SUPPLEMENTARY INFORMATION:

History

On March 22, 2010, the FAA published in the **Federal Register** a notice of proposed rulemaking to amend Class E airspace for the Corpus Christi, TX area, reconfiguring controlled airspace at Aransas County Airport (75 FR 13453) Docket No. FAA-2010-0089. Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received. Class E airspace designations are published in paragraph 6005 of FAA Order 7400.9T signed August 27, 2009, and effective September 15, 2009, which is incorporated by reference in 14 CFR Part 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

The Rule

This action amends Title 14 Code of Federal Regulations (14 CFR) Part 71 by amending Class E airspace for the Corpus Christi, TX area. The addition of new SIAPs at Aransas County Airport, Rockford, TX has made this action necessary for the safety and management of IFR operations at the airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends controlled airspace at Aransas County Airport, Rockport, TX.

Adoption of the Amendment

■ In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E. O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR Part 71.1 of the Federal Aviation Administration Order 7400.9T, Airspace Designations and Reporting Points, signed August 27, 2009, and effective September 15, 2009 is amended as follows:

* * * * *

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface.

Export Administration Regulations: Technical Corrections

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final Rule.

SUMMARY: This rule clarifies language concerning the *de minimis* provisions of the Export Administration Regulations and certain performance criteria of turning machines. It also removes obsolete cross references, removes and reserves two regulatory provisions, corrects a typographical error, and removes an unnecessary reporting requirement.

DATES: This rule is effective June 4, 2010.

SUPPLEMENTARY INFORMATION:

Background

*Removal of Potentially Confusing
Language Regarding De Minimis
Content of Foreign Made Items*

The Export Administration Regulations (EAR) generally do not apply to items that were made and are located outside the United States, and that contain only the “*de minimis*” level of U.S. origin content as defined in § 734.4. The procedures and standards for calculating whether an item exceeds the *de minimis* threshold are contained in Supplement No. 2 to Part 734 of the EAR. Section 732.2(d), which directs readers to that supplement, notes that “[t]his step [*de minimis* calculation] is appropriate only for items that are made outside the United States and are not currently in the United States.” Pursuant to § 734.3(a)(1), all items, regardless of level of foreign content, are subject to the EAR if they are physically located in the United States. This rule removes § 734.3(b)(4), which delineates a category of items not subject to the EAR (“foreign made items that have less than the *de minimis* percentage of controlled U.S. content based on the principles described in § 734.3 of this part”), because the provision could be erroneously read as applying the *de minimis* exclusion to foreign made items that are located in the United States. BIS attempted to remove § 734.3(b)(4) in a previous rule. (See 73 FR 75942, December 15, 2008). However, the drafting instruction in that rule erroneously read, “In § 734.4, remove paragraph (b)(4).” (*Id.*) Because § 734.4 does not contain a paragraph (b)(4), that instruction had no effect. This rule includes the correct drafting instruction to remove § 734.3(b)(4).

*Correction of Incorrect Paragraph
Designation*

This rule redesignates § 740.11(d)(3)(C) of the EAR as § 740.11(d)(3)(iii), to conform to standard Code of Federal Regulations paragraph structure. The incorrect designation was created in a rule published at 75 FR 6301, February 9, 2010.

*Transition to Web-Based System for
Information About the Status of Certain
Matters Pending With BIS*

Since the mid-1980s, BIS has operated a telephone-based automated system for parties to obtain information on the

status of license applications and certain other matters that are under review by BIS. This system is known as the “System for Tracking Export License Applications” or “STELA.” In 2008, BIS began offering the same automated service via a Web site (<https://snapr.bis.doc.gov/stela/>). BIS plans to phase out the telephone version of STELA because it now has few users, and maintaining such an old system is increasingly difficult. Accordingly, this rule updates references to STELA in §§ 740.5(d)(2), 740.7(d)(4)(ii) and 740.18(c)(5) to the Web address, removes references to the telephone system from all three provisions, and removes the telephone number currently listed in § 740.18(c)(5). This rule also removes and reserves § 750.5, which provided detailed instructions on how to use the telephone version of STELA, as well as references to § 750.5 from §§ 740.5(d)(2) and 740.7(d)(4)(ii).

