[Docket No. 98N-0720]

### Conforming Regulations Regarding Removal of Section 507 of the Federal Food, Drug, and Cosmetic Act

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Direct final rule.

**SUMMARY:** The Food and Drug Administration (FDA) is amending its regulations to remove references to the repealed statutory provision of the Federal Food, Drug, and Cosmetic Act (the act) under which the agency certified antibiotic drugs. FDA is also removing references to the repealed antibiotic monograph regulations and to those regulations dealing with antibiotic applications. The agency is taking this action in accordance with provisions of the Food and Drug Administration Modernization Act of 1997 (FDAMA). Elsewhere in this issue of the **Federal Register**, FDA is publishing a companion proposed rule, under FDA's usual procedures for notice and comment, to provide a procedural framework to finalize the rule in the event the agency receives any significant adverse comment and withdraws the direct final rule.

**DATES:** This rule is effective May 20, 1999. Submit written comments on or before March 22, 1999. If no timely significant adverse comments are received, the agency will publish a document in the **Federal Register** before April 20, 1999, confirming the effective date of the direct final rule. The agency

intends to make the direct final rule effective 30 days after publication of the confirmation document in the **Federal Register**. If timely significant adverse comments are received, the agency will publish a document of significant adverse comment in the **Federal Register** withdrawing this direct final rule before April 20, 1999.

**ADDRESSES:** Submit written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

#### SUPPLEMENTARY INFORMATION:

##### I. Background

On November 21, 1997, the President signed FDAMA (Pub. L. 105-115). Section 125(b) of FDAMA repealed section 507 of the act (21 U.S.C. 357). Section 507 of the act was the statutory provision under which the agency certified antibiotic drugs. Section 125(b) of FDAMA also made conforming amendments to other sections of the act. With the repeal of section 507 of the act, antibiotic drugs previously regulated under section 507 will be subject to the provisions of section 505 of the act (21 U.S.C. 355).

FDA has determined that it will be most efficient to make changes in its regulations to reflect the repeal of section 507 of the act in phases. In the first phase, FDA published in the **Federal Register** of May 12, 1998 (63 FR 26066), a direct final rule removing parts 430 through 460 (21 CFR parts 430 through 460), which had provided the procedures and standards used to certify antibiotic drugs. This direct final rule is the second phase of rulemaking in which the agency is making various, noncontroversial conforming amendments to the balance of Title 21 of the Code of Federal Regulations. The rule removes citations to section 507 of the act. It removes references to the certification of antibiotics, to the antibiotic certification regulations, and to specific antibiotic monographs. It also removes references to antibiotic drug applications, abbreviated antibiotic drug

applications, and supplemental drug antibiotic applications.

The agency recognizes that as it implements the transition from regulating the premarket review and approval of antibiotic drugs under section 507 of the act to section 505 of the act, other issues may arise that could require additional rulemaking. These issues will be addressed in the third phase of implementation.

##### II. Direct Final Rulemaking

FDA has determined that the subject of this rulemaking is suitable for a direct final rule. The repeal of section 507 of the act eliminates the statutory provision on which the agency relied to certify antibiotic drugs. FDA will, therefore, remove all provisions of Title 21 of the Code of Federal Regulations that were issued primarily to carry out the agency's certification of antibiotic drugs under former section 507 of the act. All direct references to section 507 of the act will be removed, as well as all references to regulations that were issued to carry out programs under section 507 and all references to forms and applications that were unique to the regulation of antibiotics under section 507. The actions taken should be noncontroversial, and the agency does not anticipate receiving any significant adverse comments on this rule.

If FDA does not receive significant adverse comment on or before March 22, 1999, the agency will publish a document in the **Federal Register** before April 20, 1999, confirming the effective date of the direct final rule. The agency intends to make the direct final rule effective 30 days after publication of the confirmation document in the **Federal Register**. A significant adverse comment is one that explains why the rule would be inappropriate, including challenges to the rule's underlying premise or approach, or would be ineffective or unacceptable without a change. A comment recommending a rule change in addition to this rule will not be considered a significant adverse comment unless the comment states why this rule would be ineffective without the additional change. If timely significant adverse comments are received, the agency will publish a document of significant adverse comment in the **Federal Register** withdrawing this direct final rule before April 20, 1999.

