[Docket No. FAA-2011-0783; Airspace Docket No. 11-ANM-16]

Proposed Amendment of Class D and Class E Airspace, and Establishment of Class E Airspace; Bozeman, MT

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify Class D and Class E airspace at Bozeman, Gallatin Field Airport, Bozeman, MT, to accommodate aircraft using Instrument Landing System (ILS) Localizer (LOC) standard instrument approach procedures at the airport. This action also would establish Class E En Route Domestic airspace to facilitate vectoring of Instrument Flight Rules (IFR) traffic from en route airspace to the airport. This action, initiated by the biennial review of the Bozeman airspace area, would enhance the safety and management of aircraft operations at the airport.

Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking, (202) 267-9677, for a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 by modifying Class D airspace, and Class E airspace extending upward from 700 feet above the surface at Bozeman, Gallatin Field Airport, Bozeman, MT. The FAA's biennial review of the airspace found that additional controlled airspace is necessary to accommodate aircraft using the ILS LOC standard instrument approach procedures at the airport. Also, this action would establish Class E en route domestic airspace extending upward from 1,200 feet above the surface to allow vectoring IFR aircraft from en route airspace to the airport.

Class D and Class E airspace designations are published in paragraph 5000, 6005 and 6006, respectively, of FAA Order 7400.9V, dated August 9, 2011, and effective September 15, 2011, which is incorporated by reference in 14 CFR 71.1. The Class D and Class E airspace designation listed in this document will be published subsequently in this Order.

The FAA has determined this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation; (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified this proposed rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the U.S. Code. Subtitle 1, section 106, describes the authority for the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in subtitle VII, part A, subpart I, section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends

controlled airspace at Bozeman, Gallatin Field Airport, Bozeman, MT.
