action" under Executive Order 12866, section 3(f), Regulatory Planning and Review, and the Office of Management and Budget has waived its review process under section 6(a)(3)(A).

#### Executive Order 12612

The regulations proposed herein will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

#### Executive Order 12606

The Commissioner of the Immigration and Naturalization Service certifies that she has addressed this rule in light of the criteria in Executive Order 12606 and has determined that it will have no effect on family well-being.

The information collection requirement contained in this rule has been cleared by the Office of Management and Budget under the provisions of the Paperwork Reduction Act. The clearance number for this collection is contained in 8 CFR 299.5, Display of control numbers.

#### List of Subjects

##### 8 CFR Part 103

Administrative practice and procedures, Aliens, Authority delegations (Government agencies), Freedom of Information, Privacy Act, Reporting and recordkeeping requirements.

##### 8 CFR Part 235

Administrative practice and procedure, Aliens, Immigration, Passport and visas.

##### 8 CFR Part 286

Fees, Immigration, Reporting and recordkeeping requirements.

##### 8 CFR Part 299

Accordingly, chapter I of title 8 of the Code of Federal Regulations is amended as follows:

#### **PART 103—POWERS AND DUTIES OF SERVICE OFFICERS; AVAILABILITY OF SERVICE RECORDS**

1. The authority citation for part 103 continues to read as follows:

Authority: 5 U.S.C. 552, 552a; 8 U.S.C. 1101, 1103, 1201, 1252 note, 1252b, 1304, 1356; 31 U.S.C. 9701; E.O. 12356, 47 FR 14874, 15557, 3 CFR, 1982 Comp., p. 166; 8 CFR part 2.

2. In § 103.7, paragraph (b)(1) is amended by revising the entry for "Form I-823", to read as follows:

##### **§ 103.7 Fees.**

\* \* \* \* \*

(b) \* \* \*

(1) \* \* \*

Form I-823. For application to an Inspections Facilitation Program under section 286 of the Act—\$25.00, with the maximum amount of \$50.00 payable by a family (husband, wife, and minor children under 18 years of age). This fee may be waived for applicants seeking

access through an Automated Permit Port (APP) on the northern border. If fingerprints are required, a separate fingerprint processing fee will be charged.

\* \* \* \* \*

#### **PART 235—INSPECTION OF PERSONS APPLYING FOR ADMISSION**

3. The authority citation for part 235 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1182, 1183, 1201, 1224, 1225, 1226, 1227, 1228, and 1252.

##### **§ 235.1 [Amended]**

4. In § 235.1, paragraph (a) is amended by:

(a) Adding the word "either" between the words "made" and "in person", and by

(b) Removing the period after the word "inspection" and adding the phrase "or as provided in § 235.13."

5. A new § 235.13 is added to read as follows:

##### **§ 235.13 Automated inspection services.**

(a) *PORTPASS Program.* (1) *Definitions.* (i) *Port Passenger Accelerated Service System (PORTPASS).* A system in which certain ports-of-entry (POEs) are identified and designated by the Service as providing access to the United States for a group of identified, low-risk, border crossers. Participants in the PORTPASS program are inspected, identified, and screened in advance of approval for participation in the program by an immigration officer, and may apply to enter the United States through a dedicated commuter lane (DCL) or through an automated permit port (APP). Such advance inspection and identification, when the enrolled participant also satisfies the conditions and requirements set forth in § 235.13(b), satisfies the reporting requirements of § 235.1(a). Each use of the PORTPASS system constitutes a separate application for entry by the program participant.

(ii) *Automated Permit Port (APP).* A POE designated by the Service to provide access to the United States by an identified, low-risk, border crosser through the use of automation when the POE is not staffed. An APP has limited hours of operation and is located at a remote location on a land border. This program is limited to the northern border of the United States.

(iii) *Dedicated Commuter Lane (DCL).* A special lane set apart from the normal flow of traffic at a busier land border POE which allows an accelerated inspection for identified, low-risk

travelers. This program is limited to the northern border of the United States and the California-Mexico border.

(iv) *System costs fee.* A fee charged to participants to cover the cost of implementing the PORTPASS system.

(2) *Designation of POEs for PORTPASS access.* The following criteria shall be used by the Service in the selection of a POE if classifying that POE as having PORTPASS access under the pilot program:

(i) The location has an identifiable group of low-risk border crossers;

(ii) The institution of PORTPASS access will not significantly inhibit normal traffic flow;

(iii) The POE selected for access via a DCL has a sufficient number of Service personnel to perform primary and secondary inspection functions.

(3) *General eligibility requirements for PORTPASS program applicants.*

Applicants must be citizens or lawful permanent residents of the United States, or other non-immigrants as determined eligible by the Commissioner of the Service. Non-United States citizens must meet all applicable documentary and entry eligibility requirements of the Act. Applicants must agree to furnish all information requested on the application, and must agree to terms set forth for use of the PORTPASS program. Notwithstanding the provisions of 8 CFR part 264, applicants may be required to submit fingerprints on Form FD-258 or in the manner prescribed by the Service for the purpose of determining eligibility for participation in the PORTPASS program.

(4) *Application.* (i) Application for PORTPASS access shall be made on Form I-823, Application—Inspections Facilitation Program. Applications may be submitted during regular working hours at the port-of-entry having jurisdiction over the port-of-entry for which the applicant requests access. Applications may also be submitted by mail. Each applicant must present himself or herself for inspection and positive identification prior to approval of the application. Each person seeking PORTPASS access must file a separate application."

(ii) Applications must be supported by evidence of citizenship, and, in the case of lawful permanent residents of the United States, evidence of legal permanent resident status in the United States. Evidence of residency must be submitted by all applicants. Alien applicants requiring a valid visa must be in possession of such documentation and any other documentation as required by the Act at the time of the application, at the time of each entry,

and at all times while present in the United States.

(iii) A completed application must be accompanied by the fee as prescribed in § 103.7(b)(1) of this chapter. Each PORTPASS applicant 14 years of age or older must complete the application and pay the application fee. Applicants under the age of 14 will be required to complete the application, but will not be required to pay the application fee. The district director having jurisdiction over the POE where the applicant requests access may, in his or her discretion, waive the application fee.

(iv) Each vehicle registered by a PORTPASS participant must be inspected and approved by the Service prior to use in the PORTPASS system.

(v) An application may be denied in the discretion of the district director having jurisdiction over the POE where the applicant requests access. Notice of such denial shall be given to the applicant. There is no appeal from the denial, but denial is without prejudice to reapplying for this or any other Service benefit.

(vi) Applications approved by the Service will entitle the applicant to seek entry via a designated PORTPASS Program POE for a period of 1 year from the date of approval of the application unless approval is otherwise withdrawn.

(5) In addition to the conditions set forth in § 235.13(b), participants must agree to the following:

(i) The installation and/or use of any and all decals, devices, technology or other methodology deemed necessary by the Service to ensure inspection of the person(s) seeking entry through a DCL, in addition to any monetary deposit assessed by the Service pending return of any and all such decals, devices, technology, and other methodology in undamaged condition;

(ii) The payment of a system costs fee as determined by the Service as necessary to cover the costs of any and all decals, devices, technology, or other methodology used to identify and inspect persons seeking access through the DCL.

(6) The district director having jurisdiction over the POE where the participant has access may, in his or her discretion, waive the deposit and "system costs fee."

(b) *Conditions for participation in the PORTPASS Program.* Upon being inspected and positively identified by an immigration officer and found admissible and eligible for participation in the PORTPASS program, a participant in the PORTPASS program must agree to abide by the following conditions:

(1) APP-approved participants who wish to enter the United States through a POE other than one designated as an APP through which they may pass must present themselves for inspection or examination by an immigration officer during normal business hours. Entry to the United States during hours when an APP port is not staffed may be made only through a POE designated as an APP.

(2) Each occupant of a vehicle entering through a POE providing PORTPASS access must have applied for participation in the PORTPASS Program and must have been approved for that purpose.

(3) Participants must be in possession of any authorization documents issued for PORTPASS access and any other entry documents as required by the Act or by regulation at time of each entry to the United States.

(4) Participants must positively identify themselves in the manner prescribed by the Service at the time of each application for entry via the PORTPASS system. Each use of the PORTPASS system constitutes a separate application for entry to the United States.

(5) Participants must agree to an initial inspection of any vehicle prior to use of the PORTPASS access lane.

(6) Participants may not import merchandise or transport controlled or restricted items while entering the United States under the PORTPASS Program. The entry of any merchandise or goods must be in accordance with the laws and regulations of all other federal inspection agencies.

(7) Participants must agree to random checks or inspections that may be conducted by the Service at any time and at any location, to ensure compliance.

(8) Participants agree to abide by all federal, state and local laws regarding the importation of alcohol or agricultural products or the importation or possession of controlled substances as defined in section 101 of the Controlled Substance Act (21 U.S.C. 802).

(9) Participant acknowledges that all devices, decals, or other equipment, method, or technology used to identify or inspect persons or vehicles seeking entry via any PORTPASS program remains the property of the United States Government at all times, and must be surrendered upon request by the Service. Participant agrees to abide by the terms set forth by the Service for use of any device, decal, or other equipment, method or technology, including but not limited to the payment of any deposit for use of same.

(10) Participant agrees to abide by all conditions required for use of the special access lane.

(11) Participant agrees to notify the Service if a vehicle approved for use in a PORTPASS program is sold, stolen, damaged, or disposed of otherwise. If a vehicle is sold, it is the responsibility of the participant to remove or obliterate any identifying device or other authorization for participation in the program before or at the time of sale unless otherwise notified by the Service. If any license plates are replaced on an enrolled vehicle, the participant must submit a properly executed Form I-823, Application—Inspections Facilitation Program, without fee, prior to use of the vehicle in the PORTPASS program.

(c) *Violation of condition of the PORTPASS Program.* A PORTPASS Program participant who violates any condition of the PORTPASS Program, or who has violated any immigration law or regulation, or a law or regulation of the United States Customs Service or other Federal Inspection Service, or who is otherwise determined by an immigration officer to be inadmissible to the United States, may have the PORTPASS access revoked at the discretion of the district director or the chief patrol agent and may be subject to other applicable sanctions, such as criminal and/or administrative prosecution or deportation, as well as possible seizure of goods and/or vehicles.

**PART 286—IMMIGRATION USER FEE**

5. The authority citation for part 286 continues to read as follows:

Authority: 8 U.S.C. 1103, 1356; 8 CFR part 2.

6. Section 286.8 is revised to read as follows:

**§ 286.8 Establishment of pilot programs for the charging of a land border fee for inspection services.**

Under the provisions of section 286(q) of the Act, the Service may establish pilot programs at one or more land border ports-of-entry to charge fees for immigration inspection services to be collected by the Commissioner. Individual ports-of-entry selected by the Commissioner to participate in such pilot programs may charge a fee to enhance inspection services and to recover the cost of:

- (a) Hiring additional immigration inspectors, including all associated personnel costs such as salary, benefits, and overtime;
- (b) Expansion, operation, and maintenance of information systems for nonimmigrant control;
- (c) Construction costs, including those associated with adding new primary traffic lanes (with the concurrence of the General Services Administration);
- (d) Procuring detection devices and conducting training to identify fraudulent documents used by applicants for entry to the United States; and
- (e) Other administrative costs associated with the PORTPASS Program.

**PART 299—IMMIGRATION FORMS**

7. The authority citation for part 299 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103; 8 CFR part 2.

8. Section 299.1 is amended by revising the entry for the "Form I-823" to read as follows:

OMB NO. 1115-0174  
Application - Inspections Facilitation Program

### INSTRUCTIONS

*Read carefully -- fee will not be refunded. Failure to follow instructions may require return of your application and delay final action.*

1. **Preparation of Application.** Fill in application in single copy only, by typewriter, or print in block letters using only dark ink. Do not use pencil or red ink. Do not leave any question unanswered. Mark any question which does not apply to you "N/A"

2. **Who Can Apply:**

Citizens and Lawful Permanent Residents of the United States, citizens of Canada and Landed Canadian Immigrants who are citizens of British Commonwealth countries are eligible to apply for all programs. Additional eligibility criteria for each program are indicated below:

- A. **Dedicated Commuter Lane Program** - Certain citizens of Mexico and certain non-immigrants.
- B. **Automated Permit Port Program** - Certain non-immigrants.
- C. **INSPASS Land Border** - Holders of Mexican Border Crossing Cards and citizens of Visa Waiver Program countries.
- D. **INSPASS Airport** - Citizens of Visa Waiver Program countries or any other country approved for participation by the Commissioner, INS.

Each participant in each program must submit a separate application. Persons under 14 years of age may not enroll in either INSPASS Program.

3. **Where to Submit This Application.** Applications may be submitted in person or by mail to the U.S. Port-of-Entry sponsoring the Dedicated Commuter Lane for which you are applying, or at the Port-of-Entry having jurisdiction over the Automated Permit Port for which you request access. INSPASS applicants may apply at any INSPASS Port-of-Entry in person or by mail.

4. **Submission of Application.** Each application must be supported by evidence of citizenship, and in the case of lawful permanent residents of the United States or Canada, evidence of legal resident status and other documentary requirements as specified in the Immigration and Nationality Act (Act). Photocopies of passports, naturalization certificates, or other evidence of eligibility may be submitted (do not send originals in mail).

5. **Final Approval.** Your application will be reviewed and an interview may be scheduled prior to acceptance. You will be required to produce your original evidence of eligibility at that time. Approval for participation is valid for one year unless otherwise revoked.

6. **Denial.** An application for participation in a program may be denied at the discretion of the District Director without appeal. All applicants denied shall be so notified. Applications submitted without the required documentation or which are incomplete will be returned without action.

7. **Application Fee.**

- A. The fee for the Dedicated Commuter Lane Program is \$25.00 (U.S.) with a maximum amount payable by a family (husband, wife, and any minor children) of \$50.00 (U.S.). If fingerprints are required, there will be an additional fee.
- B. Presently, there is no fee for the Automated Permit Port Program or for either INSPASS Program.

Payment may be made by check or money order in the exact amount. All checks and money orders must be payable in U.S. currency at a financial institution in the United States. Make check or money order payable to "Immigration and Naturalization Service." A charge of \$5.00 will be imposed if a check in payment of a fee is not honored by the bank on which it is drawn.

8. **Privacy Act Statement.** The authority to collect this information is contained in Title 8, United States Code. Furnishing the information on this form is voluntary; however, failure to provide all of the requested information may result in the delay of a final decision or denial of your request. The information collected will be used to make a determination on your application. It may also be provided to other government agencies (Federal, state, local and/or foreign).

9. **Penalties for False Statements in Applications.** Severe penalties are provided by law for knowingly and willfully falsifying or concealing a material fact or using any false document in the submission of this application. Also, a false representation may result in the denial of this application and any other application you may make for any benefit under the immigration laws of the United States.

10. **Random compliance checks.** Periodic random checks will be conducted to ensure compliance with the conditions of each program. Any person violating the conditions and terms of the program may be subject to severe penalties, including revocation of the permit; seizure of the vehicle and/or goods as applicable; as well as possible fines and/or criminal prosecution and deportation.

11. **Reporting Burden.** We try to create forms and instructions that are accurate, can be easily understood, and which impose the least possible burden on you to provide us with information. Often this is difficult because some immigration laws are very complex. Accordingly, the reporting burden for this collection of information is computed as follows: 1) learning about the form, and reading and understanding U.S. Customs Publications 28 minutes; 2) completing the form, 8 minutes; 3) fingerprinting 30 minutes; and 4) assembling and mailing the application, 4 minutes, for an estimated average of 70 minutes per response. If you have comments regarding the accuracy of this estimate, or suggestions for making this form simpler, you can write to the Immigration and Naturalization Service, 425 I Street, N.W.; Room 5307, Washington, D.C. 20536. **Do not mail your completed application to this address.**

Application - Inspections Facilitation Program

**AUTOMATED PERMIT PORT PARTICIPANTS**

1. Participant acknowledges that he/she is a citizen or permanent resident of the United States, or a citizen of the country contiguous to the Port-of-Entry sponsoring the permit port program in which the applicant seeks to participate, or a Landed Canadian Immigrant who is a citizen of the Commonwealth countries, or is a citizen of a country designated by the Commissioner of the Immigration and Naturalization Service as eligible to participate in the PORTPASS Program.
2. Participant agrees to a full inspection of the registered vehicle(s) listed on the application prior to initial use of the Automated Permit Port, if requested by any government agency.
3. Participant agrees to submit to a full and complete vehicular and passenger inspection, for compliance purposes, at any time or location while using the Automated Permit Port.
4. Participant agrees to pay an annual fee for the use of the Automated Permit Port, if required.
5. Participant agrees to abide by all conditions imposed. These conditions include, but are not limited to, the following:
  - a. Transportation of only enrolled PORTPASS participants when entering a location designated as an Automated Permit Port during a time that location is normally closed to non-PORTPASS participants;
  - b. State and Federal laws regarding the importation of alcohol or agricultural products;
  - c. All Federal, state and local laws pursuant to Sections 212(a)(2)(A)(i)(II) and 212(a)(2)(C) of the Immigration and Nationality Act regarding possession and importation of controlled substances; and,
  - d. All other pertinent regulations under the jurisdiction of any other Federal inspection agency.
6. Participant agrees that he/she will not be exempt from the normal examination process when entering at an open, designated Port-of-Entry or while transporting persons who are not enrolled in the PORTPASS Program.
7. Participant agrees to retain the Automated Permit Port authorization document when crossing the border and to produce such document and personal identification, including any required passport, visa, or Border Crossing Card, upon request.
8. Participant acknowledges that the Automated Permit Port may not be used when importing merchandise or transporting controlled or restricted items.
9. Participant acknowledges that a violation of the conditions listed above for use of the Automated Permit Port may result in removal from the program and may result in the imposition of any other applicable fines, penalties, or sanctions as provided by law.
10. Participant acknowledges that he/she has read and understood U.S. Customs publication 512, "Know Before You Go", for U.S. resident applicants, or U.S. Customs publication 511-A, "Customs Hints", for non-resident applicants. If there is anything to be declared in the vehicle by anyone, beyond entitled exemptions, the vehicle cannot use the Automated Permit Port.

**DEDICATED COMMUTER LANE PARTICIPANTS**

1. Participant acknowledges that he/she is a citizen or permanent resident of the United States, or a citizen of the country contiguous to the Port-of-Entry sponsoring the commuter lane program in which the applicant seeks to participate, or a Landed Canadian Immigrant who is a citizen of the Commonwealth countries, or is a citizen of a country designated by the Commissioner of the Immigration and Naturalization Service as eligible to participate in the PORTPASS Program.
2. Participant agrees to a full inspection of the registered vehicle(s) listed on the application prior to initial use of the Dedicated Commuter Lane, if requested by any government agency.
3. Participant further agrees to submit to a full and complete vehicular and passenger inspection, for compliance purposes, at any time or location while using the Dedicated Commuter Lane.
4. Participant agrees to pay a system costs fee and/or deposit, as determined necessary by the Service pursuant to regulations, for the use of the Dedicated Commuter Lane. All devices, decals, or other equipment, method or technology used to identify persons or vehicles in the DCL program remains the property of the U.S. Government and must be surrendered upon request to the Service.
5. Participant agrees to abide by all conditions imposed. These conditions include, but are not limited to, the following:
  - a. The transportation of only enrolled PORTPASS participants while using the Dedicated Commuter Lane;
  - b. State and Federal laws regarding the importation of alcohol or agricultural products;
  - c. All Federal, state and local laws pursuant to Sections 212(a)(2)(A)(i)(II) and 212(a)(2)(C) of the Immigration and Nationality Act regarding possession and importation of controlled substances; and,
  - d. All other pertinent regulations under the jurisdiction of any other Federal inspection agency.
6. Participant agrees to retain the Dedicated Commuter Lane authorization document when crossing the border and to produce such document and personal identification, including any required passport, visa, or Border Crossing Card, upon request.
7. Participant acknowledges that the Dedicated Commuter Lane may not be used when importing merchandise or transporting controlled or restricted items.
8. Participant acknowledges that a violation of the conditions listed above for use of the Dedicated Commuter Lane may result in removal from the program and, in addition, may result in the imposition of any other applicable fines, penalties, or sanctions as provided by law.
9. Participant acknowledges that he/she has read and understood U.S. Customs publication 512, "Know Before You Go", for U.S. resident applicants, or U.S. Customs publication 511-A, "Customs Hints", for nonresident applicants. If there is anything to be declared in the vehicle by anyone, beyond entitled exemptions, the vehicle cannot use the Dedicated Commuter Lane.

Application - Inspections Facilitation Programs

**INSPASS LAND BORDER PARTICIPANTS**

1. Participant acknowledges that he/she is a citizen, or Lawful Permanent Resident of the United States, a citizen of Canada, a Landed Canadian Immigrant who is a citizen of a British Commonwealth country, is the holder of an unexpired Border Crossing Card, or is a national of a Visa Waiver Program country. Border Crossing Card holders are restricted to an entry not to exceed 72 hours in duration and travel of less than 25 miles from the Port-of-Entry to the United States.
2. Participant may not use the INSPASS card when entering the United States for a purpose other than that stated in this application.
3. Participant will not be exempt from the normal examination process when entering for any other purpose.
4. Participant agrees to abide by all conditions imposed. These conditions include, but are not limited to, the following:
  - a. State and federal laws regarding the importation of alcohol or agricultural products;
  - b. All federal, state, and local laws relating to Section 212(a)(2)(A)(i)(II) and 212(a)(2)(C) of the Immigration and Nationality Act regarding possession and importation of controlled substances; and,
  - c. All other pertinent regulations under the jurisdiction of any other federal inspection agency.
  - d. Participant cannot bring in any agricultural products of any kind irregardless of it being processed, treated, frozen, or fresh including products normally permissible by U.S. Department of Agriculture Animal and Plant Health Inspection Service.
5. Participant agrees to produce personal identification, including any required passport, visa, Alien Registration Card, or Border Crossing Identification Card, upon request during periodic random checks or inspections for compliance purposes.
6. Participant acknowledges that the INSPASS Card authorizes entry only for the card holder, not goods, and may not be used when importing merchandise or transporting controlled or restricted items. Children may not accompany the card holder through the INSPASS inspection lane.
7. INSPASS does not relieve the holder of compliance with documentary requirements. The traveler must still be in possession of a valid passport, visa, Border Crossing Card, or Alien Registration Card, if required. The INSPASS Card remains the property of the United States and may be revoked or cancelled at anytime without notice.
8. Participant acknowledges that a violation of the conditions listed above may result in removal from the program and may result in the imposition of any other applicable fines, penalties, or sanctions as provided by law.

Violation of these terms will subject you to deportation.

APPENDIX

**FEDERAL RESERVE SYSTEM**

**12 CFR Part 226**

[Regulation Z; Docket No. R-0858]

**Truth in Lending; Mortgage Disclosures; Correction**

**AGENCY:** Board of Governors of the Federal Reserve System.

**ACTION:** Technical Correction to final regulation.

**SUMMARY:** This document contains a correction to the final rule (Docket No. R-0858) which was published Friday, March 24, 1995 (60 FR 15463). The amendments to Regulation Z concerned new disclosure requirements on reverse mortgage transactions (as well as on certain home loans bearing rates or fees above a certain percentage or amount).

**EFFECTIVE DATE:** September 25, 1995.

**FOR FURTHER INFORMATION CONTACT:** Sheilah Goodman or Kurt Schumacher, Staff Attorneys, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, at (202) 452-3667 or 452-2412; for the hearing impaired *only*, Dorothea Thompson, Telecommunications Device for the Deaf, at (202) 452-3544.

**SUPPLEMENTARY INFORMATION:**

**Background**

The regulation that is the subject of this correction is Regulation Z (12 CFR part 226), which implements the Truth in Lending Act (15 U.S.C. 1601-1666j). The act (TILA) requires creditors to disclose credit terms for consumer transactions. The Home Ownership and Equity Protection Act of 1994 (HOEPA), contained in the Riegle Community Development and Regulatory Improvement Act of 1994 (Pub. L. 103-325, 108 Stat. 2160) amended the TILA. Section 154 of the HOEPA added a new section 138 to the TILA dealing with disclosures required for reverse mortgage transactions. The final rule implementing these provisions in Regulation Z was published on March 24, 1995 (60 FR 15463).

**Need for Correction**

As published, the final rule implementing new TILA section 138 contains an error in the unit period used in the first example of the total annual loan cost rate computation in appendix K to part 226, which also results in an erroneous total annual loan cost rate being shown for that example. The error

resulted from the use of a monthly unit period in the transaction, whereas, under the definition of a unit period for single-advance single-payment transactions (paragraph (b)(4)(ii) of appendix K), the proper unit period is 1 year. This error has been corrected. For consistency and ease of understanding, the Baln figure has also been revised to reflect the use of an annual unit period.

**Correction of Publication**

Accordingly, the publication on March 24, 1995, of the final regulation (Docket No. R-0858), which was the subject of FR Doc. 95-7231, is corrected as follows:

*Appendix K to Part 226—[Corrected]*

On page 15475, in the example in paragraph (c)(1) of appendix K to Part 226, the formula (which follows the phrase "Assumed annual dwelling appreciation rate: 4%") is corrected to read as follows:

$$\begin{array}{cccccc}
 * & * & * & * & * & \\
 (c) & * & * & * & * & \\
 (1) & * & * & * & * & 
 \end{array}$$

$$P_{10} = \text{Min} (103,385.84, 137,662.72)$$

$$30,000(1+i)^{10-0} + \sum_{j=0}^9 (1+i)^{10-j} = 103,385.84$$

$$i = .1317069438$$

$$\text{Total annual loan cost rate} \\ (100(.1317069438 \times 1)) = 13.17\% \\ (2) * * *$$

Board of Governors of the Federal Reserve System, September 25, 1995.

William W. Wiles,  
*Secretary of the Board.*

BILLING CODE 6210-01-P

**FEDERAL DEPOSIT INSURANCE CORPORATION**

**12 CFR Part 327**

RIN 3064-AB65

**Assessments**

**AGENCY:** Federal Deposit Insurance Corporation.

**ACTION:** Final rule.

**SUMMARY:** The Federal Deposit Insurance Corporation (FDIC) is amending its regulation on assessments in several ways.

First, the FDIC is delaying the regular payment date for the first quarterly

assessment payment that insured institutions must make for the first semiannual period of each year (first payment). The first payment has been due on December 30 of the prior year. The FDIC is changing the regular payment date to the January 2 (or the first business day thereafter). But at the same time, the FDIC is giving insured institutions the option of making the first payment on December 30 (or the prior business day). The FDIC's purpose in making this pair of changes is to relieve certain institutions of the regulatory burden of having to make an extra assessment payment in 1995, while at the same time affording flexibility to other institutions to make such a payment if they should so desire.

Second, the FDIC is giving insured institutions the option of paying double the amount of any quarterly payment, when the payment is made on a payment date (regular or alternate, as the case may be) that comes before the start of the quarter to which the payment pertains—i.e., on the March, June, September, and December payment dates. The FDIC is adopting this change in response to a suggestion

made by a commenter. The FDIC believes the change will promote greater flexibility in the assessment procedures.

Third, the FDIC is replacing the interest rate to be applied to underpayments and overpayments of assessments with a new, more sensitive rate derived from the 3-month Treasury bill discount rate. Rates set under the prior standard have rapidly become obsolete in volatile interest-rate markets; the new standard is more sensitive to current market conditions.

Finally, the FDIC is shortening the timetable for announcing a change in the assessment rate from 45 days to 15 days prior to the invoice date. This change enables the FDIC to use the most up-to-date information available for computing assessments, thereby benefiting both the FDIC and the depository institutions.

**EFFECTIVE DATE:** This rule is effective September 29, 1995, except the amendments to § 327.7 are effective October 30, 1995.

**FOR FURTHER INFORMATION CONTACT:** Allan Long, Assistant Director, Treasury Branch, Division of Finance (703) 516-5559; Claude A. Rollin, Senior Counsel,

Legal Division (202) 898-3985; or Jules Bernard, Counsel, Legal Division, (202) 898-3731; Federal Deposit Insurance Corporation, Washington, D. C. 20429.

**SUPPLEMENTARY INFORMATION:**

**A. Background**

*1. The payment schedule*

On December 20, 1994, the FDIC adopted a new quarterly-collection procedure for collecting deposit insurance assessments. See 59 FR 67153 (December 29, 1994). The quarterly-collection procedure became effective April 1, 1995; it applies to the second semiannual assessment period of 1995 (beginning July 1, 1995) and thereafter.

The quarterly-collection procedure calls for the FDIC to collect assessment payments four times a year, by means of FDIC-originated direct debits through the Automated Clearing House network. Prior to the final rule adopted here, each payment to be made for a calendar quarter was due just prior to the start of that quarter.<sup>1</sup> The payment for the first calendar quarter of a year (first payment)—the initial payment for the first semiannual period of the year—was due on the prior December 30. The other regular payment dates followed suit. The second-quarter payment was due on March 30. The payment for the third quarter—the initial payment for the second semiannual period of the year—was due on June 30. And the payment for the fourth quarter was due on September 30. (In every case, if the scheduled payment date fell on a holiday or a weekend, the payment was to be made by the previous business day.)

The FDIC published the quarterly-collection procedure as a proposed rule before adopting it. See 59 FR 29965 (June 10, 1994). The FDIC received 51 comment letters on the proposal.

Two commenters pointed out that the quarterly-collection procedure would produce the so-called "5 in 95" anomaly. That is, institutions would pay their full semiannual assessment for the first semiannual period in 1995 in January, in accordance with the assessment regulations then in effect. Institutions would also pay both quarterly payments for the second semiannual period in 1995 (one at the end of June; the other at the end of September). Then institutions would make one more payment in 1995: the first payment for 1996. In effect, in 1995

they would pay assessments for 5 quarters.

The two commenters asked the FDIC to move the payment date for the first payment for 1996 from December 30, 1995, to January, 1996. In response, the FDIC looked into the issue further.

The FDIC concluded, as a result of its inquiry, that the "5 in 95" anomaly would have an adverse effect on relatively few institutions. The FDIC therefore decided to retain the December payment date. The FDIC recognized that the December 1995 payment date could present a one-time problem for some institutions. But the FDIC concluded that this situation was simply a by-product of the shift from a semiannual to a quarterly collection procedure, and would not involve an "extra" assessment payment. The FDIC further observed that this timing issue would adversely affect only institutions that use cash-basis accounting. Finally, the FDIC pointed out that the commenters' recommended solution—moving the December payment date to January—would not cure the problem if adopted only for a single year: the problem would recur in 1996. Curing the problem would require a permanent change in the December payment date. When the FDIC adopted the regulation in final form, the FDIC retained the December 30 payment date. See 59 FR 67153, 67157 (December 29, 1994).

Shortly after adopting the quarterly-collection procedure, however, the FDIC began to receive information suggesting that more institutions would be adversely affected by the December payment date than was initially thought. Moreover, the Independent Bankers Association of America (IBAA) issued a letter to the FDIC requesting the FDIC to reconsider the issue in light of the December payment date's effect on cash-basis institutions. The FDIC's Board of Directors viewed the IBAA's request as a "petition for the amendment of a regulation" within the meaning of the FDIC's policy statement "Development and Review of FDIC Rules and Regulations," 2 FED. DEPOSIT INS. CORP. LAWS, REGULATIONS, RELATED ACTS 5057 (1984). The FDIC therefore proposed the rule that is here adopted in final form. 60 FR 40776 (August 10, 1995).

The final rule moves the regular payment date for the first payment from December 30 of the prior year (or the preceding business day) to January 2 (or the next business day) of the current year. The final rule does not change the other regular payment dates.

*2. Doubled Payments*

Prior to the final rule adopted here, the FDIC's regulations did not provide a standard method for institutions to pay amounts other than the regular quarterly payments.

The final rule gives each institution the option of paying double the amount of a quarterly payment, if the payment is made on a payment date (regular or alternate, as the case may be) that comes prior to the start of the calendar quarter for which it is due. The final rule specifies the methodology for making doubled payments.

*3. Interest on Underpaid and Overpaid Assessments*

The FDIC pays interest on amounts that insured institutions overpay on their assessments, and charges interest on amounts by which insured institutions underpay their assessments. The interest rate has been the same in either case: namely, the United States Treasury Department's current value of funds rate which is issued under the Treasury Fiscal Requirements Manual (TFRM rate) and published in the Federal Register. See 12 CFR 327.7(b).<sup>2</sup>

The TFRM rate is based on aged data, however, and quickly becomes obsolete in volatile interest-rate markets. For example, the rate set for January through June, 1995, was based on the average rate data from October, 1993, through September, 1994. The practical consequence is that the TFRM rate for the January-to-June period in 1995 was 3% per annum, when the actual market rate at that time was over 5% per annum.

The FDIC is replacing the TFRM rate with a rate keyed to the 3-month Treasury bill discount rate. The new rate takes effect on January 1, 1996.

*4. The Assessment-Schedule Notice*

Under the FDIC's regulations, the semiannual assessment rate schedule is announced in advance, along with the amount and basis for any adjustment to the rate schedule. Prior to the final rule adopted here, the announcement was to be made 45 days prior to the invoice date—that is, the date on which the FDIC issues assessment invoice notices to institutions—for the first quarter of the semiannual period to which the adjusted assessment schedule applies. 12 CFR 327.9(b)(3)(ii).

The final rule reduces the advance-notice period to 15 days.

<sup>2</sup>The Treasury Fiscal Requirements Manual is now called the Treasury Financial Manual.

<sup>1</sup>Thirty days before each regular payment date, the FDIC provides to each institution an invoice showing the amount that the institution must pay. The FDIC prepares the invoice from data that the institution has reported in its report of condition for the previous quarter. See 12 CFR 327.3(c) & (d).

## B. The Final Rule

### 1. Payment Dates for First Payments

#### a. The Regular Payment Date

The final rule delays the first payment's regular payment date from December 30 of the prior year to January 2 of the current year (or, if January 2 is a holiday or weekend, the first business day thereafter). Every institution will ordinarily make its first payment on that date. In this regard, the final rule adopts the rule as proposed.

The final rule is designed to protect cash-basis institutions against the adverse consequences of having to make an extra assessment payment during 1995. The remedy is necessarily a continuing one. Accordingly, the FDIC has changed the payment date permanently.

The FDIC believes that the delay in the payment date confers a financial benefit to institutions, because they may earn additional interest on the funds they retain for the additional time. The FDIC does not consider that it is appropriate to give a benefit of this kind to some institutions but not others, however. Accordingly, the FDIC is changing the payment date for all institutions, not just for cash-basis institutions.

The FDIC further believes that most institutions have already prepared to comply with the direct-debit procedures, and will suffer no procedural disadvantage from the delayed payment date. The FDIC will therefore follow the same procedures as before in collecting the first payment.

#### b. The Alternate Payment Date

The FDIC recognizes, however, that some institutions may prefer the existing payment schedule, notwithstanding the fact that they will be making five payments during 1995. The final rule accommodates these institutions. The final rule provides that an institution may elect to pay its first payment for any year on an alternate payment date during the prior December. The final rule adopts the rule as proposed in this regard.

The alternate payment date is December 30 of the prior year (or, if December 30 is a holiday or a weekend, the preceding business day). The FDIC will collect payments made on that date by electronically debiting institutions' accounts, just as the FDIC collects other quarterly assessment payments.

In order to elect the December date, an institution must file a certification to that effect by the preceding November 1. The election is effective with respect to the first payment for the upcoming year, and remains in effect until terminated.

The institution must complete a pre-printed form supplied by the FDIC to make the certification. The form will be available from the FDIC's Division of Finance. The institution's chief financial officer, or an officer designated by the institution's board of directors, must sign the form. An electing institution must certify that it will pay its first assessment on the alternate payment date.

An institution may terminate its election of the December date in the same way as it makes the election: By certifying that it is terminating the election for an upcoming year. As in the case of the original election, the institution must use a pre-printed form supplied by the FDIC to make the certification, and must file the form by November 1 of the prior year. The institution will then revert to the regular payment schedule for the upcoming year and for all future years.

An institution that terminates an election may make a new election at any time.

The rule as proposed called for institutions to follow these procedures. The final rule adopts the rule as proposed in this regard.

The FDIC will not pay interest on payments made prior to the regular payment date. If an institution elects the alternate payment date, or otherwise pays an assessment before the regular payment date for that payment, the FDIC will not pay interest on the amount that is ordinarily to be paid on the regular payment date.

Of course, it is possible for an institution that makes its payment on the alternate payment date to pay an excess amount. The FDIC will pay interest on the excess amount, but not on the amount due for the quarterly payment. Furthermore, the FDIC will only pay such interest to the same extent as if the institution had made the excess payment on the regular payment date: That is, interest will not begin to run until the day after the regular payment date. Conversely, if an institution elects the alternate payment date, and underpays the amount due, the FDIC will only charge interest on the amount of the underpayment beginning on the day after the regular payment date.

The proposed rule said that the FDIC would charge and pay interest in the manner described here. The final rule adopts the proposed rule in the regard.

The FDIC believes that it is appropriate to allow the alternate payment option for two reasons. The FDIC recognizes that institutions that keep their books on an accrual basis are not materially harmed by having to pay

five quarters' worth of assessments in 1995. (By the same token, these institutions are not materially harmed by delaying the payment date from December to January.) Some of these institutions may prefer to pay some or all of their first semiannual assessments on the alternate payment date for their own business reasons. The FDIC further recognizes that institutions may have arranged their affairs in the expectation that the first payment for 1996 will be due in 1995. The FDIC is providing the option of paying on the alternate payment date in order to enable these institutions to avoid unnecessary disruption and financial disadvantage.

### 2. Doubled Payments

The proposed rule said that, when an institution elects the alternate payment date for the first payment, the institution may further elect to pay either the amount of the first payment or twice that amount. The final rule retains this point.

One commenter suggested, however, that some institutions may want to make a doubled payment at the start of the second semiannual assessment period as well as at the start of the first one. The final rule accommodates this suggestion.

The final rule says that, whenever an institution makes a payment on a payment date (regular or alternate, as the case may be) that comes before the start of the quarter for which the payment is due, the institution may make a doubled payment. In other words, institutions may make doubled payments on March 30, June 30, September 30, and December 30.

The doubled-payment election would remain in effect from year to year until terminated, but only for the selected payment date. If an institution wished to make doubled payments for a second payment date, the institution would file another election with respect to the second date.

The procedure enables institutions to make doubled payments at the start of either or both semiannual periods, as they choose. The procedure further gives an institution with a fiscal year that starts at the beginning of the second or fourth calendar quarter the option of making a doubled payment prior to that calendar quarter.

The FDIC recognizes that cash-basis institutions may have fiscal years that do not coincide with the calendar year. The FDIC is adopting this option to give such institutions (and others) the flexibility to schedule their payments as they see fit for their own financial purposes.

A doubled payment represents an approximation of the amount due for two quarterly payments. The approximation is not intended to be exact. Growing institutions will ordinarily owe an additional amount on the next quarterly payment date; shrinking institutions will ordinarily receive a credit.

Doubled payments are not regarded as "overpayments." The FDIC will not pay interest on the extra amount so paid.

The final rule differs from the proposed rule in that the procedure for electing the doubled-payment option is split off from the procedure for electing the alternate payment date. But the two procedures are substantially alike.

An institution that wishes to pay a doubled amount must file a certification to that effect prior to the relevant regular payment date. For the first payment, the certification must be filed by the preceding November 1 (the same date as that for filing the certification for the alternate payment date). For the other quarterly payments, the certification must be filed by the first day of the month prior to the relevant regular payment date: i.e., February 1, May 1, August 1, and November 1, respectively. The doubled-payment election is effective with respect to the payment made on the relevant payment date and to all payment dates thereafter, until terminated.

The institution must complete a pre-printed form supplied by the FDIC to make the certification. The form will be available from the FDIC's Division of Finance. The institution's chief financial officer, or an officer designated by the institution's board of directors, must sign the form. An electing institution must certify that it will pay the doubled amount on the relevant payment date.

An institution may terminate its election of the doubled-payment option by certifying that it is terminating the election as of a particular payment date. The institution must use a pre-printed form supplied by the FDIC to make the certification, and must file the form by the prior February 1, May 1, August 1, or November 1, as appropriate. The institution will then pay the regular amount on the relevant payment date and thereafter.

An institution that terminates the doubled-payment election may make a new election at any time. The new election is subject to the same deadline.

### 3. Interest on Underpaid and Overpaid Assessments

The FDIC is replacing the interest rate that is applied to underpaid assessments and overpaid assessments. The previous

rate was the TFRM rate (which is now 5.00% per annum), which is compounded annually. The FDIC is replacing this rate with a more market-sensitive rate: the coupon equivalent rate set on the 3-month Treasury bill at the last auction held by the U.S. Treasury Department before the start of each quarter. Interest will be compounded as of the first day of each subsequent quarter. Currently, this rate is 5.51% per annum (see below). The final rule adopts the rule as proposed in this regard.

Interest begins to run on the day after the regular payment date and continues to run through the day on which the debt is paid. 12 CFR 327.7(a)(3). The final rule changes the regular payment date for the first payment for 1996 to January 2. Accordingly, interest on any overpayments or underpayments due on that date will begin to run on January 3 (even if an institution has elected the alternate payment date).

The next payment date is March 29 (March 30 being a Saturday). The FDIC will ordinarily collect or repay the full amount of the January overpayment or underpayment (plus interest) on that date by adjusting the payment then due. Accordingly, interest on the January overpayment or underpayment will run through March 29.

The initial interest rate is the rate for the quarter for which (but not generally in which) the payment will be made. The payment date for the first quarter of 1996 is January 2, which falls within that quarter. But the payment dates for the second, third, and fourth calendar quarters are March 30, June 30, and September 30, respectively (and if the regular payment date falls on a weekend or holiday, the payment date is the preceding business day). Each of these payment dates falls in the quarter preceding the quarter for which the payment is due. Nevertheless, the initial interest rates on any underpayments or overpayments of payments due on these dates are the rates for the second, third, and fourth quarters, respectively.

The final rule differs slightly from the proposed rule in setting the interval during which the appropriate interest rate will be applied. The proposed rule reset the rate at the end of each calendar quarter, thereby introducing needless complexity, especially when the payment date came after the end of the calendar quarter. The final rule uses the quarterly-collection cycle to set the structure for resetting the rate. The FDIC is making this change in order to simplify and clarify the interest-rate procedure.

Under the final rule, the initial interest rate on an overpayment or

underpayment applies to the amount in question beginning on the day after the regular payment date (but not the alternate payment date) and ending on the next regular payment date (but not the alternate payment date). The FDIC resets the rate on the day following that next regular payment date. If any portion of the overpayment or underpayment (including interest) remains outstanding at that time, the FDIC applies the new rate to the outstanding amount through the following regular payment date (or until the overpayment or underpayment is discharged, whichever comes first).

If the rate had been in effect for the third quarter in 1995, the FDIC would have computed interest on an overpayment or underpayment of an amount due for that quarter as follows:

The FDIC would have based the rate on the average rate for the 3-month Treasury bill set at the June 26, 1995, auction (settling on June 29, 1995). On a bank discount rate basis (360-day year with no compounding), the auction resulted in a 5.35% average rate. This converts to a coupon equivalent rate of 5.51% according to the United States Treasury Department.

June 30 is the payment date. On the following day (July 1) the FDIC would have begun to apply the 5.51% rate to overpayments or underpayments collected on June 30. The outstanding amount would ordinarily be repaid on the next collection day, which falls on September 29 (September 30 being a Saturday).

A \$1 million overpayment collected on June 30 and refunded on September 29 would have generated 91 days of interest:  $(91/366) \times .0551 \times \$1,000,000 = \$13,699.73$ .<sup>3</sup>

The FDIC is adopting the three-month Treasury rate because it is a published rate that more closely (but not necessarily exactly) approximates the market value of funds both for the institution and for the FDIC. If an institution overpays its assessment, the FDIC will return to the institution the benefit that the institution would have been able to obtain by investing the excess amount. Conversely, if an institution underpays its assessment, the institution will have to restore to its fund—the Bank Insurance Fund (BIF) or the Savings Association Insurance Fund (SAIF)—the economic value of the interest that the fund would otherwise have earned.

The FDIC will apply the new rate (and the quarterly compounding) prospectively, not retroactively. The FDIC will apply the new rate to quarterly payments due for the first quarter of 1996 and thereafter, and to

<sup>3</sup>The third calendar quarter in 1995 falls within the leap-year cycle that begins on March 1, 1995, and ends on February 29, 1996.

any outstanding amounts owed to or by the FDIC on and after January 1, 1996. For amounts owed to or by the FDIC during intervals prior to January 1, 1996, the FDIC will continue to apply the then-current TFRM rate (and the annual compounding) for those intervals.

#### 4. *The Assessment-Schedule Notice*

The FDIC's assessment regulation specifies that the FDIC must announce in advance the semiannual assessment rate schedule for BIF members, together with the amount and basis for any adjustment to the rate schedule. The FDIC must make the announcement 45 days before the invoice date for the first payment of the semiannual period. 12 CFR 327.9(b)(3)(ii).

The FDIC is amending this provision by reducing the advance-notice period to 15 days. The amendment was not proposed for comment, and is unrelated to the other amendments made by the final rule. The primary reason for this technical amendment is to enable the FDIC to use more current financial information to determine the assessment rate schedule for the upcoming semiannual period.

Under the final rule, the announcement date for the first semiannual period moves from October 16 to November 15. The announcement date for the second semiannual period moves from April 15 to May 15.

When the FDIC adopted the 45-day advance notice period, the FDIC's primary concern was to assure that there would be ample time after the time the Board established an assessment rate schedule for the staff to provide and issue assessment invoices to insured institutions. When the Board issued the proposed and final rules on the BIF assessment regulation it assumed the invoice preparation process would take up to 45 days.

The FDIC's operating systems have improved, however. The FDIC now believes that the invoice preparation process can be completed within a 15-day period. Reducing the advance-notice period from 45 days to 15 days would create an opportunity for the FDIC to utilize additional information as it becomes available during the intervening 30 days. This information would include, but would not be limited to, the following:

- Updated fund balance information, which is calculated monthly.
- Updated market information, including financial-market data and economic conditions.
- Call Report data that reflect current revisions and corrections and, therefore, are more complete.

A shortening of the timetable for announcing a change in assessment rates from 45 days to 15 days would provide the FDIC with additional information that could be used to determine the appropriate assessment rates for the upcoming semiannual assessment period. The FDIC could utilize the relevant information to arrive at a more informed judgment of the assessment rates necessary to maintain the BIF reserve ratio at the statutorily mandated Designated Reserve Ratio, and to set the "adjustment factor" for changes in the assessment rate schedule.

It must be recognized that the institutions themselves will still have 45 days' notice from the time the FDIC notifies them of the assessment rate schedule to the time the payment is due. 12 CFR 327.3. For example, the announcement notice for the payment due on January 1, will be provided no later than November 15.

#### C. Summary of Comments

The FDIC's Board of Directors received comments for a period of 30 days. The Board considered that the shorter comment period was necessary in order to implement the proposal within the available time-frame.

The FDIC received 15 comments on the proposed rule: eight from banks; five from bankers' associations; and two from bank holding companies.

##### 1. *Payment Dates for First Payments*

###### a. *The Regular Payment Date*

Seven banks, all five bankers' associations, and one holding company explicitly supported the January payment date.

The remaining bank supported it implicitly. The bank did not address the January payment date. Instead, the bank called for equivalent changes to be made to the other payment dates: it said that the payment dates for the second, third, and fourth calendar quarters should each be moved to the start of those quarters. The FDIC believes that a change of this kind raises questions of its own that would need to be the subject of public comment. Accordingly, the FDIC is not adopting the suggestion at this time, but is taking the issue under advisement.

The other holding company did not expressly comment on this matter. The holding company did not object to the January payment date. The holding company merely noted that it would probably elect the alternate payment date for its subsidiaries.

###### b. *The Alternate Payment Date*

Five banks, all five bankers' associations, and one bank holding

company explicitly supported the proposal to allow institutions to make their first payments on the alternate payment date.

The bank holding company observed that it would have to file a certification for each of its insured institutions. The holding company did not ask the FDIC to alter the proposal on this point, and the FDIC has not done so. Nevertheless, the FDIC will take under advisement the issue of allowing bank holding companies to file the necessary certifications on behalf of their banking subsidiaries.

One bankers' association remarked that the term "prepayment"—which was used in the proposed rule—might lead to adverse tax consequences, and suggested labeling the earlier payment as an "alternate payment." The FDIC has adopted this suggestion.

One bank objected to the alternate payment date. The bank said it could not see why any financial institution would avail itself of the option. The bank further declared that banks would be required to choose the option, and the FDIC would be required to keep track of the choices, as well as contend with two payment schedules. The bank declared that the option would thereby create unnecessary work for both regulators and regulated institutions—and could even lead to the alternate payment date eventually becoming required once more. The FDIC does not consider, however, that the alternate payment date creates excessive work either for itself or for insured institutions. The FDIC further believes that many institutions may well take advantage of the alternate payment date, and that the benefits of this option far outweigh its costs.

Two banks and one holding company did not address this issue.

One bank and one bank holding company said the election should remain in effect until revoked. The rule as proposed so provided; the final rule does so as well.

##### 2. *Doubled Payments*

Four banks, three bankers' associations, and one bank holding company expressly supported the doubled-payment option.

One bankers' association asked the FDIC to make the doubled-payment option available to institutions that make their first quarterly payment on the regular January payment date, and not merely to those that elect the alternate December payment date. The FDIC has considered this matter and has concluded that few or no institutions would want to make a doubled payment after the beginning of a calendar quarter.

Accordingly, the FDIC believes that it is sufficient to offer the doubled-payment option for the December payment date.

The same bankers' association suggested that the FDIC should offer the doubled-payment option for payments due in the second semiannual period too. The FDIC has adopted and expanded upon this suggestion, by making the doubled-payment option available on all payment dates (including the alternate payment date) that occur before the start of the quarter to which the payment applies.

The other commenters did not focus on the doubled-payment issue.

### 3. Interest on Underpaid and Overpaid Assessments

None of the commenters objected to the FDIC's proposal to cease using the TFRM rate.

Five banks, two bankers' associations, and one bank holding company supported the FDIC's proposal to use the coupon equivalent rate on the 3-month Treasury bill.

Two banks, two bankers' associations, and one bank holding company did not address this point.

One banker's association said that an appropriate interest rate should meet three criteria:

- The rate should have a neutral impact on business decisions;
- The rate should be reasonably stable; and
- The rate should be publicly available.

The FDIC considers that the rate adopted in this final rule—namely, the coupon equivalent rate set on the 3-month Treasury bill at the last auction held by the U.S. Treasury Department before the start of each quarter—meets these criteria.

The bankers' association called upon the FDIC to use the Federal Funds rate averaged over the quarter of the overpayments and underpayments; one bank also called on the FDIC to adopt the Federal Funds rate. The bank said that the Federal Funds rate was the rate it would have received on the funds but for the overcharge. The bankers' association likewise said that the Federal Funds rate represents the true alternative cost of funds to insured institutions. The FDIC considers, however, that it is more appropriate to use the rate set at the Treasury auction because the FDIC invests its funds with the Treasury Department, and not in the Federal Funds market.

The bankers' association pointed out that any mechanism for selecting a rate that is based on a single date can be subject to volatility. The bankers' association suggested that, as an

alternative, the FDIC should consider using an average of the rates set in the last four weekly Treasury auctions prior to the start of a quarter. The bankers' association said the one-month average would produce a more stable, yet still current, market rate. The FDIC considers, however, that it is more appropriate to use the rate generated in the most recent Treasury auction because that rate more closely represents the rate in effect at the time the FDIC collects the overpayment or underpayment.

#### 4. The Assessment-Schedule Notice

The FDIC did not ask for comments on this amendment.

#### D. Effect on the Insurance Funds

##### 1. Payment Dates for First Payments

###### a. The Regular Payment Date

The shift in the payment date for first payments is not expected to have any substantial adverse impact on the insurance funds.

In the case of the BIF, the maximum amount of the interest foregone as a result of delaying the collection is not expected to exceed \$600,000. The actual amount of the foregone interest is likely to be considerably less, as many BIF members can be expected to take advantage of the alternate payment date. Accordingly, the FDIC considers that the BIF will not suffer any material harm by the loss of this revenue.

In the case of the SAIF, the foregone interest is not expected to exceed \$108,000. Here again, the actual amount is likely to be considerably less. While this sum is not insubstantial, the FDIC believes that its loss will not materially harm the SAIF under current conditions, and will not impede the SAIF's progress toward recapitalization.

###### b. The Alternate Payment Date

The alternate payment date would benefit the funds. The funds would receive payments from institutions that elect this option several days before the funds would otherwise do so. The funds would therefore have the use of the money, without being obliged to pay interest.

##### 2. Doubled Payments

The doubled-payment option, like the alternate payment date, would benefit the funds. The funds would receive payments in advance, and would not be required to pay interest on them.

##### 3. Interest on Underpaid and Overpaid Assessments

The change from the TFRM rate to the new rate is not expected to have any

material adverse impact on either the BIF or the SAIF. The net yearly amount routinely subject to the interest rate—that is, the net of the amounts that institutions routinely overpay, minus the amounts they routinely underpay—is approximately \$2,000,000 per year in the aggregate for both funds.

This amount represents a net overpayment. It is outstanding for 60 days on average; accordingly, at the TFRM rate, the FDIC has ordinarily paid out a net annual amount of approximately \$16,000 in interest. Under the new rate, the FDIC will pay out approximately \$18,000 yearly—for a net change to the funds of just \$2,000.

#### 4. The Assessment-Schedule Notice

The change in the assessment-schedule notice would not affect the funds.

#### E. Assessment of the Reporting or Record-Keeping Requirements

##### 1. Payment Dates for First Payments

###### a. The Regular Payment Date

The final rule delays the payment date for the first payment of each year, without changing the procedures that institutions must follow in order to make that payment. The FDIC considers that, in this regard, the final rule's reporting or record-keeping requirements will be minimal.

###### b. The Alternate Payment Date

The FDIC further believes that the burden of the one-time filing to elect the alternate payment date will be so small as to be immaterial. The final rule does not require the institution to retain the certification form, or to file a new certification each year, or to keep any other new records.

##### 2. Doubled Payments

In the same vein, the FDIC believes that the burden of the one-time filing to elect the doubled-payment option will be so small as to be immaterial. The final rule does not require the institution to retain the certification form, or to file a new certification each year, or to keep any other new records.

##### 3. Interest on Underpaid and Overpaid Assessments

The changes in the interest rate will have no effect on the reporting or record-keeping requirements of insured institutions.

#### 4. The Assessment-Schedule Notice

The change in the assessment-schedule notice would not affect the reporting or record-keeping requirements of insured institutions.

## F. Effect on Competition

The regulation is not expected to have any effect on competition among insured depository institutions.

## G. Relationship of the Regulation to Other Government Regulations

The regulation is not expected to have any impact on other government regulations.

## H. Cost-Benefit Analysis

### 1. Payment Dates for First Payments

#### a. The Regular Payment Date

The FDIC believes that the January payment date will not impose any new costs on institutions. On the contrary, it will benefit them by allowing them to retain the use of their funds for an extra interval. The final rule will provide a special benefit to cash-basis institutions by eliminating an expense they will otherwise have sustained in 1995.

#### b. The Alternate Payment Date

The alternate payment date will provide significant benefits. The FDIC believes that institutions will elect the alternate payment date only if doing so is advantageous to them. On the other hand, the only costs incurred by electing institutions are the costs of signing and submitting the certification. The FDIC considers that those costs are not likely to be material.

### 2. Doubled Payments

In the same vein, institutions will elect the doubled-payment option only if doing so will provide a significant benefit to them. The only costs incurred by electing institutions are the costs of signing and submitting the certification, which are not likely to be material.

### 3. Interest on Underpaid and Overpaid Assessments

The change from the TFRM rate to the new rate will likewise impose minimal costs on institutions. The net amount at issue will not be material in the aggregate. For any particular institution, the net effect of the change will be impossible to predict, because the relationship between the TFRM rate and the new rate varies from one interval to another.

Accordingly, the FDIC believes that the benefits of the final rule will likely outweigh any costs it might impose.

### 4. The Assessment-Schedule Notice

The change in the assessment-schedule notice does not impose any direct costs on insured institutions. Indirectly, the change is expected to provide a benefit to them, by reducing

the likelihood of errors in the assessment process.

## I. Other Approaches Considered

### 1. Retaining the Status Quo

#### a. The Payment Schedule

The FDIC considered retaining the current schedule without change. As noted above, however, the FDIC recognizes that it was responsible for establishing the original December 1995 payment date. The FDIC further recognizes that cash-basis institutions—ones that keep their financial records and make their financial reports on a cash basis—might be adversely affected if they were required to make a payment on that date. The FDIC believes that, if it can mitigate harm of this kind by modifying its regulations, it should make every effort to do so.

#### b. Interest on Underpaid and Overpaid Assessments

The FDIC also considered retaining the TFRM rate without change. The FDIC believed, however, that the rigidities and delays inherent in the TFRM rate militate against retaining this interest-rate standard.

### 2. Alternative Proposal

#### a. The Payment Schedule

The FDIC considered retaining the current payment schedule, while giving cash-basis institutions the option of electing to defer their first payment until January.

This alternative proposal focused narrowly on the one-time disadvantage that cash-basis institutions will suffer in 1995, and aimed at protecting those institutions against that disadvantage. Accordingly, the alternative proposal did not offer the deferred-payment option to non-cash-basis institutions, and did not offer the option to any institutions after 1995.

Under the alternative proposal, institutions that exercised the option by November 1, 1995, would have made their first payment for 1996 on the first business day following January 1, 1996, and would have continued thereafter to make the first payment on the first business day of the year. Institutions that failed to exercise the option by November 1, 1995, would have had to make all their payments according to the regular payment schedule.

After an institution had made the election, the institution could have terminated the election—thereby reverting to the regular payment schedule—by so certifying to the FDIC in writing. For the termination to be effective for a given year, the institution

would have had to provide the certification to that effect to the FDIC no later than November 1 of the prior year. The termination would have been permanent. The FDIC would not have charged interest on the delayed payments.

The FDIC has chosen to issue the final rule, rather than the alternative proposal, for two reasons. The approach set forth in the final rule is more evenhanded: all institutions will have the benefit of the later payment date, and all will have an equal opportunity to earn additional interest on their funds. The final rule also provides greater flexibility to all institutions to plan the timing of their expenses.

#### b. Interest on Underpaid and Overpaid Assessments

The FDIC also considered replacing the single TFRM rate with a pair of rates: namely, the composite yield at market of the BIF and SAIF portfolios, respectively. These rates would have been determined retrospectively, because they are generated by looking at the interest that the portfolios actually earned. For the second quarter of 1995, the rates would have been 5.70% for the BIF and 5.61% for the SAIF.

The FDIC would have adopted the “composite yield at market” rate on the theory that such a rate would represent the FDIC’s actual benefits (or costs) from the overcollection (or undercollection) of assessments. If an institution overpaid its assessment, the FDIC would have returned to the institution the full benefit that the FDIC had received from the overpayment. Conversely, if an institution underpaid its assessment, the institution would have restored to its fund the economic value of the interest the fund will otherwise have earned, making the fund whole.

The FDIC has adopted the new rate, rather than the “composite yield at market” rate, for two reasons. First, the new rate is based on a published rate, not on proprietary information, and is easier for people in the private sector to determine. Second, the new rate is intended to approximate the market value of the funds—that is, the interest that an institution earned or may have earned by investing the funds—rather than the vagaries of the investment portfolios of the BIF and the SAIF.

## J. Effective Dates

### 1. Payment Dates for First Payments

#### a. The Regular Payment Date

The FDIC is making the change in the payment date for the first payment effective upon publication in the Federal Register. The Board of Directors

has determined that the new payment schedule "relieves a restriction" within the meaning of 5 U.S.C. 553(d)(1), because it delays the date on which the FDIC regularly collects the first payments, and thereby allows institutions to retain their funds for an extra interval. The Board of Directors has further determined that there is "good cause" to make this aspect of the final rule effective upon adoption because institutions should have as much time as possible to adjust to the new collection schedule and to decide whether to take advantage of the election options provided by the final rule.

The FDIC is making this revision to the payment schedule effective at once, rather than delaying the effective date for 30 days, see 5 U.S.C. 553(d).

#### b. The Alternate Payment Date

The Board of Directors has likewise determined that there is "good cause" to make the final rule effective upon adoption with respect to the availability of the alternate payment date because institutions should have as much time as possible to decide whether to take advantage of this option.

The FDIC is also making this revision to the payment schedule effective at once, rather than delaying the effective date for 30 days, see 5 U.S.C. 553(d).

#### 2. Doubled Payments

The Board of Directors has determined that the doubled-payment option "relieves a restriction" within the meaning of 5 U.S.C. 553(d)(1), because it gives institutions additional flexibility to arrange their financial affairs. In addition, the Board of Directors has determined that there is "good cause" to make the final rule effective upon adoption with respect to the doubled-payment option because institutions should have as much time as possible to decide whether to take advantage of this option.

The FDIC is making this revision to the payment schedule effective at once, rather than delaying the effective date for 30 days, see 5 U.S.C. 553(d).

#### 3. Interest on Underpaid and Overpaid Assessments

The FDIC is making the revision of the interest rate effective 30 days after publication of the final rule in the Federal Register, in accordance with 5 U.S.C. 553(d).

#### 4. The Assessment-Schedule Notice

The FDIC considers that the decision to establish an advance-notice period—and, accordingly, the decision to shorten the period—is a rule of "agency

\* \* \* practice" within the meaning of the Administrative Procedure Act (5 U.S.C. 553), and that notice and comment are therefore not required. The advance-notice period is not required by statute. The FDIC has adopted the advance-notice period *sua sponte*, reflecting "the FDIC's intent promptly to make public the basis for any Board decision to adjust the rate schedule." See 60 FR 42680, 42740.

The FDIC designed the original advance-notice period with its own internal constraints in mind, and those constraints have changed. Accordingly, the Board of Directors has determined that there is good cause to shorten the advance-notice period without the notice and public participation that are ordinarily required by the Administrative Procedure Act.

Furthermore, the Board of Directors has determined that good cause exists for waiving the customary 30-day delayed effective date. The FDIC has only recently made the determination that the BIF has recapitalized. The Board considers that it is particularly important that the revenue to be generated in the current assessment cycle will accurately reflect the current status of the BIF and the assessment bases of the institutions.

The FDIC is therefore making this revision to the payment schedule effective at once, rather than delaying the effective date for 30 days, see 5 U.S.C. 553(d).

#### K. Paperwork Reduction Act

The proposed rule would have provided that, if an institution selected the alternate payment date, the institution could then select the doubled-payment option as well. Because the two elections were linked, the FDIC developed a single form for them: the form for electing the alternate payment date also asked institutions to specify the amount they would pay.

The FDIC was concerned that, by asking for this additional piece of information, the FDIC was engaging in the "collection of information" within the meaning of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). Accordingly, the FDIC asked the Office of Management and Budget (OMB) to review the proposal and submitted the proposed form to OMB for approval. OMB has approved the collection of information and the form.

The final rule does away with the need for OMB's review and approval, however. The final differs from the proposed rule by separating the procedure for selecting the alternate payment date from the procedure for selecting the doubled-payment option.

Each procedure has its own form. Each form contains the appropriate certification and specifies the initial payment with respect to which the institution is making the election.

An institution that signs a form does no more than identify itself. Self-identification in this manner does not constitute "information" within the meaning of the Paperwork Reduction Act.

#### L. Regulatory Flexibility Act

The Board hereby certifies that the final rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) The final rule mitigates a cost incurred by certain smaller entities—namely, cash-basis depository institutions—that arises from the one-time shift from the semiannual assessment process to the new quarterly assessment schedule. The final rule further confers a benefit on all institutions (including smaller institutions) by allowing them to earn interest on their funds for an additional interval.

To the extent that an institution might incur a cost in connection with preparing and submitting the paperwork necessary to make the election, the FDIC believes that the cost will be minimal, and will be far outweighed by the resulting benefit. In any case, each institution's decision to make the election is purely voluntary: The final rule does not compel an institution to accept any cost of this kind.

#### List of Subjects in 12 CFR Part 327

Bank deposit insurance, Banks, Banking, Freedom of information, Reporting and recordkeeping requirements, Savings associations.

For the reasons stated in the preamble, the Board of Directors of the FDIC is amending 12 CFR Part 327 as follows:

#### PART 327—ASSESSMENTS

1. The authority citation for part 327 continues to read as follows:

Authority: 12 U.S.C. 1441, 1441b, 1817–1819.

2. Section 327.3 is amended by revising paragraphs (c)(2), (d)(2), (e), and (f) and by adding paragraphs (c)(3) and (j) to read as follows:

#### § 327.3 Payment of semiannual assessments.

\* \* \* \* \*

(c) \* \* \*

(2) *Payment date and manner.* Except as provided in paragraphs (c)(3) and (j)

of this section, the Corporation will cause the amount stated in the applicable invoice to be directly debited on the appropriate regular payment date from the deposit account designated by the insured depository institution for that purpose, as follows:

(i) In the case of the first quarterly payment for a semiannual period that begins on January 1, the regular payment date is January 2; and

(ii) In the case of the first quarterly payment for a semiannual period that begins on July 1, the regular payment date is the preceding June 30.

(3) *Alternate payment date.*—(i)

*Election.* An insured depository institution may elect to pay the first quarterly payment for a semiannual period that begins on January 1 of a current year on the alternate payment date. The alternate payment date is December 30 of the prior year.

(ii) *Certification.* (A) In order to elect the alternate payment date with respect to a current semiannual period, an institution must so certify in writing in advance. In order for the election to be effective with respect to the current semiannual period, the Corporation must receive the certification no later than the prior November 1.

(B) The certification shall be made on a pre-printed form provided by the Corporation. The form shall be signed by the institution's chief financial officer or such other officer as the institution's board of directors may designate for that purpose. The form shall be sent to the attention of the Chief of the Assessment Operations Section of the Corporation's Division of Finance. An institution may obtain the form from the Corporation's Division of Finance.

(C) The election of the alternate payment date shall be effective with respect to the semiannual period specified in the certification and thereafter, until terminated.

(iii) *Termination.* (A) An insured depository institution may terminate its election of the alternate payment date, and thereby revert to the regular payment date, by so certifying in writing to the Corporation in advance. In order for the termination to be effective for a current semiannual period, the Corporation must receive the termination certification no later than the prior November 1.

(B) The termination certification shall be made on a pre-printed form provided by the Corporation. The form shall be signed by the institution's chief financial officer or such other officer as the institution's board of directors may designate for that purpose. The form shall be sent to the attention of the Chief of the Assessment Operations Section of

the Corporation's Division of Finance. An institution may obtain the form from the Corporation's Division of Finance.

(C) The termination shall be permanent, except that an institution that has terminated an election may make a new election under paragraph (c)(3)(i) of this section.

(iv) *Manner of payment.* Except as provided in paragraph (j) of this section, if an insured depository institution elects the alternate payment date, the Corporation will cause the amount stated in the applicable invoice to be directly debited on the alternate payment date from the deposit account designated by the insured depository institution for that purpose.

(d) *Second-quarterly payment.* \* \* \*

(2) Except as provided in paragraph (j) of this section, the Corporation will cause the amount stated in the applicable invoice to be directly debited on the appropriate regular payment date from the deposit account designated by the insured depository institution for that purpose, as follows:

(i) In the case of the second quarterly payment for a semiannual period that begins on January 1, the regular payment date is March 30; and

(ii) In the case of the second quarterly payment for a semiannual period that begins on July 1, the regular payment date is September 30.

(e) *Necessary action, sufficient funding by institution.* Each insured depository institution shall take all actions necessary to allow the Corporation to debit assessments from the insured depository institution's designated deposit account. Each insured depository institution shall, prior to each payment date indicated in paragraphs (c)(2), (c)(3)(i), and (d)(2) of this section, ensure that funds in an amount at least equal to the invoiced amount (or twice the invoiced amount if the insured depository institution has elected the doubled-payment option pursuant to paragraph (j) of this section) are available in the designated account for direct debit by the Corporation. Failure to take any such action or to provide such funding of the account shall be deemed to constitute nonpayment of the assessment.

(f) *Business days.* If a payment date specified in paragraph (c)(2)(i) falls on a date that is not a business day, the applicable date shall be the following business day. If a payment date specified in paragraph (c)(1), (c)(2)(ii), (c)(3)(i), or (d)(2) of this section falls on a date that is not a business day, the applicable date shall be the previous business day.

\* \* \* \* \*

(j) *Doubled-payment option.*—(1) *Election.* In the case of a quarterly payment to be made on March 30, on June 30, on September 30, or on the alternate payment date, an insured depository institution may elect to pay twice the amount of such quarterly payment.

(2) *Certification.* (i) In order to elect the doubled-payment option with respect to a selected payment date, an institution must so certify in writing to the Corporation in advance. In order for the election to be effective, the Corporation must receive the certification by the following dates: in the case of a quarterly payment to be made on March 30, June 30, or September 30, the Corporation must receive the certification no later than the prior February 1, May 1, or August 1, respectively; in the case of a quarterly payment to be made on the alternate payment date, the Corporation must receive the certification by the prior November 1.

(ii) The certification shall be made on a pre-printed form provided by the Corporation. The form shall be signed by the institution's chief financial officer or such other officer as the institution's board of directors may designate for that purpose. The form shall be sent to the attention of the Chief of the Assessment Operations Section of the Corporation's Division of Finance. An institution may obtain the form from the Corporation's Division of Finance.

(iii) The election shall be effective with respect to the selected quarterly payment for the year specified in the certification and with respect to subsequent quarterly payments made on the selected payment date in subsequent years, until the election is terminated.

(3) *Termination.* (i) An insured depository institution may terminate its election of the doubled-payment option for a selected payment date by so certifying in writing to the Corporation in advance. In order for the termination to be effective, the Corporation must receive the termination certification by the following dates: In the case of a quarterly payment to be made on March 30, June 30, or September 30, the Corporation must receive the termination certification no later than the prior February 1, May 1, or August 1, respectively; in the case of a quarterly payment to be made on the alternate payment date, the Corporation must receive the termination certification by the prior November 1.

(ii) The termination certification shall be made on a pre-printed form provided by the Corporation. The form shall be signed by the institution's chief financial officer or such other officer as

the institution's board of directors may designate for that purpose. The form shall be sent to the attention of the Chief of the Assessment Operations Section of the Corporation's Division of Finance. An institution may obtain the form from the Corporation's Division of Finance.

(iii) The termination shall be permanent, except that an institution that has terminated its election of the doubled-payment option for a selected payment date may make a new election.

(4) *Manner of payment.* If an insured depository institution elects the doubled-payment option for a selected payment date, the Corporation will cause an amount equal to twice the amount stated in the applicable invoice to be directly debited on the selected payment date from the deposit account designated by the insured depository institution for that purpose.

3. Section 327.7 is amended by revising paragraphs (a)(2), (a)(3), and (b) and adding paragraph (c) to read as follows:

**§ 327.7 Payment of interest on assessment underpayments and overpayments.**

(a) \* \* \*

(2) *Payment by Corporation.* (i) The Corporation will pay interest on any overpayment by the institution of its assessment.

(ii) When an institution elects the alternate payment date pursuant to § 327.3(c)(3), or otherwise pays an amount due on a regular payment date before that date, the payment of the invoiced amount prior to the regular payment date shall not be regarded as an overpayment of an assessment.

(iii) When an institution elects the doubled-payment option pursuant to § 327.3(j), the payment of any amount in excess of the invoiced amount shall not be regarded as an overpayment of an assessment.

(3) *Accrual of interest.* (i) Interest on an amount owed to or by the Corporation for the underpayment or overpayment of an assessment shall accrue interest at the relevant interest rate.

(ii) Interest on an amount specified in paragraph (a)(3)(i) of this section shall begin to accrue on the day following the regular payment date, as provided for in § 327.3(c)(2) and (d)(2), for the amount so overpaid or underpaid, provided, however, that interest shall not begin to accrue on any overpayment until the day following the date such overpayment was received by the Corporation. Interest shall continue to accrue through the date on which the overpayment or underpayment (together with any interest thereon) is discharged.

(iii) The relevant interest rate shall be redetermined for each quarterly assessment interval. A quarterly assessment interval begins on the day following a regular payment date, as specified in § 327.3(c)(2) and (d)(2), and ends on the immediately following regular payment date.

(b) *Rates after the first payment date in 1996.* (1) On and after January 3, 1996, the relevant interest rate for a quarterly assessment interval that includes the month of January, April, July, and October, respectively, is the coupon equivalent yield of the average discount rate set on the 3-month Treasury bill at the last auction held by the United States Treasury Department during the preceding December, March, June, and September, respectively.

(2) The relevant interest rate for a quarterly assessment interval will apply to any amounts overpaid or underpaid on the payment date (whether regular or alternate) immediately prior to the beginning of the quarterly assessment interval. The relevant interest rate will also apply to any amounts owed for previous overpayments or underpayments (including any interest thereon) that remain outstanding, after any adjustments to such overpayments or underpayments have been made thereon, at the end of the regular payment date immediately prior to the beginning of the quarterly assessment interval.

(c) *Rates prior to the first payment date in 1996.* Through January 3, 1996—

(1) The interest rate will be the United States Treasury Department's current value of funds rate which is issued under the Treasury Fiscal Requirements Manual (TFRM rate) and published in the Federal Register;

(2) The interest will be calculated based on the rate issued under the TFRM for each applicable period and compounded annually;

(3) For the initial year, the rate will be applied to the gross amount of the underpayment or overpayment; and

(4) For each additional year or portion thereof, the rate will be applied to the net amount of the underpayment or overpayment after that amount has been reduced by the assessment credit, if any, for the year.

4. Section 327.9 is amended by removing the number "45" in paragraph (b)(3)(ii) and adding in lieu thereof the number "15".

By order of the Board of Directors.

Dated at Washington, D.C. this 26th day of September, 1995.

Federal Deposit Insurance Corporation.

Jerry L. Langley,

*Executive Secretary.*

BILLING CODE 6714-01-P

**DEPARTMENT OF TRANSPORTATION**

**Federal Aviation Administration**

**14 CFR Part 71**

[Airspace Docket No. 95-ACE-07]

**Amendment to Class E Airspace; Clay Center, KS**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment modifies the Class E airspace area at Clay Center, KS to accommodate a planned Standard Instrument Approach Procedure (SIAP) based on the Global Positioning System (GPS). This action will provide additional controlled airspace for aircraft executing the SIAP to Clay Center Municipal Airport.

**EFFECTIVE DATE:** 0901 UTC, January 4, 1996.

**FOR FURTHER INFORMATION CONTACT:** Kathy Randolph, Air Traffic Division, Air Traffic Operations Branch, ACE-530C, Federal Aviation Administration, 601 E. 15th St., Kansas City, MO 64106; telephone (816) 426-3408.

**SUPPLEMENTARY INFORMATION:**

**History**

On July 25, 1995, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by modifying the Class E airspace area at Clay Center, KS (60 FR 37972). The proposed action would provide additional controlled airspace to accommodate a GPS SIAP to Runway 17 at the Clay Center Airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Class E airspace areas extending from 700 feet or more above the surface of the earth are published in FAA Order 7400.9C, par. 6005, dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to part 71 of the Federal Aviation Regulations (14 CFR

part 71) amends the Class E airspace area at Clay Center, KS, by providing additional controlled airspace for aircraft executing the GPS Runway 17 SIAP to the Clay Center Municipal Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation—(1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### List of Subjects in 14 CFR Part 71

Aviation, Incorporation by reference, Navigation (air).

#### Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

#### **PART 71—[AMENDED]**

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854; 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 14 CFR 11.69.

##### **§ 71.1 [Amended]**

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995 and effective September 16, 1995, is amended as follows:

*Paragraph 6005 Class E airspace areas extending from 700 feet or more above the surface of the earth*

\* \* \* \* \*

ACE KS E5 Clay Center, KS [Revised]

Clay Center Municipal Airport, KS  
(Lat. 39°23'14"N., long. 97°09'26"W)

Clay Center NDB  
(Lat. 39°22'51"N., long. 97°09'40"W)

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Clay Center Municipal Airport and within 2.6 miles each side of the 167° bearing from the Clay Center NDB extending from the 6-mile radius to 7 miles southeast of the airport and within 2 miles each side of the

001° bearing from the Clay Center Municipal Airport extending from the 6-mile radius to 10 miles north of the airport.

\* \* \* \* \*

Issued in Kansas City, MO, on September 11, 1995.

Herman J. Lyons, Jr.,

*Manager, Air Traffic Division, Central Region.*

#### **14 CFR Part 71**

#### **[Airspace Docket No. 95–ANM–13]**

#### **Amendment of Class E Airspace; Sheridan, Wyoming**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This action amends the Sheridan, Wyoming, Class E airspace to accommodate a new instrument approach procedure at Sheridan County Airport. This amendment brings publications up-to-date giving continuous information to the aviation public.

**EFFECTIVE DATE:** 0901 UTC, January 4, 1996.

#### **FOR FURTHER INFORMATION CONTACT:**

James Riley, ANM–537, Federal Aviation Administration, Docket No. 95–ANM–13, 1601 Lind Avenue S.W., Renton, Washington, 98055–4056; telephone number: (206) 227–2537.

#### **SUPPLEMENTARY INFORMATION:**

##### **History**

On July 31, 1995, the FAA proposed to amend part 71 of Federal Aviation Regulations (14 CFR part 71) by amending the Sheridan, Wyoming, Class E airspace designation (60 FR 38977). Interested parties were invited to participate in the rulemaking proceeding by submitting written comments on the proposal. No comments were received.

This action is the same as the proposal except for a typographical error discovered (and corrected herein) in the coordinates for the Sheridan County Airport and mileage southeast of the Sheridan VORTAC. The coordinates for this airspace docket are based on North American Datum 83. Class E airspace is published in Paragraphs 6002 and 6005, respectively, of FAA Order 7400.9C dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be published subsequently in the Order.

#### **The Rule**

This amendment to part 71 of Federal Aviation Regulations amends Class E airspace at Sheridan, Wyoming. The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

#### **List of Subjects in 14 CFR Part 71**

Airspace, Incorporation by reference, Navigation (air).

#### **Adoption of the Amendment**

In consideration of the foregoing, 14 CFR part 71 is amended as follows:

#### **PART 71—[AMENDED]**

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389; 14 CFR 11.69.

##### **§ 71.1 [Amended]**

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995, September 16, 1995, is amended as follows:

*Paragraph 6002 Class E airspace areas designated as a surface area for an airport*

\* \* \* \* \*

ANM WY E2 Sheridan, WY [Revised]

Sheridan County Airport, WY  
(Lat. 44°46'15"N, long. 106°58'43"W)

Sheridan VORTAC  
(Lat. 44°50'32"N, long. 107°03'40"W)

Within a 4.5-mile radius of the Sheridan County Airport, and within 4.5 miles each side of the 157° bearing from the airport, extending from the 4.5-mile radius to 17.6 miles southeast of the airport, and within 3.5 miles each side of the Sheridan VORTAC 312° and 327° radials extending from the 4.5-mile radius to 10.1 miles northwest of the VORTAC, and within 3.5 miles each side of the Sheridan VORTAC 140° radial extending from the 4.5-mile radius to 21.4 miles southeast of the VORTAC. This Class E.

airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

\* \* \* \* \*

*Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth*

\* \* \* \* \*

ANM WY E5 Sheridan, WY [Revised]  
Sheridan County Airport, WY  
(Lat. 44°46'15"N, long. 106°58'43"W)

### Sheridan VORTAC

(Lat. 44°50'32"N, long. 107°03'40"W)

That airspace extending upward from 700 feet above the surface within a 6.1-mile radius of the Sheridan County Airport; that Airspace extending upward from 1,200 feet above the surface within 6.1 miles southwest and 8.7 miles northeast of the Sheridan VORTAC 138° and 318° radials extending from 16.1 miles northwest to 29.6 miles southeast of the VORTAC, and that airspace southeast of Sheridan bounded on the north by a line located 4.3 miles south of and parallel to the Sheridan VORTAC 104° radial, on the east by a 30.5-mile radius of the Sheridan VORTAC, and on the south by a line located 8.7 miles north of and parallel to the Sheridan VORTAC 138° radial.

## DEPARTMENT OF LABOR

### Occupational Safety and Health Administration

#### 29 CFR Parts 1915 and 1926

RIN 1218-AB25

#### Occupational Exposure to Asbestos

**AGENCY:** Occupational Safety and Health Administration, Department of Labor.

**ACTION:** Final rule; amendments.

**SUMMARY:** This document corrects the Asbestos final rule which was published August 10, 1994 (59 FR 40964, 29 CFR 1915.1001 and 1926.1101) and corrected and clarified June 29, 1995 (60 FR 33974).

**EFFECTIVE DATE:** These amendments take effect on October 1, 1995.

**FOR FURTHER INFORMATION CONTACT:** Ms. Ann Cyr, Acting Director of Information and Consumer Affairs, Occupational Safety and Health Administration, U.S. Department of

Labor, Room N3647, 200 Constitution Avenue, NW., Washington, DC 20210, telephone (202) 219-8151.

**SUPPLEMENTARY INFORMATION:** OSHA issued improved asbestos standards for general industry, construction, and shipyard employment on August 10, 1994 at 59 FR 40964 to better protect workers from lung cancer, asbestosis and other diseases caused by asbestos exposure. OSHA published a notice correcting and clarifying certain provisions on June 29, 1995. This document further corrects and clarifies various provisions of the construction and shipyards employment standards. The general industry standard is not further amended.

Because the corrections are based on the existing rulemaking record and are not intended to affect the protection afforded by the standard in a significant way, OSHA finds good cause, pursuant to 29 CFR 1911.15 and the Administrative Procedure Act, for promulgating the corrections without notice and opportunity for public comment.

OSHA briefly describes in this preamble, changes to the regulatory text of the standards which are more than typographical in nature.

In both the construction and shipyards standards paragraph (g)(7)(iii) is redesignated as (g)(7)(ii)(C) to clarify that dropcloths are required beneath all indoor removal activity.

OSHA has determined that when gaskets are removed intact, wet methods are not required. Therefore, paragraph (g)(8)(iv)(B) is deleted and the word "wet" is removed from (g)(8)(iv)(C). The standard still requires that when gaskets are visibly deteriorated, they must be removed using glovebags and wet methods.

Paragraph (g)(11) of 1926.1101 and paragraph (g)(12) of 1915.1001 are revised to allow bituminous or asphaltic pipeline coating to be handled using the same "alternative methods" set forth in the June 1995 correction notice, for certain bituminous/resinous roofing materials. OSHA recognizes that asphaltic wrap is similar to these roofing materials because the highly effective material used to bind asbestos fibers, is the same. A new paragraph (g)(11)(vi) of the construction standard (1926.1101) and (g)(12)(vi) of the shipyard employment standard (1915.1001) is added to specify that activities that disturb asphaltic pipeline wrap must be performed using wet methods. Submissions by Exxon to the 1994 rulemaking record which indicate that these activities generate low fiber levels were performed using wet methods (Docket H033e, Exhibit 127).

In the preamble to the June 29 Federal Register correction document, OSHA stated its intention to allow the use of powered air-purifying respirators adequately fitted to give a good face seal when exposure assessment and monitoring data indicate that asbestos exposure levels do not exceed 1.0 fibers per cubic centimeter as an 8-hour time weighted average. However, this provision was inadvertently omitted from the regulatory text. Paragraph (h)(2)(v) of both standards is corrected to include this provision.

Paragraph (o)(4) of both standards is corrected to allow competent/qualified person training to be obtained in a course that meets the EPA criteria for supervisors, one which is state-approved, or one which is equivalent in stringency, content, and length. This restores the August 10, 1994 regulatory text allowing training in state-approved courses for competent/qualified persons which was inadvertently omitted from the June 19 document.

List of Subjects in 29 CFR Parts 1915 and 1916

Asbestos, Occupational Safety and Health.

This document was prepared under the direction of Joseph A. Dear, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Accordingly, pursuant to sections 4, 6(b), 8(c), and 8(g) of the Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); Sec. 107, Contract Work Hours and Safety Standards Act (Construction Safety Act, 40 U.S.C. 333); Sec. 41, Longshore and Harbor Workers' Compensation Act (33 U.S.C. 941); 5 U.S.C. Sec. 553; and 29 CFR Part 1911; 29 CFR Parts 1915 and 1926 are amended as set forth below.

Signed at Washington, DC this 25th day of September, 1995.

Joseph A. Dear,

*Assistant Secretary, Occupational Safety and Health Administration.*

### PART 1915—OCCUPATIONAL SAFETY AND HEALTH STANDARDS FOR SHIPYARD EMPLOYMENT

#### § 1915.1001 [Amended]

1. and 2. The authority citation of 29 CFR Part 1915 continues to read as follows:

Authority: Sec. 41, Longshore and Harbor Workers Compensation Act (33 U.S.C. 941); sections 4, 6, and 8, Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); sec. 4 of the Administrative Procedure Act (5 U.S.C. 553); Secretary of Labor's Order No. 12-71 (36 FR 8754), 8-76 (41 FR 25059), 9-

83 (48 FR 35736) or 1-90 (55 FR 9033), as applicable; 29 CFR Part 1911.

**§ 1915.1001 [Amended]**

3. In § 1915.1001, paragraph (g)(7)(iii) is redesignated as (g)(7)(ii)(C), and a new paragraph (g)(7)(iii) is added and reserved.

4. and 5. In § 1915.1001, paragraph (g)(8)(iv)(B) is removed and reserved.

6. In § 1915.1001, paragraph (g)(8)(iv)(C) is revised to read as follows:

**§ 1915.1001 Asbestos.**

\* \* \* \* \*

- (g) \* \* \*
- (8) \* \* \*
- (iv) \* \* \*

(C) The gasket shall be immediately placed in a disposal container.

\* \* \* \* \*

7. In § 1915.1001, paragraph (g)(12) introductory text is revised to read as follows:

\* \* \* \* \*

- (g) \* \* \*

(12) Alternative methods of compliance for installation, removal, repair, and maintenance of certain roofing and pipeline coating materials. Notwithstanding any other provision of this section, and employer who complies with all provisions of this paragraph (g)(12) when installing, removing, repairing, or maintaining intact pipeline asphaltic wrap, or roof cements, mastics, coatings, or flashings which contain asbestos fibers encapsulated or coated by bituminous or resinous compounds shall be deemed to be in compliance with this section. If an employer does not comply with all provisions of this paragraph (g)(12), or if during the course of the job the material does not remain intact, the provisions of paragraph (g)(8) of this section apply instead of this paragraph (g)(12).

\* \* \* \* \*

8. In § 1915.1001, paragraph (g)(12)(vi) is added to read as follows:

\* \* \* \* \*

- (g) \* \* \*
- (12) \* \* \*

(vi) All removal or disturbance of pipeline asphaltic wrap shall be performed using wet methods.

\* \* \* \* \*

9. In § 1915.1001, paragraph (h)(2)(v) is revised to read as follows:

\* \* \* \* \*

- (h) \* \* \*
- (2) \* \* \*

(v) In addition to the selection criteria in paragraph (h)(2)(i) through (iv), the employer shall provide a tight-fitting powered air purifying respirator equipped with high efficiency filters or

a full facepiece supplied air respirator operated in the pressure demand mode equipped with HEPA egress cartridges or an auxiliary positive pressure self-contained breathing apparatus for all employees within the regulated area where Class I work is being performed for which a negative exposure assessment has not been produced and, the exposure assessment indicates the exposure level will not exceed 1 f/cc as an 8-hour time weighted average. A full facepiece supplied air respirator operated in the pressure demand mode equipped with an auxiliary positive pressure self-contained breathing apparatus shall be provided under such conditions, if the exposure assessment indicates exposure levels above 1 f/cc as an 8-hour time weighted average.

\* \* \* \* \*

10. In § 1915.1001, paragraph (o)(4)(i) is revised to read as follows:

\* \* \* \* \*

- (o) \* \* \*
- (4) \* \* \*

(i) For Class I and II asbestos work the qualified person shall be trained in all aspects of asbestos removal and handling, including: Abatement, installation, removal and handling; the contents of this standard; the identification of asbestos; removal procedures, where appropriate; and other practices for reducing the hazard. Such training shall be obtained in a comprehensive course for supervisors, that meets the criteria of EPA's Model Accreditation Plan (40 CFR part 763, subpart E, Appendix C), such as a course conducted by an EPA-approved or state-approved training provider, certified by EPA or a state, or a course equivalent in stringency, content, and length.

\* \* \* \* \*

**PART 1926—SAFETY AND HEALTH REGULATIONS FOR CONSTRUCTION**

1. and 2. The authority citation of subpart Z of 29 CFR Part 1926 continues to read as follows:

Authority: Sections 6 and 8, Occupational Safety and Health Act, 29 U.S.C. 655, 657; Secretary of Labor's Orders Nos. 12-71 (36 FR 8754), 8-76 (41 FR 25059), 9-83 (48 FR 35736) or 1-90 (55 FR 9033) as applicable; and 29 CFR Part 1911.

Section 1926.1101 also issued under 5 U.S.C. 553.

Section 1926.1102 not issued under 29 U.S.C. 655 or 29 CFR Part 1911; also issued under 5 U.S.C. 553.

Section 1926.1103 through 1926.1118 also issued under 29 U.S.C. 653.

Section 1926.1128 also issued under 29 U.S.C. 653.

Section 1926.1145 and 1926.1147 also issued under 29 U.S.C. 653.

Section 1926.1148 also issued under 29 U.S.C. 653.

**§ 1926.1101 [Amended]**

3. In § 1926.1101, paragraph (g)(7)(iii) is redesignated as (g)(7)(ii)(C), and a new paragraph (g)(7)(iii) is added and reserved.

4. and 5. In § 1926.1101, paragraph (g)(8)(iv)(B) is removed and reserved.

6. In § 1926.1101, paragraph (g)(8)(iv)(C) is revised to read as follows:

**§ 1926.1101 Asbestos.**

\* \* \* \* \*

- (g) \* \* \*
- (8) \* \* \*
- (iv) \* \* \*

(c) The gasket shall be immediately placed in a disposal container.

\* \* \* \* \*

7. In § 1926.1101, paragraph (g)(11) introductory text is revised to read as follows:

\* \* \* \* \*

- (g) \* \* \*

(11) Alternative methods of compliance for installation, removal, repair, and maintenance of certain roofing and pipeline coating materials. Notwithstanding any other provision of this section, an employer who complies with all provisions of this paragraph (g)(11) when installing, removing, repairing, or maintaining intact pipeline asphaltic wrap, or roof cements, mastics, coatings, or flashings which contain asbestos fibers encapsulated or coated by bituminous or resinous compounds shall be deemed to be in compliance with this section. If an employer does not comply with all provisions of this paragraph (g)(11), or if during the course of the job the material does not remain intact, the provisions of paragraph (g)(8) of this section apply instead of this paragraph (g)(11).

\* \* \* \* \*

8. In § 1926.1101, paragraph (g)(11)(vi) is added to read as follows:

\* \* \* \* \*

- (g) \* \* \*
- (11) \* \* \*

(vi) All removal or disturbance of pipeline asphaltic wrap shall be performed using wet methods.

\* \* \* \* \*

9. In § 1926.1101, paragraph (h)(2)(v) is revised to read as follows:

\* \* \* \* \*

- (h) \* \* \*
- (2) \* \* \*

(v) In addition to the selection criteria in paragraphs (h)(2)(i) through (iv), the employer shall provide a tight-fitting powered air purifying respirator equipped with high efficiency filters or

a full facepiece supplied air respirator operated in the pressure demand mode equipped with HEPA egress cartridges or an auxiliary positive pressure self-contained breathing apparatus for all employees within the regulated area where Class I work is being performed for which a negative exposure assessment has not been produced and, the exposure assessment indicates the exposure level will not exceed 1 f/cc as an 8-hour time weighted average. A full facepiece supplied air respirator operated in the pressure demand mode equipped with an auxiliary positive pressure self-contained breathing apparatus shall be provided under such conditions, if the exposure assessment indicates exposure levels above 1 f/cc as an 8-hour time weighted average.

\* \* \* \* \*

10. In § 1926.1101, paragraph (o)(4)(i) is revised to read as follows:

\* \* \* \* \*

(o) \* \* \*

(4) \* \* \*

(i) For Class I and II asbestos work the competent person shall be trained in all aspects of asbestos removal and handling, including: abatement, installation, removal and handling; the contents of this standard; the identification of asbestos; removal procedures, where appropriate; and other practices for reducing the hazard. Such training shall be obtained in a comprehensive course for supervisors that meets the criteria of EPA's Model Accreditation Plan (40 CFR part 763, subpart E, Appendix C), such as a course conducted by an EPA-approved or state-approved training provider, certified by EPA or a state, or a course equivalent in stringency, content, and length.

**SUPPLEMENTARY INFORMATION:** The Pension Benefit Guaranty Corporation is amending several of its regulations to display the applicable Office of Management and Budget control numbers as required by 5 CFR 1320.4 and 1320.5. All of the collections of information contained in Parts 2627, 2645, and 2674 have been approved by OMB.

List of Subjects in 29 CFR Parts 2627, 2645, and 2674

Pension insurance, Pensions, Reporting and recordkeeping requirements.

Accordingly, 29 CFR Parts 2626, 2645, and 2674 are amended as follows:

**PART 2627—DISCLOSURE TO PARTICIPANTS**

1. The authority citation for part 2627 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1311.

2. A new § 2627.11 is added to read as follows:

**§ 2627.11 OMB control number.**

The collections of information contained in this part have been approved by the Office of Management and Budget under OMB control number 1212-0050.

**PART 2645—EXTENSION OF SPECIAL WITHDRAWAL LIABILITY RULES**

3. The authority citation for part 2645 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1383(f), 1388(e)(3).

4. A new § 2645.5 is added to read as follows:

**§ 2645.5 OMB control number.**

The collections of information contained in this part have been approved by the Office of Management and Budget under OMB control number 1212-0023.

**PART 2674—NOTICE OF INSOLVENCY**

5. The authority citation for part 2674 continues to read as follows:

Authority: 29 U.S.C. 1302(b)(3), 1426(e).

**§ 2674.5 [Amended]**

6. At the end of § 2674.5, the words "(Approved by the Office of Management and Budget under control number 1212-0033)" are removed.

**§ 2674.6 [Amended]**

7. At the end of § 2674.6, the words "(Approved by the Office of Management and Budget under control number 1212-0033)" are added.

Issued in Washington, DC, this 22d day of September 1995.

Martin Slate,

*Executive Director, Pension Benefit Guaranty Corporation.*

BILLING CODE 7708-01-M

**DEPARTMENT OF EDUCATION**

**34 CFR Part 80**

**Education Department General Administrative Regulations; Cost Principles for State, Local and Indian Tribal Governments**

**AGENCY:** Department of Education.

**ACTION:** Announcement regarding the revision of certain cost principles.

**SUMMARY:** The Secretary announces the applicability of revised Office of Management and Budget (OMB) Circular A-87, "Cost Principles for State, Local and Indian Tribal Governments," as revised by OMB in the Federal Register of May 17, 1995 (60 FR 26484). This Circular establishes principles for determining allowable costs incurred by State, local, and Indian tribal governments under certain agreements with the Federal Government.

While the Department has decided to make this circular apply to grants and subgrants made on or after October 1, 1995, this notice also permits flexibility for costs incurred after July 1, 1995.

**DATES:** This notice takes effect for grants and subgrants awarded on or after on October 1, 1995.

**FOR FURTHER INFORMATION CONTACT:** Richard T. Mueller, U.S. Department of Education, Grants and Contracts Service, Room 3652 ROB, 600 Independence Ave., SW. Washington, DC 20202-4201. Telephone: (202) 708-8787. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

**SUPPLEMENTARY INFORMATION:** On March 11, 1988, the Secretary published 34

CFR Part 80—Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments (53 FR 8071). This regulatory action was the result of the Department's participation in the common rule developed by Federal agencies for administering grants and cooperative agreements awarded to State, local, and Indian tribal governments. Part 80 established Circular A-87 as the cost principles used by the Secretary of Education for determining allowable costs of State, local, and Indian tribal governments under grants and cooperative agreements with the Department. (34 CFR 80.22.)

When Part 80 was published, it was the practice of the Department to adopt circulars in the regulations by citing a specific circular publication date (See 34 CFR 80.22(b)). Now, the Department makes OMB circulars applicable through notices such as this one. Thus, the Department will make conforming amendments to 34 CFR 80.22 to eliminate the obsolete publication date for Circular A-87.

On May 17, 1995, OMB published a revision of Circular A-87 (60 FR 26484). This notice announces the applicability for 34 CFR Part 80 of the revision made by OMB, binding recipients of Department of Education grants and cooperative agreements to the requirements of Circular A-87 as revised on May 17, 1995. These cost principles apply to State, local, and Indian tribal governments, except to the extent that the principles are inconsistent with specific statutes or Departmental program or administrative regulations. The revised Circular is effective for grants and cooperative agreements made by ED on or after October 1, 1995 and for subgrants made under those awards on or after that date. The cost principles in Circular A-87 are also cross-referenced in the Department's administrative regulations applicable to institutions of higher education, hospitals, and nonprofit organizations, at 34 CFR 74.27(b).

The Secretary is aware that the revised circular contains areas of flexibility which were not contained in the prior cost principles and that could be beneficial to State, local and Indian tribal governments. The Department has made substantial grant awards, primarily to States, since July 1, 1995, and the recipients of these awards may desire to benefit from the more flexible rules in the revised A-87. Considering this, the Department has determined that it will permit recipients for which the Department has cognizance to charge direct costs which are consistent

with the revised Circular for the period July 1, 1995 through the end of the 1996 fiscal year. However, States and other governmental authorities that have State-wide cost allocation plans and indirect cost rates in effect for parts of fiscal year 1996 based on costs allowable under the prior A-87 may not amend those agreements prior to their expiration.

#### Waiver of Proposed Rulemaking

It is the practice of the Secretary to offer interested parties the opportunity to comment on proposed rules in accordance with the Administrative Procedure Act (5 U.S.C. 553). However, since OMB previously provided the public an opportunity for comment on the revision of Circular A-87 on October 12, 1988 (53 FR 40352) and August 19, 1993 (58 FR 44212), the Secretary finds that soliciting further public comment with respect to adopting the revised circular is unnecessary and contrary to the public interest under 5 U.S.C. 553(b)(B). For the same reason, the Secretary finds good cause under 5 U.S.C. 553(d) to waive the thirty-day delayed effective date.

Nonetheless, in light of recently enacted legislation—the Improving America's School Act, the Goals 2000: Educate America Act, and the School-to-Work Opportunities Act—the Secretary is interested in receiving suggestions or ideas from the States and local and Indian tribal governments and other interested parties about improving the application of the Circular based on the flexibility provided in these new laws.

The Secretary has already received and is reviewing letters from several States since the Circular's publication, concerning such areas as time distribution and the determination of reasonable and necessary expenditures of program funds.

The Secretary encourages States, local and Indian tribal governments, and other interested parties, as partners in Federal program management, to maintain an open dialogue with Department officials about matters covered in Circular A-87, including accounting practices that promote efficient administrative practices, support effective delivery of program services, and conserve resources.

(Catalog of Federal Domestic Assistance Number does not apply.)

Dated: September 26, 1995.

Donald R. Wurtz,  
Chief Financial Officer.

BILLING CODE 4000-01-P

## LIBRARY OF CONGRESS

### Copyright Office

#### 37 CFR Parts 201 and 202

[Docket No. 95-1B]

#### Restoration of Certain Berne and WTO Works

**AGENCY:** Copyright Office, Library of Congress.

**ACTION:** Final regulations

**SUMMARY:** The Copyright Office is issuing final regulations establishing procedures that govern the filing of Notices of Intent to Enforce copyright (NIEs) and the registering of copyright claims to restored works as required by the Uruguay Round Agreements Act. The Act automatically restores copyright for certain foreign works effective January 1, 1996. Although restoration is automatic, the copyright owner may file a Notice of Intent to Enforce the Restored Copyright with the Copyright Office in order to enforce rights against reliance parties.

**EFFECTIVE DATE:** These final regulations are effective October 1, 1995.

**FOR FURTHER INFORMATION CONTACT:** Marilyn J. Kretsinger, Acting General Counsel, Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, D.C. 20024. Telephone: (202) 707-8380. Telefax: (202) 707-8366.

#### I. Background

On December 8, 1994, President Clinton signed the "Uruguay Round Agreements Act" (URAA), Pub. L. No. 103-465, 108 Stat. 4809. The URAA contains several significant copyright amendments. It amends the software rental provision found in 17 U.S.C. 109(b) by eliminating the expiration or sunset date, amends Titles 17 and 18 to create civil and criminal remedies for "bootlegging" sound recordings of live musical performances and music videos, and adds a new 17 U.S.C. 104A which restores copyright in certain foreign works. The URAA also gives the Copyright Office several responsibilities related to restoration of those works.

#### A. Restoration of Copyright in Eligible Works

Under the URAA, restoration of copyright in works from countries which are currently eligible occurs automatically on January 1, 1996. An eligible country is a nation, other than the United States, that is a member of the Berne Convention,<sup>1</sup> or a member of

<sup>1</sup> Convention concerning the creation of an International Union for the Protection of Literary

the World Trade Organization, or is the subject of a presidential proclamation declaring its eligibility.

Works from any source country eligible under the URAA may be subject to automatic copyright restoration. However, to be so restored, a work must meet certain other requirements:

1. It is not in the public domain in its source country through expiration of the term of protection;

2. It is in the public domain in the United States due to noncompliance with formalities imposed at any time by United States copyright law, lack of subject matter protection in the case of sound recordings fixed before February 15, 1972, or lack of national eligibility;

3. It has at least one author or rightholder who was, at the time the work was created, a national or domiciliary of an eligible country;

4. If published, it was first published in an eligible country and was not published in the United States during the 30-day period following publication in such eligible country.

Notwithstanding the fact that the work meets the above requirements, any work ever owned or administered by the Alien Property Custodian and in which the restored copyright would be owned by a government or instrumentality thereof, is not a restored work.

#### *B. Effective Date of Restoration*

Eligible copyrights are restored automatically on the date the Agreement on Trade Related Aspects of Intellectual Property (TRIPs) enters into force with respect to the United States (URAA, section 514(a)). As discussed in the Notice of Policy Decision and Public Meeting, the Copyright Office has concluded that the effective date of copyright restoration is January 1, 1996. 60 FR 7793 (Feb. 9, 1995). President Clinton has confirmed that the date on which the obligations of the TRIPs Agreement will take effect for the United States is January 1, 1996. Proclamation No. 6780, 60 FR 15845 (Mar. 27, 1995).

#### II. The Copyright Office's Responsibilities

Although copyright restoration is automatic for eligible works, the URAA charged the Office with establishing regulations to govern the filing of Notices of Intent to Enforce (NIEs) restored copyrights and the registering of copyright claims in restored works by no later than October 1, 1995.

The Act also requires the Office to publish a list in the Federal Register

identifying restored works and their ownership where NIEs have been filed with the Office. The Office must also maintain a list containing all NIEs for inspection and copying by the public.

#### *A. Notices of Intent To Enforce*

##### 1. Notification of Reliance Party

The URAA directs the owner of a restored work to notify reliance parties if the owner of the rights in a restored work plans to enforce those rights. A reliance party is typically a business or individual who, relying on the public domain status of a work, was already using the work prior to December 8, 1994, the date of enactment of the URAA.<sup>2</sup> The URAA authorizes the owner of a right in a restored work either to provide actual notice by serving a NIE directly on a reliance party or to provide constructive notice through the filing of a NIE with the Copyright Office.

##### 2. Effective Filing Date

A work whose source country is a member of the Berne Convention or the World Trade Organization on January 1, 1996, is restored on that date. The owner of such a work may file a NIE concerning that work between January 1, 1996, and December 31, 1997. The Office will publish the first listing of NIEs no later than May 1, 1996, and will publish lists at regular four-month intervals for a period of two years thereafter.

In the case of works from any source country which became eligible for restoration under the URAA after January 1, 1996, owners of such works may file NIEs with the Copyright Office for a two year period starting from the date that country became eligible. The Office will also publish a list of NIEs as detailed above, for works from any of those countries, but the time frame for such lists will be measured from the date a particular country becomes eligible.

##### 3. Effect of Notice on Reliance Party

A reliance party has a twelve-month period to sell off previously manufactured stock, to publicly perform or display the work, or to authorize others to conduct these activities. This period begins when the owner of a restored work notifies the reliance party that the owner is enforcing copyright in the identified work. The date runs from

<sup>2</sup>This is true for the great majority of works. However, for works from any country which was not eligible under the URAA as of December 8, 1994, reliance parties would be those using the work before the date on which that country becomes an eligible country by joining Berne, the WTO, or as a result of a Presidential proclamation.

either the date of publication in the Federal Register identifying the work or receipt of actual notice. If Notice of Intent to Enforce a Restored Copyright is provided both by publication in the Federal Register and service on the reliance party, the period runs from whichever date is the earlier, the date of Federal Register publication or service of actual notice. All reliance parties, except those who created certain derivative works, must cease using the work at the end of the twelve-month period unless they reach a licensing agreement with the copyright owner for continued use of the restored work.

#### *B. Registration of Copyright Claims in Restored Works*

The second filing that the owner of a restored work may choose to make with the Copyright Office is an application for registration of a copyright claim. Copyright registration is voluntary; the URAA directs the Office to have procedures for such registration, but it does not require owners of the restored works to register. Although the owner of a work not considered a Berne work as defined in 17 U.S.C. 101 must obtain or seek registration for a work before he or she can bring a copyright infringement action, the owner of rights in a Berne work does not have to register before initiating suit.<sup>3</sup>

It is true that the holder of a copyright certificate of registration may secure some procedural advantages in litigating a copyright suit based on the effective date of registration. If registration is made before or within 5 years of publication, it will establish prima facie evidence in court of the validity of the copyright and of the facts stated in the certificate; and if registration is made within 3 months after publication of the work or prior to an infringement of the work, statutory damages and attorney's fees will be available to the copyright owner in court actions. Otherwise, only an award of actual damages and profits is available to the copyright owner.

#### III. The Comments

##### *A. Comments Submitted*

The Copyright Office sought public comment concerning the implementation of the URAA both prior to and after publication of its Notice of Proposed Rulemaking (NPRM). The Office first published a notice inviting interested parties to submit written comments and/or to attend a public meeting held at the Copyright Office on March 20, 1995, to discuss issues

<sup>3</sup>It would seem that this exception would apply only to works that meet the definition of a "Berne Convention work" in 17 U.S.C. 101.

and Artistic Works (Sept. 9, 1886, revised in 1908, 1928, 1948, 1967, 1971), hereinafter cited as the Berne Convention.

related to NIEs and registration of restored works. 60 FR 7793 (Feb. 9, 1995). The Office sent this notice to over ninety authors rights organizations and industry groups, as well as 182 foreign government agencies with copyright authority, to give them the opportunity to respond. Approximately forty individuals attended the meeting, including representatives from authors' rights organizations, museums, the publishing industry, the film industry, and the computer software industry.<sup>4</sup> Fifteen written comments were submitted. The Office considered all of these views as it developed proposed procedures for the filing of NIEs and the registering of copyright claims in restored works. On July 10, the Office published proposed regulations in the Federal Register. 60 FR 35522 (July 10, 1995).

In the Notice of Proposed Rulemaking, the Office invited interested parties to submit written comments on the proposed regulations. The Office received comments from the following parties: The Association of American Publishers (AAP); Irwin Karp; Janine Lorente, for Société des Auteurs et Compositeurs Dramatiques (SACD); Nancy McAleer, for Thomson & Thomson; Bill Patry; David Pierce; Linda Shaughnessy, for AP Watt Ltd. Literary Agents; Ellen Theg, for International Television Trading Corp.; and Richard Wincor, of Coudert Brothers.

The Office notes that some of the comments received in response to the NPRM had already been addressed, and some called for minor clarifications that have been made to the final regulations. Other comments, whether raised for the first or second time, raise substantive issues that are discussed below.

### *B. Issues Related to Notices of Intent To Enforce*

#### 1. Formality

Ms. Shaughnessy stated that since copyright restoration is to occur automatically, the procedures for filing NIEs are exceptionally onerous. She asserted it should be sufficient to file one NIE for all of the titles of one author. Ms. Shaughnessy illustrated her point by noting that she will be filing for 73 authors, but there will be hundreds of titles involved. Comment 3. Ms. Lorente asserted that the NIE is a formality in violation of at least the spirit of Berne and that because reliance

parties are free to continue to exploit restored works in the United States unless a NIE is filed, an author cannot exercise his or her rights in the restored work automatically. Comment 5, at 1.

The Copyright Office again emphasizes that the restoration of copyright in certain foreign works considered in the public domain in the United States creates a conflict between reliance parties' and copyright owners' legitimate concerns. Reliance parties have invested capital and labor in the lawful exploitation of public domain property; the sudden restoration of copyright divests them of these investments. Without some provision addressing this potential loss, there could be challenges based on the "taking" clause of the Fifth Amendment of the U.S. Constitution. On the other hand, it is important that the United States restore copyright protection in certain foreign works. The United States arguably failed to conform its law fully to the Berne Convention in 1989 when it declined to interpret Article 18(1) on restoration<sup>5</sup> as being mandatory. The U.S. Justice Department in its review of the URAA legislation concluded that under existing precedents interpreting the Fifth Amendment, the Notice of Intent to Enforce the Restored Copyright avoided an unconstitutional "taking."<sup>6</sup> Thus, the Justice Department considered these provisions as critical.

We believe that such a filing is not inconsistent with the Berne Convention because Article 18(3)<sup>7</sup> of the Berne Convention specifically permits member nations to determine "conditions" for applying the principles of restoration. Copyright restoration occurs automatically; the URAA merely creates a narrow set of conditions requiring notification to reliance parties. Moreover, the information sought on the NIEs is calculated to assist in the voluntary licensing of the restored work. The decision of Congress to enact these provisions is, therefore, supported by

<sup>5</sup>This Convention shall apply to all works which, at the moment of its coming into force, have not yet fallen into the public domain in the country of origin through the expiry of the term of protection. Berne Convention art. 18(1)(Paris text).

<sup>6</sup>See Memorandum from Chris Schroeder, Counsellor to the Assistant Attorney General, Office of Legal Counsel, United States Dept. of Justice to Ira S. Shapiro, General Counsel, USTR, on Whether Certain Copyright Provisions in the Draft Legislation to Implement the Uruguay Round of Multilateral Trade Negotiations Would Constitute a Taking Under the Fifth Amendment (July 29, 1994).

<sup>7</sup>The application of this principle shall be subject to any provisions contained in special conventions to that effect existing or to be concluded between countries of the Union. In the absence of such provisions, the respective countries shall determine, each in so far as it is concerned, the conditions of application of this principle. Berne Convention art. 18(3) (Paris text).

the legitimate interests of both reliance parties and copyright owners, by constitutional considerations, and by Article 18(3) of the Berne Convention.

The Office has tried, however, to make the procedures for filing NIEs practical, realizing that too detailed requirements would burden the owner and that too general ones would serve neither the owner nor the user of the restored work.

The Office also notes that the URAA makes such filings less onerous by permitting the owner to notify all reliance parties of a restored work by filing in one central place, the Copyright Office. Only if the owner does not file with the Copyright Office within the appropriate time period, as detailed above, must the owner provide actual notice to each user of a restored work in order to enforce rights.

The Office is permitting an owner of multiple works to file one NIE if each work is identified by title, has the same author, is owned by the same identified copyright owner or owner of an exclusive right, and the rights owned are the same.

#### 2. Effective Date

Mr. Patry stated that January 1, 1995, is the initial date of copyright restoration. Comment 2, at 1. Mr. Karp asserted that the effective date of 104(A) is December 8, 1994, but that first restoration of copyrights will occur on January 1, 1996. Comment 8, at 2. The Office reaffirms its recognition of January 1, 1996, as the effective date of initial copyright restoration.

#### 3. Minor Errors or Omissions

Ms. Lorente noted that it is often impossible for foreign authors to know the English language title under which a work is being exploited, especially as it is often not a literal translation. She, therefore, asked that a NIE not be invalidated if it gives the literal translation of the foreign title, and later it is determined that the English language title under which the work is exploited is different from the one given in the NIE. Comment 5, at 2.

All information on the NIE other than the original title of the foreign work must be completed in English. The law requires that an English translation of a foreign title be given on the NIE; it does not specify that it be the English title under which the work was exploited.

The Copyright Office will record the NIE under the titles that are provided; ultimately only a court can determine the validity of a NIE. However, the Office believes that a reasonable construction of the statute's

<sup>4</sup>A copy of all written comments and a summary of the meeting can be found in the Public Information Office of the Copyright Office, Room LM-401, James Madison Memorial Building, Washington, D.C.

requirements would permit good faith discrepancies in the English translation.

Furthermore, the URAA allows a party who has filed a NIE with the Copyright Office to correct minor errors or omissions by further notice at any time after the NIE is filed. The procedures and fees are the same for filing a NIE which corrects a previously filed NIE, except that the party making the correction should refer to previous NIE's volume and page number in the Copyright Office Documents Records, if known, on the corrected NIE.

#### 4. Additional Information

The AAP asked the Office to require copyright owners to expand on the information contained in the NIEs, such as the format on which first the work was fixed (film, disk, etc.), contributors (editors, publishers, or director, animator, screenwriter, cinematographer, etc.) and for photographs, collections, etc. a description (material/subjects, organization, and/or classification). The AAP also asked the Office to request an e-mail address, names and addresses of any agents, representatives, or collecting societies that can serve as licensing authorities. The AAP suggested that the Office consider incentives such as fee discounts, for those providing more complete information. Comment 7, at 6-8. Ms. Theg asked that the year of creation be included in the NIE instead of the year of publication, since she believed it to be more consistently available. Comment 9, at 2.

The Office has incorporated some of the AAP's suggestions into the NIE format and hopes it has struck an appropriate balance in its NIE by requesting information helpful to reliance parties, while not burdening the filer of the NIE with lengthy and detailed suggested information.

#### 5. Accessible and Useful Public Record

The URAA requires the Copyright Office to publish the titles and owners of restored works in the Federal Register. Since publication in the Federal Register is costly and the parties indicated that such information would not be as accessible as information made available via the Internet, the Office is limiting the information published in the Federal Register to what the law requires. Much of the information contained in the NIE will be available on COPICS, the Copyright Office's automated database of registrations and recorded copyright transfers and other documents. These records may be accessed by the public on terminals in the Copyright Office at

the Library of Congress and are also available via the Internet.

Since Internet access is not universal, Ms. Lorente asked that other means of getting information about NIEs, including written inquiries to the Copyright Office, should not be excluded. Comment 5, at 3. The AAP stated that it would be useful if the database could be searched in directories that listed all works restored in a particular country of origin. Comment 7, at 11. The AAP also asked that each work/title be given in a separate entry in the database. Comment 7, at 9.

Traditional search methods will continue to be available; NIEs may be searched in the COPICS database under the name of the owner, the titles it contains, as well as the names of the authors, if given. Although the Office will not index works by country of origin in the COPICS database or provide separate entries in the database for multiple works listed on one NIE, each work can be easily identified since the database is searchable by title, author, and the owner or owner of an exclusive right.

Finally, though online access will be the primary means for providing this information to the public, upon request the Copyright Office staff will search the records at the rate of \$20 for each hour or fraction thereof and furnish a written report. Search requests should be sent to the Reference and Bibliography Section, Copyright Office, Library of Congress, Washington, D.C. 20559-6000. In addition, individuals may come to the Office and do their own search free of charge.

#### 6. Filing Fee

Ms. Lorente stated that restoration of copyright should be automatic, and without a fee, comment 5, at 3, and Ms. Shaughnessy asked that only one fee be charged for all the works of an author. Comment 3.

The Office notes that all of the works involved have been considered in the public domain in the United States. The URAA provides that restoration of eligible works is automatic, and a NIE may be filed directly on a reliance party. However, a notice which is effective against all reliance parties may be filed with the Copyright Office. The Office must examine and record that notice, issue an acknowledgement, create a catalog entry that includes among other things all the titles, publish the information in the Federal Register, and maintain the online catalog of the information. The URAA gives the Office authority to fix reasonable fees based on these costs.

The Office realizes that requiring a filing on each work of an author will be onerous and we will permit multiple works meeting the criteria described in our regulations to be filed on one notice for a lesser fee.

#### 7. Acknowledgement

Ms. Lorente, Mr. Pierce and Ms. Theg all asserted that it is essential that the Copyright Office confirm the filing of a NIE. Ms. Lorente stated that it is very important that an author or agent have a document providing that he or she has complied with the URAA's provisions. See comment 5, at 2; comment 6, at 1; and comment 9, at 3. Ms. McAleer stressed that the acknowledgement of the recording of a NIE is an essential service because of the possibility that the NIE may be misplaced, causing its publication in the Federal Register to be delayed. Comment 4.

The Office will mail an acknowledgement of recordation to the filer of a NIE, including the date of receipt, the volume and page on which the NIE is recorded, and the anticipated date of publication in the Federal Register. The Office will not issue a certificate of recordation. Completed recordations will appear in the COPICS database and the Federal Register.

#### 8. Transfers

Mr. Pierce asked that the Office require NIE filers, other than the author, to reference documents of transfer by date, parties and rights transferred, if any. He stated that this would decrease fraud and be less burdensome than filing the agreements with the Documents Unit of the Copyright Office. Comment 6, at 2.

While the Copyright Office agrees that such a requirement might be useful, it cannot adopt this requirement since it is not authorized by the URAA.

#### 9. Federal Register Publication

The AAP agreed that, compared to the online database, the lists published in the Federal Register would be of secondary importance. AAP suggested, however, that the Federal Register entry also include the name of the author if possible. Comment 7, at 11.

In order to minimize costs, the Office has concluded that only the minimum information (title, name of the first owner or owner of an exclusive right identified on the NIE), will be included in the list of NIEs published in the Federal Register.

### C. Issues Related to Registration of a Restored Work

#### 1. Simultaneous Registration

Ms. Lorente asserted that registration is a second formality, and asked for simultaneous filing of NIEs and registration of copyright claims. She also argued both should be automatic and at no additional cost. Comment 5, at 2. Ms. Theg asked that the application for registration be modified to include the additional information requested in the NIE so that the NIE filing requirements could be satisfied at the time of making an application for registration. Comment 9, at 1.

As discussed earlier, procedures permitting the copyright registration of restored works are not formalities in violation of the Berne Convention. Registration is entirely voluntary for Berne works since copyright registration of restored works is not a prerequisite for the filing of a copyright infringement action. Registration of a claim in a work involves significant additional work and by law requires a fee. The Office has, however, attempted to keep the processing work and the fees to a minimum.

#### 2. New URAA Related Registration Procedures

Mr. Pierce observed that registration, especially of motion pictures, is often very burdensome for foreign works, because of the difficulty in determining original publication dates and in submitting a copy of the work as first released. He concluded that applications will be filed for only a small percentage of the works unless the Office considers adopting more liberal deposit requirements such as accepting PAL, SECAM, VHS formats or written descriptions, allowing the registration of related works with multiple publication dates on one application, accepting approximate publication dates, and accepting a previously submitted deposit instead of requiring a new deposit. Comment 6, at 2. Ms. Theg asked that deposit requirements be waived entirely. Comment 9, at 2.

On the other side, the AAP questioned the necessity for changes in the existing registration and recordation systems. If such changes are made, the AAP asserted that they should not create precedent for other registration and deposit practices. The AAP also questioned the need for procedures allowing blanket exemptions in some instances for depositing materials, accepting descriptive materials instead of a copy of the work, and allowing certain collections such as photos or TV series to be given a single identifying

group name or title. The AAP is concerned that these procedures will make it difficult for reliance parties to identify restored works and comply with the law. The AAP asked that the Office instead deal with special situations on a case-by-case basis. Comment 7, at 12-16.

The procedures developed for the registration of copyright claims for restored works must both balance the needs of applicants for copyright registration, reliance parties, the public, and the Copyright Office and also establish a system that will be feasible administratively and elicit necessary information. As indicated in our final regulations, these new procedures apply only to works restored under the URAA and NAFTA; they thus have no precedential effect on other filings.

#### 3. Claimant for Registration

Mr. Patry noted that the applicable statutory language relating to the filing of NIEs permits the "owners of restored copyright or the owner of an exclusive right therein" to file a NIE, while the URAA statutory language covering registration indicates that "owners of restored copyrights" may apply for copyright registration. He asserted the statute's failure to mention the owner of an exclusive right in connection with registration means that only an author may file a registration. Comment 2, at 1-2.

The Office agrees that the restored copyright vests initially in the author as determined by the law of the source country of the work. A work, however, is registered in the name of a claimant. 17 U.S.C. 409. "Claimant" is a term of art defined in existing Copyright Office regulations, as either the author of a work or a person or organization that has obtained ownership of all rights under the copyright initially belonging to the author. 37 CFR 202.3(a)(3). Thus, an owner of only an exclusive right would not be permitted to file an application in his or her own name as the copyright claimant, although he or she could submit an application. While the URAA authorizes the Office to adopt regulations permitting owners of restored copyrights to file for registration of the restored copyright, there is nothing in the URAA to suggest that parties who register a restored work are any different from those under existing copyright law and regulations. Moreover, it seems essential to retain the concept of claimant since authors may no longer be alive.

#### 4. Foreign Law

The AAP stated that since URAA registrations may create legal

presumptions as to the validity of the copyright and the facts stated on the registration certificate, the Office should question an applicant's determination of foreign law issues. Comment 7, at 15. Mr. Karp asserted that since foreign law questions will arise with respect to many issues related to rights restored, including initial ownership, the Office should accept multiple NIEs or registrations for the same work. Comment 8, at 2.

The Copyright Office will accept such multiple, and possibly adverse, NIEs and registrations for the same work. One of the more difficult issues facing the Office is to what extent foreign law issues should be raised in the registration process. Section 104A(b) of the Act provides: "A restored work vests initially in the author or initial rightholder of the work as determined by the law of the source country of the work." Determining the appropriate source country and the applicable foreign law is a question that must ultimately be resolved by a court. At most, the Office could simply question whether or not an author was in fact the author under the law of the source country. The applicant's answer would have to be accepted. The Office does not, therefore, plan to question an applicant's determination of foreign law issues.

#### IV. Procedures for Notices of Intent To Enforce

A Copyright Office task force has been meeting for several months to discuss issues related to establishing regulations for URAA filings. The Office also carefully considered the comments made at the public meeting and those submitted by interested parties in response to the Notice of Policy Decision and Public Meeting and the Notice of Proposed Rulemaking. Most of the commentators supported a detailed NIE rather than one limited to the minimal information required by the statute. Based on those comments, the Office is requesting more information from the filer of a NIE than required under the URAA. As provided in the statute, this additional information will not affect the validity of the notice. Additional information such as the identity of the author is essential, however, for efficient and timely identification of a specific work where enforcement of copyright is sought. The additional information will also facilitate the licensing of uses of restored works. Therefore, the Office urges those parties who are filing NIEs to provide as much of this additional information as possible.

## A. Format for NIEs

### 1. Constructive Notice

The Copyright Office will not publish NIE forms; however, a suggested format for NIEs to be filed with the Office is included in the Appendix below. This format is available over the Internet and can be downloaded for use as a form. The suggested format requests information required by the statute and optional information which is extremely useful.

### 2. Actual Notice

Those parties choosing to serve actual Notice of Intent to Enforce a Restored Copyright on the reliance party should note that the URAA requires additional information. Therefore, if they use the Copyright Office's NIE format as a guide for the actual notice, it will be incomplete unless the additional information specified is added. The URAA specifies:

Notices of Intent to Enforce a Restored Copyright served on a reliance party shall be signed by the owner or the owner's agent, shall identify the restored work and the work in which the restored work is used, if any, in detail sufficient to identify them, include an English translation of the title, any other alternative titles known to the owner by which the work may be identified, the use or uses to which the owner objects, and an address and telephone number at which the reliance party may contact the owner. If the notice is signed by an agent, the agency relationship must have been constituted in writing and signed by the owner before service of the notice.<sup>8</sup>

104A(e)(2)(B) of the URAA. Actual notices may be served on a reliance party at any time after the work is restored.

### 3. Who may file a Notice of Intent To Enforce?

A NIE may be filed by someone who has the authority to sign it. The statute says that the NIE must be signed by the owner or the owner's agent. It can also be signed by the owner of any exclusive right in the restored copyright. As noted in the URAA and emphasized in the certification requirement, an agent cannot sign a NIE unless the agency relationship was constituted in writing signed by the owner before the notice is filed. 104A(e)(1)(A)(i) of the URAA.

## B. Filing Fee

The filing fee is 30 U. S. dollars<sup>9</sup> for a NIE covering one work; for a NIE covering multiple works the fee is \$30

for the first work, plus one dollar for each additional work. This fee includes the cost of an acknowledgement of recordation which will be mailed to the filer after the Copyright Office records the NIE. The regulations provide special instructions for payment of the filing fee, including payment by credit card. These instructions must be followed in order to permit processing of the fee. In addition, the filer of a NIE must insure that sufficient funds are available for payment. Insufficient fees could delay the effective date of notice.

For all URAA filings, both recordation of a NIE and registration of a restored work, the Copyright Office will accept Visa, Master Card and American Express credit cards to facilitate payment in U.S. dollars. Payment by credit card is, however, available only for URAA filings.<sup>10</sup>

## C. Certification

The Office requires the filer of a NIE to sign a certification statement at the end of the document filed indicating that the information given is correct to the best of his or her knowledge. The URAA explicitly states that any materially false statement knowingly made with respect to any restored copyright identified in any Notice of Intent shall make void all claims and assertions made with respect to such restored copyright. 104A(e)(3) of the URAA.

## D. Mailing Address

Time is critical with processing NIEs, and it is, therefore, important that URAA mail not come in with regular Copyright Office mail. All NIEs should be mailed to: URAA/GATT, NIEs and Registrations, P.O. Box 72400, Southwest Station, Washington, D.C. 20024, USA.

## V. Procedures for Registering Copyright Claims in Restored Works

The URAA raises a number of unique considerations regarding the registration of copyright claims in restored works. First, a number of technical requirements, many of which are contained in the definition of "restored work," govern whether a foreign work is subject to automatic restoration under the URAA. In many cases applicants seeking registration will be foreign claimants who are unfamiliar with the registration procedures in the United States Copyright Office. In addition, communication over technical issues

may be difficult. Finally, virtually all of the restored copyrights will be older works; and in some cases, submitting a copy or phonorecord of the work will be a problem.

The Copyright Office weighed all of these considerations before developing a procedure for registering copyright claims in restored works. The Office has adopted a simplified procedure, which will still maintain the integrity of the public record and adhere to the provisions of the existing copyright law and the URAA.

The Office will register a claim to United States copyright in any work for which copyright protection is restored by the URAA, even if a registration was previously made before the work entered the public domain in this country. The Office will also register a claim for any work previously registered where the Office originally advised the copyright claimant that there was some doubt concerning compliance with the formal requirements of the law.

## A. Registration Forms

Because the URAA creates unique eligibility requirements, the Copyright Office concluded that it should create two new registration forms and a continuation page specifically designed to obtain the information necessary for a GATT registration made under the URAA. They are Form GATT, Form GATT/GRP and Form GATT/CON. The Form GATT covers registration of individual restored works and restored works published under a single series title, Form GATT/GRP covers registration of groups of related restored works under the conditions set forth in the regulations, and the Form GATT/CON is a page providing additional space and may be used with either of the GATT application forms.

## B. Deposit Required

In recognition of the difficulty some applicants may have in submitting a deposit of an older work "as first published," the Office has established special deposit regulations for URAA restored works. These regulations permit a deposit of other than the first published edition of the work, if absolutely necessary; applicants should keep in mind, however, that the deposit serves as a crucial part of the public record, and it is their interest to make a complete deposit.

## C. Filing Fee

The filing fee for registration is \$20, since the Copyright Office believes the work in administering the registration procedure for restored works will be roughly comparable to general

<sup>8</sup>Emphasis added to show additional requirements for actual notice.

<sup>9</sup>All references to charges will be in terms of U.S. dollars.

<sup>10</sup>Acceptance of credit cards for URAA filings will serve as a test, however, by which the Office can determine at a later date the feasibility of accepting credit cards for other registrations and recordations.

registration procedures. In addition, the regulations contain special group registration options which will permit the registration of:

(1) A group of works published under a single series title. Form *GATT* should be used; the fee is \$20 for up to a calendar year's worth of episodes, installments, or issues published under the same single series title; and

(2) A group of at least two, but up to ten related individual works published within the same calendar year. Form *GATT/GRP* should be used, the fee is ten dollars per individual work, that is between \$20–\$100 per application.

The registration regulations contain special instructions for payment of the filing fee, including payment by credit card.

#### D. Mailing Address

All *GATT*/URAA applications for registration should be mailed to: URAA/*GATT*, NIEs and Registrations, P.O. Box 72400, Southwest Station, Washington, DC 20024, USA.

#### VI. NAFTA

Exactly a year before the URAA was signed into law, Congress enacted the North American Free Trade Agreement Implementation Act (NAFTA) of December 8, 1993, adding a new section 104A to the Copyright Code that allowed copyright restoration in certain Mexican and Canadian works. See generally, Federal Register notices leading to the implementation of NAFTA, 59 FR 1408 (Jan. 10, 1994); 59 FR 12162 (Mar. 16, 1994); and 59 FR 58787 (Nov. 15, 1994). Although Congress modeled the URAA provisions on NAFTA, there are significant differences. For example, under the URAA, copyright restoration is automatic; under NAFTA it was not. Moreover, the URAA requires an English translation of the title as part of the NIE, but NAFTA did not require an English translation for NAFTA statements of intent.

In enacting these two laws, Congress intended the restoration provisions to operate separately from one another. Therefore, works restored under NAFTA are not additionally restored under the URAA. It is clear that Congress intended a new section 104A enacted in the URAA, to replace the NAFTA version of section 104A. Unfortunately, the statutory language in the URAA creates some ambiguities. The recent presidential proclamation clarifies some of these questions. 60 FR 15845 (Mar. 27, 1995).

The regulation governing filings under NAFTA will be amended to reflect a reference to the public law.

This change is made necessary by the deletion of the NAFTA version of section 104A. In addition, §§ 201.33 and 202.12 of the Copyright Office regulations contain provisions clarifying that works already restored under NAFTA do not additionally fall within the provisions of the URAA.

Despite the differences in NAFTA and URAA notice filings, the registration procedures, including deposit preferences, available for URAA restored works are also available for those works restored under NAFTA.

#### List of Subjects

##### 37 CFR Part 201

Cable television, Copyright, Jukeboxes, Literary works, Satellites.

##### 37 CFR Part 202

Claims, Copyright.

In consideration of the foregoing, the Copyright Office amends 37 CFR parts 201 and 202 in the manner set forth below:

#### PART 201—GENERAL PROVISIONS

1. The authority citation for part 201 is revised to read as follows:

Authority: 17 U.S.C. 702.

2. Section 201.31 is amended by revising the first sentence of paragraph (a) to read as follows:

**§ 201.31 Procedures for copyright restoration in the United States for certain motion pictures and their contents in accordance with the North American Free Trade Agreement.**

(a) *General.* This section prescribes the procedures for submission of Statements of Intent pertaining to the restoration of copyright protection in the United States for certain motion pictures and works embodied therein as required by the North American Free Trade Agreement Implementation Act of December 8, 1993, Public Law No. 103–182. \* \* \*

\* \* \* \* \*

3. Section 201.33 is added to read as follows:

**§ 201.33 Procedures for filing Notices of Intent to Enforce a restored copyright under the Uruguay Round Agreements Act.**

(a) *General.* This section prescribes the procedures for submission of Notices of Intent to Enforce a Restored Copyright under the Uruguay Round Agreements Act, as required in 17 U.S.C. 104A(a). On or before May 1, 1996, and every four months thereafter, the Copyright Office will publish in the Federal Register a list of works for which Notices of Intent to Enforce have been filed. It will maintain a list of these

works. The Office will also make a more complete version of the information contained in the Notice of Intent to Enforce available on its automated database, which can be accessed over the Internet.

(b) *Definitions*—(1) *NAFTA work* means a work restored to copyright on January 1, 1995, as a result of compliance with procedures contained in the North American Free Trade Agreement Implementation Act of December 8, 1993, Public Law No. 103–182.

(2) *Reliance party* means any person who—

(i) With respect to a particular work, engages in acts, before the source country of that work becomes an eligible country under the URAA, which would have violated 17 U.S.C. 106 if the restored work had been subject to a copyright protection and who, after the source country becomes an eligible country, continues to engage in such acts;

(ii) Before the source country of a particular work becomes an eligible country, makes or acquires one or more copies of phonorecords of that work; or

(iii) As the result of the sale or other disposition of a derivative work, covered under the new 17 U.S.C. 104A(d)(3), or of significant assets of a person, described in the new 17 U.S.C. 104A(d)(3) (A) or (B), is a successor, assignee or licensee of that person.

(3) *Restored work* means an original work of authorship that—

(i) Is protected under 17 U.S.C. 104A(a);

(ii) Is not in the public domain in its source country through expiration of term of protection;

(iii) Is in the public domain in the United States due to—

(A) Noncompliance with formalities imposed at any time by United States copyright law, including failure of renewal, lack of proper notice, or failure to comply with any manufacturing requirements;

(B) Lack of subject matter protection in the case of sound recordings fixed before February 15, 1972; or

(C) Lack of national eligibility; and

(iv) Has at least one author or rightholder who was, at the time the work was created, a national or domiciliary of an eligible country, and if published, was first published in an eligible country and not published in the United States during the 30-day period following publication in such eligible country.

(4) *Source country* of a restored work is—

(i) A nation other than the United States; and

(ii) In the case of an unpublished work—

(A) The eligible country in which the author or rightholder is a national or domiciliary, or, if a restored work has more than one author or rightholder, the majority of foreign authors or rightholders are nationals or domiciliaries of eligible countries; or

(B) If the majority of authors or rightholders are not foreign, the nation other than the United States which has the most significant contacts with the work; and

(iii) In the case of a published work—

(A) The eligible country in which the work is first published; or

(B) If the restored work is published on the same day in two or more eligible countries, the eligible country which has the most significant contacts with the work.

(c) *Forms.* The Copyright Office does not provide forms for Notices of Intent to Enforce filed with the Copyright Office. It requests that filers of such notices follow the format set out in Appendix A of this section and give all of the information listed in paragraph (d) of this section. Notices of Intent to Enforce must be in English, and should be typed or printed by hand legibly in dark, preferably black, ink, on 8½ by 11 inch white paper of good quality, with at least a one inch (or three cm) margin.

(d) *Requirements for Notice of Intent to Enforce a Copyright Restored Under the Uruguay Round Agreements Act.* (1) Notices of Intent to Enforce should be sent to the following address: URAA/GATT, NIEs and Registrations, P.O. Box 72400, Southwest Station, Washington, DC 20024, USA.

(2) The document should be clearly designated as "Notice of Intent to Enforce a Copyright Restored under the Uruguay Round Agreements Act".

(3) Notices of Intent to Enforce must include:

(i) Required information:

(A) The title of the work, or if untitled, a brief description of the work;

(B) An English translation of the title if title is in a foreign language;

(C) Alternative titles if any;

(D) Name of the copyright owner of the restored work, or of an owner of an exclusive right therein;

(E) The address and telephone number where the owner of copyright or the exclusive right therein can be reached; and

(F) The following certification signed and dated by the owner of copyright, or the owner of an exclusive right therein, or the owner's authorized agent:

I hereby certify that for each of the work(s) listed above, I am the copyright owner, or the

owner of an exclusive right, or the owner's authorized agent, the agency relationship having been constituted in a writing signed by the owner before the filing of this notice, and that the information given herein is true and correct to the best of my knowledge.

Signature \_\_\_\_\_

Name (printed or typed) \_\_\_\_\_

As agent for (if applicable) \_\_\_\_\_

Date: \_\_\_\_\_

(ii) Optional but essential information:

(A) Type of work (painting, sculpture, music, motion picture, sound recording, book, etc.);

(B) Name of author(s);

(C) Source country;

(D) Approximate year of publication;

(E) Additional identifying information (e.g. for movies: director, leading actors, screenwriter, animator; for photographs or books: subject matter; for books: editor, publisher, contributors);

(F) Rights owned by the party on whose behalf the Notice of Intent to Enforce is filed (e.g., the right to reproduce/distribute/publicly display/publicly perform the work, or to prepare a derivative work based on the work, etc.); and

(G) Telefax number at which owner, exclusive rights holder, or agent thereof can be reached.

(4) Notices of Intent to Enforce may cover multiple works provided that each work is identified by title, all the works are by the same author, all the works are owned by the identified copyright owner or owner of an exclusive right, and the rights owned by the party on whose behalf the Notice of Intent is filed are the same. In the case of Notices of Intent to Enforce covering multiple works, the notice must separately designate for each work covered the title of the work, or if untitled, a brief description of the work; an English translation of the title if the title is in a foreign language; alternative titles, if any; the type of work; the source country; the approximate year of publication; and additional identifying information.

(5) Notices of Intent to Enforce works restored on January 1, 1996, may be submitted to the Copyright Office on or after January 1, 1996, through December 31, 1997.

(e) *Fee.*

(1) *Amount.* The filing fee for recording Notices of Intent to Enforce is 30 U.S. dollars for notices covering one work. For notices covering multiple works as described in paragraph (d)(4) of this section, the fee is 30 U.S. dollars, plus one dollar for each additional work covered beyond the first designated work. For example, the fee for a Notice

of Intent to Enforce covering three works would be \$32. This fee includes the cost of an acknowledgement of recordation.

(2) *Method of Payment.* (i) *Checks, money orders, or bank drafts.* The Copyright Office will accept checks, money orders, or bank drafts made payable to the Register of Copyrights. Remittances must be redeemable without service or exchange fees through a United States institution, must be payable in United States dollars, and must be imprinted with American Banking Association routing numbers. International money orders, and postal money orders that are negotiable only at a post office are not acceptable. CURRENCY WILL NOT BE ACCEPTED.

(ii) *Copyright Office Deposit Account.* The Copyright Office maintains a system of Deposit Accounts for the convenience of those who frequently use its services. The system allows an individual or firm to establish a Deposit Account in the Copyright Office and to make advance deposits into that account. Deposit Account holders can charge copyright fees against the balance in their accounts instead of sending separate remittances with each request for service. For information on Deposit Accounts please write: Copyright Office, Library of Congress, Washington, DC 20559-6000, and request a copy of Circular 5, "How to Open and Maintain a Deposit Account in the Copyright Office."

(iii) *Credit cards.* For URAA filings the Copyright Office will accept VISA, MasterCard and American Express. Debit cards cannot be accepted for payment. With the NIE, a filer using a credit card must submit a separate cover letter stating the name of the credit card, the credit card number, the expiration date of the credit card, the total amount, and a signature authorizing the Office to charge the fees to the account. To protect the security of the credit card number, the filer must not write the credit card number on the Notice of Intent to Enforce.

(f) *Public online access.*

(1) Almost all of the information contained in the Notice of Intent to Enforce is available online in the Copyright Office History Documents (COHD) file through the Library of Congress electronic information system LC MARVEL through the Internet. Except on Federal holidays, this information may be obtained on terminals in the Copyright Office at the Library of Congress Monday through Friday 8:30 a.m. - 5:00 p.m. U.S. Eastern Time or over the Internet Monday - Friday 6:30 a.m. - 9:30 p.m. U.S. Eastern

Time, Saturday 8:00 a.m. - 5 p.m., and Sunday 1:00 p.m. - 5:00 p.m.

(2) Alternative ways to connect through Internet are: (i) use the Copyright Office Home Page on the World Wide Web at: <http://lcweb.loc.gov/copyright>, (ii) telnet to [locis.loc.gov](mailto:locis.loc.gov) or the numeric address 140.147.254.3, or (iii) telnet to [marvel.loc.gov](mailto:marvel.loc.gov), or the numeric address 140.147.248.7 and log in as [marvel](mailto:marvel), or (iv) use a Gopher Client to connect to [marvel.loc.gov](mailto:marvel.loc.gov).

(3) Information available online includes: the title or brief description if untitled; an English translation of the title; the alternative titles if any; the name of the copyright owner or owner of an exclusive right; the author; the type of work; the date of receipt of the NIE in the Copyright Office; the date of publication in the Federal Register; the rights covered by the notice; and the address, telephone and telefax number (if given) of the copyright owner.

(4) Online records of Notices of Intent to Enforce are searchable by the title, the copyright owner or owner of an exclusive right, and the author.

(g) *NAFTA work*. The copyright owner of a work restored under NAFTA by the filing of a NAFTA Statement of Intent to Restore with the Copyright Office prior to January 1, 1995, is not required to file a Notice of Intent to Enforce under this regulation.

Appendix A to § 201.33—Notice of Intent To Enforce a Copyright Restored Under the Uruguay Round Agreements Act (URAA)

1. Title: \_\_\_\_\_  
(If this work does not have a title, state "No title.") OR  
Brief description of work (for untitled works only): \_\_\_\_\_
2. English translation of title (if applicable): \_\_\_\_\_
3. Alternative title(s) (if any): \_\_\_\_\_
4. Type of work: \_\_\_\_\_  
(e.g. painting, sculpture, music, motion picture, sound recording, book)
5. Name of author(s): \_\_\_\_\_
6. Source country: \_\_\_\_\_
7. Approximate year of publication: \_\_\_\_\_
8. Additional identifying information: \_\_\_\_\_  
(e.g. for movies; director, leading actors, screenwriter, animator, for photographs: subject matter; for books; editor, publisher, contributors, subject matter).
9. Name of copyright owner: \_\_\_\_\_  
(Statements may be filed in the name of the owner of the restored copyright or the owner of an exclusive right therein.)
10. If you are not the owner of all rights, specify the rights you own: \_\_\_\_\_  
(e.g. the right to reproduce/distribute publicly display/publicly perform the work, or to prepare a derivative work based on the work)
11. Address at which copyright owner may be contacted: \_\_\_\_\_

(Give the complete address, including the country and an "attention" line, or "in care of" name, if necessary.)

12. Telephone number of owner: \_\_\_\_\_

13. Telefax number of owner: \_\_\_\_\_

14. Certification and Signature: \_\_\_\_\_

I hereby certify that, for each of the work(s) listed above, I am the copyright owner, or the owner of an exclusive right, or the owner's authorized agent, the agency relationship having been constituted in a writing signed by the owner before the filing of this notice, and that the information given herein is true and correct to the best of my knowledge.

Signature: \_\_\_\_\_

Name (printed or typed): \_\_\_\_\_

As agent for (if applicable): \_\_\_\_\_

Date: \_\_\_\_\_

Note: Notices of Intent to Enforce must be in English, except for the original title, and either typed or printed by hand legibly in dark, preferably black, ink. They should be on 8½" by 11" white paper of good quality, with at least a 1-inch (or 3 cm) margin.

## PART 202—REGISTRATION OF CLAIMS TO COPYRIGHT

4. The authority citation for part 202 is revised to read as follows:

Authority: 17 U.S.C. 702.

5. A new § 202.12 is added to read as follows:

### § 202.12 Restored copyrights.

(a) *General*. This section prescribes rules pertaining to the registration of foreign copyright claims which have been restored to copyright protection under section 104A of 17 U.S.C., as amended by the Uruguay Round Agreements Act, Public Law 103-465.

(b) *Definitions*. (1) For the purposes of this section, restored work and source country, have the definition given in the URAA and § 201.33(b) of this chapter.

(2) *Descriptive statement for a work embodied solely in machine-readable format* is a separate written statement giving the title of the work, nature of the work (for example: computer program, database, videogame, etc.), plus a brief description of the contents or subject matter of the work.

(c) *Registration*. (1) *General*. Application, deposit, and filing fee for registering a copyright claim in a restored work under section 104A, as amended, may be submitted to the Copyright Office on or after January 1, 1996. The application, filing fee, and deposit should be sent in a single package to the following address: URAA/GATT, NIEs and Registration, P.O. Box 72400, Southwest Station, Washington, DC 20024, USA.

(2) *GATT Forms*. Application for registration for single works restored to copyright protection under URAA

should be made on Form GATT.

Application for registration for a group of works published under a single series title and published within the same calendar year should also be made on Form GATT. Application for a group of at least two and up to ten individual and related works as described in paragraph (c)(5)(ii) of this section should be made on Form GATT/GRP. GATT/URAA forms may be obtained by writing or calling the Copyright Office Hotline at (202) 707-9100. In addition, legible photocopies of these forms are acceptable if reproduced on good quality, 8½ by 11 inch white paper, and printed head to head so that page two is printed on the back of page one.

### (3) Fee.

(i) *Amount*. The filing fee for registering a copyright claim in a restored work is 20 U.S. dollars. The filing fee for registering a group of multiple episodes under a series title under paragraph (c)(5)(i) of this section is also \$20. The filing fee for registering a group of related works under paragraph (c)(5)(ii) of this section is 10 U.S. dollars per individual work.

### (ii) Method of payment.

(A) *Checks, money orders, or bank drafts*. The Copyright Office will accept checks, money orders, or bank drafts made payable to the Register of Copyrights. Remittances must be redeemable without service or exchange fees through a United States institution, must be payable in United States dollars, and must be imprinted with American Banking Association routing numbers. In addition, international money orders, and postal money orders that are negotiable only at a post office are not acceptable. CURRENCY WILL NOT BE ACCEPTED.

(B) *Copyright Office Deposit Account*. The Copyright Office maintains a system of Deposit Accounts for the convenience of those who frequently use its services. The system allows an individual or firm to establish a Deposit Account in the Copyright Office and to make advance deposits into that account. Deposit Account holders can charge copyright fees against the balance in their accounts instead of sending separate remittances with each request for service. For information on Deposit Accounts please write: Register of Copyrights, Copyright Office, Library of Congress, Washington, DC 20559, and request a copy of Circular 5, "How to Open and Maintain a Deposit Account in the Copyright Office."

(C) *Credit cards*. For URAA registrations the Copyright Office will accept VISA, MasterCard, and American Express. Debit cards cannot be accepted for payment. With the registration

application, an applicant using a credit card must submit a separate cover letter stating the name of the credit card, the credit card number, the expiration date of the credit card, the total amount authorized and a signature authorizing the Office to charge the fees to the account. To protect the security of the credit card number, the applicant must not write the credit card number on the registration application.

(4) *Deposit.*

(i) *General.* The deposit for a work registered as a restored work under the amended section 104A, except for those works listed in paragraphs (c)(4)(ii) through (iv) of this section, should consist of one copy or phonorecord which best represents the copyrightable content of the restored work. In descending order of preference, the deposit should be:

- (A) The work as first published;
- (B) A reprint or re-release of the work as first published;
- (C) A photocopy or identical reproduction of the work as first published; or
- (D) A revised version which includes a substantial amount of the copyrightable content of the restored work with an indication in writing of the percentage of the restored work appearing in the revision.

(ii) *Previously registered works.* No deposit is needed for works previously registered in the Copyright Office.

(iii) *Works embodied solely in machine-readable format.* For works embodied only in machine-readable formats, the deposit requirements are as follows:

- (A) One machine-readable copy and a descriptive statement of the work; or
- (B) Representative excerpts of the work, such as printouts; or, if the claim extends to audiovisual elements in the work, a videotape of what appears on the screen.

(iv) *Pictorial, graphic and sculptural works.* With the exception of 3-dimensional works of art, the general deposit preferences specified under paragraph (c)(4)(i) of this section shall govern. For 3-dimensional works of art, the preferred deposit is one or more photographs of the work, preferably in color.

(v) *Special relief.* An applicant who is unable to submit any of the preferred deposits may seek an alternative deposit under special relief (37 CFR 202.20(d)). In such a case, the applicant should indicate in writing why the deposit preferences cannot be met, and submit alternative identifying materials clearly showing some portion of the copyrightable contents of the restored

work which is the subject of registration.

(vi) *Motion pictures.* If the deposit is a film print (16 or 35 mm), the applicant should contact the Performing Arts Section of the Examining Division for delivery instructions. The telephone number is: (202) 707-6040; the telefax number is: (202) 707-1236.

(5) *Group registration.* Copyright claims in more than one restored work may be registered as a group in the following circumstances:

(i) *Single series title.* Works published under a single series title in multiple episodes, installments, or issues during the same calendar year may be registered as a group, provided the owner of U.S. rights is the same for all episodes, installments, or issues. The Form GATT should be used and the number of episodes or installments should be indicated in the title line. The filing fee for registering a group of such works is \$20. In general, the deposit requirements applicable to restored works will be applied to the episodes or installments in a similar fashion. In the case of a weekly or daily television series, applicants should first contact the Performing Arts Section of the Examining Division. The telephone number is (202) 707-6040; the telefax number is (202) 707-1236.

(ii) *Group of related works.* A group of related works may be registered on the Form GATT/GRP, provided the following conditions are met: the author(s) is the same for all works in the group; the owner of all United States rights is the same for all works in the group; all works must have been published in the same calendar year; all works fit within the same subject matter category, i.e., literary works, musical works, motion pictures, etc.; and there are at least two and not more than ten individual works in the group submitted. Applicants registering a group of related works must file for registration on the Form GATT/GRP. The filing fee for registering a group of related works is ten dollars per individual work.

(d) *Works excluded.* Works which are not copyrightable subject matter under title 17 of the U.S. Code, other than sound recordings fixed before February 15, 1972, shall not be registered as restored copyrights.

Dated: September 25, 1995.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 81

[OR-A-95-01a; FRL-5302-1]

#### Approval and Promulgation of Definition of Areas for Air Quality Planning Purposes; Oregon-Washington

AGENCY: Environmental Protection Agency.

ACTION: Direct-Final rule.

**SUMMARY:** The Environmental Protection Agency (EPA) approves the separation of the Portland, Oregon-Vancouver, Washington interstate carbon monoxide (CO) nonattainment area into two distinct nonattainment areas. The Oregon Department of Environmental Quality (ODEQ) has submitted sufficient technical documentation to adequately assure EPA that Vancouver and Portland are two separate CO airsheds. EPA believes any future problems will be hotspot in nature and therefore, EPA believes the CO national ambient air quality standards (NAAQS) will be protected in each state. This boundary correction will change the boundary description published in the November 6, 1991 Federal Register document.

**DATES:** This action will be effective on November 28, 1995 unless adverse or critical comments are received by October 30, 1995. If the effective date is delayed, timely notice will be published in the Federal Register.

**ADDRESSES:** Written comments should be addressed to: Montel Livingston, SIP Manager, Air & Radiation Branch (AT-082), EPA, Docket OR-A-95-01, 1200 Sixth Avenue, Seattle, Washington 98101. Documents which are incorporated by reference are available for public inspection at the Air and Radiation Docket and Information Center, Environmental Protection Agency, 401 M Street, SW, Washington, D.C. 20460. Copies of material submitted to EPA may be examined during normal business hours at the following locations: EPA, Region 10, Air & Radiation Branch, 1200 Sixth Avenue (AT-082), Seattle, Washington 98101, and Oregon Department of Environmental Quality, 811 S.W. Sixth Avenue, Portland, Oregon 97204-1390.

**FOR FURTHER INFORMATION CONTACT:** Christi Lee, Air and Radiation Branch (AT-082), EPA, Seattle, Washington 98101, (206) 553-1814.

**SUPPLEMENTARY INFORMATION****I. Background**

In the November 6, 1991 Federal Register notice, 56 FR 56847, the Portland-Vancouver area was designated as a nonattainment area for CO. The boundary for the Portland portion of the interstate nonattainment area is the Portland Metro Service District Boundary which includes Clackamas County (part), Multnomah County (part) and Washington County (part). The boundary for the Vancouver portion of the interstate nonattainment area is Clark County (part) Air Quality Maintenance Area (AQMA). The Portland-Vancouver interstate CO nonattainment area is classified as moderate less than or equal to 12.7 parts per million (ppm).

Prior to the boundary being set, the 1990 Clean Air Act required the Governor of each state to submit boundary descriptions for those areas which were to be designated nonattainment. The Governor of Oregon and the Governor of Washington each submitted a letter dated March 15, 1991, that listed and described the nonattainment area boundaries for their respective states. For CO, Oregon listed the Portland Metropolitan Area as nonattainment with the boundary being the Metropolitan Service District (METRO) which surrounds the urban growth boundaries of cities within the greater Portland Metropolitan Area<sup>1</sup>. The Washington letter listed Vancouver as nonattainment with the boundary being the Washington portion of the Portland-Vancouver Interstate AQMA.

In the November 6, 1991, notice EPA identified Portland-Vancouver as an interstate nonattainment area with the Portland portion of the nonattainment area boundary being METRO and the Vancouver portion of the nonattainment boundary being the AQMA (Vancouver portion).

The ODEQ contends that the November 6, 1991, Federal Register notice is in error. The ODEQ has written EPA that it never recommended nor acknowledged an interstate CO nonattainment area or a contiguous boundary with Vancouver, Washington.

EPA considered ODEQ's request, and finds that the designations were properly promulgated. However, EPA acknowledges ODEQ's position in that there are two distinct airsheds that should be separately regulated. EPA requested a technical justification be

submitted by the state of Oregon to demonstrate that the Portland and Vancouver CO airsheds are distinct and that there is an acceptably minimal CO transport between the two cities.

On August 5, 1994, and January 3, 1995, the State of Oregon, through the ODEQ, submitted technical justification which supports the separation of the Portland-Vancouver CO interstate nonattainment area into two distinct nonattainment areas (Portland, Oregon and Vancouver, Washington).

Of significance in EPA's review is that both areas have been successful in attaining the CO standard. Portland has been in attainment of the CO standard since 1990, and Vancouver has been in attainment since 1991. Both cities are currently in the process of preparing CO maintenance plans for redesignation.

**Technical Justification Conclusions**

EPA requested ODEQ submit documentation which demonstrates that the Portland and Vancouver airsheds are distinct, and that the CO NAAQS which have been attained will be maintained despite any differences in the prospective maintenance plans. EPA also requested ODEQ discuss the potential CO impacts of the interstate commute.

To address EPA's technical concerns, ODEQ completed a monitoring data analysis which compared Portland and Vancouver CO data, taking into consideration meteorological impacts (wind direction and wind speed) for pollutant transport. The results of this analysis demonstrated that elevated CO concentrations in either city were not influenced by meteorological transport of the pollutant between the two airsheds.

To further support this conclusion, ODEQ also conducted a statistical analysis which compared Portland and Vancouver CO monitored data to investigate whether a correlation existed between measured concentrations at the Portland and Vancouver monitoring sites. The analysis demonstrated no correlation in measured CO concentrations between the two cities.

In addition, special studies were performed in both Portland (September 1991, the 1994 report is in development) and Vancouver (May 1994) that demonstrated that CO impacts in each area are limited to intersections with steep gradients of decreasing CO concentration away from the intersections.