Elsewhere in this issue of the **Federal Register**, FDA is publishing a companion proposed rule, which is identical to the direct final rule, that provides a procedural framework within which the rule may be finalized in the event the direct final rule is withdrawn

because of significant adverse comment. The comment period for the direct final rule runs concurrently with that of the companion proposed rule. Any comments received under the companion proposed rule will be treated as comments regarding the direct final rule. Likewise, significant adverse comments submitted to the direct final rule will be considered as comments to the companion proposed rule and the agency will consider such comments in developing a final rule. FDA will not provide additional opportunity for comment on the companion proposed rule.

If a significant adverse comment applies to an amendment, paragraph, or section of this rule and that provision may be severed from the remainder of the rule, FDA may adopt as final those provisions of the rule that are not the subject of a significant adverse comment. A full description of FDA's policy on direct final rule procedures may be found in a guidance document published in the **Federal Register** of November 21, 1997 (62 FR 62466).

### III. Environmental Impact

The agency has determined under 21 CFR 25.30(h) that this action is of a class of actions that do not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

### IV. Analysis of Impacts

FDA has examined the impacts of the direct final rule under Executive Order 12866, the Regulatory Flexibility Act (5 U.S.C. 601-612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). Executive Order 12866 classifies a rule as significant if it meets any one of a number of specified conditions, including having an annual effect on the economy of \$100 million or adversely affecting in a material way a sector of the economy, competition, or jobs, or if it raises novel legal or policy issues. As discussed in this section of this document, the agency believes that this final rule is consistent with the regulatory philosophy and principles identified in the Executive Order. In addition, the direct final rule is not a significant regulatory action as defined

by the Executive Order and so is not subject to review under the Executive Order.

The Regulatory Flexibility Act requires that if a rule has a significant impact on a substantial number of small entities, the agency must analyze regulatory options to minimize the economic impact on small entities. The agency certifies, for the reasons discussed below, that the direct final rule will not have a significant impact on a substantial number of small entities. Therefore, under the Regulatory Flexibility Act, no further analysis is required.

The Unfunded Mandates Reform Act requires an agency to prepare a budgetary impact statement before issuing any rule likely to result in a Federal mandate that may result in expenditures by State, local, and tribal governments or the private sector of \$100 million (adjusted annually for inflation) in any 1 year. These conforming amendments will not result in any increased expenditures by State, local, and tribal governments or the private sector. Because this rule will not result in an expenditure of \$100 million or more on any governmental entity or the private sector, no budgetary impact statement is required.

This rule is intended to make conforming changes to FDA's regulations necessitated by repeal of the section 507 of the act that had provided for the certification of antibiotic drugs. Accordingly, the agency believes that the rule is necessary and that it is consistent with the principles of Executive Order 12866; that it is not a significant regulatory action under that Executive Order; that it will not have a significant impact on a substantial number of small entities; and that it is not likely to result in an annual expenditure in excess of \$100 million.

### V. Paperwork Reduction Act of 1995

This direct final rule does not require information collections and, thus, is not subject to review by the Office of Management and Budget under the Paperwork Reduction Act of 1995 (Pub. L. 104-13).

### VI. Request for Comments

Interested persons may, on or before March 22, 1999, submit to the Dockets Management Branch (address above) written comments regarding this rule. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be

seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

## 21 CFR Part 184

[Docket No. 78N–0281]

### Direct Food Substances Affirmed as Generally Recognized as Safe; Magnesium Hydroxide; Technical Amendment

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Final rule; technical amendment.

**SUMMARY:** The Food and Drug Administration (FDA) is amending its regulations on food for human consumption to correct an error in the Chemical Abstracts Service (CAS) registry number for magnesium hydroxide. This document corrects that error.

**DATES:** This regulation is effective January 5, 1999.

**FOR FURTHER INFORMATION CONTACT:** Martha D. Peiperl, Center for Food Safety and Applied Nutrition (HFS–215), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3077.

**SUPPLEMENTARY INFORMATION:** In the *Federal Register* of April 5, 1985 (50 FR 13557), the agency amended its regulations by adding § 184.1428 (21 CFR 184.1428) to affirm that magnesium hydroxide is generally recognized as safe (GRAS) as a direct human food ingredient. The CAS registry number for magnesium hydroxide was incorrectly published as “(Mg(OH)<sub>2</sub>, CAS Reg. No. 1409–42–8)” instead of “(Mg(OH)<sub>2</sub>, CAS Reg. No. 1309–42–8)”. Accordingly, the agency is amending § 184.1428 to correct the error.

Publication of this document constitutes final action on this change. Notice and public procedure are unnecessary because FDA is merely correcting a nonsubstantive error in its regulations.
