

FEDERAL REGISTER

Vol. 85

Thursday,

No. 219

November 12, 2020

Pages 71815–72550

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 85 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 85, No. 219

Thursday, November 12, 2020

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

2 CFR Part 1800

[Document Number NASA-20-090; Docket Number NASA-2020-0006]

RIN 2700-AE61

Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Direct final rule.

SUMMARY: This direct final rule amends NASA's regulations on Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, to align with the Office of Management and Budget's (OMB) recent amendments to its regulations on Grants and Agreements.

DATES: This direct final rule is effective on January 11, 2021 without further action, unless adverse comment is received by December 14, 2020. If adverse comment is received, NASA will publish a timely withdrawal of the rule in the **Federal Register**.

ADDRESSES: Comments must be identified with RINs 2700-AE61 and may be sent to NASA via the *Federal E-Rulemaking Portal*: <http://www.regulations.gov>. Follow the online instructions for submitting comments. Please note that NASA will post all comments on the internet without changes, including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Corey Walz, 202-940-6581, corey.a.walz@nasa.gov.

SUPPLEMENTARY INFORMATION:

Direct Final Rule and Significant Adverse Comments

NASA has determined this rulemaking meets the criteria for a direct final rule because it makes nonsubstantive changes to NASA's

regulations on Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards to align with OMB's recent amendments to its regulations on Grants and Agreements. No opposition to the changes and no significant adverse comments are expected. However, if NASA receives significant adverse comments, it will withdraw this direct final rule by publishing a document in the **Federal Register**. A significant adverse comment is one that explains: (1) Why the direct final rule is inappropriate, including challenges to the rule's underlying premise or approach; or (2) why the direct final rule will be ineffective or unacceptable without a change. In determining whether a comment necessitates withdrawal of this direct final rule, NASA will consider whether it warrants a substantive response in a notice and comment process.

Background

Title 2 CFR part 1800, last amended on May 9, 2019 [84 FR 20240], adopts OMB's guidance in subparts A through F of 2 CFR part 200 as NASA's policies and procedures for uniform administrative requirements, cost principles, and audit requirement for Federal awards. NASA is amending 2 CFR part 1800 to align with the OMB's recent amendments to its regulations on Grants and Agreements published on August 13, 2020, at 85 FR 49506, which will become effective on November 12, 2020.

Statutory Authority

The National Aeronautics and Space Act (the Space Act), 51 U.S.C. 20113(a), authorizes the Administrator of NASA to make, promulgate, issue, rescind, and amend rules and regulations governing the manner of its operations and the exercise of the powers vested in it by law.

Regulatory Analysis

Executive Order 12866, Regulatory Planning and Review and Executive Order 13563, Improving Regulation and Regulatory Review

Executive Orders (E.O.) 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits

(including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated as "not significant" under section 3(f) of E.O. 12866.

Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency to prepare an initial regulatory flexibility analysis to be published at the time the proposed rule is published. This requirement does not apply if the agency "certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities" (5 U.S.C. 603). This rule aligns NASA's regulations on uniform administrative requirements, cost principles, and audit requirement for Federal awards with OMB's recent amendments to its regulations on Grants and Agreements published on August 13, 2020, at 85 FR 49506, which will become effective on November 12, 2020, and does not have a significant economic impact on a substantial number of small entities.

Review Under the Paperwork Reduction Act

This direct final rule does not contain any information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Review Under E.O. 13132

E.O. 13132, "Federalism," 64 FR 43255 (August 4, 1999) requires that regulations be reviewed for federalism effects on the institutional interest of states and local governments, and if the effects are sufficiently substantial, preparation of the Federal assessment is required to assist senior policy makers. These amendments will not have any substantial direct effects on state and local governments within the meaning of the E.O.. Therefore, no federalism assessment is required.

Executive Order 13771—Reducing Regulation and Controlling Regulatory Costs

This rule is not an E.O. 13771 regulatory action because this rule is not significant under E.O. 12866.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by state, local, and tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments.

List of subjects in 2 CFR Part 1800

Grant programs, Grants administration.

For reasons set forth in the preamble, NASA is amending 2 CFR part 1800 as follows:

PART 1800—UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS

- 1. The authority citation for part 1800 continues to read as follows:

Authority: 51 U.S.C. 20113 (e), Pub. L. 97–258, 96 Stat. 1003 (31 U.S.C. 6301 *et seq.*), and 2 CFR part 200.

- 2. Revise § 1800.3 to read as follows:

§ 1800.3 Applicability.

(a) This part establishes policies and procedures for grants and cooperative agreements awarded by NASA to non-Federal entities, for-profit organization, foreign organizations, and foreign public entities as allowed by 2 CFR 200.101. For supplemental guidance, NASA has adopted section numbers that correspond to those in the OMB guidance in 2 CFR part 200.

(1) Non-Federal entities must follow the policies and procedures appearing in subparts A through F of 2 CFR part 200 and as supplemented by this part.

(2) Foreign organizations and foreign public entities must follow the policies and procedures appearing in subparts A through E of 2 CFR part 200 and as supplemented by this part.

(3) U.S. and foreign for-profit organizations must follow the policies and procedures appearing in subparts A through D of 2 CFR part 200 and as supplemented by this part. The Federal Acquisition Regulation (FAR) at 48 CFR parts 30 and 31 take precedence over the cost principles in subpart E of 2 CFR part 200 for Federal awards to U.S. and foreign for-profit organizations.

(b) Throughout this part, the term “award” refers to both “grant” and “cooperative agreement” unless otherwise indicated.

(c)(1) In general, research with foreign organizations will not be conducted through grants or cooperative agreements, but instead will be accomplished on a no-exchange-of-

funds basis. In these cases, NASA enters into agreements undertaking projects of international scientific collaboration. NASA’s policy on performing research with foreign organizations on a no-exchange-of-funds basis is set forth at NASA FAR Supplement (NFS) at 48 CFR 1835.016–70 and 1835.016–72. In rare instances, NASA may enter into an international agreement under which funds will be transferred to a foreign recipient.

(2) Grants or cooperative agreements awarded to foreign organizations are made on an exceptional basis only. Awards require the prior approval of the Headquarters Office of International and Interagency Relations and the Headquarters Office of the General Counsel. Requests to issue awards to foreign organizations are to be coordinated through the Office of the Chief Financial Officer, Policy Division.

- 3. Revise § 1800.5 to read as follows:

§ 1800.5 Publication.

The official site for accessing the NASA grant and cooperative agreement policies, including notices, internal guidance, certifications, the NASA Grant and Cooperative Agreement Manual (GCAM), and other source information is on the internet at: https://prod.nais.nasa.gov/pub/pub_library/srba/index.html.

Subpart A—Acronyms and Definitions

- 4. Revise § 1800.10 to read as follows:

§ 1800.10 Acronyms.

The following acronyms supplement the acronyms set forth at 2 CFR 200.0:

ACH Automated Clearing House
 AO Announcement of Opportunity
 CAN Cooperative Agreement Notice
 CFR Code of Federal Regulations
 CNSI Classified National Security Information
 EPA Environmental Protection Agency
 GCAM Grant and Cooperative Agreement Manual

- 5. Revise § 1800.11 to read as follows:

§ 1800.11 Definitions.

The following definitions are a supplement to the definitions set forth at 2 CFR 200.1.

Administrative Grant Officer means a Federal employee delegated responsibility for award administration; e.g., a NASA Grant Officer who has retained award administration responsibilities, or an Office of Naval Research (ONR) Grant Officer delegated award administration by a NASA Grant Officer.

Effective date means the date work can begin under an awarded instrument. This date is the beginning of the period of performance and can be earlier or later than the date of signature on a basic award. Expenditures made prior to the effective date are incurred at the recipient’s risk unless prior written permission has been given by the Grant Officer.

For-profit organization means any corporation, trust, or other organization that is organized primarily for profit.

Grant Officer means a Federal employee responsible for the signing of the Federal award documents.

Historically Black Colleges and Universities (HBCUs) means institutions determined by the Secretary of Education to meet the requirements of 34 CFR 608.2 and listed therein.

Minority-serving Institutions (MSIs) means an institution of higher education whose enrollment of a single minority or a combination of minorities (minority meaning American Indian, Alaskan Native, Black (not of Hispanic origin), Hispanic (including persons of Mexican, Puerto Rican, Cuban, and Central or South American origin), Pacific Islander or other ethnic group underrepresented in science and engineering) exceeds 50 percent of the total enrollment, as defined by the Higher Education Act (HEA) (20 U.S.C. 1067k(3)).

NASA Technical Officer means the NASA official responsible for the programmatic, scientific, and/or technical aspects of assigned applications and awards.

Original signature means an authorized signature as described in this definition. If the system (such as NSPIRES) used to submit required documents allows for electronic signatures, then the submission of the documents, by the authorized representative of the organization serves as the required original signature. If, however, a paper copy submission is

required, all documents submitted shall be appropriately signed in ink with an actual signature by the authorized representative of the organization.

Prescription is defined as the written instructions, to the Grants Officer, for the application of terms and conditions.

Research misconduct is defined in 14 CFR 1275.101. NASA policies and procedures regarding research misconduct are set forth in 14 CFR part 1275.

Summary of research means a document summarizing the results of the entire project, which includes bibliographies, abstracts, and lists of other media in which the research was discussed.

Subpart B—Pre-Federal Award Requirements and Contents of Federal Awards

§§ 1800.208, 1800.209, and 1800.210 [Redesignated as §§ 1800.209, 1800.210, and 1800.211]

■ 6. Redesignate §§ 1800.208, 1800.209, and 1800.210 as §§ 1800.209, 1800.210, 1800.211.

■ 7. Revise newly redesignated § 1800.209 to read as follows:

§ 1800.209 Certifications and representations.

The certifications and representations for NASA may be found in Appendix C of the GCAM, at: https://prod.nais.nasa.gov/pub/pub_library/srba/index.html.

■ 8. Revise newly reedesignated § 1800.211 to read as follows:

§ 1800.211 Information contained in a Federal award.

NASA waives the requirement for the inclusion of indirect cost rates on any notice of Federal award for for-profit organizations. The terms and conditions for NASA may be found in Appendix D of the GCAM at: https://prod.nais.nasa.gov/pub/pub_library/srba/index.html.

Subpart C—Post Federal Award Requirements

■ 9. Revise § 1800.305 to read as follows:

§ 1800.305 Federal payment.

Payments under awards with for-profit organizations will be made based on incurred costs. Standard Form 425 is not required. For-profit organizations shall not submit invoices more frequently than quarterly. Payments to be made on a more frequent basis require the written approval of the Grant Officer.

■ 10. Revise § 1800.306 to read as follows:

§ 1800.306 Cost sharing or matching.

In some cases, NASA research projects require cost sharing or matching. Where cost sharing or matching is required, recipients must secure and document matching funds to receive the Federal award.

■ 11. Revise § 1800.312 to read as follows:

§ 1800.312 Federally-owned and exempt property.

Under the authority of the Chiles Act, 31 U.S.C. 6301 to 6308, NASA has decided to vest title to tangible personal property acquired with Federal funds in nonprofit institutions of higher education and nonprofit organizations whose primary purpose is conducting scientific research without further obligation to NASA, including reporting requirements. Award recipients that are not nonprofit institutions of higher education or nonprofit organizations whose primary purpose is conducting scientific research shall adhere to regulations at 2 CFR 200.312 through 200.316.

■ 12. Revise § 1800.339 to read as follows:

§ 1800.339 Remedies for noncompliance.

NASA reserves the ability to impose additional conditions in response to award recipient noncompliance and terminate a Federal award in accordance with 2 CFR 200.339 through 200.343 and as set forth in the GCAM.

■ 13. Revise § 1800.400 to read as follows:

§ 1800.400 Policy guide.

Payment of fee or profit is consistent with an activity whose principal purpose is the acquisition of goods and services for the direct benefit or use of the United States Government, rather than an activity whose principal purpose is Federal financial assistance to a recipient to carry out a public purpose. Therefore, the Grants Officer shall use a procurement contract, rather than a grant or cooperative agreement, in all cases where fee or profit is to be paid to the recipient of the instrument or the instrument is to be used to carry out a program where fee or profit is necessary to achieving program objectives. Grants and cooperative agreements shall not provide for the

payment of any fee or profit to the recipient.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 704

RIN 3133–AF13

Corporate Credit Unions

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: The NCUA Board (Board) is issuing a final rule that amends the NCUA's corporate credit union regulation. The final rule updates, clarifies, and simplifies several provisions of the NCUA's corporate credit union regulation, including: Permitting a corporate credit union to make a minimal investment in a credit union service organization (CUSO) without the CUSO being classified as a corporate CUSO under the NCUA's rules; expanding the categories of senior staff positions at member credit unions eligible to serve on a corporate credit union's board; and amending the minimum experience and independence requirement for a corporate credit union's enterprise risk management expert.

DATES: The final rule is effective December 14, 2020.

FOR FURTHER INFORMATION CONTACT: *Policy and Analysis:* Robert Dean, National Supervision Analyst, Office of National Examinations and Supervision, (703) 518–6652; *Legal:* Rachel Ackmann, Senior Staff Attorney, Office of General Counsel, (703) 548–2601; or by mail at National Credit Union Administration, 1775 Duke Street, Alexandria, VA 22314.

SUPPLEMENTARY INFORMATION:

I. Introduction

a. Legal Authority and Background

The Board is issuing this rule pursuant to its authority under the Federal Credit Union Act (FCU Act).¹ Under the FCU Act, the NCUA is the chartering and supervisory authority for Federal credit unions (FCUs) and the federal supervisory authority for federally insured credit unions (FICUs).

¹ 12 U.S.C. 1751 *et seq.*

The FCU Act grants the NCUA a broad mandate to issue regulations governing both FCUs and FICUs. Section 120 of the FCU Act is a general grant of regulatory authority and authorizes the Board to prescribe regulations for the administration of the FCU Act.² Section 209 of the FCU Act is a plenary grant of regulatory authority to the NCUA to issue regulations necessary or appropriate to carry out its role as share insurer for all FICUs.³ The FCU Act also includes an express grant of authority for the Board to subject federally chartered central, or corporate, credit unions to such rules, regulations, and orders as the Board deems appropriate.⁴

Part 704 of the NCUA's regulations implements the requirements of the FCU Act regarding corporate credit unions.⁵ In 2010, the Board comprehensively revised the regulations governing corporate credit unions to provide longer-term structural enhancements to the corporate system in response to the financial crisis of 2007–2009.⁶ The provisions of the 2010 rule successfully stabilized the corporate system and improved corporate credit unions' ability to function and provide services to natural person credit unions. Since 2010, and as part of the Board's continuous reevaluation of its regulation of corporate credit unions, the Board has amended part 704 on several occasions.⁷ Part 704 was last amended in 2017, when the Board amended corporate credit union capital standards to change the calculation of capital after a consolidation and to set a retained earnings ratio target in meeting prompt corrective action (commonly referred to as PCA) standards.⁸

b. Regulatory Review

Generally, the NCUA reviews all of its existing regulations every three years. The NCUA's Office of General Counsel maintains a rolling review schedule that identifies one-third of its existing regulations for review each year and provides notice to the public of those regulations under review so the public may have an opportunity to comment. Part 704 was part of the Office of General Counsel's 2019 annual regulatory review.⁹ The Board received

several comments on updating part 704 as part of the 2019 annual regulatory review.

II. Proposed Rule

On February 20, 2020, the Board approved a notice of proposed rulemaking to update, clarify, and simplify several provisions of part 704 (proposed rule).¹⁰ The proposal provided for a 60-day comment period, which was later extended by 60 days due to COVID–19.¹¹ The comment period ended on July 27, 2020.

III. Final Rule and Discussion of Comments

The NCUA received 35 comment letters on the proposed rule. Comments were received from credit unions, both corporate and natural persons, credit union leagues and trade associations, individuals, corporate CUSOs, and an association of state credit union supervisors. Many of the commenters supported the stated goal, to update, clarify, and simplify several provisions of the NCUA's corporate credit union regulation, however, almost all of the commenters expressed concerns about specific aspects of the proposal. Most commenters believed that the proposed rule did not provide sufficient relief and requested additional areas of burden reduction that were beyond the scope of the proposed rule. In response to the comments received, the Board has made several changes to the final rule. The final rule: (1) Permits a corporate credit union to make a minimal investment in a CUSO without the CUSO being classified as a corporate CUSO and subject to heightened NCUA oversight; (2) expands the categories of senior staff positions at member credit unions eligible to serve on a corporate credit union's board; (3) removes the experience and independence requirement for a corporate credit union's enterprise risk management expert; (4) clarifies the definition of a collateralized debt obligation; and (5) simplifies the requirement for net interest income modeling. The specific details of the final rule, including changes as a result of the comments received, are discussed below.

A. Minimal Investment in Natural Person CUSOs

Part 704 includes specific regulations for a corporate credit union's investment and lending activity and permits a corporate credit union to invest in and lend to a corporate CUSO. A corporate CUSO is defined as an

entity that is at least partly owned by a corporate credit union; primarily serves credit unions; restricts its services to those related to the normal course of business of credit unions;¹² and is structured as a corporation, limited liability company, or limited partnership under state law.¹³

Similar to natural person credit union service organizations (NP CUSOs), the Board cannot regulate corporate CUSOs directly, but it can, for safety and soundness reasons, regulate the types of investments that corporate credit unions make and whether a corporate credit union may invest in a CUSO. Part 704 includes several prudential requirements to ensure corporate credit union investment in and lending to corporate CUSOs is safe and sound. For example, part 704 regulates aggregate corporate credit union investment in and lending to corporate CUSOs. Part 704 also includes customer base requirements, permissible activities, accounting and audit standards, and requires NCUA access to corporate CUSO facilities, books, and records. In general, many of the prudential standards for corporate CUSOs are more restrictive than the standards for NP CUSOs.¹⁴ The Board has historically imposed more restrictive standards for corporate CUSOs as they may serve hundreds or even thousands of natural person credit unions and pose unique systemic risk.¹⁵ Additionally, core functions of corporate credit unions that pose systemic risk could be moved to corporate CUSOs. The Board has expressed concern that the movement of these core functions to entities that are not directly regulated by the NCUA could increase the systemic risk associated with corporate CUSOs, and the Board wants to ensure it has a degree of oversight and control of these activities.¹⁶

¹² See, 12 CFR 704.11(e).

¹³ 12 CFR 704.11(a).

¹⁴ For example, the permissible activities for a corporate CUSO are more limited than the permissible activities for a NP CUSO. A corporate CUSO may seek Board permission to engage in additional activities, but the process can be burdensome. In addition, corporate CUSOs are also subject to more rigorous NCUA oversight. A corporate CUSO must agree to give the NCUA complete access to its personnel, facilities, equipment, books, records, and other documentation that the NCUA deems pertinent. In contrast, NP CUSOs must provide the NCUA with complete access to its books and records and the ability to review its internal controls, as deemed necessary by the NCUA. Finally, corporate CUSOs must provide quarterly financial statements to the corporate credit union. In contrast, NP CUSOs must prepare quarterly financial statements, but do not have to provide the statements to FCUs.

⁸ 82 FR 55497 (Nov. 22, 2017).

⁹ See, <https://www.ncua.gov/regulation-supervision/rules-regulations/regulatory-review>.

¹⁰ 85 FR 17288 (Mar. 27, 2020).

¹¹ 85 FR 20431 (Apr. 13, 2020).

As stated above, a corporate CUSO is defined as an entity that is at least partly owned by a corporate credit union; primarily serves credit unions; restricts its services to those related to the normal course of business of credit unions; and is structured as a corporation, limited liability company, or limited partnership under state law.¹⁷ The definition is broad and includes no exception for de minimis, non-controlling equity investments. Accordingly, any corporate credit union equity interest in a CUSO, regardless of how small a share of the CUSO the corporate credit union owns, is sufficient to designate the CUSO as a corporate CUSO and subject it to additional requirements under part 704.

The proposed rule amended the definition of corporate CUSO so that a corporate credit union could make a de minimis, non-controlling investment in a NP CUSO without the CUSO being deemed a corporate CUSO. Almost all commenters explicitly approved of this proposed change, and no commenters objected to it. The Board is finalizing it as proposed.

As stated in the proposed rule, the Board has reconsidered its position that any corporate credit union investment in a CUSO must be subject to enhanced standards under part 704 because the Board believes that a corporate credit union's non-controlling investment does not pose the same systemic risks to the credit union system as a controlling investment. In particular, it is unlikely that a corporate credit union would move its essential functions into a non-controlled CUSO.

The Board has also considered the benefits of permitting corporate credit unions to make de minimis, non-controlling investments in NP CUSOs. Compared to corporate CUSOs, NP CUSOs are permitted to engage in a broader range of permissible activities and services. Consequently, NP CUSOs are often a source of collaboration and innovation among FICUs that may result in the origination of new products and services. To compete effectively in today's technology-based financial service market, FICUs may need to rely increasingly on pooling their resources to fund CUSOs and to build the necessary infrastructure. The costs for research and development, acquisition, implementation, and specialized staff capable of managing these new technologies may be prohibitive for all but a very few of the largest FICUs. CUSOs may provide the means for FICUs to collectively address these challenges and may enable FICUs to

collaboratively develop technologies that better serve their members.

Without the opportunity to invest in NP CUSOs, a corporate credit union may be restricted in its ability to participate in this process. The Board believes that by expanding corporate credit union investment authorities, while still maintaining necessary safeguards, it can place corporate credit unions in a better position to participate in the development of new products and services. NP CUSOs will also benefit from a larger pool of potential investors, which may enable further research and development during this period of rapid technological growth.

In addition to amending the definition of corporate CUSO to permit de minimis, non-controlling investments in NP CUSOs, the final rule also makes several conforming amendments to part 704. The specific details of the amendments are discussed below.

§ 704.2 Definitions

Consolidated credit union service organization. Generally, consolidated CUSOs are those majority-owned by a corporate credit union. The proposed rule amended the definition of consolidated CUSO to use the newly defined term "CUSO" for clarity. Under the proposed rule, a consolidated CUSO was defined as any CUSO the assets of which are consolidated with those of the corporate credit union for purposes of reporting under Generally Accepted Accounting Principles (GAAP). The Board received no comment on the definition of consolidated CUSO and is finalizing the definition as proposed.

Corporate CUSO. As discussed above, the proposed rule amended the definition of a corporate CUSO. Under the proposed rule, a CUSO is designated as a corporate CUSO only if one or more corporate credit unions have a controlling interest. A corporate credit union is considered to have a controlling interest if: (1) The CUSO is consolidated on a corporate credit union's balance sheet; (2) a corporate credit union has the power, directly or indirectly, to direct the CUSO's management or policies; or (3) a corporate credit union owns 25 percent or more of the CUSO's contributed equity, stock, or membership interests.¹⁸ A CUSO also is designated as a corporate CUSO if the aggregate corporate credit union ownership of all corporates investing in the CUSO meets or exceeds 50 percent of the CUSO's

¹⁸ The definition is related to the definition of control in the Federal Deposit Insurance Act for notices filed under the Change in Bank Control Act. 12 U.S.C. 1817(j).

contributed equity, stock, or membership interests. The Board is concerned that if several corporate credit unions have a majority ownership interest in a CUSO, the CUSO could present the same risk to the credit union system as a CUSO that is controlled by one corporate credit union. If any of these four conditions are met, then the CUSO meets the definition of a corporate CUSO and is subject to additional requirements under part 704.¹⁹ No commenters suggested any changes to the definition of a corporate CUSO and the Board is finalizing the definition as proposed.

Credit Union Service Organization (CUSO). The proposed rule defined the term CUSO for purposes of part 704. Under the proposed rule, a CUSO is both a NP CUSO under part 712 and a corporate CUSO under § 704.11. The definition makes it clear that the term CUSO applies to both NP CUSOs and corporate CUSOs unless otherwise stated. For example, when calculating tier 1 capital under part 704, a corporate credit union must deduct, in part, investments in any "unconsolidated CUSO." By using the term "CUSO," instead of the defined terms "corporate CUSO" and "consolidated CUSO," the proposed rule made clear that a corporate credit union must deduct unconsolidated investments in both a NP CUSO and a corporate CUSO. The Board received no comments on this definition and is finalizing it as proposed.²⁰

§§ 704.5 Investments, 704.6 Credit Risk Management, and 704.7 Lending

The proposed rule removed references to corporate CUSOs and instead referred to the general term CUSO because those provisions continue to apply to a corporate credit union investing in and lending to both NP CUSOs and corporate CUSOs, as explained in detail below in the discussion of the proposed changes to § 704.11. The Board received no comments on these changes and is finalizing it as proposed.²¹

§ 704.11 Credit Union Service Organizations (CUSOs)

Under the proposed rule, § 704.11 was reorganized for clarity, however, the substantive requirements for corporate

¹⁹ The definition of corporate CUSO also is moved to § 704.2 for consistency with the location of other definitions in part 704.

²⁰ The Board received a substantial number of comments on the aggregation of loans to NP CUSOs and corporate CUSOs. Those comments will be discussed below.

²¹ As noted above, the Board received a substantial number of comments on the aggregation of loans to NP CUSOs and corporate CUSOs and addresses these below.

¹⁷ 12 CFR 704.11(a).

CUSOs were not amended. The intent of the reorganization is to be clear that certain requirements apply to a corporate credit union's investment in or lending to both NP CUSOs and corporate CUSOs, certain requirements apply only to NP CUSOs, and other requirements apply only to corporate CUSOs.

The proposed rule set forth the requirements for all corporate credit union investments in or lending to CUSOs. The proposed rule, in § 704.11(a), stated that the aggregate investment and lending limits apply regardless of whether a corporate credit union's investment or loan is to a NP CUSO or a corporate CUSO. The proposed rule did not intend to amend the current aggregate limitations on investments and lending.²² Under the current rule, however, the aggregate investment and lending limits applied only to corporate CUSOs. A majority of commenters were concerned that including loans made to NP CUSOs in the aggregate limits would unintentionally limit corporate credit union lending to NP CUSOs. Commenters generally requested that the final rule exclude loans to NP CUSOs from the aggregate lending limits. A few commenters stated that they are supportive of aggregate limitations for investments in NP and corporate CUSOs, as well as combined limits for loans to and investments to an individual CUSO set as a percentage of total capital, but not aggregating lending to NP and corporate CUSOs. The Board disagrees that the proposed rule would substantially limit lending to NP CUSOs. First, the Board does not believe that corporate credit unions are currently engaging in substantial lending activities to NP CUSOs. In addition, under the current rule, corporate credit unions are not generally permitted to make loans to NP CUSOs.²³ Additionally, for safety and soundness reasons, the Board believes it is prudent for lending and investments to both natural person and corporate CUSOs to be subject to the aggregate limitations. The Board would have safety and

soundness concerns if corporate credit unions lending to NP CUSOs were not subject to the limitations otherwise applicable to corporate CUSOs. The Board, however, notes that if a particular corporate credit union has a material volume of loans to a natural person CUSO, it may request that the Board issue a waiver from the aggregate lending and investment limits in the final rule under 12 CFR 704.1(b). The Board would consider such a waiver on a case-by-case basis. Therefore, the Board has not made any changes to the aggregate investment and lending limits and is adopting the limitations without change in the final rule. Therefore, a corporate credit union that has already invested in or loaned the maximum permitted under the current rule is not authorized to invest or lend any additional money. Instead, such a corporate credit union must reallocate its investments or loans if it seeks to make any new investments that are prohibited.

In § 704.11(b), the proposed rule stated that all corporate credit union loans to CUSOs are subject to due diligence requirements.²⁴ The proposed rule, as does the current rule, required corporate credit unions to comply with certain due diligence requirements from the NCUA's member business loans rule before making a loan to a CUSO. Under the proposed rule, corporate credit unions are subject to the commercial loan policy and due diligence requirements in the NCUA's member business loans rule²⁵ for lending to both NP CUSOs and corporate CUSOs. Several commenters objected to subjecting corporate credit union loans to the commercial loan policy and due diligence requirements in the revised MBL rule. Commenters generally stated that the requirements in the MBL rule are written for the lending activities and capital structure of natural person credit unions. Commenters also stated that corporate credit union lending activities are adequately regulated by the requirements of § 704.7 and, if there is a need for additional rulemaking regarding lending to CUSOs, that it is better to make changes to § 704.7 directly. One commenter also noted that an issue with referencing the MBL rule is that its lending limits are based upon net worth, which is a term that is

undefined for corporate credit unions. The Board notes that part 723 adopted principles-based standards for commercial loan policies and due diligence standards. In general, part 723 does not require prescriptive standards. Accordingly, the Board believes that the principles outlined in part 723 are appropriate for most loans to corporate and NP CUSOs, which the Board considers general commercial loans. The Board notes that to the extent part 723 refers to credit unions establishing limitations based on net worth, such limitations established by a corporate credit union would be based on tier 1 capital. As discussed by the commenters, corporate credit unions do not use the terminology net worth.

Therefore, under the final rule, a corporate credit union making loans to NP or corporate CUSOs must have a board-approved policy that ensures corporate credit union lending activities are performed in a safe and sound manner by providing for ongoing control, measurement, and management of CUSO lending. The policy should also include qualifications and experience requirements for personnel involved in underwriting, processing, approving, administering, and collecting loans to CUSOs. The corporate credit union must also have a loan approval process, underwriting standards, and risk management processes commensurate with the size, scope and complexity of its CUSO lending. The Board believes these due diligence requirements are the minimum requirements necessary to ensure that corporate credit unions are engaging in safe and sound lending practices.

The Board has made one change to this section in light of commenters concerns about burden. The Board has added an exception for loans and lines of credit to NP and corporate CUSOs that are fully secured by U.S. Treasury or agency securities. Loans that are fully secured by U.S. Treasury or agency securities present less risk and do not require the same due diligence requirements as standard commercial loans. With this limited modification, the Board does not believe these requirements should place a new burden on corporate credit unions because any corporate credit union that is currently making a loan to a corporate CUSO should be following these basic safety and soundness principles.

In § 704.11(c), the proposed rule set forth the regulations governing corporate credit union investment in and lending to NP CUSOs. The proposed rule stated that corporate credit union investment in and lending to NP CUSOs are subject to part 712 of

²² 12 CFR 704.11(b). In general, the aggregate of all investments in corporate CUSOs that a corporate credit union may make must not exceed 15 percent of a corporate credit union's total capital. The aggregate of all investments in and loans to corporate CUSOs that a corporate credit union may make must not exceed 30 percent of a corporate credit union's total capital. A corporate credit union may lend to corporate CUSOs an additional 15 percent of total capital if the loan is collateralized by assets in which the corporate has a perfected security interest under state law.

²³ 12 CFR 704.11(h) ("A corporate credit union is not authorized to . . . loan to a CUSO under part 712 of this chapter.")

²⁴ 12 CFR 704.11(c). The current rule includes a cross-reference to due diligence requirements in the member business loan rule. The member business loan rule, however, was updated in 2015 and the cross-referenced requirements have been removed. Accordingly, the proposed rule updated the cross references to reflect the revised member business loan rule.

²⁵ 12 CFR 723.4.

this chapter. The intent of this section is to be clear that a CUSO is either governed under part 704 as a corporate CUSO, as discussed below, or subject to part 712 as a NP CUSO. A corporate credit union investment in a CUSO of a state-chartered natural person credit union is also subject to the requirements in part 712. The Board has made one clarifying change to this section. Under the final rule, the Board is clarifying that the CUSO of a state-chartered natural person credit union is subject to the requirements in part 712 as if the CUSO is a CUSO of an FCU. The Board wants to clarify that all of the requirements in part 712, such as the activity limitations in § 712.5, are necessary for any corporate credit union to invest in or loan to a NP CUSO, regardless of the charter type of the natural person credit union. If a CUSO does not meet the standards in part 712, then a corporate credit union cannot make the investment or loan.

In § 704.11(d), the proposed rule, like the current rule, included safety and soundness requirements for corporate credit union investments in and loans to corporate CUSOs. In general, the proposed rule did not make any substantive changes to the existing prudential requirements. The requirements were reorganized for clarity and as part of the general restructuring of § 704.11, but were not otherwise substantively amended.²⁶ No commenters objected to these proposed provisions, and the Board is finalizing them as proposed.

Finally, in § 704.11(e), the proposed rule included one new prudential requirement for corporate credit union investments in and loans to corporate CUSOs. The proposed rule stated that any subsidiary of a corporate CUSO is automatically designated a corporate CUSO. The proposed rule also provided that all tiers or levels of a corporate CUSO's structure are subject to the requirements for corporate CUSOs. No commenters objected to this proposed provision, and the Board is finalizing it as proposed. The Board believes this level of oversight is necessary for all tiers of a corporate CUSO because corporate CUSOs affect not only the health of the investing corporate credit union, but also the health of the credit union system as a whole. Many corporate CUSOs serve natural person credit unions directly. As stated previously, the Board has historically been concerned that some activities might migrate from corporate credit

unions to CUSOs and their subsidiaries, and the Board needs to ensure each layer in the corporate structure is subject to certain minimal prudential requirements.

§ 704.19 Disclosure of Executive Compensation

Section 704.19 currently requires that each corporate credit union annually prepare and maintain a document that discloses the compensation of certain employees, including compensation received from a corporate CUSO.²⁷ The proposal amended § 704.19 to require that employee compensation from either a NP CUSO or a corporate CUSO must be reported. The Board notes that under the current rule to facilitate this disclosure, § 704.11(g) requires a corporate CUSO to disclose compensation paid to any employees that are also employees of a corporate credit union lending to, or investing in, the CUSO. This provision places the burden of disclosure on the corporate CUSO. The proposed rule, however, did not include a similar requirement for NP CUSOs.²⁸ No commenters objected to this proposed provision, and the Board is finalizing it as proposed. Accordingly, under the final rule, the dual employee is required to disclose his or her compensation from the NP CUSO for the corporate credit union to make the required disclosure.

B. Corporate Credit Union Board Representation

Section 704.14 currently requires that at least a majority of a corporate credit union's board members must serve on the corporate credit union's board as a representative of a member credit union.²⁹ In addition, any candidate for a position on the board of a corporate credit union must hold a senior management position at a member credit union and hold that position at the time he or she is seated on the board of a corporate credit union. Currently, only an individual who holds the position of chief executive officer, chief financial officer, chief operating officer, or treasurer/manager at a member credit union, and will hold that position at the time he or she is seated on the corporate credit union board if elected, may seek

²⁷ 12 CFR 704.19(a).

²⁸ The Board notes, however, that part 712 prohibits officials and senior management employees, and their immediate family members of an FCU with an outstanding loan or investment from receiving any salary, commission, investment income, or other income or compensation from the CUSO, either directly or indirectly. 12 CFR 712.8.

²⁹ 12 CFR 704.14.

election or re-election to the corporate credit union board.

The proposed rule expanded the credit union officials eligible to serve on a corporate credit union board. The proposed rule no longer expressly limited the corporate credit union board to the above stated positions and instead included any person in a senior staff position at a member credit union. The proposed rule then listed the current positions as examples of senior staff positions that are eligible to serve on a corporate credit union board. The proposed rule also included two new positions, chief information officer and chief risk officer, in the list of examples of senior staff positions eligible to serve on a corporate credit union board. No commenters objected to this proposed provision and the Board is finalizing it as proposed. One commenter, however, urged the Board to defer to state rules with respect to governance matters such as board qualifications. The commenter further stated that it believes that the homogenization of the corporate credit union governance system presents risks by stifling innovation. The commenter, however, offered no specific suggestions. The Board believes that certain minimum standards are necessary to ensure adequate corporate governance.

The Board believes that officials who hold a senior management position at a member credit union are qualified individuals who could offer expertise as a corporate credit union board member. Not only do corporate credit union members have more flexibility in choosing board members, but expanding eligible senior staff positions, such as chief information officer and chief risk officer, widens the range of expertise on corporate credit union boards.

C. Enterprise Risk Management

Section 704.21 requires corporate credit unions to develop and follow an enterprise risk management policy.³⁰ A corporate credit union must also establish an enterprise risk management committee (ERMC) and include an independent risk management expert on the committee. The Board adopted these requirements in 2011 due to concerns that corporate credit unions were not adequately focused on the aggregation of exposures across entire institutions, even though the Board believed that corporate credit unions were adequately focused on individual risk exposures.³¹

The current rule includes several specific requirements regarding the

³⁰ 12 CFR 704.21.

³¹ 76 FR 23861 (Apr. 29, 2011) and 80 FR 25932 (May 6, 2015).

²⁶ The proposed rule included a few non-substantive language changes that are only intended to streamline the provision and enhance clarity.

independent risk management expert on the committee. The risk management expert must have at least five years of experience in identifying, assessing, and managing risk exposures.³² This experience must be commensurate with the size of the corporate credit union and the complexity of its operations. In addition, the current rule provides what constitutes independence. A risk management expert qualifies as independent if: (1) The expert reports to the ERM and to the corporate credit union's board of directors; (2) neither the expert, nor any immediate family member of the expert, is supervised by or has any material business or professional relationship with the chief executive officer (CEO) of the corporate credit union, or anyone directly or indirectly supervised by the CEO; and (3) neither the expert, nor any immediate family member of the expert, has had any of the previously described relationships for at least the past three years.³³ The Board specifically included experience and independence requirements to ensure the enterprise risk management expert is adequately qualified and not influenced by the operational side of the corporate credit union.³⁴ The proposed rule removed the prescriptive independence and experience requirements. No commenters objected to this proposed provision, and the Board is finalizing with one technical amendment. The final rule clarifies that the risk management expert may report either to the corporate credit union's board of directors or to the ERM. Several commenters also requested that the prescriptive independence requirements be removed from the final rule. The Board clarifies that the prescriptive independence provisions are also removed under the final rule.

The Board no longer believes that it is necessary for prescriptive experience and independence requirements. The Board believes the corporate credit union should have more discretion in choosing a qualified risk management expert. The Board does not believe that a prescriptive five-year experience requirement is necessary. The Board believes that corporate credit unions are in the best position to determine the appropriate level of experience necessary for the position. The final rule also permits the risk management expert to report directly to the ERM or the corporate credit union's board.

Additionally, the Board believes that the effectiveness of risk management

practices is driven by a multitude of factors, to include policies, processes, and qualified knowledge. Many corporate credit unions have integrated their enterprise risk management function into their business decision making, and at many corporate credit unions, internal corporate staff possess the skills and experience to capably manage the enterprise risk management program. By and large, corporate credit unions have improved their ability to assess risk and effectively challenge evaluations of risk since the current rule was first adopted. The final rule provides the corporate credit unions flexibility to choose an internal risk management expert instead of engaging an outside consultant.

The Board, however, notes that even though independence is no longer an explicit requirement, for best enterprise risk management practices, the expert should have appropriate stature and authority to effectively manage and lead an enterprise risk management program. The expert must be competent to analyze risks across the institution and have the capability to communicate those risks to the board or ERM despite potential influence from the operational side of the corporate credit union. The NCUA will evaluate the adequacy of a corporate credit union's enterprise risk management practices through the supervisory process. Sound risk management is a cornerstone responsibility of a credit union's leadership; therefore, Capital Adequacy, Asset Quality, Management, Earnings, and Liquidity/Asset-Liability Management (CAMEL) and risk ratings will incorporate the supervisory team's assessment of this area. Weaknesses in risk management may result in supervisory actions.

D. Natural Person Credit Union Subordinated Debt Instruments

The Board recently issued a proposed rule to permit low-income designated credit unions, complex credit unions, and new credit unions to issue subordinated debt instruments for purposes of regulatory capital treatment (subordinated debt NPRM).³⁵ If the Board adopts the proposed rule as final, it expects additional credit unions to begin issuing subordinated debt instruments. Therefore, the Board believes it is necessary to clarify whether corporate credit unions may purchase such instruments and, if so, the treatment of the investments under part 704.

The proposed rule created a new definition for the term natural person

credit union subordinated debt instrument. The proposed rule defined a natural person credit union subordinated debt instrument as any debt instrument issued by a natural person credit union that is subordinate to all other claims against the credit union, including the claims of creditors, shareholders, and either the National Credit Union Share Insurance Fund (NCUSIF) or the insurer of a privately insured credit union. The Board intends for this definition to include all instruments issued under the subordinated debt NPRM. No commenters objected to this proposed definition. The Board, however, is not finalizing the definition as part of this final rule. The Board believes it is prudent to include any changes related to the subordinated debt NPRM with the associated subordinated debt final rule. At this time, the Board does not envision any changes to the proposed definition.

The proposed rule also clarified that corporate credit unions may purchase the natural person subordinated debt instruments. This authority is derived from their lending authority because subordinated debt instruments are issued under a natural person credit union's borrowing authority. Additionally, natural person credit unions are also permitted, subject to various restrictions and limits, to purchase such subordinated debt instruments from other natural person credit unions under their lending authority. Treating the purchase of such subordinated debt instruments as lending ensures consistent treatment between natural person credit unions and corporate credit unions. The final rule does not explicitly state that a corporate credit union may purchase a natural person credit union subordinate debt instrument because the Board believes corporate credit unions' current lending authority is sufficiently broad to include purchasing subordinated debt instruments.

The proposed rule, however, required that a corporate credit union fully deduct the amount of the subordinated debt instrument from its tier 1 capital to ensure consistent treatment between investments in the capital of other corporate credit unions and natural person credit unions. Corporate credit unions are currently required to deduct from tier 1 capital any investments in perpetual contributed capital and nonperpetual capital accounts that are maintained at other corporate credit unions.³⁶ The proposed rule also asked

³² 12 CFR 704.21(c).

³³ 12 CFR 704.21(d).

³⁴ 76 FR 23861 (Apr. 29, 2011).

³⁵ 85 FR 13982 (Mar. 10, 2020).

³⁶ See the definition of tier 1 capital in 12 CFR 704.2.

a question on whether it would be more appropriate to prohibit corporate credit unions from purchasing subordinated debt instruments. No commenter recommended restricting corporate credit union authority to purchase subordinated debt instruments.

The Board believes that investments in natural person credit union subordinated debt instruments should be treated similar to investments in perpetual contributed capital and nonperpetual capital accounts that are maintained at other corporate credit unions as such instruments may qualify as regulatory capital for the natural person credit union. The Board is also concerned about systemic risk if corporate credit unions own a significant amount of natural person credit union issued subordinated debt. Finally, a natural person credit union subordinated debt instrument would be in a first loss position, even before the NCUSIF and any private insurance fund or entity. Therefore, an involuntary liquidation of the issuing credit union would potentially mean large, and likely total, losses for the holders of those subordinated obligations. The Board believes that fully deducting such instruments from tier 1 capital ensures any potential losses do not affect the capital position of the investing corporate credit union. This measured approach strikes the right balance between providing corporate credit unions the flexibility to purchase natural person credit union subordinated debt instruments and avoiding undue systemic risk to the credit union system. For the same reasons as the definition of natural person subordinated debt instrument, the final rule is not including this amendment. The amendment will be included with any final rule on subordinated debt.

E. Approved Corporate CUSO Activities

Part 704 does not list the permissible activities for corporate CUSOs in the regulatory text of part 704 of the Code of Federal Regulations, unlike part 712, which does so for NP CUSOs.³⁷ Instead, § 704.11 requires that, generally, a corporate CUSO must agree that it will limit its services to brokerage services, investment advisory services, and other categories of services as preapproved by NCUA and published on NCUA's website.³⁸ A CUSO that desires to engage in an activity not preapproved by NCUA can apply to NCUA for that

approval. To increase transparency and make it easier for corporate credit unions to determine if an activity has previously been determined by the Board to be permissible, the proposed rule contained a provision to replace the permissible activities list from the NCUA website with a new appendix to part 704. No commenter supported this change, and almost all commenters specifically objected to it. Commenters generally stated that the change would increase regulatory burden and make it more difficult for corporate CUSOs to obtain timely approval to add permissible activities to the list. Commenters were primarily concerned about the added burden of formally adding activities through notice-and-comment rulemaking. Other commenters also discussed the need to make rapid changes to the list of preapproved activities in response to the pace of development from financial technology (fintech) companies. Commenters also suggested moving the list of preapproved activities for NP CUSOs to the NCUA's website. The Board notes that moving the list of preapproved activities for NP CUSOs would be outside the scope of the proposed rule. Finally, one commenter recommended codifying the practice of consulting with state regulators before making a determination on "other activities" for state chartered corporate credit union CUSOs.

In light of commenters' feedback, the Board will not adopt this proposed change regarding approval of corporate CUSO activities. The proposed change was intended to increase transparency. The Board is mindful of any unintended procedural burden the change might entail and therefore declines to adopt it. Instead, the agency's website will continue to list approved corporate CUSO activities. The current process to request approval of new corporate CUSO activities remains unchanged and is described on the web page that includes the list of approved activities.³⁹

F. Definition of Collateralized Debt Obligation

Corporate credit unions are prohibited from purchasing certain overly complex or leveraged investments, including collateralized debt obligations (commonly referred to as CDOs).⁴⁰ Under the current rule, the term CDO

means a debt security collateralized by mortgage-backed securities, other asset-backed securities, or corporate obligations in the form of nonmortgage loans or debt. The term does not include: (1) Senior tranches of REMICs consisting of senior mortgage- and asset-backed securities; (2) Any security that is fully guaranteed as to principal and interest by the U.S. Government or its agencies or its sponsored enterprises; or (3) Any security collateralized by other securities where all the underlying securities are fully guaranteed as to principal and interest by the U.S. Government or its agencies or its sponsored enterprises.⁴¹ The proposed rule amended the definition of CDO to clarify that the definition includes both loans and debt securities. The proposed rule changed the defined term to "collateralized loan or debt obligation," but did not otherwise amend the definition. No commenter objected to the substance of the change, however, several commenters requested a revision to the proposed language. Commenters generally wanted to use language that is consistent with industry terminology and recommended having separate definitions for CDOs and Collateralized Loan Obligations (referred to as "CLOs"). In response to commenter concerns about clarity, the final rule uses the term "collateralized debt obligation or collateralized loan obligation." The Board intends no substantive changes as a result of the amended terminology and has made no change to the definition. This amendment is only intended to resolve any confusion among industry participants concerning whether collateralized loans meet the definition and are therefore prohibited. The Board believes amending the name of the defined term clarifies the Board's intent that collateralized loans meeting the definition are also prohibited.

G. Net Interest Income Modeling

Under the current rule, a corporate credit union must perform net interest income (NII) modeling to project earnings in multiple interest rate environments for a period of no less than two years.⁴² NII modeling must, at minimum, be performed quarterly, including once on the last day of the calendar quarter. The proposed rule made a change to the timeframe for NII. Under the proposed rule, a corporate credit union is not required to perform NII modeling for two years and instead only is required to perform modeling for

³⁷ 12 CFR 712.5(b).

³⁸ <https://www.ncua.gov/regulation-supervision/corporate-credit-unions/corporate-cuso-activities/approved-corporate-cuso-activities>.

³⁹ Corporate CUSO Activities, <https://www.ncua.gov/regulation-supervision/corporate-credit-unions/corporate-cuso-activities>.

⁴⁰ The prohibition on purchasing CDOs was intended to protect corporate credit unions from the potential for excessive investment losses. 75 FR 64786, 64793 (Oct. 20, 2010).

⁴¹ 12 CFR 704.2.

⁴² 12 CFR 704.8(e).

a period of no less than one year. In general, commenters were either indifferent to or not supportive of the proposed change. Some commenters noted that ALM models already are built for the two-year NII projections, so this change will not provide any real regulatory relief. Some commenters stated that reducing the required NII modeling from two years to one year will not increase the accuracy of the NII forecast (however another commenter stated that the one-year forecasts are more accurate as there are more unknowns impacting a balance sheet using the two-year timeframe). Several commenters stated that the same inputs and assumptions will still have to be incorporated into the NII model and that the two-year timeframe was appropriate. Other commenters recommended that the NCUA instead increase the “weighted-average life” (WAL) limit beyond the current two-year limit. These commenters stated that a longer-term WAL would allow corporate credit unions to more effectively manage NII through varying economic and interest rate scenarios. The Board has not adopted any amendments to the WAL at this time. The Board continues to believe that the two-year WAL limit reflects the fact that corporate credit unions are, first and foremost, providers of payment systems, which, in turn, requires some matching of the investment portfolio to the short term payment liabilities to ensure liquidity for the payments system. The Board believes that a longer-term WAL is unnecessary given the primary purpose of corporate credit unions as providers of payment systems.

Therefore, the Board is only amending the requirements for NII given that corporate credit unions are also subject to a two-year WAL limit.⁴³ Under the current rule, a corporate credit union must test its financial assets at least quarterly, including once on the last day of the calendar quarter, for compliance with this limitation. If the WAL of a corporate credit union’s assets exceeds two years on the testing date, this test must be calculated at least monthly, including once on the last day of the month, until the WAL is below two years.

The Board believes that NII modeling performed over a longer period than the WAL limits for asset maturities is less useful because the corporate credit union also has to estimate what reinvestments occur over the two-year period beyond simply estimating interest cash flows on assets. In addition, corporate credit unions

already conduct net economic value analyses which capture a long-term view of interest rate risk. Allowing corporate credit unions to model NII over a one year period provides increased flexibility for corporate credit unions to measure NII over a shorter, and more appropriate, time period, such as when financial assets and liabilities are predominately short term (such as less than one year). The Board believes that NII modeling over a one-year period sufficiently captures a corporate credit union’s short-term interest rate risk. To the extent commenters stated their models are already based on two-year projections, the final rule does not require corporate credit unions to change their models. The final rule only requires that a corporate credit union must perform NII modeling for a period of *no less than* 1 year. Therefore, a model projecting a period of two years still complies with the final rule.

H. Technical Amendment

A few commenters requested that the Board clarify which type of loans would need to comply with the MBL rule. The current rule states that loans, lines of credit, and letters of credit to other members not excluded under § 723.1(b) must comply with part 723 unless the loan or line of credit is fully guaranteed by a credit union or fully secured by U.S. Treasury or agency securities. The current regulation also states that those guaranteed and secured loans must comply with the aggregate limits of § 723.16 but are exempt from the other requirements of part 723. Commenters suggested a technical correction to update the cross-reference, which cites to an outdated provision of the MBL rule. The Board has made the requested technical amendment. Under the final rule, the section of the MBL rule cross-referenced is § 723.8.

I. Comments Outside the Scope of the Proposed Rule

Many commenters recommended that the Board consider additional burden reduction for corporate credit unions. In general, these recommendations are not a logical outgrowth of the proposed rule and, thus, are outside the scope of this rulemaking. A general discussion of the recommendations is included below.

1. A few commenters requested that the Board clarify that the existing 15 percent limit on commercial mortgage-backed securities applies to “private” commercial mortgage-backed securities and not agency commercial mortgage-backed securities (ACMBS). These commenters stated that ACMBS carry the same credit risk as agency residential MBS.

2. Several commenters requested additional flexibility to allow corporate credit unions with higher capital ratios to extend their WAL limitations. These commenters also recommended that a liquidity management policy and procedures be established that incorporate the following: Liquidity strategy for various economic conditions; defined liquidity risk profiles under various economic conditions; and liquidity buffer consisting of highly liquid assets. Some commenters also suggested including permission for longer WAL limitations in Appendix B, Expanded Authorities.

3. Several commenters also recommended that the Board extend the maturity limit on secured borrowing from 180 days to 1 year to cover a full cycle of seasonal cash outflows (one commenter recommended two years). Commenters also requested a change in the limit for secured non-liquidity borrowings from the tier 1 capital in excess of five percent of moving daily average net assets to 100 percent of total capital (one commenter recommended using tier 1 capital).

4. Several commenters requested that the Board permit non-CUSO investments for the purpose of allowing corporate credit unions reasonable ability to invest a small percentage of their capital in entities outside the credit union system (such as fintechs).

5. Two commenters requested that the Board permit a modest increase in the individual borrower limit.

6. A few commenters recommended that Appendix B, Expanded Authorities, clarify that any investment that deteriorates below investment grade, as defined in § 704.2, would require an investment action plan in compliance with § 704.10.

7. One commenter recommended establishing a task force with state regulators to review future adjustments to the corporate credit union rules. The commenter also recommended reintroducing meaningful dual chartering by eliminating unnecessary preemption of state rules, particularly with respect to corporate credit union governance; and enhancing the joint supervision of corporates. The commenter also recommended increased information sharing between the NCUA and the state regulators supervising the corporate credit union’s natural person credit union members.

8. One trade organization commenter recommended that the agency should consider ways in which it can wind down the NCUA guaranteed notes program (known as the NGN Program) so that credit unions that paid into the Temporary Corporate Credit Union

⁴³ 12 CFR 704.8(f).

Stabilization Fund and invested in certain corporates are made whole. The commenter stated that the NCUA's determination that the asset management estates of the various failed corporates must remain distinct means that recoveries from one estate cannot be comingled to pay obligations of other estates; however, the commenter stated that the agency still has time to reconsider this position and invite comments from credit unions who might bear a greater loss if the NCUA proceeds along its present course.

9. One trade organization commenter also recommended that the Board explore a framework to engage with fintech companies so credit unions can more easily sustain continued innovation in the credit union industry.

VII. Regulatory Procedures

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires that, in connection with a final rule, an agency prepare and make available for public comment a final regulatory flexibility analysis that describes the impact of a final rule on small entities (defined for purposes of the RFA to include credit unions with assets less than \$100 million).⁴⁴ A regulatory flexibility analysis is not required, however, if the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities and publishes its certification and a short, explanatory statement in the **Federal Register** together with the rule.

This final rule does not have a significant economic impact on a substantial number of small entities. There are no corporate credit unions under \$100 million in assets. Therefore, the Board certifies that the rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) applies to information collection requirements in which an agency creates a new paperwork burden on regulated entities or modifies an existing burden. For purposes of the PRA, a paperwork burden may take the form of a reporting, recordkeeping, or third-party disclosure requirement, each referred to as an information collection. The NCUA may not conduct or sponsor, and the respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.

The final rule amends 12 CFR part 704, in part, to address minimal investments by a corporate credit union in a CUSO without the CUSO being classified as a corporate CUSO. The information collection requirements associated with this provision are cleared under OMB control number 3133-0129 and there are no other new information collection requirements associated with this final rule.

Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on state and local interests. In adherence to fundamental federalism principles, the NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the principles of the Executive Order. This rulemaking will not have a substantial direct effect on the states, on the connection between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. The NCUA has determined that this final rule does not constitute a policy that has federalism implications for purposes of the Executive Order.

Assessment of Federal Regulations and Policies on Families

The NCUA has determined that this final rule does not affect family well-being within the meaning of section 654 of the Treasury and General Government Appropriations Act, 1999, Public Law 105-277, 112 Stat. 2681 (1998).

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104-121) (SBREFA) generally provides for congressional review of agency rules.⁴⁵ A reporting requirement is triggered in instances where the NCUA issues a final rule as defined by Section 551 of the APA.⁴⁶ An agency rule, in addition to being subject to congressional oversight, may also be subject to a delayed effective date if the rule is a "major rule."⁴⁷ The NCUA does not believe this rule is a "major rule" within the meaning of the relevant sections of SBREFA. As required by SBREFA, the NCUA will submit this final rule to OMB for it to determine if the final rule is a "major rule" for purposes of SBREFA. The NCUA also will file appropriate reports with

Congress and the Government Accountability Office so this rule may be reviewed.

List of Subjects in 12 CFR Part 704

Credit unions, Corporate credit unions, Reporting and recordkeeping requirements.

By the National Credit Union Administration Board on October 15, 2020.

Melane Conyers-Ausbrooks,
Secretary of the Board.

For the reasons discussed in the preamble, the Board amends 12 CFR part 704, as follows:

PART 704—CORPORATE CREDIT UNIONS

■ 1. The authority citation for part 704 continues to read as follows:

Authority: 12 U.S.C. 1766(a), 1781, and 1789.

■ 2. In § 704.2:

■ a. Revise the definitions for "Collateralized Debt Obligation", and "Consolidated Credit Union Service Organization"; and

■ b. Add definitions for "Corporate CUSO", and "Credit Union Service Organization (CUSO)", in alphabetical order, to read as follows:

§ 704.2 Definitions.

* * * * *

Collateralized Debt Obligation or Collateralized Loan Obligation means a debt security collateralized by mortgage-backed securities, other asset-backed securities, or corporate obligations in the form of nonmortgage loans or debt. For purposes of this part, the term collateralized debt obligation or collateralized loan obligation does not include:

(1) Senior tranches of Re-REMIC's consisting of senior mortgage-and asset-backed securities;

(2) Any security that is fully guaranteed as to principal and interest by the U.S. Government or its agencies or its sponsored enterprises; or

(3) Any security collateralized by other securities where all the underlying securities are fully guaranteed as to principal and interest by the U.S. Government or its agencies or its sponsored enterprises.

* * * * *

Consolidated Credit Union Service Organization (Consolidated CUSO) means any CUSO the assets of which are consolidated with those of the corporate credit union for purposes of reporting under Generally Accepted Accounting Principles (GAAP). Generally,

⁴⁵ 5 U.S.C. 801-804.

⁴⁶ 5 U.S.C. 551.

⁴⁷ 5 U.S.C. 804(2).

⁴⁴ See 80 FR 57512 (Sept. 24, 2015).

consolidated CUSOs are majority-owned CUSOs.

* * * * *

Corporate CUSO means a CUSO, as defined in part 712 of this chapter, that:

(1) Is a consolidated CUSO;

(2) A corporate credit union has the power, directly or indirectly, to direct the CUSO's management or policies;

(3) A corporate credit union owns 25 percent or more of the CUSO's contributed equity, stock, or membership interests; or

(4) The aggregate corporate credit union ownership meets or exceeds 50 percent of the CUSO's contributed equity, stock, or membership interests.

Credit union service organization (CUSO) means both a CUSO under part 712 of this chapter and a corporate CUSO under this part.

* * * * *

■ 3. Revise § 704.5(c)(3) and (h)(6) to read as follows:

§ 704.5 Investments.

* * * * *

(c) * * *

(3) CUSOs, subject to the limitations of § 704.11;

* * * * *

(h) * * *

(6) Purchasing collateralized debt obligations or collateralized loan obligations;

* * * * *

§ 704.6 [Amended]

■ 4. In § 704.6(c)(2)(vi), remove the word "corporate" before the word "CUSO."

§ 704.7 [Amended]

■ 5. In § 704.7 remove the word "corporate" before the word "CUSO" each place the word appears and replace "§ 723.16" with "§ 723.8."

§ 704.8 [Amended]

■ 6. In § 704.8(e) replace the phrase "no less than 2 years" with "no less than 1 year."

■ 7. Revise § 704.11 to read as follows:

§ 704.11 Credit Union Service Organizations (CUSOs).

(a) *Investment and loan limitations.*

(1) The aggregate of all investments in member and non-member CUSOs that a corporate credit union may make must not exceed 15 percent of a corporate credit union's total capital.

(2) The aggregate of all investments in and loans to member and nonmember CUSOs a corporate credit union may make must not exceed 30 percent of a corporate credit union's total capital. A corporate credit union may lend to

member and nonmember CUSOs an additional 15 percent of total capital if the loan is collateralized by assets in which the corporate has a perfected security interest under state law.

(3) If the limitations in paragraphs (a)(1) and (2) of this section are reached or exceeded because of the profitability of the CUSO and the related GAAP valuation of the investment under the equity method without an additional cash outlay by the corporate, divestiture is not required. A corporate credit union may continue to invest up to the regulatory limit without regard to the increase in the GAAP valuation resulting from the CUSO's profitability.

(b) *Due diligence.* A corporate credit union must comply with the commercial loan policy and due diligence requirements of § 723.4 of this chapter for all loans to CUSOs unless the loan or line of credit is fully secured by U.S. Treasury or agency securities.

(c) *Requirements for CUSOs that are not corporate CUSOs.* Corporate credit union investments in and lending to CUSOs that are not corporate CUSOs are subject to part 712 of this chapter, except that investment and loan limitations and due diligence requirements are governed by this section. CUSOs of state-chartered natural person credit unions are subject to part 712 of this chapter to the same extent as a CUSO of a federal credit union.

(d) *Requirements for corporate CUSOs.* Corporate credit union authority to invest in or loan to a corporate CUSO is limited to that provided in this section.

(1) *Structure.* A corporate CUSO must be structured as a corporation, limited liability company, or limited partnership under state law.

(2) *Separate entity.* (i) A corporate CUSO must be operated as an entity separate from a corporate credit union.

(ii) A corporate credit union investing in or lending to a corporate CUSO must obtain a written legal opinion that concludes the corporate CUSO is organized and operated in a manner that the corporate credit union will not reasonably be held liable for the obligations of the corporate CUSO. This opinion must address factors that have led courts to "pierce the corporate veil," such as inadequate capitalization, lack of corporate identity, common boards of directors and employees, control of one entity over another, and lack of separate books and records.

(3) *Permissible activities.* (i) A corporate CUSO must agree to limit its activities to:

(A) Brokerage services,

(B) Investment advisory services, and

(C) Other categories of activities as approved in writing by the NCUA and published on the NCUA's website.

(ii) Once the NCUA has approved an activity and published that activity on its website, the NCUA will not remove that particular activity from the approved list, or make substantial changes to the content or description of that approved activity, except through the formal rulemaking process.

(4) *Compensation restrictions.* An official of a corporate credit union which has invested in or loaned to a corporate CUSO may not receive, either directly or indirectly, any salary, commission, investment income, or other income, compensation, or consideration from the corporate CUSO. This prohibition also extends to immediate family members of officials.

(5) *Written agreement between the corporate credit union and corporate CUSO.* Prior to making an investment in or loan to a corporate CUSO, a corporate credit union must obtain a written agreement that the corporate CUSO:

(i) Will follow GAAP;

(ii) Will provide financial statements to the corporate credit union at least quarterly;

(iii) Will obtain an annual CPA opinion audit and provide a copy to the corporate credit union. A consolidated CUSO is not required to obtain a separate annual audit if it is included in the corporate credit union's annual audit;

(iv) Will provide the reports as required by § 712.3(d)(4) and (5) of this chapter;

(v) Will not acquire control, directly or indirectly, of another depository financial institution or to invest in shares, stocks, or obligations of an insurance company, trade association, liquidity facility, or similar organization;

(vi) Will allow the auditor, board of directors, and NCUA complete access to the CUSO's personnel, facilities, equipment, books, records, and any other documentation that the auditor, directors, or NCUA deem pertinent;

(vii) Will inform the corporate, at least quarterly, of all the compensation paid by the CUSO to its employees who are also employees of the corporate credit union; and

(viii) Will comply with all the requirements of this section.

(e) *Subsidiary restrictions.* Any subsidiary of a corporate CUSO is automatically designated a corporate CUSO and subject to all the requirements of this section. The requirements of this section apply to all tiers or levels of a corporate CUSO's structure.

■ 8. Revise § 704.14(a)(2) to read as follows:

§ 704.14 Representation.

* * * * *

(a) * * *

(2) Only an individual who currently holds a senior staff position (*e.g.*, position of chief executive officer, chief financial officer, chief operating officer, chief information officer, chief risk officer, treasurer/manager, etc.) at a member credit union, and will hold that position at the time he or she is seated on the corporate credit union board if elected, may seek election or re-election to the corporate credit union board;

* * * * *

§ 704.19 [Amended]

■ 9. In § 704.19(a), remove the word “corporate” before the word “CUSO”.

■ 10. In § 704.21, revise paragraph (c) and remove paragraphs (d) and (e) to read as follows:

§ 704.21 Enterprise risk management.

* * * * *

(c) The ERMCMust include at least one risk management expert who may report either directly to the board of directors or to the ERMCM. The risk management expert’s experience must be commensurate with the size of the corporate credit union and the complexity of its operations.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1221

[Document No: NASA–20–088; Docket No: NASA–2020–0005]

RIN 2700–AE57

NASA Seal, NASA Insignia, NASA Logotype, NASA Program Identifiers, NASA Flags, and the Agency’s Unified Visual Communications System

AGENCY: National Aeronautics and Space Administration.

ACTION: Direct final rule.

SUMMARY: This direct final rule makes nonsubstantive changes to add the NASA Graphics Standards Manual and make other administrative updates.

DATES: This direct final rule is effective on January 11, 2021. Comments due on or before December 14, 2020.

ADDRESSES: Comments must be identified with RINs 2700–AE57 and may be sent to NASA via the Federal E-Rulemaking Portal: <http://www.regulations.gov>. Follow the online instructions for submitting comments. Please note that NASA will post all comments on the internet with changes, including any personal information provided.

www.regulations.gov. Follow the online instructions for submitting comments. Please note that NASA will post all comments on the internet with changes, including any personal information provided.

FOR FURTHER INFORMATION CONTACT: Bert Ulrich, 202–358–1713, bert.ulrich@nasa.gov.

SUPPLEMENTARY INFORMATION:

Direct Final Rule and Significant Adverse Comments

NASA has determined this rulemaking meets the criteria for a direct final rule because it makes nonsubstantive changes to add the NASA Graphics Standards Manual and makes other administrative updates. No opposition to the changes and no significant adverse comments are expected. However, if NASA receives significant adverse comments, it will withdraw this direct final rule by publishing a notice in the **Federal Register**. A significant adverse comment is one that explains: (1) Why the direct final rule is inappropriate, including challenges to the rule’s underlying premise or approach; or (2) why the direct final rule will be ineffective or unacceptable without a change. In determining whether a comment necessitates withdrawal of this direct final rule, NASA will consider whether it warrants a substantive response in a notice and comment process.

Background

Subpart 1 of part 1221, last amended November 5, 1993 [58 FR 58944], sets forth the policy governing the use of the NASA Seal, the NASA Insignia, NASA Logotype, NASA Program Identifiers, and the NASA Flags. This subpart also establishes and sets forth the concept and scope of the NASA Unified Visual Communications System and prescribes the policy and guidelines for implementation of the system. It is amended to add the NASA Graphics Standards Manual and make other administrative updates.

Statutory Authority

The National Aeronautics and Space Act (the Space Act), 51 U.S.C. 20113 (a), authorizes the Administrator of NASA to make, promulgate, issue, rescind, and amend rules and regulations governing the manner of its operations and the exercise of the powers vested in it by law.

Regulatory Analysis

Executive Order 12866, Regulatory Planning and Review and Executive Order 13563, Improvement Regulation and Regulation Review

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated as “not significant” under section 3(f) of E.O. 12866.

Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires an agency to prepare an initial regulatory flexibility analysis to be published at the time the proposed rule is published. This requirement does not apply if the agency “certifies that the rule will not, if promulgated, have a significant economic impact on a substantial number of small entities” (5 U.S.C. 603). This rule adds the NASA Graphics Standards Manual and make other administrative updates Subpart 1 of part 1221 and, therefore, does not have a significant economic impact on a substantial number of small entities.

Review Under the Paperwork Reduction Act

This direct final rule does not contain any information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Review Under E.O. 13132

E.O. 13132, “Federalism,” 64 FR 43255 (August 4, 1999) requires regulations be reviewed for Federalism effects on the institutional interest of states and local governments, and if the effects are sufficiently substantial, preparation of the Federal assessment is required to assist senior policy makers. The amendments will not have any substantial direct effects on state and local governments within the meaning of the E.O. Therefore, no Federalism assessment is required.

Executive Order 13771—Reducing Regulations and Controlling Regulatory Costs

This rule is not an E.O. 13771 regulatory action because this rule is not significant under E.O. 12866.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector, of \$100,000,000 or more in any one year, and it will not significantly or uniquely affect small governments.

List of Subjects in 14 CFR Part 1221

Decorations, Medals, Awards, Flags, Seals, Insignia, Unified visual communication system.

For reasons set forth in the preamble, NASA is amending 14 CFR part 1221, subpart 1221.1 to read as follows:

PART 1221—THE NASA SEAL AND OTHER DEVICES, AND THE CONGRESSIONAL SPACE MEDAL OF HONOR**Subpart 1221.1—NASA Seal, NASA Insignia, NASA Logotype, NASA Program Identifiers, NASA Flags, and the Agency’s Unified Visual Communications System**

■ 1 The authority for subpart 1221.1 continues to read as follows:

Authority: 42 U.S.C. 2472(a) and 2473(c)(1).

■ 2. Revise § 1221.100 to read as follows:

§ 1221.100 Scope.

This subpart sets forth the policy governing the use of the NASA Seal, the NASA Insignia, NASA Logotype, NASA Program Identifiers, and the NASA Flags. This subpart also establishes and sets forth the concept and scope of the NASA Graphics Standards Manual and prescribes the policy and guidelines for

implementation of the system. The NASA Graphics Standards Manual is accessible at https://communications.nasa.gov/sites/default/files/files/NASA_Graphics_Standards_v3-TAGGED-v3.pdf.

■ 3. Revise § 1221.103 to read as follows:

§ 1221.103 Establishment of the NASA Insignia.

The NASA Insignia was designed by the Army Institute of Heraldry and approved by the Commission of Fine Arts and the NASA Administrator. It symbolizes NASA’s role in aeronautics and space and is established by the NASA Administrator as the signature and design element for visual communications formerly reserved for the NASA Logotype. The NASA Insignia shall be used as set forth in §§ 1221.108, the NASA Graphics Standards Manual, and any accompanying style guides or related NASA directive or specification approved by the NASA Administrator and published subsequent hereto.

FIGURE B

The NASA Insignia

TECHNICAL DESCRIPTION:

The official insignia of the National Aeronautics and Space Administration is a dark blue disc with white stars. The white hand-cut letters "NASA" are in the center of the disc and are encircled by a white diagonal orbit. A solid red vector symbol also appears behind and in front of the letters.

REPRODUCTION:

The NASA Insignia may be reproduced black-on-white (single color) as shown above or two-color (blue and red on white). The colors are PMS 286 blue and PMS 185 red.

The Insignia may be reproduced in various sizes but not less than five-eighths (5/8) of an inch. The sizes are determined on the basis of (a) desired effect for visual identification or publicity purposes, (b) relative size of the object on which the Insignia is to appear, and (c) consideration of any design, layout, reproduction, or other problems involved. For more information, refer to the NASA Insignia Standards Supplement.

■ 4. Revised § 1221.104 to read as follows:

§ 1221.104 Establishment of the NASA Logotype.

The NASA Logotype (also called "the Worm") was approved by the Commission of Fine Arts and the NASA

Administrator. It symbolizes NASA's role in aeronautics and space from 1975 to 1992 and was retired between 1992–2020. The NASA Logotype shall be used as set forth in § 1221.111.

FIGURE C

The NASA Logotype

REPRODUCTION:

Black-on-white
or single color: As shown.

One color: The preferred color of the NASA Logotype is NASA red (PMS 179), used only when a second color is available and appropriate. Against a white background, the NASA Logotype may be shown in NASA red, black, or NASA warm gray (PMS 416). For background of other values, the Graphics Standards Manual is to be consulted and followed.

SIZE:

The NASA Logotype may be reproduced or used in various sizes. Size to be determined on the basis of (a) desired effect for visual identification or publicity purposes, (b) relative size of the object on which the NASA Logotype is to appear, and (c) consideration of any design, layout, reproduction or other problems involved. Refer to the Graphics Standards Manual for details.

RESTRICTION:

The NASA Logotype will not be used for any purpose without the written approval of the Administrator.

■ 5. Revise § 1221.107 to read as follows:

§ 1221.107 Establishment of the NASA Administrator's, Deputy Administrator's, and Associate Administrator's Flags.

(a) Concurrently with the establishment of the NASA Flag in January 1960, the NASA Administrator also established NASA Flags to represent the NASA Administrator, Deputy Administrator, and Associate Administrator. Each of these flags conforms to the basic design of the NASA Flag except for the following:

- (1) The size of the flag is 3 feet x 4 feet;
- (2) The Administrator's Flag has four stars;
- (3) The Deputy Administrator's Flag has three stars; and
- (4) The Associate Administrator's Flag has two stars.

(b) Flags representing these senior officials shall be used as set forth in § 1221.113.

■ 6. Revise § 1221.108 to read as follows:

§ 1221.108 Establishment of the NASA Unified Visual Communications System.

(a) The NASA Administrator directed the establishment of a NASA Unified Visual Communications System. The

system, which is comprised of the NASA Graphics Standards Manual and any accompanying style guides or related NASA directive or specification, was developed under the Federal Design Improvement Program initiated by the President in May 1972. This system is the Agency-wide program by which NASA projects a contemporary, business-like, progressive, and forward-looking image through the use of effective design for improved communications. The system provides a professional and cohesive NASA identity by imparting continuity of graphics design in all layout, reproduction art, stationery, forms, publications, signs, films, video productions, vehicles, aircraft, and spacecraft markings and other items. It creates a unified image which is representative and symbolic of NASA's progressive attitudes and programs.

(b) The Associate Administrator for Communications is responsible for the development and implementation of the NASA Graphics Standards Manual and any accompanying style guides for the Agency or related NASA directive or specification.

(c) The Associate Administrator for Communications has designated staff to implement and monitor Agency-wide

design improvements in consonance with the NASA Graphics Standards Manual. Designated staff will develop and issue changes and additions to the Manual as required and as new design standards and specifications are developed and approved. The NASA Graphics Standards Manual can be downloaded at https://communications.nasa.gov/sites/default/files/files/NASA_Graphics_Standards_v3-TAGGED-v3.pdf.

(d) NASA Centers and Headquarters have designated staff to implement NASA's graphics standards and ensure compliance of the NASA Graphics Standards Manual and any accompanying Style Guides or related NASA directive or specification.

■ 7. Revise § 1221.109 to read as follows:

§ 1221.109 Use of the NASA Seal.

(a) The Associate Administrator for Communications shall be responsible for custody of the NASA Impression Seal and custody of NASA replica (plaques) seals. The NASA Seal is restricted to the following:

- (1) NASA award certificates and medals.
- (2) NASA awards for career service.
- (3) Security credentials and employee identification cards.

(4) NASA Administrator's documents; the Seal may be used on documents such as interagency or intergovernmental agreements and special reports to the President and Congress, and on other documents, at the discretion of the NASA Administrator.

(5) Plaques; the design of the NASA Seal may be incorporated in plaques for display in Agency auditoriums, presentation rooms, lobbies, offices of senior officials, and on the fronts of buildings occupied by NASA. A separate NASA seal in the form of a 15-inch, round, bronze-colored plaque on a walnut-colored wood base is also available, but prohibited for use in the above representational manner. It is restricted to use only as a presentation item by the Administrator and the Deputy Administrator.

(6) The NASA Flag and the NASA Administrator's, Deputy Administrator's, and Associate Administrator's Flags, which incorporate the design of the Seal.

(7) NASA prestige publications which represent the achievements or missions of NASA as a whole.

(8) Publications (or documents) involving participation by another Government agency for which the other Government agency has authorized the use of its seal.

(b) Use of the NASA Seal for any purpose other than as prescribed in this section is prohibited, except that the Associate Administrator for Communications may authorize, on a case-by-case basis, the use of the NASA Seal for purposes other than those prescribed when the Associate Administrator for Communications deems such use to be appropriate.

■ 8. In § 1221.110, revise paragraph (c)(4) to read as follows:

§ 1221.110 Use of the NASA Insignia.

* * * * *

(c) * * *

(4) Items bearing the NASA Insignia and NASA Logotype such as souvenirs, novelties, toys, models, clothing, and similar items (including items for sale through the NASA employees' nonappropriated fund activities) may be manufactured and sold only after the a request has been submitted to, and approved by, the NASA Office for Communications, NASA Headquarters, Washington, DC 20546.

■ 9. Revise § 1221.111 to read as follows:

§ 1221.111 Use of the NASA Logotype.

The NASA Logotype which was retired from 1992–2020 can be used only in an authentic historical context,

on merchandise in accordance with § 1221.110, paragraph (c), in the NASA graphics standards/style guide or with prior written approval of the NASA Administrator.

■ 10. Revise § 1221.112(a) to read as follows:

§ 1221.112 Use of the NASA Program Identifiers.

(a) Official NASA Program Identifiers will be restricted to the uses set forth in this section and to such other uses as the Associate Administrator for Communications may specifically approve.

* * * * *

■ 11. Revise § 1221.113(b), to read as follows:

§ 1221.113 Use of the NASA Flags.

* * * * *

(b) The NASA Administrator's, Deputy Administrator's and Associate Administrator's Flags shall be displayed with the United States Flag in the respective offices of these officials but may be temporarily removed for use at the discretion of the officials concerned.

■ 12. Revise § 1221.114(a) to read as follows:

§ 1221.114 Approval of new or change proposals.

(a) Except for NASA Astronaut Mission Crew Badges/Patches, any proposal to change or modify the emblematic devices set forth in this subpart or to introduce a new emblematic device other than as prescribed in this subpart requires the written approval of the NASA Administrator with prior approval and recommendation of the NASA Associate Administrator for Communications.

BILLING CODE 7510–13–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Parts 3282 and 3284

[Docket No. FR–5848–F–02]

RIN 2502–AJ37

Manufactured Housing Program: Minimum Payments to the States

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule revises the minimum payments that HUD distributes to states that participate in the Manufactured Housing Program as State Administrative Agencies (SAAs) in order to provide for a more equitable guarantee of minimum funding and to reduce administrative burden. This rule changes the minimum payments to SAAs so that payments are based on SAAs' participation in the production or siting of new manufactured homes, regardless of whether the state was fully or conditionally approved to participate in the program as of December 27, 2000. This rule also changes the formula for minimum payments to SAAs by increasing the amount paid to SAAs for each transportable section of new manufactured housing that is produced in that state, and by ensuring that each state participating in the program will receive an annual payment no less than the amount of cumulative payments resulting from production and shipments due to that State for the Fiscal Year 2014 period.

DATES: *Effective date:* December 14, 2020.

FOR FURTHER INFORMATION CONTACT:

Teresa B. Payne, Administrator, Office of Manufactured Housing Programs, Department of Housing and Urban Development, 451 Seventh Street SW, Room 9164, Washington, DC 20410; telephone number 202–402–5365. (This is not a toll-free number.) Individuals with speech or hearing impairments may access this number through TTY by calling the toll free Federal Information Relay Service at 1–800–877–8389.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 620(e)(3) of the National Manufactured Housing Construction and Safety Standards Act of 1974, (42 U.S.C. 5401–5426) (the Act), as amended, HUD regulations provide for minimum payments to the states participating in the Manufactured Housing Program as an SAA. Since August 13, 2002, HUD regulations at 24 CFR 3284.10 provide that each SAA would receive an amount not less than the amount paid to that SAA for the 12 months ending on December 26, 2000, if that state had a fully approved state plan on December 27, 2000. As HUD explained in a proposed rule published on March 1, 2004 (69 FR 9740), the fact that § 3284.10 only applied to states that had a fully approved state plan as of December 27, 2000, resulted in inequitable payments between states and resulted in some states receiving more funding than other states for each

unit of manufactured housing produced or sited in the state.

In accordance with section 620 of the Act, HUD's regulations also provide for HUD to establish and collect from manufactured home manufacturers a reasonable fee to, among other things, provide funding to States for the administration and implementation of approved State plans. At § 3282.307(b), HUD regulations provide that HUD will distribute a portion of the monitoring inspection fees collected from all manufactured home manufacturers to SAAs based on a formula. Prior to issuance of this rule, that formula provided each state \$9.00 for each new manufactured housing unit that, after leaving the manufacturing plants, is first located on the premises of a retailer, distributor, or purchaser in that state, plus \$2.50 for each transportable section of each new manufactured housing unit produced in a manufacturing plant in that State.

Since HUD's March 1, 2004, proposed rule, which was not finalized, HUD has sought a solution to the issue of inequitable payments between states and worked with its partner SAAs and the Manufactured Housing Consensus Committee (MHCC) to develop proposed solutions. On May 2, 2014 (79 FR 25035), HUD published a proposed rule to revise the amount of the fee collected from manufacturers. In response to HUD's proposed rule, several commenters stated that the fees paid to SAAs are not reflective of current production and shipment levels. HUD responded to these comments by stating that it would review revisions to the current fee distribution formula to ensure that states are provided with adequate funding to perform the required SAA function. (See, 79 FR 47373, August 13, 2014).

HUD agreed that it should establish a more equitable distribution of funds among SAAs and, in 2015, solicited comments from both its partner SAAs and the MHCC on how to more equitably distribute fees among the states. The MHCC recommended a formula of \$9.00 per transportable section located in a state, and \$14.00 per transportable section manufactured in a state. Under this formula, whether a state was fully or conditionally approved would cease to affect funding. Additionally, the formula provided that the amounts states would receive would not decrease below that received during Fiscal Year (FY) 2014.

On December 16, 2016, HUD issued a proposed rule (81 FR 91083) to adopt the proposal as recommended by MHCC. HUD proposed to amend § 3282.307(b) to increase the amount

paid to both fully approved and conditionally approved states for each transportable section of new manufactured housing produced in that state from \$2.50 to \$14.00, in order to more appropriately reflect the responsibility of these states and to encourage states to participate in the Federal-State program to the maximum extent possible. HUD also proposed revising § 3284.10 to ensure participating states (regardless of approval status before December 27, 2000) would receive a funding level no less than the cumulative amount that state received in FY 2014. These proposed funding levels would also meet or exceed the allocated amounts paid to fully approved states based on the fee distribution system in effect on December 27, 2000, in accordance with 620(e)(3) of the Act. HUD noted in the proposed rule that these proposed changes would be more equitable for the participating states. HUD also noted its belief that the changes would simplify administrative burdens of HUD and the states, as payments would continue to be made to all participating states, regardless of whether they are fully or conditionally approved, using the methodology of § 3282.307, under which HUD and the states have been operating for years. As a result, the proposed rule noted that the revised approach would not require any new payment or accounting structures and states should be able to seamlessly implement the statutory requirement. Additionally, HUD noted that this new method of determining state payments would also largely eliminate the need for a year-end supplemental payment to states, as most states would meet or exceed their FY 14 manufacturing and location levels.

The proposed rule specifically invited comment on the following three questions:

1. In determining a revised equitable fee distribution formula, what methods and data should HUD consider to increase the amounts paid to the states? For example, should HUD rely on the past three years or more of fee income data received by both fully approved and conditionally approved states in assessing the amount of the increase of the payment to each SAA?

2. Should fully approved states be entitled to higher levels of payments than conditionally approved SAAs? In addition to the number of home placements and production levels in each state, should the increase in payment consider the number of complaints handled by each SAA for the past three years in determining the amount of the increase (HUD would

need each SAA to provide a list of all complaints handled over the past three years)?

3. Should HUD revise 24 CFR 3282.307(b) to allow the amount of the distribution of fees among the states to be established by Notice in order to more timely address changes or fluctuations in production levels, in order to assure that the states are adequately funded for the inspections and work they perform?

II. Public Comments and Response

The public comment period for the proposed rule closed on February 14, 2016. HUD received three public comments in response to this proposed rule. One comment did not address the proposed rule and stated that people should be able to live in what they want. The other two comments were responsive to the rule and were submitted by national trade associations that represent the manufactured housing industry. The responsive comments supported the proposed rule and stressed the importance of state participation in the Manufactured Housing Program. One commenter said that SAAs are state entities that are accountable to the public. This commenter said that SAAs should receive increased funding while program monitoring contractors who needlessly increase regulatory compliance costs should receive less. The responsive comments approved of the proposal to pay SAAs \$9.00 for each transportable section of a new manufactured home located in the state, and \$14.00 for each transportable section of a new manufactured home produced in the state. The responsive comments also approved of the proposal to pay states a minimum of the amount they received in FY 2014, regardless of whether the state had been fully or conditionally approved. Additionally, the responsive commenters provided answers to the three questions that HUD had posed in the proposed rule.

In response to the first question of what methods HUD should consider to increase the amounts paid to states, one commenter said that it does not object to distribution increases based on an aggregate of cumulative in-state production and shipment data reflecting a reasonable time-defined period, as long as the minimum annual distribution level to any state, regardless of approval status, does not fall below the minimum level mandated by the 2000 law. The other responsive commenter said that the primary data that should be used to determine a revised fee distribution formula is the actual shipment and production in each

of the SAA states, and that HUD should consider overall performance of the SAAs both individually and collectively.

In response to the second question of whether fully approved states should be entitled to higher levels of payments than conditionally approved SAAs, and whether increases in payments should consider the number of complaints handled by each SAA for the past three years, both of the substantive commenters said that conditionally and fully approved states should receive the same level of funding. One commenter responded to the question of whether increases in payments should consider the number of complaints handled by each SAA by saying it does not believe this would be necessary or feasible, as it would require SAAs to undertake additional recordkeeping, and would eliminate the level playing field needed to ensure that all states can meet their responsibilities under the Act.

In response to the third question of whether HUD should revise 24 CFR 3282.307(b) to allow the amount of the distribution fees to be established by Notice, both of the responsive commenters said that there is a statutory requirement for HUD to go through rulemaking before changing payments to SAAs. One of the commenters said that because section 620(d) of the Act says that any fee collected under the section may only be modified pursuant to rulemaking, and subsection (a)(1)(B) of section 620 addresses funding to states using the fees collected, any utilization of those fees for payments to states is also subject to the requirement that modifications can only be done through rulemaking. The other commenter said that HUD should obtain public input when making revisions to the funding formula.

In response to these comments, HUD notes that it appreciates these responses and will consider them for future changes to the fee distribution formula. HUD understands commenters' concerns that HUD should seek input from interested parties before making changes to the distribution formula. HUD posed the question about whether HUD should consider making future changes to § 3282.307(b) by notice with the thought that this might facilitate HUD's ability to respond more quickly in the future to requests from the states for more adequate funding.

As requested by the commenters, this final rule maintains HUD's proposed changes in its December 16, 2016, proposed rule, with some minor edits for clarity. In the proposed rule, § 3282.307(b)(1) said that states will receive \$9.00 for each transportable

section of each new manufactured housing unit that, after leaving the manufacturing plant in another state, is first located in that state. This final rule says that states will receive \$9.00 for each transportable section of each new manufactured housing unit that, after leaving the manufacturing plant, is first located in that state. This clarifies that the states where manufactured housing units are first located will receive the \$9.00 whether the transportable section was manufactured in another state, or in the same state where it is first located. Thus, if a transportable section of a manufactured housing unit is produced in a state and first located in that same state, that state would receive \$23.00 for that transportable section, the combination of the amounts in § 3282.307(b)(1) and (b)(2).

This final rule also revises § 3284.10 to clarify that the minimum payment to each state will be no less than that due to that state for production and shipments for the period between October 1, 2013 to September 30, 2014, rather than the minimum payment simply being the amount the state received during this time period. The change was needed because states typically receive payments after September 30th, up to December, for shipments and production that occurred during the FY 14 period.

Additionally, this final rule revises the wording of § 3284.10(a) for readability. The proposed rule said that states would receive \$9.00, if after leaving the manufacturing plant, for every transportable section that is first located on the premises of a retailer, distributor, or purchaser in that state after leaving the manufacturing plant (or \$0, if it is not) during the year for which payment is received. This final rule says that states will receive \$9.00 for every transportable section that is first located on the premises of a retailer, distributor, or purchaser in that state after leaving the manufacturing plant (or \$0, if it is not) during the year for which payment is received.

Finally, HUD is adding at this final rule stage language to §§ 3282.307(b) and 3284.10 that states that HUD shall distribute the monitoring fee under § 3282.307 and pay the minimum payment to states under § 3284.10 "subject to the availability of appropriations." HUD is adding this language to clarify that should its annual appropriation fail to provide sufficient funds to pay the states at the formula levels established by this rule, section 620(e)(2) of the Act limits HUD to distribute fees "only to the extent approved in advance in an annual appropriations Act." Consequently, the

language added to §§ 3282.307(b) and 3284.10 codifies existing statutory authority.

III. Findings and Certifications

Executive Order 12866 and Executive Order 13563

Under Executive Order 12866 (Regulatory Planning and Review), a determination must be made whether a regulatory action is significant and, therefore, subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the order. Executive Order 13563 (Improving Regulations and Regulatory Review) directs executive agencies to analyze regulations that are "outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with what has been learned. Executive Order 13563 also directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public. This rule was determined to not be a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and therefore was not reviewed by OMB.

Executive Order 13771

Executive Order 13771, entitled Reducing Regulation and Controlling Regulatory Costs, was issued on January 30, 2017. Section 2(a) of Executive Order 13771 requires an agency, unless prohibited by law, to identify at least two existing regulations to be repealed when the agency publicly proposes for notice and comment or otherwise promulgates a new regulation. In furtherance of this requirement, section 2(c) of Executive Order 13771 requires that the new incremental costs associated with new regulations shall, to the extent permitted by law, be offset by the elimination of existing costs associated with at least two prior regulations. OMB's interim guidance issued on February 2, 2017, explains that for Fiscal Year 2017 the above requirements only apply to each new "significant regulatory action that imposes costs." It has been determined that this rule is not a "significant regulatory action that imposes costs" and thus does not trigger the above requirements of Executive Order 13771.

Impact on Small Entities

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires

an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. This rule will affect only states that participate in the manufactured housing program, and will have a negligible economic impact.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538)(UMRA) establishes requirements for federal agencies to assess the effects of their regulatory actions on state, local, and tribal governments and the private sector. This rule does not impose any federal mandates on any state, local, or tribal governments or the private sector within the meaning of the UMRA.

Environmental Impact

This rule establishes rates and sets forth related fiscal requirements which do not constitute a development decision that affects the physical condition of specific project areas or building sites. Accordingly, under 24 CFR 50.19(c)(6), this rule is categorically excluded from the requirements of the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Federalism Impact

Executive Order 13132 (entitled “Federalism”) prohibits an agency from publishing any rule that has federalism implications if the rule either (1) imposes substantial direct compliance costs on state and local governments and is not required by statute, or (2) the rule preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This rule does not have federalism implications and does not impose substantial direct compliance costs on state and local governments or preempt state law within the meaning of the Executive Order.

List of Subjects

24 CFR Part 3282

Manufactured home procedural and enforcement regulations, Administrative practice and procedure, Consumer protection, Intergovernmental relations, Investigations, Manufactured homes, Reporting and recordkeeping requirements.

24 CFR Part 3284

Consumer protection, Intergovernmental relations, Manufactured homes.

Accordingly, for the reasons discussed in this preamble, HUD amends 24 CFR parts 3282 and 3284 as follows:

PART 3282—MANUFACTURED HOME PROCEDURAL AND ENFORCEMENT REGULATIONS

■ 1. The authority citation for part 3282 continues to read as follows:

Authority: 15 U.S.C. 2697, 42 U.S.C. 3535(d), 5403, and 5424.

■ 2. Revise § 3282.307(b) to read as follows:

§ 3282.307 Monitoring inspection fee establishment and distribution.

* * * * *

(b) The monitoring inspection fee shall be paid by the manufacturer to the Secretary or to the Secretary’s Agent, who shall distribute a portion of the fees collected from all manufactured home manufacturers among the approved and conditionally-approved States in accordance with an agreement between the Secretary and the States and based upon the following formula subject to the availability of appropriations:

(1) \$9.00 of the monitoring inspection fee collected for each transportable section of each new manufactured housing unit that is first located on the premises of a retailer, distributor, or purchaser in that State; plus

(2) \$14.00 of the monitoring inspection fee collected for each transportable section of each new manufactured housing unit produced in a manufacturing plant in that State.

* * * * *

PART 3284—MANUFACTURED HOUSING PROGRAM FEE

■ 3. The authority citation for 24 CFR part 3284 continues to read as follows:

Authority: 42 U.S.C. 3535(d), 5419, and 5424.

■ 4. Revise § 3284.10 to read as follows:

§ 3284.10 Minimum payments to states.

For every State that has a State plan fully or conditionally approved pursuant to § 3282.302 of this chapter, and subject to the availability of appropriations, HUD will pay such State annually a total amount that is the greater of either the amount of cumulative payments resulting from production and shipments due to that State for the period between October 1, 2013, and September 30, 2014; or the total amount determined by adding:

(a) \$9.00 for every transportable section that is first located on the premises of a retailer, distributor, or purchaser in that State after leaving the

manufacturing plant (or \$0, if it is not) during the year for which payment is received; and

(b) 14.00 for every transportable section that is produced in a manufacturing plant in that State (or \$0, if it is not) during the year for which payment is received.

Dana T. Wade,

Assistant Secretary for Housing, Federal Housing Commissioner.

BILLING CODE 4210–67–P

LIBRARY OF CONGRESS

Copyright Office

37 CFR Part 202

[Docket No. 2016–03]

Mandatory Deposit of Electronic-Only Books

AGENCY: U.S. Copyright Office, Library of Congress.

ACTION: Final rule.

SUMMARY: The Copyright Office is amending its regulations to make electronic-only books published in the United States subject to the Copyright Act’s mandatory deposit provisions if they are affirmatively demanded by the Office. The final rule largely adopts the language set forth in the Office’s June 2020 notice of proposed rulemaking, with one additional clarification regarding the rule’s applicability to print-on-demand books.

DATES: Effective December 14, 2020.

FOR FURTHER INFORMATION CONTACT:

Kevin R. Amer, Deputy General Counsel, kamer@copyright.gov or Mark T. Gray, Attorney-Advisor, mgray@copyright.gov. They can be reached by telephone at 202–707–3000.

SUPPLEMENTARY INFORMATION:

I. Background

Under section 407 of title 17, the owner of the copyright or the exclusive right of publication in a work published in the United States must, within three months of publication, deposit “two complete copies of the best edition” with the Copyright Office “for the use or disposition of the Library of Congress.”¹ The “best edition” is defined as “the edition, published in the United States at any time before the date of deposit, that the Library of Congress determines to be most suitable for its purposes.”² These requirements are

¹ 17 U.S.C. 407(a), (b); see generally 37 CFR 202.19.

² 17 U.S.C. 101; see also 17 U.S.C. 407(b).

governed by section 202.19 and Appendix B of part 202 of the Office's regulations, which set forth rules and criteria, respectively, for the different types of works subject to the mandatory deposit requirement.

Under the statute, the Register of Copyrights may issue a written demand for works at any time after they have been published in the United States, and failure to deposit after a demand may subject the recipient to monetary liability.³ Compliance with this section is separate from the copyright registration process, but the Copyright Act provides that deposits made under section 407 may be used to satisfy the registration deposit provisions under section 408, if all other registration conditions are met.⁴

The Register of Copyrights may, by regulation, exempt categories of works from the mandatory deposit requirement.⁵ Under this authority, the Office issued an interim rule in 2010 (the "2010 Interim Rule") codifying its established practice of excluding from mandatory deposit requirements all "[e]lectronic works published in the United States and available only online."⁶ The 2010 Interim Rule referred to such works as "electronic-only." The Office also, however, adopted an exception to this exemption, requiring the deposit of electronic-only serials if affirmatively demanded by the Office.⁷

In 2016, the Office issued a notice of inquiry ("NOI") that proposed adding a new category of online works—electronic-only books—to the mandatory deposit framework. As with electronic-only serials, the Office proposed that electronic-only books would be subject to mandatory deposit only upon demand by the Office.⁸ In

April 2018, following consideration of public comments received in response to the NOI, the Office issued a notice of proposed rulemaking ("2018 NPRM") setting forth regulatory language to implement this change. The 2018 NPRM proposed to define "electronic-only book" as "an electronic literary work published in one volume or a finite number of volumes published in the United States and available only online," with some exclusions for specific types of works such as serials, audiobooks, websites, blogs, and emails.⁹

The Office received nine comments in response to the 2018 NPRM. Commenters generally expressed agreement with the broad goal of supporting the Library's acquisition and preservation of digital materials for the benefit of the American public,¹⁰ but they raised questions about what material would be collected¹¹ and how the Library's IT security infrastructure would keep deposited materials secure.¹²

In response to those comments, the Office issued a revised NPRM on June 29, 2020 ("2020 NPRM").¹³ To address questions about the scope of the rule, the 2020 NPRM clarified that short online works such as social media posts would not be subject to demand but that that online-only books preloaded onto electronic devices such as tablets would be covered if otherwise available only

online.¹⁴ The 2020 NPRM also explained that the rule did not apply to copies of e-books printed by an author, publisher, or distributor in response to purchases by individual consumers. Such books would "instead remain subject to the general mandatory deposit obligation under section 407."¹⁵

In addition, the 2020 NPRM revised the requirement proposed in the 2018 NPRM that technological protection measures ("TPMs") controlling access to or use of deposits be removed. Instead, the Office proposed to update the Best Edition regulations in Appendix B to Part 202 to reflect the Library's preference for a TPM-free edition, if such a version has been published.¹⁶ If no TPM-free edition has been published, the proposed rule would next accept a copy for which the copyright owner has elected to remove such measures.¹⁷ If the owner declines to do so, the deposit must otherwise comply with the general requirement that copies can be accessed and reviewed on an ongoing basis.¹⁸

Finally, the 2020 NPRM addressed questions raised by commenters regarding the Library's collections policies and security practices. With respect to digital collections, the Office explained that, since the close of the 2018 NPRM comment period, the Library had provided additional information about its digital strategy and collections plans in several publicly available documents.¹⁹ As to concerns about the Library's IT security, the 2020 NPRM noted the many steps the Library has taken to improve its IT systems in recent years, as reflected in congressional testimony, Inspector General's reports, and other public materials. Those efforts include hiring a Chief Information Officer, centralizing all IT efforts in a single office, and implementing almost all of the thirty-one public recommendations from a 2015 report by the Government Accountability Office.²⁰ The 2020 NPRM concluded that "these security upgrades, together with the additional IT-related information made public since the close of the prior comment

⁷ 2010 Interim Rule at 3865–66. "Electronic works" are themselves defined as "works fixed and published solely in an electronic format." 37 CFR 202.24(c)(3).

⁸ *Mandatory Deposit of Electronic Books and Sound Recordings Available Only Online: Notice of Inquiry*, 81 FR 30505, 30506–08 (May 17, 2016). The NOI also included online sound recordings as a potential additional category of works to subject to mandatory deposit, but the Office has decided to postpone further consideration of this issue until after the conclusion of this rulemaking.

period, may reasonably address the concerns raised by commenters regarding the security of digital deposits.”²¹ To ensure, however, that stakeholders had an adequate opportunity to consider and respond to this new information, the Office invited further public comment.

II. The Final Rule

The Office received four comments on the 2020 NPRM, none of which objected to finalizing the rule. The Authors Guild stated that the revised rule “adequately addresses almost all of our prior concerns” and that it is “satisfied by the Library of Congress’ progress” in securing and managing its IT infrastructure.²² The Library Copyright Alliance also supported making the rule final, noting “the critical role of deposit in building the Library’s collection and ensuring long-term preservation of these works.”²³ An individual commenter, Owen Linback, likewise expressed support for the proposed revisions.²⁴

The University of Michigan Library Copyright Office (“UM Library”) did not state an objection to finalizing the rule, but it “strongly urge[d]” that the final rule require deposited copies to “be free from encryptions and digital rights management technologies.”²⁵ In the UM Library’s view, “[w]hen copies are encumbered with technological protection measures such as encryption or DRMs . . . they obstruct preservation, authorized access to information, and accessibility.”²⁶ The Office appreciates the need to ensure appropriate access to deposit materials, and the 2020 NPRM noted that “the Library generally prefers TPM-free editions of works to simplify and further its preservation efforts.”²⁷ As the Office discussed, however, that interest must be balanced against the language of section 407, which requires only that copyright owners deposit the best *published* edition of a work.

Additionally, section 1201 separately protects the right of copyright owners to distribute works with TPMs.²⁸ The

Office must implement its regulatory authority against the backdrop of that legal protection. The Office accordingly proposed a more flexible approach under which TPM-free copies of a work, or copies from which the owner has voluntarily removed TPMs, are preferred for best-edition purposes. And, in all events, the rightsholder must comply with the existing requirement that deposits can be “accessed and reviewed by the Copyright Office, Library of Congress, and the Library’s authorized users on an ongoing basis.”²⁹ The Office continues to believe that this framework will adequately serve the Library’s collection needs in a manner consistent with the statute. The final rule therefore retains the Office’s proposed language.

The Authors Guild raised three additional issues. First, it suggested that further guidance from the Office on the definition of “publication” in the online context would be helpful “before or in concert with” the proposed rule.³⁰ As the Authors Guild’s comment notes, the Office is currently conducting a separate proceeding to consider potential regulatory updates interpreting the meaning of publication for purposes of copyright registration, and to provide policy guidance regarding the concept of publication more generally.³¹ A work’s publication status, however, presents somewhat less of a concern for copyright owners under this rule than in the registration context, as electronic-only books must first be affirmatively identified and demanded by the Office before a copyright owner must deposit them. Thus, as the Authors Guild acknowledges, publication “need not be specifically defined in this particular rule.”³² For that reason, the Office believes that its separate proceeding on online publication is the more appropriate forum through which to provide additional guidance on the meaning of that term.

Second, the Authors Guild suggested clarifying edits to the language regarding the rule’s applicability to print-on-demand books. The 2020 NPRM provided that “[a] work shall be deemed to be *available only online* even if copies have been made available to individual consumers to print on demand, so long as the work is otherwise available only online.”³³ The Authors Guild suggested the phrase “individual consumers to print on

demand” may be ambiguous and proposed revising the language to instead read: “made available to individual consumers by print on demand services.”³⁴ The Authors Guild did not identify the specific ambiguity that this suggested change is intended to clarify, but the Office does not agree that it reflects the rule’s intended scope. The reference to copies made available to consumers “by print on demand services” could be read to encompass *physical* copies printed by a service and distributed to individual purchasers. As discussed in the 2020 NPRM, “[t]hese books are outside the scope of this rule, and instead remain subject to the general mandatory deposit obligation under section 407.”³⁵

As an alternative, or in addition to the foregoing suggestion, the Authors Guild suggested that “it might add clarity” to refer to “individual” copies, such that the language would read: “A work shall be deemed to be *available only online* even if individual copies have been made available to individual consumers to print on demand, so long as the work is otherwise available only online.”³⁶ In its view, “[i]t is possible that the emphasis on individual consumers could create confusion with respect to print-on-demand copies purchased by institutional consumers for their use (a school or a library for instance).”³⁷ It is not clear, however, that a reference to “individual copies” would address that concern, which relates to the phrase “individual consumers.” As to the latter phrase, the Office agrees that there could be uncertainty over whether the provision covers copies made available to institutional purchasers such as libraries. In the Office’s view, these entities are similarly situated to individual consumers in that they typically purchase a fixed number of copies of a given e-book, and the number of physical copies they may print and circulate to patrons is dictated by the terms of the purchasing agreement. That arrangement is distinguishable from a model in which a retailer continues to print copies as additional orders are received. To clarify that the definition is not intended to exclude e-books purchased by libraries and similar institutions, the final rule thus provides: “A work shall be deemed to be *available only online* even if copies have been made available to individual consumers or other end users to print on demand, so long as the

²¹ 2020 NPRM at 38814.

²² Authors Guild Comments at 1.

²³ Library Copyright Alliance (LCA) Comments at 2. LCA also urged the Office to initiate a rulemaking on access restrictions on deposited electronic materials and expand the proposed rule to sound recordings. *Id.* at 4–5. As noted in the 2018 NPRM with respect to deposit of electronic-only sound recordings, the Office is “postponing further consideration of this issue until after the conclusion of the present rulemaking.” 2018 NPRM at 16270.

³⁷ *Id.*

work is otherwise available only online.” The Office intends the reference to “end users” to cover institutions such as libraries and universities who are the actual users of these works and not intermediate distributors such as online booksellers.

Finally, the Authors Guild suggested that the final rule provide for periodic consultations between the Library and publishers “to ensure that the Library’s recommended formats and preferences—and the Office’s adherence thereto—are aligned with the most commonly used as-published formats.”³⁸ The Office appreciates that conversations between the Library and publishers can help the Library’s collections preferences align with industry practice. Although the Office would welcome such consultations to be ongoing (and itself maintains an open door to receive stakeholder feedback), it does not believe including a mandate in the regulatory text is appropriate. As explained in the 2020 NPRM, the Library consistently seeks stakeholder input when crafting its policies,³⁹ and the Office expects that the Library will be open to continued outreach from publishers to that effect.

List of Subjects in 37 CFR Part 202

Claims, Copyright.

For the reasons set forth in the preamble, the Copyright Office amends 37 CFR part 202 as follows:

PART 202—GENERAL PROVISIONS

■ 1. The authority citation for part 202 continues to read as follows:

Authority: 17 U.S.C. 408(f), 702.

■ 2. Amend § 202.18 by:

■ a. In paragraph (a) in the first sentence adding the words “and § 202.19, and transferred into the Library of Congress’s collections,” after “under § 202.4(e)”;

■ b. In paragraph (b) in the first sentence adding the words “and § 202.19” after “under § 202.4(e)”;

■ c. In paragraph (c) in the first sentence adding the words “and § 202.19” after “under § 202.4(e)”;

■ d. Adding paragraph (f).

The addition reads as follows:

§ 202.18 Access to electronic works.

* * * * *

(f) Except as provided under special relief agreements entered into pursuant to § 202.19(e) or § 202.20(d), electronic works will be transferred to the Library of Congress for its collections and made

available only under the conditions specified by this section.

■ 3. Amend § 202.19 by:

■ a. Revising paragraph (b)(4).

■ b. In paragraph (c)(5), adding the phrase “electronic-only books and” after the phrase “This exemption includes”.

The revision reads as follows:

§ 202.19 Deposit of published copies or phonorecords for the Library of Congress.

* * * * *

(b) * * *

(4) For purposes of paragraph (c)(5) of this section:

(i) An *electronic-only serial* is a serial as defined in § 202.3(b)(1)(v) that is published in electronic form in the United States and available only online.

(ii) An *electronic-only book* is an electronic literary work published in one volume or a finite number of volumes published in the United States and available only online. This class excludes literary works distributed solely in phonorecords (e.g., audiobooks), serials (as defined in § 202.3(b)(1)(v)), computer programs, websites, blogs, emails, and short online literary works such as social media posts.

(iii) A work shall be deemed to be *available only online* even if copies have been made available to individual consumers or other end users to print on demand, so long as the work is otherwise available only online. A work also shall be deemed to be available only online even if copies have been loaded onto electronic devices, such as tablets or e-readers, in advance of sale to individual consumers, so long as the work is otherwise available only online.

* * * * *

■ 4. Amend § 202.24 as follows:

■ a. In paragraph (a)(2), remove the word “works” and add in its place “electronic-only serials”;

■ b. Redesignate paragraphs (a)(3) and (4) as paragraphs (a)(4) and (5), and add a new paragraph (a)(3);

■ c. In paragraph (b), remove “online-only” and add in its place “electronic-only”; and

■ d. Revise paragraph (c)(3).

The addition and revision reads as follows:

§ 202.24 Deposit of published electronic works available only online.

(a) * * *

(3) Demands may be made only for electronic-only books published on or after December 14, 2020.

* * * * *

(c) * * *

(3) “Electronic-only” works are electronic works that are published and available only online.

■ 6. Amend Appendix B to Part 202 by revising section IX to read as follows:

Appendix B to Part 202 “Best Edition” of Published Copyrighted Works for the Collections of the Library of Congress

* * * * *

IX. Electronic-Only Works Published in the United States and Available Only Online

The following encodings are listed in descending order of preference for all deposits in all categories below:

1. UTF-8.
2. UTF-16 (with BOM).
3. US-ASCII.
4. ISO 8859.
5. All other character encodings.
 - A. Electronic-Only Serials:
 1. Content Format:
 - a. Serials-specific structured/markup format:
 - i. Content compliant with the NLM Journal Archiving (XML) Document Type Definition (DTD), with presentation stylesheet(s), rather than without NISO JATS: Journal Article Tag Suite (NISO Z39.96-201x) with XSD/XSL presentation stylesheet(s) and explicitly stated character encoding.
 - ii. Other widely used serials or journal XML DTDs/schemas, with presentation stylesheet(s), rather than without.
 - iii. Proprietary XML format for serials or journals (with documentation), with DTD/schema and presentation stylesheet(s), rather than without.
 - b. Page-oriented rendition:
 - i. PDF/UA (Portable Document Format/ Universal Accessibility; compliant with ISO 14289-1).
 - ii. PDF/A (Portable Document Format/ Archival; compliant with ISO 19005).
 - iii. PDF (Portable Document Format, with searchable text, rather than without; highest quality available, with features such as searchable text, embedded fonts, lossless compression, high resolution images, device-independent specification of colorspace; content tagging; includes document formats such as PDF/X).
 - c. Other structured or markup formats:
 - i. Widely-used serials or journal non-proprietary XML-based DTDs/schemas with presentation stylesheet(s).
 - ii. Proprietary XML-based format for serials or journals (with documentation) with DTD/schema and presentation stylesheet(s).
 - iii. XHTML or HTML, with DOCTYPE declaration and presentation stylesheet(s).
 - iv. XML-based document formats (widely used and publicly documented). With presentation stylesheets, if applicable. Includes ODF (ISO/IEC 26300) and OOXML (ISO/IEC 29500).
 - d. PDF (web-optimized with searchable text).
 - e. Other formats:
 - i. Rich text format.
 - ii. Plain text.
 - iii. Widely-used proprietary word processing or page-layout formats.
 - iv. Other text formats not listed here.
 2. Metadata Elements: If included with published version of work, descriptive data (metadata) as described below should accompany the deposited material:

³⁸ Authors Guild Comments at 2.

³⁹ 2020 NPRM at 38814.

a. Title level metadata: serial or journal title, ISSN, publisher, frequency, place of publication.

b. Article level metadata, as relevant/or applicable: volume(s), number(s), issue dates(s), article title(s), article author(s), article identifier (DOI, etc.).

c. With other descriptive metadata (e.g., subject heading(s), descriptor(s), abstract(s)), rather than without.

3. Completeness:

a. All elements considered integral to the publication and offered for sale or distribution must be deposited—e.g., articles, table(s) of contents, front matter, back matter, etc. Includes all associated external files and fonts considered integral to or necessary to view the work as published.

b. All updates, supplements, releases, and supersessions published as part of the work and offered for sale or distribution must be deposited and received in a regular and timely manner for proper maintenance of the deposit.

4. Technological measures that control access to or use of the work should be removed.

B. Electronic-Only Books:

1. Content Format:

a. Book-specific structured/markup format, i.e., XML-based markup formats, with included or accessible DTD/schema, XSD/XSL presentation stylesheet(s), and explicitly stated character encoding:

i. BITS-compliant (NLM Book DTD).

ii. EPUB-compliant.

iii. Other widely-used book DTD/schemas (e.g., TEI, DocBook, etc.).

b. Page-oriented rendition:

i. PDF/UA (Portable Document Format/ Universal Accessibility; compliant with ISO 14289–1).

ii. PDF/A (Portable Document Format/ Archival; compliant with ISO 19005).

iii. PDF (Portable Document Format; highest quality available, with features such as searchable text, embedded fonts, lossless compression, high resolution images, device-independent specification of colorspace; content tagging; includes document formats such as PDF/X).

c. Other structured markup formats:

i. XHTML or HTML, with DOCTYPE declaration and presentation stylesheet(s).

ii. XML-based document formats (widely-used and publicly-documented), with presentation style sheet(s) if applicable. Includes ODF (ISO/IEC 26300) and OOXML (ISO/IEC 29500).

iii. SGML, with included or accessible DTD.

iv. Other XML-based non-proprietary formats, with presentation stylesheet(s).

v. XML-based formats that use proprietary DTDs or schemas, with presentation stylesheet(s).

d. PDF (web-optimized with searchable text).

e. Other formats:

i. Rich text format.

ii. Plain text.

iii. Widely-used proprietary word processing formats.

iv. Other text formats not listed here.

2. Metadata Elements: If included with published version of work, descriptive data

(metadata) as described below should accompany the deposited material:

a. As supported by format (e.g., standards-based formats such as ONIX, XMP, MODS, or MARCXML either embedded in or accompanying the digital item): title, creator, creation date, place of publication, publisher/producer/distributor, ISBN, contact information.

b. Include if part of published version of work: language of work, other relevant identifiers (e.g., DOI, LCCN, etc.), edition, subject descriptors, abstracts.

3. Rarity and Special Features:

a. Limited editions (including those with special features such as high resolution images.)

b. Editions with the greatest number of unique features (such as additional content, multimedia, interactive elements.)

4. Completeness:

a. For items published in a finite number of separate components, all elements published as part of the work and offered for sale or distribution must be deposited. Includes all associated external files and fonts considered integral to or necessary to view the work as published.

b. All updates, supplements, releases, and supersessions published as part of the work and offered for sale or distribution must be submitted and received in a regular and timely manner for proper maintenance of the deposit.

5. Technological Protection Measures:

a. Copies published in formats that do not contain technological measures controlling access to or use of the work.

b. Copies published with technological measures that control access to or use of the work, and for which the owner has elected to remove such technological measures.

c. Copies otherwise provided in a manner that meets the requirements of § 202.24(a)(5).

Dated: October 5, 2020.

BILLING CODE 1410–30–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 17

RIN 2900–AQ94

Authority of VA Professionals To Practice Health Care

AGENCY: Department of Veterans Affairs.

ACTION: Interim final rule.

SUMMARY: The Department of Veterans Affairs (VA) is issuing this interim final rule to confirm that its health care professionals may practice their health care profession consistent with the

scope and requirements of their VA employment, notwithstanding any State license, registration, certification, or other requirements that unduly interfere with their practice. Specifically, this rulemaking confirms VA's current practice of allowing VA health care professionals to deliver health care services in a State other than the health care professional's State of licensure, registration, certification, or other State requirement, thereby enhancing beneficiaries' access to critical VA health care services. This rulemaking also confirms VA's authority to establish national standards of practice for health care professionals which will standardize a health care professional's practice in all VA medical facilities.

DATES: *Effective Date:* This rule is effective on November 12, 2020.

Comments: Comments must be received on or before January 11, 2021.

ADDRESSES: Comments may be submitted through www.Regulations.gov or mailed to, Beth Taylor, 10A1, 810 Vermont Avenue NW, Washington, DC 20420. Comments should indicate that they are submitted in response to [“RIN 2900–AQ94—Authority of VA Professionals to Practice Health Care.”] Comments received will be available at regulations.gov for public viewing, inspection, or copies.

FOR FURTHER INFORMATION CONTACT: Beth Taylor, Chief Nursing Officer, Veterans Health Administration, 810 Vermont Avenue NW, Washington, DC 20420, (202) 461–7250. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: On January 30, 2020, the World Health Organization (WHO) declared the COVID–19 outbreak to be a Public Health Emergency of International Concern. On January 31, 2020, the Secretary of the Department of Health and Human Services declared a Public Health Emergency pursuant to 42 United States Code (U.S.C.) 247d, for the entire United States to aid in the nation's health care community response to the COVID–19 outbreak. On March 11, 2020, in light of new data and the rapid spread in Europe, WHO declared COVID–19 to be a pandemic. On March 13, 2020, the President declared a National Emergency due to COVID–19 under sections 201 and 301 of the National Emergencies Act (50 U.S.C. 1601 *et seq.*) and consistent with section 1135 of the Social Security Act (SSA), as amended (42 U.S.C. 1320b–5). As a result of responding to the needs of our veteran population and other non-veteran beneficiaries during the COVID–19 National Emergency, where VA has had to shift health care

professionals to other locations or duties to assist in the care of those affected by this pandemic, VA has become acutely aware of the need to promulgate this rule to clarify the policies governing VA's provision of health care.

This rule is intended to confirm that VA health care professionals may practice their health care profession consistent with the scope and requirements of their VA employment, notwithstanding any State license, registration, certification, or other requirements that unduly interfere with their practice. In particular, it will confirm (1) VA's continuing practice of authorizing VA health care professionals to deliver health care services in a State other than the health care professional's State of licensure, registration, certification, or other requirement; and (2) VA's authority to establish national standards of practice for health care professions via policy, which will govern their employment, subject only to State laws where the health care professional is licensed, credentialed, registered, or subject to some other State requirements that do not unduly interfere with those duties.

We note that the term State as it applies to this rule means each of the several States, Territories, and possessions of the United States, the District of Columbia, and the Commonwealth of Puerto Rico, or a political subdivision of such State. This definition is consistent with the term State as it is defined in 38 U.S.C. 101(20).

A conflicting State law is one that would unduly interfere with the fulfillment of a VA health care professional's Federal duties. We note that the policies and practices confirmed in this rule only apply to VA health care professionals appointed under 38 U.S.C. 7306, 7401, 7405, 7406, or 7408 or title 5 of the U.S. Code, which does not include contractors working in VA medical facilities or those working in the community.

VA has long understood its governing statutory authorities to permit VA to engage in these practices. Section 7301(b) of title 38 the U.S. Code establishes that the primary function of the Veterans Health Administration (VHA) within VA is to provide a complete medical and hospital service for the medical care and treatment of veterans. To allow VHA to carry out its medical care mission, Congress established a comprehensive personnel system for certain VA health care professionals, independent of the civil service rules. See Chapters 73–74 of title 38 of the U.S. Code. Congress granted the Secretary express statutory authority

to establish the qualifications for VA's health care professionals, determine the hours and conditions of employment, take disciplinary action against employees, and otherwise regulate the professional activities of those individuals. 38 U.S.C. 7401–7464.

Section 7402 of 38 U.S.C. establishes the qualifications of appointees. To be eligible for appointment as a VA employee in a health care profession covered by section 7402(b) (other than a medical facility Director appointed under section 7402(b)(4)), most individuals, after appointment, must, among other requirements, be licensed, registered, or certified to practice their profession in a State, or satisfy some other State requirement. However, the standards prescribed in section 7402(b) establish only the basic qualifications for VA health care professionals and do not limit the Secretary from establishing other qualifications or rules for health care professionals.

In addition, the Secretary is responsible for the control, direction, and management of the Department, including agency personnel and management matters. See 38 U.S.C. 303.

Such authorities permit the Secretary to further regulate the health care professions to make certain that VA's health care system provides safe and effective health care by qualified health care professionals to ensure the well-being of those veterans who have borne the battle. In this rulemaking, VA is detailing its authority to manage its health care professionals by stating that they may practice their health care profession consistent with the scope and requirements of their VA employment, notwithstanding any State license, registration, certification, or other State requirements that unduly interfere with their practice. VA believes that this is necessary in order to provide additional protection for VA health care professionals against adverse State actions proposed or taken against them when they are practicing within the scope of their VA employment, particularly when they are practicing across State lines or when they are performing duties consistent with a VA national standard of practice for their health care profession.

Practice Across State Lines

Historically, VA has operated as a national health care system that authorizes VA health care professionals to practice in any State as long as they have a valid license, registration, certification, or fulfill other State requirements in at least one State. In doing so, VA health care professionals have been practicing within the scope of

their VA employment regardless of any unduly burdensome State requirements that would restrict practice across State lines. We note, however, that VA may only hire health care professionals who are licensed, registered, certified, or satisfy some other requirement in a State, unless the statute requires or provides otherwise (e.g., 38 U.S.C. 7402(b)(14)).

The COVID–19 pandemic has highlighted VA's acute need to exercise its statutory authority of allowing VA health care professionals to practice across State lines. In response to the pandemic, VA needed to and continues to need to move health care professionals quickly across the country to care for veterans and other beneficiaries and not have State licensure, registration, certification, or other State requirements hinder such actions. Put simply, it is crucial for VA to be able to determine the location and practice of its VA health care professionals to carry out its mission without any unduly burdensome restrictions imposed by State licensure, registration, certification, or other requirements. This rulemaking will support VA's authority to do so and will provide an increased level of protection against any adverse State action being proposed or taken against VA health care professionals who practice within the scope of their VA employment.

Since the start of the pandemic, in furtherance of VA's Fourth Mission, VA has rapidly utilized its resources to assist parts of the country that are undergoing serious and critical shortages of health care resources. VA's Fourth Mission is to improve the Nation's preparedness for response to war, terrorism, national emergencies, and natural disasters by developing plans and taking actions to ensure continued service to veterans, as well as to support national, State, and local emergency management, public health, safety and homeland security efforts.

VA has deployed personnel to support other VA medical facilities that have been impacted by COVID–19 as well as provided support to State and community nursing homes. As of July 2020, VA has deployed personnel to more than 45 States. VA utilized the Disaster Emergency Medical Personnel System (DEMPS), VA's main deployment program, for VA health care professionals to travel to locations deemed as national emergency or disaster areas, to help provide health care services in places such as New Orleans, Louisiana, and New York City, New York. As of June 2020, a total of 1,893 staff have been mobilized to meet the needs of our facilities and Fourth

Mission requests during the pandemic. VA deployed 877 staff to meet Federal Emergency Management Agency (FEMA) Mission requests, 420 health care professionals were deployed as DEMPS response, 414 employees were mobilized to cross level staffing needs within their Veterans Integrated Service Networks (VISN), 69 employees were mobilized to support needs in another VISN, and 113 Travel Nurse Corps staff responded specifically for COVID-19 staffing support. In light of the rapidly changing landscape of the pandemic, it is crucial for VA to be able to move its health care professionals quickly across the country to assist when a new hot spot emerges without fear of any adverse action from a State be proposed or taken against a VA health care professional.

We note that, in addition to providing in person health care across State lines during the pandemic, VA also provides telehealth across State lines. VA's video to home services have been heavily leveraged during the pandemic to deliver safe, quality VA health care while adhering to Centers for Disease Control and Prevention (CDC) physical distancing guidelines. Video visits to veterans' homes or other offsite location have increased from 41,425 in February 2020 to 657,423 in July of 2020. This represents a 1,478 percent utilization increase. VA has specific statutory authority under 38 U.S.C. 1730C to allow health care professionals to practice telehealth in any State regardless of where they are licensed, registered, certified, or satisfy some other State requirement. This rulemaking is consistent with Congressional intent under Public Law 115-185, sec. 151, June 6, 2018, codified at 38 U.S.C. 1730C for all VA health care professionals to practice across State lines regardless of the location of where they provide health care. This rulemaking will ensure that VA professionals are protected regardless of how they provide health care, whether it be via telehealth or in-person.

Beyond the current need to mobilize health care resources quickly to different parts of the country, this practice of allowing VA health care professionals to practice across State lines optimizes the VA health care workforce to meet the needs of all VA beneficiaries year-round. It is common practice within the VA health care system to have primary and specialty health care professionals routinely travel to smaller VA medical facilities or rural locations in nearby States to provide care that may be difficult to obtain or unavailable in that community. As of January 14, 2020, out

of 182,100 licensed health care professionals who are employed by VA, 25,313 or 14 percent do not hold a State license, registration, or certification in the same State as their main VA medical facility. This number does not include the VA health care professionals who practice at a main VA medical facility in one State where they are licensed, registered, certified, or hold some other State requirement, but also practice at a nearby Community Based Outpatient Clinic (CBOC) in a neighboring State where they do not hold such credentials. Indeed, 49 out of the 140 VA medical facilities nationwide have one or more sites of care in a different State than the main VA medical facility.

Also, VA has rural mobile health units that provide health care services to veterans who have difficulty accessing VA health care facilities. These mobile units are a vital source of health care to veterans who live in rural and medically underserved communities. Some of the services provided by the mobile units include, but are not limited to, health care screening, mental health outreach, influenza and pneumonia vaccinations, and routine primary care. The rural mobile health units are an integral part of VA's goal of encouraging healthier communities and support VA's preventative health programs. Health care professionals who provide health care in these mobile units may provide services in various States where they may not hold a license, registration, or certification, or satisfy some other State requirement. It is critical that these health care professionals are protected from any adverse State action proposed or taken when performing these crucial services.

In addition, the practice of health care professionals of providing health care across State lines also gives VA the flexibility to hire qualified health care professionals from any State to meet the staffing needs of a VA health care facility where recruitment or retention is difficult. As of December 31, 2019, VA had approximately 13,000 vacancies for health care professions across the country. As a national health care system, it is imperative for VA to be able to recruit and retain health care professionals, where recruitment and retention is difficult, to ensure there is access to health care regardless of where the VA beneficiary resides. Permitting VA health care professionals to practice across State lines is an important incentive when trying to recruit for these vacancies, particularly during a pandemic, where private health care facilities have greater flexibility to offer more competitive pay and benefits. This is also especially beneficial in recruiting

spouses of active service members who frequently move across the country.

National Standard of Practice

This rulemaking also confirms VA's authority to establish national standards of practice for health care professions. We note that this rulemaking does not create any such national standards; all national standards of practice will be created via policy. For the purposes of this rulemaking, a national standard of practice describes the tasks and duties that a VA health care professional practicing in the health care profession may perform and may be permitted to undertake. Having a national standard of practice means that individuals from the same VA health care profession may provide the same type of tasks and duties regardless of the VA medical facility where they are located or the State license, registration, certification, or other State requirement they hold. We emphasize that VA will determine, on an individual basis, that a health care professional has the necessary education, training, and skills to perform the tasks and duties detailed in the national standard of practice.

The need for national standards of practice have been highlighted by VA's large-scale initiative regarding the new electronic health record (EHR). VA's health care system is currently undergoing a transformational initiative to modernize the system by replacing its current EHR with a joint EHR with Department of Defense (DoD) to promote interoperability of medical data between VA and DoD. VA's new EHR system will provide VA and DoD health care professionals with quick and efficient access to the complete picture of a veteran's health information, improving VA's delivery of health care to our nation's veterans.

For this endeavor, DoD and VA established a joint governance over the EHR system. In order to be successful, VA must standardize clinical processes with DoD. This means that all health care professionals in DoD and VA who practice in a certain health care profession must be able to carry out the same duties and tasks irrespective of State requirements. The reason why this is important is because each health care profession is designated a role in the EHR system that sets forth specific privileges within the EHR that dictate allowed tasks for such profession. These tasks include, but are not limited to, dispensing and administering medications; prescriptive practices; ordering of procedures and diagnostic imaging; and required level of oversight. VA has the ability to modify these privileges within EHR, however, VA

cannot do so on an individual user level, but rather at the role level for each health care profession. In other words, VA cannot modify the privileges for all health care professionals in one State to be consistent with that State's requirements; instead, the privileges can only be modified for every health care professional in that role across all States. Therefore, the privileges established within EHR cannot be made facility or State specific.

In order to achieve standardized clinical processes, VA and DoD must create the uniform standards of practice for each health care specialty. Currently, DoD has specific authority from Congress to create national standards of practice for their health care professionals under 10 U.S.C. 1094. While VA lacks a similarly specific statute, VA has the general statutory authority, as explained above, to regulate its health care professionals and authorize health care practices that preempt conflicting State law. This regulation will confirm VA's authority to do so. Absent such standardized practices, it will be incredibly difficult for VA to achieve its goal of being an active participant in EHR modernization because either some VA health care professionals would fear potential adverse State actions or DoD and VA would need to agree upon roles that are consistent with the most restrictive States' requirements to ensure that all health care professionals are acting within the scope of their State requirements. VA believes that agreement upon roles that are consistent with the most restrictive State is not an acceptable option because it will lead to delayed care and consequently decreased access and level of health care for VA beneficiaries.

One example that impacts multiple health care professions throughout the VA system is the ability to administer medication without a provider (physician or advanced practice nurse practitioner) co-signature. As it pertains to nursing, almost all States permit nurses to follow a protocol; however, some States, such as New York, North Carolina, and South Carolina, do not permit nurses to follow a protocol without a provider co-signature. A protocol is a standing order that has been approved by medical and clinical leadership if a certain sequence of health care events occur. For instance, if a patient is exhibiting certain signs of a heart attack, there is a protocol in place to administer potentially life-saving medication. If the nurse is the first person to see the signs, the nurse will follow the approved protocol and immediately administer the medication.

However, if the nurse cannot follow the protocol and requires a provider co-signature, administration of the medication will be delayed until a provider is able to co-sign the order, which may lead to the deterioration of the patient's condition. This also increases the provider's workload and decreases the amount of time the provider can spend with patients.

Historically, VA physical therapists (PTs), occupational therapists, and speech therapists were routinely able to determine the need to administer topical medications during therapy sessions and were able to administer the topical without a provider co-signature. However, in order to accommodate the new EHR system and variance in State requirements, these therapists would need to place an order for all medications, including topicals, which would leave these therapists waiting for a provider co-signature in the middle of a therapy session, thus delaying care. Furthermore, these therapists also routinely ordered imaging to better assess the clinical needs of the patient, but would also have to wait for a provider co-signature, which will further delay care and increase provider workload.

In addition to requiring provider co-signatures, there will also be a significant decrease in access to care due to other variances in State requirements. For instance, direct access to PTs will be limited in order to ensure that the role is consistent with all State requirements. Direct access means that a beneficiary may request PT services without a provider's referral. However, while almost half of the States allow unrestricted direct access to PTs, over half of the States have some limitations on requesting PT services. For instance, in Alabama, a licensed PT may perform an initial evaluation and may only provide other services as delineated in specific subdivisions of the Alabama Physical Therapy Practice Act. Furthermore, in New York, PT treatment may be rendered by a licensed PT for 10 visits or 30 days, whichever shall occur first, without a referral from a physician, dentist, podiatrist, nurse practitioner, or licensed midwife. This is problematic as VA will not be able to allow for direct access due to these variances and direct access has been shown to be beneficial for patient care. Currently, VISN 23 is completing a two-year strategic initiative to implement direct access and have PTs embedded into patient aligned care teams (PACT). Outcomes thus far include decreased wait times, improved veteran satisfaction, improved provider satisfaction, and improved functional outcomes.

Therefore, VA will confirm its authority to ensure that health care professionals are protected against State action when they adhere to VA's national standards of practice. We reiterate that this rulemaking does not establish national standards of practice for each health care profession, but merely confirms VA's authority to do so, thereby preempting any State restrictions that unduly interfere with those practices. The actual national standards of practice will be developed in subregulatory policy for each health care profession. As such, VA will make a concerted effort to engage appropriate stakeholders when developing the national standards of practice.

Preemption

As previously explained, in this rulemaking, VA is confirming its authority to manage its health care professionals. Specifically, this rulemaking will confirm VA's long-standing practice of allowing its health care professionals to practice in a State where they do not hold a license, registration, certification, or satisfy some other State requirement. The rule will also confirm that VA health care professionals must adhere to VA's national standards of practice, as determined by VA policy, irrespective of conflicting State licensing, registration, certification, or other State requirements that unduly burden that practice. We do note that VA health care professionals will only be required to perform tasks and duties to the extent of their education, skill, and training. For instance, VA would not require a registered nurse to perform a task that the individual nurse was not trained to perform.

Currently, practice in accordance with VA employment, including practice across State lines or adhering to a VA standard of practice, may jeopardize VA health care professionals' credentials or result in fines and imprisonment for unauthorized health care practice. This is because most States have restrictions that limit health care professionals' practice or have rules that prohibit health care professionals from furnishing health care services within that State without a license, registration, certification, or other requirement from that State. We note that, some States, for example Rhode Island, Utah, and Michigan, have enacted legislation or regulations that specifically allow certain VA health care professionals to practice in those States when they do not hold a State license.

Several VA health care professionals have already had actions proposed or taken against them by various States

while practicing health care within the scope of their VA employment, while they either practiced in a State where they do not hold a license, registration, certification, or other State requirement that unduly interfered with their VA employment. In one instance, a VA psychologist was licensed in California but was employed and providing supervision of a trainee at the VA Medical Center (VAMC) in Nashville, Tennessee. California psychology licensing laws require supervisors to hold a license from the State where they are practicing and do not allow for California licensed psychologists to provide supervision to trainees or unlicensed psychologists outside the State of California. The California State Psychology Licensing Board proposed sanctions and fines of \$1,000 for violating section 1387.4(a) of the CA Code of Regulations (CCR). The VA system did not qualify for the exemption of out of State supervision requirements listed in CCR section 1387.4. In addition, a VA physician who was licensed in Oregon, but was practicing at a VAMC in Biloxi, Mississippi had the status of their license changed from active to inactive because the Oregon Medical Board determined the professional did not reside in Oregon, in violation of Oregon's requirement that a physician physically reside in the State in order to maintain an active license.

This rulemaking serves to preempt State requirements, such as the ones discussed above, that were or can be used to take an action against VA health care professionals for practicing within the scope of their VA employment. State licensure, registration, certification, and other State requirements are preempted to the extent such State laws unduly interfere with the ability of VA health care professionals to practice health care while acting within the scope of their VA employment. As explained above, Congress provided general statutory provisions that permit the VA Secretary to authorize health care practices by health care professionals at VA, which serve to preempt conflicting State laws that unduly interfere with the exercise of health care by VA health care professionals pursuant to that authorization. Although some VA health care professionals are required by Federal statute to have a State license, *see, e.g.*, 38 U.S.C. 7402(b)(1)(C) (providing that, to be eligible to be appointed to a physician position at the VA, a physician must be licensed to practice medicine, surgery, or osteopathy in a State), a State may not attach a condition to the license that is

unduly burdensome to or unduly interferes with the practice of health care within the scope of VA employment.

Under well-established interpretations of the Supremacy Clause, Federal laws and policies authorizing VA health care professionals to practice according to VA standards preempt conflicting State law: that is, a State law that prevents or unreasonably interferes with the performance of VA duties. *See, e.g., Hancock v. Train*, 426 U.S. 167, 178–81 (1976); *Sperry v. Florida*, 373 U.S. 379, 385 (1963); *Miller v. Arkansas*, 352 U.S. 187 (1956); *Ohio v. Thomas*, 173 U.S. 276, 282–84 (1899); *State Bar Disciplinary Rules as Applied to Federal Government Attorneys*, 9 Op. O.L.C. 71, 72–73 (1985). When a State law does not conflict with the performance of Federal duties in these ways, VA health care professionals are required to abide by the State law. Therefore, VA's policies and regulations will preempt State licensure, registration, and certification laws, rules, or other requirements only to the extent they conflict with the ability of VA health care professionals to practice health care while acting within the scope of their VA employment.

We emphasize that, in instances where there is no conflict with State requirements, VA health care professionals should abide by the State requirement. For example, if a State license requires a health care professional to have a certain number of hours of continuing professional education per year to maintain their license, the health care professional must adhere to this State requirement if it does not prevent or unduly interfere with the exercise of VA employment. To determine whether a State requirement is conflicting, VA would assess whether the State law unduly interferes on a case-by-case basis. For instance, if Oregon requires all licensed physicians to reside in Oregon, VA would likely find that it unduly interferes with already licensed VA physicians who reside and work for VA in the State of Mississippi. We emphasize that the intent of the regulation is to only preempt State requirements that are unduly burdensome and interfere with a VA health care professionals' practice for the VA. For instance, it would not require a State to issue a license to an individual who does not meet the education requirements to receive a license in that State. We note that this rulemaking also does not affect VA's existing requirement that all VA health care professionals adhere to restrictions imposed by the Controlled Substances

Act, 21 U.S.C. 801 *et seq.* and implementing regulations at 21 CFR 1300, *et seq.*, to prescribe or administer controlled substances.

Any preemption of conflicting State requirements will be the minimum necessary for VA to effectively furnish health care services. It would be costly and time-consuming for VA to lobby each State board for each health care profession specialty to remove restrictions that impair VA's ability to furnish health care services to beneficiaries and then wait for the State to implement appropriate changes. Doing so would not guarantee a successful result.

Regulation

For these reasons, VA is establishing a new regulation titled Health care professionals' practice in VA, which will be located at 38 CFR 17.419. This rule will confirm the ability of VA health care professionals to practice their health care profession consistent with the scope and requirements of their VA employment, notwithstanding any State license, registration, certification, or other requirements that unduly interfere with their practice.

Subsection (a) of § 17.419 contains the definitions that will apply to the new section. Subsection (a)(1) contains the definition for beneficiary. We are defining the term beneficiary to mean a veteran or any other individual receiving health care under title 38 of the U.S. Code. We are using this definition because VA provides health care to veterans, certain family members of veterans, servicemembers, and others. This is VA's standard use of this term.

Subsection (a)(2) contains the definition for health care professional. We are defining the term health care professional to be an individual who meets specific criteria that is listed below.

Subsection (a)(2)(i) will require that a health care professional be appointed to an occupation in VHA that is listed or authorized under 38 U.S.C. 7306, 7401, 7405, 7406, or 7408 or title 5 of the U.S. Code.

Subsection (a)(2)(ii) requires that the individual is not a VA-contracted health care professional. A health care professional does not include a contractor or a community health care professional because they are not considered VA employees nor appointed under 38 U.S.C. 7306, 7401, 7405, 7406, or 7408 or title 5 of the U.S. Code.

Subsection (a)(2)(iii) lists the required qualifications for a health care professional. We note that these qualifications do not include all general

qualifications for appointment, such as to hold a degree of doctor of medicine; these qualifications are related to licensure, registration, certification, or other State requirements.

Subsection (a)(2)(iii)(A) states that the health care professional must have an active, current, full, and unrestricted license, registration, certification, or satisfies another State requirement in a State to practice the health care specialty identified under 38 U.S.C. 7402(b). This standard ensures that VA health care professionals are qualified to practice their individual health care specialty if the specialty requires such credential.

Subsection (a)(2)(iii)(B) states that the individual has other qualifications as prescribed by the Secretary for one of the health care professions listed under 38 U.S.C. 7402(b). Some health care professionals appointed under 38 U.S.C. 7401(3) whose qualifications are listed in 38 U.S.C. 7402(b) are not required to meet State license, registration, certification, or other requirements and rely on the qualifications prescribed by the Secretary. Therefore, these individuals would be included in this subsection and required to have the qualifications prescribed by the Secretary for their health care profession.

Subsection (a)(2)(iii)(C) states that the individual is otherwise authorized by the Secretary to provide health care services. This would include those individuals who practice a health care profession that does not require a State license, registration, certification, or other requirement and is also not listed in 38 U.S.C. 7402(b), but is authorized by the Secretary to provide health care services.

Subsection (a)(2)(iii)(D) includes individuals who are trainees or may have a time limited appointment to finish clinicals or other requirements prior to being fully licensed. Therefore, the regulation will state that the individual is under the clinical supervision of a health care professional that meets the requirements listed in subsection (a)(2)(iii)(A)–(C) and the individual must meet the requirements in subsection (a)(2)(iii)(D)(i) or (a)(2)(iii)(D)(ii).

Subsection (a)(2)(iii)(D)(i) states that the individual is a health professions trainee appointed under 38 U.S.C. 7405 or 7406 participating in clinical or research training under supervision to satisfy program or degree requirements.

Subsection (a)(2)(iii)(D)(ii) states that the individual is a health care employee, appointed under title 5 of the U.S. Code, 38 U.S.C. 7401(1) or (3), or 38 U.S.C. 7405 for any category of

personnel described in 38 U.S.C. 7401(1) or (3) who must obtain an active, current, full and unrestricted licensure, registration, or certification or meet the qualification standards as defined by the Secretary within the specified time frame. These individuals have a time-limited appointment to obtain credentials. For example, marriage and family therapists require a certain number of supervised clinical post-graduate hours prior to receiving their license.

Lastly, as we previously discussed in this rulemaking, we are defining the term State in subsection (a)(3) as the term is defined in 38 U.S.C. 101(20), and also including political subdivisions of such States. This is consistent with the definition of State in 38 U.S.C. 1730C(f) which is VA's statutory authority to preempt State law when the covered health care professional is using telehealth to provide treatment to an individual under this title. We believe that it is important to define the term in the same way as it is defined for health care professionals practicing via telehealth so that way it is consistent regardless of whether the health care professional is practicing in-person or via telehealth. Moreover, as subdivisions of a State are granted legal authority from the State itself, it makes sense to subject entities created by a State, or authorized by a State to create themselves, to be subject to the same limitations and restrictions as the State itself.

Section 17.419(b) details that VA health care professionals must practice within the scope of their Federal employment irrespective of conflicting State requirements that would prevent or unduly interfere with the exercise of Federal duties. This provision confirms that VA health care professionals may furnish health care consistent with their VA employment obligations without fear of adverse action proposed or taken by any State. In order to clarify and make transparent how VA utilizes or intends to utilize our current statutory authority, we are providing a non-exhaustive list of examples.

The first example is listed in subsection (b)(1)(i). It states that a health care professional may practice their VA health care profession in any State irrespective of the State where they hold a valid license, registration, certification, or other qualification.

The second example is listed in subsection (b)(1)(ii). It states that a health care professional may practice their VA health care profession consistent with the VA national standard of practice as determined by VA. As previously explained, VA

intends to establish national standards of practice via VA policy.

A health care professional's practice within VA will continue to be subject to the limitations imposed by the Controlled Substances Act, 21 U.S.C. 801, *et seq.* and implementing regulations at 21 CFR 1300, *et seq.*, on the authority to prescribe or administer controlled substances, as well as any other limitations on the provision of VA care set forth in applicable Federal law and policy. This will ensure that professionals are still in compliance with critical laws concerning the prescribing and administering of controlled substances. This requirement is stated in subsection (b)(2).

Subsection (c) expressly states the intended preemptive effect of § 17.419, to ensure that conflicting State and local laws, rules, regulations, and requirements related to health care professionals' practice will have no force or effect when such professionals are practicing health care while working within the scope of their VA employment. In circumstances where there is a conflict between Federal and State law, Federal law would prevail in accordance with Article VI, clause 2, of the U.S. Constitution.

Executive Order 13132, Federalism

Executive Order 13132 establishes principles for preemption of State law when it is implicated in rulemaking or proposed legislation. Where a Federal statute does not expressly preempt State law, agencies shall construe any authorization in the statute for the issuance of regulations as authorizing preemption of State law by rulemaking only when the exercise of State authority directly conflicts with the exercise of Federal authority or there is clear evidence to conclude that the Congress intended the agency to have the authority to preempt State law.

In this situation, the Federal statutes do not expressly preempt State laws; however, VA construes the authorization established in 38 U.S.C. 303, 501, and 7401–7464 as authorizing preemption because the exercise of State authority directly conflicts with the exercise of Federal authority under these statutes. Congress granted the Secretary express statutory authority to establish the qualifications for VA's health care professionals, determine the hours and conditions of employment, take disciplinary action against employees, and otherwise regulate the professional activities of those individuals. 38 U.S.C. 7401–7464. Specifically, section 7402(b) states that most health care professionals, after appointment by VA, must, among other

requirements, be licensed, registered, or certified to practice their profession in a State. To that end, VA's regulations and policies will preempt any State law or action that conflicts with the exercise of Federal duties in providing health care at VA.

In addition, any regulatory preemption of State law must be restricted to the minimum level necessary to achieve the objectives of the statute pursuant to the regulations that are promulgated. In this rulemaking, State licensure, registration, and certification laws, rules, regulations, or other requirements are preempted only to the extent such State laws unduly interfere with the ability of VA health care professionals to practice health care while acting within the scope of their VA employment. Therefore, VA believes that the rulemaking is restricted to the minimum level necessary to achieve the objectives of the Federal statutes.

The Executive Order also requires an agency that is publishing a regulation that preempts State law to follow certain procedures. These procedures include: The agency consult with, to the extent practicable, the appropriate State and local officials in an effort to avoid conflicts between State law and Federally protected interests; and the agency provide all affected State and local officials notice and an opportunity for appropriate participation in the proceedings. For the reasons below, VA believes that it is not practicable to consult with the appropriate State and local officials prior to the publication of this rulemaking.

The National Emergency caused by COVID-19 has highlighted VA's acute need to quickly shift health care professionals across the country. As both private and VA medical facilities in different parts of the country reach or exceed capacity, VA must be able to mobilize its health care professionals across State lines to provide critical care for those in need. As explained in the Supplementary Information above, as of June 2020, a total of 1,893 staff have been mobilized to meet the needs of our facilities and Fourth Mission requests during the pandemic. VA deployed 877 staff to meet Federal Emergency Management Agency (FEMA) Mission requests, 420 health care professionals were deployed as DEMPS response, 414 employees were mobilized to cross level staffing needs within their Veterans Integrated Service Networks (VISN), 69 employees were mobilized to support needs in another VISN, and 113 Travel Nurse Corps staff responded specifically for COVID-19 staffing support. Given the speed in which it is required for our

health care professionals to go to these facilities and provide health care, it is also essential that the health care professionals can follow the same standards of practice irrespective of the location of the facility or the requirements of their individual State license. This is important because if multiple health care professionals, such as multiple registered nurses, licensed in different States are all sent to one VA medical facility to assist when there is a shortage of professionals, it would be difficult and cumbersome if they could not all perform the same duties and each supervising provider had to be briefed on the tasks each registered nurse could perform. In addition, not having a uniform national scope of practice could limit the tasks that the registered nurses could provide. This rulemaking will provide health care professionals an increased level of protection against adverse State actions while VA strives to increase access to high quality health care across the VA health care system during this National Emergency. It would be time consuming and contrary to the public health and safety to delay implementing this rulemaking until we consulted with State and local officials. For these reasons, it would be impractical to consult with State and local officials prior to the publication of this rulemaking.

We note that this rulemaking does not establish any national standards of practice; instead, VA will establish the national standards of practice via subregulatory guidance. VA will, to the extent practicable, make all efforts to engage with State and local officials when establishing the national standards of practice via subregulatory guidance. Also, this interim final rule will have a 60-day comment period that will allow State and local officials the opportunity to provide their input on the rule.

Administrative Procedures Act

An Agency may forgo notice and comment required under the Administrative Procedures Act (APA), 5 U.S.C. 553, if the agency for good cause finds that compliance would be impracticable, unnecessary, or contrary to the public interest. An agency may also bypass the APA's 30-day publication requirement if good cause exists. The Secretary of Veterans Affairs finds that there is good cause under the provisions of 5 U.S.C. 553(b)(B) to publish this rule without prior opportunity for public comment because it would be impracticable and contrary to the public interest and finds that there is good cause under 5 U.S.C.

