

covered activities would incorporate measures that avoid or minimize the impacts of the incidental take to the maximum extent practicable. In total, the proposed SSHCP covered activities could result in the development and unavoidable loss of up to 33,639 acres of natural landcovers and species habitat present within the Plan Area. These losses would be mitigated by implementation of the SSHCP conservation strategy, which includes the establishment of a minimum 34,494-acre interconnected preserve system in south Sacramento County, and the re-establishment or establishment of at least 1,787 acres of aquatic habitat, to provide a total SSHCP Preserve System of 36,281 acres. The entire SSHCP Preserve System would be preserved, monitored, and managed in perpetuity for the benefit of the covered species and their natural habitats. The issuance of the ITP is conditioned on the final SSHCP meeting all criteria in section 10(a)(2)(B) of the ESA.

National Environmental Policy Act Compliance

We published an initial notice of intent (NOI) to prepare a draft SSHCP EIS/EIR in the **Federal Register** on Wednesday, June 10, 2008 (73 FR 32729), published a revised NOI on November 4, 2013 (78 FR 66058), and we published the notice of availability (NOA) of the draft SSHCP EIS/EIR on June 2, 2017 (82 FR 25612), which included a 90-day public comment period.

The final SSHCP EIS/EIR studies three alternatives: The *No Action Alternative*, the *Proposed Action Alternative*, and the *Reduced Permit Term Alternative*. The Service has identified the *Proposed Action Alternative* as the preferred alternative. We received 26 comment letters on the draft EIS/EIR and the draft SSHCP. A response to each comment received in these letters has been included in the final EIS/EIR document. Minor revisions to the final EIS/EIR or to the final SSHCP have been made to address the comments received on the draft documents. The descriptions and analysis of the three SSHCP alternatives studied in the final EIS/EIR generally remain the same as presented in the draft EIS/EIR.

Public Review

Copies of the final EIS/EIR and the final SSHCP documents are available (see **ADDRESSES**) for a 30-day public review period (see **DATES**). If you wish to comment on the final documents, you may submit your comments to the address provided in **ADDRESSES**. Before

including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Next Steps

We will evaluate the incidental take permit application, the associated documents, and any public comments submitted during the final EIS/EIR review period to determine whether the permit application meets all requirements of section 10(a) of the ESA. The Service will then prepare a concise public record of our decision (the Record of Decision). Our permit decision will be made no sooner than 30 days after the publication of the Environmental Protection Agency's notice of this final EIS/EIR in the **Federal Register**. After they are completed and signed, the Record of Decision and the incidental take permit will be available on our web page at <https://www.fws.gov/sacramento>.