*Removal of Obsolete Provision
Regarding Restrictions on Exports and
Reexports Involving Persons Named in
General Orders*

From June 2006 until September 2008, Supplement No. 1 to part 736 of the EAR contained “General Order Number 3,” which imposed license requirements on exports and reexports of items subject to the EAR to certain listed persons. That general order was subsequently removed, and most of the persons listed therein were added to the Entity List in Supplement No. 4 to part 744 (73 FR 54503, Sept. 22, 2008). This rule removes and reserves § 744.15, which covered restrictions on exports and reexports involving persons named in general orders. With the removal of General Order Number 3, no such general orders exist; hence, § 744.15 no longer serves a purpose. This rule also removes the sentence in § 744.1(a)(1) that referred to § 744.15.

*Removal of Reference to Telephonic
Notification Regarding Personal
Identification Numbers (PIN)*

In § 748.7(a)(2)(i), this rule removes the word “telephonically” from the sentence describing BIS’s notification to individual users of the electronic filing system of their PINs because BIS now uses a variety of methods for providing such notifications.

*Removal of Cross References to EAR
paragraph That No Longer Exists*

The rule replaces references to § 748.2(c) of the EAR, which formerly contained BIS address information but no longer exists, with references to a current provision that contains appropriate current address

information. Specifically, this rule replaces the reference to § 748.2(c) that appears in §§ 748.7(a)(1), 748.7(a)(2)(iv)(A) and 748.9(i)(1) with a reference to § 748.1(d)(2), which provides BIS’s general mailing address. The rule also replaces the reference to § 748.2(c) in § 748.13(c)(2) with the full address of the specific BIS office currently handling the relevant documentation.

*Removal of Unnecessary Notification
Requirement*

Under certain circumstances, BIS may request a delivery verification of items licensed for export. Such verifications are conducted by the government of the importing country. Generally, BIS would require, as a license condition, that the exporter obtain the foreign government-issued certificate of delivery verification and send the certificate to BIS. Amended § 748.13(b) provides that if the national security export control is removed from the item that is the subject of a license that is issued, the requirement to obtain the delivery verification is removed as well. Prior to publication of this rule, § 748.13(b) required the licensee to inform BIS in writing that it would not obtain the delivery verification certificate in situations where the national security license requirement had been removed. Because the national security license requirements referred to are those imposed by the EAR, BIS would be aware of their removal regardless, and therefore would not need written notice from the licensee on this subject.

Replacement of Obsolete Terminology

This rule replaces the term “Export Management System Guidelines” that appears in Supplement No.1 to Part 766 with the term “Export Management Compliance Program Guidelines,” and replaces the term “EMS Guidelines” with “EMCP Guidelines” to reflect the terminology that BIS currently uses to describe its compliance guidance.

*Clarifying Language Regarding Certain
Machine Tools Subject to Nuclear
Proliferation Export Controls*

Export Control Classification Number (ECCN) 2B001 applies, *inter alia*, to numerically controlled machine tools for turning that have both a positioning accuracy better than 6 µm along any linear axis, and two or more axes that can be controlled simultaneously for contouring control. Consistent with the Nuclear Suppliers Group’s guidelines, the EAR’s ECCN entry reflects the fact that the United States does not apply nuclear proliferation export license

requirements and licensing policy to machines meeting those parameters if the machine is not capable of machining diameters exceeding 35 mm. Prior to publication of this rule, ECCN 2B001 stated that the nuclear proliferation reason for control (NP) does not apply to “turning machines under 2B001.a with a capacity equal to or less than 35 mm diameter.” BIS believes that this language was consistent with the meaning of the term “capacity” that is widely used in the machine tool industry, i.e., indicating a limit or a maximum amount with no extension of this capability. In addition, because the difficulty of maintaining a given positioning accuracy increases as the maximum diameter that the tool is capable of machining increases, it would make sense for BIS to apply a more stringent control to machines capable of maintaining the 6 µm positioning accuracy when machining larger parts than it would apply to machines that were capable of maintaining that level of accuracy only when machining smaller parts. Nevertheless, some parties have indicated that they find the language set forth in ECCN 2B001 confusing. Therefore, BIS is revising the entry to state that the NP reason for control does not apply to “turning machines under 2B001.a with a capacity no greater than 35 mm diameter.”

