

these project features would not affect the natural or beneficial values of floodplains or wetlands. The Alliance has not yet determined the location of the educational facilities, which could involve new construction, rehabilitation of existing structures, or a combination of both types of construction. If development requires new construction, it would most likely occur on previously disturbed land that avoids wetlands and floodplains. Therefore, the construction and operation of the educational facilities are not expected to affect the natural or beneficial values of floodplains or wetlands.

The Alliance has committed to performing all project activities in accordance with all applicable local, state, and federal regulations. The Alliance would ensure that all construction within floodplains is performed in accordance with the requirements of the Illinois Department of Natural Resources (IDNR) and the Morgan County Floodplain Ordinance. The USACE issued a NWP-12 to the Alliance for installation of the CO₂ pipeline. Depending on the types and locations of other proposed construction activities, the Alliance may also be required to obtain additional permits from IDNR prior to any construction activities. In addition to any minimization or mitigation measures required by regulation, DOE and the Alliance have incorporated measures to minimize potential adverse impacts to floodplains into the project design from construction through operation. These measures include, but are not limited to, minimum grading requirements, runoff controls, design and construction constraints and other measures as described in Table 4.2-1 of the final EIS. By incorporating these measures into project designs, DOE and the Alliance would avoid and minimize anticipated adverse impacts to the natural or beneficial values of floodplains and wetlands.

Issued in Washington, DC, on this 13 of January 2014.

Christopher A. Smith,

Acting Assistant Secretary for Fossil Energy.
