## NUCLEAR REGULATORY COMMISSION

[Docket No. 72-1036; NRC-2011-0121; EA-11-081]

### In the Matter of Nine Mile Point Nuclear Station, LLC; Nine Mile Point Nuclear Station Independent Spent Fuel Storage Installation; Order Modifying License (Effective Immediately)

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Issuance of Order for Implementation of Additional Security Measures and Fingerprinting for Unescorted Access to Nine Mile Point Nuclear Station, LLC.

**FOR FURTHER INFORMATION CONTACT:** L. Raynard Wharton, Senior Project Manager, Licensing and Inspection Directorate, Division of Spent Fuel Storage and Transportation, Office of Nuclear Material Safety and Safeguards (NMSS), U.S. Nuclear Regulatory Commission (NRC), Rockville, MD 20852. ### SUPPLEMENTARY INFORMATION:

#### I. Introduction

Pursuant to 10 CFR 2.106, NRC (or the Commission) is providing notice, in the matter of Nine Mile Point Nuclear Station Independent Spent Fuel Storage Installation (ISFSI) Order Modifying License (Effective Immediately).

## II. Further Information

### I

NRC has issued a general license to Nine Mile Point Nuclear Station, LLC (NMPNS), authorizing the operation of an ISFSI, in accordance with the Atomic Energy Act of 1954, as amended, and Title 10 of the *Code of Federal Regulations* (10 CFR) part 72. This Order is being issued to NMPNS because it has identified near-term plans to store spent fuel in an ISFSI under the general license provisions of 10 CFR part 72. The Commission's regulations at 10 CFR 72.212(b)(5), 10 CFR 50.54(p)(1), and 10 CFR 73.55(c)(5) require licensees to maintain safeguards contingency plan procedures to respond to threats of radiological sabotage and to protect the spent fuel against the threat of radiological sabotage, in accordance with 10 CFR Part 73, Appendix C. Specific physical security requirements are contained in 10 CFR 73.51 or 73.55, as applicable.

Inasmuch as an insider has an opportunity equal to, or greater than, any other person, to commit radiological sabotage, the Commission has determined these measures to be prudent. Comparable Orders have been issued to all licensees that currently store spent fuel or have identified near-term plans to store spent fuel in an ISFSI.

### II

On September 11, 2001, terrorists simultaneously attacked targets in New York, NY, and Washington, DC, using large commercial aircraft as weapons. In response to the attacks and intelligence information subsequently obtained, the Commission issued a number of Safeguards and Threat Advisories to its licensees to strengthen licensees' capabilities and readiness to respond to a potential attack on a nuclear facility. On October 16, 2002, the Commission issued Orders to the licensees of operating ISFSIs, to place the actions taken in response to the Advisories into the established regulatory framework and to implement additional security enhancements that emerged from NRC's ongoing comprehensive review. The Commission has also communicated with other Federal, State, and local government agencies and industry representatives to discuss and evaluate the current threat environment in order to assess the adequacy of security measures at licensed facilities. In addition, the Commission has conducted a comprehensive review of its safeguards and security programs and requirements.