To address EPA's interstate commuting concerns, ODEQ conducted a CO impact analysis of the interstate commute traffic focusing on high volume intersections. Since vehicles

registered in both nonattainment areas are subjected to essentially identical control strategies (oxygenated fuel, basic I/M), the impact of either the Portland or Vancouver vehicles on the contiguous CO nonattainment areas concentrations is insignificant.

The ODEQ has written EPA of its commitment to providing long-term maintenance of the CO national ambient air quality standard not only in its own jurisdiction but in other contiguous areas. Any future change in the CO control strategies for either Portland or Vancouver will be addressed in their future CO redesignation/maintenance plans which have to be evaluated and approved by EPA.

The technical justification submitted to EPA contains an adequate demonstration that Vancouver's and Portland's airsheds are distinct, relative to CO, and that Oregon and Washington are firmly committed to air quality maintenance in both Portland and Vancouver despite potential differences in the prospective maintenance plans.

**II. This Action**

With this action EPA is approving the technical correction to the CO nonattainment boundary description for Portland-Vancouver under section 110(k)(6). EPA believes that any future problems will be hotspot in nature and therefore EPA believes that the CO NAAQS will be protected in each state. This action will separate the Portland-Vancouver Interstate CO nonattainment area into two separate nonattainment areas; Portland, Oregon and Vancouver, Washington.

In separating the Portland-Vancouver nonattainment area, the METRO boundary will be recognized as the CO nonattainment boundary for Portland, and the Vancouver portion of the AQMA will remain Vancouver's CO nonattainment boundary. Both areas will remain classified as moderate nonattainment (less than or equal to 12.7 ppm) for CO. Vancouver's design value will remain at 10.0 ppm and Portland's design value has been determined to be 9.8 ppm.

The separated Portland, Oregon and Vancouver, Washington CO nonattainment designations are listed under "Designated Area" in the table at the end of this rulemaking action. The additional language is highlighted for easy reference.

**III. Administrative Review**

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603

<sup>1</sup> The Portland portion of the Air Quality Maintenance Area had been designated as a CO nonattainment area prior to the 1990 Clean Air Act Amendments, 43 FR 8962, (March 3, 1978), listed as Portland-Vancouver (Oregon Portion).

and 604. Alternatively, EPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

SIP approvals under section 110 and subchapter I, Part D of the CAA do not create any new requirements, but simply approve requirements that the state is already imposing. Therefore, because the federal SIP-approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the federal-state relationship under the CAA, preparation of a regulatory flexibility analysis would constitute federal inquiry into the economic reasonableness of state action. The CAA forbids EPA to base its actions concerning SIPs on such grounds. *Union Electric Co. v. U.S.E.P.A.*, 427 U.S. 246, 256-66 (S.Ct. 1976); 42 U.S.C. 7410(a)(2).

The EPA is publishing this action without prior proposal because the Agency views this as a noncontroversial amendment and anticipates no adverse comments. However, in a separate document in this Federal Register publication, the EPA is proposing to approve the SIP revision should adverse or critical comments be filed. This

action will be effective November 28, 1995 unless, within 30 days of its publication, adverse or critical comments are received.

If the EPA receives such comments, this action will be withdrawn before the effective date by publishing a subsequent notice that will withdraw the final action. All public comments received will be addressed in a subsequent final rule based on this action serving as a proposed rule. The EPA will not institute a second comment period on this action. Any parties interested in commenting on this action should do so at this time. If no such comments are received, the public is advised that this action will be effective November 28, 1995.

The EPA has reviewed this request for revision of the federally-approved SIP for conformance with the provisions of the 1990 Clean Air Act Amendments enacted on November 15, 1990. The EPA has determined that this action conforms with those requirements.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic and environmental factors and in relation to relevant statutory and regulatory requirements.

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United

States Court of Appeals for the appropriate circuit by November 28, 1995. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2), 42 U.S.C. 7607(b)(2)).

List of Subjects in 40 CFR Part 81

Environmental protection, Air pollution control, National parks, Wilderness areas.

Dated: September 22, 1995.  
Carol M. Browner,  
U.S. EPA Administrator.

Part 81, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

1. The authority citation for part 81 continues to read as follows:

Authority: 42 U.S.C. 7401-7671q.

2. Section 81.338 is amended by removing the entry for "Portland-Vancouver Area" and adding the entry for "Portland Area" in "Oregon-Carbon Monoxide" table to read as follows:

**§ 81.338 Oregon.**

\* \* \* \* \*

[IL-64-2-5807; FRL-5306-9]

**Hazardous Waste Treatment, Storage, and Disposal Facilities and Hazardous Waste Generators; Organic Air Emission Standards for Tanks, Surface Impoundments, and Containers**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule; stay.

**SUMMARY:** The EPA is issuing a stay subject to conditions for air standards applicable to hazardous waste treatment, storage, and disposal facilities (TSDF). This stay is applicable to tanks and containers used for the management of certain hazardous wastes generated by organic peroxide manufacturing processes. Certain organic peroxide manufacturing wastes are inherently unstable and can not safely be confined in closed units or systems. Therefore, the EPA is staying the applicability of the subpart CC technical requirements for units managing these specific organic peroxide compounds.

**EFFECTIVE DATE:** December 6, 1995.

**ADDRESSES:** Docket. Docket entries cited in this notice may be found in RCRA docket number F-94-CE2A-FFFFF. Other RCRA docket numbers that pertain to the final rule are F-91-CESP-FFFFF, F-92-CESA-FFFFF, and F-94-CESF-FFFFF. The docket is available for inspection at the EPA RCRA Docket Office (5305), Room 2616, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

**FOR FURTHER INFORMATION CONTACT:** For further information about this stay contact the RCRA Hotline at (703) 412-9877 or toll-free at 1-800-424-9346.

**SUPPLEMENTARY INFORMATION:**

I. Background

On December 6, 1994, the EPA published in the Federal Register (59

FR 62896) under authority of the Resource Conservation and Recovery Act (RCRA), as amended, standards requiring the use of air emission controls on certain tanks, surface impoundments, and containers at hazardous waste treatment, storage, and disposal facilities (TSDF). These standards are codified in 40 CFR parts 264 and 265 under subpart CC (referred to as the "subpart CC standards").

A major manufacturer of organic peroxide products has expressed its concern to the EPA regarding the availability of air emission controls which could safely be used on tanks and containers that manage certain types of organic peroxides. Certain organic peroxides are temperature sensitive compounds that are subject to spontaneous, rapid decomposition under certain conditions. The company maintains that use of the air emission controls required under the subpart CC standards on certain tanks and containers at their organic peroxides manufacturing facilities would have the potential to significantly increase the risk of explosion and fire. An inherent risk is created because these units manage a variety of organic peroxide wastes, including intermittent batches or streams containing organic peroxides that potentially undergo spontaneous, rapid thermal decomposition and hydrolysis at or below ambient temperatures.

A variety of organic peroxide products are manufactured in the United States for use by the plastics and allied industries. Typically, these organic peroxide compounds serve as initiators (catalysts) and resin hardeners in the manufacture of widely used polymer plastics (e.g., polystyrene, polyvinyl chloride, polyethylene, acrylic resins). At some organic peroxide manufacturing facilities, the production processes may generate hazardous wastes containing organic peroxides that are placed in waste management units subject to the subpart CC standards.

The manufacture, transport, and use of organic peroxide products may require implementing special safety

precautions to avoid the spontaneous, rapid decomposition of certain organic peroxides. The rate at which these organic peroxides decompose is a function of temperature. Individual organic peroxide compounds and mixtures of these compounds have different sensitivities to temperature. Some organic peroxide compounds are relatively stable (i.e., do not decompose) at ambient temperatures (e.g., 30 °C). In general, it is not necessary to handle these types of organic peroxides any differently than other organic compounds during normal process operations. Other organic peroxide compounds can undergo spontaneous, rapid thermal decomposition and hydrolysis at temperatures at, or below, ambient temperatures. Once initiated, the self-accelerating thermal decomposition and hydrolysis reactions very rapidly generate large quantities of gaseous organic compounds and oxygen. Confinement of this gaseous mixture in an enclosed vessel (such as a covered tank or ventilation ducts) creates conditions that could result in explosion, detonation, and/or fire. Consequently, handling these types of organic peroxide compounds requires use of precautionary measures to address the possibility of uncontrolled organic peroxide decomposition.

The organic peroxide manufacturer who has raised this issue with the EPA produces a variety of organic peroxide products which are potentially unstable at or below ambient temperatures. The organic peroxide characteristics of the hazardous waste placed in tanks and containers at the company's facilities are highly variable because of the number of different types of organic peroxide products manufactured, the types of manufacturing processes used, and the nature of the operations used to safely handle organic peroxides at this company's facilities. Consequently, at any given time, the organic peroxide composition and concentration in the hazardous waste placed in these tanks and containers could potentially attain proportions initiating the spontaneous organic peroxide decomposition reactions. Unless provisions are made

for the very rapid evacuation of the decomposition gases, an explosion or fire could result in the waste management unit.

Prior to publication of the final subpart CC standards, the EPA received a letter from the company requesting the EPA to identify control technologies that could be safely used to control organic emissions from tanks managing hazardous waste waters that contains organic peroxides (RCRA docket entry F-94-CE2A-0001). The Agency was in the process of revising the draft final subpart CC standards to include a provision for safety venting of tanks and containers. Based on an initial review of the information provided, the Agency considered these safety vent provisions to be adequate to address the concerns raised by the company.

In November 1994, the EPA received a second letter restating the company's safety concerns with respect to implementing the subpart CC standards on tanks and containers at their organic peroxide manufacturing facilities (RCRA docket entry F-94-CE2A-0002). In response to this letter, the EPA met with company representatives on January 11, 1995 (RCRA docket entry F-94-CE2A-S0001). During this meeting, the company representatives stated that certain tanks and containers at its organic peroxide manufacturing facilities may require air emission controls under the subpart CC standards. Several different control equipment approaches for these tanks and containers have been considered by the company for complying with the subpart CC standards. For all cases, the company has concluded that use of the control equipment on the tanks and containers in accordance with the requirements specified in the subpart CC standards would have the potential to significantly increase the risk of explosion and fire at the company's facilities.

## II. Issuance of Stay

The EPA expects that TSDF owners and operators will follow the proper safety procedures appropriate for their particular situations when designing and operating all air emission controls required by the subpart CC standards. In response to comments received at proposal, the EPA added several provisions to the final rule that specifically address special situations when venting of covers and other air emission control equipment is necessary for safety reasons. For example under 40 CFR 264.1084(g) and 40 CFR 265.1085(g), owners and operators are allowed to use pressure relief valves or other types of safety devices on a tank

cover required under the subpart CC standards to address those special situations in which emergency venting of the covered tank is necessary, consistent with good engineering and safety practices, to prevent physical damage or permanent deformation of the tank or cover.

Following the January 11, 1995 meeting with the company, the EPA reviewed the air emission control equipment safety device provisions included in the final subpart CC standards with respect to the special nature of managing hazardous waste that contains organic peroxides with the potential to undergo spontaneous, self-accelerating decomposition reactions at or below ambient temperatures. The EPA recognizes that special precautions must be followed when handling hazardous wastes containing these types of organic peroxides. Tanks and containers used for management of this type of hazardous waste exist at one company's facilities and may exist at other TSDF locations of which the EPA is not yet aware. Some of these tanks and containers potentially could be subject to the subpart CC standards and require the use of air emission controls. The EPA recognizes that certain site-specific circumstances may exist where the provisions in the subpart CC standards allowing the use of safety devices on the air emission controls (as provided by, e.g., 40 CFR 264.1084(g)) may not be adequate to provide a level of safety consistent with good engineering and safety practices for handling organic peroxides, based on the composition of the organic peroxide wastes and the management operations for those wastes. Therefore, the EPA considers it appropriate to issue an administrative stay of the subpart CC standards' applicability, subject to conditions, for those special situations where hazardous waste that contains organic peroxides with the potential to undergo spontaneous, self-accelerating decomposition reactions at or below ambient temperatures are managed at a TSDF in tanks or containers, and for which the facility owner or operator determines that the use of any appropriate air emission controls, as required by the subpart CC standards, on these tanks and containers would create an undue safety hazard.

Based on the information provided to the EPA, the special circumstances requiring the need to issue this stay for these tanks and containers do not occur for TSDF surface impoundments. In particular, the only impoundment receiving these wastes is scheduled to be replaced by tanks before December 8, 1997, the compliance date by which

facilities must install controls on units that were initially in compliance with the subpart CC standards through an implementation plan.

By today's issuance of the stay, the requirements of the subpart CC standards, with the exception of certain recordkeeping requirements, do not apply to TSDF tanks and containers used for management of hazardous waste generated by organic peroxide manufacturing and its associated laboratory operations when the facility owner or operator meets all of the conditions of the stay. This means that, for these specific tanks and containers at a TSDF site, the facility owner and operator is neither required to install and operate the air emission controls specified in the subpart CC standards on the waste management units, nor required to perform waste determinations for the hazardous waste placed in the units provided that the owner or operator satisfies all three conditions of the stay.

The first condition of the stay is that the tank or container must be used to manage hazardous waste from organic peroxide manufacturing processes that produce more than one functional family of organic peroxides, and these organic peroxides are the predominant products manufactured by the process. Further, these organic peroxides can potentially undergo self-accelerating thermal decomposition at or below ambient temperatures and these organic peroxides are the predominate products manufactured by the process. For the purpose of meeting this condition of this stay, "organic peroxide" means an organic compound that contains the bivalent -O-O- structure and which may be considered to be a structural derivative of hydrogen peroxide where one or both of the hydrogen atoms has been replaced by an organic radical.

The second condition of the stay is that the TSDF owner or operator must prepare documentation that explains why installation and operation of air emission controls on the tank or container, as required by the subpart CC standards, would create an undue safety hazard. The specific information that the EPA considers to be necessary to satisfy this condition is listed in § 264.1089(i) and § 265.1090(i) added to the subpart CC standards by today's action (the requirements in § 264.1089(i) applicable to permitted TSDF and in § 265.1090(i) applicable to interim-status TSDF are identical). The stay requires no administrative action by the EPA to take effect at a facility for which the owner or operator claims to satisfy the conditions of the stay. However, EPA officials (or officials from an

authorized State) could question the completeness and adequacy of the information prepared by the TSDF owner or operator to support the stay claim with respect to the requirements of § 264.1089(i) or § 265.1090(i), as applicable to the facility.

The third condition for the stay is that the TSDF owner or operator claiming the benefit of the stay submit a one-time notification of that fact to the appropriate EPA Region or authorized State office. This notice is to state that the TSDF manages hazardous wastes otherwise subject to the subpart CC standards in tanks and containers, but is not subject to those rules by virtue of this administrative stay. The notice must include the name and address of the facility, and must be signed and dated by an authorized representative of the facility owner or operator. This notification is necessary to alert EPA and State officials of the existence of the facility and, thus, provides a means of verifying if the stay conditions have been satisfied. As explained above, the stay is self-implementing; therefore, no administrative action by the EPA is necessary for the stay to apply to a particular TSDF. Thus, the notification does not present facts warranting grant of a stay; rather, it notifies the EPA and State authorities that the stay is being claimed by a TSDF owner or operator.

### III. Administrative Requirements

#### A. Docket

Docket entries cited in this notice may be found in RCRA docket number F-94-CE2A-FFFFF. Other RCRA docket numbers that pertain to the final rule are F-91-CESP-FFFFF, F-92-CESA-FFFFF, and F-94-CESF-FFFFF. The docket is available for inspection at the EPA RCRA Docket Office (5305), Room 2616, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

### IV. Legal Authority

The EPA is issuing this administrative stay pursuant to 5 U.S.C. 705, authorizing administrative agencies to stay administrative action pending judicial review when "justice so requires." See also Rule 18 of the Federal Rules of Appellate Procedure authorizing issuance of administrative stays pending review. (A petition for review has been filed regarding applicability of the subpart CC standards to persons managing hazardous waste containing organic peroxides in tanks and containers.) The EPA believes that issuance of a stay for this type of hazardous waste is needed because the promulgated regulation

could (in the limited circumstances discussed in this notice) make it more dangerous to manage the waste. The stay is needed to prevent such an adverse result. The EPA also believes that the minimal conditions attached to the stay—documentation of the reason why the stay applies plus a one-time notification—are necessary to limit the stay only to the situations warranting relief.

To the extent good cause (pursuant to 5 U.S.C. 553 (b)) is needed to justify the Agency's immediately effective conditioned stay, the EPA believes that it is provided by the need to avoid the risks of explosion that could occur without the stay. In addition, the EPA notes that the general issue of providing a type of safety-override in the rule was addressed during the comment period and in the final rule, so that today's action arises from the notice and comment already provided during the rulemaking.

### V. State Authority

As discussed in the final subpart CC standards (59 FR 62921, December 6, 1994), rules promulgated under RCRA section 3004(n) implement a provision of the 1984 Hazardous and Solid Waste Amendments (HSWA) and consequently take effect immediately in authorized States. The EPA will implement these standards in an authorized State until such a time when the State either: (1) modifies its RCRA program to adopt the rules and receives final authorization from the EPA for the modification; or (2) receives interim authorization from the EPA. *Id.* The EPA views today's conditioned stay as part of the rule, so that a State seeking authorization for the subpart CC standards should include this provision.

#### List of Subjects 40 CFR Parts 264 and 265

Air pollution control, Container, Control Device, Hazardous waste, Incorporation by reference, Inspection, Miscellaneous unit, Monitoring, Reporting and recordkeeping requirements, Standards, Surface impoundment, Tank, Waste determination.

Dated: September 14, 1995.  
Mary D. Nichols,  
*Assistant Administrator for Air and Radiation.*

For the reasons set out in the preamble, title 40, chapter I, parts 264 and 265 of the Code of Federal Regulations are amended as follows:

### PART 264—STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES

1. The authority citation for part 264 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6924 and 6925.

#### Subpart CC—Air Emission Standards for Tanks, Surface Impoundments, and Containers

2. In § 264.1080, paragraph (d) is added to read as follows:

#### § 264.1080 Applicability.

\* \* \* \* \*

(d) The requirements of this subpart, except for the recordkeeping requirements specified in § 264.1089(i) of this subpart, are administratively stayed for a tank or a container used for the management of hazardous waste generated by organic peroxide manufacturing and its associated laboratory operations when the owner or operator of the unit meets all of the following conditions:

(1) The owner or operator identifies that the tank or container receives hazardous waste generated by an organic peroxide manufacturing process producing more than one functional family of organic peroxides or multiple organic peroxides within one functional family, that one or more of these organic peroxides could potentially undergo self-accelerating thermal decomposition at or below ambient temperatures, and that organic peroxides are the predominant products manufactured by the process. For the purpose of meeting the conditions of this paragraph, "organic peroxide" means an organic compound that contains the bivalent —O—O— structure and which may be considered to be a structural derivative of hydrogen peroxide where one or both of the hydrogen atoms has been replaced by an organic radical.

(2) The owner or operator prepares documentation, in accordance with the requirements of § 264.1089(i) of this subpart, explaining why an undue safety hazard would be created if air emission controls specified in §§ 264.1084 through 264.1087 of this subpart are installed and operated on the tanks and containers used at the facility to manage the hazardous waste generated by the organic peroxide manufacturing process or processes meeting the conditions of paragraph (d)(1) of this section.

(3) The owner or operator notifies the Regional Administrator in writing that hazardous waste generated by an

organic peroxide manufacturing process or processes meeting the conditions of paragraph (d)(1) of this section are managed at the facility in tanks or containers meeting the conditions of paragraph (d)(2) of this section. The notification shall state the name and address of the facility, and be signed and dated by an authorized representative of the facility owner or operator.

3. In § 264.1089, paragraph (i) is added to read as follows:

**§ 264.1089 Recordkeeping requirements.**

\* \* \* \* \*

(i) For each tank or container not using air emission controls specified in §§ 264.1084 through 264.1087 of this subpart in accordance with the conditions specified in § 264.1080(d) of this subpart, the owner or operator shall record and maintain the following information:

(1) A list of the individual organic peroxide compounds manufactured at the facility that meet the conditions specified in § 264.1080(d)(1).

(2) A description of how the hazardous waste containing the organic peroxide compounds identified in paragraph (i)(1) of this section are managed at the facility in tanks and containers. This description shall include:

(i) For the tanks used at the facility to manage this hazardous waste, sufficient information shall be provided to describe for each tank: a facility identification number for the tank; the purpose and placement of this tank in the management train of this hazardous waste; and the procedures used to ultimately dispose of the hazardous waste managed in the tanks.

(ii) For containers used at the facility to manage these hazardous wastes, sufficient information shall be provided to describe: a facility identification number for the container or group of containers; the purpose and placement of this container, or group of containers, in the management train of this hazardous waste; and the procedures used to ultimately dispose of the hazardous waste handled in the containers.

(3) An explanation of why managing the hazardous waste containing the organic peroxide compounds identified in paragraph (i)(1) of this section in the tanks and containers as described in paragraph (i)(2) of this section would create an undue safety hazard if the air emission controls, as required under §§ 264.1084 through 264.1087 of this subpart, are installed and operated on these waste management units. This

explanation shall include the following information:

(i) For tanks used at the facility to manage these hazardous wastes, sufficient information shall be provided to explain: how use of the required air emission controls on the tanks would affect the tank design features and facility operating procedures currently used to prevent an undue safety hazard during the management of this hazardous waste in the tanks; and why installation of safety devices on the required air emission controls, as allowed under § 264.1084(g) of this subpart, will not address those situations in which evacuation of tanks equipped with these air emission controls is necessary and consistent with good engineering and safety practices for handling organic peroxides.

(ii) For containers used at the facility to manage these hazardous wastes, sufficient information shall be provided to explain: how use of the required air emission controls on the containers would affect the container design features and handling procedures currently used to prevent an undue safety hazard during the management of this hazardous waste in the containers; and why installation of safety devices on the required air emission controls, as allowed under § 264.1086(d) of this subpart, will not address those situations in which evacuation of containers equipped with these air emission controls is necessary and consistent with good engineering and safety practices for handling organic peroxides.

**PART 265—INTERIM STATUS STANDARDS FOR OWNERS AND OPERATORS OF HAZARDOUS WASTE TREATMENT, STORAGE, AND DISPOSAL FACILITIES**

4. The authority citation for part 265 continues to read as follows:

Authority: 42 U.S.C. 6905, 6912(a), 6924, 6925, and 6935.

**Subpart CC—Air Emission Standards for Tanks, Surface Impoundments, and Containers**

5. In § 265.1080, paragraph (d) is added to read as follows:

**§ 265.1080 Applicability.**

\* \* \* \* \*

(d) The requirements of this subpart, except for the recordkeeping requirements specified in § 265.1090(i) of this subpart, are administratively stayed for a tank or a container used for the management of hazardous waste generated by organic peroxide

manufacturing and its associated laboratory operations when the owner or operator of the unit meets all of the following conditions:

(1) The owner or operator identifies that the tank or container receives hazardous waste generated by an organic peroxide manufacturing process producing more than one functional family of organic peroxides or multiple organic peroxides within one functional family, that one or more of these organic peroxides could potentially undergo self-accelerating thermal decomposition at or below ambient temperatures, and that organic peroxides are the predominant products manufactured by the process. For the purpose of meeting the conditions of this paragraph, "organic peroxide" means an organic compound that contains the bivalent -O-O- structure and which may be considered to be a structural derivative of hydrogen peroxide where one or both of the hydrogen atoms has been replaced by an organic radical.

(2) The owner or operator prepares documentation, in accordance with the requirements of § 265.1090(i) of this subpart, explaining why an undue safety hazard would be created if air emission controls specified in §§ 265.1085 through 265.1088 of this subpart are installed and operated on the tanks and containers used at the facility to manage the hazardous waste generated by the organic peroxide manufacturing process or processes meeting the conditions of paragraph (d)(1) of this section.

(3) The owner or operator notifies the Regional Administrator in writing that hazardous waste generated by an organic peroxide manufacturing process or processes meeting the conditions of paragraph (d)(1) of this section are managed at the facility in tanks or containers meeting the conditions of paragraph (d)(2) of this section. The notification shall state the name and address of the facility, and be signed and dated by an authorized representative of the facility owner or operator.

6. In § 265.1090, paragraph (i) is added to read as follows:

**§ 265.1090 Recordkeeping requirements.**

\* \* \* \* \*

(i) For each tank or container not using air emission controls specified in §§ 265.1085 through 265.1088 of this subpart in accordance with the conditions specified in § 265.1080(d) of this subpart, the owner or operator shall record and maintain the following information:

(1) A list of the individual organic peroxide compounds manufactured at

the facility that meet the conditions specified in § 265.1080(d)(1).

(2) A description of how the hazardous waste containing the organic peroxide compounds identified in paragraph (i)(1) of this section are managed at the facility in tanks and containers. This description shall include the following information:

(i) For the tanks used at the facility to manage this hazardous waste, sufficient information shall be provided to describe for each tank: a facility identification number for the tank; the purpose and placement of this tank in the management train of this hazardous waste; and the procedures used to ultimately dispose of the hazardous waste managed in the tanks.

(ii) For containers used at the facility to manage these hazardous wastes, sufficient information shall be provided to describe: a facility identification number for the container or group of containers; the purpose and placement of this container, or group of containers, in the management train of this hazardous waste; and the procedures used to ultimately dispose of the hazardous waste handled in the containers.

(3) An explanation of why managing the hazardous waste containing the organic peroxide compounds identified in paragraph (i)(1) of this section in the tanks and containers as described in paragraph (i)(2) of this section would create an undue safety hazard if the air emission controls, as required under §§ 265.1085 through 265.1088 of this subpart, are installed and operated on these waste management units. This explanation shall include the following information:

(i) For tanks used at the facility to manage these hazardous wastes, sufficient information shall be provided to explain: how use of the required air emission controls on the tanks would affect the tank design features and facility operating procedures currently used to prevent an undue safety hazard during the management of this hazardous waste in the tanks; and why installation of safety devices on the required air emission controls, as allowed under § 265.1085(g) of this subpart, will not address those situations in which evacuation of tanks equipped with these air emission controls is necessary and consistent with good engineering and safety practices for handling organic peroxides.

(ii) For containers used at the facility to manage these hazardous wastes, sufficient information shall be provided to explain: how use of the required air emission controls on the containers

would affect the container design features and handling procedures currently used to prevent an undue safety hazard during the management of this hazardous waste in the containers; and why installation of safety devices on the required air emission controls, as allowed under § 265.1087(d) of this subpart, will not address those situations in which evacuation of containers equipped with these air emission controls is necessary and consistent with good engineering and safety practices for handling organic peroxides.

[FR Doc. 95-24268 Filed 9-28-95; 8:45 am]  
BILLING CODE 6560-50-P

#### 40 CFR Part 300

[FRL-5306-3]

#### National Oil and Hazardous Substances Contingency Plan; National Priorities List Update

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of deletion of the Witco Chemical Corporation Superfund Site from the National Priorities List (NPL).

**SUMMARY:** The Environmental Protection Agency (EPA) Region II announces the deletion of the Witco Chemical Corporation Superfund site in Oakland, New Jersey from the National Priorities List (NPL). The NPL is Appendix B of 40 CFR Part 300, the National Oil and Hazardous Substances Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), as amended. EPA and the State of New Jersey have determined that all appropriate Fund-financed responses under CERCLA have been implemented and that no further cleanup by responsible parties is appropriate. Moreover, EPA and the State of New Jersey have determined that remedial actions conducted at the site to date remain protective of public health, welfare, and the environment.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Mr. John Osolin, Remedial Project Manager, U.S. Environmental Protection Agency, Region II, 290 Broadway, 19th Floor, New York, New York 10007, (212) 637-4412.

**ADDRESSES:** Comprehensive information on this site is available at the following addresses:

Oakland Public Library, Municipal Plaza, Oakland, New Jersey 07436, (201) 337-3742, Hrs. M-TH 10:00

AM-9:00 PM, F & SA 10:00 AM-5:00 PM.

Superfund Records Center, U.S. Environmental Protection Agency, Region II, 290 Broadway, 18th Floor, New York, New York 10007, (212) 637-4308, Hrs. M-F 9:00 AM-5:00 PM, (Call for an appointment, reasonable fees may be charged for copying.).

**SUPPLEMENTARY INFORMATION:** The site to be deleted from the NPL is: Witco Chemical Corporation Site, Oakland, New Jersey.

A Notice of Intent to Delete for this site was published November 18, 1993 (58 FR 60825). The closing date for comments on the Notice of Intent to Delete was December 17, 1993. EPA received no comments and therefore has not prepared a Responsiveness Summary.

The EPA identifies sites which appear to present a significant risk to public health, welfare, or the environment and it maintains the NPL as the list of those sites. Sites on the NPL may be the subject of Hazardous Substance Response Trust Fund (Fund-) financed remedial actions. Section 300.425(e)(3) of the NCP states that Fund-financed actions may be taken at sites deleted from the NPL in the unlikely event that conditions at the site warrant such action. Deletion of a site from the NPL does not affect responsible party liability or impede agency efforts to recover costs associated with response efforts.

#### List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous substances, Hazardous waste, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: September 15, 1995.  
William J. Muszynski,  
*Acting Regional Administrator.*

40 CFR part 300 is amended as follows:

#### PART 300—[AMENDED]

1. The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601-9657; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp.; p. 351; E.O. 12580, 52 FR 2923, 3 CFR, 1987 Comp.; p. 193.

#### Appendix B—[Amended]

2. Table 1 of appendix B to part 300 is amended by removing Witco

Chemical Corporation Site, Oakland, New Jersey.

[FR Doc. 95-24269 Filed 9-28-95; 8:45 am]  
BILLING CODE 6560-50-P

#### 40 CFR Part 300

[FRL-5307-2]

#### National Oil and Hazardous Substances Pollution Contingency Plan National Priorities List Update

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice of deletion of the Action Anodizing, Plating and Polishing Site from the National Priorities List.

**SUMMARY:** The Environmental Protection Agency (EPA) Region II announces the deletion of the Action Anodizing, Plating and Polishing site from the National Priorities List (NPL). The NPL is Appendix B of 40 CFR part 300, the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to Section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), as amended. EPA and the State of New York have determined that all appropriate Hazardous Substance Response Trust Fund- (Fund-) financed responses under CERCLA have been implemented and that no further cleanup is appropriate. Moreover, EPA and the State of New York have determined that remedial actions conducted at the site to date have been protective of public health, welfare, and the environment.

**EFFECTIVE DATE:** October 30, 1995.

**ADDRESSES:** For further information contact: Janet Cappelli, Remedial Project Manager, U.S. Environmental Protection Agency, Region II, 290 Broadway, 20th Floor, New York, NY 10007-1866, (212) 637-4270.

**SUPPLEMENTARY INFORMATION:** The site to be deleted from the NPL is the Action Anodizing, Plating and Polishing site, Copiague, Suffolk County, New York. A Notice of Intent to Delete for this site was published in the Federal Register [59 FR 64644] on June 6, 1995. The closing date for comments on the Notice of Intent to Delete was July 6, 1994. EPA received no verbal or written comments on the proposed deletion.

EPA identifies sites which appear to present a significant risk to public health, welfare, or the environment and it maintains the NPL as the list of those sites. Sites on the NPL may be the subject of Fund-financed remedial actions. Any site deleted from the NPL

remains eligible for Fund-financed remedial actions in the unlikely event that conditions at the site warrant such action. Section 300.66(c)(8) of the NCP states that Fund-financed actions may be taken at sites deleted from the NPL. Deletion of a site from the NPL does not affect responsible party liability or impede EPA efforts to recover costs associated with response efforts.

#### List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous substances, Hazardous waste, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: September 7, 1995.

William J. Muszynski,  
*Acting Regional Administrator.*

#### 40 CFR Part 763

[OPPTS-62142A; FRL-4979-9]

#### Asbestos-Containing Materials in Schools; State Request for Waiver From Requirements; Final Decision

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final decision on requested waiver.

**SUMMARY:** EPA is issuing a final decision which approves the request of Colorado for a waiver from the requirements of 40 CFR part 763, subpart E, Asbestos-Containing Materials in Schools.

**DATES:** This final decision is effective October 30, 1995.

**ADDRESSES:** A copy of the complete waiver application submitted by the State is available from the TSCA Nonconfidential Information Center, TSCA Docket Receipt (7404), Office of Pollution Prevention and Toxics, Rm.

NE-B607, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. A copy is also on file and may be reviewed at the EPA Region 8 office in Denver, Colorado: EPA, Region 8 (8ART-RTI), 999 18th St., Denver, CO, 80202-2466.

#### FOR FURTHER INFORMATION CONTACT:

Susan B. Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Rm. E-543B, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD: (202) 554-0551, e-mail: TSCA-Hotline@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** This action is issued under the authority of Title II of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2641, *et seq.* TSCA Title II was enacted as part of the Asbestos Hazard Emergency Response Act (AHERA), Pub. L. 99519. AHERA is the abbreviation commonly used to refer to the statutory authority for EPA's rules affecting asbestos in schools and will be used in this document. EPA issued a final rule in the Federal Register of October 30, 1987 (52 FR 41846), the "Asbestos-Containing Materials in Schools Rule" (the Schools Rule, 40 CFR part 763, subpart E), which requires all Local Education Agencies (LEAs) to identify asbestos-containing building materials (ACBMs) in their school buildings and to take appropriate actions to control the release of asbestos fibers.

Under section 203 of AHERA, EPA may, upon request by a State Governor and after notice and comment and opportunity for a public hearing in the State, waive in whole or part the requirements of the Schools Rule, if the State has established and is implementing or intends to implement an ongoing program of asbestos inspection and management which is at least as stringent as the requirements of the rule. 40 CFR 763.98 sets forth the procedures to implement this statutory provision. The Schools Rule requires that specific information be included in the waiver request submitted to EPA, establishes a process for reviewing waiver requests, and sets forth procedures for oversight and rescission of waivers granted to States. The Agency encourages States to establish and manage their own school regulatory programs under the AHERA waiver program.

EPA issued a notice in the Federal Register of November 29, 1994 (59 FR 60945), which announced the receipt of a waiver request from the State of Colorado, and solicited comments from the public. The notice also discussed

the program elements of the State program.

EPA received one comment during the 60-day comment period. The commenter agreed with the Agency's position. No request for a public hearing was received.

EPA is required to issue a notice in the Federal Register announcing its decision to grant or deny a request for waiver within 30 days after the close of the comment period. The comment period for this docket closed on January 30, 1995. The 30-day review period may be extended if mutually agreed upon by EPA and the State. EPA and Colorado mutually agreed to extend the review period.

The remainder of this document is divided into two units. The first unit discusses the Colorado program and sets forth the reasons and rationale for EPA's decision on the State's waiver request. Unit I. is subdivided into two sections. Section A discusses key elements of the State's program. Section B gives EPA's final approval of the waiver. The second unit of this document discusses statutory requirements of the Paperwork Reduction Act.

## I. The Colorado Program

### A. Program Elements

The Colorado Regulation 8 (Part B, Emission Standards for Asbestos) give the Colorado Department of Public Health and Environment (CDPHE) the authority to regulate asbestos in schools and commercial buildings. The State's regulations adopt by reference the AHERA regulations at 40 CFR part 763, subpart E effective when an AHERA waiver is approved by EPA. The State has the enforcement mechanism to allow it to implement the program. The State has EPA-approved Neutral Administrative Inspection Scheme (NAIS), logging system for tracking tips, complaints, etc., and an enforcement response policy in place. The State has qualified personnel to carry out the provision relating to the waiver. The program will be administered by the CDPHE.

Since the State application for a waiver was received, EPA published a revision to its Asbestos Model Accreditation Plan (MAP). The Asbestos Model Accreditation Plan; Interim Final Rule was published on February 3, 1994 (59 FR 5236). This MAP required that each State adopt an accreditation plan that is at least as stringent as this MAP within 180 days after the commencement of the first regular session of the legislature of the State that is convened on or after April 4,

1994. The CDPHE has not submitted copies of the State's revised regulations. Therefore, the State's regulations are not final at this time.

### B. EPA's Decision on Colorado's Request for Waiver

EPA grants the State of Colorado a partial waiver from the requirements of 40 CFR part 763, subpart E, effective 30 days after publication of this Final Decision. This waiver includes all AHERA requirements except the MAP. EPA will amend the AHERA waiver to include the MAP when the State's MAP regulations become final. Federal jurisdiction shall be in effect in the period between the date of publication of this document and the effective date. This will assure that the State has sufficient time to prepare to assume its new responsibilities. It will also assure the public that no gap in authority occurs, and gives the public sufficient notice of the transfer of duties from EPA to the State of Colorado. This waiver is applicable to all schools and public and commercial buildings covered by AHERA in the State and is subject to rescission under 40 CFR 763.98(j) based on periodic EPA oversight evaluation and conference with the State in accordance with 40 CFR 763.98(h) and 763.98(i).

## II. Other Statutory Requirements

The reporting and recordkeeping provisions relating to State waivers from the requirements of the Asbestos-Containing Materials in Schools Rule (40 CFR part 763) have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act and have been assigned OMB control number 2070-0091.

### List of Subjects in 40 CFR Part 763

Environmental protection, Asbestos, Asbestos in schools (AHERA), Hazardous substances, Reporting and recordkeeping requirements, State and local governments, Worker protection.

Dated: September 20, 1995.

BILLING CODE 6560-50-F

## 40 CFR Parts 766 and 799

[OPPTS0940028; FRL094956093]

### Technical Amendments to Test Rules and Consent Orders

AGENCY: Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** EPA has approved by letter certain modifications to test standards and schedules for chemical testing programs under section 4 of the Toxic Substances Control Act (TSCA). These modifications, requested by test sponsors, will be incorporated and codified in the respective test regulation or consent order. Because these modifications do not significantly alter the scope of a test or significantly change the schedule for its completion, EPA approved these requests without seeking notice and comment. EPA annually publishes a notice describing all of the modifications granted by letter for the previous year.

**EFFECTIVE DATE:** This rule is effective on September 29, 1995.

### FOR FURTHER INFORMATION CONTACT:

Susan B. Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Rm. E09543B, 401 M St., SW., Washington, DC 20460, (202) 554091404, TDD (202) 554090551, Internet: TSCA-Hotline@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** EPA issued a rule published in the Federal Register of September 1, 1989 (54 FR 36311), amending procedures for modifying test standards and schedules for test rules and testing consent orders under section 4 of TSCA. The amended procedures allow EPA to approve requested modifications which do not alter the scope of a test or significantly change the schedule for its completion. These modifications are approved by letter without public comment. The rule also requires immediate placement of these letters in EPA's public files and publication of these modifications in the Federal Register. This document includes modifications approved from January 1, 1994, through December 31, 1994. For a detailed description of the rationale for these modifications, refer to the submitters' letters and EPA's responses in the public record for this rulemaking.

## I. Discussion of Modifications

Each chemical discussed in this rule is identified by a specific CAS number and docket number. Copies of correspondence relating to specific chemical modifications may be found in docket number (OPPTS0940028) established for this rule. The following table lists all chemical-specific modifications approved from January 1, 1994, through December 31, 1994.

MODIFICATIONS TO TEST STANDARDS AND CONSENT ORDERS JANUARY 1, 1994 THROUGH DECEMBER 31, 1994

**Modifications**

1. Modify sampling schedule.
2. Change to test substance (form/purity).
3. Change in non-critical test procedure or condition.
4. Add satellite group for further testing.
5. Extend test or protocol deadline, delete test initiation date.
6. Clarify and/or add specific guideline requirement.
7. Alternate specific guideline requirement approved for certain test(s).
8. CAS No. correction.
9. Test standard amendment.

Note: In §1A766.35(b)(4)(i) changes have been made to four existing chemicals and one new submitter is added to the table; however, for the convenience of the user, the entire table is being revised.

**II. Public Record**

EPA has established a public record for this rulemaking (Docket number OPPTS0940028). The record includes the information considered by EPA in evaluating the requested modifications.

The record is available for inspection from 12:00 noon to 4 p.m., Monday through Friday, except legal holidays, in Rm. NEB09607, 401 M St., SW., Washington, DC 20460.

**III. Regulatory Assessment Requirements**

**A. Analyses Under E.O. 12866, and the Unfunded Mandates Act of 1995**

Because the modifications to the subject testing actions do not impose any additional requirements, this action is not "significant" within the meaning of Executive Order 12866 (58 FR 51735,

October 4, 1993), and does not impose any Federal mandate on any State, local, or tribal governments or the private sector within the meaning of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4).

**B. Regulatory Flexibility Act**

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 605(b)), it has been determined that this action will not have a significant economic impact on a significant number of small entities.

**C. Paperwork Reduction Act**

The information collection requirements associated with this rule have been approved by OMB under the provisions of the Paperwork Reduction Act, 44 U.S.C 3501, and have been assigned OMB control number 2070-0033. EPA has determined that this rule does not change existing recordkeeping or reporting requirements nor does it impose any additional recordkeeping or reporting requirements.

**List of Subjects**

**40 CFR Part 766**

Dibenzo-para-dioxins/dibenzofurans, Environmental protection, Hazardous substances, Reporting and recordkeeping requirements.

**40 CFR Part 799**

Chemicals, Chemical export, Environmental protection, Hazardous substances, Recordkeeping and reporting requirements, Testing.

Dated: September 25, 1995.

Susan H. Wayland,

*Acting Assistant Administrator for Prevention, Pesticides and Toxic Substances.*

Therefore, 40 CFR parts 766 and 799 are amended as follows:

1. In part 766:

**PART 766—[AMENDED]**

a. The authority citation for part 766 continues to read as follows:  
Authority: 15 U.S.C. 2603 and 2607.

b. In §1A766.35, by revising paragraph (a)(2)(i)(B)(3), the table to paragraph (a)(2)(ii)(A), and the table to paragraph (b)(4)(i) and paragraph (f) to read as follows:

**§1A766.35 Dibenzo-para-dioxins/dibenzofurans.**

- (a) \*\*\*
- (2) \*\*\*
- (i) \*\*\*
- (B) \*\*\*

(3) The deadline for submitting protocols for pentabromodiphenyloxide (CAS No. 325340981099) is February 6, 1995. The deadline for submitting tetrabromobisphenol-A-bisethoxylate (CAS No. 41260945092) is January 31, 1991.

- \* \* \* \* \*
- (2) \*\*\*
- (ii) \*\*\*
- (A) \*\*\*

CAS No.	Submitter	Chemical	Due date
1180975092	Rhone-Poulenc .....	2,3,5,6-tetrachloro-2,5-cyclohexaniene-1,4-dione .....	March 4, 1994

\* \* \* \* \* (i) \*\*\*  
 (b) \*\*\*  
 (4) \*\*\*

CAS No.	Submitter	Chemical	Due Date	Effective Date
790994097	Great Lakes	Tetrabromobisphenol-A	May 26, 1992	May 28, 1993

 (f) *Effective date.* (1) The effective date of this final rule is July 6, 1987, except for paragraphs (a)(2)(i)(B) introductory text, (a)(2)(i)(B)(1), (a)(2)(i)(B)(2), (a)(2)(i)(B)(3), (a)(2)(i)(B)(4), the table in paragraph (a)(2)(ii)(A), and the table in paragraph (b)(4)(i) of this section.

(2) The effective date for paragraph (a)(2)(i)(B) introductory text, (a)(2)(i)(B)(1), (a)(2)(i)(B)(2), and (a)(2)(i)(B)(4), is May 21, 1991. The effective date of paragraphs (a)(2)(i)(B)(3), and the table in paragraph (a)(2)(ii)(A) is September 29, 1995. The effective date of paragraph (b)(4)(i) introductory text is May 28, 1993, and the effective date of the entries in the table in paragraph (b)(4)(i) is shown in the effective dates column of the table.

(3) The guidelines and other test methods cited in this rule are referenced as they exist on the effective date of the final rule.

2. In part 799:

**PART 799—[AMENDED]**

a. The authority citation for part 799 continues to read as follows:  
 Authority: 15 U.S.C. 2603, 2611, 2625.

b. In §1A799.2325 by revising paragraphs (c)(8)(ii)(A) and (d) to read as follows:

**§1A799.2325 Isopropanol**  
 \* \* \* \* \*

(c) \* \* \*  
 (8) \* \* \*  
 (ii) \* \* \* (A) The oncogenicity test shall be completed and the final report submitted to EPA by July 5, 1994.  
 \* \* \* \* \*

(d) *Effective date.* (1) The effective date of this final rule is December 4, 1989, except for the provisions of paragraphs (c)(5)(i)(C)(1), (c)(5)(ii)(A)(3), (c)(6)(i)(D), and (c)(8)(ii)(A), of this section. The effective date for paragraphs (c)(5)(i)(C)(1), and (c)(5)(ii)(A)(3) of this section is May 21, 1990. The effective date for paragraphs (c)(6)(i)(D) of this section is May 21, 1991. The effective date of paragraph (c)(8)(ii)(A) is September 29, 1995.

(2) The guidelines and other test methods cited in this rule are references as they exist on the effective date of the final rule.

c. In §1A799.5075 by revising paragraphs (a)(2), (c)(1)(ii)(A), (c)(1)(ii)(B), (c)(2)(ii)(A) and paragraph (d) to read as follows:

**§1A799.5075 Drinking water contaminants subject to testing.**

(a) \* \* \*  
 (2) A test substance of at least 99 percent purity shall be used for Chloroethane, 1,1-dichloroethane, and 1,3,5-trimethylbenzene. A test substance of at least 98 percent purity shall be used for 1,1,2,2-tetrachloroethane.  
 \* \* \* \* \*

(c) \* \* \*  
 (1) \* \* \*  
 (ii) \* \* \* (A) The subacute testing for chloroethane shall be completed and the final report submitted to EPA by March 27, 1995. The subacute testing for 1,1-dichloroethane and 1,1,2,2-tetrachloroethane shall be completed and the final report submitted to EPA by April 27, 1995. The subacute testing for 1,3,5-trimethylbenzene shall be completed and the final report submitted to EPA by February 11, 1995.

(B) Except for 1,3,5-trimethylbenzene, a progress report shall be submitted to EPA for each test beginning 6 months after the date specified in paragraph (d)(1) of this section and at 609month intervals thereafter until the final report is submitted to EPA . The progress report for 1,3,5-trimethylbenzene shall be submitted to EPA by April 10, 1995.  
 (2) \* \* \*

(ii) \* \* \* (A) The subchronic testing for chloroethane shall be completed and the final report submitted to EPA by June 27, 1995. The subchronic testing for 1,1-dichloroethane and 1,1,2,2-tetrachlorethane shall be completed and the final report submitted to EPA by August 27, 1995. The subchronic testing for 1,3,5-trimethylbenzene shall be completed and the final report submitted to EPA by April 10, 1995.

\* \* \* \* \*

(d) *Effective date.* (1) This section is effective on December 27, 1993 except for paragraphs (a)(2), (c)(1)(ii)(A), (c)(1)(ii)(B), and (c)(2)(ii)(A). The effective date for paragraphs (a)(2), (c)(1)(ii)(A), (c)(1)(ii)(B), (c)(2)(ii)(A) is September 29, 1995.

(2) The guidelines and other test methods cited in this section are referenced as they exist on the effective date of the final rule.

[FR Doc. 95-24211 Filed 9-28-95; 8:45 am]

BILLING CODE 6560-50-F

## 40 CFR Part 300

[FRL-5308-2]

### National Priorities List for Uncontrolled Hazardous Waste Sites

**AGENCY:** Environmental Protection Agency.

**ACTION:** Final rule.

**SUMMARY:** The Comprehensive Environmental Response, Compensation, and Liability Act of 1980 ("CERCLA" or "the Act"), as amended, requires that the National Oil and Hazardous Substances Pollution Contingency Plan ("NCP") include a list of national priorities among the known releases or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. The National Priorities List ("NPL") which is appendix B of 40 CFR part 300, constitutes this list.

This rule adds 8 new sites to the NPL, 6 to the General Superfund Section and 2 to the Federal Facilities Section. The NPL is intended primarily to guide the Environmental Protection Agency ("EPA" or "the Agency") in determining which sites warrant further investigation to assess the nature and extent of public health and environmental risks associated with the site and to determine what CERCLA-financed remedial action(s), if any, may be appropriate.

**EFFECTIVE DATE:** The effective date for this amendment to the NCP shall be October 30, 1995.

**ADDRESSES:** For addresses for the Headquarters and Regional dockets, as well as further details on what these dockets contain, see "Information Available to the Public" in Section I of the "Supplementary Information" portion of this preamble.

**FOR FURTHER INFORMATION CONTACT:** Terry Keidan, Hazardous Site Evaluation Division, Office of Emergency and Remedial Response (mail code 5204G), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC, 20460, or the Superfund Hotline, phone (800) 424-9346 or (703) 412-9810 in the Washington, DC, metropolitan area.

#### SUPPLEMENTARY INFORMATION:

- I. Introduction
- II. Contents of This Final Rule
- III. Executive Order 12866
- IV. Unfunded Mandates
- V. Governors' Concurrence

#### I. Introduction

##### *Background*

In 1980, Congress enacted the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601-9675 ("CERCLA" or "the Act"), in response to the dangers of uncontrolled hazardous waste sites. CERCLA was amended on October 17, 1986, by the Superfund Amendments and Reauthorization Act ("SARA"), Public Law No. 99-499, stat. 1613 *et seq.* To implement CERCLA, EPA promulgated the revised National Oil and Hazardous Substances Pollution Contingency Plan ("NCP"), 40 CFR part 300, on July 16, 1982 (47 FR 31180), pursuant to CERCLA section 105 and Executive Order 12316 (46 FR 42237, August 20, 1981). The NCP sets forth the guidelines and procedures needed to respond under CERCLA to releases and threatened releases of hazardous substances, pollutants, or contaminants. EPA has revised the NCP on several occasions. The most recent comprehensive revision was on March 8, 1990 (55 FR 8666).

Section 105(a)(8)(A) of CERCLA requires that the NCP include "criteria for determining priorities among releases or threatened releases throughout the United States for the purpose of taking remedial action \* \* \* and, to the extent practicable taking into account the potential urgency of such action, for the purpose of taking removal action." "Removal" actions are defined broadly and include a wide range of actions taken to study, clean up, prevent or otherwise address releases and threatened releases. 42 USC 9601(23). "Remedial" actions are those "consistent with permanent remedy,

taken instead of or in addition to removal actions \* \* \*." 42 USC 9601(24).

Pursuant to section 105(a)(8)(B) of CERCLA, as amended by SARA, EPA has promulgated a list of national priorities among the known or threatened releases of hazardous substances, pollutants, or contaminants throughout the United States. That list, which is Appendix B of 40 CFR Part 300, is the National Priorities List ("NPL").

CERCLA section 105(a)(8)(B) defines the NPL as a list of "releases" and as a list of the highest priority "facilities." CERCLA section 105(a)(8)(B) also requires that the NPL be revised at least annually. A site may undergo remedial action financed by the Trust Fund established under CERCLA (commonly referred to as the "Superfund") only after it is placed on the NPL, as provided in the NCP at 40 CFR 300.425(b)(1). However, under 40 CFR 300.425(b)(2) placing a site on the NPL "does not imply that monies will be expended." EPA may pursue other appropriate authorities to remedy the releases, including enforcement action under CERCLA and other laws.

The purpose of the NPL is merely to identify releases that are priorities for further evaluation. Although a CERCLA "facility" is broadly defined to include any area where a hazardous substance release has "come to be located" (CERCLA section 101(9)), the listing process itself is not intended to define or reflect the boundaries of such facilities or releases.

Further, the NPL is only of limited significance, as it does not assign liability to any party or to the owner of any specific property. See Report of the Senate Committee on Environment and Public Works, Senate Rep. No. 96-848, 96th Cong., 2d Sess. 60 (1980), quoted above and at 48 FR 40659 (September 8, 1983). If a party does not believe it is liable for releases on discrete parcels of property, supporting information can be submitted to the Agency at any time after a party receives notice it is a potentially responsible party.

Three mechanisms for placing sites on the NPL for possible remedial action are included in the NCP at 40 CFR 300.425(c). Under 40 CFR 300.425(c)(1), a site may be included on the NPL if it scores sufficiently high on the Hazard Ranking System ("HRS"), which EPA promulgated as Appendix A of 40 CFR part 300. On December 14, 1990 (55 FR 51532), EPA promulgated revisions to the HRS partly in response to CERCLA section 105(c), added by SARA. The revised HRS evaluates four pathways: ground water, surface water, soil

exposure, and air. The HRS serves as a screening device to evaluate the relative potential of uncontrolled hazardous substances to pose a threat to human health or the environment. As a matter of Agency policy, those sites that score 28.50 or greater on the HRS are eligible for the NPL.

Under a second mechanism for adding sites to the NPL, each State may designate a single site as its top priority, regardless of the HRS score. This mechanism, provided by the NCP at 40 CFR 300.425(c)(2), requires that, to the extent practicable, the NPL include within the 100 highest priorities, one facility designated by each State representing the greatest danger to public health, welfare, or the environment among known facilities in the State.

The third mechanism for listing, included in the NCP at 40 CFR 300.425(c)(3), allows certain sites to be listed regardless of their HRS score, if all of the following conditions are met:

- The Agency for Toxic Substances and Disease Registry (ATSDR) of the U.S. Public Health Service has issued a health advisory that recommends dissociation of individuals from the release.
- EPA determines that the release poses a significant threat to public health.
- EPA anticipates that it will be more cost-effective to use its remedial authority (available only at NPL sites) than to use its removal authority to respond to the release.

EPA promulgated an original NPL of 406 sites on September 8, 1983 (48 FR 40658). The NPL has been expanded since then, most recently on May 26, 1995 (60 FR 27896).

The NPL includes two sections, one of sites that are evaluated and cleaned up by EPA (the "General Superfund Section"), and one of sites being addressed generally by other Federal agencies (the "Federal Facilities Section"). Under Executive Order 12580 (52 FR 2923, January 29, 1987) and CERCLA section 120, each Federal agency is responsible for carrying out most response actions at facilities under its own jurisdiction, custody, or control, although EPA is responsible for preparing an HRS score and determining whether the facility is placed on the NPL. EPA is not the lead agency at these sites, and its role at such sites is accordingly less extensive than at other sites. The Federal Facilities Section includes facilities at which EPA is not the lead agency.

#### *Facility (Site) Boundaries*

The NPL does not describe releases in precise geographical terms; it would be neither feasible nor consistent with the limited purpose of the NPL (as the mere identification of releases), for it to do so.

CERCLA section 105(a)(8)(B) directs EPA to list national priorities among the known "releases or threatened releases." Thus, the purpose of the NPL is merely to identify releases that are priorities for further evaluation. Although a CERCLA "facility" is broadly defined to include any area where a hazardous substance release has "come to be located" (CERCLA section 101(9)), the listing process itself is not intended to define or reflect the boundaries of such facilities or releases. Of course, HRS data upon which the NPL placement was based will, to some extent, describe which release is at issue. That is, the NPL site would include all releases evaluated as part of that HRS analysis (including noncontiguous releases evaluated under the NPL aggregation policy, described at 48 FR 40663 (September 8, 1983)).

When a site is listed, it is necessary to define the release (or releases) encompassed within the listing. The approach generally used is to delineate a geographical area (usually the area within the installation or plant boundaries) and define the site by reference to that area. As a legal matter, the site is not coextensive with that area, and the boundaries of the installation or plant are not the "boundaries" of the site. Rather, the site consists of all contaminated areas within the area used to define the site, and any other location to which contamination from that area has come to be located.

While geographic terms are often used to designate the site (e.g., the "Jones Co. plant site") in terms of the property owned by the particular party, the site properly understood is not limited to that property (e.g., it may extend beyond the property due to contaminant migration), and conversely may not occupy the full extent of the property (e.g., where there are uncontaminated parts of the identified property, they may not be, strictly speaking, part of the "site"). The "site" is thus neither equal to nor confined by the boundaries of any specific property that may give the site its name, and the name itself should not be read to imply that this site is coextensive with the entire area within the property boundary of the facility or plant. The precise nature and extent of the site are typically not known at the time of listing. Also, the site name is merely used to help identify the

geographic location of the contamination. For example, the "Jones Co. plant site," does not imply that the Jones company is responsible for the contamination located on the plant site.

EPA regulations provide that the "nature and extent of the threat presented by a release" will be determined by a Remedial Investigation/Feasibility Study (RI/FS) as more information is developed on site contamination (40 CFR 300.430(d)). During the RI/FS process, the release may be found to be larger or smaller than was originally thought, as more is learned about the source and the migration of the contamination. However, this inquiry focuses on an evaluation of the threat posed; the boundaries of the release need not be exactly defined. Moreover, it generally is impossible to discover the full extent of where the contamination "has come to be located" before all necessary studies and remedial work are completed at a site. Indeed, the boundaries of the contamination can be expected to change over time. Thus, in most cases, it may be impossible to describe the boundaries of a release with absolute certainty.

For these reasons, the NPL need not be amended if further research into the extent of the contamination expands the apparent boundaries of the release. Further, the NPL is only of limited significance, as it does not assign liability to any party or to the owner of any specific property. See Report of the Senate Committee on Environment and Public Works, Senate Rep. No. 96-848, 96th Cong., 2d Sess. 60 (1980), quoted above and at 48 FR 40659 (September 8, 1983). If a party does not believe it is liable for releases on discrete parcels of property, supporting information can be submitted to the Agency at any time after a party receives notice it is a potentially responsible party.

#### *Deletions/Cleanups*

EPA may delete sites from the NPL where no further response is appropriate under Superfund, as explained in the NCP at 40 CFR 300.425(e). To date, the Agency has deleted 84 sites from the General Superfund Section of the NPL.

EPA also has developed an NPL construction completion list ("CCL") to simplify its system of categorizing sites and to better communicate the successful completion of cleanup activities (58 FR 12142, March 2, 1993). Sites qualify for the CCL when:

- (1) any necessary physical construction is complete, whether or not final cleanup levels or other requirements have been achieved;

(2) EPA has determined that the response action should be limited to measures that do not involve construction (e.g., institutional controls); or

(3) the site qualifies for deletion from the NPL.

Inclusion of a site on the CCL has no legal significance.

In addition to the 83 sites that have been deleted from the NPL because they have been cleaned up (the Waste Research and Reclamation site was deleted based on deferral to another program and is not considered cleaned up), an additional 221 sites are also in the NPL CCL. Thus, as of September 1995, the CCL consists of 304 sites.

Cleanups at sites on the NPL do not reflect the total picture of Superfund accomplishments. As of August, 1995, EPA had commenced 679 removal actions at NPL sites, and 2,108 removal actions at non-NPL sites. Information on removals is available from the Superfund hotline.

*Action In This Notice*

This final rule adds 8 sites to the NPL, 6 to the General Superfund Section and 2 to the Federal Facilities Section. Seven of these sites are added to the NPL based on an HRS score of 28.5 or greater and one is added based on the ATSDR Health Advisory Criteria. This notice also drops one site from proposal to the NPL. This action results in an NPL of 1,238 sites, 1,083 in the General Superfund Section and 155 in the Federal Facilities Section. With the action of a proposed rule published in the Federal Register issue of October 2, 1995, an additional 52 sites are proposed and are awaiting final agency action, 47 in the General Superfund Section and 5 in the Federal Facilities Section. Final and proposed sites now total 1,290.

Based on comments received on the Plymouth Avenue Landfill site in Deland, Florida, EPA recalculated the HRS score and found that it had dropped below 28.5. Consequently, EPA

is not taking final action and is withdrawing the Plymouth Avenue Landfill site from proposal to the NPL at this time.

*Information Available to the Public*

401 M Street, SW, Washington, DC 20460, 703/603-8917 (Please note this is the mailing address only. If you wish to visit the HQ Docket to view documents, see viewing address above.)

**II. Contents of This Notice**

This notice promulgates final rules to add 8 sites to the NPL, 6 to the General Superfund Section (Table 1) and 2 to the Federal Facilities Section (Table 2). The following tables present the sites in this rule arranged alphabetically by State and identifies their rank by group number. Group numbers are determined by arranging the NPL by rank and dividing it into groups of 50 sites. For example, a site in Group 4 has a score that falls within the range of scores covered by the fourth group of 50 sites on the NPL.

**NATIONAL PRIORITIES LIST FINAL RULE—GENERAL SUPERFUND SECTION**

State	Site name	City/County	Group
KS .....	Ace Services .....	Colby .....	5/6
ME .....	West Site/Hows Corner .....	Plymouth .....	5/6
NJ .....	Horseshoe Road .....	Sayreville .....	4
TN .....	Tennessee Products .....	Chattanooga .....	NA
TX .....	RSR Corporation .....	Dallas .....	5/6
VI .....	Tutu Wellfield .....	Tutu .....	5/6

Number of Sites Listed: 6.

**NATIONAL PRIORITIES LIST FINAL RULE—FEDERAL FACILITIES SECTION**

State	Site name	City/County	Group
MD .....	Indian Head Naval Surface Warfare Center .....	Indian Head .....	5/6
PA .....	Willow Grove Naval Air and Air Reserve Station .....	Willow Grove .....	5/6

Number of Sites Listed: 2.

*Public Comments*

EPA reviewed all comments received on sites included in this notice. Based on comments received on the proposed sites, as well as investigation by EPA and the States (generally in response to comment), EPA recalculated the HRS scores for individual sites where appropriate. EPA's response to site-specific public comments and explanations of any score changes made as a result of such comments are addressed in the "Support Document for the Revised National Priorities List Final Rule—September 1995."

**III. Executive Order 12866**

The Office of Management and Budget (OMB) has exempted this regulatory

action from Executive Order 12866 review.

**IV. Unfunded Mandates**

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Pub. L. 104-4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of \$100 million or more in any one year. When a written statement is needed for an EPA rule,

section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective or least burdensome alternative that achieves.

The Headquarters and Regional public dockets for the NPL contain documents relating to the evaluation and scoring of the site in this final rule. The dockets are available for viewing, by appointment only, after the appearance of this notice. The hours of operation for the Headquarters docket are from 9:00 a.m. to 4:00 p.m., Monday through Friday, excluding Federal holidays. Please contact the Regional Docket for hours.

Addresses and phone numbers for the Headquarters and Regional dockets follow.

For the sites added to the NPL based on an HRS score of 28.5 or greater, the Headquarters docket for this rule contains HRS score sheets for the final sites; Documentation Records for the sites describing the information used to compute the scores; pertinent information regarding statutory requirements or EPA listing policies that affect the sites; and a list of documents referenced in each of the Documentation Records. For the site being listed based on ATSDR Health Advisory criteria, the Headquarters docket contains the health advisory issued by ATSDR and other supporting documentation. For all of the final sites, the Headquarters docket contains comments received; and the Agency's responses to those comments. The Agency's responses are contained in the "Support Document for the

Revised National Priorities List Final Rule—September 1995."

A general discussion of the statutory requirements affecting NPL listing, the purpose and implementation of the NPL, the economic impacts of NPL listing, and the analysis required under the Regulatory Flexibility Act is included as part of the Headquarters rulemaking docket in the "Additional Information" document.

The Regional docket contains all the information in the Headquarters docket, plus the actual reference documents containing the data principally relied upon by EPA in calculating or evaluating the HRS score, when the HRS is used, for the sites. These reference documents are available only in the Regional dockets.

Interested parties may view documents, by appointment only, in the Headquarters of Regional Dockets, or copies may be requested from the Headquarters or Regional Dockets. An informal written request, rather than a formal request under the Freedom of Information Act, should be the ordinary procedure for obtaining copies of any of these documents. If you wish to obtain documents by mail from EPA Headquarters Docket, the mailing address is as follows: Docket Coordinator, Headquarters U.S. EPA CERCLA Docket Office (Mail Code 5201G) the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMR a small government agency plan. The plan must provide for notifying potentially affected small governments, giving them meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising them on compliance with the regulatory requirements.

Today's rule contains no Federal mandates (within the meaning of Title II of the UMR) for State, local, or tribal governments or the private sector. Nor does it contain any regulatory requirements that might significantly or uniquely affect small governments. This is because today's listing decision does not impose any enforceable duties upon

any of these governmental entities or the private sector. Inclusion of a site on the NPL does not itself impose any costs. It does not establish that EPA necessarily will undertake remedial action, nor does it require any action by a private party or determine its liability for site response costs. Costs that arise out of site responses result from site-by-site decisions about what actions to take, not directly from the act of listing itself. Therefore, today's rulemaking is not subject to the requirements of sections 202, 203 or 205 of the Unfunded Mandates Act.

#### V. Governor's Concurrence

On July 27, 1995, Congress enacted Public Law (P.L.) 104-19, which made emergency supplemental appropriations and rescissions for the fiscal year ending September 30, 1995. Section 1006 of P.L. 104-19 provides that EPA may not use funds made available for fiscal year 1995 for listing or to list any additional facilities on the National Priorities List \* \* \* unless the Administrator receives a written request to propose for listing or to list a facility from the Governor of the State in which the facility is located \* \* \*.

EPA has received letters from the appropriate governors requesting that the Agency list on the NPL all the facilities in this final rule. These letters are available in the docket for this rulemaking.

#### List of Subjects in 40 CFR Part 300

Air pollution control, Chemicals, Environmental Protection, Hazardous materials, Intergovernmental relations, Natural resources, Oil pollution, Reporting and recordkeeping requirements, Superfund, Waste treatment and disposal, Water pollution control, Water supply.

Dated: September 25, 1995.

Elliott P. Laws,

*Assistant Administrator, Office of Solid Waste and Emergency Response.*

40 CFR part 300 is amended as follows:

#### **PART 300—[AMENDED]**

1. The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601-9657; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; E.O. 12580, 52 FR 2923, 3 CFR, 1987 Comp., p. 193.

#### *Appendix B [Amended]*

2. Table 1 to appendix B to part 300 is amended by revising the table heading and by adding the following sites by State and in alphabetical order:

TABLE 1.—GENERAL SUPERFUND SECTION, SEPTEMBER 1995

State site name	City/County	Notes(a)
* * * * * KS Ace Services .....	Colby .....	*
* * * * * ME West Site/Hows Corners .....	Plymouth .....	*
* * * * * NJ Horseshoe Road .....	Sayreville .....	*

**42 CFR Chapter IV**

**[BPD-830-FC]**

**Medicare Program; Authority Citations: Technical Amendments**

**ACTION:** Final rule with comment period.

**SUMMARY:** This technical regulation provides uniform simplified authority citations for most of the parts that pertain to the Medicare program, and revises the sections or paragraphs that explain the statutory basis for the substance of the rules.

These changes are consistent with the use of authority citations and paragraphs identified as "statutory

basis" in the regulations that pertain to the Medicaid program.

They are intended to put an end to the continual changing of the current lengthy authority citations and, by clarifying and, where needed, expanding the "statutory basis" portions, ensure better understanding of that basis.

**DATES: Effective date:** These rules are effective as of September 29, 1995.

**Comment date:** We will consider comments received by: November 28, 1995.

**ADDRESSES:** Please mail written comments (an original and 3 copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: BPD-830-FC, P.O. Box 7195, Baltimore, MD 21207.

If you prefer, you may deliver your written comments (original and 3 copies) to one of the following addresses:

Room 309-G, Hubert H. Humphrey Building, 200 Independence Avenue, SW, Washington, DC 20201-0001, or

Room C5-09-26, 7500 Security Boulevard, Baltimore, MD 21244-1850

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code BPD-830-FC. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after publication of the document, in Room 309-G of the Department's offices at 200 Independence Avenue, SW, Washington, DC, Monday through Friday of each week from 8:30 a.m. to 5 p.m., phone: (202) 690-7890.

**FOR FURTHER INFORMATION CONTACT:** Luisa V. Iglesias (202) 690-6383.

**SUPPLEMENTARY INFORMATION:** Background

In 1978 we revised, reorganized, and redesignated the Medicaid regulations. At that time we simplified the authority citations to limit them to those statutory

provisions that explicitly authorize issuance of regulations, and to add to each part of the rules a section or paragraph to explain the statutory provisions that are implemented by the part.

Recently, we have begun to use the same kind of authority citations and explanations in the Medicare regulations.

#### Provisions of the Regulations

By establishing the simplified authority citation for most of the parts of the HCFA rules that pertain to Medicare, we—

- Make it unnecessary to keep revising individual citations as different parts are amended by newly issued regulations;

- Achieve consistency with the Medicaid regulations; and

- Provide guidance to readers with respect to the statutory basis of the rules.

For parts that have subparts dealing with very different subject matter, it is sometimes preferable to have “statutory basis” sections or paragraphs in each subpart. These clarifying additions do not affect the substance of the rules.

In part 414, we have made a nomenclature change for consistent use of the term “physician services”.

#### Collection of Information Requirements

This rule contains no new information collection requirements subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

#### Response to Comments

Although this is a final rule, we will consider timely comments from anyone who believes that, in making these technical changes we have unintentionally altered the substance of the rule. If we revise this rule as a result of comments, we will discuss all timely comments in the preamble to the revised rule.

#### Waiver of Proposed Rulemaking and Delayed Effective Date

The changes made by this rule are technical and editorial in nature and do not alter the substance of the regulations. Their aim is to simplify the authority citations to limit them to statutory sections that explicitly authorize or require issuance of regulations. Accordingly, we find that there is good cause to waive proposed rulemaking procedures as unnecessary.

In addition, it is important, for the convenience of the public, that these technical changes be effective as of

October 1, 1995 so that they will be included in the 1995 edition of the Code of Federal Regulations on which the public relies. Accordingly, we find that there is also good cause to waive the usual 30-day delay in the effective date.

#### Regulatory Flexibility Statement

Consistent with the Regulatory Flexibility Act (RFA) and section 1102(b) of the Social Security Act, we prepare a regulatory flexibility analysis for each rule, unless we can certify that the particular rule will not have a significant economic impact on a substantial number of small entities, or a significant impact on the operation of a substantial number of small rural hospitals.

The RFA defines “small entity” as a small business, a nonprofit enterprise, or a government jurisdiction (such as a county, city, or township) with a population of less than 50,000. We also consider all providers and suppliers of services to be small entities. For purposes of section 1102 of the Act, we define a small rural hospital as a hospital that has fewer than 50 beds and is not located in a Metropolitan Statistical Area.

We have not prepared a regulatory flexibility analysis because we have determined and we certify that these rules will not have a significant economic impact on a substantial number of small entities or a significant impact on the operation of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this rule was not reviewed by the Office of Management and Budget.

#### List of Subjects

##### 42 CFR Part 401

Claims, Freedom of information, Health facilities, Medicare, Privacy.

Health facilities, Medicare, Reporting and recordkeeping requirements.

*42 CFR Part 498*

Administrative practice and procedure, Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

42 CFR Chapter IV is amended as set forth below.

A. In the following parts, the authority citation is revised to read as set forth below:

Parts 406, 407, 408, 411, 412, 416, 418, 462, 466, 476, 489, and 498.

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

**PART 401—GENERAL ADMINISTRATIVE REQUIREMENTS**

B. In part 401, the following changes are made:

1. The authority citation for part 401, which was published at 59 FR 56232 (November 10, 1994) is removed and the following authority citation is added at the end of the table of contents:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1895hh). Subpart F is also issued under the authority of the Federal Claims Collection Act (31 U.S.C. 3711).

2. The authority citations at the beginning of subparts B and F are removed.

**PART 403—SPECIAL PROGRAMS AND PROJECTS**

C. Part 403 is amended as set forth below.

1. The following authority citation is added at the end of the table of contents:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

2. The authority citations at the beginning of subparts B, C and E are removed.

**PART 409—HOSPITAL INSURANCE BENEFITS**

D. Part 409 is amended as set forth below.

1. The authority citation for part 409 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (U.S.C. 1302 and 1895hh).

2. Section 409.1 is revised to read as follows:

**§ 409.1 Statutory basis.**

This part is based on the identified provisions of the following sections of the Social Security Act:

(a) Sections 1812 and 1813 establish the scope of benefits of the hospital insurance program under Medicare Part A and set forth deductible and coinsurance requirements.

(b) Sections 1814 and 1815 establish conditions for, and limitations on, payment for services furnished by providers.

(c) Section 1820 establishes the rural primary care hospital program.

(d) Section 1861 describes the services covered under Medicare Part A, and benefit periods.

(e) Section 1862(a) specifies exclusions from coverage; and section 1862(h) requires a registry of pacemakers.

(f) Section 1881 sets forth the rules for individuals who have end-stage renal disease (ESRD), for organ donors, and for dialysis, transplantation, and other services furnished to ESRD patients.

**PART 413—PRINCIPLES OF REASONABLE COST REIMBURSEMENT; PAYMENT FOR END-STAGE RENAL DISEASE SERVICES**

E. Part 413 is amended as set forth below.

1. The authority citation for part 413 continues to read as follows:

Authority: Secs. 1102, 1861(v)(1)(A), and 1871 of the Social Security Act (42 U.S.C. 1302, 1395x(v)(1)(A), and 1395hh).

2. Section 413.1(a) is amended to revise paragraphs (a)(1) and (a)(3) to read as follows:

**§ 413.1 Introduction.**

(a) *Basis, scope, and applicability*—(1) *Statutory basis*—(i) *Basic provisions*. (A) Section 1815 of the Act requires that the Secretary make interim payments to

providers and periodically determine the amount that should be paid under Part A of Medicare to each provider for the services it furnishes.

(B) Section 1814(b) of the Act (for Part A) and section 1833(a) (for Part B) provide for payment on the basis of the lesser of a provider's reasonable costs or customary charges.

(C) Section 1861(v) of the Act defines "reasonable cost".

(ii) *Additional provisions*. (A) Section 1138(b) of the Act specifies the conditions for Medicare payment for organ procurement costs.

(B) Section 1814(j) of the Act provides for exceptions to the "lower of costs or charges" provisions.

(C) Section 1833 (a)(4) and (i)(3) of the Act provide for payment of a blended amount for certain surgical services furnished in a hospital's outpatient department.

(D) Section 1833(n) of the Act provides for payment of a blended amount for outpatient hospital diagnostic procedures such as radiology.

(E) Section 1834(c)(1)(C) of the Act establishes the method for determining Medicare payment for screening mammograms performed by hospitals.

(F) Section 1834(g) of the Act provides for payment for rural primary care hospital (RPCH) outpatient services on the basis of prospectively determined amounts.

(G) Section 1881 of the Act authorizes payment for services furnished to ESRD patients.

(H) Section 1883 of the Act provides for payment for post-hospital SNF care furnished by a rural hospital that has swing-bed approval.

(I) Sections 1886 (a) and (b) of the Act impose a ceiling on the rate of increase in hospital inpatient costs.

(J) Section 1886(h) of the Act provides for payment to a hospital for the services of interns and residents in approved teaching programs on the basis of a "per resident" amount.

\* \* \* \* \*

(3) *Applicability*. The payment principles and related policies set forth in this part are binding on HCFA and its fiscal intermediaries, on the Provider Reimbursement Review Board, and on the entities listed in paragraph (a)(2) of this section.

**PART 414—PAYMENT FOR PART B MEDICAL AND OTHER HEALTH SERVICES**

(F) Part 414 is amended as set forth below.

1. The authority citation for part 414 is revised to read as follows:

Authority: Secs. 1102, 1871, and 1881(b)(1) of the Social Security Act (42 U.S.C. 1302, 1395hh, and 1395rr(b)(1)).

2. Nomenclature change. In part 414, in the following locations, the words "physicians' services" are revised to read "physician services": §§ 414.1, 414.2 (in the definition of the term, the introductory text and paragraph (2)), 414.22, 414.24 (heading and paragraph (c)(2)), 414.30, 414.32 (heading and paragraph (b)), 414.40 (paragraph (b) introductory text), 414.44 (paragraphs (a)(1), (b) introductory text, (d), (e), and (f)), and 414.58 (heading and paragraph (a)).

3. The authority citation at the beginning of subpart A is removed.

4. Section 414.1 is revised to read as follows:

**§ 414.1 Basis and scope.**

This part implements the indicated provisions of the following sections of the Act:

1833—Rules for payment for most Part B services.

1834(a) and (h)—Amounts and frequency of payments for durable medical equipment and for prosthetic devices and orthotics and prosthetics.

1848—Fee schedule for physician services.

1881(b)—Rules for payment for services to ESRD beneficiaries.

1887—Payment of charges for physician services to patients in providers.

**PART 420—PROGRAM INTEGRITY: MEDICARE**

G. Part 420 is amended as set forth below.

The authority citation for part 420 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

**§ 420.200 [Amended]**

2. In the first sentence of § 420.200, "1833(e)," and the words ", and 1866" are removed, and "1861" is revised to read "and 1861(v)(1)(i)".

**PART 421—INTERMEDIARIES AND CARRIERS**

H. Part 421 is amended as set forth below.

1. The authority citation for part 421 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

2. § 421.1 is amended to redesignate paragraph (b) as paragraph (c), revise paragraph (a) and add a new paragraph (b) to read as follows:

**§ 421.1 Basis and scope.**

(a) This part is based on the indicated provisions of the following sections of the Act:

1124—Requirements for disclosure of certain information.

1816 and 1842—Use of organizations and agencies in making Medicare payments to providers and suppliers of services.

(b) Section 421.118 is also based on 42 U.S.C. 1395b-1(a)(1)(F), which authorizes demonstration projects involving intermediary agreements and carrier contracts

\* \* \* \* \*

**PART 424—CONDITIONS FOR MEDICARE PAYMENT**

I. Part 424 is amended as set forth below.

1. The authority citation for part 424 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

2. § 424.1 is amended to revise paragraph (a) to read as follows:

**§ 424.1 Basis and scope.**

(a) *Statutory basis.* (1) This part is based on the indicated provisions of the following sections of the Act:

1814—Basic conditions for, and limitations on, Medicare payments for Part A services.

1815—Payment to providers for Part A services.

1835—Procedures for payment to providers for Part B services.

1842(b)(3)(B)(ii)—Assignment of Part B Medicare claims.

1842(b)(6)—Payment to entities other than the supplier.

1848—Payment for physician services.

1870(e) and (f)—Settlement of claims after death of the beneficiary.

(2) Section 424.444(c) is also based on section 216(j) of the Act.

**PART 473—RECONSIDERATIONS AND APPEALS**

J. Part 473 is amended as set forth below.

1. The authority citation for part 473 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

**§ 473.12 [Amended]**

2. In § 473.12, the following changes are made:

a. Paragraph (b) is redesignated as paragraph (c).

b. Paragraph (a) is redesignated as paragraph (b) and revised, and a new paragraph (a) is added, to read as set forth below.

c. In redesignated paragraph (c), "will review" is revised to read "reviews".

**§ 473.12 Statutory basis.**

(a) Under section 1154 of the Act, a PRO may make an initial determination that services furnished or proposed to be furnished are not reasonable, necessary, or delivered in the most appropriate setting.

(b) Under section 1155 of the Act, the following rules apply:

(1) A Medicare beneficiary, a provider, or an attending practitioner who is dissatisfied with an initial denial determination under paragraph (a) of this section is entitled to a reconsideration by the PRO that made that determination.

(2) The beneficiary is also entitled to the following:

(i) A hearing by an administrative law judge if \$200 or more is still in controversy after a reconsidered determination.

(ii) Judicial review if \$2000 or more is still in controversy after a final determination by the Department.

\* \* \* \* \*

**PART 482—CONDITIONS OF PARTICIPATION FOR HOSPITALS**

K. Part 482 is amended as set forth below.

1. The authority citation for part 482 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

**§ 482.1 [Amended]**

2. In § 482.1, the following changes are made:

a. The heading of paragraph (a) is revised to read "*Statutory basis.*".

b. Paragraph (a)(3) is redesignated as paragraph (a)(5).

c. New paragraphs (a)(3) and (a)(4) are added to read as set forth below.

d. In paragraph (b), "subpart S of part 405" is revised to read "subpart A of part 488".

**§ 482.1 Basis and scope.**

(a) *Statutory basis.* \* \* \*

(3) Sections 1861(k) and 1902(a)(30) of the Act provide that hospitals participating in Medicare and Medicaid must have a utilization review plan that meets specified requirements.

(4) Section 1883 of the Act sets forth the requirements for hospitals that provide long term care under an agreement with the Secretary.

\* \* \* \* \*

**PART 483—REQUIREMENTS FOR STATES AND LONG TERM CARE FACILITIES**

L. Part 483 is amended as set forth below.

1. The statutory citation for part 483 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

**§ 483.1 [Amended]**

2. In § 483.1, the following changes are made:

a. The heading of paragraph (a) is revised to read “*Statutory basis.*”.

b. Paragraph (a)(2) is redesignated as paragraph (a)(3) and a new paragraph (a)(2) is added to read as follows:

**§ 483.1 Basis and scope.**

(a) *Statutory basis.* \* \* \*

(2) Section 1861(l) of the Act requires the facility to have in effect a transfer agreement with a hospital.

**§ 483.150 [Amended]**

3. In § 483.150, the following changes are made:

a. The section heading is revised to read as set forth below.

b. Paragraphs (a) and (b) are redesignated as paragraphs (b) and (c) with the headings added as set forth below.

c. A new paragraph (a) is added to read as set forth below.

**§ 483.150 Statutory basis; Deemed meeting or waiver of requirements.**

(a) *Statutory basis.* This subpart is based on sections 1819(b)(5) and 1919(b)(5) of the Act, which establish standards for training nurse-aides and for evaluating their competency.

(b) *Deemed meeting of requirements.* \* \* \*

(c) *Waiver of requirements.* \* \* \*

4. Section 483.200 is revised to read as follows:

**§ 483.200 Statutory basis.**

This subpart is based on sections 1819(e)(3) and (f)(3) and 1919(e)(3) and (f)(3) of the Act, which require States to make available, to individuals who are discharged or transferred from SNFs or NFs, an appeals process that complies with guidelines issued by the Secretary.

**PART 484—CONDITIONS OF PARTICIPATION: HOME HEALTH AGENCIES**

M. Part 484 is amended as set forth below.

1. Section 484.1 is revised to read as follows:

**§ 484.1 Basis and scope.**

(a) *Basis and scope.* This part is based on the indicated provisions of the following sections of the Act:

(1) Sections 1861(o) and 1891 establish the conditions that an HHA

must meet in order to participate in Medicare.

(2) Section 1861(z) specifies the Institutional planning standards that HHAs must meet.

(b) This part also sets forth additional requirements that are considered necessary to ensure the health and safety of patients.

**PART 488—SURVEY AND CERTIFICATION PROCEDURES**

N. Part 488 is amended as set forth below.

1. The authority citation for part 488 is revised to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1895hh).

2. A new § 488.2 is added to read as follows:

**§ 488.2 Statutory basis.**

This part is based on the indicated provisions of the following sections of the Act:

1128—Exclusion of entities from participation in Medicare.

1128A—Civil money penalties.

1814—Conditions for, and limitations on, payment for Part A services.

1819—Requirements for SNFs.

1861(f)—Requirements for psychiatric hospitals.

1861(z)—Institutional planning standards that hospitals and SNFs must meet.

1861(ee)—Discharge planning guidelines for hospitals.

1864—Use of State survey agencies.

1865—Effect of accreditation.

1880—Requirements for hospitals and SNFs of the Indian Health Service.

1883—Requirements for hospitals that provide SNF care.

1902—Requirements for participation in the Medicaid program.

1913—Medicaid requirements for hospitals that provide NF care.

1919—Medicaid requirements for NFs.

(Catalog of Federal Domestic Assistance Program No. 93.778, Medical Assistance; Program No. 93.773, Medicare Hospital Insurance; Program No. 93.774, Medicare Supplementary Medical Insurance)

Dated: September 15, 1995.

Bruce C. Vladeck,

*Administrator, Health Care Financing Administration.*

BILLING CODE 4120-01-P

**42 CFR Part 400**

[OFH-018-F]

**Medicare and Medicaid Programs; Approved Information Collection Requirements**

AGENCY: Health Care Financing Administration (HCFA), HHS.

**ACTION:** Technical final rule.

**SUMMARY:** This technical final rule updates our display of approved control numbers for the collection of information that have been assigned to us by the Office of Management and Budget (OMB). OMB regulations require each agency to include the approval numbers in the agency's rules.

**EFFECTIVE DATE:** This regulation is effective September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Zaneta Davis, 410-786-2094.

**SUPPLEMENTARY INFORMATION:**

I. Background

The Paperwork Reduction Act of 1980 (PRA 1980), Public Law 90-620, Title 44 U.S.C. Chapter 35, requires Federal agencies to minimize burden and costs associated with information collection. The Director of the Office of Management and Budget (OMB) promulgated regulations to implement the provisions of PRA 1980 at 5 CFR Part 1320. The OMB regulations include a requirement that Federal agencies obtain OMB approval of collection of information requirements that are contained in any regulations published by the agencies in the Federal Register. After approval of the information collection by OMB, Federal agencies are further required to publish the control number assigned by OMB as part of the agency's regulations. To comply with the OMB requirement and as a means of notifying the public that our information collection requirements have been approved, we have established a general regulation under 42 CFR 400.310 to display the valid OMB control numbers and the applicable regulation sections. We routinely update § 400.310 to add sections that have been approved by OMB, delete sections that are no longer in effect, or redesignate approved sections.

II. Provisions of the Rule

We are revising § 400.310, which sets forth our display of valid OMB control numbers for 42 CFR.

*Additions*

We have identified below the sections we are adding to § 400.310 because they have been approved by OMB.

Sections in 42 CFR that contain collections of information	Current OMB control No.
405.509 .....	0938—0666

1004.40, 1004.50, 1004.60, 1004.70 .....	0938—0444

**Deletions**

We are deleting § 417.431 from § 400.310 because it was added in error. The OMB approval number 0938—0610 had been assigned to sections that appeared in parts 417 and 431 and are correctly identified in § 400.310.

**Redesignations**

Several regulation sections that were previously approved by OMB were subsequently redesignated under other sections and are listed below.

Old section	New section
405.1413 .....	486.104
405.1414 .....	486.106
405.1416 .....	486.110
405.1716 .....	485.709
405.1717 .....	485.711
405.1720 .....	485.717
405.1721 .....	485.719
405.1722 .....	485.721

Old section	New section
405.1723 .....	485.723
405.1724 .....	485.725
405.1725 .....	485.727
405.1726 .....	485.729
405.1733 .....	486.155
405.1736 .....	486.161
405.1737 .....	486.163
411.65 .....	411.165
417.107 .....	417.126

For the convenience of the reader, we are presenting the entire updated display of all OMB approval numbers in this final rule.

**III. Regulatory Impact Statement**

We generally prepare a regulatory flexibility analysis that is consistent with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 through 612) unless we certify that a final rule will not have

a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Social Security Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the Regulatory Flexibility Act. For purposes of section 1102(b) of the Social Security Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 50 beds.

As noted above, this regulation is technical in nature and merely updates the display of currently valid control numbers assigned by the OMB to collections of information contained in our regulations. Therefore, we certify, that this final rule will not result in a

significant economic impact on a substantial number of small entities and will not have a significant economic impact on the operations of a substantial number of small rural hospitals.

Accordingly, we are not preparing analyses for either the Regulatory Flexibility Act or section 1102(b) of the Social Security Act.

**IV. Waiver of Proposed Rulemaking and Delay in Effective Date**

We ordinarily publish a general notice of proposed rulemaking in the Federal Register, and invite public comment on the proposed rule. The proposed rule includes a reference to the legal authority under which the rule is proposed, and a description of the subjects and issues involved. In addition, section 1871 of the Social Security Act generally requires a 60-day public comment period. However, this procedure can be waived when an agency finds good cause that a notice-and-comment procedure is impracticable, unnecessary, or contrary to the public interest, and incorporates a statement of the finding and its reasons in the rule issued.

We routinely publish a notice in the Federal Register when an information collection requirement clearance request that is identified in a rule or notice is submitted to OMB and the public is offered an opportunity to comment. This regulation is technical in nature and merely updates the display of OMB-assigned control numbers of approved collection of information requirements contained in our regulations. Therefore, it would be redundant and provide an unnecessary delay to solicit comments on this display of the approved OMB control numbers.

For the above reasons, we find good cause to waive both proposed notice and comment rulemaking procedure and a delay in the effective date as impracticable, unnecessary, and contrary to the public interest. Under these circumstances publication of the correct up-to-date rules without further delay best serves those governed by these regulations.

**List of Subjects in 42 CFR Part 400**

Grant program—health, Health facilities, Health maintenance organizations (HMOs), Medicaid, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 400 is amended as set forth below.

**PART 400—INTRODUCTION; DEFINITIONS**

1. The authority citation for part 400 continues to read as follows:

Authority: Sections 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh) and 44 U.S.C. Chapter 35.

2. Section 400.310 is revised to read as follows:

**§ 400.310 Display of currently valid OMB control numbers.**

**Medicare Program—Providers and Suppliers of Specialized Services: Technical Amendments**

**AGENCY:** Health Care Financing Administration (HCFA), HHS.

**ACTION:** Final rule with comment period.

**SUMMARY:** This rule makes editorial and clarifying changes in the regulations that pertain to providers and suppliers of specialized services. It also adds a new subpart A to those that pertain to suppliers. These changes are purely technical and have no substantive effect on the Medicare program.

**DATES:** *Effective date:* This rule is effective as of September 27, 1991.

*Comment date:* We will consider comments received by November 28, 1995.

**ADDRESSES:** Please mail original and 3 copies of your comments to the following address: Health Care

Financing Administration, Department of Health and Human Services, Attention: BPD-836-FC, P.O. Box 26676, Baltimore, MD 21207.

If you prefer, you may deliver original and 3 copies of your comments to either of the following addresses:

Room 309-G, 200 Independence Avenue, SW, Washington, DC 20201  
Room C5-09-26, 7500 Security Boulevard, Baltimore, MD 21244-1850

Due to staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code BPD-836-FC.

Written comments received timely will be available for public inspection as they are received, generally beginning approximately three weeks after publication of the document, in room 309G of the Department's offices at 200 Independence Avenue, SW, Washington, DC, Monday through Friday, from 8:30 a.m. to 5 p.m. (Phone: (202) 690-7890).

**FOR FURTHER INFORMATION CONTACT:** Luisa V. Iglesias, (202) 690-6383.

**SUPPLEMENTARY INFORMATION:** On January 9, 1995, we published a technical regulation identified as BPD-798-FC (at 60 FR 2325) to reorganize the HCFA regulations that pertain to specialized services. The rules that pertain to specialized services furnished by providers were redesignated under part 485, and the rules that pertain to specialized services furnished by suppliers were redesignated under a new part 486. As explained in the preamble to BPD-798-FC, regulations on organ procurement organizations (OPOs) and on screening mammographies were not relocated to part 486 because they were in the process of undergoing substantive changes.

No comments were received on the January 9 publication. However, for reasons indicated below, we need to make changes in parts 485 and 486.

The final rules on OPOs have been delayed. To ensure that in the October 1, 1995 edition of the Code of Federal Regulations the current rules on OPOs (which are not providers) appear in the appropriate part, we are redesignating them as subpart G of part 486.

The rules on mammographies have been redesignated under § 410.34 of the HCFA regulations and that section specifies that certain Food and Drug Administration rules also apply.

We are adding a new "Basis and scope" section to part 486. One purpose of the new section is to inform the reader of where the conditions for

coverage for other specialized services furnished by suppliers are to be found.

This rule also—

- Clarifies and simplifies 3 definitions in part 485;
- Provides uniform heading format for all sections of redesignated subpart G and revises some of those headings; and
- Corrects internal cross-references as required by the redesignations.

**Collection of Information Requirements**

This rule contains no new information collection requirements subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

**Waiver of Proposed Rulemaking and Delayed Effective Date**

The changes made by this rule are purely technical and editorial and have no substantive impact. Accordingly, we find that there is good cause to waive proposed rulemaking procedures as unnecessary.

In addition, it is important, for the convenience of the public, that these changes be effective as of October 1, 1995, so that they will appear in the 1995 edition of the Code of Federal Regulations on which the public relies. Accordingly, we find that there is also good cause to waive the usual 30-day delay in the effective date.

**Response to Comments**

Although this is a final rule, we will consider timely comments from anyone who believes that, in making the technical and editorial changes, we have unintentionally changed the substance of the regulations. Although we cannot respond to comments individually, if we revise this rule as a result of comments, we will discuss all timely comments in the preamble to the revised rule.

**Regulatory Impact Statement**

Consistent with the Regulatory Flexibility Act (RFA) and section 1102(b) of the Social Security Act, we prepare a regulatory flexibility analysis for each rule unless we can certify that the particular rule will not have a significant economic impact on a substantial number of small entities or a significant impact on the operation of a substantial number of small rural hospitals.

The RFA defines "small entity" as a small business, a nonprofit enterprise, or a governmental jurisdiction (such as a county, city, or township) with a population of less than 50,000. We also

consider all providers and suppliers to be small entities. For purposes of section 1102(b) of the Act, we define small rural hospital as a hospital that has fewer than 50 beds, and is not located in a Metropolitan Statistical Area.

We have not prepared a regulatory flexibility analysis because we have determined and we certify that this rule (which makes only technical and editorial changes) will not have a significant economic impact on a substantial number of small entities nor a significant impact on the operation of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this rule was not reviewed by the Office of Management and Budget.

List of Subjects

42 CFR Part 485

Grant programs—health, Health facilities, Medicaid, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 486

Health professionals, Medicare, Organ procurement, X-rays.

42 CFR Chapter IV is amended as set forth below.

**PART 485—CONDITIONS OF PARTICIPATION; PROVIDERS OF SPECIALIZED SERVICES**

A. Part 485 is amended as set forth below.

1. The authority citation for part 485 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

**§§ 485.301 through 485.309 and 485.311 [Redesignated]**

2. Subpart D of part 485, consisting of §§ 485.301 through 485.309 and 485.311, is redesignated as subpart G of part 486 in accordance with the following redesignation table:

Old section (subpart D of part 485)	New section (subpart G of part 486)
485.301 .....	486.301
485.302 .....	486.302
485.303 .....	486.304
485.304 .....	486.306
485.305 .....	486.308
485.306 .....	486.310
485.307 .....	486.314
485.308 .....	486.316
485.309 .....	486.318
485.311 .....	486.325

3. Section 485.703 is amended to revise the definitions of “clinic”, “rehabilitation agency”, and “supervision”, to read as follows:

**§ 485.703 Definitions.**

*Clinic.* A facility that is established primarily to furnish outpatient physician services and that meets the following tests of physician involvement:

(1) The medical services are furnished by a group of three or more physicians practicing medicine together.

(2) A physician is present during all hours of operation of the clinic to furnish medical services, as distinguished from purely administrative services.

\* \* \* \* \*

*Rehabilitation agency.* An agency that—

(1) Provides an integrated multidisciplinary rehabilitation program designed to upgrade the physical functioning of handicapped disabled individuals by bringing specialized rehabilitation staff together to perform as a team; and

(2) Provides at least the following services:

(i) Physical therapy or speech-language pathology services.

(ii) Social or vocational adjustment services.

*Supervision.* Authoritative procedural guidance that is for the accomplishment of a function or activity and that—

(1) Includes initial direction and periodic observation of the actual performance of the function or activity; and

(2) Is furnished by a qualified person—

(i) Whose sphere of competence encompasses the particular function or activity; and

(ii) Who (unless otherwise provided in this subpart) is on the premises if the person performing the function or activity does not meet the assistant-level practitioner qualifications specified in § 485.705.

4. In the following sections, the section heading is amended to change the dash to a colon and to capitalize the first word after the colon:

§§ 485.709, 485.713, 485.717, 485.719, and 485.725.

**PART 486—CONDITIONS FOR COVERAGE OF SPECIALIZED SERVICES FURNISHED BY SUPPLIERS**

B. Part 486 is amended as set forth below.

1. The heading of part 486 is revised to read as set forth above.

2. The authority citation for part 486 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

3. A new subpart A is added, to read as follows:

**Subpart A—General Provisions**

Sec.

486.1 Basis and scope.

**§ 486.1 Basis and scope.**

(a) *Statutory basis.* This part is based on the following sections of the Act:

1138(b)—for coverage of organ procurement services.

1861(p)—for coverage of outpatient physical therapy services furnished by physical therapists in independent practice.

1861(s) (3), (15), and (17)—for coverage of portable X-ray services.

(b) *Scope.* (1) This part sets forth the conditions for coverage of certain specialized services that are furnished by suppliers and that are not specified in other portions of this chapter.

(2) The conditions for coverage of other specialized services furnished by suppliers are set forth in the following regulations which, unless otherwise indicated, are part of this chapter:

(i) Ambulatory surgical center (ASC) services—Part 416.

(ii) Ambulance services—Part 410, subpart B.

(iii) ESRD services—Part 405, subpart U.

(iv) Laboratory services—Part 493.

(v) Mammography services—Part 410, subpart B (§ 410.34) and 21 CFR Part 900, subpart B, of the Food and Drug Administration regulations.

(vi) Rural health clinic and Federally qualified health center services—Part 491, subpart A.

**§ 486.110 [Amended]**

4. In § 486.110(b), “outlined in § 405.1415.” is revised to read “outlined in § 486.108.”.

5. Subparts E and F are added and reserved.

6. In newly designated subpart G, the headings of the specified sections are revised to read as follows:

- § 486.304 **General requirements.**
- § 486.306 **Qualifications for designation as an OPO.**
- § 486.308 **Condition: Participation in organ procurement and transplantation network.**
- § 486.310 **Condition: Adherence to performance standards.**
- § 486.314 **Effect of failure to meet requirements.**
- § 486.325 **Termination of agreement with HCFA.**

7. In newly designated subpart G, all references to the section numbers listed in the following left-hand column are corrected to read as shown in the right-hand column:

Sec.	Sec.
485.303 .....	486.304
485.304 .....	486.306
405.305 .....	486.308
485.306 .....	486.310
485.309 .....	486.318

The references that are being corrected appear in the following sections: §§ 486.302, 486.304(b)(3) and (b)(5) through (b)(7), 486.314, 486.316 introductory text, and 486.318(b).

(Catalog of Federal Domestic Assistance Program No. 93-773, Medicare—Hospital Insurance, and No. 93-774, Medicare—Supplementary Medical Insurance)

BILLING CODE 4120-01-P

**DEPARTMENT OF THE INTERIOR**

**Bureau of Land Management**

**43 CFR Parts 5460, 5510, 9230, and 9260**

[WO-230-6310-02-24 1A; Circular No. 2660]

RIN 1004-AB97

**Free Use of Timber: General; Trespass; Law Enforcement: Criminal**

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Final rule.

**SUMMARY:** This final rule amends provisions of the existing Bureau of Land Management (BLM) regulations on timber trespass. The rule edits the existing regulations to make them more orderly and easier to read, and adds a list of prohibited acts necessary to

provide guidance concerning the administration of forest product contracts and free use permits, and law enforcement.

**EFFECTIVE DATE:** October 30, 1995.

**ADDRESSES:** Suggestions or inquiries should be sent to Director (230), Bureau of Land Management, 1849 C Street, NW., Washington, DC 20240.

**FOR FURTHER INFORMATION CONTACT:** Bob Bierer, (202) 452-7755.

**SUPPLEMENTARY INFORMATION:** The BLM published a proposed rule on timber trespass in the Federal Register on September 13, 1993 (58 FR 47847), requesting comments by November 12, 1993. During the 60-day comment period, comments were received from 3 forest industry associations. The comments are discussed in the same sequence as the sections of the proposed rule. Many of the suggestions were adopted and are reflected in the final rule.

The rule is a continuation of the effort to provide more effective control of trespass of timber and other vegetative resources on public lands. It provides further guidance to supplement the final rule published on March 11, 1991 (56 FR 10173), and includes specific prohibited acts to which BLM law enforcement personnel can refer to in issuing citations.

**General Comments**

The three comments noted in support of the proposed rule that theft of any timber is a serious matter and there is continued support for strong law enforcement activities, including prosecution of any person found guilty of stealing federal timber.

The law enforcement and resource protection program of the BLM is quite often involved in detecting and resolving trespasses against and thefts of timber and other vegetative resources. Uncertainty in prohibited acts or applicable penalties often causes their efforts to obtain criminal prosecution to be unsuccessful. The prohibited acts set forth in this rule will enhance law enforcement actions and serve as a deterrent to future trespass.

One comment suggested that a timber contract should allow sufficient flexibility to assure that the objectives of both parties are satisfied, especially when circumstances arise that were unforeseen at the time of contract formation. That is the intent of this final rule.

Comments on Amendment of 43 CFR Part 5460

Two comments stated that the prohibited acts relate only to BLM-

administered lands and that the final rule should clearly state this limitation. The language in § 5462.2(a) has been amended to clarify this point.

Another comment suggested deletion of the phrase "See § 9239.1 of this title for trespass and subpart 9265 of this title for criminal prosecution" from 5462.2(a). The comment has been adopted. The cross-reference is rendered unnecessary by the addition of the penalty provision at § 5462.2(c).

A comment suggested that the language in § 5462.2(b)(1) is ambiguous as to what may constitute "otherwise damaging any timber" and suggested that additional specific criteria as to what constitutes "damage" be developed to avoid arbitrary and inconsistent on-the-ground decisions. The prework conference required prior to commencement of operations provided for in the BLM Timber Sale Procedure Handbook is designed to discuss and clarify concerns such as this, and, in the context of cutting and removing timber, we do not consider "otherwise damaging any timber" to be ambiguous. The comment was not adopted.

On § 5462.2(b)(2), the comments pointed out that while it is proper in most situations to require a BLM employee to mark or designate all standing timber before it can be cut, there are instances where a logger has conflicting direction from two different Federal agencies or regulations. For example, Occupational Safety and Health Act (OSHA) regulations require operators to fell any tree constituting a hazard to safe working conditions immediately, and failure to do so may subject them to a fine. The only option available to the operator is to leave the area until a BLM employee arrives and designates the tree for felling, which is impractical for both parties. The comments noted that some allowance needs to be made for safety, or the agency must guarantee timely timber sale administration. Again, prework conferences are intended to resolve potential conflicts and procedural problems such as this, and the comments were not adopted in the final rule.

Three comments recommended removing § 5462.2(b)(3), because BLM no longer offers scaled sales. The comments were not adopted since this prohibited act is intended primarily for small salvage and firewood sales, and the BLM may occasionally offer scaled salvage timber sales where appropriate to harvest dead timber promptly to preclude excessive deterioration.

Three comments suggested that § 5462.2(b)(4) should be changed to

specify that marking or designating products in a similar manner to that employed by BLM applies only to BLM-administered lands. These comments were adopted and language added to clarify this point.

Three comments argued that proposed § 5462.2(b)(6) could result in numerous timber sale defaults, not related to timber theft. Many timber sale contract violations are minor and should be dealt with under the terms and conditions of the contract. The recommendation to remove this paragraph has been adopted in the final rule.

Three comments stated that the language in § 5462.2(b)(5) and (7) would require all persons working on a BLM timber sale or hauling logs from a sale to have copies of the contract or permit in their possession and that this is unreasonable. They suggested that requiring the purchaser or its designated representative to have a copy of the contract, as well as requiring each truck driver to have copies of the haul permit, should satisfy any accountability objective. This is an acceptable alternative, and provides for sufficient documentation and accountability. Language has therefore been added to adopt these comments.

One comment noted that § 5462.2(b)(7) authorizes any BLM employee to stop people associated with a timber sale at any time and demand that they produce a permit or contract. It questions whether all BLM employees have sufficient experience with timber sales to warrant such authority. Language was added to limit the BLM personnel to those persons acting within their designated authority as sale inspectors, contract administrators, contracting officers, and law enforcement officers.

Several comments stated that BLM lacks authority to enforce State and local laws, especially in the absence of a cooperative law enforcement agreement, and that BLM employees should concentrate their efforts on on-the-ground inspection of timber sale operations rather than enforcing State and local laws. Section 5462.2(b)(8) of the proposed rule has been amended in the final rule to make it consistent with the Federal Land Policy and Management Act provision for cooperation with State and local regulatory and law enforcement officials (43 U.S.C. 1733(d)) and the language in § 5462.2(b)(1).

For purposes of clarity, the phrase "by fraud" in § 5462.2(b)(10) of the proposed rule has been removed and replaced with language more precisely defining what constitutes fraud as it

relates to timber and other vegetative resources.

Three comments suggested that BLM define what constitutes a negligent act by an operator referred to in § 5462.2(b)(11). One of the comments added that the concept of negligence should be removed and the BLM focus on "intentional destruction." These comments were not adopted in the final rule. The prework conferences provided for in standard BLM timber sale contracts are the appropriate forums to discuss and clarify what constitutes a "negligent act."

The paragraphs of § 5462.2(b) have been renumbered in the final rule to accommodate the removal of paragraphs (3) and (6).

A comment recommended addition of a new § 5462.3 entitled "Penalties" with a description of the penalties for knowingly and willfully violating the prohibited acts under § 5462.2(b) to make it clear that criminal penalties apply to the prohibited acts. This comment has been adopted in the final rule, but by adding a new paragraph (c) to § 5462.2 rather than a new § 5462.3.

#### Comments on Amendments to 43 CFR Subpart 5511

One comment recommended removal of the phrase "See § 9239.1 of this title for trespass and subpart 9265 of this title for criminal prosecution" from § 5511.4(a). The comment was adopted. The cross-reference is rendered unnecessary by the addition of § 5511.5—Penalties.

A comment recommended addition of a new § 5511.5 entitled "Penalties" with a description of the penalties for knowingly and willfully violating the prohibited acts under 5511.4(b) to make it clear again that criminal penalties apply. The comment was adopted.

#### Comments on Amendment of 43 CFR Part 9230

No public comments addressed this part in the proposed rule. The BLM is currently in the process of updating and amending part 9230—Trespass. The changes promulgated in this rule relating to timber trespass will be included in the subsequent revision of part 9230.

#### Comments on Amendment of 43 CFR Part 9260

The BLM is also preparing to update and revise part 9260—Law Enforcement—Criminal. Organizational changes in § 9265.6 have been adopted in the final rule and language has been added to that section detailing how penalties will be determined. These changes are made in order to

standardize the penalty provisions in the various regulations that relate to timber, trees, and other vegetative resources. Paragraphs (a) and (b)(1) in the final rule are new and refer to the penalties imposed under the Sentencing Reform Act of 1984 (18 U.S.C. 3551 et seq.), as they apply to the regulations for timber sales administration and free use of timber. The penalties are statutory and would apply whether they appear in the regulations or not. Paragraph (a) in the proposed rule has been renumbered (c), and paragraph (b) in the proposed rule has been renumbered (b)(2) in the final rule. Cross references to other regulations in title 43 governing the use of timber for mining and agriculture have been added to paragraph (b)(2). Paragraph (c) in the proposed rule has been renumbered (d) in the final rule to accommodate the earlier additions. No public comments addressed this part in the proposed rule.

The principal author of this final rule is Robert Bierer, Biological and Heritage Implementation Team, assisted by the Regulatory Management Team, BLM.

It is hereby determined that this final rule does not constitute a major Federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)) is required. The BLM has determined that this final rule will not create environmental impacts. No critical element of the human environment is affected because the final rule merely promulgates a series of prohibited acts related to the ministerial aspects of the administration of timber sales contracts and the free use of timber. It does not prescribe or prohibit any substantive activities or methods for carrying out timber harvest operations on BLM-managed lands. It prohibits harvesting and removing timber without the requisite permits or haul tickets, prohibits the violation of other laws and regulations, including State and local laws, and using fraud or trickery to obtain a free-use permit. No sales or new uses of timber, and no other uses of land and resources, are authorized by this rule.

This rule was not subject to review by the Office of Management and Budget under Executive Order 12866.

The Department has determined under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) that the rule will not have a significant economic impact on a substantial number of small entities. There will be no cost increases imposed on the lumber industry other than those caused by violations of law, and there would thus be no economic effect on

small business entities that do not violate the law. Also, the rule does not distinguish between business entities based on their size.

The Department certifies that this final rule does not represent a governmental action capable of interference with constitutionally protected property rights. There will be no private property rights impaired as a result of this rule. Therefore, as required by Executive Order 12630, the Department of the Interior has determined that the rule would not cause a taking of private property.

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

Dated: July 19, 1995.

Sylvia V. Baca,

*Acting Assistant Secretary of the Interior.*

For the reasons stated in the preamble, and under the authorities cited below, parts 5460 of Group 5000, 5510 of Group 5500, Subchapter E, and parts 9230, and 9260 of Group 9200, Subchapter I, Chapter II of Title 43 of the Code of Federal Regulations are amended as set forth below:

#### **PART 5460—SALES ADMINISTRATION**

1. The authority citation for part 5460 continues to read as follows:

Authority: 30 U.S.C. 601 et seq.; 43 U.S.C. 1181e.

2. Subpart 5462 is amended by adding new paragraph (c) to § 5462.1 and new §§ 5462.2 and 5462.3 to read as follows:

##### **§ 5462.1 Contract and permit compliance.**

\* \* \* \* \*

(c)(1) The authorized officer may cancel a contract or permit upon determining that the holder has failed to comply with a law or regulation pertinent to the contract or permit. The authorized officer may also cancel a contract or permit upon determining that the holder has failed to comply with a stipulation or requirement

contained in the contract or permit and the noncompliance is detrimental to the public interest. Individual contracts or permits may contain specific language defining the remedies or penalties associated with noncompliance.

(2) Cancellation shall be mandatory in cases of intentional falsification of information used to obtain the permit or contract.

##### **§ 5462.2 Prohibited acts.**

(a) The acts or omissions listed in paragraph (b) of this section apply only to BLM-administered lands and will render the person(s) responsible liable to the United States in a civil action for trespass, and such person(s) may be prosecuted criminally. If the authorized officer determines such acts or omissions to be detrimental to the public interest, the timber sale contract or permit held by the purchaser responsible for such acts or omissions may be canceled.

(b) The following activities are prohibited:

(1) Cutting, removing, or otherwise damaging any timber, tree, or other vegetative resource, except as authorized by a forest product sale contract, permit, or Federal law or regulation.

(2) Cutting any standing tree, under a permit or timber sale contract, before a BLM employee has marked it or has otherwise designated it for cutting.

(3) Removing any timber or other vegetative resource cut under a permit or timber sale contract, except to a place designated for scaling or measurement, or removing it from that place before it is scaled, measured, counted, or otherwise accounted for by a BLM employee.

(4) Stamping, marking with paint, tagging, or otherwise identifying any tree or other vegetative resources on BLM-administered lands in a manner similar to that employed by BLM employees to mark or designate a tree or other vegetative resources for cutting, removal, or transportation.

(5) Transporting timber or other vegetative resources without a valid haul ticket that pertains to the material in question, except as authorized by Federal law or regulation.

(6) Except as authorized by Federal law or regulation, purchasers or their designated representatives, while engaging in any activity connected with the harvest or removal of forest products, failing to have in their possession and/or failing to produce any required permit or forest product sale contract for inspection upon demand by a BLM employee or any official of a cooperating law enforcement agency

acting within his or her designated authority as a sale inspector, administrator, contracting officer, or law enforcement officer.

(7) Violating any State or local laws and ordinances relating to local permits, tagging, and transportation of timber, trees, or other vegetative resources.

(8) Violating any of the provisions regulating export and substitution contained in subparts 5400, 5403, and 5420 of this title.

(9) Obtaining any forest product sale contract or permit or taking any timber, trees, or other vegetative resources through falsifying, concealing, or covering up by any trick, scheme, or device a material fact, or making any false, fictitious, or fraudulent statement or representation, or making or using a false, fictitious, or fraudulent statement or entry, including altering any forest product sales contract or permit or using an unauthorized reproduction of any official load tag.

(10) Negligent or intentional destruction of or injury to any timber or other vegetative resource during operations under a forest product sale contract or permit.

##### **§ 5462.3 Penalties.**

Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)), any individual who knowingly and willfully commits the prohibited acts under § 5462.2(b) is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000 in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 et seq.), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000.

#### **PART 5510—FREE USE OF TIMBER**

3. The authority citation for part 5510 continues to read as follows:

Authority: 61 Stat. 681, as amended; 69 Stat. 367; 48 Stat. 1269, sec. 11, 30 Stat. 414, as amended, R.S. 2478, sec. 323, 41 Stat. 450; 30 U.S.C. 601 et seq., 43 U.S.C. 315, 48 U.S.C. 423, 43 U.S.C. 1201, 30 U.S.C. 189.

#### **Subpart 5511—Free Use Regulations**

##### **§ 5511.1-1 [Amended]**

4. Section 5511.1-1 is amended by removing paragraph (f)(3).

##### **§ 5511.1-4 [Amended]**

5. Section 5511.1-4 is amended by removing paragraphs (e) and (f).

6. Section 5511.2-1 is amended by revising paragraph (a) to read as follows:

**§ 5511.2-1 Free use privilege; cutting by agent.**

(a) Except as provided in § 5511.1-4 the only timber which may be cut under §§ 5511.2-1 through 5511.2-5 for free use in Alaska is timber on vacant public lands in the State not reserved for national forest or other purposes. The timber so cut may not be sold or bartered. The free use privilege does not extend to associations or corporations, except churches, hospitals, and charitable institutions. Any applicant entitled to the free use of timber may procure it by agent, if desired, but no part of the timber may be used in payment for services in obtaining it or in manufacturing it into lumber. Timber may not be cut by an applicant under this section after the land has been included in a valid homestead settlement or entry or other claim, except that any applicant for the free use of timber who has been granted a permit to cut as hereinafter provided, will have a right to cut the timber while the permit remains in force as against a subsequent applicant who may wish to obtain the same timber by purchase.

\* \* \* \* \*

**§ 5511.2-4 [Amended]**

7. Section 5511.2-4 is amended by revising the reference "5511.2-6" to read "5511.2-5".

**§ 5511.2-5 [Amended]**

8. Section 5511.2-5 is removed.

**§ 5511.2-7 [Redesignated as § 5511.2-5 and amended]**

9. Section 5511.2-7 is redesignated as § 5511.2-5 and the reference "§ 5511.2-4" at the end of the section is revised to read "§ 5511.1-4".

10. Section 5511.4 is added to read as follows:

**§ 5511.4 Prohibited acts.**

(a) In addition to the prohibited acts listed in § 5462.2, the acts or omissions listed in paragraph (b) will render the person(s) responsible liable to the United States in a civil action for trespass and such persons may be prosecuted criminally.

(b) The following acts are prohibited:

(1) Obtaining any free use permit or taking any timber, trees, or other vegetative resources through falsifying, concealing, or covering up by any trick, scheme, or device a material fact, or making any false, fictitious, or fraudulent statements or representations, or making or using any false, fictitious or fraudulent statement or entry, including altering of any free

use permit or using a reproduction of any official load tags.

(2) Using timber secured under a free use permit for any purpose other than provided for in §§ 5511.1-1(d), 5511.1-2, 5511.1-4, 5511.2-2, 5511.3-6, or 5511.3-8.

(3) Violating any of the terms and conditions of a free use permit.

(4) Exporting timber cut under a free use permit from the State in which it was cut, except as provided in § 5511.1-1(e).

(5) The cutting of timber under a free use permit for sale, barter, speculation, or use by others than the permittee.

11. Section 5511.5 is added to read as follows:

**§ 5511.5 Penalties.**

Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a), any individual who knowingly and willfully commits the prohibited acts under § 5511.4(b) is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000, or not more than \$250,000 if commission of the prohibited acts results in death, in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000, or not more than \$500,000 if commission of the prohibited acts results in death.

**PART 9230—TRESPASS**

12. The authority citation for 43 CFR part 9230 continues to read as follows:

Authority: R.S. 2478; 43 U.S.C. 1201; 43 U.S.C. 1701, *et seq.*; 18 U.S.C. 1851-1858.

**Subpart 9239—Kinds of Trespass**

13. Section 9239.1-1 is amended by removing paragraph (c) and (d), and revising the heading and paragraph (b) to read as follows:

**§ 9239.1-1 Unauthorized cutting, removal, or injury.**

\* \* \* \* \*

(b) Commission of any of the acts listed in §§ 5462.2 and 5511.4 of this title constitutes a trespass.

14. Section 9239.1-2 is amended by revising the heading and paragraph (a) to read as follows:

**§ 9239.1-2 Penalty for trespass.**

(a) In accordance with §§ 9239.0-7, 9239.0-8, and 9239.1-1 of this subpart,

anyone responsible for a trespass act is liable to the United States in a civil action for damages and may be prosecuted under criminal law as provided in § 9265.6 of this chapter.

\* \* \* \* \*

15. Section 9239.1-3 is amended by adding paragraph (a)(4) to read as follows:

**§ 9239.1-3 Measure of damages.**

(a) \* \* \*

(1) \* \* \*

(4) In the case of a purchase from a trespasser, if the purchaser has no knowledge of the trespass, but should have had such knowledge through reasonable diligence, the value at the time of the purchase.

\* \* \* \* \*

**PART 9260—LAW ENFORCEMENT—CRIMINAL**

16. The authority citation for 43 CFR part 9260 is revised to read as follows:

Authority: 16 U.S.C. 433; 16 U.S.C. 460I-6a; 16 U.S.C. 670j; 16 U.S.C. 1246(i); 16 U.S.C. 1338; 18 U.S.C. 1851-1861; 18 U.S.C. 3551 *et seq.*; 43 U.S.C. 315(a); 43 U.S.C. 1061, 1063; 43 U.S.C. 1733.

**Subpart 9265—Timber and Other Vegetative Resources Management**

17. The heading of subpart 9265 is revised to read as set forth above.

18. Section 9265.0-3 is amended by inserting after "title 18 U.S.C.," the phrase "and section 1733 of title 43 U.S.C.,".

19. Section 9265.4 is amended by adding text to read as follows:

**§ 9265.4 Sales of forest products, general.**

Commission of any of the acts listed in § 5462.2 of this title is a violation of Federal regulations and may subject the responsible person(s) to criminal penalties under titles 18 and 43 of the United States Code.

20. Section 9265.5 is revised to read as follows:

**§ 9265.5 Non-sale disposals, general.**

Commission of any of the acts listed in § 5511.4 of this title is a violation of Federal regulations and may subject the responsible person(s) to criminal penalties under titles 18 and 43 U.S.C.

21. Section 9265.6 is added to read as follows:

**§ 9265.6 Penalties.**

(a) *Sales administration.* Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)), any individual who knowingly and willfully commits the prohibited acts under § 5462.2(b) of this

title is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000 in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000, or not more than \$500,000 if commission of the prohibited acts results in death.

(b) *Free use of timber.* (1) Under section 303(a) of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1733(a)), any individual who knowingly and willfully commits the prohibited acts under 5511.4(b) of this title is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000, or not more than \$250,000 if commission of the prohibited acts results in death, in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000, or not more than \$500,000 if commission of the prohibited acts results in death.

(2) *Exceptions for mining and agriculture.* This section shall not prevent any miner or agriculturist from clearing his land in the ordinary working of his mining claim, or in the preparation of his farm for tillage, or from taking the timber necessary to support his improvements, or the taking of timber for the use of the United States; or take away any right or privilege under any existing law of the United States to cut or remove timber from any public lands. Use or taking of timber for these exceptions is subject to the regulations provided in part 2920—Leases, Permits and Easements, part 3715—Use and Occupancy of Mining Claims, subpart 3802—Exploration and Mining, Wilderness Review Program, and/or subpart 3809—Surface Management.

(c) *Timber removed or transported.* Under 18 U.S.C. 1852, any person:

(1) Who unlawfully cuts, or wantonly destroys, any timber growing on the public lands of the United States;

(2) Who unlawfully removes any timber from said public lands, with

intent to export or dispose of the same; or

(3) Who, being the owner, master, pilot, operator, or consignee of any vessel, motor vehicle, or aircraft or the owner, director, or agent of any railroad, knowingly transports any timber unlawfully cut or removed from said lands, or lumber manufactured therefrom; shall be subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000, or not more than \$250,000 if commission of the prohibited acts results in death, in accordance with the applicable provisions of the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000, or not more than \$500,000 if commission of the prohibited acts results in death.

(d) *Trees cut or injured.* Under 18 U.S.C. 1853, whoever unlawfully cuts, or wantonly injures or destroys any tree growing, standing, or being upon any land of the United States which, in pursuance of law, has been reserved or purchased by the United States for any public use, or upon any Indian reservation, or lands belonging to or occupied by any tribe of Indians under the authority of the United States, or any Indian allotment while the title to the same shall be held in trust by the Government, or while the same shall remain inalienable by the allottee without the consent of the United States, shall be subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$100,000 in accordance with the Sentencing Reform Act of 1984 (18 U.S.C. 3551 *et seq.*), or imprisonment not to exceed 12 months, or both, for each offense, and any organization that commits these prohibited acts is subject to arrest and trial by the United States Magistrate and, if convicted, shall be subject to a fine of not more than \$200,000.

BILLING CODE 4310-84-P

## FEDERAL EMERGENCY MANAGEMENT AGENCY

### 44 CFR Part 64

[Docket No. FEMA-7626]

#### List of Communities Eligible for the Sale of Flood Insurance

**AGENCY:** Federal Emergency Management Agency (FEMA).

**ACTION:** Final rule.

**SUMMARY:** This rule identifies communities participating in the National Flood Insurance Program (NFIP). These communities have applied to the program and have agreed to enact certain floodplain management measures. The communities' participation in the program authorizes the sale of flood insurance to owners of property located in the communities listed.

**EFFECTIVE DATES:** The dates listed in the third column of the table.

**ADDRESSES:** Flood insurance policies for property located in the communities listed can be obtained from any licensed property insurance agent or broker serving the eligible community, or from the NFIP at: Post Office Box 6464, Rockville, MD 20849, (800) 638-6620.

**FOR FURTHER INFORMATION CONTACT:** Robert F. Shea, Jr., Division Director, Program Implementation Division, Mitigation Directorate, 500 C Street, SW., room 417, Washington, DC 20472, (202) 646-3619.

**SUPPLEMENTARY INFORMATION:** The NFIP enables property owners to purchase flood insurance which is generally not otherwise available. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Since the communities on the attached list have recently entered the NFIP, subsidized flood insurance is now available for property in the community.

In addition, the Director of the Federal Emergency Management Agency has identified the special flood hazard areas in some of these communities by publishing a Flood Hazard Boundary Map (FHBM) or Flood Insurance Rate Map (FIRM). The date of the flood map, if one has been published, is indicated in the fourth column of the table. In the communities listed where a flood map has been published, Section 102 of the Flood Disaster Protection Act of 1973, as amended, 42 U.S.C. 4012(a), requires the purchase of flood insurance as a condition of Federal or federally related financial assistance for acquisition or

construction of buildings in the special flood hazard areas shown on the map.

The Director finds that the delayed effective dates would be contrary to the public interest. The Director also finds that notice and public procedure under 5 U.S.C. 553(b) are impracticable and unnecessary.

**National Environmental Policy Act**

This rule is categorically excluded from the requirements of 44 CFR Part 10, Environmental Considerations. No environmental impact assessment has been prepared.

**Regulatory Flexibility Act**

The Associate Director certifies that this rule will not have a significant economic impact on a substantial number of small entities in accordance with the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because the rule creates no additional burden, but lists

those communities eligible for the sale of flood insurance.

**Regulatory Classification**

This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

**Paperwork Reduction Act**

This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

**Executive Order 12612, Federalism**

This rule involves no policies that have federalism implications under Executive Order 12612, Federalism, October 26, 1987, 3 CFR, 1987 Comp., p. 252.

Executive Order 12778, Civil Justice Reform

This rule meets the applicable standards of section 2(b)(2) of Executive Order 12778, October 25, 1991, 56 FR 55195, 3 CFR, 1991 Comp., p. 309.

**List of Subjects in 44 CFR Part 64**

Flood insurance, Floodplains.  
Accordingly, 44 CFR part 64 is amended as follows:

**PART 64—[AMENDED]**

1. The authority citation for Part 64 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*, Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp., p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

**§ 64.6 [Amended]**

2. The tables published under the authority of § 64.6 are amended as follows:

 Organizational Changes;  
 Miscellaneous Editorial Changes and  
 Conforming Amendments**

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

**SUMMARY:** This rule amends Title 46, Code of Federal Regulations to reflect recent agency organizational changes. It also makes editorial changes throughout the title to correct addresses, update cross-references, and other technical corrections requested by the Federal Register. This rule makes no substantive changes to current regulations.

**EFFECTIVE DATE:** This rule is effective on September 29, 1995.

**ADDRESSES:** Unless otherwise indicated, documents referred to in this preamble are available for inspection or copying at the office of the Executive Secretary, Marine Safety Council (G-LRA/3406), U.S. Coast Guard Headquarters, 2100 Second Street SW., room 3406, Washington, DC 20593-0001 between 8 a.m. and 3 p.m., Monday through Friday, except Federal holidays. The telephone number is (202) 267-1477.

**FOR FURTHER INFORMATION CONTACT:**

Janet Walton, Project Manager, Standards Evaluation and Development Division (G-MES-2), (202) 267-0257.

#### SUPPLEMENTARY INFORMATION:

##### Drafting Information

The principal persons involved in drafting this document are Janet Walton, Project Manager, Standards Evaluation and Development Division, and C.G. Green, Project Counsel, Office of Chief Counsel.

##### Background and Purpose

Each year Title 46 of the Code of Federal Regulations is recodified on October 1. This rule makes miscellaneous editorial changes and conforming amendments, including changes brought about by the reorganization of the Office of Marine Safety, Security and Environmental Protection (G-M) at Coast Guard Headquarters, to be included in the 1995 recodification of Title 46.

Although the office of G-M recently went through a comprehensive reorganization, its functions are unchanged. This rule reflects the redistribution of office functions and responsibilities to the three new directorates and their subordinate divisions in the Office. Paragraph (b)(1) of § 1.01-10 has been rewritten to describe the new directorates and divisions and nomenclature changes have been made throughout the Title. These new organizational elements have been functioning since August 1, 1995, and this document will update their descriptions in the Code of Federal Regulations.

The rule also makes editorial changes throughout the title to correct addresses, update cross-references, and other technical corrections requested by the Federal Register. The rule does not change any substantive requirements of existing regulations.

Since this amendment relates to departmental management, organization, procedure, and practice, notice and comment on it are unnecessary and it may be made effective in fewer than 30 days after publication in the Federal Register. Therefore, this final rule is effective upon publication in the Federal Register.

##### Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866 and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. It has not been reviewed by the Office of Management and Budget under

that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979). The Coast Guard expects the economic impact of this rule to be so minimal that a full Regulatory Evaluation under paragraph 10e of the regulatory policies and procedures of DOT is unnecessary. As this rule involves internal agency practices and procedures, it will not impose any costs on the public.

##### Collection of Information

This rule contains no collection-of-information requirements under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

##### Federalism

The Coast Guard has analyzed this rule under the principles and criteria contained in Executive Order 12612 and has determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

##### Environment

The Coast Guard considered the environmental impact of this rule and concluded that under paragraph 2.B.2 of Commandant Instruction M16475.1B, this rule is categorically excluded from further environmental documentation. This exclusion is in accordance with paragraphs 2.B.2.e. (34) (a) and (b), concerning regulations that are editorial or procedural and concerning internal agency functions or organization. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES**.

##### List of Subjects

###### 46 CFR Part 1

Administrative practice and procedure, Organization and functions (Government agencies), Reporting and recordkeeping requirements.

###### 46 CFR Part 2

Marine safety, Reporting and recordkeeping requirements, Vessels.

###### 46 CFR Part 5

Administrative practice and procedure, Alcohol abuse, Drug abuse, Investigations, Seamen.

###### 46 CFR Part 6

Navigation (water), Reporting and recordkeeping requirements, Vessels.

###### 46 CFR Part 10

Reporting and recordkeeping requirements, Schools, Seamen.

###### 46 CFR Part 12

Reporting and recordkeeping requirements, Seamen.

###### 46 CFR Part 14

Oceanographic research vessels, Reporting and recordkeeping requirements, Seamen.

###### 46 CFR Part 16

Drug testing, Marine safety, Reporting and recordkeeping requirements, Safety, Transportation.

###### 46 CFR Part 25

Fire prevention, Marine safety, Reporting and recordkeeping requirements.

###### 46 CFR Part 28

Fire prevention, Fishing vessels, Marine safety, Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

###### 46 CFR Part 30

Cargo vessels, Foreign relations, Hazardous materials transportation, Penalties, Reporting and recordkeeping requirements, Seamen.

###### 46 CFR Part 31

Cargo vessels, Marine safety, Reporting and recordkeeping requirements.

###### 46 CFR Part 32

Cargo vessels, Fire prevention, Marine safety, Navigation (water), Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

###### 46 CFR Part 33

Cargo vessels, Marine safety, Occupational safety and health, Seamen.

###### 46 CFR Part 34

Cargo vessels, Fire prevention, Marine safety.

###### 46 CFR Part 35

Cargo vessels, Marine safety, Navigation (water), Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

###### 46 CFR Part 39

Cargo vessels, Fire prevention, Hazardous materials transportation, Marine safety, Occupational safety and health, Reporting and recordkeeping requirements.

###### 46 CFR Part 50

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 52*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 53*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 54*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 56*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 57*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 58*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 59*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 61*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 62*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 63*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 69*

Measurement standards, Penalties, Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 70*

Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

*46 CFR Part 71*

Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

*46 CFR Part 72*

Fire prevention, Marine safety, Occupational safety and health, Passenger vessels, Seamen.

*46 CFR Part 75*

Marine safety, Passenger vessels.

*46 CFR Part 76*

Fire prevention, Marine safety, Passenger vessels.

*46 CFR Part 77*

Marine safety, Navigation (water), Passenger vessels.

*46 CFR Part 78*

Marine safety, Navigation (water), Passenger vessels, Penalties, Reporting and recordkeeping requirements.

*46 CFR Part 90*

Cargo vessels, Marine safety.

*46 CFR Part 91*

Cargo vessels, Marine safety, Reporting and recordkeeping requirements.

*46 CFR Part 92*

Cargo vessels, Fire prevention, Marine safety, Occupational safety and health, Seamen.

*46 CFR Part 93*

Cargo vessels, Marine safety, Reporting and recordkeeping requirements.

*46 CFR Part 94*

Cargo vessels, Marine safety.

*46 CFR Part 95*

Cargo vessels, Fire prevention, Marine safety.

*46 CFR Part 96*

Cargo vessels, Marine safety, Navigation (water).

*46 CFR Part 97*

Cargo vessels, Marine safety, Navigation (water), Reporting and recordkeeping requirements.

*46 CFR Part 98*

Cargo vessels, Hazardous materials transportation, Marine safety, Reporting and recordkeeping requirements, Water pollution control.

*46 CFR Part 107*

Marine safety, Oil and gas exploration, Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 108*

Fire prevention, Marine safety, Occupational safety and health, Oil and gas exploration, Vessels.

*46 CFR Part 110*

Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 147*

Hazardous materials transportation, Labeling, Marine safety, Packaging and containers, Reporting and recordkeeping requirements.

*46 CFR Part 148*

Cargo vessels, Hazardous materials transportation, Marine safety.

*46 CFR Part 150*

Hazardous materials transportation, Marine safety, Occupational safety and health, Reporting and recordkeeping requirements.

*46 CFR Part 151*

Cargo vessels, Hazardous materials transportation, Marine safety, Reporting and recordkeeping requirements, Water pollution control.

*46 CFR Part 153*

Administrative practice and procedure, Cargo vessels, Hazardous materials transportation, Marine safety, Reporting and recordkeeping requirements, Water Pollution control.

*46 CFR Part 154*

Cargo vessels, Gases, Hazardous materials transpiration, Marine safety, Reporting and recordkeeping requirements.

*46 CFR Part 160*

Marine safety, Reporting and recordkeeping requirements.

*46 CFR Part 161*

Fire prevention, Marine safety, Reporting and recordkeeping requirements.

*46 CFR Part 162*

Fire prevention, Marine safety, Oil pollution, Reporting and recordkeeping requirements.

*46 CFR Part 164*

Fire prevention, Marine safety, Reporting and recordkeeping requirements.

*46 CFR Part 167*

Fire prevention, Marine safety, Reporting and recordkeeping requirements, Schools, Seamen, vessels.

*46 CFR Part 169*

Fire prevention, Marine safety, Reporting and recordkeeping requirements, Schools, Vessels.

*46 CFR Part 170*

Marine safety, Reporting and recordkeeping requirements, Vessels.

*46 CFR Part 174*

Marine safety, Vessels.

*46 CFR Part 175*

Marine safety, Passenger vessels, Reporting and recordkeeping requirements.

*46 CFR Part 180*

Marine safety, Passenger vessels.

**46 CFR Part 181**

Fire prevention, Marine safety,  
Passenger vessels.

**46 CFR Part 182**

Marine safety, Passenger vessels.

**46 CFR Part 183**

Marine safety, Passenger vessels.

**46 CFR Part 184**

Communications equipment, Marine  
safety, Navigation (water), Passenger  
vessels, Reporting and recordkeeping  
requirements.

**46 CFR Part 188**

Marine safety, Oceanographic  
research vessels.

**46 CFR Part 189**

Marine safety, Oceanographic  
research vessels, Reporting and  
recordkeeping.

**46 CFR Part 190**

Fire prevention, Marine safety,  
Occupational safety and health,  
Oceanographic research vessels.

**46 CFR Part 192**

Marine safety, Oceanographic  
research vessels.

**46 CFR Part 193**

Fire prevention, Marine safety  
Oceanographic research vessels.

**46 CFR Part 196**

Marine safety, Oceanographic  
research vessels, Reporting and  
recordkeeping requirements.

**46 CFR Part 197**

Benzene, Diving, Marine safety,  
Occupational safety and health,  
Reporting and recordkeeping  
requirements, Vessels.

For the reasons set out in the  
preamble, the Coast Guard amends 46  
CFR parts 1, 2, 5, 6, 10, 12, 14, 16, 25,  
28, 30, 31, 32, 33, 34, 35, 39, 50, 52, 53,  
54, 56, 57, 58, 59, 61, 62, 63, 69, 70, 71,  
72, 75, 76, 77, 78, 90, 91, 92, 93, 94, 95,  
96, 97, 98, 107, 108, 110, 147, 148, 150,  
151, 153, 154, 160, 161, 162, 164, 167,  
169, 170, 174, 175, 180, 181, 182, 183,  
184, 188, 189, 190, 192, 193, 196, and  
197 as follows:

**PART 1—ORGANIZATION, GENERAL  
COURSE AND METHODS GOVERNING  
MARINE SAFETY FUNCTIONS**

1. The authority citation for part 1  
continues to read as follows:

Authority: 5 U.S.C. 552; 14 U.S.C. 633; 46  
U.S.C. 7701; 49 CFR 1.45, 1.46; § 1.01–35 also  
issued under the authority of 44 U.S.C. 3507.

2. In § 1.01–10, paragraph (b)(1) is  
revised to read as follows:

**§ 1.01–10 Organization.**

\* \* \* \* \*

(b) \* \* \*

(1) The Chief, Office of Marine Safety,  
Security and Environmental Protection,  
under the general direction of the  
Commandant, directs, supervises and  
coordinates the activities of the  
Directorate for Standards, consisting of  
the Design and Engineering Standards  
Division, the Operating and  
Environmental Standards Division, and  
the Standards Evaluation and  
Development Division; the Directorate  
for Field Activities, consisting of the  
Compliance Division, the Response  
Division, and the Investigations and  
Analysis Division; and the Directorate  
for Resource Management, consisting of  
the Planning and Resources Division  
and the Information Resources Division.  
The Port Safety and Security programs  
administered by the Chief, Compliance  
Division and the Marine Environmental  
Response programs administered by the  
Chief, Response Division are guided by  
regulations contained in 33 CFR chapter  
I. The Chief, Office of Marine Safety,  
Security and Environmental Protection  
exercises technical control over the  
Director, National Maritime Center and,  
through the District Commander,  
supervises the administration of the  
Marine Safety Divisions of District  
Offices and officers in Charge, Marine  
Inspection.

(i) The Director for Standards (G–MS),  
under the general direction and  
supervision of the Chief, Marine Safety,  
Security and Environmental Protection,  
establishes federal policies for  
development of marine safety, security,  
and environmental protection treaties,  
laws, and regulations; develops safety,  
security and environmental protection  
standards for the maritime industry;  
integrates all marine safety and  
environmental protection regulatory  
programs; prepares legislation,  
regulations, and industry guidance for  
new safety, security, and environmental  
protection programs; and maintains an  
active program for development of third  
party consensus industry standards.

(A) The Chief, Design and Engineering  
Standards Division (G–MMS), at  
Headquarters, under the direction of the  
Chief, Office of Marine Safety, Security  
and Environmental Protection and the  
Director for Standards, manages the  
program for defining the overall  
regulatory approach for vessels, offshore  
structures, and other marine systems  
incorporating safety considerations  
regarding the role of the human  
element; develops policies and

regulations on load line matters and  
supervises classification societies  
authorized to assign load lines on behalf  
of the Coast Guard; oversees the  
development and maintenance of  
programs that incorporate risk-based  
methods in making safety  
determinations and policies; and  
oversees technical research and  
development for safety and  
environmental protection associated  
with marine vessels, structures and  
facilities.

(B) The Chief, Operating and  
Environmental Standards Division (G–  
MOS), at Headquarters, under the  
direction of the Chief, Office of Marine  
Safety, Security and Environmental  
Protection and the Director for  
Standards, coordinates and integrates  
program standards for personnel  
qualification, vessel manning, vessel  
and facility operations, cargo systems  
and handling, and environmental  
protection; develops and maintains  
standards, regulations and industry  
guidance for maritime industry  
operations to prevent deaths, injuries,  
property damage, and environmental  
harm; develops and maintains safety  
standards and regulations for  
commercial fishing industry vessels and  
uninspected commercial vessels; and  
develops and maintains health and  
safety standards and regulations for U.S.  
inspected vessels.

(C) The Chief, Standards Evaluation  
and Development Division (G–MES), at  
Headquarters, under the Direction of the  
Chief, Office of Marine Safety, Security  
and Environmental Protection and the  
Director for Standards, coordinates the  
development of new standards and  
programs across all technical and  
operational areas of marine safety,  
security, and environmental protection;  
provides comprehensive analytical  
support for all standards assessment and  
development efforts; and coordinates  
development of measures of  
effectiveness for assessing regulatory  
programs and consensus standards.

(ii) The Director for Field Activities  
(G–MO), under the general direction  
and supervision of the Chief, Office of  
Marine Safety, Security and  
Environmental Protection, acts as  
Program Manager for the Marine Safety,  
Security and the Marine Environmental  
Protection Programs; directs,  
coordinates, and integrates the Coast  
Guard's marine safety and  
environmental protection compliance  
programs, contingency planning,  
response operations, and investigations  
programs; establishes and coordinates  
field implementation policies and  
priorities for all marine safety  
commands and units; and serves as the

focal point for field support and technical guidance.

(A) The Chief, Compliance Division (G-MCO), at Headquarters, under the direction of the Chief, Office of Marine Safety, Security and Environmental Protection and the Director for Field Activities, administers and balances all marine safety and environmental protection compliance programs, including direction of Coast Guard activities and oversight of third parties and industry programs; develops, publishes and maintains program policies for vessel compliance, interprets standards and regulations, and provides field guidance for execution and enforcement; administers the marine inspection program and foreign vessel boarding program for the enforcement of commercial vessel material and operational safety standards; and supervises the administration of licensing and documenting of merchant personnel, the issuance of certificates of registry to merchant marine staff officers, and the manning of U.S. vessels.

(B) The Chief, Response Division (G-MRO), at Headquarters, under the Direction of the Chief, Office of Marine Safety, Security and Environmental Protection and the Director for Field Activities, coordinates and integrates field planning, preparedness, and response operations for pollution incidents, natural disasters, marine accidents, terrorism, and other threats to public safety, the marine environment, or marine transportation and commerce; develops, publishes, and maintains program policies for preparedness and response, interprets laws and regulations, and provides field guidance for execution; provides guidance regarding emergency authorities of the Captain of the Port (COTP); and administers Office programs for ports and waterway management, bringing compliance and response efforts with an active presence in the marine environment.

(C) The Chief, Investigations and Analyses Division (G-MAO), at Headquarters, under the direction of the Chief, Office of Marine Safety, Security and Environmental Protection and the Director for Field Activities, reviews investigations of marine casualties; reviews records of proceedings to suspend and revoke licenses, certificates, and documents held by maritime personnel; and compiles, maintains, reviews, and evaluates statistics obtained from marine casualty investigations.

(iii) The Director for Resource Management (G-MR), under the general direction and supervision of the Chief,

Office of Marine Safety, Security and Environmental Protection, serves as Facility Manager for the marine safety programs; coordinates and integrates financial, informational, and human resources; plans, acquires, develops, and allocates resources for development and execution of the Coast Guard's marine safety programs; provides the focal point for all resource issues in support of the Standards and Operations Directorates; and oversees the development and management of the Coast Guard's direct user fee program.

(iv) The Director, Coast Guard National Maritime Center (NMC) under technical control of the Chief, Office of Marine Safety, Security and Environmental Protection, administers operational and administrative control of the Marine Safety Center which conducts reviews and approvals of plans, calculations, and other materials concerning the design, construction, alterations, and repair of commercial vessels to determine conformance with the marine inspection laws, regulations, and implementing directions; administers operational and administrative control over the National Vessel Documentation Center which administers U.S. vessel identification and documentation; oversees and administers the U.S. tonnage measurement program which measures U.S. naval vessels and oversees issuance of international and domestic tonnage certificates; administers merchant mariner licensing and seaman's documentation; and oversees the national pilotage program.

**PART 2—VESSEL INSPECTIONS**

3. The authority citation for part 2 continues to read as follows:

Authority: 14 U.S.C. 664; 31 U.S.C. 9701; 33 U.S.C. 1903; 43 U.S.C. 1333, 1356; 46 U.S.C. 2110, 3306, 3703, 5115, 8105; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46; subpart 2.45 also issued under the authority of Act Dec. 27, 1950, Ch. 1155, secs. 1, 2, 64 Stat. 1120 (see 46 U.S.C. App. note prec. 1).

**§ 2.10-10 [Amended]**

4. In § 2.10-10, the word "(G-MP)" is removed and the word "(G-MPR)" is added in its place.

**§ 2.10-20 [Amended]**

5. In § 2.10-20(e), the word "(G-MP)" is removed and the word "(G-MPR)" is added in its place.

**§ 2.10-105 [Amended]**

6. In § 2.10-105(b), the word "(G-MP)" is removed and the word "(G-MPR)" is added in its place.

**§ 2.10-115 [Amended]**

7. In § 2.10-115(b), the word "(G-MP)" is removed and the word "(G-MPR)" is added in its place.

**§ 2.45-20 [Amended]**

8. In § 2.45-20(a), the word "(G-MVI)" is removed and the word "(G-MCO)" is added in its place.

**§ 2.75-1 [Amended]**

9. In § 2.75-1, in paragraph (d), the word "(G-MVI)" is removed and the word "(G-MMS)" is added in its place; and in paragraph (f), the words "a Coast Guard pamphlet CG-190" are removed and the words "COMDTINST M16714.3 (Series)" are added in their place.

**§ 2.75-10 [Amended]**

10. In § 2.75-10(b), the word "(G-MVI)" is removed and the word "(G-MMS)" is added in its place.

**§ 2.75-15 [Amended]**

11. In § 2.75-15(a), the word "(G-MVI)" is removed and the word "(G-MMS)" is added in its place.

12. In § 2.75-17, paragraph (c)(2) is revised and in paragraph (d)(1), the word "(G-MVI)" is removed and the word "(G-MMS)" is added in its place, to read as follows:

**§ 2.75-17 General policy regarding acceptance and use of industry specifications, standards, and codes.**

**PART 5—MARINE INVESTIGATION REGULATIONS—PERSONNEL ACTION**

13. The authority citation for part 5 continues to read as follows:

Authority: 46 U.S.C. 2103, 7101, 7301, 7701; 49 CFR 1.46.

**§ 5.703 [Amended]**

14. In § 5.703(c), the word "(G-MMI)" is removed and the word "(G-MAO)" is added in its place.

**PART 6—WAIVERS OF NAVIGATION AND VESSEL INSPECTION LAWS AND REGULATIONS**

15. The authority citation for part 6 continues to read as follows:

Authority: Act Dec. 27, 1950, Ch. 1155, secs. 1, 2, 64 Stat. 1120 (see 46 U.S.C. App. note prec. 1); 49 CFR 1.46.

**§ 6.06 [Amended]**

16. In § 6.06, in paragraphs (b) and (d), the word "(G-MVI)" is removed and the word "(G-MCO)" is added in its place.

**PART 10—LICENSING OF MARITIME PERSONNEL**

17. The authority citation for part 10 continues to read as follows:

Authority: 31 U.S.C. 9701; 46 U.S.C. 2101, 2103, 7101, 7106, 7107; 49 CFR 1.45, 1.46; Section 10.107 also issued under the authority of 44 U.S.C. 3507.

**§ 10.112 [Amended]**

18. In § 10.112(b), the word “(G-MP)” is removed and the word “(G-MPR)” is added in its place.

**§ 10.302 [Amended]**

19. § 10.302(a), the words “Commandant (G-MVP) U.S. Coast Guard, Washington, DC 20593-0001,” are removed and the words “Director, National Maritime Center, NMC-4B, 4200 Wilson Boulevard, Suite 510, Arlington, VA 22203-1804” are added in their place.

**§ 10.303 [Amended]**

20. In § 10.303(e), the words “Commandant (G-MVP), U.S. Coast Guard” are removed and the words “Director, National Maritime Center, NMC-4B” are added in their place.

**§ 10.304 [Amended]**

21. In § 10.304, in paragraph (a), the words “Commandant (G-MVP)” are removed and the words “Director, National Maritime Center, NMC-4B” are added in their place; and in paragraph (d), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 10.307 [Amended]**

22. In § 10.307, the words “Commandant (G-MVP) U.S. Coast Guard, 2100 Second St., Washington, DC 20593-0001,” are removed and the words “Director, National Maritime Center, NMC-4B, 4200 Wilson Boulevard, Suite 510, Arlington, VA 22203-1804” are added in their place; and the words “(202) 267-0224” are removed and the words “(703) 235-1300” are added in their place.

**§ 10.464 [Amended]**

23. In § 10.464(d)(2), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 10.470 [Amended]**

24. In § 10.470, in paragraphs (b)(1)(ii), (d)(1)(ii), and (h)(1)(ii), the words “Commandant (G-MVP)” are removed and the words “Director, National Maritime Center” are added in their place.

**§ 10.472 [Amended]**

25. In § 10.472(a)(1)(ii), the words “Commandant (G-MVP)” are removed and the words “Director, National Maritime Center” are added in their place.

**§ 10.474 [Amended]**

26. In § 10.474(a)(1)(ii), the words “Commandant (G-MVP)” are removed and the words “Director, National Maritime Center” are added in their place.

**§ 10.516 [Amended]**

27. In § 10.516(a)(6), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in their place.

**§ 10.544 [Amended]**

28. In § 10.544(a)(3), the words “Commandant (G-MVP)” are removed and the words “Director, National Maritime Center” are added in their place.

**§ 10.703 [Amended]**

29. In § 10.703(c), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**PART 12—CERTIFICATION OF SEAMEN**

30. The authority citation for part 12 continues to read as follows:

Authority: 31 U.S.C. 9701; 46 U.S.C. 2101, 2103, 2110, 7301, 7302; 49 CFR 1.46.

**§ 12.02-3 [Amended]**

31. In § 12.02-3(b)(3), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.02-4 [Amended]**

32. In § 12.02-4, in paragraphs (a) and (b), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.02-13 [Amended]**

33. In § 12.02-13(b), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.02-14 [Amended]**

34. In § 12.02-14(c), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.02-21 [Amended]**

35. In § 12.02-21(b), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.02-24 [Amended]**

36. In § 12.02-24, the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.05-7 [Amended]**

37. In § 12.05-7, in the introductory text, in paragraph (b), and in paragraph (b)(2), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.10-3 [Amended]**

38. In § 12.10-3, in paragraphs (a)(2), (a)(5) and (a)(6), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.15-7 [Amended]**

39. In § 12.15-7(b), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.15-13 [Amended]**

40. In § 12.15-13(a)(4), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.15-15 [Amended]**

41. In § 12.15-15(a)(4), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.25-35 [Amended]**

42. In § 12.25-35(a), the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**§ 12.25-40 [Amended]**

43. In § 12.25-40, the word “Commandant” is removed and the words “Director, National Maritime Center” are added in its place.

**PART 14—SHIPMENT AND DISCHARGE OF SEAMEN**

44. The authority citation for part 14 continues to read as follows:

Authority: 5 U.S.C. 552; 46 U.S.C. 2103, 2113, 3306, 8105, 10104; 49 CFR 1.46.

**§ 14.01-3 [Amended]**

45. In § 14.01-3, the words “Commandant (G-MVP-1/TP12), U.S. Coast Guard, Washington, DC 20593” are removed and the words “Director, National Maritime Center (NMC)” are added in their place.

**§ 14.20-15 [Amended]**

46. In § 14.20-15(d), the words “Commandant (G-MVP-1/12), U.S. Coast Guard, Washington, DC 20593”

are removed and the words "Director, National Maritime Center (NMC)" are added in their place.

#### **PART 16—CHEMICAL TESTING**

47. The authority citation for part 16 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 7101, and 7701; 49 CFR 1.46.

##### **§ 16.205 [Amended]**

48. In § 16.205(g), the word "(G-MNI)" is removed and the word "(G-MAO)" is added in its place.

##### **§ 16.500 [Amended]**

49. In § 16.500, in paragraphs (a) and (c), the word "(G-MNI)" is removed and the word "(G-MAO)" is added in its place.

#### **PART 25—REQUIREMENTS**

50. The authority citation for part 25 continues to read as follows:

Authority: 33 U.S.C. 1903(b), 46 U.S.C. 3306, and 4302; 49 CFR 1.46.

##### **§ 25.01-3 [Amended]**

51. In § 25.01-3, in paragraph (a), the words "Merchant Vessel Inspection and Documentation Division (G-MVI)" are removed and the words "Compliance Division (G-MMS)" are added in their place; and in paragraph (b) under the entry for National Fire Protection Association (NFPA), the words "Batterymarch Park, Quincy, MA 02260" are removed and the words "1 Batterymarch Park, Quincy, MA 02269" are added in their place.

##### **§ 25.45-1 [Amended]**

52. In § 25.45-1(a), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

##### **§ 25.45-2 [Amended]**

53. In § 25.45-2(a), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

#### **PART 28—REQUIREMENTS FOR COMMERCIAL FISHING INDUSTRY VESSELS**

54. The authority citation for part 28 continues to read as follows:

Authority: 46 U.S.C. 3316, 4502, 4506, 6104, 10603; 49 U.S.C. App. 1804; 49 CFR 1.46.

##### **§ 28.40 [Amended]**

55. In § 28.40, in paragraph (a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place; and in paragraph (b) under the

entry for National Fire Protection Association (NFPA), the words "60 Batterymarch Park," are removed and the words "1 Batterymarch Park," are added in their place.

##### **§ 28.575 [Amended]**

56. In § 28.575, in Table 28.575 the entry "0.65" in column "Y" is removed and the entry "0.97" is added in its place; and the editorial note immediately following Figure 28.575 is removed.

#### **PART 30—GENERAL PROVISIONS**

57. The authority citation for part 30 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703; 49 U.S.C. 5103; 49 CFR 1.46; Section 30.01-5 also issued under the authority of Sect. 4109, Pub. L. 101-380, 104 Stat. 515.

##### **§ 30.30-5 [Amended]**

58. In § 30.30-5(a), the words "Commandant (G-MVP/14)" are removed and the words "Commandant (G-MCO)" are added in their place.

##### **§ 30.30-7 [Amended]**

59. In § 30.30-7, the words "room 1400" are removed and the words "room 1104" are added in their place; and the number "(202) 426-1500" is removed and the number "(202) 267-2978" are added in their place.

#### **PART 31—INSPECTION AND CERTIFICATION**

60. The authority citation for part 31 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3306, 3703, 5115, 8105, 9101, 9102; 49 U.S.C. App. 1804; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 11735, 38 FR 21243, 3 CFR, 1971-1975 Comp., p. 793; 49 CFR 1.46.

##### **§ 31.10-1 [Amended]**

61. In § 31.10-1(b), the words "45 Eisenhower Drive, Paramus, NJ 07653-0910" are removed and the words "Two World Trade Center, 106th Floor, New York, NY 10048" are added in their place.

##### **§ 31.10-21 [Amended]**

62. In § 31.10-21, in paragraphs (e)(1), (e)(3), and (g), the word "(G-MVI)" is removed and the word "(G-MCO)" is added in its place.

##### **§ 31.10-33 [Amended]**

63. In § 31.10-33, in paragraphs (a)(1) and (a)(2), the words "One World Trade Center, suite 2757, New York, N.Y. 10048" are removed and the words "30 Vesey Street, New York, NY 10007-2914" are added in their place.

#### **PART 32—SPECIAL EQUIPMENT, MACHINERY, AND HULL REQUIREMENTS**

64. The authority citation for part 32 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46; Subpart 32.59 also issued under the authority of Sect. 4109, Pub. L. 101-380, 104 Stat. 515.

##### **§ 32.01-1 [Amended]**

65. In § 32.01-1, in paragraph (a) the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place; and in paragraph (b), under the entry for American Bureau of Shipping (ABS), the words "45 Eisenhower Drive, Paramus, NJ 07652" are removed and the words "Two World Trade Center, 106th Floor, New York, NY 10048" are added in their place.

##### **§ 32.53-3 [Amended]**

66. In § 32.53-3(b), the word "(G-MTH)" is removed and the word "(G-MOS)" is added in its place.

#### **PART 33—LIFESAVING EQUIPMENT**

67. The authority citation for part 33 continues to read as follows:

Authority: 46 U.S.C. 3102, 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

##### **§ 33.01-3 [Amended]**

68. In § 33.01-3(a), the words "Marine Technical and Hazardous Materials Division" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

#### **PART 34—FIREFIGHTING EQUIPMENT**

69. The authority citation for part 34 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR 1980 Comp., p. 277; 49 CFR 1.46.

##### **§ 34.01-15 [Amended]**

70. In § 34.01-15(a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

#### **PART 35—OPERATIONS**

71. The authority citation for part 35 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3306, 3703, 6101, 9101, 9102; 49 U.S.C. App. 1804; E.O. 11735, 38 FR 21243, 3 CFR, 1971-

1975 Comp., p. 793; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 35.01-1 [Amended]**

72. In § 35.01-1(a), the words "60 Batterymarch Street, Boston, MA 02110" are removed and the words "1 Batterymarch Park, Quincy, MA 02269" are added in their place.

**PART 39—VAPOR CONTROL SYSTEMS**

73. The authority citation for part 39 continues to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. 3306, 3703, 3715(b); 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 39.10-5 [Amended]**

74. In § 39.10-5, in paragraph (a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Operating and Environmental Standards Division (G-MOS)" are added in their place; and, in paragraph (b), under the entry for National Fire Protection Association (NFPA), the number "1" is added immediately preceding the words "Batterymarch Park,".

