

owner's manual. In addition, the fact that the vehicle has a spare tire is explained on the Monroney label.

5. The spare-tire size and pressure information is readily available from additional sources (e.g., any automotive dealer or tire replacement facility), and on GM's or the tire retailer's website.

6. Most, if not all, temporary spare tires have the same cold tire pressure, which is 60 psi. The 60 psi pressure is an industry standard and it is set by at least two governing bodies, the U.S. Tire and Rim Association and the European Tire Rim Technical Organization.

7. All other information on the vehicle placard is correct.

8. NHTSA has previously granted similar inconsequential petitions with respect to FMVSS No. 110 noncompliances.

9. GM is not aware of any field or owner complaints associated with this issue. GM is also not aware of any crashes or injuries associated with this condition.

GM's complete petition and all supporting documents are available by logging onto the Federal Docket Management System (FDMS) website at: <https://www.regulations.gov> and by following the online search instructions to locate the docket number as listed in the title of this notice.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, any decision on this petition only applies to the subject vehicles that GM no longer controlled at the time it determined that the noncompliance existed. However, any decision on this petition does not relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, or introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after GM notified them that the subject noncompliance existed.

Authority: (49 U.S.C. 30118, 30120; delegations of authority at 49 CFR 1.95 and 501.8).

Acting Director, Office of Vehicle Safety Compliance.

SUPPLEMENTARY INFORMATION:

Authority: Public Law 104-13; 44 U.S.C. 3501-3521.

Title: Application by Insured Terminally Ill Person for Accelerated Benefit Form SGLI 8284.

OMB Control Number: 2900-0618.

Type of Review: Reinstatement of a previously approved collection.

Abstract: VA has amended regulations for the Servicemembers' Group Life Insurance (SGLI) and Veterans' Group Life Insurance (VGLI) programs to add accelerated death benefit (Accelerated Benefit) provisions that permit terminally ill policyholders access to the death benefits of their policies before they die. Traditionally, an

individual purchases life insurance in order to safeguard his or her dependents against major financial loss due to his or her death. Life insurance serves to replace the lost income of an insured and to provide for his or her final expenses. In recent years, the insurance industry has recognized the financial needs of terminally ill policyholders and has begun offering policies with accelerated benefit provisions. A recent statutory amendment (Section 302 of the Veterans Programs Enhancement Act of 1998, Pub. L. 105-368, 112 Stat. 3315, 3332-3333) added section 1980 to Title 38, United States Code, which extends an accelerated benefit option to terminally ill persons insured in the SGLI and VGLI programs. This form expired due to high volume of work and staffing changes.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 83 FR 56 on March 22, 2018, pages 12653 and 12654.

Affected Public: Individuals and Households.
