

3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Annual and Final Performance Report Data Collection for Arts in Education Grantees.

OMB Control Number: 1855-NEW.

Type of Review: A new information collection.

Respondents/Affected Public: State, Local, and Tribal Governments; Private Sector.

Total Estimated Number of Annual Responses: 98.

Total Estimated Number of Annual Burden Hours: 3,920.

Abstract: The Government Performance and Results Act (GPRA) requires all federally funded agencies to develop and implement an accountability system based on performance measurement. This regulation applies to grantees receiving funds from the Dept. of ED's Office of Innovation and Improvement Arts in Education—Model Development and Dissemination (AEMDD), Professional Development for Arts Educators (PDAE), and Arts in Education National Program (AENP) programs. Each grantee is required to report on performance and progress towards GPRA measures as a condition of the grant. Data for GPRA performance measures are collected through the Annual Performance Report (APR) completed by grantees. The APR also collects budget information and data on project-specific performance measures. The forms being submitted for OMB review are APR templates that

expand on the ED 524-B form to gather additional data on performance from Arts in Education grantees in a streamlined manner. Performance data are used to help make decisions about continued funding for grantees and to show overall program progress by aggregating GPRA data across grantees. GPRA data may be also be used by Congress to determine future program funding.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9947–21–Region 3]

Clean Water Act: Availability of List Decisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice and initial request for public input.

SUMMARY: The Clean Water Act (CWA) requires that states periodically submit, and EPA approve or disapprove, lists of waters (called “Section 303(d) lists”) for which existing technology-based pollution controls are not stringent enough to attain or maintain State water quality standards and for which total maximum daily loads (TMDLs) must be prepared. Waters identified on Section

303(d) lists are called “water quality-limited segments.” This notice announces EPA’s proposal to include in West Virginia’s 2014 Section 303(d) list certain water quality-limited segments and requests public comment.

On May 11, 2016, EPA partially approved West Virginia’s 2014 Section 303(d) list of water quality-limited segments and associated pollutants and partially disapproved West Virginia’s submission to the extent that West Virginia did not evaluate certain water quality information and therefore did not identify certain water quality-limited segments. EPA has evaluated the information and proposes to identify these additional water quality-limited segments for inclusion on the State’s 2014 Section 303(d) list. The proposed water quality-limited segments are identified in Enclosure 3 of the decision document available at the Web site link provided below.

EPA is providing the public the opportunity to review its decision to add these water quality-limited segments to West Virginia’s 2014 Section 303(d) list. EPA will consider public comments before transmitting its final listing decision to the State.

DATES: Comments must be submitted in writing to EPA on or before July 5, 2016.

ADDRESSES: Comments on the proposed decision should be sent to Bill Richardson, Water Protection Division (3WP30), U.S. Environmental Protection Agency Region 3, 1650 Arch Street, Philadelphia, PA 19103–2029, or emailed to Richardson.william@epa.gov. Oral comments will not be considered. Copies of EPA’s letter concerning West Virginia’s 2014 Section 303(d) list that explains the rationale for EPA’s decision and EPA’s proposed list of waters to be added to West Virginia’s 2014 Section 303(d) list can be obtained at EPA Region 3’s Web site at <https://www.epa.gov/tmdl/impaired-waters-and-tmdls-region-3> or by writing Mr. Richardson at the above address. Underlying documents from the administrative record for these decisions are available for public inspection at the above address. Please contact Mr. Richardson to schedule an inspection.

FOR FURTHER INFORMATION CONTACT: For additional information, contact Bill Richardson at (215) 814–5675.

SUPPLEMENTARY INFORMATION: Section 303(d) of the Clean Water Act requires that each State identify those waters (called “water quality-limited segments”) for which existing technology-based pollution controls are not stringent enough to attain or maintain State water quality standards

and for which total maximum daily loads (TMDLs) must be prepared. For those waters, States are required to establish TMDLs according to a priority ranking.

EPA’s Water Quality Planning and Management regulations include requirements related to the implementation of Section 303(d) of the CWA (40 CFR 130.7). The regulations require States to assemble and evaluate existing and readily-available water quality data and to identify water quality-limited segments still requiring TMDLs every two years. The list of waters still needing TMDL development must also include priority rankings and must identify the waters targeted for TMDL development during the next two years (40 CFR 130.7).

Consistent with EPA’s regulations, EPA received West Virginia’s submittal of its listing decisions under Section 303(d)(2) on April 13, 2015. On May 11, 2016, EPA partially approved West Virginia’s 2014 list of water quality-limited segments and associated priority ranking and partially disapproved West Virginia’s submission to the extent that West Virginia did not list sixty-one (61) water quality-limited segments based upon existing data and public input. EPA solicits public comment on the addition of these waters to the State’s list, as required by 40 CFR 130.7(d)(2).
