#### Implementation of a Decision Adopted Under the Australia Group (AG) Intersectoral Silent Approval Procedures in 2010 and Related Editorial Amendments

**AGENCY:** Bureau of Industry and Security, Commerce.

**ACTION:** Final rule.

**SUMMARY:** The Bureau of Industry and Security (BIS) publishes this final rule to amend the Export Administration Regulations (EAR) to implement a decision based on a proposal that was discussed at the 2010 Australia Group

(AG) Plenary and adopted under the AG intersectoral silent approval procedures in November 2010. Specifically, this rule amends the Commerce Control List (CCL) entry in the EAR that controls human and zoonotic pathogens and “toxins,” consistent with the intersectoral changes to the AG’s “List of Biological Agents for Export Control.” First, this rule clarifies the scope of the AG-related controls in the EAR that apply to “South American haemorrhagic fever (Sabia, Flexal, Guanarito)” and “Pulmonary and renal syndrome-haemorrhagic fever viruses (Seoul, Dobrava, Puumala, Sin Nombre)” by revising the list of viruses in this CCL entry to remove these two fevers and replace them with ten viral causative agents for the fevers. These changes are intended to more clearly identify the causative agents that are of concern for purposes of the controls maintained by the AG. Second, this rule alphabetizes and rennumbers the list of viruses in this CCL entry, consistent with the 2010 intersectoral changes to the AG control list. Finally, this rule makes an editorial change to the CCL entry that controls human and zoonotic pathogens and “toxins.” To assist exporters to more easily identify the bacteria and “toxins” that are controlled under this CCL entry, this rule alphabetizes and rennumbers the lists of bacteria and “toxins” in the entry.

**DATES:** This rule is effective September 12, 2011.
