Multiple resource uses are addressed which include management and forage allocations for livestock grazing; delineation of lands open, closed, or subject to special stipulations or mitigation measures for minerals development; recreation and travel management designations; management of lands and realty actions, including delineation of avoidance and exclusion areas applicable to rights-of-ways (ROWs), land tenure adjustments, and solar and wind energy development. The planning effort will consider establishment of a national trail management corridor for the congressionally-designated Old Spanish National Historic Trail. Eligible river segments will be evaluated for suitability as components of the National Wild and Scenic River System and 23 new Areas of Critical Environmental Concern (ACECs) are proposed. The ACECs are proposed to protect natural and cultural resource values and traditional Native American use areas.
