The applicant is requesting authorization to film spinner dolphins near Midway Atoll in the Pacific Ocean. Dolphins would be approached during morning and late afternoon when they are typically active, but would not be approached during their mid-day resting period. Filming techniques include above water from a vessel, a pole-mounted underwater camera, and a waterproof camera used by a snorkeling cameraman. Up to 1,300 dolphins could be approached annually during filming activities. Footage would be used primarily for a television documentary about Hawaiian wildlife that would be aired on Animal Planet in the U.S. and elsewhere internationally. The initial filming period is scheduled for two weeks in June/July 2012. The permit would be valid for five years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial

determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.