553(d)(3) to bypass its 30-day publication requirement for the same reasons as outlined above in the Federalism section, above.

In short, this rulemaking will provide health care professionals protection against adverse State actions while VA strives to increase access to high quality health care across the VA health care system during this National Emergency.

In addition to the needs discussed above regarding the National Emergency, it is also imperative that VA move its health care professionals across State lines in order to facilitate the implementation of the new EHR system immediately. VA implemented EHR at the first VA facility in October 2020 and additional sites are scheduled to have EHR implemented over the course of the next eight years. The next site is scheduled for implementation in Quarter 2 of Fiscal Year 2021 (*i.e.*, between January to March 2021). Due to the implementation of the new EHR system, VA expects decreased productivity and reduced clinical staffing during training and other events surrounding EHR enactment. VA expects a productivity decrease of up to 30 percent for the 60 days before implementation and the 120 days after at each site. Any decrease in productivity could result in decreased access to health care for our Nation's veterans.

In order to support this anticipated productivity decrease, VA is engaging in a "national supplement," where health care professionals from other VA medical facilities will be deployed to those VA medical facilities and VISNs that are undergoing EHR implementation. The national supplement would mitigate reduced access during EHR deployment activities, such as staff training, cutover, and other EHR implementation activities. Over the eight-year deployment timeline, the national supplement is estimated to have full time employee equivalents of approximately 60 nurses, 3 pharmacy technicians, 5 mental health and primary care providers, and other VA health care professionals. We note that the actual number of VA health care professionals deployed to each site will vary based on need. The national supplement will require VA health care professionals on a national level to practice health care in States where they do not hold a State license, registration, certification, or other requirement. In addition, VISNs will be providing local cross-leveling and intra-VISN staff deployments to support EHRM implementation activities. Put simply, in order to mitigate the decreased

productivity as a result of EHR implementation, VA must transfer VA health care professionals across the country to States where they do not hold a license, registration, certification, or other requirement to assist in training on the new system as well as to support patient care.

Therefore, it would be impracticable and contrary to the public health and safety to delay implementing this rulemaking until a full public notice-and-comment process is completed. This rulemaking will be effective upon publication in the **Federal Register**. As noted above, this interim final rule will have a 60-day comment period that will allow State and local officials the opportunity to provide their input on the rule, and VA will take those comments into consideration when deciding whether any modifications to this rule are warranted.

Paperwork Reduction Act

This final rule contains no provisions constituting a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521).

Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601–612, is not applicable to this rulemaking because a notice of proposed rulemaking is not required under 5 U.S.C. 553. 5 U.S.C. 601(2), 603(a), 604(a).

Executive Orders 12866, 13563, and 13771

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. The Office of Information and Regulatory Affairs has determined that this rule is a significant regulatory action under Executive Order 12866.

VA's impact analysis can be found as a supporting document at <http://www.regulations.gov>, usually within 48 hours after the rulemaking document is published. Additionally, a copy of the rulemaking and its impact analysis are available on VA's website at <http://www.va.gov/orpm/>, by following the link for "VA Regulations Published

From FY 2004 Through Fiscal Year to Date."

This interim final rule is not subject to the requirements of E.O. 13771 because this rule results in no more than *de minimis* costs.

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This interim final rule will have no such effect on State, local, and tribal governments, or on the private sector.

Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a major rule, as defined by 5 U.S.C. 804(2).

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance numbers and titles for the programs affected by this document are: 64.007, Blind Rehabilitation Centers; 64.008, Veterans Domiciliary Care; 64.009, Veterans Medical Care Benefits; 64.010, Veterans Nursing Home Care; 64.011, Veterans Dental Care; 64.012, Veterans Prescription Service; 64.013, Veterans Prosthetic Appliances; 64.018, Sharing Specialized Medical Resources; 64.019, Veterans Rehabilitation Alcohol and Drug Dependence; 64.022, Veterans Home Based Primary Care; 64.039 CHAMPVA; 64.040 VHA Inpatient Medicine; 64.041 VHA Outpatient Specialty Care; 64.042 VHA Inpatient Surgery; 64.043 VHA Mental Health Residential; 64.044 VHA Home Care; 64.045 VHA Outpatient Ancillary Services; 64.046 VHA Inpatient Psychiatry; 64.047 VHA Primary Care; 64.048 VHA Mental Health Clinics; 64.049 VHA Community Living Center; and 64.050 VHA Diagnostic Care.

List of Subjects in 38 CFR Part 17

Administrative practice and procedure, Alcohol abuse, Alcoholism, Claims, Day care, Dental health, Drug abuse, Foreign relations, Government contracts, Grant programs-health, Grant programs-veterans, Health care, Health facilities, Health professions, Health records, Homeless, Medical and dental schools, Medical devices, Medical research, Mental health programs, Nursing homes, Reporting and recordkeeping requirements,

Scholarships and fellowships, Travel and transportation expenses, Veterans.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Brooks D. Tucker, Assistant Secretary for Congressional and Legislative Affairs, Performing the Delegable Duties of the Chief of Staff, Department of Veterans Affairs, approved this document on October 19, 2020, for publication.

Consuela Benjamin,

Regulations Development Coordinator, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

For the reasons stated in the preamble, the Department of Veterans Affairs is amending 38 CFR part 17 as set forth below:

PART 17—MEDICAL

■ 1. The authority citation for part 17 is amended by adding an entry for § 17.419 in numerical order to read in part as follows:

Authority: 38 U.S.C. 501, and as noted in specific sections.

* * * * *

Section 17.419 also issued under 38 U.S.C. 1701 (note), 7301, 7306, 7330A, 7401–7403, 7405, 7406, 7408).

* * * * *

■ 2. Add § 17.419 to read as follows:

§ 17.419 Health care professionals' practice in VA.

(a) *Definitions.* The following definitions apply to this section.

(1) *Beneficiary.* The term beneficiary means a veteran or any other individual receiving health care under title 38 of the United States Code.

(2) *Health care professional.* The term health care professional is an individual who:

(i) Is appointed to an occupation in the Veterans Health Administration that is listed in or authorized under 38 U.S.C. 7306, 7401, 7405, 7406, or 7408 or title 5 of the U.S. Code;

(ii) Is not a VA-contracted health care professional; and

(iii) Is qualified to provide health care as follows:

(A) Has an active, current, full, and unrestricted license, registration, certification, or satisfies another State requirement in a State;

(B) Has other qualifications as prescribed by the Secretary for one of

the health care professions listed under 38 U.S.C. 7402(b);

(C) Is an employee otherwise authorized by the Secretary to provide health care services; or

(D) Is under the clinical supervision of a health care professional that meets the requirements of subsection (a)(2)(iii)(A)–(C) of this section and is either:

(i) A health professions trainee appointed under 38 U.S.C. 7405 or 7406 participating in clinical or research training under supervision to satisfy program or degree requirements; or

(ii) A health care employee, appointed under title 5 of the U.S. Code, 38 U.S.C. 7401(1) or (3), or 38 U.S.C. 7405 for any category of personnel described in 38 U.S.C. 7401(1) or (3) who must obtain an active, current, full and unrestricted licensure, registration, certification, or meet the qualification standards as defined by the Secretary within the specified time frame.

(3) *State*. The term State means a State as defined in 38 U.S.C. 101(20), or a political subdivision of such a State.

(b) *Health care professional's practice*. (1) When a State law or license, registration, certification, or other requirement prevents or unduly interferes with a health care professional's practice within the scope of their VA employment, the health care professional is required to abide by their Federal duties, which includes, but is not limited to, the following situations:

(i) A health care professional may practice their VA health care profession in any State irrespective of the State where they hold a valid license, registration, certification, or other State qualification; or

(ii) A health care professional may practice their VA health care profession within the scope of the VA national standard of practice as determined by VA.

(2) VA health care professional's practice is subject to the limitations imposed by the Controlled Substances Act, 21 U.S.C. 801 *et seq.* and implementing regulations at 21 CFR 1300 *et seq.*, on the authority to prescribe or administer controlled substances, as well as any other limitations on the provision of VA care set forth in applicable Federal law and policy.

(c) *Preemption of State law*. Pursuant to the Supremacy Clause, U.S. Const. art. IV, cl. 2, and in order to achieve important Federal interests, including, but not limited to, the ability to provide the same complete health care and hospital service to beneficiaries in all States as required by 38 U.S.C. 7301, conflicting State laws, rules, regulations or requirements pursuant to such laws are without any force or effect, and State governments have no legal authority to enforce them in relation to actions by health care professionals within the scope of their VA employment.

[FR Doc. 2020–24817 Filed 11–10–20; 8:45 am]

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2020–0122; FRL–10014–19–Region 9]

Air Plan Approval; California; Butte County; El Dorado County; Mojave Desert Air Quality Management District; San Diego County; Ventura County

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve revisions to the Butte County Air Quality Management District (BCAQMD), El Dorado County Air Quality Management District (EDCAQMD), Mojave Desert Air Quality Management District (MDAQMD), San Diego County Air Pollution Control District (SDCAPCD) and Ventura County Air Pollution Control District (VCAPCD) portions of the California State Implementation Plan (SIP). These revisions concern rules that include definitions for certain terms that are necessary for the implementation of local rules that regulate sources of air pollution. We are approving the definitions rules under the Clean Air Act (CAA or the Act).

DATES: This rule will be effective on December 14, 2020.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2020–0122. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, *e.g.* Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information. If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Arnold Lazarus, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 972–2304 or by email at Lazarus.arnold@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document, “we,” “us” and “our” refer to the EPA.

- II. Public Comments and EPA Responses
- III. EPA Action
- IV. Incorporation by Reference
- V. Statutory and Executive Order Reviews

I. Proposed Action

On July 6, 2020 (85 FR 40156), the EPA proposed to approve the five amended rules listed in Table 1 as revisions to the California SIP. With respect to BCAQMD Rule 102, we determined that the State had not provided sufficient public process documentation to provide the basis for a rescission of the rule from the applicable SIP, but we recognized that, because the remaining definitions in BCAQMD Rule 102 had been moved to BCAQMD Rule 101 and because we are approving BCAQMD Rule 101, there is no reason to retain BCAQMD Rule 102 in the applicable SIP.

TABLE 1—SUBMITTED RULES

Local agency	Rule No.	Rule title	Rescinded	Amended/ revised	Submitted
BCAQMD	101	Definitions	12/14/2017	1 5/23/2018
BCAQMD	102	Definitions	² 12/14/2017	³ 5/23/2018
EDCAQMD	101	General Provisions and Definitions	6/20/2017	8/9/2017
MDAQMD	102	Definition of Terms	1/28/2019	⁴ 8/19/2019

TABLE 1—SUBMITTED RULES—Continued

Local agency	Rule No.	Rule title	Rescinded	Amended/ revised	Submitted
SDCAPCD	2	Definitions	7/11/2017	11/13/2017
VCAPCD	2	Definitions	4/9/2019	5/8/19/2019

We proposed to approve these rules because we determined that they comply with the relevant CAA requirements. Our proposed action and related technical support documents (TSDs) contain more information on the rules and our evaluation.

II. Public Comments and EPA Responses

The EPA’s proposed action provided a 30-day public comment period. During this period, we received a comment letter from a member of the public who expressed support for the proposed rulemaking.

III. EPA Action

No comments were submitted that change our assessment of the rules as described in our proposed action. Therefore, as authorized in section 110(k)(3) of the Act, the EPA is fully approving these rules into the California SIP. Our final action includes regulatory text in 40 CFR 52.220 that incorporates by reference the amended rules listed in Table 1 above, and identifies the previously approved rules that are being superseded in the California SIP by the approval of the amended rules. We are also including regulatory text that specifically identifies the remaining definitions in BCAQMD Rule 102 (“Definitions”) that were superseded by our approval in 2015 of BCAQMD Rule 300 (“Open Burning Requirements, Prohibitions and Exemptions”) ⁶ and the remaining definitions that are being superseded by today’s approval of amended BCAQMD Rule 101.

¹ CARB submitted the amendment to BCAQMD Rule 101 electronically on May 23, 2018. CARB’s submittal letter is dated May 18, 2018.

² The BCAQMD amended Rule 101 on this date but took no action on Rule 102. The date is from Enclosure A to CARB Executive Order S–18–004, May 18, 2018, which is included in CARB’s May 23, 2018 SIP submittal.

³ CARB submitted the rescission of BCAQMD Rule 102 electronically on May 23, 2018. CARB’s submittal letter is dated May 18, 2018.

⁴ CARB submitted the amendment to MDAQMD Rule 102 electronically on August 19, 2019. CARB’s submittal letter is dated August 16, 2019.

⁵ CARB submitted the amendment to VCAPCD Rule 2 electronically on August 19, 2019. CARB’s submittal letter is dated August 16, 2019.

⁶ We approved BCAQMD Rule 300 at 80 FR 38966 (July 8, 2015).

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the BCAQMD’s, the EDAQMD’s, the MDAQMD’s, the SDCAPCD’s and the VCAPCD’s rules described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these documents available through *www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 3, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United

States Court of Appeals for the appropriate circuit by January 11, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: October 16, 2020.

John Busterud,

Regional Administrator, Region IX.

For the reasons stated in the preamble, the EPA amends, part 52, Chapter I, Title 40 of the Code of Federal Regulations as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraphs (c)(168)(i)(A)(11) and (12), (c)(280)(i)(B)(3), (c)(404)(i)(C)(3), (c)(457)(i)(C)(7), (c)(488)(i)(A)(5), (c)(503)(i)(C), (c)(516)(i)(B), (c)(518)(i)(B), (c)(520)(i)(A)(2) and (c)(542) to read as follows:

§ 52.220 Identification of plan-in part.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 76

[MB Docket Nos. 19–347, 17–105, 10–71; FCC 20–135; FRS 17141]

Cable Service Change Notifications; Modernization of Media Regulation Initiative; Retransmission Consent

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission revises the regulations governing the notices that cable operators must provide subscribers and local franchise authorities (LFAs) regarding rate and service changes. Specifically, document amends the rules to clarify that when service changes occur due to retransmission consent or program carriage negotiations that fail within the last 30 days of a contract, cable operators must provide notice to subscribers “as soon as possible,” rather than 30 days in advance. The document also eliminates the requirement that cable operators not subject to rate regulation provide 30 days’ advance notice to LFAs of rate or

service changes. Finally, it eliminates the requirement that cable operators provide notice of any significant change to the information required in the certain annual notices, as well as adopts several non-substantive revisions that clarify the rules and eliminate redundant provisions. The Commission concludes that these changes will make consumer notices more meaningful and accurate, reduce consumer confusion, better ensure that subscribers receive the information they need to make informed choices about their service options, and reduce unnecessary regulatory burdens.

DATES: Effective November 12, 2020.

FOR FURTHER INFORMATION CONTACT: For additional information on this proceeding, contact John Cobb, John.Cobb@fcc.gov, of the Policy Division, Media Bureau, (202) 418-2120.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order*, MB Docket Nos. 19-347, 17-105, 10-71; FCC 20-135, adopted on September 30, 2020 and released on October 1, 2020. The full text of this document is available via ECFS (<http://www.fcc.gov/cgb/ecfs/>). (Documents will be available electronically in ASCII, Word, and/or Adobe Acrobat). To request these documents in accessible formats (computer diskettes, large print, audio recording, and Braille), send an email to fcc504@fcc.gov or call the Commission's Consumer and Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY).

Synopsis

In this *Report and Order*, we revise our regulations governing the notices that cable operators must provide subscribers and local franchise authorities (LFAs) regarding rate and service changes. Specifically, we amend § 76.1603 of our rules to clarify that when service changes occur due to retransmission consent or program carriage negotiations that fail within the last 30 days of a contract, cable operators must provide notice to subscribers "as soon as possible," rather than 30 days in advance. We also amend § 76.1603(c) to eliminate the requirement that cable operators not subject to rate regulation provide 30 days' advance notice to LFAs of rate or service changes. Finally, we amend § 76.1603(b) to eliminate the requirement that cable operators provide notice of any significant change to the information required in the § 76.1602 annual notices, as well as adopt several non-substantive revisions

to §§ 76.1601 and 76.1603 that clarify the rules and eliminate redundant provisions. We adopt these changes to make consumer notices more meaningful and accurate, reduce consumer confusion, better ensure that subscribers receive the information they need to make informed choices about their service options, and reduce unnecessary regulatory burdens. With this proceeding, we continue our efforts to modernize our regulations to better reflect today's media marketplace.

Background. As explained fully in the *NPRM*, several provisions of the Communications Act of 1934, as amended (the Act)—sections 623(b), 624(h), and 632—address the notices that cable operators must provide to their subscribers and LFAs regarding service or rate changes. The Commission adopted regulations implementing these notice requirements through several decisions in 1993 and consolidated those regulations into a newly created subpart T in 1999. Two sections within that subpart are at issue in this *Report and Order*. First, § 76.1601 obligates cable operators to provide 30 days' advance notice to broadcast television stations and to subscribers of the deletion or repositioning of any such station. Second, § 76.1603 places several additional notice obligations on cable operators. Subsection (b) requires that cable operators notify subscribers of "any changes in rates, programming services or channel positions" and any significant changes in the information required by § 76.1602 as soon as possible in writing and 30 days in advance if the change is within the control of the cable operator. Subsection (c) requires that cable operators notify LFAs 30 days "before implementing any rate or service change." Finally, subsection (d) requires cable operators to "provide written notice to a subscriber of any increase in the price to be charged for the basic service tier or associated equipment at least 30 days before any proposed increase is effective." These rules, which notably apply only to cable operators and not to other multichannel video programming distributors (MVPDs), have overlapping obligations as a result of the consolidation in 1999.

In 2011, the Commission sought comment on whether to revise § 76.1601 "to require that notice of potential deletion of a broadcaster's signal be given to consumers once a retransmission consent agreement is within 30 days of expiration, unless a renewal or extension has been executed, and regardless of whether the station's signal is ultimately deleted." The

Commission noted that while adequate advance notice of retransmission consent disputes can allow consumers to prepare for service disruptions, "such notice can be unnecessarily costly and disruptive when it creates a false alarm, *i.e.*, concern about disruption that does not come to pass, and induces subscribers to switch MVPD providers in anticipation [thereof]."

In December 2019, we adopted the *NPRM* in this proceeding as a part of our ongoing Media Modernization Initiative. In the *NPRM*, we proposed three primary changes to the notice obligations in §§ 76.1601 and 76.1603: (1) Clarifying in § 76.1603(b) that cable operators have no obligation to provide notice to subscribers 30 days in advance of channel lineup changes when the change is due to retransmission consent or program carriage negotiations that fail during the last 30 days of a contract but that rather, in such a situation, they must provide notice "as soon as possible;" (2) modifying § 76.1603(c) to require service and rate change notices to LFAs only if required by an LFA; and (3) adopting several technical edits to §§ 76.1601 and 76.1603 to make the rules more readable and remove duplicative requirements. We received seven comments and three replies in response to the *NPRM*. Cable operators, ACA Connects (ACA) and NCTA—The internet and Television Association (NCTA) generally supported all of our proposals, while The National Association of Telecommunications Officers and Advisors (NATOA) and various LFAs raised concerns in opposition to the proposals to clarify the service change notice obligations in instances involving failed program carriage or retransmission consent negotiations and to require notice to LFAs only if they specifically request it.

Discussion. In this *Report and Order*, we adopt several revisions to the rules in §§ 76.1601 and 76.1603 governing the notices that cable operators must provide to subscribers and LFAs regarding rate and service changes. First, we adopt our proposal to clarify that cable operators must provide notice as soon as possible in the event of service changes that occur due to retransmission consent or program carriage negotiations that fail in the final 30 days of a contract, rather than 30 days in advance; we also provide guidance on which means are reasonable to provide that notice. Second, we amend the LFA notice requirements to eliminate the requirement that all cable operators provide 30 days' advance notice to LFAs of any changes in rates or services rather than adopting our initial proposal

concerning LFA notice. Instead, we conclude that only cable operators subject to rate regulation will be required to provide 30 days' advance written notice to LFAs of any proposed increase in the price to be charged for the basic service tier. Finally, we eliminate the requirement that cable operators provide notice of any significant change to the information required in the § 76.1602 annual notices, as well as adopt several technical edits to make the rules more readable and remove duplicative requirements.

Service Change Notice Due to Failed Retransmission Consent and Program Carriage Negotiations. We adopt our proposal to amend § 76.1603(b) to clarify that cable operators must provide subscribers notice "as soon as possible" when service changes occur due to retransmission consent or program carriage negotiations that fail within the last 30 days of a contract, rather than 30 days in advance. In doing so, we reverse our previous view that such negotiations are within the control of cable operators. Instead, we adopt a new rule that failed program carriage or retransmission consent negotiations will be deemed outside of cable operators' control. In all other circumstances, however, the subscriber notice requirements will continue to operate as they have previously. That is, rate and service changes must be provided 30 days in advance of any change, unless the change is outside the cable operators' control, in which case it must be provided as soon as possible. We conclude that this action will make subscriber notices more meaningful and accurate, reduce consumer confusion, and ensure that subscribers receive the information they need to make informed choices about their service options.

We reverse the Commission's previous interpretation that program carriage and retransmission consent negotiations are within the control of a cable operator for the purpose of § 76.1603(b). No commenter argued that the Commission should retain its current interpretation that negotiations are within the control of cable operators in this context. We agree with the multiple commenters that contend that retransmission consent and program carriage negotiations are not within the control of the cable operator because cable operators cannot unilaterally control the outcome of such negotiations. Or, as the saying goes, it takes two to tango. Thus, we find that service changes that occur as a result of failed program carriage or retransmission consent negotiations are not within the control of a cable

operator and amend § 76.1603(b) to provide so explicitly. We emphasize that this change applies only in the specific context of program carriage or retransmission consent renewal negotiations that fail within the final 30 days of an existing contract and result in a service change.

We find that this change is consistent with the Act. As noted in the *NPRM*, section 632(b) of the Act directs the Commission to adopt "standards by which cable operators may fulfill their customer service requirements," and section 632(c) affords cable operators the flexibility to "provide notice of service and rate changes to subscribers using any reasonable written means at its sole discretion." These statutory provisions do not explicitly state that all notices must be provided in advance. In fact, section 632(c) refers only to "notice," whereas various other provisions of the Act specifically require "advance notice."

We are persuaded that requiring cable operators to provide notice to subscribers that a channel may be dropped whenever a program carriage or retransmission consent renewal negotiation extends into the final 30 days of an existing contract would cause substantial consumer confusion and thus would not further the goal of facilitating informed choices. We are not persuaded by LFAs' contention that subscribers need advance notice of potential deletions so that they can seek alternative sources of the programming that could ultimately be deleted. Although the legislative history of the Telecommunications Act of 1996 indicates that Congress wanted "to ensure that consumers have sufficient warning about rate and service changes so they can choose to disconnect their service prior to the implementation of the change," we conclude that notices about deletions that may never occur are confusing to consumers and, therefore, do not fulfill this goal. The record provides ample evidence that program carriage and retransmission consent negotiations often come down to the final days—if not hours—of an existing contract and rarely result in a signal deletion. For example, Altice notes that in 2019 at least 90 percent of Altice USA's programming negotiations were resolved during the final 30 days of an existing contract and that agreements were reached with all its programming partners without any channels going dark. Similarly, ACA contends that "[c]arriage agreements are almost always renewed within days (or even hours) of their expiration, and sometimes following multiple short-term extensions." Likewise, NCTA

asserts that "[t]he vast majority of these negotiations end successfully."

The record does not support requiring cable operators to bombard subscribers with notices whenever retransmission consent or program carriage negotiations continue into the last 30 days of a contract. As cable commenters observe, the most contentious negotiations—*i.e.*, those most likely to result in a programming blackout—are often the subject of news reports, advertisements, and social media posts, which provide consumers with information about potential programming disputes and encourage them to "make their voices heard" with their cable operator. Further, we do not agree with LFAs that notices could be sufficiently tailored to avoid causing consumer confusion given the large number of renewal negotiations that extend into the final 30 days of an existing contract and the concomitant volume of potential deletion notices in situations where the channel is not ultimately deleted. Rather, we agree with commenters that caution that providing inherently uncertain notices about potential channel deletions that ultimately do not come to pass could cause some consumers to incur "the burden and expense of switching video providers under the belief that they will soon lose their favorite programming, only later to find (in the vast majority of cases) that a deal was reached that avoided this outcome." We also find that sending repeated notices about changes that do not ultimately occur would make it more likely that many subscribers would ignore those notices, resulting in their missing information about changes that actually do occur.

We interpret "as soon as possible" to require cable operators to provide notice without delay after negotiations have failed such that the cable operator is reasonably certain it will no longer be carrying the programming at issue, and, if possible, before the programming goes dark. The Commission has not previously defined what it means to provide notice "as soon as possible" in § 76.1603(b) when changes occur due to circumstances outside of a cable operator's control. No commenter offered any arguments in support of adopting a specific timeframe to satisfy the "as soon as possible" standard. We conclude that determining whether a notice was delivered as soon as possible is a necessarily fact-specific determination, and thus we decline to adopt any firm timeframe during which a notice would presumptively satisfy the standard. We disagree with Verizon's suggestion that a channel's going dark should be necessary to

trigger the delivery of a notice about the service change as soon as possible, because delivery could be triggered earlier if negotiations have reached the point where a cable operator is reasonably certain it will no longer be carrying the programming at issue. We do, however, agree that if the channel has gone dark, negotiations have clearly failed so as to trigger the notice requirement.

Form of Notice. We revise our rules to clarify that cable operators have some flexibility as to the means by which they provide written notice to communicate service changes to subscribers when those changes result from failed program carriage or retransmission consent negotiations or other changes that are outside the cable operator's control. Section 632(c) of the Act states that a cable operator may use "any reasonable written means at its sole discretion" to deliver notice of service and rate changes to subscribers, and in 2018, the Commission adopted new rules that interpret this section of the Act to permit the electronic delivery of consumer notices by cable operators. In the *Order* adopting those rules, the Commission indicated that it would address the issue of rate and service change notices in a separate proceeding, given that these notices "provide targeted and immediate information about a single event rather than a comprehensive catalog of information." We conclude that in these cases where service change are due to circumstances outside a cable operator's control, our interpretation of "reasonable notice" must reflect that cable operators need flexibility in giving notice to consumers. Therefore, in these specific cases, we will not require cable operators to follow the electronic notification procedures set forth in § 76.1600 of our rules, but instead we amend §§ 76.1600 and 76.1603 of rules to permit them to provide notice through other direct and reliable written means that can reach subscribers more quickly.

In this regard, we conclude that a channel slate on the vacant channel that appears after the programming has been dropped is a reasonable means to communicate the service change to viewers in the immediate aftermath of a channel going dark. We agree with those commenters who assert that channel slates are the most direct form of notice to immediately inform interested subscribers about a channel deletion. We reject the Joint LFAs' contention that channel slates are an inadequate form of notice on their own because they only become available after the programming has been dropped. Rather, because these negotiations, by their very

nature, often continue until the final minutes of existing contracts, we find that a channel slate could be the most immediate direct form of notice to reach affected subscribers in the event of a last-minute channel deletion. Thus, we conclude that channel slates would satisfy the "any reasonable written means" standard in the specific context of a service change due to retransmission consent or program carriage renewal negotiations that fail near the end of an existing contract, as they would communicate time-sensitive notice about service changes to subscribers via the quickest means possible. Accordingly, we revise § 76.1603 to provide that cable operators shall provide notice of service changes outside of their control "as soon as possible using any reasonable written means at the operator's sole discretion, including channel slates." We note that there may be situations in which a channel slate may not satisfy the "as soon as possible" standard despite the service change resulting from program carriage or retransmission consent negotiations that fail within the final 30 days of an existing contract. For example, if carriage negotiations between a cable operator and a programmer fail well in advance of the expiration of the contract, and the cable operator does not intend to continue negotiating, we would expect such operator to deliver notice through other means—such as email—before the channel goes dark. Similarly, to the extent possible, we expect and encourage cable operators to inform subscribers through multiple types of "written means" to ensure that subscribers are adequately informed about any changes to their cable service.

In addition, we agree with Verizon that newspaper notice is not a reasonable written means of notice in this context. Notably, no commenter suggested that newspaper notice in this context should be deemed reasonable. As Verizon asserts, newspaper notices "may not reach all customers and may be delayed, inaccurate by the time they are published, or unread altogether, [and do] not provide timely notice to allow customers to make informed decisions about potential service changes." Given this, we conclude that such notice is insufficient to satisfy the reasonable written means standard in the context of failed program carriage or retransmission consent negotiations.

Notices of Service or Other Changes to Local Franchise Authorities. We conclude that in areas that are no longer subject to rate regulation the substantial costs to cable operators of complying with the LFA rate and service change

notice requirements outweigh any potential benefits that could accrue to consumers as a result of these notices. Accordingly, rather than adopting our initial proposal, we eliminate the LFA notice requirement for cable systems subject to effective competition under the Commission's rules and adopt a requirement that rate regulated systems provide LFAs with 30 days' advance notice of any proposed increase in the price to be charged for the basic service tier.

We are not persuaded that we should preserve the current requirements that cable operators notify LFAs before implementing any rate or service change with respect to those cable operators that face effective competition. First, in the absence of rate regulation, LFAs have little practical use for this information because changes in rates or services are no longer subject to an LFA's authority. And the cable operator is in fact better positioned to address subscriber inquiries concerning rate or service changes than LFAs because LFAs receive only the same information that subscribers already receive under the notice requirements in § 76.1603(b). Second, those LFAs that do rely on these notices to address subscriber inquiries or complaints can implement their own notice requirements, consistent with the Act. Given that there is evidence that cable operators incur significant costs to comply with the current requirements and little evidence that there is widespread use of these LFA notices to benefit subscribers, we eliminate the LFA notice requirement for most cable operators.

We are persuaded to eliminate the LFA rate and service change notice requirements on cable operators subject to effective competition by the multiple commenters who contend that the costs to cable operators of complying with these LFA notice requirements outweigh any benefit to consumers from retaining the requirements. Contradicting NATOA's assertion that notifying LFAs is a de minimis additional expense, cable operators present evidence in the record that they expend significant resources to comply with the LFA notice requirements. Specifically, NCTA highlights several examples from its members' experiences, including one cable operator who budgets \$85,000 annually to deliver LFA notices, in addition to the internal resources devoted to ensure compliance. Further, NCTA points out that in some instances changes that affect only a handful of subscribers nationwide require that notice be delivered to all of the hundreds, if not thousands, of LFAs within a cable operator's service area.

Altice suggests that it has added difficulties complying with the LFA notice requirements, particularly in more rural and sparsely populated jurisdictions where it has had difficulty ascertaining the relevant contact information. We conclude that any benefit that may accrue to consumers from the LFA notice requirements does not outweigh the costs identified in the record. We disagree with those commenters that maintain that we should preserve the LFA notice requirement in its current form to enable LFAs to address inquiries and complaints from subscribers. Although NATOA argues that their LFA members rely on these notices to address inquiries and complaints, Altice asserts that LFAs rarely follow up with inquiries regarding these notices and that subscribers can obtain such information directly from the cable operator. Moreover, cable operators contend that the LFA notice requirements are the relic of an era of widespread rate regulation of cable systems and are no longer necessary now that there is effective competition nearly nationwide such that LFAs do not need the rate information to field consumer calls.

Although we disagree that the current requirement is necessary in areas that are subject to effective competition, we are persuaded that notice of certain rate changes is critical to LFAs certified to regulate cable operator rates because they must be made aware of those rate changes before they take effect to fully exercise their rate regulation authority. Thus, we retain the requirement to provide notice of certain rate changes only with respect to those cable operators in areas where they are not subject to effective competition. Specifically, we adopt a rule, consistent with the language of section 623(b)(6), that such operators must provide LFAs with 30 days' advance notice of any increase proposed in the price to be charged for the basic service tier. This requirement will ensure that relevant LFAs receive notice of any proposed increase in the rates they have the authority to regulate. We specifically do not require cable operators in areas where they are subject to rate regulation to provide advance notice of service changes or of rate changes other than the type described above. This type of notice is not contemplated by section 623(b)(6), and we find that the information gathered from such notices is of little if any use to LFAs, even in areas subject to rate regulation.

Other Rule Changes

Notice of Significant Changes to Information in Annual Notices. We eliminate from § 76.1603(b) the requirement that cable operators provide notice of any significant change to the information required in the § 76.1602 annual notices, as proposed by NCTA. No commenter contends that we should retain this requirement. NCTA asserts that “[t]his rule is yet another artifact of a time when cable operators faced little competition and consumers did not have ready access to such information over the internet.” We find that much of the information encompassed by the annual notice, such as that concerning installation policies and instructions for use, may not be as relevant to current subscribers as changes in rates and services. Changes to rates and services are still required under the rules we adopt today to be provided either “as soon as possible” or within 30 days of the change. With respect to the other categories of information, we agree with NCTA that interested subscribers would likely first turn to the internet for such information. We therefore conclude that we should eliminate this requirement.

Readability and Redundancy. We adopt as proposed in the *NPRM* three technical changes to §§ 76.1601 and 76.1603 to clean up the rules. Commenters who addressed these proposals—representing both cable providers and LFAs—expressed unanimous support for amending these provisions to eliminate redundancies, which resulted from previous streamlining efforts that consolidated multiple, disparate notice provisions into one new subpart. First, we amend § 76.1601 to delete the requirement that cable operators provide notice of the deletion or repositioning of a broadcast channel “to subscribers of the cable system,” as it is redundant of the subscriber notice requirements in § 76.1603. This action will consolidate all of the subscriber notice requirements into one provision, § 76.1603(b). Second, we delete § 76.1603(d), which requires that cable operators notify subscribers about changes in rates for equipment that is provided without charge under § 76.630, because it is duplicative of language in § 76.630(a)(1)(vi). Finally, we delete § 76.1603(e), which provides that a cable operator “may provide such notice using any reasonable written means at its sole discretion.” This provision is duplicative of language in section 632(c) of the Act and language in § 76.1603(b).

Other Proposals. We also adopt our proposal to eliminate the language

regarding the carriage of multiplexed broadcast signals in § 76.1603(c), which was supported by NCTA and unopposed by all other commenters. This requirement was added at the advent of digital broadcast television and does not reflect the standard practices of cable operators with regard to multiplexed broadcast signals.

We decline to adopt Joint LFAs' proposal that we eliminate the requirement in §§ 76.1602(a) and 76.1603(a) that an LFA provide cable operators with 90 days' written notice of its intent to enforce the customer service standards found in §§ 76.1602 and 76.1603. We agree with NCTA that these LFA notices of intent to enforce requirements “are a necessary and appropriate mechanism for alerting cable operators of an LFA's enforcement plans.” Further, given that Joint LFAs' appear to have misunderstood these rules, their arguments for their removal are not persuasive.

Final Regulatory Flexibility Analysis. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) relating to this Order. The FRFA is set forth below.

Paperwork Reduction Act Analysis. This document does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4).

Congressional Review Act. The Commission has determined, and the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs that, this rule is “non-major” under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of this *Report & Order* to Congress and the Government Accountability Office pursuant to 5 U.S.C. 801(a)(1)(A).

Final Regulatory Flexibility Act Analysis. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the *Notice of Proposed Rulemaking* in this proceeding. The Commission sought written public comment on the proposals in the *NPRM*, including comment on the IRFA. We received no comments specifically directed toward the IRFA. This present Final Regulatory

Flexibility Analysis (FRFA) conforms to the RFA.

Need for, and Objective of, the Report and Order. In today's video marketplace, retransmission consent and program carriage negotiations are often concluded within days—if not hours—of the expiration of existing agreements. And in those cases, it is frequently unclear, 30 days prior to a contract's expiration, whether a new agreement will be reached, there will be a short-term extension, or programming will be dropped. This uncertainty led to difficult questions regarding what notice cable operators should be required to provide to subscribers and when they should be required to provide it. On the one hand, subscribers must receive meaningful information regarding their programming options so they can make informed decisions about their service. On the other hand, inaccurate or premature notices about theoretical programming disruptions that never come to pass can cause consumer confusion and lead subscribers to change providers unnecessarily.

This *Report and Order* modifies our rules concerning notices that cable operators must provide to subscribers and local franchise authorities (LFAs) regarding service or rate changes. First, we clarify that cable operators must provide notice as soon as possible in the event of service changes that occur due to retransmission consent or program carriage that fail in the final 30 days of a contract, rather than 30 days in advance. We are persuaded that requiring cable operators to provide notice to subscribers that a channel may be dropped anytime a program carriage or retransmission consent renewal negotiation extends into the final 30 days of an existing contract would cause substantial consumer confusion and thus would not further the goal of facilitating informed choices. In all other circumstances, however, the subscriber notice requirements will continue to operate as they have previously. That is, rate and service changes must otherwise be provided 30 days in advance of any change, unless the change is outside the cable operators' control, in which case it must be provided as soon as possible.

Second, we amend our rule to eliminate the requirement that cable operators not subject to rate regulation provide 30 days' advance notice to LFAs for rate or service changes, and instead retain a narrower requirement that rate-regulated cable systems continue to provide 30 days' advance notice to the relevant LFA of any increase proposed in the price to be charged for the basic service tier. Finally, we eliminate the

requirement that cable operators provide notice of any significant change to the information required in the annual notices that must be sent to subscribers, as well as adopt several technical edits to make the rules more readable and remove duplicative requirements.

Summary of Significant Issues Raised by Public Comments in Response to the IRFA. There were no comments filed in response to the IRFA.

Response to comments by the Chief Counsel for Advocacy of the Small Business Administration. Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA), and to provide a detailed statement of any change made to the proposed rules as a result of those comments.

The Chief Counsel did not file any comments in response to the proposed rules in this proceeding.

Description and Estimate of the Number of Small Entities to Which Rules Will Apply. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules, if adopted. The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction." In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act. A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA. Below, we provide a description of such small entities, as well as an estimate of the number of such small entities, where feasible.

Small Governmental Jurisdictions. A "small governmental jurisdiction" is defined generally as "governments of cities, counties, towns, townships, villages, school districts, or special districts, with a population of less than fifty thousand." U.S. Census Bureau data from the 2017 Census of Governments indicates that there were 90,075 local governmental jurisdictions consisting of general purpose governments and special purpose governments in the United States. Of this number there were 36,431 General purpose governments (county, municipal and town or township) with populations of less than 50,000 and 12,040 Special purpose governments

(independent school districts and special districts) with populations of less than 50,000. The 2017 U.S. Census Bureau data for most types of governments in the local government category shows that the majority of these governments have populations of less than 50,000. Based on this data we estimate that at least 48,471 local government jurisdictions fall in the category of "small governmental jurisdictions."

Cable Companies and Systems (Rate Regulation Standard). The Commission has developed its own small business size standards, for the purpose of cable rate regulation. Under the Commission's rules, a "small cable company" is one serving 400,000 or fewer subscribers, nationwide. Industry data indicate that, of 4,200 cable operators nationwide, all but 9 are small under this size standard. In addition, under the Commission's rules, a "small system" is a cable system serving 15,000 or fewer subscribers. Industry data indicate that, of 4,200 systems nationwide, 3,900 have fewer than 15,000 subscribers, based on the same records. Thus, under this second size standard, the Commission believes that most cable systems are small.

Cable System Operators. The Act also contains a size standard for small cable system operators, which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual revenues in the aggregate exceed \$250,000,000." There are approximately 45,073,297 cable subscribers in the United States today. Accordingly, an operator serving fewer than 450,733 subscribers shall be deemed a small operator if its annual revenues, when combined with the total revenues of all its affiliates, do not exceed \$250 million in the aggregate. Based on the available data, we find that all but five independent cable operators serve fewer than 450,733 subscribers. Although it seems certain that some of these cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million, we note that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million, and therefore we are unable to estimate more accurately the number of cable system operators that would qualify as small under the definition in the Communications Act.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities. This *Report and Order* modifies three

requirements for cable operators pertaining to the notices they must deliver to subscribers and LFAs in advance of service changes. First, the rule that requires cable operators to notify subscribers about changes to rates, programming services, or channel positions with 30 days' advance notice will be clarified to instead require that cable operators notify subscribers "as soon as possible" in the case of retransmission consent or program carriage negotiations that fail during the last 30 days of a contract. This will reverse the Commission's past position that negotiations are "within the control of the cable operator," eliminating the need to notify customers of an impending change in programming 30 days in advance when carriage negotiations have not yet concluded. Second, the requirement that cable operators to notify LFAs of any changes to rates, programming services, or channel positions will be eliminated entirely for cable operators that are subject to effective competition. Finally, it deletes the requirement that cable operators provide notice of any significant change to the information required in the annual notices that must be sent to subscribers.

Steps Taken to Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered. The RFA requires an agency to describe any significant alternatives that it has considered in developing its approach, which may include the following four alternatives (among others): "(1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rule for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities."

The *Report and Order*, as stated in Section A of this FRFA, modifies two rules to reduce the burden on all cable operators, including small operators, as they will not be required to provide as many notices. Likewise, this may reduce the burdens on small local governments, which would not have to review as many filings. As a part of the Commission's Media Modernization Initiative, the intent of changing these requirements is to reduce the costs of compliance with the Commission's rules, including any related managerial, administrative, legal, and operational costs. We anticipate that small entities,

as well as larger entities, will benefit from this modification.

Report to Congress. The Commission will send a copy of the Report and Order, including this FRFA, in a report to be sent to Congress pursuant to the Congressional Review Act. In addition, the Commission will send a copy of the Report and Order, including this FRFA, to the Chief Counsel for Advocacy of the SBA. A copy of the Report and Order and FRFA (or summaries thereof) will also be published in the **Federal Register**.

Accordingly, *it is ordered* that, pursuant to the authority contained in sections 1, 4(i), 4(j), 623, 624, and 632 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i), 154(j), 543, 544, and 552, the Report and Order *is adopted*. *It is further ordered* that the Commission's rules *are hereby amended* as set forth in Appendix A, effective as of the date of publication of a summary in the **Federal Register**. *It is further ordered* that the Commission's Consumer and Governmental Affairs Bureau, Reference Information Center, *shall send* a copy of this *Report and Order*, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the Small Business Administration. *It is further ordered* that the Commission will send a copy of the *Report and Order* in a report to Congress and the Government Accountability Office pursuant to the Congressional Review Act (CRA). *It is further ordered* that should no petitions for reconsideration or petitions for judicial review be timely filed, MB Docket No. 19–347 *shall be terminated* and its docket closed.

List of Subjects in 47 CFR Part 76

Administrative practice and procedure, Cable Television, Communications, Reporting and recordkeeping requirements, Telecommunications.

Federal Communications Commission.

Marlene Dortch,

Secretary.

For the reasons set forth in the preamble, the Federal Communications Commission amends part 76 of title 47 of the Code of Federal Regulations as follows:

PART 76—MULTICHANNEL VIDEO AND CABLE TELEVISION SERVICE

■ 1. The Authority citation for Part 76 continues to read as follows:

Authority: 47 U.S.C. 151, 152, 153, 154, 301, 302, 302a, 303, 303a, 307, 308, 309, 312, 315, 317, 325, 338, 339, 340, 341, 503, 521, 522, 531, 532, 534, 535, 536, 537, 543, 544,

544a, 545, 548, 549, 552, 554, 556, 558, 560, 561, 571, 572, 573.

■ 2. Amend § 76.5 by adding paragraph (rr) to read as follows:

§ 76.5 Definitions.

* * * * *

(rr) Channel Slates. A written notice that appears on screen in place of a dropped video feed.

■ 3. Amend § 76.1600 by revising paragraph (a) to read as follows:

§ 76.1600 Electronic delivery of notices.

(a) Except as provided in § 76.1603 for changes that occur due to circumstances outside a cable operator's control, which also may be provided as set forth in 76.1603(b), written information provided by cable operators to subscribers or customers pursuant to §§ 76.1601, 76.1602, 76.1603, 76.1604, 76.1618, and 76.1620 of this Subpart T, as well as subscriber privacy notifications required by cable operators, satellite providers, and open video systems pursuant to sections 631, 338(i), and 653 of the Communications Act, may be delivered electronically by email to any subscriber who has not opted out of electronic delivery under paragraph (a)(3) of this section if the entity:

* * * * *

■ 4. Revise § 76.1601 to read as follows:

§ 76.1601 Deletion or repositioning of broadcast signals.

A cable operator shall provide written notice to any broadcast television station at least 30 days prior to either deleting from carriage or repositioning that station.

■ 5. Amend § 76.1603 by:

■ a. Revising paragraphs (b) and (c);

■ b. Removing paragraphs (d) and (e); and

■ c. Redesignating paragraph (f) as paragraph (d).

The revisions read as follows:

§ 76.1603 Customer service—rate and service changes.

* * * * *

(b) Cable operators shall provide written notice to subscribers of any changes in rates or services. Notice shall be provided to subscribers at least 30 days in advance of the change, unless the change results from circumstances outside of the cable operator's control (including failed retransmission consent or program carriage negotiations during the last 30 days of a contract), in which case notice shall be provided as soon as possible using any reasonable written means at the operator's sole discretion, including Channel Slates. Notice of rate changes shall include the precise

amount of the rate change and explain the reason for the change in readily understandable terms. Notice of changes involving the addition or deletion of

channels shall individually identify each channel affected.

(c) A cable operator not subject to effective competition shall provide 30 days' advance notice to its local franchising authority of any increase

proposed in the price to be charged for the basic service tier.

* * * * *

BILLING CODE 6712-01-P

Proposed Rules

Federal Register

Vol. 85, No. 219

Thursday, November 12, 2020

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Parts 888, 982, 983 and 985

[Docket No. FR-6092-N-02]

RIN 2577-AD06

Housing Opportunity Through Modernization Act of 2016—Housing Choice Voucher (HCV) and Project-Based Voucher Implementation; Additional Streamlining Changes; Extension of Comment Period

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Proposed rule; extension of comment period.

SUMMARY: On October 8, 2020, HUD published in the **Federal Register** a notice of proposed rulemaking entitled “Housing Opportunity through Modernization Act of 2016: Housing Choice Voucher and Project-Based Voucher Implementation; Additional Streamlining Changes”, proposing comprehensive amendments to the regulations governing the Housing Choice Voucher (HCV) and Project-Based Voucher (PBV) programs, largely in response to the enactment of the Housing Opportunity Through Modernization Act (HOTMA). The proposed rule provided for a 60-day comment period, which would have ended December 7, 2020. HUD has determined that a 30-day extension of the comment period, until January 6, 2021, is appropriate. This additional time will allow interested persons additional time to analyze the proposal and prepare their comments.

DATES: The comment period for the proposed rule published on October 8, 2020, at 85 FR 63664, is extended. Comments should be received on or before January 6, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this proposed rule. Copies of all comments submitted are available for inspection and downloading at

www.regulations.gov. To receive consideration as public comments, comments must be submitted through one of two methods, specified below. All submissions must refer to the above docket number and title.

1. *Electronic Submission of Comments.* Interested persons may submit comments electronically through the Federal eRulemaking Portal at www.regulations.gov. HUD strongly encourages commenters to submit comments electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt by HUD, and enables HUD to make them immediately available to the public. Comments submitted electronically through the www.regulations.gov website can be viewed by other commenters and interested members of the public. Commenters should follow the instructions provided on that site to submit comments electronically.

2. *Submission of Comments by Mail.* Comments may be submitted by mail to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW, Room 10276, Washington, DC 20410 0500.

FOR FURTHER INFORMATION CONTACT: Email HOTMAquestions@hud.gov with your questions about this proposed rule.

SUPPLEMENTARY INFORMATION: On October 8, 2020, at 85 FR 63664, HUD published a notice of proposed rulemaking entitled “Housing Opportunity through Modernization Act of 2016: Housing Choice Voucher and Project-Based Voucher Implementation; Additional Streamlining Changes”, proposing comprehensive amendments to the regulations governing the Housing Choice Voucher (HCV) and Project-Based Voucher (PBV) programs, in response to the enactment of the Housing Opportunity Through Modernization Act (HOTMA). While the proposed rule had a 60-day comment period, HUD has received feedback from multiple stakeholders that additional time is needed to adequately review this lengthy and complex rule. Therefore,

HUD is extending the deadline for comments for an additional 30 days.

R. Hunter Kurtz,
Assistant Secretary for Public and Indian Housing.

[FR Doc. 2020-25119 Filed 11-10-20; 8:45 am]

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-6234-A-01]

RIN 2502-AJ57

Manufactured Housing Program: Minimum Payments to the States; Advanced Notice of Proposed Rulemaking and Request for Public Comment

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Advanced notice of proposed rulemaking and request for public comment.

SUMMARY: This advanced notice of proposed rulemaking (ANPR) informs of and seeks public comment on changes that HUD is considering for the minimum payments that HUD distributes to states that participate in the Manufactured Housing Program as State Administrative Agencies (SAAs). HUD is considering two changes intended to achieve more equitable payments that more appropriately reflect state responsibilities and to incentivize continued and new state partnerships: First, HUD is considering payment to each SAA for its participation as partners in each of the various program elements, including SAA roles, participation in joint monitoring, and for administering installation and dispute resolution programs. Second, HUD is considering a change in annual funding from minimum end of Fiscal Year lump sum payments to payments for each operational element at the end of each Fiscal Year, and a sunset provision for states to strategize and plan for this change. HUD is seeking public comment on questions related to these changes and will consider the comments in developing a proposed rule to further streamline and enhance the minimum payment formula. This ANPR will also

be shared with the Manufactured Housing Consensus Committee (MHCC) and the relevant MHCC subcommittee and all state partners for feedback and comments prior to moving forward in the rulemaking process. A Proposed Rule developed in consideration of this ANPR will also be shared with the MHCC prior to moving forward in the rulemaking process in accordance with statutory requirements.

DATES: Comments due January 11, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this ANPR. Comments should refer to the above docket number and title. There are two methods for submitting public comments. All submissions must refer to the above docket number and title.

1. Submission of comments by mail: Comments may be submitted by mail to the HUD Regulations Division, Office of Housing, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410–8000; telephone: (202) 708–2625 (this is not a toll-free number), (800) 481–9895 (this is a toll-free number). Hearing- or speech-impaired individuals may access these numbers through TTY by calling the Federal Relay Service at (800) 877–8339 (this is a toll-free number).

2. Electronic submission of comments: Comments may be submitted electronically through the Federal eRulemaking Portal at www.regulations.gov. HUD strongly encourages commenters to submit comments electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt by HUD, and enables HUD to make them immediately available to the public. Comments submitted electronically through the www.regulations.gov website can be viewed by other commenters and interested members of the public. Commenters should follow instructions provided on that site to submit comments electronically.

Note: To receive consideration as public comments, comments must be submitted through one of the two methods specified above. Again, all submissions must refer to the docket number and title of this ANPR.

No Facsimile Comments. Facsimile (FAX) comments are not acceptable.

3. Public inspection of public comments: All properly submitted comments and communications submitted to HUD will be available for public inspection and copying between 8 a.m. and 5 p.m. weekdays at the above address. Due to security measures at the

HUD Headquarters building, an appointment to review the public comments must be scheduled in advance by calling the Regulations Division at (202) 402–5731 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Relay Service at (800) 877–8339 (this is a toll-free number). Copies of all comments submitted are available for inspection and downloading at www.regulations.gov.

FOR FURTHER INFORMATION CONTACT:

Teresa B. Payne, Administrator, Office of Manufactured Housing Programs, Department of Housing and Urban Development, 451 Seventh Street SW, Room 9164, Washington, DC 20410; telephone number 202–402–5365. (This is not a toll-free number.) Individuals with speech or hearing impairments may access this number through TTY by calling the Federal Relay Service at 800–877–8389. (This is a toll-free number.)

SUPPLEMENTARY INFORMATION:

I. Background

HUD is considering streamlining and enhancing the minimum payment formula to provide more equitable payments to State Administrative Agencies (SAAs) that more appropriately reflect the responsibility of the corresponding state and better encourage states to participate to the maximum extent possible in the Federal-State manufactured housing partnership program. First, HUD is considering payment to each SAA for its participation as partners in various program elements, including SAA roles, participation in joint monitoring, and for administering installation and dispute resolution programs. Second, HUD is considering a change in annual funding from minimum end of Fiscal Year lump sum payments to payments for each operational element at the end of each Fiscal Year, and a sunset provision for states to strategize and plan for this change.

Elsewhere in today's issue of the **Federal Register**, HUD published a final rule that would revise HUD's regulations at 24 CFR 3282.307 and 3284.10 on minimum payments to states to provide more equitable and fair payments to states. HUD continues to seek solutions to the issue of inequitable payments between states and to encourage states to participate in the Federal-state manufactured housing partnership program to the maximum extent possible. Due to the preemptive nature of this building regulatory program and the geographical distribution of home production

facilities combined with interstate commerce, Federal-state partnerships are integral to achieving the purposes of the National Manufactured Home Construction and Safety Standards Act of 1974 and to protecting the residents and general public. This ANPR will also be shared with the MHCC and the relevant MHCC subcommittee and all state partners for feedback and comments prior to moving forward in the rulemaking process. A Proposed Rule developed in consideration of this ANPR will also be shared with the MHCC prior to moving forward in the rulemaking process in accordance with statutory requirements (42 U.S.C. 5403(b)(3)).

Compensating state partners has been a cornerstone of HUD's commitment to its state partners. In accordance with section 620 of the National Manufactured Housing Construction and Safety Standards Act of 1974 (the Act), 42 U.S.C. 5401–5426, HUD regulations provide for HUD to establish and collect from manufactured home manufacturers a reasonable fee to, among other things, provide funding for states that offsets the costs of administering various responsibilities states choose to execute as identified in the respective state plan. 42 U.S.C. 5419(a)(1)(B). States that participate in the federal program as SAAs are currently compensated through a formula calculation. 42 U.S.C. 5419(e)(3). Currently, some SAAs with either fully or conditionally approved State plans receive an additional end-of-Fiscal-Year lump sum payment in the amounts which are not less than the total allocated amount, based on the fee distribution system in effect on December 27, 2000. 42 U.S.C. 5419(e)(3). Under the distributions included in this ANPR, eligible states would continue to receive fee distribution amounts which are not less than the allocated amounts in effect on December 27, 2000.

The Manufactured Housing Improvement Act of 2000 amended the National Manufactured Housing Construction and Safety Standards Act of 1974. Since then, HUD's payments to SAAs have consisted of evaluating each fully-approved SAA's total annual payment and ensuring that such total payment does not fall below the total HUD payments to the fully-approved SAA for Calendar Year 2000. 42 U.S.C. 5419(e)(3).

Elsewhere in today's issue of the **Federal Register** is a final rule by HUD, which would move the baseline payment to the amounts paid to the states in Fiscal Year 2014 (FY14) to ensure payments do not go below the

Calendar Year 2000 (CY00) payments, and now also includes states that have conditionally approved state plans to address previous inequities. This final rule followed from a proposed rule published December 16, 2016 (81 FR 91083) and the public comments received in response.

However, HUD believes that even with these changes there may be even more equitable approaches to ensure SAA compensation in compliance with statutory provisions. While the current formula establishes a payment that allows each SAA to obtain a minimum level of funding, that minimum funding level does not align workload with financial resource needs. For example, some states are still being provided funding under the statutory minimums, even though those states no longer have any operating manufacturing plants. Further, even with minimum payments now being based on production and shipment numbers that existed in FY14, minimum payments do not reflect workload due to changing dynamics of production and shipments. The updated regulation related to supplemental payment at the end of the fiscal year paid to eligible states is based on FY14 production outputs, and no other factors albeit update to the calculation based on CY00 production outputs. Therefore, HUD is considering an allocation of financial resources more closely based on the workload needs arising from the various levels of participation that any given state may experience or elect.

HUD is soliciting comment on potential action related to its partial funding of state programs in accordance with 42 U.S.C. 5419(e)(3), which directs that states do not receive less than the formula distribution amounts that were in place for production states (\$2.50 per transportable section) and location states (\$9.00 per transportable section) in CY00. Elsewhere in today's issue of the **Federal Register**, HUD published a final rule that would substantially increase the payment to production states from \$2.50 per transportable section to \$14.00 per transportable section. HUD is also now considering payment to each SAA for its participation as partners in various program elements, including SAA roles, participation in joint monitoring, and for administering installation and/or dispute resolution programs.

HUD is considering this change to better reinforce HUD's commitments to HUD-state partnerships while incentivizing states to maintain current partnerships and consider additional partnerships and participation in all aspects of the program. It is important to understand that these payments are

distinct from any HUD funding to SAAs provided through formula distribution calculated from production and shipments. It is also important to understand that based on statute, only SAAs with state plans are eligible for funding, therefore, those states that may choose to operate individual optional programs such as Dispute Resolution and or Installation, would not get payments unless the state becomes an SAA.

This change from minimum end of Fiscal Year lump sum payments to payments for each operational element at the end of each Fiscal Year would occur over an established time period, such as 5 or 10 years. HUD is considering a sunset of the supplemental payment(s) over a to-be-determined time frame to better incentivize states to participate to the maximum extent possible in the manufactured housing program that was initially created as a Federal-state partnership.

HUD's current partnership elements include states that have chosen to partner as:

- State Administrative Agencies with manufacturers located in the state (SAAM)
- State Administrative Agencies without manufacturers located in the state (SAAL)
- State Administrative Agencies that partner with HUD to participate in Joint Monitoring (JM)
- States that partner with HUD to administer Dispute Resolution (DR)
- States that partner with HUD to administer Installation Oversight (IN)

HUD is considering the provision of lump sum annual payments for each partnership element to help offset the costs of standing up and operating each aspect in addition to the \$9 and \$14.00 that will be paid for location and production through a final rule being published elsewhere in today's issue of the **Federal Register**. HUD is contemplating setting the annual payments for each element within the following ranges:

- SAAM: \$5,000–\$8,000
- SAAL: \$5,000–\$8,000
- JM: \$5,000–\$8,000
- DR: \$3,000–\$5,000
- IN: \$5,000–\$7,000

In addition, because the work related to the oversight of installation of new manufactured homes is generally dependent on the number of home installations in each state, HUD is considering augmenting the per-unit formula up to \$2.00 per transportable section to account for installation oversight work for each transportable

section with a manufacturer-reported first destination in a state that administers a HUD-approved installation program.

Using FY21 as an example, production and shipments are estimated to be 5% to 8% above production and shipments for FY20. Therefore, in this following examples, FY21 total production and shipments are estimated to be around 150,000 to 158,000 transportable sections.

Hypothetical State A

State A is an SAA with production within the state and participates in the program as an SAAM and SAAL but does not participate as a state partner for JM, IN, or DR state. Production for the plants within this state are estimated to be about 4,500 transportable sections in FY21 and shipments within or to this state are estimated to be 2,500 transportable sections in FY21. Therefore, according to HUD's formula payments, payment to State A in FY21 would be comprised of:

- Production: 4,500 transportable sections × \$14 per section = \$63,000, and
- Shipments: 2,500 transportable sections × \$9 per section = \$22,500

In addition to the formula payments above, State A would receive an FY21 year end payment for participation as an SAAM and SAAL, comprised of the following:

- SAAM: \$5,000–\$8,000, and
- SAAL: \$5,000–\$8,000

Since FY21 is within the to be determined sunset period, State A would also receive a year end supplemental payment that would initially be calculated based on the FY14 total payment minus the sum of formula and participation payments: FY14 total payment—(\$63,000 + \$22,500 + \$10,000 to \$16,000¹).

The end of year supplemental would continue to be paid through the sunset period, though in potentially reduced amounts (see Question 3).

After the sunset period, the year-end supplemental payment would be discontinued entirely and payments to the state would reflect potential increases in production and shipments as well as any additional program participation payment for program elements the state may choose and is approved to conduct within the HUD-state partnership (including Joint

¹ Depending on the established participation payment for each of the SAAM and SAAL elements, the participation payment for State A is expected to be \$5,000 to \$8,000 or SAAM plus \$5,000 to \$8,000 for SAAL, totaling a payment range of \$10,000 to \$16,000.

Monitoring at \$5,000 to \$8,000, Dispute Resolution at \$3,000 to \$5,000, and Installation at \$5,000 to \$7,000). In addition, if State A were to partner as an Installation state, aside from the Installation program element payment of \$5,000 to \$7,000, the state would receive up to \$5,000 for per-section installation fees based on the number of transportable sections shipped within and to the state (2,500 transportable sections \times up to \$2 per section).

Hypothetical State B

State B is an SAA state that does not have any production within the state but otherwise fully participates in the program as an SAAL, JM, DR, and IN state. Shipments to this state are estimated to be 3,500 transportable sections in FY21. Therefore, according to HUD's formula payments, payment to State B would be comprised of:

- Production: 0 transportable sections \times \$14 = \$0
- Shipments: 3,500 transportable sections \times \$9 = \$31,500

In addition to the formula payments above, State B would receive an FY21 year end payment for participation, comprised of the following:

- SAAL: \$5,000–\$8,000
- JM: \$5,000–\$8,000
- DR: \$3,000–\$5,000
- IN: \$5,000–\$7,000
- Per-section Installation Fee: Up to \$7,000 (3,500 transportable sections \times up to \$2 per section)

Since FY21 is within the to be determined sunset period, State B would continue to receive a year end supplemental payment that would initially be calculated based on the FY14 total payment minus the sum of formula and participation payments: FY14 total payment—(\$31,500 + \$18,000 to \$28,000² + up to \$7,000³).

The end of year supplemental would continue to be paid through the sunset period, though in potentially reduced amounts (see Question 3).

After the sunset period, the year-end supplemental payment would be discontinued entirely and payments to the state would reflect potential increases in shipments and installations as well as production payments if a plant were to begin production within the state.

² Depending on the established participation payment for each of the SAAL, JM, DR, and IN elements, the participation payment for State B would be expected to be \$5,000 to \$8,000 for SAAL plus \$5,000 to \$8,000 for Joint Monitoring plus, \$3,000 to \$5,000 for Dispute Resolution plus \$5,000 to \$7,000 for Installation, totaling a payment range of \$18,000 to \$28,000.

³ The per section Installation Fee would total up to \$7,000 (3,500 transportable sections \times up to \$2 per section).

II. Request for Public Comment

HUD seeks public feedback on any elements of this ANPR. In particular, HUD seeks information and recommendations on the following issues:

1. Should HUD change from a minimum annual payment structure to a payment structure that is based on an eligible state's participation in the federal program? Are the activities proposed by HUD for incorporation into the payment structure appropriate? Are there activities that should be added to or removed from that list? Provide the reasoning for your response.

2. Should HUD provide a uniform annual funding amount associated with each partnership element? Is the range of funding proposed by HUD for each partnership element appropriate? What amounts within the ranges proposed by HUD are appropriate:

a. For incenting existing SAA states to continue participation in each partnership element?

b. For incenting existing SAA states to implement additional partnership elements?

3. Can a state determine its budgeting needs and establish and implement additional partnership elements to retain maximum compensation within a 5 or 10-year sunset period? Would another time frame be more appropriate? By what means, if any, should the remaining supplemental payment be phased out during the sunset period? For example, should the supplemental payment (calculated after subtracting payments for production and state participation) be reduced by a particular percentage each year (20% in year 2, 40% in year 3, and so on)? Provide the reasoning for your responses.

4. Will states that are not currently SAAs be incentivized to become SAAs? If so, will those states also be incentivized to become active participants to the maximum extent possible in each aspect of the manufactured housing program? Provide the reasoning for your response.

5. Should HUD consider payments to states that are not SAAs? If so, what instrument needs to be implemented to enable such payments? Provide the reasoning for your response.

6. Should HUD augment the per-unit formula to account for each transportable section with a manufacturer-reported first destination in a state that administers a HUD-approved installation program? What are states' costs of overseeing installation, and if HUD were to help offset those costs, what amount of

payment per transportable unit would help to meaningfully offset those costs?

Dana T. Wade,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

[Docket No. FWS–R4–ES–2020–0094; FF09E21000 FXES11110900000 212]

RIN 1018–BE89

Endangered and Threatened Wildlife and Plants; Threatened Species Status With Section 4(d) Rule for Sickle Darter

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a 12-month finding on a petition to list the sickle darter (*Percina williamsi*), a fish species from the upper Tennessee River drainage in North Carolina, Tennessee, and Virginia, as a threatened species under the Endangered Species Act of 1973, as amended (Act). After a review of the best available scientific and commercial information, we find that listing the species is warranted. Accordingly, we propose to list the sickle darter as a threatened species with a rule issued under section 4(d) of the Act (“4(d) rule”). If we finalize this rule as proposed, it would add this species to the List of Endangered and Threatened Wildlife and extend the Act's protections to the species.

DATES: We will accept comments received or postmarked on or before January 11, 2021. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. Eastern Time on the closing date. We must receive requests for a public hearing, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by December 28, 2020.

ADDRESSES: You may submit comments by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: <http://www.regulations.gov>. In the Search box, enter FWS–R4–ES–2020–0094, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the Search panel on the left side of the screen, under the

Document Type heading, check the Proposed Rule box to locate this document. You may submit a comment by clicking on "Comment Now!"

(2) *By hard copy*: Submit by U.S. mail to: Public Comments Processing, Attn: FWS-R4-ES-2020-0094, U.S. Fish and Wildlife Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041-3803.

We request that you send comments only by the methods described above. We will post all comments on <http://www.regulations.gov>. This generally means that we will post any personal information you provide us (see Information Requested, below, for more information).

FOR FURTHER INFORMATION CONTACT: Lee Andrews, Field Supervisor, U.S. Fish and Wildlife Service, Kentucky Ecological Services Field Office, 330 West Broadway, Suite 265, Frankfort, KY 40601; telephone 502-695-0468. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Act, if we determine that a species may be an endangered or threatened species throughout all or a significant portion of its range, we are required to promptly publish a proposal in the **Federal Register** and make a determination on our proposal within 1 year. To the maximum extent prudent and determinable, we must designate critical habitat for any species that we determine to be an endangered or threatened species under the Act. Listing a species as an endangered or threatened species and designation of critical habitat can only be completed by issuing a rule.

What this document does. This rule proposes the listing of the sickle darter as a threatened species with a rule under section 4(d) of the Act. This rule summarizes our analysis regarding the status of and threats to the sickle darter.

The basis for our action. Under the Act, we may determine that a species is an endangered or threatened species because of any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence. We have determined that threats to the sickle darter include habitat degradation

or loss stemming from hydrologic alteration by impoundments, including dams and other barriers; resource extraction, including mining and timber operations; and diminished water quality from point and non-point source chemical contamination and siltation (Factor A). These threats contribute to the negative effects associated with the species' reduced range and potential effects of climate change (Factor E).

Peer review. In accordance with our joint policy on peer review published in the **Federal Register** on July 1, 1994 (59 FR 34270), and our August 22, 2016, memorandum updating and clarifying the role of peer review of listing actions under the Act, we sought the expert opinions of five appropriate specialists regarding the species status assessment report. We received responses from four specialists, which informed this proposed rule. The purpose of peer review is to ensure that our listing determinations and 4(d) rules are based on scientifically sound data, assumptions, and analyses. The peer reviewers have expertise in the biology, habitat, and threats to the species.

Because we will consider all comments and information we receive during the comment period, our final determination may differ from this proposal. Based on the new information we receive (and any comments on that new information), we may conclude that the species is endangered instead of threatened, or we may conclude that the species does not warrant listing as either an endangered species or a threatened species. We invite comments on any of these possibilities, as well.

Information Requested

We intend that any final action resulting from this proposed rule will be based on the best scientific and commercial data available and be as accurate and as effective as possible. Therefore, we request comments or information from other concerned governmental agencies, Native American tribes, the scientific community, industry, or any other interested parties concerning this proposed rule.

We particularly seek comments concerning:

(1) The species' biology, range, and population trends, including:

(a) Biological or ecological requirements of the species, including habitat requirements for feeding, breeding, and sheltering;

(b) Genetics and taxonomy;

(c) Historical and current range, including distribution patterns;

(d) Historical and current population levels, and current and projected trends; and

(e) Past and ongoing conservation measures for the species, its habitat, or both.

(2) Factors that may affect the continued existence of the species, which may include habitat modification or destruction, overutilization, disease, predation, the inadequacy of existing regulatory mechanisms, or other natural or manmade factors.

(3) Biological, commercial trade, or other relevant data concerning any threats (or lack thereof) to this species and existing regulations that may be addressing those threats.

(4) Additional information concerning the historical and current status, range, distribution, and population size of this species, including the locations of any additional populations of this species.

(5) Information on regulations that are necessary and advisable to provide for the conservation of the sickle darter and that the Service can consider in developing a 4(d) rule for the species. In particular, we seek information concerning:

(a) The extent to which we should include any of the prohibitions in section 9 of the Act (16 U.S.C. 1531 *et seq.*) in the 4(d) rule or whether any other forms of take should be excepted from the prohibitions in the 4(d) rule;

(b) Whether we should add a specific provision to except from prohibition incidental take resulting from silviculture practices and forest management activities that implement highest-standard best management practices and comply with forest practice guidelines related to water quality standards; and

(c) Whether there are additional provisions the Service may wish to consider for the 4(d) rule that are necessary and advisable for the conservation of the sickle darter.

Please include sufficient information with your submission (such as scientific journal articles or other publications) to allow us to verify any scientific or commercial information you include.

Please note that submissions merely stating support for, or opposition to, the action under consideration without providing supporting information, although noted, will not be considered in making a determination, as section 4(b)(1)(A) of the Act directs that determinations as to whether any species is an endangered or a threatened species must be made "solely on the basis of the best scientific and commercial data available."

You may submit your comments and materials concerning this proposed rule

by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

If you submit information via <http://www.regulations.gov>, your entire submission—including any personal identifying information—will be posted on the website. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on <http://www.regulations.gov>.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on <http://www.regulations.gov>.

Public Hearing

Section 4(b)(5) of the Act provides for a public hearing on this proposal, if requested. We must receive requests for a public hearing, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT**. We will schedule a public hearing on this proposal, if requested, and announce the date, time, and place of the hearing, as well as how to obtain reasonable accommodations, in the **Federal Register** and local newspapers at least 15 days before the hearing. For the immediate future, we will provide these public hearings using webinars that will be announced on the Service's website, in addition to the **Federal Register**. The use of these virtual public hearings is consistent with our regulations at 50 CFR 424.16(c)(3).

Previous Federal Actions

On April 20, 2010, we received a petition from the Center for Biological Diversity (CBD), Alabama Rivers Alliance, Clinch Coalition, Dogwood Alliance, Gulf Restoration Network, Tennessee Forests Council, and West Virginia Highlands Conservancy (referred to below as the CBD petition) to list 404 aquatic, riparian, and wetland species, including the sickle darter, as endangered or threatened species under the Act. In response to the petition, we published a partial 90-day finding on September 27, 2011 (76 FR 59836), in which we announced our finding that the petition contained substantial information indicating that listing may be warranted for numerous species, including the sickle darter.

On February 18, 2015, the CBD filed a complaint alleging the Service failed to complete a 12-month finding for the sickle darter in accordance with

statutory deadlines. On September 9, 2015, the Service and the CBD filed a stipulated settlement in the District of Columbia, agreeing that the Service will submit to the **Federal Register** a 12-month finding for the sickle darter no later than September 30, 2020 (*Center for Biological Diversity v. Jewell*, case 1:15-CV-00229-EGS (D.D.C.)). This document constitutes our concurrent 12-month warranted petition finding and proposed listing rule.

Supporting Documents

An SSA team prepared an SSA report for the sickle darter. The SSA team was composed of Service biologists, in consultation with other species experts from the Tennessee Valley Authority; State agencies in North Carolina, Tennessee, and Virginia; university researchers; and private fish conservation organizations. The SSA report represents a compilation of the best scientific and commercial data available concerning the status of the species, including the impacts of past, present, and future factors (both negative and beneficial) affecting the species. As discussed above under *Peer review*, we solicited appropriate peer review for the SSA report. The Service sent the SSA report to five independent peer reviewers and received four responses. In addition, we sent the draft SSA report for review to Federal partners, State partners, and scientists with expertise in aquatic ecology and fish biology, taxonomy, and conservation.

I. Proposed Listing Determination

Background

The sickle darter is a small fish native to the upper Tennessee River drainage in North Carolina, Tennessee, and Virginia. The species currently has a disjunct distribution, with populations in the Emory River, Little River, Sequatchie River, and Emory River systems in Tennessee, and the upper Clinch River, North Fork Holston River, and Middle Fork Holston River systems in Virginia. Populations within the French Broad River system in North Carolina and Tennessee, and the South Fork Holston River, Powell River, and Watauga River systems in Tennessee are extirpated. A thorough review of the taxonomy, life history, and ecology of the sickle darter is presented in the SSA report (version 1.0; Service 2020a, pp. 9–13).

The sickle darter has a long, slender body reaching up to 120 millimeters (mm) (4.7 inches (in)) in length and an elongated, pointed snout. The body color is brown to olive above and white

to pale yellow below with a thin black stripe along the top of the body. Spawning occurs in late winter (February–March), and the species has a maximum lifespan of 3 to 4 years.

Sickle darters typically occupy flowing pools over rocky, sandy, or silty substrates in clear creeks or small rivers. Occupied streams tend to have good water quality, with low turbidity and negligible siltation (Etnier and Starnes 1993, p. 576; Alford 2019, p. 9). In these habitats, the species is most often associated with clean sand-detritus or gravel-cobble-boulder substrates, stands of American water willow (*Justicia americana*), or woody debris piles at water depths ranging from 0.4–1.0 meter (m) (1.3–3.3 feet (ft)) (Etnier and Starnes 1993, p. 576; Page and Near 2007, p. 609; Alford 2019, p. 8). Streams supporting sickle darters range from 9–33 m (29–108 ft) wide and streamside tree canopy cover in these streams ranges from open to nearly closed (Alford 2019, p. 8). The species spends most of its time in the water column, often hovering a few inches above the stream or river bottom (Etnier and Starnes 1993, p. 576).

In winter, sickle darters have been observed in deep pools (depths of up to 3 m (10 ft)) or in slow-flowing, shallow pools in close proximity to cover (Etnier and Starnes 1993, p. 576; Service 2020b, p. 1). The species migrates from the deepest areas of pools to shallow, gravel shoals (riffles) in late winter or early spring (February–March) to spawn (Etnier and Starnes 1993, p. 576). Spawning begins when stream water temperatures reach 10 to 16 Celsius (°C) (50 to 60 Fahrenheit (°F)) (Petty *et al.* 2017, p. 3). Sexual maturity of males occurs at the end of the first year of life, while sexual maturity of females occurs at the end of their second year of life (Page 1978, p. 663; Petty *et al.* 2017, p. 3). Females produce up to 355 eggs per clutch, which hatch in 21 days at an average stream temperature of 10 °C (50 °F) (Etnier and Starnes 1993, p. 576). The incubation period is likely shorter (about 2 weeks) when stream temperatures are higher (Service 2020b, p. 1). The larvae move up and down in the water column and presumably feed on zooplankton and other small macroinvertebrates after depleting yolk sac nutrients (Etnier and Starnes 1993, p. 576; Petty *et al.* 2017, p. 3). After about 30 days, the larvae move to the stream bottom (Petty *et al.* 2017, p. 3) where they mature. Except for their late winter movements from pools to riffles for spawning, no information is available on the movement behavior of the sickle darter. However, studies of two closely related species in the genus

Percina (longhead darter and frecklebelly darter) indicate that the sickle darter likely exhibits seasonal upstream and downstream movements (Eisenhour *et al.* 2011, p. 15; Eisenhour and Washburn 2016, pp. 19–24).

Sickle darters feed primarily on larval mayflies and midges; minor prey items include riffle beetles, caddisflies, dragonflies, and several other groups of aquatic macroinvertebrates (Page and Near 2007, pp. 609–610; Alford 2019, p. 10). Crayfishes have been reported as a common food item for the closely related longhead darter (Page 1978, p. 663), but have not been observed in the sickle darter's diet (Alford 2019, p. 10).

Regulatory and Analytical Framework

Regulatory Framework

Section 4 of the Act (16 U.S.C. 1533) and its implementing regulations (50 CFR part 424) set forth the procedures for determining whether a species is an “endangered species” or a “threatened species.” The Act defines an “endangered species” as a species that is in danger of extinction throughout all or a significant portion of its range, and a “threatened species” as a species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether any species is an “endangered species” or a “threatened species” because of any of the following factors:

(A) The present or threatened destruction, modification, or curtailment of its habitat or range;

(B) Overutilization for commercial, recreational, scientific, or educational purposes;

(C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or

(E) Other natural or manmade factors affecting its continued existence.

These factors represent broad categories of natural or human-caused actions or conditions that could have an effect on a species' continued existence. In evaluating these actions and conditions, we look for those that may have a negative effect on individuals of the species, as well as other actions or conditions that may ameliorate any negative effects or may have positive effects.

We use the term “threat” to refer in general to actions or conditions that are known to or are reasonably likely to negatively affect individuals of a species. The term “threat” includes actions or conditions that have a direct impact on individuals (direct impacts), as well as those that affect individuals

through alteration of their habitat or required resources (stressors). The term “threat” may encompass—either together or separately—the source of the action or condition or the action or condition itself.

However, the mere identification of any threat(s) does not necessarily mean that the species meets the statutory definition of an “endangered species” or a “threatened species.” In determining whether a species meets either definition, we must evaluate all identified threats by considering the expected response by the species, and the effects of the threats—in light of those actions and conditions that will ameliorate the threats—on an individual, population, and species level. We evaluate each threat and its expected effects on the species, then analyze the cumulative effect of all of the threats on the species as a whole. We also consider the cumulative effect of the threats in light of those actions and conditions that will have positive effects on the species, such as any existing regulatory mechanisms or conservation efforts. The Secretary determines whether the species meets the definition of an “endangered species” or a “threatened species” only after conducting this cumulative analysis and describing the expected effect on the species now and in the foreseeable future.

The Act does not define the term “foreseeable future,” which appears in the statutory definition of “threatened species.” Our implementing regulations at 50 CFR 424.11(d) set forth a framework for evaluating the foreseeable future on a case-by-case basis. The term “foreseeable future” extends only so far into the future as the Services can reasonably determine that both the future threats and the species' responses to those threats are likely. In other words, the foreseeable future is the period of time in which we can make reliable predictions. “Reliable” does not mean “certain”; it means sufficient to provide a reasonable degree of confidence in the prediction. Thus, a prediction is reliable if it is reasonable to depend on it when making decisions.

It is not always possible or necessary to define foreseeable future as a particular number of years. Analysis of the foreseeable future uses the best scientific and commercial data available and should consider the timeframes applicable to the relevant threats and to the species' likely responses to those threats in view of its life-history characteristics. Data that are typically relevant to assessing the species' biological response include species-specific factors such as lifespan,

reproductive rates or productivity, certain behaviors, and other demographic factors.

Analytical Framework

The SSA report documents the results of our comprehensive biological review of the best scientific and commercial data regarding the status of the species, including an assessment of the potential threats to the species. The SSA report does not represent a decision by the Service on whether the species should be proposed for listing as an endangered or threatened species under the Act. However, it does provide the scientific basis that informs our regulatory decisions, which involve the further application of standards within the Act and its implementing regulations and policies. The following is a summary of the key results and conclusions from the SSA report; the full SSA report can be found at Docket No. FWS–R4–ES–2020–0094 on <http://www.regulations.gov>.

To assess sickle darter viability, we used the three conservation biology principles of resiliency, redundancy, and representation (Shaffer and Stein 2000, pp. 306–310). Briefly, resiliency supports the species' ability to withstand environmental and demographic stochasticity (for example, wet or dry, warm or cold years), redundancy supports the species' ability to withstand catastrophic events (for example, droughts, large pollution events), and representation supports the species' ability to adapt over time to long-term changes in the environment (for example, climate changes). In general, the more resilient and redundant a species is and the more representation it has, the more likely it is to sustain populations over time, even under changing environmental conditions. Using these principles, we identified the species' ecological requirements for survival and reproduction at the individual, population, and species levels, and described the beneficial and risk factors influencing the species' viability.

The SSA process can be categorized into three sequential stages. During the first stage, we evaluated the individual species' life-history needs. The next stage involved an assessment of the historical and current condition of the species' demographics and habitat characteristics, including an explanation of how the species arrived at its current condition. The final stage of the SSA involved making predictions about the species' responses to positive and negative environmental and anthropogenic influences. Throughout all stages, we used the best available information to characterize viability as

the ability of a species to sustain populations in the wild over time.

Summary of Biological Status and Threats

In this discussion, we review the biological condition of the species and its resources, and the threats that influence the species' current and future condition, in order to assess the species' overall viability and the risks to that viability.

For sickle darter populations to be resilient, the needs of individuals (slow-flowing pools, substrate, food availability, water quality, and aquatic vegetation or large woody debris) must be met at a larger scale. Stream reaches with suitable habitat must be large enough to support an appropriate number of individuals to avoid negative effects associated with small population size, such as inbreeding depression and the Allee effect (whereby low population density reduces the probability of encountering mates for spawning). Connectivity of stream reaches allows for immigration and emigration between populations and increases the likelihood of recolonization should a population be lost. At the species level, the sickle darter needs a sufficient number and distribution of healthy populations to withstand environmental stochasticity

(resiliency) and catastrophes (redundancy) and adapt to biological and physical changes in its environment (representation). To evaluate the current and future viability of the sickle darter, we assessed a range of conditions to allow us to consider the species' resiliency, representation, and redundancy.

We delineated analytical units (populations) using the tributary systems the sickle darter historically occupied. Each population represents demographically linked interbreeding individuals; however, these populations are currently separated by long distances or isolated by impoundments. We identified 10 historical populations across the range of the sickle darter: Emory River, Clinch River, Powell River, Little River, French Broad River, North Fork Holston River, Middle Fork Holston River, South Fork Holston River, Watauga River, and Sequatchie River.

To assess resiliency, we evaluated six components that broadly relate to the species' physical environment or its population demography. Each population's physical environment was assessed by averaging three components determined to have the most influence on the species: Physical habitat quality, connectivity, and water quality. The three components describing population

demography were reproduction, occurrence extent (total length of occupied streams compared to historical range), and occupied stream length. Parameters for each component's condition category were established by evaluating the range of existing data and separating those data into categories based on our understanding of the species' demographics and habitat. Using the demographic and habitat parameters, we then categorized the overall condition of each population. We weighted each of the six components equally and determined the average score to describe each population's current condition (see Table 1, below).

Due to a limited amount of species-specific genetic information for the sickle darter, we based our evaluation of the species' representation on the extent and variability of environmental diversity (habitat diversity) across the species' geographical range. Additionally, we assessed sickle darter redundancy (ability of species to withstand catastrophic events) by evaluating the number and distribution of resilient populations throughout the species' range. Highly resilient populations, coupled with a relatively broad distribution, have a positive relationship to species-level redundancy.

TABLE 1—COMPONENT CONDITIONS USED TO ASSESS RESILIENCY FOR SICKLE DARTER POPULATIONS

Component	Condition			
	High	Moderate	Low	0
Physical Habitat	Slow-flowing pools abundant (ample cover in pools); silt deposition low; no extensive or significant habitat alteration such as recent channelization or riparian clearing; > 75% of available habitat suitable for the species.	Slow-flowing pools present but not abundant (some pools with cover); silt deposition moderate; habitat alteration at moderate level such that channelization or other habitat disturbance more widespread; 25–75% of available habitat suitable for the species.	Slow-flowing pools scarce (few pools with cover); silt deposition extensive; habitat severely altered and recognized as impacting the species; < 25% of habitats suitable for the species.	Habitat unsuitable.
Connectivity	High immigration potential between populations (no dams or other barriers separating populations).	Moderate immigration potential between populations (populations separated by 1 low-head dam, and other partial barriers, such as narrow culverts, may be present).	Low immigration potential between populations (populations separated by ≥ 2 low-head dams or other barriers).	No connectivity (populations isolated; no immigration potential due to the presence of large reservoirs).
Water Quality	Minimal or no known water quality issues (i.e., no 303(d) streams* impacting the species, area sparsely populated, few roads).	Water quality issues recognized that may impact species (i.e., some 303(d) streams*, unpaved roads more common, moderate levels of developed land use).	Water quality issues prevalent within system, likely impacting populations (i.e., numerous 303(d) streams*).	Water quality unsuitable.
Reproduction	Clear evidence of reproduction, with multiple age classes present.	Clear evidence of reproduction, juveniles present, but multiple age classes not detected.	No direct evidence of reproduction (only adults present).	Extirpated.
Occurrence Extent	<10% decline from historical range	10–50% decline from historical range.	>50% decline from historical range	Extirpated.
Occupied Stream Length (Continuity).	≥22.5 km (≥ 14 mi)	11.3–22.5 km (7–14 mi)	<11.3 km (< 7 mi)	Extirpated.

* A 303(d) stream is a stream listed under section 303(d) of the Clean Water Act of 1972 (33 U.S.C. 1251 *et seq.*) as a water body impaired by pollutants.

Current Condition of Sickle Darter

Currently, the sickle darter is known from six tributary systems in the upper

Tennessee River drainage: Emory River, Little River, Clinch River, North Fork Holston River, Middle Fork Holston

River, and Sequatchie River. Historical populations in the Powell River, French Broad River, South Fork Holston River,

and Watauga River systems are extirpated, including the species' only population within the Blue Ridge ecoregion. Impoundments and water pollution in the upper Tennessee River drainage were major factors in the decline of the sickle darter and several other fishes during the early to mid-20th century (Etnier and Starnes 1993, pp. 15, 576). Current factors affecting the condition of sickle darter populations include habitat and water quality degradation, low connectivity, and small population size (e.g., Clinch River). The Emory River and Little River populations exhibit moderate resiliency, as evidenced by the species' persistence within these systems for over 45 years, recent and repeated evidence of reproduction and recruitment, a relatively long occupied reach in each system (more than 22.5 kilometers (km) (14 miles (mi))), and the physical habitat condition and water quality in both systems. The remaining four populations exhibit low resiliency. They are represented by fewer documented occurrences, no evidence of recruitment, shorter occupied reaches, and occur in areas with limited habitat and water quality.

The species' adaptive potential (representation) is low because of its reduced range (and presumably associated reduction in genetic diversity), and the loss of connectivity caused by dam construction. The sickle darter occupies only two of three historical ecoregions (Ridge and Valley and Southwestern Appalachians), likely reducing its ability to adapt to changing environmental conditions over time.

We assessed the number and distribution of resilient populations across the sickle darter's range as a measure of its redundancy. Construction of dams across the upper Tennessee River drainage has eliminated connectivity between extant populations. However, within the currently occupied streams, large barriers are absent, although some small barriers that hamper movement are present (e.g., defunct low-head mill dams, low-water bridges, narrow or partially blocked culverts). As such, there is connectivity within each occupied stream and opportunity for movement of individuals, decreasing the effect of localized stochastic events. Overall, the sickle darter exhibits a low degree of redundancy based on the number of resilient populations and the amount of isolation observed across the species' range, increasing the species' vulnerability to catastrophic events.

Risk Factors for Sickle Darter

Habitat loss and degradation (Factor A) resulting from impoundments, siltation, and water quality degradation, pose the largest risk to the current and future viability of the sickle darter and are the primary contributors to the species' reduced range, population fragmentation, and population loss. Climate change (Factor E) is a potential stressor that may impact the sickle darter in the future. We find the species does not face significant threats from overutilization (Factor B), disease or predation (Factor C), or invasive species (Factor E). A brief summary of relevant stressors is presented below; for a full description, refer to chapter 3 of the SSA report (Service 2020a, entire).

Siltation

Siltation is characterized by excess sediments suspended or deposited in a stream. Excessive levels of sediment accumulate and cover the stream bottom, filling the interstitial spaces with finer substrates and homogenizing and decreasing the available habitat for fishes. In severe cases, sediment can bury large substrate particles such as cobble and boulders. Siltation can affect fishes through abrasion of gill tissues, suffocation of eggs or larvae, reductions in disease tolerance, degradation of spawning habitats, modification of migration patterns, and reductions in food availability (Berkman and Rabeni 1987, pp. 285–294; Waters 1995, pp. 5–7; Wood and Armitage 1997, pp. 211–212; Meyer and Sutherland 2005, pp. 2–3). The sickle darter is considered to be intolerant of siltation (Etnier and Starnes 1993, p. 576). Pool habitat, which is the area in streams most often occupied by sickle darters, is affected by sediment deposition earlier and more readily than habitats with faster moving water (Eisenhour et al. 2009, p. 11). However, the sickle darter is occasionally observed in areas with at least low to moderate levels of siltation on some substrates, as in the Emory River (Service 2020b, p. 3).

Siltation continues to be one of the primary stressors of streams in the upper Tennessee River drainage (TDEC 2010, pp. 43–45; TDEC 2014, pp. 48–50; TDEC 2017, pp. 51–128; VDEQ 2018, pp. 89–91). Sediments can originate from a variety of sources, but State agencies continue to cite land use practices associated with agriculture, land development, and resource extraction (e.g., coal mining) as primary sediment sources within the current and historical range of the sickle darter (TDEC 2010, pp. 56–65; TDEC 2014, pp. 62–69; VDEQ 2018 (Appendix 5), pp.

2313–2531). Unrestricted livestock access occurs on many streams in the range of the sickle darter and has the potential to cause siltation and other habitat disturbance (Fraley and Ahlstedt 2000, pp. 193–194). Grazing may reduce water infiltration rates and increase stormwater runoff; trampling and vegetation removal increases the probability of erosion and siltation (Brim Box and Mossa 1999, p. 103). Other sources of siltation in the species' range include croplands, stream channelization, and removal of riparian (streamside) vegetation, which have the potential to contribute large sediment loads during storm events, thereby causing increased siltation and potentially introducing agricultural pollutants such as herbicides and pesticides carried on or with sediment particles that wash into streams.

Surface coal mining, oil and gas drilling, and logging may also contribute to siltation of stream habitats in the upper Tennessee River drainage, especially the upper Clinch and Powell River systems (TDEC 2017, pp. 94–97; Zipper et al. 2016, pp. 609–610; VDEQ 2018, pp. 2313–2531). Land clearing, road construction, and excavation associated with these land use practices produce new road networks and large areas of bare soil that can contribute large amounts of sediment if best management practices (BMPs) are not used. Siltation from surface coal mining activities, such as the placement of valley fills, forest clearing, and road construction, has affected the sickle darter's historical range in the mainstem Clinch and Powell Rivers. Over the last decade, forestry BMP implementation rates, to control erosion, runoff, and siltation, have increased within the upper Tennessee River drainage (Clatterbuck et al. 2017, pp. 8–12; VDOF 2014, pp. 1–5); however, siltation continues to impact aquatic habitats in those areas where BMP use is lacking.

Water Quality Degradation (Pollution)

Information is lacking on the sickle darter's tolerance to specific pollutants, but overall the species is likely to have low tolerance experienced by other species in its genus. A review of species tolerances to pollution classified five species in the sickle darter genus *Percina* as intolerant, moderately intolerant, or having intermediate tolerance (Grabarkiewicz and Davis 2008, p. 64). None of these five species were classified as moderately tolerant or tolerant of pollution. A variety of pollutants that may impact the sickle darter continue to degrade stream water quality within the upper Tennessee River drainage (Locke et al. 2006, pp.

197, 202–203; TDEC 2010, pp. 42–48; TDEC 2014, pp. 47–53; Zipper et al. 2016, p. 604; TDEC 2017, pp. 51–106; VDEQ 2018 (Appendix 5), pp. 2313–2531). Major pollutants within the upper Tennessee River drainage include pathogens, domestic sewage, animal waste, nutrients, metals, and toxic organic compounds.

Pathogens (fecal indicator bacteria) are a leading cause of stream pollution across the sickle darter's range (Hampson et al. 2000, p. 7; TDEC 2014a, pp. 47–53, TDEC 2017, pp. 51–106; VDEQ 2018 (Appendix 5), pp. 2313–2531). The effect of high bacterial levels on the sickle darter is unknown, but high bacterial concentrations are one indicator of degraded stream conditions, including low dissolved oxygen that negatively affects fish or that may indicate the presence of other pollutants of concern that could harm the species. In the upper Tennessee River drainage, livestock waste is the primary source of bacterial contamination in rural areas, while deteriorating and leaky sewage systems, faulty sewage treatment plants, urban runoff, and combined sewer overflow (CSO) systems are the primary sources of bacterial contamination in urban streams (Hampson et al. 2000, p. 7). Elevated nutrient concentrations of phosphorus, nitrite/nitrate, and ammonia are another leading cause of stream pollution in the upper Tennessee River drainage (Hampson et al. 2000, p. 8; Price et al. 2011, pp. III–1, IV–1; TDEC 2014, p. 50; TDEC 2017, pp. 51–106; VDEQ 2018, pp. 89–91). Primary sources include wastewater treatment facilities, urban and industrial stormwater systems, and agricultural runoff (*i.e.*, livestock waste and synthetic fertilizers) (Hampson et al. 2000, p. 9; TDEC 2014, p. 50).

Other stream pollutants in the upper Tennessee River drainage include organic compounds (*e.g.*, polychlorinated biphenyls (PCBs), dioxins), metals (*e.g.*, mercury, iron, manganese), and pesticides (Hampson et al. 2000, pp. 14–19; Soucek et al. 2000, entire; Soucek et al. 2003, entire; Locke et al. 2006, pp. 200–203; Price et al. 2011, p. VI–1; TDEC 2014, pp. 51–53). Industrial development and coal mining activities prior to the passage of the Clean Water Act of 1972 (CWA; 33 U.S.C. 1251 *et seq.*) and the Surface Mining Control and Reclamation Act of 1977 (SMCRA; 30 U.S.C. 1201 *et seq.*) have left a legacy of contaminated sediment and polluted waters that continue to affect streams in portions of the upper Tennessee River drainage (Hampson et al. 2000, p. 19). Coal mining activity has decreased in the Clinch and Powell River systems in

recent years; however, current and previous mining activities continue to impact portions of these stream systems in Tennessee and Virginia (TDEC 2014, p. 51; Ahlstedt et al. 2016, pp. 13–14; Zipper et al. 2016, pp. 604–612; TDEC 2017, pp. 94–97). Insecticides, herbicides, and fungicides are widely used in the upper Tennessee River drainage to control insects, fungi, weeds, and other undesirable organisms (Hampson et al. 2000, pp. 14–18). The compounds vary in their toxicity, persistence in the environment, and transport characteristics, but often become widely distributed in the environment and can pose hazards to non-target organisms such as the sickle darter.

Impoundments and Their Effects—Habitat Fragmentation and Loss

Impoundments are a threat to the sickle darter and a major factor influencing the species' current distribution within the upper Tennessee River drainage (Etnier and Starnes 1993, p. 576; Jenkins and Burkhead 1993, pp. 101–106; Service 2020a, p. 3). From 1912 to 1963, Tennessee Valley Authority constructed 12 dams, impounding waters in each of the sickle darter's historical tributary systems in Tennessee and Virginia (Miller and Reidinger 1998, pp. 35–37). Two dams were constructed on the Tennessee River mainstem, while the remaining 10 dams were built on tributaries (Clinch River, French Broad River, Holston River, South Fork Holston River, and Watauga River), creating 10 impoundments or reservoirs. Physical, chemical, and biological changes to these systems have been dramatic. Alterations to flow and temperature in the impounded reaches behind the dams and the tailwaters that extend several miles below the dams render these reaches uninhabitable for stream fishes such as the sickle darter. Additionally these dams have diminished and, in some cases, eliminated connectivity of sickle darter populations.

Population Fragmentation and Isolation

As a result of the loss of populations throughout the historical range, the sickle darter's remaining range is limited. The remaining populations are localized and geographically isolated from one another due to impoundments and other habitat degradation, leaving them vulnerable to localized extinctions from toxic chemical spills, habitat modification, progressive degradation from runoff (non-point source pollutants), natural catastrophic changes to their habitat (*e.g.*, flood scour,

drought), other stochastic disturbances, and decreased fitness from reduced genetic diversity.

Species that have incurred reductions in range and population size are more likely to suffer loss of genetic diversity due to genetic drift, potentially increasing their susceptibility to inbreeding depression, decreasing their ability to adapt to environmental changes, and reducing the fitness of individuals (Soulé 1980, pp. 157–158; Hunter 2002, pp. 97–101; Allendorf and Luikart 2007, pp. 117–146). Some small sickle darter populations (*e.g.*, Middle Fork Holston River) may be below the effective population size required to maintain long-term genetic and population viability (Soulé 1980, pp. 162–164; Hunter 2002, pp. 105–107). The long-term viability of a species depends on the conservation of numerous local populations throughout its geographic range (Harris 1984, pp. 93–104). These separate populations are essential for the species to recover and adapt to environmental changes (Harris 1984, pp. 93–104; Noss and Cooperrider 1994, pp. 264–297). The level of isolation of sickle darter populations makes recolonization following localized extirpations virtually impossible without human intervention.

Climate Change

Changing climate conditions can influence sickle darter viability through changes in water temperature and precipitation patterns that result in increased flooding, prolonged droughts, or reduced stream flows (McLaughlin et al. 2002, pp. 6060–6074; Cook et al. 2004, pp. 1015–1018; Thomas et al. 2004, pp. 145–148; p. 2065; IPCC 2014, pp. 58–83). The species' early spawning period (February–March) makes it vulnerable to warming temperatures and higher flows—conditions that could interrupt or prevent successful spawning in a given year (Service 2020b, p. 3). Stream temperatures in the Southeast have increased roughly 0.2 to 0.4 °C (0.4 to 0.7 °F) per decade over the past 30 years (Kaushal et al. 2010, p. 463), although the extent to which the increase in temperatures has affected the sickle darter is unknown. Predicted impacts of climate change on fishes include disruptions to their physiology, such as temperature tolerance, dissolved oxygen needs, and metabolic rates; life history, such as timing of reproduction and growth rate; and distribution, including range shifts and migration of new predators (Jackson and Mandrak 2002, pp. 89–98; Heino et al. 2009, pp. 41–51; Strayer and Dudgeon 2010, pp. 350–351; Comte et al. 2013, pp. 627–636).

Data on recent trends and predicted changes for the upper Tennessee River drainage allow evaluation of the potential impacts of climate change to the sickle darter in the future. Different emission scenarios were used to estimate average annual increases in maximum and minimum air temperature, precipitation, snowfall, and other variables (Alder and Hostetler 2017, entire). Depending on the chosen model and emission scenario (Representative Concentration Pathway (RCP) 4.5 vs. 8.5), annual mean maximum air temperatures for the upper Tennessee River drainage are expected to increase by 2.1 to 3.1 °C (3.8 to 5.6 °F) by 2074, while precipitation models predict that the upper Tennessee River drainage will experience a slight increase in annual mean precipitation (0.2 in per month) through 2074 (Girvetz et al. 2009, pp. 1–19; Alder and Hostetler 2016, pp. 1–9). Because stream temperature is broadly driven by air temperature (Webb and Nobilis 2007, p. 82), water temperatures in the current and historical range of the sickle darter are expected to increase in the future under both RCP 4.5 and RCP 8.5.

The upper thermal limits of the sickle darter are unknown, but the species' occurrence in streams ranging in size from large creeks to medium-sized rivers suggests that it may have some tolerance to a variety of water conditions. The species may be less vulnerable to droughts, compared to species occurring in smaller or headwater streams. Relative to other fishes, sickle darter may have some resilience to the effects of climate change. Among more than 700 species in the Appalachian region, six other darter species in the genus *Percina* are ranked as moderately vulnerable to the effects of climate change (Appalachian Landscape Conservation Cooperative 2017, unpaginated). Moderately vulnerable is defined as abundance and/or range extent within geographical area assessed likely to decrease by 2050. The sickle darter may have some of the same vulnerabilities due to its similar ecology, life history, and small range.

Conservation Efforts

The sickle darter is listed as threatened by Tennessee (Tennessee Wildlife Resources Commission (TWRC) 2016, p. 3) and Virginia (VDGIF 2018, p. 1), making it unlawful to take the species or damage its habitat without a State permit. Additionally, the sickle darter is identified as a species of greatest conservation need in the Tennessee and Virginia Wildlife Action Plans, which outline actions to promote

species conservation. A propagation effort for the sickle darter was initiated in 2015, producing 25 juveniles that were released to the wild. The status of the released fish is unknown, but the effort demonstrates that propagation may be a useful conservation tool to augment sickle darter populations or reintroduce the species to historical localities in the future.

Future Scenarios

In our SSA report (Service 2020a, entire), we defined viability as the ability of the species to sustain populations in the wild over time. To help address uncertainty associated with the degree and extent of potential future stressors and their impacts on the species' needs, the concepts of resiliency, redundancy, and representation were assessed using three plausible future scenarios. We devised these scenarios by identifying information on the following primary threats anticipated to affect sickle darter in the future: Land cover, urbanization, climate change, and conservation activity. The three scenarios capture the range of uncertainty in the changing landscape and how sickle darter will respond to the changing conditions (see Table 2, below). We used the best available data and models to project out 50 years into the future (*i.e.*, 2070), a timeframe where we were reasonably certain the land use change, urbanization, and climate models that we used could forecast patterns in the species' range relevant to the sickle darter and its habitat given the species' life span. For more information on the models and their projections, please see the SSA report (Service 2020a, pp. 54–67).

Under Scenario 1 (continuation of current trend), no significant increases or decreases are expected with respect to land cover, urbanization, or habitat conditions, and habitat restoration efforts (*e.g.*, livestock fencing, riparian plantings, streambank restoration) by the Service and its partners are projected to continue at current levels. In addition, climate change would track RCP 4.5. Three of six extant sickle darter populations are projected to maintain their resiliency categories at current levels. Three extant populations, Clinch River, Middle Fork Holston River, and North Fork Holston River, are projected to become extirpated within 30 years. The species' redundancy and representation are expected to remain at low levels.

Under Scenario 2 (improving trend), habitat conditions throughout the upper Tennessee River drainage are projected to improve due to increased

conservation efforts and improving land use practices (*e.g.*, greater forest cover and reduced agricultural and development effects). Based on these factors, resiliency of all extant populations would remain at current levels or increase, and the species may be rediscovered or will be reintroduced into portions of the Powell River system and French Broad River system. The species' redundancy would increase to a low-moderate level and representation would remain at a low level because populations will be reintroduced or rediscovered in two historically occupied river systems, increasing the number of extant populations (our measure of redundancy) from 6 to 8. In spite of the two added populations, representation would remain low because individuals would have the same genetic composition of parental stock in the rivers from which they were sourced, or will be founded from very small, previously undetected populations.

Under Scenario 3 (worsening trend), habitat conditions are projected to decline within the upper Tennessee River drainage due to reductions in forest cover, increased urbanization and agricultural activities, and a climate trend that tracks RCP 8.5. Combined with reduced conservation efforts, these factors will have a negative effect on population resiliency, with projected extirpations of the Clinch River, North Fork Holston River, Middle Fork Holston River, and Sequatchie River populations. Loss of these populations would reduce redundancy and representation, with overall species' redundancy and representation remaining at low levels.

One of our plausible scenarios (improving trends) projected improving conditions characterized by an increased percentage of forested land cover and a reduced percentage of pasture and hay land cover. In this scenario, urbanization and climate change rates of increase would be reduced relative to current trends (Service 2020a, pp. 72–73) and additional conservation actions would be implemented. There was greater uncertainty regarding future species' status and conservation action implementation than in the other two future scenarios. For example, the improving trends scenario projected reintroduction and successful establishment of two populations in the species' historical range, but successful establishment of viable populations of sickle darters has not yet been proven, and funding for this type of conservation, as well as other conservation actions such as easements

for land restoration, is uncertain. Therefore, we did not rely on the improving trends scenario to assess the

likelihood of the species becoming in danger of extinction in the foreseeable

future. (see *Status Throughout All of Its Range*, below)

TABLE 2—FUTURE CONDITION OF THE SICKLE DARTER BY THE YEAR 2070 UNDER THREE FUTURE SCENARIOS

Analytical unit (population)	Current condition	Scenario 1: Current trend	Scenario 2: Improving trend	Scenario 3: Worsening trend
Emory River	Moderate	Moderate	Moderate	Low.
Clinch River	Low	Likely Extirpated	Low	Likely Extirpated.
Powell River	Extirpated	Likely Extirpated	Low *	Likely Extirpated.
Little River	Moderate	Low	Moderate	Low.
French Broad River	Extirpated	Likely Extirpated	Low *	Likely Extirpated.
Middle Fork Holston River	Low	Likely Extirpated	Low	Likely Extirpated.
North Fork Holston River	Low	Likely Extirpated	Low	Likely Extirpated.
South Fork Holston River	Extirpated	Likely Extirpated	Likely Extirpated	Likely Extirpated.
Sequatchie River	Low	Low	Low	Likely Extirpated.
Watauga	Extirpated	Likely Extirpated	Likely Extirpated	Likely Extirpated.

*Scenario 2 anticipates successful reintroduction or rediscovery of the species in two river systems.

Cumulative Effects of Threats

We note that, by using the SSA framework to guide our analysis of the scientific information documented in the SSA report, we have not only analyzed individual effects on the species, but have also analyzed their potential cumulative effects. We incorporate the cumulative effects into our SSA analysis when we characterize the current and future condition of the species. Our assessment of the current and future conditions encompasses and incorporates the threats individually and cumulatively. Our current and future condition assessment is iterative because it accumulates and evaluates the effects of all the factors that may be influencing the species, including threats and conservation efforts. Because the SSA framework considers not just the presence of the factors, but to what degree they collectively influence risk to the entire species, our assessment integrates the cumulative effects of the factors and replaces a standalone cumulative effects analysis.

Determination of Sickle Darter Status

Section 4 of the Act (16 U.S.C. 1533) and its implementing regulations (50 CFR part 424) set forth the procedures for determining whether a species meets the definition of an endangered species or a threatened species. The Act defines “endangered species” as a species in danger of extinction throughout all or a significant portion of its range, and “threatened species” as a species likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether a species meets the definition of “endangered species” or “threatened species” because of any of the following factors: (A) The present or threatened

destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence.

Status Throughout All of Its Range

The current conditions as assessed in the sickle darter SSA report show that the species exists in six populations, in six tributary systems in two ecoregions. Two populations, Little River and Emory River, have moderate resiliency, and four populations have low resiliency. Although there are six separate populations distributed within the upper Tennessee River drainage, redundancy is low because four have low resiliency. Representation is currently low because genetic variation has likely been reduced over time as populations became disconnected, isolated, and reduced in size. Further, representation has been diminished with the loss of the species from the Blue Ridge ecoregion. While current resiliency, redundancy, and representation are far from optimal, it is unlikely that the sickle darter is in danger of extinction from a near-term catastrophic event. The occurrence in separate rivers of two populations, which are both in moderate condition and regularly recruiting new age classes (generations), greatly diminishes the possibility that such an event would simultaneously cause extirpation of the two populations, nor is it likely that such an event would simultaneously have the same level of impact on the other four populations in low condition.

After evaluating threats to the species and assessing the cumulative effect of the threats under the section 4(a)(1)

factors, we conclude that the risk factors acting on the sickle darter and its habitat, either singly or in combination, are not of sufficient imminence, intensity, or magnitude to indicate that the species is in danger of extinction now (an endangered species) throughout all of its range.

Our analysis of the sickle darter’s future conditions shows that the population and habitat factors used to determine resiliency, representation, and redundancy will continue to decline. The primary threats are currently acting on the species and are likely to continue into the future. We selected 50 years as “foreseeable” in this case because it includes projections from available models for urbanization, land use, and climate change, threats which will affect the status of the species over that timeframe.

The range of plausible future scenarios of the sickle darter’s habitat conditions and water quality factors portend reduced viability into the future. Under the current trend scenario, resiliency is low in two populations and or moderate in one population, and three populations are likely extirpated so that redundancy and representation are reduced. Under the worsening trend scenario, resiliency is low in two populations, and four populations are likely extirpated so that redundancy and representation are substantially reduced. This expected reduction in both the number and distribution of resilient populations is likely to make the species vulnerable to catastrophic disturbance. Thus, after assessing the best available information, we conclude that the sickle darter is not currently in danger of extinction but is likely to become in danger of extinction within the foreseeable future throughout all of its range.

Status Throughout a Significant Portion of Its Range

Under the Act and our implementing regulations, a species may warrant listing if it is in danger of extinction or likely to become so in the foreseeable future throughout all or a significant portion of its range. The court in *Center for Biological Diversity v. Everson*, 2020 WL 437289 (D.D.C. Jan. 28, 2020) (*Center for Biological Diversity*), vacated the aspect of our Final Policy on Interpretation of the Phrase “Significant Portion of Its Range” in the Endangered Species Act’s Definitions of “Endangered Species” and “Threatened Species” (79 FR 37578; July 1, 2014) that provided that the Service does not undertake an analysis of significant portions of a species’ range if the species warrants listing as threatened throughout all of its range. Therefore, we proceed to evaluating whether the species is endangered in a significant portion of its range—that is, whether there is any portion of the species’ range for which both (1) the portion is significant, and (2) the species is in danger of extinction in that portion. Depending on the case, it might be more efficient for us to address the “significance” question or the “status” question first. We can choose to address either question first. Regardless of which question we address first, if we reach a negative answer with respect to the first question that we address, we do not need to evaluate the other question for that portion of the species’ range.

Following the court’s holding in *Center for Biological Diversity*, we now consider whether there are any significant portions of the species’ range where the species is in danger of extinction now (*i.e.*, endangered). In undertaking this analysis for sickle darter, we choose to address the status question first—we consider information pertaining to the geographic distribution of both the species and the threats that the species faces to identify any portions of the range where the species is endangered.

For the sickle darter, we considered whether the threats are geographically concentrated in any portion of the species’ range at a biologically meaningful scale. We examined the following threats currently acting on the species: Habitat loss and degradation through siltation, water quality degradation, and impoundments and their effects and the associated effects of the species’ reduced range. We also examined the cumulative effects of these threats. Our analysis revealed that these threats are likely to continue into the foreseeable future, or approximately

50 years. Siltation and water quality degradation resulting from nutrients, pathogens, municipal and residential development, agriculture, and logging are present in all watersheds where the sickle darter occurs. Land use changes associated with extraction of energy resources (coal, oil, and gas) are restricted to the Clinch (including Emory River) and Powell River systems, but the stressors associated with these activities, including sedimentation and water quality degradation, also come from sources (*e.g.*, urbanization, grazing, logging) that are common to all watersheds where the species occurs.

Isolation as a result of habitat fragmentation affects all sickle darter populations similarly, and all populations will experience the effects of changing climate conditions. Additionally, resiliency of the remaining populations would decline, while our continuing trends and worsening trends future scenarios respectively projected three or four of the six extant populations would become extirpated. The Little River watershed has the highest amount of land affected by urbanization (development) currently, and that is projected to continue in the future (Service 2020a, pp. 86–87). However, current land use and future rates of land use change are not substantially different among the watersheds occupied by the six populations.

Overall, the current threats acting on the species and its habitat are expected to continue, and there are no indications that these threats would lessen or that declining populations trends would be reverted. After assessing the best available information, we found no concentration of threats in any portion of the sickle darter’s range at a biologically meaningful scale. Thus, there are no portions of the species’ range where the species has a different status from its rangewide status. Therefore, no portion of the species’ range provides a basis for determining that the species is in danger of extinction in a significant portion of its range, and we determine that the species is likely to become in danger of extinction within the foreseeable future throughout all of its range. This is consistent with the courts’ holdings in *Desert Survivors v. Department of the Interior*, No. 16–cv–01165–JCS, 2018 WL 4053447 (N.D. Cal. Aug. 24, 2018), and *Center for Biological Diversity v. Jewell*, 248 F. Supp. 3d, 946, 959 (D. Ariz. 2017).

Determination of Status

Our review of the best available scientific and commercial information

indicates that the sickle darter meets the Act’s definition of a “threatened species.” Therefore, we propose to list the sickle darter as a threatened species in accordance with sections 3(20) and 4(a)(1) of the Act.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened species under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing results in public awareness, and conservation by Federal, State, Tribal, and local agencies, private organizations, and individuals. The Act encourages cooperation with the States and other countries and calls for recovery actions to be carried out for listed species. The protection required by Federal agencies and the prohibitions against certain activities are discussed, in part, below.

Recovery Planning

The primary purpose of the Act is the conservation of endangered and threatened species and the ecosystems upon which they depend. The ultimate goal of such conservation efforts is the recovery of these listed species, so that they no longer need the protective measures of the Act. Section 4(f) of the Act calls for the Service to develop and implement recovery plans for the conservation of endangered and threatened species. The recovery planning process involves the identification of actions that are necessary to halt or reverse the species’ decline by addressing the threats to its survival and recovery. The goal of this process is to restore listed species to a point where they are secure, self-sustaining, and functioning components of their ecosystems.

Recovery planning consists of preparing draft and final recovery plans, beginning with the development of a recovery outline and making it available to the public within 30 days of a final listing determination. The recovery outline guides the immediate implementation of urgent recovery actions and describes the process to be used to develop a recovery plan. Revisions of the plan may be done to address continuing or new threats to the species, as new substantive information becomes available. The recovery plan also identifies recovery criteria for review of when a species may be ready for reclassification from endangered to threatened (“downlisting”) or removal from protected status (“delisting”), and methods for monitoring recovery progress. Recovery plans also establish

a framework for agencies to coordinate their recovery efforts and provide estimates of the cost of implementing recovery tasks. Recovery teams (composed of species experts, Federal and State agencies, nongovernmental organizations, and stakeholders) are often established to develop recovery plans. When completed, the recovery outline, draft recovery plan, and the final recovery plan will be available on our website (<http://www.fws.gov/angered>), or from our Kentucky Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

Implementation of recovery actions generally requires the participation of a broad range of partners, including other Federal agencies, States, Tribes, nongovernmental organizations, businesses, and private landowners. Examples of recovery actions include habitat restoration (e.g., restoration of native vegetation), research, captive propagation and reintroduction, and outreach and education. The recovery of many listed species cannot be accomplished solely on Federal lands because their range may occur primarily or solely on non-Federal lands. To achieve recovery of these species requires cooperative conservation efforts on private, State, and Tribal lands.

If this species is listed, funding for recovery actions will be available from a variety of sources, including Federal budgets, State programs, and cost-share grants for non-Federal landowners, the academic community, and nongovernmental organizations. In addition, pursuant to section 6 of the Act, the States of North Carolina, Tennessee, and Virginia would be eligible for Federal funds to implement management actions that promote the protection or recovery of the sickle darter. Information on our grant programs that are available to aid species recovery can be found at: <http://www.fws.gov/grants>.

Although the sickle darter is only proposed for listing under the Act at this time, please let us know if you are interested in participating in recovery efforts for this species. Additionally, we invite you to submit any new information on this species whenever it becomes available and any information you may have for recovery planning purposes (see **FOR FURTHER INFORMATION CONTACT**).

Section 7(a) of the Act requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as an endangered or threatened species and with respect to its critical habitat, if any is designated. Regulations implementing this interagency cooperation provision

of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a species proposed for listing or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of the species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service.

Federal agency actions within the species' habitat that may require conference or consultation or both as described in the preceding paragraph include management and any other landscape-altering activities on Federal lands administered, or on private lands seeking funding, by Federal agencies, which may include, but are not limited to, the Tennessee Valley Authority, U.S. Department of Agriculture (USDA) U.S. Forest Service, USDA Farm Service Agency, USDA Natural Resources Conservation Service, and Federal Emergency Management Agency; issuance of section 404 CWA permits by the U.S. Army Corps of Engineers; and construction and maintenance of roads or highways by the Federal Highway Administration.

It is our policy, as published in the **Federal Register** on July 1, 1994 (59 FR 34272), to identify to the maximum extent practicable at the time a species is listed, those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of a proposed listing on proposed and ongoing activities within the range of the species proposed for listing. The discussion below regarding protective regulations under section 4(d) of the Act complies with our policy.

Critical Habitat

Prudency Determination

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12) require that, to the maximum extent prudent and determinable, the Secretary shall designate critical habitat at the time the species is determined to be an endangered or threatened species. Our regulations (50 CFR 424.12(a)(1)) state that the Secretary may, but is not required to, determine that a

designation would not be prudent in the following circumstances:

(i) The species is threatened by taking or other human activity and identification of critical habitat can be expected to increase the degree of such threat to the species;

(ii) The present or threatened destruction, modification, or curtailment of a species' habitat or range is not a threat to the species, or threats to the species' habitat stem solely from causes that cannot be addressed through management actions resulting from consultations under section 7(a)(2) of the Act;

(iii) Areas within the jurisdiction of the United States provide no more than negligible conservation value, if any, for a species occurring primarily outside the jurisdiction of the United States;

(iv) No areas meet the definition of critical habitat; or

(v) The Secretary otherwise determines that designation of critical habitat would not be prudent based on the best scientific data available.

As discussed earlier in this document, there is currently no imminent threat of collection or vandalism identified under Factor B for this species, and identification and mapping of critical habitat is not expected to initiate any such threat. In our SSA and proposed listing determination for the sickle darter, we determined that the present or threatened destruction, modification, or curtailment of habitat or range is a threat to the sickle darter and that those threats in some way can be addressed by section 7(a)(2) consultation measures. The species occurs wholly in the jurisdiction of the United States, and we are able to identify areas that meet the definition of critical habitat. Therefore, because none of the circumstances enumerated in our regulations at 50 CFR 424.12(a)(1) have been met and because there are no other circumstances the Secretary has identified for which this designation of critical habitat would be not prudent, we have determined that the designation of critical habitat is prudent for the sickle darter.

Critical Habitat Determinability

Having determined that designation is prudent, under section 4(a)(3) of the Act we must find whether critical habitat for the sickle darter is determinable. Our regulations at 50 CFR 424.12(a)(2) state that critical habitat is not determinable when one or both of the following situations exist:

(i) Data sufficient to perform required analyses are lacking, or

(ii) The biological needs of the species are not sufficiently well known to

identify any area that meets the definition of “critical habitat.”

When critical habitat is not determinable, the Act allows the Service an additional year to publish a critical habitat designation (16 U.S.C. 1533(b)(6)(C)(ii)).

For the sickle darter, the species’ needs are sufficiently well known, but a careful assessment of the economic impacts that may occur due to a critical habitat designation is ongoing. Until these efforts are complete, information sufficient to perform a required analysis of the impacts of the designation is lacking, and, therefore, we find designation of critical habitat for the sickle darter to be not determinable at this time. We plan to publish a proposed rule to designate critical habitat for the sickle darter concurrent with the availability of a draft economic analysis of the proposed designation.

II. Proposed Rule Issued Under Section 4(d) of the Act

Background

Section 4(d) of the Act contains two sentences. The first sentence states that the Secretary of the Interior (Secretary) shall issue such regulations as he deems necessary and advisable to provide for the conservation of species listed as threatened. The U.S. Supreme Court has noted that statutory language like “necessary and advisable” demonstrates a large degree of deference to the agency (see *Webster v. Doe*, 486 U.S. 592 (1988)). Conservation is defined in the Act to mean the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Additionally, the second sentence of section 4(d) of the Act states that the Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a)(1), in the case of fish or wildlife, or section 9(a)(2), in the case of plants. Thus, the combination of the two sentences of section 4(d) provides the Secretary with wide latitude of discretion to select and promulgate appropriate regulations tailored to the specific conservation needs of the threatened species. The second sentence grants particularly broad discretion to the Service when adopting the prohibitions under section 9 of the Act.

The courts have recognized the extent of the Secretary’s discretion under this standard to develop rules that are appropriate for the conservation of a particular species. For example, courts have upheld rules developed under section 4(d) as a valid exercise of agency

authority where they prohibited take of threatened wildlife, or include a limited taking prohibition (see *Alsea Valley Alliance v. Lautenbacher*, 2007 U.S. Dist. Lexis 60203 (D. Or. 2007); *Washington Environmental Council v. National Marine Fisheries Service*, 2002 U.S. Dist. Lexis 5432 (W.D. Wash. 2002)). Courts have also upheld 4(d) rules that do not address all of the threats a species faces (see *State of Louisiana v. Verity*, 853 F.2d 322 (5th Cir. 1988)). As noted in the legislative history when the Act was initially enacted, “once an animal is on the threatened list, the Secretary has an almost infinite number of options available to him with regard to the permitted activities for those species. He may, for example, permit taking, but not importation of such species, or he may choose to forbid both taking and importation but allow the transportation of such species” (H.R. Rep. No. 412, 93rd Cong., 1st Sess. 1973).

Exercising this authority under section 4(d), we have developed a proposed rule that is designed to address the sickle darter’s specific threats and conservation needs. Although the statute does not require us to make a “necessary and advisable” finding with respect to the adoption of specific prohibitions under section 9, we find that this rule as a whole satisfies the requirement in section 4(d) of the Act to issue regulations deemed necessary and advisable to provide for the conservation of the sickle darter. As discussed above under Summary of Biological Status and Threats, we have concluded that the sickle darter is likely to become in danger of extinction within the foreseeable future primarily due to habitat degradation or loss stemming from hydrologic alterations by impoundments, including dams and other barriers; land development that does not incorporate BMPs; and diminished water quality from point and nonpoint source pollution and siltation. These threats contribute to the negative effects associated with the species’ habitat fragmentation and isolation and potential effects of climate change. The provisions of this proposed 4(d) rule would promote conservation of the sickle darter by encouraging management of the landscape in ways that meet both watershed and riparian management considerations and the species’ conservation needs. The provisions of this proposed rule are one of many tools that we would use to promote the conservation of the sickle darter. This proposed 4(d) rule would apply only if and when we make final

the listing of the sickle darter as a threatened species.

Provisions of the Proposed 4(d) Rule

This proposed 4(d) rule would provide for the conservation of the sickle darter by prohibiting the following activities, except as otherwise authorized or permitted: Import or export; take; possession and other acts with unlawfully taken specimens; delivery, receipt, transport, or shipment in interstate or foreign commerce in the course of commercial activity; or sale or offer for sale in interstate or foreign commerce.

Threats to the species are noted above and described in detail under Summary of Biological Status and Threats. The most significant threat expected to affect the species in the foreseeable future is loss and fragmentation of habitat from siltation, water quality degradation, and impoundments and their effects. A range of activities have the potential to affect the sickle darter, including commercial activities, agriculture, resource extraction, and land development. Regulating these activities would help preserve the sickle darter’s remaining populations, slow the rate of population decline, and decrease synergistic, negative effects from other stressors. Therefore, regulating activities that increase siltation, diminish water quality, alter stream flow, or reduce fish passage would help preserve and potentially provide for expansion of remaining populations and decrease synergistic, negative effects from other threats.

Under the Act, “take” means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. Some of these provisions have been further defined in regulations at 50 CFR 17.3. Take can result knowingly or otherwise, by direct and indirect impacts, intentionally or incidentally. Regulating incidental and intentional take would help the species maintain population size and resiliency.

We may issue permits to carry out otherwise prohibited activities, including those described above, involving threatened wildlife under certain circumstances. Regulations governing permits are codified at 50 CFR 17.32. With regard to threatened wildlife, a permit may be issued for the following purposes: For scientific purposes, to enhance propagation or survival, for economic hardship, for zoological exhibition, for educational purposes, for incidental taking, or for special purposes consistent with the purposes of the Act.

There are also certain statutory exceptions from the prohibitions, which are found in sections 9 and 10 of the Act, and other standard exceptions from the prohibitions, which are found in our regulations at 50 CFR part 17, subparts C and D. Below, we describe these exceptions to the prohibitions that we are proposing for the sickle darter.

Under our proposed 4(d) rule, take of the sickle darter would not be prohibited in the following instances:

- Take is authorized by a permit issued in accordance with 50 CFR 17.32;
- Take results from actions of an employee or agent of one of the Services or of a State conservation agency that is operating under a conservation program pursuant to the terms of a cooperative agreement with the Service;
- Take is in defense of human life; and
- Take results from actions taken by representatives of one of the Services or of a State conservation agency to aid a sick specimen or to dispose of, salvage, or remove a dead specimen that is reported to the Office of Law Enforcement.

We also propose to allow Federal and State law enforcement officers to possess, deliver, carry, transport, or ship any sickle darters taken in violation of the Act as necessary in performing their official duties.

In part, these exceptions to the prohibitions recognize the special and unique relationship with our State natural resource agency partners in contributing to conservation of listed species. State agencies often possess scientific data and valuable expertise on the status and distribution of endangered, threatened, and candidate species of wildlife and plants. State agencies, because of their authorities and their close working relationships with local governments and landowners, are in a unique position to assist the Services in implementing all aspects of the Act. In this regard, section 6 of the Act provides that the Service shall cooperate to the maximum extent practicable with the State in carrying out programs authorized by the Act. Therefore, any qualified employee or agent of a State conservation agency that is a party to a cooperative agreement with the Service in accordance with section 6(c) of the Act, who is designated by his or her agency for such purposes, would be able to conduct activities designed to conserve the sickle darter that may result in otherwise prohibited take for wildlife without additional authorization.

In addition to the exceptions to the prohibitions described above, we propose certain species-specific

exceptions to the prohibitions to provide for the conservation of the sickle darter. Consistent with all of the proposed exceptions and based on the best available information, our proposed 4(d) rule identifies the following activities, which are unlikely to result in take of the sickle darter in violation of section 9 if carried out in accordance with existing regulations and permit requirements and outside the February through March spawning season:

These 4(d) rule exceptions cover actions that improve or restore sickle darter habitat, including channel restoration and streambank stabilization, bridge and culvert replacement (including transportation projects that enhance fish passage), as well as low-head dam removal. To encourage protection of streams occupied by the sickle darter, we have included in the exceptions silvicultural activities that implement State best management practices. Within each occupied river system, these actions will promote expansion of the population's range and reduce the population's fragmentation and isolation. Additionally, these actions can reduce stressors that impact the sickle darter, including runoff of siltation and pollution, and may (through riparian reforestation) mediate local water temperatures expected to increase with climate change.

Habitat restoration actions and silvicultural activities excepted by the 4(d) rule may result in some minimal level of harm or temporary disturbance to the sickle darter. For example, a culvert replacement project would likely elevate suspended sediments for several hours and the darters would need to move out of the sediment plume to resume normal feeding behavior. Because the 4(d) rule exceptions do not apply during the sickle darter's two-month spawning period, a critical phase of the species' life history, the potential for take is further minimized. Overall, these activities benefit the species by expanding suitable habitat and reducing within-population fragmentation, contributing to conservation and recovery.

Based on the best available information, the following activities may potentially result in violation of section 9 of the Act; this list is not comprehensive:

- (1) Unauthorized handling, collecting, possessing, selling, delivering, carrying, or transporting of the sickle darter, including interstate transportation across State lines and import or export across international boundaries.
- (2) Destruction or alteration of the species' habitat by discharge of fill

material, draining, ditching, tiling, pond construction, stream channelization or diversion, or diversion or alteration of surface or ground water flow into or out of the stream (*i.e.*, due to roads, impoundments, discharge pipes, stormwater detention basins, etc.).

(3) Introduction of nonnative species that compete with or prey upon the sickle darter.

(4) Discharge of chemicals or fill material into any waters in which the sickle darter is known to occur.

Questions regarding whether specific activities would constitute a violation of section 9 of the Act should be directed to the Kentucky Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

Nothing in this proposed 4(d) rule would change in any way the recovery planning provisions of section 4(f) of the Act, the consultation requirements under section 7 of the Act, or the ability of the Service to enter into partnerships for the management and protection of the sickle darter. However, interagency cooperation may be further streamlined through planned programmatic consultations for the species between Federal agencies and the Service, where appropriate. We ask the public, particularly State agencies and other interested stakeholders that may be affected by the proposed 4(d) rule, to provide comments and suggestions regarding additional guidance and methods that the Service could provide or use, respectively, to streamline the implementation of this proposed 4(d) rule (see Information Requested, above).

Required Determinations

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

- (1) Be logically organized;
- (2) Use the active voice to address readers directly;
- (3) Use clear language rather than jargon;
- (4) Be divided into short sections and sentences; and
- (5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too

long, the sections where you feel lists or tables would be useful, etc.

National Environmental Policy Act (42 U.S.C. 4321 *et seq.*)

It is our position that we do not need to prepare environmental analyses pursuant to the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*) in connection with listing a species as an endangered or threatened species under the Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994 (Government-to-Government Relations with Native American Tribal Governments; 59 FR 22951), Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments), and the Department of the Interior's manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with recognized Federal Tribes on a government-to-government basis. In accordance with Secretarial Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly

with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and to make information available to Tribes. We have determined that no Tribal lands fall within the range of the sickle darter, so no Tribal lands would be affected by the proposed rule.

Endangered and threatened species, Exports, Imports, Reporting and recordkeeping requirements, Transportation.

Proposed Regulation Promulgation

Accordingly, we propose to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.

■ 2. Amend § 17.11(h) by adding an entry for “Darter, sickle” to the List of Endangered and Threatened Wildlife in alphabetical order under FISHES to read as set forth below:

§ 17.11 Endangered and threatened wildlife.

* * * * *
(h) * * *

Common name	Scientific name	Where listed	Status	Listing citations and applicable rules
FISHES				
Darter, sickle	<i>Percina williamsi</i>	Wherever found	T	[Federal Register citation when published as a final rule]; 50 CFR 17.44(ff). ^{4d}

■ 3. Amend § 17.44 by adding a paragraph (ff) to read as set forth below:

§ 17.44 Special rules—fishes.

* * * * *

(ff) Sickle darter (*Percina williamsi*).

(1) *Prohibitions.* The following prohibitions that apply to endangered wildlife also apply to the sickle darter. Except as provided under paragraph (ff)(2) of this section and §§ 17.4 and 17.5, it is unlawful for any person subject to the jurisdiction of the United States to commit, to attempt to commit, to solicit another to commit, or cause to be committed, any of the following acts in regard to this species:

- (i) Import or export, as set forth at § 17.21(b) for endangered wildlife.
 - (ii) Take, as set forth at § 17.21(c)(1) for endangered wildlife.
 - (iii) Possession and other acts with unlawfully taken specimens, as set forth at § 17.21(d)(1) for endangered wildlife.
 - (iv) Interstate or foreign commerce in the course of commercial activity, as set forth at § 17.21(e) for endangered wildlife.
 - (v) Sale or offer for sale, as set forth at § 17.21(f) for endangered wildlife.
- (2) *Exceptions from prohibitions.* In regard to this species, you may:
- (i) Conduct activities as authorized by a permit under § 17.32.

- (ii) Take, as set forth at § 17.21(c)(2) through (c)(4) for endangered wildlife.
- (iii) Take as set forth at § 17.31(b).
- (iv) Take incidental to an otherwise lawful activity caused by:
 - (A) Channel restoration projects that create natural, physically stable, ecologically functioning streams (or stream and wetland systems) and that take place between April 1 and January 31. These projects can be accomplished using a variety of methods, but the desired outcome is a natural channel with low shear stress (force of water moving against the channel); bank heights that enable reconnection to the floodplain; a connection of surface and groundwater systems, contributing to

perennial flows in the channel; riffles and pools composed of existing soil, rock, and wood instead of large imported materials; low compaction of soils within adjacent riparian areas; and inclusion of riparian wetlands.

(B) Streambank stabilization projects that use bioengineering methods to replace pre-existing, bare, eroding stream banks with vegetated, stable stream banks, thereby reducing bank erosion and instream sedimentation and improving habitat conditions for the species, that take place between April 1 and January 31. Stream banks may be stabilized using live stakes (live, vegetative cuttings inserted or tamped into the ground in a manner that allows the stake to take root and grow), live fascines (live branch cuttings, usually willows, bound together into long, cigar-shaped bundles), or brush layering (cuttings or branches of easily rooted tree species layered between successive lifts of soil fill). Stream banks must not be stabilized solely through the use of quarried rock (rip-rap) or the use of rock baskets or gabion structures.

(C) Bridge and culvert replacement/removal projects or low head dam removal projects that remove migration barriers or generally allow for improved upstream and downstream movements of sickle darters while maintaining normal stream flows, preventing bed and bank erosion, and improving habitat conditions for the species, and that take place between April 1 and January 31.

(D) Silviculture practices and forest management activities that:

(1) Implement State best management practices, particularly for Streamside Management Zones and stream crossings; and

(2) When such activities involve sickle darter spawning habitat, are carried out between April 1 and January 31.

(E) Transportation projects that provide for fish passage at stream crossings.

(v) Possess and engage in other acts with unlawfully taken wildlife, as set forth at § 17.21(d)(2) for endangered wildlife.

BILLING CODE 4333-15-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No.: 201103-0288]

RIN 0648-BK05

Fisheries of the Northeastern United States; Omnibus Framework Adjustment To Modify the Mid-Atlantic Fishery Management Council's Risk Policy

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to approve and implement changes to the Mid-Atlantic Fishery Management Council's Risk Policy. The purpose of this action is to adjust the Council's risk policy by accepting a higher level of risk for stocks at or above biomass targets. These adjustments could lead to increases in catch limits for healthy fisheries managed by the Council.

DATES: Comments must be received by November 26, 2020.

ADDRESSES: The Mid-Atlantic Fishery Management Council has prepared a draft environmental assessment (EA) for this action that describes and analyzes the proposed measures and other considered alternatives. Copies of the draft Risk Policy Omnibus Framework Adjustment (framework), including the EA and information on the economic impacts of this proposed rulemaking, are available upon request from Dr. Christopher M. Moore, Executive Director, Mid-Atlantic Fishery Management Council, Suite 201, 800 North State Street, Dover, DE 19901. These documents are also accessible via the internet at <http://www.mafmc.org>.

You may submit comments on this document, identified by NOAA-NMFS-2020-0143, by the following method:

Electronic Submission: Submit all electronic public comments via the Federal e-Rulemaking Portal.

- Go to www.regulations.gov/#/*docketDetail*;D=NOAA-NMFS-2020-0143;

- Click the "Comment Now!" icon, complete the required fields; and

- Enter or attach your comments.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments

received are a part of the public record and will generally be posted for public viewing on www.regulations.gov without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Shannah Jaburek, Fishery Management Specialist, 978-282-8456.

SUPPLEMENTARY INFORMATION:

Background

In 2011, the Mid-Atlantic Fishery Management Council implemented its current risk policy. The risk policy specifies the Council's acceptable tolerance of risk for its managed resources. The risk policy also works in conjunction with the Scientific and Statistical Committee's application of the Council's acceptable biological catch (ABC) control rule to account for scientific uncertainty to determine an ABC for a specific stock. Five years after implementation, the Council conducted a review of its risk policy to determine if any modifications were necessary to meet the Council's goals and objectives for its managed fisheries. From this review, the Council determined there were two elements of the current policy that warranted modifications. The Council took final action on this framework to modify its risk policy in December 2019 and submitted the action to us in early August 2020.

Proposed Action

The purpose of this action is to adjust the Council's risk policy by accepting a higher level of risk (i.e., the probability of overfishing, P*) for stocks that are healthy and either at or above biomass targets. For stocks not subject to a rebuilding plan that have a ratio of biomass (B) to biomass at maximum sustainable yield (B_{MSY}) of 1.0 or lower, the maximum P* as informed by the overfishing limit (OFL) distribution would decrease linearly from a maximum value of 45 percent until the P* becomes zero at a B/B_{MSY} ratio of 0.10. For stocks with biomass that exceeds B_{MSY} and the B/B_{MSY} ratio is greater than 1.0, the P* would increase linearly from 45 percent to a maximum of 49 percent when the B/B_{MSY} ratio is equal to 1.5 or greater. Under the current risk policy, the maximum allowed P* is capped at 40 percent for stocks with a B/B_{MSY} ratio of 1.0 or higher, with this probability decreasing

linearly until P^* becomes zero at the B/B_{MSY} ratio of 0.10. The Council made no adjustments for stocks under a rebuilding plan or stocks with no OFL or proxy OFL. The increased tolerance of risk could lead to increases in ABC allocations for healthy fisheries the Council manages. The Council and its Scientific and Statistical Committee used this modified risk policy in recommending ABCs for scup and black sea bass for the 2021 fishing year that begins on January 1, 2021.

This action would also remove the typical/atypical species designation when applied to the current risk policy. This designation was intended to provide for less risk to those species whose life histories make them more vulnerable to over-exploitation; however, it has rarely been used and is currently only applied to ocean quahog. This would allow the Council to better use improvements in stock assessment and modeling approaches that can more appropriately account for and address such vulnerability.

Classification

Pursuant to section 304 (b)(1)(A) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), the NMFS Assistant Administrator has determined that this proposed rule is consistent with all applicable Fishery Management Plans that the Council manages, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

This proposed rule is expected to be an Executive Order 13771 deregulatory action.

The Chief Counsel for Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities.

The Council evaluated the potential socioeconomic impacts of the proposed measures as part of the EA. As noted in the EA, according to the ownership database, 1,462 affiliate firms landed 1 or more of the managed resources during the 2016–2018 period, with 1,451 of those business affiliates categorized as small business and 11 categorized as large business. During this time period in the commercial fishery, for all small entities, managed

resources revenues contributed approximately 25 percent of the total gross receipts, and managed resources revenues contributed approximately 17 percent of the total gross receipts of the large entities. For the recreational fishery, 336 affiliate firms, all of which are categorized as small businesses, held a for-hire Federal permit for one or more of the managed resources and generated revenues from recreational fishing for these managed resources during 2016–2018. It is not possible to derive what proportion of the overall revenues for these for-hire firms came from fishing activities for an individual species. Nevertheless, given the popularity of the managed resources as recreational species in the Mid-Atlantic and New England, revenues generated from these managed resources are likely to be important for many of these firms at certain times of the year.

No immediate direct economic impacts are expected from the actions proposed in this framework, because these actions are not expected to result in changes to the manner in which Council-managed commercial and recreational (for-hire) fisheries operate. The adjustments proposed in this framework are largely administrative in nature, and, as such, are not expected to directly impact the landings levels, fishery distribution or fishing methods and practices of Council-managed fisheries. However, these actions may have indirect positive impacts on Council-managed fisheries. This action proposes to change the Council's risk policy to meet the objectives of continuing to prevent overfishing and minimize the risks of a stock declining to low levels, while, at the same time, increasing fishery yield across all stock biomass levels, where possible, with the resulting economic benefits. Specifically, this proposed rule would allow for increased risk under very high stock biomass conditions, which would provide increased access and fishing opportunities for robust stocks, leading to economic benefits associated with increased fishery yield. Thus, indirect impacts of this proposed rule are likely to lead to positive economic benefits for all fishery participants, including small entities. Because this proposed rule is administrative in nature, having no direct impacts on fisheries, and because indirect impacts are likely to lead to positive economic benefits for fishery participants, we have concluded that that this proposed rule, if adopted, would not have a significant economic

impact on a substantial number of small entities.

This proposed rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Recordkeeping and reporting requirements.

Dated: November 3, 2020.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 648 is proposed to be amended as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

■ 1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 648.21, revise paragraphs (b)(1) and (2) and (c)(1) to read as follows:

§ 648.21 Mid-Atlantic Fishery Management Council risk policy.

* * * * *

(b) * * *

(1) For stocks with a ratio of biomass (B) to biomass at MSY (B_{MSY}) of 1.0 or lower, the maximum probability of overfishing as informed by the OFL distribution shall decrease linearly from a maximum value of 45 percent until the probability of overfishing becomes zero at a B/B_{MSY} ratio of 0.10.

(2) For stocks with biomass that exceeds B_{MSY} and the B/B_{MSY} ratio is greater than 1.0, the probability of overfishing shall increase linearly from a probability of overfishing of 45 percent to a maximum probability of overfishing of 49 percent when the B/B_{MSY} ratio is equal to 1.5 or greater.

(c) * * *

(1) Unless otherwise allowed in paragraph (c)(2) of this section, for instances in which the application of the risk policy approaches in paragraph (b) of this section using OFL distribution results in a more restrictive ABC recommendation than the calculation of ABC derived from the use of $F_{REBUILD}$ at the MAFMC-specified overfishing risk level as outlined in paragraph (a) of this section, the SSC shall recommend to the MAFMC the lower of the ABC values.

* * * * *

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2020-0097]

Pioneer Hi-Bred International, Inc.; Availability of a Request and Plant Pest Risk Similarity Assessment for an Extension of Determination of Nonregulated Status for Maize for Use in the Seed Production Technology for Africa Process

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public that the Animal and Plant Health Inspection Service has received a request to extend our determination of nonregulated status of Pioneer Hi-Bred International, Inc.'s (Pioneer's) DP-32138-1 SPT maintainer maize to maize MS44 maintainer line DP56113 for use in the Seed Production Technology for Africa (SPTA) process (hereafter DP56113 SPTA maintainer maize). DP56113 SPTA maintainer maize has been genetically engineered for maintenance and recovery of male-sterile maize breeding lines using the same construct and method of transformation as DP-32138-1 SPT maintainer maize. We are making available for public comment the request and our plant pest risk similarity assessment and preliminary determination of nonregulated status.

DATES: We will consider all comments that we receive on or before December 14, 2020.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2020-0097>.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS-2020-0097, Regulatory Analysis

and Development, PPD, APHIS, Station 3A-03.8, 4700 River Road, Unit 118, Riverdale, MD 20737-1238.

The Pioneer extension request, our plant pest risk similarity assessment and preliminary determination of nonregulated status, and any comments we receive on this docket may be viewed at <http://www.regulations.gov/#!docketDetail;D=APHIS-2020-0097> or in our reading room, which is located in Room 1620 of the USDA South Building, 14th Street and Independence Avenue SW, Washington, DC. Normal reading room hours are 8 a.m. to 4:30 p.m., Monday through Friday, except holidays. To be sure someone is there to help you, please call (202) 7997039 before coming.

FOR FURTHER INFORMATION CONTACT: Ms. Cindy Eck, Biotechnology Regulatory Services, APHIS, 4700 River Road Unit 147, Riverdale, MD 20737-1236; (301) 851-3892; email: cynthia.a.eck@usda.gov.

SUPPLEMENTARY INFORMATION: Under the authority of the plant pest provisions of the Plant Protection Act (PPA) (7 U.S.C. 7701 *et seq.*), the regulations in 7 CFR part 340, "Movement of Organisms Modified or Produced Through Genetic Engineering," regulate, among other things, the introduction (importation, interstate movement, or release into the environment) of organisms and products altered or produced through genetic engineering that are plant pests or that there is reason to believe are plant pests. Such organisms and products are considered regulated articles.

Pursuant to the terms set forth in a final rule published in the **Federal Register** on May 18, 2020 (85 FR 29790-29838, Docket No. APHIS-2018-0034),¹ any person may submit a petition to the Animal and Plant Health Inspection Service (APHIS) seeking a determination that an article should not be regulated under 7 CFR part 340, or that APHIS extend a determination of nonregulated status to other organisms. Such an extension request must include information to establish the similarity of the antecedent organism and the regulated article in question.

On June 28, 2011,² APHIS announced its determination of nonregulated status

¹ To view the final rule, go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2018-0034>.

² <https://www.regulations.gov/document?D=APHIS-2010-0041-0057>.

of Pioneer Hi-Bred International, Inc.'s (Pioneer's) DP-32138-1 SPT maintainer maize, which was genetically engineered for maintenance and recovery of male-sterile maize breeding lines. APHIS has received a request for an extension of that determination of nonregulated status of DP-32138-1 SPT maintainer maize to maintainer maize designated as MS44 maintainer line maize event DP-Ø56113-9 and referred to as DP56113 SPTA maintainer maize (APHIS Petition Number 20-043-01.ext), also from Pioneer. DP56113 SPTA maintainer maize has also been genetically engineered for maintenance and recovery of male-sterile maize breeding lines. In its request, Pioneer stated that this maintainer maize is similar to the antecedent organism DP-32138-1 SPT maintainer maize and, based on the similarity to the antecedent organism, is unlikely to pose a plant pest risk and, therefore, should not be a regulated article under APHIS' regulations in 7 CFR part 340.

As described in the extension request, DP56113 SPTA maintainer maize was developed using the same constructs and method of transformation as DP-32138-1 SPT maintainer maize. Based on the information in the request, we have concluded that DP56113 SPTA maintainer maize is similar to DP-32138-1 SPT maintainer maize. DP56113 SPTA maintainer maize is currently regulated under 7 CFR part 340.

As part of our decision-making process regarding a GE organism's regulatory status, APHIS evaluates the plant pest risk of the article. In section 403 of the PPA, "plant pest" is defined as any living stage of any of the following that can directly or indirectly injure, cause damage to, or cause disease in any plant product: A protozoan, a nonhuman animal, a parasitic plant, a bacterium, a fungus, a virus or viroid, an infectious agent or other pathogen, or any article similar to or allied with any of the foregoing.

APHIS has prepared a plant pest risk similarity assessment (PPRSA) to compare DP56113 SPTA maintainer maize to the antecedent. As described in the PPRSA, the same genetic constructs used in DP56113 SPTA maintainer maize were previously used in DP-32138-1 SPT maintainer maize, and APHIS has concluded that DP56113 SPTA maintainer maize is unlikely to

pose a plant health risk. Therefore, based on the similarity between DP56113 SPTA maintainer maize and DP-32138-1 SPT maintainer maize as described in the PPRSA, APHIS has concluded that DP56113 SPTA maintainer maize is no more likely to pose a plant pest risk than DP-32138-1 SPT maintainer maize.

APHIS has analyzed information submitted by Pioneer, references provided in the extension request, peer-reviewed publications, and supporting documentation prepared for the antecedent organism. Based on APHIS' analysis of this information and the similarity of DP56113 SPTA maintainer maize to the antecedent organism DP-32138-1 SPT maintainer maize, APHIS has determined that DP56113 SPTA maintainer maize is unlikely to pose a plant pest risk. We have therefore reached a preliminary decision to approve the request to extend the determination of nonregulated status of DP-32138-1 SPT maintainer maize to DP56113 SPTA maintainer maize, whereby DP56113 SPTA maintainer maize would no longer be subject to our regulations governing the introduction of certain genetically engineered organisms.