**§§ 39.10-1, 39.10-9, 39.20-1, 39.20-9, 39.40-1 [Amended]**

75. In addition to the amendments set forth above, in 46 FR part 39 removed the word "(G-MTH)" and add, in its place, the word "(G-MOS)" in the following places:

- (a) Section 39.10-1(b);
- (b) Section 39.10-9;
- (c) Section 39.20-1(a)(1);
- (d) Section 39.20-9(d); and
- (e) Section 39.40-1 (b), (c), and (e).

**PART 50—GENERAL PROVISIONS**

76. The authority citation for part 50 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 2103, 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.45, 1.46; Section 50.01-20 also issued under the authority of 44 U.S.C. 3507.

**§ 50.20-5 [Amended]**

77. In § 50.20-5(c), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§ 50.25-1 [Amended]**

78. In § 50.25-1(e), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**PART 52—POWER BOILERS**

79. The authority citation for part 52 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 52.01-1 [Amended]**

80. In § 52.01-1(a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

**PART 53—HEATING BOILERS**

81. The authority citation for part 53 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 53.01-1 [Amended]**

82. In § 53.01-1(a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

**PART 54—PRESSURE VESSELS**

83. The authority citation for part 54 continues to read as follows:

Authority: 33 U.S.C. 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 54.01-1 [Amended]**

84. In § 54.01-1(a), the words "Marine Technical and Hazardous Materials (G-MTH)" are removed and the words "Design and Engineering Standards (G-MMS)" are added in their place.

**§§ 54.05-30 and 54.15-25 [Amended]**

85. In addition to the amendment set forth above, in 46 CFR part 54 remove the word "(G-MTH)" and add, in its place, the word "(G-MMS)" in the following places:

- (a) Section 54.05-30(b) and (c); and
- (b) Section 54.15-25(c-1).

**PART 56—PIPING SYSTEMS AND APPURTENANCES**

86. The authority citation for part 56 continues to read as follows:

Authority: 33 U.S.C. 1321(j), 1509; 43 U.S.C. 1333; 46 U.S.C. 2103, 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 12777, 56 FR 54757; 49 CFR 1.46.

**§ 56.20-15 [Amended]**

87. In § 56.20-15(c)(3), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§ 56.60-25 [Amended]**

88. In § 56.60-25, in paragraphs (a)(10) and (a)(11), the word "(G-MTH)"

is removed and the word "(G-MMS)" is added in its place.

**PART 57—WELDING AND BRAZING**

89. The authority citation for part 57 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 57.201-1 [Amended]**

90. In § 57.02-1(a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

**PART 58—MAIN AND AUXILIARY MACHINERY AND RELATED SYSTEMS**

91. The authority citation for part 58 continues to read as follows:

Authority: 42 U.S.C. 1333; 46 U.S.C. 2103, 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 58.03-1 [Amended]**

92. In § 58.03-01, in paragraph (a) remove the words "Marine Technical and Hazardous Materials Division (G-MTH)" and insert the words "Design and Engineering Standards Division (G-MMS)" in their place; and, in paragraph (b) under the entry for National Fire Protection Association (NFPA), add the "1" immediately preceding the words "Batterymarch Park,".

**PART 59—REPAIRS TO BOILERS, PRESSURE VESSELS AND APPURTENANCES**

93. The authority citation for part 59 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 59.01-2 [Amended]**

94. In § 59.01-2(a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

**PART 61—PERIODIC TESTS AND INSPECTIONS**

95. The authority citation for part 61 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 2103, 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 61.20-17 [Amended]**

96. In § 61.20-17(e)(2), the word "(G-MVI)" is removed and the word "(G-MCO)" is added in its place.

**§ 61.20–21 [Amended]**

97. In § 61.20–21, the word “(G–MVI)” is removed and the word “(G–MCO)” is added in its place.

**§ 61.40–10 [Amended]**

98. In § 61.40–10(b), the word “(G–MTH)” is removed and the word “(G–MMS)” is added in its place.

**PART 62—VITAL SYSTEM AUTOMATION**

99. The authority citation for part 62 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 8105; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 62.05–1 [Amended]**

100. In § 62.05–1(a), the word “(G–MTH–2/12), Room 1218,” is removed and the words “(G–MMS)” is added in its place.

**§ 62.35–40 [Amended]**

101. In § 62.35–40(b), the word “(G–MTH)” is removed and the word “(G–MMS)” is added in its place.

**PART 63—AUTOMATIC AUXILIARY BOILERS**

102. The authority citation for part 63 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 63.05–1 [Amended]**

103. In § 63.05–1(a), the words “Marine Technical and Hazardous Materials Division (G–MTH–2)” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

**PART 69—MEASUREMENT OF VESSELS**

104. The authority citation for part 69 continues to read as follows:

Authority: 46 U.S.C. 14102; 14103; 49 CFR 1.46. Section 69.29 issued under 44 U.S.C. 3507; 49 CFR 1.45.

**§ 69.9 [Amended]**

105. In § 69.9 in the definition of Commandant, the word “(G–MVI)” is removed and the word “Commanding Officer, Marine Safety Center” is added in its place.

**PART 70—GENERAL PROVISIONS**

106. The authority citation for part 70 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 U.S.C. App. 1804, E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.45, 1.46; Section 70.01–15 also issued under the authority of 44 U.S.C. 3507.

**§ 70.35–5 [Amended]**

107. In § 70.35–5(a), the words “45 Eisenhower Drive, Paramus, NJ 07653–0910” are removed and the words “Two World Trade Center, 106th Floor, New York, NY 10048” are added in their place.

**PART 71—INSPECTION AND CERTIFICATION**

108. The authority citation for part 71 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2113, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp., p. 793; 49 CFR 1.46.

**§ 71.50–3 [Amended]**

109. In § 71.50–3(f), the word “(G–MVI)” is removed and the word “(G–MCO)” is added in its place.

**§ 71.60–1 [Amended]**

110. In § 71.60–1(a), the words “60 Battery Street, Boston, Mass., 02110” are removed and the words “1 Battery Park, Quincy, MA 02269” are added in their place.

111. In § 71.65–15, paragraph (a)(2) is removed, paragraphs (a)(3) and (a)(4) are redesignated (a)(2) and (a)(3), and newly redesignated paragraph (a)(2) is revised to read as follows:

**§ 71.65–15 [Amended]**

(a) \* \* \*

(2) The plans may be submitted directly to Commanding Officer, U.S. Coast Guard Marine Safety Center (G–MSC), 400 Seventh St., SW., Washington, DC 20590–0001. In this case, the plans will be returned directly to the submitter, with a copy of the action being forwarded to the interested Officer in Charge, Marine Inspection.

\* \* \* \* \*

**PART 72—CONSTRUCTION AND ARRANGEMENT**

112. The authority citation for part 72 continues to read as follows:

Authority: 46 U.S.C. 3306, 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 72.05–10 [Amended]**

113. In § 72.05–10(p), the words “60 Battery Street, Boston, Mass. 02110” are removed and the words “1 Battery Park, Quincy, MA 02269” are added in their place.

**PART 75—LIFESAVING EQUIPMENT**

114. The authority citation for part 75 continues to read as follows:

Authority: 46 U.S.C. 3306, 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 75.01–3 [Amended]**

115. In § 75.01–3(a), the words “Marine Technical and Hazardous Materials Division” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

**§ 75.05–1 [Amended]**

116. In § 75.05–1(a), the words “CG–190, “Equipment Lists,” are removed and the words “COMDTINST M16714.3 (Series)” are added in their place.

**PART 76—FIRE PROTECTION EQUIPMENT**

117. The authority citation for part 76 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 76.01–2 [Amended]**

118. In § 76.01–2(a), the words “Marine Technical and Hazardous Materials Division (G–MTH)” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

**PART 77—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT**

119. The authority citation for part 77 continues to read as follows:

Authority: 46 U.S.C. 3306, 5115; E.O. 12234, 45 FR 58801, 3 CFR 1980 Comp., p. 277; 49 CFR 1.46.

**§ 77.01–3 [Amended]**

120. In § 77.01–3(a), the words “Marine Technical and Hazardous Materials Division” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

**PART 78—OPERATIONS**

121. The authority citation for part 78 continues to read as follows:

Authority: 33 U.S.C. 1321(j), 46 U.S.C. 2103, 3306, 6101; 49 U.S.C. App. 1804; E.O. 11735, 38 FR 21243; 3 CFR 1971–1975 Comp., p. 793, E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 78.05–1 [Amended]**

122. In § 78.05–1(c), in the second sentence, the words “3d,” and “12th,” are removed.

**PART 90—GENERAL PROVISIONS**

123. The authority citation for part 90 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 U.S.C. App. 1804; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

#### § 90.35–5 [Amended]

124. In § 90.35–5(a), the words “Eisenhower Drive, Paramus, NJ 07653–0910” are removed and the words “Two World Trade Center, 106th Floor, New York, NY 10048” are added in their place.

### PART 91—INSPECTION AND CERTIFICATION

125. The authority citation for part 91 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp., p. 793; 49 CFR 1.46.

#### § 91.40–3 [Amended]

126. In § 91.40–3, in paragraphs (e)(1), (e)(3), and (g), remove the word “(G–MVI)” and add the word “(G–MCO)” in its place.

#### § 91.50–1 [Amended]

127. In § 91.50–1(a), the words “60 Batterymarch Street, Boston, Mass., 02110” are removed and the words “1 Batterymarch Park, Quincy, MA 02269” are added in their place.

### PART 92—CONSTRUCTION AND ARRANGEMENT

128. The authority citation for part 92 continues to read as follows:

Authority: 46 U.S.C. 3306, 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

#### § 92.01–2 [Amended]

129. In § 92.01–2(a), the words “Marine Technical and Hazardous Materials Division (G–MTH)” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

### PART 93—STABILITY

130. The authority citation for part 93 continues to read as follows:

Authority: 46 U.S.C. 3306, 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

#### § 93.20–15 [Amended]

131. In § 93.20–15(b), the words “One World Trade Center, Suite 2757, New York, N.Y. 10048” are removed and the words “30 Vesey Street, New York, NY 10007–2914” are added in their place.

### PART 94—LIFESAVING EQUIPMENT

132. The authority citation for part 94 continues to read as follows:

Authority: 46 U.S.C. 3102; 3306; 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

#### § 94.01–3 [Amended]

133. In § 94.01–3(a), the words “Marine Technical and Hazardous Materials Division” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

### PART 95—FIRE PROTECTION EQUIPMENT

134. The authority citation for part 95 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

#### § 95.01–2 [Amended]

135. In § 95.01–2(a), the words “Marine Technical and Hazardous Materials Division (G–MTH)” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

### PART 96—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT

136. The authority citation for part 96 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

#### § 96.01–3 [Amended]

137. In § 96.01–3(a), the words “Marine Technical and Hazardous Materials Division (G–MTH)” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

### PART 97—OPERATIONS

138. The authority citation for part 97 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2103, 3306, 6101; 49 U.S.C. App. 1804; E.O. 11735, 38 FR 21243; 3 CFR, 1971–1975 Comp., p. 793; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

#### § 97.05–1 [Amended]

139. In § 97.05–1(c), in the second sentence, the words “3d,” and “12th,” are removed.

### PART 98—SPECIAL CONSTRUCTION, ARRANGEMENT, AND OTHER PROVISIONS FOR CERTAIN DANGEROUS CARGOES IN BULK

140. The authority citation for part 98 continues to read as follows:

Authority: 33 U.S.C. 1903; 46 U.S.C. 3306, 3703; 49 U.S.C. App. 1804; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

#### § 98.25–90 [Amended]

141. In § 98.25–90(c), the word “(G–MTH)” is removed and the word “(G–MOS)” is added in its place.

#### § 98.30–4 [Amended]

142. In § 98.30–4, in paragraph (a)(1) in footnote <sup>1</sup> remove the word “(G–MTH–1)” and add, in its place, the word “(G–MOS)”; and in paragraph (a)(2) remove the word “OHMT” and add the word “OHMS” in its place.

#### § 98.30–14 [Amended]

143. In § 98.30–14, in paragraphs (a)(2), (a)(3), (b)(1) and (b)(2) remove the word “(G–MTH)” and add, in its place, the word “(G–MOS)”.

### PART 107—INSPECTION AND CERTIFICATION

144. The authority citation for part 107 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306, 5115; 49 CFR 1.45, 1.46; § 107.05 also issued under the authority of 44 U.S.C. 3507.

#### § 107.117 [Amended]

145. In § 107.117, in paragraph (a) the word “(G–MVI)” is removed and the word “(G–MCO)” is added in its place; and in paragraph (b), the word “(G–MTH)” is removed and the word “(G–MMS)” is added in its place.

#### § 107.265 [Amended]

146. In § 107.265(a)(2), the word “(G–MVI)” is removed and the word “(G–MCO)” is added in its place.

#### § 107.267 [Amended]

147. In § 107.267, in paragraphs (a)(2) and (b), the word “(G–MVI)” is removed and the word “(G–MCO)” is added in its place.

#### § 107.413 [Amended]

148. In § 107.413, in paragraphs (b), (c) and (d) the word “(G–MVI)” is removed and the word “(G–MCO)” is added in its place.

### PART 108—DESIGN AND EQUIPMENT

149. The authority citation for part 108 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3102, 3306, 5115; 49 CFR 1.46.

#### § 108.101 [Amended]

150. In § 108.101(a), the words “Marine Technical and Hazardous Materials Division (G–MTH)” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

#### § 108.105 [Amended]

151. In § 108.105(a), the words “Commandant (G–MMT)” are removed

and the words "Commanding Officer, Marine Safety Center" are added in their place.

**§ 108.109 [Amended]**

152. In § 108.109(a), the words "Commandant (G-MMT)" are removed and the words "Commanding Officer, Marine Safety Center" are added in their place.

**§ 108.201 [Amended]**

153. In § 108.201(a), the word "(G-MTH)" is removed and the word "(G-MOS)" is added in its place.

**§ 108.508 [Amended]**

154. In paragraphs (a)(1), (a)(2) and (a)(3) of § 108.508(a), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**PART 110—GENERAL PROVISIONS**

155. The authority citation for part 110 continues to read as follows:

Authority: 33 U.S.C. 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 4104; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.45, 4.46; § 110.01-2 also issued under the authority of 44 U.S.C. 3507.

**§ 110.10-1 [Amended]**

156. In 110.10-1(a), remove the words "Merchant Marine Safety (G-MTH)" and add, in their place, the words "Marine Safety, Security and Environmental Protection (G-MMS)".

**§§ 110.20-1 and 110.25-3 [Amended]**

157. In 46 CFR part 110, remove the word "(G-MTH)" and add, in its place, the word "(G-MMS)" in the following sections:

- (a) Section 110.20-1—introductory text; and
- (b) Section 110.25-3(a)(3).

**PART 147—HAZARDOUS SHIPS' STORES**

158. The authority citation for part 147 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

159. Section 147.5 is revised to read as follows:

**§ 147.5 Commandant (G-MOS); address.**

Commandant (G-MOS) is the Operating and Environmental Standards Division of the Coast Guard Office of Marine Safety, Security and Environmental Protection. The address is Commandant (G-MOS), U.S. Coast Guard Headquarters, Washington, DC 20593-0001, and the telephone number is (202) 267-0214.

**§ 147.50 [Amended]**

160. In § 147.50(d), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§§ 147.9, 147.40, and 147.60 [Amended]**

161. In addition to the amendments set forth above, in 46 CFR part 147 remove the word "(G-MTH)" and add, in its place, the word "(G-MOS)" in the following sections:

- (a) Section 147.9(a);
- (b) Section 147.40—heading, (a), (b), and (c); and
- (c) Section 147.60(c)(2).

**PART 148—CARRIAGE OF SOLID HAZARDOUS MATERIALS IN BULK**

162. The authority citation for part 148 continues to read as follows:

Authority: 49 U.S.C. App. 1804; 49 CFR 1.46.

**§ 148.01-9 [Amended]**

163. In § 148.01-9(a), the word "(G-MTH)" is removed and the word "(G-MOS)" is added in its place.

**§ 148.01-11 [Amended]**

164. In § 148.01-11(b)(2), the word "(G-MTH)" is removed and the word "(G-MOS)" is added in its place.

**PART 150—COMPATIBILITY OF CARGOES**

165. The authority citation for part 150 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703; 49 CFR 1.45, 1.46. Section 150.105 issued under 44 U.S.C. 3507; 49 CFR 1.45.

**§ 150.210 [Amended]**

166. In § 150.210(b) under the entry for National Fire Protection Association (NFPA), the words "Batterymarch Park," are removed and the words "1 Batterymarch Park," are added in their place. 150.140, 150.150, and 150.160 [Amended]

167. In addition to the amendment set forth above, in 46 CFR part 150 remove the word "(G-MTH)" and add, in its place, the word "(G-MOS)" in the following sections:

- (a) Section 150.140;
- (b) Section 150.150—introductory text; and
- (c) Section 150.160(a).

**PART 151—BARGES CARRYING BULK LIQUID HAZARDOUS MATERIAL CARGOES**

168. The authority citation for part 151 continues to read as follows:

Authority: 33 U.S.C. 1903; 46 U.S.C. 3703; 49 CFR 1.46.1.

**§§ 151.50-20, 151.50-22, 151.50-23, 151.50-36, 151.50-50, 151.50-75, 151.50-76, 151.50-77, 151.50-80, and 151.50-84 [Amended]**

169. In 46 CFR part 151 remove the word "(G-MTH)" and add, in its place, the word "(G-MOS)" in the following sections:

- (a) Section 151.50-20(i);
- (b) Section 151.50-22(d);
- (c) Section 151.50-23(e);
- (d) Section 151.50-36(b);
- (e) Section 151.50-50(n);
- (f) Section 151.50-75;
- (g) Section 151.50-76(b), (c), and (g);
- (h) Section 151.50-77(a);
- (i) Section 151.50-80(c); and
- (j) Section 151.50-84(e)(2).

**PART 153—SHIPS CARRYING BULK LIQUID, LIQUEFIED GAS, OR COMPRESSED GAS HAZARDOUS MATERIALS**

170. The authority citation for part 153 continues to read as follows:

Authority: 46 U.S.C. 3703, 9101; 49 U.S.C. App. 1804; 33 U.S.C. 1903; 49 CFR 1.46.

**§ 153.809 [Amended]**

171. In § 153.809, in paragraphs (a), (b)(1), (c), and (d), remove the words "Commandant (G-MTH)" and add, in their place, the words "Commanding Officer, Marine Safety Center (G-MSC)".

**§ 153.902 [Amended]**

172. In § 153.902 remove the words "Commandant (G-MTH)" and add, in their place, the words "Commanding Officer, Marine Safety Center (G-MSC)".

**§§ 153.7, 153.10, 153.15, 153.16, 153.219, 153.250, 153.336, 153.353, 153.365, 153.407, 153.460, 153.490, 153.491, 153.525, 153.530, 153.556, 153.557, 153.558, 153.921, 153.935a, 153.1010, 153.1011, 153.1025, 153.1052, 153.1101, 153.1119, 153.1502, and 153.1608 [Amended]**

173. In 46 CFR part 153 remove the word "(G-MTH)" and add, in its place, the word "(G-MOS)" in the following sections:

- (a) Section 153.7(b)(4), (b)(4)(ii), (c)(3), (c)(4), (c)(5), and (c)(6);
- (b) Section 153.10(a)(1), (a)(3), and (b);
- (c) Section 153.15(b)(4);
- (d) Section 153.16(a);
- (e) Section 153.219(b)(3);
- (f) Section 153.250;
- (g) Section 153.336(a)(3) and (b)(2);
- (h) Section 153.353(c);
- (i) Section 153.365(a)(3);
- (j) Section 153.407(b);
- (k) Section 153.460(b) and (c);
- (l) Section 153.490(b)(1);
- (m) Section 153.491(b)(3);
- (n) Section 153.525(d)(3);
- (o) Section 153.530(c) introductory text, (c)(1), (c)(2), and (o);

- (p) Section 153.556(a);
- (q) Section 153.557(a)(3) and (b);
- (r) Section 153.558(b);
- (s) Section 153.921;
- (t) Section 153.935a(a)(2);
- (u) Section 153.1010(b)(4);
- (v) Section 153.1011(a)(2) and (a)(3);
- (w) Section 153.1025(c);
- (x) Section 153.1052;
- (y) Section 153.1101(c);
- (z) Section 153.1119(c)(1), (c)(2)(viii), (c)(3), and (e);
- (aa) Section 153.1502(a); and
- (bb) Section 153.1608—Note.

**PART 154—SAFETY STANDARDS FOR SELF-PROPELLED VESSELS CARRYING BULK LIQUEFIED GASES**

174. The authority citation for part 154 continues to read as follows:

Authority: 46 U.S.C. 3703, 9101; 49 CFR 1.46.

**§ 154.22 [Amended]**

175. In § 154.22, in paragraphs (a)(10) and (b), the words “Commandant (G-MTH)” are removed and the words “Commanding Officer, Marine Safety Center (G-MSC)” are added in their place.

**§ 154.151 [Amended]**

176. In § 154.151, in paragraphs (a), (b)(1) and (c), the words “Commandant (G-MTH)” are removed and the words “Commanding Officer, Marine Safety Center (G-MSC)” are added in their place.

**§ 154.1803 [Amended]**

177. In § 154.1803(b), the words “Commandant (G-MTH)” are removed and the words “Commanding Officer, Marine Safety Center (G-MSC)” are added in their place.

**§§ 154.1, 154.12, 154.30, 154.32, 154.34, 154.170, 154.172, 154.315, 154.350, 154.356, 154.405, 154.406, 154.409, 154.410, 154.411, 154.418, 154.419, 154.425, 154.426, 154.428, 154.430, 154.431, 154.435, 154.436, 154.438, 154.440, 154.447, 154.448, 154.449, 154.453, 154.459, 154.467, 154.503, 154.516, 154.519, 154.520, 154.522, 154.524, 154.546, 154.610, 154.620, 154.630, 154.650, 154.655, 154.703, 154.709, 154.805, 154.904, 154.908, 154.912, 154.1005, 154.1135, 154.1335, 154.1340, 154.1345, 154.1725, 154.1735, 154.1755, and 154.1860 [Amended]**

178. In addition to the amendments set forth above, in 46 CFR part 154 remove the word “(G-MTH)” and add, in its place, the word “(G-MOS)” in the following sections:

- (a) Section 154.1(a);
- (b) Section 154.12(c)(4) and (d)(4);
- (c) Section 154.30(a), (b), and (c);
- (d) Section 154.32(a) and (b);
- (e) Section 154.34;
- (f) Section 154.170(b)(1) and (b)(2);

- (g) Section 154.172(c);
- (h) Section 154.315(b)(2);
- (i) Section 154.350(a);
- (j) Section 154.356(c);
- (k) Section 154.405(c);
- (l) Section 154.406(c);
- (m) Section 154.409(a);
- (n) Section 154.410(a) and (b);
- (o) Section 154.411—in introductory text;
- (p) Section 154.418;
- (q) Section 154.419;
- (r) Section 154.425;
- (s) Section 154.426;
- (t) Section 154.428;
- (u) Section 154.430(b);
- (v) Section 154.431(b);
- (w) Section 154.435;
- (x) Section 154.436;
- (y) Section 154.438(b);
- (z) Section 154.440(a)(2) and (b);
- (aa) Section 154.447(b);
- (bb) Section 154.448—in introductory text;
- (cc) Section 154.449—in introductory text;
- (dd) Section 154.453;
- (ee) Section 154.459(b) and (c);
- (ff) Section 154.467—in introductory text;

**PART 160—LIFESAVING EQUIPMENT**

179. The authority citation for part 160 continues to read as follows:

Authority: 46 U.S.C. 2103, 3306, 3703, and 4302; E.O. 12234, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 160.010–2 [Amended]**

180. In § 160.010–2(c), the word “(G-MVI–3)” is removed and the word “(G-MMS–4)” is added in its place; the words “Survival Systems Branch” are removed and the words “Lifesaving and Fire Safety Standards Branch” are added in their place; and the words “Merchant Marine Safety” are removed and the words “Marine Safety, Security and Environmental Protection” are added in their place.

**§ 160.010–4 [Amended]**

181. In § 160.010–4, in paragraphs (b), (c)(1), (c)(2) and (c)(3) the word “(G-MVI)” is removed and the word “(G-MMS)” is added in its place.

**§ 160.010–7 [Amended]**

182. In § 160.010–7(a), the word “(G-MVI–3)” is removed and the word “(G-MMS)” is added in its place.

**§ 160.076–5 [Amended]**

183. In § 160.076–5, in the definition of *Commandant*, the words “Survival Systems Branch” are removed and the words “Lifesaving and Fire Safety Standards Branch” are added in their place and the word “(G-MVI–<sup>3</sup>/<sub>14</sub>)” is removed and the word “(G-MMS–4)” is added in its place.

**§ 160.077–2 [Amended]**

184. In § 160.077–2(a), the words “Survival Systems Branch” are removed and the words “Lifesaving and Fire Safety Standards Branch” are added in their place and the word “(G-MVI–<sup>3</sup>/<sub>14</sub>)” is removed and the word “(G-MMS–4)” is added in its place.

185. Section 160.077–21 is amended by adding a note immediately following paragraph (c)(4)(i) to read as follows:

**§ 160.077–21 Approval Testing—Type I and Commercial Hybrid PFD.**

*	*	*	*	*
(c)	*	*	*	*
(4)	*	*	*	*
(i)	*	*	*	*

Note If the freeboard of a test subject is close to zero, caution must be taken to prevent the subject from inhaling water. The subject may use lightweight breathing aids to avoid inhaling water.

*	*	*	*	*
---	---	---	---	---

**§ 160.176–3 [Amended]**

186. In § 160.176–3(a), the words “Survival Systems Branch” are removed and the words “Lifesaving and Fire Safety Standards Branch” are added in their place; the words “Merchant Marine Safety” are removed and the words “Marine Safety, Security and Environmental Protection” are added in their place; and the word “(G-MVI–

3/14)" is removed and the word "(G-MMS-4)" is added in its place.

**§§ 160.001-1, 160.002-1, 160.021-9, 160.022-1, 160.022-9, 160.023-9, 160.024-9, 160.028-9, 160.031-9, 160.033-1, 160.034-1, 160.035-8, 160.036-9, 160.037-1, 160.037-9, 160.040-9, 160.047-1, 160.052-1, 160.054-1, 160.055-1, 160.057-1, 160.057-9, 160.060-1, 160.066-18, 160.072-09, and 160.073-5 [Amended]**

187. In addition to the amendments set forth above, in 46 CFR part 160 remove the word "(G-MVI)" and add, in its place, the word "(G-MMS)" in the following sections:

- (a) Section 160.001-1(d);
- (b) Section 160.002-1(c);
- (c) Section 160.021-9(b);
- (d) Section 160.022-1(c);
- (e) Section 160.022-9(b);
- (f) Section 160.023-9(b);
- (g) Section 160.024-9(b);
- (h) Section 160.028-9(b);
- (i) Section 160.031-9(b);
- (j) Section 160.033-1(b);
- (k) Section 160.034-1(b);
- (l) Section 160.035-8(b);
- (m) Section 160.036-9(b);
- (n) Section 160.037-1(c);
- (o) Section 160.037-9(b);
- (p) Section 160.040-9(b);
- (q) Section 160.047-1(c)(1);
- (r) Section 160.052-1(c)(1);
- (s) Section 160.054-1(b);
- (t) Section 160.055-1(c);
- (u) Section 160.057-1(c);
- (v) Section 160.057-9(b);
- (w) Section 160.060-(c)(1);
- (x) Section 160.066-18(b);
- (y) Section 160.072-09(a); and
- (z) Section 160.073-5(b).

**§§ 160.010-1, 160.076-11, 160.077-5, 160.171-3, 160.174-3, and 160.176-4 [Amended]**

188. In addition to the amendments set forth above, in 46 CFR part 160 remove the words "Survival Systems Branch (G-MVI-3)" and add, in its place, the words "Lifesaving and Fire Safety Standards Branch (G-MMS-4)" in the following sections:

- (a) Section 160.010-1(a);
- (b) Section 160.076-11(a);
- (c) Section 160.077-5(a);
- (d) Section 160.171-3(a);
- (e) Section 160.174-3(a); and
- (f) Section 160.176-4(a).

#### **PART 161—ELECTRICAL EQUIPMENT**

189. The authority citation for part 161 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 4104, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., 277; 49 CFR 1.46.

**§ 161.002-1 [Amended]**

190. In § 161.002-1(c), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§ 161.004-1 [Amended]**

191. In § 161.004-1(d), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§ 161.004-7 [Amended]**

192. In § 161.004-7(a), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§ 161.010-1 [Amended]**

193. In § 161.010-1(a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

**§ 161.010-4 [Amended]**

194. In § 161.010-4, in paragraphs (a) and (b) the words "Commandant (G-MTH-2)" and "Commandant (G-MTH)" are removed and the words "Commandant (G-MMS)" are added in their place.

**§ 161.011-10 [Amended]**

195. In § 161.011-10(c), the word "(G-MVI)" is removed and the word "(G-MMS)" is added in their place.

**§ 161.012-5 [Amended]**

196. In § 161.012-5(a), the word "(G-MVI)" is removed and the word "(G-MMS)" is added in its place.

**§ 161.013-11 [Amended]**

197. In § 161.013-11(c)(1), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§ 161.013-17 [Amended]**

198. In § 161.013-17(a), the word "(G-MTH)" is removed and word "(G-MMS)" is added in its place.

#### **PART 162—ENGINEERING EQUIPMENT**

199. The authority citation for part 162 continues to read as follows:

Authority: 33 U.S.C. 1321(j) 1903; 46 U.S.C. 3306, 3703, 4104, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 11735, 38 FR 21243, 3 CFR, 1971-1975 Comp., p. 793; 49 CFR 1.46.

**§ 162.017-3 [Amended]**

200. In § 162.017-3(b), the word "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§ 162.017-6 [Amended]**

201. In § 162.017-6, in paragraphs (a) and (c), the "(G-MTH)" is removed and the word "(G-MMS)" is added in its place.

**§ 162.027-6 [Amended]**

202. In § 162.027-6(a), the word "(G-MVI)" is removed and the word "(G-MMS)" is added in its place.

**§ 162.050-7 [Amended]**

203. In § 162.050-7, in paragraphs (a), (f) and (g) the word "(G-MVI)" is removed and the word "(G-MMS)" is added in its place.

**§ 162.050-15 [Amended]**

204. In § 162.050-15, in paragraphs (a), (e) and (h) the word "(G-MVI)" is removed and the word "(G-MMS)" is added in its place.

#### **PART 164—MATERIALS**

205. The authority citation for part 164 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 4104, 4302; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 164.012-1 [Amended]**

206. In § 164.012-1(b), the words "60 Battery March Street, Boston, Mass., 02110" are removed and the words "1 Battery March Park, Quincy, MA 02269" are added in their place.

**§ 164.019-3 [Amended]**

207. In § 164.019-3, the word "(G-MVI-3/14)" is removed and the word "(G-MMS)" is added in its place; and the word "(G-MVI-3)" is removed and the word "(G-MMS)" is added in its place.

**§ 164.023-3 [Amended]**

208. In § 164.023-3, the words "Survival Systems Branch (G-MVI-3)" is removed and the words "Lifesaving and Fire Safety Standards Branch (G-MMS-4)" are added in their place.

**§§ 164.007-1, 164.008-1, 164.009-9, 164.009-11, 164.012-1, and 164.018-7 [Amended]**

209. In addition to the amendments set forth above, in 46 CFR Part 164 remove the word "(G-MVI)" and add, in its place, the word "(G-MMS)" in the following sections:

- (a) Section 164.007-1(c)(1);
- (b) Section 164.008-1(c)(1);
- (c) Section 164.009-9 (a) and (d);
- (d) Section 164.009-11(a);
- (e) Section 164.012-1(b); and
- (f) Section 164.018-7(a).

#### **PART 167—PUBLIC NAUTICAL SCHOOL SHIPS**

210. The authority citation for part 167 continues to read as follows:

Authority: 46 U.S.C. 3306, 6101, 8105; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 167.15-30 [Amended]**

211. In § 167.15-30(e), the word "(G-MVI)" is removed and the word "(G-MCO)" is added in its place.

**§ 167.20–35 [Amended]**

212. In § 167.20–35, the words “§ 55.10–25(n) of Subchapter F (Marine Engineering) of this chapter” are removed and the words “33 CFR 155.330 through 155.380” are added in their place.

**§ 167.30–10 [Amended]**

213. In § 167.30–10(a), the words “60 Batterymarch Street, Boston, Mass.,” are removed and the words “1 Batterymarch Park, Quincy, MA 02269” are added in their place.

**Part 169—SAILING SCHOOL VESSELS**

214. The authority citation for part 169 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 3306, 5115, 6101; E.O. 11735, 38 FR 21243, 3 CFR, 1971–1975 Comp., p. 793; 49 CFR 1.45, 1.46; § 169.117 also issued under the authority of 44 U.S.C. 3507.

**§ 169.115 [Amended]**

215. In § 169.115(c)(3), the number “1” is added immediately preceding the words “Batterymarch Park,”.

**§ 169.229 [Amended]**

216. In § 169.229(e), the word “(G–MVI)” is removed and the word “(G–MCO)” is added in its place.

**§ 169.529 [Amended]**

217. In § 169.529(j), the number “161.008” is removed and the number “94.20–15(j)” is added in its place.

**§ 169.551 [Amended]**

218. In § 169.551(b), the number “160.071” is removed and the number “160.171” is added in its place.

**PART 170—STABILITY REQUIREMENTS FOR ALL INSPECTED VESSELS**

219. The authority citation for part 170 continues to read as follows:

Authority: 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

**§ 170.015 [Amended]**

220. In § 170.015(a), the words “Marine Technical and Hazardous Materials Division (G–MTH)” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

**PART 174—SPECIAL RULES PERTAINING TO SPECIFIC VESSEL TYPES**

221. The authority citation for part 174 continues to read as follows:

Authority: 42 U.S.C. 9118, 9119, 9153; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 5115; E.O.

12234, 45 FR 58801, 3 CFR 1980 Comp., p. 277; 49 CFR 1.46.

**§ 174.007 [Amended]**

222. In § 174.007(a), the words “Marine Technical and Hazardous Materials Division (G–MTH)” are removed and the words “Design and Engineering Standards Division (G–MMS)” are added in their place.

**§ 174.335 [Amended]**

223. In § 174.335, in paragraphs (a) and (b) the number “163.001” is removed and the number “170.270” is added in its place.

**PART 175—GENERAL PROVISIONS**

224. The authority citation for part 175 continues to read as follows:

Authority: 46 U.S.C. 3306, 3703, 5115, 8105; 49 U.S.C. App. 1804; 49 CFR 1.45, 1.46; § 175.01–3 also issued under the authority of 44 U.S.C. 3507.

**§ 175.10–2 [Amended]**

225. In § 175.10–2(b), the word “CG–190” is removed and the words “COMDTINST M16714.3 (Series)” are added in its place.

**§ 175.25–1 [Amended]**

226. In § 175.25–1(a), remove the number “178”.

**§ 175.27–5 [Amended]**

227. In § 175.27–5(a), the words “420 Lexington Avenue, New York, NY 10017” are removed and the words “3069 Solomons Island Road, Edgewater, MD 21037” are added in their place.

**PART 180—LIFESAVING EQUIPMENT**

228. The authority citation for part 180 continues to read as follows:

Authority: 46 U.S.C. 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp. p. 277; 49 CFR 1.46.

**§ 180.05–1 [Amended]**

229. In § 180.05–1(a), the word “CG–190” is removed and the words “COMDTINST M16714.3 (Series)” are added in its place.

**§ 180.10–5 [Amended]**

230. In § 180.10–5(b), removed the words “After July 1, 1968, all” and add, in its place, the word “All”.

**§ 180.10–15 [Amended]**

231. In § 180.10–15(b), remove the words “After July 1, 1968, all” and add, in its place, the word “All”.

**§ 180.10–20 [Amended]**

232. In § 180.10–20(b), remove the words “After July 1, 1968, all” and add, in its place, the word “All”.

**§ 180.25–20 [Amended]**

233. In § 180.25–20(a), remove the words “after June 30, 1980,”.

**§ 180.25–25 [Amended]**

234. In § 180.25–25(a), remove the words “after June 30, 1980,”.

**PART 181—FIRE PROTECTION EQUIPMENT**

235. The authority citation for part 181 continues to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

**§ 181.05–1 [Amended]**

236. In § 181.05–1(b), the word “CG–190” is removed and the words “COMDTINST M16714.3 (Series)” are added in its place.

**§ 181.15–10 [Amended]**

237. In § 181.15–10(d), removed the words “after January 1, 1980,”.

**PART 182—MACHINERY INSTALLATION**

238. The authority citation for part 182 continues to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

**§ 182.15–40 [Amended]**

239. In § 182.15–40(a)(3), the word “(G–MTH)” is removed and the word “(G–MMS)” is added in its place.

**§ 182.20–40 [Amended]**

240. In § 182.20–40(a)(2)(ii), the word “(G–MTH)” is removed and the word “(G–MMS)” is added in its place.

**PART 183—ELECTRICAL INSTALLATION**

241. The authority citation for part 183 continues to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

**§ 183.01–15 [Amended]**

242. In § 183.01–15, in paragraph (b)(3), the words “60 Batterymarch Street, Boston 10, Mass.” are removed and the words “1 Batterymarch Park, Quincy, MA 02269.” are added in their place; in paragraph (b)(4), the words “207 East Ohio Street, Chicago 11, Ill.” are removed and the words “12 Laboratory Drive, Research Triangle Park, NC 27709.” are added in their place; and in paragraph (b)(5), the words “207 East Ohio Street, Chicago, Ill. 60611.” are removed and the words “12 Laboratory Drive, Research Triangle Park, NC 27709.” are added in their place.

**§ 183.05–45 [Amended]**

243. In § 183.05–45(i), the words “60 Batterymarch St., Boston 10, Mass.” are removed and the words “1 Batterymarch

Park, Quincy, MA 02269" are added in their place.

#### **PART 184—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT**

244. The authority citation for part 184 continues to read as follows:

Authority: 46 U.S.C. 3306; 49 CFR 1.46.

##### **§ 184.01-3 [Amended]**

245. In § 184.01-3, in paragraph (b), under the entry for American Boat and Yacht Council (ABYC), remove the words "P.O. Box 747, 405 Headquarters Dr., Suite 3, Millersville, MD 21108-0747" and add, in their place, the words "3069 Solomons Island Road, Edgewater, MD 21037" and under the entry for National Fire Protection Association (NFPA), remove the words "60 Batterymarch Park, Quincy, MA 02260" and add, in their place, the words "1 Batterymarch Park, Quincy, MA 02269".

#### **PART 188—GENERAL PROVISIONS**

246. The authority citation for part 188 continues to read as follows:

Authority: 46 U.S.C. 2113, 3306, 5115; 49 U.S.C. App. 1804; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

##### **§ 188.35-5 [Amended]**

247. In § 188.35-5, in paragraph (a) remove the words "45 Eisenhower Drive, Paramus, NJ 07653-0910" and add, in their place, the words "Two World Trade Center, 106th Floor, New York, NY 10048"; and, in paragraph (b) remove the word "(G-MVI)" and add, in its place, the word "(G-MCO)".

#### **PART 189—INSPECTION AND CERTIFICATION**

248. The authority citation for part 189 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2113, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; E.O. 11735, 38 FR 21243, 3 CFR, 1971-1975 Comp., p. 793; 49 CFR 1.46.

##### **§ 189.40-3 [Amended]**

249. In § 189.40-3(e)(1), (e)(3), and (g) the word "(G-MVI)" is removed and the word "(G-MCO)" is added in its place.

##### **§ 189.50-1 [Amended]**

250. In § 189.50-1(a), the words "60 Batterymarch Street, Boston, Mass. 02110" are removed and the words "1 Batterymarch Park, Quincy, MA 02269" are added in their place.

##### **§ 189.55-15 [Amended]**

251. In § 189.55-15(a)(2), the words "Commandant (G-MTH)" are removed

and the words "Commanding Officer, Marine Safety Center (G-MSC)" are added in their place.

#### **PART 190—CONSTRUCTION AND ARRANGEMENT**

252. The authority citation for part 190 continues to read as follows:

Authority: 46 U.S.C. 2113, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

##### **§ 190.01-3 [Amended]**

253. In § 190.01-3(a), the words, "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

##### **§ 190.20-10 [Amended]**

254. In § 190.20-10(b), the number "43.15-1" is removed and the number "42.13-15" is added in its place.

#### **PART 192—LIVESAVING EQUIPMENT**

255. The authority citation for part 192 continues to read as follows:

Authority: 46 U.S.C. 2213, 3306, 5115; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

##### **§ 192.41-5 [Amended]**

256. In § 192.41-5, in paragraphs (c) and (d), the number "160.071" is removed and the number "160.171" is added in its place.

#### **PART 193—FIRE PROTECTION EQUIPMENT**

257. The authority citation for part 193 continues to read as follows:

Authority: 46 U.S.C. 2213, 3102, 3306; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

##### **§ 193.01-3 [Amended]**

258. In § 193.01-3(a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Design and Engineering Standards Division (G-MMS)" are added in their place.

#### **PART 196—OPERATIONS**

259. The authority citation for part 196 continues to read as follows:

Authority: 33 U.S.C. 1321(j); 46 U.S.C. 2113, 3306, 5115, 6101; E.O. 11735, 38 FR 21243, 3 CFR, 1971-1975 Comp., p. 793; E.O. 12234, 45 FR 58801, 3 CFR, 1980 Comp., p. 277; 49 CFR 1.46.

##### **§ 196.03-01 [Amended]**

260. In § 196.03-1(b), the words "46 U.S.C. 239" are removed and the words "46 U.S.C. 77" are added in their place and the words "part 137" are removed

and the words "part 5" are added in their place.

#### **PART 197—GENERAL PROVISIONS**

261. The authority citation for part 197 continues to read as follows:

Authority: 33 U.S.C. 1509; 43 U.S.C. 1333; 46 U.S.C. 3306, 3703, 6101; 49 CFR 1.46.

##### **§ 197.484 [Amended]**

262. In § 197.484(a), the number "146.01-20" is removed and the number "146.30" is added in its place.

##### **§ 197.510 [Amended]**

263. In § 197.510(a), the words "Marine Technical and Hazardous Materials Division (G-MTH)" are removed and the words "Operating and Environmental Standards Division (G-MOS)" are added in their place.

Dated: September 25, 1995.

Howard L. Hime,

*Acting Chief, Office of Marine Safety, Security and Environmental Protection.*

BILLING CODE 4910-14-M

#### **FEDERAL COMMUNICATIONS COMMISSION**

##### **47 CFR Part 0**

[DA95-2035]

#### **List of Office of Management and Budget Approved Information Collection Requirements**

AGENCY: Federal Communications Commission.

ACTION: Final rule.

**SUMMARY:** This action revises the Commission's list of Office of Management and Budget approved information collection requirements with expiration dates contained in the Commission's Rules. This action will provide the public with a current list of information collection requirements that have been approved by Office of Management and Budget (OMB) and their associated OMB control numbers with expiration dates in the Commission's Rules.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Dorothy Conway, Office of Managing Director, (202) 418-0217.

##### **SUPPLEMENTARY INFORMATION:**

Order

By the Managing Director:

[Adopted: September 26, 1995;

Released: September 27, 1995]

1. Section 3507(f) of the Paperwork Reduction Act of 1980, as amended, 44

U.S.C. 3507(f), requires agencies to display a current control number assigned by the Director of the Office of Management and Budget ("OMB") for each agency information collection requirement.

2. Section 0.408 of the Commission's Rules displays the OMB control numbers assigned to the Commission's information collection requirements that have been reviewed and approved by OMB.

3. Authority for this action is contained in Section 4(i) of the Communications Act of 1934 (47 U.S.C. 154(i)), as amended, and Section 0.231(b) of the Commission's Rules. Since this revision is a matter of agency organization procedure or practice, the notice and comment and effective date provisions of the Administrative Procedure Act do not apply. See 5 U.S.C. Section 553(b)(A)(d).

4. Accordingly, *it is ordered, that* Section 0.408 of the Rules is REVISED as set forth in the revised text, effective on the date of publication in the Federal Register.

List of Subjects in 47 CFR Part 0

Reporting and recordkeeping requirements.

Federal Communications Commission.

Andrew S. Fishel,  
*Managing Director.*

Rule Change

Part 0 of Chapter I of Title 47 of the Code of Federal Regulations is amended as follows:

**PART 0—COMMISSION ORGANIZATION**

1. The authority citation for part 0 continues to read:

Authority: Secs. 4, 303, 48 Stat. 1066, 1082, as revised; 47 U.S.C. 154, 303, unless otherwise noted.

2. Section 0.408 is revised to read as follows:

**§ 0.408 OMB control numbers and expiration dates assigned pursuant to the Paperwork Reduction Act**

(a) *Purpose.* This section collects and displays the control numbers and

expiration dates for the Commission information collection requirements assigned by the Office of Management and Budget ("OMB") pursuant to the Paperwork Reduction Act of 1980, Public Law 96-511. The Commission intends that this section comply with the requirement that agencies display current control numbers and expiration dates assigned by the Director of OMB for each approved information collection requirement. Notwithstanding any other provisions of law, no person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Questions concerning the OMB control numbers and expiration dates should be directed to the Records Management Branch, Federal Communications Commission, Washington, DC 20554.

(b) *Display.*

**DEPARTMENT OF TRANSPORTATION**

**National Highway Traffic Safety Administration**

**49 CFR 552, 554, 573, 576, and 577**

[Docket No. 93-68, Notice 7]

**Defect and Noncompliance Reports; Record Retention; Defect and Noncompliance Notification Establishment of Effective Date**

**AGENCY:** National Highway Traffic Safety Administration (NHTSA).

**ACTION:** Establishment of effective date of certain amendments currently under reconsideration; clarification.

**SUMMARY:** This document clarifies that the effective date of several of the amendments to NHTSA's defect investigation and reporting regulations that were published in the Federal Register on April 5, 1995 (60 FR 17254) will be January 2, 1996. These amendments—to 49 CFR Part 576 (record retention) and 49 CFR sections 573.5(c)(8) (recall schedule); 573.7 (leased vehicle recordkeeping); and 577.5(h) (recall notification of lessees)—are currently the subject of petitions for

reconsideration. To allow the agency the opportunity to consider the issues raised by the petitions for reconsideration, NHTSA indefinitely suspended the effectiveness of those amendments on July 7, 1995 (60 FR 35458). In response to advice from the Office of the Federal Register that it is not proper to have rules in place without a definite effective date, NHTSA is establishing January 2, 1996 as the effective date of the identified amendments. All other amendments made by the April 5, 1995 final rule went into effect on July 7, 1995.

**EFFECTIVE DATES:** Effective May 4, 1995, the effective date of the April 5, 1995 amendments to 49 CFR Part 576 and 49 CFR 573.5(c)(8), 573.7 and 577.5(h) is January 2, 1996, and the effective date of all other amendments made by the April 5, 1995 final rule is July 7, 1995.

**FOR FURTHER INFORMATION CONTACT:** Jonathan D. White, Office of Defects Investigation, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Room 5319, Washington, DC 20590; (202) 366-5227.

**SUPPLEMENTARY INFORMATION:** By final rule published in the Federal Register on April 5, 1995 (60 FR 17254), NHTSA amended several provisions of its defect investigation and reporting regulations. The effective date of those amendments was originally to be May 5, 1995.

However, shortly before May 5, NHTSA received several petitions for reconsideration of certain of those amendments as well as requests for postponement of the effective date of the entire final rule.

NHTSA was unable to act on those requests prior to May 5. Thus, by notice published on May 16, 1995 (60 FR 26002), the agency rescinded the May 5, 1995 effective date and adopted a new effective date of July 7, 1995 for all of the April 5 amendments.

In June 1995, NHTSA decided that it wished to gather and consider additional information on certain of the amendments that were identified in the petitions for reconsideration. The agency decided that those amendments—to 49 CFR Part 576 (record retention) and 49 CFR sections 573.5(c)(8) (recall schedule); 573.7 (leased vehicle recordkeeping); and 577.5(h) (recall notification of lessees)—should not go into effect until the completion of the reconsideration process. Therefore, by notice published in the Federal Register on July 7, 1995 (60 FR 35458), NHTSA suspended the effective date of those four amendments "until further notice."

NHTSA has been advised by the Office of the Federal Register that it is not appropriate to have rules in place without a definite effective date and that

the agency should have indicated in the May 16, 1995 notice that the July 7, 1995 effective date was retroactively established as of May 4, 1995. To address these problems and to alleviate any potential ambiguity regarding the effectiveness of these amendments, NHTSA is issuing this notice to clarify that, effective May 4, 1995, the effective date of the amendments to 49 CFR Part 576, Record Retention, and 49 CFR 573.5(c)(8) (recall schedule), 573.7 (leased vehicle recordkeeping), and 577.5(h) (recall notification of lessees) that were published on April 5, 1995 will be January 2, 1996. All other amendments made by the April 5, 1995 final rule became effective on July 7, 1995.

Issued on: September 21, 1995.

Barry Felrice,

*Associate Administrator for Safety Performance Standards.*

#### 49 CFR Part 571

[Docket No. 74-09; Notice 42]

RIN 2127-AF02

#### Federal Motor Vehicle Safety Standards; Child Restraint Systems; Correction

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

**ACTION:** Final rule; correction.

**SUMMARY:** This document corrects a final rule that was published Thursday, July 6, 1995 (60 FR 35126). The rule amended Federal Motor Vehicle Safety Standard (FMVSS) No. 213, *Child Restraint Systems*, to add a greater array of sizes and weights of test dummies to Standard 213 for use in compliance tests.

**EFFECTIVE DATE:** January 3, 1996.

**FOR FURTHER INFORMATION CONTACT:** For nonlegal issues: Dr. George Mouchahoir, Office of Vehicle Safety Standards (telephone 202-366-4919).

For legal issues: Ms. Deirdre Fujita, Office of the Chief Counsel (202-366-2992). Both can be reached at the National Highway Traffic Safety Administration, 400 Seventh St., S.W., Washington, D.C., 20590.

#### SUPPLEMENTARY INFORMATION:

##### Background

This rule corrects a final rule that amended FMVSS No. 213, *Child Restraint Systems*, to add a greater array of sizes and weights of test dummies to

Standard 213 for use in compliance tests. The final rule was published Thursday, July 6, 1995 (60 FR 35126).

#### Need for Correction

As published, the final rule contains errors that may prove to be misleading and are in need of clarification. First, the effective date of the amendments adopted by the rule, as drafted, did not conform to the drafting requirements of the Federal Register. Second, one of the labeling requirements directed manufacturers to specify the sitting height of children for whom the restraint is recommended. This is an error because, while the proposed rule considered requiring a sitting height measure, NHTSA decided against this in the final rule. Third, there are redundant terms that are at the beginning of the section that specifies which dummy is used to test a child restraint recommended for use by older children (S7.1(c)). This document removes them.

NHTSA notes that the agency has received petitions for reconsideration requesting a delay in the January 3, 1996 effective date of the rule for add-on child restraints. These petitions are pending. This correction notice does not represent or imply any agency decision or other exercise of judgment concerning the merits of that request. NHTSA's evaluation of those petitions is on-going and a decision to grant or deny those petitions will be published shortly.

#### Correction of Publication

Accordingly, the publication on July 6, 1995 of the final rule (Docket No. 74-09, Notice 42), is corrected as follows:

1. On page 35127, in the first column, the **DATES** section is corrected to read as follows:

**DATES:** This rule is effective January 3, 1996.

However, manufacturers of built-in child restraint systems may comply with existing requirements for built-in systems (as of July 6, 1995) until September 1, 1996.

Manufacturers of add-on child restraint systems may comply with existing requirements for add-on systems (as of July 6, 1995) until January 3, 1996.

#### § 571.213 [Corrected]

2. On page 35140, in the first column, in § 571.213, in S5.5.5(f)(3), line four, the word "sitting" is removed.

3. On page 35142, in the first column, in § 571.213, in S7.1(c), line one, the words "Except for a booster seat, a child" are corrected to read "A child".

Dated: September 26, 1995.

Barry Felrice,

*Associate Administrator for Safety Performance Standards.*

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### 50 CFR Part 23

RIN 1018-AC 78

#### Changes in the List of Species in Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Final rule.

**SUMMARY:** The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES or Convention) regulates international trade in certain animals and plants. Species or other taxa for which such trade is controlled are listed in Appendices I, II, and III to CITES. The countries participating in this treaty, including the United States, adopted amendments to Appendices I and II at the ninth meeting of the Conference of the Parties (COP9) in November, 1994. The United States did not enter a reservation against any of the adopted amendments. This document incorporates all these amendments into the U.S. Fish and Wildlife Service's (Service) regulations implementing CITES. This rule includes an amended, complete listing of CITES-protected animal and plant taxa (50 CFR 23.23) that incorporates the adopted amendments. This new list also incorporates extensive recommendations of the Nomenclature Committee adopted by the Parties, including changes in scientific names and/or listing sequences resulting from adoption of new, standard, taxonomic references for birds and mammals. These taxonomic changes do not affect the status under CITES of any listed animal or plant and do not change the attendant responsibilities of the United States or any other CITES Party for regulating trade in same. The introductory text of the revised § 23.23 also incorporates new language regarding trade in certain ornamental plants, based on proposals submitted by Australia through the CITES postal procedures and adopted by the Parties in 1993.

**DATES:** The amendments set forth in this rule entered into effect and became enforceable on February 16, 1995, under the terms of CITES. Therefore, this rule is effective September 29, 1995.

**ADDRESSES:** Please send correspondence concerning this document to Chief, Office of Scientific Authority; U.S. Fish and Wildlife Service; 4401 North Fairfax Drive, room 725; Arlington, Virginia, 22203; fax number 703-358-2276. Express and messenger deliveries should be addressed to the Office of Scientific Authority; 4401 North Fairfax Drive, room 750; Arlington, Virginia, 22203. Materials received will be available for public inspection by appointment, from 8:00 a.m. to 4:00 p.m. Monday through Friday at the above address in Arlington, Virginia.

**FOR FURTHER INFORMATION CONTACT:** Dr. Charles W. Dane, Chief, Office of Scientific Authority, U.S. Fish and Wildlife Service, at telephone 703-358-1708.

**SUPPLEMENTARY INFORMATION:**

**Background**

CITES regulates import, export, reexport, and introduction from the sea of certain animal and plant species. Species for which the trade is controlled are included in three Appendices. Appendix I includes species threatened with extinction that are or may be affected by trade. Appendix II includes species that, although not necessarily now threatened with extinction, may become so unless trade in them is strictly controlled. It also lists species that must be subject to regulation in order that trade in other currently or potentially threatened species may be brought under effective control (e.g., because of difficulty in distinguishing specimens of currently or potentially threatened species from those of other species). Appendix III includes species that any Party identifies as being subject to regulation within its jurisdiction for purposes of preventing or restricting exploitation, and for which it needs the cooperation of other Parties to control trade.

Any CITES Party may propose amendments to Appendices I and II for consideration either at meetings of the Parties held about every 2½ years or, occasionally, by a postal vote process. The text of proposals must be communicated to the CITES Secretariat at least 150 days before such a meeting. The Secretariat must then consult the other Parties and appropriate intergovernmental agencies, and communicate responses to all Parties no later than 30 days before the meeting. Amendments are adopted by consensus

or a two-thirds majority of the Parties present and voting.

**Actions of the Parties**

The ninth meeting of the Conference of the Parties to CITES was held November 7-18, 1994, in Fort Lauderdale, Florida. Decisions of the Parties on 79 different animal proposals and 42 different plant proposals to amend the Appendices I and II were reported in a proposed rule in the Federal Register on January 3, 1995 (60 FR 73). The same Federal Register also briefly described a report by the CITES Nomenclature Committee, which was adopted by Party vote. By recommending certain changes in spelling, names of taxa, and annotations, this report resolved a multitude of questions that have arisen over the years regarding appropriate nomenclature for taxa listed in Appendix I prior to adoption of the Berne listing criteria in 1977. The report also recommended a standard taxonomic reference for mammals different from that used previously. Adoption of this report has resulted in numerous changes in the scientific names and/or listing sequences of many taxa of mammals listed in Appendices I, II, and III. Similar types of changes have become necessary for birds, because of adoption of a standard taxonomic reference for birds by the Parties at COP8 in 1992. Until now, those changes had not been incorporated into 50 CFR § 23.23. Although many of these changes are taxonomically significant, they alter neither the status under CITES of any listed animal or plant nor the attendant responsibilities of CITES Parties for regulating trade in same. A copy of the report of the Nomenclature Committee is available from the Office of Scientific Authority (see **ADDRESSES**).

Both the January 3, 1995 proposed rule (60 FR 73) and a previous notice of November 8, 1994 (59 FR 55617) requested comments from the public on whether the United States should enter reservations against any of the listing amendments. If the United States were to enter a reservation, it would be treated as a country not party to CITES with respect to trade in that particular species. However, because of the requirements of other Parties, the U.S. Lacey Act Amendments of 1981, and relevant CITES resolutions, the effect of a reservation would be limited. More comprehensive discussions of any practical effects of entering a reservation and reasons for or against entering reservations are contained in the November 8, 1994 and January 3, 1995

Federal Register notices (59 FR 55617 and 60 FR 73, respectively).

**Related Considerations**

At COP9, the Parties voted to downlist the South African population of the white rhinoceros, *Ceratotherium simum simum*, from Appendix I to Appendix II "for the exclusive purpose of allowing international trade in live animals to appropriate and acceptable destinations and hunting trophies." The effect of this annotation is that any white rhinoceros part or product not meeting the specific conditions of the annotated downlisting is subject to a "zero" quota and therefore prohibited from international trade. One consequence of this annotated downlisting is that importers of sport-hunted trophies of white rhinoceros from South Africa now require only a CITES export permit from South Africa. Issuance of the export permit requires a finding by the South African CITES Scientific Authority that the export will not be detrimental to the survival of the species. When the population was listed on Appendix I, there was an additional requirement of an import permit from the importing country, based on the importing country's own findings that (a) the specimen was not to be used for primarily commercial purposes and (b) the import was for purposes not detrimental to the survival of the species.

In September 1992, Australia submitted three proposals on plants through the postal procedures of CITES (see 57 FR 53090, November 6, 1992). Two of these proposals dealt with certain considerations for ornamental plants and were accepted by the Parties. Changes to the appendices resulting from these two amendments entered into force on April 16, 1993. With these changes, the Parties (including the United States) agreed to the following trade policies: (1) trade in artificially propagated hybrids of Appendix I plant taxa requires only a certificate of artificial propagation; (2) those hybrids' cut flowers, seeds and pollen (including pollinia), and flaked seedling cultures and tissue cultures are exempt from CITES controls; and (3) flaked seedling cultures and tissue cultures of the 11 taxa of orchids then in Appendix I were exempted from CITES controls.

The third Australian proposal had sought exclusion of certain parts and derivatives of seven tree species in Appendix II from CITES controls. Australia decided to withdraw that proposal and to refer the topic to the CITES Plants Committee. Information related to this topic is in two documents (Doc. 9.52 and Com. 9.32) that are part

of the official record of COP9, and in Doc. SC.35.5 (Rev.) from the March 1995 meeting of the CITES Standing Committee.

Details regarding the three September 1992 proposals and the comments received in response to 57 FR 53090 (November 6, 1992) are available from the Service's Office of Scientific Authority. The results of the two accepted proposals are incorporated below into a revised 50 CFR § 23.23, which also includes the further modifications related to flaked seedlings and tissue cultures adopted at COP9 (see 60 FR 73, January 3, 1995).

#### Requests for Reservations and U.S. Decisions

In response to the November 8, 1994, and January 3, 1995, Federal Register notices, the Service received one request for the United States to enter a reservation on any of the amendments to Appendices I and II adopted by the Parties. The United States was asked to enter a reservation on the de-listing of *Aloe vera*, by Mr. Gary W. Lyons (of Gary Lyons Garden & Horticultural Consultant & Design, Los Angeles), a member of the IUCN/SSC Cactus and Succulent Specialist Group and a past chairman of the Conservation Committee of the Cactus and Succulent Society of America. Prior to COP9, artificially propagated whole plants of *Aloe vera* were in Appendix II, but their separate leaves and other parts and derivatives were not included. All other aloes, including wild *Aloe vera*, were included either in CITES Appendix II or Appendix I.

As one basis for his request, Mr. Lyons cited the confusion among experts about what plants are meant by the scientific name "*Aloe vera*." The adopted Swiss proposal to de-list *Aloe vera* considers *Aloe vera* var. *chinensis* (with *Aloe indica* indicated as a synonym), which is coral-flowered, as a species distinct from the yellow-flowered *Aloe vera* var. *vera* (synonym *Aloe barbadensis*). The practical effect of this taxonomic interpretation in the proposal is that the yellow-flowered plants have been de-listed, whereas the coral-flowered plants remain in Appendix II. However, Mr. Lyons stated that specimens of both of these entities are commonly cultivated and in trade under the common name *aloe vera* and the scientific name *Aloe vera* (or *Aloe barbadensis*).

Mr. Lyons also asserts, based on his familiarity with *Aloe* plants, review of the scientific literature, and a September 1994 discussion with one of the foremost field botanists for succulent plants in Africa and the Middle East

(Mr. John Lavranos), that *Aloe vera* (var. *vera*) could still be extant where native in the wild, perhaps in Ethiopia, Yemen, southern Saudi Arabia, Oman, or Iran.

Regardless of the merits of the above points, a reservation cannot be entered on the COP9 decision to de-list *Aloe vera* (i.e., other than the var. *chinensis*). CITES Article XV, paragraph 3, which provides for reservations to amendments to Appendices I and II, states that a Party that has entered a reservation "shall be treated as a State not party to the present Convention with respect to trade in the species concerned." Therefore a Party cannot, either in legal or in practical terms, unilaterally maintain a CITES listing that the Parties have voted to remove from the appendices. Therefore, the United States did not enter a reservation on the de-listing of *Aloe vera*.

At COP9, problems including those raised by Mr. Lyons were referred to the CITES Plants Committee for further consideration. The Plants Committee examined these issues further at its meeting of June 19–23, 1995, in Spain, agreeing that *Aloe vera* var. *chinensis* remains listed and that *A. vera* var. *vera* might not be extinct.

#### Procedural Requirements

This Federal Register notice implements changes in the list of species in the CITES appendices that have already been approved by the Conference of the Parties at their ninth meeting, and that the United States is bound to accept unless it entered reservations. The Service does not believe that implementation of any of these adopted amendments (or the adopted changes in nomenclature) would be contrary to the interests or laws of the United States. The period of time during which the United States could have entered a reservation against any of the amendments ended on February 15, 1995. The Service did not recommend the entry of any reservations, and none were taken by the United States. Therefore, these amendments to the CITES Appendices have been in effect for the United States since February 16, 1995.

This notice brings the information in 50 CFR § 23.23 into agreement with the current species listings in the CITES appendices. Earlier Federal Register notices informed the public about these amendments and provided opportunity for comment on them, including announced public meetings on September 14 and 16, 1994. Therefore, the Department of the Interior has determined that good cause exists for making this rule effective upon its date

of publication [5 U.S.C. 553(d)]. Accordingly, § 23.23 of 50 CFR is considered amended upon publication of this rule.

Because of the number of changes necessitated by the nomenclature report, a complete revision of the list of animals and plants included in Appendices I, II, and III to CITES (50 CFR § 23.23), rather than a separate list of changes to the existing list, is warranted and appears at the end of this rule. This fully revised and updated § 23.23 incorporates (a) the recommendations of the nomenclature report and (b) new or revised listings resulting from the amendments to Appendices I and II adopted at COP9, including, in paragraph (d), clarifying language regarding plant parts and derivatives. It also modifies language in paragraph (a) in order to clarify the organization of the table in paragraph (f), and corrects non-substantive, typographical errors in the current listing.

Additions and most other changes resulting from amendments adopted at COP9 appear in their appropriate positions in the list and are preceded by a "+" to permit rapid location. However, taxa that were deleted from CITES appendices, or taxa absorbed into a listed higher taxon (frequently a consequence of moving from Appendix I to Appendix II, for example) do not appear in the list. These types of changes can be traced by comparison of the new list with the list of COP9 listing decisions published in the January 3, 1995 Federal Register. In order to minimize difficulties for users, the scientific names formerly used for animal or plant taxa affected by the new taxonomic treatments still appear in the "Species" column of the new list but are cross-referenced to the new names.

The Department has determined that amendments to CITES Appendices, which result from actions of the CITES Parties, do not require the preparation of Environmental Assessments as defined under authority of the National Environmental Policy Act (42 U.S.C. 4321–4347). This rule was not subject to Office of Management and Budget review under Executive Order 12866. The Regulatory Flexibility Act (5 U.S.C. 601) does not apply to this listing process. The adjustments to the list in 50 CFR § 23.23 presented below are solely informational to provide the public with accurate data on the species covered by CITES. The listing changes adopted by the Parties took effect on February 16, 1995, under the terms of CITES. This rule does not contain information collection requirements that require approval by the Office of

Management and Budget under 44 U.S.C. 3501 *et seq.*

This document was prepared by Drs. Marshall A. Howe and Bruce MacBryde, Office of Scientific Authority, under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.* and 87 Stat. 884, as amended).

List of Subjects in 50 CFR Part 23

Endangered and threatened species, Exports, Fish, Imports, Marine mammals, Plants (agriculture), Treaties.

Regulation Promulgation

Accordingly, for the reasons set out in the preamble of this document, Part 23 of Title 50, Code of Federal Regulations, is amended as follows: 1. The authority citation for Part 23 continues to read as follows:

**PART 23—ENDANGERED SPECIES CONVENTION**

1. The authority citation for Part 23 continues to read as follows:

Authority: Convention on International Trade in Endangered Species of Wild Fauna and Flora, 27 U.S.T. 108; and Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

\* \* \* \* \*

2. Section 23.23 is revised in its entirety to read as follows.

(Note: For the convenience of the user, the "+" symbol that precedes certain entries denotes changes resulting from the November 1994 Conference of the Parties to CITES. This symbol will not appear in the Code of Federal Regulations.)

**Subpart C—Appendices I, II and III to the Convention on International Trade in Endangered Species of Wild Fauna and Flora**

**§ 23.23 Species listed in Appendices I, II, and III.**

(a) The list in this section includes species of wildlife and plants placed in Appendix I, II or III in accordance with the provisions of Articles XV and XVI of the Convention.

The list of species is organized as follows:

Major group	Subgroups
Mammals.	Orders, in taxonomic sequence.
Birds .....	Orders, in taxonomic sequence.
Reptiles	Orders, in taxonomic sequence.
Amphibians.	Orders, in taxonomic sequence.
Fishes ..	Orders, in taxonomic sequence.
Molluscs	Classes.
Arthropods.	Classes.
Plants ...	Families, in alphabetical sequence.

Within each Subgroup, lower taxonomic units (mainly genera, but sometimes families or subfamilies) are listed in alphabetical sequence. Within genera, the scientific names of the species are listed in alphabetical sequence. The scientific name takes precedence over the common name in determining if a species is listed.

(b) The appendix column of the list includes the annotation "pe" (=possibly extinct) for certain species. It also contains the names of Parties including species in Appendix III.

(c) For purposes of issuing United States certificates of exemption under Article VII(3), the date when the Convention applies to a species is the date when the inclusion of that species in the appendices enters into force under the terms of Article XV or XVI of the Convention. The date of first listing is retained if a species is transferred from one appendix to another or if a listed species is subsequently included with other species in the listing of a taxon above the species level. Such species are shown separately in this publication of the appendices. The date of a subsequent listing is used only if a species is entirely deleted from the appendices and is subsequently reincluded after an intervening period of time.

(d) Subject to the regulations of this part are all living or dead animals or plants in Appendix I, II or III, and all their readily recognizable parts and derivatives except for specified parts or derivatives of particular Appendix III animal species as excluded in the

particular listing and the following categorically excluded or exempted parts or derivatives of certain plants:

(1) For Appendix II and Appendix III plants and artificially propagated hybrids of Appendix I plants: Seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers; and

(2) For Appendix II and Appendix III plants: Seeds, spores, and pollen (including pollinia); and

(3) For artificially propagated hybrids of Appendix I plants:

(i) Seeds and pollen (including pollinia) and

(ii) Cut flowers; and

(4) For *Panax quinquefolius* (in Araliaceae), parts and derivatives other than roots and their readily recognizable parts.

(5) For artificially propagated or naturalized Appendix II Cactaceae species:

(i) Fruits and their parts and derivatives;

(ii) For *Opuntia* subgenus *Opuntia* species, separate stem joints (pads) and their parts and derivatives.

(6) For Orchidaceae species:

(i) In Appendix I, seedling or tissue cultures obtained *in vitro*, in solid or liquid media, transported in sterile containers;

(ii) In Appendix II, if artificially propagated:

(A) Cut flowers, and

(B) For *Vanilla* species, fruits and their parts and derivatives.

(e) The list of species set out in paragraph (f) is informational and not regulatory in nature. It is solely intended as a convenience to the public. The official list of species included in Appendices I, II, and III is the one maintained by the CITES Secretariat based on the decisions of the Parties to the Convention.

(f) The list of species in the Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora is provided below:

Species	Common name	Appendix	First listing date (month/day/year)
CLASS MAMMALIA:	MAMMALS:		
Order Monotremata:	Monotremes:		
<i>Zaglossus spp</i> .....	Spiny anteaters	II .....	2/4/77
Order Dasyuromorphia:	Dunnarts (Marsupial-mice), Tasmanian wolf:		
<i>Sminthopsis longicaudata</i> .....	Long-tailed marsupial-mouse, Long-tailed dunnart	I .....	7/1/75
<i>S. psammophila</i> .....	Large desert marsupial-mouse, Sandhill dunnart	I .....	7/1/75
<i>Thylacinus cynocephalus</i> .....	Tasmanian wolf, Thylacine	I pe .....	7/1/75
Order Peramelemorphia:	Bandicoots:		
<i>Chaeropus ecaudatus</i> .....	Pig-footed bandicoot	I pe .....	7/1/75

Species	Common name	Appendix	First listing date (month/day/year)
<i>Macrotis lagotis</i> .....	Rabbit bandicoot, Bilby	I .....	7/1/75
<i>M. leucura</i> .....	Lesser rabbit bandicoot, Yallara	I .....	7/1/75
<i>Perameles boughainville</i> .....	Barred bandicoot, Long-nosed bandicoot, Mari	I .....	7/1/75
Order Diprotodontia:			
<i>Bettongia</i> spp. (except species listed below) .....	Kangaroos, Wombats, Wallabies, Cuscuses, Rat-kangaroos, etc.:		
<i>B. lesueur</i> .....	Rat-kangaroo	I .....	6/28/79
<i>B. penicillata (=tropica)</i> .....	Lesueur's rat-kangaroo, Boodie	I .....	7/1/75
<i>Burramys parvus</i> .....	Brush-tailed rat-kangaroo, Woylie	I .....	7/1/75
<i>Caloprymnus campestris</i> .....	Mountain pigmy possum	II .....	7/1/75
<i>Dendrolagus bennettianus</i> .....	Desert rat-kangaroo	I pe .....	7/1/75
<i>D. inustus</i> .....	Bennett's tree kangaroo, Dusky tree kangaroo	II .....	6/28/79
<i>D. lumholtzi</i> .....	Grizzled tree kangaroo	II .....	7/1/75
<i>D. ursinus</i> .....	Lumholtz's tree kangaroo	II .....	6/28/79
<i>Lagorchestes hirsutus</i> .....	Vogelkop tree kangaroo	II .....	7/1/75
<i>Lagostrophus fasciatus</i> .....	Western hare wallaby, Wurrup	I .....	7/1/75
<i>Lasiorhinus krefftii</i> .....	Banded hare wallaby, Munting	I .....	7/1/75
<i>Onychogalea fraenata</i> .....	Queensland hairy-nosed wombat	I .....	7/1/75
<i>O. lunata</i> .....	Bridled nail-tailed wallaby	I .....	7/1/75
<i>Phalanger maculatus</i> (see <i>Spilocuscus maculatus</i> ).	Crescent nail-tailed wallaby	I .....	7/1/75
<i>P. orientalis</i> .....	Gray cuscus	II .....	6/28/79
<i>Spilocuscus maculatus</i> .....	Spotted cuscus	II .....	6/28/79
Order Scandentia:			
<i>Tupaia</i> spp .....	Tree shrews:	II .....	2/4/77
Order Chiroptera:			
<i>Acerodon</i> spp. (all species except those in App. I) .....	Tree shrews	II .....	2/4/77
+ <i>A. jubatus</i> .....	Bats:		
+ <i>A. lucifer</i> .....	Flying foxes	II .....	1/18/90
<i>Pteropus</i> spp. (all species except those in App. I or with earlier date in App. II).	Golden-capped fruit bat	I .....	1/18/90
<i>P. insularis</i> .....	Panay giant fruit bat	I pe .....	1/18/90
<i>P. macrotis</i> .....	Flying foxes	II .....	1/18/90
<i>P. mariannus</i> .....	Truk flying fox	I .....	10/22/87
<i>P. molossinus</i> .....	Big-eared flying fox	II .....	10/22/87
<i>P. phaeocephalus</i> .....	Mariana flying fox, Mariana fruit bat.	I .....	10/22/87
<i>P. pilosus</i> .....	Ponape flying fox	I .....	10/22/87
<i>P. samoensis</i> .....	Mortlock flying fox	I .....	10/22/87
<i>P. tokudae</i> .....	Palau flying fox	I .....	10/22/87
<i>P. tonganus</i> .....	Samoa flying fox	I .....	10/22/87
<i>Vampyrops lineatus</i> .....	Little Mariana fruit bat, Tokuda's flying fox.	II .....	10/22/87
Order Primates (formerly including order Scandentia, above):			
All species except those in App. II or with earlier date in App. II.	Insular flying fox, Tonga fruit bat	I .....	10/22/87
<i>Allocebus</i> spp .....	White-lined bat	III (Uruguay) .....	7/14/76
<i>Alouatta palliata (=villosa)</i> .....	Primates: Monkeys, Apes, etc.:		
<i>A. pigra</i> .....		II .....	2/4/77
<i>Ateles geoffroyi frontatus</i> .....	Hairy-eared dwarf lemur	I .....	7/1/75
<i>A. geoffroyi panamensis</i> .....	Mantled howler monkey	I .....	7/1/75
<i>Avahi</i> spp .....	Black howler monkey	I .....	7/1/75
<i>Brachyteles arachnoides</i> .....	Black-handed spider monkey	I .....	7/1/75
<i>Cacajao</i> spp .....	Black-handed spider monkey	I .....	7/1/75
<i>Callimico goeldii</i> .....	Avahis, Woolly lemurs	I .....	7/1/75
<i>Callithrix aurita (=C. jacchus aurita)</i> .....	Woolly spider monkey	I .....	7/1/75
<i>C. flaviceps (=C. jacchus flaviceps)</i> .....	Uakaris	I .....	7/1/75
<i>Cebus capucinus</i> .....	Goeldi's monkey, Callimico	I .....	7/1/75
<i>Cercocebus galeritus galeritus</i> .....	White-eared marmoset	I .....	2/4/77
<i>Cercopithecus diana (=C. roloway)</i> .....	Buff-headed marmoset	I .....	2/4/77
<i>Cheirogaleus</i> spp .....	White-throated capuchin	II .....	7/1/75
<i>Chiropotes albinasus</i> .....	Tana River mangabey, Agile mangabey.	I .....	7/1/75
<i>Colobus</i> (see <i>Procolobus</i> ).	Diana monkey	I .....	2/4/77
<i>Daubentonia madagascariensis</i> .....	Dwarf lemurs	I .....	7/1/75
<i>Eulemur</i> spp .....	White-nosed saki	I .....	7/1/75
<i>Gorilla gorilla</i> .....	Aye-aye	I .....	7/1/75
<i>Hapalemur</i> spp .....	Lemurs	I .....	7/1/75
<i>Hylobates</i> spp .....	Gorilla	I .....	7/1/75
<i>Indri</i> spp .....	Gentle lemurs	I .....	7/1/75
<i>Lagothrix flavicauda</i> .....	Gibbons, Siamang	I .....	7/1/75
	Indri	I .....	7/1/75
	Yellow-tailed woolly monkey	I .....	2/4/77

Species	Common name	Appendix	First listing date (month/day/year)
<i>Lemur</i> spp	Lemurs	I	7/1/75
<i>Leontopithecus</i> (= <i>Leontideus</i> ) spp	Golden lion tamarin	I	7/1/75
<i>Lepilemur</i> spp	Sportive lemur, Weasel lemur	I	7/1/75
<i>Loris tardigradus</i>	Slender loris	II	7/1/75
<i>Macaca silenus</i>	Lion-tailed macaque	I	7/1/75
<i>M. sylvanus</i>	Barbary ape	II	7/1/75
<i>Mandrillus leucophaeus</i>	Drill	I	2/4/77
<i>M. sphinx</i>	Mandrill	I	2/4/77
<i>Microcebus</i> spp.	Mouse lemurs	I	7/1/75
<i>Nasalis</i> (= <i>Simias</i> ) <i>concolor</i>	Pagi Island langur	I	7/1/75
<i>N. larvatus</i>	Proboscis monkey	I	7/1/75
<i>Nycticebus coucang</i>	Slow loris	II	7/1/75
<i>Pan</i> spp	Chimpanzee, Bonobo	I	7/1/75
<i>Papio</i> (see <i>Mandrillus</i> ).			
<i>Phaner</i> spp	Fork mouse lemur, Fork-marked mouse lemur.	I	7/1/75
<i>Pongo pygmaeus</i>	Orangutan	I	7/1/75
<i>Presbytis entellus</i> (see <i>Semnopithecus entellus</i> )			
<i>P. pileata</i> (see <i>Trachypithecus pileatus</i> )			
<i>P. potenziani</i>	Long-tailed langur, Mentawai leaf monkey.	I	2/4/77
<i>Presbytis</i> (other species) (see <i>Trachypithecus</i> ).			
<i>Procolobus badius gordonorum</i>	Uhehe red colobus	II	7/1/75
<i>P. pennantii kirki</i> (= <i>C. badius kirki</i> )	Zanzibar red colobus	I	7/1/75
<i>P. rufomitratus</i> (= <i>C. badius rufomitratus</i> )	Tana River red colobus	I	7/1/75
<i>P. verus</i>	Olive colobus	II	7/1/75
<i>Propithecus</i> spp	Sifakas	I	7/1/75
<i>Pygathrix</i> (= <i>Rhinopithecus</i> ) spp. (except those species with earlier date)	Snub-nosed langurs	I	2/4/77
<i>P. nemaus</i>	Douc lagur	I	7/1/75
<i>P. roxellana</i>	Sichuan snub-nosed langur	I	7/1/75
<i>Saguinus bicolor</i>	Pied tamarin	I	2/4/77
<i>S. geoffroyi</i>	Geoffroy's marmoset	I	2/4/77
<i>S. leucopus</i>	White-footed tamarin, Silvery-brown bare-face tamarin.	I	2/4/77
<i>S. oedipus</i> (including <i>S. oedipus geoffroyi</i> )	Cotton-top tamarin	I	2/4/77
<i>Saimiri oerstedii</i>	Red-backed squirrel monkey	I	7/1/75
<i>Semnopithecus entellus</i>	Gray langur, Common Indian langur.	I	7/1/75
<i>Symphalangus</i> (see <i>Hyllobates</i> )			
<i>Trachypithecus geei</i>	Golden langur	I	7/1/75
<i>T. johnii</i>	Nilgiri langur	II	7/1/75
<i>T. pileatus</i>	Capped langur	I	7/1/75
<i>Tupaia</i> spp. (see order Scandentia, above)			
<i>Varecia</i> spp	Lemurs	I	7/1/75
Order Xenarthra:	Anteaters, Sloths, Armadillos:		
<i>Bradypus variegatus</i> (= <i>boliviensis</i> or <i>griseus</i> )	Three-toed sloth	II	7/1/75
<i>Cabassous centralis</i>	Five-toed armadillo	III (Costa Rica)	10/28/76
<i>C. tatouay</i> (= <i>gymnurus</i> )	Naked-tailed armadillo	III (Uruguay)	7/14/76
<i>Choloepus hoffmanni</i>	Two-toed sloth	III (Costa Rica)	10/28/76
<i>Myrmecophaga tridactyla</i>	Giant anteater	II	7/1/75
<i>Priodontes maximus</i> (= <i>giganteus</i> )	Giant armadillo	I	7/1/75
<i>Tamandua tetradactyla</i> (= <i>T. mexicana</i> )	Tamandua, Collared anteater	III (Guatemala)	4/23/81
Order Pholidota:	Pangolins, Scaly Anteaters:		
+ <i>Manis</i> spp	Pangolins	II	7/1/75
Order Lagomorpha:	Rabbits, Hares:		
<i>Caprolagus hispidus</i>	Hispid hare, Assam rabbit	I	7/1/75
<i>Romerolagus diazi</i>	Mexican volcano rabbit	I	7/1/75
Order Rodentia:	Rodents:		
<i>Angouti</i> (= <i>Cuniculus</i> ) <i>paca</i>	Greater paca, Spotted cavy	III (Honduras)	4/13/87
<i>Anomalurus beecrofti</i>	Beecroft's scaly-tailed flying squirrel.	III (Ghana)	2/26/76
<i>A. derbianus</i>	Lord Derby's scaly-tailed flying squirrel.	III (Ghana)	2/26/76
<i>A. pelii</i>	Pel's scaly-tailed flying squirrel	III (Ghana)	2/26/76
+ <i>Chinchilla</i> spp. (populations of South America, except domesticated specimens).	Chinchillas	I	2/4/77
<i>Cynomys mexicanus</i>	Mexican prairie dog	I	7/1/75
<i>Dasyprocta punctata</i>	Common agouti	III (Honduras)	4/13/87
<i>Epixerus ebii</i>	African palm squirrel	III (Ghana)	2/26/76
<i>Hystrix cristata</i>	Crested procupine	III (Ghana)	2/26/76
<i>Idiurus macrotis</i>	Long-eared pygmy flying squirrel	III (Ghana)	2/26/76
<i>Leporillus conditor</i>	Australian stick-nest rat	I	7/1/75

Species	Common name	Appendix	First listing date (month/day/year)
<i>Marmota caudata</i> .....	Long-tailed marmot .....	III (India) .....	3/16/89
<i>M. himalayana</i> .....	Himalayan marmot .....	III (India) .....	3/16/89
<i>Pseudomys praeconis</i> .....	Shark Bay mouse .....	I .....	7/1/75
<i>Ratufa</i> spp .....	Giant squirrels .....	II .....	7/1/75
<i>Sciurus deppei</i> .....	Deppe's squirrel .....	III (Costa Rica) .....	10/28/76
<i>Sphiggurus (=Coendou) mexicanus</i> .....	Middle American prehensile-tailed porcupine, Coendou.	III (Honduras) .....	4/1/87
<i>S. (=Coendou) spinosus</i> .....	Prehensile-tailed porcupine .....	III (Uruguay) .....	7/14/76
<i>Xeromys myoides</i> .....	False water rat .....	I .....	7/1/75
<i>Zyzomys pedunculatus</i> .....	Australian native mouse, McDonnell Range rock rat.	I .....	7/1/75
Order Cetacea:	Whales, Porpoises, Dolphins:		
All species except those in App. I or with earlier date in App. II.		II .....	6/28/79
<i>Balaena mysticetus</i> .....	Bowhead whale .....	I .....	7/1/75
<i>Balaenoptera acutorostrata</i> (all populations except that of West Greenland: entry into force as App. I on 1/1/86).	Minke Whale .....	I .....	6/28/79
<i>B. borealis</i> .....	Sei whale .....	I .....	2/4/77
<i>B. edeni</i> .....	Bryde's whale .....	I .....	6/28/79
<i>B. musculus</i> .....	Blue whale .....	I .....	7/1/75
<i>B. physalus</i> .....	Fin whale .....	I .....	2/4/77
<i>Berardius</i> spp .....	Beaked whales .....	I .....	6/28/79
<i>Caperea marginata</i> (entry into force as App. I on 1/1/86).	Pygmy right whale .....	I .....	6/28/79
<i>Eschrichtius robustus (=glaucus)</i> .....	Gray whale .....	I .....	7/1/75
<i>Eubalaena (=Balaena) spp</i> .....	Right whales .....	I .....	7/1/75
<i>Hyperoodon</i> spp .....	Bottle-nosed whales .....	I .....	6/28/79
<i>Lipotes vexillifer</i> .....	White flag dolphin, Chinese river dolphin.	I .....	6/28/79
<i>Megaptera novaeangliae</i> .....	Humpback whale .....	I .....	7/1/75
<i>Monodon monoceros</i> .....	Narwhal .....	II .....	11/16/75
<i>Neophocaena phocaenoides</i> .....	Finless porpoise .....	I .....	6/28/79
<i>Phocoena sinus</i> .....	Gulf of California harbor porpoise, Cochita.	I .....	6/28/79
<i>Physeter catodon (=macrocephalus)</i> .....	Sperm whale .....	I .....	2/4/77
<i>Platanista</i> spp .....	Ganges and Indus River dolphins	I .....	7/1/75
<i>Pontoporia (=Stenodelphis) blainvillei</i> .....	La Plata River dolphin .....	II .....	7/14/76
<i>Sotalia</i> spp .....	Humpbacked dolphins .....	I .....	6/28/79
<i>Sousa</i> spp .....	Humpbacked dolphins .....	I .....	6/28/79
Order Carnivora:	Carnivores: Cats, Bears, etc.:		
<i>Acinonyx jubatus</i> .....	Cheetah .....	I .....	7/1/75
<i>Ailuropoda melanoleuca</i> .....	Giant panda .....	I .....	3/14/84
+ <i>Ailurus fulgens</i> .....	Lesser panda .....	I .....	7/1/75
<i>Aonyx congicus (=microdon)</i> (populations of Cameroon and Nigeria).	West African "clawless" otter .....	I .....	7/1/75
<i>Arctictis binturong</i> .....	Binturong .....	III (India) .....	3/16/89
<i>Bassaricyon gabbii</i> .....	Bushy-tailed olingo .....	III (Costa Rica) .....	10/28/76
<i>Bassariscus sumichrasti</i> .....	Cacomistle .....	III (Costa Rica) .....	10/28/76
<i>Canis aureus</i> .....	Golden jackal .....	III (India) .....	3/16/89
<i>C. lupus</i> (all subspecies and populations except those listed below).	Gray wolf .....	II .....	2/4/77
<i>C. lupus</i> (India, Pakistan, Bhutan, and Nepal populations).	Gray wolf .....	I .....	2/4/77
<i>C. lupus crassodon</i> .....	Gray wolf, Vancouver Island gray wolf.	II .....	7/1/75
<i>C. lupus irremotus</i> .....	Gray wolf, Rocky Mountain gray wolf.	II .....	7/1/75
<i>C. lupus monstrabilis</i> .....	Gray wolf .....	II .....	7/1/75
<i>C. lupus pallipes</i> .....	Gray wolf, Middle East gray wolf ..	II .....	7/1/75
<i>Caracal (=Felis) caracal</i> (Asian population) .....	Caracal .....	I .....	7/1/75
<i>Catopuma (=Felis) temminckii</i> .....	Asian golden cat .....	I .....	7/1/75
<i>Cerdocyon thous</i> .....	Crab-eating fox .....	II .....	6/11/92
<i>Chrysocyon brachyurus</i> .....	Maned wolf .....	II .....	7/1/75
<i>Civettictis (=Viverra) civetta</i> .....	African civet .....	III (Botswana) .....	4/24/78
<i>Conepatus humboldtii</i> .....	Humboldt's hognose skunk .....	II .....	6/28/79
<i>Cryptoprocta ferox</i> .....	Fossa .....	II .....	2/4/77
<i>Cuon alpinus</i> .....	Dhole .....	II .....	7/1/75
<i>Cynogale bennettii</i> .....	Otter civet .....	II .....	7/1/75
<i>Dusicyon thous</i> (see <i>Cerdocyon thous</i> ).			
<i>Dusicyon</i> (other species) (see <i>Pseudalopex</i> ).			
<i>Eira barbara</i> .....	Tayra .....	III (Honduras) .....	4/13/87
<i>Enhydra lutris nereis</i> .....	Southern sea otter .....	I .....	7/1/75

Species	Common name	Appendix	First listing date (month/day/year)
<i>Eupleres goudotii</i> (=major)	Malagasy mongoose	II	2/4/77
<i>Felidae</i> spp. (all species in family except <i>Felis catus</i> or those in App. I or with earlier date in App. II).	Cats (not including House cats)	II	2/4/77
<i>Felis</i> (see also the following genera, formerly included in <i>Felis</i> : <i>Caracal</i> , <i>Catopuma</i> , <i>Herpailurus</i> , <i>Leopardus</i> , <i>Lynx</i> , <i>Oncifelis</i> , <i>Oreailurus</i> , <i>Pardofelis</i> , <i>Prionailurus</i> , and <i>Puma</i> ) <i>F. nigripes</i> .	Black-footed cat	I	7/1/75
<i>Fossa fossana</i> (=fossa)	Fanaloka	II	2/4/77
<i>Galictis vittata</i> (=allamandi)	Grison	III (Costa Rica)	10/28/76
<i>Helarctos malayanus</i>	Sun bear	I	7/1/75
<i>Hemigalus derbyanus</i>	Banded palm civet	II	2/4/77
<i>Herpailurus</i> (=Felis) <i>yaguarondi</i> (North and Central American populations).	Jaguarundi	I	7/1/75
<i>H. yaguarondi</i> (South American populations)	Jaguarundi	II	7/1/75
<i>Herpestes brachyurus fuscus</i> (=H. fuscus)	Indian brown mongoose	III (India)	3/16/89
<i>H. edwardsii</i>	Indian gray mongoose	III (India)	3/16/89
<i>H. javanicus auropunctata</i> (=H. auropunctatus)	Small Indian mongoose	III (India)	3/16/89
<i>H. smithii</i>	Ruddy mongoose	III (India)	3/16/89
<i>H. urva</i>	Crab-eating mongoose	III (India)	3/16/89
<i>H. vitticollis</i>	Stripe-necked mongoose	III (India)	3/16/89
<i>Hyaena</i> (see <i>Parahyaena</i> )			
<i>Leopardus</i> (=Felis) <i>pardalis</i> (except subspecies with earlier date).	Ocelot	I	2/4/77
<i>L. pardalis mearnsi</i>	Ocelot	I	7/1/75
<i>L. pardalis mitis</i>	Brazilian ocelot	I	7/1/75
<i>L. tigrinus</i> (=Felis <i>tigrina</i> ) (except subspecies with earlier date).	Tiger cat, Little spotted cat	I	2/4/77
<i>L. tigrinus oncilla</i>	Tiger cat	I	7/1/75
<i>L. wiedii</i> (except subspecies with earlier date)	Margay	I	2/4/77
<i>L. wiedii nicaraguae</i>	Central American margay	I	7/1/75
<i>L. wiedii salvinia</i>	Guatemalan margay	I	7/1/75
<i>Lontra felina</i>	Marine otter	I	7/1/75
<i>L. longicaudis</i>	Long-tailed otter Neotropical otter	I	7/1/75
<i>L. provocax</i>	Southern river otter, South American river otter.	I	7/1/75
<i>Lutra lutra</i>	European river otter	I	2/4/77
<i>Lutra</i> (other species) (see <i>Lontra</i> )			
<i>Lutrinae</i> spp. (all species except those in App. I)	Otters	II	2/4/77
<i>Lynx pardinus</i> (=Felis <i>pardina</i> )	Spanish lynx, Iberian lynx	I	2/4/77
<i>L. rufus</i> (=Felis <i>rufa</i> ) <i>escuinapae</i>	Mexican bobcat	II	7/1/75
<i>Martes flavigula</i> (including <i>M. gwatkinsi</i> )	Yellow-throated marten	III (India)	3/16/89
<i>M. foina intermedia</i>	Beech marten	III (India)	3/16/89
<i>Mellivora capensis</i>	Honey badger, Ratel	III (Ghana and Botswana).	2/26/76
<i>Melursus</i> (=Ursus) <i>ursinus</i>	Sloth bear	I	9/21/88
<i>Mustela altaica</i>	Mountain weasel	III (India)	3/16/89
<i>M. erminea ferghanae</i>	Ermine	*III (India)	3/16/89
<i>M. kathiah</i>	Yellow-bellied weasel	III (India)	3/16/89
<i>M. nigripes</i>	Black-footed ferret	I	7/1/75
<i>M. sibirica</i>	Siberian weasel	III (India)	3/16/89
<i>Nasua narica</i> (=nasua)	Common coati, Coatimundi	III (Honduras)	4/13/87
<i>N. nasua solitaria</i>	Coatimundi	III (Uruguay)	4/13/87
<i>Neofelis nebulosa</i>	Clouded leopard	I	7/1/75
<i>Oncifelis</i> (=Felis) <i>geoffroyi</i>	Geoffroy's cat	I	2/4/77
<i>Oreailurus</i> (=Felis) <i>jacobita</i>	Andean cat	I	7/1/75
<i>Paguma larvata</i>	Masked palm civet	III (India)	3/16/89
<i>Panthera leo persica</i>	Asiatic lion, Indian lion	I	7/1/75
<i>P. onca</i>	Jaguar	I	7/1/75
<i>P. pardus</i>	Leopard	I	7/1/75
<i>P. tigris</i>	Tiger	I	7/1/75
<i>P. uncia</i> (see <i>Uncia uncia</i> )			
<i>Paradoxurus hermaphroditus</i>	Common palm civet	III (India)	3/16/89
<i>P. jerdoni</i>	Jerdon's palm civet	III (India)	3/16/89
+ <i>Parahyaena brunnea</i>	Brown hyaena	II	7/1/75
<i>Pardofelis</i> (=Felis) <i>marmorata</i>	Marbled cat	I	7/1/75
<i>Potos flavus</i>	Kinkajou	III (Honduras)	4/13/87
+ <i>Prionailurus</i> (=Felis) <i>bengalensis bengalensis</i> Bangladesh, India, and Thailand populations).	Leopard cat	I	7/1/75
+ <i>P. bengalensis bengalensis</i> (all other populations)	Leopard cat	II	7/1/75
<i>P. planiceps</i>	Flat-headed cat	I	7/1/75
<i>P. rubiginosus</i> (=Felis <i>rubiginosa</i> ) (Indian population)	Rusty-spotted cat	I	2/4/77
<i>Prionodon linsang</i>	Banded linsang	II	7/1/75
<i>P. pardicolor</i>	Spotted linsang	I	7/1/75

Species	Common name	Appendix	First listing date (month/day/year)
<i>Proteles cristatus</i>	Aardwolf	III (Botswana)	4/24/78
<i>Pseudalopex culpaeus</i>	Culpeo fox	II	6/28/79
<i>P. griseus</i> (=fulvipes)	Argentine gray fox	II	6/28/79
<i>P. gymnocercus</i>	Pampas fox	II	10/22/87
<i>Pteronura brasiliensis</i>	Giant otter	I	7/1/75
<i>Puma</i> (=Felis) <i>concolor coryi</i>	Florida panther, Florida puma	I	7/1/75
<i>P. concolor costaricensis</i>	Costa Rican puma	I	7/1/75
<i>P. concolor cougar</i>	Eastern puma, Adirondack cougar	I	7/1/75
<i>Selenarctos thibetanus</i> (see <i>Ursus thibetanus</i> )			
<i>Speothos venaticus</i>	Bush dog	I	2/4/77
<i>Tremarctos ornatus</i>	Spectacled bear	I	2/4/77
<i>Uncia uncia</i>	Snow leopard	I	7/1/75
Ursidae spp. (all species in family except those in App. I or with earlier date in App. II; includes Baltic States and former USSR populations).	Bears	II	6/11/92
<i>Ursus americanus</i>	American black bear	II	9/18/91
<i>U. arctos</i> (all European populations except Italian and former USSR populations).	European Brown bear	II	7/29/83
<i>U. arctos</i> (Italian population)	European brown bear	II	7/1/75
<i>U. arctos</i> (all Asian populations, including populations of Iran, Iraq, Syria, and Turkey, except USSR populations and populations subspecies listed in App. I).	Brown bear	II	1/18/90
<i>U. arctos</i> (=U. <i>arctos pruinosus</i> ) (populations of Bhutan, China, and Mongolia).	Tibetan blue bear	I	7/1/75
<i>U. arctos</i> (all North American populations except Mexican population).	Brown bear, Grizzly	II	7/1/75
<i>U. arctos</i> (=U. <i>a. nelsoni</i> ) (Mexican population)	Mexican grizzly bear	I	7/1/75
<i>U. arctos isabellinus</i>	Red bear	I	6/28/79
<i>U.</i> (=Thalarctos) <i>maritimus</i>	Polar bear	II	7/1/75
<i>U. thibetanus</i> (except subspecies listed below)	Asiatic black bear	I	6/28/79
<i>U. thibetanus gedrosianus</i>	Baluchistan black bear	I	2/4/77
<i>Viverra civettina</i> (=megaspila)	Malabar large-spotted civet	III (India)	3/16/89
<i>V. zibetha</i>	Large Indian civet	III (India)	3/16/89
<i>Viverricula indica</i>	Lesser oriental civet, Small Indian civet.	III (India)	3/16/89
<i>Vulpes bengalensis</i>	Bengal fox	III (India)	3/16/89
<i>V. cana</i>	Blanford's fox	II	2/4/77
<i>V. vulpes griffithi</i>	Griffith's red fox	III (India)	3/16/89
<i>V. vulpes montana</i>	Montane red fox	III (India)	3/16/89
<i>V. vulpes pusilla</i> (=leucopus)	Little red fox	III (India)	3/16/89
<i>V.</i> (=Fennecus) <i>zerda</i>	Fennec fox	II	4/22/76
Order Pinnipedia:	Seals, Sea lions:		
<i>Arctocephalus</i> spp. (except species listed below)	Southern fur seals	II	2/4/77
<i>A. australis</i>	Southern fur seal	II	7/1/75
<i>A. galapagoensis</i>	Galapagos fur seal	II	7/1/75
<i>A. philippii</i>	Juan Fernandez fur seal	II	7/1/75
<i>A. townsendi</i>	Guadalupe fur seal	I	7/1/75
<i>Mirounga leonina</i>	Southern elephant seal	II	7/1/75
<i>Monachus</i> spp	Monk seals	I	7/1/75
<i>Odobenus rosmarus</i>	Walrus	III (Canada)	11/16/75
Order Proboscidea:	Elephants:		
<i>Elephas maximus</i>	Asian elephant	I	7/1/75
<i>Loxodonta africana</i>	African elephant	I	2/4/77
Order Sierenia:	Dugongs, Manatees:		
<i>Dugong dugon</i> (except for Australian population)	Dugong	I	7/1/75
<i>D. dugon</i> (Australian population)	Dugong	II	7/1/75
<i>Trichechus inunguis</i>	South American manatee, Amazonian manatee.	I	7/1/75
<i>T. manatus</i>	West Indian manatee	I	7/1/75
<i>T. senegalensis</i>	West African manatee	II	7/1/75
Order Perissodactyla:	Odd-toed ungulates:		
<i>Ceratotherium simum cottoni</i>	Northern white rhinoceros	I	7/1/75
+ <i>C. s. simum</i> (population of South Africa) (no trade allowed, except for hunting trophies and for the sale of live animals to appropriate and acceptable destinations).	Southern white rhinoceros	II	2/4/77
<i>Dicerorhinus</i> (=Didermocerus) <i>sumatrensis</i>	Sumatran rhinoceros	I	7/1/75
<i>Diceros bicornis</i>	Black rhinoceros	I	7/1/75
<i>Equus africanus</i> (=E. <i>asinus</i> )	African wild ass	I	7/29/83
<i>E. grevyi</i>	Grevy's zebra	I	6/28/79
<i>E. hemionus</i> (except subspecies listed below)	Asian wild ass	II	7/1/75
<i>E. hemionus hemionus</i>	Asian wild ass	I	7/1/75

Species	Common name	Appendix	First listing date (month/day/year)
<i>E. hemionus khur</i> (see <i>E. onager khur</i> )			
<i>E. kiang</i> (= <i>hemionus</i> ) (except subspecies listed below)	Kiang .....	II .....	7/1/75
<i>E. kiang khur</i> (see <i>E. onager khur</i> )

<b>Order Crocodylia:</b>			
<i>Alligatoridae</i> spp. (all species in family except those in App. I or with earlier date in App. II).			
<i>Alligator mississippiensis</i> .....	Alligators, Caimans, Gavials: Alligators, Caimans .....	II .....	2/4/77
<i>A. sinensis</i> .....	American alligator .....	II .....	7/1/75
<i>Caiman crocodilus apaporiensis</i> .....	Chinese alligator .....	I .....	7/1/75
<i>C. crocodilus crocodilus</i> .....	apapori River caiman .....	I .....	7/1/75
<i>C. crocodilus fuscus</i> (including <i>C. crocodilus</i> <i>chiapasius</i> ).	common caiman, Spectacled caiman. ....	II .....	7/1/75
<i>C. crocodilus yacare</i> (= <i>C. yacare</i> ) .....	Brown caiman .....	II .....	7/1/75
<i>C. latirostris</i> .....	Yacare .....	II .....	7/1/75
<i>Crocodylidae</i> spp. (all species in family except those in App. I or with earlier date in App. II).	Broad-snouted caiman .....	I .....	7/1/75
<i>Crocodylus acutus</i> .....	Crocodyles .....	II .....	2/4/77
<i>C. cataphractus</i> .....	American crocodile .....	I .....	7/1/75
<i>C. intermedius</i> .....	African slender-snouted crocodile ..	I .....	7/1/75
<i>C. johnsoni</i> .....	Orinoco crocodile .....	I .....	7/1/75
<i>C. moreletii</i> .....	Johnson's crocodile .....	II .....	7/1/75
<i>C. niloticus</i> (except those populations in App. II) .....	Morelet's crocodile .....	I .....	7/1/75
+ <i>C. niloticus</i> (populations of Madagascar and Uganda subject to export quotas described by the Secretar- iat).	Nile crocodile .....	I .....	7/1/75
	Nile crocodile .....	II .....	7/1/75

Species	Common name	Appendix	First listing date (month/day/year)
+ <i>C. niloticus</i> (populations of Botswana, Ethiopia, Kenya, Malawi, Mozambique, South Africa, Zambia, and Zimbabwe subject to ranching provisions).	Nile crocodile .....	II .....	7/1/75
+ <i>C. niloticus</i> (population of Tanzania subject to ranching provisions and annual quotas described by the Secretariat).	Nile crocodile .....	II .....	7/1/75
<i>C. novaeguineae</i> (except subspecies listed below) .....	New Guinea crocodile, Freshwater crocodile.	II .....	7/1/75
<i>C. novaeguineae mindorensis</i> .....	Philippine crocodile .....	I .....	7/1/75
<i>C. palustris</i> .....	Mugger crocodile .....	I .....	7/1/75
<i>C. porosus</i> (except populations of Australia, Papua New Guinea, and Indonesia).	Saltwater crocodile .....	I .....	7/1/75
+ <i>C. porosus</i> (Australia and Papua New Guinea populations).	Saltwater crocodile .....	II .....	7/1/75
+ <i>C. porosus</i> (Indonesian population subject to ranching provisions).	Saltwater crocodile .....	II .....	7/1/75
<i>C. rhombilfer</i> .....	Cuban crocodile .....	I .....	7/1/75
<i>C. siamensis</i> .....	Siamese crocodile .....	I .....	7/1/75
<i>Gavialis gangeticus</i> .....	Gavial, Charial .....	I .....	D7/1/75
<i>Melanosuchus niger</i> (except for population of Ecuador).	Black caiman .....	I .....	7/1/75
+ <i>M. niger</i> (population of Ecuador, subject to zero export quotas in 1995 and 1996, followed by annual quotas described by the Secretariat).	Black caiman .....	II .....	7/1/75
<i>Osteolaemus tetraspis</i> (except subspecies listed below).	Dwarf crocodile .....	I .....	2/4/77
<i>O. tetraspis obsorni</i> .....	Dwarf crocodile .....	I .....	7/1/75
<i>O. tetraspis tetraspis</i> .....	Dwarf crocodile .....	I .....	7/1/75
<i>Paleosuchus trigonatus</i> .....	Smooth-fronted caiman .....	II .....	7/1/75
<i>Tomistoma schlegelii</i> .....	Tomistoma, False gavial .....	I .....	7/1/75
Order Rhynchocephalia:	Tuatara:		
+ <i>Sphenodon</i> spp .....	Tuatara	I .....	7/1/75
Order Sauria:	Lizards:		
<i>Amblyrhynchus cristatus</i> .....	Galapagos marine iguana .....	II .....	7/1/75
<i>Brachylophus</i> spp .....	Fiji iguanas .....	I .....	6/6/81
<i>Bradypodion</i> spp .....	Chameleons .....	II .....	2/4/77
<i>Chamaeleo</i> spp .....	Chamaeleons .....	II .....	2/4/77
<i>Cnemidophorus hyperythrus</i> .....	Orange-throated whiptail lizard .....	II .....	7/1/75
<i>Conolophus</i> spp. (except species listed below) .....	Land lizards .....	II .....	2/4/77
<i>C. pallidus</i> .....	Barrington island land lizard .....	II .....	7/1/75
<i>C. subcristatus</i> .....	Galapagos land iguana .....	II .....	7/1/75
<i>Cordylus</i> spp .....	Girdled lizards .....	II .....	6/6/81
<i>Corucia zebrata</i> .....	Prehensile-tailed skink .....	II .....	6/11/92
<i>Crocodylus lacertinus</i> .....	Dragon lizardet .....	II .....	2/4/77
<i>Cyclura</i> spp .....	Ground iguanas .....	I .....	2/4/77
<i>Cyrtodactylus serpensinsula</i> .....	Serpent Island gecko .....	II .....	2/4/77
<i>Dracaena</i> spp .....	Caiman lizards .....	II .....	2/4/77
<i>Gallotia simonyi</i> .....	Hierro giant lizard .....	I .....	10/22/87
<i>Heloderma</i> spp .....	Beaded lizards, Gila monster .....	II .....	7/1/75
<i>Iguana</i> spp .....	Iguanas .....	II .....	2/4/77
<i>Phelsuma</i> spp .....	Day geckos .....	II .....	2/4/77
<i>Phrynosoma coronatum</i> (except subspecies with earlier date in App. II).	Coatal horned lizards .....	II .....	6/11/92
<i>P. coronatum blainvillei</i> .....	San Diego horned lizard .....	II .....	7/1/75
<i>Podarcis lilfordi</i> .....	Lilford's wall lizard .....	II .....	10/22/87
<i>P. pityusensis</i> .....	biza wall lizard .....	II .....	10/22/87
<i>Pseudocordylus</i> spp .....	Crag lizards .....	II .....	6/6/81
<i>Sauromalus varius</i> .....	San Esteban Island chuckwalla .....	I .....	6/6/81
<i>Shinisaurus crocodilurus</i> .....	Chinese crocodile lizard .....	II .....	1/18/90
<i>Tupinambis</i> spp .....	Tegu lizards .....	II .....	2/4/77
<i>Uromastyx</i> spp .....	Spiny-tailed lizards .....	II .....	2/4/77
<i>Varanus</i> spp. (all species except those in App. 1) .....	Monitor lizards .....	II .....	7/1/75
<i>V. bengalensis</i> .....	Indian monitor, Bengal monitor .....	I .....	7/1/75
<i>V. flavescens</i> .....	Yellow monitor .....	I .....	7/1/75
<i>V. griseus</i> .....	Desert monitor .....	I .....	7/1/75
<i>V. komodoensis</i> .....	Komodo Island monitor, Komodo dragon.	I .....	7/1/75
Order Serpentes:	Snakes:		
<i>Acrantophis</i> spp .....	Madagascar boas .....	I .....	2/4/77
<i>Agkistrodon bilineatus</i> .....	Cantil .....	III (Honduras) .....	4/13/87
<i>Atretium schistosum</i> .....	Olive keelback water snake .....	III (India) .....	2/12/84

Parks.  
[FR Doc. 95-24218 Filed 9-28-95; 8:45 am]  
BILLING CODE 4310-55-P

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**50 CFR Part 672**

[Docket No. 950206041-5041-01; I.D. 091995B]

**Groundfish of the Gulf of Alaska; Pollock in Statistical Area 62 of the Gulf of Alaska**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Closure.

**SUMMARY:** NMFS is prohibiting directed fishing for pollock in Statistical Area 62 in the Gulf of Alaska (GOA). This action is necessary to prevent exceeding the fourth quarterly allowance of total allowable catch (TAC) for pollock in this area.

**EFFECTIVE DATE:** 12 noon, Alaska local time (A.l.t.), October 4, 1995, until 12 midnight, A.l.t., December 31, 1995.

**FOR FURTHER INFORMATION CONTACT:** Thomas Pearson, 907-486-6919.

**SUPPLEMENTARY INFORMATION:** The groundfish fishery in the GOA exclusive economic zone is managed by NMFS according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North

Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

The 1995 pollock TAC in Statistical Area 62 was established by the Final 1995 Harvest Specifications of Groundfish (60 FR 8470, February 14, 1995) as 15,310 metric tons (mt), determined in accordance with § 672.20(a)(2)(iv). As of September 2, 1995, the remaining pollock TAC for Statistical Area 62 is 3,124 mt. The fourth quarterly allowance of the TAC for Statistical Area 62 will become available at 12 noon, A.l.t., October 1, 1995, pursuant to § 672.20(a)(2)(iv).

The Director, Alaska Region, NMFS (Regional Director), has determined, in accordance with § 672.20(c)(2)(ii), that the 1995 fourth quarterly allowance of pollock TAC in Statistical Area 62 soon will be reached. Therefore, the Regional Director has established a directed fishing allowance of 2,742 mt after determining that 382 mt will be taken as incidental catch in directed fishing for other species in Statistical Area 62 of the GOA. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 62, effective from 12 noon, A.l.t., October 4, 1995, until 12 midnight, A.l.t., December 31, 1995.

After the effective date of this closure, the maximum retainable bycatch amounts at § 672.20(g) apply at any time during a fishing trip.

**Classification**

This action is taken under 672.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 25, 1995.  
Richard W. Surdi,  
Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.  
[FR Doc. 95-24178 Filed 9-25-95; 4:38 pm]  
BILLING CODE 3510-22-F

**50 CFR Part 672**

[Docket No. 950206041-5041-01; I.D. 092195A]

**Groundfish of the Gulf of Alaska; Shortraker/Rougheye Rockfish Species Group in the Central Regulatory Area**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Closure.

**SUMMARY:** NMFS is prohibiting retention of the shortraker/ rougheye rockfish species group in the Central Regulatory Area of the Gulf of Alaska (GOA). NMFS is requiring that catches of the shortraker/rougheye rockfish species group in this area be treated in the same manner as prohibited species and discarded at sea with a minimum of injury. This action is necessary because the total allowable catch (TAC) specified for the shortraker/rougheye rockfish species group in the Central Regulatory Area of the GOA has been reached.

**EFFECTIVE DATE:** 12 noon, Alaska local time (A.l.t.), October 1, 1995, until 12 midnight, A.l.t., December 31, 1995.

**FOR FURTHER INFORMATION CONTACT:** Thomas Pearson, 907-486-6919.

**SUPPLEMENTARY INFORMATION:** The groundfish fishery in the GOA exclusive economic zone is managed by NMFS according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

In accordance with § 672.20(c)(1)(ii), the TAC for the shortraker/rougheye rockfish species group in the Central Regulatory Area of the GOA was established by the Final 1995 Harvest Specifications of Groundfish (60 FR 8470, February 14, 1995), as 1,210 metric tons.

The Director, Alaska Region, NMFS, has determined, in accordance with § 672.20(c)(3), that the TAC for the shortraker/rougheye rockfish species group in the Central Regulatory Area of the GOA has been reached. Therefore, NMFS is requiring that further catches of the shortraker/rougheye rockfish species group in the Central Regulatory Area of the GOA be treated as prohibited species in accordance with § 672.20(e).

**SUPPLEMENTARY INFORMATION:** The groundfish fishery in the GOA exclusive economic zone is managed by NMFS according to the Fishery Management Plan for Groundfish of the Gulf of Alaska (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 672.

The 1995 pollock TAC in Statistical Area 63 was established by the Final 1995 Harvest Specifications of Groundfish (60 FR 8470, February 14, 1995) as 16,310 metric tons (mt), determined in accordance with § 672.20(a)(2)(iv). As of September 2, 1995, the remaining pollock TAC for Statistical Area 63 is 3,392 mt. The fourth quarterly allowance of the TAC for Statistical Area 63 will become available at noon, October 1, 1995, pursuant to § 672.20(a)(2)(iv).

The Director, Alaska Region, NMFS (Regional Director), has determined, in accordance with § 672.20(c)(2)(ii), that the fourth quarterly allowance of pollock TAC in Statistical Area 63 soon will be reached. Therefore, the Regional Director has established a directed fishing allowance of 2,984 mt after determining that 408 mt will be taken as incidental catch in directed fishing for other species in Statistical Area 63 of the GOA. Consequently, NMFS is prohibiting directed fishing for pollock in Statistical Area 63, effective from 12 noon, A.l.t., October 4, 1995, until 12 midnight, A.l.t., December 31, 1994.

After the effective date of this closure, the maximum retainable bycatch amounts at § 672.20(g) apply at any time during a fishing trip.

#### Classification

This action is taken under 50 CFR 672.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 25, 1995.

Richard W. Surdi,

*Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.*

BILLING CODE 3510-22-F

#### 50 CFR Part 675

[Docket No. 950206040-5040-01; I.D. 081595B]

#### Groundfish Fishery of the Bering Sea and Aleutian Islands Area; Change in Assumed Pacific Halibut Discard Mortality Rate

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Change in assumed Pacific halibut discard mortality rate.

**SUMMARY:** NMFS announces a reduction of the Pacific halibut discard mortality rate assumed for the 1995 hook-and-line Pacific cod fishery in the Bering Sea and Aleutian Islands management area (BSAI) from 12.5 percent to 11.5 percent. This action is necessary to implement the intent of the North Pacific Fishery Management Council (Council) to assess discard mortality rates observed in this fishery during the first half of 1995 and, if warranted, adjust the 12.5 assumed rate specified for this fishery to reflect more closely the 1995 observed rate.

**EFFECTIVE DATE:** September 28, 1995.

**FOR FURTHER INFORMATION CONTACT:** Susan Salvesson, NMFS, 907-586-7228.

#### SUPPLEMENTARY INFORMATION:

##### Background

NMFS, in consultation with the Council, annually establishes Pacific halibut bycatch allowances for specified BSAI groundfish fisheries (§ 675.21(b)). The Director, NMFS, Alaska Region, monitors each fishery's halibut bycatch allowance using assumed discard mortality rates that are based on the best information available. NMFS published the 1995 halibut bycatch mortality allowances and assumed discard mortality rates in the Federal Register on February 14, 1995 (60 FR 8479), as part of the final 1995 specifications of groundfish and associated management measures.

On August 22, 1995, NMFS published in the Federal Register a proposed change to the halibut discard mortality rate specified for the 1995 Pacific cod hook-and-line gear fishery (60 FR 43579). Comments on the proposed change were invited through September 5, 1995.

The proposed action was based on the results of a mid-year analysis of 1995 observed halibut discard mortality rates that was conducted by the International Pacific Halibut Commission (IPHC). The results of this analysis indicated that a halibut discard rate of 11.5 percent is

more appropriate in estimating halibut bycatch mortality for the 1995 BSAI hook-and-line gear fishery for Pacific cod than the 12.5 percent rate established in the final 1995 groundfish specifications (February 14, 1995, 60 FR 8479).

At its June 1995 meeting, the Council reviewed the IPHC's analysis and recommended that NMFS take appropriate action to reduce the halibut discard mortality rate specified for the BSAI Pacific cod hook-and-line gear fishery. A fuller discussion of the IPHC's analysis and justification for the proposed reduction in this discard mortality rate assumption was presented in the August 22, 1995, Federal Register publication of the proposed change.

Upon reviewing the reasons for the proposed change to the halibut discard mortality rate specified for the BSAI Pacific cod fishery and public comments received on this action, NMFS revises Table 9 of the final 1995 groundfish specifications published February 14, 1995 (60 FR 8479), as follows:

TABLE 9.—ASSUMED PACIFIC HALIBUT MORTALITY RATES FOR THE BSAI FISHERIES DURING 1995

	Assumed mortality (percent)
<b>Hook-and-Line Gear Fisheries:</b>	
Rockfish .....	24.0
Pacific cod .....	11.5
Greenland turbot .....	19.0
Sablefish .....	17.0
<b>Trawl Gear Fisheries:</b>	
Midwater pollock .....	89.0
Non-pelagic pollock .....	77.0
Yellowfin sole .....	76.0
Rock sole, flathead sole, other flatfish .....	75.0
Rockfish .....	69.0
Pacific cod .....	65.0
Atka mackerel .....	59.0
Arrowtooth .....	49.0
Greenland Turbot .....	48.0
<b>Pot Gear Fisheries:</b>	
Pacific cod .....	8.0

NMFS will recalculate the 1995 halibut bycatch mortality for the BSAI Pacific cod hook-and-line gear fishery using the 11.5 percent assumed discard mortality rate.

**Response to Comments**

One letter was received within the comment period that ended September

5, 1995. A summary of comments of the proposed action and NMFS's response follows.

*Comment.* An adjustment of the halibut discard mortality rate assumption for the BSAI Pacific cod hook-and-line gear fishery from 12.5 percent to 11.5 percent is appropriate based on the IPHC analysis of 1995 observer data. This action would encourage industry pursuit of further conservation efforts to reduce halibut mortality in the hook-and-line gear fisheries.

*Response.* NMFS concurs and has adjusted the halibut discard mortality rate specified for the BSAI Pacific cod hook-and-line gear fishery accordingly.

**Classification**

This action is authorized under 50 CFR 675.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 22, 1995.

Richard W. Surdi,

*Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.*

# Proposed Rules

Federal Register

Vol. 60, No. 189

Friday, September 29, 1995

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 71

[Airspace Docket No. 95-ANM-16]

#### Proposed Amendment of Class E Airspace; Ogden, UT

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This proposed rule would amend the Ogden, Utah, Class E airspace to accommodate new holding fixes for air traffic associated with the future commissioning of the new runway at Salt Lake City International Airport, Salt Lake City, Utah. The area would be depicted on aeronautical charts for pilot reference.

**DATES:** Comments must be received on or before November 15, 1995.

**ADDRESSES:** Send comments on the proposal in triplicate to: Manager, System Management Branch, ANM-530, Federal Aviation Administration, Docket No. 95-ANM-16, 1601 Lind Avenue SW., Renton, Washington 98055-4056.

The official docket may be examined at the same address.

An informal docket may also be examined during normal business hours at the address listed above.

**FOR FURTHER INFORMATION CONTACT:** James Riley, ANM-537, Federal Aviation Administration, Docket No. 95-ANM-16, 1601 Lind Avenue SW., Renton, Washington 98055-4056; telephone number: (206) 227-2537.

#### SUPPLEMENTARY INFORMATION:

##### Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory

decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 94-ANM-16." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination at the address listed above both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

##### Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, System Management Branch, ANM-530, 1601 Lind Avenue SW., Renton, Washington 98055-4056. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2A, which describes the application procedure.

##### The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to amend Class E airspace at Ogden, Utah, to accommodate holding fixes for air traffic associated with the future commissioning of the new runway at Salt Lake City International Airport. The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas extending upward from 700 feet or more above the surface

of the earth are published in Paragraph 6005 of FAA Order 7400.9C dated August 17, 1995, and effective September 16, 1995, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

##### List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

##### The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

#### PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp. p. 389; 14 CFR 11.69.

##### § 71.1 [Amended]

2. The incorporation by reference in 14 CFR part 71.1 of the Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995, and effective September 16, 1995, is amended as follows:

*Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the Earth.*

## DEPARTMENT OF COMMERCE

### Bureau of Export Administration

#### 15 CFR Ch. VII

[Docket No. 950920234-5234-01]

RIN 0694-XX02

#### Request for Comments on Effects of Foreign Policy-Based Export Controls

**AGENCY:** Bureau of Export Administration, Commerce.

**ACTION:** Request for comments on foreign policy-based export controls.

**SUMMARY:** The Bureau of Export Administration (BXA) is reviewing the foreign policy-based export controls in the Export Administration Regulations to determine whether they should be modified, rescinded or extended. To help make these determinations, BXA is seeking comments on how existing foreign policy-based export controls have affected exporters and the general public.

Section 6 of the Export Administration Act of 1979, as amended (EAA), requires a report to Congress whenever foreign policy-based export controls are extended. Although the EAA expired on August 20, 1994, the President, invoking the International Emergency Powers Act (IEEPA), continued in effect the export control system in place under the provisions of the Act and the Export Administration Regulations, to the extent permitted by law, in Executive Order 12924 of August 19, 1994 and Notice 42767 of August 15, 1995. Under a policy of conforming actions under the Executive Order to those under the EAA, the Department of Commerce, insofar as appropriate, is following the provisions of section 6 in reviewing foreign policy-based export controls and requesting comments on such controls.

**DATES:** Comments must be received by October 30, 1995, to assure full consideration in the formulation of export control policies as they relate to foreign policy-based controls.

**ADDRESSES:** Written comments (three copies) should be sent to Sharron Cook, Regulatory Policy Division (Room 2096), Office of Exporter Services, Bureau of Export Administration, Department of Commerce, P.O. Box 273, Washington, DC 20044.

**FOR FURTHER INFORMATION CONTACT:** Anita McNamee, Foreign Policy Division, Office of Strategic Trade and Foreign Policy Controls, Bureau of Export Administration, Telephone: (202) 482-4252. Copies of the current

1995 Annual Foreign Policy Report to the Congress can also be requested.

**SUPPLEMENTARY INFORMATION:** The current foreign policy controls maintained by the Bureau of Export Administration (BXA) are set forth in the Export Administration Regulations (EAR), Parts 776 (Special Commodity Policies and Provisions), 778 (Proliferation Controls), and 785 (Special Country Policies and Provisions). These controls apply to: supercomputers (§ 776.11); crime control and detection commodities (§ 776.14); regional stability commodities and equipment (§ 776.16); equipment and related technical data used in the design, development, production, or use of missiles capable of delivering nuclear weapons (§ 778.7); chemical precursors and biological agents, associated equipment, technical data, and software related to the production of chemical and biological agents (§ 778.8); activities of U.S. persons in transactions related to missile technology or chemical or biological weapons proliferation in named countries (§ 778.9); embargoed countries (§ 785.1); countries designated as supporters of acts of international terrorism (§ 785.4(d)); and, Libya (§ 785.7). Attention is also given in this context to the controls on nuclear-related commodities and technical data (§ 778.2), although they are not foreign policy-based controls in the exact sense.

Effective January 21, 1995, the Secretary of Commerce, on the recommendation of the Secretary of State, extended for one year all foreign policy controls then in effect.

To assure maximum public participation in the review process, comments are solicited on the extension or revision of the existing foreign policy controls for another year. Among the criteria the Departments of Commerce and State consider in determining whether to continue or revise U.S. foreign policy controls are the following:

1. The likelihood that such controls will achieve the intended foreign policy purpose, in light of other factors, including the availability from other countries of the goods or technology proposed for such controls;

2. Whether the foreign policy purpose of such controls can be achieved through negotiations or other alternative means;

3. The compatibility of the controls with the foreign policy objectives of the United States and with overall United States policy toward the country subject to the controls;

4. The reaction of other countries to the extension of such controls by the

United States is not likely to render the controls ineffective in achieving the intended foreign policy purpose or be counterproductive to United States foreign policy interests;

5. The effect of the controls on the export performance of the United States, the competitive position of the United States in the international economy, the international reputation of the United States as a supplier of goods and technology, or the economic well-being of individual United States companies and their employees and communities does not exceed the benefit to United States foreign policy objectives; and

6. The ability of the United States to enforce the controls effectively.

BXA is particularly interested in the experience of individual exporters in complying with the proliferation controls, with emphasis on economic impact and specific instances of business lost to foreign competitors. BXA is also interested in comments relating to the effects of foreign policy controls on exports of replacement and other parts.

Parties submitting comments are asked to be as specific as possible. All comments received before the close of the comment period will be considered by BXA in reviewing the controls and developing the report to Congress.

BXA will consider requests for confidential treatment. The information for which confidential treatment is requested should be submitted to BXA separate from any non-confidential information submitted. The top of each page should be marked with the term "Confidential Information." BXA will either accept the submission in confidence, or if the submission fails to meet the standards for confidential treatment, will return it. A non-confidential summary must accompany such submissions of confidential information. The summary will be made available for public inspection.

Information accepted by BXA as confidential will be protected from public disclosure to the extent permitted by law. Communications between agencies of the United States Government or with foreign governments will not be made available for public inspection.

All other information relating to the notice will be a matter of public record and will be available for public inspection and copying. In the interest of accuracy and completeness, BXA requires written comments. Oral comments must be followed by written memoranda, which will also be a matter of public record and will be available for public review and copying.

The public record concerning these comments will be maintained in the Freedom of Information Records Inspection Facility, Room 4525, U.S. Department of Commerce, 14th Street and Pennsylvania Avenue, NW, Washington, D.C. 20230. Records in this facility, including written public comments and memoranda summarizing the substance of oral communications, may be inspected and copied in accordance with regulations published in Part 4 of Title 15 of the Code of Federal Regulations. Information about inspection and copying of records at this facility may be obtained from Henry Gaston, BXA Freedom of Information Officer, at the above address or by calling (202) 482-5653.

Dated: September 26, 1995.

Sue E. Eckert,

*Assistant Secretary for Export Administration*

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

#### 26 CFR Part 31

[EE-45-93]

RIN 1545-AR67

#### Electronic Filing of Form W-4; Hearing

**AGENCY:** Internal Revenue Service, Treasury.

**ACTION:** Notice of public hearing on proposed regulations.

**SUMMARY:** This document provides notice of a public hearing on proposed regulations relating to the electronic filing of Form W-4, Employee's Withholding Allowance Certificate, which were published on December 21, 1994.

**DATES:** The public hearing will be held on Tuesday, November 7, 1995, beginning at 10:00 a.m. Requests to speak and outlines of oral comments must be received by Tuesday, October 17, 1995.

**ADDRESSES:** The public hearing will be held in the IRS Auditorium, Seventh floor, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue, NW., Washington, DC. Requests to speak and outlines of oral comments should be submitted to the Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Attn: CC:DOM:CORP:R [EE-45-93], room 5228, Washington, DC 20044.

**FOR FURTHER INFORMATION CONTACT:** Mike Slaughter of the Regulations Unit,

Assistant Chief Counsel (Corporate), (202) 622-7190, (not a toll-free number).

**SUPPLEMENTARY INFORMATION:** The subject of the public hearing is proposed amendments to the Employment Tax Regulations (26 CFR part 31) under section 3402 of the Internal Revenue Code. A withdrawal of notice of proposed rulemaking and a notice of proposed rulemaking by cross reference to temporary regulations was published in the Federal Register on Wednesday, December 21, 1994 (59 FR 65740).

The rules of § 601.601(a)(3) of the "Statement of Procedural Rules" (26 CFR part 601) shall apply with respect to the public hearing. Persons who have submitted written comments within the time prescribed in the notice of proposed rulemaking and who also desire to present oral comments at the hearing on the proposed regulations should submit not later than Tuesday, October 17, 1995, an outline of the oral comments/testimony to be presented at the hearing and the time they wish to devote to each subject.

Each speaker (or group of speakers representing a single entity) will be limited to 10 minutes for an oral presentation exclusive of the time consumed by the questions from the panel for the government and answers to these questions.

Because of controlled access restrictions, attendees cannot be admitted beyond the lobby of the Internal Revenue Building until 9:45 a.m.

An agenda showing the scheduling of the speakers will be made after outlines are received from the persons testifying. Copies of the agenda will be available free of charge at the hearing.

Cynthia E. Grigsby,

*Chief, Regulations Unit, Assistant Chief Counsel (Corporate).*

## DEPARTMENT OF LABOR

### Pension and Welfare Benefits Administration

#### 29 CFR Part 2510

#### Proposed Regulation for Plans Established or Maintained Pursuant to Collective Bargaining Agreements Under Section 3(40)(A)

**AGENCY:** Pension and Welfare Benefits Administration, Department of Labor.

**ACTION:** Notice of extension of comment period.

**SUMMARY:** This document extends the comment period for the proposed rule under Title I of the Employee Retirement Income Security Act of 1974, as amended, 29 U.S.C. 1001-1461 (the Act), relating to plans established or maintained pursuant to collective bargaining agreements for purposes of section 3(40) of the Act, 29 U.S.C. 1002(40). The proposed rule was set forth in a notice of proposed rulemaking published in the Federal Register at 650 FR 39208 (August 1, 1995).

**DATES:** The comment period for this proposed rule is extended through November 16, 1995.

**ADDRESSES:** Written comments (preferably three copies) concerning the proposed rule should be submitted to: Pension and Welfare Benefits Administration, Room N-5669, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Attention: Proposed Regulation Under Section 3(40). All submissions will be open to public inspection at the Public Documents Room, Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N-5638, 200 Constitution Avenue NW., Washington, DC 20210.

**FOR FURTHER INFORMATION CONTACT:** Mark Connor, Office of Regulations and Interpretations, Pension and Welfare Benefits Administration, U.S. Department of Labor, Rm N-5669, 200 Constitution Avenue NW., Washington, D.C. 20210 (telephone (202) 219-8671) or Cynthia Caldwell Weglicki, Office of the Solicitor, Plan Benefits Security Division, U.S. Department of Labor, Rm N-4611, 200 Constitution Avenue NW., Washington, D.C. 20210 (telephone (202) 219-4592). These are not toll-free numbers.

**SUPPLEMENTARY INFORMATION:** On August 1, 1995, the Department of Labor (the Department) published a notice of proposed rulemaking in the Federal Register (60 FR 39208) regarding plans established or maintained pursuant to collective bargaining agreements for purposes of section 3(40) of the Act. In that notice the Department invited all interested persons to submit written comments concerning the proposed rule on or before October 2, 1995.

The Department has received requests from some members of the public for additional time to prepare comments due to the complexity of the issues involved in the proposed rule, and the Department believes that it is appropriate to grant such additional time. Accordingly, this notice extends the comment period during which comments on the proposed rule may be submitted through November 16, 1995.

#### Notice of Extension of Comment Period

Notice is hereby given that the comment period for the proposed rule relating to plans established or maintained pursuant to collective bargaining agreements for purposes of section 3(40) of the Act (proposed at 60 FR 39208, August 1, 1995) is hereby extended through Thursday, November 16, 1995.

Signed at Washington, DC, this 26th day of September 1995.

Olena Berg,

*Assistant Secretary, Pension and Welfare Benefits Administration.*

## DEPARTMENT OF THE INTERIOR

### National Park Service

#### 36 CFR Part 7

#### Cape Cod National Seashore Off-Road Vehicle Use Negotiated Rulemaking Advisory Committee

**AGENCY:** National Park Service.

**ACTION:** Notice of meeting.

**SUMMARY:** Notice is hereby given in accordance with the Federal Advisory Committee Act (5 U.S.C., Appendix), that a meeting of the Cape Cod National Seashore Off-Road Vehicle Use Negotiated Rulemaking Advisory Committee will be held on Thursday and Friday, October 12 and 13, 1995.

**DATES:** The Committee members will meet at 9 a.m. at the Sheraton Eastham, Route 6, Eastham, MA for the second of three, two-day meetings which will be held for the following reasons:

October 12, 1995—Thursday

1. Discussion of Proposed Agenda
2. Review and Discussion of Proposed Draft Rule
3. Public Participation Period
4. Adjournment

October 13, 1995—Friday

1. Review and Discussion of Proposed Draft Rule
2. Public Participation Period
3. Adjournment

**FOR FURTHER INFORMATION CONTACT:** Superintendent, Cape Cod National Seashore, South Wellfleet, MA 02663, 508-349-3785 Ext 203.

**SUPPLEMENTARY INFORMATION:** The meeting is open to the public. It is expected that 75 persons will be able to attend the meeting in addition to the Committee members.

The Committee was established pursuant to the Negotiated Rulemaking Act of 1990 (5 U.S.C. 561-570). The

purpose of the Committee is to advise the National Park Service with regard to proposed rulemaking governing off-road vehicle use at Cape Cod National Seashore.

Interested persons may make oral/written presentations to the Committee during the business meeting or file written statements. Such presentations may be made to the Committee during the Public Participation Period the day of the meeting, or in writing to the Park Superintendent at least seven days prior to the meeting.

Robert W. McIntosh,

*Acting, Deputy Field Director, Northeast Area.*

[FR Doc. 95-24401 Filed 9-27-95; 11:50 am]

BILLING CODE 4310-70-M

---

## ENVIRONMENTAL PROTECTION AGENCY

#### 40 CFR Part 81

[OR-A-95-01b; FRL-5302-2]

#### Approval and Promulgation of Definition of Areas for Air Quality Planning Purposes; Oregon-Washington

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The EPA proposes to approve the separation of the Portland, Oregon—Vancouver, Washington interstate carbon monoxide (CO) nonattainment area into two distinct nonattainment areas. The Oregon Department of Environmental Quality (ODEQ) has submitted sufficient technical documentation to adequately assure EPA that Vancouver and Portland are two separate CO airsheds. In the Final Rules Section of this Federal Register, the EPA is approving the State's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If the EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this action.

**DATES:** Comments on this proposed rule must be received in writing by October 30, 1995.

**ADDRESSES:** Written comments should be addressed to Montel Livingston, Environmental Protection Specialist (AT-082), Air Programs Section, at the EPA Regional Office listed below.

Copies of the documents relevant to this proposed rule are available for public inspection during normal business hours at the following locations. The interested persons wanting to examine these documents should make an appointment with the appropriate office at least 24 hours before the visiting day. U.S. Environmental Protection Agency, Region 10, Air Programs Section, 1200 6th Avenue, Seattle, WA 98101.

The Oregon Department of Environmental Quality, 811 S.W. Sixth Avenue, Portland, Oregon 97204-1390.

**FOR FURTHER INFORMATION CONTACT:** Christi Lee, Air Programs Branch (AT-082), EPA, 1200 6th Avenue, Seattle, WA 98101, (206) 553-1814.

**SUPPLEMENTARY INFORMATION:** See the information provided in the Direct Final action which is located in the Rules Section of this Federal Register.

Dated: September 22, 1995.

Carol M. Browner,

*U.S. EPA Administrator.*

[FR Doc. 95-24040 Filed 9-28-95; 8:45 am]

BILLING CODE 6560-50-P

#### 40 CFR Part 180

[PP 5E4464/P629; FRL-4973-7]

RIN 2070-AC18

#### Linuron; Pesticide Tolerance

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA proposes to increase the established tolerance for residues of the herbicide linuron in or on the raw agricultural commodity asparagus. The proposed regulation to increase the maximum permissible level for residues of linuron was requested in a petition submitted by the Interregional Research Project No. 4 (IR-4) pursuant to the Federal Food, Drug and Cosmetic Act (FFDCA).

**DATES:** Comments, identified by the document control number, [PP 5E4464/P629], must be received on or before October 30, 1995.

**ADDRESSES:** By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. In person, bring

comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Comments and data may also be submitted to OPP by sending electronic mail (e-mail) to:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [PP 5E4464/P629]. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in the "SUPPLEMENTAL INFORMATION" section of this document.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information." CBI should not be submitted through e-mail. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Hoyt L. Jamerson, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. Office location and telephone number: Sixth Floor, Crystal Station #1, 2800 Jefferson Davis Hwy., Arlington, VA 22202, (703)-308-8783; e-mail: jamerson.hoyt@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, submitted a pesticide petition (PP 5E4464) to EPA on behalf of the IR-4 Agricultural Experiment Stations of California, Indiana, Michigan, and New Jersey. The petition requests that the Administrator, pursuant to section 408(e) of the FFDCA, 21 U.S.C. 346a(e), amend 40 CFR 180.184 by increasing the established tolerance for residues of the herbicide linuron [3-(3,4-dichlorophenyl)-1-methoxy-1-

methylurea] in or on the raw agricultural commodity asparagus from 3.0 parts per million (ppm) to 7.0 ppm. IR-4 proposed the increased tolerance for asparagus in response to the reregistration eligibility review and decisions on the pesticide case linuron, which was completed by EPA on April 28, 1995. The Reregistration Eligibility Decision (RED) requires that the established tolerance for linuron on asparagus be increased to 7.0 ppm.

The scientific data submitted with the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance include:

1. A 1-year feeding study in dogs, which were fed diets containing 10, 25, 125, or 625 ppm (equivalent to 0.29, 0.79, 4.17, or 18.6 milligrams (mg)/kilogram (kg)/day for males; 0.3, 0.77, 3.49, or 16.1 mg/kg/day for females), with a no-observed-effect level (NOEL) for systemic toxicity of 25 ppm. The lowest-observed-effect level (LOEL) was established at 125 ppm based on hematology changes.

2. A 2-year feeding/carcinogenicity study in Sprague-Dawley rats, which were fed diets containing 50, 125, or 625 ppm (equivalent to 2.5, 6.25, or 31.25 mg/kg/day), with systemic NOEL's of 50 ppm for females and 625 ppm for males. The LOEL for systemic toxicity for females was established at 125 ppm based on hematotoxicity (a decrease in the percent hemoglobin). There was no decrease in percent hemoglobin in male rats at any dosage level tested.

Testicular interstitial cell adenomas were observed at a significantly increased incidence in male rats fed diets containing 125 and 625 ppm.

3. A 2-year feeding study in albino rats, which were fed diets containing 25, 125, or 625 ppm (equivalent to 1.25, 6.25, or 31.25 mg/kg/day), with a systemic NOEL of 125 ppm. Growth retardation and findings indicative of red blood cell disintegration were observed at the LOEL of 625 ppm.

4. An 18-month feeding study was conducted in rats to study the effects of linuron on methemoglobin and sulfhemoglobin blood concentrations. The dietary levels tested were 25, 125, or 625 ppm (1.25, 6.25, or 31.25 mg/kg/day). Significant changes in blood pigment were observed in the mid- and high-dose female rats and the high-dose male rats. NOELs were established at 125 ppm for male rats and 25 ppm for female rats.

5. A 2-year feeding/carcinogenicity in CD-1 mice, which were fed diets containing 50, 150, or 1,500 ppm (12, 35, or 455 mg/kg/day), showed a statistically significant increase in the

incidence of hepatocellular adenomas at 1,500 ppm for female mice, and borderline statistical significance was attained for hepatocellular adenomas at 50 ppm for male mice.

6. A developmental toxicity study in rats at dietary levels of 50, 125, or 625 ppm (5.0, 12.1, or 49.8 mg/kg/day), administered on days 6 to 15 of gestation with NOELs for maternal systemic toxicity and developmental toxicity established at 125 ppm. The LOEL of 625 ppm for maternal systemic toxic effects was based upon decreased body weight and food consumption values. The developmental toxicity LOEL of 625 ppm was based on increases in post-implantation loss and increases in the litter and fetal incidence of resorptions.

7. A developmental toxicity study in rabbits given gavage dosages of 5, 25, or 100 mg/kg/day on days 7 through 19 of gestation with a NOEL for developmental toxicity of 25 mg/kg/day and a NOEL for maternal toxicity of 5 mg/kg/day. The LOEL for maternal systemic toxicity (reduced body weight) was established at 25 mg/kg/day. The LOEL for developmental toxicity was established at 100 mg/kg/day based on an increased number of abortions, decreased mean number of fetuses per litter, decreased fetal body weight, and increased incidence of fetuses with skeletal variations of the skull at that dosage level.

8. A two-generation reproductive toxicity study in rats, which were fed diets containing 12.5, 100, or 625 ppm (equivalent to 0.84, 6.8, or 44.75 mg/kg/day for males; 1.0, 8.3, or 54.1 mg/kg/day for females), with no evidence of adverse effects on fertility or reproductive performance under the conditions of the study. The NOEL for parental systemic toxicity was established at 12.5 ppm based upon decrements in parental body weight gain. In addition, the results of this study support the hypothesis that rats exposed to linuron could develop interstitial cell hyperplasia and subsequent adenomas (Leydig cell tumors) of the testicular tissue via a mechanism of sustained hypersecretion of luteinizing hormone induced by the antiandrogenic potential of linuron.

9. Linuron did not produce gene mutation in an Ames assay or in an *in vitro* assay using Chinese hamster ovary cells. Linuron did not induce bone marrow chromosome aberrations *in vivo* and in other tests for genotoxicity. Linuron did not induce unscheduled DNA synthesis in isolated rat hepatocytes.

10. Metabolism studies in rats show that linuron was extensively

metabolized by male and female rats when administered by gavage, and there is no indication of accumulation of linuron or its metabolites in tissues and organs.

Linuron was placed in Special Review for carcinogenicity in 1982. It was later classified as a group C carcinogen (possible human carcinogen) with quantified cancer risk on the basis of a dose-related increase in interstitial cell hyperplasia and adenomas in the 2-year rat feeding study and hepatocellular tumors that appeared in low-dose male and high-dose female mice in a 2-year feeding study. Subsequent review by the Office of Pesticide Programs, Health Effects Division, Peer Review Committee and the Science Advisory Panel resulted in the decision to regulate linuron as a possible human carcinogen without quantified cancer risk. This decision was based on the weight-of-evidence, which suggested that the carcinogenic potential of linuron in humans is weak.

Dietary risk assessments for linuron were conducted using the Reference Dose (RfD) to assess chronic exposure and risk and the Margin of Exposure (MOE) for acute toxicity. The RfD for linuron is established at 0.008 mg/kg of body weight/day, based on a NOEL of 0.77 mg/kg/day from the 1-year feeding study in dogs and an uncertainty factor of 100. The anticipated residue contribution (ARC) from published tolerances and the proposed 7-ppm tolerance for asparagus utilizes 2 percent of the RfD for the general population. The ARC for the subgroup most highly exposed, nonnursing infants (less than 1-year old), utilizes 6 percent of the RfD. EPA concludes that established tolerances and the proposed increased tolerance for asparagus pose a negligible dietary risk to humans. The MOE is a measure of how closely acute dietary exposure comes to the NOEL from the toxicity endpoint of concern. For linuron, the MOE was calculated as a ratio of the NOEL (25 mg/kg/day) from the rabbit developmental toxicity study to dietary exposure (0.03125 mg/kg/day), as estimated by the high-end exposure for the population subgroup at greatest risk (females of childbearing age). The MOE for this subgroup is estimated at 800 for high-end exposure. Acute dietary margins of exposure of less than 100 are generally of concern to EPA. A MOE of 800 poses minimal risk.

The nature of the residue in plants is adequately understood. An adequate analytical method has been published in Pesticide Analytical Manual, Vol. II (PAM Vol. II).

There is no reasonable expectation that secondary residues will occur in

milk, and eggs, or meat, fat and meat byproducts of livestock and poultry; there are no livestock feed items associated with asparagus.

There are currently no actions pending against the continued registration of this chemical.

Based on the information and data considered, the Agency has determined that amending 40 CFR 180.184 to increase the tolerance for linuron from 3 ppm to 7 ppm would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this notice in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the FFDCA.

A record has been established for this rulemaking under docket number [PP 5E4464/P629] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-Docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Under Executive Order 12866 (58 FR 51735, Oct. 4, 1993), the Agency must

determine whether the regulatory action is "significant" and therefore subject to all the requirements of the Executive Order (i.e., Regulatory Impact Analysis, review by the Office of Management and Budget (OMB)). Under section 3(f), the order defines "significant" as those actions likely to lead to a rule (1) having an annual effect on the economy of \$100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also known as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of this Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

#### List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 20, 1995.

Peter Caulkins,

*Acting Director, Registration Division, Office of Pesticide Programs.*

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

#### **PART 180—[AMENDED]**

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. In § 180.184, paragraph (a) is amended in the table therein by revising the entry for asparagus, to read as follows:

#### **§ 180.184 Linuron; tolerances for residues.**

(a) \* \* \*

Commodity	Parts per million
Asparagus .....	7.0
* * * * *	* * * * *

[FR Doc. 95-24210 Filed 9-28-95; 8:45 am]

BILLING CODE 6560-50-F

#### **40 CFR Part 180**

[PP 1E3979/P632; FRL-4977-6]

RIN 2070-AC18

#### **Clopyralid; Pesticide Tolerance**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA proposes to establish a tolerance for residues of the herbicide clopyralid in or on the raw agricultural commodity asparagus. The proposed regulation to establish a maximum permissible level for residues of the herbicide was requested in a petition submitted under the Federal Food, Drug and Cosmetic Act (FFDCA) by the Interregional Research Project No. 4 (IR-4).

**DATES:** Comments, identified by the document control number [PP 1E3979/P632], must be received on or before October 30, 1995.

**ADDRESSES:** By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Comments and data may also be submitted to OPP by sending electronic mail (e-mail) to:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [PP 1E3979/P632]. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in the

"SUPPLEMENTARY INFORMATION" section of this document.

Information submitted as a comment concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information." CBI should not be submitted through e-mail. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Hoyt L. Jamerson, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Sixth Floor, Crystal Station #1, 2800 Jefferson Davis Hwy., Arlington, VA 22202, (703)-308-8783; e-mail: jamerson.hoyt@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** The Interregional Research Project No. 4 (IR-4), New Jersey Agricultural Experiment Station, P.O. Box 231, Rutgers University, New Brunswick, NJ 08903, has submitted pesticide petition (PP) 1E3979 to EPA on behalf of the Agricultural Experiment Stations of Arkansas, California, Maryland, Michigan, Minnesota, and Washington. The petition requests that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(e), amend 40 CFR 180.431 by establishing a tolerance for residues of the herbicide clopyralid (3,6-dichloro-2-pyridinecarboxylic acid) in or on the raw agricultural commodity asparagus at 1.0 part per million (ppm).

The scientific data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance include:

1. A 1-year feeding study in dogs, which were fed diets containing 0, 100, 320, and 1,000 milligrams (mg)/kilogram (kg)/day, with a no-observed-effect-level (NOEL) of 100 mg/kg/day. The lowest-observed-effect level (LOEL) was established at 320 mg/kg/day based on increased liver weights and decreased erythrocyte counts and hemoglobin and hematocrit values.

2. A developmental toxicity study in rats, which was given the chemical by gavage at doses of 0, 15, 75, and 250 mg/kg, with no developmental toxicity observed under the conditions of the study. The NOEL for maternal toxicity was established at 75 mg/kg based on decreased body weight and reduced food consumption at the LOEL (250 mg/kg/day).

3. A developmental toxicity study in rabbits, which was given the chemical by gavage at doses of 110 and 250 mg/kg, with no developmental or maternal toxicity observed under the conditions of the study.

4. A 2-year chronic feeding/carcinogenicity study in mice, which were fed diets containing 0, 100, 500, and 2,000 mg/kg/day, with a NOEL for systemic effects of 500 mg/kg. Decreased body weight was observed in male mice fed 2,000 mg/kg/day (LOEL). No carcinogenic effects were observed under the conditions of the study.

5. A 2-year chronic feeding/carcinogenicity study in rats fed diets containing 0, 5, 15, 50, and 150 mg/kg/day with a NOEL for systemic effects of 50 mg/kg/day. The LOEL was established at 150 mg/kg/day based on decreased mean body weight in females in the high-dose group. No carcinogenic effects were observed under the conditions of the study.

6. A two-generation reproduction study in rats fed diets containing 0, 150, 500, and 1,500 mg/kg/day with no observed effect on reproductive performance. A systemic NOEL of 500 mg/kg/day was established for the study based on reduced terminal body weight in the F0 generation at the 1,500 mg/kg/day level.

7. Mutagenicity studies including dominant-lethal assay in rats, *in vivo* rat cytogenetic, *in vitro* Salmonella and Saccharomyces assays, *in vivo* mouse host-mediated assay, and an unscheduled DNA synthesis assay, which were all negative.

8. In a metabolism study in rats, radio-labeled clopyralid was readily absorbed after being ingested and the majority of the radioactive dose was excreted within 24 hours of ingestion.

The reference dose (RfD) for clopyralid is established at 0.5 mg/kg body weight (bwt)/day. The RfD is based on a NOEL of 50 mg/kg/bwt/day from the 2-year feeding study in rats and an uncertainty factor of 100. The theoretical maximum residue contribution (TMRC) from established tolerances utilizes less than 2 percent of the RfD for the overall U.S. population. The TMRC for the subgroup most highly exposed, children aged 1 to 6 years, utilizes less than 4 percent of the RfD.

The dietary risk assessment indicates that there is no appreciable risk from establishment of the proposed tolerance for asparagus.

The nature of the residue in plants is adequately understood. The residue of concern is parent clopyralid. An adequate analytical method, gas chromatography, is available for enforcement purposes. Because of the long lead time from establishing these tolerances to publication of the enforcement method in the Pesticide Analytical Manual, the analytical method is being made available, in the interim, to anyone with an interest in pesticide enforcement when requested from: Calvin Furlow, Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 1132, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703)-305-5937.

No secondary residues are expected to occur in milk, eggs, or meat as a result of this use; asparagus is not considered a livestock feed commodity.

There are presently no actions pending against the continued registration of this chemical.

Based on the information and data considered, the Agency has determined that the tolerance established by amending 40 CFR part 180 would protect the public health. Therefore, it is proposed that the tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the FFDC.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 1E3979/P632].

Electronic comments can be sent directly to EPA at:

opp-Docket@epamail.epa.gov  
Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

A record has been established for this rulemaking under docket number [PP 1E3979/P632] (including comments and data submitted electronically as described below). A public version of

this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Hwy., Arlington, VA.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Under Executive Order 12866 (58 FR 51735, Oct. 4, 1993), the Agency must determine whether the regulatory action is "significant" and therefore subject to all the requirements of the Executive Order (i.e., Regulatory Impact Analysis, review by the Office of Management and Budget (OMB)). Under section 3(f), the order defines "significant" as those actions likely to lead to a rule (1) having an annual effect on the economy of \$100 million or more, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local or tribal governments or communities (also known as "economically significant"); (2) creating serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement, grants, user fees, or loan programs; or (4) raising novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.

Pursuant to the terms of this Executive Order, EPA has determined that this rule is not "significant" and is therefore not subject to OMB review.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial

number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 20, 1995.

Peter Caulkins,

Acting Director, Registration Division, Office of Pesticide Programs.

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

**PART 180—[AMENDED]**

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.431 is amended in paragraph (a) in the table therein by adding and alphabetically inserting an entry for the commodity asparagus, to read as follows:

**§ 180.431 Clopyralid; tolerances for residues.**

(a) \* \* \*

Commodity	Parts per million
Asparagus .....	1.0

BILLING CODE 6560-50-F

**40 CFR Part 180**

[PP 5E4540/P633; FRL-4977-8]

RIN 2070-AC18

**α-Alkyl (C<sub>21</sub>-C<sub>71</sub>)-ω-Hydroxypoly(Oxyethylene); Tolerance Exemption**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** This document proposes that residues of α-alkyl (C<sub>21</sub>-C<sub>71</sub>)-ω-hydroxypoly(oxyethylene) be exempted from the requirement of a tolerance when used at levels not to exceed 10% as a wetting agent or granule coating in pesticide formulations. Petrolite Corp. requested this regulation under the Federal Food, Drug and Cosmetic Act (FFDCA).

**DATES:** Comments, identified by the document control number [PP 5E4540/P633], must be received on or before October 30, 1995.

**ADDRESSES:** By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, deliver comments to: Rm. 1132, Crystal Mall, Building #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202. Information submitted as a comment concerning this document may be claimed confidential by marking any part of all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential will be included in the public docket by the EPA without prior notice. The public docket is available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [PP 5E4540/P633]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

**FOR FURTHER INFORMATION CONTACT:** By mail: Amelia M. Acierro, Registration Support Branch, Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: 2800 Crystal Drive, North Tower, Arlington, VA 22202, (703)-308-8375; e-mail: acierro.amelia@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** Petrolite Corp., Polymers Division, 6910 East 14th St., Tulsa, OK 74112, submitted pesticide petition (PP) 5E4540 to EPA requesting that the Administrator, pursuant to section 408(e) of the Federal

Food, Drug, and Cosmetic Act, 21 U.S.C. 346a(e), propose to amend 40 CFR 180.1001(d) by establishing an exemption from the requirement of a tolerance for α-alkyl (C<sub>21</sub>-C<sub>71</sub>)-ω-hydroxypoly(oxyethylene) when used at levels not to exceed 10% as a wetting agent or granule coating in pesticide formulations applied to growing crops only.

Inert ingredients are all ingredients that are not active ingredients as defined in 40 CFR 153.125, and include, but are not limited to, the following types of ingredients (except when they have a pesticidal efficacy of their own): solvents such as alcohols and hydrocarbons; surfactants such as polyoxyethylene polymers and fatty acids; carriers such as clay and diatomaceous earth; thickeners such as carrageenan and modified cellulose; wetting, spreading, and dispersing agents; propellants in aerosol dispensers; microencapsulating agents; and emulsifiers. The term "inert" is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

The data submitted in the petition and other relevant material have been evaluated. As part of the EPA policy statement on inert ingredients published in the Federal Register of April 22, 1987 (52 FR 13305), the Agency set forth a list of studies which would generally be used to evaluate the risks posed by the presence of an inert ingredient in a pesticide formulation. However, where it can be determined without these data that the inert ingredient will present minimal or no risk, the Agency generally does not require some or all of the listed studies to rule on the proposed tolerance or exemption from the requirement of a tolerance for an inert ingredient. The Agency has decided that no data, in addition to that described below, for α-alkyl (C<sub>21</sub>-C<sub>71</sub>)-ω-hydroxypoly(oxyethylene) will need to be submitted. The rationale for this decision is described below:

1. The rat acute oral toxicity studies with acute oral LD<sub>50</sub> values varying from 410 mg/kg to 25,000 mg/kg.
2. The acute dermal toxicity studies with acute dermal LD<sub>50</sub> values from 930 mg/kg to 11,800 mg/kg in rabbits and > 2,000 mg/kg in rats.
3. Mutagenicity studies including *Salmonella typhimurium* plate (Ames) tests with and without activation, structural chromosomal aberration test and other genotoxic effects tests were negative.
4. The 90-day feeding toxicity study in rats with a NOEL 15 mg/kg/day.

5. The 90-day dermal toxicity study with a NOEL of 20 mg/kg/day in rabbits and greater than 125 mg/kg/day in rats.

6. The developmental toxicity study in rabbits with a systemic maternal NOEL of 50 mg/kg/day and a developmental NOEL of > 200 mg/kg/day indicating no evidence of developmental effects.

7. The rat reproductive toxicity study with the systemic and developmental NOEL of 50 mg/kg/day and reproductive NOEL of > 250 mg/kg/day indicating no evidence of reproductive effects.

8. The rat chronic and carcinogenicity study with systemic NOEL of 50 mg/kg/day showing no evidence of carcinogenicity effects.

