

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531 *et seq.*) governs the issuance of Federal regulations that require unfunded government mandates. An unfunded mandate is a regulation that requires a State, local, or tribal government or the private sector to incur direct costs without the Federal Government's having first provided the funds to pay those unfunded mandate costs. This rule will not impose an unfunded mandate.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under E.O. 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of E.O. 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under E.O. 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not concern an environmental risk to health or risk to safety that may disproportionately affect children.

Environment

The Coast Guard considered the environmental impact of this interim rule and concluded that under figure 2-1, paragraph (34)(g) of COMDTINST M18475.1C, this interim rule is categorically excluded from further environmental documentation because it establishes a regulated navigation area. A "Categorical Exclusion Determination" is available in the docket for inspection or copying where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 162

Navigation (water), Waterways.

Regulation

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR Part 162 as follows:

PART 162—[AMENDED]

1. The authority citation for Part 162 continues to read as follows:

Authority: 33 U.S.C. 1231; 49 CFR 1.46.

2. Revise § 162.240 (b) to read as follows:

§ 162.240 Tongass Narrows, Alaska; navigation.

* * * * *

(b) No vessel, except for public law enforcement and emergency response vessels, floatplanes during landings and take-offs, and vessels of 23 feet registered length or less, shall exceed a speed of 7 knots in the region of Tongass Narrows bounded to the north by Tongass Narrows Buoy 9 and to the south by Tongass Narrows East Channel Regulatory marker at position 55° 19' 22.0" N, 131° 36' 40.5" W and Tongass Narrows West Channel Regulatory marker at position 55° 19' 28.5" N, 131° 39' 09.7" W, respectively.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[GA-48-200010(a); FRL-6573-5]

Approval and Promulgation of Implementation Plans; Georgia: Approval of Revisions to the Georgia State Implementation Plan: Transportation Conformity Interagency Memorandum of Agreement

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving a revision to the Georgia State Implementation Plan (SIP) that contains the transportation conformity rule pursuant to sections 110(k) and 176 of the Clean Act as amended in 1990 (Act). The transportation conformity rule assures that projected emissions from transportation plans and projects in air quality nonattainment or maintenance areas stay within the motor vehicle emissions ceiling contained in the SIP. The transportation conformity SIP revision enables the State to implement and enforce the Federal transportation conformity requirements at the State level per EPA regulation—Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. of the Federal Transit Laws. This EPA approval action streamlines the conformity process and allows direct consultation among agencies at the local

level. This final approval action is limited to Transportation Conformity. Rationale for approving this SIP revision is provided in the "Supplementary Information" Section of this action.

DATES: This direct final rule is effective on June 6, 2000, without further notice, unless EPA receives adverse comment by May 8, 2000. If adverse comment is received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** informing the public that this rule will not take effect.

ADDRESSES: All comments should be addressed to Kelly Sheckler at the EPA, Region 4 Air Planning Branch, 61 Forsyth Street, SW, Atlanta, Georgia 30303.

Copies of the state submittal are available at the following addresses for inspection during normal business hours:

Air and Radiation Docket and Information Center (Air Docket 6102), U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460.
Environmental Protection Agency, Atlanta Federal Center, Region 4 Air Planning Branch, 61 Forsyth Street S.W., Atlanta, Georgia 30303-3104.
Attn: Kelly Sheckler, (404) 562-9042.

- IV. Administrative Requirements

I. Background

A. What is a SIP?

The states, under section 110 of the Act, must develop air pollution regulations and control strategies to ensure that state air quality meets the National Ambient Air Quality Standards (NAAQS) established by EPA. The Act, under section 109, established these NAAQS which currently address six criteria pollutants. These pollutants are: carbon monoxide, nitrogen dioxide, ozone, lead, particulate matter, and sulfur dioxide.

Each state must send these regulations and control strategies to EPA for approval and incorporation into the Federally enforceable SIP, which protects air quality and contains emission control plans for NAAQS nonattainment areas. These SIPs can be extensive, containing state regulations or other enforceable documents and supporting information such as emission inventories, monitoring networks, and modeling demonstrations.

B. What is the Federal Approval Process for a SIP?

The states must formally adopt the regulations and control strategies consistent with state and Federal laws for incorporating the state regulations into the Federally enforceable SIP. This process generally includes a public notice, public comment period, public hearing, and a formal adoption by a state-authorized rulemaking body.

Once a state rule, regulation, or control strategy is adopted, the state will send these provisions to EPA for inclusion in the Federally enforceable SIP. EPA must then determine the appropriate Federal action, provide public notice, and request additional public comment on the action. The possible Federal actions include: approval, disapproval, conditional approval and limited approval/disapproval. If adverse comments are received, EPA must consider and address the comments before taking final action.