We are therefore publishing this notice to make available our evaluation and inform the public of our preliminary decision to extend the determination of nonregulated status of DP-32138-1 SPT maintainer maize to DP56113 SPTA maintainer maize.

APHIS will accept written comments on the request for extension, PPRSA, and our preliminary determination for DP56113 SPTA maintainer maize for 30 days. These documents are available for public review as indicated under **ADDRESSES** and **FOR FURTHER INFORMATION CONTACT** above. Copies of these documents may also be obtained by contacting the person listed under **FOR FURTHER INFORMATION CONTACT**.

After the comment period closes, APHIS will review all written comments received during the comment period and any other relevant information. All comments will be available for public review. After reviewing and evaluating the comments, if APHIS determines that no substantive information has been received that would warrant APHIS altering its preliminary regulatory determination, our preliminary regulatory determination will become final and effective upon notification of the public through an announcement on our website at <https://www.aphis.usda.gov/aphis/ourfocus/biotechnology/permits-notifications-petitions/petitions/petition-status>. APHIS will also furnish a response to

the petitioner regarding our final regulatory determination. No further **Federal Register** notice will be published announcing the final regulatory determination regarding DP56113 SPTA maintainer maize.

Authority: 7 U.S.C. 7701-7772 and 7781-7786; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.3.

Done in Washington, DC, this 6th day of November 2020.

Michael Watson,

Acting Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-P

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection: Collaborative Forest Landscape Restoration Program

AGENCY: Forest Service, USDA.

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the U.S. Forest Service (USFS) is seeking comments from all interested individuals and organizations on the renewal and revision of the information collection, *Collaborative Forest Landscape Restoration Program*.

DATES: Comments must be received in writing on or before January 11, 2021 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Comments concerning this notice should be addressed to Lindsay Buchanan, Collaborative Forest Landscape Restoration Program Coordinator, 1220 SW 3rd Ave., Portland, Oregon 97204. Comments may also be submitted by email to: lindsay.buchanan@usda.gov. The public may inspect comments received at 1220 SW 3rd Ave., Portland, Oregon 97204, during normal business hours. Visitors are encouraged to call ahead to 503-808-2810 to facilitate entry to the building.

FOR FURTHER INFORMATION CONTACT: Lindsay Buchanan, Collaborative Forest Landscape Restoration Program Coordinator, Forest Management, Range Management, and Vegetation Ecology, can be reached by phone at 503-808-2810, or by email at lindsay.buchanan@usda.gov. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339, twenty-four hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Title: Collaborative Forest Landscape Restoration Program.

OMB Number: 0596-0245.

Expiration Date of Approval: January 31, 2021.

Type of Request: Renewal with Revisions.

Abstract: The Collaborative Forest Landscape Restoration Program (CFLRP) is a USFS program started in 2010 to encourage collaborative groups of neighboring landowners, to work with the Forest Service to find common ground pertaining to forest restoration. Such collaborative neighboring landowners include State, local, and Tribal government representatives, businesses, interest groups, and non-profit organizations. Partners work with the USFS to implement restoration work and multi-party monitoring of landscape restoration treatments.

The Forest Landscape Restoration Act (FLRA) of 2009 (16 U.S.C. 7303), which enabled the CFLRP, requires monitoring "to assess the positive or negative ecological, social, and economic effects of projects implementing a selected proposal for not less than 15 years after project implementation commences." This Information Collection Request (ICR) will help meet the obligation for monitoring the social impacts on residents and stakeholders of activities conducted under the CFLRP. The scope of the ICR includes residents of communities within and adjacent to the CFLRP landscapes and collaborative participants.

Gaining information from individuals who work or live in the geographic area of the CFLRP projects provides valuable information to partners and land management decision makers. To ensure the USFS is informed about the opinions of participants of collaborative processes and public members living in or around the CFLRP project, the USFS seeks to obtain approval by the Office of Management and Budget (OMB) of an ICR to collect both qualitative and quantitative feedback from stakeholders on management decisions, forest restoration work, monitoring activities, and land management planning. The information will be collected through a census survey of participants and a mail-in, on-line, and hard copy survey of residents. Through the collection of this information, managers and planners will obtain valuable information to inform future decisions. USFS public affairs staff, social scientists, and economists may also use this information, and USFS, academic, and other researchers may use or cite the results or data collected in publications.

Without the collection of this information, the USFS will be unable to determine whether it is meeting the requirements of the Forest Landscape Restoration Act, nor if they are fully incorporating partner and public input into forest project, implementation, monitoring and/or planning processes as required by law.

Type of Respondents: Residents within the Selected CFLRP landscapes in Forest Service Regions 1, 2, 3, 4, 5, 6, 8, and 9.

Estimated Annual Number of Respondents: 5,250.

Estimated Annual Number of Responses per Respondent: 7.

Estimated Total Annual Burden Hours on Respondents: 2,700 hours.

Comment is Invited: Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission request for OMB approval.

Paul Strong,

Acting Director, Forest Management, Range and Vegetation Ecology, National Forest System.

BILLING CODE 3411-15-P

DEPARTMENT OF COMMERCE

International Trade Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Annual Report From Foreign-Trade Zones

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance

with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on August 31, 2020 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: Department of Commerce.

Title: Annual Report from Foreign-Trade Zones.

OMB Control Number: 0625-0109.

Form Number(s): ITA-359P.

Type of Request: Regular submission, extension of a current information collection.

Number of Respondents: 261.

Average Hours per Response: 1 to 76 hours.

Burden Hours: 5,979 hours.

Needs and Uses: The annual reports are used by Congress and the Department to determine the economic effect of the Foreign-Trade Zone program as well as by the Foreign-Trade Zones Board and other trade policy officials to determine whether zone activity is consistent with U.S. international trade policy.

Affected Public: State, local, tribal governments, or not-for-profit institutions that have been granted foreign-trade zone authority.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Legal Authority: 19 U.S.C. 81(p).

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0625-0109.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

International Trade Administration

[A-570-943, C-570-944]

Oil Country Tubular Goods From the People's Republic of China: Self-Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

Summary

The Department of Commerce (Commerce) is self-initiating country-wide anti-circumvention inquiries to determine whether imports of welded oil country tubular goods (OCTG) completed in Brunei and the Philippines (collectively, third countries) using inputs manufactured in the People's Republic of China (China) are circumventing the antidumping duty (AD) and countervailing duty (CVD) orders on OCTG from China.

DATES: Applicable November 12, 2020.

FOR FURTHER INFORMATION CONTACT:

Dana Mermelstein at (202) 482-1391, AD/CVD Operations, Office VI or Justin Enck at (202) 482-1614, Office of Policy, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On April 8, 2009, Evraz Rocky Mountain Steel, Maverick Tube Corporation, TMK IPSCO, United States Steel Corporation, V&M Star LP, V&M Tubular Corporation of America, Wheatland Tube Corp., and the United Steel, Paper, and Forestry, Rubber, Manufacturing, Energy, Allied Industrial and Service Workers International Union, AFL-CIO-CLC filed petitions seeking the imposition of antidumping and countervailing duties on imports of OCTG from China.¹ Following Commerce's affirmative determinations of dumping and countervailable subsidies,² and the U.S.

¹ See *Oil Country Tubular Goods from the People's Republic of China: Initiation of Antidumping Duty Investigation*, 74 FR 20671 (May 5, 2009); *Certain Oil Country Tubular Goods from the People's Republic of China: Initiation of Countervailing Duty Investigation*, 74 FR 20678 (May 5, 2009).

Continued

International Trade Commission's (ITC) finding of material injury,³ Commerce issued AD and CVD orders on imports of OCTG from China.⁴

Section 781(b)(1) of the Tariff Act of 1930, as amended (the Act), provides that Commerce may find circumvention of an AD or CVD order when merchandise of the same class or kind subject to the order is completed or assembled in a foreign country other than the country to which the order applies. In conducting anti-circumvention inquiries, under section 781(b)(1) of the Act, Commerce relies on the following criteria: (A) Merchandise imported into the United States is of the same class or kind as any merchandise produced in a foreign country that is the subject of an antidumping or countervailing duty order or finding, (B) before importation into the United States, such imported merchandise is completed or assembled in another foreign country from merchandise which is subject to the order or merchandise which is produced in the foreign country that is subject to the order, (C) the process of assembly or completion in the foreign country referred to in section (B) is minor or insignificant, (D) the value of the merchandise produced in the foreign country to which the AD or CVD order applies is a significant portion of the total value of the merchandise exported to the United States, and (E) the administering authority determines that action is appropriate to prevent evasion of such order or finding.

In determining whether or not the process of assembly or completion in a third country is minor or insignificant under section 781(b)(1)(C) of the Act, section 781(b)(2) of the Act directs Commerce to consider: (A) The level of investment in the foreign country, (B)

the level of research and development in the foreign country, (C) the nature of the production process in the foreign country, (D) the extent of production facilities in the foreign country, and (E) whether or not the value of processing performed in the foreign country represents a small proportion of the value of the merchandise imported into the United States. However, no single factor, by itself, controls Commerce's determination of whether the process of assembly or completion in a third country is minor or insignificant.⁵ Accordingly, it is Commerce's practice to evaluate each of these five factors as they exist in the third country, depending on the totality of the circumstances of the particular anti-circumvention inquiry.⁶

Furthermore, section 781(b)(3) of the Act sets forth additional factors to consider in determining whether to include merchandise assembled or completed in a third country within the scope of an AD and/or CVD order. Specifically, Commerce shall take into account such factors as: (A) The pattern of trade, including sourcing patterns; (B) whether the manufacturer or exporter of the merchandise is affiliated with the person who, in the third country, uses the merchandise to complete or assemble the merchandise which is subsequently imported into the United States; and (C) whether imports of the merchandise into the third country have increased after the initiation of the investigation that resulted in the issuance of such order or finding.

Scope of the Orders

The products covered by the *Orders* are certain hollow steel products of circular cross-section, including oil well casing and tubing, of iron (other than cast iron) or steel (both carbon and alloy), whether seamless or welded, regardless of end finish. For a full description of the scope of these orders, see the "Scope of the Orders," in the Appendix to this notice.

Merchandise Subject to the Anti-Circumvention Inquiries

These anti-circumvention inquiries cover welded OCTG completed in the third countries using inputs manufactured in China and subsequently exported from the third countries to the United States.

Initiation of Anti-Circumvention Inquiries

Through its regular monitoring of trade data, Commerce has gathered information indicating that hot-rolled steel sheet and strip from China may be exported to Brunei and the Philippines for minor processing, and then exported to the United States as welded OCTG, in circumvention of the *Orders*. Based on this information, we determine, pursuant to section 781(b) of the Act and 19 CFR 351.225(b) and (h), that self-initiation of anti-circumvention inquiries is warranted to determine whether certain imports of welded OCTG, completed in Brunei and the Philippines using inputs manufactured in China, are circumventing the *Orders*. For a full discussion of the basis for our decision to initiate these anti-circumvention inquiries, see the Anti-Circumvention Initiation Memo.⁷

As explained in the Anti-Circumvention Initiation Memo, the available information warrants initiating these anti-circumvention inquiries on a country-wide basis. Commerce has taken this approach in prior anti-circumvention inquiries, where the facts warranted.⁸

Consistent with the approach in the prior anti-circumvention inquiries that were initiated on a country-wide basis, Commerce intends to issue questionnaires to solicit information from producers and exporters in each of the third countries concerning their shipments of OCTG to the United States and the origin of any imported inputs being processed into OCTG. A

⁷ See Memorandum, "Oil Country Tubular Goods from the People's Republic of China: Initiation of Anti-Circumvention Inquiries on the Antidumping Duty and Countervailing Duty Orders" (Anti-Circumvention Initiation Memo). This memo is a public document that is dated concurrently with, and hereby adopted by, this notice and on file electronically via ACCESS.

company's failure to respond completely to Commerce's requests for information may result in the application of partial or total facts available, pursuant to section 776(a) of the Act, which may include adverse inferences, pursuant to section 776(b) of the Act.

Notification to Interested Parties

In accordance with 19 CFR 351.225(b), Commerce determines that available information warrants initiating these anti-circumvention inquiries to determine whether certain imports of welded OCTG, completed in Brunei and the Philippines using inputs manufactured in China, are circumventing the *Orders*. Accordingly, Commerce hereby notifies all parties on Commerce's scope service list of the initiation of these anti-circumvention inquiries. In addition, in accordance with 19 CFR 351.225(f)(1)(i) and (ii), in this notice of initiation issued under 19 CFR 351.225(b), we have included a description of the product that is the subject of these anti-circumvention inquiries (*i.e.*, OCTG completed in the third countries using inputs manufactured in China), and an explanation of the reasons for Commerce's decision to initiate these anti-circumvention inquiries, as provided above. Commerce will establish a schedule for questionnaires and comments on the issues in these inquiries.

In accordance with 19 CFR 351.225(l)(2), if Commerce issues preliminary affirmative determinations, we will then instruct U.S. Customs and Border Protection to suspend liquidation and require a cash deposit of estimated antidumping and countervailing duties, at the applicable rate, for each unliquidated entry of the merchandise at issue, entered or withdrawn from warehouse for consumption on or after the date of initiation of the inquiries. Commerce intends to issue its final determinations within 300 days of the date of publication of this initiation, in accordance with section 781(f) of the Act and 19 CFR 351.225(f)(5).

This notice is published in accordance with section 781(b) of the Act and 19 CFR 351.225(f).

Dated: November 3, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix—Scope of the *Orders*

The scope of these *Orders* consists of certain OCTG, which are hollow steel products of circular cross-section, including oil well casing and tubing, of iron (other than

cast iron) or steel (both carbon and alloy), whether seamless or welded, regardless of end finish (*e.g.*, whether or not plain end, threaded, or threaded and coupled) whether or not conforming to American Petroleum Institute (API) or non-API specifications, whether finished (including limited service OCTG products) or unfinished (including green tubes and limited service OCTG products), whether or not thread protectors are attached. The scope of the *Orders* also covers OCTG coupling stock. Excluded from the scope of the *Orders* are casing or tubing containing 10.5 percent or more by weight of chromium; drill pipe; unattached couplings; and unattached thread protectors.

The merchandise covered by the *Orders* is currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under item numbers: 7304.29.10.10, 7304.29.10.20, 7304.29.10.30, 7304.29.10.40, 7304.29.10.50, 7304.29.10.60, 7304.29.10.80, 7304.29.20.10, 7304.29.20.20, 7304.29.20.30, 7304.29.20.40, 7304.29.20.50, 7304.29.20.60, 7304.29.20.80, 7304.29.31.10, 7304.29.31.20, 7304.29.31.30, 7304.29.31.40, 7304.29.31.50, 7304.29.31.60, 7304.29.31.80, 7304.29.41.10, 7304.29.41.20, 7304.29.41.30, 7304.29.41.40, 7304.29.41.50, 7304.29.41.60, 7304.29.41.80, 7304.29.50.15, 7304.29.50.30, 7304.29.50.45, 7304.29.50.60, 7304.29.50.75, 7304.29.61.15, 7304.29.61.30, 7304.29.61.45, 7304.29.61.60, 7304.29.61.75, 7305.20.20.00, 7305.20.40.00, 7305.20.60.00, 7305.20.80.00, 7306.29.10.30, 7306.29.10.90, 7306.29.20.00, 7306.29.31.00, 7306.29.41.00, 7306.29.60.10, 7306.29.60.50, 7306.29.81.10, and 7306.29.81.50.

The OCTG coupling stock covered by the *Orders* may also enter under the following HTSUS item numbers: 7304.39.00.24, 7304.39.00.28, 7304.39.00.32, 7304.39.00.36, 7304.39.00.40, 7304.39.00.44, 7304.39.00.48, 7304.39.00.52, 7304.39.00.56, 7304.39.00.62, 7304.39.00.68, 7304.39.00.72, 7304.39.00.76, 7304.39.00.80, 7304.59.60.00, 7304.59.80.15, 7304.59.80.20, 7304.59.80.25, 7304.59.80.30, 7304.59.80.35, 7304.59.80.40, 7304.59.80.45, 7304.59.80.50, 7304.59.80.55, 7304.59.80.60, 7304.59.80.65, 7304.59.80.70, and 7304.59.80.80.

The HTSUS subheadings are provided for convenience and customs purposes only; the written description of the scope of the *Orders* is dispositive.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A-588-854]

Certain Tin Mill Products From Japan: Rescission of Antidumping Duty Administrative Review; 2019–2020

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is rescinding the administrative review of the antidumping duty order on certain tin

mill products from Japan for the period August 1, 2019, through July 31, 2020, based on the timely withdrawal of the request for review.

DATES: Applicable November 12, 2020.

FOR FURTHER INFORMATION CONTACT: Glenn T. Bass Jr., AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-8338.

Background

On August 4, 2020, Commerce published in the **Federal Register** a notice of opportunity to request an administrative review of the antidumping duty order on certain tin mill products from Japan for the period August 1, 2019, through July 31, 2020.¹ On August 31, 2020, United States Steel Corporation (the petitioner), filed a timely request for review, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.213(b).² Pursuant to this request and in accordance with section 751(a) of the Act and 19 CFR 351.221(c)(1)(i), we initiated an administrative review of the nine companies named by the petitioner in their request for review.³ No other requests for review were received. On October 28, 2020, the petitioner timely withdrew their request for an administrative review with respect to all nine companies.⁴

Rescission of Review

Pursuant to 19 CFR 351.213(d)(1), the Secretary will rescind an administrative review, in whole or in part, if the party that requested the review withdraws the request within 90 days of the date of publication of the notice of initiation of the requested review. As noted above, the petitioner, the only party to file a request for review, withdrew this request by the 90-day deadline. Accordingly, we are rescinding, in its entirety, the administrative review of the antidumping duty order on certain tin mill products from Japan covering the period August 1, 2019, through July 31, 2020.

¹ See *Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation: Opportunity to Request Administrative Review*, 85 FR 47167 (August 4, 2020).

² See Letter from the petitioner, "Tin Mill Products from Japan: Request for Administrative Review of Antidumping Duty Order," dated August 31, 2020.

³ See *Initiation of Antidumping and Countervailing Duty Administrative Reviews*, 85 FR 63081 (October 6, 2020).

⁴ See Letter from the petitioner, "Tin Mill Products from Japan: Withdrawal of Request for Administrative Review of Antidumping Duty Order," dated October 28, 2020.

Assessment

Commerce will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on all appropriate entries of certain tin mill products from Japan. Antidumping duties shall be assessed at rates equal to the cash deposit of estimated antidumping duties required at the time of entry, or withdrawal from warehouse, for consumption, in accordance with 19 CFR 351.212(c)(1)(i). Commerce intends to issue appropriate assessment instructions to CBP 15 days after the date of publication of this notice in the **Federal Register**.

Notification to Importers

This notice serves as a reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of doubled antidumping duties.

Notification Regarding Administrative Protective Orders

This notice also serves as a reminder to all parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely written notification of the return/destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

This notice is issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.213(d)(4).

Dated: November 5, 2020.

James Maeder,

Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Highly Migratory Species Vessel Logbooks and Cost-Earnings Data Reports

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on July 23, 2020, (85 FR 44520) during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Highly Migratory Species (HMS) Vessel Logbooks and Cost-Earnings Data Reports.

OMB Control Number: 0648-0371.

Form Number(s): 88-191.

Type of Request: Regular.

Number of Respondents: 5,513.

Average Hours per Response: 10 minutes for cost/earnings summaries attached to logbook reports, 30 minutes for annual expenditure forms, 12 minutes for logbook catch trip and set reports, 2 minutes for negative logbook catch reports.

Burden Hours: 21,304.

Needs and Uses: NMFS collects information via vessel logbooks to monitor the U.S. catch of Atlantic swordfish, sharks, billfish, and tunas in relation to the quotas, thereby ensuring that the United States complies with its domestic and international obligations. The HMS logbook program, OMB Control No. 0648-0371, was specifically designed to collect the vessel level information needed for the management of Atlantic HMS, and includes set forms, trip forms, negative reports, and cost-earning requirements for both commercial and recreational vessels. The information supplied through the HMS logbook program provides the catch and effort data on a per-set or per-trip level of resolution for both directed

and incidental species. In addition to HMS fisheries, the HMS logbook program is also used to report catches of dolphin and wahoo by commercial and charter/headboat fisheries by vessels that do not possess other federal permits. Additionally, the HMS logbook collects data on incidental species, including sea turtles, which is necessary to evaluate the fisheries in terms of bycatch and encounters with protected species. While most HMS fishermen use the HMS logbook program, HMS can also be reported as part of several other logbook collections including the Northeast Region Fishing Vessel Trip Reports (0648-0212) and Southeast Region Coastal Logbook (0648-0016).

These data are necessary to assess the status of HMS, dolphin, and wahoo in each fishery. International stock assessments for tunas, swordfish, billfish, and some species of sharks are conducted through ICCAT's Standing Committee on Research and Statistics periodically and provide, in part, the basis for ICCAT management recommendations which become binding on member nations. Domestic stock assessments for most species of sharks and for dolphin and wahoo are used as the basis of managing these species.

Supplementary information on fishing costs and earnings has been collected via the HMS logbook program. This economic information enables NMFS to assess the economic impacts of regulatory programs on small businesses and fishing communities, consistent with the National Environmental Policy Act (NEPA), Executive Order 12866, the Regulatory Flexibility Act, and other domestic laws.

Atlantic HMS fisheries are managed under the dual authority of the Magnuson-Stevens Fishery Conservation and Management Act (MSA) and the Atlantic Tunas Conservation Act (ATCA). Under the MSA, management measures must be consistent with ten National Standards, and fisheries must be managed to maintain optimum yield, rebuild overfished fisheries, and prevent overfishing. Under ATCA, the Secretary of Commerce shall promulgate regulations, as necessary and appropriate, to implement measures adopted by the International Commission for the Conservation of Atlantic Tunas (ICCAT).

Affected Public: Businesses or other for-profit organizations (vessel owners).

Frequency: Trip summary reports are submitted within 7 days following the completion of each fishing trip, trip cost-earnings reports are due within 30 days of trip completion, no catch/

fishing reports are due at the end of each month in which no fishing occurs, and annual expenditure reports are submitted annually.

Respondent's Obligation: Mandatory.

Legal Authority: Under the provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), the National Marine Fisheries Service (NMFS) is responsible for management of the Nation's marine fisheries. NMFS must also promulgate regulations, as necessary and appropriate, to carry out obligations the United States (U.S.) undertakes internationally regarding tuna management through the Atlantic Tunas Convention Act (ATCA, 16 U.S.C. 971 *et seq.*).

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0371.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XA605]

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Marine Site Characterization Surveys Off of Coastal Virginia

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; modification of an incidental harassment authorization; request for comments.

SUMMARY: NMFS received a request from Dominion Energy Virginia (Dominion) on September 29, 2020, for a modification to the incidental

harassment authorization (IHA) that was issued on August 28, 2020. This initial IHA allowed Dominion to take nine species of marine mammals, by Level B harassment, incidental to marine site characterization surveys conducted in the areas of the Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf (OCS) Offshore Virginia (Lease No. OCS–A–0483) as well as in coastal waters where an export cable corridor will be established in support of the Coastal Virginia Offshore Wind Commercial (CVOW Commercial) Project. Dominion was recording take of Atlantic spotted dolphin (*Stenella frontalis*) by Level B harassment at a rate that would exceed the authorized limit on this species and therefore, NMFS is proposing to modify the IHA to increase authorized take by Level B harassment of spotted dolphin. The mitigation, monitoring, and reporting measures remain the same as prescribed in the initial IHA and no additional take was requested for other species. NMFS will consider public comments on the requested modification prior to making any final decision and agency responses will be summarized in the final notice of our decision.

DATES: Comments and information must be received no later than November 27, 2020.

ADDRESSES: Comments should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service. Written comments should be submitted via email to ITP.pauline@noaa.gov.

Instructions: NMFS is not responsible for comments sent by any other method, to any other address or individual, or received after the end of the comment period. Comments, including all attachments, must not exceed a 25-megabyte file size. Attachments to comments will be accepted in Microsoft Word or Excel or Adobe PDF file formats only. All comments received are a part of the public record and will generally be posted online at <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act> without change. All personal identifying information (e.g., name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Robert Pauline, Office of Protected Resources, NMFS, (301) 427–8401. Electronic copies of the original

application and supporting documents (including NMFS **Federal Register** notices of the original proposed and final authorizations, and the previous IHA), as well as a list of the references cited in this document, may be obtained online at: <https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-under-marine-mammal-protection-act>. In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the “take” of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed incidental take authorization may be provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other “means of effecting the least practicable adverse impact” on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stocks for taking for certain subsistence uses (referred to in shorthand as “mitigation”); and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

History of Request

On February 7, 2020, NMFS received a request from Dominion for an IHA to take marine mammals incidental to marine site characterization surveys in the areas of the Commercial Lease of Submerged Lands for Renewable Energy Development on the OCS Offshore Virginia (Lease No. OCS–A–0483) as well as in coastal waters where an export cable corridor will be established in support of the offshore wind project. Dominion's planned marine site characterization surveys include high-

resolution geophysical (HRG) and geotechnical survey activities. Geophysical and shallow geotechnical survey activities are anticipated to be supported by up to four vessels. The vessels will transit a combined estimated total of 121.54 kilometers (km) of survey lines per day. Dominion's request was for incidental take of a small number of nine marine mammal species by Level B harassment only. The application was deemed adequate and complete on May 12, 2020. We published a notice of proposed IHA and request for comments in the **Federal Register** on June 17, 2020 (85 FR 36562). We subsequently published the final notice of our issuance of the IHA in the **Federal Register** on September 8, 2020 (85 FR 55415), with effective dates from August 28, 2020, to August 27, 2021. The specified activities were expected to result in the take by Level B harassment of 9 species (10 stocks) of marine mammals including bottlenose dolphin (*Tursiops truncatus*), pilot whale (*Globicephala spp.*), common dolphin (*Delphinus delphis*), Atlantic white sided dolphin (*Lagenorhynchus acutus*), Atlantic spotted dolphin (*Stenella frontalis*), Risso's dolphin (*Grampus griseus*), harbor porpoise (*Phocoena phocoena*), harbor seal (*Phoca vitulina*), and gray seal (*Halichoerus grypus*).

On September 29, 2020, NMFS received a request from Dominion for a modification to the IHA that was issued on August 28, 2020 (85 FR 55415; September 8, 2020). Since the issuance of the initial IHA, Dominion has been recording large pods of Atlantic spotted dolphin within the Level B harassment zone such that they were approaching the authorized take limit for this species. Dominion felt that without an increase in authorized take of spotted dolphins they would be forced to repeatedly shut down whenever animals entered into specified Level B harassment zones. This would likely prolong the duration of survey and add increased costs to the project. Therefore, Dominion is requesting, and NMFS is proposing to modify the IHA to increase authorized take of spotted dolphin by Level B harassment. The mitigation, monitoring, and reporting measures remain the same as prescribed in the initial IHA and no additional take is

requested or proposed for species other than spotted dolphin. Moreover, the IHA would still expire on August 27, 2021.

Description of the Proposed Activity and Anticipated Impacts

The modified IHA would include the same HRG and geotechnical surveys in the same locations that were described in the initial IHA. The mitigation, monitoring, and reporting measures remain the same as prescribed in the initial IHA. NMFS refers the reader to the documents related to the initial IHA issued on August 28, 2020, for more detailed description of the project activities. These previous documents include the notice of proposed IHA and request for comments (85 FR 36562; June 17, 2020) and notice of our issuance of the IHA in the **Federal Register** (85 FR 55415; September 8, 2020).

Detailed Description of the Action

A detailed description of the survey activities is found in these previous documents. The location, timing, and nature of the activities, including the types of HRG equipment planned for use, daily trackline distances and number of survey vessels (four) are identical to those described in the previous notices.

Description of Marine Mammals

A description of the marine mammals in the area of the activities is found in these previous documents, which remains applicable to this modified IHA as well. In addition, NMFS has reviewed recent draft Stock Assessment Reports, information on relevant Unusual Mortality Events, and recent scientific literature, and determined that no new information affects our original analysis of impacts under the initial IHA.

Potential Effects of Specified Activities on Marine Mammals and Their Habitat

A description of the potential effects of the specified activities on marine mammals and their habitat may be found in the documents supporting the initial IHA, which remains applicable to the issuance of this modified IHA. There is no new information on potential effects.

Estimated Take

A detailed description of the methods and inputs used to estimate take for the specified activity are found in the notice of IHA for the initial authorization (85 FR 55415; September 8, 2020). The HRG equipment that may result in take, as well as the source levels, marine mammal stocks taken, marine mammal density data and the methods of take estimation applicable to this authorization remain unchanged from the previously issued IHA. The proposed number of authorized takes is also identical with the exception of spotted dolphin.

During the one month period from the effective date of the initial IHA (August 28, 2020) through September 29, 2020, a total of 19 spotted dolphins had been observed within the Level B harassment zone distances and recorded as takes. This was largely due to a single pod of 15 dolphins sighted in the zone. Another 24 dolphins were observed over three survey days but they were not located in the Level B harassment zone. Prior to the issuance of the initial IHA, Dominion operated only during daylight hours under a Letter of Concurrence (LoC) issued by NMFS. As such, Dominion committed to shutting down whenever a marine mammal approached or entered a Level B harassment zone in order to avoid all incidental take. In the weeks prior to the issuance of the initial IHA, Dominion had observed pods containing up to 17 individuals in the Level B harassment zone. However, these pods were not recorded as incidental takes since mitigation measures were employed, *i.e.*, the acoustic source was shut down and the animals were not exposed to source levels associated with harassment. The estimated take in the initial IHA was based on the best available density data from Roberts *et al.* (2016, 2017, 2018), however, the multiple occurrences of the large pod in the vicinity of the survey was unexpected and not reflected in the take estimate. Table 1 shows spotted dolphin detection events when Dominion was operating under both the LoC (before August 28, 2020) as well as the initial IHA (on or after August 28, 2020).

TABLE 1—ATLANTIC SPOTTED DOLPHIN OBSERVATIONS DURING DOMINION ENERGY HRG SURVEY ACTIVITIES

Vessel name	Date of detection	Number of animals observed in the group	Level B takes accumulated

TABLE 1—ATLANTIC SPOTTED DOLPHIN OBSERVATIONS DURING DOMINION ENERGY HRG SURVEY ACTIVITIES—Continued

Vessel name	Date of detection	Number of animals observed in the group	Level B takes accumulated
Sarah Bordelon	9/4/2020	7
Sarah Bordelon	9/4/2020	11
Marcelle Bordelon	8/23/2020	5
Sarah Bordelon	8/17/2020	17

Given that large pods of spotted dolphin were recorded on multiple occasions, Dominion became concerned that the authorized number of takes by Level B harassment would be exceeded, necessitating the frequent shutdown of HRG survey equipment to avoid additional take of this species. On October 3, 2020, Dominion reached the authorized take amount for spotted dolphins. Since that time, they have been shutting down whenever spotted dolphins are sighted approaching or entering the harassment zone. Dominion

now requests that NMFS authorize additional take of this species to conservatively allow 20 authorized takes per day. NMFS concurs that this take amount is reasonable in case observed dolphin pods are larger than what has been recorded to date. While NMFS does not expect that larger spotted dolphin pods would occur every day, it cannot be ruled out. With approximately 120 survey days remaining, NMFS is proposing to increase authorized spotted dolphin take by Level B harassment from 27 to

2,427 ((20 animals/day * 120 survey days) + initial 27 authorized takes). This represents 4.38 percent of the western North Atlantic stock of spotted dolphin. Take by Level A harassment was not requested, nor does NMFS anticipate it. NMFS did not authorize Level A harassment in the initial IHA and is not proposing to do so in this modified IHA. The total numbers of incidental takes by Level B harassment, including proposed updated spotted dolphin takes, and as a percentage of population, is shown in Table 2 below.

TABLE 2—TOTAL NUMBERS OF AUTHORIZED TAKES BY LEVEL B HARASSMENT AND AS A PERCENTAGE OF POPULATION

Species	Totals	
	Take authorization (No.)	Instances of take as percentage of population ¹
Short-finned pilot whale	12	0.06
Bottlenose dolphin (Offshore)	511	0.81
Bottlenose dolphin (Southern Migratory Coastal)	224	6.5
Common dolphin	68	0.08
Atlantic white-sided dolphin	44	0.12
Spotted dolphin (adjusted)	2,427	4.38
Risso's dolphin	6	0.08
Harbor porpoise	39	0.09
Harbor seal ²	35	0.02
Gray Seal ²		0.06

¹ Calculations of percentage of stock taken are based on the best available abundance estimate as shown in Table 2 in **Federal Register** final notice of issuance of the IHA (85 FR 55415; September 8, 2020). In most cases the best available abundance estimate is provided by Roberts *et al.* (2016, 2017, 2018), when available, to maintain consistency with density estimates derived from Roberts *et al.* (2016, 2017, 2018). For bottlenose dolphins, Roberts *et al.* (2016, 2017, 2018) provides only a single abundance estimate and does not provide abundance estimates at the stock or species level (respectively), so abundance estimates used to estimate percentage of stock taken for bottlenose dolphins are derived from NMFS SARs (Hayes *et al.* 2019).

² Pinniped density values reported as “seals” and not species-specific.

Description of Mitigation, Monitoring and Reporting Measures

The mitigation, monitoring, and reporting measures described here are identical to those included in the **Federal Register** notice announcing the initial IHA and the discussion of the least practicable adverse impact included in that document remains accurate (85 FR 55415; September 8, 2020).

Establishment of Exclusion Zones (EZs)—Marine mammal EZs must be established around the HRG survey equipment and monitored by protected species observers (PSOs) during HRG surveys as follows:

- 500-m EZ is required for North Atlantic right whales;
- During use of the GeoMarine Dual 400 Sparker 800J, a 100-m EZ is required for all other marine mammals except delphinid(s) from the genera *Delphinus*, *Lagenorhynchus*, *Stenella* or *Tursiops* and seals; and
- When only the Triple Plate Boomer 1000J is in use, a 25-m EZ is required for all other marine mammals except delphinid(s) from the genera *Delphinus*, *Lagenorhynchus*, *Stenella* or *Tursiops* and seals; 200-m buffer zone is required for all marine mammals except those species otherwise excluded (*i.e.*, North Atlantic right whale).

If a marine mammal is detected approaching or entering the EZs during the survey, the vessel operator must adhere to the shutdown procedures described below. In addition to the EZs described above, PSOs must visually monitor a 200-m buffer zone for the purposes of pre-clearance. During use of acoustic sources with the potential to result in marine mammal harassment (*i.e.*, anytime the acoustic source is active, including ramp-up), occurrences of marine mammals within the monitoring zone (but outside the EZs) must be communicated to the vessel operator to prepare for potential shutdown of the acoustic source. The buffer zone is not applicable when the

EZ is greater than 100 m. PSOs are also required to observe a 500-m monitoring zone and record the presence of all marine mammals within this zone.

Visual Monitoring—Monitoring must be conducted by qualified protected PSOs who are trained biologists, with minimum qualifications described in the **Federal Register** notice of the issuance of the initial IHA (85 FR 55415; September 8, 2020). Dominion must have one PSO on duty during the day and has committed that a minimum of two NMFS-approved PSOs must be on duty and conducting visual observations when HRG equipment is in use at night. Visual monitoring must begin no less than 30 minutes prior to ramp-up of HRG equipment and continue until 30 minutes after use of the acoustic source. PSOs must establish and monitor the applicable EZs, Buffer Zone and Monitoring Zone as described above. PSOs must coordinate to ensure 360° visual coverage around the vessel from the most appropriate observation posts, and must conduct observations while free from distractions and in a consistent, systematic, and diligent manner. PSOs are required to estimate distances to observed marine mammals. It is the responsibility of the Lead PSO on duty to communicate the presence of marine mammals as well as to communicate action(s) that are necessary to ensure mitigation and monitoring requirements are implemented as appropriate.

Pre-Clearance of the Exclusion Zones—Prior to initiating HRG survey activities, Dominion must implement a 30-minute pre-clearance period. During pre-clearance monitoring (*i.e.*, before ramp-up of HRG equipment begins), the Buffer Zone also acts as an extension of the 100-m EZ in that observations of marine mammals within the 200-m Buffer Zone would also preclude HRG operations from beginning. During this period, PSOs must ensure that no marine mammals are observed within 200 m of the survey equipment (500 m in the case of North Atlantic right whales). HRG equipment must not start up until this 200-m zone (or, 500-m zone in the case of North Atlantic right whales) is clear of marine mammals for at least 30 minutes. The vessel operator must notify a designated PSO of the proposed start of HRG survey equipment as agreed upon with the lead PSO; the notification time must not be less than 30 minutes prior to the planned initiation of HRG equipment in order to allow the PSOs time to monitor the EZs and Buffer Zone for the 30 minutes of pre-clearance.

If a marine mammal is observed within the relevant EZs or Buffer Zone

during the pre-clearance period, initiation of HRG survey equipment must not begin until the animal(s) has been observed exiting the respective EZ or Buffer Zone, or, until an additional time period has elapsed with no further sighting (*i.e.*, minimum 15 minutes for porpoises, and 30 minutes for all other species). The pre-clearance requirement includes small delphinoids. PSOs must also continue to monitor the zone for 30 minutes after survey equipment is shut down or survey activity has concluded.

Ramp-Up of Survey Equipment—When technically feasible, a ramp-up procedure must be used for geophysical survey equipment capable of adjusting energy levels at the start or re-start of survey activities. The ramp-up procedure must be used at the beginning of HRG survey activities in order to provide additional protection to marine mammals near the Survey Area by allowing them to detect the presence of the survey and vacate the area prior to the commencement of survey equipment operation at full power. Ramp-up of the survey equipment must not begin until the relevant EZs and Buffer Zone has been cleared by the PSOs, as described above. HRG equipment must be initiated at their lowest power output and would be incrementally increased to full power. If any marine mammals are detected within the EZs or Buffer Zone prior to or during ramp-up, the HRG equipment must be shut down (as described below).

Shutdown Procedures—If an HRG source is active and a marine mammal is observed within or entering a relevant EZ (as described above) an immediate shutdown of the HRG survey equipment is required. When shutdown is called for by a PSO, the acoustic source must be immediately deactivated and any dispute resolved only following deactivation. Any PSO on duty has the authority to delay the start of survey operations or to call for shutdown of the acoustic source if a marine mammal is detected within the applicable EZ. The vessel operator must establish and maintain clear lines of communication directly between PSOs on duty and crew controlling the HRG source(s) to ensure that shutdown commands are conveyed swiftly while allowing PSOs to maintain watch. Subsequent restart of the HRG equipment must only occur after the marine mammal has either been observed exiting the relevant EZ, or, until an additional time period has elapsed with no further sighting of the animal within the relevant EZ.

Upon implementation of shutdown, the HRG source may be reactivated after the marine mammal that triggered the

shutdown has been observed exiting the applicable EZ (*i.e.*, the animal is not required to fully exit the Buffer Zone where applicable) or, following a clearance period of 15 minutes for small odontocetes and seals and 30 minutes for all other species with no further observation of the marine mammal(s) within the relevant EZ. If the HRG equipment shuts down for brief periods (*i.e.*, less than 30 minutes) for reasons other than mitigation (*e.g.*, mechanical or electronic failure) the equipment may be re-activated as soon as is practicable at full operational level, without 30 minutes of pre-clearance, only if PSOs have maintained constant visual observation during the shutdown and no visual detections of marine mammals occurred within the applicable EZs and Buffer Zone during that time. For a shutdown of 30 minutes or longer, or if visual observation was not continued diligently during the pause, pre-clearance observation is required, as described above.

The shutdown requirement is waived for certain genera of small delphinids (*i.e.*, *Delphinus*, *Lagenorhynchus*, *Stenella* (which includes Atlantic spotted dolphins), or *Tursiops*) under certain circumstances. If a delphinid(s) from these genera is visually detected within the EZ shutdown would not be required. If there is uncertainty regarding identification of a marine mammal species (*i.e.*, whether the observed marine mammal(s) belongs to one of the delphinid genera for which shutdown is waived), PSOs must use best professional judgment in making the decision to call for a shutdown.

If a species for which authorization has not been granted, or a species for which authorization has been granted but the authorized number of takes have been met, approaches or is observed within the area encompassing the Level B harassment isopleth (100 m or 25 m), shutdown must occur.

Vessel Strike Avoidance—Dominion must comply with vessel strike avoidance measures as described in the **Federal Register** notice of the issuance of the initial IHA (85 FR 55415; September 8, 2020).

Seasonal Operating Requirements—Dominion will conduct HRG survey activities in the vicinity of the North Atlantic right whale Mid-Atlantic seasonal management area (SMA) near Norfolk and the mouth of the Chesapeake Bay. Activities conducted prior to May 1 must comply with the seasonal mandatory speed restriction period for this SMA (November 1 through April 30) for any survey work or transit within this area.

Throughout all phases of the survey activities, Dominion must monitor NOAA Fisheries North Atlantic right whale reporting systems for the establishment of a dynamic management area (DMA). If NMFS establishes a DMA in the Lease Area or cable route corridor being surveyed, within 24 hours of the establishment of the DMA, Dominion is required to work with NMFS to shut down and/or alter activities to avoid the DMA.

Training—Project-specific training is required for all vessel crew prior to the start of survey activities. Confirmation of the training and understanding of the requirements must be documented on a training course log sheet. Signing the log sheet will certify that the crew members understand and will comply with the necessary requirements throughout the survey activities.

Reporting—PSOs must record specific information on the sighting forms as described in the **Federal Register** notice of the issuance of the initial IHA (85 FR 55415; September 8, 2020). Within 90 days after completion of survey activities, Dominion must provide NMFS with a monitoring report which includes summaries of recorded takes and estimates of the number of marine mammals that may have been harassed.

In the event of a ship strike or discovery of an injured or dead marine mammal, Dominion must report the incident to the Office of Protected Resources, NMFS and to the New England/Mid-Atlantic Regional Stranding Coordinator as soon as feasible. The report must include the information listed in the **Federal Register** notice of the issuance of the initial IHA (85 FR 55415; September 8, 2020).

Based on our evaluation of the applicant's measures in consideration of the increased estimated take for spotted dolphins, NMFS has re-affirmed the determination that the required mitigation measures provide the means effecting the least practicable impact on spotted dolphins and their habitat.

Preliminary Determinations

Dominion's HRG survey activities and the mitigation, monitoring, and reporting requirements are unchanged from those covered in the initial IHA. The effects of the activity, taking into consideration the mitigation and related monitoring measures, remain unchanged from those stated in the initial IHA, notwithstanding the increase to the authorized amount of spotted dolphin take. Specifically, the Level B harassment authorized for spotted dolphins is expected to be of lower severity, predominantly in the

form of avoidance of the sound source and potential occasional interruption of foraging. With approximately 120 survey days remaining, NMFS is proposing to increase authorized spotted dolphin take by Level B harassment to 2,427. Even in consideration of the increased estimated numbers of take by Level B harassment, the impacts of these lower severity exposures are not expected to accrue to the degree that the fitness of any individuals is impacted, and, therefore no impacts on annual rates of recruitment or survival will result. Further, and separately, the proposed take amount of spotted dolphins relative to the population size (less than 5 percent), as take that is less than one third of the species or stock abundance is considered by NMFS to be small numbers. In conclusion, there is no new information suggesting that our effects analysis or negligible impact finding for Atlantic spotted dolphins should change.

Based on the information contained here and in the referenced documents, NMFS has preliminarily reaffirmed the following: (1) The required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the proposed authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the proposed authorized takes represent small numbers of marine mammals relative to the affected stock abundances; (4) Dominion's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action, and (5) appropriate monitoring and reporting requirements are included.

Endangered Species Act (ESA)

No incidental take of ESA-listed species is authorized or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must review our proposed action (*i.e.*, the modification of an IHA) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no

anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has preliminarily determined that the issuance of the modified IHA qualifies to be categorically excluded from further NEPA review.

We will review all comments submitted in response to this notice prior to concluding our NEPA process or making a final decision on the IHA request.

Proposed Authorization

As a result of these preliminary determinations, NMFS proposes to modify the IHA to Dominion for conducting marine site characterization surveys in the areas of the Commercial Lease of Submerged Lands for Renewable Energy Development on the Outer Continental Shelf Offshore Virginia (Lease No. OCS-A-0483) as well as in coastal waters where an export cable corridor will be established in support of the CVOW Commercial Project effective until August 27, 2021. The only change is an increase in the authorized take of Atlantic spotted dolphins from 27 to 2,427. A draft of the proposed modified IHA can be found at <https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-other-energy-activities-renewable>.

Request for Public Comments

We request comment on our proposed modification of the IHA for Dominion's marine site characterization surveys. We also request comment on the potential for renewal of this modified IHA as described in the paragraph below. Please include with your comments any supporting data or literature citations to help inform our final decision on the request for MMPA authorization or subsequent Renewal IHA.

On a case-by-case basis, NMFS may issue a one-time, one-year Renewal IHA following notice to the public providing an additional 15 days for public comments when (1) up to another year of identical or nearly identical, or nearly identical, activities as described in the Description of the Proposed Activity and Anticipated Impacts section of this notice is planned or (2) the activities as described in the Description of the Proposed Activity and Anticipated Impacts section of this notice would not be completed by the time the IHA

expires and a Renewal would allow for completion of the activities beyond those described previously in this notice, provided all of the following conditions are met:

- A request for renewal is received no later than 60 days prior to the needed Renewal IHA effective date (recognizing that the Renewal IHA expiration date cannot extend beyond one year from expiration of the initial IHA).

- The request for renewal must include the following:

(1) An explanation that the activities to be conducted under the requested Renewal IHA are identical to the activities analyzed under the initial IHA, are a subset of the activities, or include changes so minor (*e.g.*, reduction in pile size) that the changes do not affect the previous analyses, mitigation and monitoring requirements, or take estimates (with the exception of reducing the type or amount of take).

(2) A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized.

Upon review of the request for Renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures will remain the same and appropriate, and the findings in the initial IHA remain valid.

Dated: November 6, 2020.

Donna S. Wieting,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Gulf of Alaska Catcher Vessel and Processor Trawl (CVPT) Economic Data Report (EDR)

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication

of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on July 23, 2020 (85 FR 44523), during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Gulf of Alaska Catcher Vessel and Processor Trawl (CVPT) Economic Data Report (EDR).

OMB Control Number: 0648–0700.

Form Number(s): None.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 117.

Average Hours per Response: Annual Trawl Catcher Vessel EDR, 15 hours; Annual Shoreside Processor EDR, 15 hours.

Total Annual Burden Hours: 1,755 hours.

Needs and Uses: The National Marine Fisheries Services (NMFS), Alaska Regional Office, is requesting extension of the currently approved information collection for the Annual Trawl Catcher Vessel Economic Data Report (EDR) and the Annual Shoreside Processor EDR.

The EDRs collect economic data on the information for the Gulf of Alaska Trawl Groundfish Economic Data Report Program (GOA Trawl EDR Program). The Gulf of Alaska Trawl Groundfish Economic Data Report Program evaluates the economic effects of current and future groundfish management measures for Gulf of Alaska (GOA) trawl fisheries. This program provides NMFS and the North Pacific Fishery Management Council with baseline information on affected harvesters, crew, processors, and communities in the GOA. Data collected through the EDRs include labor information, revenues received, capital and operational expenses, and other operational or financial data. NMFS and the Council use this information to assess the impacts of major changes in the groundfish management regime, including catch share program implementation.

The Trawl Catcher Vessel EDR is submitted annually by owners or leaseholders of catcher vessels that harvest groundfish using trawl gear from the GOA or parallel fisheries. This EDR focuses on vessel identifiers, employment data, and variable cost data (associated with fuel usage and gear

purchases). The Shoreside Processor EDR is submitted annually by owners or leaseholders of shoreside processors or stationary floating processors that receive deliveries from vessels that harvest groundfish using trawl gear from the GOA or parallel fisheries. This EDR focuses on employment and labor costs and for processors located in Kodiak, utility consumption and cost.

Requirements for the EDRs are located at 50 CFR 679.110.

Affected Public: Individuals or households; Business or other for-profit organizations; Not-for-profit institutions.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*).

This information collection request may be viewed at www.reginfo.gov. Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function and entering either the title of the collection or the OMB Control Number 0648–0700.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

[FR Doc. 2020–25040 Filed 11–10–20; 8:45 am]

BILLING CODE 3510–22–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

[Docket No. CFPB–2020–0035]

Agency Information Collection Activities: Comment Request

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Notice and request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Bureau of Consumer Financial Protection (Bureau) is publishing this notice seeking comment on a Generic Information Collection titled, “Payday Loan Disclosure Testing” under the Generic Information Collection Plan entitled, “Generic Information Collection Plan for the

Development and Testing of Disclosures and Related Materials” prior to requesting the Office of Management and Budget’s (OMB’s) approval of this collection.

DATES: Written comments are encouraged and must be received on or before December 14, 2020 to be assured of consideration.

ADDRESSES: You may submit comments, identified by the title of the information collection, OMB Control Number (see below), and docket number (see above), by any of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Email:* PRA_Comments@cfpb.gov. Include Docket No. CFPB-2020-0035 in the subject line of the message.
- *Mail/Hand Delivery/Courier:* Comment intake, Bureau of Consumer Financial Protection (Attention: PRA Office), 1700 G Street NW, Washington, DC 20552.

Please note that due to circumstances associated with the COVID-19 pandemic, the Bureau discourages the submission of comments by mail, hand delivery, or courier. Please note that comments submitted after the comment period will not be accepted. In general, all comments received will become public records, including any personal information provided. Sensitive personal information, such as account numbers or Social Security numbers, should not be included.

FOR FURTHER INFORMATION CONTACT: Documentation prepared in support of this information collection request is available at www.regulations.gov. Requests for additional information should be directed to Suzan Muslu, Data Governance Program Manager, at (202) 435-9267, or email: CFPB_PRA@cfpb.gov. If you require this document in an alternative electronic format, please contact CFPB_Accessibility@cfpb.gov. Please do not submit comments to these email boxes.

SUPPLEMENTARY INFORMATION: *Title of Collection:* Payday Loan Disclosure Testing.

OMB Control Number: 3170-0022.

Type of Review: Request for approval of a generic information collection under an existing Generic Information Collection Plan.

Affected Public: Individuals and Households.

Estimated Number of Respondents: 400.

Estimated Total Annual Burden Hours: 74.

Abstract: The Bureau has hired a contractor to conduct one-on-one

consumer interviews with participants to evaluate and refine potential options for a Bureau-designed payday loan disclosure.

Through this research effort, the Bureau aims to build upon previous academic research on payday disclosures and create disclosures that present key information clearly and effectively. The Bureau will collect information on how consumers locate, comprehend, and use information in the disclosures. Respondents will review disclosure forms and be asked questions about their impressions of the form, comprehension of information presented, usability, and decision making. Usability questions will focus on the impressions consumers take away from the form given the content and layout of the form. Decision making questions will focus on how participants use the information given to assess the cost, payment, and timing of the loan.

The results of this testing (estimated to conclude September 2021) may be used, along with other Bureau considerations, to inform the decision-making process around whether to move forward with a rulemaking related to payday loan disclosures.

Request for Comments: The Bureau is publishing this notice and soliciting comments on: (a) Whether the collection of information is necessary for the proper performance of the functions of the Bureau, including whether the information will have practical utility; (b) The accuracy of the Bureau’s estimate of the burden of the collection of information, including the validity of the methods and the assumptions used; (c) Ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Comments submitted in response to this notice will be submitted to OMB as part of its review of this request. All comments will become a matter of public record.

Dated: November 5, 2020.

Suzan Muslu,

Data Governance Program Manager, Bureau of Consumer Financial Protection.

[FR Doc. 2020-24995 Filed 11-10-20; 8:45 am]

BILLING CODE 4810-AM-P

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Application Package for Disaster Response Cooperative Agreement

AGENCY: Corporation for National and Community Service (CNCS).

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, CNCS is proposing to renew an information collection.

DATES: Written comments must be submitted to the individual and office listed in the **ADDRESSES** section by January 11, 2021.

ADDRESSES: You may submit comments, identified by the title of the information collection activity, by any of the following methods:

(1) By mail sent to: Corporation for National and Community Service, Attention: Luke Wigle, 250 E Street SW, Washington, DC 20525.

(2) By hand delivery or by courier to the CNCS mailroom at the mail address given in paragraph (1) above, between 9:00 a.m. and 4:00 p.m. Eastern Time, Monday through Friday, except federal holidays.

(3) Electronically through www.regulations.gov.

Comments submitted in response to this notice may be made available to the public through www.regulations.gov. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comment that may be made available to the public, notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: Luke Wigle, 202-409-4791, or by email at lwigle@cns.gov.

SUPPLEMENTARY INFORMATION:

Title of Collection: Application Package for Renewal of the Disaster Response Cooperative Agreement.

OMB Control Number: 3045-0133.
Type of Review: Renewal.

Respondents/Affected Public:
Businesses and Organizations.

Total Estimated Number of Annual Responses: 100.

Total Estimated Number of Annual Burden Hours: 3,960.

Abstract: CNCS, operating as AmeriCorps, seeks renewal of the current information collection pursuant to the Domestic Volunteer Service Act of 1973 (42 U.S.C. 4950 *et seq.*) and the National and Community Service Act of 1990 (42 U.S.C. 12501 *et seq.*) The information collected will be used to help CNCS more effectively utilize its deployable resources to meet the needs of disaster affected communities. A better understanding of the participating programs will allow CNCS to match the capabilities of the programs to the needs of the communities and will allow better asset mapping and resource typing. Additionally, the information collected will allow CNCS to conduct better outreach to interested programs by providing them with more information about CNCS disaster procedures, reimbursement requirements, and support services offered.

The revisions are intended to streamline the application process and ensure interested programs meet the appropriate programmatic and fiscal requirements to successfully execute disaster response activities. Additionally, the supporting forms will help CNCS identify and deploy programs more effectively and efficiently, matching the capabilities of the programs to the needs of the communities requesting assistance. The additional tools and forms under the DRCA will allow for effective information collection during a disaster event as well as assess the capacity of all DRCA programs throughout the year. Information will be collected electronically through completion of the forms and emailed to CNCS. The information collection will otherwise be used in the same manner as the existing application.

CNCS also seeks to continue using the current application until the revised application is approved by OMB. The current application is due to expire on March 30, 2021.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to

enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information. All written comments will be available for public inspection on [regulations.gov](https://www.regulations.gov).

Dated: October 28, 2020.

Jacob Sgambati,

Acting Deputy Director, AmeriCorps NCCC.

BILLING CODE 6050-28-P

DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

Notice of Extension of Public Comment Period for the Interim Report for the Buffalo Bayou and Tributaries, Texas Resiliency Study

AGENCY: Department of the Army, U.S. Army Corps of Engineers, DoD.

ACTION: Notice of extension.

SUMMARY: A notice of availability was published in the **Federal Register** by the U.S. Army Corps of Engineers (USACE) on October 2, 2020 for the Buffalo Bayou and Tributaries, Texas Resiliency Study (BBTRS) notifying the public an Interim Report was available for review and comment. The notice indicated the review period was to conclude on November 2, 2020. Four virtual public meetings were held in October 2020 in an effort to provide the public with an overview of Interim Report and answer questions about the study and alternatives considered. In response to several requests for extension, this notice announces an extension of the

public comment period to November 20, 2020. No additional public meetings have been scheduled during the extension period.

DATES: This notice announces an 18-day extension of the public comment period. Written comments on the Interim Report must be received by email or post-marked by November 20, 2020.

ADDRESSES: The Interim Report and additional pertinent information about the study can be found at: <https://www.swg.usace.army.mil/Missions/Projects/BBTRS/>. Written comments may be mailed to USACE, Galveston District, ATTN: BBTRS, P.O. Box 1229, Galveston, TX, 77553-1229 or submitted electronically by email to BBTRS@usace.army.mil.

FOR FURTHER INFORMATION CONTACT: Ms. Shelby Scego, USACE, Regional Planning and Environmental Center, at 918-669-7423 or BBTRS@usace.army.mil.

SUPPLEMENTARY INFORMATION:

1. *Background.* USACE, in partnership with the Harris County Flood Control District (HCFCD), as the non-Federal sponsor, began a feasibility study in 2018 to identify, evaluate, and recommend actions to reduce flood risks along Buffalo Bayou and its tributaries, both upstream and downstream of Addicks and Barker dams. The study will also complete a Dam Safety Modification Evaluation on Addicks and Barker dams. The BBTRS is authorized under Section 216 of the Flood Control Act of 1970 (Pub. L. 91-611) and existing project authority. Section 216 authorizes USACE to review a completed navigation, flood risk reduction, water supply, or related project due to significantly changed physical or economic conditions, and to report to Congress with recommendations regarding modification of the project's structures or operation, and for improving the quality of the environment in the overall public interest.

2. *Interim Report.* On October 2, 2020, the USACE released an Interim Report for the study. The Interim Report presents alternatives that could reduce the risk of flooding in the Buffalo Bayou, Addicks Reservoir, Barker Reservoir, and upper Cypress Creek watersheds in Harris, Fort Bend, and Waller counties, Texas. The report also evaluates alternatives for dam safety modifications to the Addicks and Barker dams. The report does not identify a preferred alternative nor does it make any recommendations or decisions.

The Interim Report is an added step to the feasibility study process and is intended to explain updated

information, present the focused array of alternatives, and seek public feedback that will inform the next level of evaluation to identify a Tentatively Selected Plan (TSP). The TSP may be a single alternative or comprised of several alternatives from the focused array under consideration.

Note: This is not a Notice of Extension associated with the release of a Draft Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act. This is an interim step intended to gather public feedback before a Draft EIS is released.

3. *Solicitation of Comments:* The USACE is soliciting comments on the Interim Report from the public, Federal, State, and local agencies, elected officials, Tribal Nations, and other interested parties. The public comment period initially began on October 2, 2020, but has been extended to November 20, 2020. Public comments may be submitted by email or through postal mail at the addresses provided above.

4. *Public Participation and Meetings:* Four virtual public meetings were held in October 2020. Over 450 people participated in the virtual meetings, which included an overview of the alternatives being considered and a question and answer session. No additional public meetings are scheduled during the extension period.

5. *Identification of Tentatively Selected Plan and Availability of Draft EIS.* Depending on input received on the Interim Report, USACE estimates issuing a Draft Feasibility Report and Draft Environmental Impact Statement for public review and comment in early 2021. At that time, USACE will provide a 45-day public review period, in accordance with the National Environmental Policy Act (NEPA). USACE will notify all interested agencies, organizations, and individuals of the availability of the draft document at that time.

Pete G. Perez,

Director, Programs Directorate.

BILLING CODE 3720-58-P

DEPARTMENT OF DEFENSE

Department of the Navy

Meeting of the U.S. Naval Academy Board of Visitors

AGENCY: Department of the Navy, U.S. Department of Defense (DoD).

ACTION: Notice of partially closed meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the U.S. Naval Academy Board of Visitors, hereafter "Board," will take place.

DATES: Open to the public, December 7, 2020, from 9 a.m. to 11 a.m. Closed to the public, December 7, 2020, from 11 a.m. to noon (12 p.m.).

ADDRESSES: This meeting will be held at the United States Naval Academy in Annapolis, MD. The meeting will be handicap accessible. Escort is required.

FOR FURTHER INFORMATION CONTACT: Major Raphael Thalakkottur, USMC, Executive Secretary to the Board of Visitors, Office of the Superintendent, U.S. Naval Academy, Annapolis, MD 21402-5000, 410-293-1503, thalakot@usna.edu, or visit <https://www.usna.edu/PAO/Superintendent/bov.php>.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), the General Services Administration's (GSA) Federal Advisory Committee Management Final Rule (41 CFR part 102-3).

Purpose of Meeting: The U.S. Naval Academy Board of Visitors will meet to make such inquiry, as the Board deems necessary, into the state of morale and discipline, the curriculum, instruction, physical equipment, fiscal affairs, and academic methods of the Naval Academy.

Agenda: Proposed meeting agenda for December 7, 2020.

0830-0900 Assemble
0900 Call to Order
0900-1055 Business Session
1055-1100 Break
1100-1200 Executive Session (Closed to Public)

Current details on the board of visitors may be found at <https://www.usna.edu/PAO/Superintendent/bov.php>.

The executive session of the meeting from 11:00 a.m. to 12:00 p.m. on December 7, 2020, will consist of discussions of new and pending administrative or minor disciplinary infractions and non-judicial punishments involving midshipmen attending the Naval Academy, to include but not limited to, individual honor or conduct violations within the Brigade, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. For this

reason, the executive session of this meeting will be closed to the public, as the discussion of such information cannot be adequately segregated from other topics, which precludes opening the executive session of this meeting to the public. Accordingly, the Secretary of the Navy, in consultation with the Department of the Navy General Counsel, has determined in writing that the meeting shall be partially closed to the public because the discussions during the executive session from 11 a.m. to noon (12 p.m.) will be concerned with matters protected under sections 552b(c) (5), (6), and (7) of title 5, United States Code.

Authority: 5 U.S.C. 552b.

Meeting Accessibility: Pursuant to FACA and 41 CFR 102-3.140, this meeting is open to the public. Any public attendance at the meeting will be governed by prevailing health directives at the United States Naval Academy. Please contact the Executive Secretary five business days prior the meeting to coordinate required medical screenings and access to the meeting.

Written Statements: Per Section 10(a)(3) of the FACA and 41 CFR 102-3.105(j) and 102-3.140, interested persons may submit a written statement for consideration at any time, but should be received by the Designated Federal Officer at least 15 business days prior to the meeting date so that the comments may be made available to the Board for their consideration prior to the meeting. Written statements should be submitted via mail to 121 Blake Rd., Annapolis, MD 21402. Please note that since the Board operates under the provisions of the FACA, as amended, all submitted comments and public presentations will be treated as public documents and will be made available for public inspection, including, but not limited to, being posted on the board website.

Dated: November 5, 2020.

K.R. Callan,

Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

BILLING CODE 3810-FF-P

DEPARTMENT OF EDUCATION

[Docket No.: ED-2020-SCC-0174]

Agency Information Collection Activities; Comment Request; Work Colleges Expenditure Report

AGENCY: Department of Education (ED), Federal Student Aid.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension without change of a currently approved collection.

DATES: Interested persons are invited to submit comments on or before January 11, 2021.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED-2020-SCC-0174. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the [regulations.gov](http://www.regulations.gov) site is not available to the public for any reason, ED will temporarily accept comments at ICDocketMgr@ed.gov. Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W208D, Washington, DC 20202-4537.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Beth Grebeldinger, (202) 337-4018.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate;

(4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Work Colleges Expenditure Report.

OMB Control Number: 1845-0152.

Type of Review: Extension without change of a currently approved collection.

Respondents/Affected Public: Private Sector.

Total Estimated Number of Annual Responses: 10.

Total Estimated Number of Annual Burden Hours: 20.

Abstract: The Higher Education Opportunity Act, Public Law 110-315 includes provisions for the Higher Education Act of 1965, as amended, in section 448 that promotes the use of comprehensive work-learning-service programs as a valuable education approach when it is an integral part of the institution's education program and a part of a financial plan which decreases reliance on grants and loans. Work Colleges participants are required to report expenditure of funds annually. The data collected in this report is used by the Department to monitor program effectiveness and accountability of fund expenditures. The data is used in conjunction with institutional program reviews to assess the administrative capability and compliance of the applicant. There are no other resources for collecting this data.

Dated: November 6, 2020.

Kate Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. EL21-14-000]

NextEra Energy, Inc.; American Electric Power Company, Inc.; Evergy, Inc.; Exelon Corporation; Xcel Energy Services Inc.; Notice of Petition for Declaratory Order

Take notice that on October 30, 2020, NextEra Energy, Inc., American Electric Power Company, Inc., Evergy, Inc., Exelon Corporation, and Xcel Energy Services Inc. (Petitioners) submitted a petition for declaratory order seeking to resolve two issues arising in the wake of Order Nos. 860 and 860-A,¹ as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the eLibrary link. Enter

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OLEM-2020-0521; FRL-10016-49-OLEM]

Proposed Information Collection Request; Comment Request; Survey of State Emergency Response Commissions (SERCs)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency is planning to submit an information collection request (ICR), "Survey of State Emergency Response Commissions (SERCs)" (EPA ICR No. 2660.01, OMB Control No. 2050-new) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. Before doing so, EPA is soliciting public comments on specific aspects of the proposed information collection as described below. This is a request for approval of a new collection. An Agency may not conduct or sponsor and a person is not required to respond

to a collection of information unless it displays a currently valid OMB control number.

DATES: Comments must be submitted on or before January 11, 2021.

ADDRESSES: Submit your comments, referencing Docket ID No. EPA-HQ-OLEM-2020-0521, online using www.regulations.gov (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT: Sicy Jacob, Regulations Implementation Division, Office of Emergency Management, Mail Code 5104A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564-8019; email address: jacob.sicy@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents which explain in detail the information that the EPA will be collecting are available in the public docket for this information collection request (ICR). The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology,

e.g., permitting electronic submission of responses. EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The EPA's Office of Emergency Management is conducting a survey of the State Emergency Response Commissions (SERCs) of each State and territories of the U.S. The SERCs were created under the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. The purpose of this survey is to gather information on how EPCRA is being implemented, best practices, challenges, and gaps in meeting the requirements. After the survey is completed, EPA is planning to publish the results of the survey, including success stories and lessons learned to share with all states and territories.

EPCRA established State Emergency Response Commissions (SERCs) and Local Emergency Planning Committees (LEPCs) and assigned implementation responsibilities to these state and local agencies. EPCRA required SERCs to appoint LEPCs¹ within a few months after the enactment of EPCRA and to supervise their activities. Importantly, SERCs should ensure that LEPCs develop local emergency response plans for their community, review the plans, and make suggestions to coordinate the plans with neighboring LEPCs. In addition, SERCs are required to collect and manage hazardous chemical information from facilities and to provide access to the public on the presence of hazardous chemicals in the community.

In response to the deadly explosion at a fertilizer distribution facility in West Texas, Executive Order (E.O.) 13650 was signed, which directed the federal government to improve the safety and security of chemical facilities and reduce the risks of hazardous chemicals to workers and communities. One of the key components of the E.O. was to strengthen the state and local infrastructure created by EPCRA for emergency planning and preparedness. EPA published additional guidance documents, and developed on-line training for states, tribes and local agencies to implement EPCRA to protect their community and first responders.

¹ Approximately, 3,000 LEPCs were established within few months after the enactment of EPCRA.

As part of the America's Water Infrastructure Act (AWIA),² promulgated in October 2018, additional coordination and provision of information responsibilities were established for SERCs and LEPCs under EPCRA. Specifically, these EPCRA amendments establish notification and information coordination with State Drinking Water Agency and Community Water Systems to ensure that these agencies prepare and protect the community from contamination of their water.

The data collected in this survey will inform the Agency about how SERCs are fulfilling the requirements of the law, specifically in sharing key information among all appropriate State organizations and managing LEPCs and their activities. Additionally, the results of the survey will help to identify areas where SERCs are having difficulty meeting their requirements, the specific challenges they are facing, and will identify areas where EPA can better assist SERCs and LEPCs in implementing EPCRA and its amendments under AWIA.

Form Numbers: None.

Respondents/affected entities:

Respondents to this voluntary ICR are State Emergency Response Commissions (SERCs).

Respondent's obligation to respond: Voluntary.

Estimated number of respondents: Approximately 56 (total).

Frequency of response: Once.

Total estimated burden: 4 Hours/respondent, 224 hours total. Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$284/respondent, \$15,904 total, includes \$0 annualized capital or operation & maintenance costs.

Reggie Cheatham,

Director, Office of Emergency Management.

BILLING CODE 6560-50-P

FARM CREDIT ADMINISTRATION

Sunshine Act Meeting; Farm Credit Administration Board

AGENCY: Farm Credit Administration.

² The America's Water Infrastructure Act (AWIA) amended the emergency release notification and the hazardous chemical inventory provisions of the 1986 legislation. The amendments require the SERCs to provide immediate notification to the State Drinking Water Primacy Agency or the Community Water Systems where there is no primacy agency. The amendment to the hazardous chemical inventory provisions require the SERCs and LEPCs to provide access to the "Tier II" information upon request by the community water systems.

ACTION: Notice, regular meeting.

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act, of the forthcoming regular meeting of the Farm Credit Administration Board.

DATES: *Date and Time:* The regular meeting of the Board will be held November 19, 2020, from 9:00 a.m. until such time as the Board may conclude its business. *Note:* *Because of the COVID-19 pandemic, we will conduct the board meeting virtually. If you would like to observe the open portion of the virtual meeting, see instructions below for board meeting visitors.*

Attendance: To observe the virtual meeting, go to FCA.gov, select "Newsroom," then "Events." There you will find a description of the meeting and a link to "Instructions for board meeting visitors." See **SUPPLEMENTARY INFORMATION** for further information about attendance requests.

Contact: Dale Aultman, Secretary to the Farm Credit Administration Board (703) 883-4009. TTY is (703) 883-4056.

SUPPLEMENTARY INFORMATION: This meeting of the Board will be open to the public. If you wish to observe, follow the instructions above in the "Attendance" section at least 24 hours before the meeting. If you need assistance for accessibility reasons or if you have any questions, contact Dale Aultman, Secretary to the Farm Credit Administration Board, at (703) 883-4009. The matters to be considered at the meeting are as follows:

Open Session

A. Approval of Minutes

- October 8, 2020

B. Reports

- Funding Corporation Activities
 - USDA's Beginning Farmers and Ranchers Lending Summit

New Business

- Farm Credit System Building Association 2021 Budget and Assessments

Dated: November 9, 2020.

Dale Aultman,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705-01-P

FEDERAL COMMUNICATIONS COMMISSION

[FRS 17226]

Federal Advisory Committee Act; Communications Security, Reliability, and Interoperability Council**AGENCY:** Federal Communications Commission.**ACTION:** Notice of public meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice advises interested persons that the Federal Communications Commission's (FCC or Commission) Communications Security, Reliability, and Interoperability Council (CSRIC) VII will hold its seventh meeting via live internet link.

DATES: December 9, 2020.

ADDRESSES: The Meeting will be held via conference call and available to the public via WebEx at <http://www.fcc.gov/live>.

FOR FURTHER INFORMATION CONTACT: Suzon Cameron, Designated Federal Officer, (202) 418-1916 (voice) or CSRIC@fcc.gov (email); or, Kurian Jacob, Deputy Designated Federal Officer, (202) 418-2040 (voice) or CSRIC@fcc.gov (email).

SUPPLEMENTARY INFORMATION: The meeting on December 9, 2020, from 1:00 p.m. EDT to 5:00 p.m. EST will be held electronically only and may be viewed live, by the public, at <http://www.fcc.gov/live>. Any questions that arise during the meeting should be sent to CSRIC@fcc.gov and will be answered at a later date. The meeting is being held in a wholly electronic format in light of travel and gathering restrictions related to COVID-19 in place in Washington, DC, and the larger U.S., which affect members of CSRIC and the FCC.

The CSRIC is a Federal Advisory Committee that will provide recommendations to the FCC to improve the security, reliability, and interoperability of communications systems. On March 15, 2019, the FCC, pursuant to the Federal Advisory Committee Act, renewed the charter for CSRIC VII for a period of two years through March 14, 2021. The meeting on December 9, 2020, will be the seventh meeting of CSRIC VII under the current charter.

The Commission will provide audio and/or video coverage of the meeting over the internet from the FCC's web page at <http://www.fcc.gov/live>. The public may submit written comments before the meeting to Suzon Cameron, CSRIC VII Designated Federal Officer, by email to CSRIC@fcc.gov.

Open captioning will be provided for this event. Other reasonable accommodations for people with disabilities are available upon request. Requests for such accommodations should be submitted via email to fcc504@fcc.gov or by calling the Consumer & Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (tty). Such requests should include a detailed description of the accommodation needed. In addition, please include a way the FCC can contact you if it needs more information. Please allow at least five days' advance notice; last-minute requests will be accepted but may be impossible to fill.

Federal Communications Commission.

Marlene Dortch,
Secretary.

BILLING CODE 6712-01-P**FEDERAL COMMUNICATIONS COMMISSION**

[DA 20-1269; FRS 17229]

Media Bureau Lifts Freeze on the Filing of Television Station Minor Modification Applications and Rulemaking Petitions**AGENCY:** Federal Communications Commission.**ACTION:** Notice.

SUMMARY: This document announces that, effective [insert date], the Media Bureau is lifting the freezes on petitions for rulemaking to change channels in the DTV Table of Allotments, petitions for rulemaking for new DTV allotments, petitions for rulemaking to change communities of license, including changes in technical parameters, and modification applications that increase a full power or Class A station's service area beyond an area that is already served.

DATES: The filing freezes will be lifted effective November 12, 2020.

FOR FURTHER INFORMATION CONTACT: Joyce L. Bernstein, Video Division, Media Bureau, Federal Communications Commission, Joyce.Bernstein@fcc.gov, (202) 418-1645.

SUPPLEMENTARY INFORMATION: The Media Bureau announces that, effective fifteen days after publication of this Public Notice, it is lifting the freezes it imposed in 2004, in connection with the DTV Transition, on the filing of certain full power and Class A television station minor modification applications and full power television station rulemaking

petitions to amend the DTV Table Allotments. Over the course of the following years, the Bureau extended the freezes to further ensure its database remained stable in connection with the incentive auction and repacking process. With the 2009 completion of the DTV transition and the July 13, 2020 completion of the post-incentive auction transition period, these freezes are no longer required. Accordingly, the Media Bureau deems it appropriate to lift the freezes on petitions for rulemaking to change channels in the DTV Table of Allotments, petitions for rulemaking for new DTV allotments, petitions for rulemaking to change communities of license, including changes in technical parameters, and modification applications that increase a full power or Class A station's service area beyond an area that is already served. The Public Notice also includes filing instructions for interested parties.

The freeze on the filing of applications for new LPTV/translator digital stations and major changes remains in effect.

This action is taken by the Chief, Video Division, Media Bureau pursuant to authority delegated by 47 CFR 0.283 of the Commission's rules.

Federal Communications Commission.

Thomas Horan,

Chief of Staff, Media Bureau.

BILLING CODE P

FEDERAL TRADE COMMISSION

[File No. 191-0182]

Pfizer Inc. and Mylan N.V.; Analysis of Agreement Containing Consent Orders To Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed consent agreement; request for comment.

SUMMARY: The consent agreement in this matter settles alleged violations of federal law prohibiting unfair methods of competition. The attached Analysis to Aid Public Comment describes both the allegations in the complaint and the terms of the consent order—embodied

in the consent agreement—that would settle these allegations.

DATES: Comments must be received on or before December 14, 2020.

ADDRESSES: Interested parties may file comments online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write: “Pfizer Inc. and Mylan N.V.; File No. 191 0182” on your comment, and file your comment online at <https://www.regulations.gov> by following the instructions on the web-based form. If you prefer to file your comment on paper, please mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC-5610 (Annex D), Washington, DC 20580; or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex D), Washington, DC 20024.

FOR FURTHER INFORMATION CONTACT: Jasmine Rosner (202-326-3558), Bureau of Competition, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: Pursuant to Section 6(f) of the Federal Trade Commission Act, 15 U.S.C. 46(f), and FTC Rule 2.34, 16 CFR 2.34, notice is hereby given that the above-captioned consent agreement containing a consent order to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, has been placed on the public record for a period of thirty (30) days. The following Analysis of Agreement Containing Consent Orders to Aid Public Comment describes the terms of the consent agreement and the allegations in the complaint. An electronic copy of the full text of the consent agreement package can be obtained from the FTC website at this web address: <https://www.ftc.gov/news-events/commission-actions>.

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before December 14, 2020. Write “Pfizer Inc. and Mylan N.V.; File No. 191 0182” on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the <https://www.regulations.gov> website.

Due to the public health emergency in response to the COVID-19 outbreak and the agency’s heightened security screening, postal mail addressed to the Commission will be subject to delay. We

strongly encourage you to submit your comments online through the <https://www.regulations.gov> website.

If you prefer to file your comment on paper, write “Pfizer Inc. and Mylan N.V.; File No. 191 0182” on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC-5610 (Annex D), Washington, DC 20580; or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex D), Washington, DC 20024. If possible, submit your paper comment by courier or overnight service.

Because your comment will be placed on the publicly accessible website at <https://www.regulations.gov>, you are solely responsible for making sure that your comment does not include any sensitive or confidential information. In particular, your comment should not include sensitive personal information, such as your or anyone else’s Social Security number; date of birth; driver’s license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure your comment does not include sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any “trade secret or any commercial or financial information which . . . is privileged or confidential”—as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled “Confidential,” and must comply with FTC Rule 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. See FTC Rule 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted on <https://www.regulations.gov>—as legally

required by FTC Rule 4.9(b)—we cannot redact or remove your comment from that website, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

Visit the FTC website at <http://www.ftc.gov> to read this Notice and the news release describing this matter. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding, as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before December 14, 2020. For information on the Commission’s privacy policy, including routine uses permitted by the Privacy Act, see <https://www.ftc.gov/site-information/privacy-policy>.

Analysis of Consent Orders To Aid Public Comment

The Federal Trade Commission (“Commission”) has accepted, subject to final approval, an Agreement Containing Consent Orders (“Consent Agreement”) from Pfizer Inc., Upjohn Inc., Viatris Inc., Mylan N.V., and Utah Acquisition Sub Inc., that is designed to remedy the anticompetitive effects resulting from the proposed combination of Upjohn and Mylan. Under the terms of the Consent Agreement, the parties are required to divest Upjohn’s generic drug rights and assets related to six products to Prasco, LLC. The Consent Agreement also requires the parties to divest Mylan’s rights and assets related to eplerenone tablets to Prasco. Further, the Consent Agreement requires prior Commission approval before Upjohn, Mylan, or Viatris may gain an interest in or exercise control over any third party’s rights to (1) levothyroxine sodium tablets, (2) sucralfate tablets, and (3) varenicline tartrate tablets.

The Consent Agreement has been placed on the public record for thirty days for receipt of comments from interested persons. Comments received during this period will become part of the public record. After thirty days, the Commission will again evaluate the Consent Agreement, along with the comments received, to make a final decision as to whether it should withdraw the Consent Agreement, modify it, or make final the proposed Decision and Order (“Order”).

Pursuant to agreements dated July 29, 2019, Pfizer proposes to spin off its Upjohn business, which includes legacy Pfizer branded products and the authorized generic business,

Greenstone, LLC. Upjohn will combine with Mylan to form a new entity, Viatrix (“Proposed Combination”). The Commission alleges in its Complaint that the Proposed Combination, if consummated, would violate Section 7 of the Clayton Act, 15 U.S.C. 18, as amended, and Section 5 of the Federal Trade Commission Act, 15 U.S.C. 45, as amended, by lessening current competition in the following seven U.S. markets: (1) Amlodipine besylate/atorvastatin calcium tablets, (2) eplerenone tablets, (3) gatifloxacin ophthalmic solution, (4) medroxyprogesterone acetate injectable solution, (5) phenytoin chewable tablets, (6) prazosin hydrochloride (“HCl”) capsules, and (7) spironolactone hydrochlorothiazide (“HCTZ”) tablets. The Commission also alleges that the Proposed Combination would violate the aforementioned statutes by lessening future competition in the markets for: (1) Levothyroxine sodium tablets, (2) sucralfate tablets, and (3) varenicline tartrate tablets. The Consent Agreement will remedy the alleged violations by preserving the competition that otherwise would be eliminated by the Proposed Combination.

I. The Products and Structure of the Markets

In human pharmaceutical markets, price generally decreases as the number of generic competitors increases. Prices continue to decrease incrementally with the entry of the second, third, fourth, and even fifth generic competitor. And in markets prone to supply shortages, additional entry after the fifth generic competitor continues to affect price and ensures more stable supply. Accordingly, the reduction in the number of suppliers within each relevant market has a direct and substantial effect on pricing.

The Proposed Combination would reduce current competition in the markets for seven products where Greenstone distributes the authorized generic version of the branded drug:

- Amlodipine besylate/atorvastatin calcium tablets combine a calcium channel blocker to treat hypertension with a lipid-lowering agent to treat high cholesterol. Only four companies sell generic amlodipine besylate/atorvastatin calcium tablets: Greenstone, Mylan, Dr. Reddy’s Laboratories Ltd., and Apotex Inc.

- Eplerenone is a diuretic that is prescribed as an adjunctive therapy when treating hypertension or congestive heart failure after a heart attack. Significant sellers of eplerenone include Greenstone, Mylan,

Breckenridge Pharmaceutical, Inc., and Accord Healthcare Inc.

- Gatifloxacin ophthalmic solution is an eye drop that treats bacterial conjunctivitis caused by susceptible strains of certain bacteria. The market for gatifloxacin has faced historical supply disruptions. Five companies supply this product today: Greenstone, Mylan, Sandoz International GmbH, Akorn, Inc., and Lupin Ltd.

- Medroxyprogesterone acetate is an injectable solution used to treat certain types of dysfunctional uterine bleeding. Injectable products, such as medroxyprogesterone acetate, have recently experienced shortages and supply disruptions. Greenstone, Mylan, Amphastar Pharmaceuticals, Inc., Teva Pharmaceutical Industries Ltd., and Sun Pharmaceutical Industries Ltd. currently supply medroxyprogesterone acetate.

- Phenytoin chewable tablets are an anti-epileptic drug that slows down impulses in the brain that cause seizures. Only three suppliers provide phenytoin chewable tablets today: Greenstone, Mylan, and Taro Pharmaceutical Industries Ltd.

- Prazosin HCl capsules are an alpha-adrenergic blocker that treats hypertension by relaxing the veins and arteries so that blood can more easily pass. The market for prazosin HCl capsules is supplied by four companies: Greenstone, Mylan, Teva, and Novitium Pharma LLC.

- Spironolactone HCTZ tablets are a diuretic used to treat hypertension. Only three suppliers provide spironolactone HCTZ tablets: Greenstone, Mylan, and Sun.

The Proposed Combination also would reduce future competition in the following generic markets:

- Levothyroxine sodium tablets are offered in a host of strengths and are prescribed to treat hypothyroidism or as an adjunct therapy for patients undergoing treatment for thyroid cancer. Suppliers for levothyroxine sodium tablets vary by strength. Should Upjohn or Greenstone launch an authorized generic of Pfizer’s levothyroxine sodium branded product (Levoxyl®), the Proposed Combination likely would reduce the number of independent suppliers from three to two in some strengths.

- Sucralfate tablets are used to treat and prevent ulcers in the small intestines. Three companies sold sucralfate tablets historically: Greenstone, Mylan, and Teva. Mylan recently discontinued sales of sucralfate. The Proposed Combination likely alters Mylan’s incentives to relaunch sucralfate tablets and would reduce the number of firms capable of

selling sucralfate tablets from three to two.

- Varenicline tartrate tablets are a smoking cessation aid offered under Pfizer’s brand Chantix®. Currently, only branded Chantix® is available in the market. Mylan is one of a limited number of companies likely to share the Hatch-Waxman 180-day exclusivity period when the generic market forms. Should Upjohn or Greenstone launch an authorized generic of Pfizer’s Chantix®, the Proposed Combination would significantly reduce the number of independent generic suppliers.

II. Entry

Entry into the markets at issue would not be timely, likely, or sufficient in magnitude, character, and scope to deter or counteract the anticompetitive effects of the Proposed Combination. The combination of drug development times and regulatory requirements, including approval by the FDA, is costly and time-consuming.

III. Competitive Effects

The Proposed Combination would likely cause significant anticompetitive harm to consumers in the relevant generic pharmaceutical markets by eliminating current and/or future competition in concentrated existing generic markets or in future generic markets. In generic pharmaceuticals markets, price is heavily influenced by the number of participants with sufficient supply. Market participants consistently characterize generic drug markets as commodity markets in which the number of generic suppliers has a direct impact on pricing. Customers and competitors alike have confirmed that the prices of the generic pharmaceutical products at issue continue to decrease with new entry even after a number of suppliers have entered these generic markets.

The evidence shows anticompetitive effects are likely because the Proposed Combination will reduce the number of independent competitors in the markets at issue. In each of the current generic drug markets, industry participants have indicated that the presence of Greenstone and Mylan as independent competitors has allowed them to negotiate lower prices and, in some markets, has improved surety of supply.

In five of the markets where Upjohn and Mylan currently compete (amlodipine besylate/atorvastatin calcium tablets, eplerenone tablets, phenytoin chewable tablets, prazosin HCl capsules, and spironolactone HCTZ tablets), the Proposed Combination likely would reduce competition by combining two of only four or fewer

current suppliers, likely leading to higher prices. In two of the markets where Upjohn and Mylan currently compete and where significant product shortages have occurred (gatifloxacin ophthalmic solution and medroxyprogesterone acetate injectable solution), the Proposed Combination would eliminate an independent supplier. Customers have indicated that preserving competition between Upjohn and Mylan, particularly in markets prone to shortages, is important to maintaining adequate supplies and competitive prices.

In addition, the Proposed Combination likely would delay or forego the introduction of beneficial competition, and subsequent price decreases, by eliminating future competition in the markets for generic levothyroxine sodium tablets, sucralfate tablets, and varenicline tartrate tablets.

Absent the Consent Agreement, the Proposed Combination would eliminate significant current and future competition between the parties and likely cause U.S. consumers to pay higher prices for the aforementioned generic pharmaceutical products.

IV. The Consent Agreement and Order

The proposed Order effectively remedies the competitive concerns raised by the Proposed Combination for the ten generic pharmaceutical product areas at issue. Pursuant to the proposed Order, the parties are required to divest to Prasco Upjohn's authorized generic rights and assets related to six products. The proposed Order also requires the parties to divest Mylan's rights and assets related to eplerenone tablets to Prasco. The parties must accomplish these divestitures and relinquish their rights no later than ten days after the Proposed Combination is consummated. The proposed Order further allows the Commission to appoint a trustee in the event the parties fail to divest the products.

Further, the proposed Order requires prior Commission approval before Upjohn, Mylan, or Viatriis may gain an interest in, or exercise control over, any third party's rights to the following products: (1) Levothyroxine sodium tablets, (2) sucralfate tablets, and (3) varenicline tartrate tablets.

The Commission's goal in evaluating possible purchasers of divested assets is to maintain the competitive environment that existed prior to the Proposed Combination. Prasco is a capable purchaser with management and employees who have experience marketing and distributing generic pharmaceutical products. It will be able

to replicate the competition otherwise lost from the Proposed Combination.

The proposed Order contains several provisions to help ensure that the divestitures are successful. As to the products and rights being divested to Prasco, generic drug manufacturing will continue to be performed by the same entity as prior to the Proposed Combination, reducing the risk of any interruption in supply to Prasco. In some instances, Pfizer—which will be an independent entity, separate from Viatriis after the Proposed Combination—will serve as Prasco's contract manufacturer, allowing Prasco to step into the shoes of Upjohn/Greenstone. Should Prasco decide to move manufacturing to another contract manufacturer, the proposed Order requires the parties to provide transitional services to assist Prasco or its designated contract manufacturer in establishing manufacturing capabilities and securing all necessary FDA approvals. These transitional services include technical assistance to manufacture the currently marketed products in substantially the same manner and quality employed or achieved by the parties. To the extent that Pfizer will manufacture relevant products on behalf of both Viatriis and Prasco, the proposed Order requires that supply to Prasco is provided at a pre-determined cost and is prioritized over supply to Viatriis. For amlodipine besylate/atorvastatin calcium tablets, Viatriis will provide the active pharmaceutical ingredient ("API") used in Prasco's product. The proposed Order requires that Viatriis provide Prasco with API at a pre-determined cost and that it prioritizes Prasco's use of API over its own. Moreover, the proposed Order requires a firewall between Viatriis's API business and its commercial business to prevent the sharing of commercially sensitive information. Under the proposed Order, the Commission also will appoint two Monitors.

The purpose of this analysis is to facilitate public comment on the Consent Agreement, and it is not intended to constitute an official interpretation of the proposed Order or to modify its terms in any way.

By direction of the Commission, Commissioner Chopra and Commissioner Slaughter dissenting.

April J. Tabor,
Acting Secretary.

Statement of Commissioner Christine S. Wilson

Today, the Commission announces that it has voted 3–2 to issue a complaint and accept a settlement to

remedy the threats to competition arising from Mylan's proposed acquisition of Pfizer's off-patent drug business.

The experienced staff of the Federal Trade Commission thoroughly investigated all cognizable theories of harm to competition during more than a year of review. Their extensive investigation put to rest some concerns and produced grounds for other concerns. Staff negotiated comprehensive remedies to address the potential anticompetitive effects identified during their exhaustive investigation—as they have done in many transactions in the pharmaceutical sector, including Bristol-Myers Squibb/Celgene and AbbVie/Allergan. Yet, as Commissioners Slaughter and Chopra did in those merger reviews, they are again opposing the settlement of this enforcement action.

Prices for pharmaceuticals and biologics deserve the attention of the American public and the federal government. As I stated in connection with the announcement of the FTC's settlement with Bristol-Myers and Celgene, within its limited civil authority as a competition agency, the Commission vigorously pursues a comprehensive agenda to address anticompetitive mergers and unlawful conduct in the pharmaceutical industry.¹ I continue to encourage those government entities with the appropriate mandates to fix the many problems in this sector that lie beyond our jurisdiction.

Dissenting Statement of Commissioner Rohit Chopra Joined by Commissioner Rebecca Kelly Slaughter

Summary

- The FTC's record when it comes to reviewing pharmaceutical mergers suggests that the agency will simply never seek to block a merger. Instead, the agency's approach is to strike narrow settlements. This encourages market actors to propose even more unlawful mergers.
- Both Pfizer and Mylan have been accused of collusion in the generic drug business. We must assess whether this merger will enhance their ability to conspire and collude.
- Rajiv Malik, who will be president of the merged entity, is currently a defendant charged with antitrust

¹ Statement of Commissioner Christine S. Wilson, *In the Matter of Bristol-Myers Squibb Company/Celgene Corporation*, File No. 191–0061, Nov. 15, 2019, available at https://www.ftc.gov/system/files/documents/public_statements/1554278/bms-celgene-wilson-statement.pdf.

misconduct. The Commission's silence about his role is deeply problematic.

Drug prices are out of control, and in too many instances, are out of reach for patients who depend on them. Competition from generic drugs pushes down high prices. That's why it's critical to combat abuse of intellectual property that allows branded drug makers to block generic entry. But we should also be deeply concerned that patients can't reap the full benefits from generic competition, given the alleged collusion in the generic drug industry to drive up prices. Any investigation of massive mergers in the generic business must take this into account.

Today, the Federal Trade Commission has voted to settle allegations that Mylan's (NASDAQ: MYL) proposed \$12 billion acquisition of Pfizer's (NYSE: PFE) generic drug business is unlawful.¹ The combined firm would become the largest generic pharmaceutical firm in the world and offer approximately 3,000 drug products that treat a broad range of diseases and conditions.² The FTC's proposed settlement requires divestiture of seven individual products, as well as other provisions.

When it comes to pharmaceutical mergers, I am unable to identify a single instance in recent history where the agency has filed a complaint in federal court seeking to halt a prescription drug company merger. This lack of litigation creates the strong impression that the FTC simply looks to strike settlement deals involving individual product divestitures. Virtually every market participant I have spoken to in this industry believes that there is simply no risk of the FTC blocking an unlawful pharmaceutical merger outright.

I respectfully disagree with the status quo approach the Commission applied to this pharmaceutical merger. The use here is especially concerning, since both firms and two of Mylan's top executives have been accused of a wide-ranging price fixing and market allocation conspiracy in the generic drug

industry.³ With an expanded empire of generic drug products, these alleged antitrust crimes may be even easier to perpetrate by the new entity.⁴

In this statement, I focus on how mergers involving companies competing across a large number of product lines can exacerbate the risk of collusive conspiracies, particularly in industries where middlemen may not have an incentive to keep prices low.⁵ I also focus on issues we must always confront. For example, the Commission should always look to testimony from top executives at companies proposing to merge in order to fully understand the range of potential effects on competition. The Commission can only make a conclusion about the risk of collusion and any impacts on competition when it has a full range of data and evidence.

Conditions for Collusion

When competitors enter into agreements to fix prices, rig bids, and divvy up markets, they can face civil and criminal charges. Pfizer and Mylan are defendants in several state attorneys general and private plaintiff lawsuits alleging market allocation and price fixing in the generic drug industry.⁶ They are also under investigation for criminal market allocation and price fixing by the Department of Justice.⁷ Over thirty additional generic drug companies are defendants in the same state attorneys general suits, including

³ See Compl., *Connecticut v. Teva Pharms. USA, Inc.*, Case No. 3:19-cv-00710 (D. Conn. filed May 10, 2019) ¶ 50; *In re Generic Pharms. Pricing Antitrust Litig.* ¶ 34, Civ. Action No. 17-3768 (E.D. Pa. filed June 15, 2018).

⁴ The Department of Justice also charged Teva with criminally conspiring to fix prices, rig bids, and allocate customers for generic drugs. Five previous corporate cases were resolved by deferred prosecution agreements; Teva and its co-conspirator Glenmark are awaiting trial. Four executives have also been charged; three have entered guilty pleas, and one is awaiting trial. See Press Release, Dep't. of Just., Seventh Generic Drug Manufacturer Is Charged In Ongoing Criminal Antitrust Investigation (Aug. 25, 2020), <https://www.justice.gov/opa/pr/seventh-generic-drug-manufacturer-charged-ongoing-criminal-antitrust-investigation>.

⁵ Most generic drugs are sold by their manufacturers to group purchasing organizations and large retail purchasers, who negotiate pricing contracts for their members that ultimately purchase the products. These contracts typically have inflation-based provisions that allow for potentially greater compensation when prices are higher. See *In re Generic Pharms. Pricing Antitrust Litig.* ¶ 74.

⁶ See e.g., Pl. States' Consol. Am. Compl., *In re Generic Pharms. Pricing Antitrust Litig.*; Compl., *Connecticut v. Teva Pharms.*; Compl., *Connecticut v. Sandoz, Inc.*, Civ. Action No. 3:20-cv-802 (D. Conn. filed June 10, 2020).

⁷ See Pfizer Inc., Current Report (Form 8-K) (Aug. 6, 2020) at 175; Mylan N.V., Annual Report (Form 10-K) (Dec. 31, 2019) at 153.

well-known drug firms Sandoz, Actavis, Teva, and Allergan, among others. Patients have allegedly paid many billions of dollars in overcharges for the generic drugs involved, causing a significant negative impact on our national health and economy.⁸

Typically, collusion is easier to pull off when a market has only a few big players, since coordination is more difficult with more actors.⁹ However, there are many generic drug companies that operate in the United States. So why might there be widespread misconduct?

One potential explanation is that these companies compete with each other in multiple different product markets. The enormous profit potential for these firms from collusion likely contributes to their incentives to engage in mutually beneficial coordination. By trading favorable competitive terms in one market for favorable competitive terms in another market, it may be easier for competing firms to reach mutually beneficial terms of trade and punish each other for any deviations.¹⁰

Pfizer and Mylan allegedly did just that.¹¹ In addition to colluding within individual generic drug product markets, Pfizer's Greenstone division, Mylan, and others are charged with trading customers across *different* drug markets.¹² They allegedly allowed price increases on generic drugs without competing, based on a quid pro quo from competitors on different drug products.¹³ Given these allegations, it is important that we closely investigate how this transaction could increase the ability of the merged entity to engage in similar—or even more harmful—collusive conduct. For example, the merged entity would become the top supplier of generic drugs by global revenues, with an enormous number of

products and a broad range of competitors with which to engage in *quid pro quo* collusive arrangements.¹⁴ With more generic drugs in the hands of one competitor, it may be easier to form a cartel and punish those who don't adhere to its terms. Despite this risk, the Commission's analysis is silent with respect to the alleged price fixing conduct.¹⁵

The FTC often acts without the benefit of the experience of other law enforcement partners.¹⁶ In all matters, the Commission should avoid a go-it-alone approach and collaborate with other agencies to help shed light on the mechanisms involved in the allegations. Together, we should closely assess whether the likelihood of harm increases post-merger.

Investigating Executives

In any matter where a company has a history of potential wrongdoing, a key method to determine the motivations for a merger and to predict how it will affect competition is to seek sworn testimony from key executives. This is especially critical to understand how sales, pricing, and market forces are working. This evidence is also helpful if the agency must prepare a lawsuit.

While filings submitted by merging parties shed light on many aspects of a transaction, they do not always provide a complete picture of the deal rationale, pricing models, and boardroom behavior. The state allegations of price fixing and market allocation make clear that individual executives play a key role in sales and price setting, so it is critical that we fully understand this element of the competitive process. For example, what is their involvement in developing a pricing model? Do they approve deviations from this pricing model? How do they decide which new markets to enter? In what contexts do they interact with their competitors? There are a long list of questions that are

absolutely essential in an inquiry like this.

In this transaction, one of the alleged masterminds of the ongoing price fixing and market allocation schemes is Rajiv Malik, Mylan's current president, who is a named defendant in one of the state lawsuits.¹⁷ A second Mylan executive, Vice President of Sales James Nesta, is also a named defendant in one of the cases.¹⁸ The merging parties have publicly announced that Mr. Malik will retain the top executive role in the expanded generic drug empire, if the transaction closes.¹⁹ As president, he will be in charge of the merged entity's sales and marketing operations.²⁰ He will also serve on the merged company's board.²¹

Mr. Malik's role in the alleged price fixing scheme is significant. He allegedly conceived and directed many of the schemes.²² In one example, he is alleged to have agreed to cede market share in one market to a specific competitor in exchange for an agreement from that competitor to allow Mylan to enter a different market without competition.²³

Despite the alarm bells raised by Mr. Malik's planned role in the merged firm, the Commission's analysis does not discuss his involvement in the ongoing price fixing and market allocation allegations in the industry or his plans for the company. In my view, the Commission owes the public a clear explanation about Mr. Malik's role. In matters like this, it is critical that the Commission rely on a wide range of data and evidence, including testimony from key executives.²⁴

Conclusion

I am concerned that executives in the pharmaceutical industry routinely propose anticompetitive mergers without any fear that their transactions will ever be blocked. In my view, the status quo approach of seeking settlements through divestitures of

individual products is myopic and misses some of the fundamental elements of how firms compete in this industry. I am also not aware of any instance where the Commission publicly relied on the testimony under oath of a pharmaceutical executive in approving a pharmaceutical divestiture settlement.

Unless we change our approach, anticompetitive mergers in the pharmaceutical industry will continue unabated, and we will all suffer for it. I appreciate the diligence of our staff, who work at the direction of the Commission. Unfortunately, the directives of the Commission are deeply flawed, favoring routine over rigor. For all these reasons, I respectfully dissent.

BILLING CODE 6750-01-P

FEDERAL TRADE COMMISSION

Agency Information Collection Activities; Proposed Collection; Comment Request; Extension

AGENCY: Federal Trade Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 ("PRA"), the Federal Trade Commission ("FTC" or "Commission") is seeking public comment on its proposal to extend for an additional three years the Office of Management and Budget clearance for information collection requirements in its rule governing Care Labeling of Textile Wearing Apparel and Certain Piece Goods As Amended ("Care Labeling Rule"). The current clearance expires on May 31, 2021.

DATES: Comments must be filed by January 11, 2021.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the **SUPPLEMENTARY INFORMATION** section below. Write "Care Labeling Rule: FTC File No. P072108," on your comment and file your comment online at <https://www.regulations.gov>, by following the instructions on the web-based form. If you prefer to file your comment on paper, mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC-5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610 (Annex J), Washington, DC 20024.

²⁴ This is particularly important in industries where the Commission cannot rely on evidence and testimony from customers who act as middlemen. We know from the allegations in the state attorneys general lawsuits that drug wholesalers and large retailers allegedly benefit when generic drug prices are higher. These firms have contractual provisions allowing for potentially greater compensation when prices are higher. *Id.* ¶¶ 71-75.

FOR FURTHER INFORMATION CONTACT: Hampton Newsome, Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, Mail Code CC-9528, 600 Pennsylvania Ave. NW, Washington, DC 20580, (202) 326-2889.

SUPPLEMENTARY INFORMATION: *Title of Collection:* Care Labeling of Textile Wearing Apparel and Certain Piece Goods As Amended, 16 CFR 423.

OMB Control Number: 3084-0103.

Type of Review: Extension of currently approved collection.

Affected Public: Private Sector: Businesses and other for-profit entities.

Estimated Annual Burden Hours: 27,489,476 hours.

Estimated Annual Labor Costs: \$187,184,518.

Abstract: The Care Labeling Rule requires manufacturers and importers of textile wearing apparel and certain piece goods to attach labels to their products disclosing the care needed for the ordinary use of the product. The Rule also requires manufacturers or importers to possess a reasonable basis for care instructions, and allows the use of approved care symbols in lieu of words to disclose those instructions.

Burden Statement: Staff estimates that approximately 10,744 manufacturers or importers of textile apparel, producing about 18.4 billion textile garments annually, are subject to the Rule's disclosure requirements. Staff estimates the burden of determining care instructions to be 100 hours each year per firm, for a cumulative total of

1,074,400 hours. Staff further estimates that the burden of drafting and providing labels is 80 hours each year per firm, for a total of 859,520 hours. Staff believes that the process of attaching labels is fully automated and integrated into other production steps for about 50 percent (approximately, 9.2 billion) of the approximately 18.4 billion garments that are required to have care instructions on permanent labels. For the remaining 9.2 billion items, the process is semi-automated and requires an average of approximately ten seconds per item, for a total of 25,555,556 hours per year. Thus, the total estimated annual burden for all firms is 27,489,476 hours.

The chart below summarizes the total estimated costs.

Task	Hourly rate ¹	Burden hours	Labor cost
Determine care instructions	\$29.00	1,074,400	\$31,157,600
Draft and order labels	18.00	859,520	15,471,360
Attach labels	≈ 5.50	25,555,556	140,555,558
Total			187,184,518

Staff believes that there are no current start-up costs or other capital costs associated with the Care Labeling Rule. Because the labeling of textile products has been an integral part of the manufacturing process for decades, manufacturers have in place the capital equipment necessary to comply with the Rule's labeling requirements. Based on knowledge of the industry, staff believes that much of the information required by the Rule would be included on the

product label even absent those requirements.

Request for Comment: Pursuant to Section 3506(c)(2)(A) of the PRA, the FTC invites comments on: (1) Whether the disclosure requirements are necessary, including whether the information will be practically useful; (2) the accuracy of our burden estimates, including whether the methodology and assumptions used are valid; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of providing the required information to consumers. All comments should be filed as prescribed in the **ADDRESSES** section above, and must be received on or before January 11, 2021.

If you file your comment on paper, write "Care Labeling Rule: FTC File No. P072108" on your comment and on the envelope, and mail your comment to the following address: Federal Trade Commission, Office of the Secretary, 600 Pennsylvania Avenue NW, Suite CC-5610 (Annex J), Washington, DC 20580, or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Constitution Center, 400 7th Street SW, 5th Floor, Suite 5610, Washington, DC 20024. If possible, please submit your paper comment to the Commission by courier or overnight service.

Because your comment will be placed on the public record, you are solely responsible for making sure that your comment does not include any sensitive or confidential information. In particular, your comment should not include any sensitive personal information, such as your or anyone else's Social Security number; date of birth; driver's license number or other state identification number, or foreign country equivalent; passport number; financial account number; or credit or debit card number. You are also solely responsible for making sure that your comment does not include any sensitive health information, such as medical records or other individually identifiable health information. In addition, your comment should not include any "trade secret or any commercial or financial information which . . . is privileged or

¹ All hourly rates except for "Attach labels" are rounded to the nearest dollar and drawn from the U.S. Dep't of Labor, Bureau of Labor Statistics, "Table 1. National employment and wage data from the Occupational Employment Statistics survey by occupation, May 2019," at <https://www.bls.gov/news.release/ocwage.t01.htm>. The hourly labor cost estimate for determining care instructions is based on mean hourly rates for Office and Administrative Support Supervisors and the estimate for drafting and ordering labels is based on mean hourly rates for Information and Record Clerks.

² For imported products, the labels generally are attached in the country where the products are manufactured. According to information compiled by an industry trade association using data from the U.S. Department of Commerce, International Trade Administration and the U.S. Census Bureau, approximately 97.5% of apparel purchased in the United States is imported. With the remaining 2.5% attributable to U.S. production at an approximate domestic hourly wage of \$12 to attach labels (derived from the U.S. Dep't of Labor, Bureau of Labor Statistics, "Occupational Employment Statistics—May 2019" which is cited in footnote 1), staff has calculated a weighted average hourly wage of \$5.50 per hour attributable to U.S. and foreign labor combined. Wages in major textile exporting countries, factored into the above hourly wage estimate, were based on data from the U.S. Department of Labor, Bureau of Labor Statistics, available at: <http://www.bls.gov/fls/#compensation>.

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before January 11, 2021. Write "Care Labeling Rule: FTC File No. P072108" on your comment. Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comments online. To make sure that the Commission considers your online comment, you must file it through the <https://www.regulations.gov> website by following the instructions on the web-based form provided. Your comment, including your name and your state—will be placed on the public record of this proceeding, including the <https://www.regulations.gov> website.

confidential”—as provided by Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2)—including in particular competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

Comments containing material for which confidential treatment is requested must be filed in paper form, must be clearly labeled “Confidential,” and must comply with FTC Rule 4.9(c). In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. See FTC Rule 4.9(c). Your comment will be kept confidential only if the General Counsel grants your request in accordance with the law and the public interest. Once your comment has been posted on the public FTC website—as legally required by FTC Rule 4.9(b)—we cannot redact or remove your comment from the FTC website, unless you submit a confidentiality request that meets the requirements for such treatment under FTC Rule 4.9(c), and the General Counsel grants that request.

The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before January 11, 2021. For information on the Commission’s privacy policy, including routine uses permitted by the Privacy Act, see <https://www.ftc.gov/site-information/privacy-policy>.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Supplemental Evidence and Data Request on Malnutrition in Hospitalized Adults

AGENCY: Agency for Healthcare Research and Quality (AHRQ), HHS.

ACTION: Request for supplemental evidence and data submissions.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) is seeking scientific information submissions from

the public. Scientific information is being solicited to inform our review on *Malnutrition in Hospitalized Adults*, which is currently being conducted by the AHRQ’s Evidence-based Practice Centers (EPC) Program. Access to published and unpublished pertinent scientific information will improve the quality of this review.

DATES: *Submission Deadline* on or before December 14, 2020.

ADDRESSES:

Email submissions: epc@ahrq.hhs.gov.

Print submissions:

Mailing Address: Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E53A, Rockville, MD 20857.

Shipping Address (FedEx, UPS, etc.): Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E77D, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Jenae Bennis, Telephone: 301–427–1496 or Email: epc@ahrq.hhs.gov.

SUPPLEMENTARY INFORMATION: The Agency for Healthcare Research and Quality has commissioned the Evidence-based Practice Centers (EPC) Program to complete a review of the evidence for Malnutrition in Hospitalized Adults. AHRQ is conducting this systematic review pursuant to Section 902 of the Public Health Service Act, 42 U.S.C. 299a.

The EPC Program is dedicated to identifying as many studies as possible that are relevant to the questions for each of its reviews. In order to do so, we are supplementing the usual manual and electronic database searches of the literature by requesting information from the public (e.g., details of studies conducted). We are looking for studies that report on *Malnutrition in Hospitalized Adults*, including those that describe adverse events. The entire research protocol is available online at: <https://effectivehealthcare.ahrq.gov/products/malnutrition-hospitalized-adults/protocol>.

This is to notify the public that the EPC Program would find the following information on *Malnutrition in Hospitalized Adults* helpful:

- A list of completed studies that your organization has sponsored for this indication. In the list, please *indicate whether results are available on ClinicalTrials.gov along with the ClinicalTrials.gov trial number.*

- *For completed studies that do not have results on ClinicalTrials.gov*, a summary, including the following elements: Study number, study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, primary and secondary outcomes, baseline characteristics, number of patients screened/eligible/enrolled/lost to follow-up/withdrawn/analyzed, effectiveness/efficacy, and safety results.

- *A list of ongoing studies that your organization has sponsored for this indication.* In the list, please provide the ClinicalTrials.gov trial number or, if the trial is not registered, the protocol for the study including a study number, the study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, and primary and secondary outcomes.

- Description of whether the above studies constitute *ALL Phase II and above clinical trials* sponsored by your organization for this indication and an index outlining the relevant information in each submitted file.

Your contribution is very beneficial to the Program. Materials submitted must be publicly available or able to be made public. Materials that are considered confidential; marketing materials; study types not included in the review; or information on indications not included in the review cannot be used by the EPC Program. This is a voluntary request for information, and all costs for complying with this request must be borne by the submitter.

The draft of this review will be posted on AHRQ’s EPC Program website and available for public comment for a period of 4 weeks. If you would like to be notified when the draft is posted, please sign up for the email list at: <https://www.effectivehealthcare.ahrq.gov/email-updates>.

The systematic review will answer the following questions. This information is provided as background. AHRQ is not requesting that the public provide answers to these questions.

Key Questions (KQs)

Key Question 1. What is the association between malnutrition and clinical outcomes among hospitalized patients?

a. How do outcomes vary depending on measures or tools used to detect malnutrition?

b. Are patient-related risk factors, such as increased age or certain pre-existing health conditions, associated with poorer clinical outcomes?

Key Question 2. What is the effectiveness of screening or diagnostic assessment for malnutrition among hospitalized adults?

a. In studies that report on clinical outcomes, what is the diagnostic accuracy of screening or diagnostic assessment for malnutrition?

b. In studies that report on clinical outcomes, what is the effectiveness of screening or diagnostic assessment on measures of nutrition (nutritional stores)?

c. What is the impact of screening or diagnostic assessment on clinical outcomes?

Key Question 3. Among patients diagnosed with malnutrition, what is the effectiveness of hospital-initiated interventions used to treat malnutrition on clinical outcomes?

PICOTS (POPULATION, INTERVENTION, COMPARATOR, OUTCOME, TIMING, SETTING)

Medicare Program; Medicare Part B Monthly Actuarial Rates, Premium Rates, and Annual Deductible Beginning January 1, 2021

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.
ACTION: Notice.

SUMMARY: This notice announces the monthly actuarial rates for aged (age 65 and over) and disabled (under age 65) beneficiaries enrolled in Part B of the Medicare Supplementary Medical Insurance (SMI) program beginning January 1, 2021. In addition, this notice announces the monthly premium for aged and disabled beneficiaries, the deductible for 2021, and the income-related monthly adjustment amounts to be paid by beneficiaries with modified adjusted gross income above certain threshold amounts. The monthly actuarial rates for 2021 are \$291.00 for aged enrollees and \$349.90 for disabled enrollees. The standard monthly Part B premium rate for all enrollees for 2021 is \$148.50, which is equal to 50 percent of the monthly actuarial rate for aged enrollees (or approximately 25 percent of the expected average total cost of Part B coverage for aged enrollees) plus the \$3.00 repayment amount required under current law. (The 2020 standard premium rate was \$144.60, which included the \$3.00 repayment amount.) The Part B deductible for 2021 is \$203.00 for all Part B beneficiaries. If a beneficiary has to pay an income-related monthly adjustment, he or she will have to pay a total monthly premium of about 35, 50, 65, 80 or 85 percent of the total cost of Part B coverage plus a repayment

amount of \$4.20, \$6.00, \$7.80, \$9.60 or \$10.20, respectively.

DATES: The premium and related amounts announced in this notice are effective on January 1, 2021.

FOR FURTHER INFORMATION CONTACT: M. Kent Clemens, (410) 786-6391.

SUPPLEMENTARY INFORMATION:

I. Background

Part B is the voluntary portion of the Medicare program that pays all or part of the costs for physicians' services; outpatient hospital services; certain home health services; services furnished by rural health clinics, ambulatory surgical centers, and comprehensive outpatient rehabilitation facilities; and certain other medical and health services not covered by Medicare Part A, Hospital Insurance. Medicare Part B is available to individuals who are entitled to Medicare Part A, as well as to U.S. residents who have attained age 65 and are citizens and to aliens who were lawfully admitted for permanent residence and have resided in the United States for 5 consecutive years. Part B requires enrollment and payment of monthly premiums, as described in 42 CFR part 407, subpart B, and part 408, respectively. The premiums paid by (or on behalf of) all enrollees fund approximately one-fourth of the total incurred costs, and transfers from the general fund of the Treasury pay approximately three-fourths of these costs.

The Secretary of the Department of Health and Human Services (the Secretary) is required by section 1839 of the Social Security Act (the Act) to announce the Part B monthly actuarial rates for aged and disabled beneficiaries as well as the monthly Part B premium. The Part B annual deductible is included because its determination is directly linked to the aged actuarial rate.

The monthly actuarial rates for aged and disabled enrollees are used to determine the correct amount of general revenue financing per beneficiary each month. These amounts, according to actuarial estimates, will equal, respectively, one-half of the expected average monthly cost of Part B for each aged enrollee (age 65 or over) and one-half of the expected average monthly

cost of Part B for each disabled enrollee (under age 65).

The Part B deductible to be paid by enrollees is also announced. Prior to the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (MMA) (Pub. L. 108-173), the Part B deductible was set in statute. After setting the 2005 deductible amount at \$110, section 629 of the MMA (amending section 1833(b) of the Act) required that the Part B deductible be indexed beginning in 2006. The inflation factor to be used each year is the annual percentage increase in the Part B actuarial rate for enrollees age 65 and over. Specifically, the 2021 Part B deductible is calculated by multiplying the 2020 deductible by the ratio of the 2021 aged actuarial rate to the 2020 aged actuarial rate. The amount determined under this formula is then rounded to the nearest \$1.

The monthly Part B premium rate to be paid by aged and disabled enrollees is also announced. (Although the costs to the program per disabled enrollee are different than for the aged, the statute provides that the two groups pay the same premium amount.) Beginning with the passage of section 203 of the Social Security Amendments of 1972 (Pub. L. 92-603), the premium rate, which was determined on a fiscal-year basis, was limited to the lesser of the actuarial rate for aged enrollees, or the current monthly premium rate increased by the same percentage as the most recent general increase in monthly Title II Social Security benefits.

However, the passage of section 124 of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA) (Pub. L. 97-248) suspended this premium determination process. Section 124 of TEFRA changed the premium basis to 50 percent of the monthly actuarial rate for aged enrollees (that is, 25 percent of program costs for aged enrollees). Section 606 of the Social Security Amendments of 1983 (Pub. L. 98-21), section 2302 of the Deficit Reduction Act of 1984 (DEFRA 84) (Pub. L. 98-369), section 9313 of the Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA 85) (Pub. L. 99-272), section 4080 of the Omnibus Budget Reconciliation Act of

1987 (OBRA 87) (Pub. L. 100–203), and section 6301 of the Omnibus Budget Reconciliation Act of 1989 (OBRA 89) (Pub. L. 101–239) extended the provision that the premium be based on 50 percent of the monthly actuarial rate for aged enrollees (that is, 25 percent of program costs for aged enrollees). This extension expired at the end of 1990.

The premium rate for 1991 through 1995 was legislated by section 1839(e)(1)(B) of the Act, as added by section 4301 of the Omnibus Budget Reconciliation Act of 1990 (OBRA 90) (Pub. L. 101–508). In January 1996, the premium determination basis would have reverted to the method established by the 1972 Social Security Act Amendments. However, section 13571 of the Omnibus Budget Reconciliation Act of 1993 (OBRA 93) (Pub. L. 103–66) changed the premium basis to 50 percent of the monthly actuarial rate for aged enrollees (that is, 25 percent of program costs for aged enrollees) for 1996 through 1998.

Section 4571 of the Balanced Budget Act of 1997 (BBA) (Pub. L. 105–33) permanently extended the provision that the premium be based on 50 percent of the monthly actuarial rate for aged enrollees (that is, 25 percent of program costs for aged enrollees).

The BBA included a further provision affecting the calculation of the Part B actuarial rates and premiums for 1998 through 2003. Section 4611 of the BBA modified the home health benefit payable under Part A for individuals enrolled in Part B. Under this section, beginning in 1998, expenditures for home health services not considered “post-institutional” are payable under Part B rather than Part A. However, section 4611(e)(1) of the BBA required that there be a transition from 1998 through 2002 for the aggregate amount of the expenditures transferred from Part A to Part B. Section 4611(e)(2) of the BBA also provided a specific yearly proportion for the transferred funds. The proportions were one-sixth for 1998, one-third for 1999, one-half for 2000, two-thirds for 2001, and five-sixths for 2002. For the purpose of determining the correct amount of financing from general revenues of the Federal Government, it was necessary to include only these transitional amounts in the monthly actuarial rates for both aged and disabled enrollees, rather than the total cost of the home health services being transferred.

Section 4611(e)(3) of the BBA also specified, for the purpose of determining the premium, that the monthly actuarial rate for enrollees age 65 and over be computed as though the transition would occur for 1998 through

2003 and that one-seventh of the cost be transferred in 1998, two-sevenths in 1999, three-sevenths in 2000, four-sevenths in 2001, five-sevenths in 2002, and six-sevenths in 2003. Therefore, the transition period for incorporating this home health transfer into the premium was 7 years while the transition period for including these services in the actuarial rate was 6 years.

Section 811 of the MMA, which amended section 1839 of the Act, requires that, starting on January 1, 2007, the Part B premium a beneficiary pays each month be based on his or her annual income. Specifically, if a beneficiary’s modified adjusted gross income is greater than the legislated threshold amounts (for 2021, \$88,000 for a beneficiary filing an individual income tax return and \$176,000 for a beneficiary filing a joint tax return), the beneficiary is responsible for a larger portion of the estimated total cost of Part B benefit coverage. In addition to the standard 25-percent premium, these beneficiaries now have to pay an income-related monthly adjustment amount. The MMA made no change to the actuarial rate calculation, and the standard premium, which will continue to be paid by beneficiaries whose modified adjusted gross income is below the applicable thresholds, still represents 25 percent of the estimated total cost to the program of Part B coverage for an aged enrollee. However, depending on income and tax filing status, a beneficiary can now be responsible for 35, 50, 65, 80, or 85 percent of the estimated total cost of Part B coverage, rather than 25 percent. Section 402 of the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Pub. L. 114–10) modified the income thresholds beginning in 2018, and section 53114 of the Bipartisan Budget Act of 2018 (BBA of 2018) (Pub. L. 115–123) further modified the income thresholds beginning in 2019. For years beginning in 2019, the BBA of 2018 established a new income threshold. If a beneficiary’s modified adjusted gross income is greater than or equal to \$500,000 for a beneficiary filing an individual income tax return and \$750,000 for a beneficiary filing a joint tax return, the beneficiary is responsible for 85 percent of the estimated total cost of Part B coverage. The BBA of 2018 specified that these new income threshold levels be inflation-adjusted beginning in 2028. The end result of the higher premium is that the Part B premium subsidy is reduced, and less general revenue financing is required, for beneficiaries with higher income because they are paying a larger share of

the total cost with their premium. That is, the premium subsidy continues to be approximately 75 percent for beneficiaries with income below the applicable income thresholds, but it will be reduced for beneficiaries with income above these thresholds. The MMA specified that there be a 5-year transition period to reach full implementation of this provision. However, section 5111 of the Deficit Reduction Act of 2005 (DRA) (Pub. L. 109–171) modified the transition to a 3-year period.

Section 4732(c) of the BBA added section 1933(c) of the Act, which required the Secretary to allocate money from the Part B trust fund to the state Medicaid programs for the purpose of providing Medicare Part B premium assistance from 1998 through 2002 for the low-income Medicaid beneficiaries who qualify under section 1933 of the Act. This allocation, while not a benefit expenditure, was an expenditure of the trust fund and was included in calculating the Part B actuarial rates through 2002. For 2003 through 2015, the expenditure was made from the trust fund because the allocation was temporarily extended. However, because the extension occurred after the financing was determined, the allocation was not included in the calculation of the financing rates for these years. Section 211 of MACRA permanently extended this expenditure, which is included in the calculation of the Part B actuarial rates for 2016 and subsequent years.

Another provision affecting the calculation of the Part B premium is section 1839(f) of the Act, as amended by section 211 of the Medicare Catastrophic Coverage Act of 1988 (MCCA 88) (Pub. L. 100–360). (The Medicare Catastrophic Coverage Repeal Act of 1989 (Pub. L. 101–234) did not repeal the revisions to section 1839(f) of the Act made by MCCA 88.) Section 1839(f) of the Act, referred to as the “hold-harmless” provision, provides that, if an individual is entitled to benefits under section 202 or 223 of the Act (the Old-Age and Survivors Insurance Benefit and the Disability Insurance Benefit, respectively) and has the Part B premium deducted from these benefit payments, the premium increase will be reduced, if necessary, to avoid causing a decrease in the individual’s net monthly payment. This decrease in payment occurs if the increase in the individual’s Social Security benefit due to the cost-of-living adjustment under section 215(i) of the Act is less than the increase in the premium. Specifically, the reduction in the premium amount applies if the individual is entitled to

benefits under section 202 or 223 of the Act for November and December of a particular year and the individual's Part B premiums for December and the following January are deducted from the respective month's section 202 or 223 benefits. The hold-harmless provision does not apply to beneficiaries who are required to pay an income-related monthly adjustment amount.

A check for benefits under section 202 or 223 of the Act is received in the month following the month for which the benefits are due. The Part B premium that is deducted from a particular check is the Part B payment for the month in which the check is received. Therefore, a benefit check for November is not received until December, but December's Part B premium has been deducted from it.

Generally, if a beneficiary qualifies for hold-harmless protection, the reduced premium for the individual for that January and for each of the succeeding 11 months is the greater of either—

- The monthly premium for January reduced as necessary to make the December monthly benefits, after the deduction of the Part B premium for January, at least equal to the preceding November's monthly benefits, after the deduction of the Part B premium for December; or
- The monthly premium for that individual for that December.

In determining the premium limitations under section 1839(f) of the Act, the monthly benefits to which an individual is entitled under section 202 or 223 of the Act do not include retroactive adjustments or payments and deductions on account of work. Also, once the monthly premium amount is established under section 1839(f) of the Act, it will not be changed during the year even if there are retroactive adjustments or payments and deductions on account of work that apply to the individual's monthly benefits.

Individuals who have enrolled in Part B late or who have re-enrolled after the termination of a coverage period are subject to an increased premium under section 1839(b) of the Act. The increase is a percentage of the premium and is based on the new premium rate before

any reductions under section 1839(f) of the Act are made.

Section 1839 of the Act, as amended by section 601(a) of the Bipartisan Budget Act of 2015 (Pub. L. 114-74), specified that the 2016 actuarial rate for enrollees age 65 and older be determined as if the hold-harmless provision did not apply. The premium revenue that was lost by using the resulting lower premium (excluding the forgone income-related premium revenue) was replaced by a transfer of general revenue from the Treasury, which will be repaid over time to the general fund.

Similarly, section 1839 of the Act, as amended by section 2401 of the Continuing Appropriations Act, 2021 and Other Extensions Act (Pub. L. 116-159), specifies that the 2021 actuarial rate for enrollees age 65 and older be determined as the sum of the 2020 actuarial rate for enrollees age 65 and older and one-fourth of the difference between the 2020 actuarial rate and the preliminary 2021 actuarial rate (as determined by the Secretary of HHS) for such enrollees. The premium revenue lost by using the resulting lower premium (excluding the forgone income-related premium revenue) will be replaced by a transfer of general revenue from the Treasury, which will be repaid over time.

Starting in 2016, in order to repay the balance due (which includes the transfer amounts and the forgone income-related premium revenue from the Bipartisan Budget Act of 2015 and the Continuing Appropriations Act, 2021 and Other Extensions Act), the Part B premium otherwise determined will be increased by \$3.00. These repayment amounts will be added to the Part B premium otherwise determined each year and will be paid back to the general fund of the Treasury, and they will continue until the balance due is paid back.

High-income enrollees pay the \$3 repayment amount plus an additional \$1.20, \$3.00, \$4.80, \$6.60, or \$7.20 in repayment as part of the income-related monthly adjustment amount (IRMAA) premium dollars, which reduce (dollar for dollar) the amount of general revenue received by Part B from the general fund of the Treasury. Because of

this general revenue offset, the repayment IRMAA premium dollars are not included in the direct repayments made to the general fund of the Treasury from Part B in order to avoid a double repayment. (Only the \$3.00 monthly repayment amounts are included in the direct repayments).

These repayment amounts will continue until the balance due is zero. (In the final year of the repayment, the additional amounts may be modified to avoid an overpayment.) The repayment amounts (excluding those for high-income enrollees) are subject to the hold-harmless provision. The original balance due was \$9,066,409,000, consisting of \$1,625,761,000 in forgone income-related premium revenue plus a transfer amount of \$7,440,648,000 from the provisions of the Bipartisan Budget Act of 2015. The increase in the balance due in 2021 will be \$8,799,829,000, consisting of \$946,046,000 in forgone income-related premium income plus a transfer amount of \$7,853,783,000 from the provisions of the Continuing Appropriations Act, 2021 and Other Extensions Act. An estimated \$6,761,022,000 will have been collected for repayment to the general fund by the end of 2020.

II. Provisions of the Notice

A. Notice of Medicare Part B Monthly Actuarial Rates, Monthly Premium Rates, and Annual Deductible

The Medicare Part B monthly actuarial rates applicable for 2021 are \$291.00 for enrollees age 65 and over and \$349.90 for disabled enrollees under age 65. In section II.B. of this notice, we present the actuarial assumptions and bases from which these rates are derived. The Part B standard monthly premium rate for all enrollees for 2021 is \$148.50.

The following are the 2021 Part B monthly premium rates to be paid by (or on behalf of) beneficiaries who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately who lived apart from their spouses for the entire taxable year), or joint tax returns.

Beneficiaries who file individual tax returns with income:	Beneficiaries who file joint tax returns with income:	Income-related monthly adjustment amount	Total monthly premium amount
Less than or equal to \$88,000	Less than or equal to \$176,000	\$0.00	\$148.50
Greater than \$88,000 and less than or equal to \$111,000	Greater than \$176,000 and less than or equal to \$222,000.	59.40	207.90

Beneficiaries who file individual tax returns with income:	Beneficiaries who file joint tax returns with income:	Income-related monthly adjustment amount	Total monthly premium amount
Greater than \$111,000 and less than or equal to \$138,000.	Greater than \$222,000 and less than or equal to \$276,000.	148.50	297.00
Greater than \$138,000 and less than or equal to \$165,000.	Greater than \$276,000 and less than or equal to \$330,000.	237.60	386.10
Greater than \$165,000 and less than \$500,000	Greater than \$330,000 and less than \$750,000	326.70	475.20
Greater than or equal to \$500,000	Greater than or equal to \$750,000	356.40	504.90

In addition, the monthly premium rates to be paid by (or on behalf of) beneficiaries who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are as follows:

Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses:	Income-related monthly adjustment amount	Total monthly premium amount
Less than or equal to \$88,000	\$0.00	\$148.50
Greater than \$88,000 and less than \$412,000	326.70	475.20
Greater than or equal to \$412,000	356.40	504.90

The Part B annual deductible for 2021 is \$203.00 for all beneficiaries.

B. Statement of Actuarial Assumptions and Bases Employed in Determining the Monthly Actuarial Rates and the Monthly Premium Rate for Part B Beginning January 2021

The actuarial assumptions and bases used to determine the monthly actuarial rates and the monthly premium rates for Part B are established by the Centers for Medicare & Medicaid Services' Office of the Actuary. The estimates underlying these determinations are prepared by actuaries meeting the qualification standards and following the actuarial standards of practice established by the Actuarial Standards Board.

1. Actuarial Status of the Part B Account in the Supplementary Medical Insurance Trust Fund

Under section 1839 of the Act, the starting point for determining the standard monthly premium is the amount that would be necessary to

finance Part B on an incurred basis. This is the amount of income that would be sufficient to pay for services furnished during that year (including associated administrative costs) even though payment for some of these services will not be made until after the close of the year. The portion of income required to cover benefits not paid until after the close of the year is added to the trust fund and used when needed.

Because the premium rates are established prospectively, they are subject to projection error. Additionally, legislation enacted after the financing was established, but effective for the period in which the financing is set, may affect program costs. As a result, the income to the program may not equal incurred costs. Trust fund assets must therefore be maintained at a level that is adequate to cover an appropriate degree of variation between actual and projected costs, and the amount of incurred, but unpaid, expenses. Numerous factors determine what level of assets is appropriate to cover

variation between actual and projected costs. For 2021, the four most important of these factors are (1) the impact of the COVID-19 pandemic on program spending; (2) the difference from prior years between the actual performance of the program and estimates made at the time financing was established; (3) the likelihood and potential magnitude of expenditure changes resulting from enactment of legislation affecting Part B costs in a year subsequent to the establishment of financing for that year; and (4) the expected relationship between incurred and cash expenditures. The first factor, the impact of the pandemic on program spending, brings a higher-than-usual degree of uncertainty to projected costs for the 2021 Part B financing. The other three factors are analyzed on an ongoing basis, as the trends can vary over time.

Table 1 summarizes the estimated actuarial status of the trust fund as of the end of the financing period for 2019 and 2020.

TABLE 1—ESTIMATED ACTUARIAL STATUS OF THE PART B ACCOUNT IN THE SUPPLEMENTARY MEDICAL INSURANCE TRUST FUND AS OF THE END OF THE FINANCING PERIOD

Financing period ending	Assets (in millions)	Liabilities (in millions)	Assets less liabilities (in millions)
December 31, 2019	\$99,602	\$31,566	\$68,036
December 31, 2020	123,051	32,884	90,167

2. Monthly Actuarial Rate for Enrollees Age 65 and Older

The monthly actuarial rate for enrollees age 65 and older is one-half of the sum of monthly amounts for (1) the projected cost of benefits; and (2) administrative expenses for each enrollee age 65 and older, after adjustments to this sum to allow for interest earnings on assets in the trust fund and an adequate contingency margin. The contingency margin is an amount appropriate to provide for possible variation between actual and projected costs and to amortize any surplus assets or unfunded liabilities.

Section 1839 of the Act, as amended by section 2401 of the Continuing Appropriations Act, 2021 and Other Extensions Act (Pub. L. 116–159), specifies that the 2021 monthly actuarial rate for enrollees age 65 and older be determined as the sum of the 2020 monthly actuarial rate for enrollees age 65 and older and one-fourth of the difference between the 2020 monthly actuarial rate and the preliminary 2021 monthly actuarial rate (as determined by the Secretary of HHS) for such enrollees. The premium revenue lost by using the resulting lower premium (excluding the forgone income-related premium revenue) will be replaced by a transfer of general revenue from the Treasury, which will be repaid over time.

The preliminary monthly actuarial rate for enrollees age 65 and older for 2021 is determined by first establishing per enrollee costs by type of service from program data through 2020 and then projecting these costs for subsequent years. The projection factors used for financing periods from January 1, 2018 through December 31, 2021 are shown in Table 2. The 2020 monthly actuarial rate for enrollees age 65 and older is \$283.20, and the preliminary 2021 monthly actuarial rate for enrollees age 65 and older is \$314.30. In accordance with the provisions of the Continuing Appropriations Act, 2021 and Other Extensions Act, the 2021 monthly actuarial rate for enrollees age 65 and older is \$291.00 ($\$283.20 + 0.25 \times (314.30 - 283.20)$).

As indicated in Table 3, the projected per enrollee amount required to pay for one-half of the total of benefits and administrative costs for enrollees age 65 and over for 2021 is \$307.52. Based on current estimates, the assets at the end of 2020 are not sufficient to cover the amount of incurred, but unpaid, expenses, to provide for substantial variation between actual and projected costs, and to accommodate the unusually high degree of uncertainty due to the COVID–19 pandemic. Thus,

a positive contingency margin is needed to increase assets to a more appropriate level. The preliminary monthly actuarial rate of \$314.30 provides an adjustment of \$8.17 for a contingency margin and $-\$1.39$ for interest earnings.

The contingency margin for 2021 is affected by several factors. First, in response to the pandemic, about \$43 billion was paid out of the Part B account as part of the Accelerated and Advanced Payment (AAP) programs. Providers are to repay their AAP payments to Part B over time through reduced Part B claims payments. However, until the AAP payments have been repaid, the Part B account would not have the roughly \$43 billion in assets, and the financing for 2021 would need to be increased to restore the assets used to make these payments. The Continuing Appropriations Act, 2021 and Other Extensions Act requires that a transfer be made from the Treasury to Part B to restore the roughly \$43 billion in AAP payments paid out and specifies that any future AAP provider repayments be transferred to the Treasury. Because the 2021 Part B financing includes the assumption that roughly \$43 billion will be transferred from the Treasury to Part B before the end of calendar year 2020, the AAP payments do not impact contingency margin.

Second, in order to take into account the uncertainty and potential impact of the COVID–19 pandemic, assumptions were developed for testing and treatment for COVID–19, utilization of non-COVID-related care, potential costs for COVID–19 vaccines, and possible paths of the pandemic. Several Part B pandemic cost scenarios were developed based on these assumptions. The difference between the best-estimate pandemic scenario and the highest-cost pandemic scenario was used to establish the additional contingency margin needed to account for the potential costs and uncertainty from the pandemic.

Third, starting in 2011, manufacturers and importers of brand-name prescription drugs pay a fee that is allocated to the Part B account of the SMI trust. For 2021, the total of these brand-name drug fees is estimated to be \$2.8 billion. The contingency margin for 2021 has been reduced to account for this additional revenue.

The traditional goal for the Part B reserve has been that assets minus liabilities at the end of a year should represent between 15 and 20 percent of the following year's total incurred expenditures. To accomplish this goal, a 17-percent reserve ratio, which is a fully

adequate contingency reserve level, has been the normal target used to calculate the Part B premium. The financing rates for 2021 are set above the normal target due to the higher-than-usual uncertainty for 2021. The actuarial rate of \$291.00 per month for aged beneficiaries, as announced in this notice for 2021, reflects the combined effect of the factors and legislation previously described and the projected assumptions listed in Table 2.

3. Monthly Actuarial Rate for Disabled Enrollees

Disabled enrollees are those persons under age 65 who are enrolled in Part B because of entitlement to Social Security disability benefits for more than 24 months or because of entitlement to Medicare under the end-stage renal disease (ESRD) program. Projected monthly costs for disabled enrollees (other than those with ESRD) are prepared in a manner parallel to the projection for the aged using appropriate actuarial assumptions (see Table 2). Costs for the ESRD program are projected differently because of the different nature of services offered by the program.

As shown in Table 4, the projected per enrollee amount required to pay for one-half of the total of benefits and administrative costs for disabled enrollees for 2021 is \$377.23. The monthly actuarial rate of \$349.90 also provides an adjustment of $-\$1.61$ for interest earnings and $-\$25.72$ for a contingency margin, reflecting the same factors and legislation described previously for the aged actuarial rate at magnitudes appropriate to the disabled rate determination. Based on current estimates, the assets associated with the disabled Medicare beneficiaries at the end of 2020 are sufficient to cover the amount of incurred, but unpaid, expenses and to provide for a significant degree of variation between actual and projected costs. As noted for the aged actuarial rate, the 2021 contingency margin is set above the normal target level in order to accommodate the higher uncertainty due to the COVID–19 pandemic.

The actuarial rate of \$349.90 per month for disabled beneficiaries, as announced in this notice for 2021, reflects the combined net effect of the factors and legislation described previously for aged beneficiaries and the projection assumptions listed in Table 2.

4. Sensitivity Testing

Several factors contribute to uncertainty about future trends in medical care costs. It is appropriate to

test the adequacy of the rates using alternative cost growth rate assumptions. The results of those assumptions are shown in Table 5. One set represents increases that are higher and, therefore, more pessimistic than the current estimate. The other set represents increases that are lower and, therefore, more optimistic than the current estimate. The values for the alternative assumptions were determined from a statistical analysis of the historical variation in the respective increase factors. The historical variation may not be representative of the current level of uncertainty due to the COVID-19 pandemic.

As indicated in Table 5, the monthly actuarial rates would result in an excess of assets over liabilities of \$101,796 million by the end of December 2021 under the cost growth rate assumptions shown in Table 2 and under the

assumption that the provisions of current law are fully implemented. This result amounts to 21.6 percent of the estimated total incurred expenditures for the following year.

Assumptions that are somewhat more pessimistic (and that therefore test the adequacy of the assets to accommodate projection errors) produce a surplus of \$65,262 million by the end of December 2021 under current law, which amounts to 12.4 percent of the estimated total incurred expenditures for the following year. Under fairly optimistic assumptions, the monthly actuarial rates would result in a surplus of \$176,475 million by the end of December 2021, or 34.2 percent of the estimated total incurred expenditures for the following year.

The sensitivity analysis indicates that, in a typical year, the premium and general revenue financing established

for 2021, together with existing Part B account assets, would be adequate to cover estimated Part B costs for 2021 under current law, should actual costs prove to be somewhat greater than expected. However, the current level of uncertainty due to the pandemic may differ from the historical variation included in this analysis.

5. Premium Rates and Deductible

As determined in accordance with section 1839 of the Act, the following are the 2021 Part B monthly premium rates to be paid by beneficiaries who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately who lived apart from their spouses for the entire taxable year) or joint tax returns.

Beneficiaries who file individual tax returns with income:	Beneficiaries who file joint tax returns with income:	Income-related monthly adjustment amount	Total monthly premium amount
Less than or equal to \$88,000	Less than or equal to \$176,000	\$0.00	\$148.50
Greater than \$88,000 and less than or equal to \$111,000	Greater than \$176,000 and less than or equal to \$222,000.	59.40	207.90
Greater than \$111,000 and less than or equal to \$138,000.	Greater than \$222,000 and less than or equal to \$276,000.	148.50	297.00
Greater than \$138,000 and less than or equal to \$165,000.	Greater than \$276,000 and less than or equal to \$330,000.	237.60	386.10
Greater than \$165,000 and less than \$500,000	Greater than \$330,000 and less than \$750,000	326.70	475.20
Greater than or equal to \$500,000	Greater than or equal to \$750,000	356.40	504.90

In addition, the monthly premium rates to be paid by beneficiaries who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are as follows:

Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses:	Income-related monthly adjustment amount	Total monthly premium amount
Less than or equal to \$88,000	\$0.00	\$148.50
Greater than \$88,000 and less than \$412,000	326.70	475.20
Greater than or equal to \$412,000	356.40	504.90

TABLE 2—PROJECTION FACTORS¹ 12-MONTH PERIODS ENDING DECEMBER 31 OF 2018–2021
[In percent]

Calendar year	Physicians' services	Durable medical equipment	Carrier lab ²	Physician-administered drugs	Other carrier services ³	Outpatient hospital	Home health agency	Hospital lab ⁴	Other intermediary services ⁵	Managed care
Aged:										
2018	1.6	18.1	11.4	12.2	2.3	8.4	1.4	-1.0	7.6	7.4

Liabilities	\$31,566	\$35,245	\$38,826
Assets less liabilities	\$68,036	\$66,552	\$65,262
Ratio ¹	16.7%	13.7%	12.4%

¹ Ratio of assets less liabilities at the end of the year to the total incurred expenditures during the following year, expressed as a percent.

III. Collection of Information Requirements

This document does not impose information collection requirements—that is, reporting, recordkeeping, or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

IV. Regulatory Impact Analysis

A. Statement of Need

Section 1839 of the Act requires us to annually announce (that is, by September 30th of each year) the Part B monthly actuarial rates for aged and disabled beneficiaries as well as the monthly Part B premium. We also announce the Part B annual deductible because its determination is directly linked to the aged actuarial rate.

B. Overall Impact

We have examined the impacts of this notice as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96-354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995, Pub. L. 104-4), Executive Order 13132 on Federalism (August 4, 1999), the Congressional Review Act (5 U.S.C. 804(2)), and Executive Order 13771 on Reducing and Controlling Regulatory Costs (January 30, 2017).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic,

environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major notices with economically significant effects (\$100 million or more in any one year). The 2021 standard Part B premium of \$148.50 is \$3.90 higher than the 2020 premium of \$144.60. We estimate that this premium increase, for the approximately 59 million Part B enrollees in 2021, will have an annual effect on the economy of \$100 million or more. As a result, this notice is economically significant under section 3(f)(1) of Executive Order 12866 and is a major action as defined under the Congressional Review Act (5 U.S.C. 804(2)).

As discussed earlier, this notice announces that the monthly actuarial rates applicable for 2021 are \$291.00 for enrollees age 65 and over and \$349.90 for disabled enrollees under age 65. It also announces the 2021 monthly Part B premium rates to be paid by

beneficiaries who file either individual tax returns (and are single individuals, heads of households, qualifying widows or widowers with dependent children, or married individuals filing separately who lived apart from their spouses for the entire taxable year) or joint tax returns.

Beneficiaries who file individual tax returns with income:	Beneficiaries who file joint tax returns with income:	Income-related monthly adjustment amount	Total monthly premium amount
Less than or equal to \$88,000	Less than or equal to \$176,000	\$0.00	\$148.50
Greater than \$88,000 and less than or equal to \$111,000	Greater than \$176,000 and less than or equal to \$222,000.	59.40	207.90
Greater than \$111,000 and less than or equal to \$138,000.	Greater than \$222,000 and less than or equal to \$276,000.	148.50	297.00
Greater than \$138,000 and less than or equal to \$165,000.	Greater than \$276,000 and less than or equal to \$330,000.	237.60	386.10
Greater than \$165,000 and less than \$500,000	Greater than \$330,000 and less than \$750,000	326.70	475.20
Greater than or equal to \$500,000	Greater than or equal to \$750,000	356.40	504.90

In addition, the monthly premium rates to be paid by beneficiaries who are married and lived with their spouses at any time during the taxable year, but who file separate tax returns from their spouses, are also announced and listed in the following chart:

Beneficiaries who are married and lived with their spouses at any time during the year, but who file separate tax returns from their spouses:	Income-related monthly adjustment amount	Total monthly premium amount
Less than or equal to \$88,000	\$0.00	\$148.50
Greater than \$88,000 and less than \$412,000	326.70	475.20
Greater than or equal to \$412,000	356.40	504.90

The RFA requires agencies to analyze options for regulatory relief of small businesses, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Individuals and states are not included in the definition of a small entity. This notice announces the monthly actuarial rates for aged (age 65 and over) and disabled (under 65) beneficiaries enrolled in Part B of the Medicare SMI program beginning January 1, 2021. Also, this notice announces the monthly premium for aged and disabled beneficiaries as well as the income-related monthly adjustment amounts to be paid by beneficiaries with modified adjusted gross income above certain threshold amounts. As a result, we are not preparing an analysis for the RFA because the Secretary has determined that this notice will not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of

the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area and has fewer than 100 beds. As we discussed previously, we are not preparing an analysis for section 1102(b) of the Act because the Secretary has determined that this notice will not have a significant effect on a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any one year of \$100 million in 1995 dollars, updated annually for inflation. In 2020, that threshold is approximately \$156 million. Part B enrollees who are also enrolled in Medicaid have their monthly Part B premiums paid by Medicaid. The cost to each state Medicaid program from the 2021 premium increase is estimated to be less than the threshold. This notice does not impose mandates that will have a consequential effect of the threshold amount or more on state, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it publishes a proposed rule (and subsequent final rule) that imposes substantial direct compliance

costs on state and local governments, preempts state law, or otherwise has Federalism implications. We have determined that this notice does not significantly affect the rights, roles, and responsibilities of states. Accordingly, the requirements of Executive Order 13132 do not apply to this notice.

Executive Order 13771, titled “Reducing Regulation and Controlling Regulatory Costs,” was issued on January 30, 2017 (82 FR 9339, February 3, 2017). It has been determined that this notice is a transfer notice that does not impose more than de minimis costs and thus is not a regulatory action for the purposes of E.O. 13771.

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.

V. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment prior to a rule taking effect in accordance with section 1871 of the Act and section 553(b) of the Administrative Procedure Act (APA). Section 1871(a)(2) of the Act provides that no rule, requirement, or other statement of policy (other than a national coverage determination) that establishes or changes a substantive legal standard

governing the scope of benefits, the payment for services, or the eligibility of individuals, entities, or organizations to furnish or receive services or benefits under Medicare shall take effect unless it is promulgated through notice and comment rulemaking. Unless there is a statutory exception, section 1871(b)(1) of the Act generally requires the Secretary of the Department of Health and Human Services (the Secretary) to provide for notice of a proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment before establishing or changing a substantive legal standard regarding the matters enumerated by the statute. Similarly, under 5 U.S.C. 553(b) of the APA, the agency is required to publish a notice of proposed rulemaking in the **Federal Register** before a substantive rule takes effect. Section 553(d) of the APA and section 1871(e)(1)(B)(i) of the Act usually require a 30-day delay in effective date after issuance or publication of a rule, subject to exceptions. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the advance notice and comment requirement and the delay in effective date requirements. Sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act also provide exceptions from the notice and 60-day comment period and the 30-day delay in effective date. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act expressly authorize an agency to dispense with notice and comment rulemaking for good cause if the agency makes a finding that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest.