Based upon the above evaluation of the toxicological data which shows no evidence of carcinogenicity, mutagenicity (Ames Test), acute and subchronic dermal, developmental or reproductive toxicity of  $\alpha$ -alkyl ( $C_{21}$ - $C_{71}$ )- $\omega$ -hydroxypoly (oxyethylene) and the expected dietary exposure, the Agency concludes that this chemical poses no significant risks under the proposed conditions of use and that no further data are required. In addition, these chemicals are similar to other ethoxylated alcohols [ $C_{12-15}$ -polyethoxylated alcohols (CAS # 68131-40-8),  $C_{12-20}$ -ethoxylated alcohols (CAS # 68526-94-3) and  $C_{12-18}$ -ethoxylated-propoxylated alcohol (CAS # 69227-21-0)], which have already been exempted from the requirement of a tolerance under 40 CFR 180.1001(c) or (d) based on data indicating no adverse toxicological effects. Furthermore, these chemicals are among those that the Agency has sufficient information to conclude that their current use patterns in pesticide products will not adversely affect public health and the environment and which have subsequently been reclassified from List 3 (inert ingredients of unknown toxicity) to List 4b (inert ingredients of minimal concern) (60 FR 35396, July 7, 1995). The  $\alpha$ -alkyl ( $C_{21}$ - $C_{71}$ )- $\omega$ -hydroxypoly(oxyethylene) merely have a longer carbon chain, and the expected breakdown products are similar to the shorter extant ethoxylated alcohols. There is no reason to believe that there would be any toxicological concern for the longer carbon chain-length alcohols since these would most likely result in decreased absorption and toxicity. Furthermore, similar surfactants, i.e., ethoxylated fatty acids and their salts and esters, ethoxylated polyglycols,

ethoxylated amines, and others, are presently exempted from tolerances under 40 CFR 180.1001.

Based upon the information above, the toxicological data and physico-chemical properties of  $\alpha$ -alkyl ( $C_{21}$ - $C_{71}$ )- $\alpha$ -hydroxypoly(oxyethylene), and review of its use, the Agency has found that, when used in accordance with good agricultural practice, this ingredient is useful and a tolerance is not necessary to protect the public health. Therefore, EPA proposes that the exemption from the requirement of a tolerance be established as set forth below.

Any person who has registered or submitted an application for registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended, which contains any of the ingredients listed herein, may request within 30 days after publication of this document in the Federal Register that this rulemaking proposal be referred to an Advisory Committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. Comments must bear a notation indicating the document control number, [PP 5E4540/P633]. All written comments filed in response to this petition will be available in the Public Response and Program Resources Branch, at the address given above from 8 a.m. to 4:30 p.m. Monday through Friday, except legal holidays.

A record has been established for this rulemaking under docket number [PP 5E4540/P633] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:  
opp-Docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12866.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-354, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the Federal Register of May 4, 1981 (46 FR 24950).

#### List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 19, 1995.

Peter Caulkins,  
*Acting Director, Registration Division, Office of Pesticide Programs.*

Therefore, it is proposed that 40 CFR part 180 be amended as follows:

#### **PART 180—[AMENDED]**

1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 346a and 371.

2. Section 180.1001(d) is amended in the table therein by adding and alphabetically inserting the inert ingredient, to read as follows:

#### **§ 180.1001 Exemptions from the requirement of a tolerance.**

\* \* \* \* \*  
(d) \* \* \*

BILLING CODE 6560-50-F

**GENERAL SERVICES ADMINISTRATION**

**41 CFR Part 201-2, 201-3, 201-9, 201-18, 201-20, 201-21, 201-22, 201-23, 201-24, and 201-39**

RIN 3090-AF84

**Amendment of Miscellaneous FIRMR Provisions**

**AGENCY:** Information Technology Service, GSA.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This document proposes to amend various Federal Information Resources Management Regulation (FIRMR) provisions with regard to updating the references to GSA offices and symbols to reflect reorganizations within GSA.

**DATES:** Comments will be considered in the final rule, but must be received on or before November 28, 1995.

**ADDRESSES:** Comments may be mailed to GSA/KAR, 18th & F Streets, NW, Room 3224, Washington, DC 20405, Attn: Doris Farmer or delivered to that address between 8 a.m. and 4:30 p.m.

**FOR FURTHER INFORMATION CONTACT:** Doris Farmer, telephone FTS/Commercial (202) 501-0960 (v), Internet (doris.farmer@gsa.gov) or (202) 501-0657 (tdd).

**SUPPLEMENTARY INFORMATION:** (1) Various sections of the FIRMR are being amended to update GSA offices and symbols. These changes result from several reorganizations within GSA.

(2) GSA has determined that this rule is not a significant regulatory action for the purposes of Executive Order 12866 of October 4, 1993, because it is not likely to result in any of the impacts noted in Executive order 12866, affect the rights of specified individuals, or raise issues arising from the policies of the Administration. GSA has based all administrative decisions underlying this

rule on adequate information concerning the need for and consequences of this rule; has determined that the potential benefits to society from this rule outweigh the potential costs and has maximized the net benefits and has chosen the alternative approach involving the least net cost to society.

(3) The recordkeeping provisions of the Paperwork Reduction Act do not apply because the FIRMR changes do not impose information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of OMB under 44 U.S.C. 3501 et seq.

List of Subjects in 41 CFR Part 201-2, 201-3, 201-9, 201-18, 201-20, 201-21, 201-22, 201-23, 201-24, and 201-39

Archives and records, Computer technology, Federal information processing resources activities, Government procurement, Property management, Records management, and Telecommunications. For the reasons set forth in the preamble, GSA is amending 41 CFR part 201-2, 201-3, 201-9, 201-18, 201-20, 201-21, 201-22, 201-23, 201-24, and 201-39 as follows:

**PART 201-2—DESIGNATED SENIOR OFFICIAL**

1. The authority citation for part 201-2 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-2.003 [Amended]**

2. In § 201-2.003 paragraph (a), remove the words "GSA, Assistant Commissioner for Federal Information Resources Management (KD)" and add in their place the words "GSA/KA".

**PART 201-3—THE FIRMR SYSTEM**

3. The authority citation for part 201-3 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-3.203 [Amended]**

4. In § 201-3.203, paragraph (a) remove the words "Information Resources Management Service" and

add in their place the words "Information Technology Service."

**§ 201.3.401 [Amended]**

5. In § 201-3.401, remove the words "Information Resources Management Service" and add in their place the words "Information Technology Service."

**§ 201-3.402 [Amended]**

6. In § 201-3.402, remove the words "General Services Administration, Regulations Analysis Division, (KAR)" and add in their place the words "GSA/KAR".

**PART 201-9—CREATION, MAINTENANCE, AND USE OF RECORDS**

7. The authority citation for part 201-9 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-9.202-1 [Amended]**

8. In § 201-9.202-1 paragraph (b)(7), remove the words "General Services Administration, Regulations Analysis Division, (KAR)" and add in their place the words "GSA/KAR".

**§ 201-9.202-2 [Amended]**

9. In § 201-9.202-2 paragraph (b)(1)(ix) remove the words "General Services Administration, Acquisition Reviews Division (KAA)" and add in their place the words "GSA/KAA."

**PART 201-18—PLANNING AND BUDGETING**

10. The authority citation for part 201-18 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-18.003 [Amended]**

11. In § 201-18.003, remove the words "General Services Administration, Acquisition Review Division (KAA)" and add in their place the words "GSA/KAA".

**PART 201-20—ACQUISITION**

12. The authority citation for part 201-20 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-20.103-11 [Amended]**

13. In § 201-20.103-11 paragraph (c), remove the words "GSA Acquisition Reviews Division (KMA)" and add in their place the words "GSA/KAA".

**§ 201-20.303 [Amended]**

14. In § 201-20-303 paragraph (d)(2), remove the words "General Services Administration, and Regulations Analysis Division, (KAR)" and add in their place the words "GSA/KAR".

**§ 201-20.305 [Amended]**

15. In § 201-20-305 paragraph (a)(7), remove the words "General Services Administration, Acquisition Reviews Division (KAA)" and add in their place the words "GSA/KAA".

**§ 201-20-305-1 [Amended]**

16. In § 201-20.305-1, paragraph (a)(3)(v), remove the words "Information Resources Management Service (IRMS)" and add in their place the words "Information Technology Service (ITS)".

**§ 201-20-305-2 [Amended]**

17. In § 201-20-305-2, remove the words "Information Resources Management Service" and add in their place "Information Technology Service".

**PART 201-21—OPERATIONS**

18. The authority citation for part 201-21 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-21.403 [Amended]**

19. In § 201-21.403 paragraph (a)(2)(ii), remove the words "General Services Administration, Acquisition Reviews Division (KAA)" and add in their place the words "GSA/KAA".

**§ 201-21.603 [Amended]**

20. In § 201-21.603 paragraph (d)(1) and (d)(3) respectively, remove the words "General Services Administration, Regulations Analysis Division, (KAR)" and add in their place the words "GSA/KAR".

**§ 201-21.604 [Amended]**

21. In § 201-21.604 paragraph (a), remove the words "General Services Administration, Acquisition Reviews Division (KAA)" and add in their place the words "GSA/KAA".

**PART 201-22—REVIEW AND EVALUATION**

22. The authority citation for part 201-22 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-22.203 [Amended]**

23. In § 201-22.203 paragraph (a)(2), remove the words "General Services Administration, Office of Federal IRM (KA)" and add in their place the words "GSA/KA."

**PART 201-23—DISPOSITION**

24. The authority citation for Part 201-23 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-23.003 [Amended]**

25. In § 201-23.003, paragraph (a) remove the words "General Services Administration, Acquisition Reviews Division (KAA)" and add in their place the words "GSA/KAA".

**§ 202-23.003 [Amended]**

26. In § 202-23.003, paragraph (c) remove the words "General Services Administration, Acquisition Reviews Division (KAA)" and add in their place the words "GSA/KAA".

**§ 202-23.003 [Amended]**

27. In § 202-23.003, paragraph (d) remove the words "GSA/IRMS" and add in their place the words "GSA/ITS".

**PART 201-24—GSA SERVICES AND ASSISTANCE**

28. The authority citation for part 201-24 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-24.102 [Amended]**

29. In § 201-24.102 paragraph (c)(2), remove the words "General Services Administration, Acquisition Reviews Division (KMA)" and add in their place the words "GSA/KT, 1730 M Street, NW., Suite 200, Washington, DC 20036".

**PART 201-39—ACQUISITION OF FEDERAL INFORMATION PROCESSING (FIP) RESOURCES BY CONTRACTING**

30. The authority citation for part 201-39 continues to read as follows:

Authority: 40 U.S.C. 486(c) and 751(f).

**§ 201-39.001 [Amended]**

31. In § 201-39.001 paragraph (b), remove the words "GSA, Regulations Analysis Division, (KAR)" and add in their place the words "GSA/KAR". Also remove the words "GSA, Agency Liaison Division (KAL)" and add in their place the words "GSA/KAL".

**§ 201-39.104-1 [Amended]**

32. In § 201-39.104-1 paragraph (a)(1) remove the words "Information Resources Management Service" and add in their place the words

"Information Technology Service". Also in paragraph (b)(3) remove the words "General Services Administration, Regulations Analysis Division, (KAR)" and add in their place the words "GSA/KAR".

**§ 201-39.803-1-[Amended]**

33. In § 201-39.803-1, paragraph (a) remove the words "Information Resources Management Service" and add in their place the words "Information Technology Service".

**§ 201-39.802-1 [Amended]**

34. In § 201-39.802-1(c), remove the word "(KVT)", and add in its place the word "(KTT)".

**§ 20-39.5202-3 [Amended]**

35. In § 201-39.5202-3, remove the words "(e.g., KMA-88-9999)" and add in their place the words "(e.g., KAA-88-9999)".

Dated: August 28, 1995.

Francis A. McDonough,

*Deputy Commissioner for Information Technology Policy and Leadership.*

BILLING CODE 6820-25-M

**FEDERAL COMMUNICATIONS COMMISSION****47 CFR PART 73**

[MM Docket No. 95-92; DA 95-1970]

**Programming Practices of Broadcast Television Networks and Affiliates**

**AGENCY:** Federal Communications Commission.

**ACTION:** Proposed rule; extension of comment period.

**SUMMARY:** The Commission granted an additional 30-day extension of time to file comments and reply comments in the above proceeding in response to a request filed by CBS, Inc., National Broadcasting Company, Inc., and Capital Cities/ABC, Inc. The Commission had previously granted a 30-day extension of the original comment period. The rulemaking proceeding seeks comment on five Commission rules governing programming practices between networks and their affiliates. This extension will permit parties to conduct more extensive analyses of the issues raised in this proceeding.

**DATES:** Comments are now due on October 28, 1995; reply comments are due November 26, 1995.

**ADDRESSES:** Federal Communications Commission, Washington, D.C. 20554.

**FOR FURTHER INFORMATION CONTACT:**  
Robert Kieschnick ((202) 739-0764).

**SUPPLEMENTARY INFORMATION:**

Order Granting Extension of Time

Adopted: September 13, 1995.  
Released: September 14, 1995.

By the Chief, Mass Media Bureau:

1. On June 15, 1995, the Commission initiated a rulemaking proceeding reexamining the Commission's rules governing programming practices of networks and their affiliates—specifically the right to reject rule, the time option rule, the exclusive affiliation rule, the dual network rule and the network territorial exclusivity rule. *Notice of Proposed Rule Making* in MM Docket No. 95-92, FCC 95-254 (released June 15, 1995), 60 FR 35369 (July 7, 1995). Comments were due August 28, 1995, and reply comments were due September 27, 1995.

2. On August 3, 1995, the Mass Media Bureau granted a 30-day extension of the comment period; as a result, comments were due September 28, 1995, and reply comments were due October 27, 1995. *Order Granting Extension of Time* in MM Docket No. 95-92, DA 95-1711 (released Aug. 3, 1995), 60 FR 40814 (Aug. 10, 1995). The Bureau did so in response to a request by the Network Affiliated Stations Alliance (NASA) for a 60-day extension. While the Bureau did not agree that a 60-day extension was appropriate, it stated its belief that a 30-day extension was warranted to enable parties to carefully compile a complete record regarding the complex issues raised in MM Docket No. 95-92.

3. On August 30, 1995, CBS, Inc., National Broadcasting Company, Inc., and Capital Cities/ABC, Inc., filed a motion to extend the comment date in this proceeding by an additional 30 days, to October 28, 1995. The networks note that ABC and CBS have recently entered into major merger agreements, and that CBS and NBC are involved in a number of station transactions. Further, they submit, all three networks are involved in proceedings involving the network/affiliate advertising rules, children's television and advanced television (ATV). The networks contend that these various undertakings have been occupying the time of their management and legal personnel and that a 30-day extension of time in this proceeding is necessary to provide them a full opportunity to present their views.

4. As set forth in Section 1.46 of the Commission's Rules, 47 CFR 1.46, it is our policy that extensions of time for filing comments in rulemaking proceedings shall not be routinely

granted. In response to NASA's request, we stated our belief that an extension until October 28 was excessive. Upon further reflection, however, and in light of recent events, we believe that it would be in the public interest to extend the comment and reply comment dates for this proceeding an additional 30 days. This proceeding has the potential to significantly affect the way the broadcast networks and their affiliates do business, and the fact that both the major networks and the affiliates feel they need additional time to prepare comments is persuasive.

5. Accordingly, *it is ordered* That the Motion for Extension of Time filed in MM Docket No. 95-92 by CBS, Inc., National Broadcasting Company, Inc., and Capital Cities/ABC, Inc., is granted.

5. *It is further ordered* That the time for filing comments in the above-captioned proceeding is extended to October 28, 1995, and the time for filing reply comments is extended to November 26, 1995.

6. This action is taken pursuant to authority found in Sections 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r), and Sections 0.204(b), 0.283, and 1.45 of the Commission's Rules, 47 CFR 0.204(b), 0.283, and 1.45.

Federal Communications Commission.

### Fish and Wildlife Service

#### 50 CFR Part 17

#### RIN 1018-AC91

### Endangered and Threatened Wildlife and Plants; Proposal To Determine the Least Chub (*Iotichthys phlegethontis*) an Endangered Species With Critical Habitat

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Proposed rule.

**SUMMARY:** The U.S. Fish and Wildlife Service (Service) proposes to determine the least chub (*Iotichthys phlegethontis*) to be an endangered species and to designate critical habitat pursuant to the Endangered Species Act of 1973, as amended. This small monotypic minnow is endemic to the Bonneville Basin in Utah where it was once common and widely distributed. Populations of least chub have declined,

and it now only exists within Snake Valley in western Utah. The continuing decline in range and abundance of the least chub has been attributed to competition and predation from nonnative species and habitat loss and alteration.

**DATES:** Comments from all interested parties must be received by November 28, 1995. Public hearing requests must be received by November 13, 1995.

**ADDRESSES:** Comments and materials concerning this proposal should be sent to the Field Supervisor, U.S. Fish and Wildlife Service, Lincoln Plaza, Suite 404, 145 East 1300 South, Salt Lake City, Utah 84115. Comments and materials received will be available for public inspection, by appointment, at the above address during normal business hours.

**FOR FURTHER INFORMATION CONTACT:** Robert D. Williams at the above address, telephone 801/524-5001.

**SUPPLEMENTARY INFORMATION:**

Background

The least chub, *Iotichthys phlegethontis*, is an endemic minnow (Family Cyprinidae) of the Bonneville Basin of Utah, which is located in the Great Basin of southwestern North America. E.D. Cope described the least chub (*Clinostomus phlegethontis*) from specimens collected in the Beaver River in 1872 by Dr. H.C. Yarrow and H.W. Henshaw (Cope 1874, cited in Cope and Yarrow 1875). However, the scientific name has been revised several times: from the genus *Clinostomus* to *Gila* (Cope and Yarrow 1875), to *Phoxinus* (Jordan and Gilbert 1883, cited in Jordan and Evermann 1896), to *Hemitremia* (Jordan 1891), to *Leuciscus* subgenus *Iotichthys* (Jordan and Evermann 1896), and finally to the monotypic genus *Iotichthys* (Jordan et al. 1930, cited in Hickman 1989; Robins 1991).

As suggested by its common and scientific names, the least chub is a small fish (<45 mm, 2.5 in.) that is identified by an upturned or oblique mouth (*clinostomus*), large scales, and absence of a lateral line (rarely with one or two pored scales). It was a deeply compressed body, the dorsal origin lies behind the insertion of the pelvic fin, and the caudle peduncle is slender. Dorsal fin rays number eight (rarely nine), and it has eight anal fin rays. The pharyngeal teeth (2.5-4.2) are in two rows (Jordan and Evermann 1896; Page and Burr 1991).

The colorful least chub has a gold stripe along its blue sides with white-to-yellow fins. Males are olive-green above, steel-blue on the sides, and have a golden stripe behind the upper end of

the gill opening. The fins are lemon-amber, and sometimes the paired fins are bright golden-amber. Females and young are pale olive above, silvery on the sides, and have watery-white fins; their eyes are silvery, with only a little gold coloration, rather than golden as in the males (Sigler and Miller 1963; Page and Burr 1991).

Sigler and Sigler (1987) considered the least chub to be a short-lived and slow-growing species: least chub mature within 1 year and rarely live beyond 3 years of age. Of 218 fish aged by various investigators, less than 1 percent of the fish reached 4 years of age, and only 2 fish reached a total length of 7.6 cm (3 in.). A least chub of average size would be about 3.3 cm (1.3 in.) and weigh 0.57 g (0.02 oz) (Sigler and Workman 1975; Workman et al. 1976; Crawford 1979).

Least chub begin spawning in the spring when water temperatures reach about 16 °C (60 °F; Sigler and Sigler 1987). The least chub is a partial and intermittent spawner. Crawford (1979) found that least chub females produced only a few eggs at any time but release eggs over an extended period. The number of eggs produced at any one time is variable and may range from about 300 to 2,700 (Sigler and Sigler 1987). Although the peak spawning activity occurs in May, the reproductive season lasts from April to August, and perhaps longer depending on environmental conditions. The least chub has evolved this reproductive strategy (i.e., repetitive spawning during one season and of spreading the spawn over many weeks) perhaps as an adaptation to unpredictable environmental changes that are present in desert habitats. The least chub presumably initiates spawning in response to increases in water temperature and photoperiod, which may act in concert with other environmental and physiological factors, including exposure to direct sunlight (Crawford 1979; Sigler and Sigler 1987).

The least chub releases its sex products over vegetation (Crawford 1979). The adhesive eggs then sink and usually attach to the underwater vegetation. Fertilized eggs hatch in about 2 days at water temperatures of 22 °C (72 °F; Crawford 1979). The presence of submerged vegetation provides an important habitat for eggs and young larvae by furnishing needed oxygen and food (Crist and Holden 1980).

Common foods of the least chub include algae (Chlorophyta and Chrysophyta) midges (Chironomidae), and microcrustaceans; but they also eat other items (Sigler and Sigler 1987). Of 185 least chub taken from 27 springs,

121 stomachs contained 14 food types including algae, crustaceans, and insects (Workman et al. 1979). It also is believed that mosquito larvae make up a significant portion of their diet (Sigler and Miller 1963; Sigler and Workman 1975). Workman et al. (1979) noted that least chub diet changed throughout the year, and vegetation was more important during winter months.

The least chub was once widely distributed within the Bonneville Basin of northwestern Utah. The fish occupied a variety of habitats including streams, springs, and ponds, and it was classified as "excessively common" in its preferred habitats (Jordan and Everman 1896). Yarrow and Henshaw found least chub in the Beaver River (Cope and Yarrow 1875). Jordan (1891, cited by Jordan and Evermann 1896) collected least chub from ponds near the mouth of the Provo River. Jordan and Evermann (1896) stated that least chub occurred in "tributaries of Great Salt Lake and Sevier Lake." Least chub also have been observed in Utah Lake, Beaver River, Parowan Creek, Clear Creek, and the Provo River (reviewed by Sigler and Miller 1963; Hickman 1989). More recently, C.D. Barbour, University of Utah, (*in litt.* 1970) collected least chub from the Gandy Salt Marsh Complex in the Snake Valley. In 1970, R.R. Miller, University of Michigan, (*in litt.* 1971), found large numbers of least chub in the Leland Harris Springs complex, also in Snake Valley.

A decline in distribution and abundance of the least chub was first noted in the 1940's and 1950's (Baugh 1980). Hubbs and Miller collected least chub on trips into Utah during the 1940's and 1950's, and also noted a decrease in abundance (Holden et al. 1974). The fish is now restricted to the Snake Valley of the Bonneville Basin.

Least chub occur on a mixture of Federal, State, and private lands at five locations in the Snake Valley. Small numbers of least chub exist in two isolated springs: Central Spring (Bishop Spring Complex, Millard County) and Miller Spring (Juab County), but the fish is most abundant in Leland Harris Spring Complex (Juab County) and Gandy Salt Marsh Complex (Millard County). Recent surveys by the Utah Division of Wildlife Resources (UDWR), Salt Lake City, (*in litt.* 1993) indicated that some least chub in Snake Creek, south of Grandy Salt Marsh. However, no studies have been conducted to determine the distribution, abundance, or status of this Snake Creek population (L. Lentsch, UDWR, pers. comm. 1993).

Historically, the least chub inhabited a variety of habitat types in different environments (Lamarra 1981; Sigler and

Sigler 1987). Least chub now occupy springs, marshes and pools, and stream habitats. Osmundson (1988) reported collections of least chub from 38 sites, and these fish were captured in pools from 0.3 to 260 m<sup>3</sup> (3 to 2,800 ft<sup>2</sup>) in size and with water depths of 0.1 to 3.6 m (0.4 to 12ft). In some of these habitats, certain environmental parameters fluctuate. The springs exhibit cool stable temperature, relatively low conductivity, and little variation in dissolved oxygen content. The marsh and pool environments exhibit extreme diurnal fluctuations in dissolved oxygen, and water temperatures that may vary between 15 and 32 °C (59–90 °F) (Crist and Holden 1980; Lamarra 1981). Seasonal water quality changes in the marshes and stream segments result in fish movement back and forth between different habitat types, especially between the springs and marshes (Crist and Holden 1980).

Vegetation is an important habitat component for the least chub (Crist and Holden 1980), and Sigler and Workman (1975) reported that least chub habitat included aquatic plants that were "plentiful and provided excellent cover." Water parsnip (*Berula erecta*), wire rush (*Juncus balticus*), and algae are common in and around the springs and marshes that are inhabited by the fish (Sigler and Workman, 1975). However, many other plants occur in areas occupied by the fish including *Chara* sp., duckweed (*Laemna* sp.), watercress (*Nasturtium* sp.), bulrushes (*Scirpus* sp.), cattails (*Typha* sp.), and sedges (*Cyperus* sp.) (Sigler and Sigler 1987).

Least chub has not been collected outside of Snake Valley since 1965 (Hickman 1989). They continue to decline in Snake Valley, and studies conducted in the past 15 years indicate a steady decline in their distribution and abundance. Workman et al. (1979) collected least chub from 36 sites in 5 major spring complexes in Snake Valley, but Osmundson (1985) found it in only 2 of 5 complexes where it previously existed. Crist (1990) reported that least chub were extirpated from springs on the Bagley Ranch and the Redden Springs Complex. Least chub numbers are now declining within the Gandy Salt Marsh and Leland Harris Spring Complex. Recent collections by UDWR personnel indicate that least chub occurs in only 3 of 5 springs sampled in the Leland-Harris Complex and 6 of 12 springs in the Grandy Salt Marsh. A continuing decline of the least chub has prompted the American Fisheries Society to recognize it as a threatened species (Deacon et al. 1979).

As with other endemic southwestern fishes (Courtenay and Stauffer 1984; Meffe 1985; Schoenherr 1991), predation by introduced nonnative fishes have caused the decline of the least chub. Largemouth bass, rainbow trout, common carp, and brook trout have been regularly stocked by government agencies and private citizens into least chub habitat (Workman et al. 1979; Sigler and Sigler 1987; Osmundson 1985). Hickman (1989) considered least chub to be "constantly threatened" by the introduction of these gamefish species. However, other nonnative species also prey upon or compete with the least chub, including the mosquitofish (*Gambusia affinis*) and rainwater killifish (*Lucania parva*). Introduction of fishes into least chub habitat probably contributed to the extirpation of least chub outside of Snake Valley, since few least chub are present in spring complexes in Snake Valley where nonnative fishes have been introduced (Osmundson 1985; Shirley, *in litt.* 1989).

Direct, physical habitat loss and habitat degradation also are factors in the decline of the least chub (Holden et al. 1974; Hickman 1989; Crist 1990). In spring complexes that contain least chub, habitat degradation caused by livestock trampling could be a threat although no studies of the impact of livestock on the springs of Snake Valley have been conducted to date.

Recent oil and gas exploration and production activity in the West Desert area may result in increased degradation and/or impacts to least chub habitat. Exploration results in increased road access to sensitive areas while surface activities associated with drilling, including drilling site preparation under water hauling, may impact water quality. Drilling activities also may release drilling fluids into the aquifer or may fracture underground geologic features that are associated with springs.

Water withdrawals also are a potential threat to the least chub. Not only can reduced water supply diminish the amount of least chub habitat, and thus the capacity of an area to support least chub, but lowered levels may cause niche overlaps with other species. These overlaps may increase hybrid introgression and interspecific competition (Crawford 1979; Lamarra 1981). Maintenance of certain water levels is very important to least chub because these levels must be high enough to allow the fish to migrate between springs and surrounding marsh areas as environmental conditions change. Additionally, maintenance of water levels and discharge volumes is

critical in preserving natural sediment transport processes, thereby maintaining underwater habitat configurations and reducing aquatic vegetation encroachment into sensitive spring areas.

Present water withdrawals from surface and underground sources are estimated at 10 percent of the total yearly recharge rate (Van Pelt 1992). These rates do not appear to be threatening to least chub habitat. However, additional proposed wells in the southern part of Snake Valley and surrounding areas could lower the water table, resulting in drying up or lowering the water level in springs and marshes populated by least chub. These springs are dependant on underground water sources that flow from the Deep Creek Mountains to the Snake Valley (M. Barber, Bureau of Land Management (BLM), *in litt.* 1991; Brothers et al. 1993). It is important to note that all surface streams from the Deep Creek Mountains are currently diverted for agricultural use.

Several efforts to reintroduce least chub into historic habitat have been attempted. In 1979, least chub were introduced into a pond near Salt Lake City, Utah. The following year, young least chub were collected, verifying successful reproduction. However, introduction of nonnative fishes, combined with flooding of the pond by the Great Salt Lake, eliminated this successfully reintroduced population. Two other attempts to reintroduce least chub were not successful; the reasons for these failures are not well understood, but competition and/or predation with nonnative fishes offer a partial explanation (Crist 1990). Additional investigations are necessary prior to future reintroduction attempts, including reasons for past successes and failures, and the need to experiment with several reintroduction techniques. Both the UDWR and BLM are working on developing management plans that will address these reintroduction issues (L. Lentsch, UDWR, pers. comm., 1994; R. Fike, BLM, pers. comm., 1994).

#### Previous Federal Action

The Fish and Wildlife Service (Service) has conducted three status reviews for the least chub and have prepared two status reports. In 1980, the Service reviewed existing information on the least chub and determined that there was insufficient data to warrant its listing as endangered or threatened. On December 30, 1982, the Service classified the fish as a category 2 candidate species (47 FR 58454). After preparation of a 1989 status report, the Service reclassified the least chub as a

category 1 candidate species (54 FR 554; January 6, 1989). The Service continues to evaluate information and data concerning population declines and increasing threats, and has determined that listing the least chub as endangered or threatened is warranted.

#### Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (Act) of 1973, as amended (16 U.S.C. 1531 *et seq.*), and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in section 4(a)(1). These factors and their application to the least chub (*Iotichthys phlegethontis*) are as follows:

A. *The threatened destruction, modification, or curtailment of its habitat or range.* The least chub was once widely distributed within the Bonneville Basin of northwestern Utah and occupied many streams, springs, and ponds. Yarrow and Henshaw found least chub in the Beaver River (Cope and Yarrow 1875). Jordan (1891, cited by Jordan and Evermann 1896) collected least chub from ponds near the mouth of the Provo River. Jordan and Evermann (1896) stated that least chub occurred in "tributaries of Great Salt Lake and Sevier Lake." More recently, least chub were observed in Utah Lake, Beaver River, Parowan Creek, Clear Creek, and the Provo River (reviewed by Sigler and Miller 1963; Hickman 1989). However, least chub have not been collected outside of Snake Valley since 1965 (Hickman 1989).

Least chub populations in Snake Valley are not stable and studies conducted in the past 15 years indicate a steady decline in their distribution and numbers. Workman et al. (1979) collected least chub from 36 sites spread throughout 5 major spring complexes in Snake Valley. A few years later, Osmundson (1985) found least chub in only two of the five complexes. Further surveys have confirmed that least chub has been extirpated from springs on the Bagley Ranch and the Redden Springs Complex (Crist 1990). Recent data suggest that least chub numbers are now declining within the Gandy Salt Marsh and Leland Harris Spring Complex. Personnel from UDWR found least chub only in 3 of 5 springs sampled in the Leland-Harris Complex and 6 of 12 springs in the Gandy Salt Marsh. Some least chub have recently been discovered in Snake Creek, south of Gandy Salt Marsh. However, no studies

have been conducted to determine the distribution, abundance, or status of this Snake Creek population (L. Lentsch, pers. comm., 1993). Service biologists believe that the numbers of least chub at Snake Creek are insufficient to reverse this downward trend in its numbers.

Habitat loss and degradation have been indicated as major causes of the least chub's decline (Holden et al. 1974; Hickman 1989; Crist 1990). Although no studies have been made of the springs in Snake Valley, numerous other reports link livestock trampling and grazing with fish habitat degradation in streams and springs (Duff 1977; May and Somes 1981; Taylor et al. 1989; Bowen and Beauchamp 1992). The springs in the Snake Valley that are occupied by least chub are not protected from livestock. The BLM has one fenced enclosure in the Gandy Salt Marsh Complex and is considering a second enclosure to protect other springs (R. Fike, BLM, pers. comm., 1993).

Crist and Holden (1990) and Lamarra (1981) indicated that water levels are important to least chub life history. The Las Vegas Valley Water District has requested a permit to drill a series of wells in the southern part of Snake Valley and surrounding areas (M. Barber, *in litt.* 1991). This could lower the water table significantly in Snake Valley, possibly drying up or lowering the water level in springs and marshes populated by least chub. These springs are totally dependent on underground water sources which flow from the Deep Creek Mountains to the west of Snake Valley. Other forms of water use within Snake Valley pose a minimal threat to least chub habitat at this time, and water withdrawals from surface and underground sources are estimated at 10 percent of the total yearly recharge rate (Van Pelt 1992).

**B. Overutilization for commercial, recreational, scientific, or educational purposes.** Some specimens have been collected for scientific and educational purposes (Sigler and Workman 1975; Workman et al. 1979; Crawford 1979; Osmundson 1985). However, no commercial or recreational uses for the least chub are known to exist. Overutilization for commercial or scientific purposes does not pose a threat to least chub.

**C. Disease or predation.** Disease or incidence of parasitism presently are not major factors affecting the least chub. Workman et al. (1979) found a single parasite called blackspot (the metacercariae of the digenetic trematode) infesting the least chub. Black spot (*Neascus cuticola*) produces small, black-pigmented nodules on the

skin, trunk musculature, and fins of fishes and is frequently encountered in the least chub, Utah chub (*Gila atraria*), and speckled dace (*Rhinichthys osculus*). Workman et al. (1979) reported black spot infection rates for the least chub as 1–23 nodules per fish, and that the infection rate varied from area to area and with season (highest in late summer and lowest in winter). Despite this moderate infestation rate, all least chubs examined appeared robust and in good condition. This parasite is apparently restricted to certain spring and pond areas.

Predation by nonnative fishes has been a major factor in the decline and extirpation of desert fishes in southwestern North America (Schoenherr 1981; Meffe 1985; Minckley et al. 1991). Hickman (1989) considered least chub to be "constantly threatened" by the introduction of nonnative species. Surveys of spring complexes indicate that where nonnative fishes were introduced, few if any least chub remain (Osmundson 1985; Shirley, *in litt.* 1989). Introduced game fishes which include largemouth bass, rainbow trout, common carp, and brook trout, are predators on least chub, and these species have been regularly stocked in least chub habitat (Workman et al. 1979; Sigler and Sigler 1987; Osmundson 1985; Crist 1990), no doubt contributing to the endangerment of least chub. In addition to game fish, other nonnative fishes also have been released into least chub habitat. Two fishes, the mosquitofish (*Gambusia affinis*) and rainwater killifish (*Luciana parva*), have similar diets to the least chub and are considered potential competitors. The mosquitofish poses a direct threat to the least chub because of its known aggressive predation on eggs and young of other fishes. Mosquitofish have been implicated in the decline of other desert fishes (Schoenherr 1981; Meffe 1985).

Osmundson (1985) and Sigler and Sigler (1987) also indicated that frogs, ducks, gulls, herons and egrets also are potential predators on least chub. Under normal circumstances, predation from these sources probably would not injure healthy populations of least chub. However, the effect of predation from the above combined sources could cause further depletion of already fragile populations.

**D. The inadequacy of existing regulatory mechanisms.** Although the State of Utah lists the least chub as a protected species, the Service believes that the present level of protection afforded by the State is not sufficient. The State does not allow taking of the species without permits, but it does not

protect or control actions which cause harm to the species or its habitat. The continued introduction of nonnative predators into least chub habitat and adjacent areas is difficult to control, and the State's protection does not address this issue.

The BLM has designated the Gandy Salt Marsh as an "Area of Critical Environmental Concern (ACEC)." This ACEC is inadequate in protecting the least chub because it does not prevent taking of the species. The establishment of an ACEC requires a management system which integrates the protection of riparian areas without infringement on "traditional permitted uses" (Van Pelt 1990). Accordingly, the Gandy Salt marsh ACEC does not prevent livestock grazing in and around least chub habitat and it does not extend over the fish's entire habitat. Finally, the ACEC is a BLM oil and gas leasing category 4, which normally closes the area to leasing. However, a clause was written into the BLM's Resource Management Plan which allows the District Manager to exempt the category 4 protections and to lease ACEC lands.

**E. Other natural or manmade factors affecting its continued existence.** Declines in native desert fishes in the Southwest has been associated with the introduction and proliferation of nonnative fishes. These nonnative fishes have, in some documented instances, extirpated small desert fishes by direct competition and predation (Schoenherr 1981; Meffe 1985; Minckley et al. 1991). The existence of small desert cyprinids, including the least chub, is presumably the result of a lack of other small competitors (Smith 1981; Minckley et al. 1991).

Least chub coexist with other native fishes, which include the Utah chub and speckled dace. However, the tiny and reclusive least chub competes poorly with nonnative species such as mosquitofish and rainwater killifish. The mosquitofish, rainbow trout, and largemouth bass are considered to be direct predators (Sigler and Workman 1975; Crawford 1979; Sigler and Sigler 1987). Least chub do not build nests or protect their eggs. Instead, they lay their eggs upon vegetation where they and the newly hatched larvae are vulnerable to predation (Crawford 1979).

Hybrid introgression between least chub and the Utah chub and speckled dace have been reported (Sigler and Sigler 1987). Reproductive isolating mechanisms have apparently broken down in some areas due to habitat alteration and degradation. This has resulted in overlaps of reproductive niches and breakdowns in behavior due to overcrowding (Crawford 1978;

Lamarra 1981). Least chub hybrids have been reported from springs near Callao, Utah, where least chubs once existed. But no hybrids have been reported from Leland Harris Springs Complex where least chub habitat has not been greatly altered by humans (Lamarra 1981).

Another potential threat to the least chub is a proposed mosquito abatement program for Juab County. The BLM has rejected the County's request to implement a mosquito control spraying program in marsh and spring areas on BLM administered lands (R. Fike, *in litt.* 1992). The rejection does not prevent the county from spraying on privately-owned lands. The effect of a mosquito control spraying program on the least chub is uncertain. Past studies (Workman et al. 1979) indicate that much of the least chub's diet is composed of insects, which includes mosquito larvae. To date, no studies have been undertaken to determine the effects of toxins on the chub or its environment.

Due to the extremely limited distribution of this species, least chub are very susceptible to stochastic events. There are only five known populations of least chub, and each population is small. A single catastrophic event could destroy a significant portion of remaining least chubs, or one or more of their populations. These remaining populations are vital in maintaining the genetic diversity of the species.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining whether to propose this listing action. Based on this evaluation, the preferred action is to list the least chub as endangered since this fish is restricted to only five known populations. Habitat loss and degradation continue to reduce its numbers in these remaining populations. Without additional protection of its habitat, continued degradation by livestock will result in a further reduction in its numbers. Competition and predation by other nonnative fishes pose severe threats to the remaining populations. The least chub is highly susceptible to additional habitat degradation and to habitat and population losses. For the reasons discussed below, the Service also is proposing to designate critical habitat for the least chub.

#### Critical Habitat

Critical habitat is defined in section 3 of the Act as: "(i) the specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are

found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection; and (ii) specific areas outside the geographical area occupied by a species at the time it is listed \* \* \*, upon a determination by the Secretary that such areas are essential for the conservation of the species." "Conservation" means the use of all methods and procedures needed to bring the species to the point at which listing under the Act is no longer necessary.

Section 4(a)(3) of the Act, as amended, and implementing regulations require that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the same time the species is determined to be endangered or threatened. Critical habitat is being proposed for the least chub to include the following areas in Utah.

Northern Snake Valley Group including: Redding Springs Complex (Tooele County) and Bagley Ranch Springs Complex (Tooele and Juab Counties).

Southern Snake Valley Group including: Miller Spring (Juab County); Leland Harris Springs Complex (Juab and Millard Counties); Gandy Salt Marsh Complex (Millard County); and Bishop Springs Complex (Millard County).

Tule Valley Group including: Coyote Spring Complex (Millard County); Willow Spring (Millard County); Tule Springs Complex (Millard County); and South Tule Springs (Millard County). Legal descriptions for these areas are provided in the "Proposed Regulation Promulgation section.

In determining the areas to designate as critical habitat for a species, the Service considers those physical and biological attributes that are essential to species conservation. In addition, the Act stipulates that the areas containing these elements may require special management consideration or protection. Such physical and biological features are stated in 50 CFR 424.12 and include, but are not limited to, the following items:

- (1) Space for individual growth and for normal behavior;
- (2) Food, water, air, light, minerals, or other nutritional or physiological requirements;
- (3) Cover or shelter;
- (4) Sites for breeding, reproduction, rearing of offspring, germination, or seed dispersal; and generally,
- (5) Habitats that are protected from disturbance or are representative of the

historical, geographical and ecological distributions of a species.

In designating critical habitat, the Service is concerned with constituent elements within the defined areas that are essential to the conservation and recovery of the species. The areas proposed as critical habitat for the least chub provide the necessary constituent elements determine essential to the survival and recovery of the least chub. They include the following:

- adequate water quantity to: (1) maintain underground aquifer function, spring flow pressure and volume, and spring water surface elevation, (2) allow the fish to complete its life cycle (spawning, rearing, feeding, etc.), and (3) allow for movement between integral parts of its habitat and to reduce the overlap with niches of other native fishes;
- sufficient vegetation in spring and surrounding marsh riparian areas to provide cover, food, spawning sites, prevent erosion, and to meet other life history requirements of the fish; and
- a biological environment in which there is little or no interaction with nonnative fishes.

The Service recognizes that those habitats proposed as critical are not sufficient to achieve recovery for the species because they do not represent the historic range or all of the widely diverse habitat types that the species historically evolved in and occupied. The UDWR and BLM are currently surveying least chub habitats throughout its historic range to determine if the requisites necessary for recovery are still available. The Service, in the process of developing a "Least Chub Recovery Plan," may utilize these new data to identify additional critical habitat areas needed to ensure the recovery of the species. The Service may, at a future date, repropose critical habitat for the least chub.

Section 4(b)(8) of the Act requires, for any proposed or final regulation that designates critical habitat, a brief description and evaluation of those activities that may adversely modify or destroy such habitat or those activities that may be affected by such designation. Activities, such as habitat alterations through livestock impacts, pollution, or dewatering, would be detrimental to the survival of this species. Additionally, activities that provide for increased access to remote spring sites or that alter ground water or deep aquifer spring sources and flow rates would also be considered detrimental. Predation and competition from nonnative species on least chubs

are considered major factors causing its demise. Future activities on Federal lands or activities requiring Federal permits in the Snake Valley area would have to be taken under consultation to prevent further adverse impacts on the least chub or its habitat.

Impacts generally will be restricted to activities on Federal lands or on lands where proposed actions require Federal permits. The greatest impact would be on livestock grazing and its restriction in and around least chub habitat. Grazing would be limited within the general area occupied by least chub to prevent any further habitat degradation within proposed critical habitat. Drilling for water within proposed critical habitat would also be restricted. Presently, water regeneration within the Gandy Salt Marsh is adequate to allow for surface water use by livestock without impacting water levels within the marsh. Livestock could graze in pastures surrounding the proposed critical habitat areas if their access to aquatic habitats are prevented. Oil and gas exploration and production activities would be restricted within critical habitat. Surface activities and directional drilling are already restricted on BLM-owned lands that are designated as "Category 4" lands (these lands are already closed to leasing).

Presently, the recharging of ground water is sufficient to offset current withdrawals. Any federally funded or permitted water withdrawals (i.e., the Las Vegas Valley Water District permits for well drilling) would require section 7 consultation if it is shown that ground water withdrawals would impact critical habitat areas.

Section 4(b)(2) of the Act requires the Service to consider economic impacts of designating a particular area as critical habitat. The Service will prepare an economic analysis of the impacts of designating critical habitat for the least chub. Upon completion of the analysis, the Service will notify the public of its availability and will request public review and comments.

#### Available Conservation Measures

Conservation measures provided to species listed as endangered under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against take. Recognition through listing encourages conservation actions by Federal and State agencies and private individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the

prohibitions against taking and harm are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(4) requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a species proposed for listing or that would result in destruction or adverse modification of proposed critical habitat. If the least chub is listed, section 7(a)(2) of the Act will require Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of this species or to destroy or adversely modify its critical habitat. If a Federal action could possibly affect the least chub or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Some portions of the least chub's proposed critical habitat are on private lands. The Federal Government has certain authority which may influence private undertakings in least chub critical habitat. Private activities that involve dredging and filling of wetlands would require a 404 permit (Federal Clean Water Act).

It is the policy of the Service to identify, to the extent known at the time a species is listed, specified activities that will not be considered likely to result in violation of section 9 of the Act. To the extent possible, activities that will be in violation also will be identified in as specific a manner as possible. The Service believes that the actions listed below might potentially result in a violation of section 9; however, possible violations are not limited to these actions alone:

- (1) Unauthorized collecting or handling of the species;
- (2) Destruction or alteration of the species habitat (i.e., water depletions that significantly modify spring functions; activities that change water quality or quantity; dredging or other physical modifications that impact the springs; introduction of nonnative species);
- (3) Improper use of herbicides, fertilizers, or pesticides;
- (4) Contamination of soil or ground water by spills, discharges or dumping of chemicals, silt, or other pollutants associated with agriculture and oil and gas activities;

Questions regarding whether a specific activity will constitute a violation of section 9 should be directed to the Field Supervisor of the Service's Salt Lake City Field office (see **ADDRESSES** section). Requests for copies of regulations concerning listed animals and general inquiries regarding prohibitions and permits may be addressed to the Fish and Wildlife Service, Ecological Services, P.O. Box 25486, Denver Federal Center, Denver, Colorado, (telephone 303/236-7398; facsimile 303/236/0027).

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, codified at 50 CFR 17.21, in part, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered wildlife species under certain circumstances. Regulations governing permits are found at 50 CFR 17.22 and 17.23. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, and/or for incidental take in connection with otherwise lawful activities. Requests for copies of the regulations on animals and inquiries regarding them may be addressed to the Regional Director, U.S. Fish and Wildlife Service, P.O. Box 25486, Denver Federal Center, Denver, Colorado 80225 (telephone 303/236-7398).

#### Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, any comments or suggestions concerning biological information and potential threats to the least chub are requested from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party. Comments are sought particularly concerning:

- (1) Biological, commercial trade, or other relevant data concerning any

threat (or the lack thereof) to the least chub;

(2) The location of any additional populations of least chub and the reasons why any habitat should or should not be determined to be critical habitat as provided by section 4 of the Act;

(3) Additional information concerning the range, distribution, and population size of this species;

(4) Current or planned activities which may adversely modify the area which is being considered for critical habitat; and

(5) Any foreseeable economic and other impacts resulting from the proposed designation of critical habitat.

(6) Final promulgation of this regulation on the least chub will take into consideration the comments and any additional information received by the Service, and such communications may lead to a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be received within 45 days of the date of publication

of the proposal. Such requests must be made in writing to the Field Supervisor (see ADDRESSES section).

National Environmental Policy Act

The Service has determined that Environmental Assessments and Environmental Impact Statements, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

Accordingly, it is hereby proposed to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

**PART 17—[AMENDED]**

1. The authority citation for Part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. It is proposed to amend § 17.11(h) is amended by adding the following, in alphabetical order under fishes, to the List of Endangered and Threatened Wildlife to read as follows:

**§ 17.11 Endangered and threatened wildlife.**

\* \* \* \* \*  
(h) \* \* \*

SPECIES		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name						
Fishes.							
* Chub, least .....	* <i>Iotichthys phlegethontis</i> .	* U.S.A. (UT) .....	* Entire .....	* E	* .....	* 17.95(e)	* NA
* .....	* .....	* .....	* .....	* .....	* .....	* .....	* .....

3. It is further proposed to amend § 17.95(e) by adding critical habitat for the least chub, in the same alphabetical order as the species occurs in 17.11(h) to read as follows:

**§ 17.95 Critical habitat—fish and wildlife.**

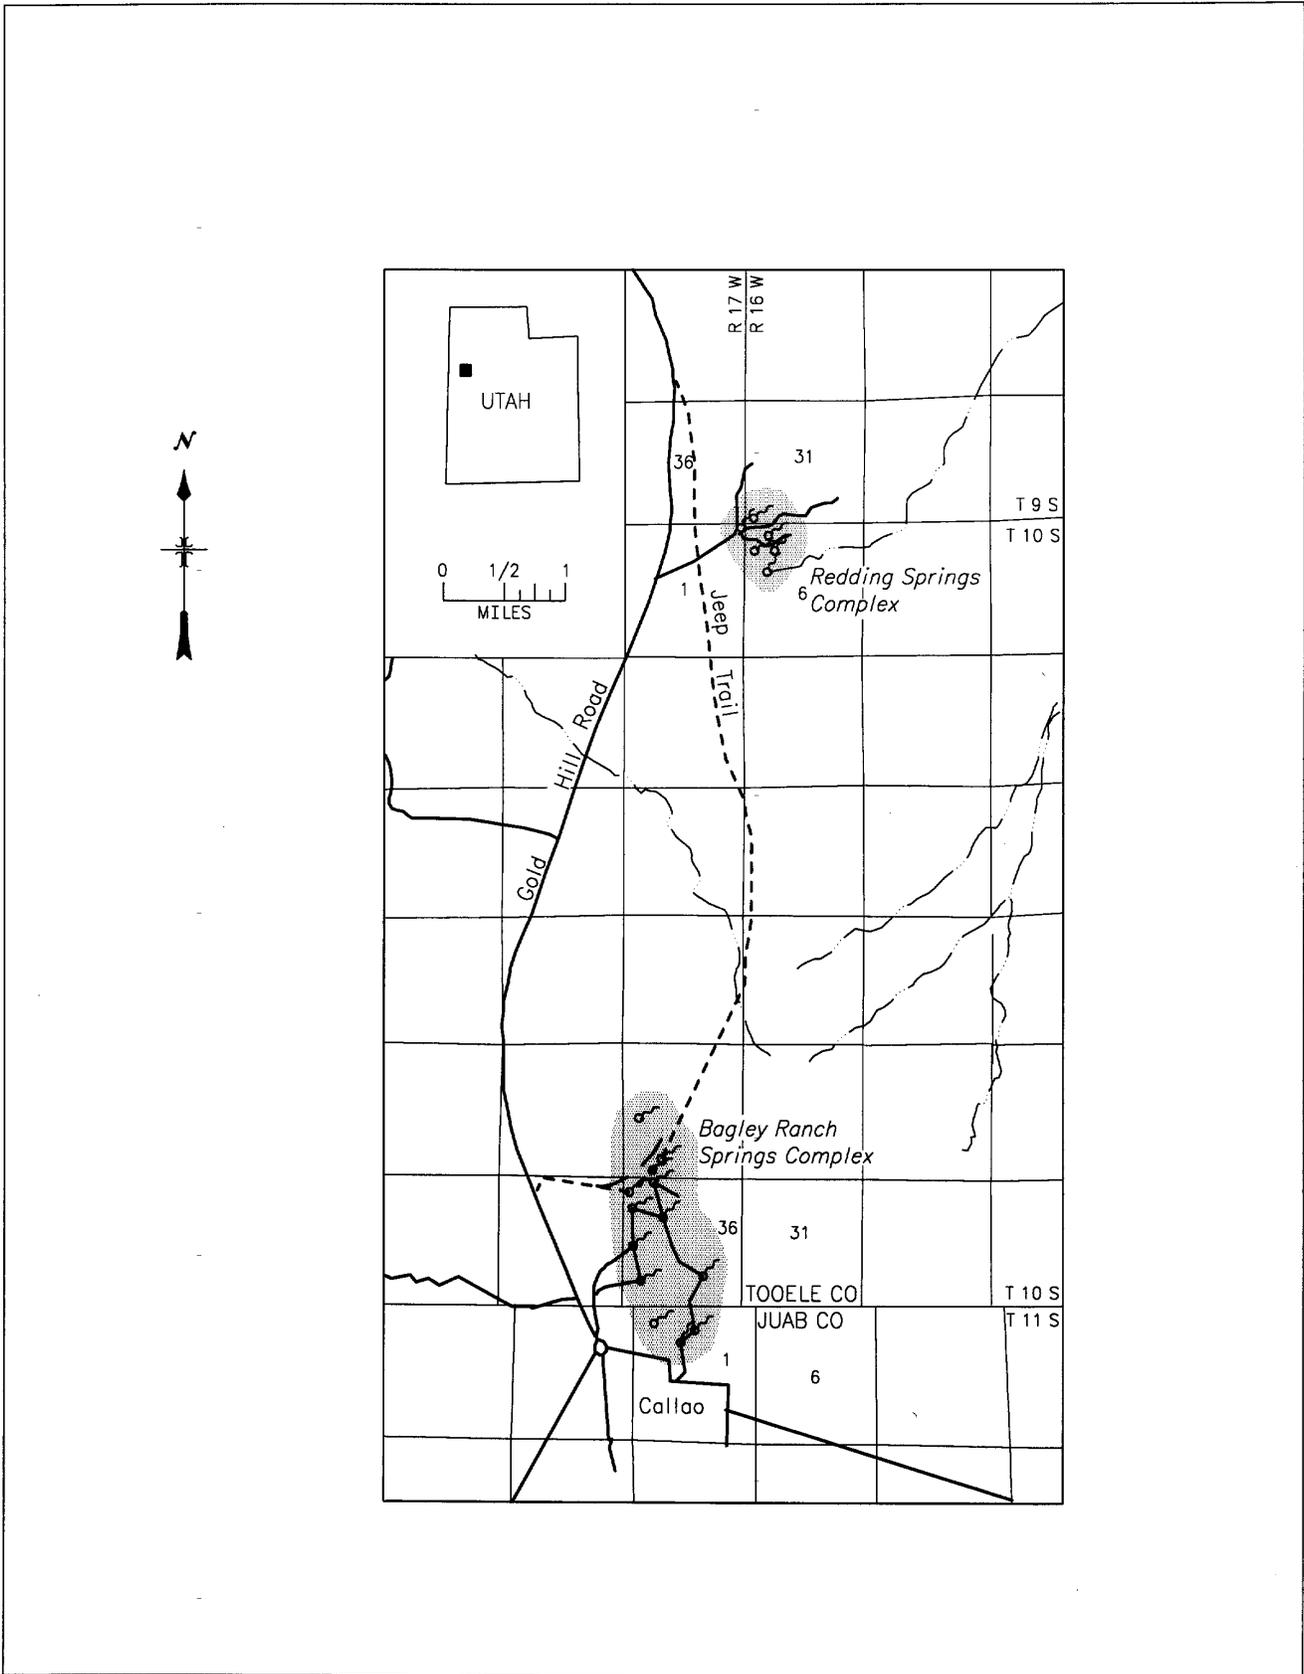

\* \* \* \* \*  
(e) \* \* \*  
\* \* \* \* \*

LEAST CHUB (*Iotichthys phlegethontis*)

1. Northern Snake Valley Group, Utah: Tooele and Juab Counties, Snake Valley. The following areas including all springs, outflow pools, runoffs streams, marshes, and a 1/8-mile zone on all sides of springs, pools, streams, and marshes:

## DEPARTMENT OF THE INTERIOR

### Fish and Wildlife Service

#### 50 CFR Part 17 and 425

RIN 1018-AD 12

### Endangered and Threatened Species; Proposed Threatened Status for a Distinct Population Segment of Anadromous Atlantic Salmon (*Salmo salar*) in Seven Maine Rivers

**AGENCIES:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce; and Fish and Wildlife Service (FWS), Interior.

**ACTION:** Proposed rule.

**SUMMARY:** The NMFS and the FWS (collectively, the Services) have completed a status review of U.S. Atlantic salmon populations and identified a distinct population segment (DPS) in seven Maine rivers. Atlantic salmon in these rivers are likely to become endangered in the foreseeable future and therefore are being proposed for listing as threatened pursuant to the Endangered Species Act of 1973 (Act). This proposed rule includes joint regulations which apply all prohibitions of 50 CFR 17.31 to the DPS, but allows exceptions for incidental take under sections 4(d) and 10 of the Act. The special rule allows for a state plan, approved by the Services, to define the manner in which certain activities could be conducted without violating the Act. If this proposed listing is finalized, the protective measures of the Act will extend to the Atlantic salmon in the seven rivers, and a recovery plan will be prepared and implemented.

**DATES:** Comments from all interested parties must be received by December 28, 1995. Public hearing requests must be received by November 13, 1995.

**ADDRESSES:** Comments and materials concerning this proposed rule and requests for public hearings should be sent to the Chief, Division of Endangered Species, FWS, 300 Westgate Center Drive, Hadley, Massachusetts 01035, or the Chief, Habitat and Protected Resources Division, NMFS, 1 Blackburn Drive, Gloucester, Massachusetts 01930.

**FOR FURTHER INFORMATION CONTACT:** Paul Nickerson at 413-253-8615 or Mary Colligan at 508-281-9116.

#### SUPPLEMENTARY INFORMATION:

##### Background

In October and November 1993, the Services received a petition under the Act to list anadromous Atlantic salmon as endangered. The Services published a notice of finding on January 20, 1994 (59 FR 3067), stating that the petition presented substantial information indicating that the requested action may be warranted. The notice also requested information from the public. A biological review team (Team) comprised of staff from the Services compiled and analyzed all available scientific information pertaining to the status of anadromous Atlantic salmon in the United States. The Team prepared a report entitled "Status Review for Anadromous Atlantic Salmon in the United States, January 1995" (Status Review). The Status Review provides detailed information and references used as the basis for this proposed rule. This Status Review was summarized in a March 17, 1995, finding (60 FR 14410) and is available upon request (see **ADDRESSES**). Further details from the Status Review are provided below. In the March 17, 1995, finding, the Services stated that they would promptly publish a proposed rule with appropriate listing actions.

##### Life History

Anadromous Atlantic salmon have a relatively complex life history that extends from spawning and juvenile rearing in freshwater rivers to extensive feeding migration in the high seas. As a result, Atlantic salmon have several distinct phases in their life history that are identified by specific behavioral and physiological changes. Adult Atlantic salmon ascend the rivers of New England beginning in spring, a migration that peaks in June and continues into fall. Spawning occurs in late October through November. Good spawning habitat has a gravel substrate

and adequate water circulation to keep the eggs well oxygenated. Female anadromous Atlantic salmon produce between 1,500 and 1,800 eggs per kilogram (2.2 pounds) of body weight; on average each female Maine Atlantic salmon produces 7,200 eggs. Eggs hatch in late March or April and the resulting alevins remain in the redd for about six weeks and are nourished by their yolk sac. When the alevins emerge from the gravel about mid-May and begin feeding, they are referred to as fry. Fry become parr as vertical bars become visible on the sides of their bodies. In spring, when the parr are two or three years of age and 12.5 centimeters (cm) to 15 cm (5 to 6 inches) long, they undergo smoltification, a process where morphological and physiological changes prepare the smolt for the transition from fresh to salt water. Most smolts in New England rivers migrate to sea in May and begin their ocean feeding migration.

The marine life history of Atlantic salmon of U.S. origin is not as well understood as the freshwater phase. Scientists have discovered correlations between natural mortality in the marine environment and abiotic factors, particularly sea surface temperature. Atlantic salmon of U.S. origin are highly migratory, undertaking long marine migrations from the mouths of U.S. rivers to the northwest Atlantic Ocean where they are distributed seasonally over much of the region. Upon entry into the nearshore waters of Canada, the U.S. post-smolts become part of a mixture of stocks of Atlantic salmon from various North American streams. Data from commercial harvest indicate that post-smolts overwinter in the southern Labrador Sea and in the Bay of Fundy. Direct sampling during the winter months is needed to better understand post-smolt Atlantic salmon distribution in the North Atlantic. Most Atlantic salmon of U.S. origin spend two winters in the ocean before returning to fresh water for spawning. Those that return after only one year at sea are called grilse.

##### Consideration as a "Species" Under the Act

The Act defines species as "any species of fish or wildlife or plants, and any distinct population segment of any species of vertebrate fish or wildlife that interbreeds when mature." This definition allows for the recognition of distinct population segments at levels below taxonomically recognized species or subspecies. To qualify as a DPS, a population (or group of populations) of indigenous Atlantic salmon must be reproductively isolated from conspecific

populations and must be biologically significant.

The Team determined that the Atlantic salmon populations in the Sheepscot, Ducktrap, Narraguagus, Pleasant, Machias, East Machias, and Dennys rivers, are, as a group, reproductively isolated, and therefore, discrete. These populations are also, as a group, biologically significant. The Services are proposing that these seven populations be listed as one DPS but that management be conducted on a watershed basis. Since the persistence of Atlantic salmon in the Kennebec River, Penobscot River, Tunk Stream, and St. Croix River and their link to native populations warrant further study, these populations were designated as category 2 candidate species by FWS and candidate species by NMFS (60 FR 14410, March 17, 1995). Since that time, the FWS has clarified that only species for which it has sufficient information on biological vulnerability and threat(s) to support issuance of a proposed listing are designated as candidate species. This definition is synonymous with the FWS' former category 1 candidate species. Former category 2 species are regarded by the FWS as species of concern, and are not, at present, candidates for listing. NMFS maintains its candidate species list, however, NMFS and FWS plan to issue joint guidance on candidate species soon. Specific information needs for these four rivers are identified below under Available Conservation Measures.

A critical factor in determining the significance of the river populations of U.S. Atlantic salmon is the continuous persistence of a substantial component of native stock reproduction. If the documented absence of wild Atlantic salmon from natal habitat were to occur for at least two generations (12 years), this would suggest the total loss of the river's native population even under the most conservative approach. Such a gap has not occurred in the DPS rivers. While it is unlikely that U.S. Atlantic salmon exist in a genetically pure native form in any of the DPS rivers, these stocks represent a significant component of the species' genetic legacy.

Naturally reproducing populations of Atlantic salmon in U.S. rivers are substantially reproductively isolated from those in Canada. Within the United States, Atlantic salmon populations exhibit strong fidelity to natal streams. Although there is some evidence of straying, recolonization from adjacent watersheds appears to be minimal. Gene flow between wild populations, or stock transfers, was

determined not to have been sufficient to have eliminated all historic differences. As a group, the seven populations composing the DPS meet the criterion of reproductive isolation.

In salmonids, adaptations to local ecosystems are important to the survival of populations and the survival of the species throughout its range. An examination of U.S. populations of Atlantic salmon provides evidence of their distinctness from stocks in Canada and northern Europe. Historically, adult spawners in U.S. rivers have been predominantly 2-sea-winter fish, whereas many Canadian and European stocks return predominantly after 1 year at sea. The riverine habitat occupied by U.S. Atlantic salmon is distinctive in that it is located at the southern extent of the range of the species in North America. U.S. rivers produce smolts that are younger than those produced in rivers at the northern extreme of the range. Atlantic salmon have persisted in the Sheepscot, Ducktrap, Narraguagus, Pleasant, Machias, East Machias, and Dennys rivers, and, consequently, represent the last known wild remnant of U.S. Atlantic salmon. All of these factors indicate that the DPS is discrete and biologically significant.

#### Distribution and Abundance

The original range of Atlantic salmon in the United States was from the Housatonic River in Connecticut, north to U.S. tributaries of the St. Johns River in New Brunswick, Canada. The historic Atlantic salmon run in the United States has been estimated to have approached 500,000 fish.

The species began to disappear from U.S. rivers 150 years ago and currently only remnant populations occur in a limited number of rivers in Maine. Construction of hundreds of dams blocked salmon migration and reduced spawning habitat to a fraction of that available historically. Water pollution and overexploitation further reduced the abundance of Atlantic salmon. Indigenous Atlantic salmon in rivers south of the Kennebec River were extirpated by the mid-1800's. In addition, some populations north of the Kennebec River were also extirpated; most of these were in small rivers with less than 1 hectare (2.5 acres) of available nursery habitat. Beginning in the mid-1800's and continuing to the present time, numerous restoration efforts were undertaken. The Connecticut and Merrimack rivers provided nearly 40 percent of historic U.S. Atlantic salmon habitat. These rivers are currently the focus of restoration efforts using nonindigenous stocks, and extensive efforts are being

undertaken to provide access to historic habitat.

The North American Salmon Working Group's method for estimating the escapement goal for adequate egg deposition for each river was used. Thus, an escapement goal was determined for each river and the return calculated as a percentage of the escapement goal. Throughout the past 24 years, the Dennys and Narraguagus rivers have had the best returns relative to available habitat, averaging 20 percent of escapement goal. The Pleasant, Sheepscot, and Machias rivers have had returns that averaged between 10 and 12 percent of escapement goal. However, recent downward trends in abundance have put most rivers at less than 10 percent of their respective escapement goals. Only the Narraguagus River has exceeded 10 percent in the past seven years.

The combination of low relative abundance and low numbers relative to spawning requirements demonstrates that the DPS is likely to become endangered within the foreseeable future throughout all or a significant portion of its range.

#### Summary of Factors Affecting the Species

Section 4 of the Act and regulations promulgated to implement the listing provisions of the Act (50 CFR part 424) set forth the procedures for adding species to the Federal list. Section 4 also requires that listing determinations be based solely on the best scientific and commercial data available, without reference to possible economic or other impacts of such determinations. A species may be determined to be endangered or threatened due to one or more of the five factors described in section 4(a)(1) of the Act. These factors and their application to the Atlantic salmon DPS are:

##### *A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range*

The construction of dams with either inefficient or non-existent fishways was a major cause for the decline of U.S. Atlantic salmon. Dams adversely impact Atlantic salmon by impeding both their upstream and downstream migration, increasing predation, altering the chemistry and flow pattern of rivers, increasing water temperature, and reducing available flow downstream. Currently, there are no dams on rivers in the DPS that have the potential to adversely impact the species. The Machias and Dennys rivers have natural falls that may partially bar salmon migration at certain flows. Beaver dams

and debris dams have been documented on many of the rivers within the DPS. Typically, these are partial obstructions and are ephemeral in nature.

One of the predominant land uses of central and northern coastal Maine watersheds is the growth and harvest of forest products. Forest management practices can cause numerous short- and long-term negative impacts to Atlantic salmon. Deforestation alters the water retention of watersheds resulting in high seasonal runoff followed by inadequate river flows. The removal of riparian vegetation reduces shading and increases water temperature. Poor logging practices and road construction adjacent to streams results in the deposition of substantial loads of woody debris and silt into waterways. Insecticides used to control insect infestations and herbicides used to manage competing vegetation enter waterways and adversely affect salmon. While historic forest practices have had harmful effects on Atlantic salmon in certain watersheds, numerous state and Federal laws now exist to prevent adverse impacts to Atlantic salmon and other aquatic species. Current forest practices are not considered a major threat to Atlantic salmon.

Another significant land use in eastern Maine watersheds is lowbush blueberry agriculture. Water extraction and diversion from rivers and streams for blueberry cultivation can make habitat unsuitable for Atlantic salmon. The herbicide hexazinone (velpar) is applied to blueberry fields to control competing vegetation. Blueberry barrens are also treated with fungicides and insecticides to prevent disease and control insect pests. Such chemical spraying can cause direct mortality of juvenile Atlantic salmon or adversely affect salmon if chemicals drain into waterways and reduce populations of aquatic insects, an important food source for salmon. With assistance from the Cooperative Extension Services of the University of Maine and the Natural Resource Conservation Service, numerous measures are being implemented to reduce the potential for contamination of waterways from blueberry cultivation. Current agricultural practices are not considered a major threat to Atlantic salmon.

Many of the eastern Maine rivers have deposits of peat within their watersheds. Commercial peat mining has the potential to adversely affect salmon habitat through the release of peat fibers, arsenic, and other chemical residues present in peat deposits. Further study is necessary to determine the impacts, if any, of peat mining on

Atlantic salmon and Atlantic salmon habitat.

#### *B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes*

Historically, the marine exploitation of U.S.-origin Atlantic salmon occurred primarily in foreign fisheries. U.S.-origin Atlantic salmon have been documented in the harvests of West Greenland, New Brunswick, Nova Scotia, Newfoundland, and Labrador fisheries. The Newfoundland and Labrador fisheries constituted the majority of the harvest and intercepted the highest percentages of U.S.-origin Atlantic salmon. In the absence of West Greenland and Canadian interception fisheries, returns of U.S. Atlantic salmon could potentially increase two-fold. In Canada, a 5-year moratorium is in place in Newfoundland and licenses are being purchased by the government. The Labrador fishery is now managed by quotas, and the 1993 quota represents a reduction of 92 percent from that of the 1990 quota level. In 1982, the North Atlantic Salmon Conservation Organization (NASCO) was formed for the purpose of managing salmon through a cooperative program of conservation, restoration and enhancement of North Atlantic stocks. NASCO accepted an agreement in 1993 that set quotas on the harvest off West Greenland with the goal of reaching target spawning escapements for North American stocks. During the next three years of the management plan, the number of spawners needed to sustain North American stocks of Atlantic salmon (194,000) will be protected by adjusting the West Greenland quota.

In 1987 the New England Fishery Management Council prepared a Fishery Management Plan (FMP) to establish explicit U.S. management authority over all Atlantic salmon of U.S. origin in Federal waters. The FMP prohibits the possession of Atlantic salmon in the exclusive economic zone, the area between 3 and 200 miles off the U.S. coastline. During the 1970s, recreational fishermen were harvesting as much as 15 to 25 percent of the Atlantic salmon returning annually to home waters. Currently state law allows only a catch and release fishery for Atlantic salmon, and no salmon fishing is authorized on the Pleasant River. Multi-sea-winter salmon incur some mortality from catch-and-release fishing and parr are vulnerable to incidental hooking mortality or illegal harvest by trout anglers. Poaching also poses a serious threat to depressed populations of Atlantic salmon in New England rivers.

#### *C. Disease or Predation*

During their various life stages, Atlantic salmon are preyed upon by numerous species of fish, birds, and mammals and also compete with other species of fish. Major freshwater predators on Atlantic salmon include brook trout, brown trout, eel, burbot, northern pike, chain pickerel, smallmouth bass, belted kingfisher, heron, common and red-breasted merganser, osprey, herring and greater black-backed gull, otter and mink. Documented predators in the estuarine and marine environments include striped bass, shark, skate, ling and Atlantic cod, pollock, whiting, garfish, double-crested cormorant, European cormorant, harbor seal, gray seal, harp seal, and ringed seal. The effects and magnitude of competition and predation in the riverine, estuarine, and marine environments are not known.

Atlantic salmon are susceptible to a number of diseases and parasites that can result in high mortality. Freshwater external parasites of Atlantic salmon are the gill maggot, freshwater louse, leaches, and the skin parasite *Gyrodactylus salaris*, while internal parasites include flukes, tapeworms, spiny-headed worms and roundworms. Ocean parasites include the sea louse and sea lamprey. Atlantic salmon are susceptible to numerous bacterial, viral and fungal diseases, including furunculosis, bacterial kidney disease and vibriosis. Disease-related mortality is primarily documented for hatcheries and aquaculture facilities. Disease epizootics in wild salmon are uncommon. In New England, furunculosis is the only known source of disease-related mortality in wild Atlantic salmon.

#### *D. Inadequacy of Existing Regulatory Mechanisms*

Many Federal and state laws and programs have affected the abundance, health and survival of anadromous Atlantic salmon populations in the United States. However, they have not prevented the decline of the species. The effectiveness of certain existing laws and regulations, which are summarized in the status review, could be strengthened by more stringent implementation and enforcement. Aquaculture facilities are located within 20 kilometers (km) (12 miles) of the mouths of five of the rivers within the DPS. Atlantic salmon that have been released or that have escaped from aquaculture pens are known to have entered some of these rivers. The escape of fish from Atlantic salmon aquaculture operations could pose a threat to the

genetic integrity of Atlantic salmon within the DPS. In addition, concentrations of aquaculture salmon increase the vulnerability of wild stocks to disease. Also, escape of juvenile Atlantic salmon from nearby fish hatcheries may cause a genetic or disease threat to wild salmon.

#### *E. Other Natural or Manmade Factors Affecting its Continued Existence*

Scientific evidence suggests that low natural survival in the marine environment is a major factor contributing to the decline of Atlantic salmon throughout North America. Recent research indicates that major seasonal events influence post-smolt survival of Atlantic salmon. It appears that survival of the North American stock complex of Atlantic salmon is at least partly explained by sea surface water temperature, during the period when Atlantic salmon concentrate in winter months in habitat at the mouth of the Labrador Sea and east of Greenland. Until more direct observation can be made on the marine ecology of post-smolts during the winter, the exact mode of mortality will be unknown. Currently, researchers speculate that a combination of factors related to slow growth and increased predation contribute to marine mortality.

Potential genetic impacts of hatchery practices include inbreeding depression, outbreeding depression and domestication. Potential ecological impacts of hatchery practices include competition and predation, displacement of wild fish, altered migratory and spawning behavior, and disease transfer. The practice of stocking fry transferred from other rivers may have exacerbated the decline of the wild population by displacing wild fish. For six of the seven rivers, the average percentage of the run that was of natural origin (wild) was higher during years not influenced by the stocking of fry transferred from other rivers. However, the Services do not believe that stock transfers in the DPS rivers have eliminated all historic characteristics of wild Atlantic salmon. Although past stocking practices may have contributed to the decline of Atlantic salmon in the seven rivers, the Services are committed to ensuring that future hatchery practices contribute to recovery of each river population. Use of river-specific fry stocking on the Penobscot River has boosted the percentage of natural origin fish and is a tool for recovery of the DPS rivers.

In summary, there are basically three major factors which continue to threaten the continued survival of Atlantic

salmon within the DPS—poaching, low natural survival of fish during the first winter at sea, and potential impacts from Atlantic salmon aquaculture operations and fish hatcheries to the genetic integrity and disease vulnerability of the DPS.

#### Basis for Determination

Section 4(b)(1)(A) of the Act states that determinations required by the Act will be made solely on the basis of the best scientific and commercial data available after conducting a review of the status of the species and after taking into account those efforts, if any, being made by any State or foreign nation, or any political subdivision of a State or foreign nation, to protect such species, whether by predator control, protection of habitat and food supply, or other conservation practices, within any area under its jurisdiction, or on the high seas. The status of the populations of Atlantic salmon in these seven rivers was analyzed by looking at historic and current angler catch, trap data, and redd counts, all of which are experiencing a downward trend. Then, the escapement goal for each river was calculated by estimating the total number of adults that would be required to fully seed the potential habitat. The documented return to these seven rivers was then compared to the escapement goal to arrive at a comparable measure of the status of the stock. Recent downward trends in abundance have placed all of the rivers at less than 10 percent of their escapement goals, with the exception of the Narraguagus which in recent years has ranged from 6 to 19 percent. The combination of low relative abundance and the low numbers relative to escapement goals indicates that these populations are in peril.

The second step was then to examine efforts currently being undertaken on behalf of the species. There are numerous measures underway to prevent the loss of any of the river populations of Atlantic salmon within the DPS. Collectively, these measures have the potential to reduce the likelihood of extinction and enable the Services to propose listing the DPS as threatened rather than endangered. This designation includes all wild and river specific hatchery stock of DPS origin. For purposes of delisting, the DPS is composed of wild fish and hatchery-reared fish that have returned to spawn naturally and successfully in their river of origin. If these measures are not continued or recent downward trends in abundance are not reversed, then the DPS may reach the point of being in danger of extinction and the designation would have to be changed to

endangered. Actions underway include the following:

1. Continued development of river specific populations for broodstock and stocking in subsequent years. Currently stocks exist for five of the seven rivers at the Craig Brook National Fish Hatchery.

2. Progeny are being outplanted to specific rivers. In 1995, over 100,000 fry will be stocked into the Dennys, Narraguagus, and Machias rivers.

3. The National Biological Service is conducting a comprehensive genetic study of Atlantic salmon populations throughout North America to identify differences in river populations and to compare wild and hatchery stock.

4. In 1993, the West Greenland Commission of the NASCO accepted the West Greenland Fishery Regulatory Measure. This agreement resulted in the setting of quotas with the goal of reaching target spawning escapements for North American stocks.

5. A private-State-Federal task force has been established to make recommendations on how to reduce threats to wild Atlantic salmon posed by nearby aquaculture operations.

6. An intensive study of the population dynamics and the condition of the freshwater habitat of Atlantic salmon in the Narraguagus River is ongoing. Key objectives include the following: estimate the number of adults returning to the river; determine the level of effort necessary to estimate the number of parr; inventory habitat; determine the abundance and diversity of macroinvertebrates; and monitor trends in water quality.

7. NMFS is conducting research on the early marine life history of Atlantic salmon populations in the State of Maine's nearshore and marine waters. The key objective of the study is to better understand the behavior and feeding relationships of post-smolts during their first few weeks at sea.

8. Recent research conducted by the NMFS Northeast Fisheries Science Center in coordination and participation with the International Council for the Exploration of the Seas, indicates that major seasonal events influence post-smolt survival. Additional research is ongoing to identify the processes involved.

9. A number of private land management agencies in Downeast Maine have formed a non-profit entity called Project SHARE (Salmon Habitat and River Enhancement). The group, which includes major forest and agriculture industry representatives, is committed to improving freshwater habitat for the Atlantic salmon in eastern Maine.

10. The State of Maine, FWS, and the National Fish and Wildlife Foundation have joined to fund habitat monitoring and improvement projects in the rivers, including spawning barrier removal, replacement of water control structures, temperature and water quality monitoring, and riparian zone protection and rehabilitation.

#### Proposed Determination

The Act defines an endangered species as any species in danger of extinction throughout all or a significant portion of its range, and a threatened species as any species likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. Section 4(b)(1)(a) of the Act requires that determinations regarding whether any species is threatened or endangered be based solely on the best scientific and commercial information available after conducting a review of the status of the species and after taking into account those efforts, if any, being made to protect such species.

The Services propose to list the populations of anadromous Atlantic salmon in the Sheepscot, Ducktrap, Narraguagus, Pleasant, Machias, East Machias and Dennys rivers as threatened under the Act. Both the naturally reproducing populations of Atlantic salmon in these seven rivers and the river specific hatchery populations for these seven rivers are included in the DPS.

#### Prohibitions and Proposed Protective Measures

With respect to the seven populations of Atlantic salmon proposed for listing, the Services propose to adopt joint regulations which apply all prohibitions of 50 CFR 17.31 to the DPS, allowing exceptions for incidental take under sections 4(d) and 10 of the Act. This regulation applies most section 9 prohibitions and exceptions to threatened species, including protective measures to prohibit taking, interstate commerce, and other Act prohibitions applicable to endangered species, with the exceptions provided under section 10 of the Act. The Services also propose to adopt specific regulations under section 4(d) that will apply to the DPS of Atlantic salmon identified as threatened (see Special Rule).

These prohibitions apply to all individuals, organizations, and agencies subject to U.S. jurisdiction. The Act and implementing regulations set forth a series of general prohibitions and exceptions that apply to all endangered wildlife. The prohibitions (codified at 50 CFR 17.21 for endangered fish or

wildlife), in part, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect; or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Section 17.31 of 50 CFR prohibits certain activities that directly or indirectly affect threatened species. The proposed rule provides that any violation of applicable State law or regulation concerning the taking of Atlantic Salmon will also be a violation of Federal law. By including this provision, the Services intend to notify the public that any State law or regulation concerning the "take" of Atlantic Salmon which is more specific or more protective of a listed species than existing federal law, may be enforced as if it were Federal law pursuant to the Act.

As announced in a recent joint policy (59 FR 34272, July 1, 1994), the Services will identify at the time a final rule is published, to the maximum extent practicable, those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of the listing on proposed and ongoing activities within the range of a species. Activities that the Services believe could result in "take" of anadromous Atlantic salmon within the DPS include, but are not limited to, the following:

- (1) Targeted recreational and commercial fishing, bycatch associated with commercial and recreational fisheries, and poaching;
- (2) Introduction of non-indigenous Atlantic salmon stock or other species not indigenous to the DPS rivers;
- (3) Discharges (point and non-point sources) or dumping of toxic chemicals, silt, fertilizers, pesticides, herbicides, heavy metals, oil, organic wastes or other pollutants into waters supporting the species;
- (4) Blockage of migration routes;
- (5) Destruction/alteration of the species' habitat (i.e. instream dredging, rock removal, channelization, discharge of fill material, operation of heavy equipment within the stream channel, manipulation of river flow, etc.);
- (6) Hatchery practices that are likely to cause genetic, disease, or ecological impacts to the DPS.

The Services believe that, based on the best available information, the following actions will not result in a

violation of section 9, provided these activities are carried out in accordance with existing regulations and permit requirements:

- (1) Fishing for other species if conducted in conformance with the Atlantic salmon conservation plan required by the special rule and approved by the Services;
  - (2) Harvest of landlocked Atlantic salmon at locations delineated by the Maine Department of Inland Fisheries and Wildlife; and
  - (3) Unavoidable losses in river specific hatchery stocks due to standard culture techniques.
- (4) Federally approved projects that involve activities, such as instream dredging, rock removal, channelization, discharge of fill material, operation of heavy equipment within the stream channel, or manipulation of river flow, when such activity is conducted in accordance with any reasonable and prudent measures given by the Services in accordance with section 7 of the Act.

Permits may be issued, under section 10 of the Act, to carry out otherwise prohibited activities involving endangered or threatened wildlife under certain circumstances. Regulations governing permits are codified at 50 CFR 17.22, 17.23, 17.31, 222.22, and 222.23 for threatened and endangered fish and wildlife. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, for educational purposes, and/or for incidental take in the course of otherwise lawful activities. Questions regarding whether specific activities will constitute a violation of section 9 should be directed to the Chief, Division of Endangered Species in the FWS Hadley, Massachusetts, office, or the Chief, Protected Resources Division, in the NMFS Gloucester, Massachusetts, office (see **ADDRESSES**).

#### Special Rule

The implementing regulations for threatened wildlife under the Act incorporate the section 9 prohibitions for endangered wildlife (50 CFR 17.31 and 50 CFR 222.21), except when a special rule promulgated pursuant to section 4(d) applies (50 CFR 17.31 (c)). Section 4(d) of the Act provides that whenever a species is listed as a threatened species, the Services shall issue regulations deemed necessary and advisable to provide for the conservation of the species. Conservation means the use of all methods and procedures necessary to bring the species to the point at which the protections of the Act are no longer necessary. Section 4(d) also states that the Services may, by regulation, extend

to threatened species all prohibitions provided for endangered species under section 9(a) of the Act.

Pursuant to section 4(d) of the Act and 50 CFR 17.31(c), the Services propose to define the conditions under which the incidental take of Atlantic salmon resulting from activities regulated by State and local governments would not violate section 9 of the Act. Under the special rule, incidental take of Atlantic salmon when conducting otherwise lawful activities addressed in an Atlantic salmon conservation plan prepared by the State of Maine and approved by the Services, would not be considered a violation of section 9 of the Act, provided the Services determine that such a plan is consistent with the criteria for an "incidental take" permit pursuant to section 10(a)(2)(B) of the Act, 50 CFR 17.32(b)(2), and 50 CFR 222.22(c)(2).

The intent of the special rule is to provide the State of Maine an opportunity to maintain the lead role in the management of activities that could impact Atlantic salmon in the DPS. The Services are encouraging the State to identify such activities and include them in a conservation plan to be submitted to the Services any time after the publication of this notice. Once the plan is received, the Services will publish a notice of availability and accept public comments on that plan. The Services will consider public comments and the criteria outlined in this section to determine whether the plan will reduce threats and promote the conservation of Atlantic salmon in the DPS. The Services will work closely with Maine officials to revise or strengthen sections of the plan as may be necessary prior to plan approval.

The Services recommend that the Atlantic salmon conservation plan contain, but not be limited to, the following sections—(1) a discussion of the lawful activities having the potential to incidentally take Atlantic salmon, (2) activities such as recreational fishing targeting species other than Atlantic salmon, habitat modification, and aquaculture, and (3) the potential impacts to the DPS and provisions to minimize those impacts.

Using recreational fishing as an example, the State could identify various ongoing fishing activities in the seven rivers (bass, trout, etc.) and the likelihood of each to incidentally catch an Atlantic salmon adult or juvenile. The plan would address the time of year of each fishery, location, and gear used. The plan should identify acceptable levels of incidental take, measures that will be implemented to monitor incidental take, and measures to further

restrict the fishing activity should such take exceed that allowed. State law enforcement activities to protect Atlantic salmon in the seven rivers should be identified. In addition, the plan should include outreach activities that will be conducted to enlist angler support and educate anglers on the proper method for releasing incidentally caught Atlantic salmon.

If aquaculture is included in the plan, then the plan should include an evaluation of the potential for incidental take to occur. A take could result, for example, from the interbreeding of escaped net-pen reared salmon and DPS salmon, the transfer of disease, or the disruption of wild redds. An assessment of the likelihood of interaction should include information on past escapement of Atlantic salmon either from cages or hatcheries, and any documentation as to the presence of the aquaculture fish in the seven rivers identified. Measures that will be required by the State to minimize interactions between DPS and net-pen reared Atlantic salmon should be identified and could include such provisions as cage monitoring and reporting of escapees and the subsequent monitoring of rivers, improved cage design, placement of weirs in the seven rivers, disease certification, siting constraints, broodstock selection, sterilization, marking of net-pen fish, and law enforcement activities.

Although the Status Review does not identify habitat modification in the seven rivers in the DPS as a major threat to Atlantic salmon, the State prepared conservation plan should discuss state authorized activities that could potentially modify habitat and incidentally take Atlantic salmon. This discussion should address impacts of water withdrawals and land use practices on spawning habitat, along with State efforts, both existing and planned, to reduce such impacts. This section might include a brief summary of existing regulations, permit review procedures, water quality monitoring activities, public outreach activities, and voluntary landowner efforts such as Project SHARE, which focus on habitat protection and improvement. Finally, the plan should include provisions for identifying and correcting any situations which are likely to be causing incidental take and monitoring the effects of such corrective actions. The conservation of the DPS must be the basis for all provisions of the plan.

The standards the Services will use to evaluate the State plan are consistent with those set forth in 50 CFR 17.32(b)(2) and 50 CFR 222.22(c)(2), which define the issuance criteria for

obtaining a permit to incidentally take listed wildlife species under section 10(a)(1)(B) of the Act. The six criteria are:

(1) Any taking will be incidental to otherwise lawful activities and not the purpose of such activities. Any taking of Atlantic salmon in the seven rivers as described in the plan would have to occur inadvertently while conducting an activity whose purpose was not to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture or collect Atlantic salmon from the seven river populations. The taking must not be deliberate and purposeful. The plan must include an analysis of alternatives that would not result in take and an explanation of why these are not being used. The plan should include the State regulations that govern these fisheries as well as information on how those regulations are promulgated, enforced, and modified.

(2) The plan should, to the maximum extent practicable, minimize and mitigate the impacts of any proposed incidental take. Compliance with this standard involves a planning strategy that emphasizes avoidance of impacts to Atlantic salmon, provides measures to minimize potential impacts by modifying practices (e.g. in the case of aquaculture it could include improved cage design, increased monitoring and reporting of escapees, etc.), and details compensation measures needed to offset unavoidable impacts (e.g., weirs or other means to recapture escapees).

(3) The plan should be adequately funded and contain provisions to deal with unforeseen circumstances. A summary of the funding that will be available to implement provisions of the plan, including enforcement and monitoring, should be provided. The plan should outline how it will be determined that there is an unforeseen problem and should include the specific steps that will be taken to correct that problem.

(4) Any taking allowed under the plan should not appreciably reduce the likelihood of survival and recovery of Atlantic salmon in the wild. This criterion is equivalent to the regulatory definition of "jeopardy" under section 7(a)(2) of the Act and means to engage in any activity that reasonably would be expected, directly or indirectly, to reduce appreciably the likelihood of both the survival and recovery of the DPS. In the case of incidental catch of Atlantic salmon, the plan must include an assessment of the potential for Atlantic salmon to be incidentally caught by anglers targeting other species, the likelihood of mortality to the Atlantic salmon that is caught and

released (including the potential for it to be caught more than once), and the resulting impact to the river population of Atlantic salmon. In the case of aquaculture, the plan must include an assessment of the potential for Atlantic salmon to be taken as a result of ongoing aquaculture operations and an assessment of the possible impacts to the affected river population of Atlantic salmon.

(5) The plan should ensure that other measures that the Services may require as being necessary or appropriate will be provided. These measures should become apparent during plan development through coordination among the Services, the State and any other plan participants and will likely include terms and conditions for monitoring implementation of the plan to ensure that its requirements and the requirements of the Act are met.

(6) The Services are assured that the plan will be implemented. The plan should specify how the State agencies will exercise their existing authorities to adhere to the commitments made in the plan. Any violations could be a basis for revocation of the Services' concurrence with the plan.

Once approved by the Services, the conditions contained in the approved plan will be the conditions, pursuant to section 4(d), under which the incidental take of Atlantic salmon in the seven rivers would not be a violation of section 9.

The Services and the State will monitor the implementation of the plan and will conduct annual reviews to assess progress, identify problems and recommend corrective action. If the Services determine that the plan is not being effectively implemented, they will discuss their concerns with appropriate State officials and jointly determine the nature and timing of corrective action. If corrective action is not taken within 90 days of such discussion, plan approval may be revoked either partially or completely. The Services will publish the findings for such revocation in the Federal Register and provide for a 30-day public comment period prior to revocation. Such revocation would result in reinstatement of the take prohibitions made applicable through 50 CFR 425.21(a)(1).

At this time, different procedures exist between the Services for authorizing the incidental take of listed species. The FWS provides such authorization through its Cooperative Agreement with the State of Maine under section 6 of the Act. The NMFS provides such authorization directly under section 10 of the Act. The language of the proposed rule at 50 CFR

425.21(b)(1) reflects the existing differences. It is the intent of the Services to ensure that these procedures are streamlined and to provide the public with a "one-stop" authorization process should this proposal be made final and an approved State Atlantic salmon conservation plan be implemented.

#### Available Conservation Measures

Conservation measures provided for species listed as endangered or threatened under the Act include recovery actions, Federal agency consultation requirements, and prohibitions on taking. Recognition through listing promotes conservation actions by Federal and State agencies and private groups and individuals.

Section 7(a)(4) of the Act requires that Federal agencies confer with the Services on any actions likely to jeopardize the continued existence of a species proposed for listing and on actions resulting in destruction or adverse modification of proposed critical habitat. For listed species, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or conduct are not likely to jeopardize the continued existence of a listed species or to destroy or adversely modify its critical habitat. If a Federal action may adversely affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Services. Consultations will be conducted on a river-specific basis pursuant to identification of river specific recovery units within the DPS.

Examples of Federal actions that may be affected by this proposal include U.S. Army Corps of Engineers (COE) section 404 permitting activities under the Clean Water Act, and COE section 10 permitting activities under the Rivers and Harbors Act.

In addition to the actions identified under Basis for Determination, the following general conservation measures could be implemented to help conserve the species. This list does not constitute the Services' interpretation of the entire scope of a recovery plan under section 4(f) of the Act.

(1) Further efforts could be made to ensure that water extractions and diversions for agriculture do not adversely affect habitat of DPS Atlantic salmon. In addition, all water diversion intake structures available to downstream migrating Atlantic salmon could be screened.

(2) Atlantic salmon aquaculture facilities located less than 20 km (12 miles) from the mouths of the Narraguagus, Pleasant, Machias, East

Machias and Dennys rivers could be encouraged to implement stringent disease protocols, sterilize fish, change broodstock origin, mark net pen reared fish, install and maintain weirs at the mouths of rivers to exclude escaped aquaculture fish, and/or develop and implement plans to safeguard against the accidental release (escape) of aquaculture fish.

(3) Predator species could be controlled.

(4) For candidate species, or species of concern for FWS (see 60 FR 14410, March 17, 1995), restoration efforts will continue on the Penobscot and St. Croix rivers. Studies will be conducted to determine the presence, origin, and genetic composition of wild Atlantic salmon in the Kennebec, Penobscot, and St. Croix rivers, and Tunk Stream. An intensive survey of the Tunk Stream watershed is needed to determine if Atlantic salmon are still present. Better documentation of wild abundance and natural reproduction of Atlantic salmon is required for all four rivers.

Should the proposed listing be made final, protective regulations under the Act would be put into effect and a recovery program would be implemented. The Services recognize that to be successful, protective regulations and recovery programs for Atlantic salmon will need to be developed in the context of conserving aquatic ecosystem health. The Services, the State of Maine, and the private sector must cooperate to conserve the listed populations and the ecosystems upon which they depend. The Services encourage non-federal landowners to assess the impacts of their actions on Atlantic salmon. In particular, the Services acknowledge and fully support the ongoing efforts to involve stakeholders (industry representatives, landowner representatives, local and state governments and Federal biologists) through Project SHARE and the ad hoc task force to address aquaculture and wild stock interactions.

#### Critical Habitat

Critical habitat is defined in section 3 of the Act as: (1) The specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management considerations or protection; and (2) specific areas outside the geographical area occupied by a species at that time it is listed upon a determination that such areas are essential for the conservation of the species.

Section 4(a)(3)(a) of the Act requires that, to the extent prudent and determinable, critical habitat be designated concurrently with the listing of a species. Designations of critical habitat must be based on the best scientific data available and must take into consideration the economic and other relevant impacts of specifying any particular area as critical habitat. While the Team has completed its analysis of the biological status of anadromous Atlantic salmon in the United States, it has not been able to address either the prudence or determinability of critical habitat designation. Therefore, during the comment period for this listing proposal the Services will seek additional agency and public input on critical habitat, along with information on the proposed listing of Atlantic salmon in the DPS rivers. The Services will use this and other information in formulating a decision on critical habitat designation for the Atlantic salmon.

#### Public Comments Solicited

To ensure that the final action resulting from this proposal will be as accurate and effective as possible, the Services are soliciting comments and information from the public, other concerned governmental agencies, the scientific community, industry, and any other interested parties. Specifically, the Services are soliciting information regarding: (1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to this species; (2) the reasons why any habitat should or should not be determined to be critical habitat pursuant to section 4 of the Act; (3) additional information concerning the range, distribution, and population size of this species; (4) current or planned activities in the subject area and their possible impacts on this species; (5) additional efforts being made to protect native, naturally-reproducing populations of Atlantic salmon; (6) relationship of existing hatchery populations to natural populations within the DPS and in the four river populations designated as candidate species (60 FR 14410, March 17, 1995), or species of concern, for FWS; (7) the development of a special section 4(d) regulation to allow incidental take of Atlantic salmon in accordance with an approved State conservation plan; and (8) additional information on the status and threats to the anadromous Atlantic salmon in the Penobscot, Kennebec, and St. Croix rivers and Tunk Stream.

The Services are also requesting information on areas that may qualify as critical habitat for the identified DPS of

Atlantic salmon. Areas that include the physical and biological features essential to the recovery of the species should be identified. Areas outside the present range should also be identified if such areas are essential for the conservation of the species. Essential features should include, but are not limited to: (1) Space for individual and population growth; (2) food, water, air, light, minerals, or other nutritional or physiological requirements; (3) cover or shelter; (4) sites for reproduction and rearing of offspring; and (5) habitats that are protected from disturbance or are representative of the historic geographical and ecological distributions of the species.

For areas potentially qualifying as critical habitat, the Services are requesting information describing: (1) The activities that affect the area or could be affected by the designation, and (2) the economic costs and benefits of restrictions on Federal activities that are likely to result from the designation.

The economic cost to be considered in the critical habitat designation under the Act is the probable economic impact "of the (critical habitat) designation upon proposed or ongoing activities" (50 CFR 424.19). The Services must consider the incremental costs specifically resulting from a critical habitat designation that are above the economic effects attributable to listing the species. Economic effects attributable to listing include actions resulting from section 7 consultations under the Act to avoid jeopardy to the species and from the taking prohibitions under section 9 of the Act. Comments concerning economic impacts should distinguish between the costs of listing from the incremental costs that can be directly attributable to the designation of specific areas as critical habitat.

Final promulgation of the regulation(s) on this species will take into consideration the comments and any additional information received by the Services, and such communications may lead to a final regulation that differs from this proposal.

#### National Environmental Policy Act

The FWS has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969 (NEPA), need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Act. The notice for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244). Sections 4(b)(1) of the Act restricts the information that may be considered when assessing species for listing. Based

on this limitation and the opinion in *Pacific Legal Foundation v. Andrus*, 657 F.2d 829 (6 Cir. 1981), the NMFS has determined that listing actions under the Act are excluded from the normal requirements of the NEPA.

#### Classification

The Conference Report on the 1982 amendments to the Act notes that economic considerations have no relevance to determinations regarding the status of species, and that the Regulatory Flexibility Act and the Paperwork Reduction Act are not applicable to the listing process. Similarly, listing actions are not subject to the requirements of Executive Order 12612 and are exempt from review under Executive Order 12866.

The proposed special rule in 50 CFR part 425 was reviewed under Executive Order 12866. The Services certify that the proposed revisions to 50 CFR 425 will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Significant adverse impacts are not expected as a result of the proposed rule because the rule is intended to reduce the likelihood of persons conducting otherwise lawful activities being in violation of section 9 of the Act. No direct costs, enforcement costs, information collection, or recordkeeping requirements are required by this proposed rule beyond those already required by existing regulations. The proposed rule does not contain any recordkeeping requirements as defined by the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and does not require a Federalism assessment under Executive Order 12612 because it would have no significant Federalism effects described in that order. Finally, the Services have determined that the proposed regulation does not require the preparation of a Takings Implication Assessment under the requirements of Executive Order 12630, "Government Actions and Interference with Constitutionally Protected Property Rights."

#### Authors

Authors of this document are Mary Colligan of the NMFS and Paul Nickerson of the FWS.

#### List of Subjects in

##### 50 CFR Part 17

Administrative practice and procedure, Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

50 CFR Part 227

Administrative practice and procedure, Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, and Transportation.

50 CFR Part 425

Administrative practice and procedure, and Endangered and threatened species.

Proposed Regulation Promulgation

Accordingly, the Services hereby propose to amend part 17, subchapter B of chapter I and part 227, subchapter C; to add part 425, subchapter B, title 50 of the Code of Federal Regulations, as set forth below. The FWS amendments to part 17 are listed first, followed by the NMFS amendments to part 227. The new part 425 is listed last.

**PART 17—[AMENDED]**

1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 16 U.S.C. 1531–1544; 16 U.S.C. 4201–4245; Pub. L. 99–625, 100 Stat. 3500, unless otherwise noted.

2. Section 17.11(h) is amended by adding the following, in alphabetical order under FISHERIES, to the List of Endangered and Threatened Wildlife to read as follows:

\* \* \* \* \*  
(h) \* \* \*

Species		Historic range	Vertebrate population where endangered or threatened	Status	When listed	Critical habitat	Special rules
Common name	Scientific name						
FISHES							
Salmon, Atlantic	<i>Salmo salar</i> ....	U.S.A., Canada, Greenland, western Europe.	U.S.A. (ME) Natural and river-specific hatchery populations in the Dennys, East Machias, Machias, Pleasant, Narraguagus, Sheepscot, Ducktrap Rivers.	T	NA	NA	17.44(v), 227.13, 425.21

3. In § 17.44 a new paragraph (v) is added to read as follows:

**§ 17.44 Special rules—fishes.**

\* \* \* \* \*

(v) Atlantic salmon (*Salmo salar*). All prohibitions and exceptions thereto regarding the distinct population segment of Atlantic salmon listed at 50 CFR 17.11 and 50 CFR 227.4(m) are specified in regulations jointly promulgated by the Fish and Wildlife Service and the National Marine Fisheries Service at 50 CFR 425.21.

**PART 227—THREATENED FISH AND WILDLIFE**

1. The authority citation for part 227 continues to read as follows:

Authority: 16 U.S.C. 1531 et seq.

2. In § 227.4 a new paragraph (m) is added to read as follows:

**§ 227.4 Enumeration of threatened species.**

\* \* \* \* \*

(m) Natural and river-specific hatchery populations of Atlantic salmon (*Salmo salar*) in the Dennys, Ducktrap, E. Machias, Machias, Narraguagus, Pleasant and Sheepscot rivers, Maine.

3. In part 227 a new § 227.13 is added to read as follows:

**§ 227.13 Atlantic Salmon.**

All prohibitions and exceptions thereto regarding the distinct population segment of Atlantic salmon listed at 50 CFR 17.11 and 50 CFR 227.4(m) are specified in regulations jointly promulgated by the Fish and Wildlife Service and National Marine Fisheries Service at 50 CFR 425.21.

1. Part 425 is added to read as follows:

**PART 425—JOINT REGULATIONS FOR ENDANGERED AND THREATENED SPECIES**

**Subpart A—General Provisions**

Sec.

- 425.1 Purpose.
- 425.2 Scope.
- 425.3 Definitions.
- 425.4 Enumeration of jointly listed endangered and threatened species.

**Subpart B—[Reserved]**

**Subpart C—Joint Regulations Governing Jointly Listed Threatened Species**

425.21 Atlantic salmon.

Authority: The Endangered Species Act of 1973, 16 U.S.C. 1531 et seq., as amended.

**Subpart A—General Provisions**

**§ 425.1 Purpose.**

The regulations contained in this part identify the species under the joint jurisdiction of the Secretary of Commerce and the Secretary of the Interior which have been determined to be endangered or threatened species under the Endangered Species Act of 1973 and establish rules and procedures to govern activities involving the species.

**§ 425.2 Scope.**

(a) The regulations contained in this part apply only to the endangered and threatened species enumerated in § 425.4.

(b) The provisions of this part are in addition to, and not in lieu of, other applicable regulations of Chapters I and II (title 50).

**§ 425.3 Definitions.**

(a) Act means the Endangered Species Act of 1973, as amended, 16 U.S.C. 1531 et seq.

(b) Atlantic salmon means the distinct population segment of Atlantic salmon listed in § 425.4(b).

(c) The Services means the Director of the Fish and Wildlife Service and the

Assistant Administrator for Fisheries,  
National Marine Fisheries Service.

**§ 425.4 Enumeration of jointly listed  
endangered and threatened species.**

(a) [Reserved]

(b) Threatened species—A distinct population segment of Atlantic salmon composed of natural and river-specific hatchery populations from the Dennys, Ducktrap, East Machias, Machias, Narraguagus, Pleasant, and Sheepscoot rivers, Maine.

**Subpart B—[Reserved]**

**Subpart C—Joint Regulations  
Governing Jointly Listed Threatened  
Species**

**§ 425.21 Atlantic salmon.**

The following provisions shall govern the activities involving Atlantic salmon:

(a) *Prohibitions.* (1) Except as provided in paragraph (b) of this section, all provisions of 50 CFR 17.31(a–b) shall apply to the distinct population segment of Atlantic salmon enumerated at 50 CFR 425.4(b). For the purposes of this section, any reference to the “Director” or the Fish and Wildlife Service shall mean “Services” as defined at 50 CFR 425.3(c). Reports required under § 17.21(c)(4) should also be sent to National Marine Fisheries Service, 1 Blackburn Drive, Gloucester, MA 01930.

(2) Any violation of applicable State fish and wildlife conservation laws or regulations with respect to the taking of the species will also be a violation of the Act.

(3) No person shall possess, sell, deliver, carry, transport, ship, import or export, by any means whatsoever, any such species taken in violation of applicable State fish and wildlife laws or regulations.

(4) No person shall attempt to commit, solicit another to commit, or cause to be committed, any offense defined in paragraphs (a) (1) through (3) of this section.

(b) *Exceptions.* (1) The Services may issue incidental take permits or permits authorizing activities which would otherwise be unlawful under paragraphs (a) (1) through (4) of this section for education purposes, scientific purposes, the enhancement or propagation for survival of Atlantic salmon, zoological exhibition, and other conservation purposes consistent with the Act in accordance with 50 CFR 17.32 and 50 CFR part 222, subpart C, Endangered Fish and Wildlife Permits, and pursuant to a section 6 Cooperative Agreement with the State of Maine, if applicable.

(2) Incidental take of Atlantic salmon will not be considered unlawful under

paragraphs (a) (1) through (4) if it results from activities conducted in accordance with:

(i) A State plan to conserve Atlantic salmon that is approved by the Services pursuant to paragraph (b)(3) of this section, and

(ii) Implementing State regulations specified in paragraph (b)(3)(iii) of this section.

(3) State plan.

(i) Upon receipt of a State plan, the Services will publish a notice of availability and allow for a 60-day comment period.

(ii) In determining whether to approve a State plan to conserve the Atlantic salmon, the Services shall consider public comments received and evaluate whether the plan meets the criteria in § 17.32(b)(2) and 50 CFR Part 222, subpart C, Endangered Fish and Wildlife Permits for determining whether to issue an incidental take permit. At a minimum, the plan should contain the following information:

(A) Description of the legal activities having a potential to incidentally take Atlantic salmon;

(B) Description of the potential impact of these activities to Atlantic salmon;

(C) Provisions for minimizing the potential impact on and for promoting the conservation of Atlantic salmon;

(D) Necessary oversight requirements; and

(E) Conditions or criteria that would trigger the immediate cessation of such activities because of the potential negative impact on Atlantic salmon.

(iii) The Services will not approve the plan until activities which are authorized and activities which are prohibited are codified into the State's fish and wildlife regulations.

(iv) The Services will monitor the implementation of the plan and will conduct annual reviews to assess progress, identify problems, and recommend corrective action. If the Services determine that the plan is not being effectively implemented, the concerns will be discussed with appropriate State officials and the nature and timing of corrective action will be jointly determined. If corrective action is not being implemented within 90 days of such discussions, plan approval and authorization for any exceptions to prohibitions on the taking of Atlantic salmon may be revoked either partially or completely. The Services will publish the findings for such revocation in the Federal Register and provide for a 30-day public comment period prior to revocation.

Dated: September 26, 1995.

Nancy Foster,

*Deputy Assistant Administrator for Fisheries,  
National Marine Fisheries Service.*

Dated: September 21, 1995.

George T. Frampton, Jr.,

*Assistant Secretary for Fish and Wildlife and  
Parks.*

BILLING CODE 4310–55–P

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric  
Administration**

**50 CFR Part 424**

[I.D. 092595A]

**Endangered and Threatened Species;  
Proposed Status for the West Coast  
Coho Salmon; Public Hearing**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of public hearings.

**SUMMARY:** NMFS is announcing dates and locations for public hearings concerning the proposed threatened listing of west coast coho salmon (*Oncorhynchus kisutch*) under the Endangered Species Act (ESA). Hearings on the proposed listings will provide the opportunity for the public to give comments and will permit an exchange of information and opinion among interested parties.

**DATES:** Written comments will be accepted until October 23, 1995. The meetings on the proposed listings will be held in October. See **SUPPLEMENTARY INFORMATION** for the specific dates and times of the hearings.

**ADDRESSES:** Send written comments to Garth Griffin, Environmental and Technical Services Division, NMFS, 525 NE Oregon Street - Suite 500, Portland, OR 97232-2737. Public hearings on the proposed listings will be held in Oregon, Washington, and California. See **SUPPLEMENTARY INFORMATION** for the specific locations of the hearings.

**FOR FURTHER INFORMATION CONTACT:** Garth Griffin, 503–231–2005; Craig Wingert, (310) 980–4021; or Marta Nammack, 301–713–1401.

**SUPPLEMENTARY INFORMATION:** On July 25, 1995, NMFS issued a proposed rule to list three evolutionarily significant units (ESUs) of west coast coho salmon (*Oncorhynchus kisutch*) as threatened under the ESA (60 FR 38011). The three coho salmon ESUs proposed for listing include: (1) Oregon coast, (2) southern

Oregon/northern California coasts, and (3) central California coast. In addition, NMFS has determined that two coho salmon ESUs warrant designation as candidates for listing due to uncertainty regarding their distribution and status. The two coho salmon ESUs proposed for candidate status include: (1) Puget Sound/Strait of Georgia, and (2) lower Columbia River/southwest Washington coast. NMFS has determined that the remaining coho salmon ESU, northwest Olympic Peninsula, WA, is presently neither threatened nor endangered. The ESA implementing regulations state that the Secretary of Commerce "shall promptly hold at least one public hearing if any person so requests within 45 days of publication of a proposed regulation to list \* \* \* a species" (50 CFR 424.16 (c)(3)).

The public will have the opportunity to provide oral and written testimony at the public hearings. Written comments on the proposed rule may also be submitted to Garth Griffin (see **ADDRESSES** and **DATES**).

The hearings are scheduled from 6 p.m. to 9 p.m. as follows:

1. Wednesday, October 11, 1995—Hatfield Marine Science Center—Meeting Room 9, 2030 Marine Science Drive, Newport, OR
2. Thursday, October 12, 1995—Gold Beach City Hall—City Council Chambers, 510 South Ellensburg Avenue, Gold Beach, OR
3. Monday, October 16, 1995—Northwest Fisheries Science Center—Auditorium, 2725 Montlake Boulevard, East Seattle, WA
4. Tuesday, October 17, 1995—Bonneville Power Administration—Complex Auditorium, 911 NE. 11th Avenue, Portland, OR
5. Tuesday, October 17, 1995—Red Lion Hotel—One Red Lion Drive, Rohnert Park, CA
6. Wednesday, October 18, 1995—Evergreen State College—Lecture Hall 5, 2700 Evergreen Parkway NW, Olympia, WA
7. Wednesday, October 18, 1995—Eureka Inn—518 7th St., Eureka, CA

These hearings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Garth Griffin (see **ADDRESSES**).

Dated: September 25, 1995.  
William W. Fox, Jr.,  
*Director, Office of Protected Resources,  
National Marine Fisheries Service.*

## 50 CFR Part 656

[I.D. 092595C]

### Atlantic Striped Bass Fisheries; Public Hearings

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of public hearings; request for comments.

**SUMMARY:** NMFS will hold public hearings to receive comments from fishery participants and other members of the public regarding proposed regulations on the harvest and possession of striped bass in the Exclusive Economic Zone of the Atlantic Ocean from Maine through North Carolina.

To accommodate people unable to attend a hearing or wishing to provide additional comments, NMFS also solicits written comments on the proposed rule.

**DATES:** Written comments on the proposed rule must be received on or before October 27, 1995. The hearings are scheduled as follows:

1. October 12, 1995, 7 to 9 p.m., Manteo, NC
2. October 16, 1995, 7 to 9 p.m., Toms River, NJ

**ADDRESSES:** Written comments should be sent to William Hogarth, Office of Fisheries Conservation and Management (F/CM), NMFS, 1315 East-West

Highway, Silver Spring, MD 20910. Clearly mark the outside of the envelope "Atlantic Striped Bass Comments."

The hearings will be held at the following locations:

1. Manteo—North Carolina Aquarium, Roanoke Island, Manteo, NC 27954
2. Toms River—Ocean County Administration Building, 101 Hooper Ave., Room 119, Toms River, NJ 08754

**FOR FURTHER INFORMATION CONTACT:** William Hogarth at 301-713-2339.

**SUPPLEMENTARY INFORMATION:** The proposed regulations are necessary to complement the rules already implemented by Atlantic coastal states through the Atlantic States Marine Fisheries Commission's (Commission) Striped Bass Management Plan. The proposed regulations are based on the fact that the Commission has declared the stocks of striped bass with the exception of Roanoke/Albemarle Sound and Delaware River stocks, recovered and has increased the allowable harvest.

A complete description of the measures, and the purpose and need for the proposed action, is contained in the proposed rule published September 27, 1995 and is not repeated here. Copies of the proposed rule may be obtained by writing (see **ADDRESSES**) or calling the contact person (see **FOR FURTHER INFORMATION CONTACT**).

The purpose of this document is to alert the interested public of the hearings and provide for public participation. The hearings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to William Hogarth by October 6, 1995 (see **ADDRESSES**).

Authority: 16 U.S.C. 1851 note.

Dated: September 25, 1995.  
Richard W. Surdi,  
*Acting Director, Office of Fisheries  
Conservation and Management, National  
Marine Fisheries Service.*

Federal Register

Vol. 60, No. 189

Friday, September 29, 1995

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## DEPARTMENT OF AGRICULTURE

### Federal Crop Insurance Corporation

#### Office of Risk Management

#### Consolidated Farm Service Agency; Notice of Specialty Crops Research Studies for Fiscal Year 1996

**SUMMARY:** The Federal Crop Insurance Corporation ("FCIC") publishes this notice to advise all interested parties of FCIC's research studies. The purpose of the crop research studies is to assist the Corporation in determining the feasibility of formulating crop insurance policies for new crops.

**EFFECTIVE DATE:** September 29, 1995.

**ADDRESSES:** Research and Evaluation Branch, FCIC, P.O. Box 419293, Kansas City, Missouri 64141.

**FOR FURTHER INFORMATION CONTACT:** Vondie W. O'Conner, Jr., Acting Chief, or Floyd Niernberger, Acting Specialty Crop Coordinator, Research and Evaluation Branch, FCIC, P.O. Box 41923, Kansas City, Missouri 64141. Telephone (816) 926-6343.

**SUPPLEMENTARY INFORMATION:** The purpose of this notice is to name the specialty crops for which research studies will be conducted in Fiscal Year 1996. Proposals for additional crops to study or comments on the crops named can be forwarded to FCIC at the address listed above.

On Friday, April 14, 1995, FCIC published a notice in the Federal Register at 60 FR 19015 to outline data collection guidelines to be used in formulating new crop insurance policies. The crop research studies will be conducted consistent with the data collection guidelines and will assist in determining the feasibility of formulating crop insurance policies for specialty crops.

On Wednesday, July 12, 1995, FCIC published a notice in the Federal Register at 60 FR 35892 listing twenty-

five specialty crops for which research studies were being prepared.

#### Notice

FCIC hereby gives notice that preliminary feasibility reports on the crops listed below are now available and a copy can be obtained from Vondie W. O'Conner, Jr., Acting Chief, or Floyd Niernberger, Acting Specialty Crop Coordinator, FCIC, Research and Evaluation Branch, P.O. Box 419293, Kansas City, Missouri 64141. Telephone (816) 926-6343.

Asparagus  
Cantaloupe  
Celery  
Forage & Turfgrass Seeds  
Hops  
Mints  
Pecans  
Strawberries  
Watermelon  
Avocados  
Carrots  
Cherries  
Hay  
Lettuce  
Mushrooms  
Pineapple  
Sweet Potatoes  
Broccoli  
Cauliflower  
Christmas Trees  
Honeydew  
Millet  
Nursery Crops  
Pistachios  
Turfgrass Sod

For Fiscal Year 1996, research studies will be done on the following crops and crop groups:

Aquaculture  
Buckwheat  
Citrus/Tropical Fruit & Trees  
Eggplant  
Nut & Nut Trees  
Sesame Seed  
Artichokes  
Cabbage  
Crambe  
Fresh Market Snap Beans  
Olives  
Spinach  
Beets  
Chile Peppers  
Cucumbers  
Garlic  
Pumpkin & Squash  
Tart Cherries

Pursuant to the authority contained in the Federal Crop Insurance Act, as

amended (7 U.S.C. 1501, *et seq.*), the FCIC herewith gives notice of the specialty crops for which research studies are being conducted in Fiscal Year 1996.

Authority: 7 U.S.C. 1506(l).

Done in Washington, D.C., on September 25, 1995.

Suzette M. Dittrich,  
*Acting Manager, Federal Crop Insurance Corporation.*

### Grain Inspection, Packers and Stockyards Administration

#### Designation for the Cairo (IL) Area

**AGENCY:** Grain Inspection, Packers and Stockyards Administration (GIPSA).

**ACTION:** Notice.

**SUMMARY:** GIPSA announces the designation of Cairo Grain Inspection Agency, Inc. (Cairo), to provide official services under the United States Grain Standards Act, as amended (Act).

**EFFECTIVE DATES:** November 1, 1995.

**ADDRESSES:** Janet M. Hart, Chief, Review Branch, Compliance Division, GIPSA, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090-6454.

**FOR FURTHER INFORMATION CONTACT:** Janet M. Hart, telephone 202-720-8525

#### SUPPLEMENTARY INFORMATION:

This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12866 and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

In the April 21, 1995, Federal Register (60 FR 19881), GIPSA asked persons interested in providing official services in the geographic area assigned to Cairo to submit an application for designation. Applications were due by May 30, 1995. Cairo, the only applicant, applied for designation in the entire area they are currently assigned.

GIPSA requested comments on the applicant in the June 30, 1995, Federal Register (60 FR 34232). Comments were due by July 31, 1995. GIPSA received two comments by the deadline. Both comments supported designation of Cairo citing the excellent service provided.

GIPSA evaluated all available information regarding the designation criteria in Section 7(f)(l)(A) of the Act; and according to Section 7(f)(l)(B), determined that Cairo is able to provide official services in the geographic area for which they applied. Effective November 1, 1995, and ending October 31, 1998, Cairo is designated to provide official inspection and Class X and Y weighing services in the geographic area specified in the April 21, 1995, Federal Register.

Interested persons may obtain official services by contacting Cairo at 618-734-0689.

**AUTHORITY:** Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

### Opportunity to Comment on the Applicants for the Alton (IL), Columbus (OH), and Farwell (TX) Areas

**AGENCY:** Grain Inspection, Packers and Stockyards Administration (GIPSA).

**ACTION:** Notice.

**SUMMARY:** GIPSA request comments on the applicants for designation to provide official services in the geographic areas currently assigned to Alton Grain Inspection Department (Alton), Columbus Grain Inspection, Inc. (Columbus), and Farwell Grain Inspection, Inc. (Farwell).

**DATES:** Comments must be postmarked, or sent by telecopier (FAX) or electronic mail by October 30, 1995.

**ADDRESSES:** Comments must be submitted in writing to Janet M. Hart, Chief, Review Branch, Compliance Division, GIPSA, USDA, Room 1647 South Building, P.O. Box 96454, Washington, DC 20090-6454. SprintMail users may respond to [A:ATTMAIL,O:USDA,ID:A36JHART]. ATTMAIL and FTS2000MAIL users may respond to !A36JHART. Telecopier (FAX) users may send comments to the automatic telecopier machine at 202-690-2755, attention: Janet M. Hart. All comments received will be made available for public inspection at the above address located at 1400 Independence Avenue, S.W., during regular business hours.

**FOR FURTHER INFORMATION CONTACT:** Janet M. Hart, telephone 202-720-8525.

#### SUPPLEMENTARY INFORMATION:

This action has been reviewed and determined not to be a rule or regulation as defined in Executive Order 12866

and Departmental Regulation 1512-1; therefore, the Executive Order and Departmental Regulation do not apply to this action.

In the August 1, 1995, Federal Register (60 FR 39147), GIPSA asked persons interested in providing official services in the geographic areas assigned to Alton, Columbus, and Farwell to submit an application for designation. There were four applicants: Alton, Columbus, and Farwell each applied for designation to provide official inspection services in the entire areas currently assigned to them; and California Department of Food and Agriculture applied for the Yuma County, Arizona, portion of the Farwell area.

GIPSA is publishing this notice to provide interested persons the opportunity to present comments concerning the applicants. Commenters are encouraged to submit reasons and pertinent data for support or objection to the designation of these applicants. All comments must be submitted to the Compliance Division at the above address. Comments and other available information will be considered in making a final decision. GIPSA will publish notice of the final decision in the Federal Register, and GIPSA will send the applicants written notification of the decision.

**AUTHORITY:** Pub. L. 94-582, 90 Stat. 2867, as amended (7 U.S.C. 71 *et seq.*)

## DEPARTMENT OF COMMERCE

### Agency Forms Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposals for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

**Agency:** National Oceanic and Atmospheric Administration (NOAA).

**Title:** Gear Identification Requirements.

**Agency Form Number:** None.

**OMB Approval Number:** None.

**Type of Request:** Existing collection in use within an OMB control number.

**Burden:** 54,089 hours.

**Number of Respondents:** 39,164.

**Avg Hours Per Response:** Varies between 2 minutes and 15 minutes depending on the requirement

(fishermen often have multiple requirements).

**Needs and Uses:** This is a generic collection of information that includes regulatory requirements for fishing gear identification under the authority of the Magnuson Fishery Conservation and Management Act to govern domestic and foreign fishing, the Atlantic Tunas Convention Act, and the South Pacific Tuna Act of 1988. The regulations further specify how the gear is to be marked, i.e., location and visibility. This information is used for enforcement purposes, and for purposes of gear identification concerning damage, loss and civil proceedings. The amount of time to mark the gear is estimated in this collection.

**Affected Public:** Individuals, businesses or other for-profit organizations.

**Frequency:** On occasion.

**Respondent's Obligation:** Mandatory.

**OMB Desk Officer:** Don Arbuckle, (202) 395-7340.

**Agency:** National Oceanic and Atmospheric Administration (NOAA).

**Title:** Vessel Identification Requirements.

**Agency Form Number:** None.

**OMB Approval Number:** None.

**Type of Request:** Existing collection in use without an OMB control number.

**Burden:** 17,159 hours.

**Number of Respondents:** 22,760.

**Avg Hours Per Response:** Ranges between 10 and 45 minutes depending on the requirement.

**Needs and Uses:** This is a generic collection of information that includes regulatory requirements for vessel identification under the authority of the Magnuson Fishery Conservation and Management Act to govern domestic and foreign fishing, the Atlantic Tunas Convention Act, and the South Pacific Tuna Act of 1988. The regulations specify that the vessel's official identification number (or international radio call) be displayed in various locations and is used primarily for enforcement purposes. Under the various regulations, vessels include fishing vessels, catcher/processors, and/or motherships. The burden hours associated with this clearance request is for the time to paint, or otherwise affix, the required identifying information on the vessel.

**Affected Public:** Individuals, businesses or other for-profit organizations.

**Frequency:** On occasion.

**Respondent's Obligation:** Mandatory.

**OMB Desk Officer:** Don Arbuckle, (202) 395-7340.

**Agency:** National Oceanic and Atmospheric Administration (NOAA).

*Title:* Vessel Monitoring and Communications Requirements.

*Agency Form Number:* None.

*OMB Approval Number:* None.

*Type of Request:* Existing collection in use without an OMB control number.

*Burden:* 9,833 hours.

*Number of Respondents:* 967 hours.

*Avg Hours Per Response:* Varies from a few seconds to 4 hours depending on the requirement.

*Needs and Uses:* This is a generic collection of information that includes regulatory requirements for vessel monitoring and communication under the authority of the Magnuson Fishery Conservation and Management Act. Fishing vessels and/or at-sea processing vessels are required to have installed transponders/vessel tracking systems on Inmarsat Communication Units for onboard communications with the National Marine Fisheries Service. The primary purpose of such equipment is to communicate the vessel's location or, in the case of Inmarsat Communication Units, communicate harvest information collected by observers aboard the vessel. The installation time of the monitoring and/or communication equipment is measured as well as the estimated transmission times for communication.

*Affected Public:* Individuals, businesses or other for-profit organizations.

*Frequency:* On occasion.

*Respondent's Obligation:* Mandatory.

*OMB Desk Officer:* Don Arbuckle, (202) 395-7340.

Copies of the above information collection proposals can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482-3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, N.W., Washington, D.C. 20230.

Written comments and recommendations for the proposed information collections should be sent to Don Arbuckle, OMB Desk Officer, Room 10202, New Executive Office Building, Washington, D.C. 20503.

Dated: September 22, 1995

Gerald Tache,

*Departmental Forms Clearance Officer, Office of Management and Organization.*

BILLING CODE 3510-CW-F

### Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

*Agency:* NIST.

*Title:* National Voluntary Laboratory Accreditation Program (NVLAP) Customer Satisfaction Survey.

*Form Number:* None.

*Agency Approval Number:* None.

*Type of Request:* New collection.

*Burden:* 200 hours.

*Number of Respondents:* 800.

*Avg Hours Per Response:* 15 minutes.

*Needs and Uses:* The National Voluntary Laboratory Accreditation Program (NVLAP) of the National Institute of Standards and Technology (NIST) plans to survey its constituent laboratories to determine the kind and quality of services they want and their level of satisfaction with existing services. The information collected will be used to identify areas in need of improvement and to provide a benchmark for future measurements of customer satisfaction.

*Affected Public:* Businesses or other for-profit, Federal Government, and State, Local or Tribal Government.

*Frequency:* One-time.

*Respondent's Obligation:* Voluntary.

*OMB Desk Officer:* Virginia Huth, (202) 395-6929.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Tache, DOC Forms Clearance Officer, (202) 482-3271, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230.

Written comments and recommendations for the proposed information collection should be sent to Virginia Huth, OMB Desk Officer, Room 10202 New Executive Office Building, Washington, DC 20503.

Dated: September 22, 1995.

Gerald Tache,

*Departmental Forms Clearance Officer, Office of Management and Organization.*

### Bureau of the Census

#### Notice of Proposal to Submit an Information Collection to the Office of Management and Budget (OMB)

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-submission consultation program to provide the general public and other Federal agencies with an opportunity to comment on proposed and/or continuing information collections before they are submitted to OMB for review. This program helps to ensure

that requested data can be provided in the desired format, reporting burden is minimized, reporting forms are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Census Bureau, within the Department of Commerce, is soliciting comments concerning its plans to submit a revised question series for educational attainment, which is part of the monthly Current Population Survey (CPS), to OMB for review.

**DATES:** Written comments must be submitted on or before November 28, 1995. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below of your intention to do so as soon as possible.

**ADDRESSES:** Direct all written comments to Gerald Taché, Departmental Forms Clearance Officer, Department of Commerce, Room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information on these questions should be directed to Gregory Weyland, Bureau of the Census, FOB 3, Room 3340, Washington, DC 20233-8400, (301) 457-3806.

#### Proposed Educational Attainment Question Series

- SEA1 What is the highest level of school you have completed or the highest degree you have received?
- 31 Less than 1st grade
  - 32 1st, 2nd, 3rd, or 4th grade
  - 33 5th or 6th grade
  - 34 7th or 8th grade
  - 35 9th grade
  - 36 10th grade
  - 37 11th grade
  - 38 12th grade NO DIPLOMA
  - 39 HIGH SCHOOL GRADUATE—high school DIPLOMA, or the equivalent (for example: GED)
  - 40 Some college but no degree
  - 41 Associate degree in college—Occupational/vocational program
  - 42 Associate degree in college—Academic program
  - 43 Bachelor's degree (For example: BA, AB, BS)
  - 44 Master's degree (For example: MA, MS, MEng, MEd, MSW, MBA)
  - 45 Professional School degree (For example: MD, DDS, DVM, LLB, JD)
  - 46 Doctorate degree (For example: PhD, EdD)

#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Bureau of the Census has conducted the CPS monthly for over 50 years. Its primary purpose is to provide monthly statistics on the labor force status of the American population, including the official unemployment rate. It is authorized by Title 13, United States Code, Section 182; and Title 29, United States Code, Sections 1-9. The Bureau of the Census and the Bureau of Labor Statistics (BLS) sponsor this survey.

Several years ago (1992), the CPS changed its methodology for collecting educational attainment from a "years attended basis" to a "degree received basis." While this change was embraced by most analysts as being a more accurate measure of this characteristic, it did disrupt a number of time series statistics using the "years attended" measure. Given this background, BLS and Census Bureau staff researched and tested a number of revised questionnaires in an attempt to devise a series of questions that would collect both measures of educational attainment, while maintaining consistency with the current "degree received measure." Note that question SEA1 above is the current "degree received" question and will retain its function as the primary measure of educational attainment.

##### II. Current Actions

In July 1995, we collected data using the revised series of questions as a supplement in one-fourth of the CPS sample. The purpose of this test was to gauge how the new question series performed and, if necessary, to provide a set of bridge statistics on educational attainment that would allow a smooth transition to the new question series. Currently, staff at both the BLS and the Census Bureau are analyzing the results of this test. If the results are favorable, we plan to incorporate the new question series into the January 1996 CPS instrument. This submission to OMB is being made in anticipation of favorable test results and may be withdrawn if that does not occur.

##### III. Request for Comments

After reviewing the information collection instrument (see above), prospective respondents and other interested parties should comment on

the actions discussed in Item II. The following general guidelines are provided to assist in the preparation of responses. Please include the name of this information collection, the CPS educational attainment revision, in your comments.

As a potential data user:

A. Did you use educational attainment data from the CPS prior to 1992?

B. If so, did the switch to "highest degree received" cause any problems with your time series or other analyses?

C. The suggested item series is intended to continue the current "highest degree received" concept while reinstating the "last year completed" concept (used prior to 1992 in the CPS). Do you think this objective is served by these items?

D. Can you use data at the levels of detail indicated?

E. For what purpose do you or would you use these data? Please be specific.

F. As a user of these data, can you suggest modifications to the proposed items that if incorporated, would better serve your analytical needs? If so, please submit your suggested changes with a short statement describing the perceived benefits.

As a potential respondent:

A. We estimate that it will take the average respondent about 30 seconds to answer the appropriate questions. Is this a reasonable burden?

B. Are the questions sensitive in nature? If so, please be specific in describing why.

C. Are the questions understandable and framed in a sensible manner? If not, what items are confusing and how should we clarify them?

D. In your opinion, could a proxy respondent (i.e., one household member providing information for another household member) provide complete and accurate answers? If not, why?

E. Do you have any suggestions on ways of reducing the burden associated with responding to this information collection?

The Census Bureau also is interested in receiving comments from persons regarding their views on the need for this information collection.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: September 26, 1995.

Gerald Taché,

*Departmental Forms Clearance Officer, Office of Management and Organization.*

BILLING CODE 3510-07-M

**Foreign-Trade Zones Board**

[Order No. 769]

**Revision of Grant of Authority; Subzone 9E, Chevron U.S.A. Products Company, (Oil Refinery), Ewa, Oahu, Hawaii**

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Board (the Board) authorized subzone status at the oil refinery of Chevron U.S.A. Products Company, in Ewa, Oahu, Hawaii, in 1988 (Subzone 9E, Board Order 415, 53 FR 53040, 12/30/88);

Whereas, the Hawaii Department of Business, Economic Development and Tourism, on behalf of the State of Hawaii, grantee of FTZ 9, has requested pursuant to § 400.32(b)(1)(i), a revision (filed 7/14/95, A(32b1)-12-95; FTZ Doc. 46-95, assigned 8/30/95) of the grant of authority for FTZ Subzone 9E which would make its scope of authority identical to that recently granted for FTZ Subzone 199A at the refinery complex of Amoco Oil Company, Texas City, Texas (Board Order 731, 60 FR 13118, 3/10/95); and,

Whereas, the request has been reviewed and the Assistant Secretary for Import Administration, acting for the Board pursuant to § 400.32(b)(1), concurs in the recommendation of the Executive Secretary, and approves the request;

Now Therefore, the Board hereby orders that, subject to the Act and the Board's regulations, including § 400.28, Board Order 415 is revised to replace the two conditions currently listed in the Order with the following conditions:

1. Foreign status (19 CFR §§ 146.41, 146.42) products consumed as fuel for the refinery shall be subject to the applicable duty rate.

2. Privileged foreign status (19 CFR § 146.41) shall be elected on all foreign merchandise admitted to the subzone, except that non-privileged foreign (NPF) status (19 CFR § 146.42) may be elected on refinery inputs covered under HTSUS Subheadings # 2709.00.1000-# 2710.00.1050 and # 2710.00.2500 which are used in the production of:

- petrochemical feedstocks and refinery by-products (FTZ staff report, Appendix B);
- products for export; and,
- products eligible for entry under HTSUS # 9808.00.30 and 9808.00.40 (U.S. Government purchases).

3. The authority with regard to the NPF option is initially granted until

September 30, 2000, subject to extension.

Signed at Washington, DC, this 20th day of September 1995.

Susan G. Esserman,

*Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.*

[Order No. 770]

**Revision of Grant of Authority; Subzone 84F; Phibro Refining Inc., (Oil Refinery), Houston, Texas**

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Board (the Board) authorized subzone status at the oil refinery of Phibro Refining Inc., in Houston, Texas, in 1991 (Subzone 84F, Board Order 552, 56 FR 67058, 12/27/91);

Whereas, the Port of Houston Authority, grantee of FTZ 84F, has requested pursuant to § 400.32(b)(1)(i), a revision (filed 7/18/95, A(32b1)-13-95; FTZ Doc. 47-95, assigned 8/30/95) of the grant of authority for FTZ Subzone 84F which would make its scope of authority identical to that recently granted for FTZ Subzone 199A at the refinery complex of Amoco Oil Company, Texas City, Texas (Board Order 731, 60 FR 13118, 3/10/95); and,

Whereas, the request has been reviewed and the Assistant Secretary for Import Administration, acting for the Board pursuant to § 400.32(b)(1), concurs in the recommendation of the Executive Secretary, and approves the request;

Now therefore, the Board hereby orders that, subject to the Act and the Board's regulations, including § 400.28, Board Order 552 is revised to replace the two conditions currently listed in the Order with the following conditions:

1. Foreign status (19 CFR §§ 146.41, 146.42) products consumed as fuel for the refinery shall be subject to the applicable duty rate.

2. Privileged foreign status (19 CFR § 146.41) shall be elected on all foreign merchandise admitted to the subzone, except that non-privileged foreign (NPF) status (19 CFR § 146.42) may be elected on refinery inputs covered under HTSUS Subheadings # 2709.00.1000-# 2710.00.1050 and # 2710.00.2500 which are used in the production of:

- petrochemical feedstocks and refinery by-products (FTZ staff report, Appendix B);
- products for export; and,
- products eligible for entry under HTSUS # 9808.00.30 and 9808.00.40 (U.S. Government purchases).

3. The authority with regard to the NPF option is initially granted until September 30, 2000, subject to extension.

Signed at Washington, DC, this 20th day of September 1995.

BILLING CODE 3510-DS-P

[Order No. 768]

**Revision of Grant of Authority; Subzone 122L—Site 5, Koch Refining Company, L.P., (Oil Refinery), Corpus Christi, Texas**

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, the Foreign-Trade Zones (FTZ) Board (the Board) authorized subzone status at the oil refinery of Koch Refining Company, L.P., in Corpus Christi, Texas, in 1985 (Subzone 122L—Site 5 (formerly Subzone 122B owned by Southwestern Refining), Board Order 310, 50 FR 38020, 9/19/85);

Whereas, the Port of Corpus Christi Authority, grantee of FTZ 122, has requested pursuant to § 400.32(b)(1)(i), a revision (filed 7/13/95, A(32b1)-11-95; FTZ Doc. 45-95, assigned 8/30/95) of the grant of authority for FTZ Subzone 122L—Site 5 which would make its scope of authority identical to that recently granted for FTZ Subzone 199A at the refinery complex of Amoco Oil Company, Texas City, Texas (Board Order 731, 60 FR 13118, 3/10/95); and,

Whereas, the request has been reviewed and the Assistant Secretary for Import Administration, acting for the Board pursuant to § 400.32(b)(1), concurs in the recommendation of the Executive Secretary, and approves the request;

Now therefore, the Board hereby orders that, subject to the Act and the Board's regulations, including § 400.28, Board Order 310 is revised to include the following conditions:

1. Foreign status (19 CFR §§ 146.41, 146.42) products consumed as fuel for

the refinery (Subzone 122L—Site 5) shall be subject to the applicable duty rate.

2. Privileged foreign status (19 CFR § 146.41) shall be elected on all foreign merchandise admitted to Subzone 122L—Site 5, except that non-privileged foreign (NPF) status (19 CFR § 146.42) may be elected on refinery inputs covered under HTSUS Subheadings # 2709.00.1000—# 2710.00.1050 and # 2710.00.2500 which are used in the production of:

- petrochemical feedstocks and refinery by-products (FTZ staff report, Appendix B);
- products for export; and,
- products eligible for entry under HTSUS # 9808.00.30 and 9808.00.40 (U.S. Government purchases).

3. The authority with regard to the NPF option for Subzone 122L—Site 5 is initially granted until September 30, 2000, subject to extension.

BILLING CODE 3510-DS-P

**International Trade Administration**

**[A-428-810]**

**High-Tenacity Rayon Filament Yarn from Germany; Final Results of Antidumping Duty Administrative Review**

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of final results of antidumping duty administrative review.

**SUMMARY:** On July 12, 1995, the Department of Commerce (the Department) published the preliminary results of its administrative review of the antidumping duty order on high-tenacity rayon filament yarn from

Germany (60 FR 35896). The review covered one manufacturer/exporter, Akzo Nobel Faser A.G. and Akzo Nobel Fibers, Inc. (collectively Akzo), of the subject merchandise and the review period June 1, 1993, through May 31, 1994.

We gave interested parties an opportunity to comment on our preliminary results. We received no comments. The final results are unchanged from those presented in the preliminary results.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Matthew Blaskovich or Zev Primor, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482-5831/4114.

**SUPPLEMENTARY INFORMATION:**

**Background**

On June 30, 1992, the Department published in the Federal Register the antidumping duty order on high-tenacity rayon filament yarn from Germany (57 FR 29062). On June 7, 1994, the Department published a notice in the Federal Register notifying interested parties of the opportunity to request an administrative review of high-tenacity rayon filament yarn from Germany (59 FR 29441). On June 30, 1994, Akzo, a producer/exporter, requested, in accordance with 19 CFR 353.22(a), that we conduct an administrative review of exports to the United States by Akzo Nobel Faser A.G. and Akzo Nobel Fibers, Inc., for the period June 1, 1993, through May 31, 1994. We published a notice of initiation of the antidumping duty administrative review on July 15, 1994 (59 FR 36160). On July 12, 1995, the Department published in the Federal Register the preliminary results of its administrative review of the antidumping duty order on high-tenacity rayon filament yarn from Germany (60 FR 35896). The Department has now completed that review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

**Applicable Statutes and Regulations**

Unless otherwise stated, all citations to the statutes and to the Department's regulations are references to the provisions as they existed on December 31, 1994.

### Scope of the Review

The product covered by this administrative review is high-tenacity rayon filament yarn from Germany. During the review period, such merchandise was classifiable under Harmonized Tariff Schedule (HTS) item number 5403.10.30.40. High-tenacity rayon filament yarn is a multifilament single yarn of viscose rayon with a twist of five turns or more per meter, having a denier of 1100 or greater, and a tenacity greater than 35 centinewtons per tex. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive as to the scope of this proceeding.

### Final Results of the Review

We invited interested parties to comment on the preliminary results. We received no comments. The final results are therefore unchanged from those presented in the preliminary results, and we determine that a margin of zero percent exists for Akzo for the period June 1, 1993, through May 31, 1994.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for Akzo will be the rate established in the final results of this review, which in this case, is a zero cash deposit rate; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less than fair value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate for the manufacturer of the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review by the Department, the cash deposit rate will be 24.58 percent, the all other rate established in the LTFV investigation.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that

reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (APOs) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and the terms of an APO is a sanctionable violation.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: September 22, 1995.  
Susan G. Esserman,  
*Assistant Secretary for Import Administration.*

#### **Polyethylene Terephthalate Film, Sheet, and Strip From the Republic of Korea; Preliminary Results of Antidumping Duty Administrative Review and Notice of Intent To Revoke Order in Part**

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of Preliminary Results of Antidumping Duty Administrative Review, and Notice of Intent to Revoke in Part.

**SUMMARY:** In response to requests from three respondents, three U.S. producers, and one interested party, the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on polyethylene terephthalate film, sheet, and strip (PET film) from the Republic of Korea. The review covers four manufacturers/exporters of the subject merchandise to the United States during the periods June 1, 1992 through May 31, 1993 and June 1, 1993 through May 31, 1994. The reviews indicate the existence of dumping margins for certain firms during the relevant periods.

We are announcing our intent to revoke the order for Cheil Synthetics, Inc. (Cheil). We preliminarily determined that Cheil has not sold the subject merchandise at less than foreign market value (FMV) in these reviews

and for at least three consecutive administrative review periods. Cheil has also submitted a certification that it will not sell at less than FMV in the future.

We have preliminarily determined that sales have been made below foreign market value (FMV). If these preliminary results are adopted in our final results of administrative review, we will instruct the U.S. Customs Service (U.S. Customs) to assess antidumping duties equal to the difference between the United States price (USP) and the FMV.

We invite interested parties to comment on these preliminary results. Parties who submit argument in this proceeding are requested to submit with the argument (1) a statement of the issue and (2) a brief summary of the argument.

**EFFECTIVE DATE:** September 29, 1995.  
**FOR FURTHER INFORMATION CONTACT:** Michael J. Heaney or John Kugelman, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, telephone: (202) 482-4475 or 482-0649, respectively.

#### **SUPPLEMENTARY INFORMATION:**

##### Background

On June 5, 1991, the Department of Commerce published in the Federal Register (56 FR 25660) the antidumping duty order on PET film from the Republic of Korea. On June 7, 1993 and June 7, 1994, the Department published (58 FR 31941 and 59 FR 29411) the respective notices of "Opportunity to Request an Administrative Review" of this antidumping duty order for the periods June 1, 1992 through May 31, 1993 (second review) and June 1, 1993 through May 31, 1994 (third review). We received timely requests for review from Kolon Industries, Inc. (Kolon), SKC Limited (SKC), and STC Corporation (STC) for the second review. The petitioners, E.I. DuPont Nemours & Co., Inc., Hoechst Celanese Corporation, and ICI Americas, Inc., requested reviews of Cheil, Kolon, SKC, and STC for the second review. We received timely requests for review from Cheil, Kolon, SKC, and STC for the third review. The petitioners also requested reviews for Cheil, Kolon, SKC, and STC for the third review. Toray, a domestic interested party, also requested reviews of Cheil, Kolon, SKC, and STC for the third review. On July 21, 1993 and July 15, 1994, the Department published (58 FR 39007 and 59 FR 36160) the respective notices of initiation for the second and third reviews.

The Department is now conducting these reviews in accordance with section 751 of the Tariff Act of 1930, as amended (the Act). Unless otherwise indicated, all citations to the statute and to the Department's regulations are in reference to the provisions as they existed on December 31, 1994.

We have preliminarily determined to revoke the antidumping duty order for Cheil. Cheil submitted a request in accordance with 19 CFR 353.25(b) to revoke the order with respect to its sales of PET film in the United States; that request constituted a request for review. Cheil's request was accompanied by a certification that it had not sold PET film to the United States at less than FMV for at least a three-year period, including the subject review periods, and would not do so in the future. Since we preliminarily determine that Cheil has not sold the subject merchandise at less than FMV for at least the required three-year period, we intend to revoke the order with respect to Cheil.

#### Scope of the Review

Imports covered by the review are shipments of all gauges of raw, pretreated, or primed polyethylene terephthalate film, sheet, and strip, whether extruded or coextruded. The films excluded from this review are metallized films and other finished films that have had at least one of their surfaces modified by the application of a performance-enhancing resinous or inorganic layer of more than 0.00001 inches (0.254 micrometers) thick. The Department has determined that roller transport cleaning film which has at least one of its surfaces modified by the application of 0.5 micrometers of SBR latex is not within the scope of the order. PET film is currently classifiable under Harmonized Tariff Schedule (HTS) subheading 3920.62.00.00. The HTS subheading is provided for convenience and for U.S. Customs purposes. The written description remains dispositive as to the scope of the product coverage.

#### Verification

As provided in section 776(b) of the Act, we verified information provided by Cheil and SKC for the second review by using standard verification procedures including inspection of the manufacturer's facilities, the examination of relevant sales and financial records, and selection of original documentation containing relevant information. Our verification results are outlined in the public versions of the verification reports.

#### United States Price (USP)

In calculating USP, the Department treated respondents' sales as purchase price (PP) sales, as defined in section 772(b) of the Act, when the merchandise was sold to unrelated U.S. purchasers prior to importation. The Department treated respondents' sales as exporter's sale price (ESP) sales, as defined in section 772(c) of the Act, when the merchandise was sold to unrelated U.S. purchasers after importation.

PP was based on ex-factory, f.o.b. Korean port, f.o.b. customer's specific delivery point, c.i.f. U.S. port, or packed, delivered prices to unrelated purchasers in the United States. We made adjustments, where applicable, for Korean and U.S. brokerage and handling, terminal handling charges, Korean and U.S. inland freight, ocean freight, marine insurance, containerization expenses and taxes, sample movement charges, return movement charges, discounts, wharfage expense, consolidated freight charges, and U.S. duties in accordance with section 772(d)(2) of the Act.

ESP was based on ex-warehouse, f.o.b. customer's specific delivery point, or packed, delivered prices to unrelated purchasers in the United States. We made adjustments, where applicable, for Korean and U.S. brokerage and handling, Korean and U.S. inland freight, ocean freight, marine insurance, consolidated freight charges, miscellaneous handling charges, containerization expenses and taxes, wharfage expenses, warranty expenses, rebates, discounts, U.S. duties, U.S. commissions, U.S. credit expenses, and indirect selling expenses (which include inventory carrying costs and pre-sale warehousing expenses), in accordance with section 772(d)(2) of the Act.

We increased both PP and ESP by the amount of import duties which were rebated or which were not collected by reason of the exportation of PET film, pursuant to section 772(d)(1)(B) of the Act.

We adjusted USP for taxes in accordance with our practice as outlined in *Silicomanganese from Venezuela*, Preliminary Determination of Sales at Less Than Fair Value, 59 FR 31204, June 17, 1994.

With respect to subject merchandise to which value was added in the United States by SKC and STC prior to sale to unrelated U.S. customers, we deducted any increased value in accordance with section 772(e)(3) of the Act. The value added consists of the costs associated with the production and sale of the further-processed merchandise, other than the costs associated with the

imported PET film, an a proportional amount of profit or loss related to the value added. Profit or loss was calculated by deducting from the sales price of the further-processed merchandise all production and selling costs incurred by SKC and STC in the value-added process. The profit or loss was then allocated proportionally to all components of cost.

No other adjustments were claimed or allowed.

#### Foreign Market Value

In order to determine whether there were sufficient sales of PET film in the home market to serve as a viable basis for calculating foreign market value (FMV), we compared the volume of home market sales of PET film to the volume of third-country sales of PET film, in accordance with section 773(a)(1) of the Act and 19 CFR 353.48 (a). All four respondents had viable home markets with respect to sales of PET film made during the PORs.

Due to the existence of sales below the cost of production (COP) in the original investigation for Cheil and SKC, which was the last completed proceeding at the time we initiated the COP investigations, the Department had reasonable grounds to believe or suspect that sales below the COP may have occurred during these reviews. See *Oil Country Tubular Goods from Canada* Preliminary Results of Antidumping Duty Administrative Review, 59 FR 18798, 18799 (April 20, 1994). Accordingly, the Department initiated a COP investigation for Cheil and SKC for the second and third administrative reviews in accordance with section 773 (b) of the Act.

Furthermore, based on an allegation by petitioners, the Department also determined that reasonable grounds existed to believe or suspect that sales below cost had been made by Kolon and STC in the third administrative review. See *Carbon Steel Butt-Weld Pipe Fittings from Taiwan*; Preliminary Results of Administrative Review, 59 FR 66001 (December 22, 1994). Thus, the Department initiated a COP investigation for Kolon and STC for the third administrative review in accordance with section 773(b) of the Act. However, because the petitioners filed an untimely allegation of sales below cost for Kolon and STC for the second review, we did not initiate a sales below cost investigation for these companies for that period.

We performed a model-specific COP test, in which we examined whether each home market sale was priced below the merchandise's COP. We calculated the COP of the merchandise

using Cheil's, SKC's, Kolon's, and STC's cost of materials and fabrication, and general expenses, in accordance with 19 CFR 353.51(c). Respondent's materials and fabrication expenses consisted of materials, labor, and overhead costs incurred for film manufacturing. General expenses consisted of general and administrative expenses as well as net interest expenses. For each model, we compared this sum to the reported home market unit price, net of price adjustments and movement expenses.

We relied upon data submitted by the respondents (See August 17, 1995 memo from the Director of the Office of Accounting to the AS/IA regarding cost methodology) except in the following instances where costs were not appropriately quantified or valued.

For SKC, we adjusted the cost of manufacturing for A-grade and B-grade film types to correct for yield differences between grades. We corrected general and administrative expenses to exclude dividend income and include the amortization of new stock issuance costs. We recalculated interest expense using amounts reported in SKC's financial statements, rather than the amount reported in the combined financial statements of the Sunkyong Group. Finally, we increased SKC's material costs for dimethyl terephthalate and terephthalic acid purchased from a related part to reflect the related party's cost of producing those materials.

For Cheil, we recalculated general and administrative expenses based on the total activity of the company reported in Cheil's 1992 or 1993 income statements, rather than on a departmental basis. We disallowed certain income as an offset to interest expense, since Cheil could not substantiate that the income was short-term in nature. For the second review, we increased Cheil's material cost for ethylene glycol purchased from a related party to reflect the related party's production costs.

In accordance with section 773(b) of the Act, we also examined whether the home market sales of each model were made at prices below its COP in substantial quantities over an extended period of time, and whether such sales were made at prices which would permit recovery of all costs within a reasonable period of time in the normal course of trade.

For each model where less than ten percent, by quantity, of the home market sales during the POR were made at prices below the COP, we included all sales of that model in the computation

of FMV. For each model where ten percent or more, but less than ninety percent, of the home market sales during the POR were priced below the merchandise's COP, we excluded from the calculation of FMV those home market sales which were priced below the merchandise's COP, provided that the below-cost sales were made over an extended period of time. For each model where ninety percent or more of the home market sales during the POR were priced below the COP, we disregarded all sales of that model from our analysis. See Preliminary Results and Partial Termination of Antidumping Duty Administrative Reviews; Tapered Roller Bearings, Four inches or Less in Outside Diameter, and Certain Components Thereof, from Japan, 58 FR 69336, 69338 (December 30, 1993).

In order to determine whether below-cost sales had been made over an extended period of time, we compared the number of months in which below-cost sales occurred for each product to the number of months during the POR in which each model was sold. If a product was sold in fewer than three months during the POR, we did not exclude the below-cost sales unless there were below-cost sales in each month of sale. If a product was sold in three or more months, we did not exclude the below-cost sales unless there were below-cost sales in at least three months during the POR.

See Notice of Final Determination of Sales at Less Than Fair Value: Certain Carbon Steel Butt Weld Pipe Fittings from Thailand, 60 FR 10552, 10554 (February 27, 1995).

In addition, the Department also determined that no evidence was presented to indicate that below-cost COP prices would permit recovery of all costs within a reasonable period of time in the normal course of trade. Therefore, in accordance with section 773(b) we disregarded these below-cost sales from our FMV calculations.

In accordance with section 773(b) of the Act, where home market sales (as identified in the model match) were excluded from our analysis because they were priced below the COP, or where the remaining sales were determined to be inadequate as a basis for determining foreign market value, we used the constructed value of the merchandise sold in the United States as the basis for FMV. We calculated the constructed value, in accordance with section 773(e) of the Tariff Act, as the sum of the cost of materials and fabrication expenses of the product sold in the United States,

home market general expenses, and home market profit. In accordance with section 773(b)(i) of the Act, for home market general expenses, we used the larger of the actual general expenses reported by the respondents or ten percent of the cost of materials and fabrication expenses, the statutory minimum for general expenses. For home market profit, we used the larger of the actual profit reported by the respondents or the statutory minimum of eight percent of the sum of the cost of materials, fabrication and general expenses in accordance with section 773(b)(i) of the Act.

For those models which we determined were not sold below the COP and were of a sufficient quantity to calculate FMV, we calculated FMV based on delivered prices to unrelated customers in the home market. In calculating FMV, we made adjustments, where appropriate, for rebates, Korean inland freight and insurance, Korean brokerage and loading charges, and home market credit expenses in accordance with section 773(a)(1) of the Act. We deducted home market packing costs from the home market price and added U.S. packing costs to the FMV. We also made, where applicable, difference-in-merchandise adjustments.

For comparison to PP sales, pursuant to 19 CFR 353.56, we made circumstance-of-sale adjustments to FMV, where appropriate, for post-sale warehousing expenses, Korean and U.S. bank charges, U.S. credit expenses, and U.S. warranty expenses. We made further adjustments, where appropriate, for U.S. commissions in accordance with 19 CFR 353.56(a)(2). Where commissions were paid on U.S. sales and not paid on home market sales, we allowed an offset to FMV amounting to the lesser of the weighted-average home market indirect selling expenses or the U.S. commissions in accordance with 19 CFR 353.56(b) of the Department's regulations.

For comparison to ESP sales, we allowed an ESP offset to FMV, amounting to the lesser of the weighted-average total of home market indirect selling expenses or the total U.S. indirect selling expenses, in accordance with 19 CFR 353.56(b)(2).

No other adjustments were claimed or allowed.

#### Preliminary Results of the Review

As a result of this review, we preliminarily determine that the following margins exist for the periods indicated:

Manufacturer/exporter	Period	Per- cent margin
Cheil .....	06/01/92-05/31/93	0.01
Cheil .....	06/01/93-05/31/94	0.01
Kolon .....	06/01/92-05/31/93	0.12
Kolon .....	06/01/93-05/31/94	0.12
SKC .....	06/01/92-05/31/93	12.34
SKC .....	06/01/93-05/31/94	16.20
STC .....	06/01/92-05/31/93	0.08
STC .....	06/01/93-05/31/94	0.94

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and FMV may vary from the percentages stated above. Upon completion of the review the Department will issue appraisal instructions on each exporter directly to the U.S. Customs Service.

Interested parties may request disclosure within five days of the date of publication of this notice, and may request a hearing within ten days of the date of publication. Any hearing, if requested, will be held as early as convenient for the parties but not later than 44 days after the date of publication or the first work day thereafter. Case briefs or other written comments from interested parties may be submitted not later than 30 days after the date of publication of this notice. Rebuttal briefs and rebuttal comments, limited to issues in the case briefs, may be filed not later than 37 days after the date of publication. The Department will publish the final results of this administrative review, including the results of its analysis of issues raised in any such written comments or at a hearing.

Furthermore, the following deposit requirements will be effective for all shipments of polyethylene terephthalate film, sheet, and strip, from Korea, entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Act.

(1) The cash deposit rate for the reviewed companies will be those rates established in the final results of the review of the third period. If the rates for Cheil and Kolon remain *de minimis*, (i.e., less than 0.5 percent) there will be no cash deposits required on shipments from these firms of subject merchandise;

(2) For previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period;

(3) If the exporter is not a firm covered in this review, a prior review, or in the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and

(4) If neither the exporter nor the manufacturer is a firm covered in this or any previous review conducted by the Department, the cash deposit rates will be 4.88 percent, the "all-others" rate established in the LTFV investigation (56 FR 16305).

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period.

Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: September 21, 1995.  
Susan G. Esserman,  
*Assistant Secretary for Import Administration.*  
[FR Doc. 95-24302 Filed 9-28-95; 8:45 am]  
BILLING CODE 3510-DS-M

**Intent to Revoke Antidumping Duty Orders and Findings and to Terminate Suspended Investigations**

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of Intent to Revoke Antidumping Duty Orders and Findings and to Terminate Suspended Investigations.

**SUMMARY:** The Department of Commerce (the Department) is notifying the public of its intent to revoke the antidumping duty orders and findings and to terminate the suspended investigations listed below. Domestic interested parties who object to these revocations and terminations must submit their comments in writing no later than the last day of October 1995.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Michael Panfeld or the analyst listed under Antidumping Proceeding at: Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW., Washington, DC. 20230, telephone (202) 482-4737.

