

specified activity on marine mammals and their habitat, and taking into consideration the implementation of the mitigation and monitoring measures, NMFS finds that BLM's proposed activities would take small numbers of marine mammals relative to the populations of the affected species or stocks.

Impact on Availability of Affected Species or Stock for Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by this action. The proposed activity occurs south of the latitude that NMFS categorizes as within Arctic waters (*i.e.*, north of 60° N). Therefore, NMFS has determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Endangered Species Act (ESA)

For the reasons already described in this notice, NMFS has determined that the issuance of a proposed Authorization may have an effect on species or critical habitat protected under the ESA (specifically, the Steller sea lion). Under section 7 of the ESA, BLM has initiated formal consultation with the NMFS Alaska Regional Office on the proposed land survey. NMFS (*i.e.*, National Marine Fisheries Service, Office of Protected Resources, Permits and Conservation Division) also consulted internally with the NMFS Alaska Regional Office on the proposed issuance of an Authorization under section 101(a)(5)(D) of the MMPA.

In June, 2015, the NMFS Alaska Regional Office Protected Species Division issued a Biological Opinion with an Incidental Take Statement to us and to BLM which concluded that the issuance of the Authorization and the conduct of the land survey activities were not likely to jeopardize the continued existence of Steller sea lions. The Biological Opinion also concluded that the issuance of the Authorization and the conduct of the land survey activities would not affect designated critical habitat for Steller sea lions.

National Environmental Policy Act (NEPA)

NMFS prepared an Environmental Assessment (EA) analyzing the potential effects to the human environment from NMFS' issuance of a Authorization to BLM for their proposed land survey activities. In June 2015, NMFS issued a Finding of No Significant Impact (FONSI) on the issuance of an Authorization for BLM's proposed land

survey activities in accordance with section 6.01 of the NOAA Administrative Order 216-6 (Environmental Review Procedures for Implementing the National Environmental Policy Act, May 20, 1999). NMFS' EA and FONSI for this activity are available upon request (see **ADDRESSES**).

Authorization

As a result of these determinations, NMFS issued an Incidental Harassment Authorization to BLM for take incidental to conducting a one-day field-based land survey of cultural sites located on a small island within the eastern Aleutian Islands archipelago, during the period of June 1, 2015 through July 31, 2015, provided they incorporate the previously mentioned mitigation, monitoring, and reporting requirements.

Dated: June 10, 2015.

Title of Collection: National Household Education Survey 2016 (NHES:2016) Full-scale Data Collection.

Abstract: The National Household Education Surveys Program (NHES) is conducted by the National Center for

Education Statistics' (NCES). NHES is NCES's principal mechanism for addressing education topics appropriate for households rather than establishments. Such topics cover a wide range of issues, including early childhood care and education, children's readiness for school, parent perceptions of school safety and discipline, before- and after-school activities of school-age children, participation in adult education and training, parent involvement in education, school choice, homeschooling, and civic involvement. The NHES consists of a series of rotating surveys using a two-stage design in which a household screener collects household membership and key characteristics for sampling and then appropriate topical survey(s) are mailed to sample members. Data from the NHES are used to provide national cross-sectional estimates on populations of special interest to education researchers and policymakers. NHES surveys were conducted approximately every other year from 1991 through 2007 using random digit dial (RDD) methodology; beginning in 2012 NHES began collecting data by mail to improve response rates. This submission seeks clearance to conduct NHES:2016, which will repeat the child topical surveys conducted in 2012: The Early Childhood Program Participation (ECPP), the Parent and Family Involvement in Education-Enrolled (PFI-E), and the Parent and Family Involvement in Education-Homeschooled (PFI-H), and will include the first adult topical survey in NHES since 2005, the Adult Training and Education Survey (ATES). The adult survey was developed in conjunction with the Interagency Working Group on Expanded Measures of Enrollment and Attainment (GEMEnA) and was pilot tested in the 2014 NHES Feasibility Study.