The annual updated amounts for the Part B monthly actuarial rates for aged and disabled beneficiaries, the Part B premium, and Part B deductible set forth in this notice do not establish or change a substantive legal standard regarding the matters enumerated by the statute or constitute a substantive rule that would be subject to the notice requirements in section 553(b) of the APA. However, to the extent that an opportunity for public notice and comment could be construed as required for this notice, we find good cause to waive this requirement.

Section 1839 of the Act requires the Secretary to determine the monthly actuarial rates for aged and disabled beneficiaries, as well as the monthly Part B premium (including the income-related monthly adjustment amounts to be paid by beneficiaries with modified adjusted gross income above certain threshold amounts), for each calendar year in accordance with the statutory

formulae, in September preceding the year to which they will apply. Further, the statute requires that the agency promulgate the Part B premium amount, in September preceding the year to which it will apply, and include a public statement setting forth the actuarial assumptions and bases employed by the Secretary in arriving at the amount of an adequate actuarial rate for enrollees age 65 and older. We include the Part B annual deductible, which is established pursuant to a specific formula described in section 1833(b) of the Act, because the determination of the amount is directly linked to the rate of increase in actuarial rate under section 1839(a)(1) of the Act. We have calculated the monthly actuarial rates for aged and disabled beneficiaries, the Part B deductible, and the monthly Part B premium as directed by the statute; since the statute establishes both when the monthly actuarial rates for aged and disabled beneficiaries and the monthly Part B premium must be published and the information that the Secretary must factor into those amounts, we do not have any discretion in that regard. We find notice and comment procedures to be unnecessary for this notice and we find good cause to waive such procedures under section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act, if such procedures may be construed to be required at all. Through this notice, we are simply notifying the public of the updates to the monthly actuarial rates for aged and disabled beneficiaries and the Part B deductible, as well as the monthly Part B premium amounts and the income-related monthly adjustment amounts to be paid by certain beneficiaries, in accordance with the statute, for CY 2021. As such, we also note that even if notice and comment procedures were required for this notice, for the previously stated reason, we would find good cause to waive the delay in effective date of the notice, as additional delay would be contrary to the public interest under section 1871(e)(1)(B)(ii) of the Act. Publication of this notice is consistent with section 1839 of the Act, and we believe that any potential delay in the effective date of the notice, if such delay were required at all, could cause unnecessary confusion both for the agency and Medicare beneficiaries.

Dated: October 30, 2020.

Seema Verma,
Administrator, Centers for Medicare & Medicaid Services.

Dated: November 2, 2020.

Alex M. Azar II,
Secretary, Department of Health and Human Services.

Medicare Program; CY 2021 Part A Premiums for the Uninsured Aged and for Certain Disabled Individuals Who Have Exhausted Other Entitlement

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces Medicare's Hospital Insurance (Part A) premium for uninsured enrollees in calendar year 2021. This premium is paid by enrollees age 65 and over who are not otherwise eligible for benefits under Medicare Part A (hereafter known as the "uninsured aged") and by certain individuals with disabilities who have exhausted other entitlement. The monthly Part A premium for the 12 months beginning January 1, 2021 for these individuals will be \$471. The premium for certain other individuals as described in this notice will be \$259.

DATES: The premium announced in this notice is effective on January 1, 2021.

FOR FURTHER INFORMATION CONTACT: Yaminee Thaker, (410) 786-7921.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1818 of the Social Security Act (the Act) provides for voluntary enrollment in the Medicare Hospital Insurance Program (Medicare Part A), subject to payment of a monthly premium, of certain persons aged 65 and older who are uninsured under the Old-Age, Survivors, and Disability Insurance (OASDI) program or the Railroad Retirement Act and do not otherwise meet the requirements for entitlement to Medicare Part A. These "uninsured aged" individuals are uninsured under the OASDI program or the Railroad Retirement Act, because they do not have 40 quarters of coverage under Title II of the Act (or are/were not

married to someone who did). (Persons insured under the OASDI program or the Railroad Retirement Act and certain others do not have to pay premiums for Medicare Part A.)

Section 1818A of the Act provides for voluntary enrollment in Medicare Part A, subject to payment of a monthly premium for certain individuals with disabilities who have exhausted other entitlement. These are individuals who were entitled to coverage due to a disabling impairment under section 226(b) of the Act, but who are no longer entitled to disability benefits and premium-free Medicare Part A coverage because they have gone back to work and their earnings exceed the statutorily defined “substantial gainful activity” amount (section 223(d)(4) of the Act).

Section 1818A(d)(2) of the Act specifies that the provisions relating to premiums under section 1818(d) through section 1818(f) of the Act for the aged will also apply to certain individuals with disabilities as described above.

Section 1818(d)(1) of the Act requires us to estimate, on an average per capita basis, the amount to be paid from the Federal Hospital Insurance Trust Fund for services incurred in the upcoming calendar year (CY) (including the associated administrative costs) on behalf of individuals aged 65 and over who will be entitled to benefits under Medicare Part A. We must then determine the monthly actuarial rate for the following year (the per capita amount estimated above divided by 12) and publish the dollar amount for the monthly premium in the succeeding CY. If the premium is not a multiple of \$1, the premium is rounded to the nearest multiple of \$1 (or, if it is a multiple of 50 cents but not of \$1, it is rounded to the next highest \$1).

Section 13508 of the Omnibus Budget Reconciliation Act of 1993 (Pub. L. 103–66) amended section 1818(d) of the Act to provide for a reduction in the premium amount for certain voluntary enrollees (sections 1818 and 1818A of the Act). The reduction applies to an individual who is eligible to buy into the Medicare Part A program and who, as of the last day of the previous month:

- Had at least 30 quarters of coverage under Title II of the Act;
- Was married, and had been married for the previous 1-year period, to a person who had at least 30 quarters of coverage;
- Had been married to a person for at least 1 year at the time of the person’s death if, at the time of death, the person had at least 30 quarters of coverage; or
- Is divorced from a person and had been married to the person for at least

10 years at the time of the divorce if, at the time of the divorce, the person had at least 30 quarters of coverage.

Section 1818(d)(4)(A) of the Act specifies that the premium that these individuals will pay for CY 2021 will be equal to the premium for uninsured aged enrollees reduced by 45 percent.

Section 1818(g) of the Act requires the Secretary of the Department of Health and Human Services (the Secretary), at the request of a state, to enter into a Part A buy-in agreement with a state to pay Medicare Part A premiums for Qualified Medicare Beneficiaries (QMBs). Under the QMB program, state Medicaid agencies must pay the Medicare Part A premium for those not eligible for premium-free Part A if those individuals meet all of the eligibility requirements for the QMB program under the state’s Medicaid state plan. (Entering into a Part A buy-in agreement would permit a state to avoid any Medicare late enrollment penalties that the individual may owe and would allow states to enroll persons in Part A at any time of the year, without regard to Medicare enrollment periods). Some of these individuals may be eligible for the Qualified Disabled Working Individuals program, through which state Medicaid programs provide coverage for the Part A premiums of individuals eligible to enroll in Part A by virtue of section 1818A of the Act who meet certain financial eligibility criteria.

II. Monthly Premium Amount for CY 2021

The monthly premium for the uninsured aged and certain individuals with disabilities who have exhausted other entitlement for the 12 months beginning January 1, 2021, is \$471. The monthly premium for the individuals eligible under section 1818(d)(4)(B) of the Act, and therefore, subject to the 45 percent reduction in the monthly premium, is \$259.

III. Monthly Premium Rate Calculation

As discussed in section I of this notice, the monthly Medicare Part A premium is equal to the estimated monthly actuarial rate for CY 2021 rounded to the nearest multiple of \$1 and equals one-twelfth of the average per capita amount, which is determined by projecting the number of Medicare Part A enrollees aged 65 years and over as well as the benefits and administrative costs that will be incurred on their behalf.

The steps involved in projecting these future costs to the Federal Hospital Insurance Trust Fund are:

- Establishing the present cost of services furnished to beneficiaries, by

type of service, to serve as a projection base;

- Projecting increases in payment amounts for each of the service types; and
- Projecting increases in administrative costs.

We base our projections for CY 2021 on—(1) current historical data; and (2) projection assumptions derived from current law and the President’s Fiscal Year 2021 Budget.

We estimate that in CY 2021, 54,661,560 people aged 65 years and over will be entitled to (enrolled in) benefits (without premium payment) and that they will incur about \$308.997 billion in benefits and related administrative costs. Thus, the estimated monthly average per capita amount is \$471.08 and the monthly premium is \$471. Subsequently, the full monthly premium reduced by 45 percent is \$259.

IV. Costs to Beneficiaries

The CY 2021 premium of \$471 is approximately 2.8 percent higher than the CY 2020 premium of \$458. We estimate that approximately 706,000 enrollees will voluntarily enroll in Medicare Part A by paying the full premium. We estimate that over 90 percent of these individuals will have their Part A premium paid for by states, since they are enrolled in the QMB program. Furthermore, the CY 2021 reduced premium of \$259 is approximately 2.8 percent higher than the CY 2020 premium of \$252. We estimate an additional 84,000 enrollees will pay the reduced premium. Therefore, we estimate that the total aggregate cost to enrollees paying these premiums in CY 2021, compared to the amount that they paid in CY 2020, will be about \$117 million.

V. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment prior to a rule taking effect in accordance with section 1871 of the Act and section 553(b) of the Administrative Procedure Act (APA). Section 1871(a)(2) of the Act provides that no rule, requirement, or other statement of policy (other than a national coverage determination) that establishes or changes a substantive legal standard governing the scope of benefits, the payment for services, or the eligibility of individuals, entities, or organizations to furnish or receive services or benefits under Medicare shall take effect unless it is promulgated through notice and comment rulemaking. Unless there is a statutory exception, section 1871(b)(1)

of the Act generally requires the Secretary to provide for notice of a proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment before establishing or changing a substantive legal standard regarding the matters enumerated by the statute. Similarly, under 5 U.S.C. 553(b) of the APA, the agency is required to publish a notice of proposed rulemaking in the **Federal Register** before a substantive rule takes effect. Section 553(d) of the APA and section 1871(e)(1)(B)(i) of the Act usually require a 30-day delay in effective date after issuance or publication of a rule, subject to exceptions. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the advance notice and comment requirement and the delay in effective date requirements. Sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act also provide exceptions from the notice and 60-day comment period and the 30-day delay in effective date. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act expressly authorize an agency to dispense with notice and comment rulemaking for good cause if the agency makes a finding that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest.

The annual Part A premium announcement set forth in this notice does not establish or change a substantive legal standard regarding the matters enumerated by the statute or constitute a substantive rule which would be subject to the notice requirements in section 553(b) of the APA. However, to the extent that an opportunity for public notice and comment could be construed as required for this notice, we find good cause to waive this requirement.

Section 1818(d) of the Act requires the Secretary during September of each year to determine and publish the amount to be paid, on an average per capita basis, from the Federal Hospital Insurance Trust Fund for services incurred in the impending CY (including the associated administrative costs) on behalf of individuals aged 65 and over who will be entitled to benefits under Medicare Part A. Further, the statute requires that the agency determine the applicable premium amount for each CY in accordance with the statutory formula, and we are simply notifying the public of the changes to the Medicare Part A premiums for CY 2021. We have calculated the Part A premiums as directed by the statute; the statute establishes both when the premium amounts must be published

and the information that the Secretary must factor into the premium amounts, so we do not have any discretion in that regard. We find notice and comment procedures to be unnecessary for this notice and we find good cause to waive such procedures under section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act, if such procedures may be construed to be required at all. Through this notice, we are simply notifying the public of the updates to the Medicare Part A premiums, in accordance with the statute, for CY 2021. As such, we also note that even if notice and comment procedures were required for this notice, for the reasons stated above, we would find good cause to waive the delay in effective date of the notice, as additional delay would be contrary to the public interest under section 1871(e)(1)(B)(ii) of the Act. Publication of this notice is consistent with section 1818(d) of the Act, and we believe that any potential delay in the effective date of the notice, if such delay were required at all, could cause unnecessary confusion both for the agency and Medicare beneficiaries.

VI. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

VII. Regulatory Impact Analysis

Although this notice does not constitute a substantive rule, we nevertheless prepared this Regulatory Impact Analysis section in the interest of ensuring that the impacts of this notice are fully understood.

A. Statement of Need

Section 1818(d) of the Act requires the Secretary during September of each year to determine and publish the amount to be paid, on an average per capita basis, from the Federal Hospital Insurance Trust Fund for services incurred in the impending CY (including the associated administrative costs) on behalf of individuals aged 65 and over who will be entitled to benefits under Medicare Part A.

B. Overall Impact

We have examined the impacts of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation

and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), the Congressional Review Act (5 U.S.C. 804(2)), and Executive Order 13771 on Reducing Regulation and Controlling Regulatory Costs (January 30, 2017).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action that is likely to result in a rule: (1) Having an annual effect on the economy of \$100 million or more in any 1 year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities (also referred to as “economically significant”); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in the Executive Order.

A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year). Although we do not consider this notice to constitute a substantive rule, this notice is economically significant under section 3(f)(1) of Executive Order 12866. As stated in section IV of this notice, we estimate that the overall effect of the changes in the Part A premium will be a cost to voluntary enrollees (sections 1818 and 1818A of the Act) of about \$117 million.

The RFA requires agencies to analyze options for regulatory relief of small entities, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other providers and

suppliers are small entities, either by being nonprofit organizations or by meeting the Small Business Administration's definition of a small business (having revenues of less than \$8.0 million to \$41.5 million in any 1 year). Individuals and states are not included in the definition of a small entity. This annual notice announces the Medicare Part A premiums for CY 2021 and will have an impact on certain Medicare beneficiaries. As a result, we are not preparing an analysis for the RFA because the Secretary has determined that this notice will not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare an RIA if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a metropolitan statistical area and has fewer than 100 beds. This annual notice announces the Medicare Part A premiums for CY 2021 and will have an impact on certain Medicare beneficiaries. As a result, we are not preparing an analysis for section 1102(b) of the Act, because the Secretary has determined that this notice will not have a significant impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. In 2020, that threshold is approximately \$156 million. This notice does not impose mandates that will have a consequential effect of \$156 million or more on state, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on state and local governments, preempts state law, or otherwise has Federalism implications. This notice will not have a substantial direct effect on state or local governments, preempt state law, or otherwise have Federalism implications.

Executive Order 13771, titled "Reducing Regulation and Controlling Regulatory Costs," was issued on January 30, 2017 (82 FR 9339, February 3, 2017). It has been determined that this notice is a transfer notice that does

not impose more than de minimis costs and thus is not a regulatory action for the purposes of E.O. 13771.

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.

C. Congressional Review

Consistent with the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*), this notice has been transmitted to the Congress and the Comptroller General for review.

Dated: October 30, 2020.

Seema Verma,

Administrator, Centers for Medicare & Medicaid Services.

Dated: November 2, 2020.

Medicare Program; CY 2021 Inpatient Hospital Deductible and Hospital and Extended Care Services Coinsurance Amounts

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.

ACTION: Notice.

SUMMARY: This notice announces the inpatient hospital deductible and the hospital and extended care services coinsurance amounts for services furnished in calendar year (CY) 2021 under Medicare's Hospital Insurance Program (Medicare Part A). The Medicare statute specifies the formulae used to determine these amounts. For CY 2021, the inpatient hospital deductible will be \$1,484. The daily coinsurance amounts for CY 2021 will be: \$371 for the 61st through 90th day of hospitalization in a benefit period; \$742 for lifetime reserve days; and \$185.50 for the 21st through 100th day of extended care services in a skilled nursing facility in a benefit period.

DATES: The deductible and coinsurance amounts announced in this notice are effective on January 1, 2021.

FOR FURTHER INFORMATION CONTACT:

Yaminee Thaker, (410) 786 7921 for general information.

Gregory J. Savord, (410) 786 1521 for case mix analysis.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1813 of the Social Security Act (the Act) provides for an inpatient hospital deductible to be subtracted from the amount payable by Medicare for inpatient hospital services furnished to a beneficiary. It also provides for certain coinsurance amounts to be subtracted from the amounts payable by Medicare for inpatient hospital and extended care services. Section 1813(b)(2) of the Act requires the Secretary of the Department of Health and Human Services (the Secretary) to determine and publish each year the amount of the inpatient hospital deductible and the hospital and extended care services coinsurance amounts applicable for services furnished in the following calendar year (CY).

II. Computing the Inpatient Hospital Deductible for CY 2021

Section 1813(b) of the Act prescribes the method for computing the amount of the inpatient hospital deductible. The inpatient hospital deductible is an amount equal to the inpatient hospital deductible for the preceding CY, adjusted by our best estimate of the payment-weighted average of the applicable percentage increases (as defined in section 1886(b)(3)(B) of the Act) used for updating the payment rates to hospitals for discharges in the fiscal year (FY) that begins on October 1 of the same preceding CY, and adjusted to reflect changes in real case-mix. The adjustment to reflect real case-mix is determined on the basis of the most recent case-mix data available. The amount determined under this formula is rounded to the nearest multiple of \$4 (or, if midway between two multiples of \$4, to the next higher multiple of \$4).

Under section 1886(b)(3)(B)(i)(XX) of the Act, the percentage increase used to update the payment rates for FY 2021 for hospitals paid under the inpatient prospective payment system is the market basket percentage increase, otherwise known as the market basket update, reduced by an adjustment based on changes in the economy-wide productivity (the multifactor productivity (MFP) adjustment) (see section 1886(b)(3)(B)(xi)(II) of the Act). Under section 1886(b)(3)(B)(viii) of the Act, for FY 2021, the applicable percentage increase for hospitals that do not submit quality data as specified by the Secretary is reduced by one quarter

of the market basket update. We are estimating that after accounting for those hospitals receiving the lower market basket update in the payment-weighted average update, the calculated deductible will not be affected, since the majority of hospitals submit quality data and receive the full market basket update. Section 1886(b)(3)(B)(ix) of the Act requires that any hospital that is not a meaningful electronic health record (EHR) user (as defined in section 1886(n)(3) of the Act) will have three-quarters of the market basket update reduced by 100 percent for FY 2017 and each subsequent FY. We are estimating that after accounting for these hospitals receiving the lower market basket update, the calculated deductible will not be affected, since the majority of hospitals are meaningful EHR users and are expected to receive the full market basket update.

Under section 1886 of the Act, the percentage increase used to update the payment rates (or target amounts, as applicable) for FY 2021 for hospitals excluded from the inpatient prospective payment system is as follows:

- The percentage increase for long term care hospitals is the market basket percentage increase reduced by the MFP adjustment (see section 1886(m)(3)(A) of the Act). In addition, these hospitals may also be impacted by the quality reporting adjustments and the site-neutral payment rates (see sections 1886(m)(5) and 1886(m)(6) of the Act).
- The percentage increase for inpatient rehabilitation facilities is the market basket percentage increase reduced by a productivity adjustment in accordance with section 1886(j)(3)(C)(ii)(I) of the Act. In addition, these hospitals may also be impacted by the quality reporting adjustments (see section 1886(j)(7) of the Act).
- The percentage increase used to update the payment rate for inpatient psychiatric facilities is the market basket percentage increase reduced by the MFP adjustment (see section 1886(s)(2)(A)(i) of the Act). In addition, these hospitals may also be impacted by the quality reporting adjustments (see section 1886(s)(4) of the Act).
- The percentage increase used to update the target amounts for other types of hospitals that are excluded from the inpatient prospective payment system and that are paid on a reasonable cost basis, subject to a rate-of-increase ceiling, is the inpatient prospective payment system operating market basket percentage increase, which is described at section 1886(b)(3)(B)(ii)(VIII) of the Act and 42 CFR 413.40(c)(3). These other types of hospitals include cancer

hospitals, children's hospitals, extended neoplastic disease care hospitals, and hospitals located outside the 50 states, the District of Columbia, and Puerto Rico.

The inpatient prospective payment system market basket percentage increase for FY 2021 is 2.4 percent and the MFP adjustment is 0.0 percentage point, as announced in the final rule that appeared in the **Federal Register** on September 18, 2020 entitled, "Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and Final Policy Changes and Fiscal Year 2021 Rates; Quality Reporting and Medicare and Medicaid Promoting Interoperability Programs Requirements for Eligible Hospitals and Critical Access Hospitals" (85 FR 58432). Therefore, the percentage increase for hospitals paid under the inpatient prospective payment system that submit quality data and are meaningful EHR users is 2.4 percent (that is, the FY 2021 market basket update of 2.4 percent less the MFP adjustment of 0.0 percentage point). The average payment percentage increase for hospitals excluded from the inpatient prospective payment system is 2.34 percent. This average includes long term care hospitals, inpatient rehabilitation facilities, and other hospitals excluded from the inpatient prospective payment system. Weighting these percentages in accordance with payment volume, our best estimate of the payment-weighted average of the increases in the payment rates for FY 2021 is 2.39 percent.

To develop the adjustment to reflect changes in real case-mix, we first calculated an average case-mix for each hospital that reflects the relative costliness of that hospital's mix of cases compared to those of other hospitals. We then computed the change in average case-mix for hospitals paid under the Medicare inpatient prospective payment system in FY 2020 compared to FY 2019. (We excluded from this calculation hospitals whose payments are not based on the inpatient prospective payment system because their payments are based on alternate prospective payment systems or reasonable costs.) We used Medicare bills from prospective payment hospitals that we received as of July 2020. These bills represent a total of about 6.1 million Medicare discharges for FY 2020 and provide the most recent case-mix data available at this time. Based on these bills, the change in average case-mix in FY 2020 is 2.8 percent. Based on these bills and past experience, we expect the overall case mix change to be 3.8 percent as the year

progresses and more FY 2020 data become available.

Section 1813 of the Act requires that the inpatient hospital deductible be adjusted only by that portion of the case-mix change that is determined to be real. Real case-mix is that portion of case-mix that is due to changes in the mix of cases in the hospital and not due to coding optimization. COVID-19 has complicated the determination of real case-mix increase. COVID-19 cases typically have higher-weighted MS-DRGs which would cause a real increase in case-mix while hospitals have experienced a reduction in lower-weighted cases which would also cause a real increase in case-mix. We compared the average case-mix for February 2020 through July 2020 (COVID-19 period) with average case-mix for October 2019 through January 2020 (pre-COVID-19 period). Since this increase applies for only a portion of CY 2020, we allocated this increase by the estimated discharges over the 2 periods—a 2.5 percent increase for FY 2020. The 1.3-percent residual case-mix increase is a mixture of real case-mix and coding optimization. Over the past several years, we have observed total case mix increases of about 0.5 percent per year and have assumed that they are real. Thus, since we do not have further information at this time, we expect that 0.5 percent of the residual 1.3 percent change in average case-mix for FY 2020 will be real. The combination of the 2.5-percent COVID-19 effect and the remaining residual 0.5-percent real case-mix increase is a 3.0-percent increase in real case-mix for FY 2020. Note that all case-mix calculations do not include the extra 20 percent adjustment in the MS-DRG relative weights for COVID-19 cases. The extra 20-percent adjustment is a payment artifact that should not be included in the measurement of case-mix.

Thus, the estimate of the payment-weighted average of the applicable percentage increases used for updating the payment rates is 2.39 percent, and the real case-mix adjustment factor for the deductible is 3.0 percent. Therefore, using the statutory formula as stated in section 1813(b) of the Act, we calculate the inpatient hospital deductible for services furnished in CY 2021 to be \$1,484. This deductible amount is determined by multiplying \$1,408 (the inpatient hospital deductible for CY 2020 (84 FR 61619)) by the payment-weighted average increase in the payment rates of 1.0239 multiplied by the increase in real case-mix of 1.03, which equals \$1,484.90 and is rounded to \$1,484.

III. Computing the Inpatient Hospital and Extended Care Services Coinsurance Amounts for CY 2021

The coinsurance amounts provided for in section 1813 of the Act are defined as fixed percentages of the inpatient hospital deductible for services furnished in the same CY. The increase in the deductible generates increases in the coinsurance amounts. For inpatient hospital and extended care services furnished in CY 2021, in

accordance with the fixed percentages defined in the law, the daily coinsurance for the 61st through 90th day of hospitalization in a benefit period will be \$371 (one-fourth of the inpatient hospital deductible as stated in section 1813(a)(1)(A) of the Act); the daily coinsurance for lifetime reserve days will be \$742 (one-half of the inpatient hospital deductible as stated in section 1813(a)(1)(B) of the Act); and the daily coinsurance for the 21st through 100th day of extended care

services in a skilled nursing facility (SNF) in a benefit period will be \$185.50 (one-eighth of the inpatient hospital deductible as stated in section 1813(a)(3) of the Act).

IV. Cost to Medicare Beneficiaries

The Table below summarizes the deductible and coinsurance amounts for CYs 2020 and 2021, as well as the number of each that is estimated to be paid.

PART A DEDUCTIBLE AND COINSURANCE AMOUNTS FOR CALENDAR YEARS 2020 AND 2021

Type of cost sharing	Value		Number paid (in millions)	
	2020	2021	2020	2021
Inpatient hospital deductible	\$1,408	\$1,484	5.81	6.45
Daily coinsurance for 61st–90th Day	352	371	1.31	1.46
Daily coinsurance for lifetime reserve days	704	742	0.65	0.72
SNF coinsurance	176.00	185.50	28.82	32.19

The estimated total increase in costs to beneficiaries is about \$2,450 million (rounded to the nearest \$10 million) due to: (1) The increase in the deductible and coinsurance amounts; and (2) the increase in the number of deductibles and daily coinsurance amounts paid. We determine the increase in cost to beneficiaries by calculating the difference between the 2020 and 2021 deductible and coinsurance amounts multiplied by the estimated increase in the number of deductible and coinsurance amounts paid.

V. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment prior to a rule taking effect in accordance with section 1871 of the Act and section 553(b) of the Administrative Procedure Act (APA). Section 1871(a)(2) of the Act provides that no rule, requirement, or other statement of policy (other than a national coverage determination) that establishes or changes a substantive legal standard governing the scope of benefits, the payment for services, or the eligibility of individuals, entities, or organizations to furnish or receive services or benefits under Medicare shall take effect unless it is promulgated through notice and comment rulemaking. Unless there is a statutory exception, section 1871(b)(1) of the Act generally requires the Secretary to provide for notice of a proposed rule in the **Federal Register** and provide a period of not less than 60 days for public comment before establishing or changing a substantive legal standard regarding the matters

enumerated by the statute. Similarly, under 5 U.S.C. 553(b) of the APA, the agency is required to publish a notice of proposed rulemaking in the **Federal Register** before a substantive rule takes effect. Section 553(d) of the APA and section 1871(e)(1)(B)(i) of the Act usually require a 30-day delay in effective date after issuance or publication of a rule, subject to exceptions. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the advance notice and comment requirement and the delay in effective date requirements. Sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act also provide exceptions from the notice and 60-day comment period and the 30-day delay in effective date. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act expressly authorize an agency to dispense with notice and comment rulemaking for good cause if the agency makes a finding that notice and comment procedures are impracticable, unnecessary, or contrary to the public interest.

The annual inpatient hospital deductible and the hospital and extended care services coinsurance amounts announcement set forth in this notice does not establish or change a substantive legal standard regarding the matters enumerated by the statute or constitute a substantive rule which would be subject to the notice requirements in section 553(b) of the APA. However, to the extent that an opportunity for public notice and comment could be construed as required for this notice, we find good cause to waive this requirement.

Section 1813(b)(2) of the Act requires publication of the inpatient hospital deductible and the hospital and extended care services coinsurance amounts between September 1 and September 15 of the year preceding the year to which they will apply. Further, the statute requires that the agency determine and publish the inpatient hospital deductible and hospital and extended care services coinsurance amounts for each CY in accordance with the statutory formulae, and we are simply notifying the public of the changes to the deductible and coinsurance amounts for CY 2021. We have calculated the inpatient hospital deductible and hospital and extended care services coinsurance amounts as directed by the statute; the statute establishes both when the deductible and coinsurance amounts must be published and the information that the Secretary must factor into the deductible and coinsurance amounts, so we do not have any discretion in that regard. We find notice and comment procedures to be unnecessary for this notice and we find good cause to waive such procedures under section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act, if such procedures may be construed to be required at all. Through this notice, we are simply notifying the public of the updates to the inpatient hospital deductible and the hospital and extended care services coinsurance amounts, in accordance with the statute, for CY 2021. As such, we also note that even if notice and comment procedures were required for this notice, for the reasons stated above, we would find good cause to waive the delay in

effective date of the notice, as additional delay would be contrary to the public interest under section 1871(e)(1)(B)(ii) of the Act. Publication of this notice is consistent with section 1813(b)(2) of the Act, and we believe that any potential delay in the effective date of the notice, if such delay were required at all, could cause unnecessary confusion both for the agency and Medicare beneficiaries.

VI. Collection of Information Requirements

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

VII. Regulatory Impact Analysis

Although this notice does not constitute a substantive rule, we nevertheless prepared this Regulatory Impact Analysis section in the interest of ensuring that the impacts of this notice are fully understood.

A. Statement of Need

Section 1813(b)(2) of the Act requires the Secretary to publish, between September 1 and September 15 of each year, the amounts of the inpatient hospital deductible and hospital and extended care services coinsurance applicable for services furnished in the following CY.

B. Overall Impact

We have examined the impacts of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), the Congressional Review Act (5 U.S.C. 804(2)), and Executive Order 13771 on Reducing Regulation and Controlling Regulatory Costs (January 30, 2017).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and

equity). Section 3(f) of Executive Order 12866 defines a “significant regulatory action” as an action that is likely to result in a rule: (1) Having an annual effect on the economy of \$100 million or more in any 1 year, or adversely and materially affecting a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities (also referred to as “economically significant”); (2) creating a serious inconsistency or otherwise interfering with an action taken or planned by another agency; (3) materially altering the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) raising novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in the Executive Order.

A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects (\$100 million or more in any 1 year). Although we do not consider this notice to constitute a substantive rule, this notice is economically significant under section 3(f)(1) of Executive Order 12866. As stated in section IV of this notice, we estimate that the total increase in costs to beneficiaries associated with this notice is about \$2,450 million due to: (1) The increase in the deductible and coinsurance amounts; and (2) the increase in the number of deductibles and daily coinsurance amounts paid.

The RFA requires agencies to analyze options for regulatory relief of small entities, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Most hospitals and most other health care providers and suppliers are small entities, either by being nonprofit organizations or by meeting the Small Business Administration’s definition of a small business (having revenues of less than \$8.0 million to \$41.5 million in any 1 year). Individuals and states are not included in the definition of a small entity. This annual notice announces the Medicare Part A deductible and coinsurance amounts for CY 2021 and will have an impact on the Medicare beneficiaries. As a result, we are not preparing an analysis for the RFA because the Secretary has determined that this notice will not have a significant economic impact on a substantial number of small entities.

In addition, section 1102(b) of the Act requires us to prepare a regulatory

impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a metropolitan statistical area and has fewer than 100 beds. This annual notice announces the Medicare Part A deductible and coinsurance amounts for CY 2021 and will have an impact on the Medicare beneficiaries. As a result, we are not preparing an analysis for section 1102(b) of the Act because the Secretary has determined that this notice will not have a significant impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of \$100 million in 1995 dollars, updated annually for inflation. In 2020, that threshold is approximately \$156 million. This notice does not impose mandates that will have a consequential effect of \$156 million or more on state, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on state and local governments, preempts state law, or otherwise has Federalism implications. This notice will not have a substantial direct effect on state or local governments, preempt state law, or otherwise have Federalism implications.

Executive Order 13771, titled “Reducing Regulation and Controlling Regulatory Costs,” was issued on January 30, 2017 (82 FR 9339, February 3, 2017). It has been determined that this notice is a transfer notice that does not impose more than de minimis costs and thus is not a regulatory action for the purposes of E.O. 13771.

In accordance with the provisions of Executive Order 12866, this notice was reviewed by the Office of Management and Budget.

C. Congressional Review

Consistent with the Congressional Review Act provisions of the Small Business Regulatory Enforcement Fairness Act of 1996 (5 U.S.C. 801 *et seq.*), this notice has been transmitted to the Congress and the Comptroller General for review.

Dated: October 30, 2020.

Food and Drug Administration

[Docket No. FDA-2020-D-0530]

Voluntary Disclosure of Sesame as an Allergen: Draft Guidance for Industry; Availability; Agency Information Collection Activities; Proposed Collection; Comment Request

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or we) is announcing the availability of a draft guidance for industry entitled “Voluntary Disclosure of Sesame as an Allergen.” The draft guidance, when finalized, will provide food manufacturers with FDA’s current views on sesame as an allergen and will provide recommendations to voluntarily disclose sesame in certain circumstances where such disclosure is not currently required. The guidance is intended to help individuals who are allergic to sesame identify those foods that may contain sesame as an ingredient. This draft guidance is not final nor is it in effect at this time.

DATES: Submit either electronic or written comments on the draft guidance by January 11, 2021 to ensure that we consider your comment on the draft guidance before we begin work on the final version of the guidance. Submit electronic or written comments on the proposed collection of information in the draft guidance by January 11, 2021.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal:* <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your

comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else’s Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see “Written/Paper Submissions” and “Instructions”).

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in “Instructions.”

Instructions: All submissions received must include the Docket No. FDA-2020-D-0530 for “Voluntary Disclosure of Sesame as an Allergen: Guidance for Industry.” Received comments will be placed in the docket and, except for those submitted as “Confidential Submissions,” publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states “THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.” We will review this copy, including the claimed confidential information, in our consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff.

If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Office of Nutrition and Food Labeling, Food Labeling and Standards Staff, Center for Food Safety and Applied Nutrition, Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740. Send two self-addressed adhesive labels to assist that office in processing your request. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance.

FOR FURTHER INFORMATION CONTACT:

With regard to the draft guidance: Carol D’lima, Center for Food Safety and Applied Nutrition, Food and Drug Administration, 5001 Campus Dr., College Park, MD 20740, 240-402-2371.

With regard to the proposed collection of information: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A-12M, 11601 Landsdown St., North Bethesda, MD 20852, 301-796-5733, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION:

I. Background

We are announcing the availability of a draft guidance for industry entitled “Voluntary Disclosure of Sesame as an Allergen.” We are issuing this draft guidance consistent with our good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on this topic. It does not establish any rights for any person

and is not binding on FDA or the public. You can use an alternate approach if it satisfies the requirements of the applicable statutes and regulations.

In the **Federal Register** of October 30, 2018 (83 FR 54594), we published a document inviting data and other information on the prevalence and severity of sesame allergies in the United States and the prevalence of sesame-containing foods sold in the United States that are not required to disclose sesame as an ingredient. The document also asked specific questions regarding the prevalence of allergies and allergic reactions due to sesame in the United States and the prevalence and amounts of undeclared sesame in foods. For example, we asked for examples of products or product categories that contain sesame as a spice, flavor, color, or incidental additive. The notice also stated that we had received a citizen petition in 2014 requesting, in part, that we issue a rule to require that sesame seeds and sesame products be regulated similarly to how major food allergens are regulated under the Federal Food, Drug, and Cosmetic Act (FD&C Act) (available at <https://www.regulations.gov/docket?D=FDA-2014-P-2035>). Among the various issues, the petition wanted FDA to require sesame's disclosure by the common or usual name "sesame" in food labeling and when present in ingredients, including a spice, flavoring, coloring, or incidental additive.

We received over 4,800 comments to the document from individual consumers and patients, as well as consumer and patient advocacy groups, medical professionals and patient caretakers, industry and trade associations, and academic institutions. Some comments submitted data and information from published studies. Data and information received in response to the document highlighted U.S. national prevalence data on sesame and other food allergens. Our communications about the notice directed the public to submit adverse events due to sesame to the CFSAN Adverse Event Reporting System (CAERS). We received over 500 individual adverse event reports.

Under our statute and regulations, if whole sesame seeds are used as an ingredient, they must be declared on the label (see section 403(i) of the FD&C Act

(21 U.S.C 343(i)); 21 CFR 101.4); however, under current regulations, sesame can, in some circumstances, such as when ground in a spice blend, be declared in an ingredient statement as simply "spice" or "flavor," so its presence may not be obvious to consumers. Some comments to the document highlighted the lack of consistent labeling of sesame on food and stated this was a major problem for those with a sesame allergy.

Based on information received in the comments to the notice, the 2014 citizen petition, and comments submitted to the corresponding docket, other correspondence, as well as adverse event reports and recent publications with prevalence data, it appears that sesame allergy may be an increasing problem in the U.S. population. We continue to evaluate the emerging evidence and are working to develop factors to inform future regulatory actions related to sesame and other emerging food allergens, including possible labeling requirements. As we engage in this important work, we recommend, in the interim, that manufacturers voluntarily take steps to help consumers who are allergic or sensitive to sesame by disclosing the presence of sesame in packaged foods, even in circumstances where such disclosure would not be required (*e.g.*, in spices and flavorings). The guidance would recommend, when finalized, that manufacturers voluntarily declare sesame in the ingredient list when it is used in foods as a "flavor" or "spice" in a parenthetical following the spice or flavor, such as, "spice (sesame)," "spices (including sesame)," "flavor (sesame)," or "flavors (including sesame)." Similarly, if a term is used for a food that is or contains sesame, such as tahini, the guidance would recommend that sesame be included in a parenthesis, *e.g.*, "tahini (sesame)" in the ingredient list. This will help consumers, especially those allergic to sesame, avoid foods that could cause an allergic reaction.

II. Paperwork Reduction Act of 1995

Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor.

"Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Voluntary Disclosure of Sesame as an Allergen: Guidance for Industry

OMB Control Number 0910–0792—
Revision

The draft guidance, when finalized, will provide food manufacturers with recommendations regarding voluntarily declaring sesame in certain circumstances where such declaration is not currently required. For example, if a term is used for a food that is or contains sesame, the guidance would recommend that sesame should be included in a parenthesis in the ingredient list.

Description of respondents: The respondents to this collection of information are manufacturers and packers of packaged foods sold in the United States.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN ¹

Activity	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure	Total hours	Total capital costs
Review labels to follow guidance recommendations	77,500	1	77,500	1	77,500	0
Redesign labels to follow guidance recommendations	775	1	775	16	12,400	\$1,414,375
Total					89,900	1,414,375

¹ There are no operating and maintenance costs associated with this collection of information.

We base these estimates from our experience with our food allergen labeling program and our labeling cost model. We estimate that there are approximately 775,000 Universal Product Codes (UPCs) of FDA-regulated foods. Using FDA’s labeling cost model, we estimate the entry rate of new UPCs to be approximately 8 percent per year. Based on the approximate entry rate of new UPCs, we estimate the rate of new or reformulated UPCs to be approximately 10 percent per year, or 77,500 products (775,000 ×10 percent). Thus, we estimate that 77,500 new or reformulated products are sold annually in the United States. Assuming an association of 1 respondent to each of the 77,500 new or reformulated products, we estimate that 77,500 respondents will each review the label of one of the 77,500 new or reformulated products, as reported in table 1, row 1. We have no data on how many label reviews would identify an opportunity to redesign the label. Therefore, we further estimate, for the purposes of this analysis, that 1 percent of the reviewed labels of new or reformulated products, or 775 labels (77,500 × 1 percent) would be redesigned as recommended by the guidance. Assuming an association of 1 respondent to each of the 775 labels, we estimate that 775 respondents will each redesign 1 label. Using our labeling cost model, we estimate that it will take an average of 16 hours to complete the administration and internal design work

for the redesign of a label to follow the recommendations of the guidance, as reported in table 1, row 2. Consequently, the burden of redesigning the 775 labels of new or reformulated products is 12,400 hours, as reported in table 1, row 2.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at either <https://www.fda.gov/FoodGuidances> or <https://www.regulations.gov>. Use the FDA website listed in the previous sentence to find the most current version of the guidance.

Dated: November 2, 2020.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

Agency Information Collection Activities; Announcement of Office of Management and Budget Approvals

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is publishing a list of information collections that have been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995.

FOR FURTHER INFORMATION CONTACT: Ila S. Mizrachi, Office of Operations, Food and Drug Administration, Three White Flint North, 10A–12M, 11601 Landsdown St., North Bethesda, MD 20852, 301–796–7726, PRAStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: The following is a list of FDA information collections recently approved by OMB under section 3507 of the Paperwork Reduction Act of 1995 (44 U.S.C. 3507). The OMB control number and expiration date of OMB approval for each information collection are shown in table 1. Copies of the supporting statements for the information collections are available on the internet at <https://www.reginfo.gov/public/do/PRAMain>. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

TABLE 1—LIST OF INFORMATION COLLECTIONS APPROVED BY OMB

Title of collection	OMB control No.	Date approval expires
Required Warnings for Cigarette Packages and Advertisements	0910–0877	04/30/2023
Medical Devices; Reports of Corrections and Removals	0910–0359	10/31/2023
Customer/Partner Service Surveys	0910–0360	10/31/2023
Annual Reporting for Custom Device Exemption	0910–0767	10/31/2023
Human Drug Compounding Under Sections 503A and 503B of the Federal Food, Drug, and Cosmetic Act	0910–0800	10/31/2023
Postmarketing Safety Reporting for Combination Products	0910–0834	10/31/2023
Importation of Prescription Drugs	0910–0888	10/31/2023

Dated: November 5, 2020.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2014-N-0998]

Agency Information Collection Activities; Proposed Collection; Comment Request; Regulations for In Vivo Radiopharmaceuticals Used for Diagnosis and Monitoring

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the collections of information in the regulations for in vivo radiopharmaceuticals used for diagnosis and monitoring.

DATES: Submit either electronic or written comments on the collection of information by January 11, 2021.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before January 11, 2021. The <https://www.regulations.gov> electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of January 11, 2021. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to [https://](https://www.regulations.gov)

www.regulations.gov will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2014-N-0998 for "Agency Information Collection Activities; Proposed Collection; Comment Request; Regulations for In Vivo Radiopharmaceuticals Used for Diagnosis and Monitoring." Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in

its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as "confidential." Any information marked as "confidential" will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the "Search" box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Domini Bean, Office of Operations, Food and Drug Administration, Three White Flint North, 10A-12M, 11601 Landsdown St., North Bethesda, MD 20852, 301-796-5733, PRASStaff@fda.hhs.gov.

SUPPLEMENTARY INFORMATION: Under the PRA (44 U.S.C. 3501-3521), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether

the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

Regulations for In Vivo Radiopharmaceuticals Used for Diagnosis and Monitoring—21 CFR Part 315

OMB Control Number 0910–0409—Extension

This information collection supports our regulations in part 315 (21 CFR part 315) that require manufacturers of diagnostic radiopharmaceuticals to submit information that demonstrates the safety and effectiveness of: (1) A new diagnostic radiopharmaceutical; or (2) a new indication for use of an approved diagnostic radiopharmaceutical. Information about the safety or effectiveness of a diagnostic radiopharmaceutical enables us to properly evaluate the safety and effectiveness profiles of such radiopharmaceuticals.

The information, which is usually submitted as part of a new drug application (NDA) or biologics license application (BLA) or as a supplement to an approved application typically includes, but is not limited to, nonclinical and clinical data on the

pharmacology; toxicology; adverse events; radiation safety assessments; and chemistry, manufacturing, and controls. The content and format of an application for approval of a new drug are set forth in § 314.50 (21 CFR 314.50) and have been approved under OMB control number 0910–0001. This information collection supports part 315, which is currently approved under OMB control number 0910–0409.

In table 1, row 1, we estimate the annual reporting burden for preparing the safety and effectiveness sections of an application. This estimate does not include the time needed to conduct studies and clinical trials or other research from which the reported information is obtained.

Based on past submissions of human drug applications, new indication supplements for diagnostic radiopharmaceuticals, or both, we estimate that six submissions will be received annually and that 2,000 hours would be spent preparing the portions of the application that would be affected by this information collection. We further estimate the total time needed to prepare complete applications for diagnostic radiopharmaceuticals as approximately 12,000 hours. This information collection does not impose any additional reporting burden for safety and effectiveness information on diagnostic radiopharmaceuticals beyond the estimated burden of 2,000 hours, because safety and effectiveness information is already required in § 314.50 and has been approved under OMB control number 0910–0001. In fact, clarification of our criteria for the evaluation of diagnostic radiopharmaceuticals in this information collection is intended to streamline overall information

collection burdens, particularly for diagnostic radiopharmaceuticals that may have well-established, low-risk safety profiles by enabling manufacturers to tailor information submissions and avoid unnecessary clinical studies.

In table 1, row 2, we estimate the annual reporting burden for preparing the safety and effectiveness sections of a supplement to an approved application. This estimate does not include the time needed to conduct studies and clinical trials or other research from which the reported information is obtained.

Based on past submissions of human drug applications, new indication supplements for diagnostic radiopharmaceuticals, or both, we estimate that nine submissions will be received annually. We estimate the total time needed to prepare complete applications for supplements to new applications for diagnostic radiopharmaceuticals as approximately between 500 and 1,000 hours. We calculated the median of this estimate to arrive at approximately 750 hours. We further estimate that the total time needed to prepare the portions of the application that would be affected by this information collection as 6,750. As previously stated, this information collection does not impose any additional reporting burden for safety and effectiveness information on diagnostic radiopharmaceuticals beyond the estimated burden of 750 hours, because safety and effectiveness information is already required in § 314.50 and has been approved under OMB control number 0910–0001.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN FOR NDAs AND SUPPLEMENTS TO APPROVED NDAs FOR DIAGNOSTIC RADIOPHARMACEUTICALS ¹

Manufacturers’ activity (21 CFR section)	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
NDAs (§§ 315.4, 315.5, and 315.6)	6	1	6	2,000	12,000
Supplements to Approved NDAs (§§ 315.4, 315.5, and 315.6)	9	1	9	750	6,750
Total					18,750

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

Our estimated burden for the information collection reflects an overall increase of 13 responses with a corresponding increase of 14,750 burden hours, including submissions involving NDAs. We attribute this adjustment to an increase in the number

of submissions for NDAs for diagnostic radiopharmaceuticals we received over the past few years and because we are now capturing supplements to approved NDAs for diagnostic radiopharmaceuticals.

Dated: November 5, 2020.
Lauren K. Roth,
Acting Principal Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Submission to OMB for Review and Approval: Public Comment Request; Information Collection Request Title: Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report OMB No. 0915–0172—Revision

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with of the Paperwork Reduction Act of 1995, HRSA has submitted an Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and approval. Comments submitted during the first public review

of this ICR will be provided to OMB. OMB will accept further comments from the public during the review and approval period. OMB may act on HRSA’s ICR only after the 30 day comment period for this notice has closed.

DATES: Comments on this ICR must be received no later than December 14, 2020.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: To request a copy of the clearance requests submitted to OMB for review, email Lisa Wright-Solomon, the HRSA Information Collection Clearance Officer at paperwork@hrsa.gov or call (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: Title V Maternal and Child Health

Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report OMB No. 0915–0172—Revision.

Abstract: HRSA is updating the *Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report*. This Guidance is used annually by the 50 states and nine jurisdictions (hereafter referred to as “state”) in applying for Block Grants under Title V of the Social Security Act and in preparing the required Annual Report. The updates being proposed by HRSA’s Maternal and Child Health Bureau (MCHB) for this edition of the Guidance continue to honor the federal-state partnership that is supported by the Title V Maternal and Child Health Services Block Grant and reinforce the state’s role in developing a Five-Year Action Plan that addresses its individual priority needs. These proposed updates build on and further refine the reporting structure and vision that was outlined in the previous edition. As such, they are intended to enable a state to provide an articulate and comprehensive description of its Title V program activities and its leadership efforts in advancing and assuring a public health system that serves the Maternal and Child Health population. HRSA’s proposed updates

to this edition of the Guidance were informed by comments received from State Title V program leadership, national Maternal and Child Health leaders and other stakeholders. Publication of a 60-day **Federal Register** Notice on June 15, 2020 (85 FR 36217) generated comments on proposed changes to the narrative instructions, reporting forms, and appendices.

While retaining the current organizational structure, performance measure framework and focus on family partnership, specific updates to this edition of the *Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report* include the following:

(1) Add clarifying language/instructions for completing the reporting forms and updating the Glossary of terms, references and citations, as needed.

(2) Revise the content of the National Outcome/Performance Measure Detail Sheets to include the 2030 *Healthy People* Objectives and to provide clear links to evidence-based and-informed strategies, federally available/state-reported data and data notes.

(3) Revise the format for Form #10e, which serves as the detail sheet for the state-specific measures (*i.e.*, Evidence-based and -Informed Strategy Measures (ESM), State Performance Measures (SPM), and State Outcome Measures (SOM)). Implement a staggered approach that requires states to use the revised form for all newly established state-specific measures and allows states to transition existing measures to the new form by the end of the five-year reporting cycle.

(4) Provide continued emphasis on family partnership and engagement at the systems level and include the Family Engagement in Systems Assessment Tool and Toolkit (FESAT) as one possible tool for State Title V programs to consider.

(5) Share background information, resources, state examples/metrics and definitions to assist states in their efforts to advance population health strategies for children with special health care needs (CSHCN).

(6) Expand Form 5 to include infants in the state's reporting on the number (5a) and percent (5b) of CSHCN served by Title V, *i.e.*, update the reporting to include infants and children with special health care needs (0–21 years).

(7) Enhance the narrative and performance reporting on State Title V efforts to build or expand program capacity related to Maternal and Child Health data access and cross-program data linkages, Maternal and Child

Health workforce development/training, and emergency planning/preparedness.

a. Integrate key aspects of the annual performance and progress reporting for the State Systems Development Initiative (SSDI) grant into the Title V Maternal and Child Health Services Block Grant Application/Annual Report to allow for more focused narrative reporting on SSDI program goals and activities relative to the State Title V Maternal and Child Health program and provide an annual assessment of the state's progress in building/expanding Maternal and Child Health data capacity through an added reporting form.

b. Enhance the annual narrative reporting to include a more robust description of the State Title V workforce capacity (*e.g.*, number/types of Full-Time Equivalents, trends/shifts in Maternal and Child Health workforce, and key external partners) and professional development efforts, while providing resources to assist State Title V programs in their ongoing assessment of Maternal and Child Health workforce and training needs.

c. Expand the annual narrative reporting to include a descriptive analysis of the

Title V program's role in the state's emergency planning and preparedness efforts, with the intended purpose of enabling each State Title V program to better assess capacity within the state for responding to emerging public health threats and disasters that could potentially impact the Maternal and Child Health population.

(8) Expand and enhance the Appendices to include supportive background information, examples, resources and tools.

In consideration of the increasing demands that are being placed on State Title V programs at this time due to the COVID–19 emergency and given that no major changes to the reporting requirements are being proposed, the burden estimates presented in the table below are based on the previous burden estimates for completion of the Title V Maternal and Child Health Services Block Grant Application/Annual Report. These estimates were developed based on prior estimates and consultations with a few States. When the COVID–19 emergency subsides, HRSA can solicit additional information from states to derive more accurate burden estimates.

The addition of clarifying instructions, state examples, reformatted Glossary, expanded background information and supportive resources and tools, where possible, is expected to assist State Title V programs in responding to the reporting requirements. It is anticipated that

further reductions in burden will be realized through the proposed revisions to the National Outcome/Performance Measure detail sheets and to Form #10e. These reductions in burden will be partially offset by the addition of one reporting form (formerly part of the state's annual performance reporting for the SSDI grant). This reporting will be coupled with expanded narrative reporting on the state's SSDI grant activities, along with other capacity-building efforts that relate to the Maternal and Child Health workforce and emergency planning and preparedness.

A 60-day notice published in the **Federal Register** on June 15, 2020, vol. 85, No. 115; pp. 36217–18. There were 10 public comments.

Need and Proposed Use of the Information: Each year, all states are required to submit an Application/Annual Report for Federal funds for their Title V Maternal and Child Health Services Block Grant to States Program to the HRSA's MCHB (Section 505(a) of Title V of the Social Security Act). In addition, the State Maternal and Child Health Services Block Grant programs are required to conduct a state-wide, comprehensive Needs Assessment every five years. The information and instructions for the preparation and submission of this Application/Annual Report are contained in the *Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report*.

Likely Respondents: By legislation (Section 505(a) of Title V of the Social Security Act), the Maternal and Child Health Services Block Grant Application/Annual Report must be developed by, or in consultation with, the State Maternal and Child Health agency.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This estimate includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Burden per response (in hours)	Total burden hours
Application and Annual Report without Five-Year Needs Assessment Summary	59	1	59	120	7,080
Average Total Annual Burden	59	59	7,080

States will use the updated edition of the *Title V Maternal and Child Health Services Block Grant to States Program: Guidance and Forms for the Title V Application/Annual Report* to prepare and submit the fiscal year (FY) 2022, FY 2023 and FY 2024 Applications/FY 2020, FY 2021 and FY 2022 Annual Reports, which will not contain the Five-Year Needs Assessment Summary. States will submit the next Five-Year Needs Assessment Summary in 2025, as part of the FY 2026 Application/FY 2024 Annual Report. Instructions for preparing the FY 2025, FY 2026 and FY 2027 Applications/FY 2023, FY 2024 and FY 2025 Annual Reports will be provided in the subsequent edition of the Application/Annual Report Guidance.

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

Center for Scientific Review; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: Center for Scientific Review Special Emphasis Panel Neurodevelopmental and Neurological Disorders.

Date: November 30, 2020.

Time: 11:00 a.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Samuel C. Edwards, Ph.D., Chief, BDCN IRG, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5210, MSC 7846, Bethesda, MD 20892, (301) 435-1246, edwardss@csr.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel Special Topics in Aging: Falls and Frailty, Diet, Inflammation and Hydrocephalus.

Date: December 1, 2020.

Time: 11:00 a.m. to 3:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Samuel C. Edwards, Ph.D., Chief, BDCN IRG, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5210, MSC 7846, Bethesda, MD 20892, (301) 435-1246, edwardss@csr.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel Member Conflict: Biobehavioral Regulation, Learning and Ethology.

Date: December 2, 2020.

Time: 2:00 p.m. to 4:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Telephone Conference Call).

Contact Person: Biao Tian, Ph.D., Scientific Review Officer, Center for Scientific Review,

National Institutes of Health, 6701 Rockledge Drive, Room 3089B, MSC 7848, Bethesda, MD 20892, (301) 402-4411, tianbi@csr.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel Member Conflict: Medical Imaging Investigations.

Date: December 4, 2020.

Time: 9:00 a.m. to 7:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Guo Feng Xu, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5122, MSC 7854, Bethesda, MD 20892, (301) 237-9870, xuguofen@csr.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel Mechanisms of Bacterial Pathogenesis and Transmission.

Date: December 4, 2020.

Time: 11:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

Contact Person: Gagan Pandya, Ph.D., Scientific Review Officer, National Institutes of Health, Center for Scientific Review, 6701 Rockledge Drive, RM 3200, MSC 7808, Bethesda, MD 20892, (301) 435-1167, pandyaga@mail.nih.gov.

Name of Committee: Center for Scientific Review Special Emphasis Panel Member Conflict: Topics in Bacterial Pathogenesis.

Date: December 4, 2020.

Time: 11:00 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Rockledge II, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

BILLING CODE 4140-01-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2020-0002]

Final Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: Flood hazard determinations, which may include additions or modifications of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or regulatory floodways on the Flood Insurance Rate Maps (FIRMs) and where applicable, in the supporting Flood Insurance Study (FIS) reports have been made final for the communities listed in the table below. The FIRM and FIS report are the basis of the floodplain management measures that a community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the Federal Emergency Management Agency's (FEMA's) National Flood Insurance Program (NFIP). In addition, the FIRM and FIS report are used by insurance agents and others to calculate

appropriate flood insurance premium rates for buildings and the contents of those buildings.

DATES: The date of March 9, 2021 has been established for the FIRM and, where applicable, the supporting FIS report showing the new or modified flood hazard information for each community.

ADDRESSES: The FIRM, and if applicable, the FIS report containing the final flood hazard information for each community is available for inspection at the respective Community Map Repository address listed in the tables below and will be available online through the FEMA Map Service Center at <https://msc.fema.gov> by the date indicated above.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The Federal Emergency Management Agency (FEMA) makes the final determinations listed below for the new or modified

flood hazard information for each community listed. Notification of these changes has been published in newspapers of local circulation and 90 days have elapsed since that publication. The Deputy Associate Administrator for Insurance and Mitigation has resolved any appeals resulting from this notification.

This final notice is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4104, and 44 CFR part 67. FEMA has developed criteria for floodplain management in floodprone areas in accordance with 44 CFR part 60.

Interested lessees and owners of real property are encouraged to review the new or revised FIRM and FIS report available at the address cited below for each community or online through the FEMA Map Service Center at <https://msc.fema.gov>.

The flood hazard determinations are made final in the watersheds and/or communities listed in the table below. (Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Michael M. Grimm,
Assistant Administrator for Risk Management, Department of Homeland Security, Federal Emergency Management Agency.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2020-0002]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency; DHS.

ACTION: Notice; correction.

SUMMARY: On August 21, 2020, FEMA published in the **Federal Register** a changes in flood hazard determination notice that contained an erroneous table. This notice provides corrections to that table, to be used in lieu of the information published at 85 FR 41608. The table provided here represents the changes in flood hazard determinations and communities affected for the City of Sanibel, Lee County, Florida.

DATES: These flood hazard determinations will be finalized on the dates listed in the table below and

revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below.

FOR FURTHER INFORMATION CONTACT: Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are

not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more

stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

Correction

In the changes in flood hazard determination notice published at 85 FR 41608 in the August 21, 2020 issue of the **Federal Register**, FEMA published a table with erroneous information. This table contained inaccurate Date of modification for the City of Sanibel, Lee County, Florida.

In this document, FEMA is publishing a table containing the accurate

information. The information provided below should be used in lieu of that previously published.

(Catalog of Federal Domestic Assistance No. 97.022, "Flood Insurance.")

Michael M. Grimm,

Assistant Administrator for Risk Management, Department of Homeland Security, Federal Emergency Management Agency.

State and county	Location and case No.	Chief executive officer of community	Community map repository	Date of modification	Community No.
Florida: Lee	City of Sanibel (20-04-2943P).	The Honorable Kevin Ruane, Mayor, City of Sanibel, 800 Dunlop Road, Sanibel, FL 33957.	Community Services Department, 800 Dunlop Road, Sanibel, FL 33957.	Nov. 10, 2020	120402

[FR Doc. 2020-24982 Filed 11-10-20; 8:45 am]

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID FEMA-2020-0002; Internal Agency Docket No. FEMA-B-2067]

Changes in Flood Hazard Determinations

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: This notice lists communities where the addition or modification of Base Flood Elevations (BFEs), base flood depths, Special Flood Hazard Area (SFHA) boundaries or zone designations, or the regulatory floodway (hereinafter referred to as flood hazard determinations), as shown on the Flood Insurance Rate Maps (FIRMs), and where applicable, in the supporting Flood Insurance Study (FIS) reports, prepared by the Federal Emergency Management Agency (FEMA) for each community, is appropriate because of new scientific or technical data. The FIRM, and where applicable, portions of the FIS report, have been revised to reflect these flood hazard determinations through issuance of a Letter of Map Revision (LOMR), in accordance with Federal Regulations. The LOMR will be used by insurance agents and others to calculate appropriate flood insurance premium rates for new buildings and the contents of those buildings. For rating purposes, the currently effective community number is shown in the table below and must be used for all new policies and renewals.

DATES: These flood hazard determinations will be finalized on the dates listed in the table below and

revise the FIRM panels and FIS report in effect prior to this determination for the listed communities.

From the date of the second publication of notification of these changes in a newspaper of local circulation, any person has 90 days in which to request through the community that the Deputy Associate Administrator for Insurance and Mitigation reconsider the changes. The flood hazard determination information may be changed during the 90-day period.

ADDRESSES: The affected communities are listed in the table below. Revised flood hazard information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

Submit comments and/or appeals to the Chief Executive Officer of the community as listed in the table below. **FOR FURTHER INFORMATION CONTACT:** Rick Sacbibit, Chief, Engineering Services Branch, Federal Insurance and Mitigation Administration, FEMA, 400 C Street SW, Washington, DC 20472, (202) 646-7659, or (email) patrick.sacbibit@fema.dhs.gov; or visit the FEMA Mapping and Insurance eXchange (FMIX) online at https://www.floodmaps.fema.gov/fhm/fmx_main.html.

SUPPLEMENTARY INFORMATION: The specific flood hazard determinations are not described for each community in this notice. However, the online location and local community map repository address where the flood hazard determination information is available for inspection is provided.

Any request for reconsideration of flood hazard determinations must be submitted to the Chief Executive Officer

of the community as listed in the table below.

The modifications are made pursuant to section 201 of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4105, and are in accordance with the National Flood Insurance Act of 1968, 42 U.S.C. 4001 *et seq.*, and with 44 CFR part 65.

The FIRM and FIS report are the basis of the floodplain management measures that the community is required either to adopt or to show evidence of having in effect in order to qualify or remain qualified for participation in the National Flood Insurance Program (NFIP).

These flood hazard determinations, together with the floodplain management criteria required by 44 CFR 60.3, are the minimum that are required. They should not be construed to mean that the community must change any existing ordinances that are more stringent in their floodplain management requirements. The community may at any time enact stricter requirements of its own or pursuant to policies established by other Federal, State, or regional entities. The flood hazard determinations are in accordance with 44 CFR 65.4.

The affected communities are listed in the following table. Flood hazard determination information for each community is available for inspection at both the online location and the respective community map repository address listed in the table below. Additionally, the current effective FIRM and FIS report for each community are accessible online through the FEMA Map Service Center at <https://msc.fema.gov> for comparison.

BILLING CODE 9110-12-P

DEPARTMENT OF HOMELAND SECURITY

Transportation Security Administration

[Docket No. TSA-2011-0008]

Aviation Security Advisory Committee (ASAC) Meeting

AGENCY: Transportation Security Administration, DHS.

ACTION: Committee management; notice of federal advisory committee meeting.

SUMMARY: The Transportation Security Administration (TSA) will hold a meeting of the Aviation Security Advisory Committee (ASAC) to discuss issues listed in the Meeting Agenda section below. This meeting will be open to the public as stated in the Supplemental section below. In light of the current COVID-19 public health crisis, the meeting will be virtual.

DATES: The Committee will meet on Thursday, December 10, 2020, from 10:00 a.m. to 1:00 p.m. Eastern Standard Time. This meeting may end early if all business is completed. As listed in the Public Participation section below, requests to attend the meeting must be received by November 30, 2020. Requests to address the Committee must be received by November 30, 2020.

ADDRESSES: The meeting will be held virtually by teleconference. See Public Participation below for information on how to register to attend the meeting.

Attendance information will be provided upon registration.

FOR FURTHER INFORMATION CONTACT:

Tamika McCree Elhilali, Aviation Security Advisory Committee Designated Federal Official, Transportation Security Administration (TSA-28), 601 South 12th Street, Arlington, VA 20598-6028, ASAC@tsa.dhs.gov, 571-227-2632.

SUPPLEMENTARY INFORMATION:

I. Background

Notice of this meeting is given in accordance with the Aviation Security Stakeholder Participation Act, codified at 49 U.S.C. 44946. Pursuant to 49 U.S.C. 44946(f), ASAC is exempt from the Federal Advisory Committee Act (5 U.S.C. App.). The ASAC provides advice and industry perspective to the Administrator of TSA on aviation security matters, including the development, refinement, and implementation of policies, programs, rulemaking, and security directives pertaining to aviation security.

II. Meeting Agenda

The Committee will meet to discuss items listed in the agenda below:

- Legislative Update
- Subcommittee and Work Group briefings on calendar year (CY) 2020 activities, key issues, and areas of focus for CY 2021:
 - Air Cargo
 - Airlines
 - Airports
 - General Aviation
 - Insider Threat
 - International Aviation
 - Security Technology

- Public Comments
- Discussion of the CY 2021 Committee Agenda
- Closing Comments and Adjournment

III. Public Participation

The meeting will be open to the public and attendance may be limited due to technological and telephonic meeting constraints. Members of the public, all non-ASAC members, and non-TSA staff who wish to attend must register via email by submitting their name, contact number, and affiliation to ASAC@tsa.dhs.gov by November 30, 2020. Attendees will be admitted on a first-to-register basis. Attendance information will be provided upon registration.

In addition, members of the public must make advance arrangements by November 30, 2020 to present oral or written statements. The statements must specifically address issues pertaining to the items listed in the Meeting Agenda section; requests must be submitted via email to: ASAC@tsa.dhs.gov. The public comment period will begin at approximately 12:00 p.m. and will end at 1:00 p.m. Speakers are requested to limit their comments to three minutes.

The ASAC and TSA are committed to providing equal access to this virtual meeting for all participants. If you need alternative formats or services because of a disability, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section before November 30, 2020.

Dated: November 5, 2020. .

Eddie D. Mayenschein,

Assistant Administrator, Policy, Plans, and Engagement (PPE).

BILLING CODE 9110-05-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615-0117]

Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: myE-Verify Program

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 30-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

DATES: Comments are encouraged and will be accepted until December 14, 2020.

ADDRESSES: Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be submitted via the Federal eRulemaking Portal website at <http://www.regulations.gov> under e-Docket ID number USCIS-2010-0014. All submissions received must include the OMB Control Number 1615-0117 in the body of the letter, the agency name and Docket ID USCIS-2010-0014.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshombres, Chief, Telephone number (240) 721-3000 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at <http://www.uscis.gov>, or call the USCIS

Contact Center at (800) 375-5283; TTY (800) 767-1833.

SUPPLEMENTARY INFORMATION:

Comments

The information collection notice was previously published in the **Federal Register** on August 18, 2020, at 85 FR 50831, allowing for a 60-day public comment period. USCIS did not receive any comments in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: <http://www.regulations.gov> and enter USCIS-2010-0014 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at <http://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of <http://www.regulations.gov>.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection Request:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* myE-Verify Program.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* G-1499; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals and Households. myE-Verify (previously E-Verify Self Check) allows workers in the United States to enter data into the E-Verify system to ensure that the information relating to their eligibility to work is correct and accurate. This is necessary so that workers in the United States can correct their records before a hiring decision is made. This will lead to a more reliable and accurate E-Verify system that works better for both employers and employees.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection Form G-1499 is 250,000 and the estimated hour burden per response is 0.083 hour. Of this 250,000, an estimated 75,000 respondents will need to correct information that may have been entered incorrectly to continue using myE-Verify; this estimated burden per response is 0.083 hour. Of this 250,000, an estimated 10,000 respondents may be required to pursue further action to correct their records at the appropriate agency; this estimated burden per response is 1.183 hour. Of this 250,000, an estimated 25,000 respondents will be required to provide additional information for a second Authentication Check; this estimated burden per response is 0.25 hour.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 45,153 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is \$0. There are no mailing or other costs associated with this collection of information.

Dated: November 5, 2020.

Samantha L. Deshommes,

Chief, Regulatory Coordination Division,
Office of Policy and Strategy, U.S. Citizenship
and Immigration Services, Department of
Homeland Security.

BILLING CODE 9111-97-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615-NEW]

Agency Information Collection Activities; New Collection: Report of Request/Receipt of Benefits by Aliens

AGENCY: U.S. Citizenship and
Immigration Services, Department of
Homeland Security.

ACTION: 60-Day notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed new collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.*, the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until January 11, 2021.

ADDRESSES: All submissions received must include the OMB Control Number 1615-NEW in the body of the letter, the agency name and Docket ID USCIS-2020-0020. Submit comments via the Federal eRulemaking Portal website at <https://www.regulations.gov> under e-Docket ID number USCIS-2020-0020. USCIS is limiting communications for this Notice as a result of USCIS' COVID-19 response actions.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number 240-721-3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking

information about the status of their individual cases can check Case Status Online, available at the USCIS website at <https://www.uscis.gov>, or call the USCIS Contact Center at 800-375-5283 (TTY 800-767-1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: <https://www.regulations.gov> and entering USCIS-2020-0020 in the search box. All submissions will be posted, without change, to the Federal eRulemaking Portal at <https://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of <https://www.regulations.gov>.

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* New Collection.

(2) *Title of the Form/Collection:* Report of Request/Receipt of Benefits by Aliens.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* G-1558; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Federal Government; State, local or Tribal Government. This information collection is used by any benefit granting agency to report a request of or receipt of certain benefits by an alien.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection G-1558 is 2,400 and the estimated hour burden per response is 0.833 hour.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 2,000 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is \$18,600.

Dated: November 5, 2020.

BILLING CODE 9111-97-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-6050-N-04]

Relief From HUD Public Housing and Section 8 Requirements Available During CY 2020 and CY 2021 to Public Housing Agencies To Assist With Recovery and Relief Efforts on Behalf of Families Affected by Presidentially Declared Major Disasters

AGENCY: Office of the Assistant
Secretary for Public and Indian
Housing, HUD.

ACTION: Notification.

SUMMARY: This notification advises the public that HUD, in order to more effectively and expeditiously respond to Presidentially declared Major Disaster Declarations (MDDs), is establishing for calendar year (CY) 2020 and CY 2021 an expedited process for the review of requests for relief from HUD regulatory and/or administrative requirements ("HUD requirements") for Public Housing Agencies (PHAs) located in

counties that are included in MDDs. PHAs located in areas covered by MDDs issued for which a related disaster occurs during CY 2020 and CY 2021 may request waivers of certain HUD Public Housing and Section 8 requirements and receive expedited review of such requests utilizing the flexibilities and expedited waiver process set out by this notification.

DATES: This document announces the waivers and flexibilities set out in this document as of the date of signature.

FOR FURTHER INFORMATION CONTACT: Tesia Irinyenikan, Office of Field Operations, Office of Public and Indian Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 3180, Washington, DC 20410-5000, or email PIH_Disaster_Relief@hud.gov. Persons with hearing or speech impairments may access this number via TTY by calling the Federal Relay Service at 800-877-8339 (this is a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background Information

On several occasions in recent years, after Presidential disaster declarations, HUD has published documents announcing waivers and flexibilities available to PHAs, Tribes, and Tribally Designated Housing Entities (TDHEs) located in areas covered by MDDs.¹ In the interest of expediting HUD's ability to provide administrative relief to PHAs in MDD declaration areas, based on HUD's past experience, HUD is publishing this notification on waivers and flexibilities that will be made

¹ See, Regulatory and Administrative Waivers Granted for Public and Indian Housing Programs to Assist with Recovery and Relief in Hurricane Katrina Disaster Areas, 70 FR 57716 (October 3, 2005); Regulatory and Administrative Waivers Granted for Public and Indian Housing Programs to Assist with Recovery and Relief in Hurricane Rita Disaster Areas; and Additional Administrative Relief for Hurricane Katrina, 70 FR 66222 (November 1, 2005); Extension of Regulatory and Administrative Waivers Granted for Public and Indian Housing Programs to Assist With Recovery and Relief in Hurricanes Katrina, Rita, and Wilma Disaster Areas, 71 FR 78022 (December 27, 2006); Regulatory and Administrative Waivers Granted for Public and Indian Housing Programs to Assist with Recovery and Relief in Hurricane Wilma Disaster Areas, 71 FR 12988 (March 13, 2006); Regulatory and Administrative Waivers Granted for Public and Indian Housing Programs to Assist with Recovery and Relief in Superstorm Sandy Disaster Areas, 77 FR 71439 (November 30, 2012); Relief From HUD Requirements Available to PHAs to Assist With Recovery and Relief Efforts on Behalf of Families Affected by Hurricanes Harvey, Irma, Maria and Future Natural Disasters Where Major Disaster Declarations Might be Issued in 2017, 82 FR 46821 (October 6, 2017) and; Relief From HUD Requirements Available During Calendar Year (CY) 2018 to Public Housing Agencies To Assist With Recovery and Relief Efforts on Behalf of Families Affected by Presidentially-Declared Major Disasters, 83 FR 46180 (September 12, 2018).

available to PHAs on an expedited basis following MDDs. The notification is organized as follows:

- Section II describes the flexibilities that are currently available to MDD PHAs under statutes and/or regulations. MDD PHAs may avail themselves of these flexibilities, following the process described in Section IV of the notification.

- Section III describes certain HUD requirements that, if waived, may facilitate an MDD PHA's ability to participate in relief and recovery efforts. An MDD PHA may request a waiver of a HUD requirement not listed in Section III and receive expedited review of the request if the MDD PHA demonstrates that the waiver is needed to assist in its relief and recovery efforts. An MDD PHA may not adopt any requested waiver prior to receiving HUD approval.

- Section IV describes certain HUD requirements that, if granted an exception, may facilitate an MDD PHA's ability to participate in relief and recovery efforts. An MDD PHA may request an exception not listed in Section IV and receive expedited review of the request if the MDD PHA demonstrates that the exception is needed to assist in its relief and recovery efforts. An MDD PHA may not adopt any requested exception prior to receiving HUD approval.

- Section V provides the instructions for submitting waiver requests.

- Section VI states that a Finding of No Significant Impact (FONSI) with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

Waiver requests approved by HUD pursuant to this notification will be published in the **Federal Register** and will identify the MDD PHAs receiving such approvals. The process that HUD will use in assessing applications for waivers and flexibilities is covered below.

This notification applies only to Presidentially declared MDDs that occurred during CY 2020 and CY 2021. However, upon finding of good cause, HUD may consider extending the time period of regulatory waivers or flexibilities described below, subject to statutory limitations and pursuant to 24 CFR 5.110.

Pursuant to the authority provided under the Coronavirus Aid, Relief and Economic Security (CARES) Act (Pub. L. 116-36), HUD established waivers, administrative flexibilities and alternative requirements for numerous statutory and regulatory requirements

for the Public Housing program, the Housing Choice Voucher (HCV) program, Indian Housing Block Grant (IHBG) program and the Indian Community Development Block Grant (ICBG) program. The Office of Public and Indian Housing's CARES Act-related Policy Notices, and other COVID-19 resources can be found at HUD's Public and Indian Housing COVID-19 Resources web page, https://www.hud.gov/program_offices/public_indian_housing/covid_19_resources.

Some of the regulatory waivers and exceptions found in Notice PIH 2020-13 (HA), REV-1 (COVID-19 Statutory and Regulatory Waivers Alternative Requirements . . .), or its replacement, are also applicable to MDD PHAs. However, the authority, pursuant to the CARES Act, to waive statutory requirements is not applicable under this notice. An MDD PHA seeking a waiver of a HUD regulation listed below, or of any other HUD requirement needed to assist the MDD PHA in its relief and recovery efforts must submit a waiver request pursuant to the process that will be provided in Section V of this notification. HUD will not approve an MDD PHA's or other recipient's request to waive a fair housing, civil rights, labor standards, or HUD's environmental review requirements.

II. Flexibilities That are Available to MDD PHAs During CY 2020 and CY 2021

HUD is exercising discretionary authority from section 106 of the Department of Housing and Urban Development Reform Act of 1989 and consistent with 24 CFR 5.110 to provide relief from the requirements described in this section of this notification. Upon application to HUD and appropriate documentation of good cause, HUD may approve, as noted below, regulatory relief for disaster relief and recovery to MDD PHAs. If a PHA needs the regulatory relief for more time, please submit documentation of good cause, and HUD may consider extending the flexibilities, subject to statutory limitations and pursuant to 24 CFR 5.110, to facilitate an MDD PHA's ability to participate in relief and recovery efforts. Unless otherwise stated, the deadline for requesting waivers is four months after the initial MDD.

A. *24 CFR 990.145(b) (Public housing dwelling units with approved vacancies).* Section 990.145 lists the categories of vacant public housing units that are eligible to receive operating subsidy and are therefore considered to be "approved vacancies." Under Section 990.145(b)(2), a PHA shall receive operating subsidy for units

that are vacant due to a federally declared, state declared or other declared disaster, subject to prior HUD approval, on a project-by-project basis. If an MDD PHA has a unit that has been vacated due to a Presidentially-declared disaster, then the MDD PHA, with HUD approval, may treat the unit as an "approved vacancy." Upon the request of an MDD PHA and HUD approval, on a case-by-case basis, such units may be considered approved vacancies for a period not to exceed 12 months from the date of HUD approval.

III. HUD Requirements That May Be Waived

For an MDD PHA, HUD will review requests for waivers of HUD requirements on an expedited basis. This section lists procedural and substantive requirements for regulatory waivers in event of an MDD. An MDD PHA may also request a waiver of a HUD requirement not listed in this section and receive expedited review of the request if the MDD PHA documents that the waiver is needed for major disaster relief and/or recovery. If a PHA needs the regulatory relief for more time, please submit documentation of good cause, and HUD may consider extending the waiver, subject to statutory limitations and pursuant to 24 CFR 5.110, to facilitate an MDD PHA's ability to participate in relief and recovery efforts. PHAs should note that waivers of essential program requirements such as property inspection or income verification will not be granted in their entirety although modifications or requirements may be considered. Also, HUD's ability to grant waivers or approval of alternative requirements imposed by statute is limited to expressed statutory authority. PHAs should go through the hierarchy of verifying income as found in PIH Notice 2018-24 if sources of income are difficult to find. Similarly, while the requirement for Housing Quality Standards (HQS) inspections cannot be waived, HUD can consider variations to the acceptability criteria to HQS in case of disaster (under the authority of § 982.401(a)(4)).

An MDD PHA seeking a waiver of a HUD requirement listed below or of any other HUD requirement needed to assist the MDD PHA in its relief and recovery efforts must submit a waiver request pursuant to the process that will be provided in Section IV of this notification. The request must be submitted to HUD not later than 4 months following the date of the relevant disaster declaration. HUD will not approve an MDD PHA's or other recipient's request to waive a fair

housing, civil rights, labor standards, or environmental protection requirement.

A. *24 CFR 905.400(i)(5) (Capital Fund Formula; Replacement Housing Factor to reflect formula need for projects with demolition or disposition occurring on or after October 1, 1998, and prior to September 30, 2013)*. Section 905.400 describes the Capital Fund formula. Section 905.400(i)(5) limits the use of replacement housing funds to the development of new public housing. To help address housing needs because of the displacement caused by the MDD, HUD will consider waiving section 905.400(i)(5) to allow all unexpended Capital Fund Replacement Housing Factor Grants to be used for public housing modernization. Should HUD waive this requirement, the waiver will be in effect for funds obligated within 12 months from the date of HUD approval.

B. *24 CFR 982.503(c) (HUD approval of exception payment standard amount)*. 24 CFR 982.503(c) authorizes HUD to approve an exception payment standard amount that is higher than 110 percent of the published fair market rent (FMR). Typically, a PHA must provide data about the local market to substantiate the need for an exception payment standard. In a major disaster declaration situation, however, the typical data sources may fail to capture conditions on the ground. In these cases, HUD considers the most recently available data on the rental market, prior to the disaster, then estimates the number of households seeking housing units in the wake of the disaster to arrive at an emergency exception payment standard amount. In the event of a disaster, HUD will consider, based on this data, whether exception payment standard amounts up to 150 percent of the FMR have a good cause justification even in the absence of supporting data. If so, an MDD PHA may request this payment standard. Upon approval by HUD, an exception payment standard adopted pursuant to this notification may be adopted for any Housing Assistance Payments (HAP) contract entered as of the effective date of this notification. HUD intends for these exception payment standards to remain in effect until HUD implements changes to the FMRs in the affected areas under an MDD. MDD PHAs are reminded that increased per-family costs resulting from the use of exception payment standards may result in a reduction in the number of families assisted or may require other cost-saving measures for an MDD PHA to stay within its funding limitations.

C. *24 CFR 982.633(a) (Occupancy of home)*. This section establishes the

requirement that PHAs may make HAP for homeownership assistance only while a family resides in their home and must stop HAP no later than the month after a family moves out. HUD will consider a request from an MDD PHA wishing to waive this requirement to allow families displaced from their homes located in areas affected by MDD(s) to comply with mortgage terms or make necessary repairs. A PHA requesting a waiver of this type must show good cause by demonstrating that the family is not already receiving assistance from another source. *Note:* An MDD PHA must separately request a waiver of the requirement at § 982.312 (that a family be terminated from the program if they have been absent from their home for 180 consecutive calendar days).

D. *Waivers not identified FR-6050-N-04*. An MDD PHA may request a waiver of HUD requirement not listed in Section III of this notice. Please be reminded that HUD will only consider waivers or flexibilities subject to statutory limitations and pursuant to 24 CFR 5.110. COVID-19 MDDs are not covered under this notice. Agencies seeking administrative or regulatory relief due to a COVID-19 MDD, must follow the guidance prescribed in specific COVID-19 notices issued by the Office of Public and Indian Housing, pursuant to the Coronavirus Aid, Relief and Economic Security (CARES) Act (Pub. L. 136-36). See *e.g.*, PIH Notice 2020-05, issued April 10, 2020.

IV. Exceptions

Notice PIH 2012-10, Section 8(c) (Verification of the Social Security Number (SSN)). PHAs are required to transmit form HUD-50058 not later than 30 calendar days following receipt of an applicant's or participant's SSN documentation. HUD is willing to consider a request to extend this requirement to 90 calendar days, for a period not to exceed 12 months from the date of HUD approval.

V. Notification and Expedited Waiver Process During CY 2020 and CY2021—Instructions

HUD has developed a checklist (Attachment A to this notification) that an MDD PHA must complete and submit to take advantage of the provisions identified in this notification and the expedited review of waiver requests. Each provision on the checklist indicates the documentation that must accompany the MDD PHA's submission. Each request for a waiver (Section 3 of the checklist) must include a good-cause justification stating why

the waiver is needed for the PHA's relief and recovery efforts.

To complete the checklist, take the following steps:

1. *Copy and paste* the checklist found in Attachment A into a new document on your computer, saving the document with the following filename format: FR-6050-N-04-XX123. The Federal Register docket number (FR-6050-N-04), a hyphen, then your Agency's HA Code. For example: FR-6050-N-04-AL123. HUD will consider other methods of submission as needed.

2. Complete the section titled "Information about Requesting Agency" in its entirety. This section must be complete. An official of the MDD PHA must sign where indicated. If the information about the requesting agency is incomplete or the checklist has not been signed, then the checklist will be returned without review.

3. Complete Sections 1, 2, and/or 3 of the checklist, as applicable, noting the documentation (if any) that accompanies each provision.

4. Address an email to both PIH_Disaster_Relief@hud.gov and your HUD Field Office Public Housing Director. In the subject line, type "PHA Name—PHA Code—MDD Disaster Relief—Month and Year". For example, Allenway Housing Authority—AL123—MDD Disaster Relief—October 2020.

5. Attach the completed checklist, letter of justification, and all supporting documentation as applicable to your email.

6. Click "Send."

Checklists and any supporting documentation or information must be submitted not later than 4 months following the MDD. Requests submitted AFTER that time period will not be considered except in special cases outside of the agency's control.

VI. Finding of No Significant Impact

A Finding of No Significant Impact (FONSI) with respect to the environment has been made in accordance with HUD regulations at 24 CFR part 50, which implement section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)).

The FONSI is available for public inspection between 8 a.m. and 5 p.m. weekdays in the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW, Room 10276, Washington, DC 20410-0500. Due to security measures at the HUD Headquarters building, an advance appointment to review the docket file must be scheduled by calling the Regulations Division at 202-708-3055

(this is not a toll-free number). Hearing- or speech-impaired individuals may access this number through TTY by calling the Federal Relay Service at 800-877-8339 (this is a toll-free number).

R. Hunter Kurtz,

Assistant Secretary for Public and Indian Housing.

Attachment A—Checklist

Relief From HUD Public Housing and Section 8 Requirements Available During CY 2020 and CY 2021 to Public Housing Agencies To Assist With Recovery and Relief Efforts on Behalf of Families Affected by Presidentially Declared Major Disasters

Information About Requesting Agency

NAME OF PHA: _____
 PHA CODE: _____
 Address: _____
 City or Locality: (must be covered under PDD) _____
 Parish: _____
 Date of Submission: _____
 Signature of PHA Official: _____
 Name/Title of PHA Official: _____
 Phone number of PHA Official: _____

Section 1. List the Presidentially-Declared Major Disaster your agency is under: _____

Section 2. Insert an "X" next to the applicable flexibilities.

An MDD PHA may adopt the flexibilities listed below.

A. 24 CFR 990.145(b) (Public housing dwelling units with approved vacancies). (Public Housing Financial Management Division)

My agency requests HUD approval to treat certain vacant public housing units in our inventory as approved vacancies for the continued receipt of Operating Subsidy. I have attached a project-by-project listing of the units for which this approval is requested. I understand that any units that remain vacant shall be considered approved vacancies only for a period not to exceed 12 months from the date of HUD approval.

Section 3. Insert an "X" next to the applicable waiver requests.

An MDD PHA may request a waiver of a HUD requirement listed below or of any other HUD requirement and receive expedited review of the request, if the MDD PHA demonstrates that the waiver is needed for relief and recovery purposes. Each request must include a good-cause justification for the waiver, documenting why the waiver is needed for such purposes. No requested waiver may be implemented unless and until written approval from HUD has been obtained.

A. 24 CFR 905.400(i)(5) (Capital Fund Formula; Replacement Housing Factor to reflect formula needs for projects with demolition or disposition occurring on or after October 1, 1998, and prior to September 2013). (Office of Capital Improvements)

My agency requests a waiver of 24 CFR 905.400(i)(5) to allow for the use of Capital Fund Replacement Housing Factor grants with undisbursed balances for public housing modernization. I understand that this waiver will be in effect only for funds obligated within 12 months from the date of HUD approval.

B. 24 CFR 982.503(c) (HUD approval of exception payment standard amount). (Housing Voucher Management and Operations)

My agency requests to establish an exception payment standard amount that is higher than 110 percent of the published fair market rent (FMR). I have attached our proposed emergency exception payment standard schedule, which shows both the dollar amounts requested and those amounts as a percentage of the FMRs in effect at the time of the request. I understand that any approved exception payment standard will remain in effect until HUD revises the FMRs for the area. I also understand that increased per-family costs resulting from the use of such exception payment standard may result in a reduction in the number of families assisted or may require my agency to adopt other cost-saving measures.

C. 24 CFR 982.633(a) (Occupancy of home). (Housing Voucher Management and Operations)

My agency requests a waiver of 24 CFR 982.633(a) so that we may continue HAP for homeownership for families displaced from their homes if needed to comply with mortgage terms or make necessary repairs. We have determined that the family is not receiving assistance from another source. I understand that such payments must cease if the family remains absent from their home for more than 180 consecutive calendar days.

D. Waivers not identified in the PIH Notice, *Relief from HUD Public Housing and Section 8 Requirements Available During CY2020 and 2021 to PHAs to Assist with Recovery and Relief Efforts on Behalf of Families Affected by Presidentially Declared Major Disasters* [FR-6050-N-04].

My agency seeks waivers of the HUD requirements listed below. None of the requests are to waive a fair housing, civil rights, labor standards, or environmental review requirements. I have included documentation justifying the need for the waivers.

Section 4. Insert an “X” next to the applicable exception request.

An MDD PHA may request an exception of the HUD requirement listed below and receive expedited review of the request, if the MDD PHA demonstrates that the exception is needed for relief and recovery purposes. Each request must include a good-cause justification for the exception, documenting why the exception is needed for such purposes. No requested exception may be implemented unless and until written approval from HUD has been obtained.

Notice PIH 2012–10, Section 8(c) (Verification of the Social Security Number (SSN)). (Real Estate Assessment Center)

My agency requests a waiver of section 8(c) of Notice PIH 2012–10 to allow for the submission of Form HUD–50058 90 calendars days from receipt of an applicant’s or participant’s SSN documentation. I understand that this waiver will be in effect for a period not to exceed 12 months from the date of HUD approval.

Regulation	Description
<i>Example: 24 CFR 982.54.</i>	<i>Example: A waiver of this regulation will facilitate our agency’s capacity to participate in relief and recovery efforts by</i>

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R1–ES–2020–N144; FXES1113010000–212–FF01E00000]

Endangered Species; Receipt of Recovery Permit Application

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of permit application; request for comments.

SUMMARY: We, the U.S. Fish and Wildlife Service, have received an application for a permit to conduct activities intended to enhance the propagation and survival of endangered species under the Endangered Species Act of 1973, as amended. We invite the public and local, State, Tribal, and Federal agencies to comment on this application. Before issuing the requested permit, we will take into consideration any information that we receive during the public comment period.

DATES: We must receive your written comments on or before December 14, 2020.

ADDRESSES:

Document availability and comment submission: Submit a request for a copy of the application and related documents and submit any comments by one of the following methods. All requests and comments should specify the applicant name and application number (e.g., Dana Ross TE–08964A–2):

- *Email:* permitsR1ES@fws.gov.
- *U.S. Mail:* Marilet Zablan, Program Manager, Restoration and Endangered Species Classification, Ecological Services, U.S. Fish and Wildlife Service, Portland Regional Office, 911 NE 11th Avenue, Portland, OR 97232–4181.

FOR FURTHER INFORMATION CONTACT:

Colleen Henson, Regional Recovery Permit Coordinator, Ecological Services, (503) 231–6131 (phone); permitsR1ES@fws.gov (email). Individuals who are hearing or speech impaired may call the Federal Relay Service at 1–800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite the public to comment on an application for a permit under section 10(a)(1)(A) of the Endangered Species Act, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The requested permit would

allow the applicant to conduct activities intended to promote recovery of species that are listed as endangered under the ESA.

Background

With some exceptions, the ESA prohibits activities that constitute take of listed species unless a Federal permit is issued that allows such activity. The ESA’s definition of “take” includes such activities as pursuing, harassing, trapping, capturing, or collecting, in addition to hunting, shooting, harming, wounding, or killing.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct activities with endangered or threatened species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. These activities often include such prohibited actions as capture and collection. Our regulations implementing section 10(a)(1)(A) for these permits are found in the Code of Federal Regulations (CFR) at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Application Available for Review and Comment

Proposed activities in the following permit request are for the recovery and enhancement of propagation or survival of the species in the wild. The ESA requires that we invite public comment before issuing this permit. Accordingly, we invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to this application. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies.

Application No.	Applicant, city, state	Species	Location	Take activity	Permit action
TE–48278D	Archipelago Research and Conservation, Kalaheo, HI.	Band-rumped storm-petrel (<i>Oceanodroma castro</i>) Hawaiian petrel (<i>Pterodroma sandwichensis</i>).	Hawaii	Harass by survey; monitor nests; capture; handle; band; biosample; conduct scent research; telemetry/tagging; release; install train and burrow cameras, artificial burrows, and social attraction arrays; and salvage.	Amend.

Public Availability of Comments

Written comments we receive become part of the administrative record

associated with this action. Before including your address, phone number, email address, or other personal identifying information in your

comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time.

While you can request in your comment that we withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, will be made available for public disclosure in their entirety.

Next Steps

If we decide to issue a permit to the applicant listed in this notice, we will publish a notice in the **Federal Register**.

Authority

We publish this notice under section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Marjorie Nelson,

*Acting Assistant Regional Director—
Ecological Services, Pacific Region.*

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before October 24, 2000, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted electronically by November 27, 2020.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line “Public Comment on <property or proposed district name, (County) State>.” If you have no access to email you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 7228, Washington, DC 20240.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the

National Park Service before October 24, 2000. Pursuant to Section 60.13 of 36 CFR part 60, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1183]

Certain Foldable Reusable Drinking Straws and Components and Accessories Thereof; Commission Determination Not To Review an Initial Determination Granting a Motion for Partial Summary Determination and Finding a Violation of Section 337; Request for Written Submissions on Remedy, the Public Interest, and Bonding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (“ID”) (Order No. 18) of the presiding administrative law judge (“ALJ”) granting complainant’s motion for partial summary determination and finding a violation of section 337. The Commission requests written submissions from the parties, interested government agencies, and interested persons on the issues of remedy, the public interest, and bonding, under the schedule set forth below.

FOR FURTHER INFORMATION CONTACT: Cathy Chen, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone 202–205–2392. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission’s electronic docket (EDIS) at <https://edis.usitc.gov>. For help

accessing EDIS, please email EDIS3Help@usitc.gov. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: The Commission instituted this investigation on November 13, 2019, based on a complaint filed on behalf of The Final Co. LLC ("Final" or "Complainant") of Santa Fe, New Mexico. 84 FR 61639 (Nov. 13, 2019). The complaint, as amended, alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 ("section 337"), in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain foldable reusable drinking straws and components and accessories thereof by reason of infringement of claims 1-12, 14-17, and 20 of U.S. Patent No. 10,123,641 ("the '641 patent"). *Id.* The complaint further alleges that a domestic industry exists. *Id.* The Commission's notice of investigation names seventeen respondents, specifically, Huizhou Sinri Technology Company Limited of Guangdong, China; Hebei Serun Import and Export Trade Co., Ltd. of Hebei, China; Dongguan Stirling Metal Products Co., Ltd. of Guangdong, China; Ningbo Wwpartner Plastic Manufacture Co., Ltd. of Zhejiang, China; Shenzhen Yuanzhen Technology Co., Ltd. of Shenzhen, China; Jiangmen Boyan Houseware Co., Ltd. of Guangdong, China; Shanghai Rbin Industry And Trade Co., Ltd. of Shanghai, China; Jiangmen Shengke Hardware Products Co., Ltd. of Guangdong, China; Funan Anze Trading Co., Ltd. of Anhui, China; Hangzhou Keteng Trade Co., Ltd. of Zhejiang, China; Hunan Jiudi Shiye Import And Export Trading Co., Ltd. of Hunan, China ("Hunan Jiudi"); Shenzhen Yaya Gifts Co., Ltd. of Guangdong, China; Ningbo Weixu International Trade Co., Ltd. of Zhejiang, China ("Ningbo Weixu"); Ningbo Beland Commodity Co., Ltd. of Zhejiang, China; Xiamen One X Piece Imp. & Exp. Co., Ltd. of Fujian, China; Hunan Champion Top Technology Co., Ltd. of Hunan, China; and Yiwu Lizhi Trading Firm of Zhejiang, China. *Id.* at 61639-40. The Office of Unfair Import Investigations ("OUII") is also named as a party in this investigation. *Id.* at 61640.

The Commission previously terminated respondents Ningbo Weixu

and Hunan Jiudi from the investigation based on Complainant's partial withdrawal of the complaint. *See* Order No. 7 (Feb. 13, 2019), *unreviewed by* Comm'n Notice (Mar. 9, 2020).

On March 16, 2020, the Commission found the remaining fifteen respondents (collectively, the "Defaulted Respondents") in default. Order No. 8 (March 3, 2020), *unreviewed by* Notice (March 16, 2020).

On April 7, 2020, Complainant filed a motion for summary determination of a violation of section 337 by the Defaulted Respondents. On May 5, 2020, Complainant filed a motion for leave to supplement the MSD, and the ALJ granted leave on May 8, 2020. On May 27, 2020, OUII filed its response in support of Complainant's motion.

On July 17, 2020, the ALJ issued Order No. 13, an ID granting in part the motion for summary determination. *See* Order No. 13 (July 17, 2020). The ALJ found that Complainant established importation of the accused products and infringement of claims 1-12 and 14-17 of the '641 patent by Defaulted Respondents and that Complainant satisfied the technical prong of the domestic industry requirement. The ALJ also found, however, that Complainant did not satisfy the economic prong of the domestic industry requirement, and so the ALJ did not find a violation of section 337 by the Defaulted Respondents. The Commission determined not to review Order No. 13. *See* Notice (Aug. 18, 2020).

Also, on July 17, 2020, the ALJ issued Order No. 14, which required the parties to choose from several options on how to proceed. *See* Order No. 14, at 1-2 (July 17, 2020). On July 31, 2020, Complainant and OUII filed a joint response to Order No. 14. The joint response stated that Complainant would file an additional motion for summary determination on the remaining issues raised in the subject ID as well as a motion to amend the complaint to drop its assertion of claim 20 of the '641 patent.

On August 7, 2020, Complainant filed a motion for partial summary determination of the economic prong of the domestic industry requirement, a remedy in the form of a general exclusion order, and a bond of 100% during the Presidential review period. On August 14, 2020, Complainant moved to replace Exhibit 11C within its motion for summary determination, which was granted by the ALJ. *See* Order No. 16 (Aug. 20, 2020). On August 24, 2020, OUII filed its response in support of Complainant's motion.

On August 17, 2020, Complainant moved to terminate the investigation

with respect to asserted claim 20 by reason of withdrawal of the complaint allegations. On August 26, 2020, the ALJ granted the motion to withdraw claim 20. *See* Order No. 17 (Aug. 26, 2020), *unreviewed by* Notice (Sep. 15, 2020).

On September 22, 2020, the ALJ issued the subject ID granting Complainant's motion for partial summary determination that a domestic industry exists with respect to Complainant's research and development investments under section 337(a)(3)(C) and finding a violation of section 337 with respect to claims 1-12 and 14-17 of the '641 patent by the Defaulted Respondents. Order No. 18 also denied Complainant's motion for summary determination under section 337(a)(3)(B). The ALJ's denial of summary determination in Order No. 18 as to section 337(a)(3)(B) is not an initial determination subject to Commission review and hence is not adopted by the Commission and is not a part of the Commission's determination. No petitions for review of the subject ID were filed.

The ALJ concurrently issued a Recommended Determination ("RD") on the issues of remedy and bonding. The RD recommends the issuance of a general exclusion order and setting the bond during the period of Presidential review in the amount of one hundred percent (100%) of the entered value.

Having reviewed the record of the investigation, including the subject ID and the parties' submissions to the ALJ, the Commission has determined not to review the subject ID. Accordingly, the Commission adopts the ID's finding that a violation of section 337 has occurred in connection with claims 1-12 and 14-17 of the '641 patent.

In connection with the final disposition of this investigation, the statute authorizes issuance of, *inter alia*, (1) an exclusion order that could result in the exclusion of the subject articles from entry into the United States; and/or (2) cease and desist orders that could result in the respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, see *Certain Devices for Connecting Computers via Telephone*

Lines, Inv. No. 337-TA-360, USITC Pub. No. 2843, Comm'n Op. at 7-10 (Dec. 1994).

The statute requires the Commission to consider the effects of that remedy upon the public interest. The public interest factors the Commission will consider include the effect that an exclusion order would have on: (1) The public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve, disapprove, or take no action on the Commission's determination. See Presidential Memorandum of July 21, 2005, 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: Parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Such submissions should address the recommended determination by the ALJ on remedy and bonding.

In their initial submissions, Complainant is also requested to identify the remedy sought and Complainant and OUII are requested to submit proposed remedial orders for the Commission's consideration. Complainant is further requested to state the date that the Asserted Patent expires, to provide the HTSUS subheadings under which the accused products are imported and to supply the identification information for all known importers of the products at issue in this investigation. The initial written submissions and proposed remedial orders must be filed no later than close of business on Monday, November 23, 2020. Reply submissions must be filed no later than the close of business on Monday, November 30, 2020. No further submissions on these issues will be

permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. The Commission's paper filing requirements in 19 CFR 210.4(f) are currently waived. 85 FR 15798 (March 19, 2020). Submissions should refer to the investigation number (Inv. No. 337-TA-1183) in a prominent place on the cover page and/or the first page. (See Handbook for Electronic Filing Procedures, https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf). Persons with questions regarding filing should contact the Secretary, (202) 205-2000.

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. A redacted non-confidential version of the document must also be filed simultaneously with any confidential filing. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements. All nonconfidential written submissions will be available for public inspection on EDIS.

The Commission vote for this determination took place on November 5, 2020.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: November 5, 2020.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-130 (Fifth Review)]

Chloropicrin From China; Termination of Five-Year Review

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission instituted the subject five-year review on August 3, 2020 (85 FR 46722) to determine whether revocation of the antidumping duty order on chloropicrin from China would be likely to lead to continuation or recurrence of material injury. The Department of Commerce issued notice that it was revoking the order effective September 22, 2020, because the domestic interested parties did not file a timely response in this review (see *Chloropicrin from the People's Republic of China: Final Results of Sunset Review and Revocation of Order*, issued November 2, 2020).

DATES: Applicable September 22, 2020 (effective date of revocation of order).

FOR FURTHER INFORMATION CONTACT: Jason Duncan (202-205-3432), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202-205-2000. General information concerning the Commission may also be obtained by accessing its internet server (<https://www.usitc.gov>).

Authority: This review is being terminated under authority of title VII of the Tariff Act of 1930 and pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)). This notice is published pursuant to § 207.69 of the Commission's rules (19 CFR 207.69).

By order of the Commission.

Issued: November 5, 2020.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE**Foreign Claims Settlement
Commission****[F.C.S.C. Meeting and Hearing Notice No.
08–20]****Sunshine Act Meeting**

The Foreign Claims Settlement Commission, pursuant to its regulations (45 CFR part 503.25) and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice in regard to the scheduling of open meetings as follows:

TIME AND DATE: Thursday, November 19, 2020, at 10:00 a.m.

PLACE: This meeting will be held by teleconference. There will be no physical meeting place.

STATUS: Open. Members of the public who wish to observe the meeting via teleconference should contact Patricia M. Hall, Foreign Claims Settlement Commission, Tele: (202) 616–6975, two business days in advance of the meeting. Individuals will be given call-in information upon notice of attendance to the Commission.

MATTERS TO BE CONSIDERED: 10:00 a.m.— Issuance of Proposed Decisions under the Guam World War II Loyalty Recognition Act, Title XVII, Public Law 114–328.

CONTACT PERSON FOR MORE INFORMATION: Requests for information, advance notices of intention to observe an open meeting, and requests for teleconference dial-in information may be directed to: Patricia M. Hall, Foreign Claims Settlement Commission, 441 G St NW, Room 6234, Washington, DC 20579. Telephone: (202) 616–6975.

Brian M. Simkin,
Chief Counsel.

[FR Doc. 2020–25107 Filed 11–9–20; 11:15 am]

BILLING CODE 4410–BA–P

SUMMARY: The Department of Labor’s (DOL) Employment and Training Administration, pursuant to the Council on Environmental Quality Regulations implementing procedural provisions of the National Environmental Policy Act (NEPA), and the Department’s own implementing regulations, provides the Department’s final determination that the proposed disposal of 10 parcels totaling 0.79 acre of excess property in the residential neighborhood on two city blocks to the west of the New Orleans Job Corps Center campus will not have a significant adverse impact on the environment.

DATES: These findings are effective as of November 12, 2020.

ADDRESSES: Department of Labor, 200 Constitution Avenue NW, Room N–4460, Attn: Jose Velazquez, Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Jose Velazquez; Telephone (202) 693–3099 (this is not a toll free number).

SUPPLEMENTARY INFORMATION: A public notice of availability of the draft environmental assessment (EA), which determined that the disposal of .79 acres of excess property near the New Orleans Job Corps Center would not have a significant impact on the environment, was published in the New Orleans Advocate in New Orleans, Louisiana, on November 25, 2019. The review period extended for 15 days, ending on December 10, 2019. No public comments were received. No changes to the findings of the EA have been made.

Implementation of the proposed action alternative will not have significant impacts on the human environment. The determination is sustained by the analysis in the EA, agency, and Native American tribal consultation, the inclusion and consideration of public review, and the capability of mitigations to reduce or avoid impacts. Any adverse environmental effects that could occur are no more than minor in intensity, duration and context and less-than-significant. As described in the EA, there are no highly uncertain or controversial impacts, unique or unknown risks, significant cumulative effects, or elements of precedence. There are no previous, planned, or implemented actions, which, in combination with the proposed action alternative, would have significant effects on the human environment. Requirements of NEPA have been satisfied, and preparation of an

Environmental Impact Statement is not required.

John Pallasch,

Assistant Secretary for Employment and Training, Labor.

DEPARTMENT OF LABOR

Agency Information Collection Activities; Comment Request; Nondiscrimination Compliance Information Reporting

AGENCY: United States Department of Labor—Office of the Assistant Secretary for Administration and Management (DOL-OASAM).

ACTION: Notice of information collections and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the DOL is soliciting public comments regarding this OASAM-sponsored information collection to the Office of Management and Budget (OMB) for review and approval.

DATES: Comments pertaining to this information collection are due on or before January 11, 2021.

ADDRESSES:

Electronic submission: You may submit comments and attachments electronically at <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Mail submission: 200 Constitution Ave. NW, Room S-5315, Washington, DC 2020.

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the DOL, including whether the information will have practical utility; (2) if the information will be processed and used in a timely

manner; (3) the accuracy of the DOL's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT:

Anthony May by telephone at 202-693-4129 (this is not a toll-free number) or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: The

Department of Labor collects the Nondiscrimination Compliance Information Reporting data to help ensure a recipient of certain DOL Federal financial assistance programs does not discriminate in the administration, management, or operation of programs and activities. Activities covered by this information collection include:

- A grant applicant providing assurance that the applicant is aware of and, as a condition of receipt of Federal financial assistance, agrees to comply with the assurance requirements;
- a DOL funds recipient maintaining a record of E.O. characteristics data and a log of any E.O. complaints for activities under an applicable DOL funded program;
- a person who believes a relevant E.O. requirement may have been violated filing a complaint with either the funds recipient or with the DOL Civil Rights Center;
- a State periodically filing a plan outlining administrative methods the State will use to ensure funds are not used in a discriminatory manner; and
- a DOL funds recipient posting required notices.

The DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an Information Collection Review cannot be for more than three (3) years without renewal. The DOL notes that currently approved information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review.

Agency: DOL-OASAM.

Title of Collection: Nondiscrimination Compliance Information Reporting.

OMB Control Number: 1225-0077.

Total Estimated Number of Respondents: 69,603.

Total Estimated Number of Responses: 56,425,453.

Total Estimated Annual Time Burden: 350,450 hours.

Total Estimated Annual Other Costs Burden: \$0.

Authority: 44 U.S.C. 3506(c)(2)(A).

Dated: November 5, 2020.

BILLING CODE 4510-04-P

DEPARTMENT OF LABOR

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Susan Harwood Training Grant Program Grantee Quarterly Progress Report

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Occupational Safety and Health Administration (OSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before December 14, 2020.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Crystal Rennie by telephone at 202-693-0456, or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: Section 21 of the OSH Act (29 U.S.C. 670) authorizes OSHA to conduct directly, or through grants and contracts, education and training courses. These courses must ensure an adequate number of qualified personnel to fulfill the purposes of the OSH Act, provide them with short-term training, inform them of the importance and proper use of safety and health equipment, and train employers and workers to recognize, avoid, and prevent unsafe and unhealthful working conditions. Under Section 21, OSHA awards training grants to nonprofit organizations to provide part of the required training. The agency requires organizations that receive these grants to submit quarterly progress reports that provide information on their grant-funded training activities; these reports allow OSHA to monitor the grantee's performance and to determine if an organization is using grant funds as specified in the grant application. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on April 28, 2020 (85 FR 23534).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL-OSHA.

Title of Collection: Susan Harwood Grant Program Grantee Quarterly Progress Report.

OMB Control Number: 1218-0100.

Affected Public: Private Sector—Not-for-profit organizations.

Total Estimated Number of Respondents: 110.

Total Estimated Number of Responses: 440.

Total Estimated Annual Time Burden: 6,160 hours.

Total Estimated Annual Other Costs Burden: \$0.

Authority: 44 U.S.C. 3507(a)(1)(D).

Occupational Safety and Health Administration

[Docket No. OSHA-2010-0052]

Material Hoists, Personnel Hoists, and Elevators; Posting Requirements; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning the proposal to extend the Office of Management and Budget's (OMB) approval of the information collection requirements specified in the Material Hoists, and Elevators; Posting Requirements.

DATES: Comments must be submitted (postmarked, sent, or received) by January 11, 2021.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at <http://www.regulations.gov>, which is the Federal e-Rulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages you may fax them to the OSHA Docket Office at (202) 693-1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, OSHA Docket No. OSHA-2010-0052, Occupational Safety and Health Administration, U.S. Department of Labor, Room N-3653, 200 Constitution Avenue NW, Washington, DC 20210. *Please note:* While OSHA's Docket Office is continuing to accept and process submissions by regular mail, due to the COVID-19 pandemic, the Docket Office is closed to the public and not able to receive submissions to the docket by hand, express mail, messenger, and courier service.

Instructions: All submissions must include the agency name and the OSHA docket number (OSHA-2010-0039) for the Information Collection Request (ICR). All comments, including any personal information you provide, such as social security number and date of birth, are placed in the public docket without change, and may be made available online at <http://www.regulations.gov>. For further information on submitting comments see the "Public Participation" heading in the section of this notice titled

SUPPLEMENTARY INFORMATION. *Docket:* To read or download comments or other material in the docket, go to <http://www.regulations.gov> or the OSHA Docket Office at the above address. All documents in the docket (including this **Federal Register** notice) are listed in the <http://www.regulations.gov> index; however, some information (e.g., copyrighted material) is not publicly available to read or download from the website. All submissions, including copyrighted material, are available for inspection

and copying at the OSHA Docket Office. You also may contact Theda Kenney at the below phone number to obtain a copy of the ICR.

FOR FURTHER INFORMATION CONTACT: Theda Kenney or Seleda Perryman, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone (202) 693-2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

Paragraph (a)(2) of the Material Hoists, Personnel Hoists, and Elevators Standard requires that the rated load capacities, recommended operating speeds, and special hazard warnings or instructions be posted on cars and platforms. Paragraph (b)(1)(i) requires that operating rules for material hoists be established and posted at the operator's station of the hoist. These rules shall include signal system and allowable line speed for various loads. Paragraph (c)(10) requires that cars be provided with a capacity and data plate secured in a conspicuous place on the car or crosshead.

These posting requirements are used by the operator and crew of the material and personnel hoists to determine how to use the specific machine and how much it will be able to lift as assembled in one or a number of particular configurations. If not properly used, the

machine would be subject to failures, endangering the workers in the immediate vicinity.

Paragraph (c)(15) requires that a test and inspection of all functions and safety devices be made following the assembly and erection of hoists. The test and inspection are to be conducted under the supervision of a competent person. A similar inspection and test is required following major alteration of an existing installation. All hoists shall be inspected and tested at three-month intervals. A certification record (the most recent) of the test and inspection must be kept on file, including the date the test and inspection was completed, the identification of the equipment and the signature of the person who performed the test and inspection. This certification ensures that the equipment has been tested and is in safe operating condition. The most recent certification record will be disclosed to a Compliance Safety and Health Officer during an OSHA inspection.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the collection of information (paperwork) requirements contained in the Material Hoists, Personnel Hoists, and Elevators; Posting Requirements. The agency requests an adjustment increase of 1,943 burden hours (from 8,104 hours to 10,047 burden hours).

Type of Review: Extension of a currently approved collection.

Title: Material Hoists, Personnel Hoists, and Elevators; Posting Requirements. (29 CFR 1926.552).

OMB Number: 1218-0231.

Affected Public: Business or other for-profit.

Number of Respondents: 10,047.

Frequency of Response: On occasion.

Total Responses: 37,451.

Average Time per Response: OSHA estimates that it an inspector will take approximately 30 minutes (30/60) to perform and record the required maintenance inspection on each Material Hoist.

Estimated Total Burden Hours: 10,047.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows: (1) Electronically at <http://www.regulations.gov>, which is the Federal e-Rulemaking Portal; (2) by facsimile; or (3) by hard copy. All comments, attachments, and other material must identify the agency name and the OSHA docket number for this ICR (Docket No. OSHA-2010-0052). You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the agency can attach them to your comments.

Because of security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693-2350, (TTY) (877) 889-5627).

Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as your social security number and date of birth. Although all submissions are listed in the <http://www.regulations.gov> index, some information (*e.g.*, copyrighted material) is not publicly available to read or download from this website. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> website to submit comments and access the docket is available at the website's "User Tips" link. Contact the OSHA Docket Office for information about materials not available from the website, and for

assistance in using the internet to locate docket submissions.

V. Authority and Signature

Loren Sweatt, Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 *et seq.*) and Secretary of Labor's Order No. 1–2012 (77 FR 3912).

Signed at Washington, DC, on November 5, 2020.

Loren Sweatt,

Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA–2011–0010]

Fire Protection in Shipyard Employment Standard; Extension of the Office of Management and Budget's (OMB) Approval of Information Collection (Paperwork) Requirements

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Request for public comments.

SUMMARY: OSHA solicits public comments concerning the proposal to extend the Office of Management and Budget's (OMB) approval of the information collection requirements specified in the Fire Protection in Shipyard Employment Standard.

DATES: Comments must be submitted (postmarked, sent or received) by January 11, 2021.

ADDRESSES:

Electronically: You may submit comments and attachments electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal. Follow the instructions online for submitting comments.

Facsimile: If your comments, including attachments, are not longer than 10 pages, you may fax them to the OSHA Docket Office at (202) 693–1648.

Mail, hand delivery, express mail, messenger, or courier service: When using this method, you must submit a copy of your comments and attachments to the OSHA Docket Office, Docket No. OSHA–2011–0010, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3653,

200 Constitution Avenue NW, Washington, DC 20210. Please note: While OSHA's Docket Office is continuing to accept and process submissions by regular mail, due to the COVID–19 pandemic, the Docket Office is closed to the public and not able to receive submissions to the docket by hand, express mail, messenger, and courier service.

Instructions: All submissions must include the agency name and the OSHA docket number (OSHA–2011–0010) for the Information Collection Request (ICR). All comments, including any personal information you provide, such as social security number and date of birth, are placed in the public docket without change, and may be made available online at <http://www.regulations.gov>. For further information on submitting comments, see the "Public Participation" heading in the section of this notice titled **SUPPLEMENTARY INFORMATION.**

Docket: To read or download comments or other materials in the docket, go to <http://www.regulations.gov> or the OSHA Docket Office at the above address. All documents in the docket (including this **Federal Register** notice) are listed in the <http://www.regulations.gov> index; however, some information (e.g., copyrighted material) is not publicly available to read or download through the website. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. You may also contact Theda Kenney at (202) 693–2222 to obtain a copy of the ICR.

FOR FURTHER INFORMATION CONTACT: Seleda Perryman or Theda Kenney, Directorate of Standards and Guidance, OSHA, U.S. Department of Labor; telephone (202) 693–2222.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of the continuing effort to reduce paperwork and respondent (*i.e.*, employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accordance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate. The Occupational Safety and Health Act of

1970 (OSH Act) (29 U.S.C. 651 *et seq.*) authorizes information collection by employers as necessary or appropriate for enforcement of the OSH Act or for developing information regarding the causes and prevention of occupational injuries, illnesses, and accidents (29 U.S.C. 657). The OSH Act also requires that OSHA to obtain such information with minimum burden upon employers, especially those operating small businesses, and to reduce to the maximum extent feasible unnecessary duplication of efforts in obtaining information (29 U.S.C. 657).

The Fire Protection in Shipyard Employment Standard specifies a number of collection of information (paperwork) requirements. In general, the Standard requires employers to develop a written fire safety plan and written statements or policies that contain information about fire watches and fire response duties and responsibilities. The Standard also requires the employer to obtain medical exams for certain workers and to develop training programs and to train employees exposed to fire hazards. Additionally, the Standard requires employers to create and maintain records to certify that employees have been made aware of the details of the fire safety plan and that employees have been trained as required by the Standard.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for proper performance of the Agency's functions, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply—for example, by using automated or other technological information collection and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend its approval of the information collection requirements specified in the Fire Protection in Shipyard Employment Standard. The agency is requesting an adjustment increase in burden hours from 6,603 to 16,251 burden hours, a total difference of 9,648 burden hours. This adjustment increase is a result of an increase in the number

of affected workers in small businesses even though the number of affected establishments decreased according to the 2017 NAICS codes. The agency will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the information collection requirements.

Type of Review: Extension of a currently approved collection.

Title: Fire Protection in Shipyard Employment Standard (29 CFR part 1915, subpart P).

OMB Control Number: 1218-0248.

Affected Public: Business or other for-profits.

Number of Respondents: 588.

Number of Responses: 184,921.

Frequency of Responses: Quarterly; annually.

Average Time per Response: Various.

Estimated Total Burden Hours: 16,251.

Estimated Cost (Operation and Maintenance): \$0.

IV. Public Participation—Submission of Comments on This Notice and Internet Access to Comments and Submissions

You may submit comments in response to this document as follows:

(1) Electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal; (2) by facsimile (fax); or (3) by hard copy. All comments, attachments, and other materials must identify the agency name and the OSHA docket number (Docket No. OSHA-2011-0010) for the ICR. You may supplement electronic submissions by uploading document files electronically. If you wish to mail additional materials in reference to an electronic or facsimile submission, you must submit them to the OSHA Docket Office (see the section of this notice titled **ADDRESSES**). The additional materials must clearly identify your electronic comments by your name, date, and the docket number so the agency can attach them to your comments.

Due to security procedures, the use of regular mail may cause a significant delay in the receipt of comments. For information about security procedures concerning the delivery of materials by hand, express delivery, messenger, or courier service, please contact the OSHA Docket Office at (202) 693-2350, (TTY) (877) 889-5627.

Comments and submissions are posted without change at <http://www.regulations.gov>. Therefore, OSHA cautions commenters about submitting personal information such as social security numbers and dates of birth. Although all submissions are listed in

the <http://www.regulations.gov> index, some information (e.g., copyrighted material) is not publicly available to read or download from this website.

All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Information on using the <http://www.regulations.gov> website to submit comments and access the docket is available at the website's "User Tips" link. Contact the OSHA Docket Office for information about materials not available from the website, and for assistance in using the internet to find docket submissions.

V. Authority and Signature

Loren Sweatt, Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health, directed the preparation of this notice. The authority for this notice is the Paperwork Reduction Act of 1995 (44 U.S.C. 3506 et seq.) and Secretary of Labor's Order No. 1-2012 (77 FR 3912).

Signed at Washington, DC, on November 5, 2020.

Loren Sweatt,

Principal Deputy Assistant Secretary of Labor for Occupational Safety and Health.

LEGAL SERVICES CORPORATION

Sunshine Act Meetings; Notice

DATE AND TIME: The Legal Services Corporation's Board of Directors will meet remotely on Monday, November 16, 2020. The meeting will commence at 2:30 p.m., EDT, and will continue until the conclusion of the Board's agenda.

LOCATION: Public Notice of Virtual Remote Meeting

Legal Services Corporation (LSC) will be conducting the November 16, 2020 meeting remotely via ZOOM.

PUBLIC OBSERVATION: Unless otherwise noted herein, the Board meeting will be open to public observation. Members of the public who wish to participate remotely may do so by following the directions provided below.

DIRECTIONS FOR OPEN SESSION:

- To join the Zoom meeting by computer, please click this link.
- *Meeting ID:* 928 0183 3531.
- *Passcode:* 909322.
- To join the Zoom meeting with one tap from your mobile phone, please click below:

+16468769923,92801833531# US (New York)
+13017158592,92801833531# US (Germantown)

- To join the Zoom meeting by phone, please use the information below:

- Dial by your location:

+1 646 876 9923 US (New York)
+1 301 715 8592 US (Germantown)
+1 312 626 6799 US (Chicago)
+1 346 248 7799 US (Houston)
+1 408 638 0968 US (San Jose)
+1 669 900 6833 US (San Jose)
+1 253 215 8782 US (Tacoma)

Meeting ID: 928 0183 3531. Find your local number: <https://lsc-gov.zoom.us/j/acEGSfYILW>.

- When connected to the call, please immediately "MUTE" your telephone. Members of the public are asked to keep their telephones muted to eliminate background noises. To avoid disrupting the meeting, please refrain from placing the call on hold if doing so will trigger recorded music or other sound. From time to time, the Chair may solicit comments from the public.

STATUS OF MEETINGS: Open.

MATTERS TO BE CONSIDERED:

Board of Directors

1. Approval of agenda
2. Approval of minutes of the Board's Open Session meeting of October 20, 2020
3. Consider and act on the Board of Directors' transmittal to accompany the Inspector General's Semiannual Report to Congress for the period of April 1, 2020 through September 30, 2020
4. Public comment
5. Consider and act on other business
6. Consider and act on adjournment of meeting

CONTACT PERSON FOR INFORMATION:

Karly Satkowiak, Special Counsel and Katherine Ward, Executive Assistant to the Vice President & General Counsel, at (202) 295-1633. Questions may be sent by electronic mail to FR_NOTICE_QUESTION@lsc.gov.

ACCESSIBILITY: LSC complies with the Americans with Disabilities Act and Section 504 of the 1973 Rehabilitation Act. Upon request, meeting notices and materials will be made available in alternative formats to accommodate individuals with disabilities. Individuals needing other accommodations due to disability in order to attend the meeting in person or telephonically should contact Katherine Ward, at (202) 295-1500 or FR_NOTICE_QUESTION@lsc.gov, at least 2 business days in advance of the meeting. If a request is made without advance notice, LSC will make every effort to accommodate the request but cannot guarantee that all requests can be fulfilled.

Dated: November 9, 2020.

Katherine Ward,

Executive Assistant to the Vice President for Legal Affairs and General Counsel.

NATIONAL FOUNDATION OF THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

42nd Meeting of the National Museum and Library Services Board

AGENCY: Institute of Museum and Library Services (IMLS), National Foundation of the Arts and the Humanities (NFAH).

ACTION: Notice of meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act, notice is hereby given that the National Museum and Library Services Board will meet to advise the Director of the Institute of Museum and Library Services (IMLS) with respect to duties, powers, and authority of IMLS relating to museum, library, and information services, as well as coordination of activities for the improvement of these services.

DATES: The meeting will be held on December 10, 2020, from 11:00 a.m. Eastern Time until adjourned.

ADDRESSES: The meeting will convene virtually. In order to enhance openness and public participation, virtual

meeting and audio conference technology will be used during the meeting. Instructions will be sent to all public registrants.

FOR FURTHER INFORMATION CONTACT:

Katherine Maas, Project Specialist and Alternate Designated Federal Officer, Institute of Museum and Library Services, Suite 4000, 955 L'Enfant Plaza North SW, Washington, DC 20024; (202) 653-4798; kmaas@imls.gov (<mailto:kmaas@imls.gov>).

SUPPLEMENTARY INFORMATION: The National Museum and Library Services Board is meeting pursuant to the National Museum and Library Service Act, 20 U.S.C. 9105a, and the Federal Advisory Committee Act (FACA), as amended, 5 U.S.C. App.

The 42nd Meeting of the National Museum and Library Services Board, which is open to the public, will convene online at 11:00 a.m. Eastern Time on December 10, 2020.

The agenda for the 42nd Meeting of the National Museum and Library Services Board will be as follows:

- I. Call to Order
- II. Approval of Minutes of the 41st Meeting
- III. Director's Welcome and Update
- IV. Governmental Engagement and Legislative Update
- V. Financial Update
- VI. Pandemic Response Overview, Including an Update on the REopening Archives, Libraries, and Museums (REALM) Project
- VII. Pandemic Response and Issues Facing the Museum Sector
- VIII. Pandemic Response and Issues Facing the Library Sector
- IX. Applying Lessons To Strengthen Community Engagement

If you wish to attend the virtual public session of the meeting, please inform IMLS as soon as possible, but no later than close of business on December 8, 2020, by contacting Katherine Maas at kmaas@imls.gov (<mailto:kmaas@imls.gov>). Virtual meeting and audio instructions will be sent to all public registrants. Please provide notice of any special needs or accommodations by November 24, 2020.

Dated: November 6, 2020.

Kim Miller,

Senior Grants Management Specialist, Institute of Museum and Library Services.

BILLING CODE 7590-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90352; File No. SR-CboeBZX-2020-078]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Equity Transaction Fee Rebate Tiers

November 5, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 2, 2020, Cboe BZX Exchange, Inc. (the "Exchange" or "BZX") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (the "Exchange" or "BZX") is filing with the Securities and Exchange Commission ("Commission") a proposed rule change to amend the fee schedule. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/), at

the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**1. Purpose**

The Exchange proposes to amend its fee schedule applicable to its equities trading platform ("BZX Equities") to: (1) Update the Supplemental Incentive Program Tiers; (2) update the Lead Market Maker ("LMM") Add Volume Tiers and (3) eliminate the Non-Displayed Tape A Tier 1, effective November 2, 2020.

The Exchange first notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. More specifically, the Exchange is only one of 16 registered equities exchanges, as well as a number of alternative trading systems and other off-exchange venues that do not have similar self-regulatory responsibilities under the Exchange Act, to which market participants may direct their order flow. Based on publicly available information,³ no single registered equities exchange has more than 18% of the market share. Thus, in such a low-concentrated and highly competitive market, no single equities exchange possesses significant pricing power in the execution of order flow. The Exchange in particular operates a "Maker-Taker" model whereby it pays credits to members that provide liquidity and assesses fees to those that remove liquidity. The Exchange's fee schedule sets forth the standard rebates and rates applied per share for orders

³ See Cboe Global Markets, U.S. Equities Market Volume Summary, Month-to-Date (October 28, 2020), available at https://markets.cboe.com/us/equities/market_statistics/.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

that provide and remove liquidity, respectively. Currently, for orders priced at or above \$1.00, the Exchange provides a standard rebate of \$0.0020 per share for orders that add liquidity and assesses a fee of \$0.0030 per share for orders that remove liquidity. For orders priced below \$1.00, the Exchange provides a standard rebate of \$0.0009 per share for orders that add liquidity and assesses a fee of 0.30% of total dollar value for orders that remove liquidity. Additionally, in response to the competitive environment, the Exchange also offers tiered pricing which provides Members opportunities to qualify for higher rebates or reduced fees where certain volume criteria and thresholds are met. Tiered pricing provides an incremental incentive for Members to strive for higher tier levels, which provides increasingly higher benefits or discounts for satisfying increasingly more stringent criteria.

Proposed Updates to the Supplemental Incentive Program Tiers

The Exchange currently offers three different Supplemental Incentive Program Tiers under footnote 1 of the Fee Schedule, wherein a Member may receive an additional rebate for qualifying orders where a Member adds a certain Tape ADAV⁴ as a percentage of that Tape's TCV. Specifically, the Supplemental Incentive Program Tiers offered are as follows:

- Supplemental Incentive Program—Tape A Tier offers an additional rebate of \$0.0001 for orders yielding fee code V⁵ where a Member has a Tape A ADAV greater than or equal to 0.30% of the Tape A TCV;
- Supplemental Incentive Program—Tape B Tier offers an additional rebate of \$0.0001 for orders yielding fee code B⁶ where a Member has a Tape B ADAV greater than or equal to 0.30% of the Tape B TCV; and
- Supplemental Incentive Program—Tape C Tier offers an additional rebate of \$0.0001 for orders yielding fee code Y⁷ where a Member has a Tape C ADAV greater than or equal to 0.30% of the Tape C TCV;

The proposed rule change amends the tiers' criteria by increasing the percentage of Tape ADAV over Tape TCV from 0.30% to 0.40% for Supplemental Incentive Program—Tape

A and Tape C Tiers, and from 0.30% to 0.50% for Supplemental Incentive Program—Tape B Tier. The proposed rule change to the Supplemental Incentive Program Tiers does not alter any of the additional rebate amounts currently offered. Although the proposed changes to the thresholds result in more stringent criteria, Members still have an opportunity to receive the additional rebate if they meet the applicable tier threshold. Moreover, the proposed changes are designed to encourage Members to increase their Displayed liquidity in Tape A, B and C securities on the Exchange, thereby contributing to a deeper and more liquid market, which benefits all market participants and provides greater execution opportunities on the Exchange.

Proposed Updates to the LMM Add Volume Tiers

Under the Exchange's LMM Program, the Exchange offers daily incentives for LMMs in securities listed on the Exchange for which the LMM meets certain Minimum Performance Standards.⁸ Such daily incentives are determined based on the number of Cboe-listed securities for which the LMM meets such Minimum Performance Standards and the average auction volume across such securities. Generally, the more LMM Securities⁹ for which the LMM meets the Minimum Performance Standards and the higher the auction volume across those securities, the greater the total daily payment to the LMM. Currently, the Exchange offers 3 LMM Add Volume Tiers [sic] under footnote 14 of the Fee Schedule, which provides an additional rebate for applicable LMM orders. Specifically, the Supplemental Incentive Program Tiers currently offered are as follows:

- LMM Add Volume Tier 1 provides an additional rebate of \$0.0001 for orders yielding fee codes B, V and Y where an LMM (1) has an ADAV greater than or equal to 0.20% of the TCV, (2)

⁸ As defined in Rule 11.8(e)(1)(E), the term "Minimum Performance Standards" means a set of standards applicable to an LMM that may be determined from time to time by the Exchange. Such standards will vary between LMM Securities depending on the price, liquidity, and volatility of the LMM Security in which the LMM is registered. The performance measurements will include: (A) Percent of time at the NBBO; (B) percent of executions better than the NBBO; (C) average displayed size; and (D) average quoted spread. For additional detail, see Original LMM Filing.

⁹ As defined in Rule 11.8(e)(1)(D), the term "LMM Security" means a Listed Security that has an LMM. As defined in Rule 11.8(e)(1)(B), the term "Listed Security" means any ETP or any Primary Equity Security or Closed-End Fund listed on the Exchange pursuant to Rule 14.8 or 14.9.

has an Average Aggregate Daily Auction Volume in LMM Securities greater than or equal to 500,000 and (3) is enrolled in at least 75 LMM Securities.

- LMM Add Volume Tier 2 provides an additional rebate of \$0.0006 for orders yielding fee codes V and "HV"¹⁰ where an LMM (1) is enrolled in at least 50 LMM Securities, and (2) has a Tape A ADAV greater than or equal to 0.10% of the Tape A TCV;

- LMM Add Volume Tier 3 provides an additional rebate of \$0.0003 for orders yielding fee codes B and "HB"¹¹ where an LMM (1) is enrolled in at least 50 LMM Securities, and (2) has a Tape B ADAV greater than or equal to 0.20% of the Tape B TCV;

- LMM Add Volume Tier 4 provides an additional rebate of \$0.0006 for orders yielding fee codes Y and "HY"¹² where an LMM (1) is enrolled in at least 50 LMM Securities, and (2) has a Tape C ADAV greater than or equal to 0.10% of the Tape C TCV.

The Exchange proposes to update the TCV thresholds in LMM Add Volume Tiers 2, 3 and 4 as follows below. The Exchange notes that the additional rebates currently provided in each tier remain the same, as do the remaining criteria for each tier.

- To meet the proposed criteria in Tier 2, a Member must add a Tape A ADV greater than or equal to 0.20% (instead of 0.10%) of the Tape A TCV.

- To meet the proposed criteria in Tier 3, a Member must add a Tape B ADV greater than or equal to 0.35% (instead of 0.20%) of the Tape B TCV.

- To meet the proposed criteria in Tier 4, a Member must add a Tape C ADV greater than or equal to 0.20% (instead of 0.10%) of the Tape C TCV.

Although the proposed changes to these thresholds result in more stringent criteria, Members will still have an opportunity to receive the additional rebates for meeting the applicable tier thresholds. Moreover, the proposed changes are designed to encourage LMMs to increase both their Displayed and Non-Displayed liquidity in Tape A, B and C securities on the Exchange, thereby contributing to a deeper and more liquid market, which benefits all market participants and provides greater execution opportunities on the Exchange.

¹⁰ Appended to non-displayed orders that add liquidity (Tape A) and are assessed a standard rebate of \$0.00150.

¹¹ Appended to non-displayed orders that add liquidity (Tape B) and are assessed a standard rebate of \$0.00150.

¹² Appended to non-displayed orders that add liquidity (Tape C) and are assessed a standard rebate of \$0.00150.

⁴ "ADAV" means average daily added volume calculated as the number of shares added per day.

⁵ Appended to orders that add liquidity to BZX (Tape A) and offered a rebate of \$0.002000 per share.

⁶ Appended to orders that add liquidity to BZX (Tape B) and offered a rebate of \$0.00200 per share.

⁷ Appended to orders that add liquidity to BZX (Tape C) and offered a rebate of \$0.00200 per share.

Non-Displayed Add Volume Tape A Tier 1

The Exchange also proposes to eliminate Non-Displayed Add Volume Tape A Tier 1, which is currently described under footnote 1 of the fees schedule. Particularly, this tier applies to orders yielding fee code HV and provides a \$0.00275 per share rebate to Members that add an ADV greater than or equal to 0.20% of the TCV as Non-Displayed orders that yield fee codes HI or HV. Particularly, no Member has reached this tier in several months and the Exchange therefore no longer wishes to, nor is it required to, maintain such tiers.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,¹³ in general, and furthers the objectives of Section 6(b)(4),¹⁴ in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members, issuers and other persons using its facilities. The Exchange operates in a highly competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or incentives to be insufficient. The proposed rule changes reflect a competitive pricing structure designed to incentivize market participants to direct their order flow to the Exchange, which the Exchange believes would enhance market quality to the benefit of all Members. The Exchange notes that relative volume-based incentives and discounts have been widely adopted by exchanges, including the Exchange, and are reasonable, equitable and non-discriminatory because they are open to all members on an equal basis and provide additional benefits or discounts that are reasonably related to (i) the value to an exchange's market quality and (ii) associated higher levels of market activity, such as higher levels of liquidity provision and/or growth patterns. Additionally, as noted above, the Exchange operates in highly competitive market. The Exchange is only one of several equity venues to which market participants may direct their order flow, and it represents a small percentage of the overall market. It is also only one of several maker-taker exchanges. Competing equity exchanges offer similar tiered pricing structures, including schedules of rebates and fees

that apply based upon members achieving certain volume and/or growth thresholds, as well as assess similar fees or rebates for similar types of orders, to that of the Exchange. These competing pricing schedules, moreover, are presently comparable to those that the Exchange provides, including the pricing of comparable criteria and/or fees and rebates.

Regarding the proposed updates to the Supplemental Incentive and LMM Add Volume Tiers, the Exchange believes that the proposed tiers are reasonable because each of the tiers, as modified, continue to be available to all Members and provide Members an opportunity to receive an additional rebate, albeit using more stringent criteria. Additionally, the Exchange also believes that the tiers, even as amended, are reasonable, equitable and not unfairly discriminatory because competing equity exchanges offer similar tiered pricing structures with comparable criteria to that of the Supplemental Incentive¹⁵ and LMM Add Volume Tiers.¹⁶ The Exchange also believes that the current additional rebates continue to be commensurate with the proposed criteria. That is, the additional rebates reasonably reflect the difficulty in achieving the corresponding criteria as amended.

The Exchange further believes that the proposed criteria and corresponding additional rebates per tier are reasonable and equitable. Generally, Tape B experiences less variability in terms of broader market share, whereas Tape A and C tend to experience more volatility. As a result, the Exchange has observed that Members generally submit less Tape volume in connection with Tape A and Tape C. For example, the average Tape ADAV as a percentage of Tape TCV in Tape A and Tape C from LMM Members in the last month was lower than their average Tape ADAV over Tape TCV in Tape B. As a result, the Exchange believes Members are more easily able to meet a volume requirement for Tape B, and therefore, it is equitable to provide for a slightly higher ADAV Tape B threshold of Tape B TCV than that for Tape A and C.

The Exchange believes the proposed changes are also a reasonable means to incentivize Members to continue to provide liquidity adding, displayed volume (Supplemental Incentive Tiers)

and displayed and non-displayed volume (for LMM Add Volume Tiers), which will benefit all market participants by incentivizing continuous liquidity and thus, deeper more liquid markets as well as increased execution opportunities. Particularly, the proposed changes are designed to incentivize continuous displayed liquidity, which signals other market participants to take the additional execution opportunities provided by such liquidity, while the proposed incentives to provide non-displayed liquidity will further contribute to a deeper, more liquid market and provide even more execution opportunities for active market participants at improved prices. This overall increase in activity deepens the Exchange's liquidity pool, offers additional cost savings, supports the quality of price discovery, promotes market transparency and improves market quality, for all investors.

In addition to this, the Exchange believes that the proposal represents an equitable allocation of rebates and is not unfairly discriminatory because all Members will continue to be eligible for the Supplemental Incentive Tiers, as amended, and for the LMM Add Volume Tiers, as amended. Without having a view of activity on other markets and off-exchange venues, the Exchange has no way of knowing whether this proposed rule change would definitely result in any Members qualifying for the proposed tiers. The Exchange notes that most recently, seven Members satisfied Supplemental Incentive Tier Tape A, seven members satisfied Supplemental Incentive Tier Tape B, and five Members satisfied Supplemental Incentive Tier Tape C. While the Exchange has no way of predicting with certainty how the proposed tier will impact Member activity, the Exchange anticipates that approximately four Members will be able to satisfy Supplemental Incentive Tier Tape A (as amended), five Members will be able to satisfy Supplemental Incentive Tier Tape B (as amended) and three Members will be able to satisfy Supplemental Incentive Tier Tape C (as amended). With respect to the LMM Add Volume Tiers, the Exchange notes that most recently, one Member satisfied LMM Add Volume Tier 2, two Members satisfied LMM Add Volume Tier 3 and two Members satisfied LMM Add Volume Tier 4. While the Exchange has no way of predicting with certainty how the proposed tier will impact Member activity, the Exchange anticipates that approximately one Member will be able to satisfy LMM Add Volume Tier 2 (as amended), one Member will be able to

¹³ See NYSE Price List, "Credit Applicable to Supplemental Liquidity Providers ("SLPs")" and Nasdaq Equity 7, Section 118(a)(1).

¹⁶ See e.g., Nasdaq Phlx Equity 7 Pricing Schedule, Section 3(c), which provides up to an additional credit of \$0.0003 for various order and quoting volume thresholds for the exchange's qualified market makers ("QMMs").

¹³ 15 U.S.C. 78f.

¹⁴ 15 U.S.C. 78f(b)(4).

satisfy LMM Add Volume Tier 3 (as amended) and one Member will be able to satisfy LMM Add Volume Tier 4 (as amended). The Exchange also notes that the proposed tiers will not adversely impact any Member's ability to qualify for other rebate tiers. Rather, should a Member not meet the proposed criteria for a tier, the Member will merely not receive the corresponding additional rebate.

Finally, the Exchange believes the proposed amendment to remove Non-Displayed Add Volume Tape A Tier 1 is reasonable because no Member has achieved this tier in several months. Moreover, the Exchange is not required to maintain this tier and Members still have a number of other opportunities and a variety of ways to receive enhanced rebates for Non-Displayed liquidity, including the enhanced rebates under the Non-Displayed Add Volume Tiers under footnote 1 of the fees schedule. The Exchange believes the proposal to eliminate these tiers is also equitable and not unfairly discriminatory because it applies to all Members.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Rather, as discussed above, the Exchange believes that the proposed change would encourage the submission of additional order flow to a public exchange, thereby promoting market depth, execution incentives and enhanced execution opportunities, as well as price discovery and transparency for all Members. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering competition among orders, which promotes "more efficient pricing of individual stocks for all types of orders, large and small."¹⁷

The Exchange believes the proposed rule change does not impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. Particularly, the proposed changes apply to all Members equally in that all Members continue to be eligible for the Supplemental Incentive Tiers and LMM Add Volume Tiers (and have the same opportunity to become an LMM Member), have a reasonable opportunity

to meet the tiers' criteria and will all receive the corresponding additional rebates if such criteria are met. Additionally, the proposed tier changes are designed to attract additional order flow to the Exchange. The Exchange believes that the updated tier criteria would incentivize market participants to direct liquidity adding order flow to the Exchange, bringing with it additional execution opportunities for market participants and improved price transparency. Greater overall order flow, trading opportunities, and pricing transparency benefits all market participants on the Exchange by enhancing market quality and continuing to encourage Members to send orders, thereby contributing towards a robust and well-balanced market ecosystem.

Next, the Exchange believes the proposed rule change does not impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. As previously discussed, the Exchange operates in a highly competitive market. Members have numerous alternative venues that they may participate on and direct their order flow, including 15 other equities exchanges and off-exchange venues and alternative trading systems. Additionally, the Exchange represents a small percentage of the overall market. Based on publicly available information, no single equities exchange has more than 18% of the market share. Therefore, no exchange possesses significant pricing power in the execution of order flow. Indeed, participants can readily choose to send their orders to other exchange and off-exchange venues if they deem fee levels at those other venues to be more favorable. Moreover, the Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. Specifically, in Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies."¹⁸ The fact that this market is competitive has also long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: "[n]o one disputes that competition for order flow is

'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . ."¹⁹ Accordingly, the Exchange does not believe its proposed fee change imposes any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act²⁰ and paragraph (f) of Rule 19b-4 thereunder.²¹ At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeBZX-2020-078 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CboeBZX-2020-078. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CboeBZX-2020-078 and should be submitted on or before December 3, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²²

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90365; File No. SR-CboeEDGX-2020-052]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Rule 14.10, Requirements for Securities Issued by the Exchange or Its Affiliates

November 6, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on October 28, 2020, Cboe EDGX Exchange, Inc. (the "Exchange" or "EDGX") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 14.10 (Requirements for Securities Issued by the Exchange or its Affiliates) regarding the requirements for the listing of securities that are issued by the Exchange or any of its affiliates. The Exchange notes that the changes proposed herein are substantively identical to changes adopted on Cboe BZX Exchange, Inc. ("BZX").³

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/options/regulation/rule_filings/edgx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of

the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 14.10 (Requirements for Securities Issued by the Exchange or its Affiliates) regarding the requirements for the listing of securities that are issued by the Exchange or any of its affiliates. The Exchange notes that the changes proposed herein are substantively identical to changes adopted on Cboe BZX Exchange, Inc. ("BZX").⁴

Rule 14.10 sets forth certain monitoring requirements that must be met throughout the continued listing and trading of securities issued by the Exchange or its affiliates. More specifically, Rule 14.10(b) and (c) provide that:

- Throughout the continued listing and trading of an Affiliate Security⁵ on the Exchange, the Exchange shall prepare a quarterly report on the Affiliate Security for the Regulatory Oversight Committee ("ROC") of the Exchange's Board of Directors that describes the Exchange's monitoring of the Affiliate Security's compliance with the Exchange's listing standards (the "Quarterly Listing Report");

- once a year, an independent accounting firm shall review the listing standards for the Affiliate Security to ensure that the issuer is in compliance with the listing requirements ("Annual Report"), and a copy of the Annual Report shall be forwarded promptly to the ROC; and

- throughout the trading of an Affiliate Security on the Exchange, the Exchange shall prepare a quarterly report on the Affiliate Security for the Regulatory Oversight Committee of the Exchange's Board of Directors that describes the Exchange's monitoring of the trading of the Affiliate Security, including summaries of all related surveillance alerts, complaints, regulatory referrals, trades cancelled or adjusted pursuant to Exchange Rules, investigations, examinations, formal and informal disciplinary actions, exception reports and trading data used to ensure the Affiliate Security's compliance with

⁴ See Securities Exchange Act Release No. 86623 (August 9, 2019) 84 FR 41771 (August 15, 2019) (SR-CboeBZX-2019-073) (the "BZX Filing").

⁵ As defined in Rule 14.10(a)(2), the term "Affiliate Security" means any security issued by a EDGX Affiliate or any Exchange-listed option on any such security, with the exception of Portfolio Depository Receipts as defined in Rule 14.8(d) and Investment Company Units as defined in Rule 14.2.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 86623 (August 9, 2019) 84 FR 41771 (August 15, 2019) (SR-CboeBZX-2019-073) (the "BZX Filing").

²² 17 CFR 200.30-3(a)(12).

the Exchange's listing and trading rules (the "Quarterly Trading Report" and, collectively with the Quarterly Listing Report, the "Quarterly Reports").

Rule 14.10(d) requires that a copy of all Quarterly Reports and Annual Reports will be forwarded promptly to the Commission.

The Exchange proposes to amend Rule 14.10(d) to remove the requirement that copies of the Quarterly Reports and Annual Reports be forwarded to the Commission and instead providing that the Exchange will forward a copy of the Quarterly Reports and/or Annual Reports to the Commission upon request.

Finally, the Exchange is proposing to make clear that the requirements under Rule 14.10(b)(1),⁶ (2),⁷ (3),⁸ and (4)⁹ do not apply to Affiliate Securities that are Exchange-listed options. The Exchange is proposing this change because there is no issuer for options as the term is used in Rule 14.10(b) and each of the requirements under Rule 14.10(b) is implicitly related to equity securities and not to options on such equity securities. The Exchange is not proposing to make any changes to the

⁶ Rule 14.10(b)(1) requires that prior to the initial listing of an Affiliate Security on the Exchange, Exchange personnel shall determine that such security satisfies the Exchange's rules for listing, and such finding must be approved by the Regulatory Oversight Committee of the Exchange's Board of Directors.

⁷ Rule 14.10(b)(2) requires that throughout the continued listing of an Affiliate Security on the Exchange, the Exchange shall prepare a quarterly report on the Affiliate Security for the Regulatory Oversight Committee of the Exchange's Board of Directors that describes the Exchange's monitoring of the Affiliate Security's compliance with the Exchange's listing standards, including: the Affiliate Security's compliance with the Exchange's minimum share price requirement; and the Affiliate Security's compliance with each of the quantitative continued listing requirements.

⁸ Rule 14.10(b)(3) requires that once a year, an independent accounting firm shall review the listing standards for the Affiliate Security to ensure that the issuer is in compliance with the listing requirements and a copy of the report shall be forwarded promptly to the Regulatory Oversight Committee of the Exchange's Board of Directors.

