#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

The Commission’s Energy Labeling Rule (Rule) (16 CFR Part 305), issued pursuant to the Energy Policy and Conservation Act (EPCA), requires

energy labeling for major household appliances and other consumer products to help consumers compare competing models. When first published in 1979, the Rule applied to eight product categories: Refrigerators, refrigerator-freezers, freezers, dishwashers, water heaters, clothes washers, room air conditioners, and furnaces. The Commission has since expanded the Rule’s coverage to include central air conditioners, heat pumps, plumbing products, lighting products, ceiling fans, certain types of water heaters, and televisions.

The Rule requires manufacturers to attach yellow EnergyGuide labels on many of these products, and prohibits retailers from removing the labels or rendering them illegible. In addition, the Rule directs sellers, including retailers, to post label information on Web sites and in paper catalogs from which consumers can order products. EnergyGuide labels for covered appliances must contain three key disclosures: Estimated annual energy cost (for most products); a product’s energy consumption or energy efficiency rating as determined from Department of Energy (DOE) test procedures; and a comparability range displaying the highest and lowest energy costs or efficiency ratings for all similar models.<sup>1</sup> For energy cost calculations, the Rule specifies national average costs for applicable energy sources (e.g., electricity, natural gas, oil) as calculated by DOE. The Rule sets a five-year schedule for updating range of comparability and average unit energy cost information.<sup>2</sup> The Commission updates the range information based on manufacturer data submitted pursuant to the Rule’s reporting requirements.

<sup>1</sup> Where no “applicable” DOE test exists for televisions, EPCA authorizes the Commission to use “adequate non-Department of Energy test procedures” to obtain information for energy disclosures. 42 U.S.C. 6294(a)(2)(I)(ii). During FTC’s television labeling proceeding, DOE announced plans to develop a new test procedure. 74 FR 53640, 53641 (Oct. 20, 2009).
