

evolved in presence of periodic fires and low structural diversity diminish in abundance and eventually are extirpated.

The Applicants biological surveys determined that about 5.5 acres of the 75-acre parcel is occupied by sand skinks and the Fish and Wildlife Service believes that bluetail mole skinks also occupy the same 5.5 acres. The Applicants' proposed construction activities would result in harm to skinks due to destruction of foraging, sheltering, and nesting habitat. The Applicants' proposed commercial construction would result in the loss of 5.5 acres of occupied skink habitat that is isolated due to surrounding urban development. Avoidance or minimized impact of the occupied skink habitat was determined to be too costly to the Applicant. In addition, conserving skink habitat on site would only maintain habitat that would be increasingly isolated from other skink habitat. The Applicants' mitigation proposes to acquire, perpetually protect, and manage 10 acres of skink habitat at an off-site location and donate \$20,000 for use in skink habitat acquisition. Take of skinks is anticipated due to commercial development of the Applicants' property, while the off-site mitigation proposed by the Applicants will result in conservation benefits to skinks and several other species endemic to xeric scrub.

The Service has made a preliminary determination that issuance of the requested ITP is not a major Federal action significantly affecting the quality of the human environment within the meaning of Section 102(2)(C) of National Environmental Policy Act. This preliminary information may be revised due to public comment received in response to this notice and is based on information contained in the EA and HCP. This notice is provided pursuant to Section 10 of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and NEPA regulations (40 CFR 1506.6).

The Service will evaluate the HCP and comments submitted thereon to determine whether the application meets the issuance criteria requirements of section 10(a)(1)(B) of the Act. By conducting an intra-Service section 7 consultation the Service will also evaluate whether issuance of the section 10(a)(1)(B) ITP would comply with section 7 of the Act. The results of this consultation, in combination with the above findings, will be used in the final analysis to determine whether or not to issue the ITP.
