Documents Containing Reporting or Recordkeeping Requirements; Notice of Pending Submittal to the Office of Management and Budget (OMB) for Review

AGENCY: U.S. Nuclear Regulatory Commission (NRC).

ACTION: Notice of pending NRC action to submit an information collection request to OMB and solicitation of public comment.

SUMMARY: The NRC is preparing a submittal to OMB for review or continued approval of information collections under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35).

Information pertaining to the requirement to be submitted:

1. The title of the information collection: 10 CFR Part 52, "Early Site Permits; Standard Design Certifications; and Combined Licenses for Nuclear Power Plants."

2. Current OMB approval number: 3150-0151.

3. How often the collection is required: On occasion and every 10 to 20 years for applications for renewal.

4. Who is required or asked to report: Designers of commercial nuclear power plants, electric power utilities, and any person eligible under the Atomic Energy Act to apply for a construction permit for a nuclear power plant.

5. The number of annual respondents: Two applications for design certification will be under review during the next three years.

6. The number of hours needed annually to complete the requirement or request: Approximately 65,333 hours per year for both applications in addition to the burden associated with 10 CFR Parts 20, 50, 73 and 100 (approved by OMB under Clearance Nos. 3150-0014, 3150-0011, 3150-0002, and 3150-0093, respectively).

7. Abstract: 10 CFR Part 52 establishes requirements for the granting of early site permits, certifications of standard nuclear power plant designs, and licenses which combine in a single license a construction permit and an operating license with conditions (combined licenses). Part 52 also establishes requirements for renewal of these permits, certifications, and licenses; amendments to them; exemptions from certifications; and variances from early site permits.

NRC uses the information collected to assess the adequacy and suitability of an applicant's site, plant design, construction, training and experience, and plans and procedures for the protection of the public health and safety. The NRC review of such information and the findings derived from that information form the basis of NRC decisions and actions concerning the issuance, modification, or revocation of site permits, design certifications, and combined licenses for nuclear power plants.

Submit by December 26, 1995 comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?

2. Is the burden estimate accurate?

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the collection of information be minimized, including the use of automated collection techniques or other forms of information technology?

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-36400; File No. SR-Amex-95-14]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change Relating to Permanent Approval of Its Pilot Program That Permits Specialists to Grant Stops in a Minimum Fractional Change Market

October 20, 1995.

I. Introduction

On March 23, 1995, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to approve permanently amendments to Exchange Rule 109 that would permit specialists to stop stock in a minimum fractional change market.

The proposed rule change was published for comment in Securities

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.