**SUPPLEMENTARY INFORMATION:**

Background

The Department may revoke an antidumping duty order or finding or terminate a suspended investigation if the Secretary of Commerce concludes that it is no longer of interest to interested parties. Accordingly, as required by § 353.25(d)(4) of the Department's regulations, we are notifying the public of our intent to revoke the following antidumping duty orders and findings and to terminate the suspended investigations for which the Department has not received a request to conduct an administrative review for the most recent four consecutive annual anniversary months:

- Antidumping Proceeding
- Japan
- Steel Wire Rope
- A-588-045
- 38 FR 28571
- October 15, 1973
- Contact: Davina Hashmi at (202) 482-3813
- Yugoslavia
- Industrial Nitrocellulose
- A-479-801
- 55 FR 41870
- October 16, 1990
- Contact: Rebecca Trainor at (202) 482-0666

If no interested party requests an administrative review in accordance with the Department's notice of

opportunity to request administrative review, and no domestic interested party objects to the Department's intent to revoke or terminate pursuant to this notice, we shall conclude that the antidumping duty orders, findings, and suspended investigations are no longer of interest to interested parties and shall proceed with the revocation or termination.

#### Opportunity to Object

Domestic interested parties, as defined in § 353.2(k)(3), (4), (5), and (6) of the Department's regulations, may object to the Department's intent to revoke these antidumping duty orders and findings or to terminate the suspended investigations by the last day of October 1995. Any submission to the Department must contain the name and case number of the proceeding and a statement that explains how the objecting party qualifies as a domestic interested party under § 353.2(k) (3), (4), (5), and (6) of the Department's regulations.

Seven copies of such objections should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, Room B-099, U.S. Department of Commerce, Washington, D.C. 20230. You must also include the pertinent certification(s) in accordance with § 353.31(g) and § 353.31(i) of the Department's regulations. In addition, the Department requests that a copy of the objection be sent to Michael F. Panfeld in Room 4203. This notice is in accordance with 19 CFR 353.25(d)(4)(i).

Dated: September 25, 1995.

Joseph A. Spetrini,

*Deputy Assistant Secretary for Compliance.*

#### Light Scattering Instruments and Parts Thereof from Japan; Final Results of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of final results of Antidumping Duty Administrative Review.

**SUMMARY:** On August 16, 1995, the Department of Commerce (the Department) published the preliminary results of its administrative review of the antidumping duty order on light-scattering instruments and parts thereof from Japan (60 FR 42527). The review

covered one manufacturer/exporter, Otsuka Electronics Co., Ltd. (Otsuka), of the subject merchandise and the review period November 1, 1993, through October 31, 1994.

We gave interested parties an opportunity to comment on our preliminary results. We received no comments. The final results are unchanged from those presented in the preliminary results.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Leon McNeill or Maureen Flannery, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482-4733.

#### SUPPLEMENTARY INFORMATION:

##### Background

On November 19, 1990, the Department published in the Federal Register the antidumping duty order on light-scattering instruments (LSIs) and parts thereof from Japan (55 FR 48144). On November 10, 1994, the Department published a notice in the Federal Register notifying interested parties of the opportunity to request an administrative review of light-scattering instruments and parts thereof from Japan (59 FR 56034). On November 2, 1994, petitioner, Wyatt Technology Corporation (Wyatt) requested, in accordance with 19 CFR 353.22(a), that we conduct an administrative review of exports to the United States by Otsuka, for the period November 1, 1993, through October 31, 1994. We published a notice of initiation of the antidumping duty administrative review on December 15, 1994 (59 FR 64650). On August 16, 1995, the Department published in the Federal Register the preliminary results of its administrative review of the antidumping duty order on light-scattering instruments and parts thereof from Japan (60 FR 42527). The Department has now completed that review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

##### Applicable Statutes and Regulations

Unless otherwise stated, all citations to the statutes and to the Department's regulations are references to the provisions as they existed on December 31, 1994.

##### Scope of the Review

The products covered by this administrative review are light-scattering instruments and parts thereof from Japan. The Department defines

such merchandise as LSIs and the parts thereof, specified below, that have classical measurement capabilities, whether or not also capable of dynamic measurement. Classical measurement (also known as static measurement) capability usually means the ability to measure absolutely (i.e., without reference to molecular standards) the weight and size of macromolecules and submicron particles in solution, as well as certain molecular interaction parameters, such as the so-called second viral coefficient. (An instrument that uses single-angle instead of multi-angle measurement can only measure molecular weight and the second viral coefficient.) Dynamic measurement (also known as quasi-elastic measurement) capability refers to the ability to measure the diffusion coefficient of molecules or particles in suspension and deduce therefrom features of their size and size distribution. LSIs subject to this review employ laser light and may use either a single-angle or multi-angle technique.

The following parts are included in the scope of this administrative review when they are manufactured according to specifications and operational requirements for use only in an LSI as defined in the preceding paragraph: scanning photomultiplier assemblies, immersion baths (to provide temperature stability and/or refractive index matching), sample-containing structures, electronic signal-processing boards, molecular characterization software, preamplifier/discriminator circuitry, and optical benches. LSIs subject to this review may be sold inclusive or exclusive of accessories such as personal computers, cathode ray tube displays, software, or printer. LSIs are currently classifiable under Harmonized Tariff Schedule (HTS) subheading 9027.30.40. LSI parts are currently classifiable under HTS subheading 9027.90.40. HTS subheadings are provided for convenience and U.S. Customs Service purposes. The written product description remains dispositive. Different items with the same name as subject parts may enter under subheading 9027.90.40. To avoid the unintended suspension of liquidation of non-subject parts, those items entered under subheading 9027.90.40 and generally known as scanning photomultiplier assemblies, immersion baths, sample-containing structures, electronic signal-processing boards, molecular characterization software, preamplifier/discriminator circuitry, and optical benches must be accompanied by an importer's

declaration to the Customs Service stating that they are not manufactured for use in a subject LSI.

#### Final Results of the Review

We invited interested parties to comment on the preliminary results. We received no comments. The final results are therefore unchanged from those presented in the preliminary results, and we determine, based on the best information available, that a margin of 129.71 percent exists for Otsuka for the period November 1, 1993, through October 31, 1994.

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of these final results, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for Otsuka will be the rate established in the final results of this review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original less than fair value (LTFV) investigation, but the manufacturer is, the cash deposit rate will be the rate for the manufacturer of the merchandise; and (4) if neither the exporter nor the manufacturer is a firm covered in this or any previous review by the Department, the cash deposit rate will be 129.71 percent, the all other rate established in the LTFV investigation.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review.

This notice serves as a final reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice also serves as a reminder to parties subject to administrative protective orders (APOs) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 353.34(d). Timely written notification of return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations

and the terms of an APO is a sanctionable violation.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: September 22, 1995.  
Susan G. Esserman,  
*Assistant Secretary for Import Administration.*

#### Porcelain-on-Steel Cooking Ware; Termination In-Part of Antidumping Duty Administrative Review

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of termination in-part of antidumping duty administrative review.

**SUMMARY:** On January 13, 1995, the Department of Commerce (the Department) initiated an administrative review of the antidumping duty order on porcelain-on-steel cooking ware from Mexico. The Department is now terminating this review in-part with respect to Esmaltaciones San Ignacio S.A. de C.V. (San Ignacio).

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Arthur N. DuBois or Thomas Futtner, Office of Antidumping Compliance, Import Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230, telephone (202) 482-6312/3814.

#### SUPPLEMENTARY INFORMATION:

##### Background

On January 13, 1995, the Department published in the Federal Register a notice of initiation of administrative review of the antidumping duty order on porcelain-on-steel cooking ware from Mexico (60 FR 3192). This notice stated that the Department would review merchandise sold in the United States by San Ignacio during the period December 1, 1993 through November 30, 1994.

San Ignacio subsequently withdrew its request for review on July 26, 1995, choosing a "new shipper" review instead. Section 19 CFR 353.22(a)(5) of the Department's regulations stipulates that the Secretary may permit a party that requests a review to withdraw the request not later than 90 days after the date of publication of the notice of

initiation of the requested review. This regulation also provides that the Secretary may extend the time limit for withdrawal of a request if it is reasonable to do so. Because we have initiated a "new shipper" review on San Ignacio (July 20, 1995, 60 FR 37426), we are waiving the 90-day requirement in section 19 CFR 353.22(a)(5) and terminating this review, in part, with respect to San Ignacio.

This notice is published pursuant to 19 CFR 353.22(a)(5).

Dated: September 19, 1995.  
Joseph A. Spetrini,  
*Deputy Assistant Secretary for Compliance.*

BILLING CODE 3510-DS-P

#### Quarterly Update to Annual Listing of Foreign Government Subsidies on Articles of Cheese Subject to an In-Quota Rate of Duty

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Publication of quarterly update to annual listing of foreign government subsidies on articles of cheese subject to an in-quota rate of duty.

**SUMMARY:** The Department of Commerce (the Department), in consultation with the Secretary of Agriculture, has prepared a quarterly update to its annual list of foreign government subsidies on articles of cheese subject to an in-quota rate of duty. We are publishing the current listing of those subsidies that we have determined exist.

**EFFECTIVE DATE:** October 1, 1995.

**FOR FURTHER INFORMATION CONTACT:** Brian Albright or Maria MacKay, Office of Countervailing Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave., NW., Washington, DC 20230, telephone: (202) 482-2786.

**SUPPLEMENTARY INFORMATION:** Section 702(a) of the Trade Agreements Act of 1979 (as amended)(the Act) requires the Department to determine, in consultation with the Secretary of Agriculture, whether any foreign government is providing a subsidy with respect to any article of cheese subject to an in-quota rate of duty, as defined in section 702(h)(4) of the Act, and to publish an annual list and quarterly updates of the type and amount of those subsidies.

The Department has developed, in consultation with the Secretary of Agriculture, information on subsidies (as defined in section 702(h)(2) of the

Act) being provided either directly or indirectly by foreign governments on articles of cheese subject to an in-quota rate of duty. The appendix to this notice lists the country, the subsidy program or programs, and the gross and net amounts of each subsidy for which information is currently available.

The Department will incorporate additional programs which are found to

constitute subsidies, and additional information on the subsidy programs listed, as the information is developed.

The Department encourages any person having information on foreign government subsidy programs which benefit articles of cheese subject to an in-quota rate of duty to submit such information in writing to the Assistant Secretary for Import Administration,

U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

This determination and notice are in accordance with section 702(a) of the Act.

Dated: September 22, 1995.  
Susan G. Esserman,  
Assistant Secretary for Import Administration.

**Determination Not to Revoke Countervailing Duty Order**

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of determination Not to Revoke Countervailing Duty Order.

**SUMMARY:** The Department of Commerce (the Department) is notifying the public of its determination not to revoke the countervailing duty order listed below.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Brian Albright or Maria MacKay, Office of Countervailing Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230; telephone: (202)482-2786.

**SUPPLEMENTARY INFORMATION:**

Background

On June 29, 1995, the Department published in the Federal Register (60

FR 33792) its intent to revoke the countervailing duty order listed below. Under 19 CFR 355.25(d)(4)(iii), the Secretary of Commerce will conclude that an order is no longer of interest to interested parties and will revoke the order if no domestic interested party (as defined in sections 355.2 (i)(3), (i)(4), (i)(5), and (i)(6) of the regulations) objects to revocation and no interested party requests an administrative review by the last day of the 5th anniversary month.

Within the specified time frame, we received either an objection from a domestic interested party to our intent to revoke, or a request for review, for this countervailing duty order. Therefore, because the requirements of 19 CFR 355.25(d)(4)(iii) have not been met, we will not revoke the order. This determination is in accordance with 19 CFR 355.25(d)(4).

**Determination to Revoke Countervailing Duty Order; Wire Rod from Zimbabwe**

**AGENCY:** Import Administration, International Trade Administration, Department of Commerce.

**ACTION:** Notice of determination to revoke countervailing duty order

**SUMMARY:** The Department of Commerce (the Department) is revoking the countervailing duty order on wire rod from Zimbabwe because it is no longer of interest to interested parties.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Brian Albright or Cameron Cardozo, Office of Countervailing Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and

Constitution Avenue NW., Washington, DC 20230; telephone: (202)482-2786.

#### SUPPLEMENTARY INFORMATION:

##### Background

On August 1, 1995, the Department published in the Federal Register (60 FR 39151) its intent to revoke the countervailing duty order on wire rod from Zimbabwe (51 FR 29292; August 15, 1986). Additionally, as required by 19 CFR 355.25(d)(4)(ii)(1994), the Department served, by certified mail, written notice of its intent to revoke this countervailing duty order on each party listed on its most current service list.

Prior to publication of the Department's notice of intent to revoke the order, this countervailing duty order was determined to be subject to section 753 of the Tariff Act of 1930 (as amended by the Uruguay Round Agreements Act of 1994)(the Act). Countervailing Duty Order; Opportunity to Request a Section 753 Injury Investigation, 60 FR 27,963 (May 26, 1995). In conjunction with that determination, domestic interested parties were notified of their right to request an injury investigation under section 753(a) of the Act from the U.S. International Trade Commission (the Commission). Those parties were further informed that, in accordance with sections 753(b)(3) and (4) of the Act, the order would be revoked effective March 3, 1995 unless a request for an injury investigation was submitted to the Commission within six months of the date on which Zimbabwe became a signatory to the World Trade Organization (March 3, 1995), and the Commission rendered an affirmative injury determination pursuant to section 753(a)(1) of the Act.

On September 18, 1995, the Commission notified the Department that it did not receive a timely request under section 753(a) and, therefore, a negative injury determination had been made with respect to this order pursuant to section 753(b)(4) of the Act. However, since the revocation is effective January 1, 1995 under 19 CFR 355.25(d)(4)(iii), no further action is required by the Department under section 753 of the Act.

##### Scope of the Order

Imports covered by this order are shipments from Zimbabwe of carbon steel wire rod including coiled, semi-finished, hot-rolled carbon steel product of approximately round solid cross-section, not under 0.20 inch in diameter, nor over 0.74 inch in diameter, tempered or not tempered, treated or not treated, not manufactured

or partly manufactured, and valued over or under four cents per pound. Such merchandise is currently classified under item numbers 7213.20.00, 7213.31.30, 7213.41.30, 7213.41.60, 7213.49.00, and 7123.50.00 of the Harmonized Tariff Schedule (HTS). The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

##### Determination to Revoke

The Department may revoke a countervailing duty order if it concludes that the order is no longer of interest to interested parties. We conclude that there is no interest in a countervailing duty order when no interested party (as defined in sections 355.2 (i)(3), (i)(4), (i)(5), and (i)(6) of the Department's regulations) has requested an administrative review for at least five consecutive review periods and when no domestic interested party objects to the revocation (19 CFR 355.25(d)(4)(iii)).

We received no requests for administrative review for the previous five consecutive review periods and no objections to our notice of intent to revoke the countervailing duty order. Therefore, we have concluded that the countervailing duty order covering wire rod from Zimbabwe is no longer of interest to interested parties, and we are revoking this countervailing duty order in accordance with 19 CFR 355.25(d)(4)(iii).

Further, as required by 19 CFR 355.25(d)(5), the Department is terminating the suspension of liquidation on the subject merchandise as of the effective date of this notice, and will instruct the Customs Service to liquidate, without regard to countervailing duties, all unliquidated entries of this merchandise exported from Zimbabwe on or after January 1, 1995.

Because of our determination to revoke this order in accordance with 19 CFR 355.25(d)(4)(iii), it is unnecessary to revoke the order pursuant to section 753(b)(3)(B) of the Act.

Dated September 21, 1995.

Joseph A. Spetrini,

*Deputy Assistant Secretary for Compliance.*

#### Applications for Duty-Free Entry of Scientific Instruments

Pursuant to Section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR part 301), we invite comments on the

question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with 15 CFR 301.5(a)(3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, D.C. 20230. Applications may be examined between 8:30 A.M. and 5:00 P.M. in Room 4211, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C.

*Docket Number: 95-078. Applicant:* University of California, Davis, Exercise Science Department, 264 Hickey Gym, Davis, CA 95616. *Instrument:* Nitrogen Analyzer, Model N2-TEST.

*Manufacturer:* Erich Jaeger, Germany.

*Intended Use:* The instrument will be used to measure nitrogen concentration in rebreathed air containing 100% oxygen in order to determine residual lung volume to provide a more accurate assessment of the percentage of body fat in humans by subtracting from weight loss in underwater weighing.

*Application Accepted by Commissioner of Customs:* August 29, 1995.

*Docket Number: 95-081. Applicant:*

University of Rhode Island, Graduate School of Oceanography, South Ferry Road, Narragansett, RI 02882-1997.

*Instrument:* ICP Mass Spectrometer, Model Element. *Manufacturer:* Finnigan MAT, Germany.

*Intended Use:* The instrument will be used for studies of oceanographic, geological and atmospheric samples that will be analyzed for a wide range of elemental and isotopic abundances. In addition, the instrument will be used in a graduate level course in Marine Isotope Geochemistry to expose students to the fundamentals of isotopic tracers used in chemical oceanography. *Application Accepted by Commissioner of Customs:* August 30, 1995.

*Docket Number: 95-082. Applicant:*

University of Maryland at College Park, Institute for Plasma Research, 1202K Energy Research Facility, College Park, MD 20742.

*Instrument:* Pulsed Surface Plasma Source and Power Supply.

*Manufacturer:* Budker Institute of Nuclear Physics, CIS. *Intended Use:* The instrument will be used to produce very high quality ion beams required to advance the present state-of-the art of ion project lithography. *Application Accepted by Commissioner of Customs:* August 30, 1995.

*Docket Number: 95-083. Applicant:*

Continuous Electron Beam Accelerator Facility, 12000 Jefferson Avenue, Newport News, VA 23606. *Instrument:*

Gas Cherenkov Counters for Hall A Magnetic Spectrometers. *Manufacturer:* CEA/DSM, France. *Intended Use:* The instrument will be used for studies of nucleons, nuclei, pions and Kaons and nucleon excited states. In addition, the instrument will be used for educational purposes in a graduate course in experimental nuclear physics.

*Application Accepted by Commissioner of Customs:* September 7, 1995.

*Docket Number:* 95-084. *Applicant:* Federal Highway Administration, Special Projects & Engineering Division, HNR-20, 6300 Georgetown Pike, McLean, VA 22101. *Instrument:* Automatic Non-Contact Aggregate Graduation Device, Model VDG 40. *Manufacturer:* Yernaux Pesage, France. *Intended Use:* The instrument will be used to evaluate mineral aggregate materials used in pavement construction. *Application Accepted by Commissioner of Customs:* September 11, 1995.

*Docket Number:* 95-085. *Applicant:* University of Wisconsin - Eau Claire, Eau Claire, WI 54702. *Instrument:* Absorbance and Fluorescence Stopped-Flow Spectrophotometer, Model SX-17MV. *Manufacturer:* Applied Photophysics, Ltd., United Kingdom. *Intended Use:* The instrument will be used to study the rates of electron transfer reactions of organic, inorganic, biological, and organometallic molecules to determine how differences in the structural, physical, and chemical properties of the reacting materials control their rates of reaction. *Application Accepted by Commissioner of Customs:* September 11, 1995.

## National Oceanic and Atmospheric Administration

[I.D. 092295B]

### Marine Mammals and Endangered Species

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Receipt of application for a scientific research permit (P278F).

**SUMMARY:** Notice is hereby given that Dr. Brent Stewart, Senior Research Biologist, Hubbs-Sea World Research Institute, 2595 Ingraham St., San Diego, CA 92109 has applied in due form for

a permit to take two species of marine mammals for purposes of scientific research.

**DATES:** Written comments must be received on or before October 30, 1995.

**ADDRESSES:** The application and related documents are available for review upon written request or by appointment in the following office(s):

Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910 (301/713-2289); and

Director, Southwest Region, NMFS, NOAA, 501 West Ocean Boulevard, Suite 4200, Long Beach, CA 90802-4213 (301/980-4016).

Written data or views, or requests for a public hearing on this request, should be submitted to the Director, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular request would be appropriate.

**FOR FURTHER INFORMATION CONTACT:** Gary Barone, Permits Division, 301/713-2289.

**SUPPLEMENTARY INFORMATION:** The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216).

The permit application requests authorization to capture and release 20 common dolphins (*Delphinus delphis*) and 20 Pacific white-sided dolphins (*Lagenorhynchus obliquidens*) over a 5-year period. The animals will be fitted with satellite linked transmitters, biologically sampled and scanned with an ultrasound device. The work will be conducted in the waters off of Southern California.

Concurrent with the publication of this notice in the Federal Register, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: September 22, 1995.

Ann D. Terbush,

*Chief, Permits and Documentation Division, Office of Protected Resources, National Marine Fisheries Service.*

### Marine Mammals

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and

Atmospheric Administration (NOAA), Commerce.

**ACTION:** Issuance of public display permit no. 978.

**SUMMARY:** Notice is hereby given that the Oregon Coast Aquarium (P145A) has been issued a permit for public display purposes.

**ADDRESSES:** The permit is available for review by appointment in the following offices:

Permits Division, Office of Protected Resources, NMFS, NOAA, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910 (301/713-2289); and

Director, Northwest Region, NMFS, 7600 Sand Point Way, NE, BIN C15700, Seattle, WA 98115 (206/526-6150).

**SUPPLEMENTARY INFORMATION:** On Monday, August 14, 1995, notice was published in the Federal Register (60 FR 41881) that an application had been filed by the Oregon Coast Aquarium, Newport, OR. A public display permit was requested to import one adult male killer whale (*Orcinus orca*), from the Reino Aventura theme park, Mexico, into the United States for public display purposes.

The requested permit has been issued subject to the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), and the conditions set forth therein.

Dated: September 22, 1995.

## COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

### Recision of a Request to Consult and Cancellation of a Limit on Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Honduras

September 27, 1995.

**AGENCY:** Committee for the Implementation of Textile Agreements (CITA).

**ACTION:** Announcing the recision of a request to consult and issuing a directive to the Commissioner of Customs cancelling a limit.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Jennifer Aldrich, International Trade

Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482-4212.

**SUPPLEMENTARY INFORMATION:**

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The United States Government has decided to rescind the request made on March 27, 1995 to consult on imports of cotton and man-made fiber nightwear and pajamas in Categories 351/651 from Honduras.

In the letter published below, the Chairman of CITA directs the Commissioner of Customs to cancel the limit established for Categories 351/651 for the period March 27, 1995 through March 26, 1996.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see Federal Register notice 59 FR 65531, published on December 20, 1994). Also see 60 FR 32655, published on June 23, 1995.

D. Michael Hutchinson,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

Committee for the Implementation of Textile Agreements

September 27, 1995.

Commissioner of Customs,  
*Department of the Treasury, Washington, DC 20229.*

Dear Commissioner: This directive cancels and supersedes the directive issued to you on June 16, 1995, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of cotton and man-made fiber textile products in Categories 351/651, produced or manufactured in Honduras and exported during the period which began on March 27, 1995 and extends through March 26, 1996.

Effective on September 29, 1995, you are directed to cancel the limit established for Categories 351/651 for the period March 27, 1995 through March 26, 1996.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C.553(a)(1).

Sincerely,

D. Michael Hutchinson,

*Acting Chairman, Committee for the Implementation of Textile Agreements.*

[FR Doc.95-24417 Filed 9-28-95; 8:45 am]

BILLING CODE 3510-DR-F

**COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED**

**Procurement List; Addition**

**AGENCY:** Committee for Purchase From People Who Are Blind or Severely Disabled.

**ACTION:** Addition to the Procurement List.

**SUMMARY:** This action adds to the Procurement List a finger bleeding lancet to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

**EFFECTIVE DATE:** October 30, 1995.

**ADDRESSES:** Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

**FOR FURTHER INFORMATION CONTACT:** Beverly Milkman (703) 603-7740.

**SUPPLEMENTARY INFORMATION:** On July 14, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notice (60 F.R. 36266) of proposed addition to the Procurement List. The Committee received comments from the current contractor in response to its 1995 and 1994 proposals to add the lancets to the Procurement List. The contractor indicated that it is a considerably smaller entity than the Committee deemed it to be, and addition of the lancet to the Procurement List would have a severe impact on that entity, including loss of jobs and of the opportunity to recoup the entity's investment in equipment, possibly resulting in the entity going out of business.

The contractor also questioned whether people with severe disabilities are capable of producing the lancets, and whether the nonprofit agency which will produce them is in compliance with Food and Drug Administration (FDA) requirements for the production of medical instruments. The contractor was particularly concerned about the nonprofit agency's ability to avoid certain critical defects identified by the FDA in the production of lancets. The contractor also questioned the nonprofit agency's compliance with the statutory direct labor ratio requirement as it applies to lancet production, and indicated that the Committee's pricing mechanism is not in accordance with law.

As the result of a 1986 merger, the contractor's Medical Supply Division, which provides the lancets to the Government and other customers, is

part of the same corporate entity as the administrative holding company for the contractor's various business ventures. This corporate entity reports its sales and income for tax purposes separately from its subsidiary corporations.

In situations like this, it has long been the Committee's policy to look at impact on the total business of the contractor affected by a decision to add a commodity or service to the Procurement List. This policy was specifically incorporated in the Committee's regulations as part of a regulatory revision which became effective December 16, 1994 (59 F.R. 59338, Nov. 16, 1994). In this case, the Committee's policy is especially appropriate. A review of the various documents submitted by the contractor, including its Form 10-K report for 1993 filed with the Securities and Exchange Commission, revealed a large interlocking financial enterprise controlled by the contractor, with substantial identity of officers, board members, and ownership for the various corporations in the enterprise. The lancets are even made for the contractor by one of its subsidiaries, in a building near the contractor's headquarters which the contractor bought from the same subsidiary and leases back to the subsidiary.

The contractor's sales of the lancets to the Government are only a very small percentage of the sales of the total enterprise. The Committee does not consider loss of such a small percentage to constitute severe adverse impact on the contractor. The contractor's ability to transfer assets and employees between various parts of the enterprise should allow it to absorb any employees who may be displaced by the Committee's action and any manufacturing equipment, which it can continue to use in producing lancets for the commercial market. Because no contractor is guaranteed to continue receiving Government contracts for an item under the competitive bidding system, the contractor assumed a risk of losing the use of this equipment when it entered the Government market.

The Committee's conclusion that people with severe disabilities employed by the designated nonprofit agency will be capable of producing the lancets to fill Government orders is based on findings by the Committee's industrial engineer and an assessment by the engineering staff of the authorized central nonprofit agency for this action. The Committee's engineer reviewed production plans with the nonprofit agency and a central nonprofit agency engineer to address each of the contractor's capability contentions in

the course of making a capability determination.

The nonprofit agency has met all FDA requirements for producing lancets. Contrary to what the contractor implied, there is no FDA list of critical defects for lancets. FDA guidelines merely reflect general good manufacturing practices for medical devices, which the nonprofit agency will follow.

The specific defects the contractor mentioned, including reversed or overly long needles in the lancets, appear to be a factor in the operation of the contractor's automated manufacturing process. The nonprofit agency plans to load the needles by hand, which will avoid these defects. The more manually intensive manufacturing process to be used will also be easier and safer for people with severe disabilities. The process is consistent with injection molding operations which have been successfully used by other nonprofit agencies to produce items under the Committee's program.

The contractor questioned the nonprofit agency's ability to produce acceptable lancets on short notice, based on the contractor's "learning curve" to produce the lancets. The nonprofit agency does not intend to start at a high volume of production, but to have a pilot production period to perfect its production methods. In addition, initial orders will come from individual Government medical centers, which will allow the nonprofit agency to ensure that it will not receive more orders than it is capable of filling during the startup period.

Contrary to the contractor's contention, the Committee's statute requires qualified nonprofit agencies to have an overall 75 percent direct labor ratio for the work they do on all commodities and services they produce. The ratio requirement does not apply to all work which must be done to produce each Government item. The nonprofit agency will be using well above this percentage in the work they will do on the lancets. Inspection is considered indirect labor which is not counted in determining compliance with the requirement.

The contractor did not challenge the initial fair market price for the lancets, which was based on bids submitted on the last competitive procurement, in accordance with the Committee procedures.

The contractor's contention that the Committee's fair market pricing procedure is inconsistent with the Committee's statute challenges the "price change exception" procedure, which the contractor claims insulates the Committee's prices from changes in

the market. However, as its name implies, this procedure is used only on an exceptional basis. The procedure allows a price change to be based on actual cost experience rather than changes in a producer price index. Where the exception is used, the Committee believes that commercial users would experience similar cost changes, so the price change exception procedure would have a relation to the market.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodity, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodity.

3. The action will result in authorizing small entities to furnish the commodity to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodity proposed for addition to the Procurement List.

Accordingly, the following commodity is hereby added to the Procurement List:

Lancet, Finger Bleeding

Special Item B-11

(Requirements for the Department of Veterans Affairs under the Multiple Award Schedule FSC Group 65, Part II, Section B)

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,

*Executive Director.*

BILLING CODE 6820-33-P

## Procurement List; Additions

**AGENCY:** Committee for Purchase From People Who Are Blind or Severely Disabled.

**ACTION:** Additions to the Procurement List.

**SUMMARY:** This action adds to the Procurement List a commodity and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

**EFFECTIVE DATE:** October 30, 1995.

**ADDRESSES:** Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

**FOR FURTHER INFORMATION CONTACT:** Beverly Milkman (703) 603-7740.

**SUPPLEMENTARY INFORMATION:** On June 17, 1994, March 17, July 28, August 4, 11 and 18, 1995, the Committee for Purchase From People Who Are Blind or Severely Disabled published notices (59 F.R. 31217, 60 FR 14427, 38794, 39947, 41060 and 43126) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodity and services, fair market price, and impact of the additions on the current or most recent contractors, the Committee has determined that the commodity and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity and services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodity and services.

3. The action will result in authorizing small entities to furnish the commodity and services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodity and services proposed for addition to the Procurement List. Accordingly, the following commodity and services are hereby added to the Procurement List:

*Commodity*

Folder, File

7530-00-990-8884

(Requirements for the Palmetto, Georgia depot only)

*Services*

Administrative Services, Social Security Administration, 1221 Nevin Avenue, Richmond, California

Administrative Services, Department of the Treasury, U.S. Mint Headquarters, 633 3rd Street, NW., Washington, DC

Commissary Shelf Stocking and Custodial, Columbus Air Force Base, Mississippi Grounds Maintenance, Lake Sonoma/Warm Springs Dam, Geyserville, California

Janitorial/Custodial, Ballistic Missile Center, 106 Wynn Drive, U.S. Post Office &amp; Courthouse, 101 Holmes Avenue, Huntsville, Alabama

Janitorial/Custodial, Federal Aviation Administration, Air Traffic Control Tower Facility, Newark International Airport, Newark, New Jersey

Janitorial/Custodial, U.S. Army Reserve Center, Hoyt Avenue, Binghamton, New York

Janitorial/Custodial, Department of Veterans Affairs, Franklin D. Roosevelt Hospital, Buildings 17, 18, 29, 39, 52, Paint Shop &amp; Chapel, Montrose, New York

Janitorial/Custodial, Efratti U.S. Army Reserve Center, Front Street, Terrace Heights, Weirton, West Virginia

POV Overseas Export/Import Processing, Norfolk Naval Base, Building CEP-57, Norfolk, Virginia

Switchboard Operation, Department of Veterans Affairs Medical Center, 3601 South 6th Avenue, Tucson, Arizona

This action does not affect current contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,

*Executive Director.*

**Procurement List; Proposed Additions**

**AGENCY:** Committee for Purchase From People Who Are Blind or Severely Disabled.

**ACTION:** Proposed additions to Procurement List.

**SUMMARY:** The Committee has received proposals to add to the Procurement List a commodity and a service to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

**COMMENTS MUST BE RECEIVED ON OR BEFORE:** October 30, 1995.

**ADDRESSES:** Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

**FOR FURTHER INFORMATION CONTACT:** Beverly Milkman (703) 603-7740.

**SUPPLEMENTARY INFORMATION:** This notice is published pursuant to 41 U.S.C. 47(a) (2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodity and service listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity and service to the Government.

2. The action will result in authorizing small entities to furnish the commodity and service to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodity and service proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following commodity and service have been proposed for addition to Procurement List for production by the nonprofit agencies listed:

*Commodity*

Case, Medical Instrument

6545-01-094-6142

NPA: Georgia Industries for the Blind, Bainbridge, Georgia

*Service*

Janitorial/Custodial, Ariel/Rios Federal Building, 12th &amp; Pennsylvania Avenue, NW., Washington, DC

NPA: The Chimes, Inc., Baltimore, Maryland

## DEPARTMENT OF DEFENSE

### Department of the Army

#### Corps of Engineers

#### **Intent to Prepare a Draft Environmental Impact Statement (DEIS) for Future 404 Permit Actions on the Santa Clara River and its Tributaries, Los Angeles County, California**

**AGENCY:** U.S. Army Corps of Engineers DOD.

**ACTION:** Notice of intent.

**SUMMARY:** The Corps will prepare a Draft Environmental Impact Statement (DEIS) for a Proposed General Permit on future 404 permit activities associated with the phased development of the Valencia Master Plan along a portion of the Santa Clara River and its tributaries, Los Angeles County, California. The proposed 404 decision(s) are associated with proposed flood control and transportation projects related to residential, commercial and industrial development on lands owned by Valencia Company. The EIS will

address project-specific impacts, indirect and cumulative impacts, and a range of alternatives. Information in the EIS will be used in the decision whether to issue a 404 permit or series of permits for future flood control improvements, bridges, drainage facilities, and other actions associated with the continual development of the region. The draft EIS is currently scheduled for public review in early 1996.

**FOR FURTHER INFORMATION CONTACT:**

Mr. Bruce Henderson, Regulatory Branch, CESPL-CO-R, Permit Number 94-504-BH, U.S. Army Corps of Engineers, Los Angeles District—300 North Los Angeles Street, Los Angeles, CA 90012. Copies of the Special Scoping Notice dated March 16, 1994 may be obtained by calling (213) 894-5606 and indicating that you are requesting a copy of the Valencia Special Scoping Notice, and leaving your name, address (or fax number), and phone number. Additional documents relative to the project may be reviewed by contacting the Los Angeles District (address above); the Ventura Field Office of the Corps of Engineers 2151, Alessandro Drive, Suite 255, Ventura CA 93001, (805) 641-1127; or Mr. Mark Subbotin, Valencia Company, 23823 Valencia Company, 23823 Valencia Blvd., Valencia, CA 91335, (805) 255-4069.

**SUPPLEMENTARY INFORMATION:**

Previous Notices

A Notice of Intent (NOI) for a previous version of this project was issued Oct. 10, 1990. The DEIS was not completed. Since 1990 Valencia Company has: (1) Completed hydrologic studies which resulted in revisions to the proposed flood control improvements; and (2) explored the use of a general permit and Environmental Assessment/Finding of No Significant Impact (EA/FONSI) for the proposed project.

A Special Scoping Notice to consider a General Permit for the project was issued by the Los Angeles District Corps of Engineers on March 16, 1994 (See below to obtain copies.) Comments were received, responded to by the applicant, and reviewed by the Corps. The Corps determined that an EIS should be prepared because: (1) Potentially significant individual and cumulative impacts to wetlands, riparian habitat, and endangered species resources along portions of the river might occur; (2) there is a need to evaluate cumulative impacts to such resources from other discharges in the vicinity; and (3) other permit processes in the watershed have generated impacts to the biological community. The Corps further

determined that it was premature to make a decision regarding whether a General Permit was the appropriate form of permit for this project. This determination was based on the fact that it appeared that the proposed project, with mitigation, could not meet the "minimal impacts" requirement for a General Permit.

Study Area

The project area includes 2.0 linear miles of the South Fork of the Santa Clara River, the mouth of Bouquet Creek, 2.5 linear miles of San Francisquito Creek, 7.6 linear miles of the mainstream of the Santa Clara River and jurisdictional tributaries from near the Los Angeles Aqueduct crossing to the Castaic Creek confluence.

Proposed Action

The proposed action is the issuance of a Clean Water Act Section 404 permit or set of permits to Valencia Company that would authorize numerous flood control and drainage facilities, and bridges over a 15 to 20 year period. These public works projects will be associated with various residential, commercial, industrial, and recreational developments. Most of the proposed development projects would be carried out by Valencia Company; however, several of the identified projects may be constructed by others, using the proposed permit issued to Valencia Company. If a general permit is issued, it would apply to other applicants in addition to Valencia Company.

Valencia Company is currently planning and constructing various component projects of the Valencia Master Plan along portions of the Santa Clara River and its tributaries. Certain projects along the river and its tributaries will result in excavation and/or the discharge of dredged or fill material into waters of the United States ("waters") as defined in 33 CFR 320-330 under provisions of Section 404 of the Clean Water Act. These activities require a Department of the Army permit. Projects resulting in excavation and/or discharges include channel bank protection for flood control, drainage structures, bridges, fill, mitigation or other encroachment into the Santa Clara River and its tributaries.

The proposed action to be addressed in the EIS has been substantially revised since the 1990 NOI, but is essentially the same as that described as the "Natural River Management Concept" in the 1994 Special Scoping Notice. This concept includes the following elements: (1) Channel bank protection will be placed only where necessary; (2) bank protection will be placed such that

impacts to wetlands along the river will be avoided or minimized where practicable; (3) a balance of wetland losses and wetland gains (by mitigation) will be sought; and (4) as proposed, clearing of vegetation in the finished river channel for maintenance purposes will not be necessary. (Los Angeles County Department of Public Works is in concurrence with this goal for most areas of the proposed project. Negotiations on the details of the maintenance agreement ("agreement") between Valencia Company and L.A. County Public Works are in process. The agreement must be signed prior to completion of the DEIS in order that the agreement and a discussion of its ramifications can be included in the DEIS. (If the signed agreement cannot be included in the DEIS other alternative maintenance regimes will be considered in the DEIS.)

#### Scope of Analysis in the EIS

The scope of the EIS impact analysis will follow the directives in 33 CFR 325 (Appendices B and C) which require the scope of an EIS be limited to the impacts of the specific activities requiring a 404 permit and only those portions of the project outside of waters where there is sufficient federal control and responsibility to warrant federal review. The latter activities are characterized as those which would not occur "but for" the 404 discharge activity. That is, related actions that are clearly and solely dependent upon the nearby 404 activities.

The EIS will address impacts of facilities that would occur within jurisdictional waters. In addition, the EIS will address adjacent land development projects in the "but for zone" (see below) that are directly dependent on adjacent bank protection or levees.

The EIS will address potential permitting strategies in which an individual permit, general permit, or combination of individual, nationwide, and/or general permits, are issued. The permit timeframe would be 5 years, with administrative renewals over a 15 to 20 year period in accordance with Corps regulations.

#### "But for Zone"

The EIS will clearly delineate a "but for zone" along the edge of jurisdictional waters. The boundary of the "but for zone" to be used as the upland limit of the EIS impact assessment is defined as 105 feet inland from the existing river bank. The 105 feet determination is based on information that 105 feet is the distance necessary to move the levee laterally in

order that both the toe of the levee and the construction zone would be behind the bank (i.e. all structures and construction would be in uplands and therefore not regulated by the Corps under Section 404 of the Clean Water Act). Bank protection installed within "but for zone" will result in permanent or temporary discharges of dredged or fill material to waters, and therefore require a 404 permit. Bank protection installed outside this zone, would not affect waters and therefore would not require a 404 permit.

Valencia Company submitted the following statement in justification for limiting the lateral extent of the Scope of Analysis to 105 feet:

#### *"Arguments For Justifying The Development Assumptions Outside*

The "But For" Zone, Valencia Master Plan 404 Permit

The scope of the EIS impact analysis will follow the directives in 33 CFR 325 that require the scope of an EIS be limited to the impacts of the specific activities requiring a 404 permit, and only those portions of the project outside of "waters" over which the Corps has sufficient control and responsibility to warrant federal review. The latter activities would include actions that would not occur "but for" the 404 discharge activity. That is, related actions that are clearly and solely dependent upon the nearby 404 activities.

The boundary of the "but for zone" to be used as the upland limit of the EIS impact assessment is defined as 105 feet inland from the existing river bank. Bank protection installed in uplands within this zone will result in temporary impact to "waters," and therefore require a 404 permit. Bank protection installed outside would not affect "waters", and therefore would not require a 404 permit.

The impacts of future land development and public works projects outside the "but for zone" would not be addressed in the EIS because it is a reasonable assumption that such projects would occur with or without the issuance of a 404 permit for bank protection, which would allow land development within the "but for zone". In other words, future land development and public works projects are independent of the proposed bank protection and will not be addressed in the EIS as an action that is linked, dependent upon, or otherwise caused by the proposed 404 permit. The justification for this approach is based on the reasonable assumption that lands outside the "but for zone" where the Corps has no permit jurisdiction will be developed in the future. This assumption is based on the following considerations:

1. There are tremendous economic and population pressures in the region. The population of the Santa Clarita Valley has been growing rapidly since 1970 and 1980. The valley experienced a 23.7% increase in population. Between 1980 and 1989, the population doubled to approximately 154,000 people. The City and County's

General Plans project populations which will double again by the year 2010. The Southern California Association of Governments (SCAG) adopted a new demographic projections in June 1994 which showed the Santa Clarita Valley population at 462,000 people by the year 2015.

Employment is expected to increase by even greater percentage. SCAG Forecasts from the City of Santa Clarita General Plan shows employment growing from an estimated 23,000 in 1984 to 97,000 jobs in the year 2010, an increase of over 315%. At its peak in the late 1980's industrial square footage was being added at a rate of a million square feet per year. Another measure of demand for industrial square footage is the vacancy rate which is currently 6.5% in the Valencia Industrial Center. This compares to 11.3% in the San Fernando Valley and 12.7% in Southern California. Retail commercial space has shown similar strengths in the Santa Clarita Valley. The Santa Clarita area has exhibited an annual retail sales rate of 11.5% in the last seven years, compared to retail sales rate of only 2% in the last five years in California.

2. Lands outside the "but for zone" in the City are zoned for development. Lands outside the "but for zone" in the City of Santa Clarita are zoned for residential, commercial, and industrial uses and are surrounded by these same land uses. Valencia Company intends to continue this type of development to meet the demands of the growing population in the Santa Clarita Valley. One of the principal components of the City of Santa Clarita's General Plan is the "Valley Center Concept". This concept is intended to create a valley identity and to unify surrounding communities by designating a central core of the valley. Within this area, higher density residential and commercial land uses would be allowed to permit lower densities in the surrounding communities. The Santa Clara River corridor is the major opportunity to link the components of the center together with the uniform theme of natural open space preservation and river enhancement.

3. Land outside the "but for zone" in the unincorporated portions of the County are designated for commercial and industrial development in the General Plan. Many are still zoned for agriculture; however, zone change requests for residential, commercial, and industrial uses are being processed by the County to make the zoning consistent with the General Plan designations and allow urban development. Valencia Company and others intend to continue residential, commercial, and industrial developments to meet the demands of the growing population in the region.

4. Lands outside the "but for zone" in the County are zoned for Development. Land development outside the "but for zone" is feasible without adjacent 404 permits. If a Corps permit were not issued and the "but for zone" was not developed, land development would still be feasible outside the "but for zone". However, less land would be available and many parcels would be reduced in size and altered in terms of their configurations. These effects would reduce the value and potential uses of these

properties. However, these lands are located within areas already surrounded by urban land uses. As such, there is a high priority to develop these lands prior to developing lands at more remote locations in the Santa Clarita Valley for several reasons: (1) The infrastructure is already present in these areas; and (2) the City and County General Plans emphasize in-filling of such areas within the urbanized portions of the valley in order to prevent scattered and disjunct development of outlying areas.

Development of flood protection features outside the "but for zone" if feasible. Such protection could involve several options: (1) Elevating land development projects above the floodway in accordance with Los Angeles County requirements; or (2) excavating dry land and installing levees and/or bank protection. Hence, the distance of the "but for zone" from the river (105 or more feet) would not represent a constraint on flood protection improvements.

Based on the above considerations, the assumption that the land outside the "but for zone" would be developed with or without the proposed 404 permit is reasonable.

#### Key Environmental Impacts

The key types of environmental impacts to be addressed in the EIS are listed below:

a. Riparian habitat and wetlands—Future flood control projects could result in the permanent or temporary loss or temporary disturbance of riparian and wetland habitat. The Valencia Master Plan includes the creation and restoration of riparian and wetland habitats along the river to compensate for these losses in other portions of the river. The EIS will assess the loss or gain of these resources over the short term and long term based on their acreages, functions, and values.

b. Threatened and endangered species—Portions of the Santa Clara River support the Federally listed endangered unarmored threespine stickleback fish (*Gasterosteus aculeatus williamsoni*).

In addition, riparian habitat along the river provides potentially suitable habitat for the Federally listed endangered least Bell's vireo (*Vireo belli pusillus*). These species could be affected by loss of wetlands, change in hydrologic conditions, and increased urban runoff. Species Proposed or designated as Candidates for Federal listing will also be addressed in the EIS.

c. Hydraulics, hydrology, and water quality—The EIS will address the effects of bank protection, bridges, and adjacent upland development on the river's hydrology, flood hazard conditions, hydraulic characteristics, sediment transport, and water quality.

d. The EIS will also address impacts of the proposed action (within the scope of analysis) related to air quality,

groundwater, recreation, visual resources, noise, traffic, land use, and cultural resources.

#### Cumulative Impacts

The EIS will address the combined effects of various future flood control facilities and urban development encroaching into the river from Lang Station (7.1 miles upstream of the east end of the project reach) to the Ventura County line 4.1 miles downstream of the west end of the project reach), including major tributaries. The assessment will focus on adverse cumulative impacts to water quality, sediment transport conditions, riparian and wetland habitat, and threatened and endangered species. Other cumulative impacts will also be addressed regarding air quality, groundwater, recreation, visual resources, and cultural resources.

#### Alternatives

The following alternatives will be addressed in the EIS: (1) No action Alternative—denial of a long-term comprehensive permit and lack of any new Section 404 authorizations allowing future development projects; limited authorizations issued by the Corps would be presumed only for emergency work on existing projects and minimal impact maintenance projects; (2) Full Encroachment Alternative—conventional uniform bank protection according to previous Los Angeles County Public Works Department plans, resulting in encroachment into the river at most locations (which would maximize developable land); (3) Complete Avoidance Alternative—placement of levees and bank protection outside of waters at all locations, avoiding the need for a Corps 404 permit except at bridge and side drain locations; (4) Refined Proposed Project Alternative—the proposed project with revisions to the channel alignment and placement to avoid certain site-specific impacts or highly sensitive areas that will be identified in the EIS impact studies; (5) Other Alternatives—other alternatives identified in the public scoping process that are consistent with the project objectives and do not have other new significant impacts; and (6) Permitting Alternatives—a range of permitting process alternatives, including various combinations of general, nationwide, and individual permits and administrative processes.

#### Public Involvement

Interested parties are encouraged to be involved in the scoping process by sending written comments concerning the scope of the EIS to the contact

person noted above. Written comments on the NOI are due to Corps Regulatory at the address noted below no later than October 31, 1995.

In addition, a public scoping meeting is scheduled for October 5, 1995, 7:00 pm to 10 pm, at the Valencia Hilton Garden Inn in the Pacific A and B rooms, 27710 The Old Road, Valencia. Interested parties are encouraged to attend.

Richard J. Schubel,

Acting Regulatory Branch.

## DEPARTMENT OF ENERGY

### Office of Environment, Safety and Health

[Notice 96-01]

#### Continuation of Solicitation for Epidemiology and Other Health Studies Financial Assistance Program

AGENCY: Department of Energy.

ACTION: Annual notice of continuation of potential availability of grants and cooperative agreements.

SUMMARY: The Office of Health Studies within the Office of Environment, Safety and Health of the Department of Energy (DOE) announces its continuing interest in receiving applications for grants and cooperative agreements for occupational and environmental health studies related to nuclear weapons production, research, development, storage and dismantling and energy production, transmission and use. A final program rule, which specifies the general policies and procedures governing the purpose and scope, program areas, eligibility, application requirements, evaluation criteria, solicitation and selection procedures for the Office of Health Studies financial assistance program, was published in the Federal Register (60 FR 5838) on January 31, 1995, effective March 2, 1995. Proposed research applications and pre-applications shall comply with 10 CFR Part 602.

The three offices within the Office of Health Studies, the Office of Epidemiologic Studies, the Office of International Health Studies, and the Office of Occupational Medicine and Medical Surveillance, promote studies to identify and assess the health risks associated with occupational or environmental exposures to ionizing radiation or toxic chemicals in the following populations: Employees of DOE and of DOE contractors

(particularly those at high-risk for exposure to ionizing radiation or toxic chemicals), residents of communities near DOE facilities, and populations throughout the world at high-risk for exposure to ionizing radiation or toxic chemicals resulting from accidental exposures or proximity to nuclear or other energy-related facilities. Deliberate exposure of human subjects in ongoing radiation experiments is outside the scope of this announcement. Access and use of information for conducting studies under this notice will comply with the Amendment to the Federal Privacy Act of 1974 regarding Existing Systems of Records, published June 28, 1995, effective August 7, 1995 (60 FR 33510).

**DATES:** Deadlines for applications or pre-applications will be contained in separate Notices of Availability to be published at a later time in the Federal Register that will address specific program areas to be funded by the Office of Health Studies in fiscal year 1996. However, all applications accepted under this notice must be received by the Office of Health Studies on or before September 30, 1996.

**ADDRESSES:** After the issuance of a Notice of Availability, applicants may obtain additional information from Dr. Paul Seligman, Deputy Assistant Secretary, Office of Health Studies (EH-6), U.S. Department of Energy, 19901 Germantown Road, Germantown, MD 20874-1290; facsimile: 301-903-3445; telephone: 301-903-5926.

**SUPPLEMENTARY INFORMATION:** For fiscal year 1996, the Office of Health Studies estimates that approximately \$2.5 million will be available for grants in occupational and environmental health studies. The number of awards made will depend on the number of applications received for which the results of competitive merit review are favorable. Of this total, the Office of International Health Studies anticipates that approximately \$500,000 will be available to support research to improve an understanding of the health effects and to assess the health risks of exposures to ionizing radiation in workers and populations throughout the world with potential radiation exposures. Of the remainder, the Office of Occupational Medicine and Medical Surveillance anticipates that approximately \$2 million will be available in the form of a cooperative agreement to identify and assess former workers at DOE facilities at risk for occupational diseases. Separate Notices of Availability will be issued in the Federal Register for these two programs.

The Office of Epidemiologic Studies does not anticipate having funds available to support either cooperative agreements or grants during fiscal year 1996.

Pursuant to a Memorandum of Understanding between DOE and the Department of Health and Human Services (56 FR 9701), published March 7, 1991, additional funds to study (1) occupational health and safety issues arising from exposures to radiation and toxic chemicals at nuclear and other energy-related facilities and (2) methodology for risk assessment and epidemiologic research may be available through the National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and Prevention (CDC); see Federal Register Announcement 521 (60 FR 4916), published January 25, 1995, or contact Richard Hornung, Associate Director for Energy-Related Health Research, NIOSH, Mail Stop R-44, 4676 Columbia Parkway, Cincinnati, OH 45226; telephone: 513-841-4400.

The National Center for Environmental Health of CDC previously awarded funds for radiation-related research, including dose reconstruction studies, but does not anticipate any additional funds for fiscal year 1996. (For current information contact Paul Renard, Chief, Radiation Studies Branch, NCEH, 4770 Buford Highway, NE., Atlanta, GA 30341; telephone: 404-488-7040.)

DOE is under no obligation to pay for any cost associated with the preparation or submission of any application. DOE reserves the right to fund, in whole or in part, any, all, or none of the applications submitted in response to this notice. Results of studies carried out as grants or cooperative agreements with the Office of Health Studies will be made available to DOE workers, to the public, and to managers responsible for protecting worker health and safety.

Issued in Washington, DC, on September 15, 1995.

Paul J. Seligman,  
Deputy Assistant Secretary for Health Studies.

BILLING CODE 6450-01-P

### Federal Energy Regulatory Commission

[Docket No. CP95-762-000, et al.]

#### Northern Natural Gas Company, et al.; Natural Gas Certificate Filings

September 21, 1995.

Take notice that the following filings have been made with the Commission:

1. Northern Natural Gas Company  
[Docket No. CP95-762-000]

Take notice that on September 18, 1995, Northern Natural Gas Company (Natural), 1111 South 103rd Street, Omaha, Nebraska 68124-1000, filed in Docket No. CP95-762-000 a request pursuant to Section 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to install and operate a new delivery point to accommodate natural gas deliveries to Western Gas Utilities, Inc. (WGU), located in Hennepin County, Minnesota, under Natural's blanket certificate issued in Docket No. CP82-401-000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern states that WGU has requested the proposed delivery point to accommodate service due to expansion of its distribution system into new areas. Northern states further that the estimated volumes to be delivered to WGU are 2,000 MMBtu on a peak day and 601,920 MMBtu on an annual basis. It is said that the estimated cost to install the delivery point would be \$60,000.

*Comment date:* November 6, 1995, in accordance with Standard Paragraph G at the end of this notice.

2. Transcontinental Gas Pipe Line Corporation, ANR Pipeline Company, Texas Eastern Transmission Corporation

Docket No. CP95-753-000

Take notice that on September 13, 1995, Transcontinental Gas Pipe Line Corporation (Transco), P. O. Box 1396, Houston, Texas 77251, ANR Pipeline Company (ANR), 500 Renaissance Center, Detroit, Michigan 48243, and, Texas Eastern Transmission Corporation (TETCO), P. O. Box 1642, Houston, Texas 77251-1642, collectively referred to as Applicants, filed in Docket No. CP95-753-000 a joint application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon a natural gas transportation and exchange service which was authorized in Docket No. CP80-82, all as more fully set forth in the application on file with the Commission and open to public inspection.

The Applicants state that they entered the agreement on September 25, 1979 wherein Transco was to receive almost 10,000 Mcf/d for TETCO's account from ANR at (1) the tailgate of the Mobil Cameron Meadows Plant near Johnson's Bayou, Louisiana, and/or (2) the interconnect between ANR's pipeline

facilities and those of High Island Offshore System in West Cameron Block 167, Offshore Louisiana. Transco would redeliver thermally equivalent natural gas quantities to TETCO at the Ragley, Louisiana existing interconnection. The agreement then provided that Transco at the Ragley, Louisiana interconnection would receive from TETCO almost 70,000 Mcf/d for ANR's account. Transco would then redeliver thermally equivalent natural gas quantities to ANR at the tailgate and/or interconnect as discussed above.

The agreement is included as Transco's Rate Schedule X-220, ANR's Rate Schedule X-98, and TETCO's Rate Schedule X-110, from their Volume No. 2 FERC Gas Tariffs. Authorization for the transportation and exchange arrangement was granted by the Commission's April 16, 1980 order in Docket No. CP80-82.

The Applicants state that the agreement was in effect for a one year primary term from the date of first delivery, August 20, 1980, and continues year-to-year unless terminated in writing by any party. ANR on August 24, 1993 provided a written notice of termination to Transco and TETCO. On July 14, 1995, ANR, Transco and TETCO terminated the agreement, effective May 31, 1995, stating that the transportation and exchange service was no longer required.

*Comment date:* October 12, 1995, in accordance with Standard Paragraph F at the end of this notice.

### 3. Texas Eastern Transmission Corporation

[Docket No. CP95-766-000]

Take notice that on September 19, 1995, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 1642, Houston, Texas, 77251-1642, filed in Docket No. CP95-766-000 a request pursuant to Sections 157.205, and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, and 157.211) for approval to construct and operate a new delivery point for United Cities Gas Company (United Cities), a local distribution company and existing Texas Eastern customer, pursuant to Section 7(c) of the Natural Gas Act (NGA), all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Texas Eastern proposes to construct, own, and operate an eight-inch tap valve, an eight-inch check valve, an insulating flange and approximately fifty feet of piping between such tap valve, check valve and insulating flange (collectively referred to as the Tap) to

interconnect Texas Eastern's Line 15 at milepost 243.00 in Maury County, Tennessee, with United Cities. It is indicated that United Cities will construct two six-inch turbine meter runs plus associated piping and valves, pressure regulation and/or over-pressure protection equipment plus associated piping and valves, flow control equipment, and all associated instrumentation. Texas Eastern states that United Cities will also construct approximately 550 feet of eight-inch pipeline between the proposed Texas Eastern eight-inch check valve and the proposed meter station and electronic gas measurement equipment. Texas Eastern avers that it will own, operate, and maintain parts of the facility and that United Cities will operate and maintain other parts of the facility. Texas Eastern further states that it will partially reimburse United Cities for its construction costs in the amount of \$340,000.

Texas Eastern proposes to render up to 50,000 Dth/day of Rate Schedule FT-1 service for United Cities at the proposed delivery point. Texas Eastern states that United Cities presently has firm service agreements with Texas Eastern under Rate Schedules FT-1, CDS, and SS-1. It is indicated that these service agreements are executed pursuant to Subpart G of the Commission's Part 284 regulations. Texas Eastern further states that United Cities and Texas Eastern executed an additional firm transportation agreement on October 24, 1994, pursuant to Texas Eastern's Rate Schedule FT-1. Texas Eastern indicates that the agreement has a primary term of seven years commencing on November 1, 1994, and ending October 31, 2001, pursuant to Texas Eastern's Part 284, Subpart G blanket certificate. It is further indicated that pursuant to the agreement Texas Eastern provided up to 3,500 Dth/day for the period November 1, 1994, through August 31, 1995, and on September 1, 1995, United Cities' maximum daily quantity increased up to 5,000 Dth/day for the remainder of the primary term of the agreement. Texas Eastern avers that the quantities of gas to be delivered to United Cities will be within United Cities' certificated entitlement.

Texas Eastern submits that the installation of the proposed delivery point will have no impact on its peak day or annual deliveries. Texas Eastern further submits that its proposal herein will be accomplished without detriment or disadvantage to its customers and that its existing tariff does not prohibit the addition of delivery points.

*Comment date:* November 6, 1995, in accordance with Standard Paragraph G at the end of this notice.

### Standard Paragraphs

F. Any person desiring to be heard or to make any protest with reference to said application should on or before the comment date, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and/or permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant to appear or be represented at the hearing.

G. Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed

for filing a protest, the instant request shall be treated as an application for authorization pursuant to Section 7 of the Natural Gas Act.

Lois D. Cashell,  
*Secretary.*

#### **ANR Pipeline Company; Notice of Informal Settlement Conference**

September 25, 1995.

Take notice that an informal settlement conference will be convened in this proceeding on Monday, October 2, 1995, at 1:00 p.m., at the offices of the Federal Energy Regulatory Commission, 810 First Street, N.E., Washington, DC, for the purpose of exploring the possible settlement of the above-referenced dockets.

Any party, as defined by 18 CFR 385.102(c), or any participant, as defined by 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, please contact William J. Collins (202) 208-0248 or Mary C. Hain (202) 208-1087. Linwood A. Watson, Jr.,  
*Acting Secretary.*

#### **Kentucky Utilities Company; Notice of Filing**

September 25, 1995.

Take notice that on September 5, 1995, Kentucky Utilities Company tendered for filing copies of an executed Service Agreement for Power Services with Heartland Energy Services, Inc.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before October 6, 1995. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party

must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

*Secretary.*

[FR Doc. 95-24203 Filed 9-28-95; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP95-661-001]

#### **Texas Eastern Transmission Corporation; Notice of Amendment to Application**

September 25, 1995.

Take notice that on September 22, 1995, Texas Eastern Transmission Corporation ("Texas Eastern"), 5400 Westheimer Court, Houston, Texas 77056-5310, filed in Docket No. CP95-661-001 an amended abbreviated application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon by sale to Texaco Pipeline Inc. ("Texaco Pipeline") approximately 37.48 miles of 20-inch pipeline, the associated scraper traps and certain valves and appurtenant piping, (collectively known as "Line No. 40-E") all in the Lafourche and Terrebonne Parishes, Louisiana, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Texas Eastern states that the intent of this Amendment is to facilitate the sale of Texas Eastern's Line No. 40-E and to separate the abandonment of the Point Au Chien compressor station, certain laterals, meter stations and appurtenant facilities associated with such Line 40-E, but not included in the sale to Texaco Pipeline, from the facilities to be sold in order to meet the November 1, 1995, closing deadline as set forth in the Purchase and Sale Agreement with Texaco Pipeline. Those facilities not included in the sale to Texaco Pipeline are the subject of a application filed concomitantly in Docket No. CP95-776-000.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 3, 1995, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party to a proceeding or to participate as a

party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Texas Eastern to appear or be represented at the hearing.

Lois D. Cashell,  
Secretary.

[FR Doc. 95-24207 Filed 9-28-95; 8:45 am]

BILLING CODE 6717-01-M

**[Docket No. CP95-650-001]**

**Questar Pipeline Company; Notice of Amendment to Application**

September 25, 1995.

Take notice that on September 21, 1995, Questar Pipeline Company (Questar Pipeline), 79 South State Street, Salt Lake City, Utah 84111, filed in Docket No. CP95-650-001 and amendment to its application in Docket No. CP95-650-000, pursuant to Section 7(b) of the Natural Gas Act, seeking authority to abandon any certifications that may still surround its Bonanza-Divide Creek gathering facilities located in eastern Utah and western Colorado, all as more fully set forth in the amendment that is on file with the Commission and open to public inspection.

It is stated that Questar Pipeline, on July 31, 1995, in Docket No. CP95-650-000, and Questar Gas Management Company (QGM), on August 2, 1995, in Docket No. CP95-658-000, filed, respectively, an abandonment application and a petition for declaratory order collectively providing for the transfer (spin down) of all of Questar Pipeline's gathering facilities, as well as specific anomalous "certificated gathering" and transmission facilities, to Questar Pipeline's wholly owned, unregulated subsidiary, QGM. Questar

Pipeline explains that among the facilities proposed to be spun down to QGM are certain gathering facilities, located between Bonanza, Utah, and the Divide Creek area of western Colorado, that have been thoroughly described in QGM's Docket No. CP95-658-000 Petition for Declaratory Order.

Questar Pipeline states that since their acquisition, despite the fact that, (1) it has accounted for the facilities as non-jurisdictional gathering and (2) in its view, the gathering facilities have consistently met the Commission's functional tests for qualifying gathering facilities, certain 20 to 30 year-old certifications may still be linked to these facilities. Therefore, it is explained, Questar Pipeline, in its amendment, formally requests authority to abandon all certificate authorizations that may exist in connection with Questar Pipeline's Bonanza-Divide Creek gathering facilities.

Any person desiring to be heard or to make any protest with reference to said amendment to the application should on or before October 5, 1995, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for Questar Pipeline to appear or be represented at the hearing.

Lois D. Cashell,  
Secretary.

**ENVIRONMENTAL PROTECTION AGENCY**

**[OPPTS-00177; FRL-4980-7]**

**Agency Information Collection Activities**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following proposed and/or continuing Information Collection Requests (ICRs) to the Office of Management and Budget (OMB). Before submitting the ICRs to OMB for review and approval, EPA is soliciting comments on specific aspects of the following information collections as described below. The ICRs are: (1) A

proposed ICR entitled "Design for the Environment (DfE) Screen Printing Survey," (2) a proposed ICR entitled "Design for the Environment (DfE) Collection of Impact Data on Technical Information," and (3) a continuing ICR entitled "TSCA Section 12(b) Notification of Chemical Exports," ICR No. 795, OMB No. 2070-0030. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9.

**DATES:** Written comments must be submitted on or before November 28, 1995.

**ADDRESSES:** Submit three copies of all written comments to: TSCA Document Receipts (7407), Rm. NE-G99, Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: 202-260-7099. All comments should be identified by the respective administrative record numbers: Comments on the proposed ICR entitled "Design for the Environment (DfE) Screen Printing Survey" should reference administrative record number 145; comments on the proposed ICR entitled "Design for the Environment (DfE) Collection of Impact Data on Technical Information" should reference administrative record number 146; and comments on ICR No. 795, "TSCA Section 12(b) Notification of Chemical Exports," should reference administrative record number 147. These ICRs are available for public review at, and copies may be requested from, the docket address and telephone number listed above.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: [ncic@epamail.epa.gov](mailto:ncic@epamail.epa.gov). Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the appropriate administrative record number and ICR number. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this document may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in Unit III. of this document.

**FOR FURTHER INFORMATION CONTACT:** For general information contact: Susan B.

Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: 202-554-1404, TDD: 202-554-0551, e-mail: [TSCA-Hotline@epamail.epa.gov](mailto:TSCA-Hotline@epamail.epa.gov).

For technical information contact the following individuals:

For the proposed ICR entitled "Design for the Environment (DfE) Screen Printing Survey," contact Jed Meline, Economics, Exposure and Technology Division (7406), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: 202-260-0695.

For the proposed ICR entitled "Design for the Environment (DfE) Collection of Impact Data on Technical Information," contact Irina Vaysman, Economics, Exposure and Technology Division (7406), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: 202-260-1312.

For ICR No. 795, "TSCA Section 12(b) Notification of Chemical Exports," contact Wanda Woodburn, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: 202-260-3795.

**SUPPLEMENTARY INFORMATION:** Electronic Availability: Electronic copies of each ICR are available from the EPA Public Access Gopher ([gopher.epa.gov](http://gopher.epa.gov)) at the Environmental Sub-Set entry for this document under "Rules and Regulations."

#### I. Background

Entities potentially affected by this action are those: which export or engage in wholesale sales of chemicals; which are engaged in screen printing or other graphics imaging activities; or which are part of industry sectors that may interact with EPA in the Agency's Design for the Environment (DfE) program. For the collections of information addressed in this notice, EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

(iii) Enhance the quality, utility, and clarity of the information to be collected.

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

#### II. Information Collections

This unit addresses three ICRs, which are identified and discussed separately below.

Title: Design for the Environment (DfE) Screen Printing Survey (proposed collection; ICR number, OMB control number, and expiration date not applicable).

Abstract: EPA's Design for the Environment program, administered by the Office of Pollution Prevention and Toxics, is a voluntary, non-regulatory approach to encourage industry to adopt technologies and use materials that result in lower levels of pollution, lessened reliance on toxic materials, higher energy efficiency and lower environmental health risks. Through DfE, EPA creates partnerships with industry, professional organizations, state and local governments, other federal agencies, and the public to develop and disseminate technical information.

The proposed study will focus on facilities that print graphic arts materials, such as fine art prints, billboard advertisements, posters, and electronic equipment. EPA, the Screen Printing and Graphic Imaging Association International (SGIA, the principal association of the screen printing industry), and the University of Tennessee Center for Clean Products and Clean Technologies have developed technical information for screen printing facilities on the use of screen reclamation processes and other workplace practices that may lower health risks to workers and prevent pollution. The purpose of the study is to evaluate the impact of such DfE technical information on screen printing industry practices, use of materials, and waste generation. The proposed study would involve two telephone surveys of owners or operators of screen printing establishments: an initial survey of a sample of 350 screen printing establishments, and a follow-up survey to be administered about 2 years later. This notice addresses burden estimates only for the initial survey.

Responses to the collection of information are voluntary. EPA and the EPA contractor administering the survey

will observe strict confidentiality precautions, based on the Privacy Act of 1974, which are outlined in detail in the ICR.

**Burden Statement:** The burden to respondents for complying with this ICR is estimated to total 438 hours at a total cost of \$10,938. These totals are based on an average burden of approximately 1.25 hours per response for 350 respondents, responding once to this survey. There are no recordkeeping requirements associated with this collection. This estimate includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Title:** Design for the Environment (DfE) Collection of Impact Data on Technical Information (proposed collection; ICR number, OMB control number, and expiration date not applicable).

**Abstract:** This is a generic ICR for a series of studies to undertake data collection in support of EPA's DfE program. The concept of the DfE program is detailed above. These studies are referred to as the DfE Technical Information Impact Studies. The studies will focus on various industrial sectors such as printing, printed wiring board circuitry, and dry cleaning. (The ICR entitled "DfE Screen Printing Survey," described above, is a specific example of the type of collection envisioned by this generic ICR.) The purpose of all DfE Technical Information Impact Studies will be to evaluate the impact of DfE technical information on industry practices, use of materials and waste generation. In each case, EPA, often in collaboration with industry associations and universities, will have developed technical information for industry on the use of product reclamation processes and other workplace practices that may lower health risks to workers and prevent pollution. The proposed studies would each involve two separate surveys of owners or operators of target industry establishments. The initial survey would establish a baseline representing pre-technical information receipt. A follow-up survey will be administered approximately 2 years later to establish longer-term impacts of

the technical materials. The overall goal of this before-and-after design is to understand the impacts of DfE technical information on workplace practices and technologies that generate or prevent pollution. This generic ICR will allow EPA to conduct a series of small conceptually interrelated surveys. It will permit the DfE program the ability to collect information in a timely manner and to evaluate the effectiveness of the technical materials EPA provides to industry. EPA will be the principal user of information developed from the survey findings, but EPA expects that tens of thousands of small businesses in a variety of industry sectors will benefit from the results of the studies.

Responses to the collection of information are voluntary. EPA and any EPA contractor administering the surveys will observe strict confidentiality precautions, based on the Privacy Act of 1974, which are outlined in detail in the ICR.

**Burden Statement:** Because it is not known how many surveys will be conducted, it is not possible to estimate the total burden or cost of the information collection. However, EPA expects that there will be an average burden of approximately 1.25 hours per response, and that the number of respondents will be in the range of 300 to 500 for each survey, with each respondent responding once to a given survey. There are no recordkeeping requirements associated with these surveys. These estimates include the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Title:** Notification of Chemical Exports, ICR No. 795, OMB No. 2070-0030, expires February 28, 1996.

**Abstract:** Section 12(b)(2) of the Toxic Substances Control Act (TSCA) requires that any person who exports or intends to export to a foreign country a chemical substance or mixture that is regulated under TSCA sections 4, 5, 6 and/or 7 submit to EPA notification of such export or intent to export. Upon receipt of notification, EPA will advise the government of the importing country of the U.S. regulatory action with respect to that substance. EPA uses the

information obtained from the submitter via this collection to advise the government of the importing country.

Responses to the collection of information are mandatory (see 40 CFR part 707). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2. However, notwithstanding any claims of confidentiality, the government of the importing country will be notified of the export of the substances in question.

**Burden Statement:** The burden to respondents for complying with this ICR is estimated to total 3,800 hours per year, with an annual cost of \$111,856. These totals are based on an average burden of approximately 0.5 hours per response for an estimated 200 annual respondents, reporting generally once annually per each country to which the respondent exports chemicals. There are no recordkeeping requirements associated with this collection. This estimate includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

### III. Public Docket

A record has been established for this action under docket number "OPPTS-00177" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from noon to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in the TSCA Nonconfidential Information Center, Rm. NE-B607, 401 M St., SW., Washington, DC 20460.

Electronic comments can be sent directly to EPA at:  
ncic@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this action, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

#### List of Subjects

Environmental protection and Information collection requests.

Dated: September 22, 1995.

Lynn R. Goldman,

*Assistant Administrator for Prevention, Pesticides and Toxic Substances.*

[FR Doc. 95-24118 Filed 9-28-95; 8:45 am]

BILLING CODE 6560-50-F

[OPPTS-00176; FRL-4980-8]

#### Agency Information Collection Activities

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing Information Collection Requests (ICRs) to the Office of Management and Budget (OMB). Before submitting the ICRs to OMB for review and approval, EPA is soliciting comments on specific aspects of the following information collections as described below. The ICRs are: (1) "Health and Safety Data Reporting Rule," ICR No. 575, OMB No. 2070-0004; (2) "Recordkeeping and Reporting Requirements for Allegations of Significant Adverse Reaction to Human Health or the Environment," ICR No. 1031, OMB No. 2070-0017; and (3) "Significant New Use Rules for Existing Chemicals," ICR No. 1188, OMB No. 2070-0038. These are not the final draft ICRs. In the absence of final drafts of the ICRs as of the date of publication of this notice, EPA is extending the required 60-day public notice and comment period, which ordinarily would commence with the date of publication of this notice, until December 15, 1995. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for

EPA's regulations are listed in 40 CFR part 9.

**DATES:** Written comments must be submitted on or before December 15, 1995.

**ADDRESSES:** Submit three copies of all written comments to: TSCA Document Receipts (7407), Rm. NE-G99, Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone 202-260-7099. All comments should be identified by the respective administrative record numbers: Comments on ICR No. 575, "Health and Safety Data Reporting Rule," should reference administrative record number 148; comments on ICR No. 1031, "Recordkeeping and Reporting Requirements for Allegations of Significant Adverse Reaction to Human Health or the Environment," should reference administrative record number 149; and comments on ICR No. 1188, "Significant New Use Rules for Existing Chemicals," should reference administrative record number 150.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: [ncic@epamail.epa.gov](mailto:ncic@epamail.epa.gov). Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the appropriate administrative record number and ICR Number. No CBI should be submitted through e-mail. Electronic comments on this action may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in Unit III. of this document.

Draft copies of the ICRs addressed by this notice are available for review at, and copies may be obtained through, the public docket address and telephone number noted above.

**FOR FURTHER INFORMATION CONTACT:** For general information contact: Susan B. Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: 202-554-1404, TDD: 202-554-0551, e-mail: [TSCA-Hotline@epamail.epa.gov](mailto:TSCA-Hotline@epamail.epa.gov). For technical information contact: Frank Kover, Chemical Control Division (7405), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460, Telephone: 202-260-8130.

#### SUPPLEMENTARY INFORMATION:

Electronic Availability: Electronic copies of each ICR are available from the EPA Public Access Gopher ([gopher.epa.gov](http://gopher.epa.gov)) at the Environmental Sub-Set entry for this document under "Rules and Regulations."

#### I. Background

Entities potentially affected by this action are those that manufacture, process, import, or distribute in commerce chemical substances or mixtures.

For each of the collections of information described in Unit II. of this preamble, EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility.

(ii) Evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used.

(iii) Enhance the quality, utility, and clarity of the information to be collected.

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

#### II. Information Collections

This unit addresses three ICRs, which are identified and discussed separately below.

Title: Health and Safety Data Reporting Rule, ICR No. 575, OMB No. 2070-0004.

Abstract: Section 8(d) of the Toxic Substances Control Act (TSCA) and 40 CFR part 716 require manufacturers and processors of chemicals to submit lists and copies of health and safety studies relating to the health and/or environmental effects of certain chemical substances and mixtures. In order to comply with the reporting requirements of section 8(d), respondents must search their records to identify any health and safety studies in their possession, copy and process relevant studies, list studies that are currently in progress, and submit this information to EPA.

EPA uses this information to construct a complete picture of the known effects of the chemicals in question, leading to determinations by EPA of whether additional testing of the

chemicals is required. The information enables EPA to base its testing decisions on the most complete information available and to avoid demands for testing that may be duplicative. EPA will use information obtained via this collection to support its investigation of the risks posed by chemicals and, in particular, to support its decisions on whether to require industry to test chemicals under section 4 of TSCA.

Responses to the collection of information are mandatory (see 40 CFR part 716). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

**Burden Statement:** The burden to respondents for complying with this ICR is estimated to total 8,100 hours per year at a total annual cost of \$349,217. These totals are based on an average burden ranging between 12 and 26 hours per respondent, depending upon the nature of the activities covered by this collection in which respondents are engaged. The overall average burden is estimated to be 17 hours per respondent. The number of respondents range from approximately 125 to approximately 600, again depending upon the activities in which respondents are engaged. There are no recordkeeping requirements associated with this collection. These estimates include the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Title:** Recordkeeping and Reporting Requirements for Allegations of Significant Adverse Reaction to Human Health or the Environment, ICR No. 1031, OMB No. 2070-0017.

**Abstract:** TSCA section 8(c) requires companies that manufacture, process, or distribute chemicals to maintain records of significant adverse reactions to health or the environment alleged to have been caused by such chemicals. Since section 8(c) includes no automatic reporting provision, EPA can obtain and use the information contained in company files only by inspecting those files or requiring reporting of records that relate

to specific substances of concern. Therefore, under certain conditions, and using the provisions found in 40 CFR part 717, EPA may require companies to report such allegations to the Agency.

EPA uses such information on a case-specific basis to corroborate suspected adverse health or environmental effects of chemicals already under review by EPA. The information is also useful to identify trends of adverse effects across the industry that may not be apparent to any one chemical company.

Responses to the collection of information are mandatory (see 40 CFR part 717). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

**Burden Statement:** The burden to respondents for complying with this ICR is estimated to total approximately 33,300 hours per year, with an annual cost of \$1,686,963. These totals are based on an average burden of about 3.5 hours per respondent, with a total of approximately 9,500 respondents. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

**Title:** Significant New Use Rules for Existing Chemicals, ICR No. 1188, OMB No. 2070-0038.

**Abstract:** Section 5 of TSCA provides EPA with a regulatory mechanism to monitor and, if necessary, control significant new uses of chemical substances. Section 5 authorizes EPA to determine by rule (a significant new use rule (SNUR)), after considering all relevant factors, that a use of a chemical substance represents a significant new use. If EPA determines that a use of a chemical substance is a significant new use, section 5 requires persons to submit a notice to EPA at least 90 days before they manufacture, import, or process the substance for that use.

EPA uses the information obtained through this collection to evaluate the health and environmental effects of the significant new use. EPA may take regulatory actions under TSCA section

5, 6, or 7 to control the activities for which it has received a SNUR notice. These actions include orders to limit or prohibit the manufacture, importation, processing, distribution in commerce, use or disposal of chemical substances. If EPA does not take action, section 5 also requires EPA to publish a Federal Register notice explaining the reasons for not taking action.

Responses to the collection of information are mandatory (see 40 CFR part 721). Respondents may claim all or part of a notice confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

**Burden Statement:** The burden to respondents for complying with this ICR is estimated to total approximately 237 hours per year, with an annual cost of \$17,360. These totals are based on an average burden of approximately 118 hours per response for an estimated two annual respondents, reporting once annually. This estimate includes the time needed to review instructions; develop, acquire, install and utilize technology and systems for the purposes of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

### III. Public Docket

A record has been established for this action under docket number "OPPTS-00176" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from noon to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in the TSCA Nonconfidential Information Center, Rm. NE-B607, 401 M St., SW., Washington, DC 20460.

Electronic comments can be sent directly to EPA at:  
ncic@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this action, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

#### List of Subjects

#### Agency Information Collection Activities Under OMB Review

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instruments.

**DATES:** Comments must be submitted on or before October 30, 1995.

**FOR FURTHER INFORMATION OR A COPY CONTACT:** Sandy Farmer at EPA, (202) 260-2740, and refer to EPA ICR No. 1698.

#### SUPPLEMENTARY INFORMATION:

*Title:* Reporting Requirements Under EPA's WasteWiSe Program (OMB Control No. 2050-0139; EPA ICR No. 1698). This is a request for extension of a currently approved information collection.

*Abstract:* EPA's voluntary WasteWiSe program encourages businesses and other organizations to reduce waste.

WasteWiSe members are composed of Partners, which commit to engage in waste reduction activities of their own choice, and Endorsers, which promote WasteWiSe and waste reduction to their members. Endorsers, which are trade associations and other membership-

based associations, submit only one form, the Endorser Registration Form, which identifies the organization and principal contact, and activities which the organization commits to conduct. Partners fill out three forms as follows:

The Partner Registration Form provides EPA with general company information and identifies the facilities committed to the WasteWiSe program: it is signed by a senior official who has authority to commit the company to the program. Each partner develops its own waste reduction goals and completes and submits an annual Goals Identification Form to EPA; partners also report annually on the progress made toward achieving those goals in the Annual Reporting Form.

The information collected will be used by EPA to develop and provide targeted technical information to assist organizations' voluntary waste reduction programs, identify and promote successful waste reduction strategies, and gauge the program's progress.

An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB Control numbers for EPA's regulations are listed in 40 CFR Part 9. The Federal Register Notice with a 60-day comment period soliciting comments on this collection of information was published on July 31, 1995 (60 FR 38997).

*Burden statement:* The respondent burden for this collection is estimated to average 24 hours per response for the Endorser Registration Form; 10 hours per response for the Partner Registration Form; 40 hours per response for the first year's Goals Identification Form; 20 hours per response for each subsequent year's Goals Identification Form; and 55.5 hours per response for the Annual Reporting Form; for an estimated one-time respondent burden of 24 hours for Endorsers and an annual respondent burden of 105.5 hours in the first year and 75.5 hours each subsequent year for Partners. These estimates include the time needed to review instructions, develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to respond to a collection of information; search existing data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

*Respondents/Affected entities:* Businesses and non-governmental organizations that voluntarily join the WasteWiSe program.

*Estimated number of respondents:* 515 in year 1 (115 new members); 615 in year 2; and 715 in year 3.

*Estimated Total Annual Burden on Respondents:* 41,110 hours in Year 1; 48,660 in Year 2; and 56,210 in Year 3.

*Frequency of Collection:* One-time and annual.

Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to the following addresses. Please refer to EPA ICR No. 1698 and OMB Control No. 2050-0139 in any correspondence.

Ms. Sandy Farmer, U.S. Environmental Protection Agency, Information Policy Branch (2136), 401 M Street, SW, Washington, DC 20460

and

Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for EPA, 725 17th Street, NW., Washington, DC 20503

#### Agency Information Collection Activities

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing Information Collection Requests (ICRs) to the Office of Management and Budget (OMB). Before (ICRs) to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collections as described below.

**DATES:** Comments must be submitted on or before November 28, 1995.

**ADDRESSES:** U.S. Environmental Protection Agency, 401 M Street SW, Mail code 2223A, OECA/OC/METD, Washington, DC 20460. A copy of these ICRs may be obtained without charge from Sandy Farmer (202) 260-2740.

**FOR FURTHER INFORMATION CONTACT:** Keith Brown at (202) 564-7124 for NSPS subpart UUU, Calciners and Dryers in Mineral industries and NSPS

subpart LL, Metallic Mineral processing Plants; Tom Ripp at (202) 564-7003 for NSPS subpart J, Petroleum Refineries; and Maria Malave at (202) 564-7027 for NSPS subpart N, Primary Emissions from Basic Oxygen Process Furnaces and NSPS subpart Na, Basic Oxygen Process Steelmaking Facilities. The fax number for all contacts is (202) 564-0050.

**SUPPLEMENTARY INFORMATION:**

*Affected Entities:* Entities potentially affected by this action are those which are subject to NSPS subpart UUU, Calciners and Dryers in Mineral Industries; NSPS subpart LL, Metallic Mineral Processing Plants; NSPS subpart J, Petroleum Refineries; NSPS subpart N, Primary Emissions from Basic Oxygen Process Furnaces; and NSPS subpart Na, Basic Oxygen Process Steelmaking Facilities.

NSPS Subpart UUU, Calciners and Dryers in Mineral Industries

*Affected Entities:* are those which are subject to NSPS subpart UUU, Calciners and Dryers in Mineral Industries with the exceptions listed in 40 CFR 60.730 (a) and (b).

*Title:* NSPS subpart UUU, Calciners and Dryers in Mineral Industries, OMB number 2060-0251, expires March 31, 1996.

*Abstract:* This ICR contains recordkeeping and reporting requirements that are mandatory for compliance with 40 CFR Part 60.730, Subpart UUU, New Source Performance Standards for Calciners and Dryers in Mineral Industries. This information notifies the Agency when a source become subject to the regulations, and informs the Agency that the source is in compliance when it begins operation. The Agency is informed of the sources; compliance status by semiannual reports. the calibration and maintenance requirements aid in a source remaining in compliance

In the Administrator's judgement, particulate matter from calciners and dryers cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, New Source Performance Standards have been promulgated for this source category as required under Section 111 of the Clean Air Act.

The control of emissions of particulate matter requires not only the installation of properly designed equipment, but also the proper operation and maintenance of that equipment. These standards rely on the capture of pollutants vented to a control device.

Owners or operators of calciners and dryers subject to NSPS are required to make initial notifications for construction, startup, and performance testing. They must also report the results of a performance test, and demonstration of a continuous monitoring system if applicable. After the initial recordkeeping and reporting requirements, semiannual reports are required if there has been an exceedance of control device operating parameters.

Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or malfunction in the operation of the air pollution control device, or any periods during which the monitoring system is inoperative. These notifications, reports and records are required in general, of all sources subject to NSPS.

Forty three new facilities are estimated to become subject to NSPS subpart UUU annually. Of those facilities 23 are expected to be exempt from any monitoring requirements and will only have to comply with initial notifications and performance tests.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

*Burden Statement:* The current ICR estimates the cost per respondent for the first year to be \$15,850. This is based on a total average annual burden of 21,636 person hours for 43 respondents with an average wage of \$15 per hour and 110% overhead. The burden for future years is greatly reduced because the initial

notifications and initial performance tests are not required in subsequent years. This burden can range from 0 hours to 78 hours depending on the type of calciner or dryer employed and the monitoring requirements associated with that piece of equipment. This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The following is a breakdown of burden used in the ICR. Burden is calculated as two hours for respondents to write the reports for; notification of construction of reconstruction, notification of physical or operational changes, notification of anticipated startup, notification of actual startup, notification of initial performance test, notification of demonstration of COM. The ICR uses 330 burden hours for the initial performance test. It is assumed that 20% of all affected facilities will have to repeat performance tests. The ICR uses one hundred burden hours for demonstration of COM, and eighteen hours for Method 9. These are all one time only burdens. Four hours are used for semiannual recalibration of the COM.

The recordkeeping burden is estimated to be 1.5 hours to enter records of startup, shutdown, and malfunction. It is assumed this will take place four times a year, with shutdowns twice a year for maintenance and twice a year for process malfunction. Records of information required by NSPS subpart UUU are estimated to take 1.5 hours to record and will be recorded 48 times a year, assuming 48 weeks a year of operation. No additional third party burden is relevant.

NSPS Subpart LL, Metallic Mineral Processing Plants

*Title:* NSPS subpart LL, Metallic Mineral Processing Plants, OMB number 2060-0016, expires March 31, 1996.

*Affected Entities:* are listed at 40 CFR 60.380 (a), (b), and (c).

*Abstract:* This ICR contains recordkeeping and reporting requirements that are mandatory for compliance with 40 CFR Part 60.380 Subpart LL, New Source Performance

Standards for Metallic Mineral Processing Plants. This information notifies the Agency when a source becomes subject to the regulations, and informs the Agency that the source is in compliance when it begins operation.

In the Administrator's judgment, particulate matter from the processing of metallic minerals cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, New Source Performance Standards have been promulgated for this source category as required under Section 111 of the Clean Air Act.

The control of emissions of particulate matter requires not only the installation of properly designed equipment, but also the proper operation and maintenance of that equipment. These standards rely on the capture of pollutants vented to a control device.

Owners or operators of Metallic Mineral Processing Plants subject to NSPS are required to make initial notifications for construction, startup, and performance testing. They must also report the results of a performance test, and demonstration of a continuous monitoring system if applicable. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or malfunction in the operation of the air pollution control device, or any periods during which the monitoring system is inoperative. These notifications, reports and records are required in general, of all sources subject to NSPS. NSPS subpart LL does not have any additional reporting requirements.

Any Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

**Burden Statement:** At the writing of the previous ICR there were 15 sources currently subject to the standards. It is estimated that 1.4 additional sources per year will become subject to the standard. The current ICR estimates the cost per respondent to be \$3,232 for the initial year. This is based on a total average annual burden of 1,911 person hours for 18 respondents with an average wage of \$14.50 per hour and 110% overhead.

The following is a breakdown of burden used in the ICR. Burden is calculated as two hours for respondents to write the reports for; notification of construction or reconstruction, notification of physical or operational changes, notification of anticipated startup, notification of actual startup, notification of initial performance test, notification of demonstration of COM. Initial performance tests are allocated 330 burden hours. It is assumed that 20% of all affected facilities will have to repeat performance tests. The ICR allocates four hours for Method 9. These are all one time only burdens.

Recordkeeping is the only ongoing burden associated with this ICR. The recordkeeping burden is estimated to be 15 minutes to enter records of operating parameters. It is assumed that the plant will operate 250 days a year, therefore, this information will be recorded 250 times a year. There is no additional third party burden relevant to this ICR.

#### NSPS Subpart J: Standards of Performance for Petroleum Refineries

**Title:** NSPS subpart J: Standards of Performance for Petroleum Refineries, OMB number 2060-0022, expires March 31, 1996.

**Affected Entities:** Entities potentially affected by this action are fluid catalytic cracking unit catalyst regenerators, fuel gas combustion devices and all Claus sulfur recovery plants except Claus plants of 20 long tons per day or less at petroleum refineries.

**Abstract:** Owners or operators of the affected facilities described must make the following one-time-only reports: Notifications of the anticipated and actual date of startup, notification of the date of construction or reconstruction, notification of any physical or operational change to an existing facility which may increase the emission rate of any regulated air pollutant, notification

of the date upon which demonstration of the continuous monitoring system performance commences, notification of the date of the initial performance test, and results of the performance tests.

Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or malfunction in the operation of the air pollution control device, or any periods during which the monitoring system is inoperative. These notifications, reports and records are required in general, of all sources subject to NSPS.

Recordkeeping and reporting requirements specific to refineries consist mainly of recording the average coke burn-off rate, the rate of fuel combustion, and the hours of operation on a daily basis. The owner or operator is also required to install a continuous emission monitor and record the emission levels of opacity, carbon monoxide, and sulfur dioxide or hydrogen sulfide. Owners or operators are required to report all periods of emissions in excess of the standard.

In the Administrator's judgment, particulate matter, carbon monoxide and sulfur dioxide from petroleum refineries cause or contribute to air pollution that may reasonably be anticipated to endanger public health or welfare. Therefore, New Source Performance Standards have been promulgated for this source category as required under Section 111 of the Clean Air Act.

The control of emissions of particulate matter, carbon monoxide and sulfur dioxide from petroleum refineries requires not only the installation of properly designed equipment, but also the proper operation and maintenance of the that equipment. These standards rely on the capture of pollutants vented to a control device.

To ensure compliance with these standards, the required records and reports are necessary to enable the Administrator: (1) To identify new, modified, or reconstructed sources subject to the standard; (2) to ensure that the emission limits are being achieved; and (3) to ensure that emission reduction systems are being operated and maintained properly. In the absence of such information collection requirements, enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act and in accordance with any applicable permit.

An Agency may not conduct or sponsor, and a person is not required to

respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

**Burden Statement:** The Agency computed the burden for each of the recordkeeping and reporting requirements applicable to the industry for the currently approved 1992 Information Collection Request (ICR). Where appropriate, the Agency identified specific tasks and made assumptions, while being consistent with the concept of burden under the Paper Reduction Act.

The estimate was based on the assumption that there would be seven new affected facilities each year and that there was an average of 146 sources in existence for the three years covered by the ICR. For the new sources, it was estimated that it would take: seven person-hours to read the instructions, 3890 person-hours to gather the information to write the initial reports and 1285 person-hours to conduct the initial performance tests (assuming that 20% of the tests must be repeated). For all sources, it was estimated that it would take: 146 person-hours to fill out quarterly and semiannual emission reports (assuming 65% of the sources will have at least one quarter with excess emissions and that 35% of the sources will have to report semiannually.) and 12,775 person-hours to enter information for records of operating parameters (assuming a source operates 350 days per year and that it takes .25 hours per occurrence).

The average annual burden to industry over the past three year period from recordkeeping and reporting requirements had been estimated at

18,103 person-hours. The respondents costs was calculated on the basis of \$14.50 per hour plus 110 percent overhead. The average annual burden to industry over the past three years was estimated to be \$551,236.

This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. For the new ICR, cost estimates for the required monitoring systems will need to be included in the overall burden estimate. No additional third party burden is relevant to this ICR.

NSPS Subpart N: New Source Performance Standards (NSPS) for Basic Oxygen Process Furnaces and NSPS Subpart Na: New Source Performance Standards (NSPS) for Basic Oxygen Process Furnaces at Steelmaking Facilities.

**Title:** NSPS Subpart N, Na: New Source Performance Standards (NSPS) for Basic Oxygen Process Furnaces; OMB No. 2060-0029; Expiration Date—March 31, 1996.

**Affected Entities:** Entities potentially affected by this action are each basic oxygen process furnace (BOPF) in a steel plant (Subpart N—addresses primary emissions from BOPF), and any top-blow BOPF and hot metal transfer station or skimming station used for a bottom-blown or top-blown BOPF (Subpart Na—addresses secondary emission from BOPF).

**Abstract:** The EPA is charged under Section 111 of the Clean Air Act, as amended, to establish standards of performance for new stationary sources based on the best demonstrated technology (BDT). Section 111 also requires that the Administrator review, and, if appropriate revise such standards every four years. In addition, Section 114(a) states that:

\* \* \* the Administrator may require any owner or operator subject to any requirement of this act to: (1) Establish and maintain such records, (2) make such reports, (3) install, use and maintain such monitoring equipment or methods (in accordance with such methods at such locations, at such intervals, and in such manner as the Administrator shall

prescribe), (4) provide such other, information, as he may reasonably require.

New Source Performance Standards were promulgated for basic oxygen process furnaces on June 11, 1973 and amended on January 2, 1986 to include both primary emissions and secondary emissions from these sources. An opacity limit was promulgated on April 13, 1978, as a supplement to the mass standard. In the Administrator's judgment, these standards were required to address particulate matter emissions from BOPFs in iron and steel plants which contribute to air pollution that may reasonably be anticipated to endanger public health or welfare.

To ensure compliance with such standards adequate recordkeeping is necessary. In the absence of such information enforcement personnel would be unable to determine whether the standards are being met on a continuous basis, as required by the Clean Air Act.

The Standards require daily recordkeeping to document process information relating to the time and duration of each steel production cycle and any diversion of exhaust gases from the main stack servicing the BOPF, as well as, of the various rates or levels of exhaust ventilation at each phase of the cycle through each duct of the secondary emission capture system (specified in 40 CFR 60.143, and 40 CFR 60.143a). Generally, this information will be readily available because it is needed for plant records. Therefore, there is no increased burden to industry on this requirement. Information on pressure losses through the venturi constriction of the control equipment, and water supply pressure to the control equipment would be recorded continuously for facilities using venturi scrubbers, thus enabling owners and operators to demonstrate compliance with the standards. This information will be used to compare recorded pressures to those pressures measured during performance test so that comparisons can be made to their emissions thus ensuring continuous compliance with the standard. The semiannual reporting requirement (specified in 40 CFR 60.143(c) and 60.143a (d) & (e)) for monitoring results (i.e., pressure loss through the venturi constriction of the scrubber and water supply pressure to the scrubber) which average more than ten percent below performance test results provides a good indication of a source's compliance status. EPA reduced the reporting frequency for this information from quarterly to semiannually in a December 1990 Federal Register Notice. The

reduction in reporting frequency was respondent to the Office of Management and Budget's (OMB's) previous questions regarding the need for quarterly versus semiannual reporting.

The standards require initial notification reports with respect to construction, modification, reconstruction, startups, shutdowns, and malfunctions (specified in 40 CFR 60.7(a)).

Notification of construction and startup indicated to enforcement personnel when a new affected facility has been constructed and, therefore, is subject to the standard.

Under the standard, the data collected by the affected industry is retained at the facility for a minimum of two years.

As mentioned above, if the information required by the standards were not collected, the Agency would have no means for ensuring that compliance with the NSPS is achieved and maintained by new, modified, or reconstructed sources subject to the regulations. An owner or operator could elect to reduce operating expenses by not installing, maintaining, or otherwise operating the control technology required by the standards. In the absence of the information collection requirements, compliance with the standards could be ensured only through continuous on-site inspections by regulatory agency personnel. Consequently, not collecting the information would result in either greatly increased expenditures of resources, or the inability to ensure compliance with the standards.

The information collected from recordkeeping and reporting requirements is also used for targeting inspections, and is of sufficient quality to be used as evidence in court.

All reports are sent to the delegated State or local level authority. In the event that there is no such delegated authority, the reports are sent directly to the EPA Regional Office.

In addition to reviewing notifications or semiannual reports, the reviewing authority may elect to also conduct inspections. After a notification, Agency personnel may want to conduct an inspection to ensure that the equipment is properly installed and operated, as was indicated in the performance test report. Agency personnel may also conduct periodic inspections to obtain additional data, as a check for source operation and maintenance and for compliance determinations.

The data that is gathered from inspections is summarized and published for internal Agency use in compliance and enforcement programs. Information from the reports is entered

into the Aerometric Information Retrieval System (AIRS) Facility Subsystem (AFS) which is operated and maintained by EPA's Office of Air Quality, Planning and Standards.

An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

**Burden Statement:** The Agency computed the burden for each of the recordkeeping and reporting requirements applicable to the industry for the currently approved 1992 Information Collection Request (ICR). Where it was appropriate, the Agency identified specific tasks and made assumptions, while being consistent with the concept of burden under the Paper Work Reduction Act.

The estimate for reporting and recordkeeping burden includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

The estimate was based on the assumption that 14 sources were subject to the standard and that an additional 0.6 sources per year became subject to the standard over the past three years.

The average annual burden to industry over the past three year period, since the currently approved ICR, from

recordkeeping and reporting requirements had been estimated at 1,547 person-hours. The respondents costs was calculated on the basis of \$14.50 per hour plus 110 percent overhead. The average annual burden to industry over the past three years was estimated to be \$47,112.

The following is a breakdown of burden used in the ICR. Burden is calculated as two hours for respondents to write the reports for; notification of construction or reconstruction, notification of physical or operational changes, notification of anticipated startup, notification of actual startup, notification of initial performance test, notification of demonstration of COM. Initial performance tests are allocated 72 burden hours. It is assumed that 20% of all affected facilities will have to repeat performance tests. The ICR allocates four hours for Method 9 tests and assumed there will be approximately 30. These are all one time only burdens. It is assumed that all sources use venturi scrubbers for pollution control and half of the affected facilities have reportable low pressures. Ten burden hours are assumed for the low pressure measurement report.

Recordkeeping is the only ongoing burden associated with this ICR. The recordkeeping burden is estimated to be 15 minutes to enter records of operating parameters. It is assumed that the plant will operate 365 days a year, therefore, this information will be recorded 365 times a year. There is no additional third party burden relevant to this ICR.

Dated: September 22, 1995.

### Agency Information Collection Activities

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following proposed and/or continuing Information Collection Requests (ICRs) to the Office of Management and Budget (OMB). Before submitting the ICRs to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collections as described below.

**DATES:** Comments must be submitted on or before November 28, 1995.

**ADDRESSES:** Chemical Emergency Preparedness and Prevention Office, Office of Solid Waste and Emergency Response, U.S. Environmental Protection Agency, 401 M Street SW., Washington DC 20460.

**FOR FURTHER INFORMATION CONTACT:** Vanessa Rodriguez, Chemical Emergency Preparedness and Prevention Office. (202) 260-7913.

**SUPPLEMENTARY INFORMATION:**

*Affected entities:* Entities potentially affected by this action are those which may petition EPA to modify, by addition or deletion, the list of regulated substances under section 112(r) of the Clean Air Act of 1990 as Amended (CAA or the Act). Any person may petition EPA to modify, by addition or deletion, the list of regulated substances. Potential petitioners are likely to include environmental groups, industries producing, using, or storing listed regulated substances, and state and local agencies.

*Title:* Information Requirements For Petitions to Modify The List of Regulated Substances Under Section 112(r) of the Clean Air Act, as Amended.

*Abstract:* This information collection addresses the requirements for submitting petitions to modify the list of regulated substances under section 112(r) of the CAA. CAA section 112(r) requires EPA to promulgate a list of at least 100 substances ("regulated substances") that are known to cause, or may be reasonably anticipated to cause, death, injury, or serious adverse effects to human health or the environment. EPA is also required to set threshold quantities for each listed substance. The list and threshold quantities will determine the need for owners and operators of facilities to comply with subsequent regulations addressing the prevention and detection of accidental releases. The act also requires the Agency to develop procedures for the addition and deletion of substances from the list. Accordingly, EPA has published a list of regulated substances and threshold quantities and also the requirements for the petition process that will be used to add or delete chemicals from the final list.

The listing rule requires the petitioner to submit information in support of a petition to modify the list of regulated substances. The petitioner must provide EPA with sufficient information to specifically support the request to add or delete a substance from the list of regulated substances. The Agency will use this information in making the

decision to grant or deny a petition. The information collection addresses the burden of collecting and submitting supporting information in accordance with EPA's proposed petition process. Information will be collected on a voluntary basis, and all the information collected requesting modification of the substance listings will be stored in a docket created for that purpose.

This information collection is authorized under CAA section 112(r), 42 U.S.C. 7412(r). CAA section 112(r)(3) states, in relevant part, "The Administrator shall establish procedures for the addition and deletion of substances from the list established under this paragraph consistent with those applicable to the list in subsection (b)." The information collected during the petition process will provide the primary basis for EPA to determine if it is appropriate to add or delete the substance from the list. To be consistent with the petition process under CAA section 112(b), EPA is required to consider and respond to petitions to modify the list of regulated substances for accidental release prevention within 18 months of submission of the petition; complete data supporting the petition are necessary to allow EPA to complete its review within that time period. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

*Burden Statement:* Public reporting for this collection of information in the petition process is estimated to be approximately 138 hours per response, including time for reviewing

instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. EPA estimates that there will be an average of 11 petitions per year. The total annual burden is estimated to be 1,518 hours, (138 hours×11 petitions). This estimate includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: September 25, 1995.

James Makris,

Director, Chemical Emergency Preparedness and Prevention Office.

**Request for Comments; Agency Information Collection Activities**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 et seq.), this notice announces that EPA is planning to submit a new Information Collection Request (ICR) to the Office of Management and Budget (OMB). This proposed ICR is for the one-time information collection activity entitled "Voluntary Dioxin Information and Data Call-In" (EPA ICR No. 1762.01). Before submitting this ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

**DATES:** Comments must be submitted on or before November 28, 1995.

**ADDRESSES:** Submit three copies identified by administrative record number "AR-138" and EPA ICR number "1762.01" by mail to: TSCA Document Receipts (7407), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to:

ncic@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the administrative record number "AR-138" and ICR number "1762.01". No CBI should be submitted through e-mail. Electronic comments on this document may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in Unit III. of this document.

**FOR FURTHER INFORMATION CONTACT:**

Susan B. Hazen, Director,  
Environmental Assistance Division  
(7408), Environmental Protection  
Agency, 401 M St., SW., Washington,  
DC 20460, Telephone: 202-554-1404,  
TDD: (202) 554-0551, e-mail: TSCA-  
Hotline@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:**

*Electronic Availability:* An electronic copy of the ICR is available from the EPA Public Access Gopher (gopher.epa.gov) at the Environmental Sub-Set entry for this document under "Rules and Regulations."

**I. Background**

Through a general notice in the Federal Register and a general press advisory, the Agency is asking industry, public interest groups, Federal, State and local governments, the medical community, academia, and the general public to submit dioxin measurement data to the Agency. No individual surveys will be sent to any specific party. The Agency has, however, developed an outreach plan which will target specific parties thought to have information as well as those who may or may not have information. These parties will receive a general notice informing them of the data call-in. These parties include: Various State and local governments; associations (medical, industrial) which will get the message out to their members; special interest groups such as environmental organizations; and academic organizations.

EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used.

(iii) Enhance the quality, utility, and clarity of the information to be collected.

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

**II. Information Collection Request**

EPA is seeking comments on the following new Information Collection Request (ICR).

*Title:* Voluntary Dioxin Information and Data Call-In (EPA ICR No. 1762.01).

*Abstract:* This new collection is in support of the Agency's efforts to reassess the toxicity of and exposure to dioxin. On September 13, 1994, EPA released a 2,400 page draft reassessment of the toxicity of and exposure to dioxin. One of the central issues to the reassessment regarded the levels of dioxin in the environment. EPA is interested in knowing whether the draft reassessment appropriately estimates releases and exposures from known sources. EPA believes that the first step in answering this question is to find out whether there are existing data which the Agency has somehow missed in the draft reassessment.

EPA has compared the estimated range of dioxin TEQ (toxic equivalent quotient) annually released from known combustion sources to an estimated range of dioxin TEQ that may be depositing from the atmosphere. EPA currently estimates that a range of emissions (3,300 to 26,000 g TEQ/yr) are released into the air annually. Although limited in number, deposition measurements taken in the U.S. suggest that more dioxin is depositing from the that atmosphere than is going into the atmosphere from combustion sources. (The total amount of dioxin depositing by wet and dry processes is in the range of 20,000 to 50,000 g TEQ/yr.)

While several possible explanations may account for this discrepancy, two potential explanations may be further clarified by using this call-in: (1) Inaccuracies in existing emission data may be resolved; and (2) emissions from unknown sources may be identified.

In order to determine if the Agency is properly measuring dioxin emissions, the Agency is seeking sources of release of dioxin to the environment, the levels of dioxin which are being released and the pathways of release, the levels of dioxin occurring in food and feed, the levels of dioxin measured in human

tissue, mechanisms for minimizing or eliminating the further generation and/or release of dioxin to the environment, and QA/QC information associated with the data.

Under the Paperwork Reduction Act, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9.

*Burden Statement:* The burden for this collection of information is estimated to be 25 hours per response, which includes the time needed to review the Federal Register notice requesting the information, gather the data needed, review the information prior to submission, and to transmit the information to the Agency.

The Agency expects the burden time per submission to be similar to an 8(e) submission with an additional 5 hours to access QA/QC information for each submission. The Agency's burden estimate for 8(e) is approximately 20 hours per submission. Since QA/QC questions are not part of the 8(e) submission, the Agency estimates the total burden time to be 25 hours per submission.

The Agency estimates approximately 125 submissions will be submitted. At 25 hours per submission the total burden time is 3,125 burden hours. The Agency estimates that approximately 25 percent of the submissions should have been submitted under TSCA section 8(e) and will now be sent (given an enforcement discretion period allowed under this call-in). Therefore, the total burden of this call-in is 2,345 hours.

**III. Public Record**

A record has been established for this action under docket number "OPPTS-00178" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from noon to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in the TSCA Nonconfidential Information Center, Rm. NE-B607, 401 M St., SW., Washington, DC 20460.

Electronic comments can be sent directly to EPA at:  
ncic@epamail.epa.gov.

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this action, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in **ADDRESSES** at the beginning of this document.

#### List of Subjects

Environmental protection and Information collection requests.

Dated: September 25, 1995.

Susan H. Wayland,

Acting Assistant Administrator for Prevention, Pesticides and Toxic Substances.

[FR Doc. 95-24286 Filed 9-28-95; 8:45 am]

BILLING CODE 6560-50-M

[OPP-00417; FRL-4982-3]

#### Renewal of Agency Information Collection Activities

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This notice announces that three Information Collection Requests (ICR) are coming up for renewal. These ICRs are: Data Call-In for Special Review Chemicals (ICR No. 922.04), Export Policy: Foreign Purchaser Acknowledgement Statements (ICR No. 161.06), and Notice of Pesticide Registration by States to Meet a Special Local Need (ICR No. 595.05). Before submitting the renewal packages to the Office of Management and Budget (OMB), EPA is soliciting comments on specific aspects of the collections as described below.

**DATES:** Comments must be submitted on or before November 28, 1995.

**ADDRESSES:** Submit written comments identified by the docket number OPP-00417 and the appropriate ICR number by mail to: Public Response Section, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460; In person, bring comments directly to the OPP docket which is located in Rm. 1132 of Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. Copies of the complete ICR and accompanying appendices may be obtained from the OPP docket at the above address or by contacting the person whose name appears under **FOR FURTHER INFORMATION CONTACT**.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number "OPP-00417" and the appropriate ICR number. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this document may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in Unit III. of this document.

Information submitted as a comment concerning this document may be claimed confidential by marking any part of all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the Virginia address given above from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

#### FOR FURTHER INFORMATION CONTACT:

Carol Peterson, Policy and Special Projects Staff, office of Pesticide Programs, Environmental Protection Agency, Mail Code (7501 C), 401 M St., SW., Washington, DC 20460, Telephone: (703) 305-6598, e-mail: peterson.carol@epamail.epa.gov.

#### SUPPLEMENTARY INFORMATION:

**Electronic Availability:** Electronic copies of each ICR are available from the EPA Public Access Gopher (gopher.epa.gov) at the Environmental Sub-Set entry for this document under "Rules and Regulations."

#### I. Information Collection Requests

EPA is seeking comments on the following Information Collection Requests (ICRs).

**Title:** Data Call-In for Special Review Chemicals. ICR No. 922.04. OMB No. 2070-0057. Expiration date: March 31, 1996.

**Affected Entities:** Parties affected by this information collection are manufacturers of pesticide chemicals.

**Abstract:** The Federal Insecticide, Fungicide, and Rodenticide Act as amended (FIFRA) mandates that EPA register pesticide products. Under FIFRA, EPA may require pesticide registrants to generate and submit data to the Agency where such data are needed to assess whether registration of an existing pesticide causes an unreasonable adverse effect on human health or the environment. Pesticide registrants must generate and report the required data.

The purpose of this information collection activity is for EPA's Office of Pesticide Programs (OPP) to obtain data to assess whether certain pesticides pose unreasonable adverse effects on human health or the environment, and therefore should continue to be registered. Data may consist of toxicology studies, fish and wildlife studies, environmental fate studies, chemistry studies, or other data needed to analyze the potential risks and benefits associated with pesticide chemicals. EPA gathers much of the additional information needed to reassess a chemical by requesting data from the registrant under FIFRA section 3(c)(2)(B).

No third party notification or public disclosure burden is associated with this collection.

**Burden Statement:** The current total annual respondent burden estimate is 58,880 hours. The current ICR estimated 8 Special Review Data Call-Ins (DCIs) and 64 respondents annually; included in the renewal the Agency predicts an average of 4 Special Review DCIs and 32 respondents annually. This revised prediction reduces the total burden estimates to 29,440 hours annually. Each respondent is required to respond only once per event. Small businesses are generally exempt from generating data on purchased registered active ingredients. Most small entities are formulators, who need only respond to a data call-in for basic data by indicating a legitimate claim for exemption. They do not incur any other information burden associated with the call-in.

**Title:** Export Policy: Foreign Purchaser Acknowledgement Statement of Unregistered Pesticides. ICR No. 161.06. OMB No. 2070-0027. Expiration date: March 31, 1996.

**Affected Entities:** Parties affected by this action are exporters of pesticides.

**Abstract:** Section 17 of FIFRA requires an exporter of any pesticide not registered under FIFRA to obtain a signed statement from the foreign purchaser acknowledging that the purchaser is aware that the pesticide is not registered for use in the United States and cannot be sold in the United

States. The purpose of the foreign purchaser acknowledgement statement (FPAS) requirement is to allow EPA to notify the government of the importing country that an unregistered pesticide for which no hazard assessment has been made, will be imported into that country. This information is submitted in the form of annual of per-shipment statements to EPA, which maintains original records and transmits copies thereof to appropriate government officials of the countries which are importing the pesticides.

EPA is also including in this renewal of the ICR an estimate of the burden imposed by export labeling requirements, which meet the definition of third party labeling. The labeling requirement may be met by supplemental labeling attached to either the product container or the shipping container.

**Burden Statement:** The burden for this information collection reflects EPA's experience implementing the 1993 pesticide export policy governing the export of pesticides, devices, and active ingredients used in producing pesticides. EPA revised the information collection estimates to reflect the actual numbers of export notifications received under the policy. This ICR renewal includes an increased burden estimate of 2,167 hours for the submission of the FPAS, which is 1,273 hours higher than in the current ICR. The 2,167 hours is based on the approximately 2,000 notices annually received pursuant to the export policy. The ICR for the export policy had a burden estimate of 1,057 hours, based upon an estimated 976 notices annually.

The previous ICR did not estimate the respondent burden of the export labeling requirement, because an estimate of third-party notification burden was not required at that time. The labeling burden for the estimated 3,600 annually exported products is estimated to be 22,050 hours.

The total estimated burden for this ICR renewal is 24,217 hours. The change in respondent burden from the current 894 hours is due to two factors: (1) EPA has revised the burden estimate for the purchaser acknowledgement requirement to reflect the numbers of FPASs submitted to EPA under the revised policy; (2) EPA has also estimated the burden imposed by the export labeling requirement, due to the new requirement in the Paperwork Reduction Act to estimate the cost of third party notifications.

**Title:** Notice of Pesticide Registration by States to Meet a Special Local Need (SLN) under FIFRA Section 24(c). ICR

No. 595.05. OMB No. 2070-0055.

Expiration date: April 30, 1996.

**Affected Entities:** Parties affected by this collection activity are the States which are defined to include Washington, DC, Puerto Rico, the U.S. Virgin Islands, Guam and the islands of the Pacific Territory, and American Samoa; manufacturers of pesticide chemicals; and grower groups.

**Abstract:** FIFRA section 24(c) authorizes the States to register additional uses of federally registered pesticides for distribution and use within the State to meet a special local need. A state-issued registration under FIFRA section 24(c) is deemed a federal registration, for the purposes of the pesticide's use within the State's boundaries. A State must notify EPA, in writing, of any action it takes, i.e., issues, amends, or revokes, a state-registration. The Agency has 90 days to disapprove the registration. In such cases, the State is responsible for notifying the affected registrant. EPA requires this information to ensure that the States do not issue any registration that might conflict with other requirements in FIFRA, or with the Federal Food, Drug, and Cosmetic Act which require that tolerance exist for any pesticide used on a food or feed commodity. The States are required by federal regulation to collect from the manufacturer, or grower group, adequate information to support the section 24(c) application for registration or amendment. Both the State and the manufacturer or grower group are required to keep records for as long as the registration is active. In this case, the manufacturer, or grower group, represents a third party. The information collected from the third party is required to obtain a benefit, while that collected from the States by EPA is mandatory.

**Burden Statement:** The overall respondent burden hours associated with this collection has increased from the current ICR estimate of 1,375 hours to 38,775 hours per year. This change is the result of new requirements imposed to include third party notification and recordkeeping estimates in the tally. The respondents include both the State governments and the company, or grower group, filing for a state registration. The number of applications made by the States since the last ICR has not changed, and no changes have been made in the requirements for section 24(c) applications. Costs have increased due to more realistic labor rates supplied by the Bureau of Labor Statistics, which reflect more accurately the costs borne by the registrants and

State government personnel who submit 24(c) applications.

The annual respondent burden for this program is estimated to average 70.5 hours per response, including time for: Compiling the information/data submitted by the registrant, reviewing the information for special local needs determination, completing paperwork to notify the federal government, storing/filing/maintaining the data, and responding back to the registrant if the registration is disapproved by EPA. In addition, the burden includes that incurred by the applicant (third party) for data gathering, reporting and recordkeeping purposes.

Any Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are contained in 40 CFR part 9.

## II. Request for Comments

EPA solicits comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility.

(ii) Evaluate the accuracy of the agency's estimates of the burden of the proposed collection of information.

(iii) Enhance the quality, utility, and clarity of the information to be collected.

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated or electronic collection technologies of other forms of information technology, e.g., permitting electronic submission of responses.

## III. Public Docket

A record has been established for this action under docket number "OPP-00417" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to epa at: opp-docket@epamail.epa.gov.

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this action, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in ADDRESSES at the beginning of this document.

#### List of Subjects

BILLING CODE 6560-50-M

[OPP-00416; FRL-4981-3]

#### Establishment of the Pesticide Program Dialogue Committee

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** As required by section 9(a)(2) of the Federal Advisory Committee Act, this notice announces the establishment of a Pesticide Program Dialogue Committee. This Committee is being established to provide a forum for a diverse group of individuals to provide advice and assistance to EPA's Office of Pesticide Programs (OPP) regarding pesticide regulatory development and reform initiatives, evolving public policy and program implementation issues, and science issues associated with evaluating and reducing risks from use of pesticides. The Agency has determined that this is in the public interest and will assist the Agency in performing its duties as prescribed in the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Federal Food, Drug, and Cosmetic Act (FFDCA). Copies of the Committee Charter will be filed with the appropriate committees of Congress and the Library of Congress. The Committee's first meeting will be scheduled in the Fall of 1995 and will be open to the public.

#### FOR FURTHER INFORMATION CONTACT:

Persons needing further information or seeking to obtain a copy of the Committee Charter should contact: Margie Fehrenbach, Office of Pesticide Programs, Environmental Protection Agency, Mail Code 7501C, 401 M St., SW., Washington, DC 20460, Telephone: (703) 305-7090, e-mail: fehrenbach.margie@epamail.epa.gov.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

EPA's Office of Pesticide Programs (OPP) is entrusted with the responsibility of ensuring the safety of the American food supply; the protection from unreasonable risk or exposure of those who apply pesticides, or are exposed to pesticides occupationally or through use of products; and, general protection of the environment and special ecosystems from potential risks posed by pesticides. OPP must also make sure that pesticides are regulated fairly and help ensure that effective measures for controlling pests are available through careful balancing of pesticide risks and benefits.

Pesticides are used in a remarkably diverse array of products, including insect repellents, agricultural weed killers, household disinfectants, swimming pool chemicals, to name a few. They are likely to be found or used in nearly every home and business in the United States, where over one billion pounds of pesticide chemicals are used each year. Thus, public concern over potential risks to human health and the environment from pesticides is significant.

While several mechanisms are in place to try to involve the public in pesticide decisionmaking activities, the Pesticide Program Dialogue Committee will bring together a broad cross-section of knowledgeable individuals from organizations representing divergent views to discuss pesticide regulatory, policy and implementation issues. EPA proposed the establishment of a dialogue committee to foster the exchange of ideas and information so that feasible regulatory and policy changes could be developed. Dialogue with outside groups is essential if OPP is to be responsive to the needs of the affected public and industry organizations.

The creation of a Pesticide Program Dialogue Committee under the Federal Advisory Committee Act (FACA) will provide the structured environment for meaningful information exchanges and consensus building discussions.

##### II. Participants

The Group will have approximately 20 members. OPP will carefully monitor membership to ensure that there is a balanced representation from industry/trade associations; pesticide user and commodity groups; consumer and environmental/public interest groups; and others.

EPA anticipates that the committee will contain the following types of representatives: environmental/public interest groups, chemical industry/trade associations, commodity and user groups, State and Regional representatives, other Federal agencies, the public health community, congressional committees, academia, and the general public.

#### List of Subjects

#### Access to Confidential Business Information by Armstrong Data Services

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has authorized its contractor, Armstrong Data Services (ADS) of Vienna, Virginia, for access to information which has been submitted to EPA under all sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI).

**DATES:** Access to the confidential data submitted to EPA will occur no sooner than October 16, 1995.

**FOR FURTHER INFORMATION CONTACT:** Susan B. Hazen, Director, Environmental Assistance Division (7408), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E-545, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD: (202) 554-0551; e-mail: TSCA-Hotline@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** Under contract number 68-W5-0024, contractor ADS, of 2070 Chain Bridge Rd., Suite 150, Vienna, VA, 22182 will assist the Office of Pollution Prevention and Toxics (OPPT) in managing and operating the TSCA Confidential and Nonconfidential Business Information

Centers. In accordance with 40 CFR 2.306(j), EPA has determined that under this contract, ADS will require access to CBI submitted to EPA under all sections of TSCA to perform successfully the duties specified under the contract. ADS personnel will be given access to information submitted to EPA under all sections of TSCA. Some of the information may be claimed or determined to be CBI.

EPA is issuing this notice to inform all submitters of information under all sections of TSCA that EPA may provide access to these CBI materials on a need-to-know basis only. All access to TSCA CBI under this contract will take place at EPA Headquarters only.

Clearance for access to TSCA CBI under this contract may continue until September 30, 2000.

ADS personnel will be required to sign nondisclosure agreements and will be briefed on appropriate security procedures before they are permitted access to TSCA CBI.

#### List of Subjects

Environmental protection, Access to confidential business information.

#### Access to Confidential Business Information ICF, Incorporated

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** EPA has authorized its contractor, ICF, Inc. (ICF) of Washington, DC and Fairfax, Virginia for access to information which has been submitted to EPA under all sections of the Toxic Substances Control Act (TSCA). Some of the information may be claimed or determined to be confidential business information (CBI). In a letter dated May 22, 1995, ICF requested that EPA approve a second location for storage of TSCA CBI.

**DATES:** Storage of the confidential data at the second site will occur no sooner than October 16, 1995.

**FOR FURTHER INFORMATION CONTACT:** Susan B. Hazen, Director, TSCA Environmental Assistance Division (7408) Office of Pollution Prevention and Toxics, Environmental Protection

Agency, Rm. E-545, 401 M St., SW., Washington, DC 20460, (202) 554-1404, TDD: (202) 554-0551; e-mail: TSCA-Hotline@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** In a previous notice published in the Federal Register of November 3, 1992, (57 FR 49706), ICF was authorized under EPA contract 68-D2-0064 for access to CBI submitted to EPA under all sections of TSCA. ICF is currently authorized access to TSCA CBI at its facility located at 9300 Lee Highway, Fairfax, VA. EPA is issuing this notice to inform all submitters of information under all sections of TSCA that in a letter dated May 22, 1995, ICF requested that EPA approve a second TSCA CBI storage site, located at 1850 K Street, NW, Suite 1000, Washington, DC. EPA has inspected the facility and ensured that it is in compliance with the manual. Upon completing review of CBI materials, ICF will return all transferred materials to EPA.

Clearance for access to TSCA CBI under this contract is authorized until September 30, 1996.

#### [ER-FRL-5229-3]

#### Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared September 11, 1995 Through September 15, 1995 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260-5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 14, 1995 (60 FR 19047).

#### Draft EISs

ERP No. D-AFS-J61096-CO Rating EC1, Steamboat Ski Area Expansion, Implementation, Medicine Bow-Routt National Forest, Mt. Weiner, Special-Use-Permit and COE Section 404 Permit, Routt County, CO.

**Summary:** EPA expressed environmental concerns over the scope of wetlands analysis and wetlands impacts in the draft EIS. Information in the draft EIS was not adequate to identify potential wetland impacts, or to assess the wetland resources.

ERP No. D-AFS-J65241-MT Rating EC2, Skyline Ridge Project Area Timber Salvage and Associated Activities, Plan of Approval and Implementation, Kootenai National Forest, Three Rivers Ranger District, Lincoln County, MT.

**Summary:** EPA expressed environmental concerns about potential adverse water quality and channel stability effects to 5 creeks in the watershed. EPA also believes additional information is needed to fully assess and mitigate all potential environmental impacts of the actions.

ERP No. D-AFS-L67034-WA Rating EO2, Crown Jewel Mine and Mill Project, Construction and Operation, Gold and Silver Mining and Milling Project, Plan of Operations Approval, Special-UsePermits and COE Section 404 Permit, Chesaw, Okanogan County, WA.

**Summary:** EPA had environmental objections regarding water quality, hydrologic alteration, NPDES permitting, reclamation and wetland and stream mitigation.

ERP No. D-FHW-K40211-HI Rating LO, Kealakehe Parkway Completion, Queen Kaahumanu Highway and Honokohau Harbor Road Intersection to near the Mamalahoa Highway and Old Mamalahoa Highway Intersection, North Kona District, Hawaii County, HI.

**Summary:** EPA expressed a lack of objection to the project as proposed.

ERP No. D-NCP-D61040-DC Rating LO, Washington, DC. New Sports and Entertainment Arena, Construction and Operation, Modern Multi-Purpose Arena, Eight potential Sites, Washington, DC.

**Summary:** EPA believed that this project will have minimal adverse impacts to the environment and therefore has no objection to the project.

ERP No. DS-BLM-G01010-NM Rating LO, Fence Lake Federal Coal Project, Updated Information for Approval or Disapproval of Salt River Project Agricultural Improvement and Power District (SRP), Lease Approval, Mining Plan Permit Application, Catron and Cibola Cos., NM and Apache County, AZ.

**Summary:** EPA expressed a lack of objection for the proposed actions.

#### Final EISs

ERP No. F-AFS-G65058-NM, Diamond Bar Allotment Management Plan, Implementation, Gila National

Forest, Mimbres Ranger District, Sierra, Catron and Grant Counties, NM.

*Summary:* EPA expressed a lack of objection to the proposed action.

ERP No. F-AFS-J65149-MT, Big Mountain Ski and Summer Resort Expansion Project, Special-Use-Permit, Flathead National Forest, Tally Lake and Glacier View Ranger Districts, Whitefish, Flathead County, MT.

*Summary:* EPA expressed environmental concerns regarding Forest Service's consistency on air quality conformity determinations for ski area expansions near nonattainment areas. EPA believes that new growth in minor source emissions for this expansion will consume PSD increment in Class I and II areas.

ERP No. F-AFS-J65211-CO, Illinois Creek Timber Sale, Timber Harvesting, Implementation, Amended Land and Resource Management Plan, Grand Mesa, Uncompahgre and Gunnison National Forests, Taylor River/Cebolla Ranger District, Gunnison County, CO.

*Summary:* EPA expressed environmental concerns about incomplete wetland identification, nutrient loading and compliance with section 404 of the CWA.

ERP No. F-AFS-J65227-MT, Wagner-Atlanta Vegetation Treatment Project, Implementation, Helena National Forest, Townsend Ranger District, Meagher County, MT.

*Summary:* EPA expressed a lack of objection with the selection of Alternative E.

ERP No. F-AFS-K28017-CA, Running Springs Water District Wastewater Treatment Facilities Upgrading and Reclamation for Irrigation and Snow-Making at the Snow Valley Ski Resort, Approval, San Bernardino National Forest, San Bernardino County, CA.

*Summary:* Review of the final EIS was not deemed necessary. No formal comment letter was sent to preparing agency.

ERP No. F-FHW-D40271-PA, US 219 Transportation Project, Improvement from I-68 to Somerset and US 219 to Meyersdale, Funding, Somerset County, PA.

*Summary:* EPA has determined that all outstanding issues have been addressed. EPA had no objections to the issuance of the Record of Decision provided that the proposed mitigation measures described in the final EIS be identified and implemented.

ERP No. F-GSA-C80014-NY, U.S. Plaza at Rainbow Bridge Renovation Project, Leasing of Space for Use by the U.S. Immigration and Naturalization Service and the U.S. Customs Service, Niagara County, NY.

*Summary:* EPA had no objection to the proposed project.

#### Regulations

ERP No. R-FEM-A99204-00, 44 CFR Part 10 (RIN-3067-AC41)—Environmental Considerations/Categorical Exclusions: Proposed Rule.

*Summary:* EPA recommended that some of the proposed categorical exclusions to environmental review under the National Environmental Policy Act (NEPA) be narrowed, and that the proposed regulation be made consistent with the Stafford Act.

Dated: September 26, 1995.

### Reinventing EPA's Pesticide Export Notification Program; Notice of Availability

**AGENCY:** Environmental Protection Agency (EPA).  
**ACTION:** Notice of Availability.

**SUMMARY:** EPA is announcing the availability for comment, a paper discussing options for reinventing the export notification procedures in the pesticide export policy.

**DATES:** Written comments may be submitted to EPA by November 28, 1995.

**ADDRESSES:** Written comments may be submitted By mail, to Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, 401 M St., SW., Washington, DC 20460. In person, deliver comments to Room 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number OPP-170004. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this notice of availability may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in Supplementary Information below.

**FOR FURTHER INFORMATION CONTACT:** Deborah Hartman, Office of Pesticide Programs, (7501C), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460 U.S.A.; telephone (703) 305-7100; e-mail: hartman.deborah@epamail.epa.gov

**SUPPLEMENTARY INFORMATION:** EPA is making available for comment an options paper on pesticide export notification issues. EPA is considering modifications to its export notification policy. EPA believes that certain modifications are necessary because (1)

EPA's current policy has resulted in too many export notices on pesticides which may be of little or no concern to other governments; (2) the increasing numbers of export notices undermines the effectiveness of the international Prior Informed Consent (PIC) procedures, an international information exchange and chemical management program developed by the Food and Agriculture Organization and the United Nations Environment Programme (UNEP); (3) the costs of implementing the existing program on the U.S. government, other governments, and industry, should be reduced.

A record has been established for this notice of availability under docket number OPP-170004 (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:  
 opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this notice of availability, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

Dated: September 20, 1995.

### W.R. Grace & Co.; Notice of Filing of Pesticide Petition

**AGENCY:** Environmental Protection Agency (EPA).  
**ACTION:** Notice.

**SUMMARY:** EPA has received from the W.R. Grace & Co. a petition to establish an exemption from the requirement of a tolerance for the use of NeemGard (clarified hydrophobic extract of neem oil) on all greenhouse and terrestrial food crops when used according to good agricultural practice.

**ADDRESSES:** By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA. Information submitted and any comment(s) concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment(s) that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Information on the proposed test and any written comments will be available for public inspection in Rm. 1132 at the Virginia address given above, from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number [PF-634]. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found below in this document.

**FOR FURTHER INFORMATION CONTACT:** By mail: Paul Zubkoff, Biopesticides and Pollution Prevention Division (7501W),

Office of Pesticide Programs,  
Environmental Protection Agency, 401  
M St., SW., Washington, DC 20460.  
Office location and telephone number:  
5th Floor, CS #1, 2800 Jefferson Davis  
Hwy., Arlington, VA, (703)-308-8694; e-  
mail: zubkoff.paul@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** This notice announces that EPA has received from W.R. Grace & Co., 7379 Route 32, Columbia, MD 21044, a notice of filing under section 408 of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a) for pesticide petition (PP) 5F4467 to amend 40 CFR part 180 to establish an exemption from the requirement of a tolerance for the use of NeemGard (active ingredient is clarified hydrophobic extract of neem oil) on all greenhouse and terrestrial food crops when used according to good agricultural practice.

A record has been established for this rulemaking under docket number [PF-634] (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:  
opp-Docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

#### Notice of Proposed Administrative Settlement; FMC-Fresno Site

**AGENCY:** Environmental Protection Agency.

**ACTION:** Notice; request for public comment.

**SUMMARY:** In accordance with Section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), as amended by the Superfund Amendments and Reauthorization Act (SARA), notice is hereby given of the proposed administrative cost recovery settlement entered into by EPA Region IX and the Respondent, FMC Corporation. The proposed settlement was entered into under the authority granted to EPA in Section 122(h) of CERCLA and provides that Respondent will reimburse EPA approximately \$178,188 for costs incurred at, or in connection with, response actions conducted at the FMC-Fresno Site, located in Fresno, California, through the effective date of the settlement.

For thirty (30) days following the date of publication of this notice, EPA will receive written comments relating to the settlement. EPA may withdraw from or modify the proposed settlement should such comments disclose facts or considerations which indicate that the proposed settlement is inappropriate, improper or inadequate. The Agency's response to any comments received will be available for inspection at the U.S. Environmental Protection Agency, Region IX (RC-1), 75 Hawthorne Street, San Francisco, California, 94105, Attention: Steven Armsey, Regional Hearing Clerk.

**ADDRESSES:** A copy of the proposed settlement may be obtained from Steven Armsey, U.S. EPA Region IX Hearing Clerk (RC-1), 75 Hawthorne Street, San Francisco, California, 94105. Comments should reference the FMC-Fresno Site and EPA Docket No. 95-12.

**FOR FURTHER INFORMATION CONTACT:** Gavin McCabe, Office of Regional Counsel (RC-3-4), U.S. EPA Region IX, 75 Hawthorne Street, San Francisco, California, 94105. Telephone: (415) 744-1334.

Dated: September 21, 1995.

#### FEDERAL COMMUNICATIONS COMMISSION

[Report No. AUC-95-07]

#### Auction Notice and Filing Requirements for 1,020 MTA Licenses for Specialized Mobile Radio Service in the 900 MHz Band, Scheduled for November 28, 1995

**AGENCY:** Federal Communications Commission.

**ACTION:** Public notice.

**SUMMARY:** This Public Notice, released September 15, 1995, announced the auction and filing requirements for the 1,020 MTA licenses for the Specialized Mobile Radio Service in the 900 MHz band, scheduled to begin November 28, 1995. This Public Notice is directed toward the Commission's goal of efficiently distributing the unused SMR spectrum through competitive bidding, and is designed to assist prospective bidders in preparing for the upcoming 900 MHz SMR auction.

**FOR FURTHER INFORMATION CONTACT:** The FCC auction contractor, Tradewinds International, Inc., at (202) 637-FCC1 (637-3221)

The complete text of the Public Notice dated September 15, 1995 follows. Copies of this item is available for public inspection in Room 207, 2033 M Street, N.W., Washington, D.C. and may also be obtained from the FCC copy contractor, ITS, Inc. at (202) 418-0620, and the FCC auction contractor, Tradewinds International, Inc. at (202) 637-FCC1.

Report No. AUC-95-07, Auction No. 7

Auction Date: Tuesday, November 28, 1995. The precise schedule for bidding in the first week of the auction will be announced by Public Notice prior to the start of the auction. Unless otherwise announced, bidding will be conducted on each business day, until bidding has stopped on all MTA licenses.

**Auction Methodology:** Simultaneous multiple round bidding. Bidding in this auction will only be permitted from remote locations, either electronically (by computer) or telephonically.

Licenses to be Auctioned: 1,020 licenses to provide Specialized Mobile Radio Services ("SMR") in the 900 MHz band. These licenses will authorize

service on 20 ten-channel blocks totaling 5 MHz of spectrum over 51 major trading areas ("MTAs") in the continental United States, as well as in Puerto Rico, Hawaii, Alaska, Guam, and American Samoa. See Attachment C for a summary of the licenses to be auctioned.

Pre-Auction Performance Deadlines:

- Short Form Application (FCC Form 175)—5:30 p.m., ET, Thursday, Oct. 26, 1995.

- Upfront Payments:

- Wire Transfer—3:00 p.m., ET, Monday, Nov. 13, 1995

- Cashier's Check—11:59 p.m., ET, Monday, Nov. 13, 1995

Telephone Contacts:

- Bidder Information Packages—(202) 637-FCC1.

- Auction Hotline—(202) 418-1400.

- FCC Technical Support Hotline—(202) 414-1260.

### I. Introduction

Those wishing to participate in the 900 MHz SMR auction must submit a "short-form" application on FCC Form 175 in accordance with the Commission's rules and instructions in this Public Notice and in the Bidder Information Package. The FCC Form 175 must be received no later than 5:30 p.m. Eastern Time on Thursday, October 26, 1995, and must be received either electronically or manually pursuant to the instructions set forth in the Bidder Information Package and this Public Notice. Applicants should note that the previous version of the FCC Form 175 is no longer valid. A new FCC Form 175 (revised 9/95) will be included in the Bidder Information Package. Furthermore, the FCC Form 175-M which was used in the MDS auction will *not* be accepted for the 900 MHz SMR auction.

In each of the 51 MTAs, 20 ten-channel block licenses will be offered for bid. Prospective bidders should note that in some areas, 900 MHz SMR channels are already being used by incumbent SMR licenses. Incumbent licenses were originally granted in 1986 in 46 "Designated Filing Areas" ("DFAs"), comprised of the top 50 urban markets, and many incumbents have since expanded their systems beyond the DFAs. Incumbent systems are entitled to protection from co-channel interference by any new entrant who obtains a 900 MHz SMR license designated by an MTA ("MTA license"). We therefore caution prospective bidders in formulating their bidding strategies to investigate and consider the extent to which 900 MHz SMR channel blocks are occupied by incumbents. Any

discussions between prospective bidders and incumbent licensees must conclude by the FCC Form 175s deadline in order to comply with the Commission's anti-collusion rules. Such rules prohibit communications after the FCC Form 175 deadline among applicants for the same geographic markets when such communications concern bids, bidding strategies or settlements. See 47 C.F.R. 1.2105(c),(d). Attachment A lists each incumbent licensee who holds a DFA license, the licensee's call sign, and the relevant frequency block. Attachment B lists the address, phone number, and point of contact for each incumbent. Attachment C lists the 51 MTAs, upfront payments, and "activity units" (See *infra*, Section II.B) for each frequency block within the MTAs.

The licensing database, which includes information regarding incumbent licensees in the 900 MHz SMR band, is available for on-line review in the Public Reference Room of the Wireless Telecommunications Licensing Division, Gettysburg, PA. The Licensing Division office is located at: 1270 Fairfield Road, Gettysburg, PA 17325, Telephone: (800) 322-1117, (717) 337-1212.

The FCC does not duplicate these records, but has contracted with International Transcription Service, Inc. to provide this service. Requests for hard copies of these records should be addressed to: International Transcription Services, Inc. (ITS, Inc.), 2100 M Street NW., Suite 140, Washington, D.C. 20037, Telephone: (717) 337-1433 (Gettysburg, PA), (202) 857-3800 (Washington, DC).

Persons who would like to obtain this information in the form of microfiche or magnetic tape, or who want to obtain information concerning those types of media should write or call: National Technical Information Service (NTIS), Department of Commerce, Springfield, VA 22161, (703) 487-4650.

Persons who would like to obtain this information through an on-line public access database should call or write: Interactive Systems, Inc., 1601 North Kent St., Suite 1103, Arlington, VA 22209, Main Number: (703) 812-8270, Fax Number: (703) 812-8275, Customer Service Number: (703) 812-8270.

The precise schedule for bidding in the first week of the auction will be announced by Public Notice prior to the start of the auction. Unless otherwise announced, bidding will be conducted on each business day, until bidding has stopped on all MTA licenses. Bidding in this auction will only be permitted from remote locations, either electronically (by computer) or telephonically.

Those wishing to participate in the auction must submit a "short-form" application on FCC Form 175 in accordance with the Commission's rules and instructions in this Public Notice and in the Bidder Information Package. The FCC Form 175 must be received no later than 5:30 p.m. Eastern Time on Thursday, October 26, 1995, and must be received either electronically or manually pursuant to the instructions set forth in the Bidder Information Package. Applicants for the 900 MHz SMR auction are encouraged to file their FCC Form 175 electronically.

Applicants should also be aware that only those applicants who file applications electronically will be permitted to bid electronically. Applicants who file their applications manually will only be permitted to bid telephonically. Limited instructions regarding electronic filing are contained in this Public Notice. More detailed instructions on electronic filing will be contained in the Bidder Information Package. Applicants whose FCC Form 175s have been accepted for filing will be required to submit an upfront payment (in U.S. dollars) to be eligible to participate in the auction. The upfront payment must be made by wire transfer or cashier's check payable to the "Federal Communications Commission" or "FCC" and must be received on or before Monday, November 13, 1995, at the Mellon Bank in Pittsburgh, Pennsylvania. No other form of payment will be accepted. See *infra*, Section II.B.

#### A. Bidder Information Package

Prospective bidders who have already contacted the FCC Auction Hotline expressing an interest in 900 MHz SMR will receive the Bidder Information Package for the 900 MHz SMR auction approximately ten to fifteen business days from the issuance of this Public Notice. Other prospective applicants may obtain the Bidder Information Package for the 900 MHz SMR auction by contacting Tradewinds International, Inc., at (202) 637-FCC1 (637-3221).

Although all prospective applicants who request a Bidder Information Package will receive their first copy of this package for free, additional copies will be provided at a cost of \$16.00 per package (including postage). Payment for additional Bidder Information Packages may be made by Visa/Master Card or check made payable to the "Federal Communications Commission" or "FCC" and mailed to: Tradewinds International, Inc., GAT Washington National Airport, Suite 215, Washington, D.C. 20001, Telephone: (202) 637-FCC1 (637-3221), FAX: (703) 341-0692.

The Bidder Information Package will include the following information:

1. A list of MTA licenses to be offered simultaneously;
2. Detailed procedures, terms and conditions of the auction;
3. Detailed instructions regarding the completion and filing of the FCC Form 175, including instructions on electronic filing and remote access of FCC Form 175 applications filed with the Commission;
4. Electronic and telephonic bidding procedures;
5. All applications/forms needed to participate in the FCC Auction:
  - (a) A short-form application to participate in the auction (FCC Form 175) for bidders who intend to file manually. Additionally, a supplemental form (FCC Form 175-S) will be included for those who wish to apply for more frequency blocks than the FCC Form 175 allows;
  - (b) An FCC Remittance Advice Form (FCC Form 159) to be submitted by each bidder with its upfront payment, and by each bidder with its down payment, final payment and installment payments, if applicable (as described below), including instructions on filling out the form and samples of completed FCC Form 159s;
  - (c) A registration form to participate in the FCC's Auction Seminar to be held at the FCC's auction facility in Washington, D.C. on Thursday, November 9, 1995. This program is only for FCC Form 175 applicants;
  - (d) An order form for the purchase of remote electronic bidding software;
6. Wire transfer instructions;
7. A partial bibliography of auction-specific FCC rules and regulations;
8. The Second Order on Reconsideration and Seventh Report and Order in PR Docket No. 89-553, PP Docket No. 93-253 and GN Docket No. 93-252, FCC 95-395 (released September 14, 1995) ("Seventh Report and Order"), which adopted the 900 MHz SMR application process and competitive bidding procedures. This Seventh Report and Order contains the amended Part 90 service and competitive bidding rules pertaining to 900 MHz SMR;
9. Other general auction information.

#### B. Relevant Authority

Prospective bidders must familiarize themselves thoroughly with the procedures, terms and conditions (collectively, "Terms") contained in the First Report and Order and Further Notice of Proposed Rule Making in PR Docket No. 89-533, 8 FCC Rcd 1469 (1993), 58 Fed. Reg. 12,176 (Mar. 3, 1993) ("First Report & Order") the Third

Report and Order in GN Docket No. 93-252, 9 FCC Rcd 7988 (1994), 59 FR. 59,945 (Nov. 21, 1994) ("CMRS Third Report & Order"); the Second Report and Order and Second Further Notice of Proposed Rule Making in PR Docket No. 89-553, GN Docket No. 93-252, PP Docket No. 93-253, FCC 95-159, released April 17, 1995, 60 FR 21,987 (May 4, 1995); and the Second Order on Reconsideration and Seventh Report and Order in PR Docket No. 89-553, PP Docket No. 93-253 and GN Docket No. 93-252, FCC 95-395 (released September 14, 1995) ("Seventh Report and Order"). The rules contained in the Relevant Orders, this Public Notice, and the Terms in the Bidder Information Package are not negotiable. Prospective bidders should review these auction documents thoroughly prior to the auction to make certain that they understand all of the provisions and are willing to be bound by all of the Terms before participating in the auction.

The information contained in this Public Notice and in the Bidder Information Package may be amended or supplemented by the Commission or the Wireless Telecommunications Bureau at any time. The Wireless Telecommunications Bureau will issue Public Notices to convey the new or supplemental information to prospective bidders. It is the responsibility of all prospective bidders to remain current with all FCC rules and with all Public Notices pertaining to this auction. Copies of FCC documents, including Public Notices, may be obtained for a fee by calling International Transcription Service, Inc. at (202) 857-3800. Additionally, prospective bidders may retrieve some of these documents from the FCC Internet node via anonymous FTP @ fcc.gov.

#### II. Bidder Eligibility

In order to be eligible to bid in the 900 MHz SMR auction, bidders must (i) satisfy the Commission's eligibility requirements; (ii) submit a short-form application on revised FCC Form 175 (and FCC Form 175-S if necessary); and (iii) remit an upfront payment in compliance with applicable FCC rules and regulations. Both incumbents and new entrants may bid for all MTA licenses subject only to the 45 MHz aggregate spectrum cap on Commercial Mobile Radio Services ("CMRS") uses within the broadband PCS, cellular, and SMR services. See 47 C.F.R. 20.6. All prospective applicants should carefully review each of the rules contained in Subparts A, H, S and U of Part 90 of the Commission's rules, as amended by the Seventh Report and Order.

Bidders that qualify as small businesses are eligible for reduced down payments, bidding credits (a discount on the winning bid price), and two possible installment payment plans (which allow eligible bidders to pay the net amount of their winning bids in quarterly installments and depend upon financial status). There are two categories of small businesses: (1) Entities that, together with affiliates, have average gross revenues that are not more than \$3 million for the preceding three years; and (2) entities that, together with affiliates, have average gross revenues that are not more than \$15 million for the preceding three years. See 47 C.F.R. 90.810, 90.811, 90.812 and 90.814 for eligibility criteria and other terms pertaining to reduced down payments, bidding credits and installment payments. These special measures available to small businesses in the 900 MHz SMR auction are also discussed in the Bidder Information Package.

Winning bidders claiming eligibility as small businesses should note that they will be required to compute their aggregate gross revenues over the relevant time period to establish that they qualify as small businesses. See 47 C.F.R. 90.815. Winning bidders claiming eligibility as small businesses may be subject to audits by the Commission to confirm bidder eligibility. See 47 C.F.R. 90.815(d).

Bidders that qualify as rural telephone companies ("rural telcos") will be permitted to acquire partitioned MTA licenses by either: (1) Forming bidding consortia and then partitioning the license among consortia participants; or (2) acquiring a partitioned license through private negotiations or agreements. A rural telco is defined as a local exchange carrier having 100,000 or fewer access lines, including all affiliates. Partitioned areas must conform to established geopolitical boundaries, such as county lines, and each area must include all portions of the wireline service area of the rural telco applicant that lies within the MTA service area. The partitioned area must be reasonably related to the rural telco's wireline service area that lies within the MTA service area. We will presume as "reasonably related" a partitioned area that contains no more than twice the population of that portion of a rural telco's wireline service area that lies within the MTA service area. See Seventh Report and Order at ¶¶ 178-179.

### A. Short-Form Application (FCC Form 175)

In order to be eligible to bid, applicants must submit a revised FCC Form 175 application to the Commission. This application must be received by the FCC no later than 5:30 p.m. Eastern Time on Thursday, October 26, 1995. Late applications will not be accepted. Applications may be submitted electronically, by hand delivery, by certified U.S. mail (return receipt requested) or by private courier. Applicants should consult the detailed application procedures provided in the Bidder Information Package before submitting their FCC Form 175.

#### 1. Completion of FCC Form 175

Because of the significance of the FCC Form 175 application to the auction, it is important to take note of the following requirements. Applicants will be required to complete all the items on the FCC Form 175. The previous version of the FCC Form 175 is no longer valid. A new FCC Form 175 (revised 9/95) will be included in the Bidder Information Package. Furthermore, the FCC Form 175-M which was used in the MDS auction will *not* be accepted for the 900 MHz SMR auction. Applicants should carefully review §§ 1.2105(a)(2), 90.806, and 90.815 of the Commission's Rules prior to completing FCC Form 175. In completing an FCC Form 175, applicants should note the following:

a. Applicants should apply for all MTA licenses for which they seek bidding eligibility. Bids will not be accepted for licenses for which an applicant has not applied on its FCC Form 175.

b. For "Auction Number" applicants filing manually should enter "7".

c. Applicants will be required to create a ten-digit FCC Account Number, which the Commission will use to identify and track applications. Applicants must create this FCC Account Number by using their taxpayer identification number (TIN) with a prefix of "0" (e.g., 0123456789). If, and only if, an applicant does not have a taxpayer identification number, the applicant may use its ten-digit area code and telephone number (e.g., 5552345678). Each applicant must use this same number when submitting additional information or material regarding its application, including on its FCC Form 159 (FCC Remittance Advice) accompanying any required auction deposits or payments submitted to the Commission. This number also must be used whenever an applicant writes, calls, or otherwise inquires about its application. Qualified bidders will

need this number to participate in the auction.

d. Applicants must indicate on their FCC Form 175, if applicable, their status as a rural telephone company, minority-owned business, women-owned business and/or small business. See 47 C.F.R. 1.2110(b), 90.814. Applicants claiming status as a small business must compute their gross revenues in accordance with 47 C.F.R. 90.814. The indication of applicants' status as a minority-owned business or women-owned business is for statistical purposes only. All applicants should pay particular attention to the provisions of 47 C.F.R. 1.2110 and 90.814.

Small businesses that are filing their forms electronically must also indicate the bidding credit and installment payment option to which they are entitled. See 47 C.F.R. 90.810, 90.812, 90.815. For the purpose of filing the FCC Form 175, the installment payment plan associated with small businesses that fall under the \$15 million definition is hereby designated as Plan A. Similarly, the installment payment plan associated with small businesses that fall under the \$3 million definition is hereby designated as Plan B. Applicants should note that an MTA license issued to an eligible small business that elects installment payments will be conditioned on the full and timely performance of the license holder's quarterly payments.

e. Applicants must identify on the FCC Form 175 the market number and frequency block for each license on which they seek bidding eligibility. Applicants should use a supplemental FCC Form 175-S to include any additional markets and frequency blocks on which they seek bidding eligibility. The market number for each MTA and the upfront payment for each frequency block in each MTA, taking into account the presence of incumbents, are listed in Attachment C of this Public Notice. MTA service areas are based on Rand McNally's 1992 Commercial Atlas & Marketing Guide, 123rd Edition, which organizes the United States into 51 MTAs.

f. Applicants must list the name(s) of the person(s) authorized to represent them at the auction (up to a maximum of three). Only those individuals listed on the FCC Form 175 will be authorized to submit and withdraw bids for the applicant during the auction.

g. Applicants should read the "certifications" on the FCC Form 175 carefully before submitting their application. Among other things, each applicant must certify that it is the real party in interest. Applicants who file

their FCC Form 175 applications electronically will not be required to transmit an original or electronic signature. However, similar to a manually filed FCC Form 175, upon submission, the certifying official has made the representation that he/she is an authorized representative of the applicant for the license(s) selected, and that he/she has read the instructions and the certifications and that all matters and things stated in the application and attachments, including exhibits, are true and correct. These certifications help to ensure a fair and competitive auction and require, among other things, disclosure of certain information on agreements or arrangements concerning the auction. Submission of a false certification to the Commission may result in penalties, including monetary forfeitures, MTA license forfeitures, ineligibility to participate in future auctions, and/or criminal prosecution.

h. If the Commission wishes to communicate with the applicant by mail, telephone or fax, such communications will be directed to the contact person identified on the FCC Form 175. A space has been provided for both a telephone number and a fax number. All written communications will be directed to the contact person at the address specified on the FCC Form 175. (Applicants must provide a street address; PO Box addresses should not be used.)

i. Applicants seeking bidding credits and installment payments as small businesses must attach an exhibit listing ownership and gross revenue information verifying that they qualify as small businesses. Applicants must provide the identity of their affiliates, persons or entities that hold attributable interests in the applicant and their affiliates, and if a consortium of small businesses, the members in the joint venture. Partnership and other ownership interests and any stock interest amounting to 20 percent or more of the equity or outstanding stock of the applicant will be attributable.

j. Applicants must attach an exhibit identifying all parties with whom they have entered into any consortium arrangements, joint ventures, partnerships or other agreements or understandings which relate in any way to the competitive bidding process of this auction.

k. Microfiche copies of the FCC Form 175 and 175-S applications are required for all manual submissions in excess of five pages. For this auction, the FCC will allow submission of a 3.5" diskette, in lieu of microfiche, which contains ASCII text (.TXT) files of all exhibit

documentation attached to the FCC Form 175 application.

## 2. Electronic Filing of FCC Form 175 Applications

The Commission recently implemented a remote access system to allow applicants to submit their FCC Form 175 applications electronically. The remote access system for initial filing of the FCC Form 175 applications will generally be available 24 hours per day beginning at approximately the same time as the release of the Bidder Information Package. FCC Form 175 applications that are filed electronically using this remote access system must be submitted and confirmed by 5:30 p.m. Eastern Time on Thursday, October 26, 1995. Late applications or unconfirmed submissions of electronic data will not be accepted. The electronic filing process consists of an initial filing period and a resubmission period to make minor corrections. See *infra*, Section II.A.5. Detailed filing instructions will be provided in the Bidder Information Package.

Those applicants who wish to file their FCC Form 175 electronically or review other FCC Form 175 applications on-line will need the following hardware and software:

### Hardware Requirements

- CPU: Intel 80386 or above (80486 or faster recommended).
- RAM: 8MB RAM (more recommended if you have multiple applications open).
- Hard Disk: 10MB available disk space.
- 1.44MB 3.5" Floppy Drive (to install the remote system).
- Modem: v.32bis 14.4kbps Hayes compatible modem.
- Monitor: VGA or above.
- Mouse or other pointing device.
- Three 1.44MB floppy disks.

### Software Requirements

- FCC-provided application software (will be available via internet or the FCC Bulletin Board System).
- PPP Asynchronous Communications Package that is Winsock v1.1 compliant (tested—Trumpet v2.0b, NetManage Chameleon v4.1, Wollongong Pathway Access for Windows v3.2).
- Microsoft Windows 3.1 or above, or Microsoft Windows for WorkGroups v3.11 or above.

Note: The FCC is in the process of testing Windows95. For further technical information, contact the FCC Technical Support Hotline at (202) 414-1260. The FCC Form 175 has not been tested on a Macintosh or OS/2 environment. Therefore, the FCC

will not provide assistance to those who cannot run Microsoft Windows 3.1 or above, or Windows for Workgroups v3.11 or above in an enhanced mode. This includes any other emulated Windows environment.

If your Windows is in a networked environment, you should check with your local network administrator for any potential conflicts with the ppp software package you will use to connect to the FCC network. This usually includes any TCP/IP installed network protocol.

Applicants who wish to file their FCC Form 175 applications electronically through the FCC Remote Access System must first download the FCC-provided application software from either the Internet or the FCC Bulletin Board System. Applicants should note that previous versions of the Remote FCC Form 175 software will not work. Applicants must download the version specific to this auction (File Name: *FCC175V4.EXE*).

### Internet Access

In order to download the compressed file from the Internet, you will need to have access to the Internet and an ftp client software as follows:

- *FTP*: The following instructions are for the command line version of ftp.

1. Connect to the FCC ftp server by typing `ftp fcc.gov`.
2. At the user name prompt, type `anonymous` [Enter].
3. At the password prompt, type your Internet e-mail address [Enter].
4. To allow the file to be downloaded type: `binary` [Enter].
5. Change your current directory to the FCC175 directory by typing: `cd/pub/Auctions/SMR/MTA/FCC175` [Enter].
6. Use the get command to download files from the FCC ftp server by typing: `get F175V4.EXE` [Enter].
7. If you wish to exit, type: `bye` [Enter].
  - *Gopher*: `gopher.fcc.gov` or use any gopher to get to "all the gophers in the world" then 'U.S.' then 'DC' then 'FCC'.
  - *World Wide Web*: `ftp://fcc.gov`

### Dial-In Access to the FCC Auction Bulletin Board System (BBS)

The FCC Auction Bulletin Board System provides dial-in access for the FCC-provided application software. In order to access the FCC Auction BBS, use a communications package that can handle at least xmodem protocol (*e.g.*, `pcAnywhere`, `Telix`, `Procomm`) to dial in to (202) 682-5851. Use the settings of 8 data bits, no parity and 1 stop bit (8,N,1).

- *For new users follow steps 1-6, otherwise go to step 7:*

1. Type `New`, [Enter]. If the word ANSI is blinking, type `Y` for yes. If the word ANSI is not blinking, type `N` for No.

2. Type in your first and last name and press [Enter]. This will be your login name.

3. Type in your Telephone number and press [Enter].

4. Type in your Fax number and press [Enter].

5. Type in what you want your password to be and press [Enter].

6. Retype the password for verification and press [Enter].

- *Once the account is generated:*

7. Type `S` for SMR Auction Files and press [Enter].

8. Type `P` for Programs and Applications and press [Enter].

9. Move the cursor to the file named `F175V4.EXE` and type [Control]-D (hold the Ctrl key down and press the D key) for Download and press [Enter].

