

conformity assessment body training document(s), if relevant.

Commission staff will review the submission for accuracy and completeness. In the case of baseline third party conformity assessment bodies and government-owned or government-operated conformity assessment bodies, when that review and any necessary discussions with the applicant are satisfactorily completed, the third party conformity assessment body in question is added to the CPSC's list of accredited third party conformity assessment bodies at: <http://www.cpsc.gov/about/cpsia/labaccred.html>. In the case of a firewalled conformity assessment body seeking accredited status, when staff's review is complete, staff transmits its recommendation on accreditation to the Commission for consideration. (A third party conformity assessment body that may ultimately seek acceptance as a firewalled third party conformity assessment body also can initially request acceptance as a third party conformity assessment body accredited for testing of children's products other than those of its owners.) If the Commission accepts a staff recommendation to accredit a firewalled conformity assessment body, the firewalled conformity assessment body will be added to the CPSC's list of accredited third party conformity assessment bodies. In each case, the Commission will notify the third party conformity assessment body electronically of acceptance of its accreditation. All information to support an accreditation acceptance request must be provided in the English language.

Subject to the limited provisions for acceptance of "retrospective" testing noted in part IV of this document below, once the Commission adds a third party conformity assessment body to the list, the third party conformity assessment body may begin testing children's products to support certification of compliance with the applicable toy safety standards identified earlier in part I of this document for which it has been accredited.

IV. Limited Acceptance of Children's Product Certifications Based on Third Party Conformity Assessment Body Testing Prior to the Commission's Acceptance of Accreditation

The Commission will accept a certificate of compliance with the applicable sections of *Standard Consumer Safety Specification for Toy Safety*, F 963-08 and/or section 4.27 (toy chests) from ASTM F 963-07e1 based on testing performed by an

accredited third party conformity assessment body (including a government-owned or -controlled conformity assessment body, and a firewalled conformity assessment body) before the Commission's acceptance of its accreditation if:

- At the time of product testing, the product was tested by a third party conformity assessment body that was ISO/IEC 17025 accredited by an accreditation body that is a signatory to the ILAC-MRA. For firewalled conformity assessment bodies, the firewalled conformity assessment body must be one that the Commission accredited, by order, at or before the time the product was tested, even though the order will not have included the test methods specified in this notice. If the third party conformity assessment body has not been accredited by a Commission order as a firewalled conformity assessment body, the Commission will not accept a certificate of compliance based on testing performed by the third party conformity assessment body before it is accredited, by Commission order, as a firewalled conformity assessment body;

- The third party conformity assessment body's application for testing to the toy standard section(s) under which the test(s) was conducted is accepted by the CPSC on or before October 31, 2011;

- With regard to tests conducted under F 963-08, the product was tested to the applicable section(s) on or after May 13, 2009; with regard to tests conducted under section 4.27 of F 963-07e1, the product was tested on or after August 14, 2008;

- The accreditation scope in effect for the third party conformity assessment body at the time of testing expressly included testing to the toy standard section(s) under which the test(s) was conducted;

- The test results show compliance with the applicable current toy standards; and

- The third party conformity assessment body's accreditation, including inclusion in its scope of the toy standard section(s) under which the test(s) was conducted, remains in effect through the effective date for mandatory third party testing and manufacturer certification for conformity with ASTM F 963-08 and/or section 4.27 of ASTM F 963-07e1.

Dated: July 22, 2011.
