Executive Summary

I. Purpose of This Regulatory Action

a. The ITEP Pilot is envisioned to promote the interchange of DoD and private sector IT professionals to enhance skills and competencies. Given the changing workforce dynamics in the IT field, DoD needs to take advantage of these types of professional development programs to proactively position itself to keep pace with the changes in technology.

b. This regulation implements section 1110 of the National Defense Authorization Act for Fiscal Year 2010 (Pub. L. 111-84), which authorizes DoD to implement a Pilot Program for the Temporary Exchange of Information Technology (IT) Personnel. This statute authorizes the temporary assignment of DoD IT employees to private sector organizations. This statute also gives DoD the authority to accept private sector IT employees assigned under the Pilot.

II. Summary of the Major Provisions of This Regulatory Action

This Pilot Program ("Pilot") is authorized by section 1110 of the NDAA for FY2010 (Pub. L. 111-84). Section 1110 authorizes DoD Components to assign exceptional IT employees to a private sector organization for purposes of training, development and sharing of best practices. It also gives DoD Components the authority to accept comparable IT employees on an assignment from the private sector for the training and development purposes and sharing of best practices and insight of government practices.

III. Costs and Benefits of This Regulatory Action

The cost of employee's salary and benefits will be paid by the originating employer. It is anticipated that the benefit will outweigh the cost to manage this program and any additional cost would be related to travel or cost to attend training or conferences.