EPA incorporates state regulations and supporting information (sent under section 110 of the Act) into the Federally approved SIP through the approval action. EPA maintains records of all such SIP actions in the CFR at Title 40, part 52, entitled "Approval and Promulgation of Implementation Plans." The EPA does not reproduce the text of the Federally approved state regulations in the CFR. They are "incorporated by reference," which means that the specific state regulation is cited in the CFR and is considered a part of the CFR

the same as if the text were fully printed in the CFR.

C. What is Transportation Conformity?

Conformity first appeared as a requirement in the Act's 1977 amendments (Public Law 95-95). Although the Act did not define conformity, it stated that no Federal department could engage in, support in any way or provide financial assistance for, license or permit, or approve any activity which did not conform to a SIP which has been approved or promulgated.

The 1990 Amendments to the Act expanded the scope and content of the conformity concept by defining conformity to a SIP. Section 176(c) of the Act defines conformity as conformity to the SIP's purpose of eliminating or reducing the severity and number of violations of the NAAQS and achieving expeditious attainment of such standards. Also, the Act states that no Federal activity will: (1) Cause or contribute to any new violation of any standard in any area, (2) increase the frequency or severity of any existing violation of any standard in any area, or (3) delay timely attainment of any standard or any required interim emission reductions or other milestones in any area. The requirements of section 176(c) of the Clean Air Act apply to all departments, agencies and instrumentalities of the Federal government. Transportation conformity refers only to the conformity of transportation plans, programs and projects that are funded or approved under title 23 U.S.C. of the Federal Transit Act.

D. Why Must the State Submit a Transportation Conformity SIP?

A transportation conformity SIP is a plan which contains criteria and procedures for the Department of Transportation (DOT), Metropolitan Planning Organizations (MPOs), and other state or local agencies to assess the conformity of transportation plans, programs and projects to ensure that they do not cause or contribute to new violations of a NAAQS in the area substantially affected by the project, increase the frequency or severity of existing violations of a standard in such area or delay timely attainment. 40 CFR 51.390, subpart T requires states to submit a SIP that establishes criteria for conformity to EPA. 40 CFR part 93, subpart A, provides the criteria the SIP must meet to satisfy 40 CFR 51.390.

EPA was required to issue criteria and procedures for determining conformity of transportation plans, programs, and projects to a SIP by section 176(c) of the

Act. The Act also required the procedure to include a requirement that each state submit a revision to its SIP including conformity criteria and procedures. EPA published the first transportation conformity rule in the November 24, 1993, **Federal Register** (FR), and it was codified at 40 CFR part 51, subpart T and 40 CFR part 93, subpart A. EPA required the states to adopt and submit a transportation conformity SIP revision to the appropriate EPA Regional Office by November 25, 1994. The State of Georgia submitted a transportation conformity SIP to the EPA Region 4 on November 15, 1994. EPA did not take action on this SIP because the Agency was in the process of revising the transportation conformity requirements. EPA revised the transportation conformity rule on August 7, 1995 (60 FR 40098), November 14, 1995 (60 FR 57179), and August 15, 1997 (62 FR 43780), and codified the revisions under 40 CFR part 51, subpart T and 40 CFR part 93, subpart A—Conformity to State or Federal Implementation Plans of Transportation Plans, Programs, and Projects Developed, Funded or Approved Under Title 23 U.S.C. of the Federal Transit Laws (62 FR 43780). EPA's action of August 15, 1997, required the states to change their rules and submit a SIP revision to EPA by August 15, 1998. States may choose to develop in place of regulations, a memorandum of agreement (MOA) which establishes the roles and procedures for transportation conformity. The MOA includes the detailed consultation procedures developed for that particular area. The MOA's are enforceable through the signature of all the transportation and air quality agencies, including the Federal Highway Administration, Federal Transit Administration and the Environmental Protection Agency.

E. How Does Transportation Conformity Work?

The Federal or state transportation conformity rule applies to all NAAQS nonattainment and maintenance areas in the state. The Metropolitan Planning Organizations (MPO), the State Department of Transportation (DOT) (in absence of a MPO), and U.S. Department of Transportation (USDOT) make conformity determinations. These agencies make conformity determinations on programs and plans such as transportation improvement programs (TIP), transportation plans, and projects. The MPOs calculate the projected emissions that will result from implementation of the transportation plans and programs and compare those

calculated emissions to the motor vehicle emissions ceiling established in the SIP. The calculated emissions must be smaller than the Federally approved motor vehicle emissions ceiling in order for USDOT to make a positive conformity determination with respect to the SIP.

