**DATES:** The comment period for the advance notice of proposed rulemaking published April 6, 2016 (81 FR 19936), is extended. Comments must be received on or before September 6, 2016.

**ADDRESSES:** Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. #### SUPPLEMENTARY INFORMATION:

##### I. Comment Period Extension

On April 6, 2016 (81 FR 19936), as part of the Commission’s systematic review of its rules and guides, the FTC published an Advance Notice of Proposed Rulemaking (ANPR) in the **Federal Register** requesting public comments on the R-value Rule. The ANPR set June 6, 2016 as the deadline for filing comments. On May 12, 2016, the American Chemistry Council’s (ACC) Center for the Polyurethanes

Industry and Spray Foam Coalition requested a 90-day extension to the comment period. ACC represents manufacturers of various types of home insulation products, including spray polyurethane foam (SPF) and rigid polyurethane foam board insulation. The requesters explained that the insulation industry and certain insulation products have changed substantially since the Commission completed its last regulatory review in 2005. In particular, new industry research has become available on the short-term and long-term thermal performance of SPF products. ACC also noted that new research exists about the energy efficiency benefits of insulation products that combine air sealing with high thermal resistance properties. Accordingly, it asserted that additional time is necessary for companies and industry trade organizations to present this new information in a useful manner through comments.

Given the complexity and range of issues raised in the ANPR, the Commission agrees that allowing additional time for filing comments would help facilitate the creation of a more complete record. Moreover, this extension would not harm consumers because the current Rule will remain in effect during the review process. The Commission agrees that extending the comment period to allow interested parties adequate time to address issues raised by the ANPR will facilitate a more complete record. Therefore, the Commission has decided to extend the comment period to September 6, 2016.

##### II. Request for Comment

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before September 6, 2016. In particular, do not include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

#### SUPPLEMENTARY INFORMATION:

**Background.** The Delaware River Basin Commission (“DRBC” or “Commission”) is a Federal interstate compact agency charged with managing the water resources of the Delaware River Basin on a regional basis without regard to political boundaries. Its members are the governors of the four basin states—Delaware, New Jersey, New York and Pennsylvania—and the North Atlantic Division Commander of the U.S. Army Corps of Engineers, representing the federal government. DRBC is proposing a comprehensive revision of its project review fee structure, including an automatic annual indexed inflation adjustment for most fees. The inflation adjustment is also proposed for DRBC’s water supply charges rates applicable to consumptive and non-consumptive surface water withdrawals.

**Current fees.** DRBC’s current project review fee structure was adopted by the Commission in 2009 by (uncodified) Resolution No. 2009–2. For projects involving total costs of \$250,000 or less, it consists of a flat project review fee of \$1,000 for privately sponsored projects and \$500 for publically sponsored projects. For projects with total costs greater than \$250,000, DRBC’s current project review fee is based upon a percentage of the costs of the project attributable to project components physically located within the basin, and is capped at \$75,000. However, projects for which the review is exceptionally involved may be charged DRBC’s actual costs, which may exceed \$75,000. The current fee structure generates an uneven revenue stream that between 2011 and 2015 produced average annual revenues of \$610,843. The Commission’s total cost associated with