⁹ Rule 14.10(b)(4) requires that in the event that the Exchange determines that the EDGX Affiliate is not in compliance with any of the Exchange's listing standards, the Exchange shall notify the issuer of such non-compliance promptly and request a plan of compliance. The Exchange shall file a report with the Commission within five business days of providing such notice to the issuer of its non-compliance. The report shall identify the date of the non-compliance, type of non-compliance, and any other material information conveyed to the issuer in the notice of non-compliance. Within five business days of receipt of a plan of compliance from the issuer, the Exchange shall notify the Commission of such receipt, whether the plan of compliance was accepted by the Exchange or what other action was taken with respect to the plan and the time period provided to regain compliance with the Exchange's listing standards, if any.

requirement for all Affiliate Securities (including options) under Rule 14.10(c) that "[t]hroughout the trading of an Affiliate Security on the Exchange, the Exchange shall prepare a quarterly report on the Affiliate Security for the Regulatory Oversight Committee of the Exchange's Board of Directors that describes the Exchange's monitoring of the trading of the Affiliate Security, including summaries of all related surveillance alerts, complaints, regulatory referrals, trades cancelled or adjusted pursuant to Exchange Rules, investigations, examinations, formal and informal disciplinary actions, exception reports and trading data used to ensure the Affiliate Security's compliance with the Exchange's listing and trading rules." As such, the Exchange will continue to prepare reports on all Affiliate Securities (including those that are Exchange-listed options) as required under Rule 14.10(c).

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b) of the Act¹⁰ in general and Section 6(b)(5) of the Act¹¹ in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, remove impediments to, and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest, because the proposed changes would reduce the paperwork received by the Commission and ease the burden of submitting the Quarterly Reports and Annual Reports, without changing the information available to the Commission. In discussions with the Commission Staff regarding Rule 14.10, it was determined that the Exchange no longer needed to provide copies of the

Quarterly Reports and Annual Reports to the Commission. The Quarterly Reports and Annual Reports would continue to be available to the Commission, as they are subject to Section 17 of the Act¹² and Rule 17a-1 thereunder,¹³ pursuant to which the Exchange is required to keep and preserve copies of the Quarterly Reports and Annual Reports, and to promptly furnish to the Commission copies of such Reports upon request of any representative of the Commission.

Finally, the Exchange believes that the clarifying change to exclude options on Affiliate Securities from the requirements of Rule 14.10(b) would promote just and equitable principles of trade and remove impediments to a free and open market by making clear that certain obligations that implicitly did not apply to options on Affiliate Securities do not, in fact, apply. As noted above, the Exchange will continue to prepare reports on all Affiliate Securities that include summaries of all related surveillance alerts, complaints, regulatory referrals, trades cancelled or adjusted pursuant to Exchange Rules, investigations, examinations, formal and informal disciplinary actions, exception reports and trading data used to ensure the Affiliate Security's compliance with the Exchange's listing and trading rules (including those that are Exchange-listed options) as required under Rule 14.10(c).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed changes to eliminate the requirement that the Exchange submit copies of the Quarterly Reports and Annual Reports to the Commission and excluding options on Affiliate Securities from the requirements of Rule 14.10(b) will have no impact on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

¹⁰ 15 U.S.C. 78f(b).

¹¹ 15 U.S.C. 78f(b)(5).

¹² 15 U.S.C. 78q.

¹³ 17 CFR 240.17a-1.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁴ and Rule 19b-4(f)(6) thereunder.¹⁵

A proposed rule change filed under Rule 19b-4(f)(6)¹⁶ normally does not become operative for 30 days after the date of the filing. However, pursuant to Rule 19b-4(f)(6)(iii),¹⁷ the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay to allow the Exchange to make the proposed changes to its rules without unnecessary delay in order to be consistent with those already in place on BZX, its affiliate. The Commission notes that the proposed rule change is based on and substantively identical to the rules of BZX.¹⁸ For this reason, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposal operative upon filing.¹⁹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and

arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeEDGX-2020-052 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CboeEDGX-2020-052. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CboeEDGX-2020-052 and should be submitted on or before December 3, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁰

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90354; File No. SR-MIAX-2020-34]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule To Increase the Number of Additional Limited Service MIAX Express Interface Ports Available to Market Makers

November 5, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on October 23, 2020, Miami International Securities Exchange, LLC ("MIAX Options" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to increase the number of additional Limited Service MIAX Express Interface ("MEI") Ports available to Market Makers.³ The Exchange does not propose to amend the fees for additional Limited Service MEI Ports.

The text of the proposed rule change is available on the Exchange's website at <http://www.miaxoptions.com/rule-filings>, at MIAX's principal office, and at the Commission's Public Reference Room.

²⁰ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The term "Market Makers" refers to Lead Market Makers ("LMMs"), Primary Lead Market Makers ("PLMMs"), and Registered Market Makers ("RMMs") collectively. See Exchange Rule 100.

¹⁴ 15 U.S.C. 78s(b)(3)(A).

¹⁵ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹⁶ 17 CFR 240.19b-4(f)(6).

¹⁷ 17 CFR 240.19b-4(f)(6)(iii).

¹⁸ See *supra* note 3.

¹⁹ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule to offer two (2) additional Limited Service MEI Ports to Market Makers. The Exchange does not propose to amend the fees charged for the additional Limited Service MEI Ports.

The Exchange initially filed the proposal to increase the number of Limited Service MEI Ports available to Market Makers on June 30, 2020, with no change to the actual fee amounts being charged.⁴ The First Proposed Rule Change was published for comment in the **Federal Register** on July 20, 2020.⁵ The Exchange notes that the First Proposed Rule Change did not receive any comment letters. Nonetheless, the Exchange withdrew the First Proposed Rule Change on August 24, 2020.⁶ On August 25, 2020, the Exchange refiled its proposal to increase the number of Limited Service MEI Ports available to Market Makers (without increasing the actual fee amounts) to provide further clarification regarding the Exchange's annual cost for providing additional Limited Service MEI Ports.⁷ The Second Proposed Rule Change was published for comment in the **Federal Register** on September 11, 2020.⁸ Like the First Proposed Rule Change, the Second Proposed Rule Change did not receive any comment letters. Nonetheless, the

Exchange withdrew the Second Proposed Rule Change on October 23, 2020.⁹

The Exchange now submits this proposed rule change to increase the number of additional Limited Service MEI Ports available to Market Makers (without increasing the actual fee amounts) to provide additional information regarding the Exchange's revenues, costs, and profitability for the two additional Limited Service MEI Ports. This additional analysis includes information regarding the Exchange's methodology for determining the costs and revenues for the two additional Limited Service MEI Ports.

Currently, MIAX assesses monthly MEI Port Fees on Market Makers based upon the number of MIAX matching engines¹⁰ used by the Market Maker. Market Makers are allocated two (2) Full Service MEI Ports¹¹ and two (2) Limited Service MEI Ports¹² per matching engine to which they connect. The Full Service MEI Ports, Limited Service MEI Ports, and the additional Limited Service MEI Ports all include access to MIAX's primary and secondary data centers and its disaster recovery center. Market Makers may request additional Limited Service MEI Ports for which they will be assessed the existing \$100 monthly fee for each additional port they request. This fee has been unchanged since 2016.¹³

The Exchange originally added the Limited Service MEI Ports to enhance

⁹ See Comment Letter from Christopher Solgan, VP, Senior Counsel, the Exchange, dated October 19, 2020, notifying the Commission that the Exchange would withdraw the Second Proposed Rule Change.

¹⁰ A "matching engine" is a part of the MIAX electronic system that processes options quotes and trades on a symbol-by-symbol basis. Some matching engines will process option classes with multiple root symbols, and other matching engines will be dedicated to one single option root symbol (for example, options on SPY will be processed by one single matching engine that is dedicated only to SPY). A particular root symbol may only be assigned to a single designated matching engine. A particular root symbol may not be assigned to multiple matching engines. See Fee Schedule, Section 5)d)ii), note 29.

¹¹ Full Service MEI Ports provide Market Makers with the ability to send Market Maker quotes, eQuotes, and quote purge messages to the MIAX System. Full Service MEI Ports are also capable of receiving administrative information. Market Makers are limited to two Full Service MEI Ports per matching engine. See Fee Schedule, Section 5)d)ii), note 27.

¹² Limited Service MEI Ports provide Market Makers with the ability to send eQuotes and quote purge messages only, but not Market Maker Quotes, to the MIAX System. Limited Service MEI Ports are also capable of receiving administrative information. Market Makers initially receive two Limited Service MEI Ports per matching engine. See Fee Schedule, Section 5)d)ii), note 28.

¹³ See Securities Exchange Act Release No. 79666 (December 22, 2016), 81 FR 96133 (December 29, 2016) (SR-MIAX-2016-47).

the MEI Port connectivity made available to Market Makers, and has subsequently made additional Limited Service MEI Ports available to Market Makers.¹⁴ Limited Service MEI Ports have been well received by Market Makers since their addition. The Exchange now proposes to offer to Market Makers the ability to purchase an additional two (2) Limited Service MEI Ports per matching engine over and above the current six (6) additional Limited Service MEI Ports per matching engine that are available for purchase by Market Makers. The Exchange proposes making a corresponding change to footnote 30 of the Exchange's Fee Schedule to specify that Market Makers will now be limited to purchasing eight (8) additional Limited Service MEI Ports per matching engine, for a total of ten (10) per matching engine. All fees related to MEI Ports shall remain unchanged and Market Makers that voluntarily purchase the additional Limited Service MEI Ports will remain subject to the existing \$100 monthly fee per port.

The Exchange is increasing the number of additional Limited Service MEI Ports because the Exchange is expanding its network. This network expansion is necessary due to increased customer demand and increased volatility in the marketplace, both of which have translated into increased message traffic rates across the network. Consequently, this network expansion, which increases the number of switches supporting customer facing systems, is necessary in order to provide sufficient access to new and existing Members,¹⁵ to maintain a sufficient amount of network capacity head-room, and to continue to provide the same level of service across the Exchange's low-latency, high-throughput technology environment.

Currently, the Exchange has 8 network switches that support the entire customer base of MIAX. The Exchange plans to increase this to 10 switches, which will increase the number of available customer ports by 25%. This increase in the number of available customer ports will enable the Exchange to continue to provide sufficient and

¹⁴ See Securities Exchange Act Release Nos. 70137 (August 8, 2013), 78 FR 49586 (August 14, 2013) (SR-MIAX-2013-39); 70903 (November 20, 2013), 78 FR 70615 (November 26, 2013) (SR-MIAX-2013-52); 78950 (September 27, 2016), 81 FR 68084 (October 3, 2016) (SR-MIAX-2016-33); and 79198 (October 31, 2016), 81 FR 76988 (November 4, 2016) (SR-MIAX-2016-37).

¹⁵ The term "Member" means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed "members" under the Exchange Act. See Exchange Rule 100.

⁴ See Securities Exchange Act Release No. 89317 (July 14, 2020), 85 FR 43918 (July 20, 2020) (SR-MIAX-2020-23) (the "First Proposed Rule Change").

⁵ *Id.*

⁶ See Comment Letter from Christopher Solgan, VP, Senior Counsel, the Exchange, dated August 24, 2020, notifying the Commission that the Exchange would withdraw the First Proposed Rule Change.

⁷ See Securities Exchange Act Release No. 89769 (September 4, 2020), 85 FR 55905 (September 10, 2020) (SR-MIAX-2020-29) (the "Second Proposed Rule Change").

⁸ *Id.*

equal access to MIAX Systems to all Members. Absent the proposed increase in available MEI Ports, the Exchange projects that its current inventory will be depleted and it will lack sufficient capacity to continue to meet Members' access needs.

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act¹⁶ in general, and furthers the objectives of Section 6(b)(5) of the Act¹⁷ in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange believes that its proposal is consistent with the objectives of Section 6(b)(5) of the Act¹⁸ because the proposed additional Limited Service MEI Ports will be available to all Market Makers and the current fees for the additional Limited Service MEI Ports apply equally to all Market Makers regardless of type, and access to the Exchange is offered on terms that are not unfairly discriminatory. The Exchange is proposing to increase the number of available Limited Service MEI Ports because the Exchange is expanding its network. This network expansion is necessary due to increased customer demand and increased volatility in the marketplace, both of which have translated into increased message traffic rates across the network. Consequently, this network expansion, which increases the number of switches supporting customer facing systems, is necessary in order to provide sufficient and equal access to new and existing Members, to maintain a sufficient amount of network capacity head-room, and to continue to provide the same level of service across the Exchange's low-latency, high-throughput technology environment.

Currently, the Exchange has 8 network switches that support the entire customer base of MIAX. The Exchange plans to increase this to 10 switches, which will increase the number of available customer ports by 25%. This increase in the number of available customer ports will enable the Exchange to continue to provide sufficient and equal access to MIAX Systems for all

Members. Absent the proposed increase in available MEI Ports, the Exchange projects that its current inventory will be depleted and it will lack sufficient capacity to continue to meet Members' access needs. Further, the Exchange notes the decision of whether to purchase two additional Limited Service MEI Ports is completely optional and it is a business decision for each Market Maker to determine whether the additional Limited Service MEI Ports are necessary to meet their business requirements.

The Exchange further believes that the availability of the additional Limited Service MEI Ports is equitable and not unfairly discriminatory because it will enable Market Makers to maintain uninterrupted access to the MIAX System and consequently enhance the marketplace by helping Market Makers to better manage risk, thus preserving the integrity of the MIAX markets, all to the benefit of and protection of investors and the public as a whole.

The Exchange also believes that its proposal is consistent with Section 6(b)(4) of the Act because only Market Makers that voluntarily purchase the two additional Limited Service MEI Ports will be charged the existing \$100 monthly fee per port, which has been unchanged since 2016.¹⁹ The Exchange does not propose to amend the fees applicable to additional Limited Service MEI Ports which have been previously filed with the Commission and become effective after notice and public comment.²⁰ As stated above, the Exchange proposes to expand its network by making available two additional Limited Service MEI Ports due to increased customer demand and increased volatility in the marketplace, both of which have translated into increased message traffic rates across the network. The cost to expand the network in this manner is greater than the revenue the Exchange anticipates the additional Limited Service MEI Ports will generate. Specifically, the Exchange estimates it will incur a one-time cost of approximately \$175,000 in capital expenditures on hardware, software, and other items to expand the network to make available the two additional Limited Service MEI Ports. This estimated cost also includes expense associated with providing the necessary engineering and support personnel to transition those Market Makers who wish to acquire the two additional Limited Service MEI Ports.

The Exchange projects that approximately six to seven Market

Makers will purchase the additional Limited Service MEI Ports, which will be subject to the existing monthly fee of \$100 per port. Accordingly, the Exchange projects that the annualized revenue from the two additional Limited Service MEI Ports will be approximately \$16,800 (assuming seven Market Makers purchase the two additional Limited Service MEI Ports). Therefore, the Exchange's upfront cost in expanding its network to provide its Members with the two additional Limited Service MEI Ports—approximately \$175,000—is significant relative to the anticipated annualized revenue the Exchange expects to bring in from the two additional Limited Service MEI Ports—approximately \$16,800. Further, the Exchange anticipates it will incur approximately \$100,371 in annualized ongoing operating expense in order to support the expanded network and the two additional Limited Service MEI Ports. Thus, even excluding the upfront capital expense ("CapEx") of \$175,000, the Exchange is not generating a supra-competitive profit from the provision of these two additional Limited Service MEI Ports. In fact, even excluding the one-time CapEx cost of \$175,000, the Exchange anticipates generating an annual loss from the provision of these two additional Limited Service MEI Ports of (\$83,571)—that is, \$16,800 in revenue minus \$100,371 in expense equates to a loss of (\$83,571) to support the additional ports annually.

The Exchange conducted an extensive cost review in which the Exchange analyzed every expense item in the Exchange's general expense ledger (this includes over 150 separate and distinct expense items) to determine whether each such expense relates to the additional Limited Service MEI Ports, and, if such expense did so relate, what portion (or percentage) of such expense actually supports the additional Limited Service MEI Ports, and thus bears a relationship that is, "in nature and closeness," directly related to those services. The sum of all such portions of expenses represents the total cost of the Exchange to provide services associated with the two additional Limited Service MEI Ports.

Specifically, utilizing 2019 expense figures, total third-party expense, relating to fees paid by the Exchange to third-parties for certain products and services for the Exchange to be able to provide the two additional Limited Service MEI Ports, was approximately \$12,393. This includes, but is not limited to, a portion of the fees paid to: (1) Equinix, for data center services, for the primary, secondary, and disaster

¹⁶ 15 U.S.C. 78f(b).

¹⁷ 15 U.S.C. 78f(b)(5).

¹⁸ 15 U.S.C. 78f(b)(5).

¹⁹ See *supra* note 13.

²⁰ See *supra* notes 13 and 14.

recovery locations of the Exchange's trading system infrastructure; (2) Zayo Group Holdings, Inc. ("Zayo") for network services (fiber and bandwidth products and services) linking the Exchange's office locations in Princeton, NJ and Miami, FL to all data center locations; (3) Secure Financial Transaction Infrastructure ("SFTI")²¹, which supports network feeds for the entire U.S. options industry; (4) various other services providers (including Thompson Reuters, NYSE, Nasdaq, and Internap), which provide content, network services, and infrastructure services for critical components of options network services; and (5) various other hardware and software providers (including Dell and Cisco, which support the production environment in which Members and non-Members connect to the network to trade, receive market data, etc.).

For clarity, only a portion of all fees paid to such third-parties is included in the third-party expense herein, and no expense amount is allocated twice. Accordingly, the Exchange does not allocate its entire information technology and communication costs to the services associated with providing the two additional Limited Service MEI Ports.

The Exchange believes it is reasonable to allocate such third-party expense described above towards the total cost to the Exchange to provide the services associated with the two additional Limited Service MEI Ports. In particular, the Exchange believes it is reasonable to allocate the identified portion of the Equinix expense because Equinix operates the data centers (primary, secondary, and disaster recovery) that host the Exchange's network infrastructure. This includes, among other things, the necessary storage space, which continues to expand and increase in cost, power to operate the network infrastructure, and cooling apparatuses to ensure the Exchange's network infrastructure maintains stability. Without these services from Equinix, the Exchange would not be able to operate and support the network and provide the services associated with the two additional Limited Service MEI

Ports to its Members and non-Members and their customers. The Exchange did not allocate all of the Equinix expense toward the cost of providing the services associated with the two additional Limited Service MEI Ports, only that portion which the Exchange identified as being specifically mapped to providing the services associated with the two additional Limited Service MEI Ports, approximately 0.5% of the total Equinix expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the services associated with the two additional Limited Service MEI Ports, and not any other service, as supported by its cost review.

The Exchange believes it is reasonable to allocate the identified portion of the Zayo expense because Zayo provides the internet, fiber and bandwidth connections with respect to the network, linking the Exchange with its affiliates, MIAX PEARL and MIAX Emerald, as well as the data center and disaster recovery locations. As such, all of the trade data, including the billions of messages each day per exchange, flow through Zayo's infrastructure over the Exchange's network. Without these services from Zayo, the Exchange would not be able to operate and support the network and provide the services associated with the two additional Limited Service MEI Ports. The Exchange did not allocate all of the Zayo expense toward the cost of providing the services associated with the two additional Limited Service MEI Ports, only the portion which the Exchange identified as being specifically mapped to providing the two additional Limited Service MEI Ports, approximately 0.4% of the total Zayo expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the services associated with the two additional Limited Service MEI Ports, and not any other service, as supported by its cost review.

The Exchange believes it is reasonable to allocate the identified portions of the SFTI expense and various other service providers' (including Thompson Reuters, NYSE, Nasdaq, and Internap) expense because those entities provide connectivity and feeds for the entire U.S. options industry, as well as the content, network services, and infrastructure services for critical components of the network. Without these services from SFTI and various other service providers, the Exchange would not be able to operate and support the network and provide access to its Members and non-Members and their customers. The Exchange did not

allocate all of the SFTI and other service providers' expense toward the cost of providing the services associated with the two additional Limited Service MEI Ports, only the portions which the Exchange identified as being specifically mapped to providing the services associated with the two additional Limited Service MEI Ports, approximately 0.5% of the total SFTI and other service providers' expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the services associated with the two additional Limited Service MEI Ports.

The Exchange believes it is reasonable to allocate the identified portion of the other hardware and software provider expense because this includes costs for dedicated hardware licenses for switches and servers, as well as dedicated software licenses for security monitoring and reporting across the network. Without this hardware and software, the Exchange would not be able to operate and support the network and provide access to its Members and non-Members and their customers. The Exchange did not allocate all of the hardware and software provider expense toward the cost of providing the services associated with the two additional Limited Service MEI Ports, only the portions which the Exchange identified as being specifically mapped to providing the services associated with the two additional Limited Service MEI Ports, approximately 0.3% of the total hardware and software provider expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the services associated with the two additional Limited Service MEI Ports.

For 2019, total internal expense, relating to the internal costs of the Exchange to provide the services associated with the two additional Limited Service MEI Ports was \$87,978. This includes, but is not limited to, costs associated with: (1) Employee compensation and benefits for full-time employees that support the services associated with providing the two additional Limited Service MEI Ports, including staff in network operations, trading operations, development, system operations, business, as well as staff in general corporate departments (such as legal, regulatory, and finance) that support those employees and functions (including an increase as a result of the higher determinism project); (2) depreciation and amortization of hardware and software used to provide the services associated with the two additional Limited Service MEI Ports,

²¹ In fact, on October 22, 2019, the Exchange was notified by SFTI that it is again raising its fees charged to the Exchange by approximately 11%, without having to show that such fee change complies with the Act by being reasonable, equitably allocated, and not unfairly discriminatory. It is unfathomable to the Exchange that, given the critical nature of the infrastructure services provided by SFTI, that its fees are not required to be rule-filed with the Commission pursuant to Section 19(b)(1) of the Act and Rule 19b-4 thereunder. See 15 U.S.C. 78s(b)(1) and 17 CFR 240.19b-4, respectively.

including equipment, servers, cabling, purchased software and internally developed software used in the production environment to support the network for trading; and (3) occupancy costs for leased office space for staff that provide the services associated with the two additional Limited Service MEI Ports. The breakdown of these costs is more fully-described below. For clarity, only a portion of all such internal expenses are included in the internal expense herein, and no expense amount is allocated twice. Accordingly, the Exchange does not allocate its entire costs contained in those items to the services associated with providing the two additional Limited Service MEI Ports.

The Exchange believes it is reasonable to allocate such internal expense described above towards the total cost to the Exchange to provide the services associated with the two additional Limited Service MEI Ports. In particular, the Exchange's employee compensation and benefits expense relating to providing the services associated with the two additional Limited Service MEI Ports was approximately \$58,870, which is only a portion of the \$9,811,685 total expense for employee compensation and benefits. The Exchange believes it is reasonable to allocate the identified portion of such expense because this includes the time spent by employees of several departments, including Technology, Back Office, Systems Operations, Networking, Business Strategy Development (who create the business requirement documents that the Technology staff use to develop network features and enhancements), Trade Operations, Finance (who provide billing and accounting services relating to the network), and Legal (who provide legal services relating to the network, such as rule filings and various license agreements and other contracts). As part of the extensive cost review conducted by the Exchange, the Exchange reviewed the amount of time spent by each employee on matters relating to the provision of services associated with the two additional Limited Service MEI Ports. Without these employees, the Exchange would not be able to provide the services associated with the two additional Limited Service MEI Ports to its Members and non-Members and their customers. The Exchange did not allocate all of the employee compensation and benefits expense toward the cost of the services associated with providing the two additional Limited Service MEI Ports, only the portions which the Exchange identified as being specifically mapped

to providing the services associated with the two additional Limited Service MEI Ports, approximately 0.6% of the total employee compensation and benefits expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the services associated with the two additional Limited Service MEI Ports, and not any other service, as supported by its cost review.

The Exchange's depreciation and amortization expense relating to providing the services associated with the two additional Limited Service MEI Ports was \$26,362, which is only a portion of the \$5,272,469 total expense for depreciation and amortization. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense includes the actual cost of the computer equipment, such as dedicated servers, computers, laptops, monitors, information security appliances and storage, and network switching infrastructure equipment, including switches and taps that were purchased to operate and support the network and provide the services associated with the two additional Limited Service MEI Ports. Without this equipment, the Exchange would not be able to operate the network and provide the services associated with the two additional Limited Service MEI Ports to its Members and non-Members and their customers. The Exchange did not allocate all of the depreciation and amortization expense toward the cost of providing the services associated with the two additional Limited Service MEI Ports, only the portion which the Exchange identified as being specifically mapped to providing the services associated with the two additional Limited Service MEI Ports, approximately 0.5% of the total depreciation and amortization expense, as these services would not be possible without relying on such equipment. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the services associated with the two additional Limited Service MEI Ports, and not any other service, as supported by its cost review.

The Exchange's occupancy expense relating to providing the services associated with providing the two additional Limited Service MEI Ports was approximately \$2,746, which is only a portion of the \$686,437 total expense for occupancy. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense represents the portion of the Exchange's cost to rent

and maintain a physical location for the Exchange's staff who operate and support the network, including providing the services associated with the two additional Limited Service MEI Ports. This amount consists primarily of rent for the Exchange's Princeton, NJ office, as well as various related costs, such as physical security, property management fees, property taxes, and utilities. The Exchange operates its Network Operations Center ("NOC") and Security Operations Center ("SOC") from its Princeton, New Jersey office location. A centralized office space is required to house the staff that operates and supports the network. The Exchange currently has approximately 160 employees. Approximately two-thirds of the Exchange's staff are in the Technology department, and the majority of those staff have some role in the operation and performance of the services associated with providing the two additional Limited Service MEI Ports. Without this office space, the Exchange would not be able to operate and support the network and provide the services associated with the two additional Limited Service MEI Ports to its Members and non-Members and their customers. Accordingly, the Exchange believes it is reasonable to allocate the identified portion of its occupancy expense because such amount represents the Exchange's actual cost to house the equipment and personnel who operate and support the Exchange's network infrastructure and the services associated with the two additional Limited Service MEI Ports. The Exchange did not allocate all of the occupancy expense toward the cost of providing the services associated with the two additional Limited Service MEI Ports, only the portion which the Exchange identified as being specifically mapped to operating and supporting the network, approximately 0.4% of the total occupancy expense. The Exchange believes this allocation is reasonable because it represents the Exchange's cost to provide the services associated with the two additional Limited Service MEI Ports, and not any other service, as supported by its cost review.

Accordingly, based on the facts and circumstances presented, the Exchange believes that its provision of the services associated with the two additional Limited Service MEI Ports will not result in excessive pricing or supra-competitive profit.

For the avoidance of doubt, none of the expenses included herein relating to the services associated with providing the two additional Limited Service MEI Ports relate to the provision of any other

services offered by the Exchange. Stated differently, no expense amount of the Exchange is allocated twice.

The Exchange believes it is reasonable, equitable and not unfairly discriminatory to allocate the respective percentages of each expense category described above towards the total cost to the Exchange of operating and supporting the network, including providing the services associated with the two additional Limited Service MEI Ports because the Exchange performed a line-by-line item analysis of all the expenses of the Exchange, and has determined the expenses that directly relate to operation and support of the network. Further, the Exchange notes that, without the specific third-party and internal items listed above, the Exchange would not be able to operate and support the network, including providing the services associated with the two additional Limited Service MEI Ports to its Members and non-Members and their customers. Each of these expense items, including physical hardware, software, employee compensation and benefits, occupancy costs, and the depreciation and amortization of equipment, have been identified through a line-by-line item analysis to be integral to the operation and support of the network. Providing the two additional Limited Service MEI Ports at the existing rates is intended to recover the Exchange's costs of operating and supporting the network.

Accordingly, the Exchange believes that providing the two additional Limited Service MEI Ports at the existing rate is fair and reasonable because it does not result in excessive pricing or supra-competitive profit, when comparing the actual network operation and support costs to the Exchange versus the projected annual revenue from providing the two additional Limited Service MEI Ports.

Further, subjecting the two additional Limited Service MEI Ports to the existing \$100 monthly fee per port is also designed to encourage Market Makers to be efficient with their port usage, thereby resulting in a corresponding increase in the efficiency that the Exchange would be able to realize in managing its aggregate costs for providing the two additional ports. There is no requirement that any Market Maker maintain a specific number of Limited Service MEI Ports and a Market Maker may choose to maintain as many or as few of such ports as each Market Maker deems appropriate.

Finally, subjecting the two additional Limited Service MEI Ports to the existing \$100 monthly fee will help to encourage Limited Service MEI Port

usage in a way that aligns with the Exchange's regulatory obligations. As a national securities exchange, the Exchange is subject to Regulation Systems Compliance and Integrity ("Reg. SCI").²² Reg. SCI Rule 1001(a) requires that the Exchange establish, maintain, and enforce written policies and procedures reasonably designed to ensure (among other things) that its Reg. SCI systems have levels of capacity adequate to maintain the Exchange's operational capability and promote the maintenance of fair and orderly markets.²³ By encouraging Members to be efficient with their usage of Limited MEI Ports, the current fee that will continue to apply to the proposed two (2) additional Limited Service MEI Ports will support the Exchange's Reg. SCI obligations in this regard by ensuring that unused ports are available to be allocated based on individual Members needs and as the Exchange's overall order and trade volumes increase.

B. Self-Regulatory Organization's Statement on Burden on Competition

MIAX does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The proposed rule change will not impose a burden on competition but will benefit competition by enhancing the Exchange's ability to compete by providing additional services to market participants. It is not intended to address a competitive issue. Rather, the proposed increase in the number of additional Limited Service MEI Ports available per Market Maker is intended to allow the Exchange to increase its inventory of MEI Ports to meet increased Member demand. The Exchange is increasing the number of available additional Limited Service MEI Ports in response to Market Maker demand for increased connectivity to the MIAX System. The Exchange's current inventory may soon be insufficient to meet those needs. Again, the Exchange is not proposing to amend the fees for MEI Ports, just to increase the number of MEI Ports available per Market Maker. The Exchange also does not believe that the proposed rule change will impose a burden on intramarket competition because the two additional Limited Service MEI Ports will be available to all Market Makers on an equal basis. It is a business decision of each Market Maker whether to pay for the additional Limited Service MEI Ports.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,²⁴ and Rule 19b-4(f)(2)²⁵ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-MIAX-2020-34 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to File Number SR-MIAX-2020-34. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the

²⁴ 15 U.S.C. 78s(b)(3)(A)(ii).

²⁵ 17 CFR 240.19b-4(f)(2).

proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-MIAX-2020-34, and should be submitted on or before December 3, 2020.²⁶

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90357; File No. SR-NASDAQ-2020-060]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change, as Modified by Amendment No. 1, To Treat as an Eligible Switch, for Purposes of IM-5900-7, an Acquisition Company That Switches From NYSE to Nasdaq After Announcing a Business Combination

November 5, 2020.

On September 1, 2020, The Nasdaq Stock Market LLC ("Nasdaq" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to treat as an Eligible Switch, for purposes of IM-5900-7, an Acquisition Company that switches from the New York Stock Exchange to Nasdaq after announcing a business combination. The proposed rule change was published for comment

in the **Federal Register** on September 21, 2020.³ No comments have been received on the proposed rule change.

Section 19(b)(2) of the Act⁴ provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is November 5, 2020. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,⁵ designates December 20, 2020 as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR-NASDAQ-2020-060).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

² 17 CFR 240.19b-4.

23, 2020, New York Stock Exchange LLC ("NYSE" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 7.35C (Exchange-Facilitated Auctions) to (1) provide the Exchange authority to facilitate a Trading Halt Auction if a security has not reopened following a MWCB Halt by 3:30 p.m.; (2) widen the Auction Collar for an Exchange-facilitated Trading Halt Auction following a MWCB Halt; (3) provide that certain DMM Interest would not be cancelled following an Exchange-facilitated Auction; and (4) change the Auction Reference Price for Exchange-facilitated Core Open Auctions. The proposed rule change is available on the Exchange's website at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 7.35C (Exchange-Facilitated Auctions) to (1) provide the Exchange authority to facilitate a Trading Halt Auction³ if a security has not reopened following a Level 1 or Level 2 trading

³ As defined in Rule 7.35(a)(1), an "Auction" refers to the process for opening, reopening, or closing of trading of Auction-Eligible Securities on the Exchange, which can result in either a trade or a quote.

²⁶ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

halt due to extraordinary market volatility under Rule 7.12 (“MWCB Halt”) by 3:30 p.m.; (2) widen the Auction Collar for an Exchange-facilitated Trading Halt Auction following a MWCB Halt; (3) provide that certain DMM Interest⁴ would not be cancelled following an Exchange-facilitated Auction; and (4) change the Auction Reference Price for Exchange-facilitated Core Open Auctions.

The first three of these proposed changes are currently in place on a temporary basis, as described in Commentaries .01–.03 to Rule 7.35C. The fourth of these proposed changes would be new and would replace the temporary rule set forth in Commentary .04 to Rule 7.35C.

Background

To slow the spread of COVID-19 through social-distancing measures, on March 18, 2020, the CEO of the Exchange made a determination under Rule 7.1(c)(3) that, beginning March 23, 2020, the Trading Floor facilities located at 11 Wall Street in New York City would close and the Exchange would move, on a temporary basis, to fully electronic trading.⁵ On May 14, 2020, the CEO of the Exchange made a determination under Rule 7.1(c)(3) to reopen the Trading Floor on a limited basis on May 26, 2020 to a subset of Floor brokers, subject to safety measures designed to prevent the spread of COVID-19.⁶ On June 15, 2020, the CEO of the Exchange made a determination under Rule 7.1(c)(3) to begin the second phase of the Trading Floor reopening by allowing DMMs to return on June 17, 2020, subject to safety measures

designed to prevent the spread of COVID-19.⁷

Rule 7.35C sets forth the procedures for Exchange-facilitated Auctions. The first time the Exchange facilitated any Auctions pursuant to Rule 7.35C was on March 19, 2020, when two DMM firms temporarily left the Trading Floor in connection with implementing their business continuity plans related to the COVID-19 pandemic. Beginning on March 23, 2020, when the Exchange temporarily closed the Trading Floor, the Exchange began facilitating Auctions on behalf of all DMM firms. Since June 17, 2020, when DMM firms were permitted to return staff to the Trading Floor, the Exchange has not facilitated any Auctions for DMM firms that have had staff return to the Trading Floor. During the period of March 23, 2020 through June 16, 2020, among the DMM firms, the percentage of Auctions that were facilitated by the Exchange ranged from 1% to 3.2% of the securities assigned to each DMM. During this period, the vast majority of Auctions were facilitated electronically by DMMs pursuant to Rules 7.35A and 7.35B.

In connection with both the market-wide volatility associated with the COVID-19 pandemic in March 2020 and the full and partial closing of the Trading Floor facilities, the Exchange added Commentaries .01, .02, .03, and .04 to Rule 7.35C⁸ that are in effect until the earlier of a full reopening of the Trading Floor facilities to DMMs or after the Exchange closes on December 31, 2020.⁹ These Commentaries set forth how the Exchange has been functioning during this temporary period when the Trading Floor facilities have been closed

either in full or in part in connection with COVID-19.

The Exchange believes that the rules that it has added on a temporary basis to Rule 7.35C have supported the fair and orderly operation of the Exchange during both the market volatility associated with COVID-19 and the temporary period that the Trading Floor facilities have been closed either in full or in part due to COVID-19. The Exchange further believes the functionality that has been operating on a temporary basis would continue to support the fair and orderly operation of the Exchange under any circumstances where there may be either market-wide volatility or the need for the Exchange to facilitate one or more Auctions. Accordingly, the Exchange proposes that the following changes be made permanent in Exchange rules:

- Provide the Exchange with authority to facilitate a Trading Halt Auction if a security has not reopened following a MWCB Halt by 3:30 p.m. Eastern Time.
- Widen the Auction Collars for an Exchange-facilitated Trading Halt Auction following a MWCB Halt to the greater of \$0.15 or 10%.
- Allow DMM Interest to remain on the Exchange Book after an Exchange-facilitated Auction.

In addition, the Exchange proposes to change the Auction Reference Price for Exchange-facilitated Core Open Auctions, which would be new.

Proposed Rule Changes

Exchange Authority To Facilitate a Trading Halt Auction Following a MWCB Halt

In the midst of the market-wide volatility relating to COVID-19 and before the Exchange temporarily closed the Trading Floor, the Exchange added Commentary .01 to Rule 7.35C, which provided, at the time of filing, that:¹⁰

Until May 15, 2020, to facilitate the fair and orderly reopening of securities following either a Level 1 or Level 2 trading halt due to extraordinary market volatility under Rule 7.12 (“MWCB Halt”), the CEO of the Exchange or his or her designee may determine that the Exchange will facilitate a Trading Halt Auction in one or more securities under this Rule if a security has not reopened by 3:30 p.m. If the Exchange facilitates a Trading Halt Auction following a MWCB Halt pursuant to this Commentary, the Auction Collars will be the greater of \$0.15 or 10% away from the Auction Reference Price.

Following the temporary closure of the Trading Floor, the substance of this Commentary was revised and moved to

⁴ For purposes of Auctions, the term “DMM Interest” is defined in Rule 7.35(a)(8) to mean all buy and sell interest entered by a DMM unit in its assigned securities and includes: “DMM Auction Liquidity,” which is non-displayed buy and sell interest that is designated for an Auction only (see Rule 7.35(a)(8)(A)); “DMM Orders” which are orders, as defined under Rule 7.31, entered by a DMM unit (see Rule 7.35(a)(8)(B)); and “DMM After-Auction Orders,” which are orders entered by a DMM unit before either the Core Open Auction or Trading Halt Auction that do not participate in an Auction and are intended instead to maintain price continuity with reasonable depth following an Auction (see Rule 7.35(a)(8)(C)).

⁵ Pursuant to Rule 7.1(e), the CEO notified the Board of Directors of the Exchange of this determination. The Exchange’s current rules establish how the Exchange will function fully-electronically. The CEO also closed the NYSE American Options Trading Floor, which is located at the same 11 Wall Street facilities, and the NYSE Arca Options Trading Floor, which is located in San Francisco, CA. See Press Release, dated March 18, 2020, available here: <https://ir.theice.com/press/press-releases/all-categories/2020/03-18-2020-204202110>.

⁶ See Securities Exchange Act Release No. 88933 (May 22, 2020), 85 FR 32059 (May 28, 2020) (SR-NYSE-2020-47) (Notice of filing and immediate effectiveness of proposed rule change).

⁷ See Securities Exchange Act Release No. 89086 (June 17, 2020) (SR-NYSE-2020-52) (Notice of filing and immediate effectiveness of proposed rule change).

⁹ See Securities Exchange Act Release No. 90005 (September 25, 2020), 85 FR 61999 (October 1, 2020) (SR-NYSE-2020-78) (Notice of filing and immediate effectiveness of proposed rule change to extend the temporary period for Commentaries to Rules 7.35, 7.35A, 7.35B, and 7.35C; and temporary rule relief in Rule 36.30 to end on the earlier of a full reopening of the Trading Floor facilities to DMMs or after the Exchange closes on December 31, 2020).

¹⁰ See First Rule 7.35C Filing, *supra* note 9.

Commentary .02 to Rule 7.35C, as follows:¹¹

If the Trading Floor facilities reopen, through trading on December 31, 2020, to facilitate the fair and orderly reopening of securities following a MWCB Halt, the CEO of the Exchange or his or her designee may determine that the Exchange will facilitate a Trading Halt Auction in one or more securities under this Rule if a security has not reopened by 3:30 p.m. Eastern Time. If the Exchange facilitates a Trading Halt Auction following a MWCB Halt pursuant to this Commentary, the Auction Collars will be the greater of \$0.15 or 10% away from the Auction Reference Price.

As described in more detail in the First Rule 7.35C Filing, under Rule 7.35C, the Exchange will facilitate an Auction only if a DMM cannot facilitate an Auction for one or more securities. In support of the proposed rule change, the Exchange explained:

The Exchange continues to believe that DMM-facilitated Trading Halt Auctions following a MWCB Halt provide the greatest opportunity for fair and orderly reopenings of securities, and would therefore continue to provide DMMs an opportunity to reopen securities before effectuating an Exchange-facilitated Trading Halt Auction. The proposal would provide the Exchange with another tool during volatile markets to reopen securities before 3:50 p.m., for continuous trading to resume leading into the close. . . . The Exchange believes that specifying a time in the Rule at which the Exchange could exercise such discretion would put DMMs on notice of the time that the Exchange could begin facilitating such auctions. The Exchange further believes that it is not appropriate to provide that the Exchange would automatically facilitate reopening auctions at 3:30 p.m. There may be facts and circumstances where DMMs would be able to reopen all securities before 3:50 p.m., but that the DMM-facilitated process may not have completed by 3:30 p.m. The Exchange would take those facts and circumstances into account before invoking the proposed relief. Exchange staff would communicate with the impacted DMMs verbally on the Floor during such times, and therefore the DMMs would be on notice of whether the Exchange would invoke this relief, and for which securities.

The Exchange continues to believe that the ability for the Exchange to facilitate a Trading Halt Auction following a MWCB Halt if a security has not reopened by 3:30 p.m. would promote the fair and orderly reopening of one or more securities so that continuous trading may resume leading into the close. Accordingly, the Exchange proposes that the relief described above should be made a permanent part of Rule 7.35C. To effect this change, the Exchange proposes to amend 7.35C to add new subparagraph

(a)(4) as follows, which is based on current Commentary .02 to Rule 7.35C without any substantive differences:

The CEO of the Exchange, or his or her designee, may determine that the Exchange will facilitate a Trading Halt Auction in one or more securities under this Rule if a security is subject to either a Level 1 or Level 2 trading halt due to extraordinary market volatility under Rule 7.12 (“MWCB Halt”) and has not reopened by 3:30 p.m. Eastern Time.

The Exchange further proposes to delete Commentary .02 to Rule 7.35C, which would be replaced by proposed Rule 7.35C(a)(4).

There are no technology changes associated with this proposed rule change and the Exchange would be able to implement it immediately upon approval of this proposed rule change.

Wider Auction Collars for a Trading Halt Auction Following a MWCB Halt

As noted above, as set forth in Commentary .01(a) to Rule 7.35C,¹² the Exchange also widened the Auction Collars for an Exchange-facilitated Trading Halt Auction following a MWCB Halt to the greater of \$0.15 or 10% away from the Auction Reference Price. Absent this temporary relief, the Auction Collars for all Exchange-facilitated Trading Halt Auctions is the greater of \$0.15 or 5% away from the Auction Reference Price.

As described in the First Rule 7.35C Filing, the widening of the Auction Collars was designed to provide the Exchange with more flexibility to respond to the then unprecedented market-wide declines that resulted from the ongoing spread of COVID-19 at that time if the Exchange were to facilitate a Trading Halt Auction following a MWCB Halt. The Exchange cannot predict if and when the U.S. equities market will experience market-wide declines that would trigger a MWCB Halt again. However, if such market-wide volatility were to occur, the Exchange believes that the widened Auction Collars would promote fair and orderly reopenings following a MWCB Halt by providing a wider price range at which the Exchange could facilitate such a reopening.

¹² Commentary .01(a) to Rule 7.35C currently provides that: “For a temporary period that begins March 23, 2020, when the Trading Floor facilities have been closed pursuant to Rule 7.1(c)(3), and ends on the earlier of a full reopening of the Trading Floor facilities to DMMs or after the Exchange closes on December 31, 2020: (a) The Auction Collar for a Trading Halt Auction following a either a Level 1 or Level 2 trading halt due to extraordinary market volatility under Rule 7.12 (“MWCB Halt”) will be the greater of \$0.15 or 10% away from the Auction Reference Price.”

To effect this change, the Exchange proposes to amend Rule 7.35C(b)(3)(A)(ii) to provide as follows (proposed new text italicized), which is based on current Commentary .01 to Rule 7.35C without any substantive differences:

The Auction Collar for the Trading Halt Auction will be based on a price that is the greater of \$0.15 or 5% away from the Auction Reference Price for the Trading Halt Auction, *provided that, the Auction Collar for a Trading Halt Auction following a MWCB Halt will be the greater of \$0.15 or 10% away from the Auction Reference Price.*

The Exchange further proposes to delete Commentary .01 to Rule 7.35C, which would be replaced by the proposed amendment to Rule 7.35C(b)(3)(A)(ii).

There are no technology changes associated with this proposed rule change and the Exchange would be able to implement it immediately upon approval of this proposed rule change.

DMM Interest and Exchange-Facilitated Auctions

As set forth in Rule 7.35C(a)(1), if the Exchange facilitates an Auction, DMM Interest would not be eligible to participate in such Auction and previously-entered DMM Interest would be cancelled. When a DMM cannot facilitate an Auction because the DMM unit is experiencing a system issue that prevents it from communicating with Exchange systems, cancelling DMM Interest following an Exchange-facilitated Auction would help ensure that DMM Interest that may be at stale prices does not participate in trading on the Exchange. On the other hand, by cancelling DMM Interest when the DMM units’ systems are operating normally, DMMs may be limited in their ability to maintain price continuity with reasonable depth, *i.e.*, provide passive liquidity at the Exchange best bid and offer and at depth, immediately following an Exchange-facilitated Auction.

After a period of operating Exchange-facilitated Auctions, the Exchange identified a way to provide DMMs with a greater opportunity to provide passive liquidity immediately following an Auction, thereby dampening volatility, while still limiting DMM risk. To effect this change, the Exchange added Commentary .03 to Rule 7.35C, which provides that for the temporary period that begins on April 6, 2020 and ends on the earlier of a full reopening of the Trading Floor facilities to DMMs or after the Exchange closes on December 31, 2020, if the Exchange facilitates an Auction, DMM Interest (i) will not be eligible to participate if such Auction

¹¹ See Second Rule 7.35C Filing, *supra* note 9.

results in a trade, and will be eligible to participate if such Auction results in a quote, and (ii) will not be cancelled unless the limit price of such DMM Interest would be priced through the Auction Price or Auction Collars, as applicable, or such DMM Interest would be marketable against other unexecuted orders.¹³

The Exchange proposes to make permanent the changes to how Exchange-facilitated Auctions function, as described in Commentary .03 to Rule 7.35C. By making this functionality permanent, such rules would continue to apply both during the continuation of the current Trading Floor closure and if the Exchange were to facilitate Auctions any time after the Trading Floor fully reopens.

To effect this change, the Exchange proposes to amend 7.35C(a)(1) as follows (new text italicized, deleted text bracketed):

If the Exchange facilitates an Auction, DMM Interest will not be eligible to participate [in] *if such Auction results in a trade, and will be eligible to participate if such Auction results in a quote* [and previously-entered DMM Interest will be cancelled].

This proposed rule change would make permanent the temporary functionality set forth in paragraph (a)(1) to Commentary .03.

With this change, DMM Interest would not participate in any Exchange-facilitated Auctions that would result in a trade. This is how DMM Interest currently functions when the Exchange facilitates an Auction pursuant to either Rule 7.35C(a)(1) or Commentary .03 to Rule 7.35C. Based on experience operating pursuant to Commentary .03 to Rule 7.35C, the Exchange believes that this functionality should continue permanently when the Exchange facilitates an Auction, including, for example, when the Trading Floor is open but the DMM is unable to facilitate an Auction because of a systems or technical issue.

More specifically, when a DMM facilitates an Auction that results in a trade, the DMM determines whether to participate on the buy or sell side and, based on that direction from the DMM, DMM Orders that do not participate in the Auction and that would lock or cross other orders, which would include other DMM Orders, will be cancelled.¹⁴

If the DMM has entered both buy and sell interest in advance of the Auction and the Exchange facilitates the Auction, the DMM would not be able to control whether the DMM's buy or sell interest would participate in a trade and the Exchange would not have that instruction from the DMM of which side of the market that the DMM would participate. As a result, there may be crossing DMM Interest that could result in a wash-sale trade that would not have occurred if the DMM had facilitated the Auction. Excluding DMM Interest from participating in an Exchange-facilitated Auction that results in a trade eliminates the potential for a wash-sale trade. In addition, the Exchange believes it promotes fair and orderly Exchange-facilitated Auctions that result in a trade to exclude DMM Interest from participating in such Auctions, because if a DMM's buy or sell interest does not reflect up-to-date prices, it could impact pricing of the Auction.

By contrast, the Exchange believes that the proposed change for DMM Interest to participate in an Exchange-facilitated Auction that results in a quote would promote fair and orderly markets. This proposed change is consistent with Commentary .03(a)(1) to Rule 7.35C, but differs from current Rule 7.35C(a)(1). A security opens on a quote if there is no buy interest willing to trade with sell interest at the same price. The Exchange believes that under such circumstances, including DMM Interest in the Exchange's quote would assist the DMMs in meeting their obligation to maintain a two-sided quote as well as to maintain continuity and depth in their assigned securities.¹⁵ Accordingly, the Exchange believes that making this change permanent would promote fair and orderly markets in connection with Exchange-facilitated Auctions that result in a quote.

The final element of the proposed change to Rule 7.35C(a)(1) is that DMM Interest would no longer be automatically cancelled after an Exchange-facilitated Auction. The Exchange believes that this proposed change would assist DMMs in meeting their obligation, as required by Rule 104(f)(2), to provide passive liquidity in order to maintain continuity with reasonable depth in their assigned securities immediately following a Core Open Auction or Trading Halt Auction that was facilitated by the Exchange. In advance of an Auction, DMMs can enter DMM Orders, which if not traded in an Auction, would be part of the DMM Interest on the Exchange Book after the Auction. In addition, DMMs can enter

DMM After-Auction Orders, which do not participate in Auctions and are specifically designed to assist the DMMs to maintain passive liquidity on the Exchange immediately following an Auction, which supports their ability to maintain continuity with reasonable depth immediately following an Auction. If DMM Interest is not automatically cancelled following an Exchange-facilitated Auction, the DMM would be better able to timely meet these obligations by ensuring that passive liquidity remains on the Exchange Book immediately following an Auction.

The Exchange believes that there remain circumstances when DMM Interest should be cancelled following an Exchange-facilitated Auction. As proposed, the Exchange would cancel unexecuted DMM Interest under the same circumstances that unexecuted orders of other member organizations would be cancelled following such Auctions.

To effect this change, the Exchange proposes to amend Rule 7.35C(g)(1), which currently describes which unexecuted orders would be cancelled if a security opens or reopens on a trade via an Exchange-facilitated Auction, and Rule 7.35C(g)(2), which currently describes which unexecuted orders would be cancelled if a security opens or reopens on a quote that is above (below) the upper (lower) Auction Collar via an Exchange-facilitated Auction. The Exchange proposes that these two subparagraphs would be replaced with the following text to incorporate that under the same circumstances, DMM Interest would similarly be cancelled (proposed new text italicized):

(1) If a security opens or reopens on a trade, Market Orders (including sell short Market Orders during a Short Sale Period) and Limit Orders, *including DMM Interest*, with a limit price that is better-priced than the Auction Price and were not executed in the applicable Auction will be cancelled.

(2) If a security opens or reopens on a quote that is above (below) the upper (lower) Auction Collar, Market Orders (including sell short Market Orders during a Short Sale Period) and Limit Orders, *including DMM Interest*, with a limit price that is better-priced than the upper (lower) Auction Collar will be cancelled before such quote is published.

These proposed rule changes would make permanent the temporary functionality set forth in paragraphs (b)(1) and (2) to Commentary .03.

The Exchange further believes that if previously-entered DMM Interest would be marketable against either other DMM Interest or contra-side unexecuted

¹³ See DMM Interest Filing, *supra* note 9.

¹⁴ See Rule 7.35A(h)(3)(C) (providing that after a Core Open or Trading Halt Auction, better at-priced DMM Orders that do not receive an allocation and that lock or cross other unexecuted orders and buy and sell better-priced DMM Orders will be cancelled after the Auction Processing Period concludes).

¹⁵ See Rule 104(f)(2).

orders, such DMM Interest should be cancelled. For example, if for a security, the Auction Reference Price is \$10.00, the lower Auction Collar is \$9.00 and the upper Auction Collar is \$11.00, and the orders on the Exchange Book in advance of the Auction are as follows:

- Order 1—Buy DMM Order 1000 shares at \$10.05
- Order 2—Sell DMM Order 1000 shares at \$10.00
- Order 3—Buy DMM Order 1000 shares at \$10.02
- Order 4—Sell Limit Order at \$10.03,

the orders in this example would be processed as follows in an Exchange-facilitated Auction:

- Order 1 would be cancelled (because DMM Interest would not be eligible to participate in an Auction trade, and here, Order 1 is marketable with Orders 2 and 4).
- Order 2 would be cancelled (because DMM Interest would not be eligible to participate in an Auction trade, and here Order 2 is marketable with Order 3), and
- Order 3 would not be cancelled because it is no longer marketable with any other interest, *i.e.*, it no longer locks or crosses the price of any other contra-side interest in the Exchange Book. Order 3 would therefore be included in the opening quote.

This Exchange-facilitated Auction would result in the following quote: \$10.02 (Order 3—DMM Order) × \$10.03 (Order 4—Limit Order).

To effect this change, the Exchange proposes new subparagraph (g)(3) to Rule 7.35C to specify the additional circumstances when DMM Interest would be cancelled, as follows:

The Exchange will cancel DMM Interest that is marketable against contra-side unexecuted orders. If the contra-side unexecuted order against which such DMM Interest is marketable is DMM Interest, the DMM Interest with the earlier working time will be canceled.

This proposed rule change would make permanent the temporary functionality set forth in paragraph (b)(3) to Commentary .03.

The Exchange believes that these proposed rule changes would promote fair and orderly markets whenever the Exchange facilitates an Auction under Rule 7.35C—under any circumstance—by supporting DMMs in maintaining continuity with reasonable depth in their assigned securities immediately following an Exchange-facilitated Core Open Auction or Trading Halt Auction that was facilitated by the Exchange.

The Exchange proposes that, with these proposed changes to Rules 7.35C(a)(1) and (g), Commentary .03 to

Rule 7.35C would be deleted in its entirety.

In further support of making the functionality set forth in Commentary .03 to Rule 7.35C permanent, the Exchange notes that after the Exchange implemented that Commentary, the Exchange observed improved performance relating to Exchange-facilitated Auctions.

- For the period March 23, 2020 to April 3, 2020, 4.9% of all Core Open Auctions were facilitated by the Exchange. For the period April 6, 2020 through June 16, 2020, the Exchange facilitated only 2% of all Core Open Auctions. In addition, the percentage of Exchange-facilitated Core Open Auctions that were bound by an Auction Collar decreased from 1.3% from the pre-April 6, 2020 period, to 0.58% in the April 6, 2020–June 16, 2020 period.

- In addition, the Exchange observed that after April 6, 2020, Exchange-listed securities experienced reduced volatility in the first half hour of trading. The Exchange uses a quote-based metric to measure volatility in securities,¹⁶ and based on that metric, volatility in Exchange-listed securities between the period of April 6, 2020 and June 16, 2020 was 28.4% lower than the same measure between March 23, 2020 and April 3, 2020. In addition, the Exchange further observed that between these two periods, the difference between the Core Open Auction Price and the subsequent five-minute VWAP dropped by 31.3%.

For DMM firms that have already returned staff to the Trading Floor, this proposed change has limited application because the Exchange has not facilitated any Auctions on behalf of those firms since June 16, 2020. In addition, the Exchange anticipates that once the Trading Floor facilities open in full to DMMs, and all DMM firms have staffing on the Trading Floor, the need for Exchange-facilitated Auctions would be obviated, and the Exchange will

¹⁶ As described in an Exchange blog post, this metric is calculated using second-to-second “quote returns,” which is calculated by averaging the midpoints of all NBBO updates for a security within each second of the day from 9:35 a.m. to 4:00 p.m., and then calculating the percentage rate of return of these average quote midpoints from one second to the next. The variance of returns are then calculated in aggregated time periods (*e.g.*, 5-minute buckets) and annualized from seconds to 6.5 hour trading days to 252 trading days in the years. Finally, the Exchange takes the square root of the annualized variance in the aggregated periods, which creates the Exchange’s quote volatility metric. See NYSE Data Insights, *Introducing Quote Volatility (QV)—a new metric to measure price volatility*, available here: <https://www.nyse.com/data-insights/introducing-quote-volatility-qv-a-new-metric-to-measure-price-volatility>.

revert to pre-pandemic rates of Exchange-facilitated Auctions, which were none. Accordingly, the proposed changes to Rule 7.35C will likely have limited application and would be available as a business continuity functionality should DMMs be unable to facilitate an Auction in one or more securities, for any reason.

There are no technology changes associated with this proposed rule change and the Exchange would be able to implement it immediately upon approval of this proposed rule change.

Updated Auction Reference Price for Exchange-Facilitated Core Open Auctions

For Exchange-facilitated Auctions, the Exchange determines an Auction Price based on the Indicative Match Price for a security, which is bound by Auction Collars.¹⁷ Rule 7.35C(b)(1) specifies the Auction Reference Price that is used for determining Auction Collars for Exchange-facilitated Core Open Auctions, which is the Imbalance Reference Price, as determined under Rule 7.35A(e)(3).¹⁸ Currently, the Auction Collars for the Core Open Auction are at a price that is the greater of \$0.15 or 10% away from the Auction Reference Price.

On June 4, 2020, the Exchange added Commentary .04 to Rule 7.35C to provide that the Auction Collars for Exchange-facilitated Core Open Auctions would be the greater of \$1.00 or 10% away from the Auction Reference Price.¹⁹ The Exchange added this Commentary to reduce the number of securities subject to a collared Exchange-facilitated Core Open Auction.²⁰ The Exchange observed that

¹⁷ See Rule 7.35C(b)(2).

¹⁸ See Rule 7.35C(b)(3)(A)(i). Pursuant to Rule 7.35A(e)(3), the Imbalance Reference Price for a Core Open Auction is the Consolidated Last Sale Price, unless a pre-opening indication has been published. Pursuant to Rule 7.35(a)(11)(A), the term “Consolidated Last Sale Price” means the most recent consolidated last-sale eligible trade in a security during Core Trading Hours on that trading day, and if none, the Official Closing Price from the prior trading day for that security.

¹⁹ See Fourth Rule 7.35C Filing, *supra* note 9. Commentary .04 is in effect for the period while the Trading Floor had been temporarily closed preceding that filing, the Exchange had facilitated 2.35% of the Core Open Auctions and that approximately 30% of the Exchange-facilitated Core Open Auctions had an Indicative Match Price that was subject to an Auction Collar, and approximately 50% of these collared Exchange-facilitated Core Open Auctions were in securities trading at prices under \$10.00. The Exchange further noted that if Auction Collars had not been

²⁰ In the Fourth Rule 7.35C Filing, *id.*, the Exchange explained that for the period while the Trading Floor had been temporarily closed preceding that filing, the Exchange had facilitated 2.35% of the Core Open Auctions and that approximately 30% of the Exchange-facilitated Core Open Auctions had an Indicative Match Price that was subject to an Auction Collar, and approximately 50% of these collared Exchange-facilitated Core Open Auctions were in securities trading at prices under \$10.00. The Exchange further noted that if Auction Collars had not been

from June 4, 2020 up to June 17, 2020, when DMMs returned staff to the Trading Floor,²¹ even with the widened Auction Collars, if there were significant overnight market-wide volatility, Exchange-facilitated Core Open Auctions had a greater likelihood of being subject to an Auction Collar. For example, for that same June 4–June 16 period, when the price of the SPDR S&P 500 ETF Trust (“SPY”)²² moved over 1% from the prior day’s close, 1.4% of the Exchange-facilitated Core Open Auctions were subject to an Auction Collar, as compared to only .5% of the Exchange-facilitated Core Open Auctions being subject to an Auction Collar when SPY moved less than 1% from the prior day’s close.

The Exchange believes that adjusting the Auction Reference Price to align more closely with the anticipated price of the Core Open Auction, rather than widening the Auction Collars, would reduce the potential for an Exchange-facilitated Core Open Auction to be subject to an Auction Collar on all trading days, including when there is significant overnight market-wide volatility. Accordingly, rather than providing for a wider Auction Collar, as set forth in Commentary .04 to Rule 7.35C, the Exchange proposes to amend Rule 7.35C to update how the Auction Reference Price for Exchange-facilitated Core Open Auctions would be determined. Specifically, the Exchange proposes to determine Auction Reference Prices for Exchange-facilitated Core Open Auctions in the same manner that the Exchange’s affiliates, NYSE Arca, Inc. (“NYSE Arca”) and NYSE American LLC (“NYSE American”), determine the Auction Reference Price for their electronic Core Open Auctions.

NYSE Arca Rule 7.35–E(a)(8)(A) and NYSE American Rule 7.35E(a)(8)(A) both provide that the Auction Reference Price for Core Open Auctions on those exchanges is, “[t]he midpoint of the Auction NBBO or, if the Auction NBBO is locked, the locked price. If there is no Auction NBBO, the prior day’s Official Closing Price.” The NYSE Arca and NYSE American rules define the term “Auction NBBO” to mean:

An NBBO that is used for purposes of pricing an auction. An NBBO is an Auction NBBO when (i) there is an NBB above zero and NBO for the security and (ii) the NBBO is not crossed. In addition, for the Core Open Auction, an NBBO is an Auction NBBO when the midpoint of the NBBO when multiplied by a designated percentage, is greater than or equal to the spread of that NBBO. The designated percentage will be determined by the Exchange from time to time upon prior notice to ETP Holders.²³

The Exchange proposes to amend Rule 7.35C(b)(1) to provide that the Auction Reference Price for an Exchange-facilitated Core Open Auction would be: “The midpoint of the Auction NBBO or, if the Auction NBBO is locked, the locked price. If there is no Auction NBBO, the Official Closing Price from the prior trading day.” This rule text is based on NYSE Arca Rule 7.35–E(a)(8)(A) and NYSE American Rule 7.35E(a)(8)(A) without any differences.

The Exchange further proposes to amend Rule 7.35(a) to add a definition for the term “Auction NBBO,” which would similarly be based on the definition of that term in the NYSE Arca and NYSE American rules without any substantive differences, as follows:

“Auction NBBO” means an NBBO that is used for purposes of pricing an auction. An NBBO is an Auction NBBO when (i) there is an NBB above zero and NBO for the security and (ii) the NBBO is not crossed. In addition, for the Core Open Auction, an NBBO is an Auction NBBO when the midpoint of the NBBO when multiplied by a designated percentage, is greater than or equal to the spread of that NBBO. The designated percentage will be determined by the Exchange from time to time upon prior notice to member organizations.

The Exchange proposes to add the term “Auction NBBO” as Rule 7.35(a)(5) and make non-substantive changes to renumber the definitions currently set forth in Rules 7.35(a)(5)–(12) as Rules 7.35(a)(6)–(13).

Because there are technology changes associated with this proposed rule change, the Exchange proposes to announce the implementation date of this change by Trader Update. The Exchange anticipates that the Exchange will implement this technology change in the first quarter of 2021.

To provide continuity, the Exchange further proposes to amend Commentary .04 to Rule 7.35C to provide that such Commentary would end on the earlier of when the Exchange implements its technology change to use the midpoint of the Auction NBBO as the Auction Reference Price for the Core Open

Auction or after the Exchange closes on December 31, 2020. With this proposed rule change, the widened Auction Collars specified in that Commentary would continue to be operative until such time that the proposed changes to the Auction Reference Price for Exchange-facilitated Core Open Auctions have been approved and implemented.

2. Statutory Basis

The proposed rule change is consistent with Section 6(b) of the Act,²⁴ in general, and furthers the objectives of Section 6(b)(5) of the Act,²⁵ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, and to remove impediments to and perfect the mechanism of a free and open market and a national market system.

The Exchange believes that the rules that it added on a temporary basis to Rule 7.35C have supported the fair and orderly operation of the Exchange during both the market volatility associated with COVID–19 and the temporary period that the Trading Floor facilities have been closed either in full or in part due to COVID–19. The Exchange further believes the functionality that has been operating on a temporary basis would continue to support the fair and orderly operation of the Exchange under any circumstances where there may be either market-wide volatility or the need for the Exchange to facilitate one or more Auctions.

Exchange Authority To Facilitate a Trading Halt Auction Following a MWCB Halt

The Exchange believes that it would remove impediments to and perfect the mechanism of a free and open market and a national market system to provide the Exchange with authority to facilitate a Trading Halt Auction following a MWCB Halt. The Exchange continues to believe that DMM-facilitated Trading Halt Auctions following a MWCB Halt provide the greatest opportunity for fair and orderly reopenings of securities, and would therefore continue to provide DMMs an opportunity to reopen securities before effectuating an Exchange-facilitated Trading Halt Auction. The proposal would provide the Exchange with another tool during volatile markets to reopen securities before 3:50 p.m. so that continuous

applied to these securities priced under \$10.00, they would have opened at a price between \$0.15 and \$1.00 away from the Auction Reference Price.

²¹ As noted above, the Exchange has not facilitated any Auctions for any of the DMM firms that have returned staff to the Trading Floor.

²² Because SPY is priced based on the securities included in the S&P 500 Index, the Exchange believes that SPY’s price as compared to its prior day’s closing price is indicative of the scope of market-wide volatility leading into the open of the Core Trading Session.

²³ See NYSE Arca Rule 7.35–E(a)(5) and NYSE American Rule 7.35E(a)(5).

²⁴ 15 U.S.C. 78f(b).

²⁵ 15 U.S.C. 78f(b)(5).

trading may resume before leading into the close. The Exchange further believes that it is not appropriate to provide that the Exchange would automatically facilitate reopening auctions at 3:30 p.m. There may be facts and circumstances where DMMs would be able to reopen all securities before 3:50 p.m., but that the DMM-facilitated process may not have completed by 3:30 p.m. The Exchange would take those facts and circumstances into account before invoking the proposed relief.

Wider Auction Collars for a Trading Halt Auction Following a MWCB Halt

The Exchange believes that it would remove impediments to and perfect the mechanism of a free and open market and a national market system to widen the Auction Collars for an Exchange-facilitated Trading Halt Auction following a MWCB Halt. Such widened Auction Collars would provide the Exchange with more flexibility to respond to any market-wide declines that may continue following a MWCB Halt if the Exchange were to facilitate a Trading Halt Auction following such halt. The Exchange cannot predict if and when the U.S. equities market will experience market-wide declines that would trigger a MWCB Halt again. However, if such market-wide volatility were to occur, the Exchange believes that the widened Auction Collars would promote fair and orderly reopenings following a MWCB Halt by providing a wider price range at which the Exchange could facilitate such a reopening, thereby allowing more buy and sell interest to participate in such Auction.

DMM Interest and Exchange-Facilitated Auctions

As noted above, beginning March 19, 2020, the Exchange began facilitating auctions as provided for under Rule 7.35C for the first time, and then, beginning March 23, 2020, when the Trading Floor was temporarily closed to reduce the spread of COVID-19, began facilitating Auctions on behalf of all DMM firms. Based on that experience, the Exchange added Commentary .03 to Rule 7.35C, which is in effect only for a temporary period while the Trading Floor is closed. The Exchange believes that it would remove impediments to and perfect the mechanism of a free and open market and a national market system to make the changes described in Commentary .03 to Rule 7.35C permanent because it would allow DMMs to maintain continuity with reasonable depth in their assigned securities immediately following an Exchange-facilitated Auction.

As described above, the Exchange is proposing that DMM Interest would continue to not participate in an Exchange-facilitated Auction that results in a trade. As noted above, under both the current Rule and temporary Commentary .03, DMM Interest does not participate in an Exchange-facilitated Auction that results in a trade in part to prevent wash-trade sales of previously-entered DMM buy and sell interest and therefore reduces DMM units' risk. It also protects the fair and orderly operation of such Auctions because such DMM Interest may be at stale prices, and therefore could impact pricing of the Auction in a manner that does not reflect up-to-date trading interest. For this reason, the Exchange believes it would continue to promote fair and orderly Auctions for DMM Interest not to participate in an Exchange-facilitated Auction that results in a trade.

By contrast, the Exchange believes that the proposed change that DMM Interest would be included in an Exchange-facilitated Auction that results in a quote would remove impediments to and perfect the mechanism of a free and open market and a national market system because it would promote fair and orderly resumption of trading by allowing DMM Interest to be considered as part of the opening quote. A security only opens on a quote when there are no buy and sell orders that can be crossed at a single price. Accordingly, when a security opens on a quote, the DMM has an immediate obligation to maintain a two-sided quote and to provide continuity and depth. Including DMM interest in an Exchange-facilitated Auction that results in a quote would assist DMMs in meeting those obligations.

The Exchange believes it would remove impediments to and perfect the mechanism of a free and open market and a national market system not to automatically cancel DMM Interest following an Exchange-facilitated Auction because it would provide DMMs with the opportunity to provide passive liquidity immediately following an Exchange-facilitated Auction, thereby reducing volatility while still limiting DMM risk. Similarly, the Exchange believes that because DMM Interest would not be participating in an Exchange-facilitated Auction that results in a trade, it would remove impediments to and perfect the mechanism of a free and open market and a national market system to cancel DMM Interest that would be marketable against unexecuted orders because, if not cancelled, such interest could trade at a price that would not be consistent

with the Auction Price or opening or reopening quote determined in the Exchange-facilitated Auction. The proposed changes would also remove impediments to and perfect the mechanism of a free and open market because DMM Interest that, following an Exchange-facilitated Auction, would be priced through the Auction Price or Auction Collars, as applicable, would be cancelled in the same manner that other unexecuted orders would be cancelled.

The Exchange further believes that the proposed changes to Rules 7.35C(a) and (g) would remove impediments to and perfect the mechanism of a free and open market and a national market system because the Exchange observed improved performance following Exchange-facilitated Auctions after the Exchange implemented Commentary .03 to Rule 7.35C. Accordingly, should circumstances ever arise again that would require the Exchange to facilitate any Auctions, which, based on pre-pandemic experience, would likely be rare, the Exchange believes that these proposed changes would improve the performance of Exchange-facilitated Auctions by enabling better engagement by the DMMs in both the Auction and the immediate after-market while still limiting DMM risk.

Updated Auction Reference Price for Exchange-Facilitated Core Open Auctions

The Exchange believes that the proposal to change the Auction Reference Price for Exchange-facilitated Core Open Auctions would remove impediments to and perfect the mechanism of a free and open market and a national market system because it would reduce the potential number of securities that would be subject to a collared Exchange-facilitated Core Open Auction, including when there is significant overnight market-wide volatility. Commentary .04 to Rule 7.35C sought to achieve this goal by widening the Auction Collars, but as noted above, these temporary widened Auction Collars would not prevent an Exchange-facilitated Core Open Auction from being subject to an Auction Collar when there has been significant overnight market-wide volatility. The Exchange believes that aligning the Auction Reference Price more closely with the anticipated opening price by using the midpoint of the Auction NBBO as the Auction Reference Price (or Official Closing Price of the prior Trading Day if no Auction NBBO) would reduce the potential for an Exchange-facilitated Core Open Auction to be subject to an Auction Collar on all trading days, including when there is

significant overnight market-wide volatility. The Exchange further believes that this proposed rule change would reduce the potential number of securities that would open at a price that may not represent the current value of the security due to unfilled marketable auction interest, while still preserving investor protections by preventing significantly dislocated openings. This proposed rule change would therefore promote the fair and orderly operation of Exchange-facilitated Core Open Auctions by allowing such securities to open at a price that is consistent with the buy and sell interest in the security, which would also allow more buy and sell interest to participate in such Auction.

The Exchange notes that this proposed change is not novel and is based on how NYSE Arca and NYSE American determine the Auction Reference Price for their respective electronic Core Open Auctions. Accordingly, this proposed change would align how Auction Reference Prices are determined for electronic Exchange-facilitated Auctions across NYSE, NYSE Arca, and NYSE American.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issues but rather would make permanent the Exchange's temporary Commentaries .01-.03 to Rule 7.35C, which have been in effect for a temporary period while the Trading Floor is temporarily closed due to COVID-19. This proposed rule change is designed to provide the Exchange with additional tools for when it facilitates an Auction, including by allowing for an Exchange-facilitated Trading Halt Auction following a MWCB Halt so that a security can be reopened before leading into the close, providing the DMMs with additional functionality to allow them to maintain price continuity with reasonable depth in their assigned securities following an Exchange-facilitated Auction, and aligning the Auction Reference Price for an Exchange-facilitated Core Open Auction with the Auction Reference Price used for NYSE Arca and NYSE American electronic Core Open Auctions. More specifically, the proposed rule change does not implicate any intramarket competition concerns because the only market participants on the Exchange with the obligation to

facilitate Auctions are DMMs, and all DMMs would be subject to this rule change. The proposed rule change does not implicate any intermarket competition concerns because it relates to how the Exchange would facilitate Auctions in Exchange-listed securities.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register**, or such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

- (A) By order approve or disapprove the proposed rule change, or
- (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NYSE-2020-89 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to File Number SR-NYSE-2020-89. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule

change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSE-2020-89, and should be submitted on or before December 3, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁶

J. Matthew DeLesDernier,
Assistant Secretary.

Arena Holdings Management LLC

November 5, 2020.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice.

Notice of application for an exemptive order under Section 202(a)(11)(H) of the Investment Advisers Act of 1940 ("Advisers Act").

Applicant: Arena Holdings Management LLC (the "Applicant").

Relevant Advisers Act Sections: Exemption requested under Section 202(a)(11)(H) of the Advisers Act from Section 202(a)(11) of the Advisers Act.

Summary of Application: The Applicant requests that the Commission issue an order declaring it to be a person not within the intent of Section 202(a)(11) of the Advisers Act, which defines the term "investment adviser."

²⁶ 17 CFR 200.30-3(a)(12).

Filing Dates: The application was filed on November 13, 2019 and amended on August 4, 2020.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by emailing the Commission's Secretary at *Secretarys-Office@sec.gov* and serving Applicant with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on November 30, 2020, and should be accompanied by proof of service on Applicant, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission's Secretary at *Secretarys-Office@sec.gov*.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov*. Applicant: Arena Holdings Management LLC, *jbergman@brickpatel.com*.

FOR FURTHER INFORMATION CONTACT: Asaf Barouk, Attorney-Adviser, at 202–551–4029 or Parisa Haghshenas, Branch Chief, at (202) 551–6825 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's website either at <http://www.sec.gov/rules/ia/releases.shtml> or by calling (202) 551–8090.

Applicant's Representations

1. The Applicant is a multi-generational, single-family office that provides or intends to provide services to the family and descendants of Roopa Dewan. The Applicant is wholly owned by Family Clients and is exclusively controlled (directly and indirectly) by one or more Family Members and/or Family Entities in compliance with Rule 202(a)(11)(G)–1 (the "Family Office Rule"). For purposes of the application, the term "Dewan Family" means the lineal descendants of Roopa Dewan, their spouses or spousal equivalents, and all other persons and entities that qualify as "Family Clients" as defined in paragraph (d)(4) of the Family Office Rule. Unless otherwise indicated, capitalized terms herein have the same meaning as defined in the Family Office Rule.

2. The Applicant provides both advisory and non-advisory services (collectively, the "Services") to members of the Dewan Family. Any Service provided by the Applicant that relates to investment advice about securities or may otherwise be construed as advisory in nature is considered an "Advisory Service."

3. The Applicant represents that: (i) Each of the persons served by the Applicant is a Family Client (*i.e.*, the Applicant has no investment advisory clients other than Family Clients as required by paragraph (b)(1) of the Family Office Rule); (ii) the Applicant is owned and controlled in a manner that complies in all respects with paragraph (b)(2) of the Family Office Rule; and (iii) the Applicant does not hold itself out to the public as an investment adviser as required by paragraph (b)(3) of the Family Office Rule. At the time of this Application, Applicant provides Advisory Services solely to Family Clients, including primarily to pooled investment vehicles that are wholly owned, directly or indirectly, by one or more natural persons that are Family Clients and operated for the sole benefit of those clients.

4. In addition to the Family Clients, the Applicant desires to provide Services (including Advisory Services) to the siblings of a spouse of a lineal descendant of Roopa Dewan (which descendant is the founder and Chief Executive Officer of Applicant) and their spouses and descendants (the "Additional Family Clients").

5. The Additional Family Clients do not have an ownership interest in the Applicant. The Applicant represents that the assets beneficially owned by Family Members and/or Family Entities (excluding the Additional Family Clients) would make up at least 95% of the total assets for which the Applicant provides Advisory Services.

6. The Applicant represents that the Additional Family Clients have important familial ties to and are an integral part of the Dewan Family. The Applicant maintains that including the Additional Family Clients into the definition of "family" for this purpose simply recognizes and memorializes the familial ties and intra-familial relationships that already exist, and have existed for at least 25 years and that the inclusion of the Additional Family Clients as members of the Dewan Family for which the Applicant may provide Services would be consistent with the existing familial relationship among the family members.

The Applicant's Legal Analysis

1. Section 202(a)(11) of the Advisers Act defines the term "investment adviser" to mean "any person who, for compensation, engages in the business of advising others, either directly or through publications or writings, as to the value of securities or as to the advisability of investing in, purchasing, or selling securities, or who, for compensation and as part of a regular business, issues or promulgates analyses or reports concerning securities . . ."

2. The Applicant falls within the definition of an investment adviser under Section 202(a)(11). The Family Office Rule provides an exclusion from the definition of investment adviser for which the Applicant is currently eligible but would no longer qualify if the Applicant provides Services to the Additional Family Clients. Because the Applicant has regulatory assets under management of more than \$100 million, it is not prohibited from registering with the Commission under Section 203A(a) of the Advisers Act. In sum, absent relief, if the Applicant opted to render Services to the Additional Family Clients, the Applicant would be required to register under Section 203(a) of the Advisers Act, notwithstanding that (i) the Applicant does not hold itself out to the public as an investment adviser and does not market non-public offerings to persons or entities that are not Family Clients, (ii) the Applicant is wholly owned by Family Clients and controlled by Feroz Dewan who is a member of the Dewan Family, in accordance with paragraph (b)(2) of the Family Office Rule; and (iii) the Applicant is a "family office" for the Dewan Family and will not offer its Advisory Services to anyone other than Family Clients and the Additional Family Clients.

3. The Applicant submits that its proposed relationship with the Additional Family Clients does not change the nature of the office into that of a commercial advisory firm. In addition, the Applicant notes that if the siblings of Mrs. Dewan were the siblings of a lineal descendant, rather than the siblings of a spouse of a lineal descendant, there would be no question that each of them would be a Family Member, and their retirement assets would similarly fall within the definition of Family Client. The Applicant states that in requesting the order, the Applicant is not attempting to expand its operations or engage in any level of commercial activity to which the Advisers Act is designed to apply. There would only be two natural persons and their spouses and

descendants who are not Family Members to whom the Applicant would provide Advisory Services if relief were granted. The Applicant estimates that if the Additional Family Clients' assets were managed by the Applicant, the assets owned by the Additional Family Clients would represent less than five percent (5%) of the Applicant's assets under management. From the perspective of the Dewan Family, allowing the Applicant to provide Services to the Additional Family Clients is consistent with the existing familial relationship among family members.

4. The Applicant also submits that there is no public interest in requiring the Applicant to be registered under the Advisers Act. The Applicant states that the office is a private organization that was formed to be the "family office" for the Dewan Family and that the office does not have any public clients. The Applicant maintains that the office's Advisory Services are exclusively tailored to the needs of the Extended Dewan Family. The Applicant argues that the provision of Advisory Services to the Additional Family Clients, does not create any public interest that would require the office to be registered under the Advisers Act that is different in any manner than the considerations that apply to a "family office" that complies in all respects with the Family Office Rule.

5. The Applicant argues that although the Family Office Rule largely codified the exemptive orders that the Commission had previously issued before the enactment of the Dodd-Frank Wall Street Reform and Consumer Protection Act, the Commission recognized in proposing the rule that the exact representations, conditions, or terms contained in every exemptive order could not be captured in a rule of general applicability. The Commission noted that family offices would remain free to seek a Commission exemptive order to advise an individual or entity that did not meet the proposed family client definition, and that certain issues would be more appropriately addressed through an exemptive order process where the Commission can consider the specific facts and circumstances, than through a rule of general applicability.

6. The Applicant maintains that, based on its circumstances—desiring to provide Advisory Services to certain Additional Family Clients who are relatives that have been considered and treated as family members for twenty-five (25) years and whose status as clients of the office would not change the nature of the office's operations to that of a commercial advisory

business—an exemptive order is appropriate based on the Applicant's specific facts and circumstances.

7. For the foregoing reasons, the Applicant requests an order declaring it to be a person not within the intent of Section 202(a)(11) of the Advisers Act. The Applicant submits that the order is necessary and appropriate, in the public interest, consistent with the protection of investors, and consistent with the purposes fairly intended by the policy and provisions of the Advisers Act.

The Applicant's Conditions

1. The Applicant will offer and provide Advisory Services only to Family Clients and to the Additional Family Clients, who generally will be deemed to be, and be treated as if they were, Family Clients; provided, however, that the Additional Family Clients will be deemed to be, and treated as if they were, Family Members for purposes of paragraph (b)(1) and for purposes of paragraph (d)(4)(vi) of the Family Office Rule.

2. The Applicant will at all times be wholly owned by Family Clients and exclusively controlled (directly or indirectly) by one or more Family Members and/or Family Entities (excluding the Additional Family Clients' Family Entities) as defined in paragraph (d)(5) of the Family Office Rule.

3. At all times the assets beneficially owned by Family Members and/or Family Entities (excluding the Additional Family Clients' Family Entities), will account for at least 95% of the assets for which the Applicant provides Advisory Services.

4. The Applicant will comply with all the terms for exclusion from the definition of investment adviser under the Advisers Act set forth in the Family Office Rule except for the limited exception requested by this Application.

For the Commission, by the Division of Investment Management, under delegated authority.

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90368; File No. SR-DTC-2020-801]

Self-Regulatory Organizations; The Depository Trust Company; Notice of No Objection To Advance Notice To Amend Rule 4

November 6, 2020.

On September 9, 2020, The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") advance notice SR-DTC-2020-801 ("Advance Notice") pursuant to Section 806(e)(1) of Title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, entitled Payment, Clearing and Settlement Supervision Act of 2010 ("Clearing Supervision Act")¹ and Rule 19b-4(n)(1)(i)² under the Securities Exchange Act of 1934 ("Exchange Act")³ to amend Rule 4 of the Rules, By-Laws and Organization Certificate of DTC (the "Rules"). The Advance Notice was published for comment in the **Federal Register** on October 20, 2020,⁴ and the Commission has not received comments regarding the changes proposed in the Advance Notice. This publication serves as notice of no objection to the Advance Notice.

I. The Advance Notice

A. Background

DTC is the central securities depository ("CSD") for substantially all corporate and municipal debt and equity securities available for trading in the United States.⁵ As a covered clearing agency that provides CSD services,⁶ DTC provides a central

¹ 12 U.S.C. 5465(e)(1).

² 17 CFR 240.19b-4(n)(1)(i).

³ 15 U.S.C. 78a *et seq.*

⁴ Securities Exchange Act Release No. 90169 (October 14, 2020), 85 FR 66666 (October 20, 2020) (SR-DTC-2020-801) ("Notice of Filing").

⁵ Each capitalized term not otherwise defined herein has its respective meaning as set forth in DTC's rules, including, but not limited to, the Rules, By-Laws and Organization Certificate of DTC (the "Rules") and the DTC Settlement Service Guide (the "Settlement Guide"), available at <http://www.dtcc.com/legal/rules-and-procedures.aspx>. The Settlement Guide is a Procedure of DTC filed with the Commission that, among other things, operationalizes and supplements the DTC Rules that relate to settlement.

⁶ A covered clearing agency is defined as a registered clearing agency that provides the services of a central counterparty ("CCP") or CSD. See 17 CFR 240.17Ad-22(a)(5). CSD services means services of a clearing agency that is a securities depository as described in Section 3(a)(23)(A) of the Exchange Act. See 17 CFR 240.17Ad-22(a)(3). Specifically, the definition of a clearing agency includes, in part, "any person, such as a securities depository that (i) acts as a custodian of securities

location in which securities may be immobilized, and interests in those securities are reflected in accounts maintained for its Participants, which are financial institutions such as brokers or banks.⁷ DTC does not provide central counterparty services and therefore does not become party to its Participants' transactions or guarantee settlement on behalf of its Participants.⁸

DTC provides settlement services for virtually all broker-to-broker equity and listed corporate and municipal debt securities transactions in the U.S., as well as institutional trades, money market instruments and other financial obligations. For end-of-day net funds settlement, the DTC settlement system records money debits and credits to Participant settlement accounts throughout a Business Day.⁹ At the end of a Business Day, a Participant's settlement account will have a net debit (*i.e.*, the sum of all money charges to a Participant's account exceeds the sum of all money credits), net credit (*i.e.*, the sum of all money credits to a Participant's account exceeds the sum of all money charges), or zero balance.

in connection with a system for the central handling of securities whereby all securities of a particular class or series of any issuer deposited within the system are treated as fungible and may be transferred, loaned, or pledged by bookkeeping entry without physical delivery of securities certificates, or (ii) otherwise permits or facilitates the settlement of securities transactions or the hypothecation or lending of securities without physical delivery of securities certificates." 15 U.S.C. 78c(a)(23)(A).

⁷ See, e.g., Securities Exchange Act Release No. 20221 (September 23, 1983), 48 FR 45167, 45168 (October 3, 1983) (File No. 600-1) ("A securities depository is a "custodial" clearing agency that operates a centralized system for the handling of securities certificates. Depositories accept deposits of securities from broker-dealers, banks, and other financial institutions; credit those securities to the depositing participants (*sic*) accounts; and, pursuant to participant's (*sic*) instructions, effect book-entry movements of securities. The physical securities deposited with a depository are held in a fungible bulk; each participant or pledgee having an interest in securities of a given issue credited to its account has a pro rata interest in the physical securities of the issue held in custody by the securities depository in its nominee name. Depositories collect and pay dividends and interest to participants for securities held on deposit. Depositories also provide facilities for payment by participants to other participants in connection with book-entry deliveries of securities. . . .").

⁸ A clearing agency that provides central counterparty services interposes itself between the counterparties to securities transactions, acting functionally as the buyer to every seller and the seller to every buyer. 17 CFR 240.17Ad-22(a)(2).

⁹ Credits to a Participant settlement account arise from deliveries versus payment, receipt of payment orders, principal and interest distributions in respect of securities held, intraday settlement progress payments and any other items or transactions that give rise to a credit. Debits to a Participant settlement account are primarily due to receives versus payment, as well as other types of charges to the account permitted under the Rules. See Notice of Filing, *supra* note 4, 85 FR at 66667.

This final balance will determine whether the Participant has an obligation to pay or to be paid as part of the process of DTC completing settlement on that Business Day. A Participant that fails to pay its net debit balance and therefore defaults on its settlement obligations on a Business Day will not have paid for the securities processed for delivery versus payment, and the securities will not be credited to its account.

DTC represents that there may be circumstances in which the amount of settlement payments received or available to DTC on a Business Day is not sufficient to pay all Participants with an end-of-day net credit balance on that Business Day (a "settlement gap").¹⁰ A settlement gap could occur on a Business Day as a result of a Participant Default, where a Participant fails to pay its settlement obligation (a "default gap"). A settlement gap could also occur on a Business Day as a result of causes other than a Participant Default (a "non-default gap"). Examples of a non-default gap could include a scenario in which the funds required to complete settlement are not available to DTC due to an operational or data issue arising at DTC or at a Participant or Settling Bank, a cyber incident, or other business disruption.¹¹ According to DTC, its failure to complete settlement on a given Business day could cause significant market-wide effects.¹²

B. The Participants Fund and Rule 4

The Participants Fund is prefunded and represents the aggregate of the deposits that each DTC Participant is required to make under DTC's Rules.¹³ The Rules provide for a minimum

¹⁰ See *id.*

¹¹ DTC is subject to a number of regulatory requirements related to its operational and cyber risks, including Rule 17Ad-22(e)(17) and Regulation Systems Compliance and Integrity. DTC's overall approach to operational risk is summarized in its Disclosure Framework, available at <https://www.dtcc.com/legal/policy-and-compliance>. Among other things, DTC manages its operational risk pursuant to the Clearing Agency Operational Risk Management Framework, which the Commission approved in a separate rule filing. See Securities Exchange Act Release No. 81745 (September 28, 2017), 82 FR 46332 (October 4, 2017) (SR-DTC-2017-014).

¹² See Notice of Filing, *supra* note 4, 85 FR at 66667 (citing, e.g., Rule 9(B), *supra* note 5, which states: "Each Participant and the Corporation shall settle the balance of the Settlement Account of the Participant on a daily basis in accordance with these Rules and the Procedures. Except as provided in the Procedures, the Corporation shall not be obligated to make any settlement payments to any Participants until the Corporation has received all of the settlement payments that Settling Banks and Participants are required to make to the Corporation.").

¹³ See Rule 4 (Participants Fund and Participants Investment), *supra* note 5.

deposit to the Participants Fund, and Participants with higher levels of activity that impose greater liquidity risk to the DTC settlement system have proportionally larger required deposits.¹⁴ DTC has stated that the Participants Fund is a mutualized pre-funded liquidity and loss resource, and that DTC does not have an obligation to repay the Participants Fund and the application of the Participants Fund does not convert to a loss.¹⁵ Once DTC applies the Participants Fund, the Participants are required, upon the demand of DTC, to replenish their shares of the Participants Fund to satisfy their minimum deposits.¹⁶ DTC further represents that the principal purpose of the Participants Fund is to be one of the foundational liquidity resources available to DTC to fund a shortfall in order to complete settlement on a Business Day.¹⁷

Currently, Section 4 of Rule 4 provides that, if there is a Defaulting Participant and the amount charged to the Actual Participants Fund Deposit of the Defaulting Participant pursuant to Section 3 of Rule 4¹⁸ is not sufficient to complete settlement, DTC may apply the Actual Participants Fund Deposits of Participants other than the Defaulting Participant (each, a "non-defaulting Participant"), and apply such other liquidity resources as may be available to DTC, including, but not limited to, the End-of-Day Credit Facility.¹⁹ DTC recognizes that currently, certain provisions of Rule 4 might be construed to narrow the scope of use of the Participants Fund (and any other liquidity resources) for settlement to a

¹⁴ See *id.*

¹⁵ Securities Exchange Act Release No. 83950 (August 27, 2018), 83 FR 44393 (August 30, 2018) (SR-DTC-2017-804).

¹⁶ See Section 4 of Rule 4 (Participants Fund and Participants Investment), *supra* note 5.

¹⁷ See Notice of Filing, *supra* note 4, 85 FR at 66668 (citing DTC's Settlement Guide which provides that the Participants Fund creates liquidity and collateral resources to support the business of DTC and to cover losses and liabilities incident to that business).

¹⁸ Section 3 of Rule 4 provides that if a Participant is obligated to DTC pursuant to the Rules and the Procedures and fails to satisfy any such obligation, DTC shall, to the extent necessary to eliminate such obligation, apply some or all of the Actual Participants Fund Deposit of such Participant to such obligation to satisfy the Participant Default. See Section 3 of Rule 4, *supra* note 5.

¹⁹ Section 2 of Rule 4 provides that "End-of-Day Credit Facility" is any credit facility maintained by DTC for the purpose of funding the end-of-day settlement of transactions processed through the facilities of DTC. See Section 2 of Rule 4, *supra* note 5. Also see Securities Exchange Act Release No. 80605 (May 5, 2017), 82 FR 21850 (May 10, 2017) (SR-DTC-2017-802; NSCC-2017-802) (renewing the committed revolving credit facility of DTC and National Securities Clearing Corporation).

default gap only.²⁰ In order to ensure that DTC may use the Participants Fund and other liquidity resources to fund a settlement gap regardless of its cause, DTC has proposed revising Rule 4, as discussed below.

C. Description of Proposed Changes

DTC states that Section 4 of Rule 4 does not address the use of the Participants Fund to complete settlement when there is a non-default gap and could be construed as limiting the pro rata application of the Participants Fund to fund a settlement gap to default scenarios.²¹ DTC further represents that, on each Business Day, settlement occurs during a tight timeframe, in conjunction with the Federal Reserve's National Settlement Service and Fedwire.²² If there is a delay with the receipt or disbursement of funds for settlement, DTC would need to address those problems quickly in order to complete settlement on that Business Day.²³

In the Advance Notice, DTC describes the proposed changes to address this situation and expressly ensure that the Participants Fund could be used to complete settlement in the event of a non-default gap. First, DTC proposes to amend Section 4 of Rule 4 to state that (i) the Participants Fund, (ii) the existing retained earnings or undivided profits of DTC, and (iii) any other liquidity resources as may be available (including, but not limited to, the End-of-Day Credit Facility), would be available to DTC as liquidity resources to fund settlement on a Business Day, regardless of whether the settlement gap is a default gap or a non-default gap. The proposal would state that DTC may apply its available resources to fund settlement, in such order and in such amounts as it determines, in its sole discretion. Second, DTC proposes to provide that a determination to apply the Participants Fund shall be made by either the Chief Executive Officer, Chief Risk Officer, Chief Financial Officer, a member of any management committee, Treasurer or any Managing Director as may be designated by the Chief Risk Officer from time to time. The proposal also states that the Board of Directors (or an authorized Committee thereof) shall be promptly informed of the

determination.²⁴ Third, DTC proposes to make certain clarifying and conforming changes, including to clarify that a Participant's pro rata share of an application of the Participants Fund would be the same whether there is a default gap or a non-default gap, and to make minor changes for conformity and readability.

II. Discussion and Recommendation

Although the Clearing Supervision Act does not specify a standard of review for an advance notice, the stated purpose of the Clearing Supervision Act is instructive: To mitigate systemic risk in the financial system and promote financial stability by, among other things, promoting uniform risk management standards for systemically important financial market utilities ("SIFMUs") and strengthening the liquidity of SIFMUs.²⁵

Section 805(a)(2) of the Clearing Supervision Act authorizes the Commission to prescribe regulations containing risk management standards for the payment, clearing, and settlement activities of designated clearing entities engaged in designated activities for which the Commission is the supervisory agency.²⁶ Section 805(b) of the Clearing Supervision Act provides the following objectives and principles for the Commission's risk management standards prescribed under Section 805(a):²⁷

- To promote robust risk management;
- To promote safety and soundness;
- To reduce systemic risks; and
- To support the stability of the broader financial system.

Section 805(c) provides, in addition, that the Commission's risk management standards may address such areas as risk management and default policies and procedures, among others areas.²⁸

The Commission has adopted risk management standards under Section 805(a)(2) of the Clearing Supervision Act and Section 17A of the Exchange Act (the "Clearing Agency Rules").²⁹ The Clearing Agency Rules require,

among other things, each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures that are reasonably designed to meet certain minimum requirements for its operations and risk management practices on an ongoing basis.³⁰ As such, it is appropriate for the Commission to review advance notices against the Clearing Agency Rules and the objectives and principles of these risk management standards as described in Section 805(b) of the Clearing Supervision Act. As discussed below, the Commission believes the proposal in the Advance Notice is consistent with the objectives and principles described in Section 805(b) of the Clearing Supervision Act,³¹ and in the Clearing Agency Rules, in particular Rule 17Ad-22(e)(1), (e)(2)(i) and (v), and (e)(7).³²

A. Consistency With Section 805(b) of the Clearing Supervision Act

The Commission believes that the Advance Notice is consistent with the stated objectives and principles of Section 805(b) of the Clearing Supervision Act,³³ because the changes proposed in the Advance Notice are consistent with promoting robust risk management, promoting safety and soundness, reducing systemic risks, and supporting the broader financial system.

First, the Commission believes that the proposal is consistent with promoting robust risk management. DTC proposes to amend Section 4 of Rule 4 to provide expressly for the pro rata application of the Participants Fund, retained earnings, and any other liquidity resources, including DTC's credit facility, to any settlement gap, including a non-default gap. As noted above, settlement occurs during a tight timeframe on each Business Day. If there is a delay with the receipt or disbursement of funds for settlement, it would need to be addressed quickly in order to complete settlement on that Business Day. The proposal would clarify which resources DTC can access and use in the most time-efficient and effective manner to ensure settlement.³⁴

²⁴ The requirement that DTC would also promptly notify the Commission in the event that the Participants Fund were used to complete settlement would remain unchanged.

²⁵ See 12 U.S.C. 5461(b).

²⁶ 12 U.S.C. 5464(a)(2).

²⁷ 12 U.S.C. 5464(b).

²⁸ 12 U.S.C. 5464(c).

²⁹ 17 CFR 240.17Ad-22. See Securities Exchange Act Release No. 68080 (October 22, 2012), 77 FR 66220 (November 2, 2012) (S7-08-11). See also Securities Exchange Act Release No. 78961 (September 28, 2016), 81 FR 70786 (October 13, 2016) (S7-03-14) (Standards for Covered Clearing Agencies). DTC is a "covered clearing agency," as defined in Rule 17Ad-22(a)(5). See *supra* note 6.

³⁰ *Id.*

³¹ 12 U.S.C. 5464(b).

³² 17 CFR 240.17Ad-22(e)(1) and (e)(2)(i).

³³ 12 U.S.C. 5464(b).

³⁴ The Commission further believes that use of the Participants Fund may be the most efficient method of completing settlement at the end of a Business Day on a tight timeframe, as it generally consists of cash which, pursuant to DTC's Investment Policy, must be held in demand deposit, savings or checking bank accounts that provide same day access to funds. See Exchange Act Release No. 88513 (March 30, 2020), 85 FR 19047, 19048 (April 3, 2020). The Commission observes that, as a general matter, it likely could take more time to

²⁰ See Notice of Filing, *supra* note 4, 85 FR at 66668.

²¹ See Notice of Filing, *supra* note 4, 85 FR at 66669.

²² See *id.*; see also, Settlement Guide at 19-20, *supra* note 5.

²³ See Notice of Filing, *supra* note 4, 85 FR at 66669.

Moreover, the proposal would specify the particular DTC personnel whose approval could authorize the use of the Participants Fund to finance a settlement gap. The Commission believes that the proposal is designed to allow DTC to take timely and effective action to fund a settlement gap, regardless of whether it is a default or non-default gap, and therefore complete settlement, by identifying and applying appropriate liquidity resources, which is consistent with the promotion of robust risk management.

Second, the Commission believes that the proposal is consistent with the promotion of safety and soundness of DTC and, by extension, the broader financial system. As stated above, the proposal would expressly provide that DTC may use the Participants Fund and other specified resources as a liquidity resource in the event of a settlement gap. With this proposal, DTC would expressly state how it would manage the potential liquidity risk that may arise from both the default of a Participant as well as a non-default event, including operational issues at DTC, a Participant, or a Settling Bank. With the proposal, DTC would be better positioned to timely complete settlement if a default or non-default gap arises. Accordingly, the Commission believes that the proposal is consistent with the promotion of safety and soundness.

Finally, the Commission believes that the proposal is consistent with reducing systemic risks and supporting the stability of the broader financial system. With clear authority to use the Participants Fund and other resources to address both a default and non-default settlement gap, DTC should be better positioned to access sufficient liquidity, and thus be better able to manage its liquidity risks in the event of a settlement gap. DTC is a SIFMU and serves as the only central securities depository in the United States, settling virtually all broker-to-broker equity and listed corporate and municipal debt securities transactions in the United States, as well as institutional trades, money market instruments and other financial obligations. This access to liquidity during a stress event would help mitigate any risk to settlement finality due to DTC having insufficient funds to meet payment obligations to its Participants. As such, access to this liquidity would help to strengthen the liquidity of DTC and mitigate potential risks to settlement finality, thereby reducing systemic risks and supporting

the stability of the broader financial system.

For the reasons stated above, the Commission believes the changes proposed in the Advance Notice are consistent with Section 805(b) of the Clearing Supervision Act.³⁵

B. Consistency With Rule 17Ad-22(e)(1)

Rule 17Ad-22(e)(1) under the Act requires that DTC establish, implement, maintain and enforce written policies and procedures reasonably designed to provide for a well-founded, clear, transparent, and enforceable legal basis for each aspect of its activities in all relevant jurisdictions.³⁶

As discussed above, current Section 4 of Rule 4 does not address the use of the Participants Fund or other liquidity resources to complete settlement when there is a non-default gap, and DTC is concerned that it could be construed as limiting the pro rata application of the Participants Fund to fund a settlement gap to default scenarios. The proposal would amend Rule 4 to expressly state that the Participants Fund, DTC's retained earnings, and other liquidity resources may be used by DTC to fund a settlement gap to complete settlement on a Business Day, whether the settlement gap is the result of a Participant Default or otherwise. In addition, the proposal makes clarifying and conforming changes and provides governance regarding the application of the Participants Fund.

The Commission believes that the above changes are designed to ensure greater certainty in the Rules regarding what resources would be available to DTC to complete settlement in the event of a settlement gap. The proposal would provide a clear, transparent and enforceable legal basis for DTC to apply the Participants Fund, retained earnings, or other liquidity resources to any settlement gap. It would also clarify that a Participant's pro rata share of an application of the Participants Fund would be the same whether there is a default gap or a non-default gap, and expressly state that DTC may apply its available resources to fund settlement, in such order and in such amounts as it determines, in its sole discretion.

Therefore, the Commission believes the proposal is designed to help ensure that DTC's Rules remain well-founded, transparent, and legally enforceable in all relevant jurisdictions, consistent with Rule 17Ad-22(e)(1) under the Act.³⁷

C. Consistency With Rule 17Ad-22(e)(2)(i) and (v)

Rule 17Ad-22(e)(2) under the Act requires, in part, that DTC establish, implement, maintain and enforce written policies and procedures reasonably designed to provide for governance arrangements that (i) are clear and transparent, and (v) specify clear and direct lines of responsibility.³⁸

As discussed above, the proposal would provide that a determination to apply the Participants Fund shall be made by either the Chief Executive Officer, Chief Risk Officer, Chief Financial Officer, a member of any management committee, Treasurer or any Managing Director as may be designated by the Chief Risk Officer from time to time. The proposal would also provide that the Board of Directors (or an authorized Committee thereof) shall be promptly informed of the determination. With this proposal, the Rules would expressly define who would be responsible for making the determination to apply the Participants Fund to a settlement gap and would require that the Board of Directors (or its authorized Committee) would be informed of such determination promptly.

Therefore, the Commission believes the proposal is designed to provide for governance arrangements regarding the use of the Participants Fund to complete settlement that are clear and transparent and specify clear and direct lines of responsibility, consistent with Rule 17Ad-22(e)(2)(i) and (v) under the Act.³⁹

D. Consistency With Rule 17Ad-22(e)(7)(i)

Rule 17Ad-22(e)(7)(i) under the Act requires, in part, that a covered clearing agency, like DTC, establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively measure, monitor, and manage the liquidity risk that arises in or is borne by the covered clearing agency, including measuring, monitoring, and managing its settlement and funding flows on an ongoing and timely basis, and its use of intraday liquidity, by maintaining sufficient liquid resources to effect same-day settlement of payment obligations with a high degree of confidence under a wide range of foreseeable stress scenarios.⁴⁰

As described above, the proposal would clarify that the Participants Fund and other resources may be applied by

³⁵ 12 U.S.C. 5464(b).

³⁶ 17 CFR 240.17Ad-22(e)(1).

³⁷ *Id.*

³⁸ 17 CFR 240.17Ad-22(e)(2)(i) and (v).

³⁹ *Id.*

⁴⁰ 17 CFR 240.17Ad-22(e)(7)(i).

DTC to fund settlement in the event of a default or non-default gap. The proposed change is designed to help ensure that DTC is able to manage its settlement and funding flows on a timely basis and effect same day settlement of payment obligations in certain foreseeable stress scenarios.

Therefore, the Commission believes that the proposal is reasonably designed to help DTC effectively manage liquidity risk in a timely manner to complete settlement, and accordingly is consistent with Rule 17Ad-22(e)(7)(i).⁴¹

III. Conclusion

It is therefore noticed, pursuant to Section 806(e)(1)(I) of the Clearing Supervision Act, that the Commission does not object to Advance Notice (SR-DTC-2020-801) and that DTC is authorized to implement the proposed change as of the date of this notice or the date of an order by the Commission approving proposed rule change SR-DTC-2020-011, whichever is later.

By the Commission.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90355; File No. SR-NASDAQ-2020-017]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Amend Nasdaq Rule 5704

November 5, 2020.

On July 23, 2020, The Nasdaq Stock Market LLC (“Exchange” or “Nasdaq”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Exchange Act”)¹ and Rule 19b-4 thereunder,² a proposed rule change to amend certain listing requirements relating to maintaining a minimum number of beneficial holders and minimum number of shares outstanding. The proposed rule change was published for comment in the **Federal Register** on August 7, 2020.³

On September 10, 2020, pursuant to Section 19(b)(2) of the Exchange Act,⁴ the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.⁵ The Commission has received no comments on the proposed rule change. The Commission is issuing this order to institute proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act⁶ to determine whether to approve or disapprove the proposed rule change.

I. Description of the Proposal

The Exchange proposes to amend Nasdaq Rule 5704 to: (1) Remove the requirement that, twelve months after the commencement of trading on the Exchange, a series of Exchange Traded Fund Shares must have 50 or more beneficial holders; and (2) replace its existing minimum number of shares requirement with a requirement that each series of Exchange Traded Fund Shares have a sufficient number of shares outstanding at the commencement of trading to facilitate the formation of at least one creation unit.⁷

The Exchange believes that the requirement that a series of Exchange Traded Fund Shares listed on the Exchange must have at least 50 beneficial shareholders is no longer necessary. The Exchange believes that the requirements of Rule 6c-11 under the Investment Company Act of 1940 (“1940 Act”), coupled with the existing creation and redemption process, mitigate the potential lack of liquidity that, according to the Exchange, the shareholder requirement was intended to address.⁸ The Exchange further believes that requiring at least one creation unit to be outstanding at the commencement of trading, together with the daily portfolio transparency and other enhanced disclosure requirements

of Rule 6c-11 under the 1940 Act,⁹ will facilitate an effective arbitrage mechanism and provide market participants and investors with sufficient transparency into the holdings of the underlying portfolio, and ensure that the trading price in the secondary market remains in line with the value per share of a fund’s portfolio.

Specifically with respect to arbitrage, the Exchange states that the arbitrage mechanism relies on the fact that shares of the Fund can be created and redeemed and that shares of the Fund are able to flow into or out of the market when the price of the Fund is not aligned with the net asset value per share of the portfolio. The resulting buying and selling of the shares of the Fund, as well as the underlying portfolio components, generally causes the market price and the net asset value per share to converge. In addition, the Exchange states that the proper functioning of the arbitrage mechanism is reliant on the presence of authorized participants (“APs”) that are eligible to facilitate creations and redemptions with the fund and support the liquidity of the fund. As a result, the Exchange believes that the AP is able to buy and sell Exchange Traded Fund Shares from both the fund and investors. Because Exchange Traded Fund Shares can be created and redeemed “in-kind” and do not have an upper limit of the number of shares that can be outstanding, an AP can fulfill customer orders or take advantage of arbitrage opportunities regardless of the number of shares currently outstanding. Thus, the Exchange believes that, unlike common stock, the liquidity of Exchange Traded Fund Shares is not dependent on the number of shares currently outstanding or the number of shareholders, but on the availability of APs to transact in the Exchange Traded Fund Shares primary market.

To support these contentions, the Exchange provides information, during a two-month observation period, regarding how closely two funds—the SPY and QQQ—tracked their respective underlying indexes, as well as data regarding creation and redemption activity in those two funds during the same observation period. The Exchange asserts that a symbiotic relationship exists between the disclosure requirements of Rule 6c-11 under the

⁴ 15 U.S.C. 78s(b)(2).

⁵ See Securities Exchange Act Release No. 89823, 85 FR 57895 (September 16, 2020). The Commission designated November 5, 2020 as the date by which the Commission shall approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change.

⁶ 15 U.S.C. 78s(b)(2)(B).

⁷ Currently, Nasdaq Rule 5704(b)(1)(A) provides that the Exchange will establish a minimum number of Exchange Traded Fund Shares required to be outstanding at the time of commencement of trading on the Exchange.

⁸ In contrast, Nasdaq believes that the shareholder requirement as it relates to common stock is a measure of liquidity designed to help assure that there will be sufficient investor interest and trading to support price discovery once a security is listed. See *id.* at 48012, n.6.

⁹ As an example, the Exchange notes that Rule 6c-11(c)(1)(vi) requires additional disclosure if the premium or discount is in excess of 2% for more than seven consecutive days, so that there would be transparency to investors in the event that the trading value and the underlying portfolio deviate for an extended period of time, which could indicate an inefficient arbitrage mechanism.

⁴¹ *Id.*

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 89464 (August 4, 2020), 85 FR 48012 (“Notice”).

1940 Act, the ability of the AP to create and redeem shares of a fund, and the functioning of the arbitrage mechanism that helps to ensure that the trading price in the secondary market is at fair value. According to the Exchange, this renders the need for a shareholder requirement as duplicative and unnecessary.

The Exchange further believes that, in order for fund redemptions to be executed in support of the arbitrage mechanism, it is appropriate that, in lieu of the minimum number of shareholders requirement, the fund have a sufficient number of shares outstanding in order to facilitate the formation of at least one creation unit on an initial and continued listing basis. The Exchange claims that the existence of the creation and redemption process, daily portfolio transparency, as well as a sufficient number of shares outstanding to allow for the formation of at least one creation unit, ensures that market participants are able to redeem shares and thereby support the proper functioning of the arbitrage mechanism. According to the Exchange, of the more than 350 funds currently listed on Nasdaq that would be eligible to be listed under Nasdaq Rule 5704, only two had a single creation unit outstanding. The remaining funds have, on average, shares outstanding equal to approximately 300 creation units.

In addition, the Exchange states that its surveillance program for, and its ability to halt trading in, Exchange Traded Fund Shares provide for additional investor protections by further mitigating any abnormal trading that would affect the prices of Exchange Traded Fund Shares.

II. Proceedings To Determine Whether To Approve or Disapprove SR–NASDAQ–2020–017 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act¹⁰ to determine whether the proposed rule change should be approved or disapproved. Institution of such proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved.

Pursuant to Section 19(b)(2)(B) of the Exchange Act,¹¹ the Commission is providing notice of the grounds for disapproval under consideration. The

Commission is instituting proceedings to allow for additional analysis of and input concerning the proposed rule change's consistency with the Exchange Act and, in particular, Section 6(b)(5) of the Exchange Act, which requires, among other things, that the rules of a national securities exchange be "designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers."¹²

The Commission has consistently recognized the importance of the minimum number of holders and other similar requirements in exchange listing standards. Among other things, such listing standards help ensure that exchange listed securities have sufficient public float, investor base, and trading interest to provide the depth and liquidity necessary to promote fair and orderly markets.¹³

As discussed above, the Exchange is proposing to: (1) Remove the listing requirement that, following the initial twelve-month period after commencement of trading of a series of Exchange Traded Fund Shares on the Exchange, such series have at least 50 beneficial holders, and (2) replace its existing minimum number of shares requirement with a requirement that each series of Exchange Traded Fund Shares have a sufficient number of shares outstanding at the commencement of trading to facilitate the formation of at least one creation unit.¹⁴ In support of its proposal, the Exchange asserts that the minimum number of beneficial holders

¹² 15 U.S.C. 78f(b)(5).

¹³ See, e.g., Securities Exchange Act Release No. 57785 (May 6, 2008), 73 FR 27597 (May 13, 2008) (SR–NYSE–2008–17) (stating that the distribution standards, which includes exchange holder requirements ". . . should help to ensure that the [Special Purpose Acquisition Company's] securities have sufficient public float, investor base, and liquidity to promote fair and orderly markets"); Securities Exchange Act Release No. 86117 (June 14, 2019), 84 FR 28879 (June 20, 2018) (SR–NYSE–2018–46) (disapproving a proposal to reduce the minimum number of public holders continued listing requirement applicable to Special Purpose Acquisition Companies from 300 to 100).

¹⁴ In support of its proposal, Nasdaq states that it would require that a sufficient number of shares to be outstanding at "all times" to facilitate the formation of at least one creation unit. See Notice, *supra* note 3, 85 FR at 48012. However, proposed Nasdaq Rule 5704(b)(1)(A) establishes that requirement "at the time of commencement of trading on Nasdaq," making it an initial and not a continued listing standard.

requirement is no longer necessary because the requirements of Rule 6c–11 under the 1940 Act, coupled with the existing creation and redemption process, mitigate the potential lack of liquidity that Nasdaq believes the beneficial holders requirement was intended to address. The Exchange, however, does not explain in any detail the basis for this view, particularly if a series of Exchange Traded Fund Shares is permitted to have a very small number of beneficial holders. For example, while the Exchange provides data with respect to two widely-held and highly liquid funds, it does not address how the arbitrage mechanism will assure Exchange Traded Fund Shares with very few holders or very few active APs will effectively support fair and orderly markets. The Exchange also does not discuss potential inefficiencies in the arbitrage mechanism that might occur with illiquid Exchange Traded Fund Shares that have very few holders, and the impact that would have on the ability of the arbitrage mechanism to effectively mitigate the risks of manipulation. Further, the Exchange does not address the impact of creation unit size on the efficiency of the arbitrage mechanism across the spectrum of Exchange Traded Fund Shares (e.g., illiquid Exchange Traded Fund Shares with very few holders and a large creation unit size). The Exchange provides no data or analysis to support its position, other than with respect to the SPY and QQQ, two highly liquid and widely held Exchange Traded Fund Shares, and the number and size of the creation units for existing Exchange Traded Fund Shares.

The Exchange provides no specific arguments to support the proposed elimination of its existing minimum number of shares requirement. While the Exchange proposes to replace that requirement with a requirement that each series of Exchange Traded Fund Shares have a sufficient number of shares outstanding at the commencement of trading to facilitate the formation of at least one creation unit, the Exchange does not explain why this is an appropriate substitute for its existing standards. Creation unit sizes could be highly variable, since they are determined at the discretion of the issuer of Exchange Traded Fund Shares. The Exchange has not articulated how this new standard would effectively support fair and orderly markets, address the risks of manipulation, and otherwise be consistent with Section 6(b)(5) and other relevant provisions of the Exchange Act for Exchange Traded

¹⁰ 15 U.S.C. 78s(b)(2)(B).

¹¹ *Id.*

Fund Shares with only a single and relatively small creation unit outstanding. The Exchange also has proposed to limit this requirement to a single determination at the commencement of trading, and has not explained the impact of fewer shares potentially being outstanding thereafter. Further, the Exchange has proposed to require that there be a sufficient number of shares outstanding to “facilitate the formation of” at least one creation unit, and has not explained how this standard differs from a requirement that the number of shares outstanding at least equals one creation unit.

Finally, the Exchange takes the position that its surveillance procedures and trading halt authority would mitigate any abnormal trading that would affect Exchange Traded Fund Shares prices in the secondary market. The Exchange, however, does not explain in any detail the basis for this view, or how specifically its existing procedures would effectively mitigate the risks addressed by the minimum number of beneficial holders and minimum number of shares requirements the Exchange is proposing to eliminate.

Under the Commission’s Rules of Practice, the “burden to demonstrate that a proposed rule change is consistent with the Exchange Act and the rules and regulations issued thereunder . . . is on the self-regulatory organization [‘SRO’] that proposed the rule change.”¹⁵ The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding, and any failure of an SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Exchange Act and the applicable rules and regulations.¹⁶

For these reasons, the Commission believes it is appropriate to institute proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act to determine whether the proposal should be approved or disapproved.

IV. Commission’s Solicitation of Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the issues

identified above, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposal is consistent with Section 6(b)(5) or any other provision of the Exchange Act, or the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b-4, any request for an opportunity to make an oral presentation.¹⁷

Interested persons are invited to submit written data, views, and arguments regarding whether the proposal should be approved or disapproved by December 3, 2020. Any person who wishes to file a rebuttal to any other person’s submission must file that rebuttal by December 17, 2020. The Commission asks that commenters address the sufficiency of the Exchange’s statements in support of the proposal, which are set forth in the Notice,¹⁸ in addition to any other comments they may wish to submit about the proposed rule change.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR–NASDAQ–2020–017 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090. All submissions should refer to File Number SR–NASDAQ–2020–017. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the

¹⁷ Section 19(b)(2) of the Exchange Act, as amended by the Securities Act Amendments of 1975, Public Law 94–29 (June 4, 1975), grants the Commission flexibility to determine what type of proceeding—either oral or notice and opportunity for written comments—is appropriate for consideration of a particular proposal by a self-regulatory organization. See Securities Act Amendments of 1975, Senate Comm. on Banking, Housing & Urban Affairs, S. Rep. No. 75, 94th Cong., 1st Sess. 30 (1975).

¹⁸ See *supra* note 3.

submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission’s Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2020–017 and should be submitted by December 3, 2020. Rebuttal comments should be submitted by December 17, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

J. Matthew DeLesDernier,

Assistant Secretary.

(the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt temporary Supplementary Material .13 (Temporary Extension of the Limited Period for Registered Persons to Function as Principals) under Exchange Rule 1.1210 of General 4 (Registration Requirements).

The text of the proposed rule change is available on the Exchange’s website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt temporary Supplementary Material .13 (Temporary Extension of the Limited Period for Registered Persons to Function as Principals) under Exchange Rule 1.1210 of General 4 (Registration Requirements). The proposed rule change would extend the 120-day period that certain individuals can function as a principal without having successfully passed an appropriate qualification examination through December 31, 2020,⁴ and would apply only to those individuals who were designated to function as a principal prior to September 3, 2020. This

⁴ If the Exchange seeks to provide additional temporary relief from the rule requirements identified in this proposed rule change beyond December 31, 2020, the Exchange will submit a separate rule filing to further extend the temporary extension of time.

proposed rule change is based on a filing recently submitted by the Financial Regulatory Authority, Inc. (“FINRA”)⁵ and is intended to harmonize the Exchange’s registration rules with those of FINRA so as to promote uniform standards across the securities industry.

In response to COVID–19, earlier this year FINRA began providing temporary relief by way of frequently asked questions (“FAQs”)⁶ to address disruptions to the administration of FINRA qualification examinations caused by the pandemic that have significantly limited the ability of individuals to sit for examinations due to Prometric test center capacity issues.⁷

FINRA published the first FAQ on March 20, 2020, providing that individuals who were designated to function as principals under FINRA Rule 1210.04⁸ prior to February 2, 2020, would be given until May 31, 2020, to pass the appropriate principal qualification examination.⁹ On May 19, 2020, FINRA extended the relief to pass the appropriate examination until June 30, 2020. Most recently, on June 29, 2020, FINRA again extended the temporary relief providing that individuals who were designated to function as principals under FINRA Rule 1210.04 prior to May 4, 2020, would be given until August 31, 2020, to pass the appropriate principal qualification examination.

One of the impacts of COVID–19 continues to be serious interruptions in the administration of FINRA qualification examinations at Prometric test centers and the limited ability of

⁵ See Securities Exchange Act Release No. 89732 (September 1, 2020), 85 FR 55535 (September 8, 2020) (SR–FINRA–2020–026) (“FINRA Filing”). The Exchange notes that the FINRA Filing also provides temporarily relief to individuals registered with FINRA as Operations Professionals under FINRA Rule 1220. The Exchange does not have a registration category for Operations Professionals and therefore, the Exchange is not proposing to adopt that aspect of the FINRA Filing.

⁶ See <https://www.finra.org/rules-guidance/key-topics/covid-19/faq#qe>.

⁷ At the outset of the COVID–19 pandemic, all FINRA qualification examinations were administered at test centers operated by Prometric. Based on the health and welfare concerns resulting from COVID–19, in March Prometric closed all of its test centers in the United States and Canada and began to slowly reopen some of them at limited capacity in May. At this time, not all of these Prometric test centers have reopened at full capacity.

⁸ Exchange Rule 1.1210.04 is the corresponding rule to FINRA Rule 1210.04.

⁹ FINRA Rule 1210.04 (Requirements for Registered Persons Functioning as Principals for a Limited Period) allows a member firm to designate certain individuals to function in a principal capacity for 120 calendar days before having to pass an appropriate principal qualification examination. Exchange Rule 1.1210.04 provides the same allowance to members.

individuals to sit for the examinations.¹⁰ Although Prometric has begun reopening test centers, Prometric’s safety practices mean that currently not all test centers are open, some of the open test centers are at limited capacity, and some open test centers are delivering only certain examinations that have been deemed essential by the local government.¹¹ Furthermore, Prometric has had to close some reopened test centers due to incidents of COVID–19 cases. The initial nationwide closure in March along with the inability to fully reopen all Prometric test centers due to COVID–19 have led to a significant backlog of individuals who are waiting to sit for FINRA examinations.¹²

In addition, firms are continuing to experience operational challenges with much of their personnel working from home due to shelter-in-place orders, restrictions on businesses and social activity imposed in various states, and adherence to other social distancing guidelines consistent with the recommendations of public health officials.¹³ As a result, firms continue to face potentially significant disruptions to their normal business operations that may include a limitation of in-person activities and staff absenteeism as a result of the health and welfare concerns stemming from COVID–19. Such potential disruptions may be further exacerbated and may even affect client services if firms cannot continue to keep principal positions filled as they may have difficulty finding other qualified individuals to transition into these roles or may need to reallocate employee time and resources away from other critical responsibilities at the firm.

These ongoing, extenuating circumstances make it impracticable for members to ensure that the individuals whom they have designated to function in a principal capacity, as set forth in Exchange Rule 1.1210.04, are able to successfully sit for and pass an appropriate qualification examination within the 120-calendar day period required under the rule, or to find other

¹⁰ Information about the continued impact of COVID–19 on FINRA-administered examinations is available at <https://www.finra.org/rules-guidance/key-topics/covid-19/faq#qe>.

¹¹ Information from Prometric about its safety practices and the impact of COVID–19 on its operations is available at <https://www.prometric.com/corona-virus-update>. See also *supra* note 10.

¹² Although an online test delivery service has been launched to help address the backlog, the General Securities Principal Examination (Series 24) is not available online. See *supra* note 10.

¹³ See, e.g., Centers for Disease Control and Prevention, How to Protect Yourself & Others, <https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/prevention.html>.

qualified staff to fill this position. The ongoing circumstances also require individuals to be exposed to the health risks associated with taking an in-person examination, because the General Securities Principal (Series 24) Examination is not available online. Therefore, the Exchange is proposing to continue the temporary relief provided through the FINRA FAQs by adopting Rule 1.1210.13 to extend the 120-day period during which an individual can function as a principal before having to pass an applicable qualification examination until December 31, 2020.¹⁴ The proposed rule change would apply only to those individuals who were designated to function as a principal prior to September 3, 2020. Any individuals designated to function as a principal on or after September 3, 2020, would need to successfully pass an appropriate qualification examination within 120 days.

The Exchange believes that this proposed continued extension of time is tailored to address the needs and constraints on a member's operations during the COVID-19 pandemic, without significantly compromising critical investor protection. The proposed extension of time will help to minimize the impact of COVID-19 on members by providing continued flexibility so that members can ensure that principal positions remain filled. The potential risks from the proposed extension of the 120-day period are mitigated by the member's continued requirement to supervise the activities of these designated individuals and ensure compliance with federal securities laws and regulations, as well as Exchange rules.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,¹⁵ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹⁶ in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to, and perfect the mechanism of, a free and open market and a national market system and, in general, to protect investors and the public interest.

The proposed rule change is intended to minimize the impact of COVID-19 on member operations by extending the

120-day period certain individuals may function as a principal without having successfully passed an appropriate qualification examination under Exchange Rule 1.1210.04 until December 31, 2020. The proposed rule change does not relieve members from maintaining, under the circumstances, a reasonably designed system to supervise the activities of their associated persons to achieve compliance with applicable securities laws and regulations, and with applicable Exchange rules that directly serve investor protection. In a time when faced with unique challenges resulting from the COVID-19 pandemic, the Exchange believes that the proposed rule change is a sensible accommodation that will continue to afford members the ability to ensure that critical positions are filled and client services maintained, while continuing to serve and promote the protection of investors and the public interest in this unique environment.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is intended to provide temporary relief given the impacts of the COVID-19 pandemic crisis and to also maintain consistency with the rules of other self-regulatory organizations ("SROs") with respect to the registration requirements applicable to members and their registered personnel. In that regard, the Exchange believes that any burden on competition would be clearly outweighed by providing members with temporary relief in this unique environment while also ensuring clear and consistent requirements applicable across SROs and mitigating any risk of SROs implementing different standards in these important areas. In its filing, FINRA provides an abbreviated economic impact assessment maintaining that the changes are necessary to temporarily rebalance the attendant benefits and costs of the obligations under FINRA Rule 1210 in response to the impacts of the COVID-19 pandemic that is equally applicable to the changes the Exchange proposes.¹⁷ The Exchange accordingly incorporates FINRA's abbreviated economic impact assessment by reference.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁸ and Rule 19b-4(f)(6)¹⁹ thereunder.

A proposed rule change filed under Rule 19b-4(f)(6) normally does not become operative for 30 days after the date of filing. However, pursuant to Rule 19b-4(f)(6)(iii), the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative immediately upon filing. As noted above, the Exchange stated that the temporary proposed rule change is based on a recent rule change by FINRA and is intended to harmonize Nasdaq's registration rules with those of FINRA to promote uniform standards across the securities industry.²⁰ The Exchange states that it will also help minimize the impact of the COVID-19 outbreak on Nasdaq members' operations by allowing them to keep principal positions filled and minimizing disruptions to client services and other critical responsibilities. The ongoing extenuating circumstances of the COVID-19 pandemic make it impractical to ensure that individuals designated to act in principal capacities are able to take and pass the appropriate qualification examination during the 120-calendar day period required under the rules. Shelter-in-place orders, quarantining, restrictions on business and social activity and adherence to other social distancing guidelines

¹⁸ 15 U.S.C. 78s(b)(3)(A).

¹⁹ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. Nasdaq has satisfied this requirement.

²⁰ See FINRA Filing, 85 FR at 55538.

¹⁴ See also *supra* note 4.

¹⁵ 15 U.S.C. 78f(b).

¹⁶ 15 U.S.C. 78f(b)(5).

¹⁷ FINRA Filing, 85 FR at 55537.

consistent with the recommendation of public officials remain in place in various states.²¹ Further, the Exchange states that Prometric test centers have experienced serious interruptions in the administration of FINRA qualification examinations, resulting in a backlog of individuals waiting to take these examinations. Following a nationwide closure of all test centers earlier in the year, some test centers have re-opened, but are operating at limited capacity or are only delivering certain examinations that have been deemed essential by the local government.²² FINRA has launched an online test delivery service to help address this backlog. However, the General Securities Principal (Series 24) Examination is not available online. The Exchange states that the temporary proposed rule change will provide needed flexibility to ensure that these positions remain filled and is tailored to address the constraints on members' operations during the COVID-19 pandemic without significantly compromising critical investor protection.²³

The Commission also notes that the proposal provides only temporary relief from the requirement to pass certain qualification examinations within the 120-day period in the rules. As proposed, this relief would extend the 120-day period that certain individuals can function as principals through December 31, 2020. The Exchange has also stated that if it requires temporary relief from the rule requirements identified in this proposal beyond December 31, 2020, it may submit a separate rule filing to extend the effectiveness of the temporary relief under these rules.²⁴ For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest.²⁵ Accordingly, the Commission hereby waives the 30-day operative delay and designates the proposal operative upon filing.²⁶

²¹ See *supra* note 13.

²² See *supra* notes 10 and 11. The Exchange states that Prometric has also had to close some reopened test centers due to incidents of COVID-19 cases.

²³ The Exchange states that members remain subject to the continued requirement to supervise the activities of these designated individuals and ensure compliance with federal securities laws and regulations, as well as Exchange rules.

²⁴ See *supra* note 4.

²⁵ As noted above by the Exchange, this proposed temporary change is based on a recent filing by FINRA that the Commission approved with a waiver of the 30-day operative delay. See FINRA Filing, 85 FR at 55538.

²⁶ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule change's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2020-073 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to File Number SR-NASDAQ-2020-073. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, on business days between the hours of 10:00 a.m. and 3:00 p.m., located at 100 F Street NE, Washington, DC 20549. Copies of such filing also will be available for inspection and copying at the principal office of Nasdaq. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal

identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NASDAQ-2020-073 and should be submitted on or before December 3, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁷

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90356; File No. SR-CboeBZX-2020-082]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule To Eliminate the Listing Fee Waiver for Issuers of Certain ETPs

November 5, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 4, 2020, Cboe BZX Exchange, Inc. (the "Exchange" or "BZX") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing to amend Rule 14.13(b)(2)(C) related to the listing of exchange traded products ("ETPs")³ on the Exchange. Specifically, the Exchange is proposing to eliminate Rule 14.13(b)(2)(C)(iii) related to Auction Fee Listings, as defined below, and to make several other corresponding amendments to Rule 14.13(b)(2)(C).

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/), at the Exchange's Office of the Secretary,

²⁷ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ As defined in Rule 11.8(e)(1)(A), the term "ETP" means any security listed pursuant to Exchange Rule 14.11.

and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange is proposing to amend Rule 14.13(b)(2)(C) related to the listing of exchange traded products ("ETPs")⁴ on the Exchange. Specifically, the Exchange is proposing to eliminate Rule 14.13(b)(2)(C)(iii) related to Auction Fee Listings, as defined below, and to make several other corresponding amendments to Rule 14.13(b)(2)(C).⁵

Auction Fee Listings

Currently, Rule 14.13(b)(2)(C)(iii) provides that any issuer that has an average daily auction volume combined between the opening and closing auctions on the Exchange across all of an issuer's ETPs listed on the Exchange that exceeds 500,000 shares (an "Auction Fee Listing"), there is no annual listing fee for that issuer's ETPs listed on the Exchange. Any ETP that is not an Auction Fee Listing, a Legacy Listing,⁶ a New Listing,⁷ an Outcome

⁴ As defined in Rule 11.8(e)(1)(A), the term "ETP" means any security listed pursuant to Exchange Rule 14.11.

⁵ The Exchange initially filed the proposed fee change on November 2, 2020.

⁶ As defined in Rule 14.13(b)(2)(C)(i), a "Legacy Listing" is an ETP listed on the Exchange prior to January 1, 2019.

⁷ As defined in Rule 14.13(b)(2)(C)(ii), a "New Listing" is an ETP during its first calendar year listed on the Exchange or an ETP that has been listed for fewer than three calendar months on the ETP's first trading day of the year.

Strategy ETP,⁸ or a Transfer Listing⁹ is currently charged an annual listing fee based on the consolidated average daily volume ("CADV") of the ETP in the fourth quarter of the preceding calendar year, which ranges from \$5,000 to \$7,000 annually and decreases as the CADV of an ETP increases, a model that is generally designed to reflect the additional revenue that an individual ETP listed on the Exchange creates for the Exchange as its CADV increases. The Exchange is proposing to eliminate Rule 14.13(b)(2)(C)(iii) and the concept of the Auction Fee Listing from its rules. As such, the Exchange is proposing that ETPs under Rule 14.13(b)(2)(C)(iii) that were previously not charged an annual listing fee will be charged an annual listing fee pursuant to the fees table in current Rule 14.13(b)(2)(C)(v)¹⁰ beginning on January 4, 2021, the first trading day of the applicable year.¹¹

The Exchange is also proposing to make certain corresponding changes, including deleting a reference to "Auction Fee Listing" under current Rule 14.13(b)(2)(C)(v) and changing the numbering associated with Rules 14.13(b)(2)(C)(iv) and (v) to 14.13(b)(2)(C)(iii) and (iv), respectively.

Implementation Date

As noted above, the Exchange intends to implement these amendments to its fee schedule on January 4, 2021, the first trading day of the upcoming year for which an ETP will be billed for applicable annual listing fees pursuant to Rule 14.13(b)(2)(C).¹² The Exchange will announce to its Members the implementation of the rule change prior to its January 4, 2021 implementation date.

⁸ As defined in current Rule 14.13(b)(2)(C)(iv) (Rule 14.13(b)(2)(C)(iii), as amended beginning January 4, 2021), an "Outcome Strategy ETP" is an ETP where the issuer lists multiple ETPs that are each designed to provide (i) a pre-defined set of returns; (ii) over a specified outcome period; (iii) based on the performance of the same underlying instrument; and (iv) each employ the same outcome strategy for achieving the pre-defined set of returns.

⁹ As defined in Rule 14.13(b)(2)(C)(ii) [*sic*], a "Transfer Listing" is an ETP that transfers its listing from another national securities exchange to the Exchange.

¹⁰ Rule 14.13(b)(2)(C)(iv), as amended beginning January 4, 2021.

¹¹ The Exchange notes that if ETPs are Legacy Listings, New Listings, Outcome Strategy ETPs, and Transfer Listings, then they will be subject to those applicable annual fees as described in current Rule 14.13(b)(2)(C)(i), (ii) and (iv).

¹² The Exchange notes that although this proposal may take effect upon filing with the Commission pursuant to Section 19(b)(3)(A)(ii) of the Act and paragraph (f)(2) of Rule 19b-4 thereunder, the Exchange may choose for such change to be effective on a date other than the filing date.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder that are applicable to a national securities exchange, and, in particular, with the requirements of Section 6 of the Act.¹³ Specifically, the Exchange believes that the proposed rule change is consistent with Section 6(b)(4) and 6(b)(5) of the Act,¹⁴ in that it provides for the equitable allocation of reasonable dues, fees and other charges among issuers and it does not unfairly discriminate between customers, issuers, brokers or dealers.

The Exchange believes that the proposed deletion of Rule 14.13(b)(2)(C)(iii) to eliminate the Auction Fee Listing is a reasonable, fair and equitable, and not unfairly discriminatory allocation of fees and other charges because it would apply equally for all issuers and all ETPs. The pricing for Auction Fee Listings was originally designed to help the Exchange attract and retain listings from issuers of ETPs that had a collectively large auction volume. As the Exchange has continued to grow its ETP listing business, it has determined that such an incentive program is no longer necessary and that such ETPs should instead be subject to the standard annual listing fees on the Exchange, which are generally based on the CADV of the ETP, pursuant to current Rule 14.13(b)(2)(C)(v).¹⁵ Such a change will create a fee structure that will generally apply on a product by product basis instead of across all of an issuer's ETP listings on the Exchange, which will allow the Exchange to charge issuers in a manner more directly related to the incremental costs associated with the initial and continued listing of ETPs on the Exchange.

The Exchange believes that this is a reasonable, fair and equitable, and not unfairly discriminatory allocation of fees and other charges because such standard fees are generally designed to reflect the additional revenue that an individual ETP listed on the Exchange creates for the Exchange through executions occurring in the auctions and additional shares executed on the Exchange. Listing exchanges generally receive an outsized portion of intraday trading activity and receive all auction volume for ETPs listed on the exchange. The higher the CADV for an ETP, the greater the likely income the Exchange will receive based on outsized intraday

¹³ 15 U.S.C. 78f.

¹⁴ 15 U.S.C. 78f(b)(4) and (5).

¹⁵ See *supra* notes 10 and 11.

trading activity and auction volume for such ETP. This structure is designed to reward the issuer of an ETP for such additional revenue brought to the Exchange as CADV increases, which the Exchange believes creates a more equitable and appropriate fee structure for issuers based on the revenue and expenses associated with listing ETPs on the Exchange. With this in mind, the Exchange believes that that it is reasonable, fair and equitable, and not unfairly discriminatory allocation of fees and other charges to charge lower fees for ETPs with a higher CADV.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. With respect to the proposed elimination of Auction Fee Listings for ETPs, the Exchange does not believe that the changes burden competition, but instead, enhance competition, as it is intended to increase the revenue of the Exchange's listing program in order to better compete. Further, the standard fees that will apply on a going forward basis are directly related to the amount of revenue that the Exchange receives from ETPs listed on the Exchange. As such, the proposal is a competitive proposal designed to enhance pricing competition among listing venues and implement pricing for listings that better reflects the revenue and expenses associated with listing ETPs on the Exchange.

The Exchange does not believe the proposed amendments would burden intramarket competition as they would be available to all issuers uniformly.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁶ and paragraph (f) of Rule 19b-4 thereunder.¹⁷ At any time within 60 days of the filing of the proposed rule

change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeBZX-2020-082 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090. All submissions should refer to File Number SR-CboeBZX-2020-082. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from

comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CboeBZX-2020-082 and should be submitted on or before December 3, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁸

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SURFACE TRANSPORTATION BOARD

[Docket No. FD 36434]

The Elk River Railroad, Inc.—Merger Exemption—The Buffalo Creek Railroad Company

On August 27, 2020, The Elk River Railroad, Inc. (TERRI), a Class III rail carrier, filed a petition under 49 U.S.C. 10502 seeking an exemption from the prior approval requirements of 49 U.S.C. 11323-25 to authorize the merger of The Buffalo Creek Railroad Company (BCR), a Class III rail carrier, with and into TERRI, which is the surviving corporation. Because the merger took place in 1995, TERRI is seeking after-the-fact authority and asks that the requested exemption be granted with retroactive effect. For the reasons discussed below, the Board will grant TERRI's petition for an exemption authorizing its merger with BCR but will deny the request to make the exemption retroactive.

Background

According to the petition, William T. Bright (Bright) is the sole owner of TERRI, a West Virginia corporation that acquired a rail line previously owned and operated by CSX Transportation, Inc.¹ (Pet. 1-3.) In 1992, BCR, at that time a noncarrier also owned by Bright, acquired the rail line of the Buffalo Creek and Gauley Railroad Company (BC&G) pursuant to authority granted by the Board's predecessor, the Interstate Commerce Commission (ICC),² and

¹⁸ 17 CFR 200.30-3(a)(12).

¹ See *Elk River R.R.—Lease, Operation & Acquis. Exemption—Line of CSX Transp., Inc.*, FD 31497 (ICC served July 26, 1989) (authorizing TERRI to acquire a line of railroad between milepost 6.2, at or near Gilmer, and milepost 67.2, at or near Hartland, in Gilmer, Braxton, and Clay Counties, W. Va.).

² See *Buffalo Creek R.R.—Acquis. & Operation Exemption—Buffalo Creek & Gauley R.R.*, FD 31968 (ICC served Feb. 11, 1992) (authorizing BCR to acquire from BC&G an 18.6-mile rail line extending from a junction point at Dundon (milepost 62.2 on

¹⁶ 15 U.S.C. 78s(b)(3)(A).

¹⁷ 17 CFR 240.19b-4(f).

Bright obtained authority to control BCR as a rail carrier.³ (Pet. 3–4.)

TERRI states that in December 1995, “[d]ue to an inadvertent oversight and lack of knowledge that additional agency approval was necessary,” BCR was merged with and into TERRI, the surviving corporation, without prior agency authorization as required under 49 U.S.C. 11323–25. (Pet. 4–5.) TERRI explains that, had it “been aware of its obligation to obtain additional agency authorization, it would have timely filed a verified notice of exemption under 49 CFR 1180.2(d)(3) prior to consummating the merger.” (*Id.* at 5.) In its petition, TERRI disclaims any intention “to flout the law,” as it “only became aware of the need for such authorization as part of current Counsel’s due diligence relating to the imminent and expected sale” of BC&G to the State of West Virginia. (*Id.*) To address this oversight, TERRI seeks expedited consideration of its petition under 49 U.S.C. 10502 for an exemption from the prior approval requirements of 49 U.S.C. 11323–25 to authorize its 1995 merger with BCR and seeks retroactive effect.

Discussion and Conclusions

Under 49 U.S.C. 11323(a)(1), the merger of two rail carriers into one corporation for the ownership, management, or operation of the previously separately owned properties requires prior approval of the Board. When a transaction does not involve the merger or control of at least two Class I railroads, it is governed by 49 U.S.C. 11324(d). However, under 49 U.S.C. 10502(a), the Board must exempt a transaction or service from regulation upon finding that: (1) Regulation is not necessary to carry out the rail transportation policy (RTP) of 49 U.S.C. 10101; and (2) either (a) the transaction or service is of limited scope, or (b) regulation is not needed to protect shippers from the abuse of market power.

Here, an exemption from the prior approval requirements of sections 11323–25 is consistent with section 10502(a). Detailed scrutiny of this transaction is not necessary to carry out the RTP here. An exemption from the application process would promote a fair and expeditious regulatory decision-

making process, minimize the need for Federal regulatory control, encourage honest and efficient management of railroads, and result in the expeditious handling of this proceeding. *See* 49 U.S.C. 10101(2), (9), (15). Other aspects of the RTP would not be adversely affected.

Regulation of this transaction is not needed to protect shippers from the abuse of market power.⁴ At the time of the 1995 merger, TERRI and BCR already were commonly controlled by Bright, and indeed, as TERRI points out, the transaction likely would have qualified for the class exemption for transactions within a corporate family under 49 CFR 1180.2(d)(3) had it been timely sought. Moreover, the record indicates there has been no loss of rail competition, no adverse change in the competitive balance in the transportation market, and no change in the level of service to any shippers because, as TERRI explains in its petition, the BC&G rail line does not connect with another rail line other than TERRI’s at Dundon, W. Va., and has not carried any traffic in over twenty years. (Pet. 6.)

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. Section 11326(c), however, precludes the Board from imposing labor protection for Class III rail carriers receiving authority under sections 11324–25. Accordingly, the Board may not impose labor protective conditions here because TERRI and BCR were both Class III carriers at the time of the merger.

This transaction is categorically excluded from environmental review under 49 CFR 1105.6(c)(1) and from the historic reporting requirements under 49 CFR 1105.8(b).

As stated above, TERRI seeks an exemption with retroactive effect, arguing that its failure to obtain prior approval or an exemption for its merger with BCR was “an inadvertent oversight” and “was in no way intended to flout the law[.]” (Pet. 5.) Although the Board on occasion has granted authority retroactively,⁵ it generally disfavors

retroactive grants of authority.⁶ As TERRI provides no explanation as to why retroactive authority is needed, the Board declines to grant retroactive authority here.

It is ordered:

1. Under 49 U.S.C. 10502, the Board exempts from the prior approval requirements of 49 U.S.C. 11323–25 BCR’s merger with and into TERRI.

2. Notice of the exemption will be published in the **Federal Register**.

3. The exemption will be effective on the service date of this decision.

Decided: November 5, 2020.

By the Board, Board Members Begeman, Fuchs, and Oberman.

Tammy Lowery,
Clearance Clerk.

BILLING CODE 7040–01–P

SUSQUEHANNA RIVER BASIN COMMISSION

Commission Meeting

AGENCY: Susquehanna River Basin Commission.

ACTION: Notice.

SUMMARY: The Susquehanna River Basin Commission will conduct its regular business meeting on December 11, 2020, from Harrisburg, Pennsylvania. Details concerning the matters to be addressed at the business meeting are contained in the Supplementary Information section of this notice. Also the Commission

published a document in the **Federal Register** on October 7, 2020, concerning its public hearing on November 5, 2020, in Harrisburg, Pennsylvania.

DATES: The meeting will be held on Friday, December 11, 2020, at 9 a.m.

ADDRESSES: The meeting will be conducted telephonically from the Susquehanna River Basin Commission, 4423 N. Front Street, Harrisburg, PA 17110.

FOR FURTHER INFORMATION CONTACT:

Jason E. Oyler, General Counsel and Secretary to the Commission, telephone: 717–238–0423; fax: 717–238–2436.

SUPPLEMENTARY INFORMATION: The business meeting will include actions or presentations on the following items: (1) Adoption of a policy to incentivize the use of impaired waters; (2) adoption of an updated regulatory program fee schedule; (3) adoption of a general permit for groundwater remediation projects; (4) ratification/approval of contracts/grants; (5) a report on delegated settlements; and (6) Regulatory Program projects.

This agenda is complete at the time of issuance, but other items may be added, and some stricken without further notice. The listing of an item on the agenda does not necessarily mean that the Commission will take final action on it at this meeting. When the Commission does take final action, notice of these actions will be published in the **Federal Register** after the meeting. Any actions specific to projects will also be provided in writing directly to project sponsors.

Due to the COVID–19 orders, the meeting will be conducted telephonically and there will be no physical public attendance. The public is invited to attend the Commission’s business meeting by telephone conference and may do so by dialing Conference Call # 1–888–387–8686, the Conference Room Code # 9179686050. Written comments pertaining to items on the agenda at the business meeting may be mailed to the Susquehanna River Basin Commission, 4423 North Front Street, Harrisburg, Pennsylvania 17110–1788, or submitted electronically through www.srbc.net/about/meetings-events/business-meeting.html. Such comments are due to the Commission on or before December 9, 2020. Comments will not be accepted at the business meeting noticed herein.

Authority: Public Law 91–575, 84 Stat. 1509 *et seq.*, 18 CFR parts 806, 807, and 808.

Dated: November 5, 2020.

Jason E. Oyler,

General Counsel and Secretary to the Commission.

[FR Doc. 2020–24958 Filed 11–10–20; 8:45 am]

BILLING CODE 7040–01–P

TENNESSEE VALLEY AUTHORITY

Sunshine Act Meetings

TIME AND DATE: 10 a.m. on November 13, 2020.

PLACE: Please use the following link for the live stream of meeting: <https://bcove.video/2ThhkTb>.

STATUS: Open, via live streaming only.

MATTERS TO BE CONSIDERED:

Meeting No. 20–04

The TVA Board of Directors will hold a public meeting on November 13, 2020. Due to the ongoing risks associated with the COVID–19 outbreak, the meeting will be conducted via teleconference. The meeting will be called to order at 10 a.m. ET to consider the agenda items listed below. TVA Board Chair John Ryder and TVA management will answer questions from the news media following the Board meeting.

Public health concerns also require a change to the Board’s public listening session. Although in-person comments from the public are not feasible, the Board is encouraging those wishing to express their opinions to submit written comments that will be provided to the Board members before the November 13 meeting. Written comments can be submitted through the same online system used to register to speak at previous listening sessions.

