SUPPLEMENTARY INFORMATION:

EXECUTIVE ORDER 12866: The Office of Management and Budget has exempted this action from the review

requirements of Executive Order 12866 pursuant to Section 6 of that order.

Regulatory Flexibility Act: Under the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.*, a Federal agency must prepare an initial regulatory flexibility analysis "for any proposed rule" for which the agency "is required by section 553 of the Administrative Procedure Act (APA), or any other law, to publish general notice of proposed rulemaking." The RFA exempts from this requirement any rule that the issuing agency certifies "will not, if promulgated, have a significant economic impact on a substantial number of small entities." EPA has concluded that NPDES general permits are permits, not rulemakings, under the APA and thus not subject to APA rulemaking requirements or the RFA. Notwithstanding that general permits are not subject to the RFA, EPA has determined that this general permit, as issued, will not have a significant economic impact on a substantial number of small entities.

Dated: January 11, 2010.

Christine Psyk,

Associate Director, Office of Water & Watersheds, Region 10.

Needs and Uses: The Commission will submit this new information collection (IC) to the OMB under their emergency processing provisions in 5 CFR 1320.13. The Commission is requesting OMB approval by February 12, 2010 so that the information can go into effect as soon as possible.

The Commission is requesting OMB approval for notice, disclosure and labeling requirements to allow the Commission to implement important disclosure requirements in order to clear the 700 MHz band of wireless microphones and provide them a home in the core TV spectrum, where many wireless microphones are already operating.

First, it is essential for the early clearing mechanism to be available as soon as possible so that public safety and commercial licensees in the 700 MHz band can avoid harmful interference from wireless microphone users still operating in that band. The potential for public harm is particularly apparent in the case of public safety licensees such as police and fire departments. Some public safety licensees are already operating in the 700 MHz band, and more are expected to commence operation soon. Interference from wireless microphones could affect the ability of these officials to communicate during an emergency and therefore could create a serious threat to public health and safety.

Second, the point-of-sale disclosure requirement is also essential for a successful transition of wireless microphones out of the 700 MHz band. The Commission anticipates that many wireless microphone users currently operating in the 700 MHz band will have to purchase or lease new equipment capable of operating in the core TV spectrum. The point-of-sale disclosure requirement will help these consumers make an educated decision as they obtain new microphones, and it will help them operate in the core TV spectrum without causing interference to other services in that spectrum.

Third, a label on 700 MHz band wireless microphones bound for export will help to ensure that these wireless microphones do not continue to be made available for use in the United States, in contravention of our efforts to remove them from the band.

The effective date proposed by the Commission provides for these early

clearing and consumer disclosure measures to commence as early as possible. Due to the limited period of time for which two of the requirements (the early clearing mechanism and the point-of-sale disclosure requirements) will be in effect, and the urgent need to ensure that wireless microphone users transition out of the 700 MHz band, we find there is good cause to obtain emergency OMB approval for these requirements, so that the requirements may take effect as soon as practicable thereafter.

Marlene F. Dortch,

Secretary, Federal Communications Commission.