II. Approval of the State Transportation Conformity Rule

A. What Did the State Submit?

The State of Georgia chose to address the transportation conformity SIP requirement through the development of an MOA. On February 16, 1999, the State of Georgia, through the Department of Natural Resources (DNR), submitted the State's transportation conformity and consultation interagency MOA to EPA as a revision to the SIP. The Georgia Air Quality Act, Article 1: Air Quality (O.C.G.A. 12-9-1, *et seq.*), approved by the Georgia General Assembly in 1992, contains the necessary authority for the revision to the SIP. DNR held a public hearing on August 13, 1998 and no comments from the general public were received. The MOA was developed with appropriate interagency consultation.

B. What is EPA Approving Today and Why?

EPA is approving the Georgia transportation conformity MOA that the Director of the Georgia DNR submitted to the Region 4 office of the EPA on February 16, 1999, except for the following sections: section 110 (c)(1)(ii); section 110 (c)(2)(ii); section 110 (d)(2)(i); section 110 (d)(3)(i); section 110 (e)(2)(i); section 110 (e)(3)(i); section 119 (e)(1); section 119b(a)(2); section 133; section 103(4)(d); section 106 (c) and, section 130 (1). The rationale for exclusion of these sections is discussed in section II.E of this action. The Georgia DNR Transportation Conformity MOA is the same as the Federal rule, with the exception of the specific interagency consultation procedures and the definition of "regionally significant".

EPA has evaluated this SIP revision and has determined that the State has met the requirements of Federal transportation conformity rule as described in 40 CFR part 51, subpart T and 40 CFR part 93, subpart A. The Georgia DNR has satisfied the public participation and comprehensive interagency consultation requirement during development and adoption of the MOA at the local level. Therefore, EPA is approving the MOA as a revision to the Georgia SIP.

C. How did the State Satisfy the Interagency Consultation Process (40 CFR 93.105)?

EPA's rule requires the states to develop their own processes and procedures for interagency consultation among the Federal, state, and local agencies and resolution of conflicts meeting the criteria in 40 CFR 93.105. The SIP revision must include processes and procedures to be followed by the MPO, state DOT, and USDOT in consulting with the state and local air quality agencies and EPA before making conformity determinations. The transportation conformity SIP revision must also include processes and procedures for the state and local air quality agencies and EPA to coordinate the development of applicable SIPs with MPOs, state DOTs, and USDOT.

The State of Georgia developed its consultation rule based on the elements contained in 40 CFR 93.105, and included it in the MOA, Exhibit 1, section 106. As a first step, the State worked with the existing transportation planning organization's interagency committee that included representatives from the State air quality agency, State Department of Transportation, the Atlanta Regional Commission (the MPO), Federal Highway Administration—Georgia Division, Federal Transit Administration, Metropolitan Area Rapid Transit Authority, Cobb County Transit Authority, Douglas County Transit Authority, Gwinnett County Transit Authority and EPA. The interagency committee met regularly and drafted the consultation rules considering elements in 40 CFR 93.105 and 23 CFR part 450, and integrated the local procedures and processes into the consultation MOA. The consultation process developed in this MOA is unique to the State of Georgia. The MOA is enforceable against the parties by their consent in the MOA to allow the Attorney General for the State of Georgia to sue any or all of the agencies for specific performance or other relief on behalf of the citizens of Georgia in *paren. patrial*. We have determined that the State adequately included all elements of 40 CFR 93.105 and that the MOA meets the EPA SIP requirements.

D. How the State's Submittal Addresses the United States Court of Appeals for the District of Columbia Circuit Ruling Overturning the Grace Period for New Nonattainment Areas (40 CFR 93.102(d)) in *Sierra Club v. Environmental Protection Agency Lawsuit*

The Sierra Club challenged this section of the second set of amendments to the transportation conformity rule arguing that allowing a 120 day grace period was unlawful under the Act. On November 4, 1997, the United States Court of Appeals for the District of Columbia Circuit held in *Sierra Club v. Environmental Protection Agency*, No. 96-1007, determined that EPA's grace period violates the plain terms of the Act and, therefore, is unlawful. Based on this court action, the State has excluded this section from its rule. EPA agrees with the State's action as it is consistent with the United States Court of Appeals for the District of Columbia Circuit ruling. Further, the exclusion of 40 CFR 93.102(d) will not prevent EPA from approving the State transportation conformity SIP.

