SUMMARY: EPA is taking direct final action to revise the national ambient air quality standards for particulate matter. This requirement describes the number of collocated sites required within a reporting organization.

In the "Rules and Regulations" section of today's **Federal Register**, we are approving revisions to "Quality Assurance Requirements for State and Local Air Monitoring Stations" (SLAMS) as a direct final rule without prior proposal because we view this as a noncontroversial revision and anticipate no adverse comment. We have explained our reasons for this

approval in the preamble to the direct final rule. If we receive adverse comment, we will withdraw the direct final rule and it will not take effect. We will address all public comments in a subsequent final rule based on this proposed rule. We will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.
