

2007 baseline area of land is being or has been exceeded.

- Whether a credible and reliable entity has been identified to conduct data gathering and analysis, including annual identification of the aggregate amount of cropland, pastureland, and land that is equivalent to U.S. Conservation Reserve Program land, that is needed for an annual EPA evaluation of the aggregate compliance approach, and whether the data, analyses, and methodologies are publicly available.

- Whether the petition submission requirements specified in 40 CFR 80.1457(b) have been satisfied, including the submission of a letter signed by a national government representative at the ministerial level or equivalent confirming that the petition and all supporting data have been reviewed and verified by the ministry (or ministries) or department(s) of the national government with primary expertise in agricultural land use patterns, practices, data, and statistics of the country in question, that the data support a finding that planted crops and crop residue from the specified country meet the definition of renewable biomass and will continue to meet the definition of renewable biomass, and that the responsible national government ministry (or ministries) or department(s) will review and verify the data submitted on an annual basis to facilitate EPA's annual assessment of the 2007 baseline area of land.

The public is specifically invited to comment on these factors, whether Canada has met all submission requirements specified in the regulations, and on any other issue that could inform EPA's evaluation of the petition.

Dated: March 10, 2011.