E. What Other Parts of the Rule Are Excluded?

EPA promulgated the third set amendments to the transportation conformity rule on August 15, 1997. On March 2, 1999, the United States Court of Appeals for the District of Columbia Circuit issued its opinion in *Environmental Defense Fund v. Environmental Protection Agency*, No. 97-1637. The Court granted the environmental group's petition for review and ruled that sections 40 CFR 93.102(c)(1), 93.121(a)(1), and 93.124(b) are unlawful and remanded 40 CFR 93.118(e) and 93.120(a)(2) to EPA for revision to harmonize these provisions with the requirements of the Act for an affirmative determination that Federal actions will not cause or increase violations or delay attainment. The sections of the rule that were impacted by this decision were:

(a) 40 CFR 93.102(c)(1) which allowed certain projects for which the National Environmental Policy Act (NEPA) process has been completed by the DOT to proceed toward implementation without further conformity determinations during a conformity "lapse". A lapse is a situation in which the conformity determination for the transportation plan or TIP has expired, and there is no currently conforming transportation plan and TIP. As such, there are restrictions on proceeding with federally funded and regionally significant projects;

(b) 40 CFR 93.118(e) which allowed use of motor vehicle emissions budgets (budgets) in the submitted SIPs after 45 days if EPA had not declared them inadequate;

(c) 40 CFR 93.120(a)(2) which allowed use of the budgets in a disapproved SIP for 120 days after disapproval;

(d) 40 CFR 93.121(a)(1) which allowed the nonfederally funded, regionally significant projects to proceed if included in the first three years of the most recent conforming transportation plan and transportation improvement program, even if conformity status is currently lapsed; and

(e) 40 CFR 93.124(b) which allowed areas to use a submitted SIP that allocated portions of a safety margin to transportation activities for conformity purposes before EPA approval.

States were required to submit transportation conformity SIPs to satisfy the requirements for the third set of amendments to the transportation conformity rule by August 15, 1998. Many of these SIP submittals, developed prior to the March 2, 1999 Court ruling, included provisions from the transportation conformity rule verbatim. As such, the State of Georgia's SIP revision included sections which the Court ruled unlawful or remanded for consistency with the Act. Therefore, in accordance with the Court's ruling, EPA can not approve the following sections of the Georgia MOA which relate to the above reference sections of the Federal conformity rule: Section 110 (c)(1)(ii); section 110 (c)(2)(ii); section 110 (d)(2)(i); section 110 (d)(3)(i); section 110 (e)(2)(i); section 110 (e)(3)(i); section 119 (e)(1); section 119b(a)(2); section 133; section 103 (4)(d); section 106 (c) and section 130 (1).

The State of Georgia submitted additional information which has complied with the EPA requirements for a transportation conformity SIP and has adopted the Federal rules in an MOA which were in effect at the time that the transportation conformity SIP was due to the EPA. If the Court had issued its ruling before adoption and SIP submittal by the Georgia DNR, EPA believes the Georgia DNR would have removed these sections from its MOA. The Georgia DNR has expended its resources and time to prepare this SIP and meet the statutory deadline, and EPA acknowledges the agency's good faith effort in submitting the transportation conformity SIP in a timely manner.

The Georgia DNR will be required to submit a SIP revision in the future when EPA revises its rule to comply with the Court decision. Because the Court

decision has invalidated the aforementioned affected provisions, EPA believes that it is reasonable to exclude the corresponding sections of the State rules from this SIP approval action. As a result, EPA is not taking any SIP action on the following Sections of the Georgia MOA : 110 (c)(1)(ii); 110 (c)(2)(ii); 110 (d)(2)(i); 110 (d)(3)(i); 110 (e)(2)(i); 110 (e)(3)(i); 119 (e)(1); 119b(a)(2); 133; 103 (4)(d); 106 (c) and, 130 (1) which relate to the Federal rule sections 93.102(c), 93.104(d), 93.109(c)-(f), 93.118(e), 93.120(a)(2), 93.121(a)(1), and 93.124(b). The conformity determinations affected by these sections should comply with the relevant requirements of the statutory provisions of the Act underlying the Court's decision on these issues. EPA will be issuing guidance on how to implement these provisions in the interim prior to EPA's amendment of the Federal transportation conformity rule. Once this Federal rule has been revised, conformity determinations in Georgia should comply with the requirements of the revised Federal rule until corresponding provisions of the Georgia conformity SIP have been approved by EPA.