Agenda

1. Approval of minutes of the August 27, 2020, Board Meeting
2. Report from President and CEO
3. Report of the Finance, Rates, and Portfolio Committee
 - A. FY 2021 Financial Plan and Budget
 - B. Electric Vehicle Charging—Policy and Pricing
4. Report of the People and Performance Committee
 - A. Fiscal Year 2020 Performance and Compensation
 - B. Fiscal Year 2021 Corporate Goals
5. Report of the Audit, Risk, and Regulation Committee
 - A. Extension of Pandemic Relief Delegation
6. Report of the Nuclear Oversight Committee
7. Report of the External Relations Committee
8. Information Items

- A. Executive Order 13950
- B. Strategic Assessment Review
- C. Policy on Requests to Use the TVA Transmission System

CONTACT PERSON FOR MORE INFORMATION:

For more information: Please call Jim Hopson, TVA Media Relations at (865) 632-6000, Knoxville, Tennessee. Anyone who wishes to comment on any of the agenda in writing may send their comments to: TVA Board of Directors, Board Agenda Comments, 400 West Summit Hill Drive, Knoxville, Tennessee 37902.

Dated: November 6, 2020.

Sherry A. Quirk,
General Counsel.

BILLING CODE 8120-08-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration**

[Docket No. FAA-2020-0414]

Agency Information Collection

**Activities: Requests for Comments;
Clearance of Renewed Approval of
Information Collection: Recording of
Aircraft Conveyances and Security
Documents**

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, FAA invites public comments about our intention to request the Office of Management and Budget (OMB) approval to renew an information collection. The Federal Register Notice with a 60-day comment period soliciting comments on the following collection of information was published on April 23, 2020. The collection involves a lienholder returning an AC Form 8050-41, Notice of Recordation—Aircraft Security Conveyance with Part II—Release completed to the Civil Aviation Registry, Aircraft Registration Branch (Registry), to release a recorded lien. This information is necessary to show satisfaction of a recorded lien.

DATES: Written comments should be submitted by December 14, 2020.

ADDRESSES: Interested persons are invited to submit written comments on the proposed information collection to the Office of Information and Regulatory Affairs, Office of Management and Budget. Comments should be addressed to the attention of the Desk Officer, Department of Transportation/FAA, and

sent via electronic mail to aira_submission@omb.eop.gov, or faxed to (202) 395-6974, or mailed to the Office of Information and Regulatory Affairs, Office of Management and Budget, Docket Library, Room 10102, 725 17th Street NW, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT:

Bonnie Lefko by email at: Bonnie.Lefko@faa.gov; phone: 405-954-7461.

SUPPLEMENTARY INFORMATION:

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) whether the proposed collection of information is necessary for FAA's performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

OMB Control Number: 2120-0043.

Title: Recording of Aircraft

Conveyances and Security Documents.

Form Numbers: AC Form 8050-41, Notice of Recordation.

Type of Review: Renewal.

Background: The Federal Register Notice with a 60-day comment period soliciting comments on the following collection of information was published on April 23, 2020 (85 FR 22784). Statute provides for establishing and maintaining a system for the recording of security conveyances affecting title to, or interest in U.S. civil aircraft and qualified engines, propellers, and/or spare part locations, and for recording of releases relating to those conveyances. A lienholder submits a lien against aircraft and/or qualified engines, propellers, and/or spare part locations to the Registry for recording. The Registry records the lien and sends an AC Form 8050-41, Notice of Recordation—Aircraft Security Conveyance, to the lienholder. When the lien is ready for release, the lienholder completes Part II—Release at the bottom of the form and returns it to the Registry as official notification that the lien has been satisfied.

Respondents: Any aircraft, propeller, engine or spare parts location lienholder, who has received the Notice of Recordation from the Registry, and is releasing the subject lien.

Frequency: On occasion.

Estimated Average Burden per Response: 1 hour.

Estimated Total Annual Burden: During FY 2019 the FAA received

22,370 release notifications for a total time burden of 22,370 hours.

Issued in Oklahoma City, OK on November 5, 2020.

Bonnie Lefko,

*Program Analyst, Civil Aviation Registry,
Aircraft Registration Branch, AFB-711.*

BILLING CODE 4910-13-P

NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION

[Docket No. NHTSA-2020-0102]

Request for Information: Impaired Driving Technologies

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Request for information.

SUMMARY: This notice requests information from interested parties to help inform the agency on available or late stage technology under development for impaired driving detection and mitigation. It also fulfills the Joint Explanatory Statement accompanying the Further Consolidated Appropriations Act, 2020, Public Law 116-94 (2020), which directs NHTSA to facilitate the sharing of information and the implementation and integration of impaired driving technology across the automotive industry.

DATES: Comments must be received on or before January 11, 2021.

ADDRESSES: You may submit comments identified by the docket number in the heading of this document or by using any of the following methods:

- *Electronic submissions:* Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, M-30, U.S. Department of Transportation, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590.
- *Fax:* 1-202-493-2251.

Instructions: Comments submitted to the docket should not include any sensitive personal information or confidential business information. Each submission must include the Agency name and the Docket number for this Notice. Note that all comments submitted to the docket, will be posted without change to <http://www.regulations.gov> including any personal information provided. Please see the Privacy Act heading below.

If you wish to voluntarily submit confidential business information, you should submit two copies of your

complete submission electronically to the Chief Counsel, NHTSA, at the address given below under **FOR FURTHER INFORMATION CONTACT**, with one copy containing the information you claim to be confidential business information, and one copy from which the claimed confidential business information has been deleted. In addition, you should submit one copy, from which you have deleted the claimed confidential business information, to Docket Management at the address given above under **ADDRESSES**. When you send a comment containing information claimed to be confidential business information to the Chief Counsel, you should follow the procedures set forth in 49 CFR part 512, and include a cover letter setting forth the information specified in our confidential business information regulation, along with the certification required by the regulation. 49 CFR part 512. In addition, you must clearly mark the top of each page of a document containing confidential business information with the word "CONFIDENTIAL."

- *Privacy Act*: Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477–78) or you may visit <http://www.dot.gov/privacy.html>.

- *Docket*: For access to the docket to read comments received, go to <http://www.regulations.gov> or the street address listed above. To be sure someone is there to help you, please call 202–366–9322 before coming. Follow the online instructions for accessing the dockets.

FOR FURTHER INFORMATION CONTACT:

Robert Ritter, Office of Impaired Driving and Occupant Protection Division, Office of Research and Program Development, National Highway Traffic Safety Administration, 1200 New Jersey Avenue SE, NPD–100, Room W44–243, Washington, DC 20590. Mr. Ritter's phone number is 202–493–0019, and his email address is Robert.Ritter@dot.gov. To submit confidential business information to the Chief Counsel: Daniel Rabinovitz, Office of Chief Counsel, National Highway Traffic Safety Administration, Daniel.Rabinovitz@dot.gov.

SUPPLEMENTARY INFORMATION: In 2008, the National Highway Traffic Safety Administration (NHTSA) entered into a Cooperative Agreement with the

Automotive Coalition for Traffic Safety (ACTS)—representing the majority of automobile manufacturers—to assess and develop alcohol detection technologies that prevent the operation of a vehicle when the driver's blood alcohol concentration (BAC) exceeds the legal limit. This collaborative research partnership is known as the Driver Alcohol Detection System for Safety (DADSS) program. Over the years, the DADSS program made progressive improvements in the development of two in-vehicle technologies that target measuring breath or blood alcohol levels and could help prevent alcohol-impaired drivers from operating their vehicles: A breath-based and a touch-based system. As the DADSS technology progressed, NHTSA also became aware of some market-based driver monitoring systems, some of which may also play a role in addressing safety risks associated with impaired driving.

NHTSA is interested in better understanding the state of technologies in impaired driving detection and mitigation, particularly those targeting alcohol-impaired driving.

Request for Information: This notice requests information to inform NHTSA about the capabilities, limitations, and maturity of currently available technologies or those under advanced stages of development that target impaired driving. The Joint Explanatory Statement accompanying the Further Consolidated Appropriations Act, 2020, Public Law 116–94 (2020), requires NHTSA to facilitate the sharing of this information and the implementation and integration of impaired driving technology across the automotive industry. NHTSA plans to conduct further research on such technologies. To ensure a comprehensive review of these technologies, NHTSA requests interested parties to submit information to the Agency on related technologies that are being researched, developed, or marketed. More specifically, NHTSA seeks information about technologies that can detect degrees of driver impairment through a range of approaches including (1) technologies that can monitor driver action, activity, behavior, or responses, such as vehicle movements during lane keeping, erratic control, or sudden maneuvers; (2) technologies that can directly monitor driver impairment (e.g., breath, touch-based detection through skin); (3) technologies that can monitor a driver's physical characteristics, such as eye tracking or other measures of impairment; and (4) technologies or sensors that aim direct measurement of a driver's physiological indicators that are already linked to forms of impaired

driving (e.g., BAC level for alcohol-impaired driving).

NHTSA is interested in information about product specifications; impairment measurement metrics, methods, and systems; impairment classification approaches and capabilities; availability of test results and data that support system capabilities and limitations; advanced sensors; and other technologies that could be used in a vehicle to detect impaired drivers.

Input is also requested about whether and how systems have been validated to date, including human factors issues and user acceptance of proposed approaches. Further, NHTSA requests information on the range of active intervention these technologies are targeted to support in vehicles based on the type and level of impairment estimated, or measured, by the system with respect to the system's confidence in such assessment.

Responses most useful to NHTSA would include specific information about the product capabilities and limitations, the state of its development, its availability and/or current uses. Examples of useful information include vendor contact information; information related to product's marketed capabilities; a description of the approach the technology uses to detect, estimate, or measure driver impairment; product specifications, including physical dimensions, accuracy, tolerance limits, performance characteristics such as temperature limitations, vehicle integration feasibility, and part-life in the automotive environment; closest Technology Readiness Level (TRL) of the technology based on best practices described in the General Accounting Office *Technology Readiness Assessment Guide* (<https://www.gao.gov/assets/710/703694.pdf>); any publicly shareable information related to the cost ranges for the unit, its installation, as well as lifetime maintenance; any data related to studies that targeted usability and user acceptance; known technology defeat strategies users may employ; and impairment detection and impairment differentiation capabilities (alcohol-impaired, drug-impaired, distracted, drowsy, etc.), including false-positive and false-negative detection rates. Additionally, NHTSA would like to know how existing technologies have been evaluated in laboratory or field tests or in operational deployments and how positive impairment data was utilized in those studies.

NHTSA encourages commenters to provide information in common file

formats, such as Microsoft Word, pdf, or plain text and limit responses to no more than 10 pages, not including appendices.

Authority: 23 U.S.C. 403.

Issued in Washington, DC, under authority delegated by 49 CFR 1.95 and 49 CFR 501.8.

Nanda Narayanan Srinivasan,
Associate Administrator, Research and Program Development.

BILLING CODE 4910-59-P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

Hazardous Materials: Notice of Applications for Modifications to Special Permit

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: List of applications for modification of special permits.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation’s Hazardous Material Regulations, notice is hereby given that the Office of Hazardous Materials Safety has received the application described herein. Each mode of transportation for which a particular special permit is requested is indicated by a number in the “Nature of Application” portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo aircraft only, 5—Passenger-carrying aircraft.

DATES: Comments must be received on or before November 27, 2020.

ADDRESSES: Record Center, Pipeline and Hazardous Materials Safety Administration U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the special permit number.

FOR FURTHER INFORMATION CONTACT: Donald Burger, Chief, Office of Hazardous Materials Approvals and Permits Division, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington, DC 20590-0001, (202) 366-4535.

SUPPLEMENTARY INFORMATION: Copies of the applications are available for inspection in the Records Center, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington DC.

This notice of receipt of applications for special permit is published in accordance with part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(b); 49 CFR 1.53(b)).

Issued in Washington, DC, on October 29, 2020.

Donald P. Burger,
Chief, General Approvals and Permits Branch.

SPECIAL PERMITS DATA

Application No.	Applicant	Regulation(s) affected	Nature of the Special Permits thereof
7573-M	Department of Defense (Military Surface Deployment & Distribution Command).	172.1, 175.1	To modify the special permit to update references to the new AFMAN manual. (mode 4)
9232-M	Department of Defense US Army (Military Surface Deployment & Distribution Command).	Parts 172 and 175	To modify the special permit to update references to the new AFMAN manual. (modes 4, 5)
14313-M	Airgas USA LLC	172.203(a), 172.301(c), 173.302a(b), 180.205.	To modify the special permit to authorize an additional UE test system to re-qualify certain DOT and permitted cylinders. (modes 1, 2, 3, 4, 5)
16146-M	Department of Defense (Military Surface Deployment & Distribution Command).	171.22(e), 172.101(j)	To modify the permit to reference update references to the 24 series of the Air Force regulations. (mode 4)
20851-M	Call2Recycle, Inc.	172.200, 172.600, 172.700(a).	To modify the special permit to authorize the transportation of end-of-life lithium batteries up to 1,200 Wh to be shipped in PG II fiberboard boxes. (mode 1)
20904-M	Piston Automotive, LLC	172.101(j), 173.185(b)(5)	To modify the special permit to authorize the use of alternative packaging which complies with § 173.185(b)(5) and Packing Instruction 965 Section 1A.2. (mode 4)

BILLING CODE P**DEPARTMENT OF TRANSPORTATION****Pipeline and Hazardous Materials Safety Administration****Hazardous Materials: Notice of Applications for New Special Permits**

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: List of applications for special permits.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation's Hazardous Material Regulations, notice is hereby given that the Office of Hazardous Materials Safety

has received the application described herein. Each mode of transportation for which a particular special permit is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo aircraft only, 5—Passenger-carrying aircraft.

DATES: Comments must be received on or before December 14, 2020.

ADDRESSES: Record Center, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the special permit number.

FOR FURTHER INFORMATION CONTACT: Donald Burger, Chief, Office of

Hazardous Materials Approvals and Permits Division, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington, DC 20590-0001, (202) 366-4535.

SUPPLEMENTARY INFORMATION: Copies of the applications are available for inspection in the Records Center, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington, DC.

This notice of receipt of applications for special permit is published in accordance with part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(b); 49 CFR 1.53(b)).

Issued in Washington, DC, on November 02, 2020.

Donald P. Burger,

Chief, General Approvals and Permits Branch.

BILLING CODE P**DEPARTMENT OF THE TREASURY****Fiscal Service****Bureau of the Fiscal Service; Notice of Rate To Be Used for Federal Debt Collection, and Discount and Rebate Evaluation**

AGENCY: Bureau of the Fiscal Service, Fiscal Service, Treasury.

ACTION: Notice of rate to be used for Federal debt collection, and discount and rebate evaluation.

SUMMARY: The Secretary of the Treasury is responsible for computing and publishing the percentage rate that is used in assessing interest charges for outstanding debts owed to the Government (The Debt Collection Act of 1982, as amended). This rate is also used by agencies as a comparison point in evaluating the cost-effectiveness of a cash discount. In addition, this rate is used in determining when agencies should pay purchase card invoices when the card issuer offers a rebate. Notice is hereby given that the applicable rate for calendar year 2021 is 1.00 percent.

DATES: January 1, 2021 through December 31, 2021

FOR FURTHER INFORMATION CONTACT: Department of the Treasury, Bureau of the Fiscal Service, Payment Management, E-Commerce Division (LC-RM 349B), 3201 Pennsy Drive, Building E, Landover, MD 20785 (Telephone: 202-874-9428).

SUPPLEMENTARY INFORMATION: The rate reflects the current value of funds to the Treasury for use in connection with Federal Cash Management systems and is based on investment rates set for purposes of Public Law 95-147, 91 Stat. 1227 (October 28, 1977). Computed each year by averaging Treasury Tax and Loan (TT&L) investment rates for the 12-month period ending every September 30, rounded to the nearest whole percentage, for applicability effective

each January 1. Quarterly revisions are made if the annual average, on a moving basis, changes by 2 percentage points. The rate for calendar year 2021 reflects the average investment rates for the 12-month period that ended September 30, 2020.

Authority: 31 U.S.C. Section 3717.

Ronda L. Kent,

Assistant Commissioner, Payment Management and Chief Disbursing Officer.

DEPARTMENT OF THE TREASURY**Internal Revenue Service**

Proposed Collection; Comment Request for Exempt Organization Forms: 990, 990-BL, 990-EZ, 990-N, 990-PF, 990-T, 990-W, 990 SCH E, 990 SCH I, 990 SCH M, 990 SCH D, 990 SCH F, 990 SCH H, 990 SCH J, 990 SCH K, 990 SCH R, 990/990-EZ SCH A, 990/990-EZ SCH C, 990/990-EZ SCH G, 990/990-EZ SCH L, 990/990-EZ SCH N, 990/990-EZ SCH O, 990/990-EZ/990-PF SCH B, 1023, 1023-EZ, 1023-Interactive, 1024, 1024-A, 1028, 1120-POL, 4720, 5578, 5884-C, 6069, 6497, 8038, 8038-B, 8038-CP, 8038-G, 8038-GC, 8038-R, 8038-T, 8038-TC, 8282, 8328, 8330, 8453-E.O., 8453-X, 8718, 8868, 8870, 8871, 8872, 8879-E.O., 8886-T, 8899, and Related Attachments

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and continuing information collections, as required by the Paperwork Reduction Act of 1995 (PRA). This notice requests comments on all forms used by tax-exempt organizations: Forms 990, 990-BL, 990-EZ, 990-N, 990-PF, 990-T,

990-W, 990 SCH E, 990 SCH I, 990 SCH M, 990 SCH D, 990 SCH F, 990 SCH H, 990 SCH J, 990 SCH K, 990 SCH R, 990/990-EZ SCH A, 990/990-EZ SCH C, 990/990-EZ SCH G, 990/990-EZ SCH L, 990/990-EZ SCH N, 990/990-EZ SCH O, 990/990-EZ/990-PF SCH B, 1023, 1023-EZ, 1023-Interactive, 1024, 1024-A, 1028, 1120-POL, 4720, 5578, 5884-C, 6069, 6497, 8038, 8038-B, 8038-CP, 8038-G, 8038-GC, 8038-R, 8038-T, 8038-TC, 8282, 8328, 8330, 8453-E.O., 8453-X, 8718, 8868, 8870, 8871, 8872, 8879-E.O., 8886-T, 8899 related and all attachments to these forms (see the Appendix-A to this notice). With this notice, the IRS is also announcing significant changes to (1) the manner in which tax forms used by tax-exempt organizations will be approved under the PRA and (2) its method of estimating the paperwork burden imposed on all tax-exempt organizations.

DATES: Written comments should be received on or before January 11, 2021 to be assured of consideration.

ADDRESSES: Direct all written comments to Kinna Brewington, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form and instructions should be directed to Martha Brinson, at (202) 317-5753, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or through the internet, at Martha.R.Brinson@irs.gov.

 Today, over 70 percent of all tax-exempt organization returns other than Form 990–N and all Forms 990–N are prepared using software by the taxpayer or with preparer assistance.
 These are forms used by tax-exempt organizations taxpayers. These include Forms 990, 990–PF, 990–N, and 990–T, and related schedules tax-exempt organizations attach to their tax returns (see Appendix-A to this notice). In addition, there are numerous regulations, notices and Treasury Decisions that are covered by the burden estimate provided in this notice. (See Appendix B for a list).

Taxpayer Compliance Burden

Tax compliance burden is defined as the time and money taxpayers spend to comply with their tax filing responsibilities. Time-related activities include recordkeeping, tax planning, gathering tax materials, learning about the law and what you need to do, and completing and submitting the return. Out-of-pocket costs include expenses such as purchasing tax software, paying a third-party preparer, and printing and postage. Tax compliance burden does not include a taxpayer's tax liability, economic inefficiencies caused by sub-optimal choices related to tax deductions or credits, or psychological costs.

Proposed PRA Submission to OMB

Title: Returns of Organization Exempt from Income Tax Under Section 501(c), 527, or 4947(a)(1) of the Internal Revenue Code.
OMB Number: 1545–0047.
Form Numbers: Forms 990, 990–EZ, 990–PF, 990–N, 990–T and all attachments to these forms and related forms (see the Appendix-A to this notice).

Abstract: OMB number 1545–0047 reports the estimated burden incurred by tax-exempt organizations to meet their tax-compliance-related reporting requirements. The estimate is preliminary and reflects only the change in burden related to technical adjustments related to updating the number of affected taxpayers to reflect the FY2020 forecast.

Current Actions: There have been changes in regulatory guidance related to various forms approved under this approval package during the past year. There has been additions and removals of forms included in this approval package. It is anticipated that these changes will have an impact on the overall burden and cost estimates requested for this approval package, however these estimates were not finalized at the time of release of this notice. These estimated figures are expected to be available by the release of the 30-comment notice from Treasury. This approval package is being submitted for renewal purposes only.

Affected Public: Tax-Exempt Organizations.

Estimated Number of Respondents: 1,606,200.

Total Estimated Time: 52.45 million hours.

Estimated Time per Respondent: 32.7 hours.

Total Estimated Out-of-Pocket Costs: \$1.50 billion.

Estimated Out-of-Pocket Cost per Respondent: \$932.

Total Estimated Monetized Burden: \$4.17 billion.

Estimated Total Monetized Burden per Respondent: \$2,595.

Note: Amounts below are for FY2021. Reported time and cost burdens are national averages and do not necessarily reflect a “typical” case. Most taxpayers experience lower than average burden, with taxpayer burden varying considerably by taxpayer type. Detail may not add due to rounding.

FISCAL YEAR 2021 ICB ESTIMATES FOR FORM 990 SERIES OF RETURNS AND RELATED FORMS AND SCHEDULES

	FY 20		FY 21
Number of Taxpayers	1,413,200	193,000	1,606,200
Burden in Hours	50,450,000	2,000,000	52,450,000
Burden in Dollars	1,297,300,000	199,200,000	1,496,500,000
Monetized Total Burden	3,594,400,000	422,600,000	4,017,000,000

Note: FY: 21 is most recent approved burden estimates for OMB number—1545–0047.

FISCAL YEAR 2020 FORM 990 SERIES TAX COMPLIANCE COST ESTIMATES

	Form 990	Form 990–EZ	Form 990–PF	Form 990–T	Form 990–N
Projections of the Number of Returns to be Filed with IRS	315,762	232,345	118,192	198,798	741,133
Estimated Average Total Time (Hours)	85	45	47	40	2

FISCAL YEAR 2020 FORM 990 SERIES TAX COMPLIANCE COST ESTIMATES—Continued

	Form 990	Form 990-EZ	Form 990-PF	Form 990-T	Form 990-N
Estimated Average Total Out-of-Pocket Costs	\$2,600	\$500	\$2,000	\$1,500	\$10
Estimated Average Total Monetized Burden	\$8,000	\$1,200	\$3,900	\$4,400	\$30
Estimated Total Time (Hours)	26,760,000	10,500,000	5,510,000	8,040,000	1,630,000
Estimated Total Out-of-Pocket Costs (Note. Totals may not add due to rounding.)	\$835,700,000	\$127,500,000	\$236,200,000	\$290,300,000	\$6,800,000

Note. Amounts above are for FY2020. Reported time and cost burdens are national averages and don't necessarily reflect a "typical" case. Most taxpayers experience lower than average burden, with taxpayer burden varying considerably by taxpayer type. Detail may not add due to rounding.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB Control Number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the

quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 6, 2020.

Martha R. Brinson,
IRS Tax Analyst.

Guidance Related to the Allocation and Apportionment of Deductions and Foreign Taxes, Foreign Tax Redeterminations, Foreign Tax Credit Disallowance Under Section 965(g), Consolidated Groups, Hybrid Arrangements and Certain Payments Under Section 951A**AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Final and temporary regulations and removal of temporary regulations.

SUMMARY: This document contains final regulations that provide guidance relating to the allocation and apportionment of deductions and creditable foreign taxes, the definition of financial services income, foreign tax redeterminations, availability of foreign tax credits under the transition tax, the application of the foreign tax credit limitation to consolidated groups, adjustments to hybrid deduction accounts to take into account certain inclusions in income by a United States shareholder, conduit financing arrangements involving hybrid instruments, and the treatment of certain payments under the global intangible low-taxed income provisions.

DATES: *Effective Date:* These regulations are effective on January 11, 2021.

Applicability Dates: For dates of applicability, see §§ 1.245A(e)-1(h)(2), 1.704-1(b)(1)(ii)(b)(1), 1.861-8(h), 1.861-9(k), 1.861-12(k), 1.861-14(k), 1.861-17(h), 1.861-20(i), 1.881-3(f), 1.904-4(q), 1.904-6(g), 1.904(b)-3(f), 1.904(g)-3(l), 1.905-3(d), 1.905-4(f), 1.905-5(f), 1.951A-7(d), 1.954-1(h), 1.954-2(i), 1.960-7, 1.965-9, 1.1502-4(f), and 301.6689-1(e).

Concerning § 1.245A(e)-1, Andrew L. Wigmore, (202) 317-5443; concerning §§ 1.861-8, 1.861-9(b), 1.861-12, 1.861-14, 1.861-17, and 1.954-2(h), Jeffrey P. Cowan, (202) 317-4924; concerning §§ 1.704-1, 1.861-9(e), 1.904-4(e), 1.904(b)-3, 1.904(g)-3, 1.1502-4, and 1.1502-21, Jeffrey L. Parry, (202) 317-4916; concerning §§ 1.861-20, 1.904-4(c), 1.904-6, 1.960-1, and 1.960-7, Suzanne M. Walsh, (202) 317-4908; concerning § 1.881-3, Richard F. Owens, (202) 317-6501; concerning §§ 1.965-5 and 1.965-9, Karen J. Cate, (202) 317-4667; concerning §§ 1.905-3,

1.905-4, 1.905-5, 1.954-1, 301.6227-1, and 301.6689-1, Corina Braun, (202) 317-5004; concerning § 1.951A-2, Jorge M. Oben, at (202) 317-6934 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:**Background****I. Rules Relating to Foreign Tax Credits**

On December 7, 2018, the Department of the Treasury (the “Treasury Department”) and the IRS published proposed regulations (REG-105600-18) relating to foreign tax credits in the **Federal Register** (83 FR 63200) (the “2018 FTC proposed regulations”). The 2018 FTC proposed regulations addressed several significant changes that the Tax Cuts and Jobs Act (Pub. L. 115-97, 131 Stat. 2054, 2208 (2017)) (the “TCJA”) made with respect to the foreign tax credit rules and related rules for allocating and apportioning deductions in determining the foreign tax credit limitation. Certain provisions of the 2018 FTC proposed regulations relating to §§ 1.78-1, 1.861-12(c)(2), and 1.965-7 were finalized as part of TD 9866, published in the **Federal Register** (84 FR 29288) on June 21, 2019.

The remainder of the 2018 FTC proposed regulations were finalized on December 17, 2019 in TD 9882, published in the **Federal Register** (84 FR 69022) (the “2019 FTC final regulations”). On the same date, the Treasury Department and the IRS published proposed regulations (REG-105495-19) relating to foreign tax credits in the **Federal Register** (84 FR 69124) (the “2019 FTC proposed regulations”). The 2019 FTC proposed regulations related to changes made by the TCJA and other foreign tax credit issues. Correcting amendments to the 2019 FTC final regulations and the 2019 FTC proposed regulations were published in the **Federal Register** on May 15, 2020, see 85 FR 29323 (2019 FTC final regulations) and 85 FR 29368 (2019 FTC proposed regulations). A public hearing on the proposed regulations was held on May 20, 2020.

On November 7, 2007, the **Federal Register** published temporary regulations (TD 9362) at 72 FR 62771 and a notice of proposed rulemaking by cross-reference to the temporary regulations at 72 FR 62805 relating to sections 905(c), 986(a), and 6689 of the Internal Revenue Code (“Code”). Portions of these temporary regulations were finalized in the 2019 FTC final regulations, while certain portions were repropounded in the 2019 FTC proposed regulations.

This document contains final regulations (the “final regulations”)

addressing the following issues: (1) The allocation and apportionment of deductions under sections 861 through 865, including rules on the allocation and apportionment of expenditures for research and experimentation (“R&E”), stewardship, legal damages, and certain deductions of life insurance companies; (2) the allocation and apportionment of foreign income taxes; (3) the interaction of the branch loss and dual consolidated loss recapture rules with section 904(f) and (g); (4) the effect of foreign tax redeterminations of foreign corporations, including for purposes of the application of the high-tax exception described in section 954(b)(4) (and for purposes of determining tested income under section 951A(c)(2)(A)(i)(III)), and required notifications under section 905(c) to the IRS of foreign tax redeterminations and related penalty provisions; (5) the definition of foreign personal holding company income under section 954; (6) the application of the foreign tax credit disallowance under section 965(g); and (7) the application of the foreign tax credit limitation to consolidated groups.

II. Rules Relating to Hybrid Deduction Accounts, Hybrid Instruments Used in Conduit Financing Arrangements, and Certain Payments Under Section 951A

On December 28, 2018, the Treasury Department and the IRS published proposed regulations (REG-104352-18) relating to hybrid arrangements, including hybrid arrangements to which section 245A(e) applies, in the **Federal Register** (83 FR 67612) (the “2018 hybrids proposed regulations”). Those regulations were finalized as part of TD 9896, published in the **Federal Register** (85 FR 19802) on April 8, 2020 (the “2020 hybrids final regulations”). On the same date, the Treasury Department and the IRS published proposed regulations (REG-106013-19) in the **Federal Register** (85 FR 19858) (the “2020 hybrids proposed regulations”). Correcting amendments to the 2020 hybrids final regulations and the 2020 hybrids proposed regulations were published in the **Federal Register** on August 4, 2020, August 11, 2020, and August 12, 2020. See 85 FR 47027 (2020 hybrids final regulations), 85 FR 48485 (2020 hybrids proposed regulations), and 85 FR 48651 (2020 hybrids final regulations).

The 2020 hybrids proposed regulations address hybrid deduction accounts under section 245A(e), hybrid instruments used in conduit financing arrangements under section 881, and certain payments under section 951A (relating to global intangible low-taxed income). The Treasury Department and

the IRS received written comments with respect to the 2020 hybrids proposed regulations. All written comments received in response to the 2020 hybrids proposed regulations are available at www.regulations.gov or upon request. A public hearing on the 2020 hybrids proposed regulations was not held because there were no requests to speak.

This document contains final regulations addressing the following issues: (1) The reduction to a hybrid deduction account under section 245A(e) by reason of an amount included in the gross income of a domestic corporation under section 951(a) or 951A(a) with respect to a controlled foreign corporation (“CFC”); (2) the treatment of a hybrid instrument as a financing transaction for purposes of the conduit financing rules under section 881; and (3) the treatment under section 951A of certain prepayments made to a related CFC after December 31, 2017, and before the CFC’s first taxable year beginning after December 31, 2017.

III. Scope of Provisions and Comments Discussed in This Preamble

This rulemaking finalizes, without substantive change, certain provisions in the 2019 FTC proposed regulations and the 2020 hybrids proposed regulations with respect to which the Treasury Department and IRS did not receive any comments. See, for example, § 1.904(b)–3, § 1.904(g)–3, § 1.951A–2(c)(6), § 1.951A–7(d), § 1.1502–4, or § 301.6689–1. These provisions are generally not discussed in this preamble.

Comments received that do not pertain to the 2019 FTC proposed regulations or the 2020 hybrids proposed regulations, or that are otherwise outside the scope of this rulemaking, are generally not addressed in this preamble but may be considered in connection with future guidance projects.

Summary of Comments and Explanation of Revisions

I. Rules Under Section 245A(e) To Reduce Hybrid Deduction Accounts

A. Overview

Section 245A(e) was added to the Code by the TCJA. Section 245A(e) and the 2020 hybrids final regulations neutralize the double non-taxation effects of a hybrid dividend or tiered hybrid dividend by either denying the section 245A(a) dividends received deduction with respect to the dividend or requiring an inclusion under section 951(a)(1)(A) with respect to the dividend, depending on whether the

dividend is received by a domestic corporation or a CFC. The 2020 hybrids final regulations require that certain shareholders of a CFC maintain a hybrid deduction account with respect to each share of stock of the CFC that the shareholder owns, and provide that a dividend received by the shareholder from the CFC is a hybrid dividend or tiered hybrid dividend to the extent of the sum of those accounts. A hybrid deduction account with respect to a share of stock of a CFC reflects the amount of hybrid deductions of the CFC that have been allocated to the share, reduced by the amount of hybrid deductions that gave rise to a hybrid dividend or tiered hybrid dividend.

The 2020 hybrids proposed regulations generally reduced a hybrid deduction account with respect to a share of stock of a CFC by three categories of amounts included in the gross income of a domestic corporation with respect to the share, including an “adjusted subpart F inclusion” or an “adjusted GILTI inclusion” with respect to the share. See proposed § 1.245A(e)–1(d)(4)(i)(B)(1) and (2). An adjusted subpart F inclusion or an adjusted GILTI inclusion with respect to a share is intended to measure, in an administrable manner, the extent to which a domestic corporation’s inclusion under section 951(a)(1)(A) (“subpart F inclusion”) or inclusion under section 951A (“GILTI inclusion amount”) attributable to the share is likely “included in income” in the United States—that is, taken into account in income and not offset by, for example, foreign tax credits associated with the inclusion and, in the case of a GILTI inclusion amount, the deduction under section 250(a)(1)(B).

The final regulations retain the basic approach and structure of the 2020 hybrids proposed regulations that reduced hybrid deduction accounts, with certain revisions. Part I.B of this Summary of Comments and Explanation of Revisions discusses the revisions as well as comments received that relate to these rules.

B. Computation of Adjusted Subpart F Income Inclusion and Adjusted GILTI Inclusion

1. In General

Comments suggested several refinements or clarifications to the computation of an adjusted subpart F inclusion or adjusted GILTI inclusion with respect to a share of stock of a CFC, generally so that the adjusted subpart F inclusion or adjusted GILTI inclusion more closely reflects the extent that the subpart F inclusion or GILTI inclusion

amount is in fact included in income in the United States.

2. Section 904 Limitation

Under the 2020 hybrids proposed regulations, an adjusted subpart F inclusion or adjusted GILTI inclusion with respect to a share of stock is computed by taking into account foreign income taxes that, as a result of the application of section 960(a) or (d), are likely to give rise to deemed paid credits eligible to be claimed by the domestic corporation with respect to the subpart F inclusion or adjusted GILTI inclusion. See proposed § 1.245A(e)–1(d)(4)(ii)(A) and (B). To minimize complexity, the 2020 hybrids proposed regulations did not take into account any limitations on foreign tax credits when computing foreign income taxes that are likely to give rise to deemed paid credits. See proposed § 1.245A(e)–1(d)(4)(ii)(D). A comment suggested that the final regulations take into account the limitation under section 904.

The Treasury Department and the IRS agree with the comment for computing an adjusted GILTI inclusion. Foreign income taxes that by reason of section 904 do not currently give rise to deemed paid credits eligible to be claimed with respect to the GILTI inclusion amount are not creditable in another year through a carryback or carryover. See section 904(c). Thus, there is generally no ability for such excess foreign income taxes to reduce the extent that an amount taken into account in income by the domestic corporation is included in income in the United States. The final regulations therefore provide that such foreign income taxes are not taken into account when computing an adjusted GILTI inclusion. See § 1.245A(e)–1(d)(4)(ii)(D)(2)(iii) and (G). If the application of this rule results in circularity or ordering rule issues, a taxpayer may, solely for purposes of computing the adjusted GILTI inclusion, apply any reasonable method to compute the amount of foreign income taxes the creditability of which is limited by section 904.¹

¹ For example, in certain cases the section 904 limitation may be affected by the extent to which section 245A(e) applies to a dividend paid by the CFC (in particular, in connection with allocating and apportioning deductions under §§ 1.861–8 through 1.861–20); the application of section 245A(e) to the dividend may depend on the extent to which a hybrid deduction account is reduced by reason of an adjusted GILTI inclusion; and the adjusted GILTI inclusion may in turn depend on the section 904 limitation. In such a case, to avoid circularity issues, a taxpayer may compute the section 904 limitation for purposes of determining the adjusted GILTI inclusion by, for instance, using simultaneous equations, or applying an ordering rule pursuant to which, solely for purposes of

The final regulations do not adopt a similar rule for computing an adjusted subpart F inclusion. This is because foreign income taxes that by reason of section 904 do not currently give rise to deemed paid credits eligible to be claimed with respect to the subpart F inclusion may become creditable in another year under section 904(c). Consequently, for example, the foreign income taxes could in a later year reduce the extent that an amount is included in income in the United States, and could thus inappropriately result in an outcome similar to the one that would have occurred had the foreign income taxes given rise to deemed paid credits in the year of the subpart F inclusion and thereby reduced the extent that the subpart F inclusion was subject to tax in the United States at the full statutory rate. The Treasury Department and the IRS have determined that special rules to prevent such results would be complex or burdensome as they would require, for instance, tracking the creditability of the foreign income taxes over prior or later years (potentially through a 10-year period), and then adjusting the hybrid deduction account as the foreign income taxes become creditable.

3. Section 250 Deduction

Under the 2020 hybrids proposed regulations, an adjusted GILTI inclusion is computed by taking into account the portion of the deduction allowed under section 250 by reason of section 250(a)(1)(B) that the domestic corporation is likely to claim with respect to the GILTI inclusion amount. See proposed § 1.245A(e)-1(d)(4)(ii)(B). The 2020 hybrids proposed regulations did not take into account any limitations on the deduction under section 250(a)(2)(B). See *id.* A comment suggested that the final regulations take into account the taxable income limitation under section 250(a)(2).

The Treasury Department and the IRS agree with the comment, because taking into account the taxable income limitation results in an adjusted GILTI inclusion that more closely reflects the extent to which the GILTI inclusion amount is included in income in the United States. The final regulations thus provide a rule to this effect. See § 1.245A(e)-1(d)(4)(ii)(B) and (H). Similar to the rule discussed in Part I.B.2 of this Summary of Comments and Explanation of Revisions (related to the section 904 limitation), a taxpayer may,

determining the adjusted GILTI inclusion, the section 904 limitation is determined without regard to the application of section 245A(e) (as well as any other provision the application of which depends on the extent to which section 245A(e) applies).

solely for purposes of computing an adjusted GILTI inclusion, apply any reasonable method to compute the extent to which the portion of a deduction allowed under section 250 by reason of section 250(a)(1)(B) is limited under section 250(a)(2)(B).

4. Limit on Reduction of a Hybrid Deduction Account

The 2020 hybrids proposed regulations provided a limit to ensure that an adjusted subpart F inclusion or adjusted GILTI inclusion with respect to a share of stock of a CFC does not reduce the hybrid deduction account by an amount greater than the hybrid deductions allocated to the share for the taxable year multiplied by a fraction, the numerator of which is the subpart F income or tested income, as applicable, of the CFC for the taxable year and the denominator of which is the CFC's taxable income. See proposed § 1.245A(e)-1(d)(4)(i)(B)(1)(ii) and (d)(4)(i)(B)(2)(ii). In cases in which the CFC's taxable income is zero or negative, the 2020 hybrids proposed regulations prevented distortions to the fraction—which would otherwise occur because the fraction would involve dividing by zero or a negative number—by providing that the fraction is considered to be zero. See proposed § 1.245A(e)-1(d)(4)(i)(B)(1)(ii) and (d)(4)(i)(B)(2)(ii).

Distortions to the fraction could also occur if the CFC's taxable income is greater than zero but less than its subpart F income or tested income (due to losses in one category of income) because, absent a rule to address, the fraction would be greater than one. The final regulations eliminate these distortions by modifying the fraction so that the numerator and denominator only reflect items of gross income. See § 1.245A(e)-1(d)(4)(i)(B)(1)(ii) and (d)(4)(i)(B)(2)(ii).

5. Clarifications

Comments recommended that the final regulations clarify whether an adjusted subpart F inclusion or adjusted GILTI inclusion can be negative and result in an increase to the hybrid deduction account (that is, whether the hybrid deduction account can be reduced by a negative amount). The final regulations clarify that an adjusted subpart F inclusion or adjusted GILTI inclusion cannot be negative and thus cannot result in an increase to the hybrid deduction account. See § 1.245A(e)-1(d)(4)(ii)(A) and (B).

A comment also recommended that the final regulations clarify whether the computation of an adjusted subpart F inclusion takes into account an amount

that the domestic corporation includes in gross income by reason of section 964(e)(4). As noted in the comment, an amount that the domestic corporation includes in gross income by reason of section 964(e)(4) is in many cases offset by a 100 percent dividends received deduction under section 245A(a), and thus no portion of the amount is included in income in the United States (that is, taken into account in income and not offset by a deduction or credit particular to the inclusion). The final regulations clarify that the computation of an adjusted subpart F inclusion does not take into account an amount that a domestic corporation includes in gross income by reason of section 964(e)(4), to the extent that a deduction under section 245A(a) is allowed for the amount. See § 1.245A(e)-1(d)(4)(ii)(A).

6. Comments Outside the Scope of the 2020 Hybrids Proposed Regulations

In response to a comment, the 2020 hybrids final regulations clarified that a deduction or other tax benefit may be a hybrid deduction regardless of whether it is used currently under the foreign tax law. See § 1.245A(e)-1(d)(2). The preamble to the 2020 hybrids final regulations explained that even though a deduction or other tax benefit may not be used currently, it could be used in another taxable period and thus could produce double non-taxation. The preamble also noted that it could be complex or burdensome to determine whether a deduction or other tax benefit is used currently and, to the extent not used currently, to track the deduction or other tax benefit and add it to the hybrid deduction account if it is in fact used.

Comments submitted with respect to the 2020 hybrids proposed regulations raised additional issues involving the extent to which a hybrid deduction account should be adjusted based on the availability-for-use of a deduction or other tax benefit under the foreign tax law. These issues include the extent to which (or the mechanism by which) a hybrid deduction account should be adjusted when a deduction or other tax benefit reflected in the account is subsequently disallowed under the foreign tax law (for example, by reason of a foreign audit) or an economically equivalent adjustment is made under the foreign tax law, or the deduction or other tax benefit expires or otherwise cannot be used under the foreign tax law. The Treasury Department and the IRS are studying these comments, which are outside the scope of the 2020 hybrids proposed regulations, and may address these issues in a future guidance project.

II. Allocation and Apportionment of Deductions and the Calculation of Taxable Income for Purposes of Section 904(a)

A. Stewardship Expenses, Litigation Damages Awards and Settlement Payments, Net Operating Losses, Interest Expense, and Other Expenses

1. Stewardship Expenses

The 2019 FTC proposed regulations made several changes to the rules for allocating and apportioning stewardship expenses, which are generally expenses incurred to oversee a related corporation. Although the 2019 FTC proposed regulations did not change the definition of stewardship expenses, the regulations did provide that expenses incurred with respect to partnerships are treated as stewardship expenses. The 2019 FTC proposed regulations also expanded the types of income to which stewardship expenses are allocated to include not only dividends but also other inclusions received with respect to stock. The 2019 FTC proposed regulations further provided that stewardship expenses are to be apportioned based on the relative values of stock held by a taxpayer, as computed for purposes of allocating and apportioning the taxpayer's interest expense. Additionally, the preamble to the 2019 FTC proposed regulations requested comments regarding how to distinguish stewardship expenses from supportive expenses.

Several comments addressed the definition of stewardship expenses. Some comments recommended that the current regulations' definition be retained without changes. One comment recommended that, because stewardship is among those activities that are not treated as providing a benefit to a related party under the section 482 regulations, such expenses should be treated as supportive expenses. Another comment recommended that the definition of stewardship expenses be narrowed to apply solely to expenses that result from oversight with respect to foreign subsidiaries or non-affiliated domestic entities. Comments also requested clarification on how to identify and distinguish between stewardship and supportive expenses and sought greater flexibility in identifying stewardship expenses. One comment recommended that further guidance be left to a separate project.

The final regulations generally retain the existing definition of stewardship expenses as either duplicative or shareholder activities as described in § 1.482-9(l)(3)(iii) or (iv). Therefore, stewardship expenses either duplicate

an expense incurred by the related entity without providing an additional benefit to that entity or are incurred primarily to protect the taxpayer's investment in another entity or to facilitate the taxpayer's compliance with its own reporting, legal or regulatory requirements. In contrast, supportive expenses are typically incurred in order to enhance the income-producing capabilities of the taxpayer itself, and so are definitely related and allocable to all, or broad classes, of the taxpayer's gross income. See § 1.861-8(b)(3). The fact that expenses attributable to stewardship activities do not provide a benefit to the related party does not mean that the expenses are supportive of all of the taxpayer's income-producing activity. Instead, expenses categorized under §§ 1.861-8(e)(4)(ii) and 1.482-9(l)(3)(iii) and (iv) as stewardship expenses are properly allocated to income generated by the related party (and included in income of the taxpayer as a dividend or other inclusion), rather than to income earned directly by the taxpayer.

Comments recommended that the definition of stewardship expenses be expanded to include expenses incurred with respect to branches and disregarded entities, in addition to corporations and partnerships. The Treasury Department and the IRS agree that stewardship expenses can also be incurred with respect to all business entities (whether foreign or domestic) as described in § 301.7701-2(a) and not only those business entities that are classified as corporations or partnerships for Federal income tax purposes. Therefore, the final regulations at § 1.861-8(e)(4)(ii)(A) provide that stewardship expenses incurred with respect to oversight of disregarded entities are also subject to allocation and apportionment under the rules of § 1.861-8(e)(4). However, the Treasury Department and the IRS have determined that it is inappropriate to extend the definition of stewardship expense to include oversight expenses incurred with respect to an unincorporated branch of the taxpayer, since the branch's income is income of the taxpayer itself, not income of a separate entity in which the taxpayer is protecting its investment, and any reporting, legal or regulatory requirements that apply to an unincorporated branch of the taxpayer apply to the taxpayer itself.

Comments also requested that the final regulations make clear that stewardship expenses can be allocated and apportioned to income and assets of all affiliated and consolidated group members, noting that a portion of the

dividends and stock with respect to domestic affiliates may be treated as exempt income or assets under section 864(e)(3) and § 1.861-8(d)(2)(ii) and excluded from the apportionment formula, which could reduce apportionment of expenses to U.S. source income. In response to the comments, the final regulations at § 1.861-8(e)(4)(ii)(A) provide that the affiliated group rules in § 1.861-14 do not apply for purposes of allocating and apportioning stewardship expenses. As a result, stewardship expenses incurred by one member of an affiliated group in order to oversee the activities of another member of the group are allocated and apportioned by the investor taxpayer on a separate entity basis, with reference to the investor's stock in the affiliated member. See § 1.861-8(e)(4)(ii)(A). Furthermore, in response to comments, the final regulations at § 1.861-8(e)(4)(ii)(C) provide that the exempt income and asset rules in section 864(e)(3) and § 1.861-8(d)(2) do not apply for purposes of apportioning stewardship expenses.

Comments were also received regarding the rules for allocating stewardship expenses solely to income arising from the entity for which the stewardship expenses are being incurred in order to protect that investment. One comment argued that the rule in the prior final regulations for allocating stewardship expenses solely to dividend income should be retained and should not be expanded to include inclusions such as those under the GILTI rules. In contrast, another comment agreed with the approach to expand allocation to include shareholder-level inclusions such as GILTI inclusions in light of the changes made by the TCJA.

The Treasury Department and the IRS have determined that allocating stewardship expenses to all types of income derived from ownership of the entity, rather than solely dividend income, is appropriate because dividends do not fully capture all of the statutory and residual groupings to which income from stock is assigned. Limiting the allocation of stewardship expenses only to dividends would preclude allocation to stock in a CFC or passive foreign investment company ("PFIC") whose income gave rise only to subpart F, GILTI, or PFIC inclusions, even if the expense clearly relates to overseeing activities that generate income in the CFC or PFIC that give rise to such inclusions. Therefore, the Treasury Department and IRS agree with the comment supporting the expansion of stewardship expense allocation in

proposed § 1.861–8(e)(4)(ii)(B) to include shareholder-level inclusions.

One comment recommended adding dividends eligible for a section 245A deduction to the list of income inclusions to which stewardship expenses are allocable. The existing regulations are already clear, however, that stewardship expenses are allocable to dividends. This allocation is not affected by the fact that dividends may qualify for the deduction under section 245A, which does not convert the dividends into exempt or excluded income for purposes of allocating and apportioning deductions. See § 1.861–8(d)(2)(iii)(C). To the extent that stewardship expense is allocated and apportioned to dividend income in the section 245A subgroup, section 904(b)(4) requires certain adjustments to the taxpayer's foreign source taxable income and entire taxable income for purposes of computing the applicable foreign tax credit limitation. Accordingly, the final regulations are not modified in response to the comment.

In response to a request for comments in the 2019 FTC proposed regulations on possible exceptions to the general rule for the allocation and apportionment of stewardship expenses, several comments recommended allowing taxpayers to show that stewardship expense factually relates only to the relevant income of a specific income-producing entity or entities. The Treasury Department and the IRS agree that stewardship expenses may be factually related to the taxpayer's ownership of a specific entity (or entities) and should not be allocated and apportioned to the income derived from all entities in a group without taking into account the factual connection between the stewardship expense and the entity being overseen. Accordingly, the final regulations at § 1.861–8(e)(4)(ii)(B) clarify that at the allocation step (but before applying the apportionment rules), only the gross income derived from entities to which the taxpayer's stewardship expense has a factual connection are included and, in such cases, the apportionment rule applies based on the tax book value of the taxpayer's investment in those particular entities. This approach recognizes that stewardship activities are not fungible in the same manner as interest expense.

With respect to the apportionment of stewardship expenses, several comments recommended retaining the flexibility of the prior final regulations, which provide for several permissible methods of apportionment, or alternatively apportioning stewardship

expenses on the basis of gross income, rather than assets. One comment questioned the appropriateness of applying the apportionment rule used for interest expense in the context of stewardship expenses.

The Treasury Department and the IRS have determined that it is appropriate to provide a single, clear rule for the apportionment of stewardship expenses and that the asset-based rule for interest expense apportionment is the most appropriate method. The Treasury Department and the IRS have also determined that an explicit rule provides certainty for both taxpayers and the IRS and will minimize disputes. By definition, stewardship expenses typically relate to protecting the value of the taxpayer's ownership interest in another entity. Therefore, such expenses should be apportioned on the basis of the tax book value (or alternative tax book value) of the taxpayer's interest in the entity (or entities) in question, since that value more closely approximates the income generated by the entity over time, while income distributed from an entity (or entities) and taxed to the owner can vary from year to year and may not properly reflect all the income-generating activity of the entity. Although stewardship activities may be definitely related to indirectly-owned entities, the Treasury Department and the IRS have determined that apportioning stewardship expenses based on the value of an indirectly-owned entity would lead to unnecessary complexity for taxpayers and administrative burdens for the IRS; instead, such expenses are apportioned based on the values of the entities that are owned directly by the taxpayer. See § 1.861–8(e)(4)(ii)(C).

For purposes of determining the value of an entity, the final regulations at § 1.861–8(e)(4)(ii)(C) provide that the value of the stock in an affiliated corporation is characterized as if the corporation were not affiliated and the stock is characterized by the taxpayer in the same ratios in which the affiliate's assets are characterized for purposes of allocating and apportioning the group's interest expense. The final regulations also provide that the tax book value of a taxpayer's investment in a disregarded entity is determined and characterized under the rules that would apply if the entity's stock basis were regarded for purposes of allocating and apportioning the investor taxpayer's interest expense.

2. Litigation Damages Awards, Prejudgment Interest, and Settlement Payments

The 2019 FTC proposed regulations included special rules for the allocation

and apportionment of damages awards, prejudgment interest, and settlement payments incurred in settlement of, or in anticipation of, claims for damages arising from product liability, events incident to the production or sale of goods or provision of services, and investor suits. Damages or settlement awards related to product liability, or events incident to the production or sale of goods or provision of services, are allocated to the class of gross income produced by the specific sales of products or services that gave rise to the claims for damages or injury, or to the class of gross income produced by the assets involved in the production or sales activity, respectively. Damages awards related to shareholder suits are allocated to all income of the corporation and apportioned based on the relative values of all of the corporation's assets that produce income in the statutory and residual groupings.

One comment suggested that the proposed rules lacked clearly articulated rationales, in contrast to, for example, the rules for R&E expenditures. The Treasury Department and the IRS have determined that the rules included in the 2019 FTC proposed regulations for specific types of litigation-related expenses are consistent with the general principles of the allocation and apportionment rules, which are based on the factual connection between deductions and the class of gross income to which they relate. See § 1.861–8(b)(1). Accordingly, no change is made in the final regulations in response to this comment. However, the final regulations at § 1.861–8(e)(5)(ii) include a new paragraph heading and a sentence to clarify that the damages rule is not limited to product liability claims.

One comment stated that the 2019 FTC proposed regulations could be interpreted to require a double allocation of deductions to royalty income, for example, if a taxpayer incurs damages from a patent infringement lawsuit and also indemnifies its CFC for damages paid in a separate lawsuit filed against the CFC. The Treasury Department and the IRS have determined that indemnification payments, to the extent deductible, are governed by the generally-applicable rules for allocating and apportioning expenses based on the factual relationship between the deduction and the class of gross income to which the deduction relates. The allocation of separate deductions that are both related to the same class of gross income does not constitute a double allocation. Accordingly, no changes are made in

the final regulations in response to this comment.

The 2019 FTC proposed regulations contained an explicit apportionment rule for damages awards in response to industrial accidents and investor lawsuits, but not for product liability and similar claims. The final regulations add a sentence at § 1.861–8(e)(5)(ii) to clarify that deductions relating to product liability and similar claims are apportioned among the statutory and residual groupings based on the relative amounts of gross income in the relevant class in the groupings in the year the deductions are allowed.

Finally, several comments disagreed with the approach in the 2019 FTC proposed regulations regarding lawsuits filed by investors against a corporation. These comments argued that it is inappropriate to allocate deductions for such payments to income produced by all of the taxpayer's assets, because these expenses can have a closer factual connection to the jurisdiction where the litigation occurs or where the events (for example, any negligence, fraud, or malfeasance) at issue in the lawsuit occurred. Some comments advocated for a more flexible rule, noting that certain shareholder claims may have a very narrow geographic scope, whereas other claims may relate to a broader range of activities.

The Treasury Department and the IRS have determined that it is inappropriate to allocate deductions for payments with respect to investor lawsuits on the basis of the situs of the underlying events or the location of the lawsuit. The purpose of direct investor lawsuits against a company is generally to compensate investors for damages to their investment in the entire company. Even where the underlying misconduct directly relates to only a portion of the taxpayer's business activities, the harm to the investor is generally attributable to the taxpayer's business more generally and, therefore, any damages payment is related to all of the taxpayer's income-producing activities. Moreover, any rule that attempted to quantify the portion of damages or settlements that relate to specific business activities and the portion that relates to more general reputational loss would by its nature be difficult for taxpayers to comply with and for the IRS to administer. Furthermore, the Treasury Department and the IRS disagree with the comments suggesting that award payments should be allocated based on the geographic location in which the lawsuit is filed, which could be governed by contractual terms or choice-of-law rules that have little to no factual relationship to the

underlying activities to which the lawsuit relates. Accordingly, the comments are not adopted.

3. Net Operating Loss Deductions

The 2019 FTC proposed regulations clarified the treatment of net operating losses (NOLs) by specifying how the statutory and residual grouping components of an NOL are determined in the taxable year of the loss and by clarifying the manner in which the net operating loss deduction allowed under section 172 is allocated and apportioned in the taxable year in which the deduction is allowed. Comments requested that for purposes of applying § 1.861–8(e)(8) to section 250 as the operative section, NOLs arising in taxable years before the TCJA's enactment of section 250 should not be allocated and apportioned to gross FDDEI. On July 15, 2020, the Treasury Department and the IRS finalized regulations under section 250, which provide that the deduction under section 172(a) is not taken into account in computing FDDEI. See § 1.250(b)–1(d)(2)(ii). Therefore, the comment is moot. However, a sentence is added to the final regulations at § 1.861–8(e)(8)(i) to clarify that in determining the component parts of an NOL, deductions that are considered absorbed in the year the loss arose for purposes of an operative section may differ from the deductions that are considered absorbed for purposes of another provision of the Code that requires determining the components of an NOL. Therefore, for example, a taxpayer's NOL may comprise excess deductions allocated to foreign source general category income for purposes of section 904, even though for purposes of section 172(b)(1)(B)(ii) the NOL is a farming loss comprising excess deductions allocated to U.S. source income from farming.

4. Application of the Exempt Income/Asset Rule to Insurance Companies in Connection With Certain Dividends and Tax-Exempt Interest

The 2019 FTC proposed regulations clarified in proposed § 1.861–8(d)(2)(ii)(B), (d)(2)(v), and (e)(16) the effect of certain deduction limitations on the treatment of income and assets generating dividends-received deductions and tax-exempt interest held by insurance companies for purposes of allocating and apportioning deductions to such income and assets. Specifically, the 2019 FTC proposed regulations provided that in the case of insurance companies, exempt income includes dividends for which a deduction is provided by sections 243(a)(1) and (2) and 245, without regard to the proration

rules under section 805(a)(4)(A)(ii) disallowing a portion of the deduction attributable to the policyholder's share of the dividends or any similar disallowance under section 805(a)(4)(D). Similarly, the regulations provided that the term exempt income includes tax-exempt interest without regard to the proration rules.

One comment requested that the final regulations modify § 1.861–8T(d)(2) to permit insurance companies to adjust the amount of income and assets that are exempted in apportioning deductions. The comment asserted that such adjustment is required in order to reflect the addition of section 864(e)(7)(E) and relied on legislative history to a provision in proposed technical corrections legislation (Technical Corrections Act of 1987, H.R. 2636, 100th Cong., section 112(g)(6)(A)) (June 10, 1987) (the "1987 bill") to suggest that Congress intended to create a different result for insurance companies than for other companies.

The 1987 bill, however, was not enacted, and the language in section 864(e)(7)(E) is not the same as the language proposed in the bill. Section 864(e)(7)(E) provides regulatory authority for the Secretary to issue regulations regarding any adjustments that may be appropriate in applying section 864(e)(3) to insurance companies. The legislative history to section 864(e)(7)(E) (which was enacted in 1988) does not contain the same language as did the committee reports from the 1987 bill, and the rule that was proposed in the 1987 bill is contrary to subsequent case law. See *Travelers Insurance Company v. United States*, 303 F.3d 1373 (2002). Therefore, the Treasury Department and the IRS have concluded that although section 864(e)(7)(E) provides regulatory authority for a rule applying section 864(e)(3) to insurance companies, there is no indication that Congress intended for Treasury to adopt a rule mirroring the rule in the 1987 bill (which Congress did not enact).

Section 864(e)(3) is clear that exempt income includes income for which a deduction is allowed under sections 243 and 245, and no exception is provided in the statute for insurance companies. Furthermore, as explained in Part I.A.4 of the Explanation of Provisions in the 2019 FTC proposed regulations, a special rule for either tax-exempt interest of a life insurance company or dividends-received deductions and tax-exempt interest of a nonlife insurance company is not appropriate because when a policyholder's share or applicable percentage is accounted for as either a reserve adjustment or a

reduction to losses incurred, no further modification to the generally applicable rules is required to ensure that the appropriate amount of expenses are apportioned to U.S. source income. Instead, the rule suggested by the comment would inappropriately distort the allocation and apportionment of deductions to U.S. source income. Therefore, the comment is not adopted.

5. Treatment of the Section 250 Deduction

One comment requested clarification on the allocation and apportionment of the deduction allowed under section 250 (“section 250 deduction”) with respect to members of a consolidated group. In general, under § 1.1502–50(b), a consolidated group member’s section 250 deduction is determined based on the member’s share of the sum of all members’ positive FDDEI or GILTI. Separate from this determination under § 1.1502–50(b), a taxpayer must also allocate and apportion the section 250 deduction to gross income for purposes of determining its foreign tax credit limitation. For this purpose, in allocating and apportioning the section 250 deduction to statutory and residual groupings, under § 1.861–8(e)(13) the portion of the section 250 deduction attributable to FDII is treated as definitely related and allocable to the specific class of gross income that is included in the taxpayer’s FDDEI and then apportioned between the statutory and residual groupings based on the relative amounts of FDDEI in each grouping. In the context of an affiliated group, under § 1.861–14T(c)(1) expenses are generally allocated and apportioned by treating all members of an affiliated group as if they were a single corporation.

In response to the comment requesting clarity on the allocation and apportionment of the section 250 deduction with respect to members of a consolidated group, the final regulations provide that the section 250 deduction is allocated and apportioned as if all members of the consolidated group are treated as a single corporation. See § 1.861–14(e)(4). However, in the case of an affiliated group that is not a consolidated group, the section 250 deduction of a member of an affiliated group is allocated and apportioned on a separate entity basis under the rules of § 1.861–8(e)(13) and (14).

6. Other Requests for Comments on Expense Allocation

The preamble to the 2019 FTC proposed regulations requested comments on whether future regulations should allow taxpayers to capitalize and

amortize certain expenses solely for purposes of the rules in § 1.861–9 for allocating and apportioning interest expense in order to better reflect asset values under the tax book value method. One comment was received recommending that such a rule be included with respect to R&E and advertising expenditures. The Treasury Department and the IRS agree with this comment and, accordingly, this rule is included in a notice of proposed rulemaking in the Proposed Rules section of this issue of the **Federal Register** (the “2020 FTC proposed regulations”). See Part V.A of the Explanation of Provisions in the 2020 FTC proposed regulations.

One comment requested that a special rule be adopted in § 1.861–10T to directly allocate certain interest expense related to regulated utility companies. The Treasury Department and the IRS agree that a special rule is warranted, and have included a rule in the 2020 FTC proposed regulations. See Part V.B. of the Explanation of Provisions in the 2020 FTC proposed regulations.

Finally, the preamble to the 2019 FTC proposed regulations requested comments on whether the rules in § 1.861–8(e)(6) for allocating and apportioning state income taxes should be revised in light of changes made by the TCJA and changes to state rules for taxing foreign income. One comment was received requesting that the existing rules, which rely on state law to determine the income to which state taxes relate, be retained. The Treasury Department and the IRS agree that no changes to the rules in § 1.861–8(e)(6) are required at this time.

7. Examples Illustrating Allocation and Apportionment of Certain Expenses of an Affiliated Group of Corporations

Examples 1 through 6 in § 1.861–14T(j) apply the temporary regulations to fact patterns involving affiliated groups of corporations. However, Examples 1 and 4 of § 1.861–14T(j) are no longer consistent with current law, and therefore the final regulations append an informational footnote to § 1.861–14T(j) to reflect this fact. The Treasury Department and the IRS are also studying whether the remaining examples should be modified and whether new examples should be included in future guidance.

B. Partnership Transactions

The 2019 FTC proposed regulations revised §§ 1.861–9(b) and 1.954–2(h)(2)(i) to provide that guaranteed payments for the use of capital described in section 707(c) are treated similarly to interest deductions for

purposes of allocating and apportioning deductions under §§ 1.861–8 through 1.861–14, and are treated as income equivalent to interest under section 954(c)(1)(E). These rules were intended to prevent the use of guaranteed payments to avoid the rules under §§ 1.861–9(e)(8) and 1.954–2(h) that apply to partnership debt.

One comment stated that while guaranteed payments for capital are economically similar to interest payments in some respects, guaranteed payments are, for Federal income tax purposes, payments with respect to equity, not debt, and regulations issued under section 707 narrowly circumscribe the situations in which a guaranteed payment is treated as something other than a distributive share of partnership income. The comment recommended that guaranteed payments for capital be treated as interest only in cases when the taxpayer harbors an abusive motive to circumvent the relevant rule.

The Treasury Department and the IRS have determined that guaranteed payments for the use of capital share many of the characteristics of interest payments that a partnership would make to a lender and, therefore, should be treated as interest equivalents for purposes of allocating and apportioning deductions under §§ 1.861–8 through 1.861–14 and as income equivalent to interest under section 954(c)(1)(E). This treatment is consistent with other sections of the Code in which guaranteed payments for the use of capital are treated similarly to interest. See, for example, §§ 1.469–2(e)(2)(ii) and 1.263A–9(c)(2)(iii). In addition, the fact that a guaranteed payment for the use of capital may be treated as a payment attributable to equity under section 707(c), or that a guaranteed payment for the use of capital is not explicitly included in the definition of interest in § 1.163(j)–1(b)(22), does not preclude applying the same allocation and apportionment rules that apply to interest expense attributable to debt, nor does it preclude treating such payments as “equivalent” to interest under section 954(c)(1)(E). Instead, the relevant statutory provisions under sections 861 and 864, and section 954(c)(1)(E), are clear that the rules can apply to amounts that are similar to interest.

Finally, a rule that would require determining whether the transaction had an abusive motive would be difficult to administer. Therefore, the comment is not adopted.

C. Treatment of Section 818(f) Expenses for Consolidated Groups

Section 818(f)(1) provides that a life insurance company's deduction for life insurance reserves and certain other deductions ("section 818(f) expenses") are treated as items which cannot definitely be allocated to an item or class of gross income. When the life insurance company is a member of an affiliated group of corporations, proposed § 1.861-14(h)(1) provided that section 818(f) expenses are allocated and apportioned on a separate company basis.

One comment argued that the separate company approach was inconsistent with the general rule in section 864(e)(6) that expenses other than interest that are not directly allocable or apportioned to any specific income-producing activity are allocated and apportioned as if all members of the affiliated group were a single corporation. The comment also argued that the separate company approach would encourage consolidated groups to use intercompany transactions, such as related party reinsurance arrangements, to shift their section 818(f) expenses and achieve a more desirable foreign tax credit result. The comment advocated that the regulations instead adopt a single entity approach for life insurance companies that operate businesses and manage assets and liabilities on a group basis (a "life subgroup" approach).

In contrast, another comment argued that the separate company approach adopted in the proposed regulations was consistent with the fact that life insurance companies are regulated with respect to their reserves, investable assets, and capital. The comment, however, acknowledged that a life subgroup approach may be appropriate in certain cases, such as when an affiliated group of life insurance companies manages similar products on a cross-entity, product-line basis, rather than on an entity-by-entity basis. The comment recommended that final regulations provide a one-time election for taxpayers to choose either the separate company or life subgroup approach for allocating and apportioning section 818(f) expenses.

The Treasury Department and the IRS agree that there are merits and drawbacks to both the separate company and the life subgroup approaches and that a one-time election, as suggested by the comments, should be considered. Therefore, the final regulations at § 1.861-14(h) do not include the separate company rule for section 818(f) expenses. The 2020 FTC proposed regulations instead propose a life

subgroup approach as well as a one-time election for taxpayers to choose the separate company approach.

D. Allocation and Apportionment of R&E Expenditures

The 2019 FTC proposed regulations proposed several changes to § 1.861-17, including eliminating the gross income method of apportionment, eliminating the legally-mandated R&E rule, and limiting the class of income to which R&E expenditures could be allocated to gross intangible income reasonably connected with a relevant Standard Industrial Code (SIC) category. In addition, the rule for exclusive apportionment of R&E expenditures was modified by eliminating the possibility of increased exclusive apportionment based on taxpayer-specific facts and circumstances, and by providing that exclusive apportionment applies solely for purposes of section 904.

1. Scope of Gross Intangible Income

Before being revised, § 1.861-17(a) provided that R&E expenditures are related to all income reasonably connected to a broad line of business or SIC code category. The 2019 FTC proposed regulations narrowed and clarified the class of gross income to which R&E expenditures are considered to relate. The 2019 FTC proposed regulations defined the relevant class of gross income as gross intangible income ("GII"), which is defined as all income attributable, in whole or in part, to intangible property, including sales or leases of products or services derived, in whole or in part, from intangible property, income from sales of intangible property, income from platform contribution transactions, royalty income, and amounts taken into account under section 367(d) by reason of a transfer of intangible property. GII does not include dividends or any amounts included in income under section 951, 951A, or 1293.

One comment disagreed with the exclusion from GII of section 951A inclusions. According to this comment, R&E expenditures ultimately benefit foreign subsidiaries such that allocation to income described in section 904(d)(1)(A) (the "section 951A category") is appropriate and should not be treated differently from other taxpayer expenses that reduce income in the section 951A category. Other comments generally supported the exclusion of GILTI and other income inclusions from GII on the grounds that a taxpayer incurring R&E expenditures to develop intangible property should be fully compensated for the value of that intellectual property and,

conversely, the earnings of CFCs should not reflect returns on intellectual property owned by another person.

The Treasury Department and the IRS have determined that GII should continue to exclude GILTI or other inclusions attributable to ownership of stock in a CFC. As described in § 1.861-17(b), R&E expenditures, whether or not ultimately successful, are incurred to produce intangible property. Under the rules of sections 367(d) and 482, the person incurring the R&E expenditures must be compensated at arm's length when such intangible property is licensed, sold, or otherwise gives rise to income of controlled parties, and it is this income that gives rise to GII. In transactions not involving the direct transfer of intangible property to a related party, the section 482 regulations require compensation for the intangible property embedded in the underlying transaction. See generally § 1.482-1(d)(3)(v). For example, § 1.482-3(f) requires that intangible property embedded in tangible property be accounted for when determining the arm's length price for the transaction. Similarly, § 1.482-9(m) requires that intangible property used in a controlled services transaction be accounted for in determining the arm's length price for the transaction.

In contrast to R&E expenditures giving rise to income required by sections 367(d) and 482, subpart F or GILTI inclusions reflect income earned by a CFC and not the taxpayer incurring the R&E expenditures; the fact that such taxpayer is deemed under section 951 or 951A to have income through an inclusion from a CFC licensee does not mean that such income is a result of the R&E expenditures incurred by the taxpayer, assuming that the CFC pays the taxpayer an arm's length price for the transfer of the intangible property or, in the case of an exchange described in sections 351 or 361, the taxpayer reports the required annual income inclusion.² Therefore, including income in the section 951A category in GII would result in a mismatch between the R&E expenditures and the income

² To assist in determining an arm's length price in related party transactions, section 14221 of the TCJA and related technical corrections in the 2018 Consolidated Appropriations Act amended sections 482 and 367(d) to clarify the methods that may be applied to determine the value of intangible property and that the definition of intangible property includes workforce, goodwill and going concern value, or other items the value or potential value of which is not attributable to tangible property or the services of any individual. To the extent the comment reflects a concern that arm's length compensation for intangible property has not always been paid under sections 367(d) and 482, the comment raises issues beyond the scope of this rulemaking.

generated by such expenditures. Although (as noted in a comment) R&E expenditures that are ultimately unsuccessful could be viewed as intended to benefit a taxpayer's foreign subsidiaries more broadly, the Treasury Department and the IRS have determined that the GII earned by the taxpayer provides a reasonable proxy for how the taxpayer expects to recover its R&E costs, and providing separate rules for identifying and attributing unsuccessful R&E expenditures to a broader class of income would be unduly burdensome for taxpayers and difficult for the IRS to administer.

Several comments noted that while income in the section 951A category is excluded from GII, income giving rise to foreign-derived intangible income ("FDII") is included in GII. These comments generally argued that the exclusion from GII of income in the section 951A category and inclusion of amounts included in FDII created a lack of parity between the two provisions even though the methodology and calculations of both are meant to be similar.

The Treasury Department and the IRS disagree with these comments. The allocation and apportionment of R&E expenditures to separate categories for purposes of section 904 as the operative section and the allocation and apportionment of R&E expenditures to FDDEI for purposes of section 250 as the operative section both require identifying the class of income to which the R&E expenditures are attributable. R&E expenditures incurred by a United States shareholder ("U.S. shareholder") are not allocated and apportioned to income in the section 951A category because such income, which relates to an inclusion of income earned by the CFC, is not a return on the U.S. shareholder's R&E expenditures and, thus, is not included in gross intangible income. In contrast, income giving rise to FDII is earned directly by the same taxpayer that incurs R&E expenditures and may include a return on those R&E expenditures. Income that gives rise to FDII is reduced by "the deductions (including taxes) properly allocable to such gross income." See section 250(b)(3)(A)(ii) and § 1.250(b)-1(d)(2). There is no indication that Congress intended to exclude R&E expenditures from that calculation. Furthermore, because expenses incurred by a CFC are allocated and apportioned to income of the CFC for purposes of computing tested income under section 951A(c)(2)(A)(ii), contrary to the suggestion in the comments, R&E expenditures of the CFC are in fact allocated and apportioned to tested

income under § 1.861-17 and reduce the ultimate amount of the taxpayer's GILTI inclusion. Accordingly, the comment is not adopted.

One comment requested modifications to the definition of GII to exclude both acquired intangible property and income from certain platform contribution transactions described in § 1.482-7(b)(1)(ii). According to the comment, income from these items should be excluded from GII because a taxpayer's R&E expenditures could not relate to gross income from intangible property acquired from a different taxpayer (as opposed to developed by the taxpayer), or to gross income from certain platform contributions.

The Treasury Department and the IRS have determined that the comment does not accurately describe the premise on which the R&E allocation and apportionment rules are based. R&E expenditures are not reasonably expected to produce any current income in the taxable year in which the expenditures are incurred, and as the regulations explicitly recognize, the results of R&E expenditures are speculative. Accordingly, R&E expenditures are allocated to a class of currently recognized gross income only because it generally will be the best available proxy for the income that the current expense is reasonably expected to produce in the future. Specifically, although current R&E expense of a taxpayer likely does not directly contribute to gross intangible income currently recognized, it is reasonable to expect that R&E will contribute to GII earned by the taxpayer group in the future. The definition of GII is not intended to require a strict factual connection between the R&E expenditure and GII earned in the taxable year, but merely that the expenditures be "reasonably connected" with a class of income. The Treasury Department and the IRS have also determined that requiring the comment's suggested level of explicit factual connection between R&E expenditures and GII would outweigh the administrative benefit and ease of broadly defining GII. Moreover, in cases in which a taxpayer has a valid cost sharing agreement, even though R&E expenditures may be allocated to PCT payments, those expenses are generally apportioned based on sales by the taxpayer or other entities reasonably expected to benefit from current research and experimentation. This ensures that R&E expenditures offset the categories of income included in GII that are expected to benefit from those

expenditures. Accordingly, the comment is not adopted.

One comment requested clarification of the definition of GII and specifically that the final regulations provide that the services income included in GII does not include gross income allocated to or from a foreign branch under § 1.904-4(f)(2)(vi) by reason of a disregarded payment for services performed by or for the foreign branch that contribute to earning GII of the taxpayer.

Under § 1.904-4(f)(2)(vi)(B), a disregarded payment from a foreign branch owner to its foreign branch to compensate the foreign branch for the provision of contract R&E services that, if regarded, would be allocable to general category gross intangible income attributable to the foreign branch owner under the principles of §§ 1.861-8 through 1.861-17, would cause the general category GII attributable to the foreign branch owner to be adjusted downward and the GII attributable to the foreign branch and included in foreign branch category income to be adjusted upward. Although a disregarded payment for R&E services does not give rise to gross income for Federal income tax purposes and so does not in and of itself constitute GII, to the extent the disregarded payment results in the reattribution of regarded gross income that is GII from the general category to the foreign branch category (or vice versa), that income is treated as GII in the foreign branch category (or the general category). The final regulations at § 1.861-17(b)(2) clarify that although GII does not include disregarded payments, certain disregarded payments that would be allocable to GII if regarded may result in the reassignment of GII from the general category to the foreign branch category or vice versa. Part II.D.6 of this Summary of Comments and Explanation of Revisions further describes comments regarding R&E expenditures and foreign branches.

One comment sought clarification regarding the portion of product sales derived from intangible property that would be considered GII. The final regulations at § 1.861-17(b)(2) clarify that GII includes the full amount of gross income from sales or leases of products or services, if the income is derived in whole or in part from intangible property. Under the definition of GII, there is no bifurcation or splitting of sales income between a portion attributable to intangible property and other amounts such as distribution or marketing functions. Additionally, the definition of GII has been modified to more clearly delineate between amounts from sales or leases of

products derived from intangible property versus sales or licenses of intangible property itself.

2. Allocation of R&E Expenditures

One comment requested modifications to the general rule that allocates R&E expenditures to GII that is reasonably connected with one or more relevant SIC code categories. The comment noted that in some cases, taxpayers are restricted by law or contract from exploiting research, with the result that the research would only generate income in a particular statutory grouping after several years from the date of the contract. Accordingly, the comment requested that such R&E expenditures be allocated to the statutory or residual grouping of income within GII that corresponds to the market restrictions on the use of the R&E. Alternatively, the comment requested that taxpayers be provided with the option to allocate R&E expenditures in a manner consistent with the taxpayer's books and records to the extent there is a clear factual relationship between the expenditures and a particular category of income.

The Treasury Department and the IRS have determined that it is inappropriate to provide exceptions to the general rule that R&E expenditures are allocated to GII reasonably connected with one or more relevant SIC code categories. The two approaches suggested by the comment are premised on a goal of seeking to "trace" R&E expenditures to the actual income that they are expected to produce in the future. However, as discussed in Part II.D.1 of this Summary of Comments and Explanation of Revisions, R&E expenditures are not reasonably expected to produce any current income in the taxable year in which the expenditures are incurred, and the regulations recognize that the results of R&E expenditures are speculative. Instead, § 1.861-17 relies on the use of current year sales as a proxy for the income that the expenses are reasonably expected to produce in the future, in recognition of the fact that it is difficult to ascertain the composition of future income that would be generated from R&E expenditures. This approach generally already takes into account the types of market or legal restrictions described by the comment—to the extent that a taxpayer's sales of products in the same SIC code category are generally restricted to a particular market, these restrictions will be reflected in its sales and therefore are already taken into account under the sales method provided in proposed § 1.861-17. Moreover, rules that specially allocate

particular R&E expenditures based on the reasonableness of speculative expectations about sales that may or may not actually arise several years in the future would be very difficult for taxpayers to comply with and for the IRS to administer.

Finally, allowing taxpayers to elect the use of a books-and-records method to allocate R&E expenditures to less than all of a taxpayer's GII would lead to inappropriate results, as taxpayers would only elect such option if the additional information reflected in the taxpayer's books and records improved the tax result; in contrast, the IRS would not have any such information available to it if the taxpayer chose not to make the election. Since this information would generally be in the form of predictions about future income streams, an elective books-and-records rule would create administrability concerns for the IRS, which would have substantial difficulty verifying whether the predictions were reasonable. Accordingly, the comments are not adopted.

One comment recommended that the Treasury Department and the IRS reconsider the elimination of the "legally mandated R&E" rule from the 2019 FTC proposed regulations, noting that the rule seemed to be required by section 864(g)(1)(A). As explained in the preamble to the 2019 FTC proposed regulations, the legally mandated R&E rule was eliminated in light of changes to the international business environment and to simplify the regulations, and the comment does not argue the change is inappropriate. Additionally, the comment misstates the application of section 864(g)(1)(A), which is not applicable to the taxable years to which the final regulations apply. See section 864(g)(6). Accordingly, the comment is not adopted.

One comment sought clarification on the allocation of R&E expenditures where research is conducted with respect to more than one SIC code category. The comment noted that the current final regulations at § 1.861-17(a)(2)(iii) mention two digit SIC code categories, or Major Groups in the terminology of the SIC Manual, yet the 2019 FTC proposed regulations omitted references to two digit SIC codes.

The Treasury Department and the IRS have determined that it is appropriate to aggregate some or all three digit SIC categories within the same Major Group, but it is inappropriate to aggregate any three digit SIC categories within different Major Groups. While R&E expenditures are speculative, it is not reasonable to expect R&E conducted for

one broad line of business to benefit an unrelated line of business and, therefore, the allocation and apportionment of expenses should not be determined by aggregating different Major Groups. For example, if a taxpayer engages in both the manufacturing and assembling of cars and trucks (SIC code 371) it may aggregate that category with another three digit category in Major Group 37, which includes six other three digit categories (for example, aircraft and parts (SIC code 372) or railroad equipment (SIC code 374)), but taxpayers may not aggregate a three digit SIC code from a Major Group with another three digit SIC code from a different Major Group, except as provided in § 1.861-17(b)(3)(iv) (requiring aggregation of R&E expenditures related to sales-related activities with the most closely related three digit SIC code, other than those within the wholesale and retail trade divisions, if the taxpayer conducts material non-sales-related activities with respect to a particular SIC code). The final regulations are modified accordingly.

3. Exclusive Apportionment of R&E Expenditures

i. Computation of FDII

Several comments argued that if the Treasury Department and the IRS determine that GII should include amounts giving rise to FDII, then the rule in the 2019 FTC proposed regulations in § 1.861-17(c), which limits exclusive apportionment of R&E expenditures solely for purposes of applying section 904 as the operative section, should be revised to also allow for exclusive apportionment for purposes of calculating a taxpayer's FDII deduction. The comments generally argued that the exclusive apportionment provision be applied such that 50 percent of a taxpayer's R&E expenditures should be apportioned to income that is not foreign derived deduction eligible income ("FDDEI") provided that at least 50 percent of the taxpayer's research activities are conducted in the United States. Comments argued that such an exclusive apportionment rule would encourage R&E activity in the United States, consistent with the general intent of the TCJA to eliminate tax incentives for shifting activity and intellectual property overseas. Additionally, comments asserted that R&E expenditures provide greater value to the location where R&E is performed and that there is a technology "lag"

before successful products are exported to foreign markets.

The Treasury Department and the IRS have determined that it is not appropriate to apply an exclusive apportionment rule for purposes of computing FDII. As discussed in Part II.D.1 of this Summary of Comments and Explanation of Revisions, R&E expenditures are not reasonably expected to produce any current income in the taxable year in which the expenditures are incurred, and the regulations explicitly recognize that the results of R&E expenditures are speculative. Furthermore, to the extent there is consistently a “lag” before a taxpayer’s successful products are exported to foreign markets, then such lag should generally be reflected in current year sales of newly successful products (which relate to R&E incurred in prior taxable years) being weighted towards domestic markets. Therefore, the rules’ use of current year sales as a proxy for the income that the expense is reasonably expected to produce in the future already takes into account to some extent the potential for a “lag” between exploiting intangible property in the domestic market versus foreign markets.

In addition, the Treasury Department and the IRS have determined that nothing in the text of the TCJA or its legislative history suggests that Congress intended that existing rules on allocation and apportionment of R&E expenditures be modified in a way to create particular incentives. Section 250(b)(3) requires determining the deductions that are “properly allocable” to deduction eligible income, and § 1.250(b)–1(d)(2) confirms that the general rules under § 1.861–17 apply for purposes of allocating and apportioning R&E expenditures to deduction eligible income and FDDEI. Nothing in the statute or legislative history suggests that any alternative allocation and apportionment rule should apply. Furthermore, adopting an R&E allocation and apportionment rule solely for purposes of increasing the amount of the FDII deduction to incentivize R&E activity (whether or not such expenditures were “properly” allocable to non-FDDEI income) would be inconsistent with the United States’ position, including as stated in forums such as the OECD’s Forum on Harmful Tax Practices, that the FDII regime is not intended to provide a tax inducement to shifting activities or income, but is intended to neutralize the effect of providing a lower U.S. effective tax rate with respect to the active earnings of a CFC of a domestic corporation (through a deduction for GILTI) by also providing

a lower effective U.S. tax rate with respect to FDII earned directly by the domestic corporation. Such parity is generally furthered by ensuring that R&E expenditures incurred by a domestic corporation are allocated and apportioned to FDII in the same manner as R&E expenditures incurred by a CFC are allocated and apportioned to tested income that gives rise to GILTI.

Therefore, the final regulations provide that the exclusive apportionment rule is limited to section 904 as the operative section.

ii. Increased Exclusive Apportionment

Two comments recommended reinstating the rule allowing for an increased exclusive apportionment of R&E expenditures. Under the increased exclusive apportionment rule, a taxpayer may establish to the satisfaction of the Commissioner that an even greater amount of R&E expenditures should be exclusively apportioned. One comment indicated that there may be circumstances where an even greater amount of R&E expenditures should be apportioned, such as following the termination of a cost sharing arrangement (“CSA”). Another comment pointed out that the 2019 FTC proposed regulations reduce taxpayer options by eliminating both increased exclusive apportionment and the gross income method.

The Treasury Department and the IRS have determined that a rule allowing for increased exclusive apportionment is not warranted. The facts and circumstances nature of the determination that would be required and the potential for disputes outweigh the benefits of affording taxpayers additional flexibility in rare or unusual cases. Additionally, to the extent that there is a tendency to exploit intellectual property in the same market where the taxpayer conducts R&E, this will already be reflected in current sales, as those in part reflect the results of recently-developed intellectual property. Accordingly, this comment is not adopted.

iii. Mandatory Application of Exclusive Apportionment

Two comments generally objected to the required application of exclusive apportionment for purposes of section 904. According to the comments, in certain situations where a taxpayer has insufficient domestic source gross income to absorb the apportioned R&E expenditures, the resulting overall domestic loss (“ODL”) would reduce foreign source income in each separate category described in § 1.904–5(a)(4)(v), including the section 951A and foreign

branch categories, reducing the taxpayer’s ability to claim foreign tax credits. The comments recommended that taxpayers either be allowed to elect out of exclusive apportionment or alternatively that it be applied in an amount less than 50 percent of the taxpayer’s R&E expenditures. One comment alternatively recommended a modification to the ODL and R&E expenditure rules such that the majority of the amounts otherwise subjected to exclusive apportionment would instead be allocated to income in the general category rather than the section 951A or foreign branch categories.

The TCJA did not modify the operation of section 904(f) or (g) with respect to the section 951A or foreign branch categories, nor is there any indication in the TCJA or legislative history that Congress intended the rules under section 904(f) and (g), or the allocation and apportionment rules under section 861, to apply differently in connection with section 951A or foreign branch category income. To the extent an ODL account is created as the result of a domestic loss offsetting foreign source income in the section 951A or foreign branch category under section 904(f)(5)(D), this reduction is reversed in later years through the recapture provisions in section 904(g)(3), when U.S. source income is recharacterized as foreign source income in the separate categories that were offset by the ODL. Additionally, the Treasury Department and the IRS have determined that the consistent application of the exclusive apportionment rule for purposes of section 904 promotes simplicity and certainty, whereas an optional rule would be more difficult to administer. Accordingly, these comments are not adopted.

4. Elimination of the Gross Income Method

Several comments requested that the gross income method for apportioning R&E expenditures be retained. In general, these comments recommended allowing taxpayers to choose either the gross income method or the sales method rather than being required to utilize only the sales method, including by allowing taxpayers to choose one method for certain operative sections and another method for other operative sections. Some comments asserted that the mandatory use of the sales method would inappropriately allocate and apportion more R&E expenditures to FDDEI than under the gross income method in cases where U.S. taxpayers license their intellectual property for foreign use but sell products directly to

U.S. customers. One comment argued that the sales method could be distortive in certain situations where a taxpayer licenses its intellectual property to entities whose sales are at least partially attributable to self-developed intellectual property. Another comment argued that where a taxpayer's primary type of GII is royalty income, it will be difficult to apportion R&E based on sales numbers and that therefore the gross income method should be maintained.

The Treasury Department and the IRS have determined that, on balance, the sales method results in substantially fewer distortions than the gross income method. Before being modified by these final regulations, taxpayers were permitted to apportion R&E expenditures under either a gross income or sales method. The Explanation of Provisions in the 2019 FTC proposed regulations explained that the gross income method could produce inappropriate, distortive results in certain cases. In particular, distortions could arise because the gross income method looks only to gross income earned directly by the taxpayer. Gross income that is earned by the taxpayer and that is attributable to one grouping (such as U.S. source income) may reflect value unrelated to intangible property, for example gross income from sales that reflect value from marketing or distribution activities of the taxpayer, whereas gross income of such taxpayer that is attributable to another grouping (such as foreign source income) may exclude such non-IP related value due, for example, to the fact that such gross income is earned solely from licensing intangible property to a related party without the performance of any marketing or distribution activities. The distortions arise both because gross income reflects a reduction of gross receipts for cost of goods sold but not for related deductible expenses, and also because the gross income method does not distinguish between gross income earned from customers (for which the gross income generally captures all of the value related to the product or service arising from the IP) versus from related parties (for which gross income generally only captures an intermediate portion of the value of the relevant product or service, which will generally be enhanced by the related party).

In contrast, the sales method provides a consistent, reliable method with fewer distortions than the gross income method. In particular, the sales method focuses on the gross receipts from sales of a product to final customers. This approach is more likely to achieve

consistent results in the case of the same or similar final products, and thereby allows for a consistent comparison of value derived from intangible property with respect to each grouping. That is the case regardless of whether the taxpayer chooses to license its intangible property to other persons (including related parties) for purposes of manufacturing final products, or the taxpayer manufactures products itself, and regardless of whether other persons enhance the product with additional value attributable to other intangible property. Therefore, the sales method ensures that differences in supply chain structures do not alter the nature of how R&E expenditures are allocated and apportioned.

Alternatively, some comments recommended modifying the gross income method. One comment recommended modifying the gross income method to more accurately match income to related R&E expenditures by using only gross income that is attributable to the intangible property owned by the taxpayer. However, the Treasury Department and the IRS have determined that it would lead to complexity for taxpayers and administrative burdens for the IRS to seek to accurately determine the share of gross income that is attributable to intangible property when the intangible property is embedded in a final product. In addition, such a rule would be unlikely to result in significantly different results than under the sales method, because the ratio of gross income among groupings that is attributable solely to intangible property is likely to be broadly similar to the ratio of gross receipts from sales within those groupings, since the intangible component of gross income from sales is likely to be determined as a fraction of gross receipts, and such fraction would generally be the same for each grouping.

One comment argued that the gross income method must be included in the final regulations because it is statutorily required under section 864(g)(1). However, section 864(g) is not applicable to the taxable years covered by the final regulations. See section 864(g)(6). Therefore, the comment is not adopted.

Finally, one comment recommended allowing taxpayers to use the gross income method if using the sales method would otherwise cause the taxpayer to have an ODL. The Treasury Department and the IRS have determined that it would be inappropriate to allow for the targeted application of a method solely for the purpose of avoiding the ODL rules,

which are statutorily mandated. The regulations under section 861, including § 1.861-17, are premised on associating deductions in as accurate and reasonable a manner as possible with the income to which such deductions relate. It is inconsistent with this overall policy of relating deductions to the relevant income to revise the regulations under section 861 simply to achieve a specific result under an operative section. Accordingly, the final regulations eliminate the gross income method.

5. Application of Sales Method

The 2019 FTC proposed regulations retained the rule in the prior final regulations which provides that for apportionment purposes, the sales method includes certain gross receipts of related and unrelated entities that are reasonably expected to benefit from the taxpayer's R&E expenditures, but does not include the receipts of entities that have entered into a valid CSA with the taxpayer. The 2019 FTC proposed regulations made limited changes to the sales method as it existed under the prior final regulations.

One comment requested guidance on the application of the sales method in the context of foreign branch category income; this comment is discussed in Part II.D.6 of this Summary of Comments and Explanation of Revisions.

Two comments asked for a modification to the treatment of controlled entities that terminate an existing CSA with a taxpayer. Under the sales method, gross receipts from sales of products or the provision of services within a relevant SIC code category by controlled parties of the taxpayer are taken into account when apportioning the taxpayer's R&E expenditures if the controlled party is reasonably expected to benefit from the taxpayer's research and experimentation. Under proposed § 1.861-17(d)(4)(iv), the sales of controlled parties that enter into a valid CSA with a taxpayer are generally excluded from the apportionment formula because the controlled party is not expected to benefit from the taxpayer's R&E expenditures. The comments argued that when a CSA is terminated and a taxpayer licenses newly-developed intangibles to a controlled party, all gross receipts from the controlled party are included in the apportionment formula, even though for some post-termination period the controlled party may benefit more from intangibles created by its own R&E expenditures incurred under the previously-existing CSA rather than from the newly-developed and licensed

intangibles. The comments recommended varying adjustments, including rules specific to CSA terminations or alternatively more generalized adjustments such as the retention of the increased exclusive apportionment rule or the gross income method.

The Treasury Department and the IRS disagree with the comments' characterization of § 1.861–17 as seeking directly to match R&E expenditures with the income that such expenditures generate. According to the comments, following a CSA termination with a controlled party, a taxpayer's current R&E expenditures should not offset the controlled party's royalty payment to the taxpayer because the controlled party's gross receipts would be attributable to the intangibles funded by the controlled party during the period the CSA existed. This assertion assumes that current sales are used to apportion R&E expenditures because they result from a taxpayer's current or recent research and, therefore, it is inappropriate to include gross receipts attributable to the research of a different taxpayer. The regulations, however, are based in part on the acknowledgement that R&E is a speculative, forward-looking activity that often does not result in income or sales in the current year, or even in future years. As discussed in Part II.D.2 of this Summary of Comments and Explanation of Revisions, current sales are nevertheless used because they generally will be the best available proxy for the income R&E expenditures are expected to produce in future years. Accordingly, once a CSA is terminated, it is appropriate to include the sales of a controlled party that previously participated in a CSA if that controlled party is reasonably expected to benefit from the taxpayer's current R&E expenditures to generate future sales. Additionally, the Treasury Department and the IRS have determined that attempting to distinguish between the sales attributable to the controlled party's intangible property and those attributable to intangible property licensed from the taxpayer is generally difficult and uncertain and may often lead to disputes, making such a rule difficult for taxpayers to comply with and burdensome for the IRS to administer. Because those concerns also exist when a taxpayer and a controlled party enter into a CSA, the final regulations also do not adopt comments requesting such a rule in that context. Furthermore, the Treasury Department and the IRS have determined that the tax consequences of terminating a CSA

may vary depending on the facts and circumstances and are considering whether it would be appropriate to provide special rules for these transactions, and thus it would not be appropriate to provide special rules in connection with § 1.861–17 until these transactions have undergone further study. Therefore, the comments are not adopted.

Finally, several comments requested a modification to the rule in proposed § 1.861–17(d)(3) and (4) providing that if a taxpayer has previously licensed, sold, or transferred intangible property related to a SIC code category to a controlled or uncontrolled party, then the taxpayer is presumed to expect to do so with respect to all future intangible property related to the same SIC code category. The comments argued that the 2019 FTC proposed regulations' use of the term "presumption" suggested that taxpayers would be unable to rebut the presumption in appropriate cases. In response to the comments, the final regulations clarify that taxpayers may rebut the presumption by demonstrating that prior exploitation of the taxpayer's intangible property is inconsistent with reasonable future expectations.

In addition, the final regulations make other revisions to the sales method. First, the final regulations specify under what circumstances the sales or services of uncontrolled or controlled parties are taken into account. In particular, the final regulations specify that the gross receipts are taken into account if the uncontrolled or controlled party is expected to acquire (through license, sale, or transfer) intangible property arising from the taxpayer's current R&E expenditures, products in which such intangible property is embedded or used in connection with the manufacture or sale of such products, or services that incorporate or benefit from such intangible property. Second, the final regulations revise § 1.861–17(d)(4) to refer to sales by controlled parties (which is defined as any person that is related to the taxpayer), rather than controlled corporations, to clarify that, for example, sales made by a controlled partnership that is reasonably expected to license intangible property from the taxpayer are fully taken into account under the sales method. Finally, the final regulations revise § 1.861–17(f)(3) to provide that if a partnership incurs R&E expenditures (and is not also an uncontrolled party or controlled party described in § 1.861–17(d)(3) or (4)) and makes related sales, then those sales are considered made by the partners in proportion to their distributive shares of gross income attributable to the sales.

6. Foreign Branch Category Income and R&E Expenditures

Two comments addressed the interaction of § 1.861–17 and foreign branch category income. One comment requested that a portion of sales earned by a foreign branch should be attributed to the general category for purposes of apportioning R&E expenditures in circumstances where a foreign branch utilizes intellectual property of the foreign branch owner to earn GII and pays a disregarded royalty to its U.S. owner. Under § 1.904–4(f)(2)(vi)(A), the amount of foreign branch category income would be adjusted downward and the foreign branch owner's general category income would be adjusted upward by the amount of the disregarded royalty. According to the comment, after exclusive apportionment (as applicable), the 2019 FTC proposed regulations would apportion entirely to foreign branch category income the remaining R&E expense, which should instead be apportioned to the general category income originally attributable to the GII of the foreign branch that was reassigned by reason of the disregarded royalty.

The Treasury Department and the IRS have determined that the 2019 FTC proposed regulations, in combination with § 1.904–4(f)(2)(vi), already operate in the manner requested by the comment. Under proposed § 1.861–17(d)(1)(iii), gross receipts are assigned to the statutory grouping (or groupings) or residual grouping to which the GII related to the sale, lease, or service is assigned. Adjustments to the amounts of gross income attributable to a foreign branch by reason of disregarded payments change the separate category grouping to which the gross income is assigned, but do not change the total amount, character, or source of a United States person's gross income. See § 1.904–4(f)(2)(vi)(A). After application of § 1.904–4(f)(2)(vi), GII related to the foreign branch's sales is assigned to the general category in the amount of the disregarded royalty payment, and only the balance of the GII is assigned to the foreign branch category. Accordingly, a proportionate amount of the gross receipts from sales made by the foreign branch to which a disregarded royalty payment would be allocable is assigned to the general and foreign branch categories in the same ratio as the disregarded royalty payment bears to the gross income attributable to the sales. The final regulations in § 1.861–17(d)(1)(iii) clarify that the assignment of gross receipts occurs after gross income in the separate categories is adjusted under § 1.904–4(f)(2)(vi) and

clarify through an example the formula used to reassign gross receipts as a result of a disregarded reallocation transaction. See § 1.861–17(g)(6) (*Example 6*).

The second comment requested changes to the treatment of foreign branches that provide contract R&E services for the benefit of the foreign branch owner. According to the comment, when disregarded payments made by the foreign branch owner in respect of the provision of contract R&E services by a foreign branch cause GII to be reallocated to the foreign branch, R&E expenditures incurred by the foreign branch owner may be apportioned to foreign branch category income in a manner inconsistent with the economics of the branch's activities as a services provider, creating disparate tax results compared to those that would obtain if the services were performed by a CFC. The comment suggested that the foreign branch's regarded costs of providing the research services that give rise to the disregarded payment from the foreign branch owner should reduce the amount of GII that was assigned to the foreign branch category, or more generally that GII should not be assigned to the foreign branch category by reason of disregarded payments for research services.

The Treasury Department and the IRS agree that R&E expenditures, including deductible expenses for the foreign branch's costs in providing research services to the foreign branch owner, may be apportioned to foreign branch category income that is GII, including GII that is treated as attributable to the foreign branch category under § 1.904–4(f)(2)(vi) by reason of disregarded payments from the foreign branch owner compensating the foreign branch for its research services that will generate GII for the foreign branch owner, and that the apportionment is based upon gross receipts assigned to the statutory groupings. However, as noted in § 1.904–4(f)(2)(vi)(A), the reattribution of gross income between the general and foreign branch categories by reason of disregarded payments cannot change the character of a taxpayer's realized gross income. The Treasury Department and the IRS have determined that the different characterization of services income earned by a CFC, which may not be GII, and sales income reflecting GII that is attributed to a foreign branch by reason of disregarded payments for services, results from the Federal income tax treatment of disregarded payments, which do not give rise to gross income, and that it is not appropriate effectively

to override the characterization of gross income by modifying the rules for allocating and apportioning recognized R&E expenditures. Accordingly, the comment is not adopted.

7. Contract Research Arrangements

In the Explanation of Provisions in the 2019 FTC proposed regulations, the Treasury Department and the IRS requested comments on whether contract research arrangements involving expenditures that are reimbursed by a foreign affiliate are generally paid or incurred by a U.S. taxpayer such that a deduction under section 174 would be allowable for such expenditures, and whether any special rules for such arrangements should be considered. Generally, the comments received stated that where contract research is performed in the United States and is connected with a U.S.-based multinational's trade or business, a deduction under section 174, rather than section 162, may be appropriate.

The Treasury Department and the IRS have determined that it is beyond the scope of the final regulations to determine whether contract research expenses are, or are not, eligible to be deducted under either section 162 or 174.

8. Amended Returns and Applicability Dates

One comment requested clarification of the applicability date provisions of the § 1.861–17 portion of the 2019 FTC proposed regulations. The comment noted that it was unclear whether a taxpayer that originally elected to apply the gross income method on its 2018 tax return would be eligible to amend its 2018 tax return to apply the sales method. The 2019 FTC final regulations included a provision addressing the binding election contained in former § 1.861–17(e)(1). Under this provision, as modified in the 2019 FTC final regulations at § 1.861–17(e)(3), taxpayers otherwise subject to the binding election were permitted to change their election. On May 15, 2020, correcting amendments to the 2019 FTC final regulations were issued in 85 FR 29323. These amendments make clear that the change in method can occur on an original or an amended return. See also Part VII of this Summary of Comments and Explanation of Revisions for a discussion of the ability for taxpayers to rely on the proposed or final versions of § 1.861–17 for taxable years before the years in which the final regulations are applicable. Accordingly, changes to the applicability date provisions are not necessary in response to this comment.

Finally, one comment requested that the applicability of the regulations under section 250 be deferred until after § 1.861–17 is finalized. Because the applicability of the regulations under section 250 has been deferred until taxable years beginning on or after January 1, 2021, which is consistent with the applicability date of § 1.861–17, the comment is moot. See § 1.250–1(b).

E. Application of Section 904(b) to Net Operating Losses

Proposed § 1.904(b)–3(d)(2) contained a coordination rule providing that for purposes of determining the source and separate category of a net operating loss, the separate limitation loss and overall foreign loss rules of section 904(f) and the overall domestic loss rules of section 904(g) are applied without taking into account the adjustments required under section 904(b). No comments were received on this provision, which is finalized without change.

One comment requested that the final regulations include a rule switching off the application of section 904(b)(4) with respect to pre-2018 U.S. source NOLs that offset foreign source income and created ODL accounts in pre-2018 taxable years, because in certain cases the increase in the denominator of the foreign tax credit limitation fraction required by section 904(b)(4) could limit the utilization of foreign tax credits that would otherwise be allowed by reason of the recapture of the ODL.

Nothing in section 904(b)(4) allows for the rule to be applied differently in cases when a taxpayer recaptures a pre-2018 ODL versus a post-2017 ODL or has no ODL recapture at all. Instead, the adjustments required by section 904(b)(4) apply in all taxable years beginning after 2017. Therefore, the comment is not adopted.

III. Conduit Financing Rules Under § 1.881–3 To Address Hybrid Instruments

A. Overview

The conduit financing regulations in § 1.881–3 allow the IRS to disregard the participation of one or more intermediate entities in a “financing arrangement” where such entities are acting as conduit entities, and to recharacterize the financing arrangement as a transaction directly between the remaining parties for purposes of imposing tax under sections 871, 881, 1441 and 1442. In general, a financing arrangement exists when through a series of transactions one person advances money or other property (the financing entity), another

person receives money or other property (the financed entity), the advance and receipt are effected through one or more other persons (intermediate entities), and there are “financing transactions” linking each of those parties. See § 1.881–3(a)(2)(i). An instrument that for U.S. tax purposes is stock (or a similar interest, such as an interest in a partnership) is not a financing transaction under the existing conduit financing regulations, unless it is “redeemable equity” or is otherwise described in § 1.881–3(a)(2)(ii)(B)(1).

The 2020 hybrids proposed regulations expanded the definition of a financing transaction, such that an instrument that for U.S. tax purposes is stock or a similar interest is a financing transaction if: (i) Under the tax law of a foreign country where the issuer is a tax resident or has a taxable presence, such as a permanent establishment, the issuer is allowed a deduction or another tax benefit, including a deduction with respect to equity, for an amount paid, accrued, or distributed with respect to the instrument; or (ii) under the issuer’s tax laws, a person related to the issuer is entitled to a refund, including a credit, or similar tax benefit for taxes paid by the issuer upon a payment, accrual, or distribution with respect to the equity interest and without regard to the related person’s tax liability in the issuer’s jurisdiction. See proposed § 1.881–3(a)(2)(ii)(B)(1)(iv) and (v). The 2020 hybrids proposed regulations relating to conduit financing arrangements were proposed to apply to payments made on or after the date that final regulations are published in the **Federal Register**.

B. Scope of Instruments Treated as Financing Transactions

A comment agreed that a financing transaction should include an instrument that is stock or a similar interest for U.S. tax purposes but debt under the tax law of the issuer’s country because, according to the comment, cases of potential conduit abuse are likely to involve “classic” hybrid instruments not covered by the types of equity described in § 1.881–3(a)(2)(ii)(B)(1). However, the comment recommended that an instrument that is equity for purposes of both U.S. tax law and the issuer’s tax law not be treated as a financing transaction, except in limited circumstances, such as if the instrument is issued by a special purpose company formed to facilitate the avoidance of tax under section 881 and the instrument gives rise to a notional deduction or a refund or credit to a related person. According to the comment, the proposed rule that treated

an instrument that is equity for both U.S. and foreign tax purposes as a financing transaction was overbroad—as it could deem an operating company to have entered into a financing transaction simply because foreign tax law provides for notional interest deductions or a similar regime of general applicability—or was unclear or vague in certain cases.

If the final regulations were to retain the proposed rules treating other types of equity instruments as financing transactions, the comment requested several clarifications, modifications, and limitations with respect to the rules. These included: (i) Treating an instrument that is equity in a partnership for U.S. tax purposes and under the issuer’s tax law as a financing transaction only if the partnership is a hybrid entity that claims treaty benefits; (ii) either eliminating or clarifying the rule providing that an instrument can be a financing transaction by reason of generating tax benefits in a jurisdiction where the issuer has a permanent establishment; and (iii) modifying the applicability date for payments under existing financing arrangements.

Consistent with the comment, the final regulations adopt without substantive change the rule that included as a financing transaction an instrument that is stock or a similar interest (including an interest in a partnership) for U.S. tax purposes but debt under the tax law of the country of which the issuer is a tax resident. See § 1.881–3(a)(2)(ii)(B)(1)(iv). In addition, the final regulations provide that if the issuer is not a tax resident of any country, such as an entity treated as a partnership under foreign tax law, the instrument is a financing transaction if the instrument is debt under the tax law of the country where the issuer is created, organized, or otherwise established. See id.

The final regulations do not include the rules under the 2020 hybrids proposed regulations that treated as a financing transaction an instrument that is stock or a similar interest for U.S. tax purposes but gives rise to notional interest deductions or other tax benefits (such as a deduction or credit allowed to a related person) under foreign tax law. The Treasury Department and the IRS plan to finalize those rules separately, in order to allow additional time to consider the comments received. In addition, the Treasury Department and the IRS are continuing to study instruments that generate tax benefits in the jurisdiction where the issuer has a permanent establishment and may address these instruments in future guidance.

IV. Foreign Tax Credit Limitation Under Section 904

A. Definition of Financial Services Entity

In order to promote simplification and greater consistency with other Code provisions that have complementary policy objectives, § 1.904–4(e)(2) of the 2019 FTC proposed regulations proposed to define a financial services entity as an individual or a corporation “predominantly engaged in the active conduct of a banking, insurance, financing, or similar business,” and proposed to define financial services income as “income derived in the active conduct of a banking, insurance, financing, or similar business.” These modified definitions are generally consistent with sections 954(h), 1297(b)(2)(B), and 953(e); the 2019 FTC proposed regulations also included conforming changes to the rules for affiliated groups in proposed § 1.904–4(e)(2)(ii) and partnerships in proposed § 1.904–4(e)(2)(i)(C).

Comments stated that the 2019 FTC proposed regulations increased uncertainty and resulted in the disqualification of certain banks or insurance companies that would qualify as financial services entities under the existing final regulations. Comments also suggested that it was inappropriate to seek to align the relevant definitions in section 904 with those in section 954 because of the differing policies and scope of the two rules. Comments suggested various modifications to more closely align the revisions with the existing approach under § 1.904–4(e), or in the alternative, withdrawing the proposed rules entirely.

The Treasury Department and the IRS have determined that revisions to the financial services entity rules in § 1.904–4(e) continue to be necessary in light of statutory changes made in 2004 (under the American Jobs Creation Act of 2004, Pub. L. 108–357) and the changes to the look-through rules in § 1.904–5 in the 2019 FTC final regulations, which were precipitated by the revisions to section 904(d) under the TCJA. However, the Treasury Department and the IRS have determined the changes to § 1.904–4(e) should be repropoed to allow further opportunity for comment. Therefore, the 2020 FTC proposed regulations contain new proposed regulations under § 1.904–4(e), as well as a delayed applicability date. See Part IX.B. of the Explanation of Provisions in the 2020 FTC proposed regulations.

B. Allocation and Apportionment of Foreign Income Taxes

Proposed § 1.861–20 provided detailed guidance on how to match foreign income taxes with income, particularly in the case of differences in how U.S. and foreign law compute taxable income with respect to the same transactions. Proposed § 1.861–20(c) provided that foreign tax expense is allocated and apportioned among the statutory and residual groupings by first assigning the items of gross income under foreign law (“foreign gross income”) on which a foreign tax is imposed to a grouping, then allocating and apportioning deductions under foreign law to that income, and finally allocating and apportioning the foreign tax among the groupings. See proposed § 1.861–20(c).

Proposed § 1.861–20(d)(2)(ii)(B) provided that if a taxpayer recognizes an item of foreign gross income that is attributable to a base difference, then the item of foreign gross income is assigned to the residual grouping, with the result that no credit is allowed if the tax on that item is paid by a CFC. The proposed regulations provided an exclusive list of items that are excluded from U.S. gross income and that, if taxable under foreign law, are treated as base differences.

Several comments requested that distributions described in sections 301(c)(2) and 733, representing nontaxable returns of capital, be removed from the list of base differences on the grounds that foreign tax on such distributions is more likely to result from timing differences. Some comments argued that the foreign law characterization of the distribution should govern the determination of the income group to which the foreign tax is allocated. Other comments suggested that foreign tax on return of capital distributions should be associated with passive category capital gains, because by reducing basis such distributions may increase the amount of capital gain recognized for U.S. tax purposes in the future.

The purpose of the rules in § 1.861–20, as well as § 1.904–6, is to allocate and apportion foreign income taxes to groupings of income determined under Federal income tax law, and the final regulations at § 1.861–20(d)(1), consistent with the approach in former § 1.904–6, provide that Federal income tax law applies to characterize foreign gross income and assign it to a grouping. Characterizing items solely based on foreign law, with no comparison to the U.S. tax base, would altogether eliminate base differences, which are

expressly referenced in section 904(d)(2)(H)(i).

However, the Treasury Department and the IRS have determined that in most cases, a foreign tax imposed on distributions described in sections 301(c)(2) and 733 is likely to represent tax on earnings and profits of the distributing entity that are accounted for at different times under U.S. and foreign tax law, such as earnings of a hybrid partnership, earnings that are accelerated and subsequently eliminated for U.S. tax purposes by reason of a section 338 election, or earnings and profits of lower-tier entities, rather than tax on amounts that are permanently excluded from the U.S. tax base. Although in some cases involving net basis foreign income taxes imposed at the shareholder level, distributions described in sections 301(c)(2) and 733 may reflect a timing difference in the recognition of unrealized gain with respect to the equity of the distributing entity, the Treasury Department and the IRS have determined that these situations are less likely to occur than timing differences in the recognition of earnings subject to withholding taxes because of the prevalence of foreign participation exemption regimes. Moreover, treating the foreign tax on distributions as representing a timing difference on earnings and profits of the distributing entity is more consistent with the general approach in the Code and regulations to the treatment of distributions as representing a tax on the earnings (see, for example, sections 904(d)(3) and (4), and 960(b)) and with treating gain on stock sales as related in part to earnings and profits (see section 1248(a)).

Therefore, these distributions are removed from the list of base differences, and the final regulations at § 1.861–20(d)(3)(ii)(B)(2) generally associate a foreign law dividend that gives rise to a return of capital distribution under section 301(c)(2) with hypothetical earnings of the distributing corporation, measured based on the groupings to which the tax book value of the corporation’s stock is assigned under the asset method in § 1.861–9. Similar rules are included in the 2020 FTC proposed regulations for partnership distributions described in section 733.

The Treasury Department and the IRS have determined that similar rules should apply in appropriate cases to associate a portion of foreign tax imposed on an item of foreign gross income constituting gain recognized on the sale or other disposition of stock in a corporation or a partnership interest

with amounts that constitute nontaxable basis recovery for U.S. tax purposes. Such similar treatment is appropriate to minimize differences in the foreign tax credit consequences of a sale or a distribution in redemption of the taxpayer’s interest. Proposed rules on the allocation of foreign income tax on such dispositions are included in the 2020 FTC proposed regulations.

Proposed § 1.861–20 addressed the assignment to statutory and residual groupings of foreign gross income arising from disregarded payments between a foreign branch (as defined in § 1.904–4(f)(3)) and its owner. If the foreign gross income item arises from a payment made by a foreign branch to its owner, proposed § 1.861–20(d)(3)(ii)(A) generally assigned the item by deeming the payment to be made ratably out of the foreign branch’s accumulated after-tax income, calculated based on the tax book value of the branch’s assets in each grouping. If the item of foreign gross income arises from a disregarded payment to a foreign branch from its owner, proposed § 1.861–20(d)(3)(ii)(B) generally assigned the item to the residual grouping, with the result that any taxes imposed on the disregarded payment would be allocated and apportioned to the residual grouping as well. In addition, proposed § 1.904–6(b)(2) included special rules assigning foreign gross income items arising from certain disregarded payments for purposes of applying section 904 as the operative section.

Several comments asserted that foreign tax on disregarded payments from a foreign branch owner to a foreign branch should not be allocated and apportioned to the residual grouping, which results in an effective denial of foreign tax credits in the case of a branch of a CFC, because items of foreign gross income that arise from disregarded payments of items such as interest or royalties should give rise to creditable foreign income taxes despite being nontaxable for Federal income tax purposes. Some comments recommended adopting a tracing regime similar to the rules in § 1.904–4(f) to trace foreign gross income that a taxpayer includes by reason of a disregarded payment to current year income of the payor for purposes of determining the grouping to which tax on the disregarded payment is allocated and apportioned. Comments also requested that the final regulations clarify whether the rule for remittances or contributions applies in the case of payments between two foreign branches.

The Treasury Department and the IRS generally agree with the comments that

rules similar to the rules in § 1.904–4(f) should apply under § 1.861–20 to trace foreign gross income that a taxpayer includes by reason of a disregarded payment to the current year income of the payor to which the disregarded payment would be allocable if regarded for U.S. tax purposes. However, in order to provide taxpayers additional opportunity to comment, the final regulations reserve on the allocation and apportionment of foreign tax on disregarded payments, and new proposed rules are contained in the 2020 FTC proposed regulations. See Part V.F.4 of the Explanation of Provisions in the 2020 FTC proposed regulations. Similarly, the special rules in proposed § 1.904–6(b)(2) for assigning foreign gross income items arising from certain disregarded payments for purposes of applying section 904 as the operative section are repropoed in the 2020 FTC proposed regulations. The other special rules in proposed § 1.861–20(d)(3) for allocating foreign tax in connection with a taxpayer’s investment in a corporation or a disregarded entity are reorganized, and some of the definitions in proposed § 1.861–20(b) are correspondingly revised, in the final regulations to group the rules on the basis of how the entity is classified, and whether the transaction giving rise to the item of foreign gross income results in the recognition of gross income or loss, for U.S. tax purposes. The rule in proposed § 1.904–6(b)(3) relating to dispositions of property resulting in certain disregarded reallocation transactions is removed and repropoed as part of proposed § 1.861–20 as contained in the 2020 FTC proposed regulations.

Finally, one comment requested that §§ 1.904–1 and 1.904–6 clarify that the tax allocation rules apply to taxes paid to United States territories, which are generally treated as foreign countries for purposes of the foreign tax credit. The final regulations clarify this point by including a cross reference to § 1.901–2(g), which defines a foreign country to include the territories. See § 1.861–20(b)(6).

V. Foreign Tax Redeterminations Under Section 905(c) and Penalty Provisions Under Section 6689

Portions of the temporary regulations relating to sections 905(c), 986(a), and 6689 (TD 9362) (the “2007 temporary regulations”) were repropoed in order to provide taxpayers an additional opportunity to comment on those rules in light of the changes made by the TCJA. In particular, the rules in the 2007 temporary regulations that were repropoed in the 2019 FTC proposed regulations were: (1) Proposed § 1.905–

3(b)(2), which addressed foreign taxes deemed paid under section 960, (2) proposed § 1.905–4, which in general provided the procedural rules for how to notify the IRS of a foreign tax redetermination, and (3) proposed § 301.6689–1, which provided rules for the penalty for failure to notify the IRS of a foreign tax redetermination. In addition, the 2019 FTC proposed regulations contained a transition rule in proposed §§ 1.905–3(b)(2)(iv) and 1.905–5 to address foreign tax redeterminations of foreign corporations that relate to taxable years that predated the amendments made by the TCJA.

A. Adjustments to Foreign Taxes Paid by Foreign Corporations

One comment requested clarification on whether multiple payments to foreign tax authorities under a single assessment (for example, payments to stop the running of interest and penalties) each result in a foreign tax redetermination under section 905(c).

Under § 1.905–3(a) of the 2019 FTC final regulations, each payment of tax that has accrued in a later year in excess of the amount originally accrued results in a separate foreign tax redetermination. However, the 2019 FTC proposed regulations at § 1.905–4(b)(1)(iv), which is finalized without change, only required one amended return for each affected prior year to reflect all foreign tax redeterminations that occur in the same taxable year. In the case of payments that are made across multiple taxable years, § 1.905–4(b)(1)(iv) of the final regulations also provides that, if more than one foreign tax redetermination requires a redetermination of U.S. tax liability for the same affected year and those redeterminations occur within the same taxable year or within two consecutive taxable years, the taxpayer may file for the affected year one amended return and one statement under § 1.905–4(c) with respect to all of the redeterminations. Otherwise, separate amended returns for each affected year are required to reflect each foreign tax redetermination. Accordingly, no changes are made in response to this comment.

The comment also requested that the Treasury Department and the IRS clarify whether contested taxes that are paid before the contest is resolved are considered to accrue for foreign tax credit purposes when paid or whether they represent an advance payment against a future liability that does not accrue until the final liability is determined. Proposed rules addressing this issue are included in the 2020 FTC proposed regulations. See Part X.D.3 of

the Explanation of Provisions in the 2020 FTC proposed regulations.

B. Deductions for Foreign Income Taxes

One comment requested clarification on whether the general rules under section 905(c) apply to taxpayers who elect to take a deduction, rather than a credit, for creditable foreign taxes in the prior year to which the adjusted taxes relate. Additionally, the comment requested that the Treasury Department and the IRS clarify whether the ten-year statute of limitations under section 6511(d)(3)(A) applies to refund claims based on such deductions.

In the case of a U.S. taxpayer that directly pays or accrues foreign income taxes, no U.S. tax redetermination is required in the case of a foreign tax redetermination of such taxes if the taxpayer did not claim a foreign tax credit in the taxable year to which such taxes relate. See § 1.905–3(b)(1) (a redetermination of U.S. tax liability is required with respect to foreign income tax claimed as a credit under section 901). However, in the case of a U.S. shareholder of a CFC that pays or accrues foreign income tax, proposed § 1.905–3(b)(2)(i) and (ii), which are finalized without substantive change, provided that a redetermination of U.S. tax liability is required to account for the effect of a foreign tax redetermination even in situations in which the foreign tax credit is not changed, such as for purposes of computing earnings and profits or applying the high-tax exception described in section 954(b)(4), including in the case of a U.S. shareholder that chooses to deduct foreign income taxes rather than to claim a foreign tax credit. Additional guidance addressing the accrual rules for creditable foreign taxes that are deducted or claimed as a credit is included in § 1.461–4(g)(6)(B)(iii) and in the 2020 FTC proposed regulations.

The question of whether section 6511(d)(3)(A) applies to refunds relating to foreign taxes that are deducted, instead of taken as a foreign tax credit, is beyond the scope of this rulemaking. See, however, *Trusted Media Brands, Inc. v. United States*, 899 F.3d 175 (2d. Cir. 2018) (holding that section 6511(d)(3)(A) only applies to refund claims based on foreign tax credits). In addition, the 2020 FTC proposed regulations include proposed amendments to the regulations under section 901(a), which provides that an election to claim foreign income taxes as a credit for a particular taxable year may be made or changed at any time before the expiration of the period prescribed for claiming a refund of U.S. tax for that year. See Part X.B.2 of the Explanation

of Provisions in the 2020 FTC proposed regulations.

C. Application to GILTI High-Tax Exclusion

Proposed § 1.905–3(b)(2)(ii) provided that the required adjustments to U.S. tax liability by reason of a foreign tax redetermination of a foreign corporation include not only adjustments to the amount of foreign taxes deemed paid and related section 78 dividend, but also adjustments to the foreign corporation's income and earnings and profits and the amount of the U.S. shareholder's inclusions under sections 951 and 951A in the year to which the redetermined foreign tax relates.

One comment requested that final regulations clarify whether a U.S. tax redetermination is required when the foreign tax redetermination affects whether the taxpayer is eligible for the GILTI high-tax exclusion. Specifically, the comment stated that because a redetermination of U.S. tax liability is required when the foreign tax redetermination affects whether a taxpayer is eligible for the subpart F high-tax election under section 954(b)(4), a similar result should apply for taxpayers that make (or seek to make) the GILTI high-tax exclusion election, and that taxpayers should be allowed to make the election on an annual basis. Further, the comment suggested that if taxpayers are allowed to make an annual election under the final GILTI high-tax exclusion regulations, then taxpayers should be permitted to make or revoke the election on an amended return following a foreign tax redetermination.

Proposed § 1.905–3(b)(2)(ii) provided that the required U.S. tax redetermination applies for purposes of determining amounts excluded from a CFC's gross tested income under section 951A(c)(2)(A)(i)(III), and this provision is retained in the final regulations with minor modifications. Furthermore, under final regulations issued on July 23, 2020 (TD 9902, 85 FR 44620), taxpayers may make the GILTI high-tax exclusion election on an annual basis and may do so on an amended return filed within 24 months of the unextended due date of the original income tax return. See § 1.951A–2(c)(7)(viii)(A)(1)(i).

D. Foreign Tax Redeterminations of Successor Entities

Proposed § 1.905–3(b)(3) provided that if at the time of a foreign tax redetermination the person with legal liability for the tax (the "successor") is a different person than the person that had legal liability for the tax in the year

to which the redetermined tax relates (the "original taxpayer"), the required redetermination of U.S. tax liability is made as if the foreign tax redetermination occurred in the hands of the original taxpayer. The proposed regulations further provided that Federal income tax principles apply to determine the tax consequences if the successor remits, or receives a refund of, a tax that in the year to which the redetermined tax relates was the legal liability of, and thus considered paid by, the original taxpayer.

One comment suggested that proposed § 1.905–3(b)(3), as drafted, did not clearly address cases where the ownership of a disregarded entity changes. The comment recommended clarifying that in the case of a disregarded entity, the owner of the disregarded entity is treated as the person with legal liability for the tax or the person with the legal right to a refund, as applicable.

The Treasury Department and the IRS have determined that no clarification is necessary. Existing regulations make clear that the owner of a disregarded entity is considered to be legally liable for the tax. See § 1.901–2(f)(4)(ii) (legal liability for income taxes imposed on a disregarded entity).

The same comment stated that the preamble to the proposed regulations incorrectly suggested that under U.S. tax principles the payment of tax by a successor entity owned by the original taxpayer (for example, by a CFC that was formerly a disregarded entity) is treated as a distribution. The comment further recommended addressing the issue of contingent liabilities in future guidance. The Treasury Department and the IRS agree that there may be multiple ways to characterize the tax consequences of tax paid by a successor in the example described in the preamble to the proposed regulations. Furthermore, the Treasury Department and the IRS have determined that the issue of contingent foreign tax liabilities in connection with foreign tax redeterminations under section 905(c) requires further study and may be considered as part of future guidance.

E. Notification to the IRS of Foreign Tax Redeterminations and Related Penalty Provisions

1. Notification Through Amended Returns

In general, proposed § 1.905–4(b)(1)(i) provided that any taxpayer for which a redetermination of U.S. tax liability is required must notify the IRS of the foreign tax redetermination by filing an amended return.

Several comments suggested that taxpayers should be allowed to report adjustments to U.S. tax liability in prior years by reason of foreign tax redeterminations on an attachment to their Federal income tax return for the taxable year in which the redetermination occurs, instead of requiring taxpayers to file amended tax returns for the taxable year in which the adjusted foreign tax was claimed as a credit and any intervening years in which the foreign tax redetermination affected U.S. tax liability. Specifically, comments suggested that taxpayers could be allowed to file a statement with their return for the taxable year in which the foreign tax redetermination occurs notifying the IRS of overpayments or underpayments of U.S. tax and applicable interest due for prior taxable years that resulted from the foreign tax redetermination. One comment suggested that taxpayers could be required to maintain books and records reflecting all the adjustments that would normally accompany an amended return, without actually being required to prepare and file such a return. Another comment suggested that the IRS could amend Schedule E on Form 5471 to include this type of information about the changes to prior year U.S. tax liabilities that result from foreign tax redeterminations. Comments noted that providing an alternative to filing amended Federal income tax returns would relieve taxpayers from having to file amended state tax returns.

The Treasury Department and the IRS have determined that, based on existing processes, the only manner in which taxpayers can properly notify the IRS of a change in U.S. tax liability for a prior taxable year that results from a foreign tax redetermination is by filing an amended return reflecting all the necessary U.S. tax adjustments. In addition, the Treasury Department and the IRS have determined that the type of statement suggested by the comments, reflecting a recomputation of Federal income tax liability for a prior year, could be viewed by state tax authorities as the functional equivalent of an amended Federal income tax return that may not necessarily operate to relieve taxpayers of their obligations to file amended state tax returns. In any event, taxpayer requests for relief from state tax filing obligations are properly directed to state tax authorities, rather than to the Treasury Department and the IRS. Therefore, the comments are not adopted. However, the Treasury Department and the IRS continue to study whether new processes or forms can be developed to streamline the

filing requirements while ensuring that the IRS receives the necessary information to verify that taxpayers have made the required adjustments to their U.S. tax liability. Under § 1.905–4(b)(3) of the final regulations, the IRS may prescribe alternative notification requirements through forms, instructions, publications, or other guidance.

Comments also suggested that the notification due date should be extended (for example, to up to three years from the due date of the original return for the taxable year in which the foreign tax redetermination occurred).

The Treasury Department and the IRS have determined that deferring the due date of the required amended returns beyond the due date (with extensions) of the return for the year in which the foreign tax redetermination occurs would not substantially reduce compliance burdens and could be more difficult for the IRS to administer, because the same filing obligations would be required, though with respect to foreign tax redeterminations that occurred three years earlier rather than in the current taxable year. In addition, taxpayers have an economic incentive to promptly file amended returns claiming a refund of U.S. tax in cases where a foreign tax redetermination reduces, rather than increases, U.S. tax liability; the Treasury Department and the IRS have determined that it is appropriate to require comparable promptness when a foreign tax redetermination increases U.S. tax due in order to permit timely verification of the required U.S. tax adjustments when the relevant documentation and personnel are more readily available. Accordingly, the comments are not adopted. However, a transition rule is added at § 1.905–4(b)(6) to give taxpayers an additional year to file required notifications with respect to foreign tax redeterminations occurring in taxable years ending on or after December 16, 2019, and before November 12, 2020.

Comments also requested that the final regulations provide that for foreign tax redeterminations below a certain de minimis threshold (for example, 10 percent of foreign taxes as originally accrued, or \$5 million), taxpayers should be allowed to account for the foreign tax redeterminations by making adjustments to current year taxes and foreign tax credits claimed in the taxable year in which the foreign tax redetermination occurs, rather than by adjusting U.S. tax liability in the prior year or years in which the adjusted foreign taxes were claimed as a credit. Alternatively, some comments requested that for foreign tax

redeterminations below a de minimis or materiality threshold, taxpayers should be completely relieved of adjusting U.S. tax liability and from all notification and amended return requirements.

The Treasury Department and the IRS have determined that, as amended by the TCJA, section 905(c) mandates retroactive adjustments to U.S. tax liability when foreign taxes claimed as credits are redetermined. The TCJA repealed section 902 and the regulatory authority at the end of section 905(c)(1) to prescribe alternative adjustments to multi-year pools of earnings and taxes of foreign corporations in lieu of the required adjustments to U.S. tax liability for the affected years. Recharacterizing prior year taxes as current year taxes would have substantive effects on the amounts of a taxpayer's GILTI and subpart F inclusions, the applicable carryover periods for excess credits, the applicable currency translation conventions, the amounts of interest owed by or due to the taxpayer, and the applicable statutes of limitation for refund or assessment. Therefore, the comments are not adopted.

Finally, a comment requested that § 1.905–4(b)(1)(ii) be amended to allow a taxpayer that avails itself of special procedures under Revenue Procedure 94–69 to notify the IRS of a foreign tax redetermination when the taxpayer makes a Revenue Procedure 94–69 disclosure during an audit for the taxable year for which U.S. tax liability is increased by reason of the foreign tax redetermination.

In relevant part, Revenue Procedure 94–69 provides special procedures for a taxpayer in the Large Corporate Compliance program (formerly the Coordinated Examination Program or Coordinated Industry Case program) to avoid the potential application of the accuracy-related penalty currently described in section 6662. Under Revenue Procedure 94–69, a taxpayer may file a written statement that is treated as a qualified amended return within 15 days after the IRS requests it. However, Revenue Procedure 94–69 does not provide any protection for penalties under section 6689 for failure to file a notice of a foreign tax redetermination, and it requires a statement that is less detailed than the notification statement required under § 1.905–4(b)(1)(ii). Further, section 905(c) contemplates that the burden is on the taxpayer to notify the IRS of a foreign tax redetermination, whereas Revenue Procedure 94–69 places the burden on the IRS to request information. Finally, the notification requirement under § 1.905–4(b)(1)(ii) affords a taxpayer more time to satisfy

its reporting obligation as opposed to the 15-day notification requirement in Revenue Procedure 94–69. Therefore, the comment is not adopted.

2. Foreign Tax Redeterminations of Pass-Through Entities

Proposed § 1.905–4(b)(2) generally provided that a pass-through entity that reports creditable foreign income tax to its partners, shareholders, or beneficiaries is required to notify the IRS and its partners, shareholders, or beneficiaries if there is a foreign tax redetermination with respect to such foreign income tax. See proposed § 1.905–4(c) for the information required to be provided with the notification. Additionally, proposed § 1.905–4(b)(2)(ii) provided that if a redetermination of U.S. tax liability would require a partnership adjustment as defined in § 301.6241–1(a)(6), the partnership must file an administrative adjustment request (“AAR”) under section 6227 without regard to the time restrictions on filing an AAR in section 6227(c). See also § 1.6227–1(g).

One comment suggested that S corporations should be allowed to follow similar notification procedures as partnerships that are subject to sections 6221 through 6241 (enacted in § 1101 of the Bipartisan Budget Act of 2015, Pub. L. 114–74 (“BBA”) and as amended by the Protecting Americans from Tax Hikes Act of 2015, Pub. L. 114–113, div Q, and by sections 201 through 207 of the Tax Technical Corrections Act of 2018, contained in Title II of Division U of the Consolidated Appropriations Act of 2018, Pub. L. 115–141).

By their terms, the BBA rules only apply to partnerships and not S corporations, except in the limited circumstance in which an S corporation is a partner in a partnership subject to the BBA rules. See sections 6226(b)(4) and 6227(b). But in cases where the S corporation is not a partner in a BBA partnership that made the election, there is no provision under BBA or any other provision of the Code to allow the S corporation to pay the imputed underpayment on behalf of its shareholders. Because the statute does not generally allow for S corporations to pay imputed underpayments on behalf of its shareholders, the approach suggested by the comment is not viable and therefore the comment is not adopted. However, as described in Part V.E.1 of this Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS continue to study whether new processes or forms can be developed to streamline the amended return requirements, including in the case of S corporations that report

foreign tax redeterminations to their shareholders.

3. Foreign Tax Redeterminations of LB&I Taxpayers

Proposed § 1.905–4(b)(4) provided a limited alternative notification requirement for U.S. taxpayers that are under the jurisdiction of the IRS's Large Business & International ("LB&I") Division. Under proposed § 1.905–4(b)(4)(i)(B), the alternative notification requirement is available only if certain conditions are met, including that an amended return reflecting a foreign tax redetermination would otherwise be due while the return for the affected taxable year is under examination, and that the foreign tax redetermination results in a downward adjustment to the amount of foreign tax paid or accrued, or included in the computation of foreign taxes deemed paid.

Several comments suggested broadening the scope of proposed § 1.905–4(b)(4) to include upward adjustments to foreign taxes paid or accrued. The comments also recommended that the special notification rules apply when multiple foreign tax redeterminations involving different foreign jurisdictions occur in the same taxable year and result in offsetting adjustments, for example, if there is an additional payment of foreign tax in one jurisdiction and a refund of a comparable amount in another jurisdiction.

The proposed regulations limited the alternative notification requirement to cases where the foreign tax redetermination results in a downward adjustment to the amount of foreign taxes paid or accrued because failure to comply with the notification requirements exposes taxpayers to penalties under section 6689 only if the foreign tax redetermination results in an underpayment of U.S. tax. As provided in § 1.905–4(b)(1)(iii), if a foreign tax redetermination results in an overpayment of U.S. tax, in order to claim a refund of U.S. tax the taxpayer must file an amended return within the period specified in section 6511. See section 6511(d)(3)(A), providing a special 10-year period of limitations for refund claims based on foreign tax credits. However, in unusual circumstances, an increase in foreign tax liability for a prior year may result in an underpayment (rather than an overpayment) of U.S. tax (for example, if an increase in foreign income tax liability causes a CFC to have a tested loss or to qualify for the high-tax exclusion of section 954(b)(4), reducing the amount of foreign taxes deemed paid).

In addition, in some cases the complexity of the required computations may make it difficult for taxpayers to identify easily which particular foreign tax redeterminations will ultimately result in an underpayment of U.S. tax. Accordingly, the final regulations extend the alternative notification procedures to cover the case of any adjustment (whether upward or downward) of foreign taxes by reason of a foreign tax redetermination that increases U.S. tax liability, and so would otherwise require the filing of an amended return while the affected year of the LB&I taxpayer is under examination. In addition, the final regulations provide that an LB&I taxpayer that has a foreign tax redetermination that decreases U.S. tax liability for an affected year that is under examination may (but is not required to) notify the examiner of the adjustment in lieu of filing an amended return to claim a refund (within the time period provided in section 6511). However, because section 6511(d)(3) generally allows taxpayers 10 years to seek a U.S. tax refund attributable to foreign tax credits and the regulations do not preclude taxpayers from filing such an amended return before the audit of an affected year is completed, the IRS may either accept the alternative notification or require the taxpayer to file an amended return. The additional flexibility added to the final regulations will assure timely notification of, and penalty protection for taxpayers with respect to, all foreign tax redeterminations that may increase or decrease U.S. tax liability for an affected taxable year, including in the case of offsetting foreign tax redeterminations that occur in the same taxable year.

Finally, comments recommended that examiners should be granted authority to accept notifications of foreign tax redeterminations outside the periods specified in § 1.905–4(b)(4)(ii)(A) through (C) and for affected taxable years that are not currently under examination. For example, the comments suggested that the notification deadline for an LB&I taxpayer should be extended upon the taxpayer's request and at the examiner's discretion.

The Treasury Department and the IRS have determined that amended returns reflecting additional U.S. tax due should be timely filed in order to ensure examiners have sufficient time to take into account any redetermination of U.S. tax liability without prolonging the audit. In addition, the special notification rules are not extended to taxpayers that are not currently under examination. The alternative

notification rules in § 1.905–4(b)(4) are predicated on the fact that the examiner is in the process of determining whether to propose adjustments to the items included on the taxpayer's return for the taxable year under examination, and it is appropriate to defer the requirement to file an amended return reflecting the effect of a foreign tax redetermination on the taxpayer's U.S. tax liability for that taxable year until the examination has concluded. These considerations do not apply to affected taxable years that are not currently under examination when an amended return would otherwise be due. Accordingly, these comments are not adopted.

F. Transition Rule Relating to the TCJA

Proposed §§ 1.905–3(b)(2)(iv) and 1.905–5 provided a transition rule providing that post-2017 redeterminations of pre-2018 foreign income taxes of foreign corporations must be accounted for by adjusting the foreign corporation's taxable income and earnings and profits, post-1986 undistributed earnings, and post-1986 foreign income taxes (or pre-1987 accumulated profits and pre-1987 foreign income taxes, as applicable) in the pre-2018 year to which the redetermined foreign taxes relate.

The preamble to the 2019 FTC proposed regulations requested comments on whether an alternative adjustment to account for post-2017 foreign tax redeterminations with respect to pre-2018 taxable years of foreign corporations, such as an adjustment to the foreign corporation's taxable income and earnings and profits, post-1986 undistributed earnings, and post-1986 foreign income taxes as of the foreign corporation's last taxable year beginning before January 1, 2018, may provide for a simplified and reasonably accurate alternative.

Several comments supported this suggestion. A comment further noted that certain taxpayers should be excluded from any alternative rule where it would be distortive. For example, the comment suggested excluding taxpayers that distributed material amounts of earnings and profits, as well as taxpayers who took advantage of the subpart F high-tax exception in the foreign corporation's final pre-TCJA taxable year. Another comment noted that taxpayers should be allowed to adjust the foreign corporation's final pre-2018 year only if the adjustments would not cause a deficit in the foreign corporation's tax pool in that final year. A comment also suggested that the alternative rule should provide that in case of foreign corporations that ceased to be subject to

the pooling regime before 2018 (for example, due to a liquidation or sale to a foreign acquiror), the required adjustments should be made in the foreign corporation's last year in which the pooling rules are relevant). Additionally, several comments suggested that foreign tax redeterminations of foreign corporations below a certain threshold should not require a redetermination or adjustment of a taxpayer's section 965(a) inclusion or the amount of foreign taxes deemed paid with respect to such section 965(a) inclusion. Instead, some comments suggested that the redetermination be taken into account in the post-2017 year of the redetermination.

In response to comments, the final regulations under § 1.905-5(e) provide an irrevocable election for a foreign corporation's controlling domestic shareholders to account for all foreign tax redeterminations that occur in taxable years ending on or after November 2, 2020, with respect to pre-2018 taxable years of foreign corporations as if they occurred in the foreign corporation's last taxable year beginning before January 1, 2018 (the "last pooling year"). The rules in §§ 1.905-3T and 1.905-5T (as contained in 26 CFR part 1 revised as of April 1, 2019) will apply for purposes of determining whether a particular foreign tax redetermination must instead be accounted for in the year to which the redetermined foreign tax relates, instead of in the last pooling year. The election is made by the foreign corporation's controlling domestic shareholders, and is binding on all persons who are, or were in a prior year to which the election applies, U.S. shareholders of the foreign corporation with respect to which the election is made for all of its subsequent foreign tax redeterminations, as well as foreign tax redeterminations of other members of the same CFC group as the foreign corporation for which the election is made. For this purpose, the definition of a CFC group in § 1.905-5(e)(2)(iv)(B) is modeled off the definition contained in § 1.951A-2(c)(7)(viii)(E)(2).

No exception is provided that would allow taxpayers to avoid redetermination or adjustment of the amount of a taxpayer's section 965(a) inclusion or foreign income taxes deemed paid with respect to such section 965(a) inclusion if under section 905(c) a foreign tax redetermination with respect to a foreign corporation's pre-2018 year requires such an adjustment to the taxpayer's U.S. tax liability. As discussed in Part V.E.1 of this Summary of Comments and Explanation of Revisions, section 905(c)

mandates retroactive adjustments to U.S. tax liability when foreign taxes claimed as credits are redetermined, and there is no technical or policy basis on which to exclude such adjustments when the U.S. tax liability arises as a result of section 965 as opposed to another section of the Code.

G. Protective Claims

One comment requested guidance on how to file protective refund claims to account for contested foreign taxes that may result in foreign tax redeterminations after the expiration of the applicable statute of limitations. Providing guidance on the procedures for filing protective claims is beyond the scope of this rulemaking.

VI. Foreign Income Taxes Taken Into Account Under Section 954(b)(4)

The 2019 FTC proposed regulations included a clarification relating to schemes involving jurisdictions that do not impose corporate income tax on a CFC until its earnings are distributed. The proposed regulations clarified that foreign income taxes that have not accrued because they are contingent on a future distribution are not taken into account for purposes of determining the amount of foreign income taxes paid or accrued with respect to an item of income.

No comments were received with respect to this provision, and the rules are finalized without change. In addition, proposed § 1.905-1(d)(1) in the 2020 FTC proposed regulations further clarifies that taxes contingent on a future distribution are not treated as accrued.

VII. Applicability Dates

A. Regulations Relating to Foreign Tax Credits

The 2019 FTC proposed regulations provided that the rules in proposed §§ 1.861-8, 1.861-9, 1.861-12, 1.861-14, 1.904-4(c)(7) and (8), 1.904(b)-3, 1.905-3, 1.905-4, 1.905-5, 1.954-1, 1.954-2, 1.965-5(b)(2), and 301.6689-1 are applicable to taxable years that end on or after December 16, 2019. Certain provisions, such as §§ 1.704-1(b)(4)(viii)(d)(1), 1.861-17, 1.861-20, 1.904-6, and 1.960-1, were proposed to be applicable to taxable years beginning after December 31, 2019, while proposed §§ 1.904-4(e) and 1.904(g)-3 were proposed to be applicable to taxable years ending on or after the date the final regulations are filed. Proposed § 1.1502-4 was proposed to be applicable to taxable years for which the original consolidated Federal income

tax return is due (without extensions) after December 17, 2019.

Several comments requested that the applicability dates to the 2019 FTC proposed regulations generally be delayed to taxable years beginning on or after the final regulations are published to allow more time for taxpayers to adapt to the new rules, and also requested that the regulations allow taxpayers the flexibility to rely on either the 2019 FTC proposed regulations or the final regulations for any preceding taxable years.

The Treasury Department and the IRS agree that the applicability date of the expense allocation rules in §§ 1.861-8 and 1.861-14, which particularly in the case of stewardship expenses contain significant changes relative to the 2019 FTC proposed regulations, should be delayed to allow taxpayers more time to comply with the revisions made in the final regulations. Therefore, the applicability dates of §§ 1.861-8 and 1.861-14 are revised to apply to taxable years beginning after December 31, 2019 (consistent with the later applicability date provided for §§ 1.861-17, 1.861-20, 1.904-6, and 1.960-1). In addition, although the applicability date of the notification requirements for foreign tax redeterminations in § 1.905-4 is adopted as proposed to apply to foreign tax redeterminations occurring in taxable years ending on or after December 16, 2019, a transition rule is added to the final regulations to provide taxpayers an additional year to file required notifications with respect to foreign tax redeterminations occurring in taxable years ending before November 12, 2020. Also, because section 1503(a) provides that regulations under section 1502 only apply to consolidated tax returns if they are prescribed before the last day prescribed by law for the filing of such return, the applicability date of § 1.1502-4 is revised to apply to taxable years for which the original consolidated Federal income tax return is due (without extensions) after November 12, 2020. However, the other provisions in the 2019 FTC proposed regulations which were proposed to apply to taxable years ending on or after December 16, 2019 (§§ 1.861-9, 1.861-12, 1.904-4(c)(7) and (8), 1.904(b)-3, 1.905-3, 1.905-5, 1.954-1, 1.954-2, 1.965-5(b)(2), and 301.6689-1), generally received minimal or no comments and have been adopted with no or minimal changes. Therefore, the Treasury Department and the IRS have determined that taxpayers with 2019 calendar years have been sufficiently on notice of these rules and little benefit would be afforded by providing a delayed applicability date or an election

to apply either the proposed or final regulations to preceding years, given that these rules have not significantly changed between the proposed and final regulations.

The 2019 FTC proposed regulations provided that, with respect to § 1.861–17, taxpayers that use the sales method for taxable years beginning after December 31, 2017, and before January 1, 2020 (or taxpayers that use the sales method only for their last taxable year that begins before January 1, 2020), may rely on proposed § 1.861–17 if they apply it consistently with respect to such taxable year and any subsequent year. Therefore, a taxpayer using the sales method for its taxable year beginning in 2018 may rely on proposed § 1.861–17 but must also apply the sales method (relying on proposed § 1.861–17) for its taxable year beginning in 2019.

These final regulations provide that a taxpayer may choose to apply § 1.861–17 (as contained in these final regulations) to taxable years beginning before January 1, 2020, provided that it applies the final regulations in their entirety, and provided that if a taxpayer applies the final regulations to the taxable year beginning in 2018, the taxpayer must also apply the final regulations for the subsequent taxable year beginning in 2019. Alternatively, and consistent with the 2019 FTC proposed regulations, a taxpayer may rely on proposed § 1.861–17 in its entirety for taxable years beginning after December 31, 2017, and beginning before January 1, 2020. A taxpayer that applies either the proposed or final version of § 1.861–17 to a taxable year beginning on or after January 1, 2018, and beginning before January 1, 2020, must apply it with respect to all operative sections (including both section 250 and 904). See § 1.861–8(f).

B. Rules Relating to Hybrid Arrangements and Section 951A

Under the 2020 hybrids proposed regulations, the rules under section 245A(e) relating to hybrid deduction accounts were proposed to be applicable to taxable years ending on or after the date that final regulations are published in the **Federal Register**, although a taxpayer could choose to consistently apply those final regulations to earlier taxable years. See proposed § 1.245A(e)–1(h)(2). In addition, the 2020 hybrids proposed regulations provided that a taxpayer could consistently rely on the proposed rules with respect to earlier taxable years.