10. Type the letter representing the transfer protocol desired and press [Enter]. How the file is downloaded and where it gets downloaded depends on the transfer protocol package used.

11. Repeat steps 10 and 11 to download additional files, or press `X` and [Enter] to Exit the screen.

- *To Exit:*

12. Type `X` to Exit and press [Enter] and continue to do so until asked if you want to Exit the BBS. Press `Y` for Yes when asked to verify your leaving.

The FCC-provided application software available through the Internet and the FCC Auction BBS will be in a self-extracting compressed file format. Once the compressed file has been downloaded, you will need to generate the installation disks.

To generate the installation disks, type `F175V4.EXE /!` and press [Enter].

The extracted files will be executable programs for submitting and reviewing FCC Form 175 applications along with a `README.TXT` file. The text file will provide instructions for installing the software on the applicant's personal computer. For technical assistance in downloading, extracting, installing, or using the FCC application software, contact the FCC Technical Support Hotline at (202) 414-1260.

## 3. Manual Filing of FCC Form 175

For those applicants who file manually, whether mailed, hand delivered or sent by private courier, applications must be addressed to: Office of the Secretary, Attn: Auction 7 Short-Form Processing, Federal Communications Commission, 1919 M Street, NW., Room 222, Washington, D.C. 20554.

Applications will not be accepted if delivered to any other location. Additionally, applicants should be aware that if they file manually they will only be permitted to submit their

bids telephonically. Electronic bidding is reserved for parties who submit their applications electronically.

#### 4. FCC Form 175 Application Fee

No application fee need accompany the FCC Form 175 for the auction.

#### 5. Procedures after FCC Form 175 Applications are Filed and Processed for Minor Corrections.

After the deadline for filing the FCC Form 175 applications has passed, the Commission will process all applications to determine whether they are acceptable for filing. The Commission will issue a Public Notice listing all applications which are accepted for filing, rejected, and those which have minor defects that may be corrected. The Public Notice will also announce the deadline for filing corrected applications. As described more fully in the Commission's general auction rules and in the Seventh Report and Order, applicants may make minor corrections to their FCC Form 175 applications. Applicants will not be permitted to make major modifications to their applications. In particular, failure to sign a manually filed FCC Form 175 cannot be corrected and will cause the application to be dismissed and the applicant to be ineligible to participate in the auction. See 47 C.F.R. 1.2105(b). Furthermore, applicants will not be permitted to modify their authorization selection(s), change their certifying official, or change de facto and/or de jure control of the applicant.

After the deadline for resubmitting corrected applications, the Commission will release another Public Notice announcing all applications that have been accepted for filing, including applicants who have corrected defective applications.

#### B. Upfront Payments

In order to be eligible to bid in the auction, applicants must submit an upfront payment together with an FCC Remittance Advice, FCC Form 159. In accordance with the Commission's rules, the minimum upfront payment is \$2,500. See 47 C.F.R. 1.2106; Second Report and Order in PP Docket No. 93-253, 9 FCC Rcd 2348, at ¶ 180, 59 Fed. Reg. 22,980 (May 4, 1994). The upfront payment will be due Monday, November 13, 1995. A sample FCC Form 159 and further instructions for making auction payments will be included in the Bidder Information Package.

All payments must be made in U.S. dollars, must be in the form of a wire transfer or cashier's check, and must be made payable to the "Federal

Communications Commission" or "FCC." No other form of payment will be accepted. Cashier's checks must be drawn on a financial institution whose deposits are insured by the Federal Deposit Insurance Corporation (FDIC). All payments, whether by wire transfer or cashier's check, must be made to the Mellon Bank in Pittsburgh, Pennsylvania. Payments made by cashier's check must be received by 11:59 p.m. Eastern Time, Monday, November 13, 1995. Payments made by wire transfer must be received by 3:00 p.m. Eastern Time, Monday, November 13, 1995. Bidders making payments by wire transfer should allow sufficient time for the wire transfer to be confirmed.

Failure to deliver the upfront payment in a timely manner will result in dismissal of the application and inability to participate in the auction.

A bidder should calculate its upfront payment using the standard \$0.02 per "activity" units formula for the largest combination of activity units upon which a bidder wishes to bid in a single round of bidding. The number of activity units associated with any particular frequency block is the product derived from multiplying the number of megahertz associated with a license by the population of the license's service area. Each license in this auction will cover 0.25 MHz. In general, the population coverage for each frequency block in each MTA will be based on a formula that takes into account the presence of incumbent licensees. Attachment C lists the activity units associated with each frequency block.

The upfront payment submitted by each applicant is not attributed to specific licenses but instead will define the maximum amount of activity units on which the applicant will be permitted to bid in any single round of bidding. The combination of activity units on which a bidder is active in a round equals the sum of the activity units associated with the MTAs on which the bidder has submitted a valid bid, or on which the bidder is the standing high bidder.

In calculating the upfront payment amount, an applicant should determine the maximum number of activity units on which it wishes to bid in any single round and submit an upfront payment covering that number of activity units. Thus, if an applicant wants to be eligible to bid in any single bidding round on a license with a total population of 750,000 persons, the applicant must submit an upfront payment of \$3,750.00 (0.25 MHz times 750,000 times \$0.02; note that the initial

calculation of activity units—0.25 MHz times 750,000—has been done for you in Attachment C). That applicant could then be active in any single round on any license(s) whose total activity units do not exceed 187,500 (0.25 MHz times 750,000). See Seventh Report and Order at ¶¶ 110–112.

Applicants should note that if after calculating the upfront payment, the amount does not exceed \$2,500, the applicant will be required to pay the minimum upfront payment amount of \$2,500. Any applicant that is required to increase its upfront payment to \$2,500, however, will also be allocated the corresponding amount of activity units on which it may bid (i.e., a minimum upfront payment of \$2,500 allows the applicant to bid on 125,000 activity units, which is derived by dividing \$2,500 by \$0.02). If a bidder does not plan to use the additional activity units associated with the minimum upfront payment, it may choose to reduce its eligibility in the first round or any other round. The mechanism to reduce eligibility will be explained in the Bidder Information Package.

An applicant may, on its FCC Form 175, apply for every license being offered, but an applicant need not submit an upfront payment for every license for which it has applied. The total upfront payment submitted by the applicant will determine the combinations of licenses on which the applicant will actually be permitted to be active in any single round of bidding. Small businesses are not eligible for a reduced upfront payment.

The Commission will issue a Public Notice announcing all qualified bidders for the 900 MHz SMR auction. Qualified bidders are those whose FCC Form 175 applications have been accepted for filing and who have submitted timely upfront payments sufficient to make them eligible to bid on at least one of the MTA licenses applied for on the FCC Form 175 application.

#### III. Auction Event and Bidding Rounds

The 900 MHz SMR auction will begin at 9:00 a.m. Eastern Time on Tuesday, November 28, 1995. The precise schedule for bidding in the first week of the auction will be announced by Public Notice two weeks prior to the start of the auction.

Generally bids will be submitted twice each day during the first three days of bidding. The Commission may, however, increase or decrease the amount of time for bid submission as well as the number of rounds per day depending upon such factors as the bidding activity level or the aggregate amount of high bids.

#### IV. Auction Procedures

The MTA licenses will be awarded through a simultaneous multiple round auction. Bids will be accepted on all MTA licenses in each round of the auction until bidding stops on all licenses. See Section IV.E for specific information about stopping rules. High bid amounts will be posted after the end of the bid submission period in each round of bidding. Information regarding all valid bids submitted and all bid withdrawals in each round also will be provided along with the minimum accepted bids for the next round.

##### A. Number of Licenses that May be Acquired

- The Commission has imposed no limitations on the number of MTA licenses that any one entity may acquire in the 900 MHz SMR auction.

- Both incumbents and new entrants are subject to the 45 MHz aggregate spectrum cap on CMRS uses within the broadband PCS, cellular, and SMR services. 47 C.F.R. § 20.6.

##### B. Bid Submission and Withdrawal Procedures

- Details will be set forth in the Bidder Information Package on the procedures to be used in submitting bids.

- A high bidder may withdraw one or more of its high bids during the course of the auction during the bid withdrawal period and subject to a bid withdrawal penalty. See 47 C.F.R. § 90.805 (a) and (b).

##### C. Minimum Bid Increments and Tie Bids

- The minimum bid increment is the amount or percentage by which a bid must be raised above the previous round's high bid in order to be accepted as a valid bid in the current round.

- The amount of the minimum accepted bid for each MTA license (the sum of the minimum bid increment and the high bid from the previous round) will be announced before the beginning of each round.

- The Commission may, in its discretion, raise or lower the amount of the minimum bid increment at any time during the auction.

- There will be no minimum opening bids for any of the MTA licenses in the 900 MHz SMR auction and no minimum bid increment for an MTA license until that license has received a bid.

- Each bid will be date and time stamped when it is entered into the computer system. In the event of tie bids, the Commission will identify the high bidder on the basis of the order in which bids are received by the

Commission, starting with the earliest bid.

More detailed information regarding the minimum bid increments for each stage of the auction will be included in the Bidder Information Package.

##### D. Activity Rules

- In order to ensure that the auction closes within a reasonable period of time, the Commission will impose a three-stage activity rule with increasing levels of bidding activity required in each stage in order for a bidder to maintain its current eligibility. Because activity requirements increase in each auction stage, it is especially important for bidders to check current activity during the bid submission period in the first round following a stage transition. Guidelines governing the transition from one stage to another will be set forth in the Bidder Information Package.

- A bidder will be considered active on an MTA license in the current round if it is either the higher bidder at the end of the bid withdrawal period in the previous round or submits a bid in the current round which meets or exceeds the minimum accepted bid. A bidder's activity level in a round is the sum of the activity units of the MTA licenses on which the bidder is active.

- Minimum required activity levels are associated with each stage of the 900 MHz SMR auction. Failure to maintain the requisite activity level will result in a reduction in the amount of activity units upon which a bidder will be eligible to bid in the next round of bidding (unless an activity rule waiver is used).

- Stage One: In order to maintain its current eligibility in each round of Stage One, a bidder must be active on MTA licenses encompassing at least 50% of the activity units for which it is currently eligible. If activity is below the required minimum level, eligibility in the next round will be calculated by multiplying the current round activity by two (2).

- Stage Two: in order to maintain its current eligibility in each round of Stage Two, a bidder must be active on MTA licenses encompassing at least 75% of the activity units for which it is eligible in that particular round. If activity is below the required minimum level, eligibility in the next round will be calculated by multiplying the current round activity by four-thirds (4/3).

- Stage Three: In order to maintain its current eligibility in each round of Stage Three, a bidder must be active on MTA licenses encompassing at least 95% of the activity units for which it is eligible in that particular

round. If activity in the current round is below 95% of current eligibility, eligibility in the next round will be calculated by multiplying the current round activity by twenty-nineteenths (20/19).

The Commission reserves the discretion to set and, by announcement before or during the auction, vary the requisite minimum activity levels (and associated eligibility calculations) for each auction stage.

- Activity rule waivers:

- Bidders will be provided five activity rule waivers that may be used in any round during the course of the auction. A waiver will preserve current eligibility in the next round.

- If a bidder's activity level is below the required activity level a waiver will be applied automatically if a bidder still has waivers remaining and does not submit a bid or an automatic waiver override. An automatic waiver invoked in a round in which there are no new valid bids will not keep the auction open.

- Bidders may override the automatic waiver mechanism if they wish to intentionally reduce their bidding eligibility and do not want to use a waiver to retain their eligibility at its current level. The bidder's eligibility will then be permanently reduced.

- Bidders may proactively enter an activity rule waiver during the bid submission period. If a bidder submits a proactive waiver in a round in which no other bidding activity occurs, the auction will remain open.

##### E. Stopping Rules

- Bidding will normally remain open on all MTA licenses until bidding stops on every license. The auction will close after one round passes in which no new bids or proactive waivers are submitted.

- The Wireless Telecommunications Bureau may, in its discretion, exercise the following options:

- Keep an auction open even if no new valid bids and no proactive waivers are submitted. In the event the Bureau exercises this discretion, the effect will be the same as if a bidder had submitted a proactive waiver.

- Declare at any time that the auction will end after a specified number of additional rounds. The Bureau would then accept bids in the final round(s) only for MTA licenses on which the high bid increased in at least one of the preceding three rounds.

- Close bidding on a particular MTA license or licenses individually. The Bureau anticipates using such a license-by-license stopping rule only after 40 rounds, applying if first to the

largest MTAs, and only if three or more rounds have passed without any bids on these MTA licenses.

The Bureau does not intend to exercise these options except in extreme circumstances, such as where the auction is proceeding very slowly, there is minimal overall bidding activity and it appears unlikely that the auction will close within a reasonable period of time.

**F. Delay, Suspension or Cancellation of the Auction**

The Commission may, by Public Notice or by announcement during the auction, delay, suspend or cancel the auction in the event of natural disaster, technical obstacle, evidence of an auction security breach, unlawful bidding activity, administrative necessity, if for any other reason that affects the fair and competitive conduct of competitive bidding. In such cases, the Commission may, in its sole discretion, resume the auction starting from the beginning of the current or some previous round or cancel the auction in its entirety. The Commission will delay the auction in the event of technical failure involving the electronic bidding system or the telephone lines.

**G. Default and Disqualification Penalties**

Any high bidder who defaults by failing to remit the required down payment within the prescribed time or is disqualified after bidding is declared closed will be subject to the penalties described in section 90.805(c) of the Commission's rules, 47 CFR 90.805(c). In addition, if a default or disqualification involves gross misconduct, misrepresentation or bad faith by an applicant, the Commission may declare the applicant and its principals ineligible to bid in future auctions, and may take any other action that it deems necessary, including institution of proceedings to revoke any existing licenses or station licenses held by the applicant. See Competitive Bidding Second Report and Order in PP Docket No. 93-253, 9 FCC Rcd 2348, at ¶ 198, 59 FR 22980 (May 4, 1994).

**H. Releasing Bidder Identities**

Bidders' identities and FCC Account Numbers will be disclosed prior to the auction. Thus, bidders will know in advance of the auction the identities of the bidders against whom they are bidding.

**I. Collusion**

To prevent collusion, the Commission's rules generally prohibit communications after FCC Form 175 applications are filed and before down payments are submitted, among applicants eligible to bid for the same geographic markets when such communications concern bids, bidding strategies or settlements. See 47 CFR 1.2105(c), (d).

**V. Post-Auction Procedures for High Bidders**

Detailed information regarding down payments, submission of the long-form application (FCC Form 600), and full payment and installment payment plans will be included in the Bidder Information Package.

**VI. Bidder Alert**

**A. Applicant Certification Requirements**

The Terms contained in the Commission's Report and Orders, Public Notices and in the Bidder Information Package are not negotiable. Prospective bidders should review these auction documents thoroughly prior to the auction to make certain that they understand all of the provisions and are willing to be bound by all of the Terms before making any bid.

All applicants must certify under penalty of perjury on their FCC Form 175 applications that they are legally, technically and financially qualified. Prospective bidders are reminded that submission of a false certification to the Commission is a serious matter that may result in severe penalties including monetary forfeitures, MTA license revocations, preclusion from participation in future auctions, and/or criminal prosecution.

**B. A Note on Possible Deceptive Solicitations**

As is the case with many business investment opportunities, some

unscrupulous entrepreneurs may attempt to use the SMR auctions to deceive and defraud unsuspecting investors. According to the Securities and Exchange Commission ("SEC"), common warning signals of such fraud include the following: the first contact is a "cold call" from a telemarketer or made in response to an inquiry prompted by a television or radio infomercial; the offering materials used to invest in the venture appear to be targeted at IRA funds by, for example, including all documents and papers needed for the transfer of funds maintained in IRA accounts; the amount of the minimum investment is less than \$20,000; the sales representative makes verbal representations that (1) the IRS, FTC, SEC, FCC, or some other government agency has approved the investment; (2) the investment is not subject to state or federal securities laws; (3) the investment will yield unrealistically high short-term profits. In addition, the offering materials often include actual copies of FCC releases, or quotes from Commission personnel, giving the appearance of FCC approval or knowledge of the solicitation.

The Commission does not approve any individual investment proposal, nor does it provide a warranty with respect to any license being auctioned. Potential applicants or investors are reminded that winning a license in the 900 MHz SMR auction is not a guarantee of success in the marketplace. Information about deceptive telemarketing investment schemes is available from the Federal Trade Commission (FTC) at (202) 326-2222 and from the Securities and Exchange Commission (SEC) at (202) 942-7040. Complaints about specific deceptive telemarketing investment schemes should be directed to the National Fraud Information Center at 1 (800) 876-7060, the FTC or the SEC. Consumers who have concerns about specific SMR investment proposals, or previous SMR investments, may also call the FCC Auction Hotline at (202) 418-1400.

**Notice of Public Information Collections Being Reviewed by FCC For Extension Under Delegated Authority 5 CFR 1320 Authority**

September 22, 1995.

The Federal Communications Commission, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

The FCC is reviewing the following information collection requirements for possible 3-year extension under delegated authority 5 CFR 1320, authority delegated to the Commission by the Office of Management and Budget (OMB).

Written comments should be submitted on or before [insert date 60 days after date of publication in the Federal Register]. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

Direct all comments to Dorothy Conway, Federal Communications, Room 234, 1919 M St., NW.,

Washington, DC 20554 or via internet to dconway@fcc.gov.

For additional information or copies of the information collections contact Dorothy Conway at 202-418-0217 or via internet at dconway@fcc.gov.

OMB Approval Number: 3060-0302.

Title: Section 97.9 Operator license.

Form No.: N/A.

Type of Review: Extension of existing collection.

Respondents: Individuals and households.

Number of Respondents: 40,000.

Estimated Time Per Response: .001 hours.

Total Annual Burden: 40 hours.

Needs and Uses: The recordkeeping requirement contained in 97.5 requires that the amateur radio operator keep an original or photocopy of his or her operator license in their possession when serving as the control operator of an amateur radio station. This requirement is necessary so that the Commission field personnel can quickly determine whether an operator is licensed in conformance with the Communications Act of 1934, as amended as well as the International Telecommunications Union Radio Regulations. Review of the operator license is done by the FCC Compliance and Information Bureau personnel during inspection and investigations to assure that amateur operators are duly licensed in accordance with applicable rules, statutes and treaties. In the absence of this recordkeeping requirement, field investigations related to the solution of cases of harmful interference could be severely hampered and needlessly prolonged due to the inability to determine whether an operator is licensed.

OMB Approval No: 3060-0303.

Title: Section 97.5 Station license required.

Form No.: N/A.

Type of Review: Extension of existing collection.

Respondents: Individuals or households.

Number of Respondents: 40,000.

Estimated Time Per Response: .001 hour.

Total Annual Burden: 40 hours.

Needs and Uses: The recordkeeping requirement in section 97.5 requires that an original or photocopy of each amateur station license be retained at the station. This is necessary so Commission field personnel can quickly determine whether the radio station is licensed in conformance with the terms of the station license and the requirements of the Communications Act of 1934, as amended. Review of the license is done by the FCC Compliance and Information Bureau personnel during inspections and investigations to assure that amateur stations are duly licensed in accordance with applicable rules, statutes and treaties. In the absence of this recordkeeping requirement, field investigations related to the solution of cases of harmful interference could be severely hampered and needlessly prolonged due to the inability to determine whether a station was licensed.

OMB Approval No: 3060-0434.

Title: Section 90.19(f)(7) Stolen vehicle recovery system requirements.

Form No.: N/A.

Type of Review: Extension of existing collection.

Respondents: Business or other for-profit; Small business or organizations.

Number of Respondents: 8 respondents; 5 responses per respondent.

Estimated Time Per Response: 4 hours.

Total Annual Burden: 160 hours.

Needs and Uses: Section 90.19 requires that applicants for stolen vehicle recovery systems perform an analysis for each base station to ensure that the system does not cause interference to Channel 7 television stations. This requirement is necessary so that the Commission field personnel can quickly determine whether the radio station is licensed and is being operated in conformance with the terms of the station license and the requirements of the Communications

Act of 1934, as amended. Review of the operator license is done by the FCC Compliance and Information Bureau personnel during inspections and investigation to assure that the stations are duly licensed in accordance with applicable rules statutes and treaties. In the absence of this recordkeeping requirement, field investigations related to the solution of cases of harmful interference could be severely hampered and needlessly prolonged due to the inability to determine whether the station was licensed.

*OMB Approval No:* 3060-0262.

*Title:* Section 90.179 Shared use of radio stations.

*Form No.:* N/A.

*Type of Review:* Extension of existing collection.

*Respondents:* Business and other-for-profit; State or local governments; Not-for-profit institutions; Small businesses or organizations.

*Number of Respondents:* 1,650.

*Estimated Time Per Response:* .75.

*Total Annual Burden:* 1238.

*Needs and Uses:* Licensees are permitted to share use of their radio facilities with others who are not licensees. Section 90.179 requires the sharing agreement and the list of station users by kept as part of the station records.

*OMB Approval No:* 3060-0260.

*Title:* Section 90.239 (d) Interim Provisions for Operation of Automatic Vehicle Monitoring (AVM) Systems (Supplemental showing required).

*Form No.:* N/A.

*Type of Review:* Extension of existing collection.

*Respondents:* State or local governments; Business or other for-profit; Not-for profit institutions; Small businesses or organizations.

*Number of Respondents:* 50.

*Estimated Time Per Response:* 1.33 hours.

*Total Annual Burden:* 67 hours

*Needs and Uses:* Section 90.239(d) requires applicants for Automatic Vehicle Monitoring (AVM) Systems to submit supplemental technical information necessary to evaluate the interference potential of the applied for system.

*OMB Approval No:* 3060-0180.

*Title:* Section 73.1610 Equipment Tests.

*Form No.:* N/A.

*Type of Review:* Extension of existing collection.

*Respondents:* Business and other-for-profit.

*Number of Respondents:* 612.

*Estimated Time Per Response:* 30 minutes.

*Total Annual Burden:* 306 hours.

*Needs and Uses:* Section 73.1610 requires the permittee of a new broadcast station to notify the FCC of its plans to conduct equipment tests for the purpose of making adjustments and measurements as may be necessary to assure compliance with the terms of the construction permit and applicable engineering standards. The data are used by FCC staff to assure compliance with the terms of the construction permit and applicable engineering standards.

#### FEDERAL ELECTION COMMISSION

[Notice 1995-12]

#### Filing Dates for the Illinois Special Elections

AGENCY: Federal Election Commission.

**ACTION:** Notice of Filing Dates for Special Elections.

**SUMMARY:** Illinois has scheduled special elections on November 28 and December 12 in the Second Congressional District to fill the U.S. House seat vacated by Congressman Mel Reynolds.

Committees required to file reports in connection with the Special Primary Election should file a 12-day Pre-Primary Report on November 16. Committees required to file reports in connection with both the Special Primary and Special General Election to be held on December 12 must file a 12-day Pre-Primary Report, a 12-day Pre-General Report on November 30, and a consolidated Post-General & Year-End Report on January 11, 1996.

**FOR FURTHER INFORMATION CONTACT:** Ms. Bobby Werfel, Information Division, 999 E Street, NW., Washington, DC 20463, Telephone: (202) 219-3420; Toll Free (800) 424-9530.

**SUPPLEMENTARY INFORMATION:** All principal campaign committees of candidates in the Special Primary and Special General Elections and all other political committees not filing monthly which support candidates in these elections shall file a 12-day Pre-Primary Report on November 16, with coverage dates from the close of the last report filed, or the day of the committee's first activity, whichever is later, through November 8, a 12-day Pre-General Election Report on November 30, with coverage dates from November 9 through November 22, and a consolidated Post-General and Year-End Report on January 11, 1996, with coverage dates from November 23 through December 31, 1995.

All principal campaign committees of candidates in the Special Primary Election only and all other political committees not filing monthly which support candidates in the Special Primary Election shall file a 12-day Pre-Primary Report on November 16, with coverage dates from the close of the last report filed, or the date of the committee's first activity, whichever is later, through November 8, and a Year-End Report on January 31, 1996, with coverage dates from November 9 through December 31, 1995.

All political committees not filing monthly which support candidates in the Special General only shall file a 12-day Pre-General Election Report on November 30, with coverage dates from the last report filed, or the date of the committee's first activity, whichever is later, through November 22, and a consolidated Post-General and Year-End Report on January 11, 1996, with

coverage dates from November 23 through December 31, 1995.

CALENDAR OF REPORTING DATES FOR ILLINOIS SPECIAL ELECTIONS

Report	Close of books <sup>1</sup>	Reg./cert. mailing date <sup>2</sup>	Filing date
I. All Committees Involved in the Special Primary (11/28) and Special General (12/12) Must File:			
Pre-Primary .....	11/08/95	11/13/95	11/16/95
Pre-General .....	11/22/95	<sup>3</sup> 11/30/95	11/30/95
Post-General & Year-End <sup>4</sup> .....	12/31/95	01/11/96	01/11/96
II. All Committees Involved in the Special Primary (11/28) Only Must File:			
Pre-Primary .....	11/08/95	11/13/95	11/16/95
Year-End .....	12/31/95	01/31/96	01/31/96
III. All Committees Involved in the Special General (12/12) Only Must File:			
Pre-General .....	11/22/95	<sup>3</sup> 11/30/95	11/30/95
Post-General & Year-End <sup>4</sup> .....	12/31/95	01/11/96	01/11/96

<sup>1</sup> The period begins with the close of books of the last report filed by the committee. If the committee has filed no previous reports, the period begins with the date of the committee's first activity.  
<sup>2</sup> Reports sent by registered or certified mail must be postmarked by the mailing date; otherwise, they must be received by the filing date.  
<sup>3</sup> The mailing date is the same as the filing date because the computed mailing date would fall one day before the primary was held.  
<sup>4</sup> Committees should file a consolidated Post-General and Year-End Report by the filing date of the Post-General Report.

Dated: September 26, 1995.

**Commonwealth of Puerto Rico; Amendment to Notice of a Major Disaster Declaration**

**AGENCY:** Federal Emergency Management Agency (FEMA).

**ACTION:** Notice.

**SUMMARY:** This notice amends the notice of a major disaster for the Commonwealth of Puerto Rico (FEMA-1068-DR), dated September 16, 1995, and related determinations.

**EFFECTIVE DATE:** September 22, 1995.

**FOR FURTHER INFORMATION CONTACT:** Pauline C. Campbell, Response and Recovery Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646-3606.

**SUPPLEMENTARY INFORMATION:** Notice is hereby given that the incident period for this disaster is September 15 through September 17, 1995.

**FEDERAL RESERVE SYSTEM**

**Steven Bangert, et al.; Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies**

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than October 13, 1995.

A. Federal Reserve Bank of Kansas City (John E. Yorke, Senior Vice

**HUBCO, Inc., et al.; Acquisitions of Companies Engaged in Permissible Nonbanking Activities**

The organizations listed in this notice have applied under § 225.23(a)(2) or (f)

of the Board's Regulation Y (12 CFR 225.23(a)(2) or (f)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated for the application or the offices of the Board of Governors not later than October 13, 1995.

A. Federal Reserve Bank of New York (William L. Rutledge, Senior Vice President) 33 Liberty Street, New York, New York 10045:

1. *HUBCO, Inc.*, Mahwah, New Jersey, and United National Bancorp, Bridgewater, New Jersey; to acquire Hub Financial Services, Inc., Mahwah, New Jersey, and thereby engage in data processing activities, pursuant to § 225.25(b)(7) of the Board's Regulation Y. These activities will be conducted worldwide.

B. Federal Reserve Bank of Atlanta (Zane R. Kelley, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *First American Corporation*, Nashville, Tennessee; to acquire Charter Federal Savings Bank, Bristol, Virginia, and thereby engage in operating a

savings association, pursuant to § 225.25(b)(9) of the Board's Regulation Y; and in the sale of credit related insurance through Charter Federal Savings Bank's wholly-owned subsidiaries, Charter Financial Services Corporation and Highlands Service Corporation, pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y. The proposed activities will be conducted throughout the State of Virginia.

C. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Old National Bancorp*, Evansville, Indiana; to acquire First United Savings Bank, F.S.B., Greencastle, Indiana, and thereby engage in operating a savings association, pursuant to § 225.25(b)(9) of the Board's Regulation Y. This activity will be conducted in Monroe County, Indiana.

Board of Governors of the Federal Reserve System, September 25, 1995.

William W. Wiles,

*Secretary of the Board.*

BILLING CODE 6210-01-F

#### **NationsBank Corporation; Formation of, Acquisition by, or Merger of Bank Holding Companies; and Acquisition of Nonbanking Company**

The company listed in this notice has applied under § 225.14 of the Board's Regulation Y (12 CFR 225.14) for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) to become a bank holding company or to acquire voting securities of a bank or bank holding company. The listed company has also applied under § 225.23(a)(2) of Regulation Y (12 CFR 225.23(a)(2)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to acquire or control voting securities or assets of a company engaged in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies, or to engage in such an activity. Unless otherwise noted, these activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the

proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 13, 1995.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Senior Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *NationsBank Corporation*, Charlotte, North Carolina; to merge with Bank South Corporation, Atlanta, Georgia, and thereby indirectly acquire Bank South, Atlanta, Georgia.

In connection with this application, Applicant also has applied to acquire Bank South Life Insurance Corporation, Atlanta, Georgia; Bank South Life Insurance Corporation, and thereby reinsure credit life and credit disability insurance activities, pursuant to § 225.25(b)(8)(i) of the Board's Regulation Y; Bank South Securities Corporation, and thereby engage in underwriting and dealing in municipal revenue bonds, buying and selling municipal revenue bonds on the order of investors as a "riskless principal"; acting as agent in the private placement of municipal revenue bonds and other general obligations of states, their political subdivisions, authorities, or agencies, all pursuant to Board Order; *Bank South Corporation*, 79 Fed. Res. Bull. 716 (1993); in providing full service brokerage and discount brokerage services, pursuant to § 225.25(b)(15) of the Board's Regulation Y; in providing investment and financial advisory services to states, their political subdivisions, authorities, or agencies, and to other entities, pursuant to § 225.25(b)(4)(v) of the Board's Regulation Y; in underwriting and dealing in government obligations and money market instruments pursuant to § 225.25(b)(16) of the Board's Regulation Y; in arranging commercial real estate equity financing pursuant to § 225.25(b)(14) of the Board's Regulation

Y; providing foreign exchange advisory services, pursuant to § 225.25(b)(17) of the Board's Regulation Y; and Southeast Switch, Inc., and thereby engage in owning an interest in an interbank electronic funds transfer computer network for automatic teller machines, pursuant to § 225.25(b)(7) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 25, 1995  
William W. Wiles,  
*Secretary of the Board.*

BILLING CODE 6210-01-F

### **Peoples Banking Company, et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies**

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than October 23, 1995.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Peoples Banking Company*, Springfield, Missouri; to become a bank holding company by acquiring 100 percent of the voting shares of Peoples Bank of the Ozarks, Nixa, Missouri; Citizens Bank of the Ozarks, Camdenton, Missouri; and Peoples Bank of Fordland, Fordland, Missouri.

Comments regarding this application must be received not later than October 13, 1995.

B. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. *Park Bank Corporation of Duluth*, Duluth, Minnesota; to become a bank holding company by acquiring 100 percent of the voting shares of Park State Bank, Duluth, Minnesota.

Board of Governors of the Federal Reserve System, September 25, 1995.

William W. Wiles,  
*Secretary of the Board.*

BILLING CODE 6210-01-F

### **Sun Bancorp, Inc.; Notice of Application to Engage de novo in Permissible Nonbanking Activities**

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (12 CFR 225.23(a)(1)) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.21(a) of Regulation Y (12 CFR 225.21(a)) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party

commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than October 13, 1995.

A. Federal Reserve Bank of Philadelphia (Michael E. Collins, Senior Vice President) 100 North 6th Street, Philadelphia, Pennsylvania 19105:

1. *Sun Bancorp, Inc.*, Selingsgrove, Pennsylvania; to acquire Mifflin Place Associates, Mifflinburg, Pennsylvania, and thereby engage *de novo* in community development activities through a 95 percent investment in Company, pursuant to § 225.25(b)(6) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, September 25, 1995.

William W. Wiles,  
*Secretary of the Board.*

## **DEPARTMENT OF HEALTH AND HUMAN SERVICES**

### **Food and Drug Administration**

[Docket No. 95N-0317]

#### **Colgate-Palmolive Co., et al.; Withdrawal of Approval of 23 New Drug Applications**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is withdrawing approval of 23 new drug applications (NDA's). The holders of the NDA's notified the agency in writing that the drug products were no longer being marketed under the NDA and requested that the approval of the applications be withdrawn.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** Nancy G. Maizel, Center for Drug Evaluation and Research (HFD-53), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-594-2623.

**SUPPLEMENTARY INFORMATION:** The holders of the NDA's listed below have informed FDA that these drug products are no longer being marketed under the NDA and have requested that FDA withdraw approval of the applications. The applicants have also, by request, waived their opportunity for a hearing.

NDA No.	Drug	Applicant
6-615 .....	Veto Cream Deodorant .....	Colgate-Palmolive Co., P.O. Box 1343, 909 River Rd., Piscataway, NJ 08855-1343.
7-871 .....	Perazil Cream .....	Burroughs Wellcome Co., 3030 Cornwallis Rd., P.O. Box 12700, Research Triangle Park, NC 27709-2700.
8-842 .....	Raudixin Tablets .....	Apothecon, Bristol-Myers Squibb Co., P.O. Box 4500, Princeton, NJ 08543-4500.
10-653 .....	Disipal Tablets .....	Riker Laboratories Inc., 3M Pharmaceuticals, 270-3A-01 3M Center, St. Paul, MN 55144-1000.
12-026 .....	Apresoline-Esidrix Tablets .....	Ciba Pharmaceuticals Division, Ciba-Geigy Corp., 556 Morris Ave., Summit, NJ 07901-1398.
12-402 .....	Ivadantin Injection .....	Procter & Gamble Pharmaceuticals, Regulatory and Clinical Development, Sharon Woods Technical Center, 11370 Reed Hartman Hwy., Cincinnati, OH 45241-2422.
16-069 .....	Mepriam Tablets .....	Lemmon Co., 650 Cathill Rd., Sellersville, PA 18960.
16-379 .....	Locorten Cream .....	Ciba Pharmaceuticals Division.
17-046 .....	Kaon-CI/Koan-CI 10 Tablets .....	Savage Laboratories, Division of Altana Inc., 60 Baylis Rd., Melville, NY 11747.
17-244 .....	Uticort Gel .....	Parke-Davis Pharmaceutical Research, Division of Warner-Lambert Co., 2800 Plymouth Rd., Ann Arbor, MI 48105.
17-739 .....	Monistat-Derm Lotion .....	The R.W. Johnson Pharmaceutical Research Institute, Route 202, P.O. Box 300, Raritan, NJ 08869-0602.
17-941 .....	Sudafed 12-Hour Capsules .....	Burroughs Wellcome Co.
18-004 .....	Hydroxyprogesterone Caproate Injection .....	Akorn Inc., P.O. Box 1220, Decatur, IL 62525.
18-009 .....	Sarenin Injection .....	Procter & Gamble Pharmaceuticals.
18-075 .....	K-TimeKap Capsules .....	Ciba Pharmaceuticals Division.
18-166 .....	Trasicor Capsules .....	Do.
18-816 .....	Micatin Antifungal Powder .....	Advanced Care Products, Ortho Pharmaceutical Corp., J&J Research Complex, Route 1 South and Middleton Rd., North Brunswick, NJ 08902-0724.
18-872 .....	Viskazine Tablets .....	Sandoz Pharmaceuticals Corp., 59 Route 10, East Hanover, NJ 07936-1080.
19-208 .....	Actifed Capsules .....	Burroughs Wellcome Co.
19-451 .....	Lopressor Chlorthalidone Capsules .....	Ciba Pharmaceuticals Division.
20-158 .....	Deracyn Tablets .....	The Upjohn Co., U.S. Pharmaceutical Regulatory Affairs, 7000 Portage Rd., Kalamazoo, MI 49001-0199.
50-473 .....	Velosef Powder for Oral Suspension .....	Apothecon.
50-474 .....	Velosef Capsules .....	Do.

Therefore, under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) and under authority delegated to the Director, Center for Drug Evaluation and Research (21 CFR 5.82), approval of the NDA's listed above, and all amendments and supplements thereto, is hereby withdrawn, effective September 29, 1995.

Dated: September 21, 1995.

Janet Woodcock,

Director, Center for Drug Evaluation and Research.

**Advisory Committees; Notice of Meetings**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

FDA has established an Advisory Committee Information Hotline (the hotline) using a voice-mail telephone

system. The hotline provides the public with access to the most current information on FDA advisory committee meetings. The advisory committee hotline, which will disseminate current information and information updates, can be accessed by dialing 1-800-741-8138 or 301-443-0572. Each advisory committee is assigned a 5-digit number. This 5-digit number will appear in each individual notice of meeting. The hotline will enable the public to obtain information about a particular advisory committee by using the committee's 5-digit number. Information in the hotline is preliminary and may change before a meeting is actually held. The hotline will be updated when such changes are made.

**MEETINGS:** The following advisory committee meetings are announced:

#### **National Task Force on Aids Drug Development**

*Date, time, and place.* October 12, 1995, 8:30 a.m., Hubert H. Humphrey Bldg., rm. 800, 200 Independence Ave. SW., Washington, DC.

*Type of meeting and contact person.* Open task force discussion, 8:30 a.m. to 4:30 p.m.; open public hearing, 4:30 p.m. to 5:30 p.m., unless public participation does not last that long; Heidi C. Marchand or Kimberley M. Miles, Office of AIDS and Special Health Issues (HF-12), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-0104, or FDA Advisory Committee Information Hotline, 1-800-741-8138 (301-443-0572 in the Washington, DC area), National Task Force on AIDS Drug Development, code 12602.

*General function of the task force.* The task force shall identify any barriers and provide creative options for the rapid development and evaluation of treatments for human immunodeficiency virus (HIV) infection and its sequelae. It also advises on issues related to such barriers, and provides options for the elimination of these barriers.

*Open task force discussion.* The task force will present, hear, and discuss recommendations made at previous meetings and discuss the future of the task force.

FDA is giving less than 15 days public notice of the advisory committee meeting because of the urgent need to address the potential risk of this disease to public health safety. The agency decided that it was in the public interest to hold this scientific discussion on October 12, 1995, even if there was not sufficient time for the customary 15-day public notice.

*Agenda—Open public hearing.* Interested persons may present information or views, orally or in writing, on issues pending before the task force. Those desiring to make formal presentations should notify the contact person before October 10, 1995, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

#### **National Mammography Quality Assurance Advisory Committee**

*Date, time, and place.* October 16, 1995, 10 a.m., and October 17 and 18, 1995, 9 a.m., Dupont Plaza Hotel, 1500 New Hampshire Ave. NW., Washington, DC. A limited number of overnight accommodations have been reserved at the Dupont Plaza Hotel. Attendees requiring overnight accommodations may contact the hotel at 202-483-6000 and reference the FDA Committee meeting block. Reservations will be confirmed at the group rate based on availability.

*Type of meeting and contact person.* Open committee discussion, October 16, 1995, 10 a.m. to 12 m.; open subcommittee discussions, 12 m. to 5 p.m.; open public hearing, October 17, 1995, 9 a.m. to 10 a.m., unless public participation does not last that long; open committee discussion, 10 a.m. to 5 p.m.; open subcommittee discussions, October 18, 1995, 9 a.m. to 1 p.m.; open committee discussion, 1 p.m. to 3 p.m.; Charles K. Showalter, Center for Devices and Radiological Health (HFZ-240), Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850, 301-594-3332, or FDA Advisory Committee Information Hotline, 1-800-741-8138 (301-443-0572 in the Washington, DC area), National Mammography Quality Assurance Advisory Committee, code 12397.

*General function of the committee.* The committee advises on developing appropriate quality standards and regulations for the use of mammography facilities.

*Agenda—Open public hearing.* Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before October 10, 1995, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the

approximate time required to make their comments.

*Open committee discussion.* On October 16, 1995, the committee will discuss a methodology of assessing the costs and benefits of the Mammography Quality Standards Act (the MQSA). On October 17, 1995, the committee will discuss facility inspection procedures and have a briefing by FDA on facility inspections to date. Copies of the "MQSA Facility Inspection Procedures" may be obtained by submitting a written request to John L. McCrohan at the address given above for the FDA contact person. On October 18, 1995, the committee will discuss the ongoing work of the three subcommittees: Access to Mammography Services, Physicists Availability, and Cost Benefit of Compliance.

*Open subcommittee discussions.* On October 16 and 18, 1995, the three subcommittees will meet concurrently. The subcommittees will discuss information that is necessary to make the determinations and subsequently prepare the reports mandated by the MQSA. Upon completion, the subcommittee reports will be reviewed by the committee prior to submission to the Secretary of Health and Human Services and Congress.

#### **Advisory Committee on Special Studies Relating to the Possible Long-Term Health Effects of Phenoxy Herbicides and Contaminants (Ranch Hand Advisory Committee)**

*Date, time, and place.* October 25, 1995, 8:30 a.m., Hubert H. Humphrey Bldg., rm. 405-A, 200 Independence Ave. SW., Washington, DC.

*Type of meeting and contact person.* Open committee discussion, 8:30 a.m. to 10:30 a.m.; open public hearing, 10:30 a.m. to 11:30 a.m., unless public participation does not last that long; open committee discussion, 11:30 a.m. to 5 p.m.; Ronald F. Coene, National Center for Toxicological Research (HFT-10), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3155, or FDA Advisory Committee Information Hotline, 1-800-741-8138 (301-443-0572 in the Washington, DC area), Ranch Hand Advisory Committee, code 12560.

*General function of the committee.* The committee shall advise the Secretary and the Assistant Secretary for Health concerning its oversight of the conduct of the Ranch Hand Study by the Air Force and other studies in which the Secretary or the Assistant Secretary for Health believes involvement by the advisory committee is desirable.

*Agenda—Open public hearing.* Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before October 16, 1995, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their comments.

*Open committee discussion.* The committee will review and provide comments on the draft protocol and questionnaire for the Department of Veterans Affairs, Army Chemical Corps Vietnam Veterans Health Study, developed by the Environmental and Epidemiology Service, Department of Veterans Affairs, Veterans Administration.

A final agenda will be available October 18, 1995, from the contact person.

FDA public advisory committee meetings may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. There are no closed portions for the meetings announced in this notice. The dates and times reserved for the open portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this Federal Register notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

The agenda, the questions to be addressed by the committee, and a current list of committee members will be available at the meeting location on the day of the meeting.

Transcripts of the open portion of the meeting may be requested in writing from the Freedom of Information Office (HFI-35), Food and Drug Administration, rm. 12A-16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting may be requested in writing from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (5 U.S.C. app. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

Dated: September 25, 1995.  
David A. Kessler,  
*Commissioner of Food and Drugs.*

## Health Care Financing Administration

### Public Information Collection Requirements Submitted for Public Comment and Recommendations

AGENCY: Health Care Financing Administration.

In compliance with the requirement of section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the

Health Care Financing Administration (HCFA), Department of Health and Human Services (HHS), is publishing the following summaries of proposed collections for public comment.

*Type of Information Collection*  
*Request:* Extension; *Title of Information Collection:* Sole Community Home Health Agencies (HHA) at 42 CFR 424.22(b)(2),(f) and (g); *Form No.:* HCFA R-85; *Use:* These regulations implement the rules for participation of HHAs in Medicare and the establishment and review of plans of care for home health services. These regulations make it easier for certain HHAs to meet certification and plan of care requirements. *Frequency:* Annually; *Affected Public:* Business or other for-profit and not-for-profit institutions; *Number of Respondents:* 20; *Total Annual Hours:* 40.

To request copies of the proposed paperwork collections referenced above, call the Reports Clearance Office on (410) 786-1326. Written comments and recommendations for the proposed information collections should be sent within 60 days of this notice directly to the HCFA Paperwork Clearance Officer designated at the following address: HCFA, Office of Financial and Human Resources, Management Planning and Analysis Staff, Attention: Louis Blank, Room C2-26-17, 7500 Security Boulevard, Baltimore, Maryland 21244-1850.

Dated: September 21, 1995.  
Carl Bordone,  
*Acting Director, Management Planning and Analysis Staff, Office of Financial and Human Resources.*

## Indian Health Service

### Availability of Funds for Loan Repayment Program for Repayment of Health Professions Educational Loans

AGENCY: Indian Health Service, HHS.  
ACTION: Notice.

**SUMMARY:** The Administration's budget request for fiscal year (FY) 1996 includes \$11,000,000 for the Indian Health Service Loan Repayment Program for health professions educational loans (undergraduate and graduate) in return for full-time clinical service in Indian health programs. It is anticipated that \$11,000,000 will be available to support approximately 250 competing awards averaging \$50,000 per award.

This program announcement is subject to the appropriation of funds.

This notice is being published early to coincide with the recruitment activity of the IHS which competes with other Government and private health management organizations to employ qualified health professionals. Funds are required to be expended by September 30 of the fiscal year. This program is authorized by Section 108 of the Indian Health Care Improvement Act as amended, 25 U.S.C. 1601 *et seq.* The IHS invites potential applicants to request an application for participation in the Loan Repayment Program.

**DATES:** Applications for the FY 1996 Loan Repayment Program will be accepted and evaluated monthly beginning 30 days after publication of this notice and will continue each month thereafter until all funds are exhausted. Subsequent monthly deadline dates are scheduled for Friday of the second full week of each month. Notice of awards will be mailed on the last working day of each month.

Applicants selected for participation in the FY 1996 program cycle will be expected to begin their service period no later than September 30, 1996.

Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date; or
2. Sent on or before the deadline date. (Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or the U.S. Postal Service. Private metered postmarks shall *not* be acceptable as proof of timely mailing.)

Applications received after the monthly closing date will be held for consideration in the next monthly funding cycle. Applicants who do not receive funding by September 30, 1996, will be notified in writing.

**FORM TO BE USED FOR APPLICATION:**

Applications will be accepted only if they are submitted on the form entitled "Application for the Indian Health Service Loan Repayment Program," identified with the Office of Management and Budget approval number of OMB #0917-0014 (expires 2/28/96).

**ADDRESSES:** Application materials may be obtained by calling or writing to the address below. In addition, completed applications should be returned to: IHS Loan Repayment Program, 12300 Twinbrook Parkway—Suite 100, Rockville, Maryland 20852, PH: 301/443-3396 (between 8 a.m. and 5 p.m. (EST) Monday through Friday, except Federal holidays).

**FOR FURTHER INFORMATION CONTACT:**

Please address inquiries to Mr. Charles Yepa, LRP Section Chief, IHS Loan Repayment Program, Twinbrook Metro Plaza—Suite 100, 12300 Twinbrook Parkway, Rockville, Maryland 20852, PH: 301/443-3396 (between 8 a.m. and 5 p.m. (EST) Monday through Friday, except Federal holidays).

**SUPPLEMENTARY INFORMATION:** Section 108 of the Indian Health Care Improvement Act as amended by Public Law 100-713 and 102-573, authorizes the IHS Loan Repayment Program and provides in pertinent part as follows:

The Secretary, acting through the Service, shall establish a program to be known as the Indian Health Service Loan Repayment Program (hereinafter referred to as the "Loan Repayment Program") in order to assure an adequate supply of trained health professionals necessary to maintain accreditation of, and provide health care services to Indians through, Indian health programs

"Health Profession" means family medicine, internal medicine, pediatrics, geriatric medicine, obstetrics and gynecology, podiatric medicine, nursing, public health nursing, dentistry, psychiatry, osteopathy, optometry, pharmacy, psychology, public health, social work, marriage and family therapy, chiropractic medicine, environmental health and engineering and allied health professions.

Osteopathic physicians (D.O.) may be funded regardless of specialty, provided that the IHS has a need for that specialty. Allopathic physicians (M.D.) may be funded only if they are board certified/eligible in family medicine, internal medicine, pediatrics, geriatric medicine, obstetrics and gynecology and psychiatry.

For the purpose of this program, the term "Indian health program" is defined in Section 108(a)(2)(A), as follows:

\* \* \* any health program or facility funded, in whole or in part, by the IHS for the benefit of American Indians and Alaska Natives and administered:

- a. Directly by the service; or
- b. By any Indian tribe or tribal or Indian organization pursuant to a contract under:
  - (1) The Indian Self-Determination Act; or
  - (2) Section 23 of the Act of April 30, 1908, (25 U.S.C. 47), popularly known as the Buy Indian Act; or
  - (3) By an urban Indian organization pursuant to Title V of this act.

Applicants may sign contractual agreements with the Secretary for 2 years. The IHS will repay all or a portion of the applicant's health professions educational loans (undergraduate and graduate) for tuition expenses and reasonable educational and living expenses in amounts up to \$30,000 per year for each year of contracted service to be made in annual

payments to the participant for the purpose of repaying his/her outstanding health professions educational loans. Repayment of health professions educational loans will be made to the participant within 120 days after the participant's entry on duty has been confirmed by the IHS. The Secretary must approve the contract before the disbursement of loan repayments can be made to the participant.

Participants will be required to fulfill their contract service agreements through full-time clinical practice at an Indian health program site determined by the Secretary. Loan repayment sites are characterized by physical, cultural, and professional isolation, and have histories of frequent staff turnover. All Indian health program sites are annually prioritized by discipline, based on need or vacancy by the Agency.

All health professionals will receive up to \$30,000 per year, regardless of their length of contract. Where payments under the Loan Repayment Program result in an increase in Federal income tax liability, the IHS will pay up to 31 percent of the participant's total loan repayments to the Internal Revenue Service on the participant's behalf for all or part of the increased tax liability of the participant.

Pursuant to Section 108(b), to be eligible to participate in the Loan Repayment Program an individual must:

- (1) A. be enrolled:
  - (i) In a course of study or program in an accredited institution, as determined by the Secretary, within any state and be scheduled to complete such course of study in the same year such individual applies to participate in the Loan Repayment Program. (The Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, the Virgin Islands, Guam, American Samoa, the Federated States of Micronesia, the Republic of the Marshall Islands, and the Republic of Palau); or
  - (ii) In an approved graduate training program in a health profession; or
- B. have a degree in a health profession and a license to practice; AND
- (2) A. be eligible for, or hold an appointment as a Commissioned Officer in the Regular or Reserve Corps of the Public Health Service, or
  - B. be eligible for selection for civilian service in the Regular or Reserve Corps of the Public Health Service; or
  - C. meet the professional standards for civil service employment in the IHS; or
  - D. be employed in an Indian health program without service obligation; AND

(3) submit to the Secretary an application and contract to the Loan Repayment Program; AND

(4) sign and submit to the Secretary, a written contract agreeing to accept repayment of educational loans and to serve for the applicable period of obligated service in a priority site as determined by the Secretary; AND

(5) sign an affidavit attesting to the fact that they have been informed of the relative merits of the U.S. Public Health Service Commissioned Corps and the Civil Service as employment options.

Upon approval of the applicant for participation in the Loan Repayment Program, the applicant will receive confirmation of his/her loan repayment award and the duty site at which he/she will serve his/her loan repayment obligation.

The IHS has identified the positions in each Indian health program for which there is a need or vacancy and ranked those positions in order of priority by developing discipline specific prioritized lists of sites. Ranking criteria for these sites include the following:

- Historically critical shortages caused by frequent staff turnover;
- Current unmatched vacancies in a Health Profession Discipline;
- Projected Vacancies in a Health Profession Discipline;
- Ensuring that the staffing needs of Indian health programs administered by an Indian tribe or tribal or health organization received consideration on an equal basis with programs that are administered directly by the Service; and

- Giving priority to vacancies in Indian health programs that have a need for health professionals to provide health care services as a result of individuals having breached Loan Repayment Program contracts entered into under this section. Consistent with this priority ranking, in determining which applications to approve and which contracts to accept, the IHS will give priority to applications made by American Indians and Alaska Natives and to individuals recruited through the efforts of Indian tribes or tribal or Indian organizations.

- With respect to priorities among the various health professions, the statute requires that of the total amount appropriated for Fiscal Year 1996 for loan repayment contracts, not less than 25 percent be provided to applicants who are nurses, nurse practitioners, or nurse midwives and not less than 10 percent be provided to applicants who are mental health professionals (other than nurses, nurse practitioners, or nurse midwives). This requirement does not apply if the number of applications

from these two groups, respectively, is not sufficient to meet the requirement.

- Subject to the above statutory priority for nurses and mental health practitioners, the IHS will give priority in funding among health professionals to physicians in the following priority specialties: anesthesiology, emergency room medicine, general surgery, obstetrics/gynecology, ophthalmology, orthopedic surgery, otolaryngology/otorhinolaryngol, psychiatry and radiology.

The following factors are equal in weight when applied, and are applied when all other criteria are equal and a selection must be made between applicants. One or all of the following factors may be applicable to an applicant, and the applicant who has the most of these factors, all other criteria equal, would be selected.

- An applicant's length of current employment in the IHS, tribal or urban program.
- Availability for service earlier than other applicants (first come, first served); and
- Date the individual's application was received.

Any individual who enters this program and satisfactorily completes his or her obligated period of service may apply to extend the contract on a year-by-year basis as determined by the IHS, at the maximum amount of up to \$30,000 per year and an additional 31 percent for Federal Withholding. If funds available, the maximum amount will be funded in this manner and will not exceed the total of the individual's outstanding eligible health professions educational loans.

Any individual who owes an obligation for health professional service to the Federal Government or to a State or other entity under an agreement with such State or other entity is not eligible for the Loan Repayment Program unless such an obligation will be completely satisfied prior to the beginning of service under this program in the year that an application is made for this program.

This program is not subject to review under Executive Order 12372.

The Catalog of Federal Domestic Assistance number is 93.164.

Dated: September 20, 1995.

Michel E. Lincoln,

*Acting Director.*

## National Institutes of Health

### Notice of a Meeting of the Office of AIDS Research Advisory Council (OARAC)

Pursuant to Public Law 92-463, notice is hereby given of the meeting of the Office of AIDS Research Advisory Council (OARAC) on October 19, 1995, at the National Institutes of Health (NIH), Bethesda, Maryland. The meeting will take place on October 19 from 8:30 am to 5:00 pm, in Building 31, C Wing, Sixth Floor, Conference Room 10. The meeting will be open to the public.

The purpose of the first OARAC meeting will be to introduce and welcome new council members and further familiarize them with the NIH AIDS research program. The meeting will include a presentation on the Office of AIDS Research (OAR) structure and function, and an overview of the NIH AIDS research effort in the five areas of AIDS research: Natural History, Epidemiology, and Prevention Research; Etiology and Pathogenesis; Behavioral Research; Vaccine Research and Development; and Therapeutics. There will be discussions on the NIH AIDS Research Program Evaluation; a review of the OAR Emergency Discretionary Fund and discussions on a proposal for new ways for making the best use of these funds.

Jeannette R. De Lawter, Program Analyst, Office of AIDS Research, National Institutes of Health, Building 31, Room 4B54, 9000 Rockville Pike, Bethesda, MD 20892, Phone (301) 402-3357, Fax (301) 402-3360, will furnish the meeting agenda and roster of committee members upon request. Any individual who requires special assistance, such as sign language interpretation or other reasonable accommodations, should contact Mrs. De Lawter at the above location no later than October 13.

Dated: September 22, 1995.

Margery G. Grubb,

*Senior Committee Management Specialist.*

### Notice of Meeting

Notice is hereby given of the meeting of the NIH AIDS Research Program Evaluation Working Group Area Review Panel on Natural History, Epidemiology, and Prevention Research on October 17, 1995 from 1 pm to 5 pm at the Holiday Inn Bethesda, 8120 Wisconsin Avenue, Bethesda, Maryland. The meeting will be open to the public from 2 pm to 5

pm, and the closed portion will be from 1 pm to 2 pm.

The NIH Revitalization act of 1993 authorizes the Office of AIDS Research (OAR) to evaluate the AIDS research activities of NIH. The NIH AIDS Research Program Evaluation Working Group was established by the OAR to carry out this major evaluation initiative, reviewing and assessing each of the components of the NIH AIDS research endeavor to determine whether those components are appropriately designed and coordinated to answer the critical scientific questions to lead to better treatments, preventions, and a cure for AIDS. Six Area Review Panels were also established to address the following research areas: Natural History and Epidemiology; Etiology and Pathogenesis; Clinical Trials; Drug Discovery; Vaccine Research; and Behavioral and Social Sciences Research.

The purpose of the meeting is to seek input from individuals and organizations interested in the evaluation of AIDS research in the areas of natural history, epidemiology, and biomedical (nonbehavioral) intervention and prevention. Examples of areas under consideration by the panel include risk factors and mechanisms of HIV transmission; the progression of HIV-related disease from primary infection through long-term consequences and sequelae; cohort studies of HIV-infected persons and HIV-uninfected persons at high risk of acquiring the infection; biomedical methods for HIV prevention and control, including topical microbicides; and treatment of other sexually transmitted diseases as a means of HIV control. The NIH AIDS Research Program Evaluation Working Group will develop recommendations to be made to the Office of AIDS Research Advisory Council that address the overall NIH AIDS research initiatives, both intramural and extramural, and identify long-range goals in the relevant areas of science. These recommendations will provide the framework for future planning and budget development of the NIH AIDS research program.

There will be a closed session from 1 pm to 2 pm to update the Panel members on privileged information on institute and center grant and contract portfolios. The open session from 2 pm to 5 pm will begin with a brief overview of panel activities by members of the panel. The remainder of the meeting will be devoted to presentations from individuals and organizations. The session is open to the public; however, attendance may be limited by seat availability.

Comments should be confined to statements related to the current status of NIH AIDS research in the areas of natural history, epidemiology, and biomedical prevention and recommendations for consideration by the panel in assessing and reviewing the relevant research in these areas.

Only one representative of an organization may present oral comments. Each speaker will be permitted 5 minutes for their presentation. Interested individuals and representatives of organizations must submit a letter of intent to present comments and three (3) typewritten copies of the presentation, along with a brief description of the organization represented, to the attention of Dr. Sandra L. Melnick, Office of AIDS Research, NIH, 31 Center Drive, MSC 2340, Building 31, Room 5C08, Bethesda, MD 20892-2340, (301) 402-2932, FAX: (301) 402-7769. Letters of intent and copies of presentations must be received no later than 5 pm EDT on October 10.

Individuals wishing to provide only written statements should send three (3) typewritten copies of their comments, including a brief description of their organization, to the above address no later than 5 pm EDT on October 12. Statements submitted after that date will be accepted. They may not, however, be made available to the Area Review Panel prior to the meeting, though they will be provided subsequently as written testimony.

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Dr. Melnick in advance of the meeting.

Dated: September 22, 1995.

#### Division of Research Grants; Notice of Closed Meetings

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following Division of Research Grants Special Emphasis Panel (SEP) meetings:

*Purpose/Agenda:* To review individual grant applications

*Name of SEP:* Multidisciplinary Sciences

*Date:* October 11-13, 1995

*Time:* 7:00 p.m.

*Place:* Lebanon, New Hampshire

*Contact Person:* Dr. Donald Schneider,  
Scientific Review Administrator, 6701

Rockledge Drive, Room 5104, Bethesda, Maryland 20892, (301) 435-1165

*Name of SEP:* Multidisciplinary Sciences

*Date:* October 13, 1995

*Time:* 10:00 a.m.

*Place:* Lebanon, New Hampshire

*Contact Person:* Dr. Donald Schneider,  
Scientific Review Administrator, 6701  
Rockledge Drive, Room 5104, Bethesda,  
Maryland 20892, (301) 435-1165

*Name of SEP:* Biological and Physiological Sciences

*Date:* November 15, 1995

*Time:* 4:00 p.m.

*Place:* NIH, Rockledge II, Room 4148,

Telephone Conference

*Contact Person:* Dr. Philip Perkins, Scientific Review Administrator, 6701 Rockledge Drive, Room 4148, Bethesda, Maryland 20892, (301) 435-1038.

*Purpose/Agenda:* To review Small Business Innovation Research

*Name of SEP:* Multidisciplinary Sciences

*Date:* November 6-7, 1995

*Time:* 8:00 a.m.

*Place:* Georgetown Holiday Inn, Washington, DC

*Contact Person:* Dr. Donald Schneider,  
Scientific Review Administrator, 6701  
Rockledge Drive, Room 5104, Bethesda,  
Maryland 20892, (301) 435-1165.

The meetings will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than 15 days prior to the meeting due to the urgent need to meet timing limitations imposed by the grant review cycle.

(Catalog of Federal Domestic Assistance Program Nos. 93.306, 93.333, 93.337, 923.393-93.396, 93.837-93.844, 93.846-93.878, 93.892, 93.893, National Institutes of Health, HHS)

Dated: September 25, 1995.

### Public Health Service

#### National Institutes of Health; Statement of Organization, Functions, and Delegations of Authority

Part H, Chapter HN (National Institutes of Health) of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health and Human Services (40 FR 22859, May 27, 1975, as amended most recently at 60 FR 30092, June 7, 1995) is amended to reflect a reorganization within the Office of Research Services (ORS). The reorganization consists of the following: Retitle the Division of Security Operations (HNAL4) to the Division of Public Safety (HNAL4) and revise its functional statement. This reorganization is consistent with Administration objectives related to the National Performance Review and the Continuous Improvement Program. This reorganization will enable ORS to better fulfill its mission by centralizing the focus of public safety functions within ORS.

*Section HN-B, Organization and Functions,* is amended as follows: (1) Under the heading *Division of Security Operations (HNAL4), Office of Research Services (HNAL)*, delete the title and functional statement in their entirety and substitute the following:

*Division of Public Safety (HNAL4).* (1) Plans, directs, coordinates, and evaluates a comprehensive protection and security program that requires the development of protection and security criteria to eliminate or control protection and security vulnerabilities encountered in the construction, operations, and maintenance of NIH's health care facilities, research laboratories, administration and support facilities, and the physical plant; (2) is responsible for all security and protection programs, including education, training, technical assistance, physical security, hospital security, parking and traffic control, law enforcement, criminal investigation, fire protection, and emergency management; (3) implements Federal and Departmental regulations and establishes NIH policies and procedures in the area of security, emergency

management, and protection; (4) as the focal point for the receipt and transmittal of classified documents, verifies clearance levels prior to the delivery of classified documents, provides security briefings and debriefings for persons holding security clearances, and destroys outdated classified documents; (5) maintains liaison with international, national, State and local law enforcement and emergency management agencies, with particular emphasis on the Federal Bureau of Investigation, Drug Enforcement Agency, Montgomery County Police and Fire, security directors of research facilities receiving NIH funds, and the Federal Emergency Management Administration (FEMA); (6) ensures that all appropriate action is taken to carry out 45 CFR Part 3, including providing assistance to the Department of Justice in prosecuting criminal offenses or pursuing other legal actions related to the law enforcement or investigative activities of the division; and (7) plans, conducts, and coordinates programs to protect life, property, and the environment in the event of fire, explosions, accidental release of hazardous materials, and natural disasters.

Dated: September 10, 1995.

Harold Varmus,

*Director, NIH.*

### DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

#### Office of the Assistant Secretary for Community Planning and Development

[Docket No. FR-3778-N-56]

#### Federal Property Suitable as Facilities to Assist the Homeless

**AGENCY:** Office of the Assistant Secretary for Community Planning and Development, HUD.

**ACTION:** Notice.

**SUMMARY:** This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

**EFFECTIVE DATE:** September 29, 1995.

**FOR FURTHER INFORMATION CONTACT:** For further information, contact Mark Johnston, Department of Housing and Urban Development, Room 7256, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708-1226; TDD number for the hearing- and speech-

impaired (202) 708-2565, (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1-800-927-7588.

**SUPPLEMENTARY INFORMATION:** In accordance with the December 12, 1988 court order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.), HUD publishes a Notice, on a weekly basis, identifying unutilized, underutilized, excess and surplus Federal buildings and real property that HUD has reviewed for suitability for use to assist the homeless. Today's Notice is for the purpose of announcing that no additional properties have been determined suitable or unsuitable this week.

Dated: September 22, 1995.

BILLING CODE 4510-29-M

[Docket No. FR-2856-N-03]

**Office of the Assistant Secretary for Public and Indian Housing; Notice of Proposed Information Collection for Public Comment**

**AGENCY:** Office of the Assistant Secretary for Public and Indian Housing, HUD.

**ACTION:** Notice.

**SUMMARY:** The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

**DATES:** *Comments due:* November 28, 1995.

**ADDRESSES:** Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Mildred M. Hamman, Reports Liaison Officer, Public and Indian Housing, Department of Housing and Urban Development, 451-7th Street, SW., Room 4240, Washington, DC 20410-5000.

**FOR FURTHER INFORMATION CONTACT:** Mildred M. Hamman, (202)-708-0846, (this is not a toll-free number) for copies of the proposed forms and other available documents.

**SUPPLEMENTARY INFORMATION:** The Department will submit the proposed information collection to OMB for

review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

The Notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarify of the information to be collected; and (4) Minimize the burden of the collection of information of those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

*Title of Proposal:* Public Housing-Contracting with Resident-Owned Businesses

*OMB Control Number, if applicable:* 2577-0161

*Description of the need for the information and proposed use:* The information is necessary so that the applicants (resident-owned businesses) seeking to qualify for noncompetitive contracting with the PHA will be eligible to be solicited by the PHA as a contractor for a proposed contract.

*Agency forms numbers, if applicable:* Not applicable.

*Members of affected public:* Individuals or households; State or local governments; nonprofit institutions; small businesses or organizations.

*Estimation of the total numbers of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response:* 500 respondents, annually, 9 average hours per response, 10,000 hours for a total reporting burden.

*Status of the proposed information collection:* Extension, without change.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: September 21, 1995.

Joseph Shuldiner,

*Assistant Secretary for Public and Indian Housing.*

[FR Doc. 95-24227 Filed 9-28-95; 8:45 am]

BILLING CODE 4210-33-M

**Office of the Assistant Secretary for Public and Indian Housing**

[Docket No. FR-3972-D-01]

**Supersedure and Redelelegation of Authority Regarding Waiver of Public and Indian Housing Directives for the Public Housing, Indian Housing and Section 8 Rental Voucher, Rental Certificate, and Moderate Rehabilitation Programs and for Waiver of Conflict of Interest Prohibitions in Section 8 Contracts for the Rental Voucher, Rental Certificate and Moderate Rehabilitation Programs**

**AGENCY:** Office of the Assistant Secretary for Public and Indian Housing, HUD.

**ACTION:** Supersedure and Redelelegation of Authority to Issue Waivers of Office of Public and Indian Housing Directives for Public Housing, Indian Housing and Section 8 Rental Certificate, Rental Voucher and Moderate Rehabilitation Programs and to Waive Conflict of Interest Prohibitions in Section 8 Contracts for the Rental Certificate, Rental Voucher and Moderate Rehabilitation Programs. (This notice does not apply to the Moderate Rehabilitation Single Room Occupancy Program.)

**SUMMARY:** This notice consolidates in one document:

- Authority to waive Office of Public and Indian Housing directives for the Public Housing Program, Indian Housing Program and the Section 8 Rental Certificate Program, Rental Voucher Program and Moderate Rehabilitation Program and
- Authority to waive conflict of interest prohibitions for the Section 8 Rental Certificate and Rental Voucher programs and the Section 8 Moderate Rehabilitation Program.

The authority to waive Office of Public and Indian Housing Directives was previously retained and administered by the HUD Field Office Directors of Indian Programs, the Field Office Directors of HUD Public Housing Divisions and the Headquarters Director, Office of Native American Programs. The authority to waive conflict of interest prohibitions in the Section 8 Rental Certificate, Rental Voucher and Moderate Rehabilitation Programs was previously retained and administered by the Field Office Regional Administrators, Deputy Regional Administrators, Area Managers, Deputy Area Managers and Multifamily Service Office Supervisors.

This notice supersedes the prior redelegations of authority to waive

Section 8 conflict of interest prohibitions published at 45 FR 54143, August 14, 1980 and the redelegation of authority for the issuance of waivers of Office of Public and Indian Housing Directives published at 34 FR 8266, February 18, 1994. It does not supersede the authority regarding the waiver of conflict of interest provisions for the public housing and Indian Housing programs.

The authority to waive the conflict of interest includes the contracts for the Section 8 Rental Certificate, Rental Voucher and Moderate Rehabilitation Programs (exclusive of Moderate Rehabilitation Single Room Occupancy Program.)

This notice relates only to the waiver of Public and Indian Housing directives and Section 8 conflict of interest prohibitions and does not grant authority to waive contractual provisions. This redelegation does not include authority to waive statutes, regulations or contracts and does not confer authority to waive the requirement that Housing Authorities (HAs) must use forms required by HUD Headquarters. Further, this redelegation does not confer authority to waive the requirement that HAs maintain program accounts in accordance with HUD regulations, or to waive provisions in Notices of Funding Availability.

**EFFECTIVE DATE:** September 21, 1995.

**FOR FURTHER INFORMATION CONTACT:** With respect to conflict of interest prohibitions, contact Madeline Hastings, Director, Office of Rental Assistance, Department of Housing and Urban Development, Room 4226, 451 7th Street, SW., Washington, DC 20410, telephone (202) 708-1842. With respect to directives, contact Mildred M. Hamman, Directives Management Officer, Office of Public and Indian Housing, Department of Housing and Urban Development, Room 4244, 451 7th Street, SW., Washington, DC, telephone (202) 708-0846. (These are not toll-free numbers.)

**SUPPLEMENTARY INFORMATION:** Section 106 of the Department of Housing and Urban Development Reform Act of 1989 (Pub. L. 101-235, approved December 15, 1989) (HUD Reform Act), amended section 7 of the Department of Housing and Urban Development Act (42 U.S.C. 3535 (HUD Act) by adding section 7(q), governing circumstances upon which the Department may issue waivers of regulations and handbooks. According to section 7(q)(2), only an individual of Assistant Secretary rank or the equivalent may waive a regulation. This redelegation of authority does not

include the authority to waive regulations.

On April 22, 1991, at 56 FR 16337, HUD published a Statement of Policy implementing Section 106 of the HUD Reform Act. The new notice stated that although new section 7(q)(4) of the HUD Act addressed only "handbooks", HUD would apply this term to all Departmental directives in order to give section 7(q)(4) "the widest possible coverage." Therefore, the term "directive" was defined in the notice as follows:

Directives means a Handbook (including a change or supplement), notice, interim notice, special directive, and any other issuance that the Department may classify as a directive.

The Policy Statement also indicated that the authority to waive directives may be delegated to any officer or employee in the issuing official's organization, as well as to any officer or employee in a field or regional office.

With respect to handbooks, section 7(q)(4) states that a waiver of a provision of a handbook must:

- (A) Be in writing;
- (B) Specify the grounds for approving the waiver; and
- (C) Be maintained in indexed form and made available for public inspection for not less than the 3-year period beginning on the date of the waiver.

The current process of reviewing requests to waive directives in Headquarters frequently adds an unnecessary layer to a procedure that can be adequately carried out at the HUD Field Office level. Officials in the HUD Field Offices are often best situated to assess and react promptly to requests for relief from administrative requirements of general application, where specific circumstances, unanticipated under the directive, warrant a departure from the ordinary standard.

Therefore, in keeping with the objectives of the Secretary of Housing and Urban Development to improve the efficiency and enhance the productivity of the Department, the Assistant Secretary for Public and Indian Housing is redelegating the authority to waive directives and Section 8 conflict of interest prohibitions.

Pursuant to 24 CFR 0.735-104 and 0.735-106 and HUD's Supplemental Standards of Conduct regulation, only the General Counsel may waive violations of HUD's Standards of Conduct regulations, including conflict of interest provisions. The General Counsel may not redelegate the authority to issue waivers of the

Standards of Conduct for HUD employees. The Field Offices may not grant waivers for conflicts of interest for HUD employees under program contracts or 24 CFR 982.161. Therefore, this redelegation does not grant any authority to waive HUD's Standards of Conduct regulations, including waiving conflicts of interest for HUD employees.

For example, pursuant to 24 CFR 0.735-204(4), with certain exceptions, a HUD employee may not own a financial interest in any Section 8 subsidy provided to or on behalf of a tenant of property owned by the employee. If a HUD employee seeks a waiver to obtain or retain an interest in a Section 8 subsidy, the General Counsel must grant or deny the employee's request. The Field Offices do not have authority to grant or deny the request.

All Office Directors and Administrators to whom waiver authority for directives and/or conflicts of interest prohibitions are hereby redelegated are cautioned against the development of local requirements, processes, or procedures to replace those that are waived, which would counteract the intent of the established waiver process or the intent of any HUD regulation.

Accordingly, the Assistant Secretary for Public and Indian Housing redelegates as follows:

*Section A. Authority to waive directives*

(1) The Assistant Secretary for Public and Indian Housing redelegates to HUD State and Area Office Directors of the Offices of Public Housing and to the Administrators of the Field Offices of Native American Programs (waiver officials) the authority to waive Office of Public and Indian Housing directives for Public Housing, Indian Housing and Section 8 programs.

(2) Paragraph (1) does not grant authority to waive:

- a. Any statutory or regulatory provision.
- b. Program contracts and other forms required by HUD Headquarters.
- c. A directive that requires a HUD Office action;
- d. Requirements to maintain complete and accurate accounts and other records for a program in accordance with HUD requirements and in the form required by HUD.
- e. Reporting requirements.
- f. Provisions in a Notice of Funding Availability and associated processing instructions;
- g. Any actual or potential conflict of interest on the part of a HUD employee.

*Section B. Authority to Waive Prohibitions on Conflicts of Interest*

(1) The Assistant Secretary for Public and Indian Housing redelegates to HUD State and Area Office Directors of the Offices of Public Housing and to the Administrators of the Offices of Native American Programs (waiver officials) the following authority to waive conflict of interest prohibitions in contracts executed under the Section 8 Rental Certificate and Rental Voucher Programs and the Section 8 Moderate Rehabilitation Program:

(a) In the case of the Section 8 Rental Certificate and Rental Voucher Programs, the authority to waive the conflict of interest prohibition for good cause in accordance with section 982.161, including the authority to waive related contractual conflict of interest prohibitions for non-HUD employees.

(b) In the case of the Section 8 Moderate Rehabilitation Program the authority to waive contractual conflict of interest prohibitions for non-HUD employees.

(2) Paragraph (1) does not grant authority to waive;

a. Any statutory or regulatory provision.

b. Program contracts and other forms required by HUD Headquarters.

c. A directive that requires a HUD Office action;

d. Requirements to maintain complete and accurate accounts and other records for a program in accordance with HUD requirements and in the form required by HUD.

e. Reporting requirements.

f. Provisions in a Notice of Funding Availability and associated processing instructions;

g. Any actual or potential conflict of interest on the part of a HUD employee.

*C. Procedures for Approval of a Waiver of a Directive or a Section 8 Conflict of Interest Prohibition*

1. Before approval of a request for a waiver of a directive or a conflict of interest prohibition, the waiver official must consult with and obtain the concurrence of the HUD counsel in the HUD Field Office.

2. HUD Offices shall advise public housing agencies and Indian Housing Authorities (housing agencies) to submit the following documentation when requesting a waiver of a conflict of interest prohibition for Section 8 Rental Certificate and Rental Voucher Programs or the Section 8 Moderate Rehabilitation Program:

a. A complete statement of facts in the case.

b. Justification for the waiver of the conflict of interest prohibition.

If the case involves a hardship for a particular family, a statement of facts of the case, including: (a) circumstances of hardship, and (b) alternative housing available under the same or other forms of assisted housing. A "hardship" case includes a case where an eligible in-place family is handicapped, elderly or includes many minors, and moving would be a burden or very difficult because of a shortage of available units meeting housing quality standards.

If the case involves a public official, member of a governing body, State or local legislator, or any member of the Congress of the United States, an explanation of the individual's duties under Federal, State or local law, including reference to any responsibilities that involve the Section 8 program to which the requested waiver relates. Where relevant, the interrelationship of city, county, State and Federal governments should be discussed.

If the case involves an employee or a tenant of the housing agency, there should be an explanation of the responsibilities and duties of the job involved. (An employee would be permitted to receive Section 8 assistance or participate as a Section 8 owner, if the employee is not serving in a capacity which would influence housing agency decision or formulate policy with respect to the Section 8 program. Also, Section 8 tenants may be employed by the housing agency in such nonpolicy and nondecisionmaking positions.) The explanation must describe whether the employee formulates policy or influences decisions with respect to the program. (A PHA employee who is not serving in a capacity to influence housing agency decisions or formulate policy with respect to the Section 8 program may receive assistance or participate as a Section 8 owner.)

If the case involves an investment on the part of an officer or employee of the PHA, or any other non-HUD employee covered by the conflict of interest provisions, the nature of the investment should be described, and any divesture plans specified.

c. Written evidence that the waiver, if granted, would be consistent with State law and local ordinances. Where appropriate, a legal opinion should be obtained from the State Attorney General or housing agency attorney.

d. In cases where a waiver is approved to permit an individual to occupy a specific unit, the waiver should terminate when that tenant vacates the unit. In addition, no person

for whom a waiver is approved shall be given any preferential treatment, nor shall any such person be permitted to exercise functions or responsibilities with respect to a contract to which that person is a party or recipient of a benefit resulting from the contract.

3. HUD Office processing of requests for waiver directives or conflict of interest prohibitions shall be guided by the following:

a. A waiver shall be granted only on a case-by-case basis. For each request, there must be a showing or other evidence of "good cause" which demonstrates that the major interest of providing low income housing overrides the purpose of the directive or conflict of interest prohibitions. The HUD Office shall permanently maintain a fully documented separate file for each waiver.

b. The Field Office must inform the housing authority in writing of its decision regarding the waiver request, and of the basis for the HUD Office determination. Within 30 calendar days after issuance of the waiver, waiver officials must submit a copy of each determination granting a waiver to the Departmental Directives Management Office, Office of Administrative and Management Services-ACES, Office of Administration. A copy should be provided to the Office of Public and Indian Housing, Attention: Directives Management Officer. Copies of waivers of conflicts of interest do not require submission to Headquarters.

c. The Field Office letter approving the waiver must cite the specific directive or conflicts prohibition being waived, the specific conduct being permitted, the time period the waiver shall be in effect (if not indefinitely), as well as the reason(s) for granting the waiver. This is because HUD maintains a record of all such waivers and makes them available for public inspection. The Office of Public and Indian Housing will periodically review all waivers of directives to assess such matters as (a) Whether a particular directive, or provision should be revised (because for example, the exception should become the rule), and (b) whether there is consistency in the granting of waiver requests.

*Section D. No Further Redelelegation*

The authority granted to waiver officials under this redelegation may not be further redelegated pursuant to this redelegation.

*Section E. Authority Superseded*

The portions of the following delegations of authority relating to Directives and conflict of interest

prohibitions described above are superseded; 36 F.R. 5004 (March 16, 1971), 36 FR 5005 (March 16, 1971), 38 FR 8011 (March 27, 1973), 41 FR 24755 (June 18, 1976), 45 FR 54143 August 14, 1980, 59 FR 8266 (February 18, 1994).

Authority: Section 7(d), Department of Housing and Urban Development Act [42 U.S.C. 3535(d)], and Section 7(q), Department of Housing and Urban Development Act (42 U.S.C. 3535(q)).

Dated: September 21, 1995.

Joseph Shuldiner,

*Assistant Secretary for Public and Indian Housing and Urban Development.*

BILLING CODE 4210-33-M

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

[OR-094-05-6310-04: G5-223]

#### Emergency Closure of Public Lands; Douglas County, OR

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Emergency closure of public lands and access roads in Douglas County, OR.

**SUMMARY:** Notice is hereby given that certain public lands and access roads in Douglas County, Oregon are temporarily closed to all public use, including vehicle operation, camping, shooting, hiking and sightseeing, from September 26, 1995 through May 31, 1996. The closure is made under the authority of 43 CFR 8364.1.

The public lands affected by this emergency closure are specifically identified as follows:

Willamette Meridian, Oregon

T. 19 S., R. 8 W.

Sec. 7: All that portion of Section 7 lying North and West of Dunn Ridge Road (BLM Road No. 18-8-28.1) and lying North and East of BLM Road. No. 19-8-7

All roads on the public lands listed above are closed as specified above, including specifically BLM Roads Nos. 19-8-7.2, 19-8-7.3 and 19-8-7.4.

The following persons, operating within the scope of their official duties, are exempt from the provisions of this closure order: Bureau employees; state, local and federal law enforcement and fire protection personnel; the holders of BLM road use permits that include roads within the closure area; the purchaser of BLM timber within the closure area and its employees and subcontractors. Access by additional

parties may be allowed, but must be approved in advance in writing by the Authorized Officer.

Any person who fails to comply with the provisions of this closure order may be subject to the penalties provided in 43 CFR 8360.0-7, which include a fine not to exceed \$1,000 and/or imprisonment not to exceed 12 months.

The public lands and roads temporarily closed to public use under this order will be posted with signs at points of public access.

The purpose of this emergency temporary closure is to protect persons from potential harm from logging operations, protect valuable public timber resources from unauthorized damage, and to facilitate authorized timber harvest operations.

**DATES:** This closure is effective from September 26, 1995 through May 31, 1996.

**ADDRESSES:** Copies of the closure order and maps showing the location of the closed lands and roads are available from the Eugene District Office, P.O. Box 10226 (2890 Chad Drive), Eugene, Oregon 97440.

**FOR FURTHER INFORMATION CONTACT:** Terry Hueth, Coast Range Area Manager, Eugene District Office, at (503) 683-6600.

Dated: September 25, 1995.

Terry Hueth,

*Coast Range Area Manager.*

[NM-932-4120-05; OKNM 93019]

#### Invitation to Participate; Exploration for Coal in Oklahoma

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice.

**SUMMARY:** Members of the public are hereby invited to participate with Farrell-Cooper Mining Company on a pro rata cost sharing basis, in a program for the exploration of coal deposits owned by the United States of America. The lands are located in LeFlore County, Oklahoma, and are described as follows:

Indian Meridian

T. 8 N., R. 26 E., LeFlore Co., OK

Sec. 12, S<sup>1</sup>/<sub>2</sub>S<sup>1</sup>/<sub>2</sub>;

Sec. 13, N<sup>1</sup>/<sub>2</sub>;

Sec. 14, NE<sup>1</sup>/<sub>4</sub>, S<sup>1</sup>/<sub>2</sub>NW<sup>1</sup>/<sub>4</sub>, N<sup>1</sup>/<sub>2</sub>SW<sup>1</sup>/<sub>4</sub>;

Sec. 15, N<sup>1</sup>/<sub>2</sub>SE<sup>1</sup>/<sub>4</sub> and SW<sup>1</sup>/<sub>4</sub>SE<sup>1</sup>/<sub>4</sub>;

Sec. 21, N<sup>1</sup>/<sub>2</sub>NE<sup>1</sup>/<sub>4</sub>;

Sec. 22, NW<sup>1</sup>/<sub>4</sub>NW<sup>1</sup>/<sub>4</sub>;

T. 8 N., R. 27 E.,

Sec. 7, S<sup>1</sup>/<sub>2</sub>NE<sup>1</sup>/<sub>4</sub>SW<sup>1</sup>/<sub>4</sub>, S<sup>1</sup>/<sub>2</sub>SW<sup>1</sup>/<sub>4</sub>, and SE<sup>1</sup>/<sub>4</sub>;

Sec. 8, SW<sup>1</sup>/<sub>4</sub> and N<sup>1</sup>/<sub>2</sub>N<sup>1</sup>/<sub>2</sub>SE<sup>1</sup>/<sub>4</sub>;

Sec. 9, S<sup>1</sup>/<sub>2</sub>N<sup>1</sup>/<sub>2</sub> and N<sup>1</sup>/<sub>2</sub>N<sup>1</sup>/<sub>2</sub>S<sup>1</sup>/<sub>2</sub>;

Sec. 10, SW<sup>1</sup>/<sub>4</sub>NW<sup>1</sup>/<sub>4</sub> and NW<sup>1</sup>/<sub>4</sub>SW<sup>1</sup>/<sub>4</sub>;

Aggregating 1,820.00 acres, more or less.

Interested parties may obtain a complete description of the lands covered in the license application by contacting Farrell-Cooper Mining Company, P.O. Box 11050, Ft. Smith, Arkansas 72917-1050, or the Bureau of Land Management New Mexico State Office, Land and Mineral Support Team, Solid Minerals Adjudication, P.O. Box 27115, Santa Fe, New Mexico 87502-0115.

Any parties electing to participate in this exploration program shall notify in writing, both the State Director, Bureau of Land Management, New Mexico State Office, P.O. Box 27115, Santa Fe, New Mexico 87202-0115, and Farrell-Cooper Mining Company, P.O. Box 11050, Ft. Smith, Arkansas 72917-1050. Such written notice must include a justification for wanting to participate and any recommended changes in the exploration plan with specific reasons for such changes. The notice must be received no later than 30-calendar days after the publication of this notice in Federal Register.

This proposed exploration program is for the purpose of determining the quality and quantity of the coal in the area and will be conducted pursuant to an exploration plan to be approved by the Bureau of Land Management.

A copy of the exploration plan as submitted by Farrell-Cooper Mining Company may be examined at the Bureau of Land Management, New Mexico State office, 1474 Rodeo Road, Santa Fe, New Mexico 87502, the Bureau of Land Management, Tulsa District Office, 9522-E 47th Place, Tulsa, Oklahoma 74145-7223, or the Bureau of Land Management, Oklahoma Resource Area Office, 221 N. Service Road, Moore, Oklahoma 73160-4946.

Dated: September 18, 1995.

Gilbert J. Lucero,

*Acting State Director.*

#### Sierra Front/Northwestern Great Basin Resource Advisory Council; Meeting

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of meeting of the Sierra Front/Northwestern Great Basin Resource Advisory Council.

**SUMMARY:** The Sierra Front/Northwestern Great Basin Resource Advisory Council will conduct a field

orientation session on October 16, 1995. Council members will meet at 8 a.m. at the Bureau of Land Management's Nevada State Office, located at 850 Harvard Way, Reno, Nevada. The session is open to the public. Any public attendees must provide their own transportation and meals. The primary topic of the session will be how to determine the functionality of uplands and riparian zones. Members of the public wishing to take part in the session should notify the Carson City District Office no later than October 13, 1995.

**FOR FURTHER INFORMATION CONTACT:** Cub Wolfe, Carson City District, Bureau of Land Management, 1535 Hot Springs Road, Carson City, Nevada 89706, phone (702) 885-6100.

Dated this 25th day of September, 1995.

**Notice of Realty Action: Corrected lease/conveyance notice for Recreation and Public Purposes, N-59066**

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Corrected Recreation and Public Purpose Lease/conveyance notice.

**SUMMARY:** The notice of realty action published February 27, 1995, page 10608, identifies public lands requested by Clark County, Nevada. This notice is corrected as follows:

a. Under Summary, 18th line down, "38 34" should read "38.34".

b. Under Summary, 9th paragraph, 17th line, remove "P.O. Box 26569".

c. Under Summary, 9th paragraph, 18th line, "89126" should read "89108".

d. Under Classification Comments, 3rd line, last word "church" should read "maintenance operations".

e. Under Application Comments, 9th line, "church" should read "maintenance operations".

No additional comment period is required. Detailed information concerning this action is available for review at the office of the Bureau of Land Management, Las Vegas District, 4765 W. Vegas Drive, Las Vegas, Nevada.

Dated: September 15, 1995.

**Notice of Availability and Notice of Realty Action**

**AGENCY:** Bureau of Land Management, Interior.

**SUMMARY:** Notice is hereby given that an environmental assessment and proposed plan amendment for the Cedar, Beaver, Garfield, Antimony Resource Management Plan have been completed. Pursuant to this environmental assessment and proposed plan amendment, 20 acres of public land have been found suitable for direct sale, under the authority of section 203 of the Federal Land Policy and Management Act of 1976, to Sheldon J. and Rita F. Jessup at the appraised fair market value of \$6,500. This land is located at Salt Lake Meridian, T. 29 S., R. 8 W., sec. 20, W $\frac{1}{2}$ W $\frac{1}{2}$ SW $\frac{1}{4}$ SE $\frac{1}{4}$  and sec. 29, W $\frac{1}{2}$ W $\frac{1}{2}$ NW $\frac{1}{4}$ NE $\frac{1}{4}$ , Beaver County, Utah. The land will not be offered for sale until at least 60 days after the date of this notice and is contingent upon the signing of a decision record approving the proposed amendment.

**DATES:** The proposed plan amendment may be protected. The protest period will commence with the date of publication of this notice. Protests must be submitted on or before October 30, 1995. Also for a period of 45 days from September 29, 1995, interested parties may submit comments on the proposed land sale to the District Manager, Cedar City District, at the address below.

**ADDRESSES:** Protests to the proposed plan amendment should be addressed to the Director (480), Bureau of Land Management, Resource Planning Team, Box 10, 1620 L Street, N.W., Washington, DC 20036, within 30 days after the date of publication of this Notice for the proposed planning amendment. All comments concerning this proposed sale should be addressed to A.J. Meredith, District Manager, Cedar City District, 176 East DL Sargent Drive, Cedar City, UT 84720.

**FOR FURTHER INFORMATION CONTACT:** Arthur L. Tait at 176 East DL Sargent Drive, Cedar City, UT 84720, telephone (801) 865-3080.

**SUPPLEMENTARY INFORMATION:** The lands described are hereby segregated from all forms of appropriation under the public land laws, including the mining laws, pending disposition of this action or 270 days from September 29, 1995, whichever occurs first. Only the surface estate will be sold. The patent, when issued, will contain a reservation for all minerals to the United States, together with the right to prospect for, mine and remove the minerals. There will also be

reserved to the United States, a right-of-way for ditches or canals constructed by the authority of the United States. In the absence of timely objections, this proposal shall become the final determination of the Department of the Interior.

In the absence of a formal protest to the Director, or timely objections to the District Manager, the proposed plan amendment shall become the final determination of the State Director.

Dated: September 20, 1995.  
G. William Lamb,  
*Acting State Director.*

BILLING CODE 4310-DQ-P

**Bureau of Reclamation**

**Quarterly Status Report of Water Service and Repayment Contract Negotiations**

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice.

**SUMMARY:** Notice is hereby given of proposed contractual actions that are new, modified, discontinued, or completed since the last publication of this notice on May 22, 1995. The February 1, 1995, notice should be used as a reference point to identify changes. The number in parenthesis corresponds to the number in the February 1, 1995, notice. This notice is one means in which the public is informed about contractual actions for capital recovery and management of project resources and facilities. Additional Bureau of Reclamation (Reclamation) announcements of individual contract actions may be published in the Federal Register and in newspapers of general circulation in the areas determined by Reclamation to be affected by the proposed action. Announcements may be in the form of news releases, legal notices, official letters, memorandums, or other forms of written material. Meetings, workshops, and/or hearings may also be used, as appropriate, to provide local publicity. The public participation procedures do not apply to proposed contracts for sale of surplus or interim irrigation water for a term of 1 year or less. Either of the contracting parties may invite the public to observe any contract proceedings. All public participation procedures will be coordinated with those involved in complying with the National Environmental Policy Act.

**ADDRESSES:** The identity of the approving officer and other information pertaining to a specific contract

proposal may be obtained by calling or writing the appropriate regional office at the address and telephone number given for each region in the supplementary information.

**FOR FURTHER INFORMATION CONTACT:**

Alonzo Knapp, Manager, Reclamation Law, Contracts, and Repayment Office, Bureau of Reclamation, P.O. Box 25007, Denver, Colorado 80225-0007; telephone 303-236-1061 extension 224.

**SUPPLEMENTARY INFORMATION:** Pursuant to section 226 of the Reclamation Reform Act of 1982 (96 Stat. 1273) and 43 CFR 426.20 of the rules and regulations published in 52 FR 11954, Apr. 13, 1987, Reclamation will publish notice of proposed or amendatory contract actions for any contract for the delivery of project water for authorized uses in newspapers of general circulation in the affected area at least 60 days prior to contract execution. Pursuant to the "Final Revised Public Participation Procedures" for water resource-related contract negotiations, published in 47 FR 7763, Feb. 22, 1982, a tabulation is provided of all proposed contractual actions in each of the five Reclamation regions. Each proposed action is, or is expected to be, in some stage of the contract negotiation process in 1995. When contract negotiations are completed, and prior to execution, each proposed contract form must be approved by the Secretary of the Interior or, pursuant to delegated or redelegated authority, the Commissioner of Reclamation or one of the regional directors. In some instances, congressional review and approval of a report, water rate, or other terms and conditions of the contract may be involved.

Public participation in and receipt of comments on contract proposals will be facilitated by adherence to the following procedures:

1. Only persons authorized to act on behalf of the contracting entities may negotiate the terms and conditions of a specific contract proposal.

2. Advance notice of meetings or hearings will be furnished to those parties that have made a timely written request for such notice to the appropriate regional or area office of Reclamation.

3. Written correspondence regarding proposed contracts may be made available to the general public pursuant to the terms and procedures of the Freedom of Information Act (80 Stat. 383), as amended.

4. Written comments on a proposed contract or contract action must be submitted to the appropriate regional officials at the locations and within the

time limits set forth in the advance public notices.

5. All written comments received and testimony presented at any public hearings will be reviewed and summarized by the appropriate regional office for use by the contract approving authority.

6. Copies of specific proposed contracts may be obtained from the appropriate regional director or his designated public contact as they become available for review and comment.

7. In the event modifications are made in the form of a proposed contract, the appropriate regional director shall determine whether republication of the notice and/or extension of the comment period is necessary.

Factors considered in making such a determination shall include, but are not limited to: (i) The significance of the modification, and (ii) the degree of public interest which has been expressed over the course of the negotiations. As a minimum, the regional director shall furnish revised contracts to all parties who request the contract in response to the initial public notice.

**Acronym Definitions Used Herein**

(BCP) Boulder Canyon Project  
 (CAP) Central Arizona Project  
 (CUP) Central Utah Project  
 (CVP) Central Valley Project  
 (CRSP) Colorado River Storage Project  
 (D&MC) Drainage and Minor Construction  
 (FR) Federal Register  
 (IDD) Irrigation and Drainage District  
 (ID) Irrigation District  
 (M&I) Municipal and Industrial  
 (O&M) Operation and Maintenance

 (R&B) Rehabilitation and Betterment  
 (SRPA) Small Reclamation Projects Act  
 (WCUA) Water Conservation and Utilization Act  
 (WD) Water District

The following contract actions are either new, modified, discontinued, or completed in the Bureau of Reclamation since the February 1, 1995, Federal Register notice.

**Pacific Northwest Region:** Bureau of Reclamation, 1150 North Curtis Road, Boise, Idaho 83706-1234, telephone 208-378-5346.

**1. New Contract Actions:**

(21) Fremont-Madison Irrigation District, Minidoka Project, Idaho-Wyoming: Supplemental and amendatory contract providing for the transfer of operation and maintenance for the remaining reserved works of the

Upper Snake Storage Division (including Cascade Creek Diversion Dam, Grassy Lake Dam and Reservoir, and Island Park Dam and Reservoir).

(22) North Unit Irrigation District, Deschutes Project, Oregon: Warren Act contract with cost of service charge to allow for use of project facilities to convey nonproject water.

**2. Contract Actions Completed:**

(18) Part Completed: Temporary water service contracts executed with Hermiston, Stanfield, and Westland Irrigation Districts to provide water service for 1995 to lands outside their boundaries.

**Mid-Pacific Region:** Bureau of Reclamation, 2800 Cottage Way, Sacramento, California 95825-1898, telephone 916-978-5030.

**1. New Contract Actions:**

(24) City of Folsom, CVP, California: Amendment of existing water rights conveyance contract to allow for delivery of an additional 5,000 acre-feet of water from Folsom Reservoir that has been acquired from the Southern California Water Company.

(25) Napa County Flood Control and Water Conservation District, Solano Project, California: Amend water service contract to decrease quantity.

(26) City of Roseville, CVP, California: Execution of a long-term Warren Act contract for conveyance of nonproject water provided from the Placer County Water Agency. This contract will allow CVP facilities to be used to deliver nonproject water to the City of Roseville for use within their service area.

(27) Sacramento Municipal Utility District, CVP, California: Amendment of existing water service contract to allow for additional points of diversion, and assignment of up to 15,000 acre-feet of project water to the Sacramento County Water Agency. The amended contract will conform to current Reclamation law.

**2. Contract Actions Modified:**

(21) San Juan Water District, CVP, California: Execute Warren Act contract to replace expiring long-term wheeling contract with San Juan WD and the Placer County Water Agency allowing the Agency to use CVP facilities to deliver its water to the District for use on District land within Placer County.

**3. Contract Actions Completed:**

(12) Central Coast Water Authority, Cachuma Project, California: Long-term Warren Act contract for use of Cachuma Project facilities when excess capacity exists. Approximately 13,750 acre-feet of water per year from the California State Water Project will be made available under a Warren Act contract to users along the South Coast of

California. ACTION: Contract executed July 25, 1995.

(17) Monterey County Water Resources Agency, Castroville Irrigation Water Supply Project, SRPA, California: Loan repayment contract in the amount of \$32,600,000 to construct an irrigation distribution system to convey reclaimed water for agricultural purposes and to reduce seawater intrusion in the groundwater aquifers. ACTION: Contract executed May 26, 1995.

(18) Monterey Regional Water Pollution Control Agency, Water Reclamation Facility for Crop Irrigation Project, SRPA, California: Loan repayment contract in the amount of \$20,544,400 to reduce seawater intrusion in the groundwater aquifers. ACTION: Contract executed June 2, 1995.

(19) Santa Barbara County Water Agency, Cachuma Project, California: Renewal of existing long-term water service contract which expires May 14, 1995; water quantity in existing contract 32,000 acre-feet. ACTION: Interim renewal contract executed April 25, 1995.

Lower Colorado Region: Bureau of Reclamation, P.O. Box 61470 (Nevada Highway and Park Street), Boulder City, Nevada 89006-1470, telephone 702-293-8536.

#### 1. New Contract Actions:

(41) Department of the Navy, Niland, CA. Contract for delivery of up to 23 acre-feet per year of California surplus water for domestic use.

(42) Windsor Beach State Park, Lake Havasu City, AZ. Contract for 130 acre-feet entitlement to Colorado River domestic water.

(43) Maricopa-Stanfield Irrigation & Drainage District, Stanfield, AZ. District has requested the United States to defer payments and restructure its \$78 million distribution system repayment obligation.

(44) McMicken ID/City of Surprise, AZ. Amend McMicken's CAP subcontract to reduce its entitlement by 4,500 acre-feet and execute a CAP water service subcontract with the City of Surprise for 4,500 acre-feet of CAP water.

(45) McMicken, ID/Avondale, AZ. Amend McMicken's CAP subcontract to reduce its entitlement by 647 acre-feet and amend Avondale's CAP water service subcontract to increase its entitlement by 647 acre-feet of CAP water.

(46) Kent Sea Farms, Yuma, AZ. Contract to divert and return 32,000 acre-feet of water per year from and to, respectively, the Main Outlet Drain Extension for one or more fish farms.

(47) New Magma Irrigation and Drainage District, Phoenix, AZ, Central Arizona Project. Amend and Supplement distribution system repayment Contract No. 4-07-30-W0049 to reschedule repayment terms pursuant to U.S. Bankruptcy Court, District of Arizona, Judgement No. B-94-00211-TUC-JMM, June 20, 1995.

(48) San Tan Irrigation District, Chandler Heights, AZ, CAP. Amend distribution system repayment Contract No. 6-07-30-W0120 to increase the repayment obligation approximately \$168,000.

(49) Chandler Heights Citrus Irrigation District, Chandler Heights, AZ, CAP. Amend distribution system repayment Contract No. 6-07-30-W0119 to increase the repayment obligation approximately \$114,000.

(50) Central Arizona Drainage and Irrigation District, Phoenix, AZ, CAP. Amend distribution system repayment Contract No. 4-07-30-W0048 to reschedule repayment terms pursuant to U.S. Bankruptcy Court, District of Arizona.

(51) Arizona Sierra Utility Company, Phoenix, Arizona, CAP. Assignment to the Town of Florence of 407 acre-feet of CAP municipal and industrial water allocation under subcontract from Central Arizona Water Conservation District.

(52) San Diego County Water Authority, San Diego, California, San Diego Project: Title transfer to the Second Barrel, San Diego Aqueduct composed of over 70 miles of pipeline 4.5 to 8 feet in diameter and related facilities and rights of way.

(53) W.F. West, Winslow, Arizona, Boulder Canyon Project: Miscellaneous Present Perfected Rights contract for 0.8774 acre-feet of domestic water.

(54) Julia Soto Zozaya and Steve M. Zozaya, Mohave County, Arizona, Boulder Canyon Project. Miscellaneous Present Perfected Rights contract for 720 acre-feet of irrigation water.

(55) Atchison, Topeka and Santa Fe Railway Company, BCP, California. The company intends to transfer its miscellaneous present perfected rights for the diversion of 1,260 acre-feet and consumptive use of 273 acre-feet of Colorado River water to the City of Needles.

(56) The Gas Company, BCP, California. Short-term water delivery contract for 125 acre-feet of surplus Colorado river water for domestic and industrial water use near the City of Needles, California.

#### 2. Contract Actions Discontinued:

(21) City of Yuma, BCP, AZ. Amendment to Contract No. 1-4-06-W-

106. ACTION: The City of Yuma declined to amend its contract.

#### 3. Contract Actions Completed:

(7) Ft. Yuma Indian Reservation (Quechan Indian Reservation), Yuma Project, AZ and CA. Surplus water contract to receive Colorado River water in the states of Arizona and California. The contract may include surplus and unused apportionment entitlements (51,616 acre-feet or 7.743 acres, whichever is less) and wheeling arrangements with Bard ID. ACTION: Completed by letter dated May 18, 1995.

(16) Elsinore Valley Municipal WD, Temescal Valley Project, SRPA, CA. ACTION: Contract executed.

(26) Santa Ana Watershed Project Authority, SRPA, CA. Chino Basin Desalination Program. ACTION: Contract executed.

(27) Gila River Indian Community/Gila River Farms, CAP, Arizona. Repayment/deferment/O&M contract for distribution system not to exceed \$4 million. Execution of this contract facilitates construction under Public Law 93-638 funding and work performance contract. ACTION: Contract executed.

Upper Colorado Region: Bureau of Reclamation, P.O. Box 11568 (125 South State Street), Salt Lake City, Utah 84147, telephone 801-524-5435.

#### 1. New Contract Actions:

(17) Salt Lake County Water Conservancy District and Central Utah Water Conservancy District, Central Utah Project, Utah. Contract to provide the Bureau of Reclamation with perpetual use of 7,900 acre-feet of water annually for storage in the Jordanelle Reservoir.

(18) Grand Valley Water Users Association, Orchard Mesa Irrigation District and Public Service Company of Colorado, Grand Valley Project, Colorado. Water service contract for the utilization of project water for cooling purposes for a steam electric generation plant.

(19) Public Service Company of New Mexico, Colorado River Storage Project, Navajo Unit, New Mexico. Amendatory water service contract for diversion of 20,200 acre-feet, not to exceed a depletion of 16,200 acre-feet of project water for cooling purposes for a steam electric generation plant.

(20) Provo Reservoir Water Users Company, Wasatch Irrigation Company, Timpanogas Irrigation Company, Exchange Irrigation Company, Washington Irrigation Company, and the City of Provo; Central Utah Project, Utah: Water exchange contracts, water rights in several mountain lakes and reservoirs are being exchanged for

equivalent contract water rights in Jordanelle Reservoir.

(21) Sanpete County Water Conservancy District, Narrows Project, Utah: Application for a Small Reclamation Project Act loan and grant to construct a dam, reservoir and pipeline to annually supply approximately 5,000 acre-feet of water through a transmountain diversion from upper Gooseberry Creek in the Price River drainage (Colorado River Basin) to the San Pitch—Sevier River (Great Basin).

(22) Dodds Ditch Water Users, Central Utah Project, Utah. Contracts for exchange of water rights and sale of project water; water rights in Ashley Creek for 30 acre-feet of project water from Steinaker Reservoir.

(23) Highland Conservation District, Provo River Project, Utah. Water transfer agreement between the District and Highland City involving change of use from irrigation to municipal and industrial.

Great Plains Region: Bureau of Reclamation, P.O. Box 36900, Federal Building, 316 North 26th Street, Billings, Montana 59107-6900, telephone 406-657-6413.

1. New Contract Actions:

(27) Enders Dam, Frenchman-Cambridge Division, Frenchman Unit, Nebraska: Repayment contract for proposed Safety of Dams modifications to Enders Dam for repair of seeping drainage features. Estimated cost of the repairs is \$632,000.

(28) Belle Fourche Irrigation District, Belle Fourche Unit, P-SMBP, South Dakota: D&MC contract for rehabilitation work on water control structures, lining additional canals, and rehabilitation of bridges and laterals. Public Law 103-434, enacted October 31, 1994, authorized an additional \$10.5 million in Federal funds and \$4 million in non-Federal cost share for completion of the minor construction.

1. Contract Actions Discontinued:

(9) Chinook Water Users Association, Milk River Project, Montana: SRPA contract for loan of up to \$6,000,000 for improvements to the Association's water conveyance system.

(14) Hidalgo County Irrigation District No. 6, Texas: SRPA contract for a 20-year loan for up to \$5,712,900 to rehabilitate the District's irrigation facilities pending appropriation of funds.

(16) Thirty Mile Canal Company, Nebraska: SRPA contract for a loan of \$2,264,000 to reline the main canal, replace open laterals with buried pipe, and replace bridges pending appropriation of funds.

2. Contract Actions Modified:

(12) Canadian River Municipal Water Authority, Canadian River Project, Texas: Determination of no authority for credit for transferred lands.

(13) Lakeview Irrigation District, Shoshone Project, Wyoming: New long-term water service contract for up to 3,200 acre-feet of firm water supply annually and up to 11,800 acre-feet of interim water from Buffalo Bill Reservoir. Pursuant to Section 9(e) of the Reclamation Project Act of 1939 (Public Law 260).

(17) Belle Fourche Irrigation District, Belle Fourche Unit, P-SMBP, South Dakota. Amendment to Contract No. 5-07-60-WR170. The amendment will initiate the repayment period for the rehabilitation and betterment work to begin June 30, 1996. The Amendment will also provide an additional \$10.5 million for additional rehabilitation and betterment work.

(18) North Platte Project, Kendrick Project, and Glendo Project, P-SMBP, Wyoming and Nebraska contractors: Repayment contracts under the Safety of Dams Project for the modification of Pathfinder, Lake Alice, Seminoe, and Glendo Dams.

(21) Mountain Park Master Conservancy District, Mountain Park Project, Oklahoma: Pursuant to Title IV of Public Law 103-434, amend the District's contract to reallocate the project costs to reflect the environmental activities authorized by Title IV and provide for a discounted prepayment of all or a portion of the reimbursable costs allocated for its M&I water supply.

(25) Angostura Irrigation District, Angostura Unit, P-SMBP: The District's current contract for water services expired on January 1, 1995. The current contract also provided for the District to operate and maintain the dam and reservoir. The proposed contract would provide a continued water supply for the District and the District's continued operation and maintenance of the facility.

(26) West River Conservancy Sub-District, Shadehill Unit, P-SMBP, South Dakota: Water service contract expired June 10, 1995. The proposed contract would provide irrigation water to the District pursuant to terms acceptable to both the United States and the District.

Dated: September 25, 1995.

Wayne O. Deason,

*Assistant Director, Program Analysis.*

BILLING CODE 4310-94-P

### Bay-Delta Advisory Council Meeting

**AGENCY:** Bureau of Reclamation, Interior.

**ACTION:** Notice of meeting.

**SUMMARY:** The Bay-Delta Advisory Council (BDAC) will meet to discuss several issues including: review of the CALFED Bay-Delta Program's problem definition, objectives, mission and geographic scope; discussion of causes and actions related to the problems in the Delta; and other program components. The meeting is open to the public. Interested persons may make oral statements to the BDAC or may file written statements for consideration.

**DATES:** The Bay-Delta Advisory Council will meet from 10:00 am to 4:00 pm on Wednesday, October 18, 1995.

**ADDRESSES:** The Bay-Delta Advisory Council will meet at the Holiday Inn Oakland/San Francisco Bay Bridge, 1800 Powell Street, Emeryville, CA 94608.

**FOR FURTHER INFORMATION CONTACT:** Sharon Gross, CALFED Bay-Delta Program, at (916) 657-2666.

**SUPPLEMENTARY INFORMATION:** The San Francisco Bay/Sacramento-San Joaquin Delta Estuary is a critically important part of California's natural environment and economy. In recognition of the serious problems facing the region and the complex resource management decisions that must be made, the State of California and the Federal government are working together to stabilize, protect, restore, and enhance the Bay-Delta Estuary. The State and Federal agencies with management and regulatory responsibilities in the Bay-Delta Estuary are working together as CALFED to provide policy direction and oversight for the process.

One area of Bay-Delta management includes the establishment of a joint State-Federal process to develop long-term solutions to problems in the Bay-Delta Estuary related to fish and wildlife, water supply reliability, natural disasters, and water quality. The intent is to develop a comprehensive and balanced plan which addresses all of the resource problems. This effort will be carried out under the policy direction of CALFED. A group of citizen advisors representing California's agricultural, environmental, urban, business, fishing, and other interests who have a stake in finding long term solutions for the problems affecting the Bay-Delta Estuary has been chartered under the Federal Advisory Committee Act (FACA) as the Bay-Delta Advisory Council (BDAC) to advise CALFED on the program mission, problems to be

addressed, and objectives for the CALFED Bay-Delta Program. BDAC will also provide a forum to help ensure public participation, and will review reports and other materials prepared by CALFED staff.

Minutes of the meeting will be maintained by the CALFED Bay-Delta Program, Suite 1155, 1416 Ninth Street, Sacramento, CA 95814, and will be available for public inspection during regular business hours, Monday through Friday within 30 days following the meeting.

Dated: September 22, 1995.

Roger Patterson,

Regional Director, Mid-Pacific Region.

BILLING CODE 4310-94-M

## Fish and Wildlife Service

### Availability of Draft Recovery Plan for the Koolau Mountain Plant Cluster for Review and Comment

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of document availability.

**SUMMARY:** The U.S. Fish and Wildlife Service (Service) announces the availability for public review of the Technical/Agency Draft Recovery Plan for the Koolau Mountain Plant Cluster. There are 11 taxa of plants included in this plan. All 11 taxa are known to be extant on the island of Oahu, Hawaii; one species also is found on the islands of Molokai and Maui, Hawaii.

**DATES:** Comments on the draft recovery plan must be received on or before November 28, 1995.

**ADDRESSES:** Copies of the draft recovery plan are available for inspection, by appointment, during normal business hours at the following locations: U.S. Fish and Wildlife Service, Pacific Islands Office, 300 Ala Moana Boulevard, room 6307, P.O. Box 50167, Honolulu, Hawaii 96850 (phone 808/541-2749); U.S. Fish and Wildlife Service, Regional Office, Ecological Services, 911 N.E. 11th Ave., Eastside Federal Complex, Portland Oregon 97232-4181 (phone 503/231-6131); the Molokai Public Library, 15 Ala Malama Street, Kaunakakai, Hawaii 96748 (phone 808/553-5483); and, the Wailuku Public Library, 251 High Street, Wailuku, Maui (phone 808/244-3945). Requests for copies of the draft recovery plan and written comments and materials regarding this plan should be addressed to Brooks Harper, Field Supervisor, Ecological Services, at the above Honolulu address.

**FOR FURTHER INFORMATION CONTACT:** Scott M. Johnston, Fish and Wildlife Biologist, at the above Honolulu address.

### SUPPLEMENTARY INFORMATION:

#### Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act, as amended (16 U.S.C. 1531 *et seq.*) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act as amended in 1988 requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during the public comment period prior to approval of each new or revised Recovery Plan. Substantive technical comments will result in changes to the plans. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plan implementation may not necessarily result in changes to the recovery plans, but will be forwarded to appropriate Federal or other entities so that they can take these comments into account during the course of implementing recovery actions. Individualized responses to comments will not be provided.

The 11 taxa being considered in this recovery plan are: *Chamaesyce deppeana* ('akoko), *Cyanea crispa* (no common name (NCN)), *Cyanea truncata* (haha), *Cyrtandra crenata* (ha'iwale), *Cyrtandra polyantha* (ha'iwale), *Eugenia koolauensis* (nioi), *Hesperomannia arborescens* (NCN), *Lobelia oahuensis* (NCN), *Melicope lydgatei* (alani), *Phlegmariurus nutans* (wawae'iole), *Tetraplasandra gymnocarpa* ('ohe'ohe).

All 11 species covered in this plan are listed as endangered. Ten of the 11 taxa are known to be extant only on the island of Oahu, Hawaii; one species, *Hesperomannia arborescens*, also is found on the islands of Molokai and

Maui. The 11 plant taxa and their habitats have been variously affected and are threatened by one or more of the following: Habitat degradation and/or predation by feral ungulates (goats, pigs, sheep, and cattle); competition for space, light, water, and nutrients by naturalized, alien vegetation; habitat loss from fires; predation by rats; human recreational activities; and military training exercises. Because of the depauperate number of extant individuals and their severely restricted distributions, populations of these taxa are subject to an increased likelihood of extinction from stochastic events.

All 11 of these taxa are known from the Koolau Mountains on the eastern portion of Oahu. The 11 taxa included in this plan grow in lowland and mesic forests, and in dry and wet moisture regimes.

The objective of this plan is to provide a framework for the recovery of these 11 taxa so that their protection by the Endangered Species Act (ESA) is no longer necessary. Immediate actions necessary for the prevention of extinction of these taxa include fencing for exclusion of ungulates, alien plant control, protection from fire, population and plant community monitoring and management, ex situ propagation, and augmentation of populations, as appropriate. Long-term activities necessary for the perpetuation of these taxa in their natural habitats additionally include public education, maintenance of fenced areas, long-term monitoring and management of populations and communities, and re-establishment of populations within the historic ranges of some taxa. Further research regarding current range, reproduction and reproductive status, pollinators, life history, limiting factors, habitat requirements, and minimum viable population sizes is needed to facilitate appropriate management decisions regarding the long-term perpetuation of each of these taxa.

#### Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of these plans.

Authority: The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 25, 1995.

Thomas J. Dwyer,

Acting Regional Director, U.S. Fish and Wildlife Service, Pacific Region.

BILLING CODE 4310–70–M

**National Preservation Technology and Training Board; Meeting****AGENCY:** National Park Service, Interior.**ACTION:** Notice of meeting of the National Preservation Technology and Training Board.

Notice is hereby given in accordance with the Federal Advisory Committee Act, 5 U.S.C. Appendix (1988), that the National Preservation Technology and Training Board will meet on November 7, 8 and 9, 1995, in Natchitoches, Louisiana.

The Board was established by Congress to provide leadership, policy

advice, and professional oversight to the National Center for Preservation Technology and Training, as required under the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470).

The Board will meet on the campus of Northwestern State University of Louisiana in the Board Room of the Louisiana School for Math, Science and the Arts at 715 College Street, Natchitoches, Louisiana. Matters to be discussed will include the five-year plan for the organization, staff program updates and the FY 96 grant awards.

Tuesday, November 7 and Wednesday, November 8 the meeting will start at 8:30 a.m. and end at 5:00 p.m. On Thursday the meeting will begin at 8:30 a.m. and end at noon. Meetings will be open to the public. However, facilities and space for accommodating members of the public are limited and persons will be accommodated on a first-come, first-served basis. Any member of the public may file a written statement concerning the matters to be discussed with Dr. Elizabeth A. Lyon, Chair, National Preservation Technology and Training Board, P.O.Box 1269, Flowery Branch, Georgia 30542.

Persons wishing more information concerning this meeting, or who wish to submit written statements, may do so by contacting Mr. E. Blaine Cliver, Chief, Preservation Assistance Division, P.O. Box 37127, Washington, DC 20013–7127, telephone: (202) 343–9573. Draft summary minutes of the meeting will be available for public inspection about eight weeks after the meeting at the office of the Preservation Assistance Division, Suite 200, 800 North Capitol Street, Washington, DC.

Dated: September 25, 1995.

E. Blaine Cliver,

Chief, Preservation Assistance Division, Designated Federal Official, National Park Service.

BILLING CODE 7035-01-P

**[Ex Parte No. MC-5 (Sub-No. 12)]**

**Procedural Change in Authority Revocation Process**

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Notice of Procedural Change.

**SUMMARY:** The purpose of this Notice is to announce changes, effective October 15, 1995, in the Commission's internal procedures for revocation of operating authority based upon noncompliance with the financial security provisions of 49 U.S.C. 10927 and 49 CFR 1043.

**DATES:** The revised internal procedures announced here will apply to insurance, surety bond and trust fund notices of cancellation filed on or after October 15, 1995. Comments must be filed by October 10, 1995.

**ADDRESSES:** Send comments (an original and 10 copies) referring to: Docket No. Ex Parte No. MC-5 (Sub-No. 12), Procedural Change in Authority Revocation Process, to the Office of the Secretary, Case Control Branch, Interstate Commerce Commission, 1201 Constitution Avenue, NW., Washington, DC 20423.

**FOR FURTHER INFORMATION CONTACT:** Dixie E. Horton, (202) 927-5520 or Patricia A. Burke, (202) 927-5520. [TDD for the hearing impaired: (202) 927-5721.]

**SUPPLEMENTARY INFORMATION:** The Interstate Commerce Act requires that motor carriers, brokers, and household goods freight forwarders must maintain insurance or other security in order to operate in interstate commerce. Under our current insurance and surety compliance program, as soon as we learn that a regulated entity's insurance is about to lapse, we initiate a license revocation proceeding. The revocation process, however, is not completed until 120 days after the date when the security is cancelled. We intend to shorten and simplify the revocation process in order to better protect the public and to make better use of scarce Commission resources without impinging on an authority holder's rights under the statute.

Under the Commission's current revocation process, when the Commission receives a 30-day advance notice of cancellation from an insurer about to cancel a carrier's or a household goods freight forwarder's

insurance, or a broker's surety bond or trust fund agreement, it immediately sends a letter to the carrier, forwarder or broker. The letter advises the authority holder of the cancellation date, and it indicates that any operations without insurance are unlawful and that revocation proceedings will begin in the event of failure to comply with insurance requirements. Unless the Commission receives acceptable evidence demonstrating that the authority holder's insurance or security has been renewed by the end of the 30-day advance notification period, the agency institutes a revocation proceeding (first decision). The first decision requires the holder either to show cause why its authority should not be revoked or to achieve compliance within 60 days. After 60 days, if the Commission has not received notification of insurance or broker security renewal, a second decision is issued, establishing a second 60-day compliance period (second decision). If the Commission has not received evidence of an acceptable insurance filing by the end of the second 60-day period, the authority stands revoked. A final notice (third decision) is then issued formally revoking the authority. If, however, compliance is achieved within either of the 60-day periods, a notice of discontinuance of the revocation proceeding is issued.

In our continuing efforts to ensure that our regulatory procedures are performed efficiently and effectively, we have concluded that the current procedure is too labor-intensive, and, because it is so time-consuming, it has the potential for putting the public at unnecessary risk. We do not have sufficient staff to issue 4 documents to complete what ought to be a ministerial process. Moreover, a carrier, broker, or household goods forwarder retains its license for 4 months after its security has lapsed; during that period of time, the public is at risk from uninsured carriers that may continue operating—albeit unlawfully—under color of their license. Shortening our revocation procedures will conserve scarce resources and better protect the public.

Under the revised procedures, upon receipt of the 30-day advance notice of cancellation filed by the insurer, the Commission will issue an initial order to the carrier, broker, or forwarder instituting a revocation proceeding. The order will note the cancellation date and will indicate that any operations without insurance are unlawful. This order will also direct the authority holder either to obtain replacement coverage or to show good cause within 30 days of the service date of the order

why its authority should not be revoked. The order will further provide that failure to respond or comply within 30 days of the service date of the order shall result in revocation of its operating rights. In the event that acceptable evidence of insurance is not filed within the 30-day period, or that the authority holder has not shown cause why its authority should not be revoked, a final order will be issued notifying the holder that its operating authority has been revoked.

If the holder achieves compliance within the 30-day period, a notice discontinuing the revocation proceeding will be issued. Pending receipt of the notice, the authority holder will have various options to verify its renewed compliance prior to notification of the discontinuance. It could confirm that we have received acceptable filings by contacting its own insurance company/agent or the Commission's Regional offices, or by accessing the Commission's Automated Response Capability system at (202) 927-7600. Copies of the initial order, and the final revocation order or the notice discontinuing the proceeding will continue to be placed in the authority holder's public docket file.

These procedures—under which a four-step process concluding 120 days beyond an insurance lapse is replaced with a two-step process concluding within a few days after an insurance lapse—will not alter substantive rights and responsibilities. They simply provide for a more effective and expeditious method of protecting the public from operations by uninsured motor carriers, brokers and forwarders by reducing the time period within which operating authorities will be revoked for failure to comply with 49 U.S.C. 10927.<sup>1</sup>

We will provide a brief comment period to enable interested parties to submit written statements or arguments regarding the revised process. Notice of the procedural change will be published in the Federal Register and the ICC Register, and interested parties will have 10 days to comment.

**Environmental Statement**

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

Authority: 49 U.S.C. 10925 and 10927; 49 CFR 1043 and 1084.

Decided: September 25, 1995.

<sup>1</sup> Under section 10927, the holder's authority remains in effect only so long as the holder is in compliance with the security limits.

By the Commission, Chairman Morgan, Vice Chairman Owen, and Commissioners Simmons and McDonald.  
 Vernon A. Williams,  
*Secretary.*

**[Docket No. AB-3 (Sub-No. 123X)]**

**Missouri Pacific Railroad Company—  
 Abandonment Exemption—in Pettis  
 County, MO**

**AGENCY:** Interstate Commerce Commission.

**ACTION:** Notice of Exemption.

**SUMMARY:** Under 49 U.S.C. 10505, the Commission exempts from the requirements of 49 U.S.C. 10903-04, the abandonment by the Missouri Pacific Railroad Company of 2.16 miles of rail line between milepost 226.84 near Sedalia and milepost 229.0 in Pettis County, MO, subject to: (1) standard labor protection conditions; (2) an historic preservation condition; and (3) a trail use condition.

**DATES:** The exemption will be effective October 30, 1995 unless stayed or a statement of intent to file an offer of financial assistance (OFA) is filed. Statements of intent to file an OFA under 49 CFR 1152.27(c)(2) and requests for a notice of interim trail use/rail banking under 49 CFR 1152.29 must be filed by October 9, 1995, petitions to stay must be filed by October 16, 1995, requests for a public use condition under 49 CFR 1152.28 must be filed by October 19, 1995, and petitions to reopen must be filed by October 24, 1995.

**ADDRESSES:** An original and 10 copies of all pleadings referring to Docket No. AB-3 (Sub-No. 123X) must be filed with the: Office of the Secretary, Case Control Branch Interstate Commerce Commission, 1201 Constitution Avenue, N.W., Washington, D.C. 20423. In addition, a copy of all pleadings must be served on petitioner's representatives: Joseph D. Anthofer, General Attorney, and Jeanna L. Regier, Registered ICC Practitioner, 1416 Dodge Street, Room 830, Omaha, NE 68179-0830.

**FOR FURTHER INFORMATION CONTACT:** Joseph H. Dettmar, (202) 927-5660. [TDD for hearing the impaired (202) 927-5721.]

**SUPPLEMENTARY INFORMATION:** Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call or pick up in person from: Dynamic Concepts, Inc., Interstate Commerce Commission Building, 1201

Constitution Avenue, N.W., Room 2229, Washington, DC 20423. Telephone: (202) 289-4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927-5721.]

Decided: September 19, 1995.

By the Commission, Chairman Morgan, Vice Chairman Owen, and Commissioners Simmons and McDonald.

**DEPARTMENT OF JUSTICE**

**Information Collections Under Review**

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 USC Chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

- (1) The title of the form/collection;
- (2) the agency form number, if any, and the applicable component of the Department sponsoring the collection.
- (3) who will be asked or required to respond, as well as a brief abstract;
- (4) an estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;
- (5) an estimate of the total public burden (in hours) associated with the collection; and,
- (6) an indication as to whether Section 3504(h) of Public Law 96-511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Mr. Jeff Hill on (202) 395-7340 and to the Department of Justice's Clearance Officer, Mr. Robert B. Briggs, on (202) 514-4319. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the Department of Justice Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr.

Robert B. Briggs, Department of Justice Clearance Officer, Systems Policy Staff/Information Resources Management/Justice Management Division Suite 850, WCTR, Washington, DC 20530.

**New Collection**

- (1) COPS Supplemental Assistance Request Form.
  - (2) Form COPS 015/01. Community Oriented Policing Services, United States Department of Justice.
  - (3) Primary: State, Local, or Tribal Government. Other: None. The COPS Supplemental Assistance Request Form will collect information from agencies holding COPS Phase I, COPS FAST, COPS AHEAD, and COPS MORE grants concerning their requests for supplemental awards in the areas of technology, equipment, personnel, and training. Awards will be made on a one-time basis to supplement current grant awards.
  - (4) 7500 annual respondents, 0.50 hours per response.
  - (5) 11,250 annual burden hours.
  - (6) Not applicable under section 3504(h) of Public Law 96-511.
- Public comment on this item is encouraged.

Dated: September 25, 1995.

Kathleen T. Albert,

*Acting Department Clearance Officer United States Department of Justice.*

BILLING CODE 4410-21-M

**DEPARTMENT OF LABOR**

**Employment Standards Administration**

**Wage and Hour Division; Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions**

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended,

40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution

Avenue, N.W., Room S-3014, Washington, D.C. 20210.

General Wage Determination  
Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the county.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487-4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 512-1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, DC this 22nd day of September 1995.

Alan L. Moss,

Director, Division of Wage Determinations.

BILLING CODE 4510-27-M

NATIONAL LABOR RELATIONS  
BOARD**Notice of Procedures to be Followed in  
the Event Board Offices are Closed  
Due to Lack of Appropriated Funds**

The National Labor Relations Board is issuing this notice to advise the public of procedures to be followed in the event that Board offices are closed, in compliance with the Antideficiency Act, 31 U.S.C. 1341, *et seq.*, due to the lack of appropriated funds.

1. Tolling of Time for Filing or Serving  
Certain Documents

In the event the Board's offices are closed due to lack of appropriated funds, the Board hereby grants, *sua sponte*, an extension of time to file or serve any document for which the grant of an extension of time is permitted by law. The terms of the extension are that for each day on which the agency's offices are closed for all or any portion of the day, one day shall be added to the time for filing or service of the document.

Extensions of time for filing cannot apply to the 6 month period provided by section 10(b) of the Act for the filing of charges, 29 U.S.C. 160(b), or to Applications for awards and fees and other expenses under the Equal Access to Justice Act, 5 U.S.C. 504. However, with respect to time computations for filing and serving charges filed pursuant to section 10(b) or applications filed pursuant to the Equal Access to Justice Act, the Board hereby gives notice of its intention to construe the phrase "Saturday, Sunday, or a legal holiday" in its rules pertaining to filing and service, § 102.111(a), 29 C.F.R. 102.111(a), to encompass any day on which the agency's offices are closed for all or any portion of the day due to lack of appropriated funds.

Notwithstanding the foregoing provisions, persons wishing to file a charge pursuant to section 10(b) of the act, and for whom the 6-month period of Section 10(b) is to expire during the interruption in the Board's normal operations, are cautioned that the operation of Section 10(b) during an interruption in the Board's normal operations is uncertain. Consequently, it would be prudent to attempt to file the charge during the interruption in the Board's operations by following the procedures outlined in the notice set forth below. Moreover, persons filing a charge are reminded that it is their responsibility, pursuant to § 102.14 of the Board's Rules and Regulations, 29 C.F.R. 102.14, to serve a copy of the charge upon the person against whom

the charge is made. While Regional Directors ordinarily serve a copy of the charge on the person against whom the charge is made as a matter of courtesy, they do not assume responsibility for such service, and it is unlikely that the agency will be able to serve charges during any period of shutdown due to lack of appropriated funds.

2. Notice To Be Posted in the Event of  
a Shutdown Due to Lack of  
Appropriated Funds

In the event the Board's offices are closed due to lack of appropriated funds, the Board intends to post a copy of the following notice at each of its offices to advise the public of procedures to be followed during the period of the shutdown. In addition, a pre-recorded message will be available on the main phone numbers in each of the agency's offices to provide persons with information regarding how to contact the agency during the shutdown.

"This office of the National Labor Relations Board is closed due to the lack of a budget appropriatio.

Due to the lack of appropriated funds this office of the National Labor Relations Board is temporarily closed. This office will reopen when sufficient funding has been authorized by law. Only such Government activities necessary to prevent an imminent threat to the safety of human life or the protection of property may be undertaken in the absence of specific budget authority. If there is an imminent threat to the safety of human life or the protection of property as a result of a violation of the National Labor Relations Act, you should contact the \_\_\_\_\_ Regional Office, \_\_\_\_\_, at telephone number ( ) \_\_\_\_\_, FAX Number ( ) \_\_\_\_\_, for assistance. If the safety of human life or the protection of property is not subject to an imminent threat, you will have to wait until the Office resumes normal operations to be served. [Note: The addresses and phone numbers listed will vary from office to office. All possible choices are listed in part 3 of this Federal Register notice, below.]

Timeliness of Charges, Petitions and other papers:

Pursuant to Section 10(b) of the National Labor Relations Act, 29 U.S.C. 160(b), complaint cannot issue on a charge alleging an unfair labor practice violation unless the charge is filed and served within 6 months of the occurrence complained of. The operation of Section 10(b) during an interruption in Agency services as a result of a lack of funds is uncertain. If

the 6-month period of Section 10(b) is to expire during the interruption in the Board's normal operations and your charge has not previously been filed and served, you can attempt to comply with Section 10(b) by serving a copy of the charge on the party charged and filing a copy of the charge with an office of the Board in a timely manner. Filing with the Board for this purpose may include service or attempted service upon the regional office named above by certified mail.

During this period, you can attempt to serve petitions for certifications and all other time-sensitive documents by serving a copy on the proper party or parties and filing a copy of the document with an office of the Board in a timely manner. Filing with the Board for this purpose may include service or attempted service upon the regional office named above by certified mail."

### 3. Addresses and Phone Numbers of Regional Offices that will be Staffed by Essential Personnel During the Period of Any Shutdown Due to Lack of Appropriated Funds

Region 1—Boston, 10 Causeway St., 6th Floor, Boston MA 02222-1072,  
Phone: (617) 565-6748, FAX No.:  
(617) 565-6725

Region 2—Manhattan, 26 Federal Plaza, Room 3614, New York, NY 10278-0104, Phone: (212) 264-0330, FAX No.: (212) 264-8427

Region 7—Detroit, 477 Michigan Avenue, Room 300, Detroit, MI 48226-2569, Phone: (313) 226-3210, FAX No.: (313) 226-2090

Region 10—Atlanta, 101 Marietta St., N.W., Atlanta, GA 30323-3301, Phone: (404) 331-2861, FAX No.: (404) 331-2858

Region 13—Chicago, 200 West Adams St., Chicago, IL 60606-5208, Phone: (312) 353-7608, FAX No.: (312) 886-1341

Region 17—Kansas City, 8600 Farley St., Suite 100, Overland Park, KS 66212-4677, Phone: (913) 236-3001, FAX No.: (913) 236-3010

Region 19—Seattle, 915 2nd Ave, Room 2948, Seattle, WA 98174-1078 Phone: (206) 220-6310, FAX No.: (206) 220-6305

Region 21—Los Angeles, 888 S. Figueroa St., 9th Floor, Los Angeles, CA 90017-5455, Phone: (213) 894-5184, FAX No.: (213) 894-2778

Dated, Washington, DC., September 26, 1995.

By direction of the Board.

John J. Toner,

Acting Executive Secretary, National Labor Relations Board.

## NUCLEAR REGULATORY COMMISSION

### Documents Containing Reporting or Recordkeeping Requirements; Notice of Pending Submittal to the Office of Management and Budget (OMB) for Review

**AGENCY:** Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

**SUMMARY:** The NRC is preparing a submittal to OMB for review and continued approval of information collection requirements currently approved by OMB under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. *The title of the information collection:* 10 CFR Part 61—Licensing Requirements for Land Disposal of Radioactive Waste.

2. *Current OMB approval number:* 3150-0135.

3. *How often the collection is required:* Applications for licenses are submitted once. Applications for renewals or amendments are submitted as needed. Other reports are submitted annually and as other events require.

4. *Who is required or asked to report:* Applicants for and holders of an NRC license for land disposal of low-level radioactive waste, and all generators, collectors, and processors of low-level waste intended for disposal at a low-level waste facility.

5. *The number of annual respondents:* 14.

6. *The number of hours needed annually to complete the requirement or request:* 7,538 (an average of approximately 3.5 hours per respondent for reporting and 506 hours per respondent for recordkeeping).

7. *Abstract:* 10 CFR Part 61 establishes the procedures, criteria, and license terms and conditions for the land disposal of low-level radioactive waste. Reporting and recordkeeping requirements are mandatory or, in the case of application submittals, are required to obtain a benefit. The information collected in the applications, reports and records is evaluated by the NRC to ensure that the licensee's or applicant's physical plant, equipment, organization, training, experience, procedures and plans provide an adequate level of protection of public health and safety, common defense and security, and the environment.

Submit comments that address the following by November 28, 1995:

1. Is the proposed collection of information necessary for the proper performance of the functions of the NRC, including whether the information will have practical utility?

2. Is the estimate of burden accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the collection of information be minimized, including the use of automated collection techniques?

A copy of the draft supporting statement may be obtained free of charge from the NRC Public Document Room, 2120 L Street NW, (lower level), Washington, DC. Members of the public who are in the Washington, DC, area can access this document within 30 days of the signature date of this notice on the Public Document Room Bulletin Board (NRC's Advanced Copy Document Library), NRC subsystem on FedWorld at 703-321-3339. Members of the public who are located outside of the Washington, DC, area can dial FedWorld, 800-303-9672, or use the FedWorld Internet address: fedworld.gov (Telnet). The filename for this document will be yymmdd.omb, where yy, mm, and dd will be the year, month, and day of the signature date of this notice. If assistance is needed in accessing the document, please contact the FedWorld help desk at 703-487-4608.

Comments and questions may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T-6 F33, Washington DC, 20555-0001, or by telephone at (301) 415-7233, or by Internet electronic mail at bjs1@nrc.gov.

Dated at Rockville, Maryland, this 22nd day of September, 1995.

For the Nuclear Regulatory Commission.  
Gerald F. Cranford,

Designated Senior Official for Information Resources Management.

BILLING CODE 7590-01-P

### Documents Containing Reporting or Recordkeeping Requirements; Notice of Pending Submittal to the Office of Management and Budget (OMB) for Review

**AGENCY:** Nuclear Regulatory Commission (NRC).

**ACTION:** Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

**SUMMARY:** The NRC is preparing a submittal to OMB for review and continued approval of information collection requirements currently approved by OMB under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection:

—DOE/NRC Forms 741 & 741A, "Nuclear Material Transaction Report," and NUREG/BR-0006, "Instructions for completing forms 741, 741A, and 740M"

—DOE/NRC Form 740M, "Concise Note"

2. Current OMB approval number: 3150-0003.

3. How often the collection is required:

—DOE/NRC Form 741/741A: As occasioned by special nuclear material or source material transfers, receipts, or inventory changes that meet certain criteria.

—DOE/NRC Form 740M: When specified in Facility Attachments or Transitional Facility Attachments, or as necessary to inform the U. S. or the International Atomic Energy Agency (IAEA) of any qualifying statement or exception to any of the data contained in any of the other reporting forms required under the US/IAEA Safeguards Agreement.

4. Who is required or asked to report: Persons licensed to possess specified quantities of special nuclear material or source material, and licensees of facilities on the U. S. eligible list who have been notified in writing by the Commission that they are subject to 10 CFR Part 75.

5. The number of annual respondents:

—DOE/NRC Form 741/741A: 20,000

—DOE/NRC Form 740M: 1,140

6. The number of hours needed annually to complete the requirement or request:

—DOE/NRC Form 741/741A: 15,000

—DOE/NRC Form 740M: 855

7. Abstract: NRC and Agreement State licensees are required to make inventory and accounting reports on DOE/NRC Form 741/741A for certain source or special nuclear material inventory changes, for transfers or receipts of special nuclear material, or for transfer or receipt of 1 kilogram or more of source material. Licensees affected by 10 CFR Part 75 and related sections of Parts 40, 50, 70, and 150 are required to submit DOE/NRC Form 740M to inform the U. S. or the IAEA of any qualifying statement or exception to any of the data

contained in any of the other reporting forms required under the U.S./IAEA Safeguards Agreement. The use of Forms 740M, 741, and 741A, together with NUREG/BR-0006, the instructions for completing the forms, enables NRC to collect, retrieve, analyze as necessary, and submit the data to IAEA to fulfill its reporting responsibilities.

Submit comments that address the following by November 28, 1995.

1. Is the proposed collection of information necessary for the proper performance of the functions of the NRC, including whether the information will have practical utility?

2. Is the estimate of burden accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the collection of information be minimized, including the use of automated collection techniques?

A copy of the draft supporting statement may be obtained free of charge from the NRC Public Document Room, 2120 L Street NW, (lower level), Washington, DC. Members of the public who are in the Washington, DC, area can access this document within the first 30 days on the Public Document Room Bulletin Board (NRC's Advanced Copy Document Library), NRC subsystem on FedWorld at 703-321-3339. Members of the public who are located outside of the Washington, DC, area can dial FedWorld, 800-303-9672, or use the FedWorld Internet address: fedworld.gov (Telnet). The electronic copy of this document will be in the NRC PDR library that can be selected from any FedWorld library. The filename for this document will be yymmdd.omb, where yy, mm, and dd will be the year, month, and day of the signature date of this notice. If assistance is needed in accessing the document, please call the FedWorld help desk at 703-487-4608.

Comments and questions may be directed to the NRC Clearance Officer, Brenda Jo. Shelton, U.S. Nuclear Regulatory Commission, T-6 F33, Washington DC, 20555-0001, or by telephone at (301) 415-7233, or by Internet electronic mail at bjs1@nrc.gov.

[Docket No. 50-220]

**Niagara Mohawk Power Corporation;  
Notice of Denial of Amendment To  
Facility Operating License and  
Opportunity for Hearing**

The U.S. Nuclear Regulatory Commission (the Commission) has denied a request by Niagara Mohawk Power Corporation, (licensee) for an amendment to Facility Operating License No. DPR-63 issued to the licensee for operation of Nine Mile Point Nuclear Station Unit No. 1, located in Oswego County, New York. Notice of Consideration of Issuance of this amendment was published in the Federal Register on October 12, 1994 (59 FR 51620).

The purpose of the licensee's amendment request was to revise the Technical Specifications (TSs) to change pressure/temperature limits in Section 3.2.2.

The NRC staff has concluded that the licensee's request cannot be granted. The licensee was notified of the Commission's denial of the proposed change by a letter dated September 22, 1995.

By October 30, 1995, the licensee may demand a hearing with respect to the denial described above. Any person whose interest may be affected by this proceeding may file a written petition for leave to intervene.

A request for hearing or petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Services Branch, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date.

A copy of any petitions should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to Mark J. Wetterhahn, Esquire, Winston & Strawn, 1400 L Street, NW., Washington, DC 20005-3502, attorney for the licensee.

For further details with respect to this action, see (1) the application for amendment dated September 1, 1994, as supplemented December 5 and 20, 1994, and (2) the Commission's letter to the licensee dated September 22, 1995.

These documents are available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Reference and Documents Department, Penfield Library, State University of New York, Oswego, New York 13126.

Dated at Rockville, Maryland, this 22th day of September 1995.

For The Nuclear Regulatory Commission.

Ledyard B. Marsh,

*Director, Project Directorate I-1, Division of Reactor Projects—I/II Office of Nuclear Reactor Regulation.*

BILLING CODE 7590-01-P

## OFFICE OF THE FEDERAL REGISTER

### Procedures for Publication of Federal Register Documents During a Funding Hiatus

**AGENCY:** Office of the Federal Register.

**ACTION:** Notice of special procedures.

**SUMMARY:** Due to the possibility of a lapse in appropriations and in accordance with the provisions of the Antideficiency Act, as amended by Public Law No. 101-508, 104 Stat. 1388 (31 U.S.C. 1341), the Office of the Federal Register (OFR) announces special procedures for agencies submitting documents to be published in the Federal Register.

In the event of an appropriations lapse, the OFR would be required to publish documents directly related to the performance of governmental functions necessary to address imminent threats to the safety of human life or protection of property. Since it would be impracticable for the OFR to make case-by-case determinations as to whether certain documents are directly related to activities that qualify for an exemption under the Antideficiency Act, the OFR will place responsibility on agencies submitting documents to certify that their documents relate to emergency activities authorized under the Act.

During a funding hiatus affecting one or more Federal agencies, the OFR will remain open to accept and process documents authorized to be published in the daily Federal Register in the absence of continuing appropriations. An agency wishing to submit a document to the OFR during a funding hiatus must attach a transmittal letter to the document which states that publication in the Federal Register is necessary to safeguard human life, protect property, or provide other emergency services consistent with the performance of functions and services exempted under the Antideficiency Act.

Under the August 16, 1995 opinion of the Office of Legal Counsel of the Department of Justice, exempt functions and services would include activities such as those related to the constitutional duties of the President,

food and drug inspection, air traffic control, responses to natural or manmade disasters, law enforcement and supervision of financial markets. Documents related to normal or routine activities of Federal agencies, even if funded under prior year appropriations, will not be published.

At the onset of a funding hiatus, the OFR may suspend the regular three-day publication schedule to permit a limited number of exempt personnel to process emergency documents. Agency officials will be informed as to the schedule for filing and publishing individual documents.

**FOR FURTHER INFORMATION CONTACT:** Richard Claypoole or Michael White, (202) 523-4534.

#### Authority

The authority for this action is 44 U.S.C. 1502 and 1 CFR 2.4 and 5.1.

Dated: September 28, 1995.

Richard L. Claypoole,

*Director of the Federal Register.*

## OFFICE OF MANAGEMENT AND BUDGET

### Guidelines and Instructions for Implementing Section 204, "State, Local, and Tribal Government Input," of Title II of Public Law 104-4

**AGENCY:** Office of Management and Budget.

**ACTION:** Memorandum for Heads of Departments and Agencies.

**SUMMARY:** On March 22, 1995, the President signed into law the "Unfunded Mandates Reform Act of 1995" (P.L. 104-4). This notice provides guidance to agencies on the Act.

**FOR FURTHER INFORMATION CONTACT:** Jeff Hill, 395-7340.

Attached to this notice is the material for inclusion in the Federal Register.

Dated: September 25, 1995.

John B. Arthur,

*Assistant Director for Administration.*

Memorandum for the Heads of Departments and Agencies

*FROM:* Alice M. Rivlin, Director.

*SUBJECT:* Guidelines and Instructions and Implementing Section 204, "State, Local, and Tribal Government Input," of Title II of P.L. 104-4.

On March 22, 1995, President Clinton signed into law the "Unfunded Mandates Reform Act of 1995" (P.L. 104-4) (the "Act"). Section 204(a) of the Act requires that—

"Each agency shall, to the extent permitted in law, develop an effective process to permit elected officers of State, local, and tribal governments (or their designated employees with authority to act on their behalf) to provide meaningful and timely input in the development of regulatory proposals containing significant Federal intergovernmental mandates."<sup>1</sup>

Section 204(b) of the Act provides an exemption from the Federal Advisory Committee Act (5 U.S.C. App.) for intergovernmental consultations involving intergovernmental responsibilities or administration.

Section 204(c) requires the President to issue guidelines and instructions to Federal agencies "for appropriate implementation" of both of these provisions "consistent with applicable laws and regulations." In accordance with the President's delegation of authority,<sup>2</sup> OMB is today issuing those guidelines and instructions.<sup>3</sup>

#### I. The Process for Intergovernmental Consultation

It is important that this intergovernmental consultation process not only achieves meaningful input, but also builds a better understanding among Federal, State, local, and tribal governments. As described in Part II, below, the process required by the Federal Advisory Committee Act is not to act as a hindrance to full and effective intergovernmental consultation.

##### A. What Agencies Are Covered?

The process for intergovernmental consultation called for by Section 204(a) applies to all Federal agencies (as

<sup>1</sup> The Act's consultation requirement builds on that set forth by President Clinton on October 26, 1993, in Executive Order No. 12875. In order "reduce the imposition of unfunded mandates upon State, local, and tribal governments," the Executive order requires agencies, when they seek to impose unfunded mandates upon State, local, or tribal governments through a regulation, to provide to the Director of the Office of Management and Budget "a description of the extent of the agency's prior consultation with representatives of affected State, local, and tribal governments, the nature of their concerns, any written communications submitted to the agency by such units of government, and the agency's position supporting the need to issue the regulation containing the mandate" (Sec. 1(a)(2)).

<sup>2</sup> See 60 Fed. Reg. 45039 (August 29, 1995).

<sup>3</sup> Portions of these guidelines and instructions are based on OMB Memorandum M-94-10, entitled "Guidance for Implementing E.O. 12875, 'Reduction of Unfunded Mandates,'" issued by Director Leon E. Panetta on January 11, 1994. These guidelines and instructions are not intended, and should not be construed, to create any right or benefit, substantive or procedural, enforceable at law by a party against the United States, its agencies, its officers, or its employees. Neither are these guidelines and instructions intended, nor should they be construed, to limit the availability of any exclusion from the Federal Advisory Committee Act contained in that Act or any applicable regulations.

defined in 5 U.S.C. 551(1)), with the exception of independent regulatory agencies.

#### *B. When Should Intergovernmental Consultations Take Place?*

Intergovernmental consultation should take place as early in the regulatory process as possible. Except where the need for immediate agency action precludes prior consultation, consultation should occur before publication of the notice of proposed rulemaking or other regulatory action proposing a significant Federal intergovernmental mandate.

Consultation should continue after publication of the regulatory action initiating the proposal. Except in exceptional circumstances where the need for immediate action precludes prior consultation, consultation must occur prior to the formal promulgation in final form of the regulatory action.

#### *C. With Whom Should Agencies Consult?*

The statute directs agencies to develop an effective process to ensure that "elected officers of State, local, and tribal governments (or their designated employees with authority to act on their behalf)" who wish to provide meaningful and timely input are able to do so.

Each agency needs to develop an intergovernmental consultation process for that agency. To do so, the agency should first develop a proposal for that process, and consult with State, local, and tribal governments (as appropriate) concerning this proposed process, as soon as possible.

One approach an agency may wish to adopt is to designate a person or an office through which intergovernmental consultation should be coordinated. Another approach is for an agency to instruct those responsible for developing a rule to seek out the views of elected officers of their designated employees. An agency may also wish to develop other effective means of generating meaningful input or expand those that it already has. An agency will be able to obtain the fullest range of meaningful input from State local, and tribal governments by undertaking the following kinds of consultation.

##### (1) Heads of Government

Agencies should seek to consult with the highest levels of the pertinent government units, e.g., the Office of the Governor, Mayor, or Tribal Leader (or their designated employees with authority to act on their behalf). These officials are the ones elected to represent the people and are the ones

that the public holds directly accountable for the actions of those government units.

##### (2) Both Program and Financial Officials

Many regulatory agencies have functional counterparts in State, local, and tribal governments, e.g., those government officials who implement or enforce regulatory responsibilities required in whole or part by the Federal agency. These local officials tend to be those most familiar with the Federal agency's regulatory program, and should be consulted as a source of important information concerning the likely effects of, or effective alternatives to, Federal regulatory proposals.

In addition, agencies should consult with those State, local, and tribal officials most directly responsible for ensuring the funding of compliance with the Federal mandate, e.g., the applicable treasury, budget, tax-collection, or other financial officials. These officials are institutionally responsible for balancing the competing claims for scarce State, local, or tribal resources.

##### (3) Washington Representatives

It is also important that Federal agencies consult with Washington representatives, where available, of associations representing elected officials. These Washington representatives often know which local elected officials are the most knowledgeable about, interested in, or responsible for, implementing specific issues, regulations or programs, and can ensure that a broad range of government officials learn of and provide valuable insight concerning a proposed intergovernmental mandate.

##### (4) Small Governments

Agencies should make special efforts to consult with officials of small governments, and to develop a plan for such consultation under section 203 of Title II of the Act. Agencies may wish to consider several mechanisms for reaching small governments, including special task forces, periodic mailings through small government associations, or communication through rural development councils.

#### *D. How Much Consultation Should There Be?*

The scope of intergovernmental consultation should be based on common sense and be commensurate with the significance of the action being taken. The more costly, the more potentially disruptive, the more broadly applicable, the more controversial the proposed Federal intergovernmental

mandate—the more consultation there should be. An agency should decide the extent of its consultation on a case-by-case basis; a one-size-fits-all prescription is neither appropriate nor desirable.

#### *E. What Should Be the Content of Consultation?*

Agencies should seek views of State, local, and tribal governments regarding costs, benefits, risks, and alternative and flexible methods of compliance regarding their regulatory proposals. Agencies should also seek views on potential duplication with existing laws or regulations at other levels of government, and on ways to harmonize their rules with State, local and tribal policies and programs.

To assist with these consultations, agencies should first estimate the direct costs to be incurred by the State, local, or tribal governments in complying with the mandate and then inform the affected governmental units of these cost estimates. Estimates should cover both up-front and recurring costs, for a reasonable number of years after the rule is to be put into effect. To the extent practicable, agencies should make reasonable efforts to disaggregate these cost estimates as they affect the various levels of government, or otherwise provide the criteria by which those affected can disaggregate the cost estimates in order to determine the potential costs to themselves. Where quantitative estimates are not feasible, agencies should work with other levels of government to discern and discuss qualitative costs.

Agencies should also consult on and estimate the benefits expected from the mandate for States, localities, tribes, and their residents and businesses. Estimates should cover both up-front and recurring benefits for a reasonable number of years after the rule is to be put into effect. To the extent practicable, agencies should make reasonable efforts to disaggregate these benefit estimates as they affect the various levels of government, or otherwise provide the criteria by which those affected can disaggregate the benefit estimates in order to determine the potential benefits to themselves. Where quantitative estimates are not feasible, agencies should work with other levels of government to discern and discuss qualitative benefits.

Agencies should also, during the consultative process, seek views on the expected method of compliance. Governmental units may have suggestions as to how to achieve the Federal regulatory objective in a way that is more effective, efficient flexible,

and consistent with State, local, and tribal governmental regulatory and other functions.

*F. How Should Agencies Integrate These Intergovernmental Consultations into the Rulemaking Process?*

It is important for agencies to integrate these consultation activities into the ongoing rulemaking process. The cost and benefit estimates, any additional viable suggestions received during the pre-notice consultations, and the agency plan to carry out intergovernmental consultation should be included in the preamble to the notice of proposed rulemaking. Publication of consultation plan in the Federal Register will assure that those governmental units that are not contacted directly will have access to the same cost and benefit estimates as those who were contacted directly, and have the opportunity to make their concerns known. Similarly, and consistent with E.O. 12875, any preamble transmitted to the Federal Register on or after October 2, 1995, should include, as of the particular stage of the rulemaking, the extent of the agency's prior consultations with representatives of affected State, local, and tribal governments, the nature of their concerns, any written communications submitted to the agency by such units of government, and the agency's position supporting the need to issue the regulation containing the mandate.

*G. What Compliance Reports Should Agencies Submit to OMB?*

Under Section 208 of the Act, OMB is required to submit a report to Congress on agency compliance with the requirements of Title II of the Act, which includes the intergovernmental consultation requirement, on or before March 22, 1996, and annually thereafter. Accordingly, agencies should provide the Administrator of the Office of Information and Regulatory Affairs, by January 15, 1996, and annually on that date thereafter, a written report of each agency's compliance with Title II of the Act. The report should include a description of the process established by the agency to ensure meaningful input, as well as a description of agency consultations with State, local, and tribal governments for each proposed and final rule "containing significant Federal intergovernmental mandates." As part of the report to be submitted by January 15, 1996, agencies should also describe the plans they have developed to consult with small governments, under Section 203 of Title II of the Act.

**II. The Exemption From the Federal Advisory Committee Act**

In order to facilitate the consultation process, section 204(b) of the Act provides an exemption from the Federal Advisory Committee Act ("FACA") (5 U.S.C. App.) "for the exchange of official views regarding the implementation of public laws requiring shared intergovernmental responsibilities or administration."<sup>4</sup> This exemption applies to all Federal agencies subject to FACA, and is not limited to the intergovernmental consultations required by Section 204(a) but instead applies to the entire range of intergovernmental responsibilities or administration. In accordance with the legislative intent, the exemption should be read broadly to facilitate intergovernmental communications on responsibilities or administration.

This exemption applies to meetings between Federal officials and employees and State, local, or tribal governments, acting through their elected officers, officials, employees, and Washington representatives, at which "views, information, or advice" are exchanged concerning the implementation of intergovernmental responsibilities or administration, including those that arise explicitly or implicitly under statute, regulation, or Executive order.<sup>5</sup>

The scope of meetings covered by the exemption should be construed broadly to include any meetings called for any purpose relating to intergovernmental responsibilities or administration. Such meetings include, but are not limited to, meetings called for the purpose of seeking consensus; exchanging views, information, advice, and/or recommendations; or facilitating any other interaction relating to intergovernmental responsibilities or administration.

The guidance given above should help determine when a meeting qualifies under Section 204(b) of the Act for an exemption from the FACA. We also note that meetings that do not meet these guidelines for an exemption may nonetheless not be subject to the FACA in the first instance. Accordingly, to

<sup>4</sup> House Conference Report 104-76 (March 13, 1995), p. 40.

<sup>5</sup> Specifically, this exemption from FACA applies where—

"(1) meetings are held exclusively between Federal officials and elected officers of State, local, and tribal governments (or their designated employees with authority to act on their behalf), acting in their official capacities; and

"(2) such meetings are solely for the purposes of exchanging information, or advice relating to the management or implementation of Federal programs established pursuant to public law that explicitly or inherently share intergovernmental responsibilities or administration."

determine whether there is even a need for an exemption from the FACA, agencies should also consult the FACA itself, as well as the General Service Administration's regulations at 41 CFR Subpart 101-6.10, and the court decisions construing the FACA.

\* \* \* \* \*

It is important that agencies make their best efforts to implement these guidelines and instructions. As the Conference Report stated, "an important part of efforts to improve the Federal regulatory process entails improved communications with State, local, and tribal governments. Accordingly, this legislation will require Federal agencies to establish effective mechanisms for soliciting and integrating the input of such interests into the Federal decision-making process."<sup>6</sup>

If agencies have any questions concerning these guidelines and instructions, they should contact the Administrator of the Office of Information and Regulatory Affairs, or her staff. OMB will provide additional guidance as experience and need dictate.