Correcting a Typographical Error Regarding Calculating the “Adjusted Peak Performance” of Digital Computers

The EAR employ a concept called “adjusted peak performance” (APP) for setting performance benchmarks that determine the classification of a digital computer on the Commerce Control List (CCL). A note entitled “Technical Note on ‘Adjusted Peak Performance’ (‘APP’)” at the end of Category 4 on the CCL explains how to calculate APP. BIS’s intent is that this note match the note of the same name that appears at the end of Category 4 of the List of Dual-Use Goods and Technology published by the Wassenaar Arrangement on Export Controls for Conventional Arms and Dual Use Goods and Technologies (WA list note). However, prior to the publication of this rule, in describing how APP is expressed, the CCL’s Category 4 note erroneously used the number “10₁₂” instead of the correct number, “10¹²,” that appears in the WA List note. This rule corrects that error.

Rulemaking Requirements

1. This rule is not a significant rule for purposes of Executive Order 12866.
2. Notwithstanding any other provision of law, no person is required

to respond to, nor shall any person be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act, unless that collection of information displays a currently valid Office of Management and Budget Control Number. This rule involves a collection of information that has been approved by the OMB under control number 0694–0088, which carries a burden hour estimate of 58 minutes to prepare and submit form BIS–748. Miscellaneous and recordkeeping activities account for 12 minutes per submission. BIS believes that this rule will make no change to the number of submissions or to the burden imposed by this collection.

3. This rule does not contain policies with Federalism implications as that term is defined in Executive Order 13132.

4. BIS finds that there is good cause under 5 U.S.C. 553(b)(3)(B) to waive the provisions of the Administrative Procedure Act requiring prior notice and the opportunity for public comment because these revisions are administrative in nature and do not affect the rights and obligations of the public; therefore allowing prior notice and comment on these rules is unnecessary. In addition, the 30-day delay in effectiveness required by 5 U.S.C. 553(d) is not applicable here because this rule is not a substantive rule, but merely makes technical changes to the regulations. No other law requires that notice of proposed rulemaking and an opportunity for public comment be given for this rule; therefore, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable.

§ 740.18 Agricultural commodities (AGR).

* * * * *

(c) * * *

(5) *Status of pending AGR notification requests.* You must contact BIS's System for Tracking Export License Applications (STELA) (<https://snapr.bis.doc.gov/stela>) for status of your pending AGR notification or verify the status in BIS's Simplified Network Applications Processing Redesign (SNAP-R) System. STELA will provide the date of registration of the AGR notification. If no department or agency objection is raised within 11 business days, STELA will, on the twelfth business day following the date of registration, provide you with confirmation of that fact. You may not proceed with your shipment unless you confirm with either STELA or SNAP-R that no objection has been raised. If an objection is raised, STELA and SNAP-R will indicate that a license is required. The AGR notification will then be processed as a license application. In addition, BIS may provide notice of an objection by telephone, fax, courier service, or other means.

RIN 3084-AA99

Disclosures for Non-Federally Insured Depository Institutions Under the Federal Deposit Insurance Corporation Improvement Act (FDICIA)

AGENCY: Federal Trade Commission (FTC or Commission).

ACTION: Final rule.

SUMMARY: The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) directs the Commission to prescribe the manner and content of certain mandatory disclosures for depository institutions that lack federal deposit insurance. On March 13, 2009, the Commission published a supplemental notice of proposed rulemaking seeking comment on disclosure rules for such institutions. After reviewing comments received in response, the Commission now publishes a final rule.

DATES: This final rule will become effective on July 6, 2010.

SUPPLEMENTARY INFORMATION:

I. Introduction

In 1991, as part of the Federal Deposit Insurance Corporation Improvement Act (FDICIA), Congress directed the Commission to prescribe certain disclosures for depository institutions lacking federal deposit insurance. Congress then prohibited the FTC from spending resources on FDICIA’s disclosure requirements until 2003. After Congress lifted that ban, the Commission published proposed disclosures consistent with FDICIA’s statutory directives (70 FR 12823 (March 16, 2005)). Many commenters raised concerns with the proposal.¹ Thereafter, Congress passed the Financial Services Regulatory Relief Act of 2006 (FSRRA) (Pub. L. 109-351) amending FDICIA. The FSRRA amendments addressed almost all of the concerns raised by commenters about the FTC’s proposed rule. The Commission published a supplemental notice on March 13, 2009 (74 FR 10843) seeking comments on a proposal consistent with the FSRRA amendments. The Commission has reviewed the comments received in response and now publishes a final rule.

II. Background

Under existing law, all federally chartered and most state-chartered depository institutions must have federal deposit insurance. Federal deposit insurance funds currently guarantee all deposits at federally
