

the environmental impacts that would be caused by 26 years of operation would be slightly less than those that would be caused by the full 30 years of operation previously evaluated in the EIS, the difference is not significant. Therefore, denial of the amendment request would result in no significant change in the environmental impacts previously evaluated in the EIS.

Alternative Use of Resources

The proposed action does not involve the use of any different resources than those considered in the EIS for NEF (NUREG-1790).

List of Agencies and Persons Consulted and Identification of Sources Used

The NRC staff consulted the New Mexico Environment Department (NMED) in December 2011 for their review and comment on the draft EA/FONSI. In an email response dated December 28, 2011 (ML120370017), the NMED indicated that it had no comments on the EA and supported approval of the license amendment.

The NRC staff has determined that consultation with the U.S. Fish and Wildlife Service for compliance with Section 7 of the Endangered Species Act is not necessary because the proposed action does not have the potential to affect listed species or critical habitat.

The NRC staff has determined that the proposed extension of the license expiration date is not a type of activity that has potential to cause effects on historic properties because it will not authorize any additional activities that were not previously evaluated in the final EIS for NEF (NUREG-1790) in Section 4.2.2, and because, as noted above, LES will continue to follow the written procedures in the event of an inadvertent discovery of cultural resources. Therefore, no further consultation is required under Section 106 of the National Historic Preservation Act.

Finding of No Significant Impact

The NRC reviewed LES's license amendment request to revise license

condition 13 to extend the expiration date from 2036 to 2040, and found no significant environmental impacts from the shift in enrichment operation dates. On the basis of this EA, the NRC concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the NRC has determined not to prepare an EIS for the proposed action.
