

**FOR FURTHER INFORMATION CONTACT:** Dr. Richard Leard, Deputy Executive Director/Senior Fishery Biologist; Gulf of Mexico Fishery Management Council; telephone: (813) 348-1630.

**SUPPLEMENTARY INFORMATION:** The Shrimp Stock Assessment Review Workshop will evaluate the data used in the assessment and whether data uncertainties acknowledged/reported are within normal or expected levels, *e.g.*, recruitment deviations; whether data were applied properly within the assessment model; are input data series reliable and sufficient to support the assessment approach and findings; whether selectivity functions are acceptable and biologically realistic for both fisheries independent and dependent data. The Workshop will also evaluate the assessment findings with respect to the following: Are abundance, exploitation, and biomass estimates reliable and consistent with input data and population biological characteristics, and useful to support status inferences; are quantitative estimates of the status determination criteria for this stock reliable; consider how uncertainties in the assessment, and their potential consequences, are addressed, *e.g.*, sensitivity analysis runs. A Panel Review Report summarizing the evaluation of the stock assessment and addressing each Term of Reference will be developed along with a list of tasks to be completed following the workshop.

**Note:** The Workshop will address the aforementioned issues for each of the three shrimp species (brown, white, and pink), and a separate Panel Review Report for each species will be developed.

Copies of the agenda and other related materials can be obtained by calling (813) 348-1630.

Actions will be restricted to those issues specifically identified in the agenda and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take action to address the emergency.