III. Opportunity for Public Comments

The EPA is publishing this rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comment. However, in the "Proposed Rules" section of today's **Federal Register** publication, EPA is publishing a separate document that will serve as the proposal to approve this SIP revision if adverse comments are filed. This rule will be effective on June 6, 2000, without further notice unless EPA receive adverse comment by May 8, 2000. If EPA receives adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. EPA will address all public comments in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.

IV. Administrative Requirements

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and therefore is not subject to review by the Office of Management and Budget. This action merely approves state law as meeting federal requirements and imposes no additional requirements beyond those imposed by state law. Accordingly, the Administrator certifies that this rule will not have a significant

economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this rule approves pre-existing requirements under state law and does not impose any additional enforceable duty beyond that required by state law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Public Law 104-4). For the same reason, this rule also does not significantly or uniquely affect the communities of tribal governments, as specified by Executive Order 13084 (63 FR 27655, May 10, 1998). This rule will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely approves a state rule implementing a federal standard, and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. This rule also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997), because it is not economically significant.

In reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. In this context, in the absence of a prior existing requirement for the State to use voluntary consensus standards (VCS), EPA has no authority to disapprove a SIP submission for failure to use VCS. It would thus be inconsistent with applicable law for EPA, when it reviews a SIP submission, to use VCS in place of a SIP submission that otherwise satisfies the provisions of the Clean Air Act. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in issuing this rule, EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of the rule in accordance with the "Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings" issued under the executive order. This rule does not impose an information collection burden under the provisions of the

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of

this action must be filed in the United States Court of Appeals for the appropriate circuit by June 6, 2000. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Hydrocarbons, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides.

Dated: March 23, 2000.

A. Stanley Meiburg,
Acting Regional Administrator, Region 4.

Part 52 of chapter I, title 40, *Code of Federal Regulations* is amended as follows:

PART 52—[AMENDED]

1. The authority for citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart L—Georgia

2. Section 52.570 paragraph (e) is amended by adding a new entry at the end of the table to read as follows:

§ 52.570 Identification of plan.

40 CFR Part 62

[PA152-4099a; FRL-6571-5]

Approval and Promulgation of State Air Quality Plans for Designated Facilities and Pollutants; Allegheny County, Pennsylvania; Control of Emissions From Existing Hospital/Medical/Infectious Waste Incinerators

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: EPA is approving the Allegheny County, Pennsylvania hospital/medical/infectious waste incinerator (HMIWI) 111(d)/129 plan (the "plan") submitted on June 24, 1999 by the Pennsylvania Department of Environmental Protection (PADEP) on behalf of the Allegheny County Health Department (ACHD). The plan establishes emission limitations and other requirements for existing HMIWIs, and provides for the implementation and enforcement of those limitations and requirements.

DATES: This final rule is effective June 6, 2000 unless within May 8, 2000

adverse or critical comments are received. If adverse comment is received, EPA will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Comments may be mailed to Makeba A. Morris, Chief, Technical Assessment Branch, Mailcode 3AP22, Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the documents relevant to this action are available for public inspection during normal business hours at the following locations: Air Protection Division, Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103-2029; and the Allegheny County Health Department, Air Quality Program, 301 39th Street, Pittsburgh, Pennsylvania 15201-1891.

FOR FURTHER INFORMATION CONTACT: James B. Topsale at (215) 814-2190, or by e-mail at topsale.jim@epamail.gov.

SUPPLEMENTARY INFORMATION: This document is divided into Sections I through V and answers the questions posed below.

I. General Provisions

What is EPA approving?
What is a State/local 111(d)/129 plan?
What pollutant(s) will this action control?

What are the expected environmental and public health benefits from controlling HMIWI emissions?

II. Federal Requirements the Allegheny County HMIWI 111(d)/129 Plan Must Meet for Approval

What general EPA requirements must the Allegheny County Health Department (ACHD) meet in order to receive approval of its County HMIWI 111(d)/129 plan?
What does the Allegheny County plan contain?
Does the Allegheny County plan meet all EPA requirements for approval?

III. Requirements for Affected HMIWI Owners/Operators

How do I determine if my HMIWI is subject to the Allegheny County 111(d)/129 plan?
What general requirements must I meet under the approved EPA 111(d)/129 plan?
What emissions limits must I meet, and in what time frame?
Are there any operational requirements for my HMIWI and air pollution control system?
What are the testing, monitoring, recordkeeping, and reporting requirements for my HMIWI?
Is there a requirement for obtaining a Title V permit?

IV. Final EPA Action

V. Administrative Requirements

I. General Provisions

Q. What is EPA approving?
A. EPA is approving the Allegheny County 111(d)/129 plan (the "plan") for the control of air pollutant emissions
