SUPPLEMENTARY INFORMATION:

Title: Interstate Movement of Sheep and Goats.

OMB Number: 0579-0258.

Type of Request: Extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture is authorized, among other things, to prohibit or restrict the interstate movement of animals and animal products to prevent the dissemination within the United States of animal diseases and pests of livestock and to conduct programs to detect, control, and eradicate pests and diseases of livestock.

Scrapie is a progressive, degenerative, and eventually fatal disease affecting the nervous system of sheep and goats. Its control is complicated because the disease has an extremely long incubation period without clinical signs of disease and no known treatment.

APHIS regulations in 9 CFR part 71 restrict the interstate movement of sheep and goats to control the spread of scrapie and include provisions for livestock facilities that handle sheep or goats in interstate commerce to be approved by APHIS. These requirements are intended to ensure that such facilities are constructed and operated in a manner that will help prevent the spread of scrapie and involve information collection activities, including an Approval of Livestock and Facilities Agreement and recordkeeping.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 0.52667 hours per response.

Respondents: Owners of livestock facilities that handle sheep and goats moving interstate; State animal health officials.

Estimated annual number of respondents: 200.

Estimated annual number of responses per respondent: 2.25.

Estimated annual number of responses: 450.

Estimated total annual burden on respondents: 237 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 6th day of June 2011.

Kevin Shea,

Acting Administrator, Animal and Plant Health Inspection Service.
