SUPPLEMENTARY INFORMATION:

Title: Bovine Spongiform Encephalopathy; Importation of Animals and Animal Products.

OMB Control Number: 0579-0234.

Type of Request: Revision to and extension of approval of an information collection.

Abstract: Under the Animal Health Protection Act (7 U.S.C. 8301 *et seq.*), the Animal and Plant Health Inspection Service of the U.S. Department of Agriculture regulates the importation of animals and animal products into the United States to guard against the introduction of animal diseases. The regulations in 9 CFR parts 93, 94, 95, and 96 (referred to below as the regulations) govern the importation of certain animals, birds, poultry, meat, other animal products and byproducts, hay, and straw into the United States in order to prevent the introduction of animal diseases, including bovine spongiform encephalopathy (BSE), a chronic degenerative disease affecting the central nervous system of cattle.

To help ensure that BSE is not introduced into the United States, the

regulations place specified conditions on the importation of certain live ruminants and ruminant products and byproducts. These requirements necessitate the use of several information collection activities, including Veterinary Services (VS) Form 16-3, permit application; certification statements for the importation of ruminants and ruminant products; certificate for inedible processed animal origin materials and products from BSE-free regions; cooperative service agreements with foreign facilities that process and store regulated materials and products destined for importation into the United States; VS Form 17-33, Animals Imported for Immediate Slaughter; the placing of seals on conveyances from the exporting region; agreement with slaughter facilities on use of seals on conveyances transporting animals from BSE minimal-risk regions; notification regarding conditions of sealed shipments; and notification of designated individuals authorized to break seals.

In addition to the above information collection activities, we are adding VS Form 17-130, Ruminants Imported to Designated/Approved Feedlots; and VS Form 1-27, Permit for Movement of Restricted Animals. As a result of adding these two activities and the increase in importations from Canada, the estimated annual number of responses has increased by 110,463, and the estimated total annual burden on respondents has increased by 160,983 hours.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

- (1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

- (2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- (3) Enhance the quality, utility, and clarity of the information to be collected; and

- (4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; *e.g.*, permitting electronic submission of responses.

Estimate of burden: The public reporting burden for this collection of information is estimated to average 1 hour per response.

Respondents: Herd owners, U.S. importers of regulated animal products, salaried veterinarians in BSE-free regions and BSE-affected regions, foreign exporters of processed animal protein and other regulated materials and products, accredited veterinarians, feedlot managers, and slaughter facility managers.

Estimated annual number of respondents: 4,500.

Estimated annual number of responses per respondent: 52.

Estimated annual number of responses: 235,752.

Estimated total annual burden on respondents: 231,307 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 22nd day of December 2014.

Kevin Shea,

Administrator, Animal and Plant Health Inspection Service.

Type of Request: New collection.

Abstract

USDA Foods play an important role in school meals and may contribute up to 20% of the foods served in school meals through the National School Lunch Program (NSLP). States and School Food Authorities (SFAs) receive a USDA Foods entitlement to acquire products offered through the USDA Foods program. USDA Foods can be directly delivered from USDA's vendor to state warehouses, distributors, buying cooperatives, or SFAs. Fruits and vegetables can be requisitioned through the Department of Defense (DoD) Fresh Fruit and Vegetable Program. Bulk USDA Foods can be sent directly to a processor to create final products for use in school meals.

An SFA's costs of using USDA Foods begin with how it spends its entitlement, which is managed by State Distribution Agencies (SDAs). SFAs incur additional costs to obtain USDA Foods, for procurement, storage, distribution and administration. These functions are performed by a variety of agencies involved in this process (FNS, SDAs, storage/distribution contractors, SFAs and schools). SDAs may absorb some of these costs. Finally, the model of contracting with food processors may affect the full cost of USDA Foods to SFAs—whether the contract is a payment for final product (with a rebate or discount for the SFA) or a payment for service, *i.e.* for transforming the USDA Food into a final product.

While several USDA-funded studies have examined SFA food purchasing practices and have compared foods purchased by SFAs with commercial products, very little research has focused specifically on the full cost of USDA Foods used in school meals. The most recent study on this topic, and the model for the current study, is the State Commodity Distribution System study covering the 1985-86 school year.

The proposed study will examine the variety of factors that determine the cost and value of USDA Foods to local school and school district food programs. The objectives of the study are to (1) identify distribution models (including procurement, transportation, storage and delivery) used by 49 states and the District of Columbia to distribute USDA Foods to schools; (2) identify 4 to 10 procurement and distribution models that represent the state systems used in School Year (SY) 2015-16; and (3) develop cost estimates for a group of USDA Foods, full processed products made from USDA Foods, and comparable commercial products.

Affected Public: Respondent groups include: (1) State officials with responsibility for USDA Food provision and (2) directors of school food authorities.

Estimated Number of Respondents: 440-950. The proposed final samples will include State Distribution Agencies in up to 49 States and the District of Columbia, and 112-280 unique SFAs, depending on how many distribution models are studied (Kansas is excluded because it receives cash payments in lieu of USDA foods). The number studied will be determined on the basis of the results of the survey of SDAs.

Estimated Frequency of Responses per Respondent: All respondents will be asked to respond to each instrument only once.

Estimated Total Annual Responses: 440-950, depending on the number of distribution models studied.

Estimated Time per Response: 43 minutes (0.72 hours). The estimated response time varies from 5 minutes for notifications of the surveys to 360 minutes (6 hours), depending on the survey and the respondent group, as shown in the following table.

Estimated Total Annual Burden on Respondents: 308 to 693 hours.

[Docket No. FSIS–2014–0035]

Notice of Request for a Renewal Information Collection (Marking, Labeling and Packaging)

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 and the Office of Management and Budget (OMB) regulations, the Food Safety and Inspection Service (FSIS) is announcing its intention to renew a currently approved information collection regarding the regulatory requirements for marking, labeling, and packaging of meat, poultry, and egg products and for establishments that produce mechanically separated poultry. This approval covers the labeling approval process whereby establishments are to submit their labels to FSIS for approval or maintain files related to generic labeling. This package also covers the recordkeeping burden for packaging

material letters of guarantee for safety. Lastly, this package contains the recordkeeping burden imposed on establishments that produce mechanically separated poultry. There are no changes to the existing information collection.

DATES: Comments on this notice must be received on or before March 2, 2015.

ADDRESSES: FSIS invites interested persons to submit comments on this notice. Comments may be submitted by the following methods:

- *Federal eRulemaking Portal:* This Web site provides the ability to type short comments directly into the comment field on this Web page or attach a file for lengthier comments. Go to <http://www.regulations.gov>. Follow the on-line instructions at that site for submitting comments.
