Title: Compliance Requirement for Child-Resistant Packaging.

ICR numbers: EPA ICR No. 0616.09, OMB Control No. 2070-0052.

ICR Status: This ICR is scheduled to expire on August 31, 2007. Under OMB regulations, the Agency may continue to conduct or sponsor the collection of information while this submission is pending at OMB. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9, are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR is designed to provide the EPA with assurances that the packaging of pesticide products sold and distributed to the general public in the United States meets standards set forth by the Agency pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Unless a pesticide product qualifies for an exemption, if the product meets certain

criteria regarding toxicity and use, it must be sold and distributed in child-resistant packaging. Section 25(c)(3) of FIFRA authorizes EPA to establish standards for packaging of pesticide products and pesticidal devices to protect children and adults from serious illness or injury resulting from accidental ingestion or contact. The law requires that these standards are designed to be consistent with those under the Poison Prevention Packaging Act, administered by the Consumer Product Safety Commission (CPSC). Pesticide registrants must certify to the Agency that the packaging or device meets these standards. EPA reviews a registrant's child-resistant packaging (CRP) certification to determine if there are human safety/health risk concerns. Exemption requests are reviewed to ascertain if there is a health risk, and if CRP is technically feasible, practicable, and appropriate.

Responses to this collection of information are mandatory under authority of 40 CFR 157.34. Although submission of confidential information is not required as a part of this information collection, there has been at least one instance where confidential data have been submitted voluntarily as supporting material for an exemption request from CRP compliance requirements. When any trade secret or Confidential Business Information (CBI) is provided to EPA, such information is protected from disclosure under section 10 of FIFRA. Data submitted to EPA is handled strictly in accordance with the provisions of the FIFRA Confidential Business Information Manual.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average 4.9 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Respondents/Affected Entities: All registrants of pesticide products meeting

the use criteria which trigger Child-Resistant Packaging (CRP) requirements.

Estimated Number of Respondents: 2,109.

Frequency of Response: On occasion.

Estimated Total Annual Hour Burden: 3,473.

Estimated Total Annual Cost: \$193,567.

Changes in the Estimates: There is an increase of 1,364 hours in the total estimated burden currently identified in the OMB Inventory of Approved ICR Burdens. This increase is an adjustment to the burden estimate. Neither the number of responses nor the average burden estimate for each response type has changed. However, the distribution of those responses among the four response types has changed, with a net shift from less-burdensome to more-burdensome type responses.

Dated: August 14, 2007

Sara Hisel-McCoy,

Acting Director, Collection Strategies Division.
