[Project No. 13135-002]

City of Watervliet; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On July 1, 2011, the City of Watervliet filed an application for a successive preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Delta Hydroelectric Project to be located at Delta Dam on the Mohawk River in Oneida County, New York. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of: (1) The existing 1,016-foot-long, 76-foot-high Delta Dam, owned by the New York State Canal Corporation, (2) an existing impoundment having a surface area of 2,700 acres and a storage capacity of 63,200 acre-feet and normal water surface elevation of 550 feet mean sea level, (3) a proposed powerhouse containing two generating units with a total installed capacity of 5.0 megawatts, (4) a proposed 17,000-foot-long, 13.2-kilovolt underground generator lead, and (5) appurtenant facilities. The project would have an annual generation of 14.1 gigawatt hours.
