

impacts are short-term and temporary. Therefore, the NRC staff concluded that the overall impacts related to these resource areas would be SMALL. Furthermore, the NRC staff found that there would be no significant negative cumulative impact to any resource area from the MEA when added to other past, present, and reasonably foreseeable future actions, and that a potential positive cumulative socioeconomic impact could result from additional tax revenue, employment, and local purchases.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denial of the proposed action (*i.e.*, the “no-action” alternative). Under the no-action alternative, the NRC would not authorize CBR to construct and operate the MEA. In situ uranium recovery activities would not occur within the MEA and the associated environmental impacts also would not occur.

III. Finding of No Significant Impact

In accordance with the NEPA and 10 CFR part 51, the NRC staff has conducted an environmental review of CBR’s request for a license amendment to NRC source materials license SUA–1534 that would authorize construction and operation of the MEA. Based on its environmental review of the proposed action, as documented in the EA, the NRC staff has determined that granting the requested license amendment would not significantly affect the quality of the human environment. Therefore, the NRC staff has determined, pursuant to 10 CFR 51.31, that preparation of an environmental impact statement is not required for the proposed action and a FONSI is appropriate.
