#### **SUPPLEMENTARY INFORMATION:**

##### **I. Background**

Under section 313 of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 873, any explosives used in underground coal mines must be permissible. The Mine Act also provides that, under safeguards prescribed by the Secretary of Labor, a mine operator may permit the firing of more than 20 shots and the use of nonpermissible explosives in sinking shafts and slopes from the surface in rock. Title 30 CFR 75.1321 outlines the procedures by which a permit may be issued for the firing of more than 20 boreholes and/or the use of nonpermissible shot-firing units in underground coal mines. In those instances in which there is a misfire of explosives, section 75.1327 requires that a qualified person post each accessible entrance to the affected area with a warning to prohibit entry. Section 77.1909-1 outlines the procedures by which a coal mine operator may apply for a permit to use nonpermissible explosives and/or shot-firing units in the blasting of rock while

sinking shafts or slopes for underground coal mines.