Further, under the 2020 hybrids proposed regulations, the rules under section 881 relating to conduit financing

arrangements were proposed to be applicable to payments made on or after the date that final regulations are published in the **Federal Register**. See proposed § 1.881–3(f). Finally, the rules under section 951A relating to disqualified payments were proposed to be applicable to taxable years of foreign corporations ending on or after April 7, 2020, and to taxable years of United States shareholders in which or with which such taxable years end. See proposed § 1.951A–7(d).

As discussed in Part III.B of this Summary of Comments and Explanation of Revisions, a comment recommended modifying the applicability date for the rules under section 881 if the final regulations were to include some of the proposed rules, such as the rule that treated as a financing transaction an instrument that is equity for both U.S. and foreign tax purposes and that gives rise to notional interest deductions. The final regulations do not include those rules. In addition, no comments suggested a modification to the applicability dates for the other rules under the 2020 hybrids proposed regulations. Therefore, the final regulations adopt applicability dates consistent with the proposed applicability dates under the 2020 hybrids proposed regulations. See §§ 1.245A(e)–1(h)(2); 1.881–3(f); and 1.951A–7(d). The final regulations also clarify that for a taxpayer to apply the final rules under section 245A(e) to a taxable year ending before November 12, 2020, the taxpayer must consistently apply those rules to that taxable year and any subsequent taxable year ending before November 12, 2020. See § 1.245A(e)–1(h)(2).

Special Analyses

I. Regulatory Planning and Review

Executive Orders 13771, 13563 and 12866 direct agencies to assess costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. For purposes of Executive Order 13771, this final rule is regulatory.

These final regulations have been designated as subject to review under Executive Order 12866 pursuant to the Memorandum of Agreement (MOA) (April 11, 2018) between the Treasury

Department and the Office of Management and Budget (OMB) regarding review of tax regulations. The Office of Information and Regulatory Affairs has designated these regulations as economically significant under section 1(c) of the MOA. Accordingly, the OMB has reviewed these regulations.

A. Background and Need for the Final Regulations

1. Regulations Relating to Foreign Tax Credits

Before the Tax Cuts and Jobs Act (TCJA), the United States taxed its citizens, residents, and domestic corporations on their worldwide income. However, to the extent that a foreign jurisdiction and the United States taxed the same income, this framework could have resulted in double taxation. The U.S. foreign tax credit (FTC) regime alleviated potential double taxation by allowing a non-refundable credit for foreign income taxes paid or accrued that could be applied to reduce the U.S. tax on foreign source income. Although TCJA eliminated the U.S. tax on some foreign source income, the United States continues to tax other foreign source income, and to provide foreign tax credits against this U.S. tax. The changes made by TCJA to international taxation necessitate certain changes in this FTC regime.

The FTC calculation operates by defining different categories of foreign source income (a “separate category”) based on the type of income.³ Foreign taxes paid or accrued as well as deductions for expenses borne by U.S. parents and domestic affiliates that support foreign operations are also allocated to the separate categories under similar principles. The taxpayer can then use foreign tax credits allocated to each category against the U.S. tax owed on income in that category. This approach means that taxpayers who pay foreign taxes on income in one category cannot claim a credit against U.S. taxes owed on income in a different category, an important feature of the FTC regime. For example, suppose a domestic corporate taxpayer has \$100 of active foreign source income in the “general category” and \$100 of passive foreign source income, such as interest income, in the “passive category.” It also has \$50 of foreign taxes associated with the

³ Prior to the TCJA, these categories were primarily the passive income and general income categories. The TCJA added new separate categories for global intangible low-taxed income (the section 951A category) and foreign branch income.

“general category” income and \$0 of foreign taxes associated with the “passive category” income. The allowable FTC is determined separately for the two categories. Therefore, none of the \$50 of “general category” FTCs can be used to offset U.S. tax on the “passive category” income. This taxpayer has a pre-FTC U.S. tax liability of \$42 (21 percent of \$200) but can claim an FTC for only \$21 (21 percent of \$100) of this liability, which is the U.S. tax owed with respect to active foreign source income in the general category. The \$21 represents what is known as the taxpayer’s foreign tax credit limitation. The taxpayer may carry the remaining \$29 of foreign taxes (\$50 minus \$21) back to the prior taxable year and then forward for up to 10 years (until used), and is allowed a credit against U.S. tax on general category foreign source income in the carryover year, subject to certain restrictions.

The final regulations are needed to address changes introduced by the TCJA and to respond to outstanding issues raised in comments to foreign tax credit regulations issued in 2018. In particular, the comments highlighted the following areas of concern: (a) Uncertainty concerning appropriate allocation of R&E expenditures across FTC categories, and (b) the need to treat loans from partnerships to partners the same as loans from partners to partnerships with respect to aligning interest income to interest expense. In addition, the final regulations are needed to expand the application of section 905(c) to cases where a foreign tax redetermination changes a taxpayer’s eligibility for the high-taxed exception under subpart F and GILTI.

In addition to the 2018 FTC final regulations, the Treasury Department and the IRS also issued final regulations in 2019 (84 FR 69022) (2019 FTC final regulations) and proposed regulations (84 FR 69124) (2019 FTC proposed regulations), which are being finalized in this document, and are issuing additional proposed regulations simultaneously with these final regulations.

2. Regulations Relating to Hybrid Arrangements and to Section 951A

The TCJA introduced two new provisions, sections 245A(e) and 267A, that affect the treatment of hybrid arrangements, and a new section 951A, which imposes tax on United States shareholders with respect to certain earnings of their CFCs.⁴ The Treasury

Department and the IRS previously issued final regulations under sections 245A(e) and 267A (2020 hybrids final regulations) as well as proposed regulations under sections 245A(e), 881, and 951A (2020 hybrids proposed regulations). See TD 9896, 85 FR 19802; REG–106013–19, 85 FR 19858. The Treasury Department and the IRS are issuing additional final regulations relating to finalize the 2020 hybrids proposed regulations.

Section 245A(e) disallows the dividends received deduction (DRD) for any dividend received by a U.S. shareholder from a CFC if the dividend is a hybrid dividend. In addition, section 245A(e) treats hybrid dividends between CFCs with a common U.S. shareholder as subpart F income. The statute defines a hybrid dividend as an amount received from a CFC for which a deduction would be allowed under section 245A(a) and for which the CFC received a deduction or other tax benefit in a foreign country. This disallowance of the DRD for hybrid dividends and the treatment of hybrid dividends as subpart F income neutralizes the double non-taxation that might otherwise be produced by these dividends.⁵ The 2020 hybrids final regulations require that taxpayers maintain “hybrid deduction accounts” to track a CFC’s (or a person related to a CFC’s) hybrid deductions allowed in foreign jurisdictions across sources and years. The 2020 hybrids final regulations then provide that a dividend received by a U.S. shareholder from the CFC is a hybrid dividend to the extent of the sum of those accounts.

These final regulations also include rules regarding conduit financing arrangements.⁶ Under the regulations in

that have operations both in the U.S. and a foreign country. These hybrid arrangements use differences in tax treatment by the U.S. and a foreign country to reduce taxes in one or both jurisdictions. Hybrid arrangements can be “hybrid entities,” in which a taxpayer is treated as a flow-through or disregarded entity in one country but as a corporation in another, or “hybrid instruments,” which are financial transactions that are treated as debt in one country and as equity in another.

⁵ The tax treatment under which certain payments are deductible in one jurisdiction and not included in income in a second jurisdiction is referred to as a deduction/no-inclusion outcome (“D/NI outcome”).

⁶ On December 22, 2008, the Treasury Department and the IRS published a notice of proposed rulemaking (REG–113462–08) that proposed adding § 1.881–3(a)(2)(i)(C) to the conduit financing regulations. The preamble to the proposed regulations provides that the Treasury Department and the IRS are also studying transactions where a financing entity advances cash or other property to an intermediate entity in exchange for a hybrid instrument (that is, an instrument treated as debt under the tax laws of the foreign country in which the intermediary is resident and equity for U.S. tax purposes), and states that they may issue separate guidance to address the treatment under § 1.881–3 of certain hybrid instruments.

§ 1.881–3 (the “conduit financing regulations”), a “financing arrangement” means a series of transactions by which one entity (the financing entity) advances money or other property to another entity (the financed entity) through one or more intermediaries, and there are “financing transactions” linking each of those parties. If the IRS determines that a principal purpose of such an arrangement is to avoid U.S. tax, the IRS may disregard the participation of intermediate entities. As a result, U.S.-source payments from the financed entity are, for U.S. withholding tax purposes, treated as being made directly to the financing entity.

For example, consider a foreign entity that is seeking to finance its U.S. subsidiary but is not entitled to U.S. tax treaty benefits; thus, U.S.-source payments made to this entity are not entitled to reduced withholding tax rates. Instead of lending money directly to the U.S. subsidiary, the foreign entity might loan money to an affiliate residing in a treaty jurisdiction and have the affiliate lend on to the U.S. subsidiary in order to access U.S. tax treaty benefits.

Under the conduit financing regulations, if the IRS determines that a principal purpose of such an arrangement is to avoid U.S. tax, the IRS may disregard the participation of the affiliate. As a result, U.S.-source interest payments from the U.S. subsidiary are, for U.S. withholding tax purposes, treated as being made directly to the foreign entity.

In general, the conduit financing regulations apply only if “financing transactions,” as defined under the regulations, link the financing entity, the intermediate entities, and the financed entity. Under the prior conduit financing regulations, before the finalization of these regulations, an instrument that is equity for U.S. tax purposes generally will not be treated as a “financing transaction” unless it provides the holder significant redemption rights or the issuer has a right to redeem that likely will be exercised. This is the case even if the instrument is treated as debt under the laws of the foreign jurisdiction (for example, perpetual debt). As a result, the prior conduit financing regulations would not apply to an equity instrument in the absence of such attributes, and the U.S.-source payment might be entitled to a lower rate of U.S. withholding tax.

These final regulations also implement items in section 951A of the TCJA. Section 951A provides for the taxation of global intangible low-taxed

⁴ Hybrid arrangements are tax-avoidance tools used by certain multinational corporations (MNCs)

income (GILTI), effective beginning with the first taxable year of a CFC that begins after December 31, 2017. The existing final regulations under section 951A address the treatment of a deduction or loss attributable to basis created by certain transfers of property from one CFC to a related CFC after December 31, 2017, but before the date on which section 951A first applies to the transferring CFC's income. Those regulations state that such a deduction or loss is allocated to residual CFC gross income; that is, income that is not attributable to tested income, subpart F income, or income effectively connected with a trade or business in the United States.

B. Overview of the Final Regulations

1. Regulations Relating to Foreign Tax Credits

These final regulations address the following issues: (1) The allocation and apportionment of deductions under sections 861 through 865, including new rules on the allocation and apportionment of research and experimentation (R&E) expenditures; (2) the allocation of foreign income taxes to the foreign income to which such taxes relate; (3) the interaction of the branch loss and dual consolidated loss recapture rules with sections 904(f) and (g); (4) the effect of foreign tax redeterminations of foreign corporations on the application of the high-tax exception described in section 954(b)(4) (including for purposes of determining tested income under section 951A(c)(2)(A)(i)(III)), and required notifications under section 905(c) to the IRS of foreign tax redeterminations and related penalty provisions; (5) the definition of foreign personal holding company income under section 954; (6) the application of the foreign tax credit disallowance under section 965(g); and (7) the application of the foreign tax credit limitation to consolidated groups.

2. Regulations Relating to Hybrid Arrangements and to Section 951A

These final regulations address three main issues. First, these final regulations address adjustments to hybrid deduction accounts under section 245A(e) and the 2020 hybrids final regulations. The 2020 hybrids final regulations stipulate that hybrid deduction accounts should generally be reduced to the extent that earnings and profits of the CFC that have not been subject to foreign tax as a result of certain hybrid arrangements are included in income in the United States by some provision other than section 245A(e). These final regulations provide

new rules for reducing hybrid deduction accounts by reason of income inclusions attributable to subpart F, GILTI, and sections 951(a)(1)(B) and 956. An inclusion due to subpart F or GILTI reduces a hybrid deduction account only to the extent that the inclusion is not offset by a deduction or credit, such as a foreign tax credit, that likely will be afforded to the inclusion. Because deductions and credits are not available to offset income inclusions under section 951(a)(1)(B) and 956, these inclusions reduce a hybrid deduction account dollar-for-dollar.

Second, these final regulations address conduit financing arrangements under § 1.881-3 by expanding the types of transactions classified as financing transactions. These final regulations state that if a financial instrument is debt under the tax law of the foreign jurisdiction where the issuer is a resident, or, if the issuer is not a tax resident of any country, where it is created, organized, or otherwise established, then it may now be characterized as a financing transaction even though the instrument is equity for U.S. tax purposes. Accordingly, the conduit financing regulations would apply to multiple-party financing arrangements using these types of instruments. This change is consistent with the policy of § 1.881-3 and also helps to align the conduit regulations with the policy of section 267A by discouraging the exploitation of differences in treatment of financial instruments across jurisdictions. While section 267A and the 2020 hybrids final regulations apply only if the D/NI outcome is a result of the use of a hybrid entity or instrument, the conduit financing regulations apply regardless of causation and instead look to whether there is a tax avoidance plan. Thus, this new rule, to a limited extent, will address economically similar transactions that section 267A and the 2020 hybrids final regulations do not cover.

Finally, these final regulations address certain payments made after December 31, 2017, but before the date of the start of the first fiscal year for the transferor CFC for which 951A applies (the "disqualified period") in which payments, such as pre-payments of royalties, create income during the disqualified period and a corresponding deduction or loss claimed in taxable years after the disqualified period. Absent these final regulations, those deductions or losses could have been used to reduce tested income or increase tested losses, among other benefits. However, under these final regulations, these deductions will no longer provide

such a tax benefit, and will instead be allocated to residual CFC income, similar to deductions or losses from certain property transfers in the disqualified period under the existing final regulations under section 951A.

C. Economic Analysis

1. Baseline

In this analysis, the Treasury Department and the IRS assess the benefits and costs of these final regulations relative to a no-action baseline reflecting anticipated Federal income tax-related behavior in the absence of these regulations.

2. Summary of Economic Effects

i. Regulations Relating to Foreign Tax Credits

The final regulations provide certainty and clarity to taxpayers regarding the allocation of income, expenses, and foreign income taxes to the separate categories. In the absence of the enhanced specificity provided by these provisions of the regulations, similarly-situated taxpayers might interpret the foreign tax credit provisions of the Code differently, potentially resulting in inefficient patterns of economic activity. For example, in the absence of the final regulations, one taxpayer might have chosen not to undertake research (that is, incur R&E expenses) in a particular location, based on that taxpayer's interpretation of the tax consequences of such expenditures, that another taxpayer, making a different interpretation of the tax treatment of R&E, might have chosen to pursue. If this difference in interpretations confers a competitive advantage on the less productive enterprise, U.S. economic performance may suffer. Thus, the guidance provided in these regulations helps to ensure that taxpayers face more uniform incentives when making economic decisions. In general, economic performance is enhanced when businesses face more uniform signals about tax treatment.

To the extent that taxpayers would generally, in the absence of this final guidance, have interpreted the foreign tax credit rules as being less favorable to the taxpayer than the final regulations provide, the final regulations may result in additional international activity by these taxpayers relative to the no-action baseline. This additional activity may include both activities that are beneficial to the U.S. economy (perhaps because they represent enhanced international opportunities for businesses with U.S. owners) and activities that are not beneficial

(perhaps because they are accompanied by reduced activity in the United States). The Treasury Department and the IRS recognize that additional foreign economic activity by U.S. taxpayers may be a complement or substitute to activity within the United States and that to the extent these regulations change this activity, relative to the no-action baseline or alternative regulatory approaches, a mix of results may occur.

The Treasury Department and the IRS have not undertaken quantitative estimates of the economic effects of the foreign tax credit provisions of the regulations. The Treasury Department and the IRS do not have readily available data or models to estimate with reasonable precision (i) the tax stances that taxpayers would likely take in the absence of the final regulations or under alternative regulatory approaches; (ii) the difference in business decisions that taxpayers might make between the final regulations and the no-action baseline or alternative regulatory approaches as a result of these tax stances; or (iii) how this difference in those business decisions would affect measures of U.S. economic performance.

In the absence of such quantitative estimates, the Treasury Department and the IRS have undertaken a qualitative analysis of the economic effects of the final regulations relative to the no-action baseline and relative to alternative regulatory approaches. This analysis is presented in Parts I.C.3.i through iii of this Special Analyses.

ii. Regulations Relating to Hybrid Arrangements and Section 951A

These provisions of the final regulations provide certainty and clarity to taxpayers regarding (i) adjustments to hybrid deduction accounts under section 245A(e) and the 2020 hybrids final regulations; (ii) the determination of withholding taxes on payments made pursuant to conduit financing arrangements under § 1.881-3; and (iii) the allocation of deductions for certain payments between related CFCs for purposes of section 951A and the final regulations under section 951A.

In the absence of this clarity, the likelihood that different taxpayers would interpret the rules regarding hybrid arrangements and certain deductible payments under the final regulations under section 951A differently would be exacerbated. In general, overall economic performance is enhanced when businesses face more uniform signals about tax treatment. Certainty and clarity over tax treatment generally also reduce compliance costs for taxpayers.

For those statutory provisions for which similar taxpayers would generally adopt similar interpretations of the statute even in the absence of guidance, the final regulations provide value by helping to ensure that those interpretations are consistent with the intent and purpose of the statute. Because the tax treatment in these final regulations advances the intent and purpose of the statute, this guidance enhances U.S. economic performance, relative to the no-action baseline or alternative regulatory approaches, within the context of Congressional intent.

These provisions of the final regulations will further enhance U.S. economic performance by helping to ensure that similar economic arrangements face similar tax treatments. Disparate tax treatment of similar economic transactions may create economic inefficiencies by leading taxpayers to undertake less productive economic activities.

The Treasury Department and the IRS have not undertaken quantitative estimates of the economic effects of these provisions of the final regulations because they do not have readily available data or models to estimate with reasonable precision (i) the types or volume of hybrid arrangements or certain disqualified payments between related CFCs that would likely be covered under these regulations, under the no-action baseline, or under alternative regulatory approaches; or (ii) the effects of those hybrid arrangements or disqualified payments on businesses' overall economic performance, including possible differences in compliance costs.

In the absence of such quantitative estimates, the Treasury Department and the IRS have undertaken a qualitative analysis of the economic effects of the final regulations relative to the no-action baseline and relative to alternative regulatory approaches. This analysis is presented in Parts I.C.3.iv through vi of this Special Analyses.

iii. Summary of Economic Effects of All Provisions

The Treasury Department and the IRS project that the final regulations will have economic effects greater than \$100 million per year (\$2020) relative to the no-action baseline. This determination is based on the substantial size of many of the businesses potentially affected by these regulations and the general responsiveness of business activity to effective tax rates,⁷ one component of

which is the creditability of foreign taxes. Based on these two magnitudes, even modest changes in the treatment of foreign taxes or the allocation of deductions between related CFCs provided by the final regulations, relative to the no-action baseline, can be expected to have annual effects greater than \$100 million (\$2020).

3. Economic Effects of Specific Provisions

i. Rules for Allocating R&E Expenditures Under the Sales Method

a. Background

Under long-standing foreign tax credit rules, taxpayers must allocate expenditures to income categories. In the case of research and experimentation (R&E) expenditures, taxpayers can elect between a "sales method" and a "gross income method" to allocate the R&E expenses.⁸

The TCJA created some uncertainty regarding the application of the sales method because of the introduction of the section 951A category. In particular, comments raised issues regarding whether any R&E expenditures should be allocated to the section 951A category. The fact that sales by CFCs generate tested income and tested income is generally assigned to the section 951A category might imply that R&E expenditures should be allocated to the section 951A category. But the fact that royalty payments from the CFC to the U.S. taxpayer (*e.g.*, in remuneration for IP held by the parent that is licensed to the CFC to create the products that are sold) are in the general category implies that R&E expenditures should be allocated to the general category.

The gross income method is based on a different apportionment factor (gross income) as compared to the sales method (gross receipts). However, the gross income method is subject to certain conditions that require the result to be within a certain band around the result under the sales method, because historically the Treasury Department and the IRS have considered that the gross income method could lead to anomalous results and could be more easily manipulated than the sales

Economic Review 2017, 107(1): 217–48 and articles cited therein.

⁸ If the taxpayer chooses the gross income method, 25 percent of the R&E expenditures are exclusively apportioned to the source where more than 50 percent of the taxpayer's R&E activities occur (generally the United States), and the other 75 percent is apportioned ratably. If a taxpayer chooses the sales method then 50 percent of the R&E expenditures are exclusively apportioned on the same basis, and the other 50 percent is apportioned ratably.

⁷ See E. Zwick and J. Mahon, "Tax Policy and Heterogeneous Investment Behavior," at *American*

method.⁹ The uncertainty with respect to R&E expense allocation under the sales method needed resolution, and because the gross income method is tied to the sales method, any changes to the sales method required consideration of the gross income method.

b. Options Considered for the Final Regulations

The Treasury Department and the IRS considered three options with respect to the allocation of R&E expenditures to the section 951A category for purposes of calculating the FTC limitation. The first option was to confirm that R&E expenditures are allocated to the section 951A category under the sales method and to otherwise leave their treatment under the gross income method unchanged. The second option was to revise the sales method to provide that R&E expenditures are only allocated to the income that represents the taxpayer's return on intellectual property (thus, R&E expenditures could not be allocated to income from the taxpayer's CFC sales) and otherwise leave their treatment under the gross income method unchanged. The third option was to revise the sales method as considered in the second option and eliminate the gross income method for purposes of allocating R&E expenditures.

The final regulations adopt the third option. This option allows for the provision of an allocation and apportionment method for R&E expenditures that generally matches the expense reasonably with the income it generates. The matching of income and expenses generally produces a more efficient tax system contingent on the overall Code relative to the alternative options. Additionally, because this option results in no R&E expense being allocated to section 951A category income, it does not incentivize taxpayers with excess credits (which cannot be carried over to prior or future taxable years and therefore become unusable) in the section 951A category to perform R&E through foreign subsidiaries; instead, the chosen option generally incentivizes choosing the location of R&E based on economic considerations rather than tax-related reasons, contingent on the overall Code. Finally, because the final regulations

⁹The gross income method is more susceptible to manipulation because taxpayers can manage the type and amount of their foreign gross income by, for example, not paying a dividend and because presuming a factual relationship between the R&E expenditure and the related class of income based on the relative amounts of a taxpayer's gross income was more attenuated than a factual relationship based on sales.

adopt the principle of allocating and apportioning R&E expenditures to IP-related income of the U.S. taxpayer, the gross income method is no longer relevant, because it allocates and apportions R&E expenditures to the section 951A category, and section 951A category gross income is not IP income to the U.S. taxpayer.

c. Number of Affected Taxpayers

The Treasury Department and the IRS have determined that the population of affected taxpayers consists of any U.S. taxpayer with R&E expenditures and foreign operations. There are around 2,500 such taxpayers in currently available tax filings from tax year 2018. Based on Statistics of Income data, approximately \$40 billion of R&E expenses of such taxpayers were allocated to foreign source income, out of a total of \$190 billion in qualified research expenses reported by such taxpayers.¹⁰

ii. Application of Section 905(c) to Changes Affecting the High-Tax Exception

a. Background

Section 905(c) provides special rules for a foreign tax redetermination (FTR), which is when the amount of foreign tax paid in an earlier year (origin year) is changed in a later year (FTR year). This redetermination may be necessary, for example, because the taxpayer gets a refund or because a foreign audit determines that the taxpayer owes additional foreign tax. Since these additional taxes (or refunds) relate to the origin year, an FTR affects a taxpayer's origin year tax position (as well as FTC carryovers from that year). Before the TCJA, FTRs of foreign corporations generally resulted in prospective "pooling adjustments" to foreign tax credits. Under this approach, taxpayers simply added to or reduced the amount of foreign taxes in their foreign subsidiary's FTC "pool" going forward rather than amend the deemed paid taxes claimed on their origin year return. TCJA eliminated the pooling mechanism for taxes (because the adoption of a participation exemption system along with the elimination of deferral made it unnecessary) and replaced it with a system where taxes are deemed paid each year with an inclusion or distribution of previously taxed earnings and profits ("PTEP").

The 2019 FTC final regulations make clear that an FTR of a United States

¹⁰Note, however, that these taxpayers might have additional R&E expenses which are not qualified R&E expenses. The tax data do not separately identify such expenses.

taxpayer must always be accounted for in the origin year, and that the taxpayer must file an amended return reflecting any resulting change in the taxpayer's U.S. tax liability.

Section 905(c) provides tools to enforce this amended return requirement. It suspends the statute of limitations with respect to the assessment of any additional U.S. tax liability that results from an FTR, and imposes a civil penalty on taxpayers who fail to notify the IRS (through an amended return) of an FTR. To reflect the repeal of the pooling mechanism, the final regulations generally require taxpayers to account for FTRs of foreign subsidiaries on an amended return that reflects revised foreign taxes deemed paid under section 960 and any resulting change in the taxpayer's U.S. tax liability. However, the 2019 FTC final regulations require U.S. tax redeterminations only by reason of FTRs that affect the amount of foreign tax credit taxpayers claimed in the origin year. The rules do not apply to other tax effects, such as when the FTR changes the amount of earnings and profits the taxpayer's CFC had in the origin year, or affects whether or not the CFC's income qualifies for the high-tax exception under GILTI or subpart F.

The interaction of FTRs and the high-tax exception under GILTI and subpart F increases the importance of filing an origin year amended return. In particular, FTRs can give rise to inaccurate origin year U.S. liability calculations in the absence of an amended return precisely because they can change taxpayers' eligibility for the high-tax exception. Therefore, the final regulations provide that the section 905(c) rules cover situations in which the FTR affects not only the amount of FTCs taxpayers claimed in the origin year, but also whether or not their CFC's income qualified for the high-tax exception.

b. Options Considered for the Final Regulations

The Treasury Department and the IRS considered two options in applying section 905(c) in connection with the high-tax exception. The first option was to limit section 905(c) to changes in the amount of FTCs. The second option was to provide that section 905(c) applies in connection with the high-tax exceptions under GILTI and subpart F.

The final regulations adopt the second option. The first option would lead to frequent occurrences of inaccurate results with respect to the GILTI and subpart F high-tax exceptions because it is common for foreign audits to change the amount of tax paid in a prior

year. Furthermore, taxpayers would have an incentive to overpay their CFC's foreign tax in the origin year, claim the high-tax exception to avoid subpart F or GILTI inclusions, wait for the 3 year statute of limitations to pass, and then claim a foreign tax refund with the foreign authorities. Without section 905(c) applying, taxpayers would have no obligation or threat of penalty for not amending the origin year return. Although there are FTC regulations that deny a credit if taxpayers make a noncompulsory payment of tax (*i.e.*, taxpayers paid more foreign tax than is necessary under foreign law), those rules are challenging to administer. While taxpayers have the burden to prove that they were legally required to pay the tax, the IRS may need to engage foreign tax law experts to establish that the taxpayer could have successfully fought paying it.

The second option provides a more accurate tax calculation than the first option, and it is instrumental in avoiding abuse. The increased number of amended returns relative to the alternative regulatory approach will increase compliance costs for taxpayers, but the Treasury Department and the IRS consider that, in light of the high-tax exception, accurate origin year tax liability calculations necessitate these increased costs.

c. Number of Affected Taxpayers

The Treasury Department and the IRS determined that the final regulations potentially affect those U.S. taxpayers that pay foreign taxes and have a redetermination of that tax. Although data reporting the number of taxpayers subject to an FTR in a given year are not readily available, some taxpayers currently subject to FTRs will file amended returns. The Treasury Department and the IRS estimate that there were between 8,900 and 13,500 taxpayers with foreign affiliates that filed amended returns in 2018. However, the elimination of the pooling mechanism and the expanded incidence of deemed paid taxes in connection with the GILTI regime may significantly increase the number of taxpayers filing amended returns, and the expansion of the section 905(c) requirement to file an amended return to instances where a FTR changes eligibility for the high-tax exception under GILTI or subpart F (but does not affect the taxpayer's foreign tax credit) has the potential to modestly increase that number. The Treasury Department and the IRS have determined that a high upper bound for the number of taxpayers subject to a FTR that will be required to file amended returns (that is, taxpayers

affected by this provision) can be derived by estimating the number of taxpayers with a potential GILTI or subpart F inclusion. Based on currently available tax filings for taxable year 2018, there were about 16,500 C corporations with CFCs that filed at least one Form 5471 with their Form 1120 return. In addition, for the same year, there were about 41,000 individuals with CFCs that e-filed at least one Form 5471 with their Form 1040 return.

In 2018, there were about 3,250 S corporations with CFCs that filed at least one Form 5471 with their 1120S return. The identified S corporations had an estimated 23,000 shareholders. Finally, the Treasury Department and the IRS estimate that there were approximately 7,500 U.S. partnerships with CFCs that e-filed at least one Form 5471 as Category 4 or 5 filers in 2018. The identified partnerships had approximately 1.7 million partners, as indicated by the number of Schedules K-1 filed by the partnerships. This number includes both domestic and foreign partners, so it substantially overstates the number of partners that would actually be affected by the final regulations because it includes foreign partners.

iii. Extension of the Partnership Loan Rule to Loans From the Partnership to a U.S. Partner

a. Background

The 2019 FTC final regulations provide a rule that aligns interest income and expense when a U.S. partner makes a loan to the partnership. Under this matching rule, the partner's gross interest income is apportioned between U.S. and foreign sources in each separate category based on the partner's interest expense apportionment ratios. This rule minimizes the artificial increase in foreign source taxable income based solely on offsetting amounts of interest income and expense from a related party loan to a partnership. Comments in response to the 2018 FTC proposed regulations requested an equivalent rule when the partnership makes a loan to a U.S. partner.

b. Options Considered for the Final Regulations

The Treasury Department and the IRS considered two options with respect to this rule. The first option was to not provide a rule, because the abuse the Treasury Department and the IRS were concerned about was not relevant with respect to loans from the partnership to the partner. In the absence of a matching

rule, the U.S. partner's U.S. source taxable income would be artificially increased but this income is not eligible to be sheltered by FTCs. The second option was to provide an identical rule for loans from the partnership to the partner as was provided in the 2019 FTC final regulations for loans from the partner to the partnership. The final regulations adopt the second option. This symmetry helps to ensure that similar economic transactions are treated similarly.

c. Number of Affected Taxpayers

The Treasury Department and the IRS consider the population of affected taxpayers to consist of any U.S. partner in a partnership which has a loan from the partnership to the partner or certain other parties related to the partner. The Treasury Department and the IRS estimate that there are approximately 450 partnerships and 5,000 partners that would be affected by this regulation.

iv. Section 245A(e)—Adjustment of Hybrid Deduction Account

a. Background

Under the 2020 hybrids final regulations, taxpayers must maintain hybrid deduction accounts to track income of a CFC that was sheltered from foreign tax due to hybrid arrangements, so that it may be included in U.S. income under section 245A(e) when paid as a dividend. The final regulations address how hybrid deduction accounts should be adjusted to account for earnings and profits of a CFC included in U.S. income due to certain provisions other than section 245A(e). The final regulations provide rules reducing a hybrid deduction account for three categories of inclusions: subpart F inclusions, GILTI inclusions, and inclusions under sections 951(a)(1)(B) and 956.

b. Options Considered for the Final Regulations

One option for addressing the treatment of earnings and profits included in U.S. income due to provisions other than section 245A(e) would be to not issue additional guidance beyond current tax rules and thus not to adjust hybrid deduction accounts to account for such inclusions. This would be the simplest approach among those considered, but under this approach, some income could be subject to double taxation in the United States. For example, if no adjustment is made, to the extent that a CFC's earnings and profits were sheltered from foreign tax as a result of certain hybrid arrangements, the section 245A DRD would be disallowed for an amount of

dividends equal to the amount of the sheltered earnings and profits, even if some of the sheltered earnings and profits were included in the income of a U.S. shareholder under the subpart F rules. The U.S. shareholder would be subject to tax on both the dividends and on the subpart F inclusion. Owing to this double taxation, the final regulations do not adopt this approach.

A second option would be to reduce hybrid deduction accounts by amounts included in gross income under the three categories; that is, without regard to deductions or credits that may offset the inclusion. While this option is also relatively simple, it could lead to double non-taxation and thus would give rise to results not intended by the statute. Subpart F and GILTI inclusions may be offset by—and thus may not be fully taxed in the United States as a result of—foreign tax credits and, in the case of GILTI, the section 250 deduction.¹¹ Therefore, this option for reducing hybrid deduction accounts may result in some income that was sheltered from foreign tax due to hybrid arrangements also escaping full U.S. taxation. This double non-taxation is economically inefficient because otherwise similar activities are taxed differently, potentially leading to inefficient business decisions.

A third option, which is the option finalized by the Treasury Department and the IRS, is to reduce hybrid deduction accounts by the amount of the inclusions from the three categories, but only to the extent that the inclusions are likely not offset by foreign tax credits or, in the case of GILTI, the section 250 deduction. For subpart F and GILTI inclusions, the final regulations stipulate adjustments to be made to account for the foreign tax credits and the section 250 deduction available for GILTI inclusions. These adjustments are intended to provide a precise, administrable manner for measuring the extent to which a subpart F or GILTI inclusion is included in U.S. income and not shielded by foreign tax credits or deductions. This option results in an outcome aligned with statutory intent, as it generally ensures that the section 245A DRD is disallowed (and thus a dividend is included in U.S. income without any regard for foreign tax credits) only for amounts that were sheltered from foreign tax by reason of a hybrid arrangement but that have not yet been subject to U.S. tax.

Relative to a no-action baseline, these final regulations provide taxpayers with new instructions regarding how to adjust hybrid deduction accounts to account for earnings and profits that are included in U.S. income by reason of certain provisions other than section 245A(e). This new instruction avoids possible double taxation. Double taxation is inconsistent with the intent and purpose of the statute and is economically inefficient because it may result in otherwise similar income streams facing different tax treatment, incentivizing taxpayers to finance operations with specific income streams and activities that may not be the most economically productive.

The Treasury Department and the IRS have not estimated the difference in compliance costs under each of the three options for the treatment of earnings and profits included in U.S. income due to provisions other than section 245A(e) because they do not have readily available data or models that can provide such estimates.

c. Number of Affected Taxpayers

The Treasury Department and IRS estimate that this provision will impact an upper bound of approximately 2,000 taxpayers. This estimate is based on the top 10 percent of taxpayers (by gross receipts) that filed a domestic corporate income tax return for tax year 2017 with a Form 5471 attached, because only domestic corporations that are U.S. shareholders of CFCs are potentially affected by section 245A(e).¹²

This estimate is an upper bound on the number of large corporations affected because it is based on all transactions, even though only a portion of such transactions involve hybrid arrangements. The tax data do not report whether these reported dividends were part of a hybrid arrangement because such information was not relevant for calculating tax before the TCJA. In addition, this estimate is an upper bound because the Treasury Department and the IRS anticipate that fewer taxpayers would engage in hybrid arrangements going forward as the statute and § 1.245A(e)-1 would make such arrangements less beneficial to taxpayers. Further, it is anticipated that the final regulations will result in only a small increase in compliance costs for those taxpayers who do engage in hybrid arrangements (relative to the

baseline) because a reduction to hybrid deduction accounts under these final regulations generally uses information required to be computed under other provisions of the Code.

v. Conduit Financing Regulations To Address Hybrid Instruments

a. Background

The conduit financing regulations allow the IRS to disregard intermediate entities in a multiple-party financing arrangement for the purposes of determining withholding tax rates if the instruments used in the arrangement are considered “financing transactions.” Financing transactions generally exclude instruments that are treated as equity for U.S. tax purposes unless they have significant redemption-type features. Thus, in the absence of further guidance, the conduit financing regulations would not apply to an equity instrument in the absence of such features. This would allow payments made under these arrangements to continue to be eligible for reduced withholding tax rates through a conduit structure.

b. Options Considered for the Final Regulations

One option for addressing the current disparate treatment would be to not change the conduit financing regulations, which currently treat equity as a financing transaction only if it has specific redemption-type features; this is the no-action baseline. This option is not adopted by the Treasury Department and the IRS, since it is inconsistent with the Treasury Department’s and the IRS’s ongoing efforts to address financing transactions that use hybrid instruments, as discussed in the 2008 proposed regulations.

A second option, which is adopted in the final regulations, is to treat as a financing transaction an instrument that is equity for U.S. tax purposes but debt under the tax law of the issuer’s jurisdiction of residence or, if the issuer is not a tax resident of any country, the tax law of the country in which the issuer is created, organized or otherwise established. This approach will prevent taxpayers from using this type of hybrid instrument to engage in treaty shopping through a conduit jurisdiction. However, this approach does not cover certain cases, such as if a jurisdiction offers a tax benefit to non-debt instruments (for example, a notional interest deduction with respect to equity). The Treasury Department and the IRS adopt this second option in these final regulations because it will, in a manner that is clear and

¹¹ Deductions or credits are not available to offset income inclusions under sections 951(a)(1)(B) and 956, the third category of income inclusions that reduce hybrid deduction accounts addressed by these final regulations.

¹² Because of the complexities involved, primarily only large taxpayers engage in hybrid arrangements. The estimate that the top 10 percent of otherwise-relevant taxpayers (by gross receipts) are likely to engage in hybrid arrangements is based on the judgment of the Treasury Department and IRS.

administrable, prevent a basic form of inappropriate avoidance of the conduit financing regulations.

A third option considered, which was proposed in the 2020 hybrids proposed regulations, would be to treat as a financing transaction any instrument that is equity for U.S. tax purposes and which entitles its issuer or its shareholder a deduction or similar tax benefit in the issuer's resident jurisdiction or in the jurisdiction where the resident has a permanent establishment. This rule would be broader than the second option. It would cover all instruments that give rise to deductions or similar tax benefits, such as credits, rather than only those instruments that are treated as debt under foreign law. This rule would also cover instruments where a financing payment is attributable to a permanent establishment of the issuer, and the tax law of the permanent establishment's jurisdiction allows a deduction or similar treatment for the instrument. This approach would prevent issuers from routing transactions through their permanent establishments to avoid the anti-conduit rules. The Treasury Department and the IRS did not adopt this third option in these final regulations. As discussed in Part III.B of the Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS plan to finalize this rule separately to allow additional time to consider the comments received.

Relative to a no-action baseline, the final regulations are likely to incentivize some taxpayers to shift away from conduit financing arrangements and hybrid arrangements, a shift that is likely to result in little to no overall economic loss, or even an economic gain, because conduit arrangements are generally not economically productive arrangements and are typically pursued only for tax-related reasons. The Treasury Department and the IRS recognize, however, that as a result of these provisions, some taxpayers may face a higher effective tax rate, which may lower their economic activity.

The Treasury Department and the IRS have not undertaken more precise quantitative estimates of either of these economic effects because they do not have readily available data or models to estimate with reasonable precision: (i) The types or volume of conduit arrangements that taxpayers would likely use under the final regulations or under the no-action baseline; or (ii) the effects of those arrangements on businesses' overall economic performance, including possible differences in compliance costs.

c. Number of Affected Taxpayers

The Treasury Department and the IRS estimate that the number of taxpayers potentially affected by the final conduit financing regulations will be an upper bound of approximately 7,000 taxpayers. This estimate is based on the top 10 percent of taxpayers (by gross receipts) that filed a domestic corporate income tax return with a Form 5472, "Information Return of a 25% Foreign-Owned U.S. Corporation or a Foreign Corporation Engaged in a U.S. Trade or Business," attached because primarily foreign entities that advance money or other property to a related U.S. entity through one or more foreign intermediaries are potentially affected by the conduit financing regulations.¹³

This estimate is an upper bound on the number of large corporations affected because it is based on all domestic corporate arrangements involving foreign related parties, even though only a portion of such arrangements are conduit financing arrangements that use hybrid instruments. The tax data do not report whether these arrangements were part of a conduit financing arrangement because such information is not provided on tax forms. In addition, this estimate is an upper bound because the Treasury Department and the IRS anticipate that fewer taxpayers would engage in conduit financing arrangements that use hybrid instruments going forward as the proposed conduit financing regulations would make such arrangements less beneficial to taxpayers.

vi. Rules Under Section 951A To Address Certain Disqualified Payments Made During the Disqualified Period

a. Background

The final section 951A regulations include a rule that addresses certain transactions involving disqualified transfers of property between related CFCs during the disqualified period that may have the effect of reducing GILTI inclusions due to timing differences between when income is included and when resulting deductions, such as depreciation expenses, are claimed. The disqualified period of a CFC is the period between December 31, 2017, which is the last earnings and profits measurement date under section 965, and the beginning of the CFC's first

taxable year that begins after December 31, 2017, which is the first taxable year with respect to which section 951A is effective. The final regulations refine this rule to extend its applicability to other transactions for which similar timing differences can arise.

b. Options Considered for the Final Regulations

The Treasury Department and the IRS considered two options with respect to providing a rule that would apply to certain transactions during the disqualified period in addition to disqualified transfers. The first option was to not provide a rule that would apply to additional transactions. This option was not adopted in the final regulations, since it would result in certain transactions involving payments during the disqualified period giving rise to reduced GILTI inclusions simply due to timing differences. In addition, this option would not provide a similar tax treatment for transactions involving payments as for disqualified transfers of property occurring during the disqualified period.

The second option, which is the option adopted in the final regulations, is to provide an identical rule for disqualified payments between related CFCs as was provided in the section 951A final regulations for disqualified transfers of property between related CFCs during the disqualified period. This symmetry helps to ensure that similar economic transactions are treated similarly.

In the absence of such a rule, certain payments between related CFCs made during the disqualified period may give rise to lower income inclusions for their U.S. shareholders. For example, suppose that a CFC licensed property to a related CFC for ten years and received pre-payments of royalties during the disqualified period from the related CFC. Since these prepayments were received by the licensor CFC during the disqualified period, they would not have affected amounts included under section 965 nor given rise to GILTI tested income. However, the licensee CFC that made the payments would not have claimed the total of the corresponding deductions during the disqualified period, since the timing of deductions are generally tied to economic performance over the period of use. The licensee CFC would claim deductions over the ten years of the contract, and since these deductions would be claimed during taxable years when section 951A is in effect, these deductions would reduce GILTI tested income or increase GILTI tested loss. Thus, this type of transaction could

¹³ Because of the complexities involved, primarily only large taxpayers engage in conduit financing arrangements. The estimate that the top 10 percent of otherwise-relevant taxpayers (by gross receipts) are likely to engage in conduit financing arrangements is based on the judgment of the Treasury Department and IRS.

lower overall income inclusions for the U.S. shareholder of these CFCs in a manner that does not accurately reflect the earnings of the CFCs over time.

Under the final regulations, all deductions attributable to disqualified payments to a related CFC during the disqualified period are allocated and apportioned to residual CFC gross income. These deductions will not thereby reduce tested, subpart F or effectively connected income. This rule provides similar treatment to transactions involving payments as the rule in the section 951A final regulations provides to property transfers between related CFCs during the disqualified period.

Relative to a no-action baseline, the final regulations harmonize the treatment of similar transactions. Since this rule applies to deductions resulting from transactions that occurred during the disqualified period and not to any new transactions, the Treasury Department and the IRS do not expect changes in taxpayer behavior under the final regulations, relative to the no-action baseline.

c. Number of Affected Taxpayers

The Treasury Department and the IRS estimate that the number of taxpayers potentially affected by this rule will be an upper bound of approximately 25,000 to 35,000 taxpayers. This estimate is based on filers of income tax returns with a Form 5471 attached because only filers that are U.S. shareholders of CFCs or that have at least a 10 percent ownership in a foreign corporation would be subject to section 951A. This estimate is an upper bound because it is based on all filers subject to section 951A, even though only a portion of such taxpayers may have engaged in the pre-payment transactions during the disqualified period described in the proposed regulations. Therefore, the Treasury Department and the IRS estimate that the number of taxpayers potentially affected by this rule will be substantially less than 25,000 to 35,000 taxpayers.

II. Paperwork Reduction Act

A. Regulations Relating to Foreign Tax Credits

For purposes of the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) (“PRA”), there is a collection of information in §§ 1.905–4 and 1.905–5(b) and (e). When a redetermination of U.S. tax liability is required by reason of a foreign tax redetermination (FTR), the final regulations generally require the taxpayer to notify the IRS of the FTR and provide certain information

necessary to redetermine the U.S. tax due for the year or years affected by the FTR. If there is no change in the U.S. tax liability as a result of the FTR or if the FTR is caused by certain de minimis fluctuations in foreign currency rates, the taxpayer may simply attach the notification to their next filed tax return and make any appropriate adjustments in that year. However, taxpayers are generally required to file an amended return (or an administrative adjustment request in the case of certain partnerships) for the year or years affected by the FTR along with an updated Form 1116 Foreign Tax Credit (Individual, Estate, or Trust) (covered under OMB Control Number 1545–0074 individual, or 1545–0121 and 1545–0092 estate and trust) or Form 1118 Foreign Tax Credit-Corporations (OMB Control Number 1545–0123), and a written statement providing specific information relating to the FTR (covered under OMB Control Number 1545–1056). Since the burden for filing amended income tax returns and the Forms 1116 and 1118 is covered under the OMB Control Numbers listed in the prior sentence, the burden estimates for OMB Control Number 1545–1056 only cover the burden for the written statements. Sections 1.905–5(b) and 1.905–5(e) only apply to foreign tax redeterminations of foreign corporations that relate to a taxable year of the foreign corporation beginning before January 1, 2018. Section 1.905–4 applies to all other foreign tax redeterminations. Section 1.905–5(b) and (e) reference the same notification and information requirements as § 1.905–4, subject to certain modifications.

For purposes of the PRA, the reporting burden associated with §§ 1.905–4 and 1.905–5(b) and (e) will be reflected in the PRA submission associated with OMB control number 1545–1056, which is set to expire on December 31, 2020. The number of respondents to this collection was estimated to be in a range from 8,900 to 13,500 and the total estimated burden time was estimated to be 56,000 hours and total estimated monetized costs of \$2,583,840 (\$2017). The IRS will be requesting a revision of the paperwork burden under OMB control number 1545–1056 prior to its expiration date.

For taxpayers who are required to file an amended return (along with related Form 1116 or Form 1118) in order to report an FTR, and for purposes of the PRA, the reporting burden for filing the amended return will be reflected in OMB control numbers 1545–0123 (relating to business filers, which represents a total estimated burden time, including all related forms and

schedules, of 3.344 billion hours and total estimated monetized costs of \$61.558 billion (\$2019)), 1545–0074 (relating to individual filers, which represents a total estimated burden time, including all related forms and schedules, of 1.717 billion hours and total estimated monetized costs of \$33.267 billion (\$2019)), 1545–0092 (relating to estate and trust filers with respect to all related forms and schedules except Form 1116, which represents a total estimated burden time, including all related forms and schedules except Form 1116, of 307,844,800 hours and total estimated monetized costs of \$14.077 billion (\$2018)), and 1545–0121 (relating to estate and trust filers but solely with respect to Form 1116, which represents a total estimated burden time related solely to Form 1116 of 25,066,693 hours and total estimated monetized costs of \$1.744 billion (\$2018)). In general, burden estimates for OMB control numbers 1545–0123 and 1545–0074 include, and therefore do not isolate, the estimated burden of the foreign tax credit-related forms. These reported burdens are therefore insufficient for future calculations of the burden imposed by the final regulations. However, with respect to estate and trust filers (OMB control numbers 1545–0121 and 1545–0092) the burdens with respect to foreign tax credit-related forms are isolated in OMB control number 1545–0121 which relates solely to Form 1116, and, therefore may be sufficient to determine future burdens imposed by the final regulations. These particular burden estimates, except OMB control number 1545–0121, have also been reported for other regulations related to the taxation of cross-border income and the Treasury Department and the IRS urge readers to recognize that these numbers are duplicates and to guard against overcounting the burden that international tax provisions imposed prior to the TCJA.

As a result of the changes made in the TCJA to the foreign tax credit rules generally, and to section 905(c) specifically, the Treasury Department and the IRS anticipate that the number of respondents may increase among taxpayers who file Form 1120 series returns. The possible increase in the number of respondents is due to the increase in foreign tax credits claimed by taxpayers in connection with the new GILTI regime and the elimination of adjustments to pools of post-1986 earnings and profits and post-1986 foreign income taxes as an alternative to filing an amended return following the changes made in the TCJA. These

changes to the burden estimate will be reflected in the PRA submission for the renewal of OMB control number 1545-1056 as well as in the OMB control numbers 1545-0074 (for individuals) and 1545-0123 (for business taxpayers).

The estimates for the number of impacted filers with respect to the collections of information described in this Part II of the Special Analyses are based on filers of income tax returns that file a Form 1065, Form 1040, or

Form 1120 series for years 2015 through 2017 because only filers of these forms are generally subject to the collection of information requirement. The IRS estimates the number of impacted filers to be the following:

TAX FORMS IMPACTED

Collection of information	Number of respondents (estimated)	Forms to which the information may be attached
§ 1.905-4	8,900—13,500	Form 1065 series, Form 1040 series, and Form 1120 series.
§ 1.905-5(b)	8,900—13,500	Form 1065 series, Form 1040 series, and Form 1120 series.
§ 1.905-5(e)	8,900—13,500	Form 1065 series, Form 1040 series, and Form 1120 series.

Source: IRS data (MeF, DCS, and Compliance Data Warehouse).

No burden estimates specific to the final regulations are currently available. The Treasury Department and the IRS have not estimated the burden, including that of any new information collections, related to the requirements under the final regulations. Those estimates would capture both changes made by the TCJA and those that arise out of discretionary authority exercised in the final regulations.

The Treasury Department and the IRS request comments on all aspects of the forms that reflect the information collection burdens related to the final regulations, including estimates for how much time it would take to comply with the paperwork burdens related to the forms described and ways for the IRS to minimize the paperwork burden. Proposed revisions (if any) to these forms that reflect the information collections related to the final regulations will be made available for public comment at <https://apps.irs.gov/app/picklist/list/draftTaxForms.html> and will not be finalized until after these forms have been approved by OMB under the PRA.

B. Regulations Relating to Hybrid Arrangements and Section 951A

Pursuant to § 1.6038-2(f)(14), certain U.S. shareholders of a CFC must provide information relating to the CFC and the rules of section 245A(e) on Form 5471, “Information Return of U.S. Persons With Respect to Certain Foreign Corporations,” (OMB control number 1545-0123), as the form or other

guidance may prescribe. The final regulations do not impose any additional information collection requirements relating to section 245A(e). However, the final regulations provide guidance regarding certain computations required under section 245A(e), and such could affect the information required to be reported on Form 5471. For purposes of the PRA, the reporting burden associated with § 1.6038-2(f)(14) is reflected in the PRA submission for Form 5471. See the chart at the end of this Part II.B of this Special Analyses section for the status of the PRA submission for Form 5471. As described in the Special Analyses section in the 2020 hybrids final regulations, and as set forth in the chart below, the Treasury Department and the IRS estimate the number of affected filers to be 2,000.

Pursuant to § 1.6038-5, certain U.S. shareholders of a CFC must provide information relating to the CFC and the U.S. shareholder’s GILTI inclusion under section 951A on new Form 8992, “U.S. Shareholder Calculation of Global Intangible Low-Taxed Income (GILTI),” (OMB control number 1545-0123), as the form or other guidance may prescribe. The final regulations do not impose any additional information collection requirements relating to section 951A. However, the final regulations provide guidance regarding computations required under section 951A for taxpayers who engaged in certain transactions during the disqualified period, and such guidance

could affect the information required to be reported by these taxpayers on Form 8992. For purposes of the PRA, the reporting burden associated with the collection of information under § 1.6038-5 is reflected in the PRA submission for Form 8992. See the chart at the end of this Part II.B of the Special Analyses for the status of the PRA submission for Form 8992. As discussed in the Special Analyses of the preamble to the proposed regulations under section 951A (REG-104390-18, 83 FR 51072), and as set forth in the chart below, the Treasury Department and the IRS estimate the number of filers subject to § 1.6038-5 to be 25,000 to 35,000. Since the final regulations only apply to taxpayers who engaged in certain transactions during the disqualified period, the Treasury Department and the IRS estimate that the number of filers affected by the final regulations and subject to the collection of information in § 1.6038-5 will be significantly less than 25,000 to 35,000.

There is no existing collection of information relating to conduit financing arrangements, and the final regulations do not impose any new information collection requirements relating to conduit financing arrangements. Therefore, a PRA analysis is not required with respect to the final regulations relating to conduit financing arrangements. As a result, the Treasury Department and the IRS estimate the number of filers affected by the final regulations for hybrid arrangements and section 951A to be the following.

TAX FORMS IMPACTED

Collection of information	Number of respondents (estimated, rounded to nearest 1,000)	Forms in which information may be collected
§ 1.6038-2(f)(14)	2,000	Form 5471 (Schedule I).
§ 1.6038-5	25,000—35,000	Form 8992.

Source: IRS data (MeF, DCS, and Compliance Data Warehouse).

The current status of the PRA submissions related to the tax forms associated with the information collections in §§ 1.6038–2(f)(14) and 1.6038–5 is provided in the accompanying table. The reporting burdens associated with the information collections in §§ 1.6038–2(f)(14) and 1.6038–5 are included in the aggregated burden estimates for OMB control number 1545–0123, which represents a total estimated burden time for all forms and schedules for corporations of 3.157 billion hours and total estimated monetized costs of \$58.148 billion (\$2017). The overall burden estimates provided in 1545–0123 are aggregate amounts that relate to the entire package of forms associated with the OMB control number, and are therefore not

suitable for future calculations needed to assess the burden specific to certain regulations, such as the information collections under § 1.6038–2(f)(14) or § 1.6038–5.

No burden estimates specific to the final regulations are currently available. The Treasury Department and the IRS have not identified any burden estimates, including those for new information collections, related to the requirements under the final regulations. The Treasury Department and the IRS estimate PRA burdens on a taxpayer-type basis rather than a provision-specific basis. Changes in those estimates from the estimates reported here will capture both changes made by the TCJA and those that arise

out of discretionary authority exercised in the final regulations.

The Treasury Department and the IRS request comments on the forms that reflect the information collection burdens related to the final regulations, including estimates for how much time it would take to comply with the paperwork burdens related to the forms described and ways for the IRS to minimize the paperwork burden. Proposed revisions (if any) to these forms that reflect the information collections related to the final regulations will be made available for public comment at <https://apps.irs.gov/app/picklist/list/draftTaxForms.html> and will not be finalized until after these forms have been approved by OMB under the PRA.

Form	Type of filer	OMB No.(s)	Status

III. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that these final regulations will not have a significant economic impact on a substantial number of small entities within the meaning of section 601(6) of the Regulatory Flexibility Act.

A. Regulations Relating to Foreign Tax Credits

These final regulations provide guidance needed to comply with statutory changes and affect individuals and corporations claiming foreign tax credits. The domestic small business entities that are subject to the foreign tax credit rules in the Code and in these final regulations are generally those domestic small business entities that are at least 10 percent corporate shareholders of foreign corporations, and so are eligible to claim dividends-received deductions or compute foreign taxes deemed paid under section 960 with respect to inclusions under subpart F and section 951A from CFCs. Other aspects of these final regulations also affect domestic small business entities that operate in foreign jurisdictions or

that have income from sources outside of the United States. Based on 2017 Statistics of Income data, the Treasury Department and the IRS computed the fraction of taxpayers owning a CFC by gross receipts size class. The smaller size classes have a relatively small fraction of taxpayers that own CFCs, which suggests that many domestic small business entities would be unaffected by these regulations.

Many of the important aspects of these final regulations, including all of the rules in §§ 1.861–8(d)(2)(ii)(B), 1.904–4(c)(7), 1.904–6(f), 1.905–3(b)(2), 1.905–5, 1.954–1, 1.954–2, and 1.965–5(b)(2) apply only to U.S. persons that operate a foreign business in corporate form, and, in most cases, only if the foreign corporation is a CFC. Other provisions in these final regulations, including the rules in §§ 1.861–8(d)(2)(v) and (e)(16), 1.861–14, 1.1502–4, and 1.1502–21, generally apply only to members of a consolidated group and insurance companies or other members of the financial services industry earning income from sources outside of the United States. It is infrequent for domestic small entities to operate as

part of an affiliated group, to be taxed as an insurance company, or to constitute a financial services entity, and also earn income from sources outside of the United States. Consequently, the Treasury Department and the IRS expect that these final regulations are unlikely to affect a substantial number of domestic small business entities; however, adequate data are not available at this time to certify that a substantial number of small entities would be unaffected.

The Treasury Department and the IRS have determined that these final regulations will not have a significant economic impact on domestic small business entities. Based on published information from 2017, foreign tax credits as a percentage of three different tax-related measures of annual receipts (see Table for variables) by corporations are substantially less than the 3 to 5 percent threshold for significant economic impact for businesses in all categories of business receipts. The amount of foreign tax credits in 2017 is an upper bound on the change in foreign tax credits resulting from these final regulations.

Size (by business receipts)	Under \$500,000	\$500,000 under \$1,000,000	\$1,000,000 under \$5,000,000	\$5,000,000 under \$10,000,000	\$10,000,000 under \$50,000,000	\$50,000,000 under \$100,000,000	\$100,000,000 under \$250,000,000	\$250,000,000 or more
FTC/Total Receipts	0.12%	0.00%	0.00%	0.01%	0.01%	0.01%	0.02%	0.28%
FTC/(Total Receipts-Total Deductions)	0.61%	0.03%	0.09%	0.05%	0.35%	0.71%	1.38%	9.89%
FTC/Business Receipts ...	0.84%	0.00%	0.00%	0.00%	0.01%	0.01%	0.02%	0.05%

Source: RAAS: KDA: (Tax Year 2017 SOI Data).

Although § 1.905-4 contains a collection of information requirement, the small businesses that are subject to the requirements of § 1.905-4 are domestic small entities with significant foreign operations. The data to assess precise counts of small entities affected by § 1.905-4 are not readily available. However, as demonstrated in the accompanying Table in this Part III, foreign tax credits do not have a significant economic impact for any gross-receipts class of business entities. Accordingly, it is hereby certified that the requirements of § 1.905-4 will not have a significant economic impact on a substantial number of small entities.

Pursuant to section 7805(f), the proposed regulations preceding these final regulations (REG-105495-19) were submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small businesses and no comments were received.

B. Regulations Relating to Hybrid Arrangements and Section 951A

The final regulations amend certain computations required under section 245A(e) or section 951A. As discussed in the Special Analyses accompanying the preambles to the 2020 hybrids final regulations and the proposed regulations under section 951A (REG-104390-18, 83 FR 51072), as well as in Part II.B of the Special Analyses, the Treasury Department and the IRS project that a substantial number of domestic small business entities will not be subject to sections 245A(e) and 951A, and therefore, the existing requirements in §§ 1.6038-2(f)(14) and 1.6038-5 will not have a significant economic impact on a substantial number of small entities.

The small entities that are subject to section 245A(e) and § 1.6038-2(f)(14) are controlling U.S. shareholders of a CFC that engage in a hybrid arrangement, and the small entities that are subject to section 951A and § 1.6038-5 are U.S. shareholders of a CFC. A CFC is a foreign corporation in which more than 50 percent of its stock is owned by U.S. shareholders, measured either by value or voting power. A U.S. shareholder is any U.S.

person that owns 10 percent or more of a foreign corporation’s stock, measured either by value or voting power, and a controlling U.S. shareholder of a CFC is a U.S. person that owns more than 50 percent of the CFC’s stock.

The Treasury Department and the IRS estimate that there are only a small number of taxpayers having gross receipts below either \$25 million (or \$41.5 million for financial entities) who would potentially be affected by these regulations.¹⁴ The Treasury Department and the IRS’s estimate of those entities who could potentially be affected is based on their review of those taxpayers who filed a domestic corporate income tax return in 2016 with gross receipts below either \$25 million (or \$41.5 million for financial institutions) who also reported dividends on a Form 5471. The Treasury Department and the IRS estimate that this number is between 1 and 6 percent of all affected entities regardless of size.

The Treasury Department and the IRS cannot readily identify from these data amounts that are received pursuant to hybrid arrangements because those amounts are not separately reported on tax forms. Thus, dividends received as reported on Form 5471 are an upper bound on the amount of hybrid arrangements by these taxpayers.

The Treasury Department and the IRS estimated the upper bound of the relative cost of the statutory and regulatory hybrids provisions, as a percentage of revenue, for these taxpayers as (i) the statutory tax rate of 21 percent multiplied by dividends received as reported on Form 5471, divided by (ii) the taxpayer’s gross receipts. Based on this calculation, the Treasury Department and the IRS estimate that the upper bound of the relative cost of these statutory and regulatory provisions is above 3 percent for more than half of the small entities described in the preceding paragraph. Because this estimate is an upper bound, a smaller subset of these taxpayers (including potentially zero taxpayers) is likely to have a cost above three percent of gross receipts.

¹⁴ This estimate is limited to those taxpayers who report gross receipts above \$0.

Pursuant to section 7805(f), the proposed regulations preceding these final regulations (REG-106013-19) were submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small businesses and no comments were received.

IV. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits and take certain other actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a state, local, or tribal government, in the aggregate, or by the private sector, of \$100 million in 1995 dollars, updated annually for inflation. This rule does not include any Federal mandate that may result in expenditures by state, local, or tribal governments, or by the private sector in excess of that threshold.

V. Executive Order 13132: Federalism

Executive Order 13132 (entitled “Federalism”) prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on state and local governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This rule does not have federalism implications and does not impose substantial direct compliance costs on state and local governments or preempt state law within the meaning of the Executive order.

VI. Congressional Review Act

The Administrator of the Office of Information and Regulatory Affairs of the OMB has determined that this Treasury decision is a major rule for purposes of the Congressional Review Act (5 U.S.C. 801 *et seq.*) (“CRA”). Under section 801(3) of the CRA, a major rule takes effect 60 days after the rule is published in the **Federal Register**. Accordingly, the Treasury Department and IRS are adopting these final regulations with the delayed

effective date generally prescribed under the Congressional Review Act.

Drafting Information

The principal authors of the final regulations are Corina Braun, Karen J. Cate, Jeffrey P. Cowan, Jorge M. Oben, Richard F. Owens, Jeffrey L. Parry, Tracy M. Vilecco, Suzanne M. Walsh, and Andrew L. Wigmore of the Office of Associate Chief Counsel (International). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 301

Income taxes, Penalties, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR parts 1 and 301 are amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by revising the entry for § 1.861–14 and adding an entry for § 1.905–4 in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805.

* * * * *

Section 1.861–14 also issued under 26 U.S.C. 864(e)(7).

* * * * *

Section 1.905–4 also issued under 26 U.S.C. 989(c)(4), 26 U.S.C. 6227(d), 26 U.S.C. 6241(11), and 26 U.S.C. 6689(a).

* * * * *

■ **Par. 2.** Section 1.245A(e)–1 is amended by:

- 1. Adding paragraphs (d)(4)(i)(B) and (d)(4)(ii).
- 2. Adding a sentence at the end of the introductory text of paragraph (g).
- 3. Adding paragraphs (g)(1)(v) and (h)(2).

The additions read as follows:

§ 1.245A(e)–1 Special rules for hybrid dividends.

* * * * *

- (d) * * *
- (4) * * *
- (i) * * *

(B) Second, the account is decreased (but not below zero) pursuant to the rules of paragraphs (d)(4)(i)(B)(1) through (3) of this section, in the order set forth in this paragraph (d)(4)(i)(B).

(1) *Adjusted subpart F inclusions—(i) In general.* Subject to the limitation in paragraph (d)(4)(i)(B)(1)(ii) of this section, the account is reduced by an

adjusted subpart F inclusion with respect to the share for the taxable year, as determined pursuant to the rules of paragraph (d)(4)(ii) of this section.

(ii) *Limitation.* The reduction pursuant to paragraph (d)(4)(i)(B)(1)(i) of this section cannot exceed the hybrid deductions of the CFC allocated to the share for the taxable year multiplied by a fraction, the numerator of which is the sum of the items of gross income of the CFC that give rise to subpart F income (determined without regard to an amount treated as subpart F income by reason of section 964(e)(4)(A)(i), to the extent that a deduction under section 245A(a) is allowed for a portion of the amount included under section 964(e)(4)(A)(ii) in the gross income of a domestic corporation) of the CFC for the taxable year and the denominator of which is the sum of all the items of gross income of the CFC for the taxable year.

(iii) *Special rule allocating otherwise unused adjusted subpart F inclusions across accounts in certain cases.* This paragraph (d)(4)(i)(B)(1)(iii) applies after each of the specified owner’s hybrid deduction accounts with respect to its shares of stock of the CFC are adjusted pursuant to paragraph (d)(4)(i)(B)(1)(i) of this section but before the accounts are adjusted pursuant to paragraph (d)(4)(i)(B)(2) of this section, to the extent that one or more of the hybrid deduction accounts would have been reduced by an amount pursuant to paragraph (d)(4)(i)(B)(1)(i) of this section but for the limitation in paragraph (d)(4)(i)(B)(1)(ii) of this section (the aggregate of the amounts that would have been reduced but for the limitation, the *unused reduction amount*, and the accounts that would have been reduced by the unused reduction amount, the *unused reduction amount accounts*). When this paragraph (d)(4)(i)(B)(1)(iii) applies, the specified owner’s hybrid deduction accounts other than the unused reduction amount accounts (if any) are ratably reduced by the lesser of the unused reduction amount and the difference of the following two amounts: The hybrid deductions of the CFC allocated to the specified owner’s shares of stock of the CFC for the taxable year multiplied by the fraction described in paragraph (d)(4)(i)(B)(2)(ii) of this section; and the reductions pursuant to paragraph (d)(4)(i)(B)(2)(i) of this section with respect to the specified owner’s shares of stock of the CFC.

(2) *Adjusted GILTI inclusions—(i) In general.* Subject to the limitation in paragraph (d)(4)(i)(B)(2)(ii) of this section, the account is reduced by an adjusted GILTI inclusion with respect to

the share for the taxable year, as determined pursuant to the rules of paragraph (d)(4)(ii) of this section.

(ii) *Limitation.* The reduction pursuant to paragraph (d)(4)(i)(B)(2)(i) of this section cannot exceed the hybrid deductions of the CFC allocated to the share for the taxable year multiplied by a fraction, the numerator of which is the sum of the items of gross tested income of the CFC for the taxable year and the denominator of which is the sum of all the items of gross income of the CFC for the taxable year.

(iii) *Special rule allocating otherwise unused adjusted GILTI inclusions across accounts in certain cases.* This paragraph (d)(4)(i)(B)(2)(iii) applies after each of the specified owner’s hybrid deduction accounts with respect to its shares of stock of the CFC are adjusted pursuant to paragraph (d)(4)(i)(B)(2)(i) of this section but before the accounts are adjusted pursuant to paragraph (d)(4)(i)(B)(3) of this section, to the extent that one or more of the hybrid deduction accounts would have been reduced by an amount pursuant to paragraph (d)(4)(i)(B)(2)(i) of this section but for the limitation in paragraph (d)(4)(i)(B)(2)(ii) of this section (the aggregate of the amounts that would have been reduced but for the limitation, the *unused reduction amount*, and the accounts that would have been reduced by the unused reduction amount, the *unused reduction amount accounts*). When this paragraph (d)(4)(i)(B)(2)(iii) applies, the specified owner’s hybrid deduction accounts other than the unused reduction amount accounts (if any) are ratably reduced by the lesser of the unused reduction amount and the difference of the following two amounts: The hybrid deductions of the CFC allocated to the specified owner’s shares of stock of the CFC for the taxable year multiplied by the fraction described in paragraph (d)(4)(i)(B)(2)(ii) of this section; and the reductions pursuant to paragraph (d)(4)(i)(B)(2)(i) of this section with respect to the specified owner’s shares of stock of the CFC. See paragraph (g)(1)(v)(C) of this section for an illustration of the application of this paragraph (d)(4)(i)(B)(2)(iii).

(3) *Certain section 956 inclusions.* The account is reduced by an amount included in the gross income of a domestic corporation under sections 951(a)(1)(B) and 956 with respect to the share for the taxable year of the domestic corporation in which or with which the CFC’s taxable year ends, to the extent so included by reason of the application of section 245A(e) and this

section to the hypothetical distribution described in § 1.956–1(a)(2).

* * * * *

(ii) *Rules regarding adjusted subpart F and GILTI inclusions.* (A) The term *adjusted subpart F inclusion* means, with respect to a share of stock of a CFC for a taxable year of the CFC, a domestic corporation's pro rata share of the CFC's subpart F income included in gross income under section 951(a)(1)(A) (determined without regard to an amount included in gross income by the domestic corporation by reason of section 964(e)(4)(A)(ii), to the extent a deduction under section 245A(a) is allowed for the amount) for the taxable year of the domestic corporation in which or with which the CFC's taxable year ends, to the extent attributable to the share (as determined under the principles of section 951(a)(2) and § 1.951–1(b) and (e)), adjusted (but not below zero) by—

(1) Adding to the amount the associated foreign income taxes with respect to the amount; and

(2) Subtracting from such sum the quotient of the associated foreign income taxes divided by the percentage described in section 11(b).

(B) The term *adjusted GILTI inclusion* means, with respect to a share of stock of a CFC for a taxable year of the CFC, a domestic corporation's GILTI inclusion amount (within the meaning of § 1.951A–1(c)(1)) for the U.S. shareholder inclusion year (within the meaning of § 1.951A–1(f)(7)), to the extent attributable to the share (as determined under paragraph (d)(4)(ii)(C) of this section), adjusted (but not below zero) by—

(1) Adding to the amount the associated foreign income taxes with respect to the amount;

(2) Multiplying such sum by the difference of 100 percent and the section 250(a)(1)(B)(i) deduction percentage; and

(3) Subtracting from such product the quotient of 80 percent of the associated foreign income taxes divided by the percentage described in section 11(b).

(C) A domestic corporation's GILTI inclusion amount for a U.S. shareholder inclusion year is attributable to a share of stock of the CFC based on a fraction—

(1) The numerator of which is the domestic corporation's pro rata share of the tested income of the CFC for the U.S. shareholder inclusion year, to the extent attributable to the share (as determined under the principles of § 1.951A–1(d)(2)); and

(2) The denominator of which is the aggregate of the domestic corporation's pro rata share of the tested income of

each tested income CFC (as defined in § 1.951A–2(b)(1)) for the U.S. shareholder inclusion year.

(D) The term *associated foreign income taxes* means—

(1) With respect to a domestic corporation's pro rata share of the subpart F income of the CFC included in gross income under section 951(a)(1)(A) and attributable to a share of stock of a CFC for a taxable year of the CFC, current year tax (as described in § 1.960–1(b)(4)) allocated and apportioned under § 1.960–1(d)(3)(ii) to the subpart F income groups (as described in § 1.960–1(b)(30)) of the CFC for the taxable year, to the extent allocated to the share under paragraph (d)(4)(ii)(E) of this section; and

(2) With respect to a domestic corporation's GILTI inclusion amount under section 951A attributable to a share of stock of a CFC for a taxable year of the CFC, the product of—

(i) Current year tax (as described in § 1.960–1(b)(4)) allocated and apportioned under § 1.960–1(d)(3)(ii) to the tested income groups (as described in § 1.960–1(b)(33)) of the CFC for the taxable year, to the extent allocated to the share under paragraph (d)(4)(ii)(F) of this section;

(ii) The domestic corporation's inclusion percentage (as described in § 1.960–2(c)(2)); and

(iii) The section 904 limitation fraction with respect to the domestic corporation for the U.S. shareholder inclusion year.

(E) Current year tax allocated and apportioned to a subpart F income group of a CFC for a taxable year is allocated to a share of stock of the CFC by multiplying the foreign income tax by a fraction—

(1) The numerator of which is the domestic corporation's pro rata share of the subpart F income of the CFC for the taxable year, to the extent attributable to the share (as determined under the principles of section 951(a)(2) and § 1.951–1(b) and (e)); and

(2) The denominator of which is the subpart F income of the CFC for the taxable year.

(F) Current year tax allocated and apportioned to a tested income group of a CFC for a taxable year is allocated to a share of stock of the CFC by multiplying the foreign income tax by a fraction—

(1) The numerator of which is the domestic corporation's pro rata share of tested income of the CFC for the taxable year, to the extent attributable to the share (as determined under the principles of § 1.951A–1(d)(2)); and

(2) The denominator of which is the tested income of the CFC for the taxable year.

(G) The term *section 904 limitation fraction* means, with respect to a domestic corporation for a U.S. shareholder inclusion year, a fraction—

(1) The numerator of which is the amount of foreign tax credits for the U.S. shareholder inclusion year that, by reason of sections 901 and 960(d) and taking into account section 904, the domestic corporation is allowed for the separate category set forth in section 904(d)(1)(A) (amounts includible in gross income under section 951A); and

(2) The denominator of which is the amount of foreign tax credits for the U.S. shareholder inclusion year that, by reason of sections 901 and 960(d) and without regard to section 904, the domestic corporation would be allowed for the separate category set forth in section 904(d)(1)(A) (amounts includible in gross income under section 951A).

(H) The term *section 250(a)(1)(B)(i) deduction percentage* means, with respect to a domestic corporation for a U.S. shareholder inclusion year, a fraction—

(1) The numerator of which is the amount of the deduction under section 250 allowed to the domestic corporation for the U.S. shareholder inclusion year by reason of section 250(a)(1)(B)(i) (taking into account section 250(a)(2)(B)); and

(2) The denominator of which is the domestic corporation's GILTI inclusion amount for the U.S. shareholder inclusion year.

* * * * *

(g) * * * No amounts are included in the gross income of US1 under section 951(a)(1)(A), 951A(a), or 951(a)(1)(B) and section 956.

(1) * * *

(v) *Alternative facts—account reduced by adjusted GILTI inclusion.* The facts are the same as in paragraph (g)(1)(i) of this section, except that for taxable year 1 FX has \$130x of gross tested income and \$10.5x of current year tax (as described in § 1.960–1(b)(4)) that is allocated and apportioned under § 1.960–1(d)(3)(ii) to the tested income groups of FX. US1's ability to credit the \$10.5x of current year tax is not limited under section 904(a). In addition, FX has \$119.5x of tested income (\$130x of gross tested income, less the \$10.5x of current year tax deductions properly allocable to the gross tested income). Further, of US1's pro rata share of the tested income (\$119.5x), \$80x is attributable to Share A and \$39.5x is attributable to Share B (as determined under the principles of § 1.951A–1(d)(2)). Moreover, US1's net deemed tangible income return (as defined in § 1.951A–1(c)(3)) for taxable year 1 is \$71.7x, and US1 does not own any stock of a CFC

other than its stock of FX. Thus, US1's GILTI inclusion amount (within the meaning of § 1.951A-1(c)(1)) for taxable year 1, the U.S. shareholder inclusion year, is \$47.8x (net CFC tested income of \$119.5x, less net deemed tangible income return of \$71.7x) and US1's inclusion percentage (as described in § 1.960-2(c)(2)) is 40 (\$47.8x/\$119.5x). The deduction allowed to US1 under section 250 by reason of section 250(a)(1)(B)(i) is not limited as a result of section 250(a)(2)(B). At the end of year 1, US1's hybrid deduction account with respect to Share A is: First, increased by \$80x (the amount of hybrid deductions allocated to Share A); and second, decreased by \$10x (the sum of the adjusted GILTI inclusion with respect to Share A, and the adjusted GILTI inclusion with respect to Share B that is allocated to the hybrid deduction account with respect to Share A) to \$70x. See paragraphs (d)(4)(i)(A) and (B) of this section. In year 2, the entire \$30x of each dividend received by US1 from FX during year 2 is a hybrid dividend, because the sum of US1's hybrid deduction accounts with respect to each of its shares of FX stock at the end of year 2 (\$70x) is at least equal to the amount of the dividends (\$60x). See paragraph (b)(2) of this section. At the end of year 2, US1's hybrid deduction account with respect to Share A is decreased by \$60x (the amount of the hybrid deductions in the account that give rise to a hybrid dividend or tiered hybrid dividend during year 2) to \$10x. See paragraph (d)(4)(i)(C) of this section. Paragraphs (g)(1)(v)(A) through (C) of this section describe the computations pursuant to paragraph (d)(4)(i)(B)(2) of this section.

(A) To determine the adjusted GILTI inclusion with respect to Share A for taxable year 1, it must be determined to what extent US1's \$47.8x GILTI inclusion amount is attributable to Share A. See paragraph (d)(4)(ii)(B) of this section. Here, \$32x of the inclusion is attributable to Share A, calculated as \$47.8x multiplied by a fraction, the numerator of which is \$80x (US1's pro rata share of the tested income of FX attributable to Share A) and denominator of which is \$119.5x (US1's pro rata share of the tested income of FX, its only CFC). See paragraph (d)(4)(ii)(C) of this section. Next, the associated foreign income taxes with respect to the \$32x GILTI inclusion amount attributable to Share A must be determined. See paragraphs (d)(4)(ii)(B) and (D) of this section. Such associated foreign income taxes are \$2.8x, calculated as \$10.5x (the current year tax allocated and apportioned to the tested income groups of FX) multiplied by a fraction, the numerator of which is \$80x (US1's pro rata share of the tested income of FX attributable to Share A) and the denominator of which is \$119.5x (the tested income of FX), multiplied by 40% (US1's inclusion percentage), multiplied by 1 (the section 904 limitation fraction with respect to US1's GILTI inclusion amount). See paragraphs (d)(4)(ii)(D), (F), and (G) of this section. Thus, pursuant to paragraph (d)(4)(ii)(B) of this section, the adjusted GILTI inclusion with respect to Share A is \$6.7x, computed by—

(1) Adding \$2.8x (the associated foreign income taxes with respect to the \$32x GILTI

inclusion attributable to Share A) to \$32x, which is \$34.8x;

(2) Multiplying \$34.8x (the sum of the amounts in paragraph (g)(1)(v)(A)(1) of this section) by 50% (the difference of 100 percent and the section 250(a)(1)(B)(i) deduction percentage), which is \$17.4x; and

(3) Subtracting \$10.7x (calculated as \$2.24x (80% of the \$2.8x of associated foreign income taxes) divided by .21 (the percentage described in section 11(b)) from \$17.4x (the product of the amounts in paragraph (g)(1)(v)(A)(2) of this section), which is \$6.7x.

(B) Pursuant to computations similar to those discussed in paragraph (g)(1)(v)(A) of this section, the adjusted GILTI inclusion with respect to Share B is \$3.3x. However, the hybrid deduction account with respect to Share B is not reduced by such \$3.3x, because of the limitation in paragraph (d)(4)(i)(B)(2)(ii) of this section, which, with respect to Share B, limits the reduction pursuant to paragraph (d)(4)(i)(B)(2)(i) of this section to \$0 (calculated as \$0, the hybrid deductions allocated to the share for the taxable year, multiplied by 1, the fraction described in paragraph (d)(4)(i)(B)(2)(ii) of this section (computed as \$130x, the sole item of gross tested income, divided by \$130x, the sole item of gross income)). See paragraphs (d)(4)(i)(B)(2)(i) and (ii) of this section.

(C) US1's hybrid deduction account with respect to Share A is reduced by the entire \$6.7x adjusted GILTI inclusion with respect to the share, as such \$6.7x does not exceed the limit in paragraph (d)(4)(i)(B)(2)(ii) of this section (\$80x, calculated as \$80x, the hybrid deductions allocated to the share for the taxable year, multiplied by 1, the fraction described in paragraph (d)(4)(i)(B)(2)(ii) of this section). See paragraphs (d)(4)(i)(B)(2)(i) and (ii) of this section. In addition, the hybrid deduction account is reduced by another \$3.3x, the amount of the adjusted GILTI inclusion with respect to Share B that is allocated to the hybrid deduction account with respect to Share A. See paragraph (d)(4)(i)(B)(2)(iii) of this section. As a result, pursuant to paragraph (d)(4)(i)(B)(2) of this section, US1's hybrid deduction account with respect to Share A is reduced by \$10x (\$6.7x plus \$3.3x).

* * * * *

(h) * * *

(2) *Special rules.* Paragraphs (d)(4)(i)(B) and (d)(4)(ii) of this section (decrease of hybrid deduction accounts; rules regarding adjusted subpart F and GILTI inclusions) apply to taxable years ending on or after November 12, 2020. However, a taxpayer may choose to apply paragraphs (d)(4)(i)(B) and (d)(4)(ii) of this section to a taxable year ending before November 12, 2020, so long as the taxpayer consistently applies paragraphs (d)(4)(i)(B) and (d)(4)(ii) of this section to that taxable year and any subsequent taxable year ending before November 12, 2020.

■ **Par. 3.** Section 1.704-1 is amended by:

■ 1. In paragraph (b)(1)(ii)(b)(1), revising the fourth sentence and adding a new fifth sentence.

■ 2. Revising paragraph (b)(4)(viii)(d)(1). The revisions and addition read as follows:

§ 1.704-1 Partner's distributive share.

* * * * *

(b) * * *

(1) * * *

(ii) * * *

(b) * * *

(1) * * *

Except as provided in the next sentence, the provisions of paragraphs (b)(4)(viii)(a)(1), (b)(4)(viii)(c)(1), (b)(4)(viii)(c)(2)(ii) and (iii), (b)(4)(viii)(c)(3) and (4), and (b)(4)(viii)(d)(1) (as in effect on July 24, 2019) and in paragraphs (b)(6)(i), (ii), and (iii) of this section (*Examples 1, 2, and 3*) apply for partnership taxable years that both begin on or after January 1, 2016, and end after February 4, 2016. For partnership taxable years beginning after December 31, 2019, paragraph (b)(4)(viii)(d)(1) of this section applies.

* * *

* * * * *

(4) * * *

(viii) * * *

(d) * * *

(1) *In general.* CFTEs are allocated and apportioned to CFTE categories in accordance with § 1.861-20 by treating each CFTE category as a statutory grouping (with no residual grouping). See paragraphs (b)(6)(ii) and (iii) of this section (*Examples 2 and 3*), which illustrate the application of this paragraph (b)(4)(viii)(d)(1) in the case of serial disregarded payments subject to withholding tax. In addition, if as described in § 1.861-20(e), foreign law does not provide for the direct allocation or apportionment of such items for purposes of determining the net income in the CFTE categories for Federal income tax purposes pursuant to paragraph (b)(4)(viii)(c)(3) of this section.

* * * * *

■ **Par. 4.** Section 1.861-8 is amended by:

■ 1. Adding a sentence to the end of paragraph (a)(1).

■ 2. In paragraph (d)(1), removing the language “§ 1.1502-4(d)(1) and the last sentence of” in the fifth sentence and removing the last sentence.

■ 3. Revising paragraph (d)(2)(ii)(B).

- 4. Adding paragraph (d)(2)(v).
- 5. Revising paragraph (e)(4)(ii).
- 6. Redesignating paragraph (e)(5) as paragraph (e)(5)(i).
- 7. Adding a heading for paragraph (e)(5) and paragraphs (e)(5)(ii) and (iii).
- 8. Revising the first sentence of paragraph (e)(6)(i) and paragraphs (e)(7) and (8).
- 9. Adding paragraphs (e)(16) and (g)(15) through (18).
- 10. Revising paragraph (h).

The additions and revisions read as follows:

§ 1.861-8 Computation of taxable income from sources within the United States and from other sources and activities.

(a) * * *

(1) * * * The term *section 861 regulations* means this section and §§ 1.861-8T, 1.861-9, 1.861-9T, 1.861-10, 1.861-10T, 1.861-11, 1.861-11T, 1.861-12, 1.861-12T, 1.861-13, 1.861-14, 1.861-14T, 1.861-17, and 1.861-20.

* * * * *

(d) * * *

(2) * * *

(ii) * * *

(B) *Certain stock and dividends.* The term *exempt income* includes the portion of the dividends that are deductible under section 243(a)(1) or (2) (relating to the dividends received deduction) or section 245(a) (relating to the dividends received deduction for dividends from certain foreign corporations). Thus, for purposes of apportioning deductions using a gross income method, gross income does not include a dividend to the extent that it gives rise to a dividends-received deduction under either section 243(a)(1), section 243(a)(2), or section 245(a). In addition, for purposes of apportioning deductions using an asset method, assets do not include that portion of the value of the stock (determined in accordance with § 1.861-9(g), and, as relevant, §§ 1.861-12 and 1.861-13) equal to the portion of dividends that would be offset by a deduction under either section 243(a)(1), section 243(a)(2), or section 245(a), to the extent the stock generates, has generated, or can reasonably be expected to generate such dividends. For example, in the case of stock for which all dividends would be allowed a deduction of 50 percent under section 243(a)(1), 50 percent of the value of the stock is treated as an exempt asset. In the case of stock which generates, has generated, or can reasonably be expected to generate qualifying dividends deductible under section 243(a)(3), such stock does not constitute an exempt asset. However, such stock and the qualifying dividends thereon

are eliminated from consideration in the apportionment of interest expense under the affiliated group rule set forth in § 1.861-11T(c), and in the apportionment of other expenses under the affiliated group rules set forth in § 1.861-14T.

* * * * *

(v) *Dividends-received deduction and tax-exempt interest of insurance companies—(A) In general.* For purposes of characterizing gross income or assets as exempt or not exempt under this section, the following rules apply on a company wide basis pursuant to the rules in paragraphs (d)(2)(v)(A)(1) and (2) of this section.

(1) In the case of an insurance company taxable under section 801, the term *exempt income* includes the portion of dividends received that satisfy the requirements of deductibility under sections 243(a)(1) and (2) and 245(a) but without regard to any disallowance under section 805(a)(4)(A)(ii) of the policyholder's share of the dividends or any similar disallowance under section 805(a)(4)(D), and also includes tax-exempt interest but without reduction for the policyholder's share of tax-exempt interest that reduces the closing balance of items described in section 807(c), as provided under section 807(a)(2)(B) and 807(b)(1)(B). The term *exempt assets* includes the corresponding portion of assets that generates, has generated, or can reasonably be expected to generate exempt income described in the preceding sentence. See § 1.861-8(e)(16) for a special rule concerning the allocation of reserve expenses to dividends received by a life insurance company.

(2) In the case of an insurance company taxable under section 831, the term *exempt income* includes the portion of interest and dividends deductible under sections 832(c)(7) and (12) or sections 834(c)(1) and (7). Exempt income also includes the amounts reducing the losses incurred under section 832(b)(5) to the extent such amounts are not already taken into account in the preceding sentence. The term *exempt assets* includes the corresponding portion of assets that give rise to exempt income described in the preceding two sentences.

(B) *Examples.* The following examples illustrate the application of paragraph (d)(2)(v)(A) of this section.

(1) *Example 1—(i) Facts.* U.S.C. is a domestic life insurance company that has \$300x of gross income, consisting of \$100x of foreign source general category income and \$200x of U.S. source passive category interest income,

\$100x; of the latter of which is tax-exempt interest income from municipal bonds under section 103. U.S.C.'s opening balance of its section 807(c) reserves is \$50,000x; and USP's closing balance of its section 807(c) reserves is \$50,130x. Under section 807(b)(1)(B), USP's closing balance of its section 807(c) reserves, \$50,130x, is reduced by the amount of the policyholder's share of tax-exempt interest. The policyholder's share of tax-exempt interest under section 812(b) is equal to 30 percent of the \$100x of tax-exempt interest (\$30x). Therefore, under sections 803(a)(2) and 807(b), USP's reserve deduction is \$100x (\$50,130x of reserve deduction minus \$30x (30 percent of \$100x of tax-exempt interest), minus \$50,000x). U.S.C. has no other income or deductions.

(ii) *Analysis—allocation.* Under section 818(f)(1), U.S.C.'s reserve deduction is treated as an item that cannot be definitely allocated to an item or class of gross income. Accordingly, under paragraph (b)(5) of this section, U.S.C.'s reserve deduction is allocable to all of U.S.C.'s gross income as a class.

(iii) *Analysis—apportionment.* Under paragraph (c)(3) of this section, the reserve deduction is ratably apportioned between the statutory grouping (foreign source general category income) and the residual grouping (U.S. source income) on the basis of the relative amounts of gross income in each grouping. For purposes of apportioning deductions under § 1.861-8T(d)(2)(i)(B), exempt income is not taken into account. Under paragraph (d)(2)(v)(A)(1) of this section, in the case of an insurance company taxable under section 801, exempt income includes tax-exempt interest without regard to any reduction for the policyholder's share. U.S.C. has U.S. source income of \$200x of which \$100x is tax-exempt without regard to the reduction for the policyholder's share of tax-exempt interest that reduces the closing balance of items described in section 807(c). Thus, the gross income taken into account in apportioning U.S.C.'s reserve deduction is \$100x of foreign source general category gross income and \$100x of U.S. source gross income. Of U.S.C.'s \$100x reserve deduction, \$50x (\$100 × \$100x/\$200x) is apportioned to foreign source general category gross income and \$50x (\$100 × \$100x/\$200x) is apportioned to U.S. source gross income.

(2) *Example 2—(i) Facts.* U.S.C. is a domestic life insurance company that has \$300x of gross income consisting of \$10x of foreign source general category income and \$200x of U.S. source general category dividend income eligible for the 50% dividends received

deduction (DRD) under section 243(a)(1). Under section 805(a)(4)(A)(ii), U.S.C. is allowed a 50% DRD on the company's share of the dividend received. Under section 812(a), the company's share of the dividend is equal to 70% of the dividend income eligible for the DRD under section 243(a)(1), which results in a DRD of \$70x (50% × 70% × \$200), and under section 812(b), the policyholder's share of the dividend is equal to 30% of the dividend income eligible for the DRD under section 243(a)(1), which would result in a DRD of \$30x (50% × 30% × \$200x). U.S.C. is entitled to a \$130x deduction for an increase in its life insurance reserves under sections 803(a)(2) and 807(b). Unlike for tax-exempt interest income, there is no adjustment under section 807(b)(1)(B) to the reserve deduction for the policyholder's share of dividends that would be offset by the DRD under section 243(a)(1). U.S.C. has no other income or deductions.

(ii) *Analysis—allocation.* Under section 818(f)(1), U.S.C.'s reserve deduction is treated as an item that cannot be definitely allocated to an item or class of gross income except that, under § 1.861-8(e)(16), an amount of reserve expenses of a life insurance company equal to the DRD that is disallowed because it is attributable to the policyholder's share of dividends is treated as definitely related to such dividends. Thus, U.S.C. has a life insurance reserve deduction of \$130x, of which \$30 (equal to the policyholder's share of the DRD that would have been allowed under section 243(a)(1)) is directly allocated and apportioned to U.S. source dividend income. Under paragraph (b)(5) of this section, the remaining portion of U.S.C.'s reserve deduction (\$100x) is allocable to all of U.S.C.'s gross income as a class.

(iii) *Analysis—apportionment.* Under paragraph (c)(3) of this section, the deduction is ratably apportioned between the statutory grouping (foreign source general category income) and the residual grouping (U.S. source income) on the basis of the relative amounts of gross income in each grouping. For purposes of apportioning deductions under § 1.861-8T(d)(2)(i)(B), exempt income is not taken into account. Under paragraph (d)(2)(v)(A)(1) of this section, in the case of an insurance company taxable under section 801, exempt income includes dividends deductible under section 805(a)(4) without regard to any reduction to the DRD for the policyholder's share in section 804(a)(4)(A)(ii). Thus, the gross income taken into account in apportioning \$100x of U.S.C.'s remaining reserve

deduction is \$100x of foreign source general category gross income and \$100x of U.S. source gross income. Of U.S.C.'s \$100x remaining reserve deduction, \$50x (\$100x × \$100x / \$200x) is apportioned to foreign source general category gross income and \$50x (\$100x × \$100x / \$200x) is apportioned to U.S. source gross income.

* * * * *
 (e) * * *
 (4) * * *

(ii) *Stewardship expenses—(A) In general.* Stewardship expenses are those expenses resulting from “duplicative activities” (as defined in § 1.482-9(l)(3)(iii)) or “shareholder activities” (as defined in § 1.482-9(l)(3)(iv)) that are undertaken for a person's own benefit as an investor in a related entity, which for purposes of this paragraph (e)(4)(ii) includes a business entity as described in § 301.7701-2(a) of this chapter that is classified for Federal income tax purposes as either a corporation or a partnership, or is disregarded as an entity separate from its owner (“disregarded entity”). Thus, for example, stewardship expenses include expenses of an activity the sole effect of which is to protect the investor's capital investment in the entity or to facilitate compliance by the investor with reporting, legal, or regulatory requirements applicable specifically to the investor. If an investor has a foreign or international department which exercises oversight functions with respect to related entities and, in addition, the department performs other functions that generate other foreign-source income (such as fees for services rendered outside of the United States for the benefit of foreign related corporations or foreign-source royalties), some part of the deductions with respect to that department are considered definitely related to the other foreign-source income. In some instances, the operations of a foreign or international department will also generate U.S. source income (such as fees for services performed in the United States). Stewardship expenses are allocated and apportioned on a separate entity basis without regard to the affiliated group rules in § 1.861-14. See § 1.861-14(e)(1)(i).

(B) *Allocation.* In the case of stewardship expenses incurred to oversee a corporation, the expenses are considered definitely related and allocable to dividends received or amounts included, or to be received or included, under sections 78, 301, 951, 951A, 1291, 1293, and 1296, from the corporation. In the case of stewardship expenses incurred to oversee a

partnership, the expenses are considered definitely related and allocable to a partner's distributive share of partnership income. In the case of stewardship expenses incurred to oversee a disregarded entity, the expenses are considered definitely related and allocable to all gross income attributable to the disregarded entity. Stewardship expenses are allocated to income from a particular entity (or entities) related to the taxpayer if the expense is definitely related to the oversight of that entity or entities as provided in § 1.861-8(b)(1) under all the facts and circumstances.

(C) *Apportionment.* Stewardship expenses must be apportioned between the statutory and residual groupings based on the relative values of the entity or entities in each grouping that are owned by the investor taxpayer, and without regard to the relative amounts of gross income in the statutory and residual groupings to which the stewardship expense is allocated. In the case of stewardship expenses incurred to oversee a lower-tier entity owned indirectly by the taxpayer, the stewardship expenses must be apportioned based on the relative values of the owner or owners of the lower-tier entity that are owned directly by the taxpayer. In the case of stewardship expenses incurred to oversee a corporation, the corporation's value is the value of its stock as determined and characterized under the asset method in § 1.861-9 (and, as relevant, §§ 1.861-12 and 1.861-13) for purposes of allocating and apportioning the taxpayer's interest expense. For purposes of the preceding sentence, if the corporation is a member of the same affiliated group as the investor, the value of the corporation's stock is determined under the asset method in § 1.861-9 and is characterized by the investor in proportion to how the corporation's assets are characterized for purposes of apportioning the group's interest expense. In the case of stewardship expenses incurred to oversee a partnership, the partnership's value is determined and characterized under the asset method in § 1.861-9 (taking into account any adjustments under sections 734(b) and 743(b)). In the case of stewardship expenses incurred to oversee a disregarded entity, the disregarded entity's character and value is determined using the principles of the asset method in § 1.861-9 as if the disregarded entity were treated as a corporation for Federal income tax purposes. For purposes of determining the tax book value of assets under this

paragraph (e)(4)(ii)(C), section 864(e)(3) and § 1.861–8(d)(2) do not apply.

(5) *Legal and accounting fees and expenses; damages awards, prejudgment interest, and settlement payments—* * * *

(ii) *Product liability and other claims for damages.* Except as otherwise provided in this paragraph (e)(5), awards for litigation or arbitral damages, prejudgment interest, and payments in settlement of or in anticipation of claims for damages, including punitive damages, arising from claims relating to sales, licenses, or leases of products or the provision of services, are definitely related and allocable to the class of gross income of the type produced by the specific sales or leases of the products or provision of services that gave rise to the claims for damage or injury. Such damages and payments may include, but are not limited to, product liability or patent infringement claims. The deductions are apportioned among the statutory and residual groupings on the basis of the relative amounts of gross income in the relevant class in each grouping in the year in which the deductions are allowed. If the claims arise from an event incident to the production or sale of products or provision of services (such as an industrial accident), the payments are definitely related and allocable to the class of gross income ordinarily produced by the assets that are involved in the event. The deductions are apportioned among the statutory and residual groupings on the basis of the relative values (as determined under the asset method in § 1.861–9 for purposes of allocating and apportioning the taxpayer's interest expense) of the assets that were involved in the event or that were used to produce or sell products or services in the relevant class in each grouping; such values are determined in the year the deductions are allowed.

(iii) *Investor lawsuits.* If the claims are made by investors in a corporation and arise from negligence, fraud, or other malfeasance of the corporation (or its representatives), then the damages, prejudgment interest, and settlement payments paid by the corporation are definitely related and allocable to all income of the corporation and are apportioned among the statutory and residual groupings based on the relative value of the corporation's assets in each grouping (as determined under the asset method in § 1.861–9 for purposes of allocating and apportioning the taxpayer's interest expense) in the year the deductions are allowed.

(6) * * *

(i) * * * The deduction for foreign income, war profits, and excess profits

taxes allowed by section 164 is allocated and apportioned among the applicable statutory and residual groupings under § 1.861–20. * * *

* * * * *

(7) *Losses on the sale, exchange, or other disposition of property.* See §§ 1.865–1 and 1.865–2 for rules regarding the allocation and apportionment of certain losses.

(8) *Net operating loss deduction—(i) Components of net operating loss.* A net operating loss is separated into components that are assigned to statutory or residual groupings by reference to the losses in each such statutory or residual grouping that are not allocated to reduce income in other groupings in the taxable year of the loss. For example, for purposes of applying this paragraph (e)(8)(i) with respect to section 904 as the operative section, the source and separate category components of a net operating loss are determined by reference to the amounts of separate limitation loss and U.S. source loss (determined without regard to adjustments required under section 904(b)) that are not allocated to reduce U.S. source income or income in other separate categories under the rules of sections 904(f) and 904(g) for the taxable year in which the net operating loss arose. See § 1.904(g)–3(d)(2). See § 1.1502–4 for rules applicable in computing the foreign tax credit limitation and determining the source and separate category of a net operating loss of a consolidated group. Similarly, for purposes of applying this paragraph (e)(8)(i) with respect to another operative section (as described in § 1.861–8(f)(1)), a net operating loss is divided into component parts based on the amounts of the deductions that are assigned to the relevant statutory and residual groupings and that are not absorbed in the taxable year in which the loss is incurred under the rules of that operative section. Deductions that are considered absorbed for purposes of an operative section may differ from the deductions that are considered absorbed for purposes of another provision of the Code that requires determining the components of a net operating loss.

(ii) *Allocation and apportionment of section 172 deduction.* A net operating loss deduction allowed under section 172 is allocated and apportioned to statutory and residual groupings by reference to the statutory and residual groupings of the components of the net operating loss (as determined under paragraph (e)(8)(i) of this section) that is deducted in the taxable year. Except as provided under the rules for an operative section, a partial net operating

loss deduction is treated as ratably comprising the components of a net operating loss. See, for example, § 1.904(g)–3, which is an exception to the general rule described in the previous sentence and provides rules for determining the source and separate category of a partial net operating loss deduction for purposes of section 904 as the operative section.

* * * * *

(16) *Special rule for the allocation and apportionment of reserve expenses of a life insurance company.* An amount of reserve expenses of a life insurance company equal to the dividends received deduction that is disallowed because it is attributable to the policyholders' share of dividends received is treated as definitely related to such dividends. See paragraph (d)(2)(v)(B)(2) of this section (*Example 2*).

* * * * *

(g) * * *

(15) *Example 15: Payment in settlement of claim for damages allocated to specific class of gross income—(i) Facts.* USP, a domestic corporation, sells Product A in the United States. USP also owns and operates a disregarded entity (FDE) in Country X. FDE, which constitutes a foreign branch of USP within the meaning of § 1.904–4(f)(3)(vii), sells Product A inventory in Country X. FDE's functional currency is the U.S. dollar. In each of its taxable years from 2018 through 2020, USP earns \$2,000x of U.S. source gross income from sales of Product A to customers in the United States. USP also sells Product A to FDE for an arm's length price and FDE sells Product A to customers in Country X. After the application of section 862(a)(6), § 1.861–7(c), and the disregarded payment rules of § 1.904–4(f)(2)(vi), the sales of Product A in Country X result in \$1,500x of general category foreign source gross income and \$500x of foreign branch category foreign source gross income in each of 2018 and 2019 and \$2,500x of general category foreign source gross income and \$500x of foreign branch category foreign source gross income in 2020. FDE is sued for damages in 2019 after Product A harms a customer in Country X in 2018. In 2020, FDE makes a deductible payment of \$60x to the Country X customer in settlement of the legal claims for damages.

(ii) *Analysis.* Under paragraph (e)(5)(ii) of this section, the deductible settlement payment is definitely related and allocable to the class of gross income of the type produced by the specific sales of property that gave rise

to the damages claims, that is USP's gross income from sales of Product A in Country X. Claims that might arise from damages caused by Product A to customers in the United States are irrelevant in allocating the deduction for the settlement payments made to the customer in Country X. For purposes of determining USP's foreign tax credit limitation under section 904(d), because in 2020 that class of gross income consists of both foreign source foreign branch category income and foreign source general category income, the settlement payment of \$60x is apportioned between gross income in the two categories in proportion to the relative amounts of gross income in each category in 2020, the year the deduction is allowed. Therefore, \$10x ($\$60x \times \$500x / \$3,000x$) is apportioned to foreign source foreign branch category income, and the remaining \$50x ($\$60x \times \$2,500x / \$3,000x$) is apportioned to foreign source general category income.

(16) *Example 16: Legal damages payment arising from event incident to production and sale—(i) Facts—*The facts are the same as in paragraph (g)(15) of this section (the facts in *Example 15*) except that instead of a product liability lawsuit relating to a 2018 event, in 2019 there is a disaster at a warehouse owned by USP in the United States arising from the negligence of an employee. The warehouse is used to store Product A inventory intended for sale both by USP in the United States and by FDE in Country X. In 2020, the warehouse asset is characterized under § 1.861–9T(g)(3)(ii) as a multiple category asset that is assigned 10% to the foreign source foreign branch category, 50% to the foreign source general category, and 40% to the residual grouping of U.S. source income. The inventory of Product A in the warehouse is destroyed and USP employees as well as residents in the vicinity of the warehouse are injured. USP's reputation in the United States suffers such that USP expects to subsequently lose market share in the United States. In 2020, USP makes deductible damages payments totaling \$50x to injured employees and the nearby residents, all of whom are in the United States.

(ii) *Analysis.* USP's warehouse in the United States is used in connection with sales of Product A to customers in both the United States and Country X. Thus, under paragraph (e)(5)(ii) of this section, the \$50x damages payment arises from an event incident to the sales of Product A and is therefore definitely related and allocable to the class of gross income ordinarily produced by the asset (the warehouse) that is involved in the

event—that is, the gross income from sales of Product A by USP in the United States and by FDE in Country X. Under paragraph (e)(5)(ii) of this section, the \$50x deduction for the damages payment is apportioned for purposes of applying section 904(d) on the basis of the relative value in each grouping (as determined under § 1.861–9(g) for purposes of allocating and apportioning USP's interest expense) of USP's warehouse, the asset involved in the event, in 2020, the year the deduction is allowed. USP's warehouse is a multiple category asset as described in § 1.861–9T(g)(3)(ii) and 10% of the value of USP's warehouse is properly characterized as an asset generating foreign source foreign branch category income in 2020. Accordingly, \$5x ($10\% \times \$50x$) of the deduction is apportioned to foreign source foreign branch category income. Additionally, 50% of the value of USP's warehouse is properly characterized as an asset generating foreign source general category income in 2020 and, accordingly, \$25x ($50\% \times \$50x$) is apportioned to such grouping. The remaining \$20x ($40\% \times \$50x$) is apportioned to U.S. source income.

(17) *Example 17: Payment following a change in law—(i) Facts.* The facts are the same as in paragraph (g)(16) of this section (the facts in *Example 16*), except that the disaster at USP's warehouse occurred not in 2019 but in 2016 and thus before the enactment of the section 904(d) separate category for foreign branch category income. The deductible damages payments are made in 2020.

(ii) *Analysis.* USP's U.S. warehouse was used in connection with making sales of Product A in both the United States and Country X. Under paragraph (e)(5)(ii) of this section, the 2020 damages payment arises from an event incident to the sales of Product A and is therefore definitely related and allocable to the class of gross income ordinarily produced by the asset (the warehouse) that is involved in the event, that is the gross income from sales of Product A by USP in the United States and by FDE in Country X. Under the law in effect in 2016, the income earned from the Product A sales in Country X was solely general category income. Under paragraph (e)(5)(ii) of this section, the damages payment is definitely related and allocable to the class of gross income consisting of sales of Product A by USP in the United States and by FDE in Country X, and apportioned to the statutory and residual groupings based on the relative value in each grouping (as determined under § 1.861–9(g) for purposes of allocating and apportioning USP's interest expense) of USP's warehouse,

the asset involved in the event, in 2020, the year in which the deduction is allowed. Accordingly, for purposes of determining USP's foreign tax credit limitation under section 904(d), the 2020 deductible damages payment of \$50x is allocated and apportioned in the same manner as in paragraph (g)(16)(ii) of this section (the analysis in *Example 16*).

(18) *Example 18: Stewardship and supportive expenses—(i) Facts—(A) Overview.* USP, a domestic corporation, manufactures and sells Product A in the United States. USP directly owns 100% of the stock of USSub, a domestic corporation, and each of CFC1, CFC2, and CFC3, which are all controlled foreign corporations. USP and USSub file separate returns for U.S. Federal income tax purposes but are members of the same affiliated group as defined in section 243(b)(2). USSub, CFC1, CFC2, and CFC3 perform similar functions in the United States and in the foreign countries T, U, and V, respectively. USP's tax book value in the stock of USSub is \$15,000x. USP's tax book value in the stock of each of CFC1, CFC2, and CFC3 is, respectively, \$5,000x, \$10,000x, and \$15,000x.

(B) *USP Department expenses.* USP's supervision department (the Department) incurs expenses of \$1,500x. The Department is responsible for the supervision of its four subsidiaries and for rendering certain services to the subsidiaries, and the Department provides all the supportive functions necessary for USP's foreign activities. The Department performs three types of activities. First, the Department performs services that cost \$900x outside the United States for the direct benefit of CFC2 for which a marked-up fee is paid by CFC2 to USP. Second, the Department provides services at a cost of \$60x related to license agreements that USP maintains with subsidiaries CFC1 and CFC2 and which give rise to foreign source general category income to USP. Third, the Department performs activities described in § 1.482–9(l)(3)(iii) that are in the nature of shareholder oversight, that duplicate functions performed by all four of the subsidiaries' own employees, and that do not provide an additional benefit to the subsidiaries. For example, a team of auditors from USP's accounting department periodically audits the subsidiaries' books and prepares internal reports for use by USP's management. Similarly, USP's treasurer periodically reviews the subsidiaries' financial policies for the board of directors of USP. These activities do not provide an additional benefit to the related corporations. The Department's

oversight activities are related to all the subsidiaries. The cost of the duplicative activities is \$540x.

(C) *USP's income.* USP earns the following items of income: First, under section 951(a), USP has \$2,000x of subpart F income that is passive category income. Second, USP has a GILTI inclusion amount of \$2,000x. Third, USP earns \$1,000x of royalties, paid by CFC1 and CFC2, that are foreign source general category income. Finally, USP receives a fee of \$1,000x from CFC2 that is foreign source general category income.

(ii) *Analysis—(A) Character of USP Department services.* The first and second activities (the services rendered for the benefit of CFC2, and the provision of services related to license agreements with CFC1 and CFC2) are not properly characterized as stewardship expenses because they are not incurred solely to protect the corporation's capital investment in the related corporation or to facilitate compliance by the corporation with reporting, legal, or regulatory requirements applicable specifically to the corporation. The third activity described is in the nature of shareholder oversight and is characterized as stewardship as described in paragraph (e)(4)(ii)(A) of this section because the expense is related to duplicative activities.

(B) *Allocation.* First, the deduction of \$900x for expenses related to services rendered for the benefit of CFC2 is definitely related (and therefore allocable) to the fees for services that USP receives from CFC2. Second, the \$60x of deductions attributable to USP's license agreements with CFC1 and CFC2 are definitely related (and therefore allocable) solely to royalties received from CFC1 and CFC2. Third, based on the relevant facts and circumstances and the Department's oversight activities, the stewardship deduction of \$540x is related to the oversight of all of USP's subsidiaries and therefore is definitely related (and therefore allocable) to dividends and inclusions received or included from all the subsidiaries.

(C) *Apportionment.* (1) No apportionment of USP's deduction of \$900x for expenses related to the services performed for CFC2 is necessary because the class of gross income to which the deduction is allocated consists entirely of a single statutory grouping, foreign source general category income.

(2) No apportionment of USP's deduction of \$60x attributable to the services related to license agreements is necessary because the class of gross income to which the deduction is

allocated consists entirely of a single statutory grouping, foreign source general category income.

(3) For purposes of apportioning USP's \$540x stewardship expenses in determining the foreign tax credit limitation, the statutory groupings are foreign source general category income, foreign source passive category income, and foreign source section 951A category income. The residual grouping is U.S. source income.

(4) USP's deduction of \$540x for the Department's stewardship expenses which are allocable to dividends and amounts included from the subsidiaries are apportioned using the same value of USP's stock in USSub, CFC1, CFC2, and CFC3 that is used for purposes of allocating and apportioning USP's interest expense. Pursuant to paragraph (e)(4)(ii)(A) of this section and § 1.861–14(e)(1)(i), the value of USP's stock in USSub is included for purposes of apportioning USP's stewardship expense. The value of USSub's stock is \$15,000x, and USSub only owns assets that generate income in the residual grouping of gross income from U.S. sources. Therefore, for purposes of apportioning USP's stewardship expense, all of the \$15,000x value of the USSub stock is characterized as an asset generating U.S. source income.

Although USSub stock would be eliminated from consideration as an asset under paragraph (d)(2)(ii)(B) of this section, for purposes of apportioning USP's stewardship expense section 864(e)(3) and paragraph (d)(2) of this section do not apply. USP uses the asset method described in § 1.861–12T(c)(3)(ii) to characterize the stock in its CFCs. After application of § 1.861–13(a), USP determines that with respect to its three CFCs in the aggregate it has \$15,000x of section 951A category stock in the non-section 245A subgroup, \$6,000x of general category stock in the section 245A subgroup, and \$9,000x of passive category stock in the non-section 245A subgroup. Although under paragraph (d)(2)(ii)(C)(2) of this section \$7,500x of the stock that is section 951A category stock is an exempt asset, for purposes of apportioning USP's stewardship expense section 864(e)(3) and paragraph (d)(2) of this section do not apply. Finally, even though USP may be allowed a section 245A deduction with respect to dividends from the CFCs, no portion of the value of the stock of the CFCs is eliminated, because the section 245A deduction does not create exempt income or result in the stock being treated as an exempt asset. See section 864(e)(3) and paragraph (d)(2)(iii)(C) of this section.

(5) Taking into account the characterization of USP's stock in USSub, CFC1, CFC2, and CFC3 with a total value of \$45,000x (\$15,000x + \$6,000x + \$9,000x + \$15,000x), the \$540x of Department expenses is apportioned as follows: \$180x (\$540x × \$15,000x/\$45,000x) to section 951A category income, \$72x (\$540x × \$6,000x/\$45,000x) to general category income, \$108x (\$540x × \$9,000x/\$45,000x) to passive category income, and \$180x (\$540x × \$15,000x/\$45,000x) to the residual grouping of U.S. source income. Section 904(b)(4)(B)(i) and § 1.904(b)–3 apply to \$72x of the stewardship expense apportioned to the CFCs' stock that is characterized as being in the section 245A subgroup in the general category.

* * * * *

(h) *Applicability date.* (1) Except as provided in this paragraph (h), this section applies to taxable years that both begin after December 31, 2017, and end on or after December 4, 2018.

(2) Paragraphs (d)(2)(ii)(B), (d)(2)(v), (e)(4) and (5), (e)(6)(i), (e)(8) and (16), and (g)(15) through (18) of this section apply to taxable years that begin after December 31, 2019. For taxable years that both begin after December 31, 2017, and end on or after December 4, 2018, and also begin on or before December 31, 2019, see § 1.861–8(d)(2)(ii)(B), (e)(4) and (5), (e)(6)(i), and (e)(8) as in effect on December 17, 2019.

(3) The last sentence of paragraph (d)(2)(ii)(C)(1) of this section and paragraph (f)(1)(vi)(N) of this section apply to taxable years beginning on or after January 1, 2021.

■ **Par. 5.** Section 1.861–8T is amended by revising paragraph (d)(2)(ii)(B) to read as follows:

§ 1.861–8T Computation of taxable income from sources within the United States and from other sources and activities (temporary).

* * * * *

- (d) * * *
- (2) * * *
- (ii) * * *

(B) *Certain stock and dividends.* For further guidance, see § 1.861–8(d)(2)(ii)(B).

* * * * *

■ **Par. 6.** Section 1.861–9 is amended by:

- 1. Revising paragraph (a).
- 2. Adding paragraph (b).
- 3. Revising paragraphs (e)(8)(vi)(C) and (D).
- 4. Adding paragraph (e)(9).
- 5. Revising paragraph (k).

The revisions and additions read as follows:

§ 1.861-9 Allocation and apportionment of interest expense and rules for asset-based apportionment.

(a) *In general.* For further guidance, see § 1.861-9T(a).

(b) *Interest equivalent*—(1) *Certain expenses and losses*—(i) *General rule.* Any expense or loss (to the extent deductible) incurred in a transaction or series of integrated or related transactions in which the taxpayer secures the use of funds for a period of time is subject to allocation and apportionment under the rules of this section and § 1.861-9T(b) if such expense or loss is substantially incurred in consideration of the time value of money. However, the allocation and apportionment of a loss under this paragraph (b) and § 1.861-9T(b) does not affect the characterization of such loss as capital or ordinary for any purpose other than for purposes of the section 861 regulations (as defined in § 1.861-8(a)(1)).

(ii) *Examples.* For further guidance, see § 1.861-9T(b)(1)(ii).

(2) *Certain foreign currency borrowings.* For further guidance, see § 1.861-9T(b)(2) through (7).

(3) through (7) [Reserved]

(8) *Guaranteed payments.* Any deductions for guaranteed payments for the use of capital under section 707(c) are allocated and apportioned in the same manner as interest expense.

* * * * *

- (e) * * *
- (8) * * *
- (vi) * * *

(C) *Downstream partnership loan.* The term *downstream partnership loan* means a loan to a partnership for which the loan receivable is held, directly or indirectly through one or more other partnerships or other pass-through entities (as defined in § 1.904-5(a)(4)), by a person (or any person in the same affiliated group as such person) that owns an interest, directly or indirectly through one or more other partnerships or other pass-through entities, in the partnership.

(D) *Downstream partnership loan interest expense (DPL interest expense).* The term *downstream partnership loan interest expense*, or *DPL interest expense*, means an item of interest expense paid or accrued with respect to a downstream partnership loan, without regard to whether the expense was currently deductible (for example, by reason of section 163(j) or the election to waive deductions pursuant to § 1.59A-3(c)(6)).

* * * * *

(9) *Special rule for upstream partnership loans*—(i) *In general.* For

purposes of apportioning interest expense that is not directly allocable under paragraph (e)(4) of this section or § 1.861-10T, an upstream partnership loan debtor's (UPL debtor) pro rata share of the value of the upstream partnership loan (as determined under paragraph (h)(4)(i) of this section) is not considered an asset of the UPL debtor taken into account as described in paragraphs (e)(2) and (3) of this section.

(ii) *Treatment of interest expense and interest income attributable to an upstream partnership loan.* If a UPL debtor (or any other person in the same affiliated group as the UPL debtor) takes into account a distributive share of upstream partnership loan interest income (UPL interest income), the UPL debtor (or any other person in the same affiliated group as the UPL debtor) assigns an amount of its distributive share of the UPL interest income equal to the matching expense amount for the taxable year that is attributable to the same loan to the same statutory and residual groupings using the same ratios as the statutory and residual groupings of gross income from which the upstream partnership loan interest expense (UPL interest expense) is deducted by the UPL debtor (or any other person in the same affiliated group as the UPL debtor). Therefore, the amount of the distributive share of UPL interest income that is assigned to each statutory and residual grouping is the amount that bears the same proportion to the matching expense amount as the UPL interest expense in that statutory or residual grouping bears to the total UPL interest expense of the UPL debtor (or any other person in the same affiliated group as the UPL debtor).

(iii) *Anti-avoidance rule for third party back-to-back loans.* If, with a principal purpose of avoiding the rules in this paragraph (e)(9), a partnership makes a loan to a person that is not related (within the meaning of section 267(b) or 707) to the lender, the unrelated person makes a loan to a direct or indirect partner in the partnership (or any person in the same affiliated group as a direct or indirect partner), and the first loan would constitute an upstream partnership loan if made directly to the direct or indirect partner (or person in the same affiliated group as a direct or indirect partner), then the rules of this paragraph (e)(9) apply as if the first loan was made directly by the partnership to the partner (or affiliate of the partner), and the interest expense paid by the partner is treated as made with respect to the first loan. Such a series of loans will be subject to the recharacterization rule in this paragraph (e)(9)(iii) without regard

to whether there was a principal purpose of avoiding the rules in this paragraph (e)(9) if the loan to the unrelated person would not have been made or maintained on substantially the same terms but for the loan of funds by the unrelated person to the direct or indirect partner (or affiliate of the partner). The principles of this paragraph (e)(9)(iii) also apply to similar transactions that involve more than two loans and regardless of the order in which the loans are made.

(iv) *Interest equivalents.* The principles of this paragraph (e)(9) apply in the case of a partner, or any person in the same affiliated group as the partner, that takes into account a distributive share of income and has a matching expense amount (treating any interest equivalent described in paragraph (b) of this section and § 1.861-9T(b) as interest income or expense for purposes of paragraph (e)(9)(v)(B) of this section) that is allocated and apportioned in the same manner as interest expense under paragraph (b) of this section and § 1.861-9T(b).

(v) *Definitions.* For purposes of this paragraph (e)(9), the following definitions apply.

(A) *Affiliated group.* The term *affiliated group* has the meaning provided in § 1.861-11(d)(1).

(B) *Matching expense amount.* The term *matching expense amount* means the lesser of the total amount of the UPL interest expense taken into account directly or indirectly by the UPL debtor for the taxable year with respect to an upstream partnership loan or the total amount of the distributive shares of the UPL interest income of the UPL debtor (or any other person in the same affiliated group as the UPL debtor) with respect to the loan.

(C) *Upstream partnership loan.* The term *upstream partnership loan* means a loan by a partnership to a person (or any person in the same affiliated group as such person) that owns an interest, directly or indirectly through one or more other partnerships or other pass-through entities (as defined in § 1.904-5(a)(4)(iv)), in the partnership.

(D) *Upstream partnership loan debtor (UPL debtor).* The term *upstream partnership loan debtor*, or *UPL debtor*, means the person that has the payable with respect to an upstream partnership loan. If a partnership has the payable, then any partner in the partnership (other than a partner described in paragraph (e)(4)(i) of this section) is also considered a UPL debtor.

(E) *Upstream partnership loan interest expense (UPL interest expense).* The term *upstream partnership loan*

interest expense, or UPL interest expense, means an item of interest expense paid or accrued with respect to an upstream partnership loan, without regard to whether the expense was currently deductible (for example, by reason of section 163(j) or the election to waive deductions pursuant to § 1.59A-3(c)(6)).

(F) *Upstream partnership loan interest income (UPL interest income)*. The term *upstream partnership loan interest income*, or *UPL interest income*, means an item of gross interest income received or accrued with respect to an upstream partnership loan.

(vi) *Examples*. The following examples illustrate the application of this paragraph (e)(9).

(A) *Example 1—(1) Facts*. US1, a domestic corporation, directly owns 60% of PRS, a foreign partnership that is not engaged in a U.S. trade or business. The remaining 40% of PRS is directly owned by US2, a domestic corporation that is unrelated to US1. US1, US2, and PRS all use the calendar year as their taxable year. In Year 1, PRS loans \$1,000x to US1. For Year 1, US1 has \$100x of interest expense with respect to the loan and PRS has \$100x of interest income with respect to the loan. US1's distributive share of the interest income is \$60x. Under paragraph (e)(2) of this section, \$75x of US1's interest expense with respect to the loan is allocated and apportioned to U.S. source income and \$25x is allocated and apportioned to foreign source foreign branch category income. Under paragraph (h)(4)(i) of this section, US1's share of the total value of the loan between US1 and PRS is \$600x.

(2) *Analysis*. The loan by PRS to US1 is an upstream partnership loan and US1 is an UPL debtor. Under paragraph (e)(9)(iv)(B) of this section, the matching expense amount is \$60x, the lesser of the UPL interest expense taken into account by US1 with respect to the loan for the taxable year (\$100x) and US1's distributive share of the UPL interest income (\$60x). Under paragraph (e)(9)(ii) of this section, US1 assigns \$45x of the UPL interest income to U.S. source income (\$60x × \$75x/\$100x) and \$15x of the UPL interest income to foreign source foreign branch category income (\$60x × \$25x/\$100x). Under paragraph (e)(9)(i) of this section, the disregarded portion of the upstream partnership loan is \$600x, and is not taken into account as described in paragraphs (e)(2) and (3) of this section.

(B) *Example 2—(1) Facts*. The facts are the same as in paragraph (e)(9)(vi)(A)(1) of this section (the facts in *Example 1*), except that US1 and US2 are part of the same affiliated group

with the same ratio of U.S. and foreign assets that US1 had in paragraph (e)(9)(vi)(A)(1), US2's distributive share of the interest income is \$40x, and under paragraph (h)(4)(i) of this section US2's share of the total value of the loan between US1 and PRS is \$400x.

(2) *Analysis*. The loan by PRS to US1 is an upstream partnership loan and US1 is an UPL debtor. Under paragraph (e)(9)(iv)(B) of this section, the matching expense amount is \$100x, the lesser of the UPL interest expense taken into account by US1 with respect to the loan for the taxable year (\$100x) and the total amount of US1 and US2's distributive shares of the UPL interest income (\$100x). Under paragraph (e)(9)(ii) of this section, US1 and US2 assign \$75x of their total UPL interest income to U.S. source income (\$100x × \$75x/\$100x) and \$25x of their total UPL interest income to foreign source foreign branch category income (\$100x × \$25x/\$100x). Under paragraph (e)(9)(i) of this section, the disregarded portion of the upstream partnership loan is \$1,000x, the total amount of US1 and US2's share of the loan between US1 and PRS, and is not taken into account as described in paragraphs (e)(2) and (3) of this section.

(k) *Applicability date*. (1) Except as provided in paragraph (k)(2) of this section, this section applies to taxable years that both begin after December 31, 2017, and end on or after December 4, 2018.

(2) Paragraphs (b)(1)(i), (b)(8), and (e)(9) of this section apply to taxable years that end on or after December 16, 2019. For taxable years that both begin after December 31, 2017, and end on or after December 4, 2018, and also end before December 16, 2019, see § 1.861-9T(b)(1)(i) as contained in 26 CFR part 1 revised as of April 1, 2019.

■ **Par. 7.** Section 1.861-9T is amended by revising paragraph (b)(1)(i) and adding paragraph (b)(8) to read as follows:

§ 1.861-9T Allocation and apportionment of interest expense (temporary).

* * * * *

(b) * * *

(1) * * *

(i) *General rule*. For further guidance, see § 1.861-9(b)(1)(i).

* * * * *

(8) *Guaranteed payments*. For further guidance, see § 1.861-9(b)(8).

* * * * *

■ **Par. 8.** Section 1.861-12 is amended by revising paragraph (e), adding paragraphs (f) and (g), and revising paragraph (k) to read as follows:

§ 1.861-12 Characterization rules and adjustments for certain assets.

* * * * *

(e) *Portfolio securities that constitute inventory or generate primarily gains*. For further guidance, see § 1.861-12T(e).

(f) *Assets connected with capitalized, deferred, or disallowed interest—(1) In general*. In the case of any asset in connection with which interest expense accruing during a taxable year is capitalized, deferred, or disallowed under any provision of the Code, the value of the asset for allocation and apportionment purposes is reduced by the principal amount of indebtedness the interest on which is so capitalized, deferred, or disallowed. Assets are connected with debt (the interest on which is capitalized, deferred, or disallowed) only if using the debt proceeds to acquire or produce the asset causes the interest to be capitalized, deferred, or disallowed.

(2) *Examples*. The following examples illustrate the application of paragraph (f)(1) of this section.

(i) *Example 1: Capitalized interest under section 263A—(A) Facts*. X is a domestic corporation that uses the tax book value method of apportionment. X has \$1,000x of indebtedness and incurs \$100x of interest expense. Using \$800x of the \$1,000x debt proceeds to produce tangible property, X capitalizes \$80x of interest expense under the rules of section 263A. X deducts the remaining \$20x of interest expense.

(B) *Analysis*. Because interest on \$800x of debt is capitalized under section 263A by reason of the use of debt proceeds to produce the tangible property, \$800x of the principal amount of X's debt is connected to the tangible property under paragraph (f)(1) of this section. Therefore, for purposes of apportioning the remaining \$20x of X's interest expense, the adjusted basis of the tangible property is reduced by \$800x.

(ii) *Example 2: Disallowed interest under section 163(l)—(A) Facts*. X, a domestic corporation, owns 100% of the stock of Y, a domestic corporation. X and Y file a consolidated return and use the tax book value method of apportionment. In Year 1, X makes a loan of \$1,000x to Y (Loan A) and Y then uses the Loan A proceeds to acquire in a cash purchase all the stock of a foreign corporation, Z. Interest on Loan A is payable in U.S. dollars or, at the option of Y, in stock of Z.

(B) *Analysis*. Under section 163(l), Loan A is a disqualified debt instrument because interest on Loan A is payable at the option of Y in stock of a related party to Y. Because Loan A is a

disqualified debt instrument, section 163(l)(1) disallows Y's interest deduction for interest payable on Loan A. However, the value of the Z stock is not reduced under paragraph (f)(1) of this section because the use of the Loan A proceeds to acquire the stock of Z is not the cause of Y's interest deduction being disallowed. Rather, the Loan A terms allowing interest to be paid in stock of Z is the cause of Y's interest deduction being disallowed under section 163(l). Therefore, no adjustment is made to Y's adjusted basis in the stock of Z for purposes of allocating the interest expense of X and Y.

(g) *Special rules for FSCs.* For further guidance, see § 1.861-12T(g) through (j).

(k) *Applicability date.* (1) Except as provided in paragraph (k)(2) of this section, this section applies to taxable years that both begin after December 31, 2017, and end on or after December 4, 2018.

(2) Paragraph (f) of this section applies to taxable years that end on or after December 16, 2019. For taxable years that both begin after December 31, 2017, and end on or after December 4, 2018, and before December 16, 2019, see § 1.861-12T(f) as contained in 26 CFR part 1 revised as of April 1, 2019.

■ **Par. 9.** Section 1.861-12T is amended by revising paragraph (f) to read as follows:

§ 1.861-12T Characterization rules and adjustments or certain assets (temporary).

(f) *Assets connected with capitalized, deferred, or disallowed interest.* For further guidance, see § 1.861-12(f).

§ 1.861-13T [REMOVED]

■ **Par. 10.** Section 1.861-13T is removed.

■ **Par. 11.** Section 1.861-14 is amended by:

- 1. Removing the last sentence in paragraph (d)(1) and paragraphs (d)(3) through (e)(5).
- 2. Adding paragraph (d)(3), reserved paragraph (d)(4), paragraph (e) heading, and paragraphs (e)(1) through (5).
- 3. Removing the heading for paragraph (e)(6).
- 4. Redesignating paragraph (e)(6)(i) as paragraph (e)(6).
- 5. Revising the heading for newly redesignated paragraph (e)(6).
- 6. Removing paragraphs (e)(6)(ii) and (f) through (j).
- 7. Adding paragraph (f), reserved paragraph (g), paragraph (h), reserved paragraphs (i) and (j), and paragraph (k).

The additions and revisions read as follows:

§ 1.861-14 Special rules for allocating and apportioning certain expenses (other than interest expense) of an affiliated group of corporations.

* * * * *

(d) * * *

(3) *Inclusion of financial corporations.* For further guidance, see § 1.861-14T(d)(3) through (4).

(4) [Reserved]

(e) *Expenses to be allocated and apportioned under this section—(1) Expenses not directly allocable to specific income-producing activities or property.* (i) The expenses that are required to be allocated and apportioned under the rules of this section are expenses that are not directly allocable to specific income-producing activities or property solely of the member of the affiliated group that incurred the expense, including (but not limited to) certain expenses related to research and experimental expenses, supportive functions, deductions under section 250, legal and accounting expenses, and litigation damages awards, prejudgment interest, and settlement payments. Interest expense of members of an affiliated group of corporations is allocated and apportioned under § 1.861-11T and not under the rules of this section. Expenses that are included in inventory costs or that are capitalized are not subject to allocation and apportionment under the rules of this section. In addition, stewardship expenses are not subject to allocation and apportionment under the rules of this section; instead, stewardship expenses of a taxpayer are allocated and apportioned on a separate entity basis without treating members of the affiliated group as a single taxpayer. See § 1.861-8(e)(4)(ii)(A).

(ii) For further guidance, see § 1.861-14T(e)(1)(ii).

(2) *Research and experimental expenditures.* R&E expenditures (as defined in § 1.861-17(a)) in the case of an affiliated group are allocated and apportioned under the rules of § 1.861-17 as if all members of the affiliated group were a single taxpayer. Thus, R&E expenditures are allocated to all gross intangible income of all members of the affiliated group reasonably connected with the relevant broad SIC code category. If fewer than all members of the affiliated group derive gross intangible income reasonably connected with that relevant broad SIC code category, then such expenditures are apportioned under the rules of this paragraph (e)(2) only among those members, as if those members were a single taxpayer.

(3) *Expenses related to supportive functions.* For further guidance, see § 1.861-14T(e)(3).

(4) *Section 250 deduction.* Except as provided in this paragraph (e)(4), the deduction allowed under section 250(a) (the section 250 deduction) to a member of an affiliated group is allocated and apportioned on a separate entity basis under the rules of § 1.861-8(e)(13) and (14). However, the section 250 deduction of a member of a consolidated group is not directly allocable to specific income-producing activities or property solely of the member of the affiliated group that is allowed the deduction. See § 1.1502-50 for rules on applying section 250 and §§ 1.250-1 through 1.250(b)-6 to a member of a consolidated group. In such case, the section 250 deduction is allocated and apportioned as if all members of the consolidated group are treated as a single corporation.

(5) *Legal and accounting fees and expenses; damages awards, prejudgment interest, and settlement payments.* Legal and accounting fees and expenses, as well as litigation or arbitral damages awards, prejudgment interest, and settlement payments, are allocated and apportioned under the rules of § 1.861-8(e)(5). To the extent that under § 1.861-14T(c)(2) and (e)(1)(ii) such expenses are not directly allocable to specific income-producing activities or property of one or more members of the affiliated group, such expenses must be allocated and apportioned as if all members of the affiliated group were a single corporation. Specifically, such expenses must be allocated to a class of gross income that takes into account the gross income which is generated, has been generated, or is reasonably expected to be generated by the other members of the affiliated group. If the expenses relate to the gross income of fewer than all members of the affiliated group as determined under § 1.861-14T(c)(2), then those expenses must be apportioned under the rules of § 1.861-14T(c)(2), as if those fewer members were a single corporation. Such expenses must be apportioned taking into account the apportionment factors contributed by the members of the group that are treated as a single corporation.

(6) *Charitable contribution expenses.*

(f) *Computation of FSC or DISC combined taxable income.* For further guidance, see § 1.861-14T(f) and (g).

(g) [Reserved]

(h) *Special rule for the allocation and apportionment of reserve expenses of a life insurance company.* Section 1.861-

8(e)(16) applies for purposes of allocating and apportioning reserve expenses with respect to dividends received by a life insurance company. The remaining reserve expenses of such company are allocated and apportioned under the rules of § 1.861–8 and this section.

(i) through (j) [Reserved]

(k) *Applicability date.* This section applies to taxable years beginning after December 31, 2019.

■ **Par. 12.** Section 1.861–14T is amended by:

- 1. Revising paragraphs (e)(1)(i) and (e)(2)(i).
- 2. Removing and reserving paragraph (e)(2)(ii).
- 3. Revising paragraphs (e)(4) and (5) and (h).
- 4. Adding footnote 1 at the end of paragraph (j) introductory text.

The revisions and additions read as follows:

§ 1.861–14T Special rules for allocating and apportioning certain expenses (other than interest expense) of an affiliated group of corporations (temporary).

* * * * *

(e) * * *

(1) * * *

(i) For further guidance, see § 1.861–14(e)(1)(i).

* * * * *

(2) * * *

(i) For further guidance, see § 1.861–14(e)(2)(i) and (ii).

* * * * *

(4) *Section 250 deduction.* For further guidance, see § 1.861–14(e)(4).

(5) *Legal and accounting fees and expenses; damages awards, prejudgment interest, and settlement payments.* For further guidance, see § 1.861–14(e)(5).

* * * * *

(h) *Special rule for allocation of reserve expenses of life insurance companies.* For further guidance, see § 1.861–14(h).

* * * * *

(j) * * *

¹ Examples 1 and 4 of this paragraph (j) apply to taxable years beginning before January 1, 2018.

* * * * *

■ **Par. 13.** Section 1.861–17 is revised to read as follows:

§ 1.861–17 Allocation and apportionment of research and experimental expenditures.

(a) *Scope.* This section provides rules for the allocation and apportionment of research and experimental expenditures that a taxpayer deducts, or amortizes and deducts, in a taxable year under section 174 or section 59(e) (applicable

to expenditures that are allowable as a deduction under section 174(a)) (*R&E expenditures*). R&E expenditures do not include any expenditures that are not deductible expenses by reason of the second sentence under § 1.482–7(j)(3)(i) (relating to CST Payments (as defined in § 1.482–7(b)(1)) owed to a controlled participant in a cost sharing arrangement).

(b) *Allocation*—(1) *In general.* The method of allocation and apportionment of R&E expenditures set forth in this section recognizes that research and experimentation is an inherently speculative activity, that findings may contribute unexpected benefits, and that the gross income derived from successful research and experimentation must bear the cost of unsuccessful research and experimentation. In addition, the method set forth in this section recognizes that successful R&E expenditures ultimately result in the creation of intangible property that will be used to generate income. Therefore, R&E expenditures ordinarily are considered deductions that are definitely related to gross intangible income (as defined in paragraph (b)(2) of this section) reasonably connected with the relevant SIC code category (or categories) of the taxpayer and therefore allocable to gross intangible income as a class related to the SIC code category (or categories) and apportioned under the rules in this section. For purposes of the allocation under this paragraph (b)(1), a taxpayer's SIC code category (or categories) are determined in accordance with the provisions of paragraph (b)(3) of this section. For purposes of this section, the term *intangible property* means intangible property (as defined in section 367(d)(4)), including intangible property either created or acquired by the taxpayer, that is derived from R&E expenditures.

(2) *Definition of gross intangible income.* The term *gross intangible income* means all gross income earned by a taxpayer that is attributable to a sale or license of intangible property (including income from platform contribution transactions described in § 1.482–7(b)(1)(ii), royalty income from the licensing of intangible property, or amounts taken into account under section 367(d) by reason of a transfer of intangible property), and the full amount of gross income from sales or leases of products or services if the income is derived directly or indirectly (in whole or in part) from intangible property. Gross intangible income also includes a distributive share of any amounts described in the previous sentence, but does not include

dividends or any amounts included in income under section 951, 951A, or 1293. See § 1.904–4(f)(2)(vi) for rules addressing the assignment of gross income, including gross intangible income, to a separate category by reason of certain disregarded payments to or from a taxpayer's foreign branch.

(3) *SIC code categories*—(i) *Allocation based on SIC code categories.*

Ordinarily, a taxpayer's R&E expenditures are incurred to produce gross intangible income that is reasonably connected with one or more relevant SIC code categories. Except as provided in paragraph (b)(3)(iv) of this section, where research and experimentation is conducted with respect to more than one SIC code category, the taxpayer may aggregate the categories for purposes of allocation and apportionment, provided the categories are in the same Major Group. However, the taxpayer may not subdivide any categories. Where research and experimentation is not clearly related to any SIC code category (or categories), it will be considered conducted with respect to all of the taxpayer's SIC code categories.

(ii) *Use of three digit standard industrial classification codes.* A taxpayer determines the relevant Major Groups and SIC code categories by reference to the two digit and three digit classification, respectively, of the Standard Industrial Classification Manual (SIC code). The SIC Manual is available at https://www.osha.gov/pls/imis/sic_manual.html.

(iii) *Consistency.* Once a taxpayer selects a SIC code category or Major Group for the first taxable year for which this section applies to the taxpayer, it must continue to use that category in following years unless the taxpayer establishes to the satisfaction of the Commissioner that, due to changes in the relevant facts, a change in the category is appropriate. Therefore, once a taxpayer elects a permissible aggregation of three digit SIC code categories into a two digit Major Group, it must continue to use that two digit category in following years unless the taxpayer establishes to the satisfaction of the Commissioner that, due to changes in the relevant facts, a change is appropriate.

(iv) *Wholesale trade and retail trade categories.* A taxpayer must use a SIC code category within the divisions of “wholesale trade” or “retail trade” if it is engaged solely in sales-related activities with respect to a particular category of products. In the case of a taxpayer that conducts material non-sales-related activities with respect to a particular category of products, all R&E

expenditures related to sales of the products must be allocated and apportioned as if the expenditures were reasonably connected to the most closely related three digit SIC code category other than those within the wholesale and retail trade divisions. For example, if a taxpayer engages in both the manufacturing and assembling of cars and trucks (SIC code 371) and in a wholesaling activity related to motor vehicles and motor vehicle parts and supplies (SIC code 501), the taxpayer must allocate and apportion all R&E expenditures related to both activities as if they relate solely to the manufacturing SIC code 371. By contrast, if the taxpayer engages only in the wholesaling activity related to motor vehicles and motor vehicle parts and supplies, the taxpayer must allocate and apportion all R&E expenditures to the wholesaling SIC code 501.

(c) *Exclusive apportionment.* Solely for purposes of applying this section to section 904 as the operative section, an amount equal to fifty percent of a taxpayer's R&E expenditures in a SIC code category (or categories) is apportioned exclusively to the residual grouping of U.S. source gross intangible income if research and experimentation that accounts for at least fifty percent of such R&E expenditures was performed in the United States. Similarly, an amount equal to fifty percent of a taxpayer's R&E expenditures in a SIC code category (or categories) is apportioned exclusively to the statutory grouping (or groupings) of foreign source gross intangible income in that SIC code category if research and experimentation that accounts for more than fifty percent of such R&E expenditures was performed outside the United States. If there are multiple separate categories with foreign source gross intangible income in the SIC code category, the fifty percent of R&E expenditures apportioned under the previous sentence is apportioned ratably to foreign source gross intangible income based on the relative amounts of gross receipts from gross intangible income in the SIC code category in each separate category, as determined under paragraph (d) of this section. Solely for purposes of determining whether fifty percent or more of R&E expenditures in a year are performed within or without the United States under this paragraph (c), a taxpayer's R&E expenditures with respect to a taxable year are determined by taking into account only the R&E expenditures incurred in such taxable year (without regard to whether such expenditures are capitalized under section 59(e) or any other provision in

the Code), and do not include amounts that were capitalized in a prior taxable year and are deducted in such taxable year.

(d) *Apportionment based on gross receipts from sales of products or services—(1) In general.* A taxpayer's R&E expenditures not apportioned under paragraph (c) of this section are apportioned between the statutory grouping (or among the statutory groupings) within the class of gross intangible income and the residual grouping within such class according to the rules in paragraphs (d)(1)(i) through (iv) of this section. See paragraph (b) of this section for defining the class of gross intangible income in relation to SIC code categories.

(i) A taxpayer's R&E expenditures not apportioned under paragraph (c) of this section are apportioned in the same proportions that:

(A) The amounts of the taxpayer's gross receipts from sales and leases of products (as measured by gross receipts without regard to cost of goods sold) or services that are related to gross intangible income within the statutory grouping (or statutory groupings) and in the residual grouping bear, respectively; to

(B) The total amount of such gross receipts in the class.

(ii) For purposes of this paragraph (d), gross receipts from sales and leases of products are related to gross intangible income if intangible property is embedded or used in connection with the manufacture or sale of such products, and gross income from services is related to gross intangible income if intangible property is incorporated in or directly or indirectly benefits such services. See paragraph (g)(7) of this section (*Example 7*). The amount of the gross receipts used to apportion R&E expenditures also includes gross receipts from sales and leases of products or services of any controlled or uncontrolled party to the extent described in paragraphs (d)(3) and (4) of this section. A royalty or other amount paid to the taxpayer for intangible property constitutes gross intangible income, but is not considered part of gross receipts arising from the sale or lease of a product or service, and so is not taken into account in apportioning the taxpayer's R&E expenditures to its gross intangible income.

(iii) The statutory grouping (or groupings) or residual grouping to which the gross receipts are assigned is the grouping to which the gross intangible income related to the sale, lease, or service is assigned. In cases where the gross intangible income of the

taxpayer is income not described in paragraph (d)(3) or (4) of this section, the grouping to which the taxpayer's gross receipts and the gross intangible income are assigned is the same. In cases where the taxpayer's gross intangible income is related to sales, leases, or services described in paragraph (d)(3) or (4) of this section, the gross receipts that will be used for purposes of this paragraph (d) are the gross receipts of the controlled and uncontrolled parties that are taken into account under paragraphs (d)(3) and (4) of this section. The grouping to which the controlled or uncontrolled parties' gross receipts are assigned is determined based on the grouping of the taxpayer's gross intangible income attributable to the license, sale, or other transfer of intangible property to such controlled or uncontrolled party as described in paragraph (d)(3)(i) or (d)(4)(i) of this section, and not the grouping to which the gross receipts would be assigned if the assignment were based on the income earned by the controlled or uncontrolled party. See paragraph (g)(1) of this section (*Example 1*). For purposes of applying this paragraph (d)(1)(iii) to section 250 or section 904 as the operative section, the assignment of gross receipts to the general and foreign branch categories is made after taking into account the assignment of gross intangible income to those categories as adjusted by reason of disregarded payments under the rules of § 1.904-4(f)(2)(vi), and by making similar adjustments to gross receipts under the principles of § 1.904-4(f)(2)(vi).

(iv) For purposes of applying this section to section 904 as the operative section, because a United States person's gross intangible income cannot include income assigned to the section 951A category, no R&E expenditures of a United States person are apportioned to foreign source income in the section 951A category.

(2) *Apportionment in excess of gross income.* Amounts apportioned under this section may exceed the amount of gross income related to the SIC code category within the statutory or residual grouping. In such case, the excess is applied against other gross income within the statutory or residual grouping. See § 1.861-8(d)(1) for applicable rules where the apportionment results in an excess of deductions over gross income within the statutory or residual grouping.

(3) *Sales or services of uncontrolled parties—(i) In general.* For purposes of the apportionment within a class under paragraph (d)(1) of this section, if a taxpayer reasonably expects an

uncontrolled party to (through a license, purchase, or transfer): Acquire intangible property that would arise from the taxpayer's current R&E expenditures; acquire products in which such intangible property is embedded or used in connection with the manufacture or sale of such products; or receive services that incorporate or directly or indirectly benefit from such intangible property, then the gross receipts of the uncontrolled party from sales, licenses, leases, or services of the particular products or services in which the taxpayer's intangible property is embedded or incorporated or which the taxpayer's intangible property directly or indirectly benefitted are taken into account. If the taxpayer has previously licensed, sold, or transferred intangible property related to a SIC code category to an uncontrolled party, the taxpayer is presumed to expect to license, sell, or transfer to that uncontrolled party all future intangible property related to the same SIC code category. The presumption described in the preceding sentence may be rebutted by the taxpayer with facts that demonstrate that the taxpayer reasonably expects not to license, sell, or transfer future intangible property to the uncontrolled party.

(ii) *Definition of uncontrolled party.* For purposes of this paragraph (d)(3), the term *uncontrolled party* means a person that is not a controlled party as defined in paragraph (d)(4)(ii) of this section.

(iii) *Sales of components.* In the case of a sale or lease of a product by an uncontrolled party that is derived from the taxpayer's intangible property but is incorporated as a component of a larger product (for example, where the product incorporating the intangible property is a component of a large machine), only the portion of the gross receipts from the larger product that are attributable to the component derived from the intangible property is included. For purposes of the preceding sentence, a reasonable estimate based on the principles of section 482 must be made. See paragraph (g)(4)(ii)(B)(3) of this section (*Example 4*).

(iv) *Reasonable estimates of gross receipts.* If the amount of gross receipts of an uncontrolled party is unknown, a reasonable estimate of gross receipts must be made annually. Appropriate economic analyses, based on the principles of section 482, must be used to estimate gross receipts. See paragraph (g)(5)(ii)(B)(3)(ii) of this section (*Example 5*).

