SUPPLEMENTARY INFORMATION:

I. Introduction

The National Transit Database (NTD) is the Federal Transit Administration's (FTA) primary database for statistics on the transit industry. Congress established the NTD to "help meet the needs of . . . the public for information on which to base public transportation service planning . . ." (49 U.S.C 5335). Currently, 821 transit providers in urbanized areas report to the NTD through its online reporting system. Each year, performance data from these submissions are used to apportion over \$7 billion of FTA funds for Urbanized Area Formula (section 5307) grants, Rural Area Formula (section 5311) grants, Tribal Transit Formula grants, Bus and Bus Facilities Formula (section 5339) grants, and State of Good Repair (section 5337) grants. The data is made available on the NTD Web site at www.ntdprogram.gov for the benefit of the public, transit systems, and all levels of government. The data is also used in the annual National Transit Summaries and Trends report, the biennial Conditions and Performance Report to Congress, and in meeting FTA's obligations under the Government Performance and Results Act. Reporting requirements are governed by a Uniform System of Accounts (USOA) and Reporting Manuals that are issued each year. The USOA is the chart of accounts and accounting manual that describes how transit agencies are to report to the NTD.

The USOA was originally published in 1977 when NTD reporting began. While the NTD has undergone numerous and substantial changes in the past 38 years, the USOA was last updated for minor changes in 1995. This notice proposes updates to the USOA to better align with today's NTD and accounting practices and to address FTA data needs and common questions among NTD reporters.

II. Background

This notice proposes changes to the USOA that impact NTD reporting requirements. FTA proposes that changes A-J below take effect starting with the FY17 data reporting cycle. Change K below, the revised APC certification policy, would take effect when changes are proposed in the **Federal Register**. Following is a summary of proposed changes:

- A. Separation of "Passenger-Paid Fares" and "Organization-Paid Fares"
- B. Separation of "Paid Absences" From "Fringe Benefits"
- C. Consolidation of "Casualty and Liability Costs" Under General Administration Function
- D. Expansion of Assets and Liabilities Object Classes (F-60)
- E. Addition of "Voluntary Non-Exchange Transactions"
- F. Addition of "Sales and Disposals of Assets"
- G. Simplification of State Fund Reporting
- H. Reorganization of B-30 Contractual Relationship

Additionally, this notice proposes the following changes to the NTD reporting requirements that are not directly addressed in the updated USOA:

- I. Separation of Operators' and Non-Operators' Work Hours and Counts
- J. Enhanced Auditor's Review
- K. Revised APC Certification Policy

Finally, FTA seeks comments on the decision to not require a separate non-add item for police force expenses.

III. Proposed Changes to the National Transit Database Reporting Requirements

A. Separation of "Passenger-Paid Fares" and "Organization-Paid Fares"

Currently, the NTD category "Passenger Fares" includes both directly paid fares collected via standard methods such as a farebox or purchase of monthly passes and less direct fares—for example, where a university pays the transit agency to provide fare-free service to students. This combination of revenue sources has been confusing to some reporters.