**SECURITIES AND EXCHANGE COMMISSION**

[Release No. 34-36272; File No. SR-OCC-95-01]

**Self-Regulatory Organizations; the Options Clearing Corporation; Notice of Withdrawal of a Proposed Rule Change**

September 22, 1995.

On January 23, 1995, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),<sup>1</sup> a proposed rule change clarifying OCC's Rules regarding the unavailability of current index values. Notice of the proposed rule was published in the Federal Register on March 17, 1995.<sup>2</sup> On September 19, 1995, OCC filed a request that the proposed rule change be withdrawn.<sup>3</sup>

<sup>6</sup> House Conference Report 104-76 (March 13, 1995), p. 40.

<sup>1</sup> 15 U.S.C. 78s(b)(1) (1988).

<sup>2</sup> Securities Exchange Act Release No. 35472 (March 10, 1995), 60 FR 14475 [File No. SR-OCC-95-01].

<sup>3</sup> Letter from James C. Yong, First Vice President and General Counsel, OCC, to Jerry Carpenter, Assistant Director, Division of Market Regulation, Commission, (September 15, 1995).

For the Commission by the Division of Market Regulation, pursuant to delegated authority.<sup>4</sup>

BILLING CODE 8010-01-M

[Release No. 35-26378]

**Filings Under the Public Utility Holding Company Act of 1935, as amended ("Act")**

September 22, 1995.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by October 16, 1995, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

General Public Utilities Corporation  
(70-7670)

General Public Utilities Corporation ("GPU"), 100 Interpace Parkway, Parsippany, New Jersey 07054, a registered holding company, has filed a post-effective amendment to its application-declaration under sections 6(a) and 7 of the Act and rules 53 and 54 thereunder.

By order of the Commission dated October 23, 1989 (HCAR No. 24971) ("1989 Order"), GPU was authorized to issue and sell, from time to time through December 31, 1995, pursuant to a

Dividend Reinvestment and Stock Purchase Plan ("Plan"), up to 2.5 million shares of its common stock, \$2.50 par value ("Common Stock"). Common Stock is purchased under the Plan either on the open market or directly from GPU from authorized but unissued shares or previously reacquired shares, as GPU may direct, by the administrator of the Plan.

GPU now proposes to extend to December 31, 2000 the time it may issue and sell authorized but unissued and reacquired shares of Common Stock under the Plan.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

BILLING CODE 8010-01-M

[Rel. No. IC-21371; 812-9266]

**T. Rowe Price Spectrum Fund, Inc., et al.; Notice of Application**

September 22, 1995.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of application for exemption under the Investment Company Act of 1940 (the "Act").

**APPLICANTS:** T. Rowe Price Growth Stock Fund, Inc., T. Rowe Price New Horizons Fund, Inc., T. Rowe Price New Era Fund, Inc., T. Rowe Price New Income Fund, Inc., T. Rowe Price Prime Reserve Fund, Inc., T. Rowe Price Growth & Income Fund, Inc., T. Rowe Price Short-Term Bond Fund, Inc., T. Rowe Price High Yield Fund, Inc., T. Rowe Price Equity Income Fund, T. Rowe Price GNMA Fund, T. Rowe Price International Funds, Inc., and each open-end management investment company (1) that in the future becomes advised by T. Rowe Price Associates, Inc. ("T. Rowe Price") and/or Row Price-Fleming International, Inc. ("Price-Fleming") and distributed by T. Rowe Price Investment Services, Inc. ("Investment Services"), and (2) that holds itself out to investors as a related fund for purposes of investment and investor services (collectively, the "Price Funds"); T. Rowe Price Spectrum Fund, Inc. (the "Spectrum Fund"); T. Rowe Price Associates, Inc. ("T. Rowe Price"); Rowe Price-Fleming International, Inc. ("Price-Fleming"); T. Rowe Price Investment Services, Inc. ("Investment Services"); and T. Rowe Price Services, Inc. ("Price Services").

**RELEVANT ACT SECTIONS:** Order requested under section 6(c) to exempt the

applicants from sections 12(d)(1) (A) and (B), sections 6(c) and 17(b) to exempt applicants from section 17(a), and rule 17d-1 under the Act to permit certain joint transactions otherwise prohibited by section 17(d) and rule 17d-1.

**SUMMARY OF APPLICATION:** The requested order would supersede two prior orders that permit the T. Rowe Price Spectrum Fund, Inc. ("the "Spectrum Fund") to operate as a "fund of funds." The existing relief imposes a number of restrictions that limit the manner in which the Spectrum Fund may operate. The requested order would permit the Spectrum Fund to continue operating as a fund of funds while eliminating many of the restrictions from the prior order.

**FILING DATES:** The application was filed on September 29, 1994, and amended on April 28, 1995, August 16, 1995, and August 23, 1995.

**HEARING OR NOTIFICATION OF HEARING:** An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 17, 1995, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

**ADDRESSES:** Secretary, SEC, 450 5th Street, NW., Washington, D.C. 20549. Applicants, 100 East Pratt Street, Baltimore, MD 21202.

**FOR FURTHER INFORMATION CONTACT:** Elaine M. Boggs, Staff Attorney, at (202) 942-0572, or C. David Messman, Branch Chief, at (202) 942-0564 (Division of Investment Management, Office of Investment Company Regulation).

**SUPPLEMENTARY INFORMATION:** The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

**Applicant's Representation**

1. The Spectrum Fund is a registered, no-load, open-end, management investment company organized as a Maryland corporation. The Spectrum Fund began offering its shares to the public in 1990 and consists of two series: the Growth Fund and the Income Fund (the "Portfolios"), with assets as of June 30, 1995 of approximately \$1.1

<sup>4</sup> 17 CFR 200.30-3(a)(12) (1994).

billion and \$842 million, respectively. Each Portfolio invests substantially all of its assets in certain Price Funds (the "Underlying Funds"). Investments also may be made in money market instruments for temporary purposes. The Underlying Funds are no-load, open-end investment companies which have not adopted plans under rule 12b-1 to finance their distribution. Applicants request that the relief sought herein also apply to any future "fund of funds," whether organized as an investment company or as a portfolio thereof, which operates in all material respects in accordance with the conditions to the requested order, and that is a number of the T. Rowe Price group of investment companies.

2. Price Associates serves as investment adviser to each of the Underlying Funds, except for T. Rowe Price International Funds, Inc. which is advised by Price-Fleming. Investment Services, a wholly-owned subsidiary of Price Associates, serves as distributor of the Spectrum Fund and the Underlying Funds. Price Services, a wholly-owned subsidiary of Price Associates, performs certain shareholder services for the Spectrum Fund and the Underlying Funds.

3. The Spectrum Fund operates as a "fund of funds" under an exemptive order granted by the Commission (the "Existing Order").<sup>1</sup> The Existing Order exempts applicants under section 6(c) from the limitations of section 12(d)(1) (A) and (B) to the extent necessary to permit: (i) The Spectrum Fund to purchase, in the aggregate, up to 15% of the outstanding voting shares of each underlying Fund, (ii) the securities of each Underlying Fund to have an aggregate value in excess of 5% of the value of the total assets of the Spectrum Fund, (iii) the Spectrum Fund to invest essentially all of its assets in the securities of the Underlying Funds, and (iv) each of the Underlying Funds to sell more than 3% of its total outstanding voting stock to the Spectrum Fund. The Existing Order also exempts applicants under sections 6(c) and 17(b) from section 17(a)(1) to permit sales by the Underlying Funds of their shares to the Spectrum Fund. Finally, the Existing Order permits, under section 17(d) and rule 17d-1, joint arrangements under a special servicing agreement that includes payments by the Underlying Funds of Spectrum Fund expenses.

4. The Existing Order was amended in 1992 (the "Amended Order")<sup>2</sup> to modify a condition of the Existing Order that had limited investments in the Spectrum Fund to individuals investing an aggregate of \$30,000 per calendar year. The Amended Order removed this restriction.

5. The Existing Order imposed a number of conditions that restrict the manner in which the Spectrum Fund may operate. These conditions require applicants to sell shares of the Spectrum Fund only to certain "long-term investors," require the Spectrum Fund to allocate its assets to specified Underlying Funds only in predetermined and set ranges, prohibit the Spectrum Fund from acquiring more than 15% of the outstanding securities of any Underlying Fund, limit redemptions made by the Spectrum Fund from the Underlying Funds to 1% in any 30-day period (unless the redemptions are made to satisfy redemption requests by the Spectrum Fund's shareholders), limit shareholder exchanges into or out of the Spectrum Fund, prevent the Spectrum Fund from creating new portfolios without further exemptive relief from the Commission (the "Redemption Conditions"). In addition, the Existing Order prohibits any of the Spectrum Fund's non-interested directors from serving on the board of directors of any Underlying Fund, requires the Spectrum Fund to vote its shares in each Underlying Fund in proportion to the vote of all shareholders of the Underlying Fund, prohibits the Spectrum Fund and/or the Underlying Funds from imposing certain distribution and advisory fees, and requires the Spectrum Fund's board of directors to monitor for "wash transactions"<sup>3</sup> among the Underlying Funds (the "Order Conditions," collectively with the Redemption Conditions, the "Existing Conditions"). The requested order would supersede the Existing and Amended Orders, and would eliminate the Existing Conditions and replace them with the conditions set forth below.

#### Applicant's Legal Analysis

##### A. Section 12(d)(1)

1. Absent the Existing Order, section 12(d)(1)(A) of the Act would prohibit the Spectrum Fund from purchasing

more than 3% of the outstanding voting securities of an Underlying Fund, securities issued by all Underlying Funds having an aggregate value in excess of 5% of the value of the total assets of the Spectrum Fund, or securities issued by the Underlying Funds and all other investment companies having an aggregate value in excess of 10% of the value of the total assets of the Spectrum Fund. Section 12(d)(1)(B) would prohibit the Underlying Funds from selling more than 3% of their outstanding voting securities to the Spectrum Fund and more than 10% to the Spectrum Fund and other investment companies.

2. Section 12(d)(1) is intended to prevent the pyramiding of investment companies, the layering of fees, and undue organizational complexities. Applicants state that none of these abuses associated with fund holding companies are present with respect to the current and proposed arrangement, and that the Spectrum Fund will provide the benefits of diversification and cost savings to its investors.

##### B. Section 17(a)

1. Section 17(a) of the Act generally prohibits sales or purchases of securities between a registered investment company and any affiliated person of that company. Absent the Existing Order, the sale by the Underlying Funds of their shares to the Spectrum Fund could be deemed to be a principal transaction between affiliated persons that are prohibited under section 17(a). Because the Spectrum Fund and the Underlying Funds are each advised by Price Associates, they could be deemed to be affiliates of one another. Therefore, applicants requested the Existing Order to permit the Underlying Funds to sell their shares to the Spectrum Fund.

##### C. Section 17(d) and Rule 17d-1

1. Section 17(d) of the Act and rule 17d-1 thereunder prohibit an affiliated person of an investment company, acting as principal, from participating in or effecting any transaction in connection with any joint enterprise or joint arrangement in which the investment company participates. Applicants requested the Existing Order under section 17(d) and rule 17d-1 to permit the Spectrum Fund to enter into a joint arrangement pursuant to a special servicing agreement, as more fully described in the application.

##### D. Standard for Relief

1. Applicants state that the Redemption Conditions to the Existing Order were designed to prevent disruptive redemptions from the

<sup>1</sup> Investment Company Act Release Nos. 17198 (Oct. 31, 1989) (notice) and 17242 (Nov. 29, 1989) (order).

<sup>2</sup> Investment Company Act Release Nos. 18816 (June 29, 1992) (notice) and 18865 (July 24, 1992) (order).

<sup>3</sup> A "wash transaction" is a purchase of a security by one underlying fund that is offset by a contemporaneous sale of the same security by another underlying fund.

Underlying Funds. Applicants believe these conditions are no longer necessary and act as an impediment to the prudent management of the Spectrum Fund. Specifically, applicants believe that the Redemption Conditions are unnecessary for the following reasons: The Spectrum Fund has attracted shareholders investing for retirement, has had a consistently lower redemption rate than the Underlying Funds, has shareholders who on the whole remain in the fund longer than shareholders remain in the Underlying Funds, and has benefited the Underlying Funds in by increasing assets and reducing redemption pressure. In addition, the Underlying Funds have maintained sufficient cash positions to satisfy all redemptions made by the Spectrum Fund, and applicants believe that the structure of the Spectrum Fund dilutes Spectrum Fund shareholder redemptions by spreading their effect over the Underlying Funds.

2. Applicants also believe the Other Conditions are no longer necessary. Applicants submit that the identity of management between Spectrum Fund and the Underlying Funds provides assurance to investors that they will not be treated unreasonably or unfairly. Applicants further note that any harm to the Underlying Funds would be contrary to price Associates' business interests.

3. Applicants state that the fact that the boards of directors for the Spectrum Fund and the Underlying Funds may have common independent directors does not impede the ability of the independent directors to perform their oversight function because they have fiduciary obligations to all funds on whose board of directors they serve. Further, any conflict among the interests of those funds is no different from that which, in theory, can arise in any situation where an individual serves on the boards of directors of multiple funds in the same fund family.

4. Section 6(c) permits the SEC to exempt any person or transaction from any provision of the Act, if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy of the Act. For the above reasons, applicants argue that the replacement of the Existing Conditions with the modified conditions meets the section 6(c) standards.

5. Section 17(b) permits the SEC to grant an order permitting a transaction otherwise prohibited by section 17(a) if it finds that the participation of such investment company is consistent with the provisions, policies, and purposes of

the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants. Applicants believe that the terms of the transactions meet these standards.

6. Rule 17d-1 permits the SEC to approve a proposed joint transaction. In determining whether to approve a transaction, the SEC is to consider whether the proposed transaction is consistent with the provisions, policies, and purposes of the Act, and the extent to which the participation of the investment companies is on a basis different from or less advantageous than that of the other participants. Applicants believe that the requested order meets these standards.

#### Applicants' Conditions

Applicants agree that any order of the Commission granting the requested relief will be subject to the following conditions:

1. The Spectrum Fund and each Underlying Fund will be part of the same "group of investment companies," as defined in rule 11a-3 under the Act.

2. No Underlying Fund shall acquire securities of any other investment company in excess of the limits contained in section 12(d)(1)(A) of the Act.

3. A majority of the directors of the Spectrum Fund will not be "interested persons," as defined in section 2(a)(19) of the Act.

4. Before approving any advisory contract under section 15, the board of directors of the Spectrum Fund, including a majority of the directors who are not "interested persons," as defined in section 2(a)(19), shall find that advisory fees charged under such contract are based on services provided that are in addition to, rather than duplicative of, services provided pursuant to any Underlying Fund's advisory contract. Such finding, and the basis upon which the finding was made, will be recorded fully in the minute books of the Spectrum Fund.

5. Any sales charges and other service fees charged with respect to securities of spectrum Fund, when aggregated with any sales charges and service fees paid by spectrum Fund with respect to securities of the Underlying Funds, shall not exceed the limits set forth in Article III, section 26, of the Rules of Fair Practice of the National Association of Securities Dealers, Inc.

6. Applicants agree to provide the following information, in electronic format, to the Chief Financial Analyst of the SEC's Division of Investment Management: monthly average total assets for each Spectrum Fund portfolio

and each of its Underlying Funds; monthly purchases and redemptions (other than by exchange) for each Spectrum Fund portfolio and each of its Underlying Funds; monthly exchanges into and out of each Spectrum Fund portfolio and each of its Underlying Funds; month-end allocations of each Spectrum Fund portfolio's assets among its Underlying Funds; annual expense ratios for each Spectrum Fund portfolio and each of its Underlying Funds; and a description of any vote taken by the shareholders of any Underlying Fund, including a statement of the percentage of votes cast for and against the proposal by the Spectrum Fund and by the other shareholders of the Underlying Funds. Such information will be provided as soon as reasonably practicable following each fiscal year-end of the Spectrum Fund (unless the Chief Financial Analyst shall notify applicants in writing that such information need no longer be submitted).

By the Commission.  
Margaret H. McFarland,

[Investment Company Act Release No. 21372; 812-9540]

#### Vanguard STAR Fund, et al.; Notice of Application

September 22, 1995.

**AGENCY:** Securities and Exchange Commission ("SEC").

**ACTION:** Notice of application for an order under the Investment Company Act of 1940 (the "Act").

**APPLICANTS:** Vanguard STAR Fund ("STAR"); The Vanguard Group, Inc. ("TVGI"); and Vanguard Balanced Index Fund, Inc., Vanguard Index Trust, Vanguard International Equity Index Fund, Inc., Vanguard Bond Index Fund, Inc., Vanguard Institutional Portfolios, Inc., Vanguard California Tax-Free Fund, Vanguard New York Insured Tax-Free Fund, Vanguard Pennsylvania Tax-Free Fund, Vanguard Fixed Income Securities Fund, Inc., Vanguard Preferred Stock Fund, Vanguard Asset Allocation Fund, Inc., Vanguard/Trustees' Equity Fund, Vanguard/Windsor Funds, Inc., Vanguard Tax-Managed Fund, Inc., Vanguard Florida Insured Tax-Free Fund, Inc., Vanguard/Primecap Fund, Inc., Vanguard/Morgan Growth Fund, Inc., Vanguard Variable Insurance Fund, Vanguard Money Market Reserves, Inc., Vanguard Municipal Bond Fund, Inc., Vanguard New Jersey Tax-Free Fund, Vanguard

Ohio Tax-Free Fund, Vanguard/Wellesley Income Fund, Inc., Vanguard Convertible Securities Fund, Inc., Vanguard/Wellington Fund, Inc., Vanguard Equity Income Fund, Inc., Vanguard Quantitative Portfolios, Inc., Gemini II, Inc., Vanguard World Fund, Inc., Vanguard Explorer Fund, Inc., Vanguard Specialized Portfolios, Inc., Vanguard Admiral Funds, Inc., and any future registered management investment company, or portfolio thereof, in which STAR invests that (a) is part of a group of investment companies which holds itself out to investors as related companies for purposes of investment and investor services, and (b) obtains corporate management, administrative, and distribution services from TVGI (together, the "Funds").

**RELEVANT ACT SECTIONS:** Order requested under section 6(c) of the Act from section 12(d)(1) of the Act, under sections 6(c) and 17(b) of the act from section 17(a) of the Act, and pursuant to section 17(d) of the Act and rule 17d-1 thereunder.

**SUMMARY OF APPLICATION:** Applicants request an order that would supersede a prior order. The prior order permits STAR to operate as a "fund of funds," subject to the limitation that STAR may not acquire more than 10% of the outstanding voting shares of any acquired fund. The requested order would permit STAR to acquire up to 100% of the voting shares of any acquired fund. The requested order would also permit the boards of trustees/directors of the funds constituting the Vanguard Group of Investment Companies, as defined below, to modify the Funds' service agreement to provide that STAR may become a member of The Vanguard Group of Investment Companies without bearing duplicative capital contribution or expense allocation costs.

**FILING DATES:** The application was filed on March 17, 1995, and was amended on August 17, 1995.

**HEARING OR NOTIFICATION OF HEARING:** An order granting the application will be issued unless the SBC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 17, 1995, and should be accompanied by proof of service on applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested.

Persons may request notification of a hearing by writing to the SEC's Secretary.

**ADDRESSES:** Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, c/o The Vanguard Group, Inc., P.O. Box 2600, Valley Forge, Pennsylvania 19482.

**FOR FURTHER INFORMATION CONTACT:** Sarah A. Wagman, Staff Attorney, at (202) 942-0654, or C. David Messman, Branch Chief, at (202) 942-0564 (Division of Investment Management, Office of Investment Company Regulation).

**SUPPLEMENTARY INFORMATION:** The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch.

#### Applicants' Representations

1. The Funds are thirty-two registered management investment companies that currently offer shares in 86 portfolios (the "Portfolios"). The Funds organized and operate TVGI, pursuant to the terms of a Second Amended and Restated Funds' Service Agreement dated May 15, 1993 (the "Funds' Service Agreement") in order to provide the Funds with services on an "internalized," at-cost, no-load basis.<sup>1</sup> Each Fund is organized as a business trust under Pennsylvania law, or as a Maryland corporation. Each Fund has a board of directors/trustees (the "Board of Directors") that consists of the same ten persons, eight of whom are not "interested persons" under section 2(a)(19) of the Act. Nine of the directors compose the board of directors of TVGI. The Funds that are party to the Funds' Service Agreement constitute The Vanguard Group of Investment Companies ("The Vanguard Group").

2. TVGI, a registered investment adviser under the Investment Advisers Act of 1940, is a wholly and jointly owned and capitalized subsidiary of the Funds. TVGI provides to the Funds on an at-cost basis almost all of their necessary corporate management,

administrative, and shareholder accounting services, distribution services, and, for certain Portfolios, advisory services. TVGI also provides specified services to STAR and the Vanguard Institutional Index Fund, funds that do not contribute to the capitol of TVGI.

3. STAR is a no-load, open-end, registered management investment company which operates as a "fund of funds," investing in shares of certain specified Vanguard Portfolios rather than investing directly in portfolio securities. STAR operates under the terms of a prior order (the "STAR Order").<sup>2</sup> STAR commenced operations on March 29, 1985 and began offering shares of one portfolio, now the "STAR Portfolio." Since July 17, 1994, STAR has offered shares of four additional portfolios (the Income Portfolio, the Conservative Growth Portfolio, the Moderate Growth Portfolio, and the Growth Portfolio) designated the "LIFEStrategy Portfolios" (each portfolio of STAR is hereinafter referred to as a "STAR Fund Portfolio"). Applicants request that the relief sought herein apply to any future "fund of funds," whether organized as an investment company or as a portfolio thereof, which operates in all material respects in accordance with the representations contained in the application, complies with the conditions to the requested order, and is a Vanguard Fund or is operated by TVGI (a "Vanguard Fund of Funds").

4. In the STAR Order, the Commission granted STAR an exemption under section 6(c) from section 12(d)(1), and pursuant to section 17(d) and rule 17d-1, to permit STAR to operate as a "fund of funds," subject to the condition, among others, that STAR may not acquire more than 10% of the outstanding voting shares of any acquired Fund.<sup>3</sup> Applicants request that this limitation be eliminated, so that STAR may acquire up to 100% of the voting shares of any Fund.

5. Initially, the STAR Portfolio invested its assets in shares of four specified Vanguard Portfolios (two equity funds, one fixed income fund, and one money market fund). Currently, the STAR Portfolio invests 60-70% of its net assets in six Portfolios that invest primarily in equity securities, and 30-

<sup>1</sup> The Funds operate TVGI pursuant to a number of prior exemptive orders. The Vanguard Group, Inc., Investment Company Act Release Nos. 19011 (Oct. 9, 1992) (notice) and 19184 (Dec. 29, 1992) (order); Wellington Fund, Inc., Investment Company Act Release Nos. 15788 (June 9, 1987) (notice) and 15846 (July 2, 1987) (order); Wellington Fund, Inc., Investment Company Act Release Nos. 13566 (Oct. 5, 1983) (notice) and 13613 (Nov. 3, 1983) (order); The Vanguard Group, Inc., Investment Company Act Release Nos. 11718 (Apr. 6, 1981) (notice) and 11761 (May 4, 1981) (order); The Vanguard Group, Inc., Investment Company Act Release Nos. 9850 (July 15, 1977) (notice), and 9927 (Sept. 13, 1977) (temporary order) and 11645 (Feb. 25, 1981) (order); Wellington Fund, Inc., Investment Company Act Release Nos. 8644 (Jan. 17, 1975) and 8676 (Feb. 18, 1975) (order).

<sup>2</sup> Vanguard Special Tax-Advantaged Retirement Fund, Inc., Investment Company Act Release Nos. 14153 (Sept. 12, 1984) (notice) and 14361 (Feb. 7, 1985) (order).

<sup>3</sup> STAR was also subject to conditions requiring that it vote its shares in any acquired Fund in proportion to the vote of all the other shareholders in that Fund, and that it allocate its assets to any acquired fund within a 25% range.

40% of its net assets in three Portfolios (including a money market portfolio) that invest primarily in fixed income securities. Since its inception, the STAR Portfolio has maintained fixed allocation targets for its investments in equity, fixed income, and money market Portfolios.

6. The LIFEStrategy Portfolios' different asset allocations provide investors with four distinct options that meet a wide array of investor needs. Currently, each LIFEStrategy Portfolio invests its assets in a "fixed mix" of shares of Vanguard Portfolios to provide its investors with a targeted asset allocation. Each LIFEStrategy Portfolio currently invests 30% of its net assets in the Vanguard Asset Allocation Fund (the "Asset Allocation Fund") which allocates its assets among an equity portfolio, a bond portfolio, and money market instruments.

7. As of December 31, 1994, the Asset Allocation Fund had assets of \$1.1 billion and the LIFEStrategy Portfolios had invested \$37.6 million in the Asset Allocation Fund. Because of the 10% limitation imposed by the STAR Order upon investments by STAR in any Vanguard Fund, at December 31, 1994 the maximum amount which STAR could invest in the Asset Allocation Fund was \$110 million. As a result of the 10% limitation, when the LIFEStrategy Portfolios reach assets of approximately \$400 million (at March 1, 1995 assets were \$215 million), applicants state that the only solutions will be for the LIFEStrategy Portfolios to begin investing directly in securities at an additional cost estimated to be \$100,000 per LIFEStrategy Portfolio,<sup>4</sup> or to cease offering shares because Vanguard has no comparable and suitable alternative Portfolio in which the LIFEStrategy Portfolios may invest.

8. STAR has entered into a special servicing agreement (the "STAR Servicing Agreement") with TVGI, under which TVGI provides all management, administrative, and distribution services to STAR and acts as STAR's dividend disbursing, shareholder servicing, and transfer agent. To avoid imposing a duplicate capital contribution on STAR's shareholders, STAR is not a party to the general Funds' Service Agreement and, therefore, is not a member of The Vanguard Group.

<sup>4</sup>The additional cost would be caused because each LIFEStrategy Portfolio would own shares of a number of issuers rather than shares of a single fund, and would incur additional custody fees; investment portfolio, tax accounting, and administrative expenses; audit fees; and printing and postage costs.

9. Under the STAR Servicing Agreement, the STAR Fund Portfolios are obligated to pay for services rendered by outside parties, including auditors, STAR's custodian, and outside legal counsel. The STAR Servicing Agreement provides, however, that each STAR Fund Portfolio's expenses will be offset, in whole or in part, by a "credit" from TVGI for: (a) That STAR Fund Portfolio's contributions to the cost of operating the underlying Vanguard Portfolios in which it invests, and (b) certain savings in transfer agency, administrative, and marketing costs that TVGI derives from the operation of the STAR Fund Portfolios. These reimbursements by TVGI have been, and should continue to be, sufficient to offset all of the STAR Fund Portfolios' expenses.

10. Under current provisions of the Funds' Service Agreement, STAR cannot become a member of the Vanguard Group without making a capital investment in TVGI, and being allocated a portion of TVGI's corporate management and distribution expenses, even though STAR shareholders already bear a portion of these expenses through the fees they pay with respect to the Portfolios. The Boards of Directors of the Funds propose to amend the Funds' Service Agreement to permit a Vanguard Fund of Funds, such as STAR, whether structured as a separate investment company or as a portfolio of a Vanguard Fund, to become a member of The Vanguard Group. Applicants believe that, although the STAR Service Agreement has worked well in practice, the same result can be achieved by amending the Funds' Service Agreement to permit a Vanguard Fund of Funds to become a member of The Vanguard Group without a requirement that such fund of funds bear the TVGI capital contribution and expense allocation assessments borne by the other Vanguard Funds.

11. The amendment to the Funds' Service Agreement would provide, in substance, that: (a) The obligation of a Vanguard Fund of Funds to make capital contributions to TVGI would be reduced or eliminated to the extent that its assets consist of shares of Vanguard Portfolios that are already contributing to the capital of TVGI; (b) a Vanguard Fund of Funds would not be allocated any portion of the corporate management and administrative expenses, or the distribution expenses, that are allocated under the Funds' Service Agreement; and (c) a Vanguard Fund of Funds would be obligated to pay for services rendered by outside parties and certain other direct Vanguard Fund of Funds expenses

customarily borne by each Fund pursuant to the Funds' Service Agreement, subject to the partial or complete elimination of these charges by the savings which would accrue to the benefit of the Vanguard Portfolios.

#### Applicants' Legal Analysis

##### A. Section 12(d)(1)

1. Section 12(d)(1)(A) provides that no registered investment company may acquire securities of another investment company if such securities represent more than 3% of the acquired company's outstanding voting stock, more than 5% of the acquiring company's total assets, or if such securities, together with the securities of any other acquired investment companies, represent more than 10% of the acquiring company's total assets. Section 12(d)(1)(B) provides that no registered open-end investment company may sell its securities to another investment company if the sale will cause the acquiring company to own more than 3% of the acquired company's voting stock, or if the sale will cause more than 10% of the acquired company's voting stock to be owned by investment companies.

2. Section 6(c) provides that the SEC may exempt persons or transactions if, and to the extent that, such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants request an order under section 6(c) exempting them from section 12(d)(1) to permit STAR, and any future Vanguard Fund of Funds, to invest in the Vanguard Portfolios in excess of the percentage limitations of section 12(d)(1). The STAR Order permitted STAR to acquire up to 10% of any acquired Vanguard Fund's outstanding voting stock. The requested order would eliminate this 10% limitation.

3. STAR was created to provide investors with an investment service through which they could diversify and maintain investment holdings balanced among asset types or classes of assets selected to meet long-term retirement and savings objectives. Currently, more than 287,000 investors have entrusted more than \$3.7 billion to STAR. Absent an investment service such as STAR, an "asset allocation" approach to investing requires that an investor establish accounts in two or more portfolios, and, at least periodically, take the steps to "rebalance" his or her account so that the ratio selected is maintained. If Vanguard were not able to offer STAR as an investment alternative, it would

have to create and operate a variety of asset allocation funds at substantial additional expense, notwithstanding the fact that suitable Portfolios otherwise exist.

4. Section 12(d)(1) was intended to mitigate or eliminate actual or potential abuses which might arise when one investment company acquires shares of another investment company. These abuses include the acquiring fund imposing undue influence over the management of the acquired funds through the threat of large-scale redemptions, the acquisition by the acquiring company of voting control of the acquired company, the layering of sales charges, advisory fees, and administrative costs, and the creation of a complex pyramidal structure which may be confusing to investors.

5. Applicants believe that none of these potential or actual abuses are present in the structure of STAR. STAR does not exercise any influence over the management of the acquired Portfolios by the threat of redemptions. STAR does not hold out to investors that STAR is seeking to exercise investment judgment to time the market or to pick the "better" or "best" performing funds. Instead, STAR enables Vanguard to offer an asset allocation service to investors on a cost-effective basis. STAR currently, as a matter of fundamental policy, invests its assets solely in specified Portfolios within defined ranges.<sup>5</sup> Redemptions from the acquired Portfolios will result solely in the ordinary course of business as a result of STAR's receipt of net redemption requests from its shareholders. The acquired Portfolios, as a matter of policy and practice, are at all times at least 85% invested in liquid, publicly traded securities. Thus, they would have no reason to hold a higher than normal cash position to protect their other shareholders against potential redemptions by STAR. As well, the actual results of ten years of the STAR Portfolio's investments in the acquired Portfolios demonstrates that STAR's investments tend to reduce the redemption rates of the acquired Portfolios.<sup>6</sup>

<sup>5</sup> If the requested order is granted, STAR may seek shareholder approval to eliminate this limitation as a matter of fundamental policy. STAR would continue to disclose in its prospectus and other documents the Vanguard Funds in which it intends to invest.

<sup>6</sup> For each of the 10 years in which the STAR Portfolio has operated, the STAR Portfolio's redemption rates, with one exception, have been somewhat or substantially below the redemption rates of the Portfolios. In 1994, for example, the STAR Portfolio experienced a redemption rate of 7%, while the average redemption rate for the acquired Vanguard Portfolios was 19.7%.

6. The structure of STAR contains no layering of sales charges, advisory fees, or administrative costs. Neither STAR nor the Portfolios imposes any sales charges or fees pursuant to rule 12b-1. Although STAR may pay advisory fees at the level of the Vanguard Portfolios, it does not intend to pay an advisory fee at the STAR level for advisory services related to investments in any Vanguard Portfolios. Similarly, virtually all administrative fees are imposed at the Portfolio level, and shareholders of STAR will bear a portion of the fees only in proportion to their holdings of the Portfolios.

7. STAR does not have a complex structure that would make it difficult for a shareholder to determine the true value of his or her interest in the Portfolios. Indeed, the 10% limitation contained in the STAR Order operates to increase the complexity of the STAR Portfolio by requiring it to acquire shares of additional Portfolios which would not otherwise acquire, and of the LIFEStrategy Portfolios if they must invest directly in securities once they have reached the 10% limit with respect to the Vanguard Asset Allocation Fund.

8. In addition to not containing the actual and potential abuses which led to the enactment of section 12(d)(1), applicants believe that the structure of STAR provides a number of benefits to STAR and its shareholders, including: (a) An increase in the variety of investment options available to shareholders; (b) a simpler method for an investor to allocate his or her assets on a continuous basis without, at a minimum, the inconvenience of initiating the steps periodically to "rebalance" his or her portfolio; (c) a modest reduction in the investor's account maintenance costs, because an investor will not need to maintain two or more accounts to attain a desired allocation; and (d) the lower expense ratios and increased diversification which result from a new STAR Fund Portfolio's ability to take advantage of the existing asset base created by the acquired Funds.

9. The acquired Vanguard Portfolios benefit from the existence of STAR in four major respects: (a) The likely addition of assets from STAR will further reduce the expense ratios of the Portfolios; (b) to the extent many shareholders of STAR would otherwise open accounts with each of the Portfolios, the number of accounts maintained by the Portfolios in the aggregate, and the resulting transfer agency fees, will be reduced; (c) the costs of printing and mailing prospectuses, sales material, and periodic reports will be reduced because

The Vanguard Group can combine information concerning two or more funds in a single document; and (d) the Portfolios' redemption rates are likely to be lower due to the long-term nature of STAR's assets. As well, all of the Vanguard Funds are likely to benefit from the existence of STAR since increased distribution and the resulting addition of assets to The Vanguard Group produces cost savings and other benefits for all Funds even if they are not the acquired Funds.

#### *B. Section 17(a)*

1. Section 17(a) makes it unlawful for an affiliated person of a registered investment company to sell securities to, or purchase securities from, the company. STAR and the acquired Vanguard Funds may be considered affiliated persons because they share common officers and/or directors/trustees. An acquired Fund's issuance of its shares to STAR may be considered a sale prohibited by section 17(a).

2. Section 17(b) provides that the SEC shall exempt a proposed transaction from section 17(a) if evidence establishes that: (a) The terms of the proposed transaction are reasonable and fair and do not involve overreaching; (b) the proposed transaction is consistent with the policies of the registered investment company involved; and (c) the proposed transaction is consistent with the general provisions of the Act. Applicants request an exemption under sections 6(c) and 17(b) to permit the Portfolios to sell their shares to STAR.

3. Applicants believe that the proposed transactions meet the standards of sections 6(c) and 17(b). All purchases and redemptions of shares of a Vanguard Portfolio will be effected at current net asset value. STAR's purchase and sale of shares of the Vanguard Portfolios is consistent with STAR's policy, as set forth in its registration statement. Applicants also believe that the proposed transactions are consistent with the general purposes of the Act.

#### *C. Section 17(d) and Rule 17d-1*

1. Section 17(d) prohibits an affiliated person of the registered investment company, or an affiliated person of such person, acting as principal, from effecting any transaction in which such investment company is a joint, or joint and several, participant with such person in contravention of SEC rules and regulations. Rule 17d-1 provides that an affiliated person of a registered investment company or an affiliated person of such person, acting as principal, shall not participate in, or effect any transaction in connection

with, any joint enterprise or other joint arrangement in which the registered investment company is a participant unless the SEC has issued an order approving the arrangement. The Vanguard Funds and TVGI are engaged in a joint enterprise within the meaning of section 17(d).

2. Applicants request an exemption under section 17(d) and rule 17d-1 to permit the Boards of Directors of the Vanguard Funds to modify the Funds' Service Agreement. Applicants believe that, for the reasons discussed above, the proposed amendments to the Funds' Service Agreement are consistent with the standards of rule 17d-1. Requiring STAR to make an asset-related capital contribution to TVGI, when the assets of STAR will already be bearing a capital assessment indirectly at the Portfolio level, would unfairly impose duplicative expenses upon the shareholders of STAR, and confer an unjustified benefit on the acquired Portfolios, as well as the other Vanguard Funds, which will be deriving other benefits from STAR's participation in TVGI.

**Applicants' Conditions**

Applicants agree that the order granting the requested relief shall be subject to the following conditions:

1. STAR and each acquired Vanguard Fund will be part of a group of investment companies which holds itself out to investors as related companies for purposes of investment and investor services, and which obtains corporate management, administrative, and distribution services from TVGI.

2. No acquired Vanguard fund shall acquire securities of any other investment company in excess of the limits contained in section 12(d)(1)(A) of the Act.

3. A majority of the directors of STAR will not be "interested persons," as defined in a section 2(a)(19) of the Act.

4. Before approving any advisory contract under section 15 of the Act, the Board of Directors of STAR, including a majority of the directors who are not "interested persons," as defined in section 2(a)(19), shall find that advisory fees charged under such contract are based on services provided that are in addition to, rather than duplicative of, services provided pursuant to any acquired vanguard fund's advisory contract. Such finding, and the basis upon which the finding was made, will be recorded fully in the minute books of STAR.

5. Any sales charges or service fees charged with respect to securities of STAR, when aggregated with any sales

charges or service fees paid by STAR with respect to shares of the acquired Vanguard Funds, shall not exceed the limits set forth in Article III section 26, of the Rules of Fair Practice of the National Association of Securities Dealers, Inc.

6. The applicants agree to provide the following information, in electronic format, to the Chief Financial Analyst of the SEC's Division of Investment Management: Monthly average total assets of each STAR Fund Portfolio and each of its acquired Vanguard funds; monthly purchases and redemptions (other than by exchange) for each STAR Fund Portfolio and each of its acquired Vanguard Funds; monthly exchanges into and out of each STAR Fund Portfolio and each of its acquired Vanguard Funds; month-end allocations of each STAR Fund Portfolio's assets among its acquired Funds; annual expense ratios for each STAR Fund Portfolio and each of its acquired Vanguard Funds; and a description of any vote taken by the shareholders of any acquired Vanguard Fund, including a statement of the percentage of votes cast for and against the proposal by STAR and by the other shareholders of the acquired Vanguard Funds. Such information will be provided as soon as reasonably practicable following each fiscal year-end of STAR (unless the Chief Financial Analyst shall notify applicants in writing that such information need no longer be submitted).

By the Commission,  
Margaret H. McFarland,  
*Deputy Secretary.*

**SMALL BUSINESS ADMINISTRATION**

**[Declaration of Disaster Loan Area #2806; Amendment #2]**

**Ohio; Declaration of Disaster Loan Area**

The above-numbered Declaration is hereby amended, effective September 13, 1995, to include Washington County in the State of Ohio as a disaster area due to damages caused by severe storms and flooding which occurred August 7-18, 1995.

In addition, applications for economic injury loans from small businesses located in the contiguous counties of Athens, Monroe, Morgan, and Noble in the State of Ohio, and Pleasants, Tyler, and Wood Counties in the State of West Virginia may be filed until the specified

date at the previously designated location.

All other information remains the same, i.e., the termination date for filing applications for physical damage is October 24, 1995, and for loans for economic injury the deadline is May 28, 1996.

The economic injury number for the State of West Virginia is 863800.

**Equity Investment Partners, L.P. (Application No. 99000181); Notice of Filing of an Application for a License To Operate as a Small Business Investment Company**

Notice is hereby given of the filing of an application with the Small Business Administration (SBA) pursuant to Section 107.102 of the Regulations governing small business investment companies (13 CFR 107.102 (1994)) by Equity Investment Partners, L.P. ("the Applicant"), 500 Post Road East, Westport, Connecticut 06880, for a license to operate as a small business investment company (SBIC) under the Small Business Investment Act of 1958 ("the Act"), as amended (15 U.S.C. 661 *et. seq.*), and the Rules and Regulations promulgated thereunder. The Applicant is a limited partnership formed under Delaware law. The General Partner of the Applicant is Equity Investment Partners, L.L.C. The affairs of the Applicant will be managed by Equity Investment Advisors, L.L.C. ("the Manager"). Principals of the Manager are Messrs. Stephen D. Weinroth, G. Chris Andersen and Randolph W. Lenz. Messrs. Russell B. Pyne and George B. Schwartz will assist as a source of deals and in recommending and monitoring investments, and will be responsible for day-to-day administration of the Manager. The Applicant will have capitalization of \$30 million and will be a source of equity financings for

qualified small business concerns. Primary focus will be on the manufacturing, services and communications businesses throughout the United States. Factors in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of success of the new company under their management, including profitability and financial soundness in accordance with the Act and Regulations.

Notice is hereby given that any person may, not later than 15 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Associate Administrator for Investment, Small Business Administration, 409 3rd Street, SW, Washington, D.C. 20416.

A copy of this Notice will be published in a newspaper of general circulation in Westport, Connecticut.

BILLING CODE 8025-01-P

**DEPARTMENT OF TRANSPORTATION**

**Federal Aviation Administration**

[Docket No. 27782]

RIN 2120-AF90

**Proposed Policy Regarding Airport Rates and Charges**

**AGENCY:** Department of Transportation (DOT), Federal Aviation Administration (FAA).

**ACTION:** Notice of meeting.

**SUMMARY:** On September 8, 1995, the Department of Transportation and the Federal Aviation Administration published a supplemental notice of a proposed policy statement in the Federal Register (60 FR 47012) with respect to fair and reasonable and not unjustly discriminatory airport rates and charges and announced that at least two meetings for oral views would be held. The proposed policy statement sets forth DOT/FAA policy regarding airport practices that DOT/FAA would consider to be consistent with Federal requirements for airport rates and charges for aeronautical uses. This notice announces the date, time, location and procedures for the first meeting. A separate notice will be published about additional meetings.

**DATES:** The public meeting will be held on October 17, 1995, starting at 9 a.m. Pursuant to the September 8, 1995 Supplemental Notice, written comments are also invited and must be received on or before October 23, 1995.

**ADDRESSES:** The public meeting will be held at the Department of Transportation, Nassif Bldg., Room 2230, 400 7th St. SW., Washington, DC 20590. Persons unable to attend the meeting may mail their comments in quadruplicate to: Federal Aviation Administration, Office of Chief Counsel, Attention: Rules Docket (AGC-200), Dockets No. 27782, 800 Independence Avenue, SW., Washington, DC 20591.

**FOR FURTHER INFORMATION CONTACT:** Requests to participate in public meeting should be directed to Kevin Hehir at (202) 267-8224, Federal Aviation Administration, Airport Safety and Compliance, 800 Independence Ave. SW., Washington, DC 20591.

Questions concerning the subject matter of the meeting may be directed to Barry Molar, Federal Aviation Administration, Airports Law Branch, AGC-610, 800 Independence Ave. SW., Washington, DC 20591; telephone (202) 267-3473.

The full text of the Supplemental Notice is also available on the Office of Airport Safety and Standards Electronic Bulletin Board. Persons with a computer and modem, and communications software, can access the bulletin board by setting the modem parameters to match those of the bulletin board before dialing. Upon connection with the bulletin board for the first time, users are required to register by answering a short questionnaire. The bulletin board is menu-driven, and detailed instructions for downloading files are provided. The Supplemental Notice cannot be read on-line, but can be easily downloaded and saved.

The bulletin board parameters are as follows:

*Telephone number:* (202) 267-5205, or 1-800-224-6287 via FAA Corporate Bulletin Board

*Data bits:* 8

*Parity:* None

*Stop bits:* 1

*Baud rate:* 300/1200/2400/9600/14400

*System operator:* Jeff Rapol, AAS-200; (202) 267-7474

**SUPPLEMENTARY INFORMATION:**

**Participation at the Meeting**

Request from persons who wish to participate at the public meeting should be received by the FAA no later than October 10, 1995. Such requests should be submitted to Kevin Hehir as listed in the section title **FOR FURTHER**

**INFORMATION CONTACT** and should include a statement of the interest represented by the speaker, e.g., as a representative of an airport proprietor, an air carrier, a foreign air carrier, or other aeronautical user. Requests received after the date specified above will be scheduled if they can be accommodated, but in view of the format for presentation, as discussed below, accommodation of late requests cannot be assured. The FAA will prepare an agenda of speakers that will be available at the time of the meeting.

**Background**

On September 8, 1995, the DOT and FAA jointly published in the Federal Register a supplemental notice of proposed policy regarding fair and reasonable nondiscriminatory airport rates and charges (40 FR 47012). Specifically, the supplemental notice of proposed policy sets forth proposed revisions to the interim final policy on airport rates and charges published jointly by the DOT and FAA on February 3, 1995 (60 FR 6906). In the February 3 publication, DOT/FAA requested comments on the interim policy, and the supplemental notice reflects DOT/FAA consideration of the comments received. DOT/FAA have published the supplemental notice of proposed policy for comment and are conducting public meetings to assure that any modifications in the interim policy are based on as full an understanding of the industry practices as possible and to provide a full opportunity for industry input into the policy. The meeting will be structured to permit informal discussion among the various interested parties rather than simply delivery of prepared comments for the record.

**Meeting Procedures**

The following procedures are established to facilitate the meeting:

(1) There will be no admission fee or other charge to attend or to participate in the meeting. The meeting will be open to all persons who have requested in advance to participate. Registration will be available on the day of the meeting (between 8:00 a.m. and 9:00 a.m.). However, in view of the format of the meetings, there is no assurance that persons who register on the day of the meeting will have the opportunity to fully participate.

(2) There will be a morning and afternoon break as well as a break for lunch.

(3) The meeting may adjourn early if scheduled panels of speakers complete their presentations in less time than is scheduled for the meeting.

(4) DOT/FAA will try to accommodate all speakers in the context of the format for this public meeting. However, the FAA reserves the right to exclude some speakers if necessary to assure that all panels represent a balance of viewpoints and concerns.

(5) Sign and oral interpretation can be made available at the meeting, as well as an assistive listening device, if requested at the above number by October 15, 1995.

(6) Representatives of the FAA will preside over the meeting. A panel of DOT and FAA personnel will hear comments and question other participants. Presentations by commenters will be made on panels of up to 5 persons, rather than individually. The Department will assign interested persons to panels before the meeting, and will attempt to have each panel representative of different segments of the industry. At a minimum, each panel should include both airline and airport representatives.

(7) Each participant on a panel may make a brief opening statement and submit written materials for the record. After completion of the statements by all members of the panel, agency personnel will question commenters on their statements and views, and may inquire into commenters' experience with specific industry practices. Appropriate questions may be directed by one panel member to another, through the agency moderator. Questions and comments from the floor will be taken if time permits.

(8) Opening statements will be limited to 2 minutes. Each panel will be limited to no more than one hour. The meeting will include as many panels as are necessary to accommodate all interested commenters.

(9) The meeting will be recorded by a court reporter. A transcript of the meeting and any material accepted by the panel during the meeting will be included in the public docket. Any person who is interested in purchasing a copy of the transcript should contact the court reporter directly. This information will be available at the meeting.

(10) The DOT/FAA will review and consider all material presented by participants at the meeting. Position papers or material presenting views or information related to the proposed policy statement may be accepted at the discretion of the presiding officer and subsequently placed in the public docket. The FAA requests that persons participating in the meeting provide 10 copies of all materials to be presented for distribution to the panel members; other copies may be provided to the

audience at the discretion of the participant.

(11) Statements made by the members of the meeting panel are intended to facilitate discussion of the issues or to clarify issues. Any statement made during the meeting by a member of the panel is not intended to be, and should not be construed as, a position of the FAA.

Issued in Washington, DC, on September 26, 1995.

Cynthia Rich,

*Assistant Administrator for Airports.*

BILLING CODE 4910-13-M

### Centers of Excellence in Operations Research; Meeting

**AGENCY:** Federal Aviation Administration (FAA), DOT

**ACTION:** Notice of meeting.

**SUMMARY:** Notice is hereby given of an information meeting regarding technical proposals for the establishment of an FAA Aviation Research Center of Excellence in Operations Research. The FAA will hold the meeting to explain further the FAA research needs, procedures, and criteria for the selection of the FAA Aviation Research Center of Excellence in Operations Research. Questions and suggestions from attendees will be addressed at this meeting. Interested parties are encouraged, but not required, to attend the informational meeting.

**DATES:** The meeting will be held November 1, 1995, from 10 a.m. to 4 p.m.

**ADDRESSES:** The meeting will be held in the Media Briefing Room, Ninth Floor, FAA Headquarters Building, 800 Independence Avenue, Washington, DC 20591.

**FOR FURTHER INFORMATION CONTACT:** The Office of Research and Technology Applications, AAR-201, FAA Aviation Research Centers of Excellence Program Office, Building 270, Atlantic City International Airport, NJ 08405, telephone (609) 485-5043/4042, facsimile (609) 485-6509.

**SUPPLEMENTARY INFORMATION:** The FAA intends to award a 50-50 cost share cooperative agreement to establish a COE in operations research at a qualified college or university. The cooperative agreement will be awarded in 3 year increments up to a maximum of 10 years. It is the FAA's intent to fund the first three years at \$1.5 million. It is also the intent of the FAA to award a 10 year, sole-source indefinite delivery quantity contract to the winner of the

competition, under which orders may be placed for development products up to a maximum of \$10 million.

The Center will conduct research in the following areas: Airport surface operations, airport terminal operations and en route flight, external flight hazards, and concomitant systems.

The FAA is responsible for developing standards for a variety of aviation-related technologies including capacity, controller workload, threat modeling and resource allocation.

The COE for Operations Research will assist the FAA in the pursuit of advanced operations methodologies which are validated through full scale testing.

The FAA will provide funding for a long-term partnership to establish and operate a "World Class" COE in support of Operations Research. The FAA encourages offerors to develop a team of academia, industry, state/local government and other government agencies. The recipient is required to match FAA funds with non-federal funding over the term of the cooperative agreement. Matching funds are not required for any orders placed under the contract.

#### Selection Criteria

The COE will be selected primarily on technical merit and the ability of the team to meet the following criteria:

- The extent to which the needs of the State in which the applicant is located are representative of the needs of the region for improved air transportation services and facilities.
- The demonstrated research and extension resources available to the applicant for carrying out the intent of the legislation.
- The capability of the applicant to provide leadership in making national and regional contributions to the solution of both long-range and immediate air transportation problems.
- The extent to which the applicant has an established air transportation program.
- The demonstrated ability of the applicant to disseminate results of air transportation research and educational programs through a statewide or regionwide continuing education program.
- The projects that the applicant proposes to carry out under the grant.

Those persons wishing to attend this informational meeting are requested to register by no later than October 30, 1995. To register for the meeting or to obtain more information about the meeting, contact Ms. Patricia Watts,

(609) 485-5043, or Dave Nesterok (609) 485-4042 or facsimile (609) 485-6509 at the Office of Research and Technology Applications, FAA Aviation Research Centers of Excellence Program Office, at the FAA Technical Center, Building 270, Atlantic City International Airport, NJ 08405 or facsimile 609-485-6509.

Issued in Washington, DC, on September 26, 1995.

Andres G. Zellweger,

*Director, Office of Aviation Research.*

### RTCA, Inc. Special Committee 159; Minimum Operational Performance Standards for Airborne Navigation Equipment Using Global Positioning System (GPS)

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C., Appendix 2), notice is hereby given for a Special Committee 159 meeting to be held October 23-27, 1995, starting at 9 a.m. The meeting will be held at RTCA, 1140 Connecticut Avenue, N.W., Suite 1020, Washington, DC, 20036.

The agenda for October 23, October 24, and October 26 will address specific working group issues as follows: October 23-24, Working Group 6, Interference Issues; October 24, Working Group 3A, Inertial; October 26 (Afternoon), Working Group 4, Precision Landing Guidance & Airport Surface Surveillance.

The agenda for the October 25-27 Plenary Session will be as follows: (1) Chairman's Introductory Remarks; (2) Review and Approval of Minutes of the Previous Meeting; (3) Review Working Group (WG) Progress and Identify Issues for Resolution: a. GPS/GLONASS (WG-1); b. GPS/GIC/WADGNSS (WG-2); c. GPS/Other Navigation Systems (WG-3A/B); d. GPS/Precision Landing Guidance and Airport Surface Surveillance (WG-4A/B); e. Fault Detection and Isolation (WG-5); f. Interference Issues (WG-6); g. Antenna Performance (WG-7); (4) Review of EUROCAE Activities; (5) Review/Approval of WAAS MOPS; (6) Assignment/Review of Future Work; (7) Other Business; (8) Date and Place of Next Meeting.

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1140 Connecticut Avenue, N.W., Suite 1020, Washington, D.C. 20036; (202) 833-9339 (phone) or (202) 833-9434 (fax). Members of the public may present a written statement to the committee at any time.

Issued in Washington, D.C., on September 26, 1995.

Janice L. Peters,

*Designated Official.*

BILLING CODE 4810-13-M

### Notice of Intent to Rule on Application To Impose and Use the Revenue From a Passenger Facility Charge (PFC) at Sarasota Bradenton International Airport, Sarasota, FL

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of intent to rule on application.

**SUMMARY:** The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Sarasota Bradenton International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget

Reconciliation Act of 1990) (Pub. L. 101-508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

**DATES:** Comments must be received on or before October 30, 1995.

**ADDRESSES:** Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Orlando Airports District Office, 9677 Tradeport Drive, Suite 130, Orlando, Florida 32827

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Raymond J. Wise, Interim Executive Director of the Sarasota Manatee Airport Authority at the following address: Sarasota Manatee Airport Authority, 6000 Airport Circle, Sarasota, Florida 34243.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Sarasota Manatee Airport Authority under section 158.23 of Part 158.

**FOR FURTHER INFORMATION CONTACT:** Peggy Jones, Airport Plans and Programs Manager, 9677 Tradeport Drive, Suite 130, Orlando, Florida, 32827, 407-648-6583, Ext. 28. The application may be reviewed in person at this same location.

**SUPPLEMENTARY INFORMATION:** The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Sarasota Bradenton International Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101-508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158)

On September 20, 1995, the FAA determined that the application to impose and use the revenue from a PFC submitted by the Sarasota Manatee Airport Authority was substantially complete within the requirements of § 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than December 29, 1995

The following is a brief overview of PFC Application No. 95-03-C-00-SRQ.

*Level of the proposed PFC:* \$3.00

*Proposed charge effective date:*

September 1, 1992

*Proposed charge expiration date:* April 1, 2001

*Total estimated PFC revenue:*

\$22,387,893

*Total estimated PFC revenue to be used on projects in this application:*

\$14,350,000

*Total Impose only authority deleted in this application:* \$12,790,000

*Brief description of proposed project(s):*

Project 101B Federal Aviation Regulation (FAR)—Part 150 Program Funding (Use)

Project 102 Airfield Drainage Improvements (Use)

Project 107 Lengthen Runway (14/32) (Use)

Project 117 Development of Regional Impact Report (Impose & Use)

#### *Projects Deleted:*

Project 111 Construct Airside A

Project 112 Rehabilitate Taxiway D

Project 114 Rehabilitate Taxiway C

Project 115 Land Acquisition New Runway

Project 116 Construct New Runway

Class or classes of air carriers which the public agency has requested to be required to collect PFCs: Air Taxi/Commercial Operators (ATCO) filing FAA Form 1800-31.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT.**

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Sarasota Manatee Airport Authority.

Issued in Orlando, Florida on September 22, 1995.

John W. Reynolds, Jr.,

*Acting Manager, Orlando Airports District Office Southern Region.*

BILLING CODE 4910-13-M

### Federal Highway Administration

#### Supplemental Draft and Final Environmental Impact Statement; Tuscaloosa County, Alabama

**AGENCY:** Federal Highway Administration (FHWA) DOT.

**ACTION:** Notice of Intent.

**SUMMARY:** The FHWA is issuing this notice to advise the public that a Supplemental Draft and a Final Environmental Impact Statement will be prepared for a proposed highway project in Tuscaloosa County, Alabama.

#### **FOR FURTHER INFORMATION CONTACT:**

Mr. Joe D. Wilkerson, Division Administrator, Federal Highway Administration, 500 Eastern Boulevard, Suite 200, Montgomery, Alabama 36117, Telephone: (334) 223-7370, Mr. Jimmy Butts, Director, State of Alabama Department of Transportation, 1409 Coliseum Boulevard, Montgomery, Alabama 36130, Telephone (334) 242-6311.

**SUPPLEMENTARY INFORMATION:** The FHWA in cooperation with the State of

Alabama Department of Transportation, will prepare and circulate for comment a Supplemental Draft and a Final Environmental Impact Statement (EIS) for Alabama Highway Project DPI-0080(001) Tuscaloosa County, Alabama. This is a proposed bypass of the cities of Northport and Tuscaloosa, approximately 29 km (18 miles) in length, beginning at I-59 east and extending north and west around Tuscaloosa and Northport to U.S. Route 82 west of Northport. The proposed limited access multi-lane facility provides a much needed new crossing of the Black Warrior River which runs generally east and west through the metropolitan area. There are presently two routes serving the Tuscaloosa/Northport area that cross the Black Warrior River. Both of these facilities have become severely congested creating the need for additional river crossings. The Tuscaloosa Area Long Range Transportation Plan includes two new river crossings. This proposed project is the more urgently needed of the two.

A Notice of Intent was previously published on September 17, 1992, to prepare an Environmental Impact Statement for this project. Early coordination letters describing the proposed action and soliciting comments were sent to appropriate Federal, State, local agencies, and to private organizations and citizens who had expressed or were known to have an interest in the proposal. A scoping meeting, four public involvement meetings, and public hearings were held to describe the project and solicit public/private input. After these meetings, hearings and consideration of comments, the location of a river crossing was selected and a FONSI approved on January 14, 1994, for a separate project within the overall limits of the bypass for construction of a bridge across the river. Funding to begin bridge construction was provided in the Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA).

A Draft Environmental Impact Statement (FHWA-AL-EIS-94-01-D) for the bypass, which also included discussion of the river crossing project, was approved on June 1, 1994. After circulation of the Draft Environmental Impact Statement and the public hearing, new comments and objections to the alignment north of the river were raised by residents of a subdivision north of the river near the proposed location. In order to ensure that there was full public knowledge of the proposed project and to clarify apparent confusion by some citizens, a Supplemental Draft Environmental

Impact Statement will be prepared for the entire route. Right-of-way acquisition for the bridge project will not proceed until approval of the Final Environmental Impact Statement and Record of Decision for the entire route.

Alternatives to be considered and discussed in the Supplemental Draft Environmental Impact Statement include: (1) No Action; (2) Postponing the Action; (3) Reduced Facility; (4) Improving the Existing Facility; (5) Alternate Locations for the Build Alternative; (6) Alternate Design Features. Another public hearing will be held after approval of the Supplemental Draft Environmental Impact Statement and its availability to the public.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the Supplemental Draft and Final Environmental Impact Statement should be directed to the FHWA at the address provided above.

Alfred T. Russell,

*Assistant Division Administrator, Federal Highway Administration, Montgomery, Alabama.*

## DEPARTMENT OF THE TREASURY

### Public Information Collection Requirements Submitted to OMB for Review

September 15, 1995.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

*Special Request:* In order to conduct the survey described below in early October, the Department of the Treasury is requesting Office of Management and Budget (OMB) review and approval of this information collection by September 29, 1995. To obtain a copy of this survey, please write to the IRS Clearance Officer at the address listed below.

Internal Revenue Service (IRS)

*OMB Number:* 1545-1432.

*Project Number:* PC:V 95-014-G.

*Type of Review:* Revision.

*Title:* Ensuring Compliance Focus Groups.

*Description:* This effort to determine expectations supports the objective of the Ensuring Compliance which is to preserve the integrity of the voluntary tax system by continually measuring compliance behavior, identifying noncompliance, determining root causes, and taking actions to improve compliance.

*Respondents:* Individuals or households.

*Estimated Number of Respondents:* 72.

*Estimated Burden Hours Per Respondent:*

Screening participants—2 hours

Interview—2 hours

Travel—1 hour

*Frequency of Response:* Other.

*Estimated Total Reporting Burden:* 301 hours.

*Clearance Officer:* Garrick Shear, (202) 622-3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, N.W., Washington, DC 20224.

*OMB Reviewer:* Milo Sunderhauf, (202) 395-7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

*Departmental Reports Management Officer.*

### Public Information Collection Requirements Submitted to OMB for Review

September 21, 1995.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, N.W., Washington, DC 20220.

*Special Request:* In order to ensure that the applications described below are available for use to obtain grants and technical assistance under the Community Development Financial Institutions (CDFI) and the Bank Enterprise Award (BEA) Programs the Department of the Treasury is requesting Office of Management and Budget (OMB) review and approval by close of business September 29, 1995.

Departmental Offices/Community Development Financial Institutions Fund

*OMB Number:* New.

*Form Number:* CDFI-0001.

*Type of Review:* New collection.

*Title:* Community Development Financial Institutions Program Application.

*Description:* The CDFI Program Applications will be used by applicants to apply for financial or technical assistance under the Community Development Financial Institutions Program to enhance their ability to make loans and investments and provide services for the benefit of investment areas and targeted populations, or to apply for CDFI certification.

*Respondents:* Business or other for-profit, Not-for-profit institutions.

*Estimated Number of Respondents:* 300.

*Estimated Burden Hours Per Response:* 100 hours.

*Frequency of Response:* On occasion.  
*Estimated Total Reporting Burden:* 30,000 hours.

*OMB Number:* New.

*Form Number:* CDFI-0002.

*Type of Review:* New collection.

*Title:* Bank Enterprise Award Program Application.

*Description:* The BEA Program Applications will be used by applicants under the BEA Program to apply for awards for making equity investments in Community Development Financial Institutions and carrying out certain eligible activities in distressed communities.

*Respondents:* Business or other for-profit.

*Estimated Number of Respondents:* 100.

*Estimated Burden Hours Per Response:* 10 hours.

*Frequency of Response:* On occasion.  
*Estimated Total Reporting Burden:* 1,000 hours.

*Clearance Officer:* Lois K. Holland, (202) 622-1563, Departmental Offices, Room 2110, 1425 New York Avenue, N.W., Washington, DC 20220.

*OMB Reviewer:* Milo Sunderhauf (202) 395-7340, Office of Management and Budget, Room 10226, New Executive Office Building, Washington, DC 20503.

Lois K. Holland,

*Departmental Reports, Management Officer.*

### Public Information Collection Requirements Submitted to OMB for Review

September 25, 1995.

The Department of the Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96-511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department

Clearance Officer, Department of the Treasury, Room 2110, 1425 New York Avenue, NW., Washington, DC 20220.

*Special Request:* In order to conduct the survey described below in mid to late October, the Department of Treasury is requesting Office of Management and Budget (OMB) review and approval of this information collection by October 6, 1995. To obtain a copy of this survey, please write to the IRS Clearance Officer at the address listed below.

Internal Revenue Service (IRS)

*OMB Number:* 1545-1432.

*Project Number:* PC:V 95-015-G

*Type of Review:* Revision.

*Title:* California Mortgage Bankers Association Focus Groups with Users and Lenders.

*Description:* The Core Business System for Value Tracking and the National Office Research and Analysis Division (NORA) are proposing to conduct a series of focus groups around the California Mortgage Bankers Association (CMBA) project now being implemented in the Western Region. IRS would like to discuss the program with actual customers (loan applicants) and with the principle stakeholders (bankers). In addition, based on feedback already received, IRS proposes gathering information from interested government agency representatives on how this initiative might be expanded to other government agencies as well as private industry.

*Respondents:* Business or other for-profit.

*Estimated Number of Respondents:* 60.

*Estimated Burden Hours Per Respondent:* 3 hours, 5 minutes.

*Frequency of Response:* Other.

*Estimated Total Reporting Burden:* 255 hours.

*Clearance Officer:* Garrick Shear, (202) 622-3869, Internal Revenue Service, Room 5571, 1111 Constitution Avenue, N.W., Washington, DC 20224.

## UNITED STATES INFORMATION AGENCY

### Office of Citizens Exchange; NIS Secondary School Initiative; Secondary School Link Program

**AGENCY:** United States Information Agency.

**ACTION:** Amendment—request for proposals.

**SUMMARY:** This is an amendment to the request for proposals (RFP) published on August 17, 1995, beginning page 42943 and ending on page 42945, concerning exchanges through school linkage programs with the New Independent States of the former Soviet Union (Announcement Number E/P-96-14). On page 42943 column 1, under Summary the sentence "USIA grant funds may not be used for student or teacher exchanges located in the cities of Moscow or St. Petersburg, Russia." is replaced by the following language: "Priority will be given to exchanges outside of Moscow and St. Petersburg." Also in an effort to clarify possible thematic foci, suggested themes for exchange projects include but are not limited to the following: Health education, civics education, social and environmental issues, in both the U.S. and the NIS, the American political system, youth leadership training, computer technology, the environment, agriculture, business administration/management (including enterprise promotion), and volunteerism.

**FOR FURTHER INFORMATION CONTACT:** Naomi Feigenbaum, NIS Secondary School Division, E/PY, Room 320, USIA, 301 4th Street, SW, Washington, D.C. 20547, tel. (202) 619-6299; Fax (202) 619-5311; e-mail nfeigenb@usia.gov.

Dated: September 25, 1995.

Dell Pendergrast,

*Deputy Associate Director, Bureau of Educational and Cultural Affairs.*

### Meeting of the Advisory Board for Cuba Broadcasting

The Advisory Board for Cuba Broadcasting will conduct a meeting on Friday, September 29, 1995, in Union City, New Jersey, at 6:00 p.m. The intended agenda is listed below.

Agenda

Friday, September 29, 1995

Part One—Closed to the Public

6:00 p.m. Technical Operations Update

Part Two—Open to the Public

6:30 p.m.

1. Approval of Minutes
2. Congressional Liaison Report
3. Status of Investigations:
  - (a) Inspector General
  - (b) General Accounting Office
  - (c) President's Council on Integrity and Efficiency
4. Focus Group Results
5. Update on Radio and TV Marti
6. Public Testimony
7. Old Business
8. New Business
9. Adjournment

The Technical Operations Update discussed from 6:00 p.m. to 6:30 p.m. will be closed to the public. Discussion of this item will include information the premature disclosure of which would be likely to frustrate the implementation of a proposed Agency action (5 U.S.C. 522(c)(9)(B)).

Members of the public interested in attending the open portion of the meeting should contact Ms. Angela R. Washington, at the Advisory Board Office. Ms. Washington can be reached at (202) 401-2178.

Dated: September 22, 1995.

Joseph Duffey,

*Director, United States Information Agency.*

BILLING CODE 8230-01-M

## DEPARTMENT OF VETERANS AFFAIRS

### Medical Research Service Merit Review Committee, Amended Notice of Meeting

The Department of Veterans Affairs gives notice under the Federal Advisory Committee Act, 5 U.S.C. App., that the Subcommittee for Cardiovascular Studies, formerly scheduled to meet October 2-3, 1995, has been rescheduled to meet October 30-31, 1995, from 8 a.m. to 5 p.m. at the Holiday Inn Central, 1501 Rhode Island Avenue, NW, Washington, DC.

This meeting will be for the purpose of evaluating the scientific merit of cardiovascular research by the Department of Veterans Affairs (VA) investigators working in VA Medical Centers and Clinics.

This meeting will be open to the public up the seating capacity of the room at the start of the meeting to discuss the general status of the program. It will then be closed to the public after approximately one hour from the start for the review, discussion, and evaluation of initial and renewal projects.

The closed portion of the meeting involves: discussion, examination,

reference to, and oral review of site visits, staff and consultant critiques of research protocols and similar documents. During this portion of the meeting, discussion and recommendations will deal with qualifications of personnel conducting the studies, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy, as well as research information, the premature disclosure of which would be likely to significantly frustrate implementation of proposed agency action regarding such research projects. As provided by subsection 10(d) of Public Law 92-463, as amended by Public Law 94-409, closing portions of this meeting is in accordance with 5 U.S.C. 552b(c) (6) and (9)(B). Because of the limited seating capacity of the rooms, those who plan to attend should contact Dr. LeRoy Frey, Chief, Program Review Division, Medical Research Service, Department of Veterans Affairs, Washington, DC, (202) 565-5942, at least five days prior to each meeting. Minutes of the meeting and a roster of the Subcommittee members may be obtained from this source.

Dated: September 21, 1995.

By Direction of the Secretary.

Heyward Bannister,

*Committee Management Officer.*

BILLING CODE 8320-01-M

### **Persian Gulf Expert Scientific Committee, Notice of Meeting**

The Department of Veterans Affairs (VA), in accordance with Public Law 92-463, gives notice that a meeting of the VA Persian Gulf Expert Scientific Committee will be held on:

Thursday, November 30, 1995, at 9:00 a.m.-5:00 p.m.

Friday, December 1, 1995, at 8:00 a.m.-12:01 p.m.

The location of the meeting will be 801 I Street, N.W., Washington, D.C., Room 1105.

The Committee's objectives are to advise the Under Secretary for Health about medical findings affecting Persian Gulf era veterans.

At this meeting the Committee will review all aspects of patient care and medical diagnoses and will provide professional consultation as needed. The Committee may advise on other areas involving research and development, veterans benefits and/or training aspects for patients and staff.

All portions of the meeting will be open to the public except from 9:00 a.m. until 11:00 a.m. on November 30, 1995. During this executive session discussions and recommendations will deal with medical records of specific patients and individually identifiable patient medical histories. The disclosure of this information would constitute a clearly unwarranted

invasion of personal privacy. Closure of this portion of the meeting is in accordance with subsection 10(d) of Public Law 92-463, as amended by Public Law 94-409, and as cited in 5 U.S.C. 552b(c)(6).

The agenda for November 30 will begin with an update on recent events, followed by responses from Committee members. The first day's agenda will also cover reports on activities of the Presidential Advisory Committee on Gulf War Veterans' Illnesses and the Panel on Infectious/Parasitic Diseases of the Persian Gulf, as well as developments in the area of neurobiology.

On December 1 the Committee will undertake the writing of a status report. The second day's agenda will also include updates on the CDC Iowa Survey and VA Registry Exams.

Additional information concerning these meetings may be obtained from the Chairperson, Office of Public Health & Environmental Hazards, 810 Vermont Avenue, N.W., Washington, DC 20420.

Dated: September 21, 1995.

By Direction of the Secretary.

Heyward Bannister,

*Committee Management Officer.*

# Sunshine Act Meetings

Federal Register

Vol. 60, No. 189

Friday, September 29, 1995

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

## FEDERAL DEPOSIT INSURANCE CORPORATION

### Notice of Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 10:17 a.m. on Tuesday, September 26, 1995, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following matters relating to the Corporation's corporate activities.

In calling the meeting, the Board determined, on motion of Vice Chairman Andrew C. Hove, Jr., seconded by Director Jonathan L. Fiechter (Acting Director, Office of Thrift Supervision), concurred in by Director Eugene A. Ludwig (Comptroller of the Currency), and Chairman Ricki Helfer, that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550—17th Street, NW., Washington, DC.

Dated: September 26, 1995.

Federal Deposit Insurance Corporation.  
Robert E. Feldman,

*Deputy Executive Secretary.*

[FR Doc. 95-24419 Filed 9-27-95; 2:18 pm]

BILLING CODE 6714-01-M

## BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

**TIME AND DATE:** 10:00 a.m., Wednesday, October 4, 1995.

**PLACE:** Marriner S. Eccles Federal Reserve Board Building, C Street

entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

**STATUS:** Closed.

### MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

**CONTACT PERSON FOR MORE INFORMATION:** Mr. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: September 27, 1995.

Jennifer J. Johnson,

*Deputy Secretary of the Board.*

[FR Doc. 95-24420 Filed 9-27-95; 2:19 pm]

BILLING CODE 6210-01-M

## NATIONAL CREDIT UNION ADMINISTRATION

### Notice of Change in Subject of Meeting

The National Credit Union Administration Board determined that its business requires the deletion of the following item from the previously announced open meeting (Federal Register, Vol. 60, page 49320, September 22, 1995) scheduled for Thursday, September 28, 1995.

2. Approval of NCUA's Serving the Underserved Conference.

The Board voted unanimously that Agency business requires that this item be deleted from the open agenda and earlier announcement of this change was not possible.

The previously announced items were:

1. Approval of Minutes of Previous Open Meeting.

3. Proposed Rule: Amendments to Part 760, NCUA's Rules and Regulations, Flood Insurance.

4. Final Rule: Amendments to Section 701.21(c)(8), CUA's Rules and Regulations, Prohibited Fees.

5. Final Rule: Amendments to Part 722, NCUA's Rules and Regulations, Appraisals.

6. Proposed Amendments to Interpretive Ruling and Policy Statement (IRPS) 94-1, Chartering and Field of Membership.

**FOR FURTHER INFORMATION CONTACT:** Becky Baker, Secretary of the Board, Telephone (703) 518-6304.

Becky Baker,

*Secretary of the Board.*

BILLING CODE 7535-01-M

## NATIONAL CREDIT UNION ADMINISTRATION

### Notice of Change in Subject of Meeting

The National Credit Union Administration Board determined that its business requires the addition of the following item, which is closed to public observation, to the previously announced closed meeting (Federal Register, Vol. 60, page 49320, September 22, 1995) scheduled for Thursday, September 28, 1995.

7. Budget Amendments, Delegations of Authority, and Procurement Policy. Closed pursuant to exemption (9)(B).

The Board voted unanimously that Agency business requires that this item be considered with less than the usual seven days advance notice, that it be closed to the public, and that no earlier announcement of this change was possible.

The previously announced items were:

1. Approval of Minutes of Previous Closed Meetings.

2. Request from a Corporate Federal Credit Union for a Waiver from Section 704.6, NCUA's Rules and Regulations. Closed pursuant to exemption (8).

3. Administrative Actions under Section 205 of the FCU Act. Closed pursuant to exemptions (8) and (9)(B).

4. Request from a Federal Credit Union for a Community Charter Expansion. Closed pursuant to exemption (8).

5. Administrative Action under Section 206 of the Federal Credit Union Act. Closed pursuant to exemptions (8), (9)(A)(ii), and (9)(B).

6. Personnel Actions. Closed pursuant to exemptions (2), (6), (8), and (10).

**FOR FURTHER INFORMATION CONTACT:** Becky Baker, Secretary of the Board, Telephone (703) 518-6304.

Becky Baker,

*Secretary of the Board.*

**Department of  
Housing and Urban  
Development**

---

Office of the Assistant Secretary for  
Public and Indian Housing

---

**Notice of Fund Availability for Fiscal  
Year 1995 for the Section 8 Rental  
Voucher Program and Rental Certificate  
Program**

**DEPARTMENT OF HOUSING AND  
URBAN DEVELOPMENT**

**Office of the Assistant Secretary for  
Public and Indian Housing**

[Docket No. FR-3849-N-04]

**Notice of Fund Availability (NOFA) for  
Fiscal Year 1995 For the Section 8  
Rental Voucher Program and Rental  
Certificate Program**

**AGENCY:** Office of the Assistant  
Secretary for Public and Indian  
Housing, HUD.

**ACTION:** Revision to the notice of fund  
availability (NOFA) for fiscal year (FY)  
1995 for the rental voucher program and  
rental certificate program.

**SUMMARY:** The Department published  
the FY 1995 Notice of Fund Availability  
(NOFA) in the Federal Register on  
March 3, 1995 (60 FR 12036) for the  
Section 8 rental voucher program and  
rental certificate program. Corrections to  
that NOFA were published on April 17,  
1995 (60 FR 19278) and on July 27, 1995  
(60 FR 38567). This Notice cancels parts  
of the FY 1995 NOFA to comply with  
the provisions of the Emergency  
Supplemental Appropriations Act of  
1995 (Pub. L. 104-19, 109 Stat. 194,  
dated July 27, 1995) (the Act), which  
rescinded most of the FY 1995  
appropriations for incremental funding  
under the Section 8 rental voucher and  
rental certificate programs.

**FOR FURTHER INFORMATION CONTACT:**  
Gerald J. Benoit, Director, Operations  
Division, Office of Rental Assistance,  
Office of Public and Indian Housing,  
Room 4220, Department of Housing and  
Urban Development, 451 Seventh Street,  
S.W., Washington, D.C. 20410-8000,  
telephone (202) 708-0477. Hearing-  
impaired or speech-impaired  
individuals may call HUD's TDD  
number (202) 708-4594. (These  
telephone numbers are not toll-free.)

**SUPPLEMENTARY INFORMATION:**

**I. Background**

The original 1995 NOFA provided for  
funding in the following categories: (1)  
Fair Share Allocations; (2) Mainstream  
Housing; (3) Homeless Families (non-  
competitive process); (4) Persons with  
AIDS (non-competitive process); (5)  
Section 8 Counseling; (6) Family Self-  
Sufficiency ("FSS") Service  
Coordinators; (7) Family Unification; (8)  
Relocation, Demolition and Disposition,  
and Replacement Housing; (9) Rental  
Voucher and Rental Certificate  
Renewals; (10) Section 23 Conversions;  
(11) Section 8 Amendments; (12)  
Housing Agency Portability Fees; (13)

Natural disasters, Other Housing  
Emergencies, Litigation, and  
Desegregation of Public Housing; (14)  
FY 1994 funding for Homeless Persons  
With Disabilities; (15) FY 1994 funding  
for Homeless Veterans; (16) FY 1994  
funding for Family Unification; and (17)  
FY 1994 funding for FSS Service  
Coordinators.

On July 25, 1995, the Act rescinded  
funding for incremental allocations that  
had not yet been obligated. The Act  
allows HUD to use any remaining  
appropriations, after rescission, for new  
incremental rental assistance to fund  
Section 8 applications only for the  
following specific purposes: (a) For  
residents to be relocated from existing  
federally subsidized or assisted housing,  
(b) for replacement housing for units  
demolished or disposed of (including  
units disposed of pursuant to  
homeownership programs under section  
5(h) or title III (HOPE 1 and HOPE 2) of  
the U.S. Housing Act of 1937), (c) for  
funds related to litigation settlements or  
court orders, (d) for amendments to  
contracts to permit continued assistance  
to participating families, and (e) to  
enable public housing authorities to  
implement "mixed population plans"  
for developments housing primarily  
elderly residents.

**II. Departmental Action**

HUD is canceling the previous FY  
1995 NOFA with respect to funding  
under several of the subprograms to  
which the Rescission Act applies. Under  
the FY 1995 NOFA, HUD intends to  
award incremental funding for  
applications submitted for only the  
following components of the program:  
the family unification subprogram  
(category 7); the mainstream housing  
opportunities for persons with  
disabilities subprogram in connection  
with designated housing allocation  
plans (part of category 2 related to  
designated housing). Funding for the  
first of these programs remained after  
the rescission, and funding for the  
second category fits within the  
Rescission Act's category (e).

In addition, the Department intends to  
renew the funding for the family self-  
sufficiency (FSS) service coordinators  
for housing agencies (HAs) awarded FY  
1994 funding (category 17), as well as to  
fund rental voucher and rental  
certificate renewals (category 9), section  
23 conversions (category 10), Section 8  
amendments (category 11), and special  
portability fees (category 12). This  
funding is not incremental funding, and  
so not prohibited by the Rescission Act.  
Some subprograms also will be funded  
from carryover funds, to the extent they  
are available.

Accordingly, the Department is  
revising the March 3, 1995, NOFA (60  
FR 12036) as follows:

1. Of the amounts appropriated for the  
family unification program, \$15 million  
was rescinded leaving approximately  
\$73 million in FY 1995 funding for  
applications submitted in response to  
the NOFA. Therefore, applications will  
be awarded in accordance with the  
lottery process described in the March  
3, 1995, NOFA (60 FR 12045), as limited  
by the amount of funding now available.

2. Applications were submitted for  
approximately \$17.3 million in response  
to the NOFA for the mainstream  
housing for persons with disabilities  
subprogram for use in connection with  
designated housing allocation plans.  
HUD will approve the Section 8  
applications for all HAs that submitted  
a designated housing allocation plan  
that is also approved by HUD.

3. The Department will not fund  
applications submitted in response to  
the NOFA for the following  
subprograms due to the rescission of  
appropriations:

- A. Fair Share;
- B. Mainstream Housing Opportunities  
(General Program only);
- C. Homeless Families; and
- D. Persons with HIV/AIDS.

4. Section IX(H), "FY 94 NOFA for  
Homeless Persons with Disabilities", of  
the March 3, 1995 NOFA (60 FR 12058)  
stated that HUD would issue funds to  
the HAs selected for funding in  
response to the February 1, 1994 NOFA  
(59 FR 4758). In September 1994, a  
portion of the funds available for the FY  
1994 NOFA were reserved and  
subsequently annual contribution  
contracts were executed. All other funds  
available under the FY 1994 NOFA that  
were not committed under Annual  
Contributions Contracts with specific  
HAs in September of FY 1994 are no  
longer available.

5. The funds remaining for the family  
self-sufficiency service coordinator  
subprogram were reduced to  
approximately \$8.7 million for FY 1995.  
These funds will be awarded to those  
housing agencies awarded funding in  
response to the NOFA published on  
August 29, 1994 (59 FR 44550). As  
indicated in the March 3, 1995 NOFA,  
HUD will provide FY 1995 funding to  
all the HAs that received funding in  
response to the August 29, 1994 NOFA  
at 103 percent of the amount of FY 1994  
funds awarded. New or revised  
applications from previously funded  
HAs or applications from new HAs will  
not be considered by HUD.

6. Of the funds available for the  
Section 8 counseling subprogram, \$70  
million was rescinded, leaving \$101

million. Some of these funds already were reserved for use in connection with litigation, and the remaining funds are not sufficient to fund the applications submitted in response to the NOFA. As a result, HUD will publish a new NOFA for Section 8 counseling inviting public housing agencies to apply under the terms of the new NOFA.

7. HUD will continue to make funds available to fulfill relocation and replacement housing, voucher and certificate renewals, voucher and certificate needs in connection with litigation, Section 23 conversions, Section 8 amendments, and Section 8 counseling needs in connection with

litigation and relocation of families from public housing. HUD will notify the housing agencies that are selected to receive funding under these subprogram categories. HUD also will continue to fund HA requests for special portability fees; HA requests should continue to be submitted directly to the HUD State or Area Office.

8. HUD plans to destroy all applications submitted in response to the FY 1995 NOFA for all subprograms for which no funds will be made available. Any HAs interested in having their unfunded applications returned should contact the following: for all subprograms other than Section 8 counseling—the Office of Public

Housing or the Office of Native American Programs, as applicable, in the local HUD office; for Section 8 counseling—Mr. Laurence Pearl, Office of Program Standards and Evaluation, Fair Housing and Equal Opportunity (FHEO), Room 5226, 451 Seventh Street, SW, Washington, DC 20410, telephone (202) 708-0288, ext. 265. Hearing-impaired or speech-impaired individuals may call FHEO's TDD number (202) 708-4112.

Dated: September 21, 1995.

Joseph Shuldiner,

*Assistant Secretary for Public and Indian Housing.*

RIN 2120-AF35

**Notification to Air Traffic Control (ATC) of Deviations From ATC Clearances in Response to Traffic Alert and Collision Avoidance System Resolution Advisories**

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

**SUMMARY:** This action codifies the previously announced policy extended to pilots during the initial testing of the Traffic Alert and Collision Avoidance System (TCAS) during the Limited Implementation Plan for TCAS, and during the actual implementation of TCAS under the TCAS Transition Plan (TTP). This policy permitted pilots to deviate from an air traffic control (ATC) clearance, in non-emergency situations, when responding to a TCAS resolution advisory (RA). The language contained in current regulations suggests that deviation from an ATC clearance is authorized only in an emergency situation. The intended effect of this action is to add the TCAS RA as a reason to deviate from a clearance, and to require that whenever a pilot deviates from an ATC clearance, ATC will be advised as soon as possible.

**EFFECTIVE DATE:** October 30, 1995.

**FOR FURTHER INFORMATION CONTACT:** Mrs. Ellen Crum, Air Traffic Rules Branch, ATP-230, Airspace Rules and Aeronautical Information Division, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267-8783.

**SUPPLEMENTARY INFORMATION:****Background**

On December 26, 1989, the FAA published a petition for rulemaking, received from the Air Transport Association of America (ATA), that requested the FAA amend section 91.75(a) of the Federal Aviation Regulations (FAR) to permit a pilot to deviate from an ATC clearance when responding to a TCAS RA (54 FR 52951). (Effective August 18, 1990, part 91 of the FAR was revised (54 FR 34284; August 18, 1989) to renumber all of its sections. Section 91.75(a) was renumbered as section 91.123(a).)

Section 91.123 of the FAR states, in pertinent part, that each pilot in

command who, in an emergency, deviates from an ATC clearance shall notify ATC of that deviation as soon as possible. The ATA petition states that TCAS is an advisory system and not an emergency system. The ATA feels that pilots should be able to comply with a TCAS RA without exercising emergency authority. The ATA petition mirrors current FAA policy and guidance for the use of TCAS II. The petition drew no negative comments and one positive comment from the Airline Pilots Association (ALPA) that supported the proposal.

On April 9, 1994, the FAA published a Notice of Proposed Rulemaking (59 FR 22142, Notice No. 94-16) that proposed to amend Section 91.123(a) of the FAR in accordance with the ATA petition. In addition, this NPRM proposed to amend § 91.123(c) of the FAR to require pilots to notify ATC as soon as possible if they deviate from a clearance in response to a RA. The comment period for this NPRM closed on May 31, 1994 and comments are discussed later in this document.

Currently, regulations do not provide for any deviation from an ATC clearance except in an emergency situation. However, during the initial trial and implementation of TCAS II, the FAA notified pilots that no enforcement action would be initiated if the pilot deviated from an ATC clearance when responding to a TCAS RA. A letter signed by former FAA Administrator James B. Busey was published as Appendix C to the TTP Project Management Plan, dated August 1, 1990. The FAA also provided procedural guidance in Advisory Circular 120-55, "Air Carrier Operational Approval and Use of TCAS II" dated October 23, 1991, and later amended as AC 120-55A dated August 27, 1993. The policy and guidance proved successful during the testing and implementation of TCAS II.

**Related Agency Actions**

On January 10, 1989, the FAA published a final rule (54 FR 940), known as the "TCAS rule," that required airplanes having more than 30 passenger seats and operated under part 121, 125, or 129 to be equipped with TCAS II by December 30, 1991. The TCAS rule also required airplanes having 10 to 30 passenger seats and operated under part 129 or 135 to be equipped with TCAS I by February 9, 1995; this compliance date was subsequently extended to December 31, 1995 (59 FR 67584, December 29, 1994). On April 9, 1990, the FAA amended the TCAS rule by revising the schedule for the installation of TCAS II equipment in

airplanes having more than 30 passenger seats (55 FR 13242). Operators of airplanes having more than 30 passenger seats and operated under part 121 were required to install TCAS II equipment in accordance with a phased-in schedule so that 100% of an operator's covered airplanes would be equipped by December 30, 1993. Operations conducted under part 125 or 129 with airplanes having more than 30 passenger seats were also required to install TCAS II equipment by December 30, 1993.

**TCAS**

TCAS is airborne equipment that interrogates ATC transponders of other aircraft nearby. By computer analysis of the replies, TCAS equipment determines which transponder-equipped aircraft are potential collision hazards and provides appropriate advisory information to the flight crew. If a TCAS-equipped airplane interrogates an aircraft that is equipped with a transponder without altitude reporting capability (Mode A), range and azimuth information will be provided to the TCAS-equipped aircraft. If the interrogated aircraft is equipped with an altitude encoding transponder (Mode C or Mode S), then relative altitude information will be provided in addition to range and azimuth. TCAS equipment cannot detect the presence of an aircraft that is not equipped with a transponder.

TCAS equipment performs proximity tests on each detected target. If the path of a target is projected to pass within certain horizontal and vertical distance criteria, then that target is declared an intruder. An intruder that is determined to pose an even greater risk of collision is declared a threat. When a threat is declared, TCAS equipment will determine the appropriate direction that the TCAS-equipped aircraft must move (climb or descend) and the vertical rate that must be maintained to achieve separation from the threat.

There are two classes of advisories provided by TCAS equipment. The first class, the "traffic advisory" (TA), provides supplemental information to the pilot that aids in visual detection of other aircraft. TA's include the range, bearing, and if the intruder has altitude-reporting equipment, the altitude of intruding aircraft relative to the TCAS equipped aircraft. TA's without altitude information may also be provided from non-altitude reporting transponder-equipped intruders. TCAS I equipment provides TA's that only assist the pilot in visually detecting an intruder aircraft. The second class of advisory, the "resolution advisory" (RA), indicates

the vertical direction and rate that must be achieved by an aircraft in order to prevent insufficient separation. When an RA occurs, the pilot flying should respond by direct attention to RA displays and should maneuver as indicated unless doing so would jeopardize the safe operation of the flight or unless the flight crew has definitive visual acquisition of the aircraft causing the RA. TCAS II equipment provides both traffic and resolution advisories only in the vertical plane.

#### The Rule

This rule accomplishes two things. First, it authorizes deviations from an ATC clearance when responding to a TCAS RA. Secondly, it requires pilots to notify ATC as soon as possible if they deviate from a clearance in response to a TCAS RA. This action codifies existing policies and practices that were initiated during the TCAS implementation period.

#### Discussion of Comments

Interested persons were invited to participate in this rulemaking action by submitting written data, views, or arguments. All comments received during the comment period were considered before making a determination regarding this final rule. The following is a discussion of the comments received.

Five comments were received in response to the NPRM. Of this number, three comments were received from associations and two from individuals. Most commenters supported amending FAR 91.123(a); however, three commenters opposed amending FAR 91.123(c).

#### I. Compliance With ATC Clearances

Most commenters support this amendment which allows flight crews to deviate from an air traffic control clearance in response to a TCAS RA. The Air Transport Association of America (ATA) and the Air Line Pilots Association (ALPA) stated that the proposal is fully consistent with the ATA petition referenced in the Notice. ATA believes this action will remove a potential obstacle to the full use of TCAS by allowing flight crews to follow a TCAS RA without pausing to determine if the RA maneuver would require the crew to declare an emergency. Another commenter states that he believes safety would be improved with this amendment, and supports it. The National Air Traffic Controllers Association (NATCA) did not comment specifically on this proposed change, but offers general

comments stating they do not believe the air traffic system is as safe today as it was prior to the introduction of TCAS.

On December 30, 1987, the President of the United States signed Public Law 100-223 which, among other provisions, amended the FAA Act of 1958, Section 601, by adding a new paragraph (f) entitled "Collision Avoidance Systems." This section requires TCAS II on "each civil aircraft of more than 30 seats and which is used to provide air transportation of passengers, including intrastate air transportation of passengers." The amendment does not provide for the exception of any class of civil operation or operator, U.S. or foreign, from the basic rule. Consequently, the FAA promulgated numerous regulations (several of which have been referenced earlier in this document) pertaining to TCAS. In addition, the TTP, along with the Separation Assurance Task Force (SATF), were established to investigate and resolve TCAS related problems in the NAS which are discovered during implementation. Participants in this program include the FAA, ATA, Regional Airline Association, ALPA, Allied Pilots Association, NATCA, Transport Canada, TCAS equipment manufacturers and the major, national and regional air carriers.

The FAA disagrees with NATCA's view that TCAS has compromised safety. Since the introduction of TCAS into the NAS, both air traffic controllers and flight crews have adjusted their operating procedures. With the assistance and cooperation of flight crews and air traffic controllers, surveys have been collected and volumes of data analyzed. As issues surface, the TTP provides guidance for timely resolution that has resulted in better training for both pilots and controllers, the issuance of two advisory circulars addressing the use of TCAS, amendments to the controllers handbook and the Airman's Information Manual (AIM), and updating the TCAS software in order to eliminate false and nuisance RA's.

At the second annual International TCAS Conference held in Reston, Virginia in September, 1993, TCAS was lauded by many flight crews as a safety enhancing cockpit device.

For example, TCAS was credited by the captain of a major air carrier for saving the lives of nearly 700 people in two B747 aircraft traveling over the Pacific Ocean.

The TCAS Industry Alert Bulletin #5, issued February 18, 1994, states that during the prior two years, 16 encounters had occurred wherein TCAS II displayed unnecessary resolution advisories that directed pilots to cross

through each other's altitudes. The RA's were unnecessary because the aircraft were safely separated by the ATC system. In each of these encounters, the TCAS logic detected the high vertical closure rate of the two aircraft and predicted the close proximity of the aircraft without knowing that the aircraft intended to level off 1000 feet apart in altitude.

In order to eliminate these unnecessary RA's, a new version of the TCAS logic (Version 6.04A) was created and installation required by 12/31/94. This logic will not generate altitude-crossing RAs when aircraft level off within 1000 feet vertically of one another. None of the 16 encounters previously mentioned would have resulted in altitude-crossing RAs with the Version 6.04A logic installed.

#### II. ATC Notification

ATA and ALPA oppose this proposal which requires flight crews to inform ATC as soon as possible when deviating from an ATC clearance in response to a TCAS RA. ALPA states they do not oppose notifying ATC of any deviation caused by responding to a TCAS RA; however, they believe the proposal may imply a sense of urgency for pilots to advise ATC of a deviation at a time when complete attention must be focused on identifying the intruder and responding to the RA. ALPA states this sense of urgency may also be prompted by a concern over possible enforcement action should the crew neglect to report the event due to a directed frequency change or some other unanticipated event. ATA comments that the phrase "as soon as possible" implies that notification to ATC of a deviation should take place prior to executing the maneuver. ATA suggests the word "practical" be used in lieu of "possible" which would be consistent with the AIM.

The FAA does not agree with replacing the word "possible" with "practical". The word "possible" does not mean that the notification has to take place before the pilot has executed the appropriate maneuver. "Possible" does, however, contain a greater urgency than the word "practical," and would require notification to ATC of the deviation as soon as the pilot maneuvers the aircraft to a safe operating environment. The language is consistent with current wording contained in the regulation that requires a flight crew who, in an emergency, deviates from an ATC clearance to notify ATC as soon as possible. If a pilot deviates from an ATC clearance, the controller must be given timely notification of that deviation so that appropriate instructions and/or

advisories can be issued to ensure a safe, orderly, and expeditious flow of traffic. By advising ATC as soon as possible that an RA has been received, the controller can evaluate the situation, determine the most appropriate and safe course of action, and issue alternate instructions if necessary.

ALPA states that the requirement to report a deviation from an ATC clearance as a result of an RA is stated in the Airman's Information Manual (AIM), FAA Advisory Circular 120-55, and each TCAS equipped aircraft flight operations manual. Consequently, the commenter believes this proposal is redundant and unnecessary.

The FAA acknowledges there are several FAA publications which explain and encourage pilots to communicate with ATC when deviating from a clearance upon receipt of a RA.

However, the FAA has determined that safety within the NAS can only be maintained if pilots are required to advise controllers when a deviation from an ATC clearance has occurred as a result of an RA.

NATCA opposes this rule change due to concerns for the safety of persons operating in the NAS. However, NATCA does not provide specific instances of how or where safety is compromised, but merely reiterates their ongoing concern with the TCAS program.

The FAA has determined that pilot notification of a deviation from a clearance due to a TCAS RA enhances safety in the NAS. Air traffic controllers base their control and traffic management decisions on the expectation that pilots will comply with ATC-assigned routes, altitudes, and other clearances. If a pilot deviates from an ATC clearance, the controller must be given timely notification of that deviation so that appropriate instructions and/or advisories can be issued to ensure a safe, orderly, and expeditious flow of traffic. By advising ATC as soon as possible that an RA has been received, the controller can evaluate the situation, determine the most appropriate and safe course of action, and issue alternate instructions if necessary.

### *III. Resolution Advisory Maneuver—An Emergency?*

One commenter contends that any deviation from an ATC clearance is an emergency; therefore, this rule change is not needed. The commenter believes the cause of the deviation need not be an emergency, but the mere fact that an aircraft is not following an ATC clearance should be considered an emergency. The commenter suggested the phrase "in an emergency" be

deleted from the rule; thereby, any time an aircraft deviates from an ATC clearance, regardless of the reason, ATC will be notified.

The FAA disagrees that an RA maneuver is an emergency action. TCAS is designed to serve as a backup (safety net) to visual collision avoidance, application of "right of way rules", and air traffic separation services. Since its inception, TCAS has been considered by the FAA and industry to be a supplement to the ATC system that provides flight guidance to ensure adequate separation from other aircraft. Additionally, although the suggestion to remove the word "emergency" from the language of the regulations is outside the scope of this rulemaking, the FAA will consider the merits of the comment for possible future rulemaking.

### *Regulatory Evaluation Summary*

Executive Order 12866 established the requirement that, within the extent permitted by law, a Federal regulatory action may be undertaken only if the potential benefits to society for the regulation outweigh the potential costs to society. In response to this requirement, and in accordance with Department of Transportation policies and procedures, the FAA has estimated the anticipated benefits and costs of this rulemaking action. The results are stated in this section. The FAA has determined that this rule change is not a "significant rulemaking action," as defined by Executive Order 12866 (Regulatory Planning and Review).

The FAA has determined that this rule will be cost-beneficial because it imposes no costs and would promote air safety. There will not be any changes in notification or reporting requirements for deviations from ATC clearances that are necessary to avoid potential collision hazards. This action codifies a previously announced policy that pilots who deviate from their assigned altitudes in response to a TCAS RA will provide timely notice, as soon as possible, to air traffic control. Such non-written, voice notification will give controllers an opportunity to resolve any conflicts resulting from a TCAS II-equipped aircraft being at other than the assigned altitude.

### *International Trade Impact Statement*

This action will not impose a competitive disadvantage to either U.S. air carriers doing business abroad or foreign air carriers doing business in the United States. This assessment is based on the fact that this rule will not impose additional costs on either U.S. or foreign air carriers.

### *Regulatory Flexibility Determination*

In accordance with the Regulatory Flexibility Act of 1980, the FAA has determined that this action will not have a significant economic impact, positive or negative, on a substantial number of small entities. This assessment is based on the fact action will not impose any additional cost on aircraft operators.

### *Paperwork Reduction Act*

There are no requirements for information collection associated with this action that would require approval from the Office of Management and Budget pursuant to the Paperwork Reduction Act of 1980 (Pub. L. 96-511).

### *Federalism Implications*

This regulation will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

### *International Civil Aviation Organization and Joint Aviation Regulations*

In keeping with the U.S. obligations under the Convention on International Civil Aviation (ICAO), it is FAA policy to comply with ICAO Standards and Recommended Practices (SARP) to the maximum extent practicable. The FAA has determined that this action complies with the ICAO SARP.

### *Conclusion*

For the reasons discussed in the preamble, and based on the findings in the Regulatory Flexibility Determination and the International Trade Impact Analysis, the FAA has determined that this regulation is not a "significant regulatory action" under Executive Order 12866. This regulation is not considered significant under DOT Order 2100.5, Policies and Procedures (44 FR 11034; February 26, 1979). In addition, the FAA certifies that this regulation will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### *List of Subjects in 14 CFR Part 91*

Air traffic control, Aircraft, Aviation safety.

The Amendment

In consideration of the foregoing, the Federal Aviation Administration amends part 91 of the Federal Aviation Regulations (14 CFR part 91) as follows:

**PART 91—GENERAL OPERATING AND FLIGHT RULES**

1. The authority citation for part 91 continues to read as follows:

Authority: 42 U.S.C. 4321 *et seq.*; 49 U.S.C. app. 1301, 1303, 1344, 1348, 1352 through 1355, 1401, 1421 through 1431, 1471, 1472, 1502, 1510, 1522, and 2121 through 2125, 2157, 2158; 49 U.S.C. 106(g); articles 12, 29, 31, and 32(a) of the Convention on International Civil Aviation (61 Stat. 1180);

E.O. 11514, 35 FR 4247, 3 CFR, 1966–1970 Comp., p. 902.

2. Section 91.123 is amended by revising paragraphs (a) and (c) to read as follows:

**§ 91.123 Compliance with ATC clearances and instructions.**

(a) When an ATC clearance has been obtained, no pilot in command may deviate from that clearance unless an amended clearance is obtained, an emergency exists, or the deviation is in response to a traffic alert and collision avoidance system resolution advisory. However, except in Class A airspace, a pilot may cancel an IFR flight plan if the operation is being conducted in VFR weather conditions. When a pilot is

uncertain of an ATC clearance, that pilot shall immediately request clarification from ATC.

\* \* \* \* \*

(c) Each pilot in command who, in an emergency, or in response to a traffic alert and collision avoidance system resolution advisory, deviates from an ATC clearance or instruction shall notify ATC of that deviation as soon as possible.

\* \* \* \* \*

Issued in Washington, D.C. on September 13, 1995.

40 CFR Part 170  
Pesticide Worker Protection Standards;  
Language and Size Requirement for  
Warning Signs; Decontamination  
Requirements; Proposed Rules

**ENVIRONMENTAL PROTECTION AGENCY****40 CFR Part 170**

[OPP-250107; FRL-4969-4]

**Pesticide Worker Protection Standard; Language and Size Requirement for Warning Signs****AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Proposed rule.

**SUMMARY:** EPA proposes to revise the Worker Protection Standard (WPS) to allow the substitution of an alternate language for the Spanish portion of the warning sign and to allow the use of smaller warning signs in greenhouses and nurseries where the use of the standard size sign may interfere with operations or the clear identification of treated areas. These changes will allow the flexibility to tailor the sign to accommodate a workforce whose predominant language is neither English nor Spanish. In addition, the changes will modify the rule's existing criterion for allowing smaller signs in nurseries and greenhouses and will facilitate posting of treated areas.

**DATES:** Written comments, identified by the docket control number OPP-250107, must be received on or before November 13, 1995.

**ADDRESSES:** By mail, submit written comments to: Public Response Section, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number OPP-250107. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this proposed rule may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in Unit V. of this document. Information submitted as a comment concerning this document may be claimed confidential by marking

any part or all of that information as CBI.

Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the Virginia address given above from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** John MacDonald or Linda Strauss, Certification and Training, and Occupational Safety Branch (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Telephone: 703-305-7666, e-mail: strauss.linda@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:****I. Statutory Authority**

This proposed rule is issued under the authority of section 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. sections 136-136y.

**II. Background**

In 1992 EPA revised the Worker Protection Standard (40 CFR part 170) (57 FR 38102, August 21, 1992) which is intended to protect agricultural workers and handlers from risks associated with agricultural pesticides. The 1992 WPS expanded the scope of the original WPS to include not only workers performing hand labor operations in fields treated with pesticides, but also workers in or on farms, forests, nurseries, and greenhouses, as well as pesticides handlers who mix, load, apply, or otherwise handle pesticides for use at these locations in the production of agricultural commodities. The WPS contains requirements for training, notification of pesticide applications, use of personal protective equipment, restricted entry intervals, decontamination, and emergency medical assistance.

This proposed WPS rule amendment is one of a series of Agency actions in response to concerns raised by stakeholders affected by the rule. In addition to this proposed amendment, elsewhere in this issue of the Federal Register, EPA is issuing another proposal soliciting public comment regarding modifying the requirements for decontamination supplies for

workers when low toxicity pesticides are used.

**III. Current Requirements and Proposal for Bilingual Signs****A. Current Requirements**

Section 170.120 of the WPS requires that signs warning of pesticide-treated areas be in both English and Spanish. The words "DANGER" and "PELIGRO," plus "PESTICIDES" and "PESTICIDAS," shall be at the top of the sign, and the words "KEEP OUT" and "NO ENTRE" shall be at the bottom of the sign. All letters must be clearly legible and visible from all usual points of worker entry into the treated area. Also, the regulation allows additional information to be placed on the warning sign if the information does not detract from the appearance of the sign or change the meaning of the required information.

**B. Reasons for this Proposal**

In the preamble to the final regulation, EPA discussed its rationale for adoption of Spanish as the second language on the warning sign. EPA realized that non-English readers were not solely Spanish readers. However, EPA believed imposition of a requirement to identify all languages spoken and development of alternative signs would be an unnecessary burden on agricultural employers.

Since publication of the regulation, EPA has received a number of comments on the English/Spanish warning signs. These commenters are concerned about workers who do not read English or Spanish and have requested that EPA allow a grower to eliminate or replace the Spanish portion of the warning sign based upon the composition of the workforce. They stated that, in some parts of the country, Spanish-reading workers are not common and the requirement to include Spanish on the sign should be limited to those areas where a significant number of Spanish-reading workers are employed.

Farmworker representatives have commented that it should be mandatory to add to the warning sign all languages used by workers at the establishment.

**C. Proposal to Modify the Second Language Requirements on the Sign**

In response to the above comments, EPA believes that allowing growers the option to replace the Spanish portion of the warning sign with an appropriate language that is more representative of the language read by the workforce will promote worker understanding of the information on the sign and enhance

worker safety. Presently, EPA believes that the number of farmworkers who read a language other than English or Spanish is approximately 5 percent of the United States farmworker population. EPA believes this represents a large enough population to warrant this proposal.

EPA considered the farmworker proposal that warning signs contain all languages spoken by workers on an establishment. While the Agency agrees that it would be ideal to have a warning sign(s) capable of being read by all workers, EPA believes that a requirement for multiple signs using different languages would be difficult to administer and would place an unnecessary burden on growers. Specifically, such a proposal could require frequent review of the languages spoken by the workforce and frequent sign modifications. The sign also could become cluttered and be less likely to be read and understood by the workers. Further, under the regulation, the WPS-required training for workers must be presented in a manner that the workers can understand (such as through a translator) and must convey the purpose and posting of warning signs. For these reasons, EPA is not proposing adoption of a requirement that warning signs contain all languages read by workers on an establishment.

EPA is proposing the following for consideration and comment:

EPA proposes to allow growers the option of replacing the Spanish portion of the warning sign with the written language that is most read by the portion of the workforce that does not read English. If finalized, this would be an option for growers and would not preclude the continued use of the English/Spanish sign, which would remain acceptable. If the grower chooses this approach, the second language must represent a language read by a majority of workers who do not read English. The English portion of the sign must not be omitted. Workers capable of reading both English and other language(s) should be considered English readers.

Under this proposal, growers who wish to replace the Spanish portion of the sign may accomplish this in several ways, including: (1) Covering the Spanish portion with a sticker displaying the appropriate second language, (2) writing in the substitute language on a sign produced with a blank portion, or (3) using originally produced warning signs with a second language other than Spanish. This proposal would not affect other format and design requirements of the WPS, including the requirement that signs must be visible, legible and

weatherproof, during the time they are posted.

The proposed text that would give growers the option of replacing the Spanish portion of the sign with a language other than Spanish is located in the regulatory text of this document.

#### *D. Solicitation of Comments on Bilingual Signs*

EPA is interested in receiving comments and information on the proposed option. Specifically, comments are requested on:

1. What are the advantages and disadvantages of changing the current warning sign provisions of the WPS to allow for the use of a non-Spanish second language?
2. What are the advantages and disadvantages of requiring all languages read by workers to be included on the warning sign?
3. If growers wish to replace the Spanish portion of the sign with another language, how practical and effective are the proposed options? Are there methods other than those identified by EPA, which would be more effective in facilitating the proposed language substitution?
4. If growers choose to use a non-Spanish second language, how should growers identify the non-Spanish language which is read by a majority of workers who do not read English?
5. What are the costs, availability, production time, and general feasibility of producing signs with a second language other than Spanish under the provisions of the proposed regulation?

#### **IV. Current Sign Requirements and Proposal for Smaller Signs**

##### *A. Current Requirements*

WPS § 170.120(c)(2) specifies that warning signs must be 14" X 16" (standard) in size, and the letters shall be at least 1 inch in height, unless a smaller sign and smaller letters are necessary "because the treated area is too small to accommodate a sign of this size."

Also, the signs must remain visible and legible during the time they are posted. On agricultural establishments, the signs must be visible from all usual points of worker entry to the treated area, or if there are no usual points of entry, signs must be posted in the corners of the treated area or in any other location affording maximum visibility. On farms and in forests and nurseries, usual points of entry include each access road, each border with any labor camp adjacent to the treated area, and each footpath and other walking route that enters the treated area. In

greenhouses, usual points of entry include each aisle or other walking route that enters the treated area.

##### *B. Reasons for this Proposal*

In the proposal of the 1992 regulation, the Agency did not propose a size requirement for warning signs, however signs were to be "clearly legible." However, in the response to comments on the proposal, the Agency explained that the final rule would specify a sign size because that would promote the use of generic signs and eliminate any ambiguity as to what is "clearly legible." The document also states that EPA would require 14" X 16" size signs, except where that size would be impractical, such as for posting individual potted plants and where numerous crops are grown in relatively small areas. In the final rule, however, use of the smaller sign was restricted only to areas where the size of the treated area would not accommodate a 14" X 16" size sign.

Since publication of the 1992 rule, the American Association of Nurserymen (AAN) has commented that use of smaller signs should not be limited to situations where the treated area is too small to accommodate a standard size sign, as the current rule requires. The AAN asserts that use of smaller signs should be an option in a wide variety of greenhouse and nursery production settings. The AAN reports that, as growers have tried to implement the current WPS sign requirements, the 14" X 16" (standard) size signs have been impractical and burdensome in greenhouses and nurseries, given the intensity and frequency of labor activity in these smaller-scale operations and their reliance on and requirement by WPS for posting. In greenhouses, all pesticide applications must be posted and oral notification to workers is required as well for some products. Although oral notification is an option in nurseries in most circumstances, posting is generally preferred by the industry because it would be difficult for workers to remember the locations of all the treated areas.

The AAN provides several reasons why the 14" X 16" signs interfere with operations and the clear identification of treated areas in greenhouse and nursery settings. First, they state that, as compared to farms and forests, the use of the standard size signs can result in crowding and confusion about the exact boundary of each of the treated areas because many signs can be required in a small area where there are different treatment regimes which are in close proximity. Second, installing, removing, and storing the standard size signs and

the physical supports, such as metal or wooden poles, presents added costs and difficulties for the industry. Third, the physical supports needed for the 14" X 16" inch signs can prevent operation of the standard machinery and equipment used in these operations and can obstruct overhead irrigation spray equipment, including the irrigation water itself.

The industry believes that the use of smaller signs in greenhouses and nurseries will facilitate posting and worker awareness of areas under the restricted entry interval (REI). In the AAN's view, allowing the use of smaller signs will eliminate the ambiguity and resulting inconsistencies in interpretation between growers and states as to when small signs can be used. The AAN also believes that smaller signs can be equally visible and legible in the small-scale of greenhouses and nurseries, as compared to larger signs on farms and forests.

Some state agencies have requested EPA's review of posting plans to determine whether they are consistent with current rule requirements. For example, the Oregon Association of Nurserymen (OAN) organized a task force with Oregon OSHA and EPA Region 10 to develop a system of posting beds and fields in greenhouses and nurseries. The Oregon plan contained the following conditions: For greenhouse and nursery beds, 5" X 5" signs would be placed at the beds' corners and every 25 feet along the beds

bordering walkways that serve as usual worker entry points. For nursery fields, each field would be posted with a 7" X 8" sign at its corners and every 50 feet along usual worker access routes bordering the field, such as walkways and access roads.

#### *C. Proposal to Allow Smaller Signs in Greenhouses and Nurseries*

The Agency believes that use of the 14" X 16" signs may interfere with operations or the clear identification of treated areas in greenhouses and nurseries, particularly in cases where there may be different treatment regimes in close proximity that require separate posting. EPA does not envision that using the standard-size signs would interfere with operations or the identification of treated areas on sod farms, tree nurseries, and nurseries where large fields of nursery stock receive uniform pesticide treatments.

EPA also believes that a minimum-size for smaller signs should be set because such a limitation may be necessary to meet the rule requirement that signs be both visible and legible from usual points of entry to the treated area. EPA considered proposing that signs be posted at specific distances, such as the Oregon plan discussed in Unit IV.B. of this preamble. However, although spacing signs at specific distances could be useful in clearly identifying the treated areas, the Agency is not proposing this requirement. The Agency is concerned that a single

specific distance between signs may not be appropriate for all nursery and greenhouse situations.

EPA is proposing the following for consideration and comment:

In addition to allowing the use of smaller signs when the treated area is too small to accommodate the 14" X 16" sign, EPA proposes to allow smaller signs in greenhouses and nurseries when use of a larger sign may interfere with operations or the clear identification of treated areas. This additional option would not preclude the continued use of a small sign based on spatial limitations, as presently allowed. Also, a minimum size would be set for smaller signs. This minimum size requirement would apply to all uses of small signs, including uses already allowed by the WPS. Further, signs would have to meet all other posting requirements of the rule, including that they be visible and legible during the time they are posted.

The proposed text that would incorporate a performance standard that considers interference with operations or the clear identification of treated areas and a minimum sign size for greenhouses and nurseries is located in the regulatory text of this document.

#### *D. Solicitation of Comments*

EPA is interested in receiving comments and information on the proposed option. Specifically, comments are requested on:

1. What are the advantages and disadvantages of amending the WPS in the manner described by this proposal?

2. What are the advantages and disadvantages of proposing a minimum-size sign?

3. What is an appropriate minimum-size requirement for smaller signs? Please provide any available data on the relationship between sign size and worker recognition that entry to the treated area is prohibited.

4. Should EPA require a maximum distance requirement between signs when smaller signs are used (e.g., the Oregon Proposal discussed in Unit IV.B. of this preamble)? If so, what should the distance be?

5. Would commenters prefer a more precise and objective standard, such as permitting the use of a smaller size sign on a smaller plot, e.g., 1/2 acre or less?

6. Should the grower be permitted to handwrite in a substitute language or should a manufactured sign or sticker be required?

#### V. Public Docket

A record has been established for this rulemaking under docket number "OPP-250107" (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of

Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for the rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in "ADDRESSES" at the beginning of this document.

#### VI. Statutory Requirements

As required by FIFRA section 25(a), this proposed rule was provided to the Secretary of Agriculture; the Committee on Agriculture of the House Representatives; and the Committee on Agriculture, Nutrition, and Forestry of the Senate for review. The FIFRA Scientific Advisory Panel waived its review.

#### VII. Regulatory Assessment Requirements

##### A. Executive Order 12866

Pursuant to Executive Order 12866 (58 FR 51735, October 4, 1993), it has

been determined that this is not a "significant regulatory action." OMB has waived its review.

Both the proposals to modify the second language requirements on the sign and to allow smaller signs in greenhouses and nurseries are only optional changes to the requirements of the current WPS. This proposed rule, if finalized, would provide non-mandatory options and, therefore, does not increase costs. In the event that either option is chosen, the second language change would be a negligible cost, and the smaller signs change would constitute regulatory relief.

##### B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act of 1980, the Agency must conduct a small business analysis to determine whether a substantial number of small entities would be significantly affected by the rule. However, this proposed rule potentially reduces burden and would not require actions which would increase costs. I therefore certify that this proposal does not require a separate analysis under the Regulatory Flexibility Act as it would not have an adverse impact on any small entity.

##### C. Paperwork Reduction Act

This proposed rule does not have any information collection requirements subject to the provisions of the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq.

*D. Unfunded Mandates Reform Act*

Pursuant to Title II of the Unfunded Mandates Reform Act of 1995, EPA has assessed the effects of this regulatory action on State, local, or tribal governments, and the private sector. This action does not result in the expenditure by State, local, and tribal governments in the aggregate or by the private sector of \$100 million or more in any one year.

## List of Subjects in Part 170

Environmental protection, Intergovernmental relations, Occupational safety and health, Pesticides and pests.

Dated: September 25, 1995.

Carol M. Browner,  
Administrator.

Therefore, 40 CFR part 170 is proposed to be amended as follows:

**Part 170—[Amended]**

1. The authority citation for part 170 would continue to read as follows:

Authority: 7 U.S.C. 136w.

2. In § 170.120, by revising paragraph (c)(2), redesignating existing paragraphs (c)(3) through (c)(7) as (c)(4) through (c)(8) respectively, and adding a new paragraph (c)(3) to read as follows:

**§ 170.120 Notice of applications.**

\* \* \* \* \*

(c) \* \* \*

(2) On all use sites, the sign shall be at least 14 inches by 16 inches in size, and the letters shall be at least 1 inch in height unless a smaller sign and smaller letters are necessary, because the treated area is too small to accommodate a sign of this size. In nurseries and greenhouses only, a smaller sign may be used when a 14 inches by 16 inches sign may interfere with operations or the clear identification of the treated area. If a smaller sign is used, under any of the conditions above, it must be at least X inches x Y inches and meet the requirements of paragraph (c)(1) of this section.

(3) The grower may replace the Spanish portion of the warning sign with another non-English language which is read by a majority of workers who do not read English. The replacement sign must be in the same format as the original sign and be visible, legible, and weatherproof.

[FR Doc. 95-24212 Filed 9-28-95; 8:45 am]

BILLING CODE 6560-50-F

**ENVIRONMENTAL PROTECTION AGENCY****40 CFR Part 170**

[OPP-250108; FRL-4969-5]

**Worker Protection Standard; Decontamination Requirements**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** EPA is proposing to amend the Worker Protection Standard (WPS) for agricultural pesticides by modifying the current requirements for decontamination sites for workers. EPA is proposing to shorten the time that decontamination sites are required when certain pesticides are used; all other decontamination provisions are unaffected by this proposal. The objective of the proposed change is to provide flexibility and encourage the use of low-toxicity pesticides, while ensuring that there is no increase in worker risk. EPA is also clarifying existing decontamination requirements so that agricultural employers will better understand their responsibilities under this WPS provision.

**DATES:** Written comments, data, or evidence must be identified by docket number and should be submitted on or before November 13, 1995.

**ADDRESSES:** Submit written comments in triplicate to: By mail: Program Resources Section, Public Response and Program Resources Branch, Field Operations Division (7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number "OPP-250108." No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this document may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in Unit VIII. of this document.

Information submitted as a comment concerning this document may be

claimed confidential by marking any part or all of that information as CBI. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the Virginia address given above from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Joshua First or Allie Fields, Office of Pesticide Programs, Field Operations Division, Certification, Training, and Occupational Safety Branch (7506C), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. By telephone: (703) 305-7437 and (703) 305-5391, respectively. By e-mail: first.joshua@epamail.epa.gov or fields.allie@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:**

## I. Statutory Authority

This proposal is issued under the authority of section 25(a) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), 7 U.S.C. 136w(a).

## II. Background of the Worker Protection Standard

In 1992, EPA revised the Worker Protection Standard (40 CFR part 170) (57 FR 38102, August 21, 1992) which is intended to protect agricultural workers from risks associated with agricultural pesticides. The 1992 WPS expanded the scope of the original WPS to include not only workers performing hand labor operations in fields treated with pesticides, but also workers in or on farms, forests, nurseries, and greenhouses. It also included pesticide handlers who mix, load, apply, or otherwise handle pesticides for use at these locations in the production of agricultural commodities. The WPS contains other requirements for training, notification of pesticide applications, use of personal protective equipment, restricted entry intervals, decontamination, and emergency medical assistance.

This proposed WPS amendment is one of a series of Agency actions in response to concerns raised by persons affected by the final WPS rule since its publication in August 1992. In addition to this proposed amendment, EPA will also be publishing a notice soliciting public comment about possible modifications to the requirements for the WPS warning sign.

### III. Current Worker Protection Standard Decontamination Requirement

Section 170.150 of the WPS requires that workers be provided with a decontamination site (water, soap, disposable towels) for washing off pesticide residues whenever a worker performs any task in an area where, within the last 30 days, a pesticide has been applied or a restricted-entry interval has been in effect, and the worker contacts anything that has been treated with the pesticide. Decontamination sites must consist of soap and single-use towels sufficient to meet workers' needs and enough water for routine washing and emergency eye flushing. The sites must be reasonably accessible to workers and not more than 1/4 mile from workers, or at the nearest place of vehicular access.

The water must be of a quality and temperature that will not cause injury when it contacts eyes, skin, or when it is ingested. Water cannot be stored in tanks used for mixing pesticides, unless the tank is equipped with functioning valves or mechanisms that prevent pesticides from entering the tank. EPA recommends that at least 1 gallon of water be available per worker for general washing. When workers are engaged in early-entry tasks in areas treated with pesticides that require protective eye wear, at least 1 pint of water must be immediately available to each worker for emergency eye flushing; this water must be carried by the worker, on the vehicle which the worker is using, or must be otherwise immediately available. At remote work sites, workers may use clean water from streams, springs, lakes, or other sources that are more accessible than the water at the decontamination site located at the nearest point of vehicular access.

Decontamination sites shall not be in areas being treated with pesticides. In general, decontamination sites shall not be in areas under a restricted entry interval (REI), unless workers are engaged in permitted early-entry tasks and are contacting treated surfaces. For workers who have performed early-entry tasks, employers must provide a decontamination site at the place where the workers remove their protective equipment with a sufficient amount of water to wash thoroughly. These requirements are discussed more fully in the next unit.

### IV. Discussion of Comments Received and Clarification of Requirements

The Agency has received comments and requests from stakeholders that changes to the WPS decontamination

requirement be made. EPA has held meetings with agricultural industry representatives and farmworker representatives to discuss their concerns about potential changes in the decontamination requirement. EPA has also received written comments on the subject. Concerns expressed by stakeholders in both correspondence and in meetings are reviewed below.

#### A. Stakeholder Concerns

In a July 8, 1994, petition for rulemaking, the National Association of State Departments of Agriculture (NASDA) requested that EPA narrow WPS decontamination supply requirements to periods which EPA has previously identified as posing potential contact with residues. In particular, NASDA asked for decontamination supplies to be required only during REIs or "immediately following the pesticide application." NASDA stated that the duration of the 30-day requirement is "unnecessary and wasteful" because decontamination supplies must be provided even when there is no apparent risk.

NASDA stated that pesticide dusts and mists settle after a pesticide application, which minimizes the opportunity for workers to contact the pesticide residues. Moreover, NASDA argued that, unless EPA has a specific health-based concern about a particular pesticide, which should be reflected in the pesticide's REIs, decontamination supplies should not be required beyond a pesticide's REI because foliar residues should be largely dissipated by the time the REI expires; NASDA stated that risks are relatively low when foliar residues are mostly dissipated. NASDA also argued that it is impractical to place a decontamination site where potential risks from residues are arguably low, instead of in areas where potential risks are known to be high.

The Farm Bureau, the Cotton Council, and other stakeholders have stated in correspondence and in meetings with EPA that the requirement is unduly burdensome because there is little or no worker risk from what pesticide residues remain after the respective REIs expire. These commenters believe that the sites would be better utilized in more recently treated areas. Industry stakeholders comments have focused on the risks associated with pesticides' acute toxicity.

Some agricultural industry stakeholders stated that putting decontamination sites in areas of arguably low risk, such as areas where the REIs have expired, results in the inefficient use of transport equipment. For example, on some cotton farms

work crews are large, and decontamination supplies and facilities are transported in trailers. Commenters have stated that the trailers are expensive, are difficult to move around, and that purchasing several of them, instead of moving one trailer to the area most in need of a decontamination site, is an added burden and an inefficient use of equipment. Some commenters have stated that other vehicles, such as pickup trucks, are also not efficiently used, because large water tanks are kept in the truck's bed and the truck must remain with the workers.

On the other hand, stakeholders representing farmworker concerns have taken issue with the proposed changes to the decontamination requirement. For example, the Farmworker Justice Fund and the American Farmworker Opportunities Program have requested that EPA not make any changes to the requirement. They have stated that a change to the requirement may be perceived as a weakening of the requirement and might promote less compliance. Stakeholders representing farmworkers have said that implementing any of the possible changes mentioned in this proposal will weaken the requirement. They have said that these changes will result in increased risks to farmworkers, because the number of opportunities for farmworkers to wash themselves during working hours will decrease. These commenters have also stated that the requirement is easy to meet because of its low costs and, therefore, there is no basis for changing it.

#### B. Clarification of Current Worker Protection Standard Decontamination Requirement

EPA has received comments and requests to provide clarification about the WPS decontamination requirement. The Agency has realized from these questions that the requirement is not completely understood by agricultural employers. In response, EPA is providing the following information.

1. *When a decontamination site must be provided and when it is not required.* A decontamination site is only required whenever workers perform tasks resulting in contact with pesticide-treated surfaces in an area that has been treated with pesticides within the last 30 days, or an REI has been in effect in the area within the last 30 days. The decontamination site is not required to be left in or near a pesticide-treated area when workers are not present, nor is a decontamination site required to be left in or near a pesticide-treated area in the event that it might be needed at some future time.

Decontamination sites are not required when there are no workers present in the treated area. Decontamination sites are not required when workers are engaged in work that does not result in contact with pesticide-treated surfaces. For example, a decontamination site is not required for a worker who walks into a treated field to place a flag without handling the crop or otherwise contacting treated surfaces. Likewise, a decontamination site is not required for workers who enter fields where the treated surface(s) has been completely removed.

The removal of treated surfaces can occur during the harvest of some crops. However, not all harvesting will result in the removal of all treated surfaces. The harvest of some crops is accomplished in stages, such as melons. Melons ripen throughout the growing season and it is likely that many melons remaining in the field will have pesticides residues on them that are less than 30 days old, due to periodic retreatment. With other crops, such as orchard fruits, harvesting cannot completely remove all treated surfaces, which include tree leaves and branches. However, the remains of some field crops are plowed under after harvest. In that case, there would be no treated surfaces remaining.

2. *How to transport and provide a decontamination site.* Employers have expressed concern about ways to transport and provide decontamination sites, particularly the water. Employers have stated that providing large containers of water limits the use of the transport vehicle, which is often left stationary with the supplies in or on it. In response, the Agency would like to emphasize that the method of providing decontamination supplies is at the discretion of the employer. Examples of placement of the supplies can include in a shed, trailer, pickup truck, carboy, or enclosed container.

Decontamination water must be sufficient for workers' needs. If running water is not immediately available, EPA recommends that at least 1 gallon of water be provided for each worker. The water need not necessarily be in a single large container that would be kept in or on a vehicle. It can be provided in smaller containers, such as large and medium coolers, or even 1 gallon jugs. Whenever possible, EPA recommends that employers provide larger water containers. Small ones, such as 1 gallon jugs, are more easily contaminated because they are handled more, and more easily moved and knocked over than larger containers.

3. *Duration of decontamination sites.* The decontamination requirement does

not require that a permanent supply site be built, such as a shed. The requirement will be satisfied so long as the decontamination supplies are reasonably accessible to workers (within ¼ mile or at the nearest point of vehicular access), and the water is of a quality and temperature that will not cause illness or injury when it contacts the skin or eyes or if it is swallowed. Water can be kept at acceptable temperatures any number of ways, the most common being shade, although coolers are also common.

4. *Decontamination sites in areas under an REI.* A decontamination site can be placed in a pesticide-treated area, including an area under an REI. The decontamination site can be in an area under an REI only if intended for workers engaged in early entry tasks in that area.

In the case of workers engaged in early entry work in an area under an REI, it is the employer's discretion on where to provide the decontamination site. The site can be placed at the edge of the area under the REI, where there is less opportunity for it to contact pesticide residues. However, the employer may also wish to place the site in the area under the REI, where it would be closer to the workers. The site must be within ¼ mile of the work area or at the nearest point of vehicular access.

Workers entering areas under an REI in a vehicle, such as a truck or tractor, may bring decontamination supplies with them in the vehicle, so long as the supplies will not contact pesticides or their residues. One way of ensuring that the decontamination supplies do not contact pesticides or their residues is to store them in an enclosed container. An enclosed container can be a closable plastic bag, a hard plastic box with a sealable lid, or other similar container.

When decontamination sites are in a treated area, and there is no REI in effect, enclosed containers or other measures to ensure that the decontamination supplies do not contact pesticide residues are not required, although EPA recommends that they be used.

5. *Federal and State Occupational Safety and Health Administration (OSHA) Requirements.* The OSHA Field Sanitation Standard (29 CFR 1928.110) sets sanitation requirements similar to those promulgated by EPA for worker decontamination. Several states, such as Washington, California, and Oregon, have requirements similar to or stricter than the OSHA requirements. These states appear to be the exception, however. The vast majority of states do not have requirements similar to

OSHA's. To the extent that the provision of state and OSHA-required facilities coincide with WPS decontamination requirements, it is acceptable to use the state or OSHA-required facility. Therefore, employers meeting the OSHA or state requirement will not incur additional cost or burden in complying with the WPS decontamination requirement.

The OSHA standard requires agricultural employers who employ more than 10 workers at a given time to provide to those workers, among other things, hand washing facilities, including potable water, when workers are engaged in hand labor operations in the production of crops in the field. OSHA's Standard differs significantly from the WPS requirement in the following ways: It applies only to larger establishments; it applies to all hand labor (not work resulting in limited contact with pesticide-treated surfaces); and it applies only to more than 3 hours of labor. The WPS decontamination requirements apply to any labor resulting in any contact with treated surfaces.

6. *Length of time that decontamination sites are required after the REI.* Decontamination sites are required for 30 days after a pesticide has been applied or after a REI has expired. All but a few pesticides have at least 4-hour REIs; therefore, it is highly likely that decontamination sites will be required for 30 days in almost all situations where pesticides are used. If the employer wishes to do so, decontamination sites can be provided to employees for longer than 30 days.

Should the proposed change in this proposed rule be implemented, the period for which decontamination sites would be required for certain low-toxicity pesticides will be shortened from 30 days to between 1 and 15 days. The interval will be determined after the 45-day comment period on this proposed rule.

## V. Options Considered and EPA's Proposal

EPA considered several possible changes to the decontamination requirement, and is proposing to change the length of time decontamination supplies are required for pesticide-treated areas that have been under a 4-hour REI, e.g., end-use products containing active ingredients that have passed EPA's low toxicity screening criteria. The Agency believes that this proposed change will provide regulatory flexibility and promote the use of low-toxicity pesticides, while ensuring that worker risk is not increased. Although the Agency is not proposing any of the

other changes it considered at this time, EPA desires comments on these possible changes. Should EPA receive comments on these options that the Agency finds to be compelling, it is possible that one or more of the options could be implemented.

#### A. Options EPA Considered

1. *Eliminating the requirement of a decontamination site after crops are harvested.* EPA considered the option of eliminating the decontamination requirement after certain crops are harvested. EPA is not proposing this option for the following reasons.

First, tasks which occur after harvesting can result in high exposures to pesticide-treated surfaces and, therefore, high exposures to pesticide residues if residues remain. Implementing this option would contradict EPA's regulation that tasks resulting in any contact with pesticide-treated surfaces must be accompanied by a decontamination site. Depending on the persistence of the pesticide residues and the time that has elapsed between application and harvest, the risks could still be high. For example, this option could not be applied to orchard crops, melons, and other crops where significant amounts of live plant material or foliage remain after the crop harvest. Because so many different crops leave similar amounts of foliage after harvest, determining the crops that are ineligible for this option would be too resource-intensive.

Second, in those cases where the treated surfaces have been completely removed during harvest, the rule already allows entry with no contact without requiring decontamination supplies.

Finally, the costs of providing a decontamination site (which consists of water, soap, and disposable towels) are quite low. In certain situations, potential exposure to pesticide residues from activities in treated areas, and potential risks, even after harvest, can be high. Therefore, the Agency believes that the risks avoided by having decontamination sites available to workers appear to justify the very small costs of meeting that requirement.

2. *Ending the decontamination requirement when REIs expire.* EPA considered eliminating the requirement for decontamination sites after the particular REI has expired. This option is appealing because the REI represents the time of greatest exposure potential and the greatest potential acute risk. The WPS establishes interim REIs, based on toxicity, for pesticides which have not been through the reregistration process. Excluding the interim REIs set by the

WPS, EPA sets permanent REIs through the registration, reregistration and special review processes to coincide with the dissipation of pesticide residues, thereby minimizing potential worker exposure to residues.

EPA is not proposing this option for several reasons. First, pesticide residues often remain even after the REI. The residues present after the REI may not always pose an acute risk, but EPA is also concerned about other risks that they may pose, such as reproductive effects and carcinogenicity. If the decontamination requirements were to be eliminated immediately following the expiration of the REI, the workers would be subject to higher risks. The Agency believes that washing with soap and water will mitigate, to a substantial extent, the potential acute, chronic, and subchronic risks posed by pesticide residues which may remain after the REI.

Second, EPA does not yet have complete data sets on residue dissipation for all pesticides which have not been through the reregistration process; thus, interim REIs may not accurately reflect all potential risk to workers. Based on its experience with the reregistration process, the Agency believes that some REIs may be increased in the future.

3. *Relating the length of time a decontamination site is required to toxicity category.* EPA considered relating the length of time a decontamination site is required to broad toxicity categories (such as Toxicity Categories I through IV). EPA is not willing to propose this option because many pesticides can present risk beyond the REI, particularly for the higher toxicity pesticides. Pesticides can also present other than acute risks and EPA believes that provision of decontamination supplies should continue as currently required for most pesticides.

EPA is willing to propose a reduced decontamination period for a specific subset of pesticides, such as certain determined low-toxicity pesticides that have had 4-hour REIs approved for their use. EPA believes that pesticides that qualify for 4-hour REIs have been shown to present far less risk than pesticides with longer REIs. EPA does not believe that it is prudent to completely eliminate the decontamination requirement for these low-toxicity pesticides based upon the assumption that additional risks, such as carcinogenicity and mutagenicity, may still exist.

#### B. Proposed Change

This proposal is in response to the input EPA has received from its stakeholders. It addresses only the requirement that decontamination sites be provided to workers for 30 days after the expiration of REIs. Other decontamination provisions will not be affected by this proposal.

1. *Reasons for proposal.* In considering the requests to change the decontamination requirement, EPA has reassessed the initial analysis used to establish the 30-day requirement. This reassessment is based on two factors. The first is the Agency's experience with recent data from the reregistration process. Through the reregistration process, it has been demonstrated that many pesticides pose additional risks, such as carcinogenicity and developmental effects. Second, agricultural pesticides that have not been through the reregistration process lack complete or substantially-complete data sets, making it difficult for the Agency to make an accurate estimate of the risks that these pesticides may pose. Although the Agency has established product specific REIs for pesticides that have completed the reregistration or special review processes, the Agency believes that products with permanent REIs, as well as those products with interim REIs should retain the 30 day decontamination period.

However, EPA has sufficient information to support the proposition that, because different pesticides pose different levels of risk, the current decontamination requirement does not adequately fit all pesticides. EPA is willing to decrease the time a decontamination site is required for pesticides which have been demonstrated to pose low or insignificant worker risks. The criterion EPA is using to determine which pesticides pose low or insignificant worker risks is a 4-hour REI. Any end-use pesticide that has had 4-hour REIs approved will have met or exceeded the standard for low or insignificant risk described in the May 3, 1995 Policy Statement (60 FR 21965).

In that policy statement, EPA identified 114 active ingredients which do not appear to pose any significant risks to workers. Based on substantial data sets (many of the 114 active ingredients have complete data sets) and a thorough screening of each pesticide, EPA believes that the 114 active ingredients listed in the Policy Statement present low risk. This is because of the active ingredients' low acute toxicity, an absence of reported worker poisonings associated with their

use, and because no other toxicity or risk concerns have been identified with them. For active ingredients lacking complete data sets, EPA substituted analog data, which the Agency believes is sufficient for the purpose of the screening. The screening process EPA employed could be compared to a shortened version of the reregistration process, in terms of determining potential risk.

EPA is comfortable with the degree of risk posed by the chemicals that qualify for the reduced REIs. EPA's screening process for active ingredients and end-use products was designed to eliminate chemicals that posed too many unknown risks because of data gaps, absence of chronic effects data, or no analog data. EPA believes that because the active ingredients associated with 4-hour REIs do not appear to pose any significant worker risks, decontamination supplies should be required for less than the current 30-day period. Therefore, the Agency proposes to reduce the 30-day decontamination requirement for all pesticides for which EPA approves 4-hour REIs.

2. *Proposal.* EPA is proposing a range of 1 to 15 days for those pesticides with 4-hour REIs. However, EPA will consider other lengths of time if appropriate data are submitted to support any requested periods. After 45 days from the publication of this proposed rule, EPA will evaluate public comments, select an interval, and issue its conclusions in the final rule.

This change is not proposed for situations where two or more pesticides are mixed together, unless the mixed pesticides have 4-hour REIs, or have all met or exceeded the criteria in the policy statement, or are designated by EPA as having the same or lower risk profile as those chemicals on the list of active ingredients in the policy statement.

Because of the low costs associated with providing decontamination sites and the potential risks workers face from exposure to pesticide residues, EPA is not proposing any other change to the decontamination requirement. EPA has not made the risk-benefit finding necessary to eliminate or otherwise alter the length of the decontamination requirement, except for products with 4-hour REIs.

#### VI. Solicitation of Comments

EPA is interested in receiving comments and information on the proposal and on options presented, and is providing 45 days for the submission of comments.

While stakeholders did not submit any data to support their request to shorten the period when decontamination sites are required, EPA believes that there is merit to the assertion that the 30-day decontamination requirement may be inappropriate for some low-toxicity pesticides. Therefore, EPA is issuing this proposal to notify the public about possible changes in the WPS decontamination requirement and to solicit information and comments. This information will assist EPA in determining whether the conditions resulting from the proposed change would pose unreasonable risks to workers. In addition, EPA is soliciting information about the economic impact of the proposed option in this document. EPA desires comments on all of the options considered by the Agency, as presented in this proposed rule.

EPA is especially interested in receiving information about the potential implications for regulatory compliance and enforcement that the proposed change might create. Many commenters have requested that the WPS be changed to better fit actual field situations. EPA has responded to these requests by making changes to the WPS where they are justified by weighing the risks and the benefits. However, EPA has received many comments that the WPS is too complicated as a result of these changes, and that these changes result in a more complex rule that is more difficult to comply with and to enforce. Any information that will help EPA resolve the relative trade-offs between regulatory flexibility and more complex regulations will be useful.

EPA is also interested in receiving worker exposure data or worker incident data related to decontamination requirements. Information on the possible risks to workers that could result from any of the proposed options is of interest to EPA. Information from sources such as state incident reporting, poison control centers, hospital surveys, and worker exposure studies (studies involving passive dosimetry are particularly desirable) is valuable.

#### VII. Statutory Requirements

As required by FIFRA section 25(a), this proposed rule was provided to the U.S. Department of Agriculture and to Congress for review. The FIFRA Scientific Advisory Panel waived its review.

#### VIII. Public Docket

A record has been established for this rulemaking under docket number

“OPP-250108” (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as CBI, is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov.

Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this rulemaking, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official rulemaking record which will also include all comments submitted directly in writing. The official rulemaking record is the paper record maintained at the address in “ADDRESSES” at the beginning of this document.

#### IX. Regulatory Assessment Requirements

##### A. Executive Order 12866

Pursuant to Executive Order 12866 (58 FR 51735, October 4, 1993), it has been determined that this is not a “significant regulatory action.” OMB has waived its review.

This proposal does not increase requirements which would increase costs to any person. Any optional changes implemented would reduce the regulatory burden.

##### B. Regulatory Flexibility Act

This proposed rule was reviewed under the provisions of section 3(a) of the Regulatory Flexibility Act, and it was determined that the rule would not have an adverse impact on any small entities. Moreover, this proposed rule would provide regulatory relief and would not impose any additional costs (in fact, it could lower costs). I therefore certify that this proposal does not require a separate analysis under the Regulatory Flexibility Act.

*C. Paperwork Reduction Act*

This proposal contains no information collection requirements, and is therefore not subject to the Paperwork Reduction Act.

## List of Subjects in Part 170

Environmental protection, Intergovernmental relations, Occupational safety and health, Pesticides and pests, and Reporting and recordkeeping requirements.

Dated: September 25, 1995.

Carol M. Browner,  
*Administrator.*

Therefore, it is proposed that 40 CFR part 170 be amended as follows:

1. The authority citation for part 170 would continue to read as follows:

**Part 170—[Amended]**

Authority: 7 U.S.C. 136w.

In 170.150, by revising paragraph (a) to read as follows:

**§ 170.150 Decontamination.**

(a) *Requirement.* (1) If any worker on an agricultural establishment performs an activity in an area where a pesticide has been applied, or a restricted-entry interval (REI) has been in effect, and the worker contacts anything that has been treated with the pesticide, including, but not limited to, soil, water, plants, plant surfaces, and plant parts, the

agricultural employer shall provide, in accordance with this section, a decontamination site for washing off pesticide residues for a 30-day period following the expiration of the REI.

(2) If the pesticide (end-use product) that has been applied requires a REI of 4 hours or less, then notwithstanding the requirement for 30 days in paragraph (a)(1) of this section, the agricultural employer shall provide a decontamination site for not less than [1 to 15] days following the expiration of the REI.

**Department of  
Housing and Urban  
Development**

---

**Historically Black Colleges and  
Universities Program; Funding Availability  
for FY 1995; Notice**

**DEPARTMENT OF HOUSING AND  
URBAN DEVELOPMENT**

**Office of the Assistant Secretary for  
Community Planning and  
Development**

[Docket No. FR-3945-N-01]

**Notice of Funding Availability for FY  
1995 Historically Black Colleges and  
Universities Program**

**AGENCY:** Office of the Assistant Secretary for Community Planning and Development, HUD.

**ACTION:** Notice of funding availability (NOFA) for fiscal year (FY) 1995.

**SUMMARY:** This NOFA announces up to \$1.5 million of FY 1995 funding for Historically Black Colleges and Universities (HBCU) to undertake jointly funded Community Development Block Grant (CDBG) projects with units of general local government. In the body of this document is information concerning the following:

a. information regarding the purpose of the NOFA and available funds, objectives, eligibility and selection criteria; and

b. Application processing, including how, where and when to apply and how selections will be made.

**DATES:** No applications will be accepted after 4:30 pm on November 28, 1995.

This application deadline is firm as to date and hour. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems. Applications may not be submitted by facsimile (FAX).

**ADDRESSES:** For an application kit contact: Processing and Control Branch, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street SW, Room 7255, Washington, DC, 20410-3500. ATTN: HBCU Program. Requests must be in writing and may be sent to this address or may be made by facsimile machine to the following number: (202) 708-3363. The TDD number for the hearing impaired is (202) 708-2565. (This is not a toll-free number.) When requesting an application kit, please refer to document FR- , and provide your name, address (including zip code), and telephone number (including area code). Requests for HBCU application packages should

be made immediately. HUD will distribute application packages as soon as they become available.

Application Submission: An original and three copies of the completed application should be submitted to the following address: Processing and Control Branch, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street SW, Room 7255, Washington, DC, 20410-3500. ATTN: HBCU Program.

**FOR FURTHER INFORMATION CONTACT:** Dr. James Turk, Office of Technical Assistance, Department of Housing and Urban Development, 451 7th Street SW, Room 7253, Washington, DC 20410. Telephone Number: (202) 708-3176. The TDD number for the hearing impaired is (202) 708-2565. (These are not toll-free numbers.)

**SUPPLEMENTARY INFORMATION:**

Paperwork Reduction Act Statement

The information collection requirements contained in this notice have been approved by the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520). The control number for information described in this document is 2506-0122.

**I. Purpose and Substantive Description**

Funding is being made available under this NOFA to assist HBCUs in forming partnerships with units of general local governments to conduct joint program efforts. These partners will undertake joint projects to establish multiple use community services facilities on HBCU campuses that will benefit low-income and subsidized housing residents, senior citizens, and the HBCUs.

**A. Authority**

This program is authorized under section 107(b)(3) of the Housing and Community Development Act of 1974 (the 1974 Act), which was added by section 105 of the HUD Reform Act of 1989. The program is governed by regulations contained in 24 CFR 570.201 through 207, 24 CFR 570.400, 570.404 and 24 CFR part 570, subparts A, C, J, K, and O.

**B. Allocation Amounts and Form**

The Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act 1995, (approved September 28, 1994, Pub. L. 103-327), (95 App. Act) appropriated \$44,000,000 for special purpose grants pursuant to

section 107 of the Housing and Community Development Act of 1974. This notice announces HUD's intention to award up to \$1.5 million from these FY 95 funds for partnership projects between units of local government and HBCUs. The maximum amount awarded to any applicant will be \$500,000. The awards will be made in the form of grants.

**C. Eligibility**

1. *Eligible Applicants.* Only HBCUs as determined by the Department of Education in 34 CFR 608.2 in accordance with that Department's responsibilities under Executive Order 12677, dated April 28, 1989, are eligible to submit applications.

2. *Eligible Activities.* Funds are being made available under this NOFA for HBCUs and units of general local government to undertake jointly-funded projects to establish multiple use community services facilities. Examples of such facilities include Counseling and Skills Development Centers, Cultural Art Centers, and Elderly Housing Centers to provide activities such as: Adult basic education classes; GED preparation and testing; job and career counseling and assessment; job readiness and placement assistance; cultural and recreational activities that include dancing lessons, art classes and other support activities for youth, senior citizens and other low and moderate income residents; day care services; and social and medical services.

Activities under this NOFA must not be inconsistent with the locality's community development plan or program, or its HUD-approved consolidated plan in accordance with 24 CFR Part 91. For the purposes of this program, the term "locality" includes any city, local government, county, town, township, parish, village, or other unit of general local government of a State within which an HBCU is located. An HBCU located in a metropolitan statistical area (MSA), as established by the Office of Management and Budget, may consider its locality to be one or more of these entities within the entire MSA. The nature of the locality for each HBCU may, therefore, differ depending on its location.

Those applicants planning to use funds for the provision of public services are bound by the statutory requirement that not more than 15% of the total grant amount be used for public service activities.

3. *Environmental Review.* If the applicant proposes activities involving rehabilitation of structures or construction of buildings, an environmental review is required and

the proposed project must pass an environmental review in accordance with 24 CFR part 50. If the requirements of part 50 are not met, HUD reserves the right to terminate all or portions of the award. The grantee is not authorized to proceed with any activity requiring such approval until written approval is received from the HUD environmental office in your area certifying that the project has been approved.

In accordance with the Coastal Barrier Resources Act (16 U.S.C. 3601), HUD will not approve applications for any activities that would be located or carried out in the Coastal Barrier Resources System.

#### D. Selection Criteria/Ranking Factors

An applicant must demonstrate that it meets the objectives of this HBCU program by scoring at least 12 of the possible 20 points on ranking factor 1 (addressing the objectives) in order to qualify for funding. Applicants must also receive a minimum score of 70 out of the total of 105 points to be considered eligible for funding. Activities which are not eligible for funding under this program (see 24 CFR 570.207) will not be funded. If more than 50 percent of the amount requested in the application is for ineligible activities, the application will not be funded.

Applications for funding under this Notice will be evaluated competitively, and awarded points based on the factors identified below. The Department will rank the applications in descending order according to score. Applications meeting the minimum threshold requirements will be funded in rank order, until all available funds have been obligated, or until there are no acceptable applications.

**Negotiations.** After all applications have been rated and ranked and a determination of successful applicants has been made, HUD requires that all successful applicants participate in negotiations to determine the specific terms of the Statement of Work and grant budget. In cases where HUD cannot successfully conclude negotiations, awards will not be made. In such instances, HUD may elect to offer an award (in an amount not to exceed the amount of remaining funds available for the competition) to the next highest ranking applicant and proceed with negotiations as described above.

**Match.** The Department will accept only those applications which demonstrate that the HBCU and unit of government have both agreed to contribute matching funds to undertake a joint project on the HBCU campus.

Each HBCU applying under this competition must include a letter from the Chief Executive Officer of the participating unit of government certifying that it has formed a partnership with the HBCU to undertake a jointly funded CDBG project using both the HBCU funds of this award and local funds to conduct projects on HBCU campuses. The letter from the unit of local government must certify that they are contributing local funds. Matching funds may be in the form of local Community Development Block Grant Funds.

**Rating Factors.** The factors set forth below will be used by the Department to evaluate applications. Each application must contain sufficient information to be reviewed for its merits. The score of each factor will be based on the qualitative and quantitative aspects demonstrated for each factor in an application. The factors, and the maximum number of points for each factor (out of a total of 105 points, which includes up to 5 bonus points), are as follows:

##### 1. *Addressing the Objectives.* (maximum points: 20)

The extent to which the applicant addresses the objectives of this program is examined by this factor. Applicants must address objective i.A., below, by demonstrating how the proposed joint activities between them and the unit of government will expand the role of the HBCU in meeting local community economic development and/or housing needs while furthering HUD's priorities identified in objective i.B., below.

##### i. The objectives of this program are:

A. To help HBCUs in undertaking joint activities between them and the unit of local government to establish multiple use community services facilities on HBCU campuses that will benefit low-income and subsidized housing residents, senior citizens, and the HBCU, consistent with the purposes of title I of the Housing and Community Development Act of 1974; and

B. To help HBCUs through joint projects with units of government address the needs of their localities in supporting the following HUD values:

\* A Commitment to Community;

\* A Commitment to Support

Families;

\* A Commitment to Economic Lift;

\* A Commitment to Reciprocity and to Balancing Individual Rights and Responsibilities.

\* A Commitment to Reducing the Separations by Race and Income in American Life.

ii. In rating this factor, the Department will consider:

A. The extent to which the applicant demonstrates that the proposed joint activities to be carried out in the multiple use community services facilities to be established on HBCU campuses with units of government will expand its role and effectiveness in addressing community development needs in its locality(ies), in accordance with objective i.A., above;

B. The extent to which the applicant demonstrates that the proposed joint activities will further one or more of the (5) HUD values specified in objective i.B., above;

C. The extent to which the applicant demonstrates that it will provide to the greatest extent feasible, and consistent with existing Federal, State, and local laws and regulations, job training, employment, contracting and other economic opportunities to section 3 residents and section 3 business concerns.

##### 2. *Substantial Impact in Achieving Objectives.* (maximum points: 25)

The extent to which the applicant demonstrates that the proposed jointly-funded activities to be carried out in the multiple use community facilities would have a substantial impact in achieving the overall objectives of this NOFA. In rating this factor the Department will consider:

a. The extent to which the applicant demonstrates how the proposed joint activities to be carried out will address needs that were identified as high priorities in each locality's HUD-approved Consolidated Plan in accordance with 24 CFR part 91.

b. The extent to which the applicant demonstrates how the proposed joint activities to be carried out in the multiple use community facilities will impact the low income and elderly residents of the community which the HBCU serves; the applicant should cite specific impacts anticipated.

##### 3. *Special Needs of Applicant or Locality.* (maximum points: 10)

This factor examines the extent to which the applicant demonstrates that the jointly funded activities, to be carried out in the multiple use community services facilities being proposed by the HBCU and the unit of local government, address special needs of the applicant or the locality. In rating this factor, HUD will consider the degree to which the applicant identifies specific groups or neighborhoods to be served, and how the facilities will meet the identified needs of those groups or neighborhoods. More points will be given to applications which target assistance to public housing residents and the elderly.

#### 4. *Technical and Financial Feasibility and Match.* (maximum points: 25)

This factor examines the extent to which the applicant demonstrates the technical and financial feasibility of achieving the objectives, the local support by the unit of government for the activities proposed to be carried out in the locality, and the required matching funds proposed to be provided from sources other than the applicant. In rating this factor, the Department will consider:

a. The extent to which the applicant demonstrates the technical feasibility of achieving the objectives within the program period proposed;

b. The extent to which the applicant demonstrates the financial feasibility of, and local support by the participating unit of government for, the activities to be carried out in the locality, as evidenced by the commitment, from sources other than the applicant, of matching funds, staffing, services, or other in-kind resources.

#### 5. *Capacity.* (maximum points: 20)

This factor examines the extent to which the applicant demonstrates the capacity to carry out satisfactorily the proposed activities in a timely fashion, including consideration of satisfactory performance in carrying out any previous HUD-assisted projects or activities. In rating this factor, the Department will consider:

i. The extent to which the applicant's proposed management plan:

A. Clearly delineates staff responsibilities of the HBCU and local government partners and accountability for all work required;

B. Presents a Statement of Work with a clear and feasible schedule for conducting all project tasks; and

C. Presents a reasonable and adequate budget as reflected in the budget-by-task and supporting justification for the budget. The budget should identify matching dollars and/or in-kind service contributions that have been equated to dollars. The budget should break these out to indicate match versus HUD funds.

ii. The extent to which the applicant demonstrates the recent and relevant work experience of the staff proposed to undertake the activities described in the Statement of Work.

iii. The extent to which the applicant can demonstrate that its past and current projects funded by HUD and/or other Federal or private sector sources are or have been completed on schedule and have met or are meeting goals established for addressing local needs.

iv. The extent to which the applicant demonstrates the proposed program manager's capacity, background and

experience to carry out the proposed activities in a satisfactory and timely fashion, as evidenced by recent work experience in managing projects of the same or similar size, dollar amount, and types of activities as those proposed in the application.

*Bonus Points.* Applicants that undertake joint construction projects on HBCU campuses with units of local governments in a Federally-designated Empowerment Zone, Urban Supplemental Empowerment Zone, Enterprise Community, or Urban Enhanced Enterprise Community will receive a maximum of 5 bonus points. To receive these bonus points applicants must submit with the application package a certification from the authorized representative of the local government that the HBCU is located within the zone.

#### II. Application Submission Requirements

Complete application submission requirements are contained in the FY 1995 Historically Black Colleges and Universities Program application package. The application package will request information in sufficient detail for HUD to determine whether the proposed activities are feasible and meet all the requirements of applicable statutes and regulations.

#### III. Corrections to Deficient Applications

Immediately after the deadline for submission of applications, applications will be screened to determine whether all required items were submitted. If the applicant fails to submit certain technical items, or the application contains a technical mistake, such as an incorrect signatory, the Department shall notify the applicant in writing that the applicant has 14 calendar days from the date of the written notification to submit the missing item, or correct the technical mistake. If the applicant does not submit the missing item within the required time period, the application will be ineligible for further processing.

The 14-day cure period pertains only to non-substantive technical deficiencies or errors. Technical deficiencies relate to items that:

1. Are not necessary for HUD review under selection criteria/ranking factors; and

2. Would not improve the substantive quality of the proposal.

#### IV. Other Matters

(a) Environmental Impact. A Finding of No Significant Impact with respect to the environment has been made in accordance with the Department's

regulations at 24 CFR Part 50 which implement Section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays at the Office of the Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, DC 20410.

(b) Federalism, Executive Order 12612. The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies and procedures contained in this NOFA will not have substantial direct effect on States or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government. Specifically, the NOFA solicits HBCU applicants to expand their role in addressing community development needs in their localities and does not impinge upon the relationships between the Federal government, and State and local governments.

(c) Family, Executive Order 12606. The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this document does not have potential for significant impact on family formation, maintenance, and general well-being. The notice only solicits HBCUs to apply for funding to address community development needs in their locality. Any impact on the family will be indirect and beneficial in that better planning of community development needs should result.

