SUPPLEMENTARY INFORMATION:

- I. Background
- II. Discussion
- III. Procedural Matters

I. Background

The BLM proposed these Supplementary Rules in the **Federal Register** on May 10, 2010 (75 FR 25879). Under current regulations found in 43 CFR 8365.2-5 (a), no person shall discharge or use fireworks at a developed recreation site. Seasonal fire prevention orders issued under the authority of 43 CFR 9212.2 (a) are commonly used at the local level to reduce the chance of human-caused fires during peak fire season. This action will supplement the existing regulations to prohibit the possession and use of fireworks on all public land in Colorado. Drought and subsequent insect kill of large stands of pine trees in Colorado have made the threat of wildfires greater each year. The challenges of fire protection and suppression increase as more people move into the wildland urban interface. Ensuring public and firefighter safety, while protecting property and natural resources, remain the BLM's priorities.

Under the National Fire Plan, the BLM works with other agencies and communities to ensure adequate preparedness for future fire seasons, restore landscapes, rebuild communities damaged by wildfire, and invest in projects to reduce fire risk. These rules complement the National Fire Plan. Land management agencies have taken precautions to enhance public awareness, provide proactive pre-suppression efforts, and implement fire restrictions that are reasonable and consistent among Federal, state, and local agencies. Federal, state, and local land management agencies should strive to implement fire restrictions and
