NUCLEAR REGULATORY COMMISSION

[NRC-2011-0185]

Virginia Electric and Power Company, Docket Nos. 50-338 and 50-339, North Anna Power Station, Unit Nos. 1 and 2, Docket Nos. 50-280 and 50-281, Surry Power Station, Unit Nos. 1 and 2; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (NRC) is considering issuance of an exemption from Title 10 of the *Code of Federal Regulations* (10 CFR) part 26, “Fitness for Duty Programs,” for Facility Operating License Nos. NPF-4 and NPF-7, issued to Virginia Electric Power Company (the licensee), for operation of the North Anna Power Station (NAPS) Unit Nos. 1 and 2, located in Louisa County, Virginia; and Facility Operating License Nos. DPR-32 and DPR-37, issued to the licensee, for operation of the Surry Power Station, Unit Nos. 1 and 2, located in Surry County, Virginia. Therefore, as required by 10 CFR 51.21, the NRC performed an environmental assessment. Based on the results of the environmental assessment, the NRC is issuing a finding of no significant impact.

Environmental Assessment

Identification of the Proposed Action

The proposed action would provide exemption from the work hour control requirements of 10 CFR 26.205(c) and (d) during declarations of severe weather conditions involving tropical storm or hurricane force winds.

The proposed action is in accordance with the licensee’s application dated February 10, 2011 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML110450583), as supplemented by letters dated March 10, 2011 (ADAMS Accession No. ML110740442) and May 26, 2011 (ADAMS Accession No. ML111470265).

The Need for the Proposed Action

The proposed action extends the exception provided by 10 CFR 26.207(d) to include pre-defined entry and exit conditions related to hurricane events because the sequestering of plant personnel and related staff resource limitations may occur at times prior to and following the current entry and exit conditions (*i.e.*, emergency declaration) specified in 10 CFR 26.207(d). Entry into a severe weather situation involving tropical storm or hurricane force winds can impose conditions

similar to entry into the site emergency plan where the imposition of work hour controls on vital personnel could impede the ability to focus on plant safety and security, and may be detrimental to the health and safety of the public.

Environmental Impacts of the Proposed Action

The NRC has completed its environmental assessment of the proposed action and concludes that extending the exception provided by 10 CFR 26.207(d) to include pre-defined entry and exit conditions related to hurricane events would not significantly affect plant safety, as it does not change the Technical Specification-required shift staffing. Additionally, the time from entry into the condition in which the work hour control exemption applies, to exiting the condition, is limited to severe weather situations involving tropical storm or hurricane force winds. The licensee states that the Hurricane Response Plan (Nuclear) and other plant-specific procedures ensure that adequate resources and guidance are in place to prepare for, respond to, and recover from severe weather conditions associated with tropical storm or hurricane force winds.

The proposed action will not significantly increase the probability or consequences of accidents. The proposed action would not result in an increased radiological hazard beyond those previously analyzed in the Final Safety Analysis Report. No changes are being made in the types of effluents that may be released offsite. There is no significant increase in the amount of any effluent released offsite. There is no significant increase in occupational or public radiation exposure. No changes will be made to plant buildings or site property. Therefore, there are no significant radiological environmental impacts associated with the proposed action.

The proposed action does not result in changes to land use or water use, or result in changes to the quality or quantity of non-radiological effluents. No changes to the National Pollution Discharge Elimination System permits are needed. No effects on the aquatic or terrestrial habitat in the vicinity of the plant, or to threatened, endangered, or protected species under the Endangered Species Act, or impacts to fish habitat covered by the Magnuson-Stevens Act are expected. There are no impacts to the air or ambient air quality. There are no impacts to historical or cultural resources. There would be no noticeable effect on socioeconomic conditions in the region. Therefore, no changes or