(d) Prohibition Against Lobbying Activities. The use of funds awarded under this NOFA is subject to the disclosure requirements and prohibitions of section 319 of the Department of the Interior and Related Agencies Appropriations Act for Fiscal Year 1990 (31 U.S.C. 1352) (The "Byrd Amendment") and the implementing regulations at 24 CFR part 87. These authorities prohibit recipients of federal contracts, grants, or loans from using appropriated funds for lobbying the Executive or Legislative branches of the federal government in connection with a specific contract, grant, or loan. The prohibition also covers the awarding of contracts, grants, cooperative agreements, or loans unless the recipient has made an acceptable certification regarding lobbying. Under 24 CFR part 87, applicants, recipients, and subrecipients of assistance exceeding \$100,000 must certify that no federal funds have been or will be spent

on lobbying activities in connection with the assistance.

(e) Section 102 HUD Reform Act; Documentation and Public Access Requirements. HUD will ensure that documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance pursuant to this NOFA in its Federal Register notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the Federal Register on January 16, 1992 (57 FR 1942), for further information on these requirements.)

(f) Section 103 HUD Reform Act. HUD's regulation implementing section 103 of the Department of Housing and Urban Development Reform Act of 1989 was published May 13, 1991 (56 FR 22088) and became effective on June 12, 1991. That regulation, codified as 24 CFR Part 4, applies to the funding competition announced today. The requirements of the rule continue to

apply until the announcement of the selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are limited by Part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR Part 4.

Applicants who have questions should contact the HUD Office of Ethics (202) 708-3815. (This is not a toll-free number.) The Office of Ethics can provide information of a general nature to HUD employees, as well. However, a HUD employee who has specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, should contact his or her Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

(g) Section 112 HUD Reform Act. Section 13 of the Department of Housing and Urban Development Act (42 U.S.C. 3537b) contains two provisions dealing with efforts to influence HUD's decisions with respect to financial assistance. The first imposes disclosure requirements on those who are typically involved in these efforts—those who pay others to influence the award of assistance or the taking of a

management action by the Department and those who are paid to provide the influence. The second restricts the payment of fees to those who are paid to influence the award of HUD assistance, if the fees are tied to the number of housing units received or are based on the amount of assistance received, or if they are contingent upon the receipt of assistance.

Section 13 was implemented by final rule published in the Federal Register on May 17, 1991 (56 FR 22912). The final rule was codified as 24 CFR part 86. If readers are involved in any efforts to influence the Department in these ways, they are urged to read part 86, particularly the examples contained in Appendix A of the regulation.

Any questions about the rule should be directed to the Office of Ethics, room 2158, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410-3000. Telephone: (202) 708-3815; TDD: (202) 708-1112. (These are not toll-free numbers.) Forms necessary for compliance with the rule may be obtained from the local HUD office.

Authority: Title I, Housing and Community Development Act of 1974 (42 U.S.C. 5301-5320); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d); 24 CFR 570.404.

Dated: September 21, 1995.

Mark C. Gordon,

*General Deputy Assistant Secretary for  
Community Planning and Development.*

Community Planning and  
Development**

[Docket No. FR-3937-N-01]

**Notice of Funding Availability for FY  
1995 Historically Black Colleges and  
Universities Program**

**AGENCY:** Office of the Assistant Secretary for Community Planning and Development, HUD.

**ACTION:** Notice of funding availability (NOFA) for fiscal year (FY) 1995.

**SUMMARY:** This NOFA announces the availability up to \$2.5 million of Fiscal Year 1995 funds for ten Historically Black Colleges and Universities (HBCUs) to form Community Development Corporations (CDCs) to undertake eligible activities. In accordance with a memorandum of understanding establishing a public-private partnership between the United States Department of Housing and Urban Development (HUD) and the Structured Employment Economic Development Corporation (Seedco) of New York, New York, Seedco will also provide technical assistance and up to \$1 million in low-interest gap loan funding to be made available to the CDCs formed under this program.

Community-based organizations provide the spark that make communities a viable place to live. HUD's Office of the Assistant Secretary for Community Planning and Development has worked to create partnerships across the nation with community-based organizations rebuilding their neighborhoods brick by brick. Efforts to support CDCs created by Historically Black Colleges and Universities are part of the community development partnership for neighborhood revitalization.

In the body of this document is information concerning the following:

- a. The purpose of the NOFA and information regarding available amounts, objectives, eligibility and authority; and
- b. Application processing, including how, where and when to apply and how selections will be made.

**DATES:** No applications will be accepted after 4:30 PM on November 28, 1995. This application deadline is firm as to date and hour. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants

should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems. Applications may not be submitted by facsimile (FAX).

**ADDRESSES:** *For An Application Kit Contact:* Processing and Control Branch, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street SW., Room 7255, Washington, DC 20410-3500. ATTN: HBCU CDC Program. Requests must be in writing and may be sent to this address or may be made by facsimile machine to the following number: (202) 708-3363. The TDD number for the hearing impaired is 1-800-877-8339. (This is a toll-free number.) When requesting an application kit, please refer to document FR-3937 and provide your name, address (including zip code), and telephone number (including area code). Requests for HBCU application kits should be made immediately. HUD will distribute application kits as soon as they become available.

**Application Submission:** An original and three copies of the completed application must be submitted to the following address: Processing and Control Branch, Office of Community Planning and Development, Department of Housing and Urban Development, 451 7th Street, SW., Room 7255, Washington, DC 20410-3500. ATTN: HBCU CDC Program.

**FOR FURTHER INFORMATION CONTACT:** Yvette Aidara, Office of Technical Assistance, Department of Housing and Urban Development, 451 7th Street, SW., Room 7216, Washington, DC 20410. Telephone Number: (202) 401-7912. This is not a toll free number. Access to this information is available to the hearing impaired through the Federal Information Relay Service at 1-800-877-8339. This is a toll-free number.

**SUPPLEMENTARY INFORMATION:**  
Paperwork Reduction Act Statement

The information collection requirements contained in this notice have been approved by the Office of Management and Budget (OMB) for review under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3520). The control number for information described in this document is 2506-0122.

**I. Purpose and Substantive Description**  
*(a) Purpose*

The purpose of this NOFA is to assist HBCUs in forming Community Development Corporations (CDC) that will expand the role and effectiveness of HBCUs in addressing community development needs, including neighborhood improvement, housing, economic development and other revitalization efforts, in their surrounding or adjacent communities. Forming a CDC will expand the community development effectiveness of many HBCU's that may be unable to undertake certain activities directly because of requirements in their authorizing charters or State law. A number of HBCUs have already established CDCs or have working relationships with existing CDCs, and this NOFA is intended to promote the establishment of CDCs where HBCU/CDC relationships do not currently exist.

For the purpose of this competition, a CDC is defined as a nonprofit association or corporation which: (1) Is organized under State or local law to engage in community development activities within an identified geographic area of operation adjacent to or in close proximity to the recipient HBCU, or in the case of an urban county, within the jurisdiction of the county; (2) maintains a significant portion of its governing body's membership for low- and moderate-income residents of its geographic area of operation, owners or senior officers of private establishments and other institutions located in and serving its geographic area of operation, or representatives of low- and moderate-income neighborhood organizations located in its geographic area of operation; (3) has as its primary purpose the improvement of the physical, economic or social environment of its geographic area of operation by addressing one or more critical problems of the area, with particular attention to the needs of low- and moderate-income residents of the area; and (4) has received or applied for a tax exemption ruling from the Internal Revenue Service under section 501(c) of the Internal Revenue Code of 1986. CDCs formed under this program must indicate, through Articles of Incorporation, a commitment to community and economic development activities that use the facilities of the HBCU (physical as well as faculty, administrators and students) and the target locality (residents, businesses and the local government).

The purpose of this NOFA is further supported through a memorandum of understanding establishing a public-private partnership between the United States Department of Housing and Urban Development (HUD) and the Structured Employment Economic Development Corporation (Seedco). This partnership seeks to combine the expertise and resources of HUD's HBCU program and Seedco's Community Development Partnership program to maximize the impact of their assistance to HBCUs seeking to revitalize their surrounding communities. HUD, through its HBCU program, seeks to increase the effectiveness of HBCUs in addressing community development and economic needs. Since 1990, Seedco, a national nonprofit community development support organization, has provided financial and technical assistance for planning and operation of nonprofit, neighborhood-based CDCs. Seedco's participation in this partnership will extend and expand its work with HBCUs.

Seedco intends to provide technical assistance to grant recipients selected under this NOFA to assist them in forming and operating CDCs and carrying out the community development objectives of the CDCs. Seedco will not seek contracts funded from grants made under this NOFA to provide any additional technical assistance or other services to the grantees or to the CDCs formed by them. However, grant recipients are not precluded from using grant funds to pay reasonable and customary registration fees in connection with Seedco-sponsored conferences or workshops. HUD and Seedco intend to hold such meetings as may be necessary to coordinate activities of the HBCU/CDC partnership.

Once recipient HBCU's have established CDCs and implemented a program of eligible activities using the HUD start-up funding of up to \$250,000, it is intended that the new CDCs will be eligible for low-interest gap loan funding from Seedco to finance additional eligible activities of the CDC. Seedco intends to set aside up to \$1 million in low-interest gap loan funding to be made available to the CDCs formed under this program. Seedco also intends to provide technical assistance to the selected grantees and the CDCs they've helped to form as they implement the individual projects.

#### (b) Authority

This program is authorized under section 107(b)(3) of the Housing and Community Development Act of 1974 (the 1974 Act), which was added by

section 105 of the HUD Reform Act of 1989. The program is governed by regulations contained in 24 CFR 570.201 through 207, 24 CFR 570.400, 570.404 and 24 CFR part 570, subparts A, C, J, K and O.

#### (c) Allocation Amounts and Form of Award

The Departments of Veterans Affairs and Housing and Urban Development, and the Independent Agencies Appropriations Act 1995 (approved September 28, 1994, Pub. L. 103-327), (95 App. Act) appropriated \$44,000,000 for special purpose grants pursuant to section 107 of the Housing and Community Development Act of 1974. This notice announces HUD's intention to award up to \$2.5 million from these FY 95 funds to fund HBCUs to create CDCs. The maximum amount awarded to any applicant will be \$250,000. The awards will be made in the form of grants.

#### (d) Objectives

The objectives of this program are:

(1) To help HBCUs, through the formulation of CDCs, expand their role and effectiveness in addressing community development needs in their localities, including neighborhood revitalization, housing, and economic development, consistent with the purposes of Title I of the Housing and Community Development Act of 1974;

(2) To help HBCUs, through the formulation of CDCs, address the needs of their locality(ies) while furthering the following HUD values:

- \* A Commitment to Community;
- \* A Commitment to Support

Families;

- \* A Commitment to Economic Lift;
- \* A Commitment to Reciprocity and to Balancing Individual Rights and Responsibilities; and

\* A Commitment to Reducing the Separations by Race and Income in American Life.

(3) To encourage and ensure that employment and other economic opportunities generated by Federal financial assistance for housing and community development programs shall, to the greatest extent feasible, be directed toward low-income persons, particularly those who are recipients of government assistance for housing consistent with Section 3 of the Housing and Urban Development Act of 1968.

#### (e) Eligibility

(1) Eligible Applicants. Only HBCUs as determined by the Department of Education in 34 CFR 608.2 in accordance with that Department's responsibilities under Executive Order

12677, dated April 28, 1989, are eligible to submit applications. Eligibility is further limited to such HBCUs that have not already established CDCs or that do not already have working relationships with CDCs, since the purpose of this NOFA is to promote HBCU/CDC efforts where they do not currently exist.

The Department issued a NOFA on April 11, 1995 (60 FR 18456) making up to \$4 million of FY 1995 funding available for HBCU activities to expand their role and effectiveness in addressing community development in their localities. Forming a CDC is also an eligible activity under the April 11, 1995 NOFA; however, if an HBCU is selected to receive funding under the April NOFA to form a CDC, that HBCU will not be eligible for funding under this NOFA also. In the event that an HBCU applies for funding to form a CDC under both NOFAs, and scores high enough to be selected under both, it will be funded under the April NOFA only, and HUD will select the next highest ranked applicant for funding under this NOFA.

(2) Eligible Activities. Each application under this competition must propose two activities: first, the formation of a CDC, and second, an eligible activity that will be conducted by the CDC that is formed. The eligible CDC activities that may be funded under this NOFA are those activities eligible for Community Development Block Grant (CDBG) funding. They are listed in 24 CFR 570.201 through 570.206. In addition to basic eligible activities, CDCs may undertake special economic development activities (as described at 24 CFR 570.203 (a) through (c)) and special activities undertaken by community-based development organizations (as described at 570.204). These activities have additional eligibility requirements.

(i) Performance standards. Activities selected for funding under this NOFA will be subject to the following performance standards:

(A) The CDC must be formed, staffed, and operational within one year of the grant award; and

(B) The CDC must begin to implement the activities described in the HBCU's statement of work within two years of the grant award.

HUD reserves the right to terminate funding for the grant award if the above prescribed performance standards are not met within the listed time frame.

(ii) Environmental Review. If the applicant proposes activities involving rehabilitation or construction of structures, the proposed project must pass an environmental review in accordance with 24 CFR part 50. If the

requirements of part 50 are not met, HUD reserves the right to terminate all or portions of the award. The grantee is not authorized to proceed with any activity requiring such approval until written approval is received from the HUD environmental office with jurisdiction over the project area certifying that the project has been approved.

(iii) In accordance with the Coastal Barrier Resources Act (16 U.S.C. 3601), HUD will not approve applications for any activities that would be located or carried out in the Coastal Barrier Resources System.

*(f) Selection Criteria/Negotiations*

(1) General. An applicant must demonstrate that it meets the objectives of this HBCU program by scoring at least 12 of the possible 20 points on rating factor 1 (addressing the objectives) in order to qualify for funding. Applicants must also receive a minimum score of 70 out of the total of 108 points to be considered eligible for funding. Activities which are not eligible for funding under this program (see 24 CFR 570.207) will not be funded. HUD reserves the right to fund all or portions of the proposed activities identified in each application, based on eligibility of the proposed activities. However, if more than 50 percent of the amount requested in the application is for ineligible activities, the application will not be funded.

Applications for funding under this Notice will be evaluated competitively and awarded points based on the factors identified below. The Department will rank the applications in descending order according to score. Applications meeting the minimum threshold requirements will be funded in rank order, until all available funds have been obligated, or until there are no remaining acceptable applications.

(2) Negotiations. After all applications have been rated and ranked and a determination of successful applicants has been made, HUD requires that all successful applicants participate in negotiations to determine the specific terms of the Statement of Work and grant budget. In cases where HUD cannot successfully conclude negotiations, awards will not be made. In such instances, HUD may elect to offer an award (in an amount not to exceed the amount of remaining funds available for the competition) to the next highest ranking remaining applicant and proceed with negotiations as described above.

*(g) Rating Factors*

The factors set forth below will be used by the Department to rate and rank applications. Each application must contain sufficient information to be reviewed for its merits. The score for each factor will be based on the qualitative and quantitative aspects demonstrated in the application. The factors, and the maximum number of points for each factor (out of a total of 108 points, which includes up to 8 bonus points), are as follows:

(1) Addressing the Objectives. (maximum points: 20)

(i) The extent to which the applicant addresses the objectives of this program is examined by this factor. Applicants must address objective (A), below, by successfully demonstrating how the proposed activities to be carried out by the CDC will expand the role of the HBCU in meeting local community economic development and/or housing needs while furthering HUD's priorities identified in objective (B), below. The objectives of this program are:

(A) To help HBCUs form CDCs that will expand their role and effectiveness in addressing community development needs in their localities, including neighborhood revitalization, housing, and economic development, consistent with the purposes of the 1974 Act; and

(B) To help HBCUs, through the formulation of CDCs, to address the needs of their localities in meeting the following HUD values:

- \* A Commitment to Community;
- \* A Commitment to Support Families;
- \* A Commitment to Economic Lift;
- \* A Commitment to Reciprocity and to Balancing Individual Rights and Responsibilities; and
- \* A Commitment to Reducing the Separations by Race and Income in American Life.

(ii) In rating this factor, the Department will consider:

(A) The extent to which the applicant demonstrates that the CDC's proposed activities and program will expand its role and effectiveness in addressing community development needs in its locality(ies), in accordance with the objective specified in section I.(g)(1)(i)(A) of this NOFA, above; and

(B) The extent to which the applicant demonstrates that the CDC's proposed activities will further one or more of the HUD values specified in section I.(g)(1)(i)(B) of this NOFA, above.

(C) The extent to which the applicant demonstrates that the proposed CDC will provide to the greatest extent feasible, and consistent with existing Federal, State, and local laws and

regulations, job training, employment, contracting and other economic opportunities to section 3 residents and section 3 business concerns.

(2) Impact of the Project. (Maximum points: 25)

The extent to which the applicant demonstrates that the proposed CDC's activities would have a substantial impact on the community and economic development of the locality. In rating this factor the Department will consider:

(i) The extent to which the applicant demonstrates how the proposed CDC's activities will address high priority needs identified in each locality's HUD-approved Consolidated Plan in accordance with 24 CFR part 91, especially in the target HBCU neighborhood.

(ii) The extent to which the applicant demonstrates how the proposed CDC's activities will make a substantial contribution to achieve local community development objectives.

(iii) The extent to which the applicant demonstrates that its proposed CDC is willing to forge a common identity and shared goals and objectives between the HBCU and its neighborhood leadership for revitalization of the community.

(3) Special Needs of the Applicant and Locality. (Maximum points: 10)

In rating this factor, the Department will consider:

(i) The extent to which the applicant demonstrates that the CDC formed will create or enhance community-based capacity to successfully carry out community and economic development projects and to attract new government and private financial support for development of the local community.

(ii) The extent to which the CDC will serve to develop local resident leadership capacity and will provide opportunities for HBCU faculty and students to engage in community service and community development activities.

(iii) The extent to which local community support is demonstrated through letters of commitment, record of local accomplishment, and capacity to form a partnership with the applicant to address community outreach, organizing, fundraising and operational aspects of the CDC.

(4) Technical and Financial Feasibility. (Maximum points: 25)

The extent to which the applicant demonstrates the technical and financial feasibility for achieving the objectives, including local support for the activities proposed to be carried out in the locality and any matching funds proposed to be provided from sources other than the applicant is examined by

this factor. In rating this factor, the Department will consider:

(i) The extent to which the applicant demonstrates the technical feasibility for achieving the objectives within the program period proposed as evidenced by a management plan which:

(A) Clearly delineates staff responsibilities and accountability for all work required;

(B) Presents a work plan with a clear and feasible schedule for conducting all project tasks; and

(C) Presents a reasonable and adequate budget as reflected in the budget-by-task and supporting rationale and justification for the budget.

(ii) The extent to which the applicant demonstrates the institutional stability and health in financial and organizational terms sufficient to allow for a sustained focus on community development.

(iii) The extent to which the applicant's Chief Executive Officer demonstrates that the HBCU is committed to forming a CDC and will strongly and vigorously support all aspects of the program.

(5) Capacity. (maximum points: 20)

The extent to which the applicant demonstrates the capacity to carry out satisfactorily the proposed activities in a timely fashion, including satisfactory performance in carrying out any prior HUD-assisted projects or activities, is examined by this factor. In rating this factor, the Department will consider:

(i) The extent to which the applicant demonstrates the recent and relevant work experience of the staff proposed to undertake the activities described in the Statement of Work.

(ii) The extent to which the applicant can demonstrate that its past and current projects funded by HUD and/or other Federal or private sector sources are or have been completed on schedule and have met or are meeting goals established for addressing local needs.

(iii) The extent to which the applicant demonstrates that the proposed activities will be carried out in a satisfactory and timely fashion, as evidenced by recent efforts to initiate and/or manage projects of the same or similar type, size, and dollar amount as those proposed in the application.

(h) Bonus Points. Applicants that propose forming a CDC and implementing activities in a Federally-designated Empowerment Zone, Urban Supplemental Empowerment Zone, Enterprise Community, or Urban Enhanced Enterprise Community will receive a maximum of 8 bonus points. Bonus points will be allocated as follows: three points for placing the offices of the CDC in one of the above-

designated zones and five points for carrying out activities within such zones. To receive these bonus points, applicants must submit with the application package a certification from the authorized representative of the unit of local government that: (1) The CDC will place its offices within the zone and/or (2) the CDC's proposed activities will be carried out within the zone.

(i) General Program Requirements.

(1) Statement of Work. After selection for funding but prior to award, each selected applicant must ensure that any deletions, additions or enhancements to the Statement of Work submitted with the application are incorporated into the approved grant, including how the revised Statement of Work will be accomplished. Following a task-by-task format, the approved Statement of Work must:

(i) Delineate the tasks and sub-tasks involved in each activity funded under this NOFA.

(ii) Indicate the sequence in which the tasks are to be performed, noting areas of work which must be performed simultaneously.

(iii) Identify specific numbers of quantifiable end products and program improvements the selected applicant aims to deliver, through the newly established CDC, by the end of the grant period, e.g., number of persons to be assisted; number of units to be provided, rehabilitated, or built; number of classes to be provided; commercial enterprises to be established, etc.

(2) Certifications and Assurances. After selection for funding but prior to award, each selected applicant must submit signed copies of the assurance form covering the following Assurances and Certifications: Drug-Free Workplace; Certification Regarding Lobbying; Applicant/recipient disclosure Update Report; Certification and disclosure Regarding Payments to Influence Certain Federal Transactions (where applicable). This form will be provided in the application kit which will be available following publication of this NOFA.

(3) Project Management and Staff Allocation Plan. After selection for funding but prior to award, each selected applicant must submit a Project Management and Staff Allocation Plan for carrying out the activities proposed in the Statement of Work. The Project Management Plan and Staff Allocation submission must cover the proposed period of performance.

(4) Financial management and Audit Information. After selection for funding but prior to award, each selected applicant must submit a certification from an Independent Public Accountant

or the cognizant government auditor, stating that the financial management system employed by the applicant meets prescribed standards for fund control and accountability required by OMB Circular A-110 for institutions of Higher Education and other Non-Profit Institutions. The information should include the name and telephone number of the independent auditor, cognizant Federal auditor, or other audit agency as applicable.

(5) Local approval. Since eligible activities must take place in a locality, after selection but prior to award, each selected applicant must submit a letter from the chief elected official of the locality (or a resolution by the legislative body of the locality) certifying that the activity(ies) to be undertaken are not inconsistent with the local community development or consolidated plan.

(6) Reasonable time and cost for establishing the CDC. HUD reserves the right to limit the amount of grant funds awarded under this NOFA that may be used to establish the CDC. Generally, applicants may be limited to not more than 10% of the award amount for activities associated with establishing the CDC. In addition, the time frame for establishing the CDC should not exceed twelve months from the program start date. HUD may suspend or terminate the grant if the grantee fails to establish the proposed CDC at a reasonable cost and within a reasonable time frame.

## II. Application Submission Requirements

Complete application submission requirements are contained in the FY 1995 Historically Black Colleges and Universities Program application package. The application package will request information in sufficient detail for HUD to determine whether the proposed activities are feasible and meet all the requirements of applicable statutes and regulations.

## III. Corrections to Deficient Applications

Immediately after the deadline for submission of applications, applications will be screened to determine whether all items were submitted. If the applicant fails to submit certain technical items, or the application contains a technical mistake, such as an incorrect signatory, the Department shall notify the applicant in writing that the applicant has 14 calendar days from the date of the written notification to submit the missing item, or correct the technical mistake. If the applicant does not submit the missing item within the

required time period, the application will be ineligible for further processing.

The 14-day cure period pertains only to non-substantive technical deficiencies or errors. Technical deficiencies relate to items that:

1. Are not necessary for HUD review under selection criteria/ranking factors; and
2. Would not improve the substantive quality of the proposal.

#### IV. Other Matters

##### (a) *Environmental Impact*

A Finding of No Significant Impact with respect to the environment has been made in accordance with the Department's regulations at 24 CFR part 50 which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). The Finding of No Significant Impact is available for public inspection between 7:30 a.m. and 5:30 p.m. weekdays at the Office of the Rules Docket Clerk, Room 10276, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410.

##### (b) *Federalism Impact*

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, Federalism, has determined that the policies and procedures contained in this NOFA will not have substantial direct effects on States or their political subdivisions, or on the distribution of power and responsibilities among the various levels of government. Specifically, the NOFA solicits HBCU applicants to expand their role in addressing community development needs in their localities and does not impinge upon the relationships between the Federal government, and State and local governments.

##### (c) *Impact on the Family*

The General Counsel, as the Designated Official under Executive Order 12606, The Family, has determined that this document does not have potential for significant impact on family formation, maintenance, and general well-being. This notice solicits HBCUs to apply for funding to address community and economic development needs in their locality. While impact on the family will be indirect, there will be benefits that accrue to families in that better planning of community and economic development needs should result.

##### (d) *Prohibition Against Lobbying Activities*

The use of funds awarded under this NOFA is subject to the disclosure

requirements and prohibitions of section 319 of the Department of Interior and Related Agencies Appropriations Act for Fiscal Year 1990 (31 U.S.C. 1352) (The "Byrd Amendment") and the implementing regulations at 24 CFR part 87. These authorities prohibit recipients of federal contracts, grants, or loans from using appropriated funds for lobbying the Executive or Legislative branches of the federal government in connection with a specific contract, grant, or loan. The prohibition also covers the awarding of contracts, grants, cooperative agreements, or loans unless the recipient has made an acceptable certification regarding lobbying. Under 24 CFR part 87, applicants, recipients, and subrecipients of assistance exceeding \$100,000 must certify that no federal funds have been or will be spent on lobbying activities in connection with the assistance.

##### (e) *Documentation and Public Access Requirements; HUD Reform Act, Section 102*

HUD will ensure that documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance pursuant to this NOFA in its quarterly Federal Register notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the Federal Register on January 16, 1992 (57 FR 1942), for further information on these requirements.)

##### (f) *Prohibition Against Advance Information on Funding Decisions*

HUD's regulation implementing section 103 of the Department of Housing and Urban Development Reform Act of 1989 was published May 13, 1991 (56 FR 22088) and became effective on June 12, 1991. That regulation, codified as 24 CFR part 4, applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of the selection of successful applicants. HUD employees involved in the review of applications and in the making of funding decisions are limited by part 4 from providing

advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants with questions should contact the HUD Office of Ethics (202) 708-3815. (This is not a toll-free number.) The Office of Ethics can provide information of a general nature to HUD employees, as well. However, a HUD employee who has specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, should contact his or her Regional or Field Office Counsel, or Headquarters counsel for the program to which the question pertains.

##### (g) *Prohibition Against Lobbying of HUD Personnel*

Section 13 of the Department of Housing and Urban Development Act contains two provisions dealing with efforts to influence HUD's decisions with respect to financial assistance. The first imposes disclosure requirements on those who are typically involved in these efforts—those who pay others to influence the award of assistance or the taking of a management action by the Department and those who are paid to provide the influence. The second restricts the payment of fees to those who are paid to influence the award of HUD assistance, if the fees are tied to the number of housing units received or are based on the amount of assistance received, or if they are contingent upon the receipt of assistance.

Section 13 was implemented by final rule published in the Federal Register on May 17, 1991 (56 FR 22912). If readers are involved in any efforts to influence the Department in these ways, they are urged to read the final rule, particularly the examples contained in Appendix A of the rule.

Authority: Title I, Housing and Community Development Act of 1974 (42 U.S.C. 5301-5320); sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d); 24 CFR 570.404.

Dated: September 18, 1995.

Mark C. Gordon,

*General Deputy Assistant Secretary for Community Planning and Development.*

50 CFR Part 20

Migratory Bird Hunting Regulations on  
Certain Federal Indian Reservations and  
Ceded Lands for the 1995–96 Late  
Season; Final Rule

**DEPARTMENT OF THE INTERIOR****Fish and Wildlife Service****50 CFR Part 20**

RIN 1018-AC79

**Migratory Bird Hunting: Migratory Bird Hunting Regulations on Certain Federal Indian Reservations and Ceded Lands for the 1995-96 Late Season****AGENCY:** Fish and Wildlife Service, Interior.**ACTION:** Final rule.**SUMMARY:** This rule prescribes special late season migratory bird hunting regulations for certain tribes on Federal Indian reservations, off-reservation trust lands and ceded lands. This is in response to tribal requests for Service recognition of their authority to regulate hunting under established guidelines. This rule is necessary to allow establishment of seasons and bag limits and, thus, harvest at levels compatible with populations and habitat conditions.**EFFECTIVE DATE:** This rule takes effect September 30, 1995.**ADDRESSES:** Comments received on the tribal proposals and special hunting regulations are available for public inspection during normal business hours in Room 634, Arlington Square Building, 4401 N. Fairfax Drive, Arlington, VA. Communications regarding the documents should be sent to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, 634 ARLSQ, 1849 C St., NW, Washington, DC 20240.**FOR FURTHER INFORMATION CONTACT:** Ron W. Kokel or Dr. Keith A. Morehouse, Office of Migratory Bird Management, U.S. Fish and Wildlife Service (703/358-1714).**SUPPLEMENTARY INFORMATION:** The Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 et seq.), authorizes and directs the Secretary of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds, to determine when, to what extent, and by what means such birds or any part, nest or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported or transported.

In the August 17, 1995 Federal Register (60 FR 42960), the U.S. Fish and Wildlife Service (Service) proposed special migratory bird hunting regulations for the 1995-96 hunting season for certain Indian tribes, under the guidelines described in the June 4,

1985, Federal Register (50 FR 23467). The guidelines were developed in response to tribal requests for Service recognition of their reserved hunting rights, and for some tribes, recognition of their authority to regulate hunting by both tribal members and nonmembers on their reservations. The guidelines include possibilities for: (1) on-reservation hunting by both tribal members and nonmembers, with hunting by nontribal members on some reservations to take place within Federal frameworks but on dates different from those selected by the surrounding State(s); (2) on-reservation hunting by tribal members only, outside of usual Federal frameworks for season dates and length, and for daily bag and possession limits; and (3) off-reservation hunting by tribal members on ceded lands, outside of usual framework dates and season length, with some added flexibility in daily bag and possession limits. In all cases, the regulations established under the guidelines would have to be consistent with the March 10-September 1 closed season mandated by the 1916 Convention on the Protection of Migratory Birds Between the U.S. and Great Britain (for Canada). Tribes that desired special hunting regulations in the 1995-96 hunting season were requested in the March 24, 1995, Federal Register (60 FR 15642) to submit a proposal that included details on: (1) requested season dates and other regulations to be observed; (2) harvest anticipated under the requested regulations; (3) methods that will be employed to measure or monitor harvest; (4) steps that will be taken to limit level of harvest, where it could be shown that failure to limit such harvest would impact seriously on the migratory bird resource; and (5) tribal capabilities to establish and enforce migratory bird hunting regulations. No action is required if a tribe wishes to observe the hunting regulations that are established by the State(s) in which an Indian reservation is located. The guidelines have been used successfully since the 1985-86 hunting season, and they were made final beginning with the 1988-89 hunting season (August 18, 1988; 53 FR 31612).

Although the August 17, 1995, proposed rule included generalized regulations for both early- and late-season hunting, this rulemaking addresses only the late-season proposals. Early-season hunting was addressed in the rulemaking published in the Federal Register on September 1, 1995 (60 FR 46012). As a general rule, early seasons begin during September each year and have a primary emphasis

on such species as mourning and white-winged dove. Late seasons are ordinarily those that begin in late-September or early-October, or later, each year and have a primary emphasis on waterfowl.

This year, the Service's annual breeding duck survey recorded an estimated 35.9 million ducks, a 10 percent increase from 32.5 million last year. Breeding mallard populations rose 18 percent to 8.3 million, the highest level since 1972 and above the North American Waterfowl Management Plan's goal of 8.1 million. Based on survey and production data, the Service is projecting a fall-flight index of about 80 million ducks from the traditional surveyed areas, up 13 percent from last year's estimate of 71 million. As a result, the Service has responded by proposing Flyway frameworks including longer seasons and larger daily bag limits for the 1995-96 waterfowl hunting season (August 28, 1995, Federal Register, 60 FR 44463). The fact that liberalization has occurred in bag limits and season length is considered in these final regulations, many of which were proposed before final decisions were made on late-season frameworks for the States.

**Tribal Proposals**

For the 1995-96 migratory bird hunting season, the Service proposed regulations for 17 tribes and/or Indian groups that followed the 1985 guidelines and were considered appropriate for final rulemaking. Some of the proposals submitted by the tribes have both early- and late-season elements. However, as noted earlier, only those with late-season proposals are included in this final rulemaking; 14 tribes made proposals with late seasons. Nine tribes were represented in the early-season regulations.

There have been no tribal comments or revised proposals for the late seasons received since publication of the early-season final rule. However, tribal proposals were made before late-season final frameworks for States were established. Thus, with the liberalization that has occurred, changes have been made in some of the tribal seasons that are not reflected in the earlier proposed rule document.

**Public Comments On Tribal Proposals**

The Service received a letter from the Arizona Game and Fish Department (AGFD), dated August 25, 1995, generally supporting the season proposals by Arizona tribes. The AGFD did, however, comment on aspects of the proposals from the Colorado River Tribes and the White Mountain Apache

Tribe. In particular, AGFD was concerned about the apparent lack of a hen mallard restriction in the Colorado River Indian Tribes' proposal and the White Mountain Apache Tribe's proposal of 2 canvasbacks per day in the daily bag limit.

While the above two proposals are not exactly in accordance with the Pacific Flyway's frameworks, the Service's position has generally been that there must be a certain amount of latitude and flexibility in the guidelines developed and established for tribal requests for special migratory bird hunting seasons. The 1985 guidelines were developed in response to tribal requests for Service recognition of their reserved hunting rights, and for some tribes, recognition of their authority to regulate hunting by both tribal and non-tribal members on their reservations. Specifically regarding the Colorado River Indian Tribes' and the White Mountain Apache Tribe's proposals, the Service points out that both tribes have established more conservative daily bag limits and seasons than those allowed in the proposed Pacific Flyway frameworks. The Colorado River Indian Tribes have selected a 4-bird daily bag limit and a 59-day season while the White Mountain Apache Tribe has selected a 3-bird daily bag limit and a 58-day season. Pacific Flyway frameworks for the 1995-96 hunting season allow for a 93-day season and a 6-bird daily bag limit.

Other comments from States regarding tribally proposed regulations, received earlier, were addressed in the early-season final rule published on September 1, 1995.

In summary, this rule amends section 20.110 of 50 CFR to make current for the late 1995-96 migratory bird hunting season the regulations that will apply on Federal Indian reservations, off-reservation trust lands and ceded lands. These regulations take into account the liberalization that the Service has determined is biologically feasible for this current season, based on the improved status of ducks.

#### NEPA Consideration

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)), the "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES-75-74)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the Federal Register on June 13, 1975, (40 FR 25241). A supplement to the final

environmental statement, the "Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (SEIS 88-14)" was filed on June 9, 1988, and notice of availability was published in the Federal Register on June 16, 1988 (53 FR 22582), and June 17, 1988 (53 FR 22727). In addition, an August 1985 environmental assessment titled "Guidelines for Migratory Bird Hunting Regulations on Federal Indian Reservations and Ceded Lands" is available from the Service.

#### Endangered Species Act Considerations

Section 7 of the Endangered Species Act, as amended (16 U.S.C. 1531-1543; 87 Stat. 884), provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act" (and) shall "insure that any action authorized, funded or carried out . . . is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of [critical] habitat . . ." Consequently, the Service initiated Section 7 consultation under the Endangered Species Act for the proposed migratory bird hunting seasons including those which occur on Federally recognized Indian reservations and ceded lands. The Service's biological opinion resulting from its consultation under Section 7 of the Endangered Species Act may be inspected by the public in, and will be available to the public from the Service at the address indicated under the caption **ADDRESSES**.

In an August 1995 finding, the Division of Endangered Species concluded that the proposed action is not likely to jeopardize the continued existence of listed species or result in the destruction or adverse modification of their critical habitats. Among other things, hunting regulations are designed to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species and their habitats.

#### Regulatory Flexibility Act, Executive Order 12866, and the Paperwork Reduction Act

In the March 24 Federal Register, the Service reported measures it had undertaken to comply with requirements of the Regulatory Flexibility Act and the Executive Order. These included preparing an Analysis of Regulatory Effects, and an updated Final Regulatory Impact Analysis (FRIA), and publication of a summary of the later.

Although a FRIA is no longer required, the economic analysis contained in the FRIA was reviewed and the Service determined that it met the requirements of E.O. 12866. In addition, the Service prepared a Small Entity Flexibility Analysis, under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), which further document the significant beneficial economic effect on a substantial number of small entities. This rule was not subject to review by the Office of Management and Budget under E.O. 12866.

These regulations contain no information collections subject to OMB review under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.). However, the Service does utilize information acquired through other various information collections in the formulation of migratory game bird hunting regulations. These information collection requirements have been approved by OMB and assigned clearance numbers 1018-0005, 1018-0006, 1018-0008, 1018-0009, 1018-0010, 1018-0015, 1018-0019, and 1018-0023.

Authorship: The primary authors of this final rule are Ron W. Kokel and Dr. Keith A. Morehouse, Office of Migratory Bird Management.

#### Regulations Promulgation

The rulemaking process for migratory bird hunting must, by its very nature, operate under severe time constraints. However, the Service is of the view that every attempt should be made to give the public the greatest possible opportunity to comment on the regulations. Thus, when the proposed hunting regulations for certain tribes were published on August 17, 1995, the Service established the longest possible period for public comments. In doing this, the Service recognized that time would be of the essence. However, the comment period provided the maximum amount of time possible while ensuring that this final rule would be published before the late-hunting season beginning on or about September 30, 1995.

Under the authority of the Migratory Bird Treaty Act of July 3, 1918, as amended (40 Stat. 755; 16 U.S.C. 703 et seq.), the Service prescribes final hunting regulations for certain tribes on Federal Indian reservations (including off-reservation trust lands), and ceded lands. The regulations specify the species to be hunted and establish season dates, bag and possession limits, season length, and shooting hours for migratory game birds other than waterfowl.

Therefore, for the reasons set out above, the Service finds that "good

cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and this final rule will take effect on September 30, 1995.

#### List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

Accordingly, Part 20, Subchapter B, Chapter I of Title 50 of the Code of Federal Regulations is amended as follows:

#### PART 20—[AMENDED]

1. The authority citation for Part 20 continues to read as follows:

Authority: 16 U.S.C. 703 et seq. (Editorial Note: The following annual hunting regulations provided for by §20.110 of 50 CFR Part 20 will not appear in the Code of Federal Regulations because of their seasonal nature.)

2. Section 20.110 is revised to read as follows:

#### **§20.110 Seasons, limits and other regulations for certain Federal Indian reservations, Indian Territory, and ceded lands.**

(a) *Colorado River Indian Tribes, Parker, Arizona (Tribal Members and Nontribal Hunters)*

##### Ducks (including mergansers)

*Season Dates:* Begin October 15, end November 12, 1995; then open December 9, 1995, close January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 4, which may include no more than 2 pintails, 2 redheads, 1 Mexican duck and 1 canvasback. The possession limit is twice the daily bag limit.

##### Coots and Common Moorhens

*Season Dates:* Begin October 15, end November 12, 1995; then open December 9, 1995, close January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 25, singly or in the aggregate. The possession limit is twice the daily bag limit.

##### Geese

*Season Dates:* Begin October 21, 1995, end January 22, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 5, with 5 in possession. The daily bag limit may not include more than 2 dark (Canada) geese and 3 white (snow, blue, Ross's) geese.

*General Conditions:* A valid Colorado River Indian Reservation hunting permit is required for all persons 12 years and older and must be in possession before taking any wildlife on tribal lands. Any

person transporting game birds off the Colorado River Indian Reservation must have a valid transport declaration form. Other tribal regulations apply, and may be obtained at the Fish and Game Office in Parker, Arizona.

(b) *Confederated Salish and Kootenai Tribes, Flathead Indian Reservation, Pablo, Montana (Nontribal Hunters)*

##### Ducks (including mergansers)

*Season Dates:* Begin September 30, end December 31, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 6, including no more than 1 female mallard, 2 pintails, 1 canvasback and 2 redheads. The possession limit is twice the daily bag limit.

##### Coots

*Season Dates:* Begin September 30, end December 31, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 25, and the possession limit is limited to the daily bag (25).

##### Geese

###### *Dark*

*Season Dates:* Begin September 30, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 4. The possession limit is twice the daily bag limit.

###### *White*

*Season Dates:* Begin September 30, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 3, and the possession limit is 6.

*General Conditions:* Nontribal hunters will comply with all basic Federal migratory bird hunting regulations contained in 50 CFR Part 20 regarding manner of taking. In addition, shooting hours are sunrise to sunset and each waterfowl hunter 16 years of age or older must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Confederated Salish and Kootenai Tribes also apply on the reservation.

(c) *Crow Creek Sioux Tribe, Crow Creek Indian Reservation, Fort Thompson, South Dakota (Tribal Members and Nontribal Hunters)*

##### Ducks and mergansers

*Season Dates:* Begin October 28, end December 23, 1995.

*Daily Bag and Possession Limits:* The daily bag limit for ducks is 5, which may include no more than 1 female mallard, 1 mottled duck, 1 canvasback, 1 redhead, 1 pintail, and 2 wood ducks. The daily bag limit for mergansers is 5,

which may include no more than 1 hooded merganser. The possession limit is twice the daily bag limit.

##### Dark Geese

*Canada, Brant and White-fronted Geese*

*Season Dates:* Begin October 7, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 2 dark geese, which can include no more than 1 white-fronted goose (or brant). The possession limit is twice the daily bag limit.

##### Light Geese

*Season Dates:* Begin October 7, 1994, end January 7, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 10, and the possession limit is 20.

*General Conditions:* The waterfowl hunting regulations established by this final rule apply only to tribal and trust lands within the external boundaries of the reservation. Tribal and nontribal hunters will comply with basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Crow Creek Sioux Tribe also apply on the reservation.

(d) *Grand Traverse Band of Ottawa and Chippewa Indians, Suttons Bay, Michigan (Tribal Members Only)*

##### Ducks

*Michigan, 1836 Treaty Zone:*

*Season Dates:* Begin October 1, end November 30, 1995.

*Daily Bag Limit:* The daily bag limit is 5, including no more than 4 mallards (only 1 of which may be a female), 1 black duck, 1 pintail, 2 wood ducks, and 1 canvasback.

Other Geese (Brant, Blue, Snow, and White-fronted)

*Michigan, 1836 Treaty Zone:*

*Season Dates:* Begin October 1, end November 30, 1995.

*Daily Bag Limit:* The daily bag limit is 5.

*General Conditions:* A valid Grand Traverse Band Tribal license is required and must be in possession before taking any wildlife. Persons twelve years and older are required to have a valid permit. All other basic regulations contained in 50 CFR part 20 are valid. Other tribal regulations apply, and may be obtained at the tribal office in Suttons Bay, Michigan.

(e) *Great Lakes Indian Fish and Wildlife Commission, Odanah, Wisconsin (Tribal Members Only)*

#### Ducks

*Michigan, 1842 Treaty Zone:*

*Season Dates:* Begin September 30, end November 18, 1995.

*Daily Bag Limit:* The daily bag limit is 5, including no more than 4 mallards (only 1 of which may be a female), 1 black duck, 1 pintail, 2 wood ducks, 1 canvasback and 1 redhead.

*Michigan, 1836 Treaty Zone:*

*Season Dates:* North Zone, begin September 30 and end November 18, 1995; Middle Zone, begin October 7 and end November 25, 1995; South Zone, begin October 14 and end December 2, 1995.

*Daily Bag Limit:* The daily bag limit is 5, including no more than 4 mallards (only 1 of which may be a female), 1 black duck, 1 pintail, 2 wood ducks, 1 canvasback and 1 redhead.

#### Mergansers

*Michigan, 1842 Treaty Zone:*

*Season Dates:* Begin September 30, end November 18, 1995.

*Daily Bag Limit:* The daily bag limit is 5, including no more than 1 hooded merganser.

*Michigan, 1836 Treaty Zone:*

*Season Dates:* North Zone, begin September 30 and end November 18, 1995; Middle Zone, begin October 7 and end November 25, 1995; South Zone, begin October 14 and end December 2, 1995.

*Daily Bag Limit:* The daily bag limit is 5, including no more than 1 hooded merganser.

#### Canada Geese

*Michigan, 1842 Treaty Zone:*

*Season Dates:* Begin September 23, end November 1, 1995.

*Daily Bag Limit:* The daily bag limit is 5.

*Michigan, 1836 Treaty Zone:*

*Season Dates:* North Zone, begin September 23 and end November 1, 1995; Middle Zone, begin October 7 and end November 15, 1995; South Zone, begin October 14 and end December 2, 1995.

*Daily Bag Limit:* The daily bag limit is 1 for the South Zone and 2 for the North and Middle Zones.

#### Other Geese (Brant, Blue, Snow, and White-fronted)

*Michigan, 1842 Treaty Zone:*

*Season Dates:* Begin September 23, end November 18, 1995.

*Daily Bag Limit:* The daily bag limit is 7, minus the number of Canada geese taken and including no more than 2 white-fronted geese.

*Michigan, 1836 Treaty Zone:*

*Season Dates:* North Zone, begin September 23 and end November 18, 1995; Middle Zone, begin October 7 and end November 25, 1995; South Zone, begin October 14 and end December 2, 1995.

*Daily Bag Limit:* The daily bag limit is 7, minus the number of Canada geese taken and including no more than 2 white-fronted geese.

#### Coots and Common Moorhens (Gallinule)

*Michigan, 1842 Treaty Zone:*

*Season Dates:* Begin September 30, end November 18, 1995.

*Daily Bag Limit:* The daily bag limit is 20, singly or in the aggregate.

*Michigan, 1836 Treaty Zone:*

*Season Dates:* North Zone, begin September 30 and end November 18, 1995; Middle Zone, begin October 7 and end November 25, 1995; South Zone, begin October 14 and end December 2, 1995.

*Daily Bag Limit:* The daily bag limit is 20, singly or in the aggregate.

*General Conditions:* (1) While hunting waterfowl, a tribal member must carry on his/her person a valid tribal waterfowl hunting permit.

(2) Except as otherwise noted, tribal members will be required to comply with tribal codes that will be no less restrictive than the provisions of Chapter 10 of the Model Off-Reservation Code. Except as may be modified by Service final rules adopted in response to a proposed rule, these amended regulations parallel Federal requirements, 50 CFR Part 20, and shooting hour regulations in 50 CFR Part 20, subpart K, as to hunting methods, transportation, sale, exportation and other conditions generally applicable to migratory bird hunting.

(3) Tribal members in each zone will comply with State regulations providing for closed and restricted waterfowl hunting areas.

(4) Minnesota and Michigan—Duck Blinds and Decoys. Tribal members hunting in Minnesota will comply with tribal codes that contain provisions parallel to M. S. 100.29, Subd. 18 (duck blinds and decoys). Tribal members hunting in Michigan will comply with tribal codes that contain provisions parallel to Michigan law regarding duck blinds and decoys.

(5) Possession limits for each species are double the daily bag limit, except on the opening day of the season, when the possession limit equals the daily bag limit.

(6) Possession limits are applicable only to transportation and do not

include birds which are cleaned, dressed, and at a member's primary residence. For purposes of enforcing bag and possession limits, all migratory birds in the possession or custody of tribal members on ceded lands will be considered to have been taken on those lands unless tagged by a tribal or State conservation warden as having been taken on-reservation. In Wisconsin, such tagging will comply with Sec. NR 19.12, Wis. Adm. Code. All migratory birds which fall on reservation lands will not count as part of any off-reservation bag or possession limit.

(f) *Jicarilla Apache Tribe, Jicarilla Indian Reservation, Dulce, New Mexico (Tribal Members and Nontribal Hunters)*

#### Ducks (including mergansers)

*Season Dates:* Begin October 14, end November 30, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 6, including no more than 1 female mallard, 2 pintails and 2 redheads. The season on canvasbacks is closed. The possession limit is twice the daily bag limit.

#### Geese

The 1995–96 goose season is closed.

*General Conditions:* Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or older must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Jicarilla Tribe also apply on the reservation.

(g) *Kalispel Tribe, Kalispel Reservation, Usk, Washington (Nontribal Hunters)*

#### Ducks

*Season Dates:* Begin October 1, 1995, end January 31, 1996. During this period, days to be hunted are specified by the Kalispel Tribe as weekends, holidays and for a continuous period in the month of December for a total of 66 days. Nontribal hunters should contact the tribe for more detail on hunting days.

*Daily Bag and Possession Limits:* The daily bag limit is 6 ducks, including no more than 1 female mallard, 2 pintails, 1 canvasback and 2 redheads. The possession limit is twice the daily bag limit.

#### Geese

*Season Dates:* Begin October 1, 1995, end January 31, 1996. During this period, days to be hunted are specified

by the Kalispel Tribe as weekends, holidays and for a continuous period during the month of December for a total of 66 days. Nontribal hunters should contact the tribe for more detail on hunting days.

*Daily Bag and Possession Limits:* The daily bag limit is 4 geese, including 4 dark geese but not more than 3 light geese. The possession limit is twice the daily bag limit.

*General:* All State and Federal regulations, such as those contained in 50 CFR Part 20 and including the possession of a validated Migratory Bird Hunting and Conservation Stamp, will be observed by hunters.

(h) *Klamath Tribe, Chiloquin, Oregon (Tribal Members)*

#### Ducks

*Season Dates:* Begin October 1, 1995, end January 28, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 9. The possession limit is twice the daily bag limit.

#### Coots

*Season Dates:* Begin October 1, 1995, end January 28, 1996.

*Daily Bag and Possession Limits:* The daily bag and possession limits are 25.

#### Geese

*Season Dates:* Begin October 1, 1995, end January 28, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 6. The possession limit is twice the daily bag limit.

*General:* The Klamath Tribe provides regulations enforcement authority in its game management officers, biologists and wildlife technicians, and has a court system with judges that hear cases and set fines.

(i) *Lower Brule Sioux Tribe, Lower Brule Reservation, Lower Brule, South Dakota (Tribal Members and Nontribal Hunters)*

#### Ducks (including mergansers)

*Season Dates:* Begin October 7, end December 28, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 5, including no more than 1 pintail, 1 mottled duck, 1 redhead, 1 canvasback, 2 wood ducks, 1 female mallard and 1 hooded merganser. The possession limit is twice the daily bag limit.

#### Geese

##### Dark Geese

*Season Dates:* Begin October 7, end December 31, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 2 Canada geese or 1 Canada goose and 1 white-fronted goose (or 1 brant). The possession limit is twice the daily bag limit.

##### White Geese

*Season Dates:* Begin October 7, end December 31, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 10, and the possession limit is 20.

*General Conditions:* All hunters shall comply with the basic Federal migratory bird hunting regulations in 50 CFR Part 20, including the use of steel shot. Nontribal hunters are required to have in their possession a validated Migratory Waterfowl Hunting and Conservation Stamp. The Lower Brule Sioux Tribe has an official Conservation Code that hunters must adhere to when hunting in areas subject to control by the tribe.

(j) *Navajo Indian Reservation, Window Rock, Arizona (Tribal Members and Nontribal Hunters)*

#### Ducks

*Season Dates:* Begin September 30, end December 31, 1995.

*Daily Bag and Possession Limits:* The bag limit is 6, including no more than 1 female mallard, 1 pintail, 1 canvasback and 2 redheads. The possession limit is twice the daily bag limit for each sex and/or species.

#### Dark Geese

*Season Dates:* Begin September 30, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 2 and the possession limit is 4.

#### Coots and Common Moorhens

*Season Dates:* Begin September 30, end December 31, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 25 singly or in the aggregate, and the possession limit is restricted to the daily bag limit (25).

*General Conditions:* Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20, regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (duck stamp) signed in ink across the face. Special regulations established by the Navajo Nation also apply on the reservation.

(k) *Shoshone-Bannock Tribes, Fort Hall Indian Reservation, Fort Hall, Idaho (Nontribal Hunters)*

#### Ducks (including Mergansers)

*Season Dates:* Begin October 7, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit for ducks is 6, including

no more than 1 female mallard, 2 pintails, 1 canvasback and 2 redheads. The daily bag limit for mergansers is 5. The possession limit is twice the daily bag limit.

#### Coots

*Season Dates:* Begin October 7, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 10, and the possession limit is 20.

#### Geese

*Season Dates:* Begin October 7, 1995, end January 14, 1996.

*Daily Bag and Possession Limits:* The bag limit is 4 geese, including not more than 3 light geese and 2 white-fronted geese. The possession limit is twice the daily bag limit.

#### Common Snipe

*Season Dates:* Begin October 7, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 8, and the possession limit is 16.

*General Conditions:* Nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or older must have in his/her possession a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Other regulations established by the Shoshone-Bannock Tribes also apply on the reservation.

(l) *Tulalip Tribes of Washington, Tulalip Indian Reservation, Marysville, Washington (Nontribal Hunters)*

#### Ducks

*Season Dates:* Begin October 20, 1995, end January 21, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 6, which may include no more than 1 female mallard, 2 pintails, 1 canvasback and 2 redheads. The possession limit is twice the daily bag limit.

#### Coots

*Season Dates:* Begin October 20, 1995, end January 21, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 25, and the possession limit is restricted to the daily bag limit (25).

#### Geese

*Season Dates:* Begin October 13, 1995, end January 21, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 4, including 4 dark geese but no more than 3 light geese.

The possession limit is twice the daily bag limit.

#### Brant

*Season Dates:* Begin January 6, 1996, end January 21, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 2, and the possession limit is 4.

#### Snipe

*Season Dates:* Begin October 20, 1995, end January 21, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 8, and the possession limit is 16.

*General Conditions:* All waterfowl hunters, members and non-members, must obtain and possess while hunting a valid hunting permit from the Tulalip tribes. Also, non-tribal members sixteen years of age and older, hunting pursuant to Tulalip Tribes' Ordinance No. 67, must possess a validated Federal Migratory Bird Hunting and Conservation Stamp and a validated State of Washington Migratory Waterfowl Stamp. All Tulalip tribal members must have in their possession while hunting, or accompanying another, their valid tribal identification card. All hunters are required to adhere to a number of other special regulations enforced by the tribes and available at the tribal office.

*(m) White Mountain Apache Tribe, Fort Apache Indian Reservation, Whiteriver, Arizona (Tribal Members and Nontribal Hunters)*

#### Ducks (Including Mergansers)

*Season Dates:* Begin November 11, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 3, including no more than 1 female mallard, 1 redhead, 2 canvasbacks and 1 pintail. The possession limit is twice the daily bag limit.

#### Coots, Moorhens and Gallinules

*Season Dates:* Begin November 11, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 25, singly or in the aggregate. The possession limit is twice the daily bag limit.

#### Canada Geese

*Season Dates:* Begin November 11, 1995, end January 7, 1996.

*Bag and Possession Limits:* The daily bag limit is 2, and the possession limit is 4.

*General Conditions:* (1) The area open to hunting in the above seasons consists of: the entire length of the Black and Salt Rivers forming the southern boundary of the reservation; the White River, extending from the Canyon Day Stockman Station to the Salt River; and all stock ponds located within Wildlife Management Units 4, 6 and 7. The remaining reservation waters will be closed to waterfowl hunting during the 1995-96 hunting season.

(2) Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours and manner of taking.

(3) See other special regulations established by the White Mountain Apache Tribe that apply on the reservation, available from the reservation Game and Fish Department.

*(n) Yankton Sioux Tribe, Marty, South Dakota (Tribal Members and Nontribal Hunters)*

#### Ducks (including Mergansers)

*Season Dates:* Begin November 4, end December 13, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 5 ducks, which may include no more than 1 female mallard, 1 redhead, 1 pintail, and 2 wood ducks. The merganser daily bag limit is 5, of which no more than 1 may be a hooded

merganser. The possession limit is twice the daily bag limit.

#### Coots

*Season Dates:* Begin November 4, end December 13, 1995.

*Daily Bag and Possession Limits:* The daily bag limit is 15, and the possession limit is 30.

#### Dark Geese

*Season Dates:* Begin October 14, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 2, which may include no more than 1 white-fronted goose (or brant). The possession limit is twice the daily bag limit.

#### White Geese

*Season Dates:* Begin October 14, 1995, end January 7, 1996.

*Daily Bag and Possession Limits:* The daily bag limit is 10, and the possession limit is 20.

*General Conditions:* (1) The waterfowl hunting regulations established by this final rule apply to tribal and trust lands within the external boundaries of the reservation.

(2) Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or older must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Yankton Sioux Tribe also apply on the reservation.

Dated: September 25, 1995.

George T. Frampton, Jr.,  
Assistant Secretary for Fish and Wildlife and Parks.

**49 CFR Parts 171 through 180  
Alternate Standards for Open-Head Fiber  
Drum Packaging; Proposed Rule**

**DEPARTMENT OF TRANSPORTATION****Research and Special Programs Administration****49 CFR Parts 171 through 180**

[Docket No. HM-221; Notice No. 95-11]

RIN 2137-AC62

**Alternate Standards for Open-Head Fiber Drum Packaging****AGENCY:** Research and Special Programs Administration (RSPA), DOT.**ACTION:** Termination of rulemaking concerning alternate standards for open-head fiber drum packaging.

**SUMMARY:** As directed by Section 122 of the Hazardous Materials Transportation Authorization Act of 1994, RSPA has examined whether there are alternate standards for open-head fiber drums that provide an equal or greater level of safety as the HM-181 performance standards, for the domestic transportation of liquid hazardous materials. Because RSPA finds that there are no known alternate standards that provide an equal or greater level of safety, RSPA is closing this rulemaking without proposing alternate standards. RSPA initiated this rulemaking in an advance notice of proposed rulemaking published on October 7, 1994 [59 FR 51157], and invited the submission of further proposals and comments in a supplemental advance notice of proposed rulemaking published on January 25, 1995 [60 FR 4879].

**FOR FURTHER INFORMATION CONTACT:** Frazer C. Hilder, Office of the Chief Counsel, Research and Special Programs Administration, U.S. Department of Transportation, 400 Seventh Street, SW, Washington, DC 20590-0001; telephone 202-366-4400.

**SUPPLEMENTARY INFORMATION:****I. Background****A. The Statute**

Section 122(a) of the Hazardous Materials Transportation Authorization Act of 1994 (Pub. L. 103-311) (the "Act") requires DOT to initiate a rulemaking proceeding

to determine whether the requirements of section 5103(b) of title 49, United States Code (relating to regulations for safe transportation) as they pertain to open head fiber drum packaging can be met for the domestic transportation of liquid hazardous materials (with respect to those classifications of hazardous materials transported by such drums pursuant to regulations in effect on September 30, 1991) with standards other than the performance-oriented standards adopted under docket

number HM-181 contained in part 178 of title 49, Code of Federal Regulations.

If, as a result of this rulemaking proceeding, DOT determines that a packaging standard other than the performance-oriented packaging standards referred to in [Section 122(a)] will provide an equal or greater level of safety for the domestic transportation of liquid hazardous materials than would be provided if such performance-oriented standards were in effect, [DOT] shall issue regulations which implement such other standard and which take effect before October 1, 1996.

Section 122(b). The Act also requires that the rulemaking proceeding be completed before October 1, 1995 (Section 122(c)), but that this rulemaking and any regulations issued "shall not apply to packaging for those hazardous materials regulated by the Department of Transportation as poisonous by inhalation \* \* \*" Section 122(d)(1).

**B. HM-181 Performance Standards**

As authorized by 49 CFR 171.14, "non-specification" packagings may be used until October 1, 1996, for the transportation of the following categories of liquid hazardous materials:

1. Flammable liquids with a flash point above 73°F, in packagings up to 110 gallons (55 gallons for cargo aircraft, one gallon for passenger aircraft);
2. Liquid cleaning compounds and four other liquid corrosives (coal tar dye, dye intermediate, mining reagent, and textile treating compound), in drums with a removable or "open" head (steel and fiber drums may not be larger than 55 gallons, and the limit for plastic drums is 6.5 gallons) for shipments by rail, highway, and water only; and
3. Hazardous wastes and hazardous substances not included in another hazard class (for materials with a vapor pressure exceeding 16 psi at 100°F, the packaging must be capable of withstanding the inside vapor pressure at 130°F without leaking).

The non-specification packagings authorized for use until October 1, 1996, need not meet the former "DOT" design specifications, but they must be designed, constructed and used so that there will be no identifiable release of hazardous materials to the environment under conditions normally incident to transportation and the effectiveness of the package will not be substantially reduced. 49 CFR 172.24(b); see also 49 CFR 173.24(a) (1990 ed.).

After September 30, 1996, however, fiber drums and other non-bulk packagings used for the transportation of these categories of liquid hazardous materials must meet the performance-oriented standards currently set forth in the Hazardous Materials Regulations (HMR) at 49 CFR Part 178, Subpart M.

See 49 CFR 171.14(b)(6). (Non-bulk packagings are those which have a capacity up to 450 liters (119 gallons) or a net mass up to 400 kg (882 lbs.). This discussion of the HM-181 performance standards applies only to non-bulk packagings.)

For liquid hazardous materials, the tests and standard prescribed in the following sections of 49 CFR apply:

Section 178.603—drop test  
Section 178.604—leakproofness test  
Section 178.605—hydrostatic pressure test  
Section 178.606—stacking test  
Section 178.608—vibration standard

These performance-oriented standards replaced DOT design specifications and were adopted in RSPA's rulemaking proceeding in Docket No. HM-181. 55 FR 52042 (Dec. 21, 1990); 56 FR 66124 (Dec. 20, 1991); 57 FR 45446 (Oct. 1, 1992). (Former DOT specifications may be found in the October 1, 1990 edition of Title 49 CFR.)

The performance standards adopted in HM-181 are based on United Nations (UN) recommendations (and sometimes referred to as "UN standards"). They are intended to simulate the normal transportation environment and to achieve international uniformity. Under the UN standards, packagings are subjected to design qualification tests as well as periodic retesting (every year for single packagings; every two years for combination packagings). 49 CFR 178.601(d), (e). In addition, each packaging designed to contain liquids must be subjected to leakproofness testing during production and before reuse. 49 CFR 173.28(b), 178.604(b)(1).

The severity of the tests to which packagings are subjected varies according to the degree of hazard of the material to be transported. Packagings for materials with the greatest hazards (in Packing Group I) must perform at a higher level than packagings designed for less hazardous materials (in Packing Groups II and III). See 49 CFR 178.603(e), 178.604(e), 178.605(d).

A drop test is required for all hazardous materials packagings marked with the UN identification. It is intended to simulate a packaging's fall in transportation, such as a fall off a hand truck or fork lift, or simply off another packaging. The minimum height for the drop test is 0.8 meters (31.5 inches or 2.6 feet) for Packing Group III materials, but greater heights are specified for Packing Group I and II materials. 49 CFR 178.603(e). A stacking test, which is required for all hazardous materials packagings other than bags, determines whether the packagings will withstand the loads that occur when packages are stacked to a height of three

meters (approximately ten feet) on a vehicle or in a warehouse. 49 CFR 178.606(c).

Hydrostatic pressure and leakproofness tests apply only to a packaging designed to contain liquid hazardous materials. In the hydrostatic pressure test, a filled packaging is subjected to an internal pressure. This amount of pressure depends on the liquid material's vapor pressure and Packing Group; it may be as low as 20 kiloPascals (kPa) (less than three psi) for low volatility, low hazard materials, and more than 250 kPa (approximately 36 psi) for Packing Group I volatile liquids. 49 CFR 178.605(d). This test is intended to determine whether the increase in pressure that can occur with a rise in temperature will deform the packaging and cause it to leak.

A leakproofness test is performed as one of the packaging design qualification tests and also on every packaging produced. Depending on the Packing Group of the material to be transported, internal air pressure of 20 or 30 kPa (roughly 2.9 or 4.4 psi) is applied to each packaging to determine if it leaks. 49 CFR 178.604(e). In addition, all hazardous materials packagings must meet the vibration standard to assure that the normal vibration incident to transportation will not cause a packaging to fail. 49 CFR 178.608.

One of RSPA's purposes in the HM-181 rulemaking proceeding was to promote "safety in transport through the use of better packaging." Advance Notice of Proposed Rulemaking, 47 FR 16268, 16289 (Apr. 15, 1982). In the preamble to the final rule, RSPA noted that, in the past, many packaging requirements had been "based on industry standards, with economic considerations sometimes taking precedence over safety considerations, rather than on a systematic assignment of packagings based on the hazards of the materials to be packaged and the suitability of the packaging." 55 FR 52403. RSPA later affirmed that an objective in HM-181 was "to improve transportation safety by upgrading package integrity for a number of materials, including hazardous substances and wastes, previously shipped in non-specification packagings." 56 FR 66145. (A wide variety of materials are included in the category of hazardous substances, many of which, such as polychlorinated biphenyls (PCBs), are not regulated except as environmentally hazardous materials.

### C. Prior Industry Requests for Relaxation of HM-181 Standards

Following issuance of the final rule in HM-181, the Fibre Drum Technical Council (FDTC), submitted a petition for reconsideration in which it asked RSPA to continue "the status quo for domestic shipments in non-D.O.T. specification drums" of certain hazardous materials. In December 1991, RSPA denied FDTC's petition and stated that, because it intended to upgrade package integrity, it "never intended to except domestically-used fiber drums from the performance standards it adopted" in HM-181. 56 FR 66146.

In June 1992, FDTC then applied for an exemption from the HMR to allow the continued use of open-head non-specification fiber drums for rail and highway transportation within the United States of the three categories of liquid hazardous materials specified above (plus certain hazardous solids). FDTC stated that these drums would meet a series of six standards prepared for the purpose of establishing an industry specification.

To support its exemption application, FDTC asserted that, over the 1980-1991 period, these drums had a 99.99% safety record. FDTC also stated that the fiber drum industry was "completely unable to meet the new UN/DOT specifications without incurring significant costs and investments, which would make these drums prohibitively expensive in the marketplace." It estimated that "the average percentage (cost) increase related to redesigning the fibre drums to meet specifications is 50 percent" and stated that "the number of units to which the 50 percent increase applies represents a substantial portion of the fibre drum industry."

RSPA's Associate Administrator for Hazardous Materials Safety denied FDTC's exemption application because he found that FDTC's proposed impact test was not equivalent to the drop tests of 3.9 and 2.6 feet, respectively, required for Packing Group II and III packagings, and that FDTC's other proposed standards did not address the pressure requirements of the leakproofness and hydrostatic pressure tests required for packagings intended for liquid hazardous materials. RSPA's Acting Administrator affirmed the denial of FDTC's application for an exemption and found that the standards proposed by FDTC would not achieve a level of safety "at least equal to that specified in the regulation from which the exemption is sought." 49 CFR 107.103(b)(9)(i). In her detailed decision, the Acting Administrator discussed the HMR's prior authority for

the use of non-specification fiber drums for certain materials, the adoption of the HM-181 performance standards which eliminated that prior authority, and representative incidents involving spills when a fiber drum fell over or was dropped a short distance. She also considered the 99.99% "success rate" for fiber drums but found that it ignored the types of incidents which occur during normal transportation, including minor accidents that justified RSPA's objective in HM-181 in upgrading packaging integrity.

FDTC's successor organization, the International Fibre Drum Institute (IFDI), states that Congress passed Section 122 of the Act because it was concerned that RSPA had not considered the safety record of open-head fiber drums when it denied FDTC's application for an exemption. According to IFDI, Congress enacted this provision "to require DOT to take a 'fresh and fair' look at open-head fibre drum packaging to determine whether it should be used after October 1, 1996 \* \* \*"

### D. ANPRM

On October 7, 1994, RSPA published in the Federal Register an advance notice of proposed rulemaking (ANPRM), Docket No. HM-221; Notice No. 94-9 (59 FR 51157), soliciting comments and proposals for alternate standards for open-head fiber drum packaging. In the ANPRM, RSPA requested "[d]etailed comments and proposals \* \* \* that will assist RSPA in developing an appropriate regulatory proposal consistent with the requirement" in Section 122 of the Act. 59 FR 51158. RSPA invited proposals, "preferably in the form of a draft standard, that would assist RSPA in accomplishing the intended effect of this law." *Id.* RSPA also invited comments on whether alternate standards for open head fiber drums should be limited to domestic transportation of liquid hazardous materials.

In response to the ANPRM, RSPA received comments from 17 parties. In addition, RSPA's Administrator and other DOT officials held separate meetings concerning this rulemaking with: (1) IFDI's counsel and officials of Sonoco Products Company (a member of IFDI), and (2) representatives of the Association of Container Reconditioners (ACR), the 3M Corporation, USX Corporation, and the Steel Shipping Container Institute (SSCI). Notes of these two meetings have been placed in the public docket for this rulemaking.

Only IFDI proposed alternate standards for open-head fiber drum

packaging for the transportation of liquid hazardous materials. The set of six standards it has offered appear to be identical to the standards proposed by FDTC in its 1992 exemption application and, according to IFDI, "accurately predict, and will continue to accurately predict, the safety of liquid hazardous materials as transported in open-head fibre drums." IFDI referred to "a 30-year record of safe shipping experience," and a safety record that "has continued to remain at 99.99 percent for the past 14-year period." It asserted that the ANPRM was deficient for failing to specify factors that, according to IFDI, Congress directed DOT to consider. These factors are set forth in the legislative history and include: (1) DOT's Hazardous Incident Reporting System as it pertains to fibre drums; (2) the fibre drum industry's own safety record; (3) the 30 years of shipping experience associated with use of these drums and (4) existing industry standards that have led to the industry's "excellent shipping record."

IFDI also contended that other matters were "irrelevant" to this rulemaking, including the safety record for other packagings (similar to that for fiber drums), the comparative costs of other packagings, and possible impacts that alternate standards would have on international trade agreements.

Several commenters expressed opposition to alternate standards for fiber drums. The 3M Corporation stated: "The UN performance standards are very basic standards that simulate the transportation environment. There are no other standards that simulate the current transportation environment." DuPont acknowledged that it used a "small amount" of fiber drums for shipping non-hazardous liquids, but that its evaluations have led it to follow a "long-standing practice" of not using fiber drums for hazardous liquids. Elf Atochem stated that "liquid-type fiber drums could not offer the filler, carrier and emptier an 'equal or greater level of safety' to a drum which does pass the required [HM-181] tests."

SSCI argued that alternate standards would move the United States away from an international system of hazardous materials regulations, forcing some shippers to stock different packagings for domestic and international shipments, and compromise transportation safety by authorizing lower quality packagings. ACR stated that alternate packagings should be approved only under the provisions of 49 CFR 178.601(h), which authorizes RSPA's Associate Administrator for Hazardous Materials Safety to approve packagings which are

"shown to be equally effective, and testing methods must be equivalent."

Monsanto Company supported the position that fiber drums should conform to the HM-181 performance standards, but it suggested a limited exception to allow the use of non-standard fiber drums for the shipment of liquid hazardous wastes in packing groups II and III to incineration facilities, under certain conditions. Monsanto stated that it would not be acceptable "to allow for any other use of fiber drums which do not meet the requirements of performance standards."

Besides opposing the issuance of alternate standards, Russell-Stanley and The Society of the Plastics Institute also stated that if any alternate standards were adopted, they should apply to all open-head drums, including those made from steel and plastic as well as fiber. According to Sirco Systems, Inc., alternate standards would be "a precedent for similar requests by other packaging industries [which] could undermine the entire performance-oriented packaging standards system \* \* \*"

#### E. SANPRM

On January 25, 1995, RSPA published in the Federal Register a supplemental advance notice of proposed rulemaking (SANPRM), Docket No. HM-221; Notice No. 95-2 (60 FR 4879). In the SANPRM, RSPA reopened the comment period and scheduled a public hearing to allow interested parties to submit additional proposals as well as comments with regard to the alternate standards offered by IFDI.

The SANPRM broadly encouraged interested parties to "submit any comments relevant to the direction in Section 122 of the Act." 60 FR 4880. Additional comments were invited on whether the alternate standards proposed by IFDI meet the statutory measure, in light of the prior determination by RSPA (on FDTC's application for an exemption) that similar standards did not provide an equal or greater level of safety than the HM-181 performance standards. RSPA also requested comments on the "factors set forth in the legislative history" of Section 122, as represented by IFDI; whether alternate standards, if adopted, should apply to packagings other than fiber drums; and Monsanto's proposal for a limited exception to allow non-standard fiber drums to be used for shipping hazardous wastes to incineration facilities.

At a public hearing on February 17, 1995, statements were presented by IFDI, three manufacturers of fiber

drums, two shippers of hazardous materials in fiber drums, ACR and SSCI. RSPA also received 13 additional written comments, including five from members of Congress: Sens. Hollings (D-SC) and Thurmond (R-SC) and Reps. Baker (R-CA), Gillmor (R-OH), and Spratt (D-SC). All the statements and comments to the ANPRM and the SANPRM have been carefully considered as discussed below.

#### II. IFDI's Proposed Alternate Standards

FDTC's June 1992 exemption application and IFDI's comments in this proceeding both state that open-head fiber drums presently being manufactured meet the stacking test set forth in 49 CFR 178.606 and the vibration standard set forth in 49 CFR 178.608. As alternatives to the other three HM-181 performance standards (drop, leakproofness, and hydrostatic pressure tests), IFDI has proposed a set of six standards entitled as follows:

- IFDI Standard 101, Rev. 1—Compatibility Test
- IFDI Standard 110, Rev. 1—Joint Integrity Test
- IFDI Standard 120, Rev. 1—Leakage Spray Test
- IFDI Standard 130, Rev. 1—Weatherproofing Test
- IFDI Standard 140, Rev. 1—Fibre Drum Structure
- IFDI Standard 150, Rev. 1—Impact Test

IFDI's standard for fiber drum structure (No. 140) specifies the manner and materials for construction of fiber drums, rather than a test of how the drums will perform. It sets forth specifications for the drum heads, joint materials (caulking and gaskets) and sidewall (paperboard caliper, burst strength, and adhesive). This standard requires that the drum manufacturer know the expected use for the drum, as it specifies non-water soluble adhesive only for drums "intended for outdoor or high humidity storage." It also states that a polyethylene, polymer or poly/foil liner, laminated to the paperboard, "may be used as the interior ply to provide liquid-holding capability and/or improved product protection and drum cleanliness properties."

IFDI's other five standards represent forms of performance standards; according to IFDI, four of them set forth tests to which samples are subjected during the design phase (before regular production begins), and the fifth (leakage spray, No. 120) is "a production run test on each container." In summary, these five standards consist of:

- Compatibility (No. 101)—The test consists of folding and stapling a 6"

square of the drum's lining material into a five-sided cube (or "boat") and exposing the bottom creases under the surface level of a sample of the liquid hazardous material in a closed 8 oz. jar which is then elevated in temperature for "any appropriate set of time and temperature conditions" (for example, 130 °F for 30 days). Other "product contact" materials (such as caulking and gaskets) may also be placed in the jar. Success is indicated when there is no stress cracking of the lining material. IFDI indicates that this test is performed for each different liquid hazardous material for which the drum is to be used.

- **Joint Integrity (No. 110)**—The test consists of filling a drum with water containing a "wetting agent" (such as "a squirt of dish detergent") and subjecting the drum to the one-hour vibration test specified in 49 CFR 178.608. Success is based on the absence of any "observable staining of the interior and exterior of the drum in the vicinity of the bottom chime." However, IFDI also states that the drum is closed and, accordingly, this test establishes the integrity of both top and bottom joints, including the gasket used in the closure.

- **Leakage Spray (No. 120)**—The test consists of spraying "[a]ll interior seams and joints of the (plastic lined) surface of each drum \* \* \* with denatured alcohol or its equivalent in such a way that the target drum areas are wetted." The drum passes the test if no stains are observed on the interior surface that would indicate that the paperboard has been wetted through the plastic lining.

- **Weatherproofing (No. 130)**—This test is applied only to drums intended for outdoor or high humidity storage and consists of subjecting random samples to a 72-hour shower of water at the rate of one inch per hour. The drum passes the test if it loses no more than 15% of its compression strength and is still capable of passing the stacking test in 49 CFR 178.606.

- **Impact (No. 150)**—After conditioning at specified temperature and humidity for 48 hours, the drum is filled to its net capacity with water and subjected to two tests. It is first tipped over on concrete onto its cover chime. The same drum must then withstand a diagonal drop on the bottom chime "sufficient to provide at least 500 foot-pounds impact," except that the minimum drop height is one foot and the maximum is two feet. This means that a 55-gallon fiber drum designed to contain a liquid with the specific gravity of water (8.3 lbs. per gallon) would be tested from a height of approximately 13 inches. A drum passes the test if there is no leakage.

According to IFDI, "[t]he impact test cannot be evaluated by itself," but three standards in combination (structure, joint integrity, and impact) account for the "outstanding record" of fiber drums and should be compared to DOT's drop test. IFDI also states that the leakage spray test is the industry's version of DOT's leakproofness test, although no pressure is applied "because of the nature of the materials of construction." Nonetheless, IFDI states that this is an "exceedingly sensitive" test and "will reliably detect the smallest leaks." IFDI further comments that the liquid hazardous materials for which fiber drums have been authorized have low vapor pressures, for which the hydrostatic pressure in 49 CFR 178.605 is not necessary. IFDI indicates it will not object if RSPA issues alternate standards limited to liquids with a vapor pressure (Reid Test) not to exceed 16 psia at 100 °F.

IFDI implies that its standards have been in use in the fiber drum industry since 1973, when the liquid materials shipped in fiber drums were first regulated under the HMR. IFDI has claimed a safety record for fiber drums of 99.99% since 1980, based on its review of industry records and DOT's Hazardous Materials Incident Reporting System (HMIS) (and a comparable record before that time). It states that the lack of customer complaints and commercial claims confirms that fiber drums are dependable and safe. Three members of IFDI and two users of fiber drums echo these contentions: Astro Fibre Drum Inc., General Cooperage Co., Sonoco Products Co., Neste Polyester Inc., and Sybron Chemicals Inc.

General Cooperage indicates that 40 million fiber drums of all types are produced each year; between 1980 and 1991, a total of more than 13 million were built for shipping solid and liquid hazardous materials and, during that time, DOT received only 1,487 incident reports "indicating a failure of some type with fibre drums of all kinds." (In its 1992 exemption application, FDTC stated that only 455 of these incidents involved liquid hazardous materials for which non-specification fiber drums were authorized.) According to General Cooperage, the HMIS "indicates that only 72 failures occurred between January 1992 and October 1994 from a total of two million drums built for liquid hazardous materials." Astro and Sonoco also refer to the fiber drum industry's "99.99 percent safety record."

Neste states that, for each of the past seven years, it has shipped approximately 10,000 fiber drums containing its gelcoat product, a polyester resin, without any reported

incidents of spillage or other problems in shipping and handling. It indicates it has not had the same success with steel drums, which it previously used. Sybron testifies that it has not had any "safety-related problems" during more than 20 years of shipping various materials, including corrosives and combustibles, in open-head fiber drums. It states its customers prefer fiber drums to other packagings, such as steel and plastic drums, and that fiber drums offer "definite advantages" over these other packagings.

IFDI and Sonoco both assert:

The yardstick by which any alternate standards should be measured or evaluated in determining whether the standards provide an equal or greater level of safety for transport is whether the standards predict safety in the transport—not whether the alternate standards are identical to the UN or HM-181 standards.

These parties further contend that IFDI's proposed alternate standards "should be evaluated as a whole in terms of their ability to predict safety" in transportation of hazardous materials, and "not on an individualized basis."

ACR and SSCI specifically challenge IFDI's proposed standards. ACR repeats an earlier characterization of IFDI's alternate standards as "similar to but less stringent than those adopted by DOT under HM-181." SSCI states that the HM-181 performance standards are "minimum standards based on real world experience and conditions," but that IFDI's proposed standards "do not adequately reflect a 'real world' transportation environment." ACR contends that the fiber drum industry's arguments come down to: (1) Non-specification open-head fiber drums have a good record of safety in transportation, and (2) these fiber drums have been constructed to industry standards which, based on shipping experience, appear to work well in practice even though the industry standards are not as stringent as the HM-181 performance standards. In this context, however, SSCI states that the IFDI standards "were first adopted in May 1992," both questioning the procedures under which these standards were adopted and implying that the prior shipping experience has little relevance.

ACR points out that IFDI's compatibility test (Standard 101) may be run "under any appropriate set of time and temperature conditions," which "does not meet the rigors of good packaging testing methodology, makes nearly impossible meaningful comparisons of test data, and eliminates the possibility of repeating the tests for purposes of enforcement." According to

SSCI, IFDI acknowledged at the February 17, 1995 public hearing that the compatibility test was not routinely performed. SSCI also takes the position that the compatibility requirement in 49 CFR 173.24(e) "renders this test moot."

Both ACR and SSCI contend that, because IFDI's leakage spray test (Standard 120) does not require pressure inside the fiber drum, it is not equivalent to DOT's leakproofness test. ACR states that the leakage spray test would not be adequate if the vapor pressure of liquid materials "exceeds that of the previously authorized materials." SSCI asserts that this is a problem also with IFDI's joint integrity test (Standard 110) if liquids have "elevated vapor pressures in the normal range of temperatures experienced during transport."

SSCI describes IFDI's impact test (Standard 150) as a "pale substitute" for DOT's drop test and "substantially inadequate to simulate the full range of transporting experiences." It notes that IFDI's impact test does not require dropping a fiber drum more than two feet, which is some 30% less than the 0.8 meters required for packagings certified for Packing Group III materials. SSCI's comments include a memorandum by a professor in the Virginia Tech Department of Mechanical Engineering, who indicates that "energy that must be dissipated at impact is proportional to the drop height (so that) a drum dropped from a height of 2.7 ft. would have to absorb 2.7 times the energy resulting from an impact from a 1 ft. height." This professor states that steel would "dissipate about 3.5 times the energy in plastic deformation" as compared to fiberglass epoxy, which he assumes to have similar properties to a fiber drum. He concludes that

a valid drop test for drums of different materials must be performed at the same drop height. Drums that are dropped during handling are going to be dropped from the same height regardless of the material that the drum is made of. Therefore, the height that container industry determines by consensus to be representative of mishandling in the field should apply to all container materials. To request a different height for different materials is to ignore how containers are handled in the field.

Shell Chemical Company believes that IFDI has not demonstrated that fiber drum packaging provides a level of safety equivalent to the HM-181 standards for the transportation of liquid hazardous materials. DuPont also urges DOT not to accept "a standard for the United States that is less than the international standard."

### III. Other Industry Standards for Non-hazardous Materials

At the February 17, 1995 public hearing, IFDI noted that there are numerous "methods used to evaluate packaging other than the UN performance standards," including the Uniform Freight Classification (UFC), the National Motor Freight Classification (NMFC), and the National Safe Transit Packaging systems. According to IFDI, these systems were developed to evaluate a packaging's ability "to retain its contents so that the packaging will be delivered intact; that there will be no loss of contents." SSCI also stated that the "American performance standards for shipping containers (including the drop, compression, permeability and vibration tests) were first developed by the American Society of Testing and Materials (ASTM) in the 1940's." All of these other systems apply to general freight. Both UFC and NMFC explicitly state that hazardous materials must be tendered in accordance with DOT's regulations, *i.e.*, the HMR. UFC Rule 39; NMFC Item 540. ASTM Standard Practice for Performance Testing of Shipping Containers and Systems (D 4169) states that the "suitability of this practice for use with hazardous materials has not been determined."

As IFDI testified, the UFC and NMFC systems generally use a combination of "both design and performance systems." This is similar to the former DOT 21C specification for fiber drums, which set forth the minimum thickness and strength for the top, bottom, and sidewall of the fiber drum and also included a compression test and a series of four drops from four feet in different orientations (top chime, bottom chime, sidewall and closure). See 49 CFR 178.224 (1990 ed.). The UFC and NMFC standards applicable to fiber drums for liquids set forth several different options. All but one of these options include construction standards, capacities and weight limits as well as the following similar to IFDI's impact test:

Drums filled to net capacity with water must withstand without leakage a tipover fall on concrete on the cover chime followed by a diagonal drop on the bottom chime sufficient to provide at least 500 foot-pounds impact, except that a maximum height of drop shall not exceed two feet and the minimum height of drop not less than one foot.

The last option in the UFC and NMFC systems allows the use of a fiber drum that passes a four-foot drop test from two different orientations, without regard to construction specifications. In

this respect, the UFC and NMFC systems resemble the HM-181 performance standards.

The ASTM D 4169 standard provides for a single test sample to be subjected to a series of tests, such as climate hazards, handling, vehicle stacking, and vibration (loose-load and stacked). The specific tests performed and their order are determined by the shipper's intended "distribution cycle" as to how the package will be shipped, the "acceptance criteria" (whether the package is damage-free or merely intact), and the desired "assurance level." The last is "based on the product value, the desired level of anticipated damage that can be tolerated, the number of units to be shipped, knowledge of the shipping environment, or other criteria." Within "handling" is a drop test that also depends on the type and shipping weight of the package. Among the test methods referred to in ASTM D 4169 is the Standard Test Method for Drop Test for Loaded Cylindrical Containers (D 997), applicable to barrels, drums and kegs of all construction materials. The procedure for drop tests states that the height from which the drum is dropped "will depend upon the purpose of the test, but normally will be 4 ft (1.2 m)." Otherwise, ASTM D 4169 generally prescribes lower drop heights for "large and heavy shipping units and unitized loads to withstand mechanical handling hazards," up to one foot; as applied to drums, these standards appear to contemplate that the drums are secured to a pallet for handling.

Procedures of the International Safe Transit Association (formerly the National Safe Transit Association) for testing packaged products weighing over 100 lbs. (Project No. 1) consist of a vibration test followed by an incline-impact test. For the latter, the package slides down an inclined plane and strikes a vertical surface at a specified velocity. However, this standard appears to be designed only for materials packaged in boxes, and it is not applicable to drums.

### IV. Finding on Alternate Standards

Packagings manufactured to IFDI's proposed standards will not meet the drop, leakproofness and hydrostatic tests adopted in HM-181. No pressure is applied in IFDI's leakage spray test. And IFDI's impact test does not measure the ability of a fiber drum to survive a fall on its bottom chime from the minimum 2.6 feet height specified in the HM-181 drop test. The other industry standards discussed above also do not assure that packagings will perform to the same level as packagings that meet the HM-

181 performance standards (other than perhaps the option in the UFC and NMFC systems that includes a four-foot drop test).

As directed by Section 122 of the Act, RSPA must determine whether any of these alternate standards will provide a "level of safety" equal or greater than that provided when packagings meet the HM-181 performance standards. RSPA believes that any specified "level of safety" in the transportation of hazardous materials can only be measured with reference to the performance of the packaging used to transport those hazardous materials. If the packaging fails, safety is compromised. The ultimate purpose of any packaging standards must be, as IFDI puts it, their ability "to predict the safety of [the packaging] in the transportation environment." In other words, how will the packaging perform, and to what extent will it protect its contents during transportation? To make the finding required by Section 122 of the Act, RSPA must determine whether a packaging that meets other standards will perform as well in the normal transportation environment as a packaging that meets the HM-181 performance standards.

The flaw in IFDI's proposed alternate standards is that they contain no means of assuring the same performance that the HM-181 standards measure. IFDI's impact test, a tipover followed by a one- to two-foot drop on the bottom chime, is essentially a lesser form of the 2.6-foot drop test in 49 CFR 178.603. IFDI states that its structure, joint integrity and impact tests, in combination, must be compared to DOT's drop test. But RSPA cannot find anything in the first two that compensates for the inability of IFDI's 55-gallon fiber drum to survive a drop of more than 13 inches. RSPA recognizes the historical use of construction specifications, alone or with performance tests, in IFDI's proposed standards and in the former DOT specifications. However, the only purpose of construction standards is to assure satisfactory performance. A fiber drum manufactured to the IFDI standards cannot perform as well, or achieve the same level of safety as, a drum meeting the HM-181 standard of a drop from 2.6 feet or more.

Similarly, since liquids expand in hot weather, a packaging that will not withstand an increase in pressure is simply not as safe as one that will. While IFDI has stated that it would not object if RSPA limited the use of non-specification fiber drums to liquids with a vapor pressure no greater than 16 psi, RSPA has no basis (from IFDI's submission or otherwise) to find that

this limitation is sufficient to avoid those instances when an increase in internal pressure would affect the performance of a drum.

Safety and the ability of a packaging to contain its contents can be increased by certain handling practices that minimize damage to individual packagings. For example, banding or wrapping individual packagings secured to a pallet will reduce the likelihood of one packaging falling over or off another. Restricting the height that packagings are stacked will reduce the distance a single package can fall off another. The familiarity and expertise of a private or contract carrier, that handles only a few hazardous materials, reduces risks associated with a common carrier that transports any freight offered to it. Many exemptions issued by RSPA include operational controls along these lines. Some of these controls are found in Monsanto's proposal for a limited exception to allow the use of non-standard fiber drums for the shipment of liquid hazardous wastes in packing groups II and III to incineration facilities.

Monsanto's proposal would apply to the situation when the entire package (with its contents) was to be incinerated, and would allow the one-time use of drums similar in design to former DOT specifications 21C and 21P, under conditions similar to those set forth in 49 CFR 173.12(c) (authorizing the reuse of standard packagings for shipments of hazardous waste, by highway only, when the packaging is finally closed at least 24 hours in advance of transportation, inspected for leaks, and loaded by the shipper and unloaded by the consignee—or handled only by private or contract carrier). Monsanto would also limit to 90 days the total time the non-standard fiber drum could contain the liquid hazardous waste.

The only party to comment on Monsanto's proposal, the Association of Waste Hazardous Materials Transporters (AWHMT) raised several questions. AWHMT expressed concerns that the liquid hazardous waste would cause the fiber drums to deteriorate during a 24-hour holding period. It also noted that drums are typically double stacked (one on another) during transportation and asked whether double stacking would "compromise the integrity of fiber-drum packagings containing liquids." For AWHMT, the packaging material and pre-trip requirements were not important, but

all packaging should meet the same level of transportation performance \* \* \* based on safety, not the use proposed for the packaging after transportation \* \* \* In short, transporters should not have to assume

increased risk for the convenience of a shipper or consignee.

Monsanto's suggestion appears to exclude fiber drums built to IFDI's proposed standard, because the drums Monsanto would use would meet former DOT specifications 21C (which includes a four-foot drop test) or 21P (which mandates the tests applicable to the inside plastic container). 49 CFR 178-224-2(b), 178-225-5(b) (1990 ed.). In this circumstance, and without further comments on Monsanto's proposal in response to the ANPRM, there is insufficient information on which to propose a rule concerning the use of fiber drums for the shipment of liquid hazardous wastes to incineration facilities.

IFDI, any of its member companies or any other person that wants to use non-specification fiber drums for this or any other purpose may petition RSPA for a rulemaking, in accordance with 49 CFR 106.31, or apply for an exemption and provide the information specified in 49 CFR 107.103.

RSPA assumes that there are an infinite number of possible alternate standards that could be measured against the level of safety provided by the HM-181 performance standards. However, the final determination of whether any standard provides an equal or greater level of safety as the HM-181 standards must rest on whether it produces a packaging that will perform as well in the normal transportation environment as one that meets the HM-181 standards. Because IFDI's proposed standards do not assure this same performance, they will not provide as great a level of safety for the transportation of liquid hazardous materials as the HM-181 standards. In light of that finding, Section 122 does not require RSPA to propose any amendments or additions to the HMR.

#### V. Congressional Concerns and Other Matters

IFDI points to language in the Congressional Record, and letters from Senators and Representatives to the docket, urging RSPA to consider the fiber drum industry's "excellent shipping record." These letters also question whether the scope of this rulemaking is consistent with Section 122 of the Act.

Sen. Hollings states that RSPA should not consider whether alternate standards should apply to other packagings in this rulemaking. Both he and Sen. Thurmond believe that RSPA's request for estimates of cost differences between present and proposed packagings "goes beyond the statutory mandate." As Sen. Thurmond states,

“the Act directed DOT to consider only one issue—safety.” Sen. Thurmond and Reps. Gillmor, Spratt and Baker all advised RSPA to consider the factors mentioned in IFDI’s comments to the ANPRM (on which RSPA invited comments in the ANPRM). Sen. Hollings and Rep. Gillmor questioned whether RSPA had prejudged the issues in this rulemaking, and Rep. Spratt stated that the standard of an equal or greater level of safety “is specifically not a standard of equivalence to the performance tests of HM-181.”

The Supreme Court has made clear that the “starting point in determining the scope” of legislation “is, of course, the statutory language.” *North Haven Bd. of Educ. v. Bell*, 456 U.S. 512, 520 (1982). Resort to legislative history, or the asserted intentions of a statute’s sponsors, is unnecessary when the language of the statute is unambiguous. *Freytag v. Commissioner*, 501 U.S. 868, 873 (1991) (“When we find the terms of a statute unambiguous, judicial inquiry should be complete except in rare and exceptional circumstances.”); *United States v. Ron Pair Enterprises, Inc.*, 489 U.S. 235, 241 (1989) (where “the statute’s language is plain,” the only task is to enforce the law according to its terms).

In this case, the Act’s command is clear: DOT must determine whether alternate standards will provide “an equal or greater level of safety” than the HM-181 performance standards. The level of safety to be provided by alternate standards is the sole basis of RSPA’s finding in Part IV, above, consistent with Section 122 of the Act. Historical shipping experience under lesser standards, in effect prior to the adoption of the performance standards in HM-181, cannot be dispositive.

As a matter of fact, the actual experience of shipping hazardous materials in fiber drums was considered in RSPA’s detailed decision on FDTC’s appeal from the denial of its application for an exemption. There RSPA’s Acting Administrator found that the claimed

99.99% “success rate” for fiber drums was comparable for all packagings but, notwithstanding that record, it was appropriate to further improve safety in HM-181 by eliminating non-specification packagings of all constructions (metal and plastic, as well as fiber). Were RSPA to have accepted the fiber drum industry’s position that the past shipping record was satisfactory, that success rate “would foreclose RSPA from taking any further actions to require appropriate levels of safety for the transportation of hazardous materials.” Moreover, the types of incidents involving fiber drums were considered to be more reflective of a packaging’s performance, and the need to upgrade the packaging, than just the number of incidents.

Also beyond the direction of Section 122 of the Act is IFDI’s claim that the HM-181 standards are too strict and need to be relaxed for fiber drums. Under Section 122, the benchmark for alternate standards is HM-181, not some less protective version thereof. Moreover, contentions regarding the impossibility of making fiber drums to meet the HM-181 performance standards and arguments concerning other exceptions from the HM-181 requirements were discussed in detail in the decision on FDTC’s appeal from a denial of its application for an exemption.

The only additional matter raised in IFDI’s comments in this proceeding relates to an approval recently issued by RSPA that permits the remarking of steel drums, as meeting the HM-181 standards without additional testing, that were certified to meet the former DOT specifications at dates up to September 30, 1994. (Packagings may not be made to the former DOT specifications after September 30, 1994. 49 CFR 171.14(b)(5)(ii).) Those former DOT specifications included a series of tests in which sample drums were required to be tested at pressures of 15 psi or more (some up to 80 psi) and

dropped from a height of at least four feet, in various orientations (e.g., diagonally on the chime and on any other part “considered weaker than the chime,” 49 CFR 178.116-12(a)(1990 ed.)). Moreover, a remanufacturer who remarks a steel drum, under the authority of this approval, certifies that the drum is capable of meeting the HM-181 performance standards.

In contrast, IFDI would continue the authority to transport liquid hazardous materials in fiber drums that cannot pass a drop test greater than two feet (or 13 inches for the standard 55-gallon drum) or a hydrostatic pressure test at 3 psi. Nothing in RSPA’s approval for remarking steel drums can justify the continued use of fiber drums that do not meet either the former DOT specifications or the HM-181 performance standards.

Section 122 of the Act requires RSPA to determine whether alternate standards for fiber drums provide “an equal or greater level of safety” as the HM-181 performance standards. As already discussed, a standard that requires only a one- to two-foot drop test does not provide an equal level of safety as a standard that requires being able to withstand a drop of 2.6 feet. The separate question raised by IFDI, whether certain steel drums actually meet the former DOT specification, is beside the point and concerns enforcement of the applicable standards rather than the appropriate standard to be applied.

## VI. Final Agency Action

This rulemaking proceeding is terminated, and this decision constitutes RSPA’s final agency action.

Issued at Washington, DC on September 21, 1995, under authority delegated in 49 CFR Part 1.

D.K. Sharma,

*Administrator.*

Meeting; Notices**

## ENVIRONMENTAL PROTECTION AGENCY

[OPPTS-00149; FRL-4760-5]

### Guidance on Acquisition of Environmentally Preferable Products and Services; Solicitation of Comments

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice.

**SUMMARY:** This document announces a proposed general guidance designed to assist Executive agencies in identification and acquisition of environmentally preferable products. This document also solicits comments from all interested parties on the proposed guidance. The proposed guidance is in response to section 503 of the Executive Order 12873 on Federal Acquisition, Recycling and Waste Prevention.

**DATES:** All written comments must be received on or before November 28, 1995.

**ADDRESSES:** Written comments must be submitted in triplicate and identified with docket number OPPTS-00149 to: OPPT Document Control Officer (7407), Office of Pollution Prevention and Toxics, Environmental Protection Agency, Rm. E-G99, 401 M St., SW., Washington, DC 20460.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: [ncic@epamail.epa.gov](mailto:ncic@epamail.epa.gov). Electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by the docket number OPPTS-00149. No Confidential Business Information (CBI) should be submitted through e-mail. Electronic comments on this proposed guidance may be filed online at many Federal Depository Libraries. additional information on electronic submissions can be found in Unit V. of this document.

**FOR FURTHER INFORMATION CONTACT:** For general information: Danielle Fuligni, telephone number: 202-260-4172, e-mail: [fuligni.danielle@epamail.epa.gov](mailto:fuligni.danielle@epamail.epa.gov). For computer information: John Shoaff, telephone number: 260-1831, e-mail: [shoaff.john@epamail.epa.gov](mailto:shoaff.john@epamail.epa.gov). For green building information: Peter Thompson, telephone number: 260-8612, e-mail: [thompson.peter@epamail.epa.gov](mailto:thompson.peter@epamail.epa.gov). For General Services Administration/EPA

Cleaners Project information: Tom Murray, telephone number: 260-1876, e-mail: [murray.tom@epamail.epa.gov](mailto:murray.tom@epamail.epa.gov). Mailing address for all contact persons except for Tom Murray: Environmental Protection Agency, Office of Pollution, Prevention, and Toxics (7409), 401 M St., SW., Washington, DC 20460. Mailing address for Tom Murray: Environmental Protection Agency, Office of Pollution, Prevention, and Toxics (7406), 401 M St., SW., Washington, DC 20460.

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

On October 20, 1993, President Clinton signed Executive Order 12873 entitled "Federal Acquisition, Recycling and Waste Prevention." Section 503 of this Executive Order requires EPA to "issue guidance that recommends principles that Executive agencies should use in making determinations for the preference and purchase of environmentally preferable products." EPA plans to hold a public meeting in October 1995, in Washington, DC to solicit input from interested parties concerning this proposed guidance. More detailed information about the meeting will be published in the Federal Register at a later date.

##### II. Process

To implement section 503, EPA established a process to solicit public input from all interested persons and organizations prior to development of the proposed guidance. EPA developed a "concept paper" that outlined preliminary thoughts on how the guidance might be structured and some guiding principles for implementation of section 503. The public was given an opportunity to comment on the concept paper, and over 50 comments were received. EPA also held a public meeting at which over 20 Executive agencies, companies, organizations, and individuals presented testimony.

In addition, EPA held meetings with "stakeholders" to give interested parties an additional opportunity to present their views on how EPA should proceed in developing principles for Executive agencies to use when making determinations for the preference and purchase of environmentally preferable products (EPPs). Meetings were held with over 20 stakeholders companies and organizations. EPA also consulted with the major purchasing agencies. Use of this public process has given EPA an appreciation for the diversity of views and complexity of the issues involving the acquisition of environmentally preferable products. EPA is open to

alternate approaches and welcomes comments on ways to encourage the acquisition of environmentally preferable products.

This proposed guidance is meant to serve as a framework for interested parties to begin a dialogue on environmental preferability of products and services as it is applicable within the Federal purchasing context. It is also EPA's first comprehensive articulation of its policy on "green" products and as such, it will evolve over time as scientific and technical understanding expands. What follows should serve as a backdrop for comments.

This proposed guidance reflects many months of deliberations and discussions with a wide variety of interested parties, including companies, Executive agencies, academia, environmental organizations, and others. During the process of developing this guidance, it became apparent that different parties had very divergent views on how EPA should go about implementing the Executive Order mandates. Given this, EPA recognizes that the guidance cannot meet all of the needs of all of the interested parties. Instead, the document attempts to capture these many views within a single document while presenting a possible approach that EPA believes will lead to effective implementation of the Executive Order.

EPA's effort to define and apply environmental preferability is not being done in a vacuum. Other initiatives are underway that will impact the Federal government's policies on acquisition and environmental management, most notably the National Performance Review (NPR, also commonly referred to as the "Reinventing Government" initiative). Another initiative is the interim rule amending the Federal Acquisition Regulation (FAR) which will allow consideration of broad environmental factors in acquisition decisions.<sup>1</sup>

At the same time that the Environmentally Preferable Products guidance is being developed, for example, efforts are being made to streamline and simplify the Federal government's procurement process under the NPR. The result will be to reduce the bureaucracy of Federal procurement by delegating additional purchasing authority away from procurement personnel and towards all government employees. To the extent that the streamlining will result in increasing the overall number of

<sup>1</sup> "Federal Acquisition Regulation: Environmentally Preferable Products," Interim Rule, Federal Register (60 FR 28494, May 31, 1995).

government purchasers, this guidance will have to be broadly distributed, easily understandable, and supplemented by education and training for government purchasers on the environmental implications of their purchases as well as tools to improve their purchasing performance.

The proposed guidance is intended, like the NPR, to promote a government that "works better and costs less." It will work better by reducing its negative impacts on the environment and ensuring productive, sustainable natural systems. And it will cost less by incorporating environmental considerations into its decisions (in this case, purchasing decisions) and, from a fiscal as well as an environmental standpoint, operating its facilities and programs more efficiently.<sup>2</sup>

To help Executive agencies move forward in acquiring environmentally preferable products, and to help in the further development of the tools and knowledge base to support this initiative, EPA is recommending that voluntary pilot projects be undertaken by Executive agencies. EPA believes that these pilot acquisitions will serve as the "laboratories" for applying this proposed guidance, helping to test the workability of the concepts presented and providing valuable information that can be used to improve the guidance in the future. The proposed guidance includes a more detailed discussion of the pilots.

EPA believes that this proposed guidance provides the first step in bringing forward the key issues surrounding the acquisition of environmentally preferable products, allowing Executive agencies to make the necessary choices more effectively. This proposed general guidance, however, will not answer many of the questions which may arise in acquisition of a particular product category or service, and thus is not intended for use by individual procurement officials. Instead, EPA envisions that the results of the pilot acquisitions will more closely address the needs of the acquisition community. However, EPA believes that this guidance will nonetheless, inform procurement officials interested in making decisions involving environmental preferability.

EPA intends this proposed guidance to serve as a broad framework for acquisitions involving environmentally preferable products or services. Following the issuance of this broad, umbrella guidance, EPA intends to issue

more specific guidance on certain product categories. Product categories could include not just common supplies but also services, facilities and/or systems. Which product categories will be the subject of specific guidance will depend upon the plans of the individual Executive agencies and on comments that are solicited from the public. EPA plans to use a public process to develop the product category-specific guidances, so as to draw on the extensive knowledge from both within and outside of the government.

### III. Request for Comment

EPA request comments on all aspects of this proposed guidance and is interested in receiving comments as they relate to the following sections in this unit.

#### A. General Framework

- Will the framework suggested in the guidance be effective in promoting federal purchase of environmentally preferable products and expand public sector markets for these goods and services? How might it be improved?

#### B. Guiding Principles

- The proposed guidance presents seven guiding principles. Combined, do these seven principles convey the multi-dimensional and dynamic nature of environmental preferability? Are these the principles that Executive agencies should follow? Are all of these principles appropriate or of equal importance to Executive agencies? What are the best ways to operationalize these principles so that they are easy for procurement officials to use in identifying and giving preference to environmentally preferable products and services?

- In collaboration with other Executive agencies, EPA plans to test out many of the concepts contained in the guiding principles through pilot acquisitions focused on specific product categories. EPA seeks comments on ways that can best facilitate operationalizing the concepts in the guidance through pilot acquisitions and other approaches and which will result in practical, user-friendly tools.

- The proposed guidance promotes a life-cycle perspective to determining environmental preferability. EPA seeks comments on the best and least burdensome ways to encourage reporting of life-cycle information and to embark on practical life-cycle approaches. Is it possible to determine some minimum level of life-cycle information that is necessary to reasonably evaluate environmental preferability of a product or service?

What is this minimum level? The government's need for any information needs to be weighed against the burden on vendors of providing, and consumers interpreting, that information.

- The concept of multiple attributes has been presented as a separate principle (Principle #2) from the concept of life-cycle perspective (Principle #3). EPA seeks comments on whether some combination of attributes can determine a product's overall environmental performance or whether such a determination can only be made after assessing the environmental effects during the product's life-cycle. If the latter is more appropriate, EPA seeks comments on whether these two principles should be merged into a single principle so that attributes associated with products are always viewed in the context of a life-cycle perspective.

#### C. Proposed Menu of Environmental Performance Characteristics

- As part of the guidance, EPA proposes to offer a preliminary list of attributes that can serve as a starting point for presenting and comparing environmental information of products and services. This menu of environmental performance characteristics is attached to the guidance as Appendix B(1). Are these the right set of attributes? What should be added or deleted? Should the list include exposure factors associated with the materials, e.g., potential for exposure (low/high likelihood), number of people exposed, duration of exposure, magnitude of exposure, length of time until exposure, number of acres exposed, number of species exposed, etc? If so, how should these exposure factors be defined? How should the environmental attributes be characterized, i.e., in terms of environmental releases or effects, risks to human health and the environment, or some other characterization? Who should be involved in narrowing down the list of attributes to determine environmental preferability for a specific product category?

#### D. Establishing Core Environmental Values

Deciding whether one product is more environmentally preferable than another inevitably involves judgements that one environmental impact or environmental stressor is more important than another. The EPA believes that it is appropriate and important to establish a possible framework for a discussion of environmental priorities, and recognizes that there are various ways in which the government may establish

<sup>2</sup>From "Creating a Government That Works Better and Costs Less: Reinventing Environmental Management," page 2.

environmental priorities. One possibility for establishing environmental priorities is to use the matrix of ecological stressors and the list of high risk human health stressors that were developed by EPA's Science Advisory Board (SAB) and published in its 1990 report "Reducing Risk: Setting Priorities and Strategies for Environmental Protection."

EPA believes that this report and its findings may offer an appropriate baseline around which to frame the public discussion regarding the establishment of environmental priorities in the context of purchasing environmentally preferable products or services. It should be noted that the rankings in the report are not perfect; they may be incomplete and may emphasize global-scale impacts, at the expense of local ones. EPA is presenting the following matrix of ecological stressors and the list of stressors presenting high risk to human health to begin the public debate, and is very interested in receiving comments on whether this proposed approach should be used for making decisions concerning the relative environmental priorities and thereby assist in

determining the preferability of products or services.

EPA recognizes that determining which environmental impacts are most important and setting environmental priorities involve certain value judgements. Who should be responsible for making decisions concerning the relative environmental priorities? EPA envisions applying this decision matrix within the context of pilot acquisitions in hopes of learning how Executive agencies should establish environmental priorities for making decisions about environmental preferability. EPA is interested in receiving comments about this proposed approach. EPA proposes including this decision matrix and the list of human health impacts in the guidance as Appendix E. Should this approach be considered for inclusion as an Appendix to the guidance?

1. Ecological priority impacts matrix. The Decision Matrix for ecological priority impacts, which is presented below, would provide some guidance to Executive agencies on making trade-offs among various environmental attributes.

According to EPA's Science Advisory Board, the ecological recovery time affects the severity of the risk; the longer the recovery time (the less reversible the damage), the higher the risk of that

ecological stressor. Thus, the matrix uses reversibility of the impact as the horizontal axis for estimating the severity of the risk associated with environmental attribute information provided by the vendor. Stressors whose effects cause the ecosystem to take centuries or an indefinite amount of time to recover are given a greater risk ranking than those that take years or decades to recover. Non-renewable resource consumption, for example, is considered a more significant ecological stressor than the discharge to water of conventional pollutants such as biochemical oxygen demand, loadings, from which an ecosystem can recover in years.

The Science Advisory Board also considered significant the geographic scale of the area subject to the stress and the importance of the ecosystem that is actually affected within the stressed area. Thus, ecological stressors that have impacts on a global or biosphere basis are to be considered higher risk or more significant than ecological stressors that have an impact only on a local or regional/ecosystem basis. The Agency has, therefore, used geographic scale of the stressor's impact as the vertical axis for its matrix.

TABLE 1.—ECOLOGICAL PRIORITY IMPACTS MATRIX GEOGRAPHIC SCALE/REVERSIBILITY

	Years	Decades	Centuries/indefinite
Local/Regional .....	Rapidly Renewable Resource Consumption.		
National .....	Conventional Pollutants. Hazardous Air Pollutants .....	Bioaccumulative Pollutants.	
Global .....	Renewable Resource Consumption. Chemical Releases.		Non-renewable Resource Consumption. Ecosystem Impacts. Ozone Depleting Chemicals. Global Warming Gases.

2. List of stressors presenting high risk to human health. The list of stressors below have been identified by the Science Advisory Board in its "Reducing Risk" report as presenting high risks to human health. The stressors are not listed in any particular order of importance:

- Ambient air pollutants.
- Hazardous air pollutants.
- Indoor air pollution.
- Occupational exposure to chemicals.
- Bioaccumulative pollutants.<sup>3</sup>

<sup>3</sup>The EPA has added bioaccumulative pollutants to the list of stressors that pose high risks to human health. While not explicitly identified in the SAB report as a high risk stressor, the report does

provide support for this addition. The Science Advisory Board (SAB) did not consider bioaccumulative pollutants as a high risk stressor in part because "Unfinished Business" (an earlier report that provided the basis for "Reducing Risk") did not separately break out this category; that report focused on pollutants based on the Agency's organizational and regulatory structure. The SAB report discusses bioaccumulative pollutants in several sections, however, as posing potentially high risks. For example, the report states: "It is also noteworthy that certain environmental toxicants—such as heavy metals, PCBs, and long-lived radionuclides—tend to persist indefinitely in the environment and may gradually become concentrated in certain components of the human food chain. Consequently, such toxicants may continue to pose a threat to human health long after their release into the environment has halted." See Appendix B: The Report of Human Health Subcommittee of Reducing Risk for a more complete discussion of the human health stressors

EPA believes that this is one approach to making decisions concerning the relative environmental preferability of products. EPA seeks comments on the usefulness of the ecological impact matrix as well as the list of high priority human health impacts. In addition, readers are encouraged to provide their thoughts concerning the placement of the impacts in the matrix, gaps in the matrix, and whether or not the human health impacts can be prioritized in a similar manner. Comments on other methods of prioritizing ecological and human health impacts are also solicited.

listed above and how the SAB determined that they presented a significant risk.

### *E. Third Party Environmental Certification Programs*

EPA recognizes that a number of public and private programs already award "seal-of-approval" labels on consumer products for certain environmental attributes. Some programs have developed a "report card" approach whereby certain environmental information about a product or groups of products is profiled. Yet others certify single attribute claims made by manufacturers. More than 20 countries have environmental labeling programs and a number of private companies and non-profit programs claim to either identify environmentally preferable products here in the United States or label products based on environmental attributes. These third party environmental certification programs can play the important role of helping consumers identify which products are less environmentally damaging.<sup>4</sup>

Although these third party environmental certification programs currently operate primarily in the consumer sector, their influence in the Federal marketplace could become significant. For example, as streamlining efforts allow more Federal employees to make direct purchasing decisions, agency personnel, in their purchases of commercially available or "off-the-shelf" items may come to equate the "seals" or "report cards" of these programs as being environmentally preferable.<sup>5</sup> In addition, as Executive agencies begin to implement Executive Order 12873, it is possible that Executive agencies will look to these programs to assist in identifying environmentally preferable products in specific procurement. However, Executive agency decisions regarding federal procurement, including those involving the environmental preferability of products, are considered to be an inherent government function. As such, Executive agencies need to ensure that an acquisition decision does not turn on an unverified policy, or value judgment by a non-government entity.

Currently, there are no widely accepted standards for how these programs should operate. Although organizations such as the International Standards Organization (ISO) have

initiated efforts to develop a "code of conduct" for eco-labeling programs, the resulting standards will not be finalized for a number of years.<sup>6</sup> Until international standards or other practices are developed, EPA believes that it is appropriate for Executive agencies to consider the following questions if evaluating such programs for use in making decisions regarding the environmental preferability of products. Does the program have:

- An open, public process that involves key stakeholders (businesses, environmental and consumer groups, states etc.) in developing its criteria or standards?
- Award criteria, assumptions, methods and data used to evaluate the product or product categories that are transparent (i.e., they are publicly available, easily accessed and understandable to the lay person)?
- A system of data verification and data quality?
- A peer review process (with representation of all stakeholders) for developing the standards or criteria?
- Criteria which are developed based on a "systems" or life-cycle approach (i.e., "cradle to grave")?
- An outreach program to educate the consumer, which includes clear communications to consumers that provide key information concerning environmental impacts associated with the product?
- An established goal of updating standards or criteria as technology and scientific knowledge advance?
- Authority to inspect the facility whose product is certified to ensure compliance with the standards or criteria?
- Testing protocols for the products that are certified which ensure testing is conducted by a credible institution?
- Access to obtaining the seal by small and medium sized companies (e.g., the cost of the seal is not as high as to prevent access by companies)?
- Compliance with the Federal Trade Commission's (FTC) Guides for the Use of Environmental Marketing Claims?

EPA believes that Executive agencies should not make decisions regarding the environmental preferability of products based on third party environmental certification programs that do not generally meet these basic characteristics. EPA is interested in receiving comments on this proposed approach to dealing with the use of third party environmental certification programs by Executive agencies in

making decisions regarding environmental preferability. Although EPA is not proposing that these characteristics be used by individual Federal procurement personnel and does not plan for them to serve as a model for Federal approval of third party environmental certification programs in the private marketplace, it does believe that these characteristics may nonetheless be helpful to decisionmakers. EPA proposes to include this discussion in the guidance as an Appendix F. Should this be considered for inclusion as an Appendix to the guidance? Does the existing FTC Guides help Executive agencies to evaluate third party environmental certification programs?

### *F. Other Issues*

In addition to these specific topics, EPA is also interested in soliciting ideas from the public concerning tools (e.g., a computerized software tool for evaluating products, etc.) that would be useful to Executive agencies in identifying and purchasing "green" products. Finally, EPA is requesting suggestions for product categories to target for specific pilot acquisitions and additional guidance.

### IV. The Proposed Guidance

For the convenience of the reader, the proposed guidance is published below in its entirety.

#### Proposed Guidance on Acquisition of Environmentally Preferable Products and Services

##### *I. Introduction*

Executive Order 12873. On October 20, 1993, President Clinton signed Executive Order 12873, entitled "Federal Acquisition, Recycling and Waste Prevention."<sup>1</sup> Section 503 of this Executive Order requires EPA to "issue guidance that recommends principles that Executive agencies should use in making determinations for the preference and purchase of environmentally preferable products." "Environmentally preferable" is defined in the Executive Order to mean "products or services that have a lesser or reduced effect on human health and the

<sup>1</sup> Executive Order 12873 is one in a series of executive orders that President Clinton has signed since 1993 that emphasizes Federal government purchasing practices to promote environmental goals. Other executive orders include: Executive Order 12843, Procurement Requirements and Policies for Executive Agencies for Ozone Depleting Substances; Executive Order 12844, Federal Use of Alternative Fueled Vehicles; Executive Order 12845, Federal Procurement of Energy Efficient Computers; Executive Order 12856, Pollution Prevention and Right-to-Know in the Government; Executive Order 12902, Energy Efficiency and Water Conservation at Federal Facilities; Presidential Memorandum on Environmentally and Economically Beneficial Practices on Federal Landscaped Grounds.

<sup>4</sup> The term, third party environmental certification program, is used to capture the different types of programs, including those which verify single environmental claims, compile report cards, award seals, etc.

<sup>5</sup> This may not be warranted particularly if the seal or report card does not provide sufficient information about the criteria used to judge the product.

<sup>6</sup> Work on eco-labeling is being done under the Technical Committee on Environmental Management System (TC 207).

environment when compared with competing products or services that serve the same purpose.”

The guidance proposed below is designed to help Executive agencies meet their obligations under this Executive Order to identify and purchase environmentally preferable products and services.<sup>2</sup> It is intended to draw on the extensive procurement experience of the Executive agencies and on the environmental expertise of EPA and others both within and outside of the government. EPA believes that this guidance provides the first step in bringing forward the key issues surrounding the acquisition of environmentally preferable products, allowing Executive agencies to make the necessary choices more effectively. EPA recognizes that this proposed general guidance, however, will not answer many of the questions which may arise in acquisition of a particular product category or service and thus is not intended, although it will be

<sup>2</sup>Section 401 of Executive Order 12873 requires Executive agencies to consider the use of environmentally preferable products in acquisition planning for all procurement and in the evaluation and award of contracts, as appropriate. Section 501 of the Executive Order requires Executive agencies to “review and revise federal and military specifications, product descriptions and standards to enhance Federal procurement of products” that are environmentally preferable. Section 503(b) of the Executive Order requires Executive agencies to use the guidance developed by EPA “to the maximum extent practicable” in identifying and purchasing environmentally preferable products.

informative, for use by individual procurement officials.

The guidance attempts to implement the goals of the National Performance Review and procurement reform objectives of making Federal purchasing a simpler and not a more complex process. This guidance also recognizes that defining what is an environmentally preferable product and service may require a complex balancing of different environmental factors. In sum, the guidance does the following:

- Focuses on all types of acquisition, from supplies and services to buildings and systems.
- Establishes a general, umbrella guidance and requests Executive agencies to select voluntary pilot acquisitions or demonstration projects.
- Establishes a framework for issuing more detailed guidances on specific product categories that are related to current or future pilot acquisitions.
- Establishes a set of guiding principles.
- Outlines a number of steps for Executive agencies’ short-run and medium-run implementation.

## *II. Broad Principles and Approach*

### *A. Overall Approach*

In implementing section 503 of the Executive Order, EPA proposes an approach that has two components. The first is the publication of this general, umbrella guidance. Following this, additional guidances will be issued that will focus on

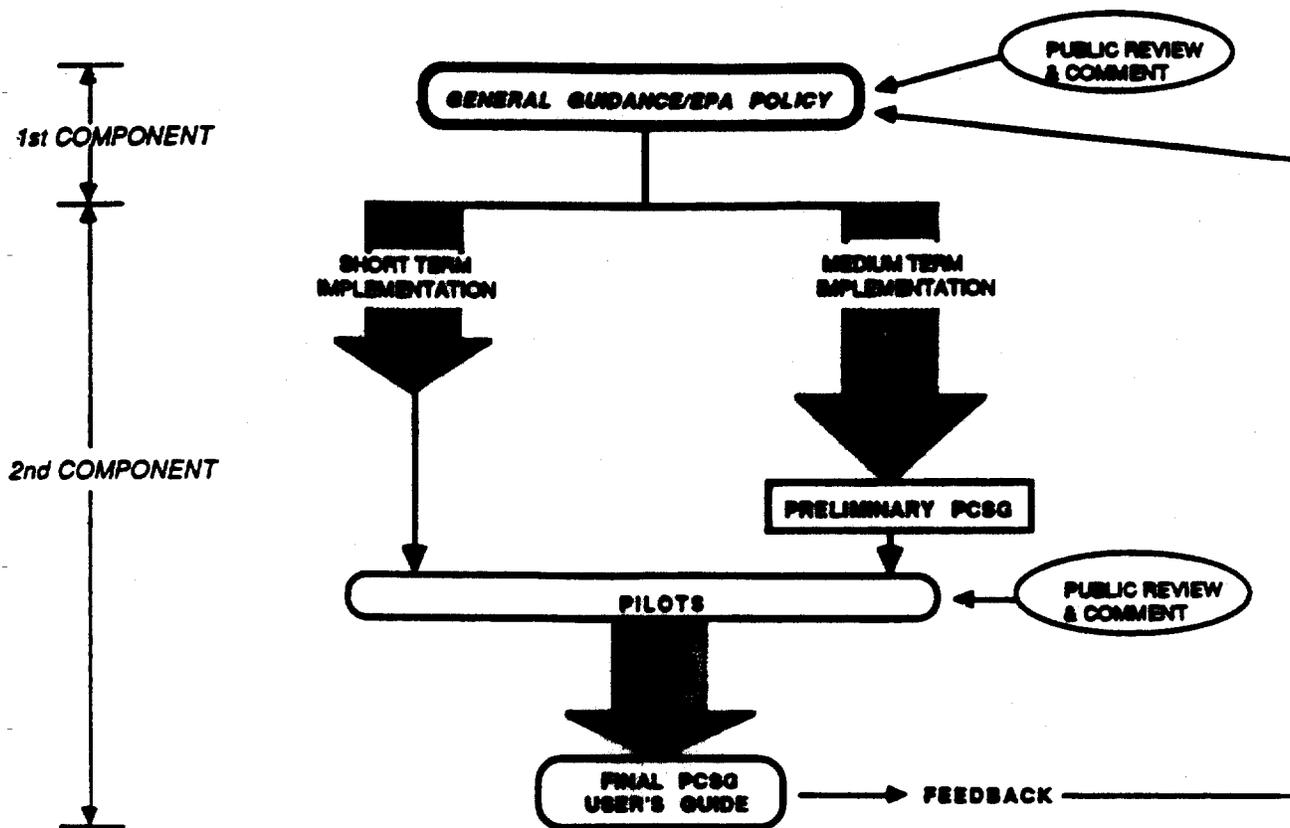

specific product categories. These will be linked to the pilot acquisitions selected by Executive agencies. A more detailed discussion of how these pilot acquisitions might work is included in Section III.B.

Although both components are meant to address multiple audiences (e.g., acquisition community, companies, environmental organizations, etc.), each has a slightly different target audience in mind. The first component, which sets a broad policy framework, is aimed primarily at policy makers and others, both in the public as well as in the private sector, who may be interested in EPA’s first comprehensive statement on “green” products. The second component, which will result in more detailed and practical guidance on specific product categories, will be aimed at the procurement and the acquisition personnel. By making clear its goals and directions, both the general and product category specific guidances (PCSGs) should also provide pragmatic direction for companies who desire to produce more environmentally preferable products and services, and who seek to sell those products and services to the Federal government. The consideration of environmental factors in purchasing needs to be put in the context of other important considerations such as performance, health and safety issues and price.

Figure 1 illustrates the approach which is described above.

**BILLING CODE 6560-50-M**

Figure 1. Implementation Approach

## B. Guiding Principles

The following seven principles are recommended as a broad guide to help Federal purchasers address environmental preferability in Federal acquisitions.

### Guiding Principle 1:

Consideration of environmental preferability should begin early in the acquisition process and be rooted in the ethic of pollution prevention which strives to eliminate or reduce, up front, potential risks to human health and the environment.

It has been estimated that 70 percent or more of the costs of product development, manufacture, and use are determined during the initial design stages.<sup>3</sup> Thus, customized purchases or projects where program managers, architects, engineers, systems designers, or others have influence over the design phase afford the agencies an early opportunity to apply environmental preferability and offer a unique point of leverage from which to address environmental impacts.

Environmental preferability does not involve just substituting one "green" product for another, it also involves questioning whether a function needs to be performed, and how it can best be performed to minimize environmental impacts. For instance, in degreasing operations, the question is often posed whether an efficient cleaner using halogenated solvents is better or worse for the environment than an aqueous based cleaner. A more appropriate question may be whether the cleaning/degreasing step can be eliminated without affecting the overall performance of the product or system. This might be accomplished for example, by consolidating cleaning/degreasing in a later stage of the manufacturing process or changing the process itself.

### Guiding Principle 2:

A product or service's environmental preferability is a function of multiple attributes.

Environmental preferability is a function of many attributes (e.g., energy efficiency, impacts on air, water, and land and fragile ecosystems, etc.), not just one or two. Targeting a single environmental performance characteristic for improvement, like energy efficiency or recycled content, may be much easier, because they are more easily defined (most of the time), measured and understood. By focusing on one dimension of a product's performance, however, one might overlook other environmental impacts associated with the product that may cause equal or greater damage. Furthermore, it is possible that improvements along one dimension may result in other unintended negative environmental impacts along another dimension.

The menu of environmental performance characteristics described in Appendix B offers a preliminary list of product or service attributes that can help to identify environmentally preferable products.

### Guiding Principle 3:

Environmental preferability should reflect life-cycle considerations of products and services to the extent feasible.

Ideally, "environmental preferability" of a product or service should be determined by comparing the severity of environmental damage that the product or service causes to human health and ecological health across its life-cycle with that caused by competing products—from the point of a raw materials acquisition, through product manufacturing, packaging, and transportation to use and ultimate disposal.

The term "life-cycle" is often interpreted by different people to mean very different things. To some, it connotes an exhaustive, extremely time-consuming and very expensive analysis. To other life-cycle is an abbreviated process whereby a long list of potential environmental attributes and/or impacts is narrowed to just a few which provide the basis for comparison across a particular product category. This guidance promotes the latter interpretation and encourages the use of tools which are currently available. For starters, Executive agencies are directed to EPA's document "Federal Facility Pollution Prevention Project Analysis: A Primer for Applying Life Cycle and Total Cost Assessment Concepts." (EPA 300-B-95-008, July 1995)

A more detailed discussion of issues related to life-cycle considerations is included in Appendix C.

### Guiding Principle 4:

Environmental preferability should consider the scale (global vs. local) and temporal reversibility) aspects of the impact.

Determination of environmental preferability may require weighing the various environmental impacts among products. For example, is the impact of increased energy requirements of one product more tolerable than the water pollution associated with the use of another product? While there is no clear hierarchy as to which attributes or environmental impacts are most important, EPA has articulated, in its Science Advisory Board's 1990 report entitled *Reducing Risk*, a statement of policy on priority pollutants affecting environmental and public health. In this report, environmental stressors were judged to be significant based on two primary criteria—the geographic scale and degree of reversibility of the impact. Applying this principle suggests that products with pollutants whose effects are local and rapidly reversible are to be generally preferred over products that impose global and irreversible environmental damages.

A matrix of priority ecological impacts that reflects the scale and temporal consideration of impacts, and a list of priority human health impacts is included in a discussion in proposed Appendix E.

### Guiding Principle 5:

Environmental preferability should be tailored to local conditions where appropriate.

The importance of environmental impacts may vary depending on geographic location and other site-specific factors, such as the variation in the availability of natural resources and pollutant effects on a particularly sensitive ecosystem. For

example, products that conserve water usage may be valued more highly by those who live in the southwest United States where water is scarce than by resident of the northeast where water is abundant. Thus, purchasers may wish to consider local environmental issues when evaluating life-cycle environmental information provided by offerors. When making purchasing decisions, these local issues would need to be carefully weighed against other global and national environmental problems, such as ozone depletion and global climate change.

### Guiding Principle 6:

Environmental objectives of products or services should be a factor or subfactor in competition among vendors, when appropriate.

An approach to selecting environmentally preferable products that promotes competition on environmental grounds among vendors is better than an approach which inhibits competitive forces. The consideration of environmental factors in purchasing needs to be put in the context of other important considerations such as performance, health and safety issues and price. A crucial element in fostering competition and encouraging a market-driven approach is to have disclosure of information by vendors about their products and services. Where appropriate, Federal personnel should seek meaningful information about the environmental aspects of products in order to judge whether one product or service is more of less environmentally preferable than another. The accessibility of the information to the public (both the Federal personnel and the general public) will help ensure its accuracy and credibility (e.g., through "the power of the spotlight") as well as to stimulate continuous improvement in the environmental performance of vendors' products.

### Guiding Principle 7:

Agencies need to examine carefully product attribute claims.

A number of sources of information about environmental performance of products are currently available.<sup>4</sup> Two general categories of information sources can be distinguished. The first is manufacturers who make claims about their products either on the product label or in their advertisements. Second, some third party environmental certification programs evaluate environmental aspects of products and award "seals-of-approval" or compile "report cards" of environmental information. Others verify specific claims made by manufacturers (e.g., product contains X percent recycled content). The extent to which information conveyed through claims and seals can assist Executive agency personnel in identifying environmentally preferable products may vary depending on the types of product being

<sup>3</sup> From Office of Technology Assessment's "Green Products by Design," page 3.

<sup>4</sup> Information about environmental aspects of products are much more abundant in the consumer marketplace. However, as the Federal acquisition system becomes more decentralized and allows for more direct purchasing of commercially available products, the line that distinguishes the Federal marketplace from the consumer marketplace will become increasingly blurred and the information flow between the two marketplaces will increase.

purchased and the legal requirements applicable for a particular acquisition.

This guidance includes two tools to assist Executive agency personnel in evaluating attribute claims or "eco-labels" that appear on products. First, a summary of the Federal Trade Commission's (FTC) "Guides for Use of Environmental Marketing Terms," appears as Appendix D. Second, EPA proposes to include a discussion of characteristics for third party environmental certification programs in the guidance as Appendix F. Executive agency decisions regarding federal procurement, including those involving the environmental preferability of products, are considered to be an inherent government function, therefore the EPA believes that Executive agencies should not make decisions regarding the environmental preferability of products based on third party environmental certification programs that do not generally meet certain characteristics. EPA has requested comment on this proposed Appendix.

### III. Executive Agency Implementation

This section recommends steps that each agency can take to implement the environmentally preferable provisions of Executive Order 12873.

#### A. Policy Directive and Affirmative Procurement Plans

Recognizing that effective implementation will require clear direction and support from the top levels of the agency, it is recommended that each Executive agency issue a Policy Directive that promotes the purchase of environmentally preferable products and services. Elements in the policy directive should include:

An overall statement of policy:

- Agency personnel should seek to reduce the environmental damages associated with their purchases by increasing their purchase of environmentally preferable products and services to the extent feasible, taking into account other considerations such as performance, health and safety issues and price.

- Environmental factors should be taken into account as early as possible in the acquisition planning and decision-making process.

A commitment to the following:

- Increase the acquisition of environmentally preferable products and services.<sup>5</sup>
- Identification of voluntary pilot projects (see discussion below).

- Establishment of incentive and award programs to recognize those people, teams, and interagency work groups who are most successful at promoting the purchase of environmentally preferable products.<sup>6</sup>

<sup>5</sup>This is pursuant to section 602. "Goal for Increasing the Procurement of Recycled and Other Environmentally Preferable Products," which states "Agencies shall strive to increase the procurement of products that are environmentally preferable or that are made with recovered materials and set annual goals to maximize the number of recycled products purchased, relative to non-recycled alternatives."

<sup>6</sup>This is pursuant to section 302(b)(2) of the Executive Order that states that Agency Environmental Executives shall "establish

Collaboration among agencies to provide education and training is highly encouraged.

In order to minimize the burden on Executive agencies, EPA recommends that provisions of the Policy Directive to promote environmentally preferable products be incorporated into individual agency's Affirmative Procurement Plans.<sup>7</sup> This can be done as agencies revise their Plans.

#### B. Pilot Projects

The discussion in Section II.B. identified seven principles which are key to promoting the purchase of environmentally preferable products. To encourage Executive agencies to move forward in acquiring environmentally preferable products and to further develop the infrastructure and knowledge base to support this initiative, EPA is recommending that voluntary pilot projects be undertaken by Executive agencies.

The pilot acquisitions will be the "laboratories" for applying the principles, will help test their workability, and through the results of the pilots, provide actual "lessons learned" as well as improved or more effective policy for future acquisitions. For each of the pilots, a product category specific guidance (PCSG) or "users guide" aimed at the acquisition community will be developed. EPA will seek involvement of established commodity sources, such as the General Service Administration (GSA) and the Defense Logistics Agency (DLA), who have experience and expertise concerning their respective commodities in the pilot projects. EPA plans to keep track of projects that are planned or already underway and thereby serve as a focal point for information on government-wide activities related to environmentally preferable products. Information about different pilots will be disseminated among the agencies to avoid any duplication of efforts and to ensure that lessons learned in one pilot project can be shared to inform other pilot projects.

The discussion below further describes how these pilots and demonstration projects might work. Figure 2 illustrates this process.

1. Selection of pilots. Selection of pilot acquisitions is at the discretion of individual Executive agencies. Criteria that agencies should consider in selecting pilots include:

- Potential for a reduction in risk to human health and the environment.
- Feasibility/degree of flexibility in the acquisition.
- Products or services that are representative or typical of the procurement system; this maximizes the potential value of the pilot acquisition in providing lessons as to the effectiveness of the guidance as well as future acquisitions.

2. Short-term implementation. There are several demonstration projects that are

incentives, provide guidance and coordinate appropriate educational programs for agency employees."

<sup>7</sup>Under section 6002 of the Resource Conservation and Recovery Act of 1976, procuring agencies are required to establish affirmative procurement programs for purchasing EPA-designated recycled products. EPA recommends that agencies expand the scope of their affirmative procurement programs to include other environmentally preferable products.

already in the planning or implementation stages that illustrate how to promote the purchase of environmentally preferable products. These include:

#### GSA/EPA Cleaning Products Pilot

In 1993 at the request of GSA, EPA began developing environmental performance criteria that would help identify "green" cleaning products. Stakeholder meetings were held to develop the criteria, and a study was undertaken to look at product efficacy and the relationship between product performance and environmental impact. Using the results of these efforts, GSA's Federal Supply Service is developing a solicitation for a multiple award schedule that will convey from vendors to federal consumers information on attributes of cleaning products that can serve as indicators of environmental impacts. This information will then be available to purchasers for their examination when selecting products. As part of this pilot, EPA will examine the information provided on the "environmentally preferable cleaning products" schedule and will select cleaning products for EPA facilities.

#### GSA/EPA Computer Pilot

Computer hardware accounts for approximately \$4.6 billion in purchases by the Federal government annually. Currently, the Federal government has been successful in purchasing energy efficient Energy Star computers which have resulted in significant environmental benefits and cost savings. Using its purchasing power, the Federal government can and, in the case of Energy Star, has stimulated product manufacturers to make environmental improvements. EPA and GSA, in collaboration with computer manufacturers and others, are seeking to expand the Energy Star model to identify additional attributes that can be used in the acquisition of environmentally preferable computers.

#### Current Sources for Products With Environmental Attributes

Executive agencies have the option of acquisition products through various supply sources available from GSA and DLA. GSA's Multiple Award schedules (MAS) are one such source of supply. With recent modifications, these schedules offer to purchasers some information on the environmental performance of products. GSA also currently publishes an Environmental Products Guide which identifies those products which vendors have associated with an environmental claim and a New Item Introductory Schedule that often includes information on the environmental performance of products.<sup>8</sup> While agencies should consider purchasing items from this Guide, they should be aware that often the claims refer to a single environmental attribute (e.g., recycled content) and are not verified by GSA. GSA is planning to enlist EPA's assistance in implementing a demonstration project that will involve expanding these publications to include

<sup>8</sup>Other catalogs of supply include GSA's Supply Catalog and DLA's Energy Efficient Lighting Catalog.

more comprehensive information on the environmental performance of products.

3. Medium term implementation. In addition to completing the aforementioned pilots that have already been initiated, EPA requests that Executive agencies select voluntary acquisitions that would become the next wave of pilots and which would also benefit from lessons learned from those case studies already underway or completed. These voluntary pilots will be implemented in three phases.

Phase I—Agencies will identify possible pilot projects. Based on their selections, additional guidance targeting specific product categories will be developed and published. EPA will support these pilots, providing overall coordination and technical assistance, as resources allow. The product category-specific guidances will include the following:

- A qualitative description of the most important environmental performance characteristics for that product category; this will involve a scoping process that will include technical experts both inside and outside the government.
- A description of standard methods by which those characteristics can be measured.

Institutionalizing the purchase of environmentally preferable products in the long run requires that the efforts on the part of the Executive agencies not end when these pilots are completed. So that agencies will continue to acquire "green" products, EPA will coordinate an effort to develop additional guidance documents for product categories that will become the subjects of future pilots. These guidance documents, similar to the product category-specific guidances described above, will describe environmental performance characteristics and measurement methods, and will be developed through a process involving technical experts both inside and outside the government. The identity of the product categories to be targeted for additional guidance will be determined at a future date, and will be influenced by suggestions that are submitted during the public comment period on this proposed guidance.

Phase II—Applying the product category-specific guidance to the acquisition process, agencies will actually purchase environmentally preferable products. While the acquisition strategy and method are left to the discretion of the purchasing agency,

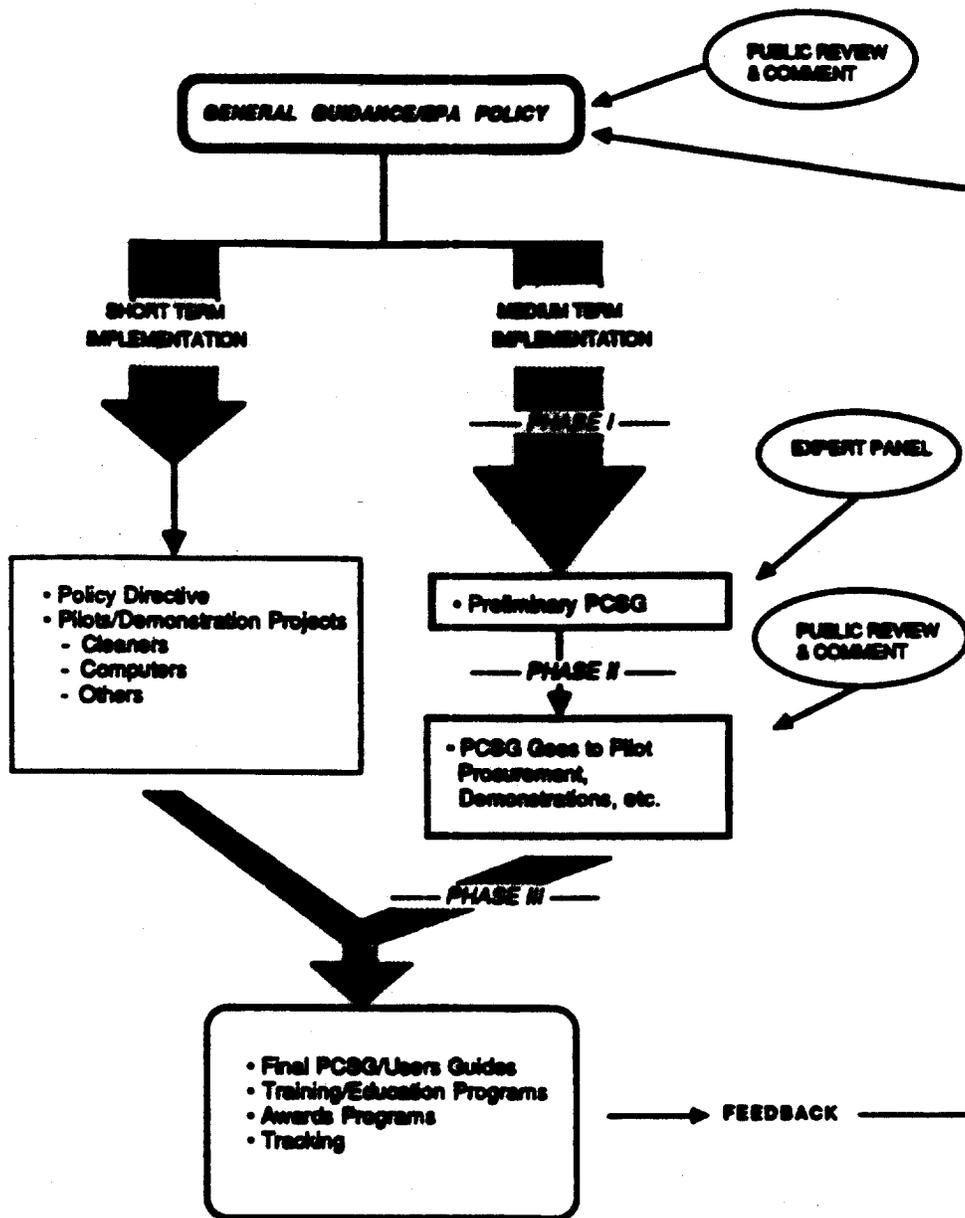

Executive agencies are asked to select the procurement strategy that:

- Maximizes the number of environmentally preferable product choices available to the purchasing Agency.
- Promotes competition across products in terms of environmental performance.
- Stimulates product and process innovation and continuous improvement.
- Allows for the consideration of local environmental conditions.
- Promotes a definition of environmentally preferable products that can improve over time.

Phase III—Upon completion of the pilot project, a compilation and analysis of lessons learned in the acquisition process, data gathered about product categories and results of the pilots will be assembled. The results of these joint efforts will be shared with other agencies through the Electronic Acquisition Network process. EPA believes that the lessons learned from these efforts will help to refine the concepts and principles contained in the general guidance and thereby ensure the effective implementation of the mandates in the Executive Order.

**BILLING CODE 6560-50-M**

**Figure 2. Pilot Implementation**

4. Long-term success. The experience gained from the short- and medium-term pilots will be key to determining the scope and nature of EPA's long-term activities to advance Federal acquisition of environmentally preferable products and services. The lessons learned from these pilots as well as the partnerships formed during the pilots will help to establish a broader infrastructure to support this initiative. EPA may need to utilize existing or help develop new mechanisms—guidance, networks, data bases, etc.—in support of the Federal purchasing community to build this infrastructure. The infrastructure can serve to bridge the gap between the environmental and procurement expertise within the Executive agencies.

All Federal personnel will have a role in creating a demand for products and services that have fewer environmental burdens. Thus, the infrastructure will also have to support the development of tools that are easy and convenient for Federal personnel to use in selecting and purchasing environmentally preferable products.

Furthermore, in light of the evolving acquisition landscape and the dynamic nature of the marketplace, the infrastructure will have to be flexible in order to meet the changing needs of the acquisition community. Given the increased globalization of the economy and the trend towards commercialization of the Federal marketplace, another important consideration will be to coordinate this initiative with new international trade and standardization developments. Ultimately, the measure of success of this initiative will be in terms of increased availability and purchase of products and services that have fewer impacts on human health and the environment.

## Appendix

The set of appendices that follows should be viewed by procuring officials and other government employees as separate but related "tools boxes" to be used in determining preferability. As with all tasks, the type and complexity of the tools should be appropriate to the magnitude and importance of the job. The EPA seeks comments on the appendices that follow:

Appendix A. Glossary of Terms

Appendix B. Environmental Performance Characteristics

(1) Preliminary "Menu" of Environmental Performance Characteristics

(2) Definitions for Terms in the Menu of Environmental Performance Characteristics

Appendix C. Applying a Life-Cycle Perspective

Appendix D. Summary of FTC's "Guides for Use of Environmental Marketing Claims"

Appendix A. Glossary of Terms

Environmentally preferable. Products or services that have a lesser or reduced effect

on human health and the environment when compared with competing products or services that serve the same purpose. The comparison may consider raw materials acquisition, production, manufacturing, packaging, distribution, reuse, operation, maintenance, or disposal of the product or service.

Life-cycle assessment. The life-cycle assessment is a process or framework to evaluate the environmental burdens associated with a product, process, or activity by identifying and quantifying energy and material usage and environmental releases, to assess the impact of those energy and material uses and releases on the environment, and to evaluate and implement opportunities to effect environmental improvements. The assessment includes the entire life-cycle of the product, process, or activity, encompassing extracting and processing raw materials; manufacturing, transportation and distribution; use/re-use/maintenance; recycling; and final disposal.

Often the terms life-cycle assessment and life-cycle analysis are used synonymously. The Executive Order uses the latter and provides a slightly different definition as follows: "Life-cycle analysis is a comprehensive examination of a product's environmental and economic effects throughout its lifetime including new material extraction, transportation, manufacturing, use and disposal.

Life-cycle cost. For the purposes of this guidance document, life-cycle cost is defined to mean all internal and external costs associated with a product, process, or activity throughout its entire life-cycle—from raw materials acquisition to manufacture to recycling/final disposal of waste materials. The term life-cycle cost has also been used by the Department of Defense to mean the amortized annual cost of a product, including capital costs, installation costs, operating costs, maintenance costs, and disposal costs discounted over the lifetime of a product. However, this second definition has traditionally not included environmental costs associated with systems and thus, the first definition is used in the guidance.

Multiple Award Schedule (MAS). MASs contain a number of product listings for which several vendors are available for a particular product. Purchasers obtain information from the vendors and determine from which vendor they want to buy.

Pollution prevention. Pollution prevention means "source reduction," as defined under the Pollution Prevention Act of 1990, and other practices that reduce or eliminate the creation of pollutants through:

—Increased efficiency in the use of raw materials, energy, water, or other resources, or

—Protection of natural resources by conservation.

The Pollution Prevention Act defines source reduction to mean any practice which: —Reduces the amount of any hazardous substance, pollutant, or contaminant entering any waste stream or otherwise released into the environment (including fugitive

emissions) prior to recycling, treatment, or disposal; and

—Reduces the hazards to public health and the environment associated with the release of such substances, pollutants, or contaminants.

The term includes: equipment or technology modifications, process or procedure modifications, reformulation or redesign of products, substitution of raw materials, and improvements in housekeeping, maintenance, training or inventory control.

Third party certification programs. Within the context of this guidance, this general term is used to include programs (either non-profit or for-profit, government-run, government-related or independent) that verify or certify single attribute claims made by manufacturers or other programs that compile key environmental information into "report cards" (e.g., those compiled by the Scientific Certification Program). The term also encompasses a large category of both international and to a lesser extent, domestic programs that award "seals-of-approval" to those products that meet a specific set of environmental award criteria. Award criteria may reflect an analysis of environmental impacts, such as Canada's Environmental Choice's standards for reduced-pollution paint, or single categories, such as Japan's EcoMark seal awarded for the recycled content of paper. A seal is given only if a product meets the standards established by the program. Most of the major foreign environmental certification programs use a seal of approval approach. Active third party seal of approval programs include Germany's Blue Angel, Canada's Environmental Choice, Japan's EcoMark, Green Seal (U.S.), and the international Flipper Seal-of-Approval, among others.

Participation by manufacturers or vendors in the various programs is usually on a voluntary basis.

## Appendix B. Environmental Performance Characteristics

The menu of environmental performance characteristics listed below is designed to help identify the attributes that can be targeted for improvement. This, together with the life cycle graphic which appears in Appendix C, can be used by Federal purchasers to help select that product or service that minimizes environmental impact. It is a preliminary list of the major potential sources of human health and environmental risk. Definitions for each of the characteristics follow the menu.

This menu can be used by agency personnel in two ways: (a) to provide a standard framework for focusing in on the most important environmental attributes of products, systems, and facilities, and determining which product is preferable based on those attributes, or (b) as a checklist of environmental issues to be considered when designing and acquiring systems or buildings. Not all of the environmental performance characteristics will apply to each product; indeed, in some cases, information on only a few key environmental

attributes may be needed to determine environmental preferability.

The menu of environmental performance characteristics suggests that two different approaches to soliciting information can be used. The first includes consideration of releases of pollutants that occur during the life-cycle of the product. In the research on product life-cycle assessments that have been conducted over the past several years, these releases are known as "inventory" items. Alternatively, the risks (or risk surrogates) associated with various life-cycle stages of a product can be identified. This approach seeks to identify actual environmental impacts rather than solely environmental releases. When calculating risks, general population (both environmental and human) exposures and occupational exposures need to be considered. Executive agencies may consider using both risk and release data in their decisions to purchase environmentally preferable products and services.

Additional guidance on how the menu may be used within the context of a particular product category as well as how the Ecological Priority Impacts Matrix and the List of Stressors Presenting High Risk (discussed below in Appendix D) may be applicable will be issued as part of specific guidances that will follow based on voluntary pilot acquisitions.

If vendors/offerors use the menu as a basis for making environmental marketing claims, they should conform to the Federal Trade Commission's Guides for Use of Environmental Marketing Claims (16 CFR 260.5). A summary of the FTC's Guides is included as Appendix D. As explained in the FTC guides, claims concerning a product's environmental performance need to be supported by environmental data provided by offerors and offerors are encouraged to have the information verified by a credible, independent third party certifier to provide product users, acquisition officials and program managers with the assurance that the information they are evaluating is accurate and scientifically sound.

#### Appendix B(1). Preliminary Menu of Environmental Performance Characteristics

##### A. Natural Resources Use

- Ecosystem impacts (endangered species, wetlands loss, fragile ecosystem, erosion, animal welfare etc.)
- Energy consumption (including source, if known)
- Water consumption
- Non-renewable resource consumption (>200 years)
- Renewable resource consumption (<200 years)
- Rapidly renewable resource consumption (<2 years)

##### B. Human Health and Ecological Stressors

- Bioaccumulative pollutants
- Ozone depleting chemicals
- Global warming gases
- Chemical releases (Toxics Release Inventory (TRI) list chemicals or others)
- Ambient air releases (other than TRI, including volatile organic compounds & particulate matter)

- Indoor environmental releases (consumer and occupational)
- Conventional pollutants released to water
- Hazardous waste
- Non-hazardous solid waste (municipal solid waste, large volume waste, surface impoundments)
- Other stressors

##### C. Positive Attributes

- Recycled Content
- Recyclability
- Product Disassembly Potential
- Durability
- Reusability
- Other attributes

##### D. Hazard Factors Associated With Materials

- Human Health Hazards
  - acute toxicity
  - carcinogenicity
  - developmental/reproductive toxicity
  - immunotoxicity
  - irritancy
  - neurotoxicity
  - sensitization
  - other chronic toxicity
- Ecological Hazards
  - aquatic toxicity
  - avian toxicity
  - terrestrial species toxicity
- Product Safety Attributes
  - corrosivity
  - flammability
  - reactivity

#### Appendix B(2). Definitions for Terms in the Menu of Environmental Performance Characteristics

##### A. Natural Resource Use

(1) Ecosystem impacts: Adverse impacts on the ecosystem, e.g., endangered species, wetlands loss, fragile ecosystems, erosion.

(2) Energy consumption: The total amount of energy consumed. Different sources of energy are associated with different environmental impacts (e.g., petroleum consumption creates global warming gases while hydroelectric power may have localized site impacts on ecosystems and/or species diversity).

(3) Water consumption: Refers to the water resources that are consumed or used.

(4) Non-renewable resource consumption: Those resources consumed that are not renewable in 200 years (e.g., fossil fuels, minerals).

(5) Renewable resource consumption: Those resources consumed that are renewable in 2 to 200 years (e.g., timber-based products).

(6) Rapidly renewable resource consumption: Those resources consumed that are renewable in less than 2 years (e.g., grain-based feed stocks).

##### B. Human Health and Ecological Stressors

(1) Bioaccumulative pollutants: Those chemicals that bioconcentrate in the environment as described in the Significant New Use Rule for new chemicals. (See 40 CFR 721.3)

(2) Ozone depleting chemicals: Ozone depleting chemicals have been defined in the Protection of Stratospheric Ozone Final Rule, (58 FR 65018, December 10, 1993).

(3) Global warming gases: Global warming gases are listed in Climate Change 1992, The Scientific Report on the IPCC Scientific Assessment, Table A 2.1.

(4) Chemical releases: This refers to ambient releases of chemicals of concern such as those reported on the Toxics Release Inventory (TRI) of the Emergency Planning and Community Right-to-Know Act. The current list is reported in 40 CFR 372.65.

(5) Ambient air pollutants: Refers to pollutants for which ambient air quality standards have been developed (see 40 CFR 50.4–50.12). These include nitrogen dioxide, sulfur dioxide, ozone precursors, particulate matter, carbon monoxide and lead.

(6) Indoor environmental releases: This refers to releases to an indoor environment of chemicals of concern such as those reported on the TRI in both occupational and consumer settings.

(7) Conventional pollutants: Conventional pollutants are defined in 40 CFR 401.16. These include biochemical oxygen demand, total suspended solids, fecal coliform, pH, and oil and grease.

(8) Hazardous waste: Quality of Resource Conservation and Recovery Act (RCRA) hazardous waste as defined in 40 CFR 261.3.

(9) Non-hazardous waste: Quantity of solid waste as defined in 40 CFR 261.3. Includes municipal solid waste, large volume (e.g., oil and gas, mining, etc.) waste and solid disposed of in surface impoundments.

(10) Other stressors: Any other stressors associated with the product or service but not captured elsewhere.

##### C. Positive Attributes

(1) Recycled content: Percentage of recovered material content (see Federal Trade Commission guidelines mentioned above for more details). Executive agencies are required to purchase EPA-designated items with recycled content (40 CFR part 247). Purchasers may want to consider whether the material contains pre-consumer or post-consumer recycled content. Post-consumer recycled content or material that would have otherwise been incinerated or landfilled is considered to be better for the environment than manufacturers' scrap material that would have, in any case, been incorporated into the product. Refer to FTC's "Guides for the Use of Environmental Marketing Claims."

(2) Recyclability: Refers to products or materials that can be recovered from or otherwise diverted from the solid waste stream for the purpose of recycling. It should be noted, however, that although technically most materials may be recyclable—i.e., processed and used—whether a product or a material is actually recycled depends to a large extent on the community availability of collection and use programs for the materials. Refer to FTC's "Guides for the Use of Environmental Marketing Claims."

(3) Product disassembly potential: Refers to the ease with which a product can be disassembled for maintenance, parts replacement, or recycling.

(4) Durability: Refers to the expected lifetime of the product.

(5) Reusability: Refers to how many times a product may be reused. Since reusable products, in general, may require more up

front costs than disposable products they are often subjected to a cost/benefit analysis in order to determine the payback period.

(6) Other attributes: Any other positive attributes that are associated with the product but are not listed here.

*D. Hazard Factors Associated With Materials Human Health Hazards*

(1) Acute toxicity: The potential to cause adverse health effects from short-term exposure to a chemical substance.

(2) Carcinogenicity: Carcinogenicity is defined EPA using a weight-of-evidence approach (51 FR 33992, September 24, 1986). When quantification is possible, slope factors can also be used to express carcinogenic potency.

(3) Development/reproductive toxicity: EPA defines developmental toxicity as adverse effects on the developing organism that result from exposure prior to conception (either parent), during prenatal development, or postnatally to the time of sexual maturation (56 FR 63798, December 5, 1991). Reproductive toxicity is any adverse effect on an organism's ability to reproduce.

(4) Immunotoxicity: Any adverse effect on an organism's immune system that results from exposure to a chemical substance.

(5) Irritancy: Irritancy can be reported according to the Occupational Safety and Health Administration (OSHA) Hazard Communication Standard (29 CFR part 1910.1200) or using the Draize scale.

(6) Neurotoxicity: Any adverse change in the development, structure, or function of the
