ENVIRONMENTAL PROTECTION AGENCY
40 CFR Part 63

[AD-FRL-5512-6]

National Emission Standards for Hazardous Air Pollutants for: Chromium Emissions From Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks; Ethylene Oxide Commercial Sterilization and Fumigation Operations; Perchloroethylene Dry Cleaning Facilities; and Secondary Lead Smelting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This action promulgates final action to amend certain sections of the following promulgated standards: "National Emission Standards for Chromium Emissions from Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks; Final Rule" (subpart N); "National Emission Standards for Hazardous Air Pollutants for Ethylene Oxide Commercial Sterilization and Fumigation Operations" (subpart O); "National Emission Standards for Hazardous Air Pollutants for Source Categories: Perchloroethylene Dry Cleaning Facilities" (subpart M); and "National Emission Standards for Hazardous Air Pollutants from Secondary Lead Smelting" (subpart X). Today's action amends the Final Rules' requirement that nonmajor sources (emitting or having the potential to emit less than 10 tons per year of any hazardous air pollutant or 25 tons per year of any combination of hazardous air pollutants) obtain title V operating permits. The action being taken today will substantially reduce the unnecessary and undue regulatory burden for States and local agencies, the EPA Regional Offices, and the industry during a time when all available resources are necessary for the initial

implementation of the title V permit program for major sources. Sources are still required to meet all applicable emission control requirements established by the respective maximum achievable control technology (MACT) standards. The only change from proposal to promulgation is that the 5-year deferral option, as with the other rules, is also being provided for nonmajor sources in the secondary lead smelters (subpart X) source category.

DATES: Effective Date: June 3, 1996.

Judicial Review: Under section 307(b)(1) of the Act, judicial review of national emission standards for hazardous air pollutants (NESHAP) is available only by filing a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this final rule. Under section 307(b)(2) of the Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by the EPA to enforce these requirements.

ADDRESSES: *Docket.* Docket No. A-88-02, containing the supporting information for the original subpart N NESHAP and this action, Docket No. A-88-03, containing the supporting information for the original subpart O NESHAP, Docket No. A-88-11, containing the supporting information for the original subpart M NESHAP, and Docket No. A-92-43, containing the supporting information for the original subpart X NESHAP, are available for public inspection and copying between 8:00 a.m. and 5:30 p.m., Monday through Friday, at the EPA Air and Radiation Docket and Information Center, Waterside Mall, room M-1500, first floor, 401 M Street S.W., Washington, D.C. 20460, or by calling (202) 260-7548. These dockets also contain information considered by the EPA in developing this final rule. A reasonable fee may be charged for copying.

SUPPLEMENTARY INFORMATION:

I. Background

The proposal notice was published in the Federal Register on December 13, 1995 (60 FR 64002). No public hearing was requested. Seventeen letters commenting on the proposed rule were

received during the public comment period.

II. Summary

A. Summary of Changes Since Proposal

The proposed rule offered title V permitting authorities the option to defer permitting of nonmajor sources in the following source categories: chromium electroplating and chromium anodizing tanks; ethylene oxide commercial sterilization and fumigation operations; and perchloroethylene dry cleaning facilities. The rule proposed permitting nonmajor secondary lead smelters on schedule. In response to public comments received and additional analyses performed by the EPA, one change has been made to the rule since proposal. The permitting authorities will be allowed the option to defer the nonmajor sources in the secondary lead smelters source category for 5 years from title V permit requirements similar to the option for nonmajor sources in the other source categories described in the proposal. Comments were also received on possible additional permanent exemptions for any of the source categories for which temporary exemptions were being considered. Although a majority of the comments supported permanent exemptions for these nonmajor sources, the EPA has decided not to grant permanent exemptions to any additional source categories at this time. However, the EPA will make a decision regarding additional permanent exemptions by the time the temporary exemptions expire. During the permit deferral period, the EPA will continue to evaluate the State/local agencies implementation and enforcement of the standards for nonmajor sources outside of a title V permit, the likely benefit of permitting such sources, and the costs and other burdens on such sources associated with obtaining a title V permit.

B. Significant Comments and Responses

Comments on the proposed rule were received from the industry and State and local regulatory agencies. Except for one State agency, all commenters concurred with the EPA option to allow states to defer title V permit requirements for nonmajor sources. The representative for the State of Florida disagreed with this recommendation by contending that permitting the subject nonmajor sources through the use of title V general permits would not constitute an undue regulatory burden for a permitting agency, nor would such a mechanism be considered exceptionally onerous for small