(4) *Sales or services of controlled parties*—(i) *In general.* For purposes of the apportionment within a class under

paragraph (d)(1) of this section, if the controlled party is reasonably expected to (through a license, sale, or transfer): Acquire intangible property that would arise from the taxpayer's current R&E expenditures; acquire products in which such intangible property is embedded or used in connection with the manufacture or sale of such products; or receive services that incorporate or directly or indirectly benefit from such intangible property, then the gross receipts of the controlled party from all of its sales, licenses, leases, or services are taken into account. Except to the extent provided in paragraph (d)(4)(iv) of this section, if the taxpayer has previously licensed, sold, or transferred intangible property related to a SIC code category to a controlled party, the taxpayer is presumed to expect to license, sell, or transfer to that controlled party all future intangible property related to the same SIC code category. The presumption described in the preceding sentence may be rebutted by the taxpayer with facts that demonstrate that the taxpayer will not license, sell, or transfer future intangible property to the controlled party.

(ii) *Definition of a controlled party.* For purposes of this paragraph (d)(4), the term *controlled party* means any person that has a relationship to the taxpayer specified in section 267(b) or 707(b), or is a member of a controlled group of corporations (within the meaning of section 267(f)) to which the taxpayer belongs. Because an affiliated group is treated as a single taxpayer, a member of an affiliated group is not a controlled party. See paragraph (e) of this section.

(iii) *Gross receipts not to be taken into account more than once.* Sales, licenses, leases, or services among the taxpayer, controlled parties, and uncontrolled parties are not taken into account more than once; in such a situation, the amount of gross receipts of the selling person must be subtracted from the gross receipts of the buying person. Therefore, the gross receipts taken into account under paragraph (d)(4)(i) of this section generally reflect the gross receipts from sales made to end users.

(iv) *Effect of cost sharing arrangements.* If the controlled party has entered into a cost sharing arrangement, in accordance with the provisions of § 1.482–7, with the taxpayer for the purpose of developing intangible property, then the taxpayer is not reasonably expected to license, sell, or transfer to that controlled party, directly or indirectly, intangible property that would arise from the taxpayer's share of the R&E expenditures with respect to the cost

shared intangibles as defined in § 1.482–7(j)(1)(i). Therefore, solely for purposes of apportioning a taxpayer's R&E expenditures (which do not include the amount of CST Payments received by the taxpayer; see paragraph (a) of this section) that are intangible development costs (as defined in § 1.482–7(d)) with respect to a cost sharing arrangement, the controlled party's gross receipts are not taken into account for purposes of paragraphs (d)(1) and (d)(4)(i) of this section.

(5) *Application of section 864(e)(3).* Section 864(e)(3) and § 1.861–8(d)(2) do not apply for purposes of this section.

(e) *Affiliated groups.* See § 1.861–14(e)(2) for rules on allocating and apportioning R&E expenditures of an affiliated group (as defined in § 1.861–14(d)).

(f) *Special rules for partnerships*—(1) *R&E expenditures.* For purposes of applying this section, if R&E expenditures are incurred by a partnership in which the taxpayer is a partner, the taxpayer's R&E expenditures include the taxpayer's distributive share of the partnership's R&E expenditures.

(2) *Purpose and location of expenditures.* In applying exclusive apportionment under paragraph (c) of this section, a partner's distributive share of R&E expenditures incurred by a partnership is treated as incurred by the partner for the same purpose and in the same location as incurred by the partnership.

(3) *Apportionment based on gross receipts.* In applying the remaining apportionment under paragraph (d) of this section, if a taxpayer is a partner in a partnership that incurs R&E expenditures described in paragraph (f)(1) of this section and the taxpayer is not reasonably expected to license, sell, or transfer to the partnership (directly or indirectly) intangible property that would arise from the taxpayer's current R&E expenditures, in the manner described in paragraph (d)(3)(i) or (d)(4)(i) of this section, then the taxpayer's gross receipts in a SIC code category include only the taxpayer's share of any gross receipts in the SIC code category of the partnership. For purposes of the preceding sentence, the taxpayer's share of gross receipts is proportionate to the taxpayer's distributive share of the partnership's gross income in the product category. However, if the taxpayer is reasonably expected to license, sell, or transfer to the partnership (directly or indirectly) intangible property that would arise from the taxpayer current R&E expenditures, in the manner described in paragraph (d)(3)(i) or (d)(4)(i) of this

section, then the taxpayer's gross receipts in a SIC code category include the full amount of any gross receipts in the SIC code category of the partnership as provided in paragraph (d)(3)(i) or (d)(4)(i) of this section.

(g) *Examples.* The following examples illustrate the application of the rules in this section.

(1) *Example 1: Controlled party and single product—(i) Facts.* X, a domestic corporation, is a manufacturer and distributor of small gasoline engines for lawnmowers. Gasoline engines are a product within the category, Engines and Turbines (SIC Industry Group 351). Y, a wholly owned foreign subsidiary of X, also manufactures and sells these engines abroad. X owns no other foreign subsidiaries. During Year 1, X incurred R&E expenditures of \$60,000x, which it deducts under section 174 as a current expense, to invent and patent a new and improved gasoline engine. All of the research and experimentation was performed in the United States. Also in Year 1, the domestic gross receipts of X from sales of gasoline engines total \$500,000x and foreign gross receipts of Y from sales of gasoline engines total \$300,000x. X provides technology for the manufacture of engines to Y through a license that requires the payment of an arm's length royalty. Because X has licensed its intangible property to Y related to the SIC code, it is presumed to reasonably expect to license the intangible property that would be developed from the current research and experimentation. In Year 1, X's gross income is \$210,000x, of which \$140,000x is U.S. source income from domestic sales of gasoline engines, \$40,000x is income included under section 951A, all of which relates to Y's foreign source income from sales of gasoline engines, \$20,000x is foreign source royalties from Y, and \$10,000x is U.S. source interest income. None of the foreign source royalties are allocable to passive category income of Y, and therefore, under §§ 1.904–4(d) and 1.904–5(c)(3), the foreign source royalties are general category income to X.

(ii) *Analysis—(A) Allocation.* The R&E expenditures were incurred in connection with developing intangible property related to small gasoline engines and they are definitely related to X's items of gross intangible income related to the SIC code category 351, namely gross income from the sale of small gasoline engines in the United States and royalties received from subsidiary Y, a foreign manufacturer of gasoline engines. Accordingly, under paragraph (b) of this section, the R&E expenditures are allocable to the class of

gross intangible income related to SIC code category 351, all of which is general category income of X. X's U.S. source interest income and income included under section 951A are not within this class of gross intangible income and, therefore, no portion of the R&E expenditures are allocated to the U.S. source interest income or foreign source income in the section 951A category.

(B) *Apportionment—(1) In general.* For purposes of applying this section to section 904 as the operative section, the statutory grouping of gross intangible income is foreign source general category income and the residual grouping of gross intangible income is U.S. source income.

(2) *Exclusive apportionment.* Under paragraph (c) of this section, because at least 50% of X's research and experimental activity was performed in the United States, 50% of the R&E expenditures, or \$30,000x ($\$60,000x \times 50\%$), is apportioned exclusively to the residual grouping of U.S. source gross intangible income. The remaining 50% of the R&E expenditures is then apportioned between the statutory and residual groupings on the basis of the relative amounts of gross receipts from sales of small gasoline engines by X and Y that are related to the U.S. source sales income and foreign source royalty income, respectively.

(3) *Apportionment based on gross receipts.* After taking into account exclusive apportionment, X has \$30,000x ($\$60,000x - \$30,000x$) of R&E expenditures that must be apportioned between the statutory and residual groupings. Under paragraph (d)(4) of this section, Y's gross receipts within the SIC code are taken into account in apportioning X's R&E expenditures. Although X has gross intangible income of \$140,000x from domestic sales and \$20,000x in royalties from Y, X's R&E expenditures are apportioned to that gross intangible income on the basis of the relative amounts of gross receipts arising from the sale of products by X and Y (and not the relative amounts of X's gross intangible income) in the statutory and residual groupings. Therefore, under paragraphs (d)(1) and (4) of this section $\$11,250x$ ($\$30,000x \times \$300,000x / (\$500,000x + \$300,000x)$) is apportioned to the statutory grouping of X's gross intangible income attributable to its license of intangible property to Y, or foreign source general category income. No portion of the gross receipts by X or Y are disregarded under section 864(e)(3), regardless of whether the income related to those sales is eligible for a deduction under section 250(a)(1)(A). The remaining \$18,750x

($\$30,000x \times \$500,000x / (\$500,000x + \$300,000x)$) is apportioned to the residual grouping of gross intangible income, or U.S. source income.

(4) *Summary.* Accordingly, for purposes of the foreign tax credit limitation, \$11,250x of X's R&E expenditures are apportioned to foreign source general category income, and \$48,750x ($\$30,000x + \$18,750x$) of X's R&E expenditures are apportioned to U.S. source income.

(2) *Example 2: Controlled party and two products in same SIC code category—(i) Facts.* The facts are the same as in paragraph (g)(1)(i) of this section (the facts in *Example 1*), except that X also spends \$30,000x in Year 1 for research on steam turbines, all of which is performed in the United States, and X has steam turbine gross receipts in the United States of \$400,000x. X's foreign subsidiary Y neither manufactures nor sells steam turbines. The steam turbine research is in addition to the \$60,000x in R&E expenditures incurred by X on gasoline engines for lawnmowers. X thus has \$90,000x of R&E expenditures. X's gross income is \$260,000x, of which \$140,000x is U.S. source income from domestic sales of gasoline engines, \$50,000x is U.S. source income from domestic sales of steam turbines, \$40,000x is income included under section 951A all of which relates to foreign source income derived from Y's sales of gasoline engines, \$20,000x is foreign source royalties from Y, and \$10,000x is U.S. source interest income.

(ii) *Analysis—(A) Allocation.* X's R&E expenditures generate gross intangible income from sales of small gasoline engines and steam turbines. Both of these products are in the same three digit SIC code category, Engines and Turbines (SIC Industry Group 351). Therefore, under paragraph (a) of this section, X's R&E expenditures are definitely related to all items of gross intangible income attributable to SIC code category 351. These items of X's gross intangible income are gross income from the sale of small gasoline engines and steam turbines in the United States and royalties from foreign subsidiary Y, a foreign manufacturer and seller of small gasoline engines. X's U.S. source interest income and income included under section 951A is not within this class of gross intangible income and, therefore, no portion of X's R&E expenditures are allocated to the U.S. source interest income or income in the section 951A category.

(B) *Apportionment—(1) In general.* For purposes of applying this section to section 904 as the operative section, the statutory grouping of gross intangible

income is foreign source general category income and the residual grouping of gross intangible income is U.S. source income.

(2) *Exclusive apportionment.* Under paragraph (c) of this section, because at least 50% of X's research and experimental activity was performed in the United States, 50% of the R&E expenditures, or $\$45,000x$ ($\$90,000x \times 50\%$), are apportioned exclusively to the residual grouping of U.S. source gross intangible income. The remaining 50% of the R&E expenditures is then apportioned between the statutory and residual groupings on the basis of the relative amounts of gross receipts of small gasoline engines and steam turbines by X and Y with respect to which gross intangible income is foreign source general category income and U.S. source income.

(3) *Apportionment based on gross receipts.* After taking into account exclusive apportionment, X has $\$45,000x$ ($\$90,000x - \$45,000x$) of R&E expenditures that must be apportioned between the statutory and residual groupings. Although X has gross intangible income of $\$190,000x$ from domestic sales and $\$20,000x$ in royalties from Y, X's R&E expenditures are apportioned to that gross intangible income on the basis of the relative amounts of gross receipts arising from the sale of products by X and Y (and not the relative amounts of X's gross intangible income) in the statutory and residual groupings. Even though a portion of the R&E expenditures that must be apportioned are attributable to research performed with respect to steam turbines, and Y does not sell steam turbines, because Y is reasonably expected to license all intangible property related to SIC code category 351 from X, including intangible property related to steam turbines, under paragraphs (d)(1) and (4) of this section $\$11,250x$ ($\$45,000x \times \$300,000x / (\$500,000x + \$400,000x + \$300,000x)$) is apportioned to the statutory grouping of gross intangible income, or foreign source general category income attributable to the royalty income to which the gross receipts of Y are related. The remaining $\$33,750x$ ($\$45,000x \times (\$500,000x + \$400,000x) / (\$500,000x + \$400,000x + \$300,000x)$) is apportioned to the residual grouping of gross intangible income, or U.S. source gross income.

(4) *Summary.* Accordingly, for purposes of the foreign tax credit limitation, $\$11,250x$ of X's R&E expenditures are apportioned to foreign source general category income and $\$78,750x$ ($\$45,000x + \$33,750x$) of X's

R&E expenditures are apportioned to U.S. source income.

(3) *Example 3: Cost sharing arrangement—(i) Facts—(A) Acquisitions and transfers by X.* The facts are the same as in paragraph (g)(1)(i) of this section (the facts in *Example 1*) except that, in Year 2, X and Y terminate the license for the manufacture of engines that was in place in Year 1 and enter into a cost sharing arrangement, in accordance with the provisions of § 1.482-7, to share the costs and risks of developing the intangible property related to the engines. Pursuant to the cost sharing arrangement, X has the exclusive rights to exploit the cost shared intangibles within the United States, and Y has the exclusive rights to exploit the cost shared intangibles outside the United States. X's and Y's shares of the reasonably anticipated benefits from the cost shared intangibles are 70% and 30%, respectively. In Year 2, Y makes a PCT Payment (as defined in § 1.482-7(b)(1)(ii)) of $\$50,000x$ that is characterized and sourced as a royalty for a license of small gasoline engine technology.

(B) *Gross receipts and R&E expenditures.* In Year 2, X and Y continue to sell gasoline engines, with gross receipts of $\$600,000x$ in the United States by X and $\$400,000x$ abroad by Y. X incurs intangible development costs associated with the cost shared intangibles of $\$100,000x$ in Year 2, which consist exclusively of research activities conducted in the United States. Y also makes a $\$30,000x$ CST Payment (as defined in § 1.482-7(b)(1)(i)) under the cost sharing arrangement. X is entitled to deduct $\$70,000x$ of its intangible development costs ($\$100,000x$ less the $\$30,000x$ CST Payment by Y) by reason of the second sentence under § 1.482-7(j)(3)(i) (relating to CST Payments).

(C) *Gross income of X.* In Year 2, X's gross income is $\$360,000x$, of which $\$200,000x$ is U.S. source income from domestic sales of small gasoline engines, $\$50,000x$ is foreign source general category income attributable to the PCT Payment, $\$100,000x$ is income included under section 951A (all of which relates to foreign source income derived from engine sales by Y), and $\$10,000x$ is U.S. source interest income.

(ii) *Analysis—(A) Allocation.* The $\$70,000x$ of R&E expenditures incurred in Year 2 by X in connection with small gasoline engines are definitely related to the items of gross intangible income related to the SIC code category, namely gross income from the sale of small gasoline engines in the United States and PCT Payments from Y. Accordingly,

under paragraph (a) of this section, the R&E expenditures are allocable to this class of gross intangible income. X's U.S. source interest income and income included under section 951A are not within this class of gross intangible income and, therefore, no portion of X's R&E expenditures is allocated to X's U.S. source interest income or section 951A category income.

(B) *Apportionment—(1) In general.* For purposes of applying this section to section 904 as the operative section, the statutory grouping of gross intangible income is foreign source general category income, and the residual grouping of gross intangible income is U.S. source income.

(2) *Exclusive apportionment.* Under paragraph (c) of this section, because at least 50% of X's research and experimentation in Year 2 was performed in the United States, 50% of the R&E expenditures, or $\$35,000x$ ($\$70,000x \times 50\%$), is apportioned exclusively to the residual grouping of gross intangible income, U.S. source income.

(3) *Apportionment based on gross receipts.* Although X has gross intangible income of $\$200,000x$ from domestic sales and $\$50,000x$ as a PCT Payment from Y, X's R&E expenditures are apportioned to its gross intangible income on the basis of the relative amounts of gross receipts arising from the sale of products by X (and not the relative amounts of X's gross intangible income) in the statutory and residual groupings. Under paragraph (d)(4)(iv) of this section, because of the cost sharing arrangement, Y's gross receipts from sales are not taken into account in apportioning X's R&E expenditures that are intangible development costs with respect to the cost sharing arrangement. Because all of the gross receipts from sales that are taken into account under paragraph (d)(1) of this section relate to gross intangible income that is included in the residual grouping, $\$35,000x$ is apportioned to the residual grouping of gross intangible income, or U.S. source income.

(4) *Summary.* Accordingly, for purposes of the foreign tax credit limitation, $\$70,000x$ of X's R&E expenditures are apportioned to U.S. source income.

(4) *Example 4: Uncontrolled party—(i) Facts—(A) X's R&E expenditures.* X, a domestic corporation, is engaged in continuous research and experimentation to improve the quality of the products that it manufactures and sells, which are floodlights, flashlights, fuse boxes, and solderless connectors. All of these products are in the same three digit SIC code category, Electric

Lighting and Wiring Equipment (SIC Industry Group 364). X incurs \$100,000x of R&E expenditures in Year 1 that is performed exclusively in the United States. As a result of this research activity, X acquires patents that it uses in its own manufacturing activity.

(B) *License to Y and Z.* In Year 1, X licenses its floodlight patent to Y and Z, uncontrolled parties, for use in their own territories, Countries Y and Z, respectively. Y pays X a royalty of \$3,000x plus \$0.20x for each unit sold. Gross receipts from sales of floodlights by Y for the taxable year are \$135,000x (30,000 units at \$4.50x per unit), and the royalty is \$9,000x ($\$3,000x + \$0.20x/\text{unit} \times 30,000 \text{ units}$). Y has sales of other products of \$500,000x. Z pays X a royalty of \$3,000x plus \$0.30x for each unit sold. Z manufactures 30,000 floodlights in the taxable year, and the royalty is \$12,000x ($\$3,000x + \$0.30x/\text{unit} \times 30,000 \text{ units}$). The dollar value of Z's gross receipts from floodlight sales is not known to X because, in this case, the floodlights are not sold separately by Z but are instead used as a component in Z's manufacture of lighting equipment for theaters. However, a reasonable estimate of Z's gross receipts attributable to the floodlights, based on the principles of section 482, is \$120,000x. The gross receipts from sales of all Z's products, including the lighting equipment for theaters, are \$1,000,000x. Because X has licensed its intangible property to Y and Z related to the SIC code, it is presumed to reasonably expect to license the intangible property that would be developed from the current research and experimentation.

(C) *X's gross receipts and gross income.* X's gross receipts from sales of floodlights for the taxable year are \$500,000x and its sales of its other products (flashlights, fuse boxes, and solderless connectors) are \$400,000x. X has gross income of \$500,000x, consisting of U.S. source gross income from domestic sales of floodlights, flashlights, fuse boxes, and solderless connectors of \$479,000x, and foreign source gross income from royalties of \$9,000x and \$12,000x from foreign corporations Y and Z, respectively. The royalty income is general category income to X under § 1.904-4(b)(2)(ii).

(ii) *Analysis—(A) Allocation.* X's R&E expenditures are definitely related to all of the gross intangible income from the products that it produces, which are floodlights, flashlights, fuse boxes, and solderless connectors. All of these products are in SIC code category 364. Therefore, under paragraph (b) of this section, X's R&E expenditures are

definitely related to the class of gross intangible income related to SIC code category 364 and to all items of gross intangible income attributable to the class. These items of X's gross intangible income are gross income from the sale of floodlights, flashlights, fuse boxes, and solderless connectors in the United States and royalties from Corporations Y and Z.

(B) *Apportionment—(1) In general.* For purposes of applying this section to section 904 as the operative section, the statutory grouping of gross intangible income is foreign source general category income, and the residual grouping of gross intangible income is U.S. source income.

(2) *Exclusive apportionment.* Under paragraph (c) of this section, because at least 50% of X's research and experimentation was performed in the United States, 50% of the R&E expenditures, or \$50,000x ($\$100,000x \times 50\%$), is apportioned exclusively to the residual grouping of U.S. source gross intangible income.

(3) *Apportionment based on gross receipts.* After taking into account exclusive apportionment, X has \$50,000x ($\$100,000x - \$50,000x$) of R&E expenditures that must be apportioned between the statutory and residual groupings. Under paragraph (d)(3)(i) of this section, gross receipts from sales of Y and Z are taken into account in apportioning X's R&E expenditures. Although X has gross intangible income of \$479,000x from domestic sales and \$21,000x in royalties from Y and Z, X's R&E expenditures are apportioned to its gross intangible income on the basis of the relative amounts of gross receipts arising from the sale of products by X, Y and Z (and not the relative amounts of X's gross intangible income) in the statutory and residual groupings. In addition, under paragraph (d)(3)(iii) of this section only the portion of Z's gross receipts that are attributable to the floodlights that incorporate the intangible property licensed from X, rather than Z's total gross receipts, are used for purposes of apportionment. All of X's gross receipts from sales in the entire SIC code category are included for purposes of apportionment on the basis of gross intangible income attributable to those sales. Under paragraph (d)(1) of this section, \$11,039x ($\$50,000x \times (\$135,000x + \$120,000x) / (\$900,000x + \$135,000x + \$120,000x)$) is apportioned to the statutory grouping of gross intangible income, or foreign source general category income. The remaining \$38,961x ($\$50,000x \times \$900,000x / (\$900,000x + \$135,000x + \$120,000x)$) is apportioned to the residual grouping of

gross intangible income, or U.S. source income.

(4) *Summary.* Accordingly, for purposes of the foreign tax credit limitation, \$11,039x of X's R&E expenditures are apportioned to foreign source general category income and \$88,961x ($\$50,000x + \$38,961x$) of X's R&E expenditures are apportioned to U.S. source income.

(5) *Example 5: Uncontrolled party and sublicense—(i) Facts.* X, a domestic corporation, is a cloud storage service provider. Cloud storage services are a service within the category, Computer Programming, Data Processing, and other Computer Related Services (SIC Industry Group 737). During Year 1, X incurs R&E expenditures of \$50,000x to invent and copyright new storage monitoring and management software. All of the research and experimentation is performed in the United States. X uses this software in its own business to provide services to customers. X also licenses a version of the software that can be used by other businesses that provide cloud storage services. X licenses the software to uncontrolled party U, which sub-licenses the software to other businesses that provide cloud storage services to customers. U does not use the software except to sublicense it. As a part of the licensing agreement with U, U and its sublicensees are only permitted to use the software in certain countries outside of the United States. Under the contract with U, U pays X a royalty of 50% on the amount it receives from its sublicensees that use the software to provide services to customers. Because X has licensed its intangible property to U related to the SIC code and U has sublicensed it to other businesses, it is presumed that X is reasonably expected to license the intangible property that would be developed from its current research and experimentation to U and that U would sublicense it to other businesses. In Year 1, X earns \$300,000x of gross receipts from providing cloud storage services within the United States. Further, in Year 1 U receives \$10,000x of royalty income from its sublicensees and pays a royalty of \$5,000x to X. Thus, X earns \$300,000x of U.S. source general category gross income and also earns \$5,000x of foreign source general category royalty income from licensing its software to U for use outside of the United States.

(ii) *Analysis—(A) Allocation.* The R&E expenditures were incurred in connection with the development of cloud computing software and they are definitely related to the items of gross intangible income related to the SIC Code category, namely gross income

from the storage monitoring and management software in the United States and royalties received from U. Accordingly, under paragraph (b) of this section, the R&E expenditures are allocable to this class of gross intangible income.

(B) *Apportionment—(1) In general.* For purposes of applying this section to section 904 as the operative section, the statutory grouping of gross intangible income is foreign source general category income, and the residual grouping of gross intangible income is U.S. source income.

(2) *Exclusive apportionment.* Under paragraph (c) of this section, because at least 50% of X's research and experimental activity was performed in the United States, 50% of the R&E expenditures, or \$25,000x (\$50,000x × 50%), is apportioned exclusively to the residual grouping of U.S. source gross intangible income.

(3) *Apportionment based on gross receipts—(i) In general.* After taking into account exclusive apportionment, X has \$25,000x (\$50,000x – \$25,000x) of R&E expenditures that must be apportioned between the statutory and residual groupings. Because X has licensed its intangible property related to the SIC code to U and U has licensed it to the sub-licensees, under paragraph (d)(3)(i) of this section, gross receipts from sales of U's sublicensees are taken into account in apportioning X's R&E expenditures. Although X has gross intangible income of \$300,000x from domestic sales of services and \$5,000x in royalties from U, X's R&E expenditures are apportioned to its gross intangible income on the basis of the relative amounts of gross receipts arising from the sale of services by X and U's sub-licensees (and not the relative amounts of X's gross intangible income) in the statutory and residual groupings.

(ii) *Determination of U's sub-licensee's gross receipts.* Under paragraph (d)(3)(iv) of this section, X can make a reasonable estimate of the gross receipts of U's sub-licensees from services incorporating the intangible property licensed by X by estimating, after an appropriate economic analysis, that U would charge a royalty of 5% of the sub-licensee's sales. U received a royalty of \$10,000x from the sub-licensees. X then determines U's sub-licensees' foreign sales by dividing the total royalty payments received by U by the royalty estimated rate (\$10,000x/.05 = \$200,000x).

(iii) *Results of apportionment based on gross receipts.* Therefore, under paragraphs (d)(1) and (3) of this section, \$10,000x (\$25,000x × \$200,000x/

(\$300,000x + \$200,000x)) is apportioned to the statutory grouping of gross intangible income, or foreign source general category income. The remaining \$15,000x (\$25,000x × \$300,000x/(\$300,000x + \$200,000x)) is apportioned to the residual grouping of gross intangible income, or U.S. source income.

(4) *Summary.* Accordingly, for purposes of the foreign tax credit limitation, \$10,000x of X's R&E expenditures are apportioned to foreign source general category income and \$40,000x (\$25,000x + \$15,000x) of X's R&E expenditures are apportioned to U.S. source income.

(6) *Example 6: Foreign branch—(i) Facts—(A) Overview for X.* X, a domestic corporation, owns FDE, a disregarded entity that is a foreign branch within the meaning of § 1.904–4(f)(3)(vii). FDE conducts activities solely in Country Y. FDE's functional currency is the U.S. dollar. X is a manufacturer and distributor of small gasoline engines for lawnmowers in the United States. Gasoline engines are a product within the category, Engines and Turbines (SIC Industry Group 351). FDE also manufactures and distributes small gasoline engines but only in Country Y. During Year 1, X incurred R&E expenditures of \$60,000x, which it deducts under section 174 as a current expense, to invent and patent a new and improved gasoline engine. All of the research and experimentation was performed in the United States. Also in Year 1, the domestic gross receipts of X from gasoline engines total \$500,000x. X provides technology for the manufacture of engines to FDE through a license. FDE compensates X for the technology with an arm's length royalty payment of \$10,000x, which is disregarded for Federal income tax purposes.

(B) *Overview for FDE.* FDE accrues and records on its books and records \$100,000x of gross income from sales of gasoline engines to unrelated persons. FDE's gross income is non-passive category income and is foreign source income. In Year 1, the foreign gross receipts of FDE from sales of gasoline engines total \$300,000x. The disregarded royalty payment from FDE to X is not recorded on FDE's separate books and records (as adjusted to conform to Federal income tax principles) within the meaning of paragraph § 1.904–4(f)(2)(i) because it is disregarded for Federal income tax purposes. However, the \$10,000x disregarded royalty payment would be allocable to foreign source gross income attributable to FDE under § 1.904–4(f)(2)(vi)(B)(1)(ii). Therefore, under § 1.904–4(f)(2)(vi)(A) the amount of

foreign source gross income attributable to FDE is adjusted downwards and the amount of foreign source gross income attributable to X is adjusted upward to take the \$10,000x disregarded royalty payment into account.

(C) *Assignment of X's gross income to separate categories.* In Year 1, X has U.S. source general category gross income of \$140,000x from domestic sales of gasoline engines. After application of § 1.904–4(f)(2)(vi)(A) to the disregarded payment made by FDE, X has \$10,000x of foreign source general category gross income and X also has \$90,000x of foreign source foreign branch category gross income.

(ii) *Analysis—(A) Allocation.* The R&E expenditures were incurred in connection with developing intangible property related to small gasoline engines and are definitely related to the items of gross intangible income related to the SIC code category 351, namely gross income from the sale of small gasoline engines in both the United States and Country Y.

(B) *Apportionment—(1) In general.* For purposes of applying this section to section 904 as the operative section, the statutory groupings of gross intangible income are foreign source general category income and foreign source foreign branch category income, and the residual grouping of gross intangible income is U.S. source income.

(2) *Exclusive apportionment.* Under paragraph (c) of this section, because at least 50% of X's research and experimental activity was performed in the United States, 50% of the R&E expenditures, or \$30,000 (\$60,000x × 50%), is apportioned exclusively to the residual grouping of U.S. source gross intangible income. The remaining 50% of the R&E expenditures is then apportioned between the statutory and residual groupings on the basis of the relative amounts of gross receipts from sales of small gasoline engines that are related to U.S. source income, foreign source general category income, and foreign source foreign branch category income.

(3) *Apportionment based on gross receipts.* After taking into account exclusive apportionment, X has \$30,000x (\$60,000x – \$30,000x) of R&E expenditures that must be apportioned between the statutory and residual groupings. Because X's gross intangible income is not described in paragraph (d)(3) or (4) of this section (that is, there is no gross intangible income related to sales, leases or services from controlled or uncontrolled parties that are incorporating intangible property that was licensed, sold, or transferred to controlled or uncontrolled parties), the

groupings to which the taxpayer's gross receipts and gross intangible income are assigned is the same. However, because the assignment of X's gross income to the foreign branch and general categories is made by taking into account disregarded payments under § 1.904-4(f)(2)(vi), the assignment of gross receipts between the general category and foreign branch category must be determined by making similar adjustments to X's gross receipts under the principles of § 1.904-4(f)(2)(vi). See paragraph (d)(1)(iii) of this section. Foreign gross receipts of FDE from gasoline engines total \$300,000x. However, those gross receipts are adjusted under the principles of § 1.904-4(f)(2)(vi) for purposes of apportioning the remaining R&E expenditures by reducing the gross receipts initially assigned to the foreign branch category by an amount equal to the ratio of the royalty income to FDE's gross income that is initially assigned to the foreign branch category. Accordingly, since the disregarded royalty payment of \$10,000x caused an adjustment equal to 10% of FDE's initial gross income of \$100,000x, 10% of the gross receipts or \$30,000x (10% × \$300,000x) are similarly assigned to the grouping of foreign source general category income, and the remaining \$270,000x of gross receipts are assigned to the grouping of foreign source foreign branch category income. Therefore, under paragraph (d)(1) of this section, $\$1,125x (\$30,000x \times \$30,000x / (\$500,000x + \$270,000x + \$30,000x))$ is apportioned to the statutory grouping of X's gross intangible income attributable to foreign source general category income. $\$10,125x (\$30,000x \times \$270,000x / (\$500,000x + \$270,000x + \$30,000x))$ is apportioned to the statutory grouping of X's foreign source foreign branch category income. The remaining $\$18,750x (\$30,000x \times \$500,000x / (\$500,000x + \$270,000x + \$30,000x))$ is apportioned to the residual grouping of gross intangible income or U.S. source income.

(7) *Example 7: Indirectly derived gross intangible income*—(i) *Facts*. P, a domestic corporation, develops and publishes an internet website that persons use (referred to as “users” and collectively referred to as “user base”) without a fee. P incurs R&E expenditures to update software code and write new software code to maintain the website and develop new products that are incorporated into the website. P's activities consist of services that fall within SIC code category 737 (computer programming, data processing, and other computer related

services). P sells space on its website for businesses to advertise to its user base in exchange for a fee. P's technology allows it to collect data on users and to use that data to effectively target advertisements. P does not grant rights to the technology or other intangible property to the businesses advertising on its website. In Year 1, P incurs R&E expenditures of \$60,000x, which it deducts under section 174. All the research and experimentation is performed in the United States. Also in Year 1, P earns gross receipts of \$200,000x from the sale of advertisements, all of which gives rise to U.S. source gross income.

(ii) *Analysis*—(A) *Allocation*. The R&E expenditures were incurred in connection with developing intangible property used for P's website. Accordingly, they are definitely related and allocable to gross intangible income derived directly or indirectly (in whole or in part) from that intangible property. Because P's advertising sales are dependent on the users attracted to its website, P's gross income from advertising is indirectly derived from intangible property and is included in gross intangible income. Accordingly, under paragraph (b) of this section, the R&E expenditures are allocable to the class of gross intangible income related to SIC code category 737, which consists of U.S. source income.

(B) *Apportionment*. Because all gross receipts from services that the intangible property directly or indirectly benefits result in U.S. source income, no apportionment is required.

(h) *Applicability date*. This section applies to taxable years beginning after December 31, 2019. However, taxpayers may choose to apply this section to taxable years beginning on or after January 1, 2018, and before January 1, 2020, provided they apply this section in its entirety and for any subsequent year beginning before January 1, 2020.

■ **Par. 14.** Section 1.861-20 is added to read as follows:

§ 1.861-20 Allocation and apportionment of foreign income taxes.

(a) *Scope*. This section provides rules for the allocation and apportionment of foreign income taxes, including allocating and apportioning foreign income taxes to separate categories for purposes of the foreign tax credit. The rules of this section apply except as modified under the rules for an operative section (as described in § 1.861-8(f)(1)). See, for example, §§ 1.704-1(b)(4)(viii)(d)(1), 1.904-6, 1.960-1(d)(3)(ii), and 1.965-5(b)(2). Paragraph (b) of this section provides definitions for the purposes of this

section. Paragraph (c) of this section provides the general rule for allocation and apportionment of foreign income taxes. Paragraph (d) of this section provides rules for assigning foreign gross income to statutory and residual groupings. Paragraph (e) of this section provides rules for allocating and apportioning foreign law deductions to foreign gross income in the statutory and residual groupings. Paragraph (f) of this section provides rules for apportioning foreign income taxes among statutory and residual groupings. Paragraph (g) of this section provides examples that illustrate the application of this section. Paragraph (h) of this section provides the applicability date for this section.

(b) *Definitions*. The following definitions apply for purposes of this section.

(1) *Corporation*. The term *corporation* has the same meaning as set forth in § 301.7701-2(b) of this chapter, and so includes a reverse hybrid.

(2) *Corresponding U.S. item*. The term *corresponding U.S. item* means the item of U.S. gross income or U.S. loss, if any, that arises from the same transaction or other realization event from which an item of foreign gross income also arises. An item of U.S. gross income or U.S. loss is a corresponding U.S. item even if the item of foreign gross income that arises from the same transaction or realization event differs in amount from the item of U.S. gross income or U.S. loss. A corresponding U.S. item does not include an item of gross income that is exempt, excluded, or eliminated from U.S. gross income, nor does it include an item of U.S. gross income or U.S. loss that is not realized, recognized or taken into account by the taxpayer in the U.S. taxable year in which the taxpayer paid or accrued the foreign income tax, except as provided in the next sentence. If a taxpayer pays or accrues a foreign income tax that is imposed on foreign taxable income that includes an item of foreign gross income by reason of a transaction or other realization event that also gave rise to an item of U.S. gross income or U.S. loss, but the U.S. and foreign taxable years end on different dates and the event occurred in the last U.S. taxable year that ends before the end of the foreign taxable year, then the item of U.S. gross income or U.S. loss is a corresponding U.S. item.

(3) *Disregarded entity*. The term *disregarded entity* means an entity described in § 301.7701-2(c)(2) of this chapter that is disregarded as an entity separate from its owner for Federal income tax purposes.

(4) *Foreign capital gain amount.* The term *foreign capital gain amount* means the portion of a distribution that under foreign law gives rise to gross income of a type described in section 301(c)(3)(A).

(5) *Foreign dividend amount.* The term *foreign dividend amount* means the portion of a distribution that is taxable as a dividend under foreign law.

(6) *Foreign gross income.* The term *foreign gross income* means the items of gross income included in the base upon which a foreign income tax is imposed.

This includes all items of foreign gross income included in the foreign tax base, even if the foreign taxable year begins in the U.S. taxable year that precedes the U.S. taxable year in which the taxpayer pays or accrues the foreign income tax.

(7) *Foreign income tax.* The term *foreign income tax* means an income, war profits, or excess profits tax within the meaning of § 1.901–2(a) that is a separate levy within the meaning of § 1.901–2(d) and that is paid or accrued to any foreign country (as defined in § 1.901–2(g)).

(8) *Foreign law CFC.* The term *foreign law CFC* means an entity that is a body corporate under foreign law, certain of the earnings of which are taxable to its shareholder under a foreign law inclusion regime.

(9) *Foreign law disposition.* The term *foreign law disposition* means an event that foreign law treats as a taxable disposition or deemed disposition of property but that Federal income tax law does not treat as a disposition causing the recognition of gain or loss (for example, marking property to market under foreign law).

(10) *Foreign law distribution.* The term *foreign law distribution* means an event that foreign law treats as a taxable distribution (other than by reason of a foreign law inclusion regime) but that Federal income tax law does not treat as a distribution of property within the meaning of section 317(a) (for example, a stock dividend described in section 305 or a foreign law consent dividend).

(11) *Foreign law inclusion regime.* A *foreign law inclusion regime* is a foreign law tax regime similar to the subpart F or GILTI regime described in sections 951 through 959, or the PFIC regime described in sections 1293 through 1295 (relating to qualified electing funds), that imposes a tax on a shareholder of an entity based on an inclusion in the shareholder's taxable income of certain of the entity's current earnings, whether or not the foreign law deems the entity's earnings to be distributed.

(12) *Foreign law inclusion regime income.* The term *foreign law inclusion regime income* means the items of foreign gross income included by a

taxpayer with respect to a foreign law CFC by reason of a foreign law inclusion regime.

(13) *Foreign law pass-through income.* The term *foreign law pass-through income* means the items of a reverse hybrid, computed under foreign law, that give rise to an inclusion in a taxpayer's foreign gross income under the laws of a foreign country imposing tax by reason of the taxpayer's ownership of the reverse hybrid.

(14) *Foreign taxable income.* The term *foreign taxable income* means foreign gross income reduced by the deductions that are allowed under foreign law.

(15) *Foreign taxable year.* The term *foreign taxable year* has the meaning set forth in section 7701(a)(23), applied by substituting "under foreign law" for the phrase "under subtitle A."

(16) *Partnership.* The term *partnership* has the same meaning as set forth in § 301.7701–2(c)(1) of this chapter.

(17) *Reverse hybrid.* The term *reverse hybrid* means a corporation that is a fiscally transparent entity (under the principles of § 1.894–1(d)(3)) or a branch under the laws of a foreign country imposing tax on the income of the entity.

(18) *Taxpayer.* The term *taxpayer* has the meaning described in § 1.901–2(f)(1).

(19) *U.S. capital gain amount.* The term *U.S. capital gain amount* means gain recognized by a taxpayer on the sale or exchange of stock or, in the case of a distribution with respect to stock, the portion of the distribution to which section 301(c)(3)(A) applies. However, a U.S. capital gain amount does not include any portion of the gain recognized by a taxpayer that is treated as a dividend under section 964(e) or 1248.

(20) *U.S. dividend amount.* The term *U.S. dividend amount* means the portion of a distribution that is made out of earnings and profits under Federal income tax law, including distributions out of previously taxed earnings and profits described in section 959(a) or (b). It also includes amounts included in gross income as a dividend by reason of section 1248 or section 964(e).

(21) *U.S. gross income.* The term *U.S. gross income* means the items of gross income that a taxpayer recognizes and includes in taxable income under Federal income tax law for its U.S. taxable year.

(22) *U.S. loss.* The term *U.S. loss* means the item of loss that a taxpayer recognizes and includes in taxable income under Federal income tax law for its U.S. taxable year.

(23) *U.S. return of capital amount.* The term *U.S. return of capital amount* means, in the case of the sale or exchange of stock, the adjusted basis of the stock, and in the case of a distribution with respect to stock, the portion of a distribution to which section 301(c)(2) applies.

(24) *U.S. taxable year.* The term *U.S. taxable year* has the same meaning as that of the term *taxable year* set forth in section 7701(a)(23).

(c) *General rule.* A foreign income tax is allocated and apportioned to the statutory and residual groupings that include the items of foreign gross income included in the base on which the tax is imposed. Each foreign income tax (that is, each separate levy) is allocated and apportioned separately under the rules in this section. A foreign income tax is allocated and apportioned to or among the statutory and residual groupings under the following steps:

(1) First, by assigning the items of foreign gross income to the groupings under the rules of paragraph (d) of this section;

(2) Second, by allocating and apportioning the deductions that are allowed under foreign law to the foreign gross income in the groupings under the rules of paragraph (e) of this section; and

(3) Third, by allocating and apportioning the foreign income tax by reference to the foreign taxable income in the groupings under the rules of paragraph (f) of this section.

(d) *Assigning items of foreign gross income to the statutory and residual groupings—(1) In general.* Each item of foreign gross income is assigned to a statutory or residual grouping. The amount of the item is determined under foreign law. However, Federal income tax law applies to characterize the item and the transaction or other realization event from which the item arose, and to assign it to a grouping. Except as provided in paragraph (d)(3) of this section, if a taxpayer pays or accrues a foreign income tax that is imposed on foreign taxable income that includes an item of foreign gross income with respect to which the taxpayer also realizes, recognizes, or takes into account a corresponding U.S. item, then the item of foreign gross income is assigned to the grouping to which the corresponding U.S. item is assigned. See paragraph (g)(2) of this section (*Example 1*). If the corresponding U.S. item is a U.S. loss (or zero), the foreign gross income is assigned to the grouping to which a gain would be assigned had the transaction or other realization event given rise to a gain, rather than a U.S. loss (or zero), for Federal income tax

purposes, and not (if different) to the grouping to which the U.S. loss is allocated and apportioned in computing U.S. taxable income. Paragraph (d)(3) of this section provides special rules regarding the assignment of the item of foreign gross income in particular circumstances.

(2) *Items of foreign gross income with no corresponding U.S. item*—(i) *In general.* The rules in paragraphs (d)(2)(ii) and (iii) of this section apply for purposes of characterizing an item of foreign gross income and assigning it to a grouping if the taxpayer does not realize, recognize, or take into account a corresponding U.S. item. But see paragraphs (d)(3)(i)(C) and (d)(3)(iii) of this section for special rules with respect to items of foreign gross income attributable to foreign law pass-through income and foreign law inclusion regime income.

(ii) *Foreign gross income from U.S. nonrecognition event, or U.S. recognition event that falls in a different U.S. taxable year*—(A) *In general.* If a taxpayer recognizes an item of foreign gross income arising from a transaction or other foreign realization event that does not result in the recognition of gross income or loss under Federal income tax law in the same U.S. taxable year in which the foreign income tax is paid or accrued or (in the circumstance described in the last sentence of paragraph (b)(2) of this section) in the immediately preceding U.S. taxable year, then the item of foreign gross income is characterized and assigned to the grouping to which the corresponding U.S. item (or the items described in paragraph (d)(3) of this section that are used to assign certain items of foreign gross income to the statutory and residual groupings) would be assigned if the event giving rise to the foreign gross income resulted in the recognition of gross income or loss under Federal income tax law in the U.S. taxable year in which the foreign income tax is paid or accrued.

(B) *Foreign law distributions.* An item of foreign gross income that a taxpayer includes as a result of a foreign law distribution with respect to either stock or a partnership interest is assigned to the same statutory or residual groupings to which the foreign gross income would be assigned if a distribution of property in the amount of the taxable distribution under foreign law were made for Federal income tax purposes on the date on which the foreign law distribution occurred. See paragraph (g)(6) of this section (*Example 5*). See paragraph (d)(3)(i)(B) of this section for rules regarding the assignment of foreign gross income arising from a

distribution with respect to stock. For purposes of applying paragraph (d)(3)(i)(B) of this section to a foreign law distribution, the U.S. dividend amount, U.S. capital gain amount, and U.S. return of capital amount are computed as if the distribution occurred on the date the distribution occurs for foreign law purposes. See § 1.960–1(d)(3)(ii) for rules for assigning foreign gross income arising from a foreign law distribution to income groups or PTEP groups for purposes of section 960 as the operative section.

(C) *Foreign law dispositions.* A foreign gross income item of gain that a taxpayer includes as a result of a foreign law disposition of property is assigned to the grouping to which a corresponding U.S. item of gain or loss would be assigned on a taxable disposition of the property under Federal income tax law in exchange for an amount equal to the gross receipts or other value used under foreign law to determine the amount of the items of foreign gross income arising from the foreign law disposition in the U.S. taxable year in which the taxpayer paid or accrued the foreign income tax. For example, an item of foreign gross income that results from a deemed disposition of stock under a foreign law mark-to-market regime is assigned under the rules of this paragraph (d)(2)(ii)(C) as though a taxable disposition of the stock occurred under Federal income tax law for an amount equal to the fair market value determined under foreign law for purposes of marking the stock to market. See paragraph (g)(3) of this section (*Example 2*).

(iii) *Foreign gross income of a type that is recognized but excluded from U.S. gross income*—(A) *In general.* If a taxpayer recognizes an item of foreign gross income that is a type of recognized gross income that Federal income tax law excludes from U.S. gross income, then the item of foreign gross income is assigned to the grouping to which the item of gross income would be assigned if it were included in U.S. gross income. See paragraph (g)(4) of this section (*Example 3*). Notwithstanding the first sentence of this paragraph (d)(2)(iii)(A), foreign gross income that is attributable to a base difference is assigned under paragraph (d)(2)(iii)(B) of this section.

(B) *Base differences.* If a taxpayer recognizes an item of foreign gross income that is attributable to a base difference, then the item of foreign gross income is assigned to the residual grouping. But see § 1.904–6(b)(1) (assigning foreign gross income attributable to a base difference to foreign source income in the separate

category described in section 904(d)(2)(H)(i)) for purposes of applying section 904 as the operative section). An item of foreign gross income is attributable to a base difference under this paragraph (d)(2)(iii)(B) only if the item results from the receipt of one of the following items:

(1) Death benefits described in section 101;

(2) Gifts and inheritances described in section 102;

(3) Contributions to capital described in section 118;

(4) Money or other property in exchange for stock described in section 1032 (including by reason of a transfer described in section 351(a)); or

(5) Money or other property in exchange for a partnership interest described in section 721.

(3) *Special rules for assigning certain items of foreign gross income to a statutory or residual grouping*—(i) *Items of foreign gross income that a taxpayer includes by reason of its ownership of an interest in a corporation*—(A) *Scope.* The rules of this paragraph (d)(3)(i) apply to characterize and assign to a statutory or residual grouping an item of foreign gross income that a taxpayer includes in foreign taxable income as a result of its ownership of an interest in a corporation with respect to which there is a distribution under both foreign and Federal income tax law or an inclusion of foreign law pass-through income.

(B) *Foreign gross income items arising from a distribution with respect to a corporation*—(1) *In general.* If there is a distribution by a corporation that is treated as a distribution of property for both foreign law and Federal income tax purposes, a taxpayer first applies the rules of paragraph (d)(3)(i)(B)(2) of this section, and then (if necessary) applies the rules of paragraph (d)(3)(i)(B)(3) of this section to characterize and assign to the statutory and residual groupings the items of foreign gross income that constitute the foreign dividend amount and the foreign capital gain amount, if any, that arise from the distribution. See paragraph (g)(5) of this section (*Example 4*). For purposes of this paragraph (d)(3)(i)(B), the U.S. dividend amount, U.S. capital gain amount, and U.S. return of capital amount that result from a distribution (including a distribution that occurs on the same date, but in different taxable years, for foreign law purposes and Federal income tax purposes) are computed on the date the distribution occurred for Federal income tax purposes. See paragraph (d)(2)(ii)(B) of this section for rules for assigning foreign gross income arising from any portion of a distribution that

is a foreign law distribution. See § 1.960–1(d)(3)(ii) for rules for assigning foreign gross income arising from a distribution described in this paragraph (d)(3)(i)(B) to income groups or PTEP groups for purposes of section 960 as the operative section.

(2) *Foreign dividend amounts.* The foreign dividend amount is, to the extent of the U.S. dividend amount, assigned to the same statutory and residual grouping (or ratably to the groupings) from which a distribution of the U.S. dividend amount is made under Federal income tax law. If the foreign dividend amount exceeds the U.S. dividend amount, the excess foreign dividend amount is an item of foreign gross income that is, to the extent of the U.S. return of capital amount, assigned to the same statutory and residual grouping (or ratably to the groupings) to which earnings equal to the U.S. return of capital amount would be assigned if they were recognized for Federal income tax purposes in the U.S. taxable year in which the distribution is made. These earnings are deemed to arise in the statutory and residual groupings in the same proportions as the proportions in which the tax book value of the stock of the distributing corporation is (or would be if the taxpayer were a United States person) assigned to the groupings under the asset method in § 1.861–9 in the U.S. taxable year in which the distribution is made. Any additional excess of the foreign dividend amount over the sum of the U.S. dividend amount and the U.S. return of capital amount is an item of foreign gross income that is assigned to the statutory or residual grouping (or ratably to the groupings) to which the U.S. capital gain amount is assigned.

(3) *Foreign capital gain amounts.* The foreign capital gain amount is, to the extent of the U.S. capital gain amount, assigned to the statutory and residual groupings to which the U.S. capital gain amount is assigned under Federal income tax law. If the foreign capital gain amount exceeds the U.S. capital gain amount, the excess is, to the extent of the U.S. return of capital amount, assigned to the statutory and residual groupings to which earnings equal to the U.S. return of capital amount would be assigned if they were recognized in the U.S. taxable year in which the distribution is made. These earnings are deemed to arise in the statutory and residual groupings in the same proportions as the proportions in which the tax book value of the stock of the distributing corporation is (or would be if the taxpayer were a United States person) assigned under the asset method in § 1.861–9 in the U.S. taxable year in

which the distribution is made. Any excess of the foreign capital gain amount over the sum of the U.S. capital gain amount and the U.S. return of capital amount is assigned ratably to the statutory and residual groupings to which the U.S. dividend amount is assigned.

(C) *Foreign law pass-through income from a reverse hybrid.* An item of foreign law pass-through income that a taxpayer includes in its foreign taxable income as a result of its direct or indirect ownership of a reverse hybrid is assigned to a statutory or residual grouping by treating the taxpayer's items of foreign law pass-through income as the foreign gross income of the reverse hybrid, and applying the rules in this paragraph (d) by treating the reverse hybrid as the taxpayer in the reverse hybrid's U.S. taxable year with or within which its foreign taxable year (under the law of the foreign jurisdiction imposing the owner-level tax) ends. See § 1.904–6(f) for special rules that apply for purposes of section 904 with respect to items of foreign gross income that under this paragraph (d)(3)(iii) would be assigned to a separate category that includes income that gives rise to inclusions under section 951A.

(ii) [Reserved]

(iii) *Foreign law inclusion regime income.* A gross item of foreign law inclusion regime income that a taxpayer includes in its capacity as a shareholder under foreign law of a foreign law CFC under a foreign law inclusion regime is assigned to the same statutory and residual groupings as the item of foreign gross income of the foreign law CFC that gives rise to the item of foreign law inclusion regime income of the taxpayer. The assignment is made by treating the gross items of foreign law inclusion regime income of the taxpayer as the items of foreign gross income of the foreign law CFC and applying the rules in this paragraph (d) by treating the foreign law CFC as the taxpayer in its U.S. taxable year with or within which its foreign taxable year (under the law of the foreign jurisdiction imposing the shareholder-level tax) ends. See paragraphs (g)(7) and (8) of this section (*Examples 6 and 7*). See § 1.904–6(f) for special rules with respect to items of foreign gross income relating to items of the foreign law CFC that give rise to inclusions under section 951A for purposes of applying section 904 as the operative section.

(iv) *Gain on sale of disregarded entity.* An item of foreign gross income arising from gain recognized on the sale, exchange, or other disposition of a disregarded entity that is characterized

as a disposition of assets for Federal income tax purposes is assigned to statutory and residual groupings in the same proportion as the gain that would be treated as foreign gross income in each grouping if the transaction were treated as a disposition of assets for foreign tax law purposes. See paragraph (g)(9) of this section (*Example 8*).

(e) *Allocating and apportioning deductions (allowed under foreign law) to foreign gross income in a grouping—*
(1) *Application of foreign law expense allocation rules.* In order to determine foreign taxable income in each statutory grouping, or the residual grouping, foreign gross income in each grouping is reduced by deducting any expenses, losses, or other amounts that are deductible under foreign law that are specifically allocable to the items of foreign gross income in the grouping under the laws of that foreign country. If expenses are not specifically allocated under foreign law, then the expenses are allocated and apportioned among the groupings under the principles of foreign law. Thus, for example, if foreign law provides that expenses will be apportioned on a gross income basis, the foreign law deductions are apportioned on the basis of the relative amounts of foreign gross income assigned to each grouping.

(2) *Application of U.S. expense allocation rules in the absence of foreign law rules.* If foreign law does not provide rules for the allocation or apportionment of expenses, losses or other deductions to particular items of foreign gross income, then the principles of the section 861 regulations (as defined in § 1.861–8(a)(1)) apply in allocating and apportioning such expenses, losses, or other deductions to foreign gross income. For example, in the absence of foreign law expense allocation rules, the principles of the section 861 regulations apply to allocate definitely related expenses to particular categories of foreign gross income and provide the methods for apportioning foreign law expenses that are definitely related to more than one statutory grouping or that are not definitely related to any statutory grouping. For purposes of this paragraph (e)(2), the apportionment of expenses required to be made under the principles of the section 861 regulations need not be made on other than a separate company basis. If the taxpayer applies the principles of the section 861 regulations for purposes of allocating foreign law deductions under this paragraph (e), the taxpayer must apply the principles in the same manner as the taxpayer applies such principles in determining the income or earnings and profits for

Federal income tax purposes of the taxpayer (or of the foreign branch, controlled foreign corporation, or other entity that paid or accrued the foreign taxes, as the case may be). For example, a taxpayer must use the modified gross income method under § 1.861–9T when applying the principles of that section for purposes of this paragraph (e) to determine the amount of foreign taxable income in each grouping if the taxpayer applies the modified gross income method in determining the income and earnings and profits of a controlled foreign corporation for Federal income tax purposes.

(f) *Allocation and apportionment of foreign income tax.* Foreign income tax is allocated to the statutory or residual grouping or groupings to which the items of foreign gross income are assigned under the rules of paragraph (d) of this section. If foreign gross income is assigned to more than one grouping, then the foreign income tax is apportioned among the statutory and residual groupings by multiplying the foreign income tax by a fraction, the numerator of which is the foreign taxable income in a grouping and the denominator of which is all foreign taxable income on which the foreign income tax is imposed. If foreign law, including by reason of an income tax convention, exempts certain types of income from tax, or if foreign taxable income is reduced to or below zero by foreign law deductions, then no foreign income tax is allocated and apportioned to that income. A withholding tax (as defined in section 901(k)(1)(B)) is allocated and apportioned to the foreign gross income from which it is withheld. If foreign law, including by reason of an income tax convention, provides for a specific rate of tax with respect to certain types of income (for example, capital gains), or allows credits only against tax on particular items or types of income (for example, credit for foreign withholding taxes), then such provisions are taken into account in determining the amount of foreign tax imposed on such foreign taxable income.

(g) *Examples.* The following examples illustrate the application of this section and § 1.904–6.

(1) *Presumed facts.* Except as otherwise provided in this paragraph (g), the following facts are assumed for purposes of the examples in paragraphs (g)(2) through (9) of this section:

- (i) USP and US2 are domestic corporations, which are unrelated;
- (ii) USP elects to claim a foreign tax credit under section 901;
- (iii) CFC, CFC1, and CFC2 are controlled foreign corporations

organized in Country A, and are not reverse hybrids;

(iv) All parties have a U.S. dollar functional currency and a U.S. taxable year and foreign taxable year that correspond to the calendar year;

(v) No party has expenses for Country A tax purposes or expenses for U.S. tax purposes (other than foreign income tax expense); and

(vi) Section 904 is the operative section, and terms have the meaning provided in this section or §§ 1.904–4 and 1.904–5.

(2) *Example 1: Corresponding U.S. item—(i) Facts.* USP conducts business in Country A that gives rise to a foreign branch (as defined in § 1.904–4(f)(3)). In Year 1, in a transaction that is a sale for purposes of the laws of Country A and Federal income tax law, the foreign branch transfers Asset X to US2 for \$1,000x. For Country A tax purposes, USP earns \$600x of gross income from the sale of Asset X and incurs foreign income tax of \$80x. For Federal income tax purposes, USP earns \$800x of foreign branch category income from the sale of Asset X.

(ii) *Analysis.* For purposes of allocating and apportioning the \$80x of Country A foreign income tax, the \$600x of Country A gross income from the sale of Asset X is first assigned to separate categories. The \$800x of foreign branch category income from the sale of Asset X is the corresponding U.S. item to the Country A item of gross income. Under paragraph (d)(1) of this section, because USP recognizes a corresponding U.S. item with respect to the Country A item of gross income in the same U.S. taxable year, the \$600x of Country A gross income is assigned to the same separate category as the corresponding U.S. item. This is the case even though the amount of gross income recognized for Federal income tax purposes differs from the amount recognized for Country A tax purposes. Accordingly, the \$600x of Country A gross income is assigned to the foreign branch category. Additionally, because all of the Country A taxable income is assigned to a single separate category, the \$80x of Country A tax is also allocated to the foreign branch category. No apportionment of the \$80x is necessary because the class of gross income to which the tax is allocated consists entirely of a single statutory grouping, foreign branch category income.

(3) *Example 2: Foreign law disposition—(i) Facts.* USP owns all of the outstanding stock of CFC, which conducts business in Country A. CFC sells Asset X for \$1,000x. For Country A tax purposes, CFC's basis in Asset X is \$600x, the sale of Asset X occurs in

Year 1, and CFC recognizes \$400x of foreign gross income and incurs \$80x of foreign income tax. For Federal income tax purposes, CFC's basis in Asset X is \$500x, the sale of Asset X occurs in Year 2, and CFC recognizes \$500x of general category income.

(ii) *Analysis.* For purposes of allocating and apportioning the \$80x of Country A foreign income tax in Year 1, the \$400x of Country A gross income from the sale of Asset X is first assigned to separate categories. There is no corresponding U.S. item because the sale occurs on a different date and in a different U.S. taxable year for U.S. and foreign tax purposes. Under paragraph (d)(2)(ii)(C) of this section, the item of foreign gross income (the \$400x from the sale of Asset X) is characterized and assigned to the groupings to which the corresponding U.S. item would be assigned if for Federal income tax purposes Asset X were sold for \$1,000x in Year 1, the same U.S. taxable year in which the foreign income tax accrued. This is the case even though the amount of gross income that would be recognized for Federal income tax purposes differs from the amount recognized for Country A tax purposes. Accordingly, the \$400x of Country A gross income is assigned to the general category. Additionally, because all of the Country A taxable income is assigned to a single separate category, the \$80x of Country A tax is also allocated to the general category. No apportionment of the \$80x is necessary because the class of gross income to which the deduction is allocated consists entirely of a single statutory grouping, general category income.

(4) *Example 3: Foreign gross income excluded from U.S. gross income—(i) Facts.* USP conducts business in Country A. In Year 1, USP earns \$200x of interest income on a State or local bond. For Country A tax purposes, the \$200x of income is included in gross income and incurs \$10x of foreign income tax. For Federal income tax purposes, the \$200x is excluded from gross income under section 103.

(ii) *Analysis.* For purposes of allocating and apportioning the \$10x of Country A foreign income tax, the \$200x of Country A gross income is first assigned to separate categories. There is no corresponding U.S. item because the interest income is excluded from U.S. gross income. Thus, the rules of paragraph (d)(2) of this section apply to characterize and assign the foreign gross income to the groupings to which a corresponding U.S. item would be assigned if it were recognized under Federal income tax law in that U.S. taxable year. The interest income is

excluded from U.S. gross income but is otherwise described or identified by section 103. Accordingly, under paragraph (d)(2)(iii)(A) of this section, the \$200x of Country A gross income is assigned to the separate category to which the interest income would be assigned under Federal income tax law if the income were included in gross income. Under section 904(d)(2)(B)(i), the interest income would be passive category income. Accordingly, the \$200x of Country A gross income is assigned to the passive category. Additionally, because all of the Country A taxable income is assigned to a single separate category, the \$10x of Country A tax is also allocated to the passive category (subject to the rules in § 1.904-4(c)). No apportionment of the \$10x is necessary because the class of gross income to which the deduction is allocated consists entirely of a single statutory grouping, passive category income.

(5) *Example 4: Actual distribution—*(1) *Facts.* USP owns all of the outstanding stock of CFC1, which in turn owns all of the outstanding stock of CFC2. CFC1 and CFC2 conduct business in Country A. In Year 1, CFC2 distributes \$300x to CFC1. For Country A tax purposes, \$100x of the distribution is the foreign dividend amount, \$160x is treated as a nontaxable return of capital, and the remaining \$40x is the foreign capital gain amount. CFC1 incurs \$20x of foreign income tax with respect to the foreign dividend amount and \$4x of foreign income tax with respect to the foreign capital gain amount. The \$20x and \$4x of foreign income tax are each a separate levy within the meaning of § 1.901-2(d). For Federal income tax purposes, \$150x of the distribution is the U.S. dividend amount, \$100x is the U.S. return of capital amount, and the remaining \$50x is the U.S. capital gain amount. Under section 904(d)(3)(D) and §§ 1.904-4(d) and 1.904-5(c)(4), the \$150x of U.S. dividend amount consists solely of general category income in the hands of CFC1. Under section 904(d)(2)(B)(i) and § 1.904-4(b)(2)(i)(A), the \$50x of U.S. capital gain amount is passive category income to CFC1.

(ii) *Analysis—*(A) *In general.* Because the \$20x of Country A foreign income tax and the \$4x of Country A foreign income tax are separate levies, the taxes are allocated and apportioned separately. For purposes of allocating and apportioning each foreign income tax, the relevant item of Country A gross income (the foreign dividend amount or foreign capital gain amount) is first assigned to separate categories. The U.S. dividend amount and U.S. capital gain

amount are corresponding U.S. items. However, paragraph (d)(3)(i)(B) of this section (and not paragraph (d)(1) of this section) applies to assign the items of foreign gross income arising from the distribution.

(B) *Foreign dividend amount.* Under paragraph (d)(3)(i)(B)(2) of this section, the foreign dividend amount (\$100x) is, to the extent of the U.S. dividend amount (\$150x), assigned to the same separate category from which the distribution of the U.S. dividend amount is made under Federal income tax law. Thus, \$100x of foreign gross income that is the foreign dividend amount is assigned to the general category. Additionally, because all of the Country A taxable income included in the base on which the \$20x of foreign income tax is imposed is assigned to a single separate category, the \$20x of Country A tax on the foreign dividend amount is also allocated to the general category. No apportionment of the \$20x is necessary because the class of gross income to which the deduction for foreign income tax is allocated consists entirely of a single statutory grouping, general category income. See also section 245A(d) for rules that may apply to disallow a credit or deduction for certain foreign taxes.

(C) *Foreign capital gain amount.* Under paragraph (d)(3)(i)(B)(3) of this section, the foreign capital gain amount (\$40x) is, to the extent of the U.S. capital gain amount (\$50x), assigned to the same separate category to which the U.S. capital gain is assigned under Federal income tax law. Thus, the \$40x of foreign gross income that is the foreign capital gain amount is assigned to the passive category. Additionally, because all of the Country A taxable income in the base on which the \$4x of foreign income tax is imposed is assigned to a single separate category, the \$4x of Country A tax on the foreign dividend amount is also allocated to the passive category. No apportionment of the \$4x is necessary because the class of gross income to which the deduction is allocated consists entirely of a single statutory grouping, passive category income.

(6) *Example 5: Foreign law distribution—*(i) *Facts.* USP owns all of the outstanding stock of CFC. In Year 1, for Country A tax purposes, CFC distributes \$1,000x of its stock that is treated entirely as a dividend to USP, and Country A imposes a withholding tax on USP of \$150x with respect to the \$1,000x of foreign gross income. For Federal income tax purposes, the distribution is treated as a stock dividend described in section 305(a) and USP recognizes no U.S. gross

income. At the time of the distribution, CFC has \$800x of section 965(a) PTEP (as defined in § 1.960-3(c)(2)(vi)) in a single annual PTEP account (as defined in § 1.960-3(c)(1)), and \$500x of earnings and profits described in section 959(c)(3). Section 965(g) is the operative section for purposes of this paragraph (g)(6). See § 1.965-5(b)(2). Section 904 is also a relevant operative section, but is not addressed in this paragraph (g)(6).

(ii) *Analysis.* For purposes of allocating and apportioning the \$150x of Country A foreign income tax, the \$1,000x of Country A gross income is first assigned to the relevant statutory and residual groupings for purposes of applying section 965(g) as the operative section. Under § 1.965-5(b)(2), the statutory grouping is the portion of the distribution that is attributable to section 965(a) previously taxed earnings and profits and the residual grouping is the portion of the distribution attributable to other earnings and profits. There is no corresponding U.S. item because under section 305(a) USP recognizes no U.S. gross income with respect to the distribution. Under paragraph (d)(2)(ii)(B) of this section, the item of foreign gross income (the \$1,000x distribution) is assigned under the rules of paragraph (d)(3)(i)(B) of this section to the same statutory or residual groupings to which the foreign gross income would be assigned if a distribution of the same amount were made for Federal income tax purposes in Year 1 on the date the distribution occurs for foreign law purposes. If recognized for Federal income tax purposes, a \$1,000x distribution in Year 1 would result in a U.S. dividend amount of \$1,000x. Under paragraph (d)(3)(i)(B)(2) of this section, the foreign dividend amount (\$1,000x) is, to the extent of the U.S. dividend amount (\$1,000x), assigned to the same statutory or residual groupings from which a distribution of the U.S. dividend amount would be made under Federal income tax law. Thus, \$800x of foreign gross income related to the foreign dividend amount is assigned to the statutory grouping for the portion of the distribution attributable to section 965(a) previously taxed earnings and profits and \$200x of foreign gross income is assigned to the residual grouping. Under paragraph (f) of this section, \$120x ($\$150x \times \$800x / \$1,000x$) of the Country A foreign income tax is apportioned to the statutory grouping and \$30x ($\$150x \times \$200x / \$1,000x$) of the Country A foreign income tax is apportioned to the residual grouping. See section 965(g)(2) and § 1.965-5(b) for application of the applicable

percentage (as defined in § 1.965–5(d)) to the foreign income tax allocated and apportioned to the statutory grouping.

(7) *Example 6: Foreign law inclusion regime, CFC shareholder*—(i) *Facts.* USP owns all of the outstanding stock of CFC1, which in turn owns all of the outstanding stock of CFC2. CFC2 is organized and conducts business in Country B. Country A has a foreign law inclusion regime that imposes a tax on CFC1 for certain earnings of CFC2, a foreign law CFC. In Year 1, CFC2 earns \$400x of interest income and \$200x of royalty income. CFC2 incurs no foreign income tax. For Country A tax purposes, the \$400x of interest income and \$200x of royalty income are each an item of foreign law inclusion regime income of CFC2 that are included in the gross income of CFC1. CFC1 incurs \$150x of Country A foreign income tax with respect to the foreign law inclusion regime income. For Federal income tax purposes, with respect to CFC2, the \$400x of interest income is passive category income under section 904(d)(2)(B)(i) and the \$200x of royalty income is general category income under § 1.904–4(b)(2)(iii).

(ii) *Analysis.* For purposes of allocating and apportioning CFC1's \$150x of Country A foreign income tax, the \$600x of Country A gross income is first assigned to separate categories. The \$600x of foreign gross income is not included in the U.S. gross income of CFC1, and thus, there is no corresponding U.S. item. Under paragraph (d)(3)(iii) of this section, each item of foreign law inclusion regime income that is included in CFC1's foreign gross income is assigned to the same separate category as the items of foreign gross income of CFC2 that give rise to the foreign law inclusion regime income of CFC1. With respect to CFC2, the \$400x of interest income and the \$200x of royalty income would be corresponding U.S. items if CFC2 were the taxpayer. Accordingly, \$400x of CFC1's foreign gross income is assigned to the passive category and \$200x of CFC1's foreign gross income is assigned to the general category. Under paragraph (f) of this section, \$100x (\$150x × \$400x/\$600x) of the Country A foreign income tax is apportioned to the passive category and \$50x (\$150x × \$200x/\$600x) of the Country A foreign income tax is apportioned to the general category.

(8) *Example 7: Foreign law inclusion regime, U.S. shareholder*—(i) *Facts.* The facts are the same as in paragraph (g)(7)(i) of this section (the facts in

Example 6), except that both CFC1 and CFC2 are organized and conduct business in Country B, all of the outstanding stock of CFC1 is owned by Individual X, a U.S. citizen resident in Country A, and Country A imposes tax of \$150x on foreign gross income of \$600x under its foreign law inclusion regime on Individual X, rather than on CFC1. For Federal income tax purposes, in the hands of CFC2, the \$400x of interest income is passive category subpart F income and the \$200x of royalty income is general category tested income (as defined in § 1.951A–2(b)(1)). CFC2's \$400x of interest income gives rise to a passive category subpart F inclusion under section 951(a)(1)(A), and its \$200x of tested income gives rise to a GILTI inclusion amount (as defined in § 1.951A–1(c)(1)) of \$200x, with respect to Individual X.

(ii) *Analysis.* The analysis is the same as in paragraph (g)(7)(ii) of this section (the analysis in *Example 6*) except that under § 1.904–6(f), because \$50x of the Country A foreign income tax is allocated and apportioned under paragraph (d)(3)(iii) of this section to CFC2's general category tested income group to which Individual X's inclusion under section 951A is attributable, the \$50x of Country A foreign income tax is allocated and apportioned in the hands of Individual X to the section 951A category.

(9) *Example 8: Sale of disregarded entity*—(i) *Facts.* USP sells FDE, a disregarded entity that is organized and operates a trade or business in Country A, for \$500x. FDE owns Asset X and Asset Y in Country A, each having a fair market value of \$250x. For Country A tax purposes, FDE has a basis in Asset X of \$100x and a basis in Asset Y of \$200x, USP's basis in FDE is \$100x, and the sale is treated as a sale of stock. Country A imposes foreign income tax of \$40x on USP on the Country A gross income of \$400x resulting from the sale of FDE, based on its rules for taxing capital gains of nonresidents selling stock of companies operating a trade or business in Country A. For Federal income tax purposes, USP has a basis of \$150x in each of Assets X and Y, and so the sale of FDE results in \$100x of passive category income with respect to the sale of Asset X and \$100x of general category income with respect to the sale of Asset Y.

(ii) *Analysis.* For purposes of allocating and apportioning USP's \$40x of Country A foreign income tax, the \$400x of Country A gross income resulting from the sale of FDE is first

assigned to separate categories. Under paragraph (d)(3)(iv) of this section, USP's \$400x of Country A gross income is assigned among the statutory groupings in the same percentages as the foreign gross income in each grouping that would have resulted if the sale of FDE were treated as an asset sale for Country A tax purposes. Because for Country A tax purposes Asset X had a built-in gain of \$150x and Asset Y had a built-in gain of \$50x, \$300x (\$400x × \$150x/\$200x) of the Country A gross income is assigned to the passive category and \$100x (\$400x × \$50x/\$200x) is assigned to the general category. Under paragraph (f) of this section, \$30x (\$40x × \$300x/\$400x) of the Country A foreign income tax is apportioned to the passive category, and \$10x (\$40x × \$100x/\$400x) of the Country A foreign income tax is apportioned to the general category.

(h) [Reserved]

(i) *Applicability date.* This section applies to taxable years beginning after December 31, 2019.

■ **Par. 15.** Section 1.881–3 is amended by:

- 1. Adding two sentences at the end of paragraph (a)(1).
- 2. Revising paragraph (a)(2)(i)(C).
- 3. In paragraph (a)(2)(ii)(B)(1) introductory text, removing “one of the following” and adding “one or more of the following” in its place.
- 4. In paragraph (a)(2)(ii)(B)(1)(ii), removing the word “or” at the end of the paragraph.
- 5. In paragraph (a)(2)(ii)(B)(1)(iii), removing the period at the end and adding “; or” in its place.
- 6. Adding paragraph (a)(2)(ii)(B)(1)(iv) and reserved paragraph (a)(2)(ii)(B)(1)(v).
- 7. In paragraph (c)(2)(ii), adding “(as in effect for taxable years beginning before January 1, 2018)” at the end of the last sentence.
- 8. Adding reserved paragraph (d)(1)(iii).
- 9. Adding a sentence at the end of paragraph (e) introductory text.
- 10. In paragraph (e), designating Examples 1 through 26 as paragraphs (e)(1) through (26), respectively.
- 11. Redesignating newly designated paragraphs (e)(4) through (26) as paragraphs (e)(5) through (27), respectively.
- 12. Adding new paragraph (e)(4).
- 13. For each paragraph listed in the table, remove the language in the “Remove” column and add in its place the language in the “Add” column:

Paragraph	Remove	Add
(a)(2)(i)(A)	Examples 1, 2, 3 and 4 of paragraph (e) of this section	paragraphs (e)(1) through (5) of this section (Examples 1 through 5).
(a)(2)(i)(B)	Examples 5 and 6 of paragraph (e) of this section	paragraphs (e)(6) and (7) of this section (Examples 6 and 7).
(a)(3)(ii)(E)(2)(ii)	Example 7 of paragraph (e) of this section	paragraph (e)(8) of this section (Example 8).
(a)(4)(ii)(B)	Examples 8 and 9 of paragraph (e) of this section	paragraphs (e)(9) and (10) of this section (Examples 9 and 10).
(b)(1)	Examples 12 and 13 of paragraph (e) of this section	paragraphs (e)(13) and (14) of this section (Examples 13 and 14).
(b)(2)(i)	Examples 14, 15 and 16 of paragraph (e) of this section	paragraphs (e)(15) through (17) of this section (Examples 15 through 17).
(b)(2)(iii)	Example 17 of paragraph (e) of this section	paragraph (e)(18) of this section (Example 18).
(b)(2)(iv)	Example 18 of paragraph (e) of this section	paragraph (e)(19) of this section (Example 19).
(b)(3)(i)	Examples 22, 23 and 24 of paragraph (e) of this section	paragraphs (e)(23) through (25) of this section (Examples 23 through 25).
(d)(1)(i)	Example 25 of paragraph (e) of this section	paragraph (e)(26) of this section (Example 26).
(d)(1)(ii)(A)	Example 26 of paragraph (e)	paragraph (e)(27) of this section (Example 27).
newly designated paragraph (e)(3).	Example 2	paragraph (e)(2) of this section (the facts in Example 2).
newly designated paragraph (e)(3).	§ 301.7701-3	§ 301.7701-3 of this chapter.
newly designated paragraph (e)(8)(ii).	(a)(4)(i)	(a)(4)(i) of this section.
newly designated paragraph (e)(22)(i).	Example 20	paragraph (e)(21) of this section (the facts in Example 21).
newly designated paragraph (e)(22)(ii).	Example 19	paragraph (e)(20) of this section (Example 20).
newly designated paragraph (e)(22)(ii).	paragraph (i) of this Example 21	paragraph (e)(22)(i) of this section (this Example 22).
newly designated paragraph (e)(24)(i).	Example 22	paragraph (e)(23) of this section (the facts in Example 23).
newly designated paragraph (e)(25)(i).	Example 22	paragraph (e)(23) of this section (the facts in Example 23).
(f)	Paragraph (a)(2)(i)(C) and Example 3 of paragraph (e) of this section.	Paragraphs (a)(2)(i)(C) and (e)(3) (Example 3) of this section.

■ 14. In paragraph (f), revising the heading and adding a sentence at the end of the paragraph.

The additions and revisions read as follows:

§ 1.881-3 Conduit financing arrangements.

(a) * * *
 (1) * * * See § 1.1471-3(e)(5) for withholding rules applicable to conduit financing arrangements for purposes of sections 1471 and 1472. See also §§ 1.267A-1 and 1.267A-4 (disallowing a deduction for certain interest or royalty payments to the extent the income attributable to the payment is offset by a hybrid deduction).

(2) * * *
 (i) * * *
 (C) *Treatment of disregarded entities.*

For purposes of this section, the term *person* includes a business entity that is disregarded as an entity separate from its single member owner under §§ 301.7701-1 through 301.7701-3 of this chapter and, therefore, such entity may, for example, be treated as a party to a financing transaction with its

owner. See paragraph (e)(3) of this section (Example 3).

- (ii) * * *
- (B) * * *
- (1) * * *

(iv) The stock or similar interest is treated as debt under the tax law of the issuer's country of residence or, if the issuer is not a tax resident of any country, such as a partnership, the tax law of the country in which the issuer is created, organized, or otherwise established.

* * * * *
 (e) * * * For purposes of the examples in this paragraph (e), unless otherwise indicated, it is assumed that no stock is of the type described in paragraph (a)(2)(ii)(B)(1)(iv) of this section.

* * * * *
 (4) *Example 4. Hybrid instrument as financing arrangement.* The facts are the same as in paragraph (e)(2) of this section (the facts in Example 2), except that FP assigns the DS note to FS in exchange for stock issued by FS. The stock issued by FS is in form convertible

debt with a 49-year term that is treated as debt under the tax law of Country T. The FS stock is not subject to any of the redemption, acquisition, or payment rights or requirements specified in paragraphs (a)(2)(ii)(B)(1)(i) through (iii) of this section. However, because the FS stock is treated as debt under the tax law of Country T, the FS stock is a financing transaction under paragraph (a)(2)(ii)(B)(1)(iv) of this section. Therefore, the DS note held by FS and the FS stock held by FP are financing transactions within the meaning of paragraphs (a)(2)(ii)(A)(1) and (2) of this section, respectively, and together constitute a financing arrangement within the meaning of paragraph (a)(2)(i) of this section. See also § 1.267A-4 for rules applicable to disqualified imported mismatch amounts.

* * * * *
 (f) *Applicability date.* * * * Paragraph (a)(2)(ii)(B)(1)(iv) of this section applies to payments made on or after November 12, 2020.

■ **Par. 16.** Section 1.904–1 is amended by revising the section heading and paragraph (a) as follows:

§ 1.904–1 Limitation on credit for foreign income taxes.

(a) *In general.* For each separate category described in § 1.904–5(a)(4)(v), the total credit for foreign income taxes (as defined in § 1.901–2(a)) paid or accrued (including those deemed to have been paid or accrued other than by reason of section 904(c)) to any foreign country (as defined in § 1.901–2(g)) does not exceed that proportion of the tax against which such credit is taken which the taxpayer’s taxable income from foreign sources (but not in excess of the taxpayer’s entire taxable income) in such separate category bears to the taxpayer’s entire taxable income for the same taxable year.

* * * * *

■ **Par. 17.** Section 1.904–4 is amended by:

- 1. Revising paragraph (c)(7)(i), the third and fourth sentences of paragraph (c)(7)(ii), and paragraph (c)(7)(iii).
- 2. Adding paragraphs (c)(8)(v) through (viii).
- 3. In paragraph (o), removing the language “§ 1.904–6(b)” and adding the language “1.904–6(e)” in its place.
- 4. Revising paragraph (q).

The revisions and additions read as follows:

§ 1.904–4 Separate application of section 904 with respect to certain categories of income.

* * * * *

(c) * * *
(7) * * *

(i) *In general.* If the effective rate of tax imposed by a foreign country on income of a foreign corporation that is included in a taxpayer’s gross income is reduced under foreign law on distribution of such income, the rules of this paragraph (c) apply at the time that the income is included in the taxpayer’s gross income, without regard to the possibility of a subsequent reduction of foreign tax on the distribution. If the inclusion is considered to be high-taxed income, then the taxpayer must initially treat the inclusion as general category income, section 951A category income, or income in a specified separate category as provided in paragraph (c)(1) of this section. When the foreign corporation distributes the earnings and profits to which the inclusion was attributable and the foreign tax on the inclusion is reduced, then if a redetermination of U.S. tax liability is required under § 1.905–3(b)(2), the taxpayer must redetermine whether the revised inclusion (if any) is considered

to be high-taxed income. See § 1.905–3(b)(2)(ii) (requiring a redetermination of the amount of the inclusion, the application of the high-tax exception under section 954(b)(4), and the amount of foreign taxes deemed paid). If, taking into account the reduction in foreign tax, the inclusion is not considered high-taxed income, then the taxpayer, in redetermining its U.S. tax liability for the year or years affected, must treat the inclusion and the associated taxes (as reduced on the distribution) as passive category income and taxes. For purposes of this paragraph (c), the foreign tax on an inclusion under section 951(a)(1) or 951A(a) is considered reduced on distribution of the earnings and profits associated with the inclusion if the total taxes paid and deemed paid on the inclusion and the distribution (taking into account any reductions in tax and any withholding taxes) is less than the total taxes deemed paid in the year of inclusion. Therefore, any foreign currency gain associated with the earnings and profits that are distributed with respect to the inclusion is not taken into account in determining whether there is a reduction of tax requiring a redetermination of whether the inclusion is high-taxed income.

(ii) * * * If, however, foreign law does not attribute a reduction in taxes to a particular year or years, then the reduction in taxes shall be attributable, on an annual last in-first out (LIFO) basis, to foreign taxes potentially subject to reduction that are associated with previously taxed income, then on a LIFO basis to foreign taxes associated with income that under paragraph (c)(7)(iii) of this section remains as passive income but that was excluded from subpart F income or tested income under section 954(b)(4) or section 951A(c)(2)(A)(i)(III), and finally on a LIFO basis to foreign taxes associated with other earnings and profits. Furthermore, in applying the ordering rules of section 959(c), distributions shall be considered made on a LIFO basis first out of earnings described in section 959(c)(1) and (2), then on a LIFO basis out of earnings and profits associated with income that remains passive income under paragraph (c)(7)(iii) of this section but that was excluded from subpart F income or tested income under section 954(b)(4) or section 951A(c)(2)(A)(i)(III), and finally on a LIFO basis out of other earnings and profits. * * *

(iii) *Treatment of income excluded under section 954(b)(4) or section 951A(c)(2)(A)(i)(III).* If the effective rate of tax imposed by a foreign country on income of a foreign corporation is reduced under foreign law on

distribution of that income, the rules of section 954(b)(4) (including for purposes of determining tested income under section 951A(c)(2)(A)(i)(III)) are applied in the year of inclusion without regard to the possibility of a subsequent reduction of foreign tax. See §§ 1.954–1(d)(3)(iii) and 1.951A–2(c)(6)(iv). If a taxpayer excludes passive income from a controlled foreign corporation’s foreign personal holding company income or tested income under section 954(b)(4) or section 951A(c)(2)(A)(i)(III), then, notwithstanding the general rule of § 1.904–5(d)(2), the income is considered to be passive category income until distribution of that income. At that time, if after the redetermination of U.S. tax liability required under § 1.905–3(b)(2) the taxpayer still elects to exclude the passive income under section 954(b)(4) or section 951A(c)(2)(A)(i)(III), the rules of this paragraph (c)(7)(iii) apply to determine whether the income is high-taxed income upon distribution and, therefore, income in another separate category. For purposes of determining whether a reduction in tax is attributable to taxes on income excluded under section 954(b)(4) or section 951A(c)(2)(A)(i)(III), the rules of paragraph (c)(7)(ii) of this section apply. The rules of paragraph (c)(7)(ii) of this section also apply for purposes of ordering distributions to determine whether such distributions are out of earnings and profits associated with such excluded income. For an example illustrating the operation of this paragraph (c)(7)(iii), see paragraph (c)(8)(vi) of this section (*Example 6*).

(8) * * *

(v) *Example 5.* CFC, a controlled foreign corporation, is a wholly-owned subsidiary of USP, a domestic corporation. USP and CFC are calendar year taxpayers. In Year 1, CFC’s only earnings consist of \$200x of pre-tax passive income that is foreign personal holding company income that is earned in foreign Country X. Under Country X’s tax system, the corporate tax on particular earnings is reduced on distribution of those earnings and no withholding tax is imposed. In Year 1, CFC pays \$100x of foreign tax with respect to its passive income. USP does not elect to exclude this income from subpart F under section 954(b)(4) and includes \$200x in gross income (\$100x of net foreign personal holding company income and \$100x of the amount under section 78 (the “section 78 dividend”). At the time of the inclusion, the income is considered to be high-taxed income under paragraphs (c)(1) and (c)(6)(i) of this section and is general category income to USP (\$100x > \$42x (21% ×

\$200x)). CFC does not distribute any of its earnings in Year 1. In Year 2, CFC has no additional earnings. On December 31, Year 2, CFC distributes the \$100x of earnings from Year 1. At that time, CFC receives a \$60x refund from Country X attributable to the reduction of the Country X corporate tax imposed on the Year 1 earnings. The refund is a foreign tax redetermination under § 1.905–3(a) that under §§ 1.905–3(b)(2) and 1.954–1(d)(3)(iii) requires a redetermination of CFC's Year 1 subpart F income and the application of section 954(b)(4), as well as a redetermination of USP's Year 1 inclusion under section 951(a)(1), its deemed paid taxes under section 960(a), and its Year 1 U.S. tax liability. As recomputed taking into account the \$60x refund, CFC's Year 1 passive category net foreign personal holding company income is increased by \$60x to \$160x, CFC's foreign income taxes attributable to that income are reduced from \$100x to \$40x, and the income still qualifies to be excluded from CFC's subpart F income under section 954(b)(4) ($\$40x > \$37.80x (90\% \times 21\% \times \$200x)$). Assuming USP does not change its Year 1 election, USP's Year 1 inclusion under section 951(a)(1) is increased by \$60x to \$160x, and the associated deemed paid tax and section 78 dividend are reduced by \$60x to \$40x. Under paragraph (c)(7)(i) of this section, in connection with the adjustments required under section 905(c), USP must redetermine whether the adjusted Year 1 inclusion is high-taxed income of USP. Taking into account the \$60x refund, the inclusion is not considered high-taxed income of USP ($\$40x < \$42x (21\% \times \$200x)$). Therefore, USP must treat the \$200x of income (\$160x inclusion plus \$40x section 78 amount) and the \$40x of taxes associated with the inclusion in Year 1 as passive category income and taxes. USP must also follow the appropriate procedures under § 1.905–4.

(vi) *Example 6.* The facts are the same as in paragraph (c)(8)(v) of this section (the facts in *Example 5*), except that in Year 1, USP elects to apply section 954(b)(4) to exclude CFC's passive income from its subpart F income, both before and after the recomputation of CFC's Year 1 subpart F income and USP's Year 1 U.S. tax liability that is required by reason of the Year 2 \$60x foreign tax redetermination. Although the income is not considered to be subpart F income, under paragraph (c)(7)(iii) of this section it remains passive category income until distribution. In Year 2, the \$100x distribution is a dividend to USP, because CFC has \$160x of accumulated

earnings and profits described in section 959(c)(3) (the \$100x of earnings in Year 1 increased by the \$60x refund received in Year 2 that under § 1.905–3(b)(2) is taken into account in Year 1). Under paragraph (c)(7)(iii) of this section, USP must determine whether the dividend income is high-taxed income to USP in Year 2. The treatment of the dividend as passive category income may be relevant in determining deductions allocable or apportioned to such dividend income or related stock that are excluded in the computation of USP's foreign tax credit limitation under section 904(a) in Year 2. See section 904(b)(4). Under paragraph (c)(1) of this section, the dividend income is passive category income to USP because the foreign taxes paid and deemed paid by USP (\$0x) with respect to the dividend income do not exceed the highest U.S. tax rate on that income.

(vii) *Example 7.* The facts are the same as in paragraph (c)(8)(v) of this section (the facts in *Example 5*), except that the distribution in Year 2 is subject to a withholding tax of \$25x. Under paragraph (c)(7)(i) of this section, USP must redetermine whether its Year 1 inclusion should be considered high-taxed income of USP because there is a net \$35x reduction (\$60x refund of foreign corporate tax—\$25x withholding tax) of foreign tax. By taking into account both the reduction in foreign corporate tax and the additional withholding tax, the inclusion continues to be considered high-taxed income of USP in Year 1 ($\$65x > \$42x (21\% \times \$200)$). USP must follow the appropriate section 905(c) procedures. USP must redetermine its U.S. tax liability for Year 1, but the Year 1 inclusion and the \$65x taxes (\$40x of deemed paid tax in Year 1 and \$25x withholding tax in Year 2) will continue to be treated as general category income and taxes.

(viii) *Example 8.* (A) CFC, a controlled foreign corporation operating in Country G, is a wholly-owned subsidiary of USP, a domestic corporation. USP and CFC are calendar year taxpayers. Country G imposes a tax of 50% on CFC's earnings. Under Country G's system, the foreign corporate tax on particular earnings is reduced on distribution of those earnings to 30% and no withholding tax is imposed. Under Country G's law, distributions are treated as made out of a pool of undistributed earnings subject to the 50% tax rate. For Year 1, CFC's only earnings consist of passive income that is foreign personal holding company income that is earned in foreign Country G. CFC has taxable income of \$110x for Federal income tax purposes and \$100x for Country G

purposes. Country G, therefore, imposes a tax of \$50x on the Year 1 earnings of CFC. USP does not elect to exclude this income from subpart F under section 954(b)(4) and includes \$110x in gross income (\$60x of net foreign personal holding company income under section 951(a) and \$50x of the section 78 dividend). The highest rate of tax under section 11 in Year 1 is 34%. Therefore, at the time of the section 951(a) inclusion, the income is considered to be high-taxed income under paragraph (c) of this section ($\$50x > \$37.4x (34\% \times \$110x)$) and is general category income to USP. CFC does not distribute any of its earnings in Year 1.

(B) In Year 2, CFC earns general category income that is not subpart F income or tested income. CFC again has \$110x in taxable income for Federal income tax purposes and \$100x in taxable income for Country G purposes, and CFC pays \$50x of tax to foreign Country G. In Year 3, CFC has no taxable income or earnings. On December 31, Year 3, CFC distributes \$60x of its total \$120x of earnings and receives a refund of foreign tax of \$24x. The \$24x refund is a foreign tax redetermination under § 1.905–3(a) that under § 1.905–3(b)(2) requires a redetermination of CFC's Year 1 subpart F income and USP's deemed paid taxes and Year 1 U.S. tax liability. Country G treats the distribution of earnings as out of the 50% tax rate pool of \$200x of earnings accumulated in Year 1 and Year 2, as calculated for Country G tax purposes. However, under paragraph (c)(7)(ii) of this section, the distribution, and, therefore, the reduction of tax is treated as first attributable to the \$60x of passive category earnings attributable to income previously taxed in Year 1, and none of the distribution is treated as made out of the \$60x of earnings accumulated in Year 2 (which is not previously taxed). Because 40 percent (the reduction in tax rates from 50 percent to 30 percent is a 40 percent reduction in the tax) of the \$50x of foreign taxes attributable to the \$60x of Year 1 passive income as calculated for Federal income tax purposes is refunded, \$20x of the \$24x foreign tax refund reduces foreign taxes on CFC's Year 1 passive income from \$50x to \$30x. The other \$4x of the tax refund reduces the taxes imposed in Year 2 on CFC's general category income from \$50x to \$46x.

(C) Under paragraph (c)(7) of this section, in connection with the section 905(c) adjustment USP must redetermine whether its Year 1 subpart F inclusion is considered high-taxed income. By taking into account the reduction in foreign tax, the inclusion is

increased by \$20x to \$80x, the deemed paid taxes are reduced by \$20x to \$30x, and the inclusion is not considered high-taxed income (\$30x < 34% × \$110x). Therefore, USP must treat the revised section 951(a) inclusion and the taxes associated with the section 951(a) inclusion as passive category income and taxes in Year 1. USP must follow the appropriate procedures under § 1.905–4.

* * * * *

(q) *Applicability date.* (1) Except as provided in paragraph (q)(2) and (3) of this section, this section applies for taxable years that both begin after December 31, 2017, and end on or after December 4, 2018.

(2) Paragraphs (c)(7)(i) and (iii) and (c)(8)(v) through (viii) apply to taxable years ending on or after December 16, 2019. For taxable years that both begin after December 31, 2017, and end on or after December 4, 2018, and also end before December 16, 2019, see § 1.904–4(c)(7)(i) and (iii) as in effect on December 17, 2019.

■ **Par. 18.** Section 1.904–6 is amended by:

- 1. Revising the section heading and paragraph (a).
- 2. Redesignating paragraph (b) as paragraph (e).
- 3. Adding a new paragraph (b) and paragraph (c).
- 4. Revising paragraph (d).
- 5. In newly redesignated paragraph (e)(4)(i), removing the language “paragraph (b)(4)(ii)” and adding the language “paragraph (e)(4)(ii)” in its place.
- 6. In newly redesignated paragraph (e)(4)(ii)(C), removing the language “paragraph (b)(4)(ii)(B)” and adding the language “paragraph (e)(4)(ii)(B)” in its place.
- 7. Adding paragraphs (f) and (g).

The revisions and additions read as follows:

§ 1.904–6 Allocation and apportionment of foreign income taxes.

(a) *In general.* The amount of foreign income taxes paid or accrued with respect to a separate category (as defined in § 1.904–5(a)(4)(v)) of income (including U.S. source income assigned to the separate category) includes only those foreign income taxes that are allocated and apportioned to the separate category under the rules of § 1.861–20 (as modified by this section). In applying the foreign tax credit limitation under sections 904(a) and (d) to general category income described in section 904(d)(2)(A)(ii) and § 1.904–4(d), foreign source income in the general category is a statutory grouping. However, general category income is the

residual grouping of income for purposes of assigning foreign income taxes to separate categories. In addition, in determining the numerator of the foreign tax credit limitation under sections 904(a) and (d), where U.S. source income is the residual grouping, the amount of foreign income taxes paid or accrued for which a deduction is allowed, for example, under section 901(k)(7), with respect to foreign source income in a separate category includes only those foreign income taxes that are allocated and apportioned to foreign source income in the separate category under the rules of § 1.861–20 (as modified by this section). For purposes of this section, unless otherwise stated, terms have the same meaning as provided in § 1.861–20(b). For examples illustrating the application of this section, see § 1.861–20(g).

(b) *Assigning an item of foreign gross income to a separate category.* For purposes of assigning an item of foreign gross income to a separate category or categories (or foreign source income in a separate category) under § 1.861–20, the rules of this paragraph (b) apply.

(1) *Base differences.* Any item of foreign gross income that is attributable to a base difference described in § 1.861–20(d)(2)(ii)(B) is assigned to the separate category described in section 904(d)(2)(H)(i), and to foreign source income in that category.

(2) [Reserved]

(c) *Allocating and apportioning deductions.* For purposes of applying § 1.861–20(e) to allocate and apportion deductions allowed under foreign law to foreign gross income in the separate categories, before undertaking the steps outlined in § 1.861–20(e), foreign gross income in the passive category is first reduced by any related person interest expense that is allocated to the income under the principles of section 954(b)(5) and § 1.904–5(c)(2)(ii)(C). In allocating and apportioning expenses not specifically allocated under foreign law, the principles of foreign law are applied only after taking into account the reduction of passive income by the application of section 954(b)(5). In allocating and apportioning expenses when foreign law does not provide rules for the allocation or apportionment of expenses, losses or other deductions to particular items of foreign gross income, then the principles of section 954(b)(5), in addition to the principles of the section 861 regulations (as defined in § 1.861–8(a)(1)), apply to allocate and apportion expenses, losses or other foreign law deductions to foreign gross income after reduction of passive income by the amount of related person interest expense allocated to passive

income under section 954(b)(5) and § 1.904–5(c)(2)(ii)(C).

(d) *Apportionment of taxes for purposes of applying the high-tax income tests.* If taxes have been allocated and apportioned to passive income under the rules of paragraph (a) this section, the taxes must further be apportioned to the groups of income described in § 1.904–4(c)(3) through (5) for purposes of determining if the group is high-taxed income that is recharacterized as income in another separate category under the rules of § 1.904–4(c). See also § 1.954–1(c)(1)(iii)(B) (defining a single item of passive category foreign personal holding company income by reference to the grouping rules under § 1.904–4(c)(3) through (5)). Taxes are related to income in a particular group under the same rules as those in paragraph (a) of this section except that those rules are applied by apportioning foreign income taxes to the groups described in § 1.904–4(c)(3) through (5) instead of separate categories.

* * * * *

(f) *Treatment of certain foreign income taxes paid or accrued by United States shareholders.* Some or all of the foreign gross income of a United States shareholder of a controlled foreign corporation that is attributable to foreign law inclusion regime income with respect to a foreign law CFC described in § 1.861–20(d)(3)(iii) or foreign law pass-through income from a reverse hybrid described in § 1.861–20(d)(3)(i)(C) is assigned to the section 951A category if, were the controlled foreign corporation the taxpayer that recognizes the foreign gross income, the foreign gross income would be assigned to the controlled foreign corporation’s tested income group (as defined in § 1.960–1(b)(33)) within the general category to which an inclusion under section 951A is attributable. The amount of the United States shareholder’s foreign gross income that is assigned to the section 951A category (or a specified separate category associated with the section 951A category) is based on the inclusion percentage (as defined in § 1.960–2(c)(2)) of the United States shareholder. For example, if a United States shareholder has an inclusion percentage of 60 percent, then 60 percent of the foreign gross income of a United States shareholder that would be assigned (under § 1.861–20(d)(3)(iii)) to the tested income group within the general category income of a reverse hybrid that is a controlled foreign corporation to which an inclusion under section 951A is attributable is assigned to the section

951A category or the specified separate category for income resourced under a tax treaty, and not to the general category.

(g) *Applicability date.* This section applies to taxable years beginning after December 31, 2019. For taxable years that both begin after December 31, 2017, and end on or after December 4, 2018, and also begin before January 1, 2020, see § 1.904–6 as in effect on December 17, 2019.

■ **Par. 19.** Section 1.904(b)–3 is amended by revising the first sentence in paragraph (c)(1), adding paragraph (d)(2), and revising paragraph (f) to read as follows:

§ 1.904(b)–3 Disregard of certain dividends and deductions under section 904(b)(4).

* * * * *

(c) * * *

(1) * * * For purposes of applying the section 861 regulations (as defined in § 1.861–8(a)) to the deductions of a United States shareholder, the only gross income included in a section 245A subgroup is dividend income for which a deduction is allowed under section 245A. * * *

* * * * *

(d) * * *

(2) *Net operating losses.* If the taxpayer has a net operating loss in the current taxable year, then solely for purposes of determining the source and separate category of the net operating loss, the overall foreign loss rules in section 904(f) and the overall domestic loss rules in section 904(g) are applied without taking into account the adjustments required under section 904(b) and this section.

* * * * *

(f) *Applicability dates.* (1) Except as provided in paragraph (f)(2) of this section, this section applies to taxable years beginning after December 31, 2017.

(2) Paragraph (d)(2) of this section applies to taxable years ending on or after December 16, 2019.

■ **Par. 20.** Section 1.904(g)–3 is amended by:

- 1. Adding a sentence at the end of paragraph (b)(1) and adding paragraph (j).
- 2. Revising paragraph (l).

The additions and revision read as follows:

§ 1.904(g)–3 Ordering rules for the allocation of net operating losses, net capital losses, U.S. source losses, and separate limitation losses, and for the recapture of separate limitation losses, overall foreign losses, and overall domestic losses.

* * * * *

(b) * * *

(1) * * * See §§ 1.861–8(e)(8), 1.904(b)–3(d)(2), and 1.1502–4(c)(1)(iii) for rules to determine the source and separate category components of a net operating loss.

* * * * *

(j) *Step Nine: Dispositions that result in additional income recognition under the branch loss recapture and dual consolidated loss recapture rules—(1) In general.* If, after any gain is required to be recognized under section 904(f)(3) on a transaction that is otherwise a nonrecognition transaction, an additional amount of income is recognized under section 91(d), section 367(a)(3)(C) (as applicable to losses incurred before January 1, 2018), or § 1.1503(d)–6, and that additional income amount is determined by taking into account an offset for the amount of gain recognized under section 904(f)(3) and so is not initially taken into account in applying paragraph (b) of this section, then paragraphs (b) through (h) of this section are applied to determine the allocation of any additional net operating loss deduction and other deductions or losses and the applicable increases in the taxpayer’s overall foreign loss, separate limitation loss, and overall domestic loss accounts, as well as any additional recapture and reduction of the taxpayer’s separate limitation loss, overall foreign loss, and overall domestic loss accounts.

(2) *Rules for additional recapture of loss accounts.* For the purpose of recapturing and reducing loss accounts under paragraph (j)(1) of this section, the taxpayer also takes into account any creation of or addition to loss accounts that result from the application of paragraphs (b) through (i) of this section in the current tax year. If any of the additional income described in paragraph (j)(1) of this section is foreign source income in a separate category for which there is a remaining balance in an overall foreign loss account after applying paragraph (i) of this section, the section 904(f)(1) recapture amount under § 1.904(f)–2(c) for that additional income is determined by first computing a hypothetical recapture amount as it would have been determined prior to the application of paragraph (i) of this section but taking into account the additional foreign source income described in this paragraph (j)(2) and then subtracting the actual overall foreign loss recapture determined prior to the application of paragraph (i) of this section (that did not take into account the additional foreign source income). The remainder is the overall foreign loss recapture amount

with respect to the additional foreign source income described in this paragraph (j)(2).

* * * * *

(l) *Applicability date.* This section applies to taxable years ending on or after November 2, 2020.

■ **Par. 21.** Section 1.905–3 is amended by:

- 1. Revising the section heading and the first sentence of paragraph (a).
- 2. Adding paragraphs (b)(2) and (3).
- 3. Revising paragraph (d).

The revisions and additions read as follows:

§ 1.905–3 Adjustments to U.S. tax liability and to current earnings and profits as a result of a foreign tax redetermination.

(a) * * * For purposes of this section and § 1.905–4, the term *foreign tax redetermination* means a change in the liability for foreign income tax, as defined in § 1.960–1(b)(5), or certain other changes described in this paragraph (a) that may affect a taxpayer’s U.S. tax liability, including by reason of a change in the amount of its foreign tax credit, the amount of its distributions or inclusions under section 951, 951A, or 1293, the application of the high-tax exception described in section 954(b)(4) (including for purposes of determining amounts excluded from gross tested income under section 951A(c)(2)(A)(i)(III) and § 1.951A–2(c)(1)(iii)), or the amount of tax determined under sections 1291(c)(2) and 1291(g)(1)(C)(ii). * * *

(b) * * *

(2) *Foreign income taxes paid or accrued by foreign corporations—(i) In general.* A redetermination of U.S. tax liability is required to account for the effect of a redetermination of foreign income taxes taken into account by a foreign corporation in the year accrued, or a refund of foreign income taxes taken into account by the foreign corporation in the year paid.

(ii) *Required adjustments.* If a redetermination of U.S. tax liability is required for any taxable year under paragraph (b)(2)(i) of this section, the foreign corporation’s taxable income, earnings and profits, and current year taxes (as defined in § 1.960–1(b)(4)) must be adjusted in the year to which the redetermined tax relates (or, in the case of a foreign corporation that receives a refund of foreign income tax and uses the cash basis of accounting, in the year the tax was paid). The redetermination of U.S. tax liability is made by treating the redetermined amount of foreign tax as the amount of tax paid or accrued by the foreign corporation in such year. For example, in the case of a refund of foreign income

taxes taken into account in the year accrued, the foreign corporation's subpart F income, tested income, and current earnings and profits are increased, as appropriate, in the year to which the foreign tax relates to reflect the functional currency amount of the foreign income tax refund. The required redetermination of U.S. tax liability must account for the effect of the foreign tax redetermination on the characterization and amount of distributions or inclusions under section 951, 951A, or 1293 taken into account by each of the foreign corporation's United States shareholders, on the application of the high-tax exception described in section 954(b)(4) (including for purposes of determining the exclusions from gross tested income under section 951A(c)(2)(A)(i)(III) and § 1.951A-2(c)(1)(iii)), and the amount of tax determined under sections 1291(c)(2) and 1291(g)(1)(C)(ii), as well as on the amount of foreign taxes deemed paid under section 960 in such year, regardless of whether any such shareholder chooses to deduct or credit its foreign income taxes in any taxable year. In addition, a redetermination of U.S. tax liability is required for any subsequent taxable year in which the characterization or amount of a United States shareholder's distribution or inclusion from the foreign corporation is affected by the foreign tax redetermination, up to and including the taxable year in which the foreign tax redetermination occurs, as well as any year to which unused foreign taxes from such year were carried under section 904(c).

(iii) *Reduction of corporate level tax on distribution of earnings and profits.* If a United States shareholder of a controlled foreign corporation receives a distribution out of previously taxed earnings and profits described in section 959(c)(1) and (2) and a foreign country has imposed tax on the income of the controlled foreign corporation, which tax is reduced on distribution of the earnings and profits of the corporation (resulting in a foreign tax redetermination), then the United States shareholder must redetermine its U.S. tax liability for the year or years affected. See also § 1.904-4(c)(7)(i).

(iv) *Foreign tax redeterminations relating to taxable years beginning before January 1, 2018.* In the case of a foreign tax redetermination of a foreign corporation that relates to a taxable year of the foreign corporation beginning before January 1, 2018, a redetermination of U.S. tax liability is required under the rules of § 1.905-5.

(v) *Examples.* The following examples illustrate the application of this paragraph (b)(2).

(A) *Presumed Facts.* Except as otherwise provided in this paragraph (b)(2)(v), the following facts are assumed for purposes of the examples in paragraphs (b)(2)(v)(B) through (E) of this section:

(1) All parties are accrual basis taxpayers that use the calendar year as their taxable year both for Federal income tax purposes and for foreign tax purposes and use the average exchange rate to translate accrued foreign income taxes;

(2) CFC, CFC1, and CFC2 are controlled foreign corporations organized in Country X that use the "u" as their functional currency;

(3) No income adjustment is required to reflect exchange gain or loss (within the meaning of § 1.988-1(e)) with respect to the disposition of nonfunctional currency attributable to a refund of foreign income taxes received by any CFC, because all foreign income taxes are denominated and paid in the CFC's functional currency;

(4) The highest rate of U.S. tax in section 11 and the rate applicable to USP in all years is 21 percent;

(5) No election to exclude high-taxed income under section 954(b)(4) or § 1.951A-2(c)(7) is made with respect to CFC, CFC1, or CFC2; and

(6) USP's foreign tax credit limitation under section 904(a) exceeds the amount of foreign income taxes it is deemed to pay.

(B) *Example 1: Refund of tested foreign income taxes—(1) Facts.* CFC is a wholly-owned subsidiary of USP, a domestic corporation. In Year 1, CFC earns 3,660u of general category gross tested income and accrues and pays 300u of foreign income taxes with respect to that income. CFC has no allowable deductions other than the foreign income tax expense. Accordingly, CFC has tested income of 3,360u in Year 1. CFC has no qualified business asset investment (within the meaning of section 951A(d) and § 1.951A-3(b)). In Year 1, no portion of USP's deduction under section 250 ("section 250 deduction") is reduced by reason of section 250(a)(2)(B)(ii). USP's inclusion percentage (as defined in § 1.960-2(c)(2)) is 100%. In Year 1, USP earns no other income and has no other expenses. The average exchange rate used to translate USP's inclusion under section 951A and CFC's foreign income taxes into dollars for Year 1 is \$1x:1u. See section 989(b)(3) and §§ 1.951A-1(d)(1) and 1.986(a)-1(a)(1). Accordingly, for Year 1, USP's tested foreign income taxes (as defined in

§ 1.960-2(c)(3)) with respect to CFC are \$300x. In Year 3, CFC carries back a loss for foreign tax purposes and receives a refund of foreign tax of 100u that relates to Year 1.

(2) *Analysis—(i) Result in Year 1.* In Year 1, CFC has tested income of 3,360u and tested foreign income taxes of \$300x. Under section 951A(a) and § 1.951A-1(c)(1), USP has a GILTI inclusion amount of \$3,360x (3,360u translated at \$1x:1u). Under section 960(d) and § 1.960-2(c), USP is deemed to have paid \$240x (80% × 100% × \$300x) of foreign income taxes. Under section 78 and § 1.78-1(a), USP is treated as receiving a dividend of \$300x (a "section 78 dividend"). USP's section 250 deduction is \$1,830x (50% × (\$3,360x + \$300x)). Accordingly, for Year 1, USP has taxable income of \$1,830x (\$3,360x + \$300x - \$1,830x) and pre-credit U.S. tax liability of \$384.30x (21% × \$1,830x). Accordingly, USP pays U.S. tax of \$144.30x (\$384.30x - \$240x).

(ii) *Result in Year 3.* The refund of 100u to CFC in Year 3 is a foreign tax redetermination under paragraph (a) of this section. Under paragraph (b)(2)(ii) of this section, USP must account for the effect of the foreign tax redetermination on its GILTI inclusion amount and foreign taxes deemed paid in Year 1. In redetermining USP's U.S. tax liability for Year 1, USP must increase CFC's tested income and its earnings and profits in Year 1 by the refunded tax amount of 100u, must determine the effect of that increase on its GILTI inclusion amount, and must adjust the amount of foreign taxes deemed paid and the section 78 dividend to account for CFC's refund of foreign tax. Under § 1.986(a)-1(c), the refund is translated into dollars at the exchange rate that was used to translate such amount when initially accrued. As a result of the foreign tax redetermination, for Year 1, CFC has tested income of 3,460u (3,360u + 100u) and tested foreign income taxes of \$200x (\$300x - \$100x). Under section 951A(a) and § 1.951A-1(c)(1), USP has a redetermined GILTI inclusion amount of \$3,460x (3,460u translated at \$1x:1u). Under section 960(d) and § 1.960-2(c), USP is deemed to have paid \$160x (80% × 100% × \$200x) of foreign income taxes. Under section 78 and § 1.78-1(a), USP's section 78 dividend is \$200x. USP's redetermined section 250 deduction is \$1,830x (50% × (\$3,460x + \$200x)). Accordingly, USP's redetermined taxable income is \$1,830x (\$3,460x + \$200x - \$1,830x) and its pre-credit U.S. tax liability is \$384.30x (21% × \$1,830x). Therefore, USP's redetermined U.S. tax liability is

\$224.3x (\$384.30x – \$160x), an increase of \$80x (\$224.30x – \$144.30x).

(C) *Example 2: Additional payment of foreign income taxes*—(1) *Facts*. CFC is a wholly-owned subsidiary of USP, a domestic corporation. In Year 1, CFC earns 1,000u of general category gross foreign base company sales income and accrues and pays 100u of foreign income taxes with respect to that income. CFC has no allowable deductions other than the foreign income tax expense. The average exchange rate used to translate USP's subpart F inclusion and CFC's foreign income taxes into dollars for Year 1 is \$1x:1u. See section 989(b)(3) and § 1.986(a)–1(a)(1). In Year 1, USP earns no other income and has no other expenses. In Year 5, pursuant to a Country X audit CFC accrues and pays additional foreign income tax of 80u with respect to its 1,000u of general category foreign base company sales income earned in Year 1. The spot rate (as defined in § 1.988–1(d)) on the date of payment of the tax in Year 5 is \$1x:0.8u. The foreign income taxes accrued and paid in Year 1 and Year 5 are properly attributable to CFC's foreign base company sales income that is included in income by USP under section 951(a)(1)(A) (“subpart F inclusion”) in Year 1 with respect to CFC.

(2) *Analysis*—(i) *Result in Year 1*. In Year 1, CFC has subpart F income of 900u (1,000u – 100u). Accordingly, USP has a \$900x (900u translated at \$1x:1u) subpart F inclusion. Under section 960(a) and § 1.960–2(b), USP is deemed to have paid \$100x (100u translated at \$1x:1u) of foreign income taxes. Under section 78 and § 1.78–1(a), USP's section 78 dividend is \$100x. Accordingly, for Year 1, USP has taxable income of \$1,000x (\$900x + \$100x) and pre-credit U.S. tax liability of \$210x (21% × \$1,000x). Accordingly, USP's U.S. tax liability is \$110x (\$210x – \$100x).

(ii) *Result in Year 5*. CFC's payment of 80u of additional foreign income tax in Year 5 with respect to Year 1 is a foreign tax redetermination as defined in paragraph (a) of this section. Under paragraph (b)(2)(ii) of this section, USP must reduce CFC's subpart F income and its earnings and profits in Year 1 by the additional tax amount of 80u. Further, USP must reduce its subpart F inclusion, adjust the amount of foreign taxes deemed paid, and adjust the amount of the section 78 dividend to account for CFC's additional payment of foreign tax. Under section 986(a)(1)(B)(i) and § 1.986(a)–1(a)(2)(i), because CFC's payment of additional tax occurs more than 24 months after the close of the

taxable year to which it relates, the additional tax is translated into dollars at the spot rate on the date of payment (\$1x:0.8u). Therefore, CFC has foreign income taxes of \$200x (100u translated at \$1x:1u plus 80u translated at \$1x:0.8u) that are properly attributable to CFC's foreign base company sales income that gives rise to USP's subpart F inclusion in Year 1. As a result of the foreign tax redetermination, for Year 1, USP has a subpart F inclusion of \$820x (1,000u – 180u = 820u translated at \$1x:1u). Under section 960(a) and § 1.960–2(b), USP is deemed to have paid \$200x of foreign income taxes. Under section 78 and § 1.78–1(a), USP's section 78 dividend is \$200x. USP's redetermined U.S. taxable income is \$1,020x (\$820x + \$200x) and its pre-credit U.S. tax liability is \$214.20x (21% × \$1,020x). Therefore, USP's redetermined U.S. tax liability is \$14.20x (\$214.20x – \$200x), a decrease of \$95.80x (\$110x – \$14.20x). If USP makes a timely refund claim within the period allowed by section 6511, USP will be entitled to a refund of any overpayment resulting from the redetermination of its U.S. tax liability.

(D) *Example 3: Two-year rule*—(1) *Facts*. CFC is a wholly-owned subsidiary of USP, a domestic corporation. In Year 1, CFC earns 1,000u of general category gross foreign base company sales income and accrues 210u of foreign income taxes with respect to that income. In Year 1, USP earns no other income and has no other expenses. The average exchange rate used to translate USP's subpart F inclusion and CFC's foreign income taxes into dollars for Year 1 is \$1x:1u. See sections 989(b)(3) and 986(a)(1)(A) and § 1.986(a)–1(a)(1). CFC does not pay its foreign income taxes for Year 1 until September 1, Year 5, when the spot rate is \$0.8x:1u. The foreign income taxes accrued and paid in Year 1 and Year 5, respectively, are properly attributable to CFC's foreign base company sales income that gives rise to USP's subpart F inclusion in Year 1 with respect to CFC.

(2) *Analysis*—(i) *Result in Year 1*. In Year 1, CFC has subpart F income of 790u (1,000u – 210u). Accordingly, USP has a \$790x (790u translated at \$1x:1u) subpart F inclusion. Under section 960(a) and § 1.960–2(b), USP is deemed to have paid \$210x (210u translated at \$1x:1u) of foreign income taxes. Under section 78 and § 1.78–1(a), USP's section 78 dividend is \$210x. Accordingly, for Year 1, USP has taxable income of \$1,000x (\$790x + \$210x) and pre-credit U.S. tax liability of \$210x (21% × \$1,000x). Accordingly, USP owes no U.S. tax (\$210x – \$210x = 0).

(ii) *Result in Year 3*. CFC's failure to pay the tax by the end of Year 3 results in a foreign tax redetermination under paragraph (a) of this section. Because the taxes are not paid on or before the date 24 months after the close of the taxable year to which the tax relates, under paragraph (a) of this section CFC must account for the redetermination as if the unpaid 210u of taxes were refunded on the last day of Year 3. Under paragraph (b)(2)(ii) of this section, USP must increase CFC's subpart F income and its earnings and profits in Year 1 by the unpaid tax amount of 210u. Further, USP must increase its subpart F inclusion, and decrease the amount of foreign taxes deemed paid and the amount of the section 78 dividend to account for the unpaid taxes. As a result of the foreign tax redetermination, for Year 1, USP has a subpart F inclusion of \$1,000x (1,000u translated at \$1x:1u). Under section 960(a) and § 1.960–2(b), USP is deemed to have paid no foreign income taxes. Under section 78 and § 1.78–1(a), USP has no section 78 dividend. Accordingly, USP's redetermined taxable income is \$1,000x and its pre-credit U.S. tax liability is unchanged at \$210x (21% × \$1,000x). However, USP has no foreign tax credits. Therefore, USP's redetermined U.S. tax liability for Year 1 is \$210x, an increase of \$210x.

(iii) *Result in Year 5*. CFC's payment of the Year 1 tax liability of 210u on September 1, Year 5, results in a second foreign tax redetermination under paragraph (a) of this section. Under paragraph (b)(2)(ii) of this section, USP must decrease CFC's subpart F income and its earnings and profits in Year 1 by the tax paid amount of 210u. Further, USP must reduce its subpart F inclusion, and adjust the amount of foreign taxes deemed paid and the amount of the section 78 dividend to account for CFC's payment of foreign tax. Under section 986(a)(1)(B)(i) and § 1.986(a)–1(a)(2)(i), because the tax was paid more than 24 months after the close of the year to which the tax relates, CFC must translate the 210u of tax at the spot rate on the date of payment of the foreign taxes in Year 5. Therefore, CFC has foreign income taxes of \$168x (210u translated at \$0.8x:1u) that are properly attributable to CFC's foreign base company sales income that gives rise to USP's subpart F inclusion in Year 1. As a result of the foreign tax redetermination, for Year 1, USP has a subpart F inclusion of \$790x (1,000u – 210u = 790u translated at \$1x:1u). Under section 960(a) and § 1.960–2(b), USP is deemed to have paid \$168x of foreign income taxes.

Under section 78 and § 1.78–1(a), USP's section 78 dividend is \$168x. Accordingly, USP's redetermined taxable income is \$958x (\$790x + \$168x), its pre-credit U.S. tax liability is \$201.18x (21% × \$958x), and its redetermined U.S. tax liability is \$33.18 (\$201.18x – \$168x), a decrease of \$176.82x (\$210x – \$33.18x). If USP makes a timely refund claim within the period allowed by section 6511, USP will be entitled to a refund of any overpayment resulting from the redetermination of its U.S. tax liability.

(E) *Example 4: Contested tax—(1) Facts.* CFC is a wholly-owned subsidiary of USP, a domestic corporation. In Year 1, CFC earns 360u of general category gross tested income and accrues and pays 160u of current year taxes with respect to that income. CFC has no allowable deductions other than the foreign income tax expense. Accordingly, CFC has tested income of 200u in Year 1. CFC has no qualified business asset investment (within the meaning of section 951A(d) and § 1.951A–3(b)). In Year 1, no portion of USP's section 250 deduction is reduced by reason of section 250(a)(2)(B)(ii). USP's inclusion percentage (as defined in § 1.960–2(c)(2)) is 100%. In Year 1, USP earns no other income and has no other expenses. The average exchange rate used to translate USP's section 951A inclusion and CFC's foreign income taxes into dollars for Year 1 is \$1x:1u. See section 989(b)(3) and §§ 1.951A–1(d)(1) and 1.986(a)–1(a)(1). Accordingly, for Year 1, CFC's tested foreign income taxes (as defined in § 1.960–2(c)(3)) with respect to USP are \$160x. In Year 3, Country X assessed an additional 30u of tax with respect to CFC's Year 1 income. CFC did not pay the additional 30u of tax and contested the assessment. After exhausting all effective and practical remedies to reduce, over time, its liability for foreign income tax, CFC settled the contest with Country X in Year 4 for 20u, which CFC did not pay until January 15, Year 5, when the spot rate was \$1.1x:1u. CFC did not earn any other income or accrue any other foreign income taxes in Years 2 through 6 and made no distributions to USP. The additional taxes paid in Year 5 are also tested foreign income taxes of CFC with respect to USP.

(2) *Analysis—(i) Result in Year 1.* In Year 1, CFC has tested income of 200u and tested foreign income taxes of \$160x. Under section 951A(a) and § 1.951A–1(c)(1), USP has a GILTI inclusion amount of \$200x (200u translated at \$1x:1u). Under section 960(d) and § 1.960–2(c), USP is deemed to have paid \$128x (80% × 100% × \$160x) of foreign income taxes. Under

section 78 and § 1.78–1(a), USP's section 78 dividend is \$160x. USP's section 250 deduction is \$180x (50% × (\$200x + \$160x)). Accordingly, for Year 1, USP has taxable income of \$180x (\$200x + \$160x – \$180x) and a pre-credit U.S. tax liability of \$37.80x (21% × \$180x). Under section 904(a), because all of USP's income is section 951A category income (see § 1.904–4(g)), USP's foreign tax credit limitation is \$37.80x (\$37.80x × \$180x/\$180x), which is less than the \$128x of foreign income tax that USP is deemed to have paid. Accordingly, USP owes no U.S. tax (\$37.80x – \$37.80x = 0).

(ii) *Result in Year 5.* CFC's accrual and payment of the additional 20u of foreign income tax with respect to Year 1 is a foreign tax redetermination under paragraph (a) of this section. Under § 1.461–4(g)(6)(iii)(B), the additional taxes accrue when the tax contest is resolved, that is, in Year 4. However, because the taxes, which relate to Year 1, were not paid on or before the date 24 months after close of CFC's taxable year to which the tax relates, that is, Year 1, under section 905(c)(2) and paragraph (a) of this section CFC cannot take these taxes into account when they accrue in Year 4. Instead, the taxes are taken into account when they are paid in Year 5. Under paragraph (b)(2)(ii) of this section, USP must decrease CFC's tested income and its earnings and profits in Year 1 by the additional tax amount of 20u. Further, USP must adjust its GILTI inclusion amount, the amount of foreign taxes deemed paid, and the amount of the section 78 dividend to account for CFC's additional payment of tax. Under section 986(a)(1)(B)(i) and § 1.986(a)–1(a)(2)(i), because CFC's payment of additional tax occurs more than 24 months after the close of the taxable year to which it relates, the additional tax is translated into dollars at the spot rate on the date of payment (\$1.1x:1u). Therefore, CFC has tested foreign income taxes of \$182x (160u translated at \$1x:1u plus 20u translated at \$1.1x:1u). As a result of the foreign tax redetermination, for Year 1, CFC has tested income of 180u (200u – 20u). Under section 951A(a) and § 1.951A–1(c)(1), USP has a redetermined GILTI inclusion amount of \$180x (180u, translated at \$1x:1u). Under section 960(d) and § 1.960–2(c), USP is deemed to have paid \$145.60x (80% × 100% × \$182x) of foreign income taxes. Under section 78 and § 1.78–1(a), USP's section 78 dividend is \$182x. USP's redetermined section 250 deduction is \$181x (50% × (\$180x + \$182x)). Accordingly, USP's redetermined

taxable income is \$181x (\$180x + \$182x – \$181x), its pre-credit U.S. tax liability is \$38.01x (21% × \$181x), and its redetermined U.S. tax liability is zero (\$38.01x – \$38.01x).

(3) *Foreign tax redeterminations of successors or transferees.* If at the time of a foreign tax redetermination the person with legal liability for the tax (or in the case of a refund, the legal right to such refund) (the “successor”) is a different person than the person that had legal liability for the tax in the year to which the redetermined tax relates (the “original taxpayer”), the required redetermination of U.S. tax liability is made as if the foreign tax redetermination occurred in the hands of the original taxpayer. Federal income tax principles apply to determine the tax consequences if the successor remits (or receives a refund of) a tax that in the year to which the redetermined tax relates was the legal liability of, and thus under § 1.901–2(f) is considered paid by, the original taxpayer.

* * * * *

(d) *Applicability dates.* This section applies to foreign tax redeterminations occurring in taxable years ending on or after December 16, 2019, and to foreign tax redeterminations of foreign corporations occurring in taxable years that end with or within a taxable year of a United States shareholder ending on or after December 16, 2019 and that relate to taxable years of foreign corporations beginning after December 31, 2017.

■ **Par. 22.** Section 1.905–4 is added to read as follows:

§ 1.905–4 Notification of foreign tax redetermination.

(a) *Application of this section.* The rules of this section apply if, as a result of a foreign tax redetermination (as defined in § 1.905–3(a)), a redetermination of U.S. tax liability is required under section 905(c) and § 1.905–3(b).

(b) *Time and manner of notification—*
(1) *Redetermination of U.S. tax liability—(i) In general.* Except as provided in paragraphs (b)(1)(v) and (b)(2) through (4) of this section, any taxpayer for which a redetermination of U.S. tax liability is required must notify the Internal Revenue Service (IRS) of the foreign tax redetermination by filing an amended return, Form 1118 (Foreign Tax Credit—Corporations) or Form 1116 (Foreign Tax Credit (Individual, Estate, or Trust)), and the statement described in paragraph (c) of this section for the taxable year with respect to which a redetermination of U.S. tax liability is required. Such notification must be filed within the time prescribed by this

paragraph (b) and contain the information described in paragraph (c) of this section. If a foreign tax redetermination requires an individual to redetermine the individual's U.S. tax liability, and if, after taking into account such foreign tax redetermination, the amount of creditable foreign taxes (as defined in section 904(j)(3)(B)) that are paid or accrued by such individual during the taxable year does not exceed the applicable dollar limitation in section 904(j), the individual is not required to file Form 1116 with the amended return for such taxable year if the individual satisfies the requirements of section 904(j).

(ii) *Increase in amount of U.S. tax liability.* Except as provided in paragraphs (b)(1)(iv) and (v) and (b)(2) through (4) of this section, for each taxable year of the taxpayer with respect to which a redetermination of U.S. tax liability is required by reason of a foreign tax redetermination that increases the amount of U.S. tax liability, for example, by reason of a downward adjustment to the amount of foreign income taxes paid or accrued by the taxpayer or a foreign corporation with respect to which the taxpayer computes an amount of foreign taxes deemed paid, the taxpayer must file a separate notification by the due date (with extensions) of the original return for the taxpayer's taxable year in which the foreign tax redetermination occurs.

(iii) *Decrease in amount of U.S. tax liability.* Except as provided in paragraphs (b)(1)(iv) and (v) and (b)(2) through (4) of this section, for each taxable year of the taxpayer with respect to which a redetermination of U.S. tax liability is required by reason of a foreign tax redetermination that decreases the amount of U.S. tax liability and results in an overpayment, for example, by reason of an increase in the amount of foreign income taxes paid or accrued by the taxpayer or a foreign corporation with respect to which the taxpayer computes an amount of foreign taxes deemed paid, the taxpayer must file a claim for refund with the IRS within the period provided in section 6511. See section 6511(d)(3)(A) for the special refund period for refunds attributable to an increase in foreign tax credits.

(iv) *Multiple redeterminations of U.S. tax liability for same taxable year.* The rules of this paragraph (b)(1)(iv) apply except as provided in paragraphs (b)(1)(v) and (b)(2) through (4) of this section. If more than one foreign tax redetermination requires a redetermination of U.S. tax liability for the same affected taxable year of the taxpayer and those foreign tax

redeterminations occur within the same taxable year or within two consecutive taxable years of the taxpayer, the taxpayer may file for the affected taxable year one amended return, Form 1118 or Form 1116, and the statement described in paragraph (c) of this section that reflects all such foreign tax redeterminations. If the taxpayer chooses to file one notification for such redeterminations, one or more of such redeterminations would increase the U.S. tax liability, and the net effect of all such redeterminations is to increase the U.S. tax liability for the affected taxable year, the taxpayer must file such notification by the due date (with extensions) of the original return for the taxpayer's taxable year in which the first foreign tax redetermination that would result in an increased U.S. tax liability occurred. If the taxpayer chooses to file one notification for such redeterminations, one or more of such redeterminations would decrease the U.S. tax liability, and the net effect of all such redeterminations is to decrease the total amount of U.S. tax liability for the affected taxable year, the taxpayer must file such notification as provided in paragraph (b)(1)(iii) of this section, within the period provided by section 6511. If a foreign tax redetermination with respect to the taxable year for which a redetermination of U.S. tax liability is required occurs after the date for providing such notification, more than one amended return may be required with respect to that taxable year.

(v) *Amended return required only if there is a change in amount of U.S. tax due.* If a redetermination of U.S. tax liability is required by reason of a foreign tax redetermination (or multiple foreign tax redeterminations, in the case of redeterminations described in paragraph (b)(1)(iv) of this section), but does not change the amount of U.S. tax due for any taxable year, the taxpayer may, in lieu of applying the applicable rules of paragraphs (b)(1)(i) through (iv) of this section, notify the IRS of such redetermination by attaching a statement to the original return for the taxpayer's taxable year in which the foreign tax redetermination occurs. The statement must be filed by the due date (with extensions) of the original return for the taxpayer's taxable year in which the foreign tax redetermination occurs and contain the information described in § 1.904-2(f). If a redetermination of U.S. tax liability is required by reason of a foreign tax redetermination (either alone, or if the taxpayer chooses to apply paragraph (b)(1)(iv) of this section, in combination with other

foreign tax redeterminations, as provided therein) and the redetermination of U.S. tax liability results in a change to the amount of U.S. tax due for a taxable year, but does not change the amount of U.S. tax due for other taxable years, for example, because of a carryback or carryover of an unused foreign tax under section 904(c), the notification requirements for such other taxable years are deemed to be satisfied if the taxpayer complies with the applicable rules of paragraphs (b)(1)(i) through (iv) of this section with respect to each taxable year for which the foreign tax redetermination changes the amount of U.S. tax due.

(2) *Notification with respect to a change in the amount of foreign tax reported to an owner by a pass-through entity—(i) In general.* If a partnership, trust, or other pass-through entity that reports to its beneficial owners (or to any intermediary on behalf of its beneficial owners), including partners, shareholders, beneficiaries, or similar persons, an amount of creditable foreign tax expenditures, such pass-through entity must notify both the IRS and its owners of any foreign tax redetermination described in § 1.905-3(a) with respect to the foreign tax so reported. For purposes of this paragraph (b)(2), whether or not a redetermination has occurred within the meaning of § 1.905-3(a) is determined as if the pass-through entity were a domestic corporation which had elected to and claimed foreign tax credits in the amount reported for the year to which such foreign taxes relate. The notification required under this paragraph (b)(2) must include the statement described in paragraph (c) of this section along with any information necessary for the owners to redetermine their U.S. tax liability.

(ii) *Partnerships subject to subchapter C of chapter 63 of the Code.* Except as provided in paragraph (b)(4) of this section, if a redetermination of U.S. tax liability that is required under § 1.905-3(b) by reason of a foreign tax redetermination described in § 1.905-3(a) would require a partnership adjustment as defined in § 301.6241-1(a)(6) of this chapter, the partnership must file an administrative adjustment request under section 6227 and make any adjustments required under section 6227. See §§ 301.6227-2 and 301.6227-3 of this chapter for procedures for making adjustments with respect to an administrative adjustment request. An administrative adjustment request required under this paragraph (b)(2)(ii) must be filed by the due date (with extensions) of the original return for the partnership's taxable year in which the

foreign tax redetermination occurs, and the restrictions in section 6227(c) do not apply to such filing. However, unless the administrative adjustment request may otherwise be filed after applying the limitations contained in section 6227(c), such a request is limited to adjustments that are required to be made under section 905(c). The requirements of paragraph (b)(2)(i) of this section are deemed to be satisfied with respect to any item taken into account in an administrative adjustment request filed under this paragraph (b)(2)(ii).

(3) *Alternative notification requirements.* An amended return and Form 1118 (Foreign Tax Credit—Corporations) or Form 1116 (Foreign Tax Credit (Individual, Estate, or Trust)), is not required to notify the IRS of the foreign tax redetermination and redetermination of U.S. tax liability if the taxpayer satisfies alternative notification requirements that may be prescribed by the IRS through forms, instructions, publications, or other guidance.

(4) *Taxpayers under examination within the jurisdiction of the Large Business and International Division—(i) In general.* The alternative notification requirements of this paragraph (b)(4) apply if all of the conditions described in paragraphs (b)(4)(i)(A) through (E) of this section are satisfied.

(A) A foreign tax redetermination occurs while the taxpayer is under examination within the jurisdiction of the Large Business and International Division.

(B) The foreign tax redetermination results in an adjustment to the amount of foreign income taxes paid or accrued by the taxpayer or a foreign corporation with respect to which the taxpayer computes an amount of foreign income taxes deemed paid.

(C) The foreign tax redetermination requires a redetermination of U.S. tax liability that increases the amount of U.S. tax liability, and accordingly, but for this paragraph (b)(4), the taxpayer would be required to notify the IRS of such foreign tax redetermination under paragraph (b)(1)(ii) of this section (determined without regard to paragraphs (b)(1)(iv) and (v) of this section) or paragraph (b)(2)(ii) of this section. See paragraph (b)(4)(v) of this section regarding foreign tax redeterminations that decrease the amount of U.S. tax liability.

(D) The return for the taxable year for which a redetermination of U.S. tax liability is required is under examination.

(E) The due date specified in paragraph (b)(1)(ii) or (b)(2)(ii) of this

section for providing notice of such foreign tax redetermination is not before the later of the opening conference or the hand-delivery or postmark date of the opening letter concerning an examination of the return for the taxable year for which a redetermination of U.S. tax liability is required by reason of such foreign tax redetermination.

(ii) *Notification requirements—(A) Foreign tax redetermination occurring before commencement of the examination.* If a foreign tax redetermination described in paragraphs (b)(4)(i)(B) and (C) of this section occurs before the later of the opening conference or the hand-delivery or postmark date of the opening letter and if the condition provided in paragraph (b)(4)(i)(E) of this section with respect to such foreign tax redetermination is met, the taxpayer, in lieu of applying the rules of paragraphs (b)(1)(i) and (ii) of this section (requiring the filing of an amended return, Form 1116 or 1118, and the statement described in paragraph (c) of this section) or paragraph (b)(2)(ii) of this section (requiring the filing of an administrative adjustment request), must notify the IRS of such redetermination by providing the statement described in paragraph (b)(4)(iii) of this section to the examiner no later than 120 days after the later of the date of the opening conference of the examination, or the hand-delivery or postmark date of the opening letter concerning the examination.

(B) *Foreign tax redetermination occurring within 180 days after commencement of the examination.* If a foreign tax redetermination described in paragraphs (b)(4)(i)(B) and (C) of this section occurs on or after the latest of the opening conference or the hand-delivery or postmark date of the opening letter and on or before the date that is 180 days after the later of the opening conference or the hand-delivery or postmark date of the opening letter, the taxpayer, in lieu of applying the rules of paragraph (b)(1)(i) and (ii) of this section or paragraph (b)(2) of this section, must notify the IRS of such redetermination by providing the statement described in paragraph (b)(4)(iii) of this section to the examiner no later than 120 days after the date the foreign tax redetermination occurs.

(C) *Foreign tax redetermination occurring more than 180 days after commencement of the examination.* If a foreign tax redetermination described in paragraphs (b)(4)(i)(B) and (C) of this section occurs after the date that is 180 days after the later of the opening conference or the hand-delivery or postmark date of the opening letter, the taxpayer must either apply the rules of

paragraphs (b)(1)(i) and (ii) of this section or paragraph (b)(2) of this section, or, in lieu of applying paragraphs (b)(1)(i) and (ii) of this section or paragraph (b)(2) of this section, provide the statement described in paragraph (b)(4)(iii) of this section to the examiner within 120 days after the date the foreign tax redetermination occurs. However, the IRS, in its discretion, may either accept such statement or require the taxpayer to comply with the rules of paragraphs (b)(1)(i) and (ii) of this section or paragraph (b)(2) of this section, as applicable.

(iii) *Statement.* The statement required by paragraphs (b)(4)(ii)(A) and (B) of this section must provide the original amount of foreign income taxes paid or accrued, the revised amount of foreign income taxes paid or accrued, and documentation with respect to the revisions, including exchange rates and dates of accrual or payment, and, if applicable, the information described in paragraph (c)(8) of this section. The statement must include the following declaration signed by a person authorized to sign the return of the taxpayer: “Under penalties of perjury, I declare that I have examined this written statement, and to the best of my knowledge and belief, this written statement is true, correct, and complete.”

(iv) *Penalty for failure to file notice of a foreign tax redetermination.* A taxpayer subject to the rules of this paragraph (b)(4) must satisfy the rules of paragraph (b)(4)(ii) of this section in order not to be subject to the penalty relating to the failure to file notice of a foreign tax redetermination under section 6689 and § 301.6689–1 of this chapter.

(v) *Notification of foreign tax redetermination that decreases U.S. tax liability in an affected year under audit.* A taxpayer may (but is not required to) notify the IRS as provided in this paragraph (b)(4)(v) if the taxpayer has a foreign tax redetermination that meets the conditions in paragraphs (b)(4)(i)(A), (B), and (D) of this section and results in a decrease in the amount of U.S. tax liability that, but for this paragraph (b)(4), would require the taxpayer to notify the IRS of such foreign tax redetermination under paragraph (b)(1)(iii) or (b)(2)(ii) of this section (determined without regard to paragraphs (b)(1)(iv) and (v) of this section). The notification should be made in the time and manner specified in paragraph (b)(4)(ii) of this section. The IRS, in its discretion, may either accept such alternate notification or require the taxpayer to comply with the

rules of paragraphs (b)(1)(i) and (iii) or paragraphs (b)(2) of this section, as applicable.

(5) *Examples.* The following examples illustrate the application of paragraph (b) of this section.

(i) *Example 1.* (A) X, a domestic corporation, is an accrual basis taxpayer and uses the calendar year as its U.S. taxable year. X conducts business through a branch in Country M, the currency of which is the m, and also conducts business through a branch in Country N, the currency of which is the n. X uses the average exchange rate to translate foreign income taxes. X is able to claim a credit under section 901 for all foreign income taxes paid or accrued.

(B) In Year 1, X accrued and paid 100m of Country M income taxes with respect to 400m of foreign source foreign branch category income. The average exchange rate for Year 1 was \$1:1m. Also in Year 1, X accrued and paid 50n of Country N income taxes with respect to 150n of foreign source foreign branch category income. The average exchange rate for Year 1 was \$1:1n. On its Year 1 Federal income tax return, X claimed a foreign tax credit under section 901 of \$150 (\$100 (100m translated at \$1:1m) + \$50 (50n translated at \$1:1n)) with respect to its foreign source foreign branch category income. See § 1.986(a)-1(a)(1).

(C) In Year 2, X accrued and paid 100n of Country N income taxes with respect to 300n of foreign source foreign branch category income. The average exchange rate for Year 2 was \$1.50:1n. On its Year 2 Federal income tax return, X claimed a foreign tax credit under section 901 of \$150 (100n translated at \$1.5:1n). See § 1.986(a)-1(a)(1).

(D) On June 15, Year 5, when the spot rate was \$1.40:1n, X received a refund of 10n from Country N, and, on March 15, Year 6, when the spot rate was \$1.20:1m, X was assessed by and paid Country M an additional 20m of tax. Both payments were with respect to X's foreign source foreign branch category income in Year 1. On May 15, Year 6, when the spot rate was \$1.45:1n, X received a refund of 5n from Country N with respect to its foreign source foreign branch category income in Year 2.

(E) Both of the refunds and the assessment are foreign tax redeterminations under § 1.905-3(a). Under § 1.905-3(b)(1), X must redetermine its U.S. tax liability for both Year 1 and Year 2. With respect to Year 1, under paragraph (b)(1)(ii) of this section X must notify the IRS of the June 15, Year 5, refund of 10n from Country N that increased X's U.S. tax liability by filing an amended return, Form 1118, and the statement required by paragraph

(c) of this section for Year 1 by the due date of the original return (with extensions) for Year 5. The amended return and Form 1118 would reflect the reduced amount of foreign income taxes claimed as a credit under section 901 and the increase in X's U.S. tax liability of \$10 (10n refund translated at the average exchange rate for Year 1, or \$1:1n (see § 1.986(a)-1(c)). With respect to the March 15, Year 6, additional assessment of 20m by Country M, under paragraph (b)(1)(iii) of this section X must notify the IRS within the time period provided by section 6511, increasing the foreign income taxes available as a credit and reducing X's U.S. tax liability by \$24 (20m translated at the spot rate on the date of payment, or \$1.20:1m). See sections 986(a)(1)(B)(i) and 986(a)(2)(A) and § 1.986(a)-1(a)(2)(i). X may so notify the IRS by filing a second amended return, Form 1118, and the statement described in paragraph (c) of this section for Year 1, within the time period provided by section 6511. Alternatively, under paragraph (b)(1)(iv) of this section, when X redetermines its U.S. tax liability for Year 1 to take into account the 10n refund from Country N that occurred in Year 5, X may also take into account the 20m additional assessment by Country M that occurred on March 15, Year 6. If X reflects both foreign tax redeterminations on the same amended return, Form 1118, and in the statement described in paragraph (c) of this section for Year 1, the amount of X's foreign income taxes available as a credit would be reduced by \$10 (10n refund translated at \$1:1n), and increased by \$24 (20m additional assessment translated at the spot rate on the date of payment, March 15, Year 6, or \$1.20:1m). The foreign income taxes available as a credit therefore would be increased by \$14 (\$24 (additional assessment) - \$10 (refund)). Because the net effect of the foreign tax redeterminations is to increase the amount of foreign taxes paid or accrued and decrease X's U.S. tax liability for Year 1, under paragraph (b)(1)(iv) of this section the Year 1 amended return, Form 1118, and the statement required in paragraph (c) of this section reflecting foreign tax redeterminations in both years must be filed within the period provided by section 6511.

(F) With respect to Year 2, under paragraph (b)(1)(ii) of this section X must notify the IRS by filing an amended return, Form 1118, and the statement required by paragraph (c) of this section for Year 2, in addition to the amended return, Form 1118, and statement that are required by reason of

the separate foreign tax redeterminations that affect Year 1. The amended return, Form 1118, and the statement required by paragraph (c) of this section for Year 2 must be filed by the due date (with extensions) of X's original return for Year 6. The amended return and Form 1118 must reflect the reduced amount of foreign income taxes claimed as a credit under section 901 and the increase in X's U.S. tax liability of \$7.50 (5n refund translated at the average exchange rate for Year 2, or \$1.50:1n).

(ii) *Example 2.* X, a taxpayer within the jurisdiction of the Large Business and International Division, uses the calendar year as its U.S. taxable year. On November 15, Year 2, X receives a refund of foreign income taxes that constitutes a foreign tax redetermination and necessitates a redetermination of U.S. tax liability for X's Year 1 taxable year. Under paragraph (b)(1)(ii) of this section, X is required to notify the IRS of the foreign tax redetermination that increased its U.S. tax liability by filing an amended return, Form 1118, and the statement described in paragraph (c) of this section for its Year 1 taxable year by October 15, Year 3 (the due date (with extensions) of the original return for X's Year 2 taxable year). On December 15, Year 3, the IRS hand delivers an opening letter concerning the examination of the return for X's Year 1 taxable year, and the opening conference for such examination is scheduled for January 15, Year 4. Because the date for notifying the IRS of the foreign tax redetermination under paragraph (b)(1)(ii) of this section (October 15, Year 3) is before the date of the opening conference concerning the examination of the return for X's Year 1 taxable year (January 15, Year 4), the condition of paragraph (b)(4)(i)(E) of this section is not met, and so paragraph (b)(4)(i) of this section does not apply. Accordingly, X must notify the IRS of the foreign tax redetermination by filing an amended return, Form 1118, and the statement described in paragraph (c) of this section for the Year 1 taxable year by October 15, Year 3.

(6) *Transition rule for certain foreign tax redeterminations.* In the case of foreign tax redeterminations occurring in taxable years ending on or after December 16, 2019, and before November 12, 2020, and foreign tax redeterminations of foreign corporations occurring in taxable years that end with or within a taxable year of a United States shareholder ending on or after December 16, 2019, and before November 12, 2020, any amended return or other notification that under paragraph (b)(1)(ii), (iv), or (v) or

(b)(2)(ii) of this section must be filed by the due date (with extensions) of, or attached to, the original return for the taxpayer's taxable year in which the foreign tax redetermination occurs must instead be filed by the due date (with extensions) of, or attached to, the original return for the taxpayer's first taxable year ending on or after November 12, 2020. For purposes of paragraph (b)(4)(i)(E) of this section, the relevant due date is the due date specified in this paragraph (b)(6).

(c) *Notification contents.* The statement required by paragraphs (b)(1)(i) through (iv) and (b)(2) of this section must contain information sufficient for the IRS to redetermine U.S. tax liability if such a redetermination is required under section 905(c). The information must be in a form that enables the IRS to verify and compare the original computation of U.S. tax liability, the revised computation resulting from the foreign tax redetermination, and the net changes resulting therefrom. The statement must include the following:

(1) The taxpayer's name, address, identifying number, the taxable year or years of the taxpayer that are affected by the foreign tax redetermination, and, in the case of foreign taxes deemed paid, the name and identifying number, if any, of the foreign corporation;

(2) The date or dates the foreign income taxes were accrued, if applicable; the date or dates the foreign income taxes were paid; the amount of foreign income taxes paid or accrued on each date (in foreign currency) and the exchange rate used to translate each such amount, as provided in § 1.986(a)–1(a) or (b);

(3) Information sufficient to determine any change to the characterization of a distribution, the amount of any inclusion under section 951(a), 951A, or 1293, or the deferred tax amount under section 1291;

(4) Information sufficient to determine any interest due from or owing to the taxpayer, including the amount of any interest paid by the foreign government to the taxpayer and the dates received;

(5) In the case of any foreign income tax that is refunded in whole or in part, the taxpayer must provide the date of each such refund; the amount of such refund (in foreign currency); and the exchange rate that was used to translate such amount when originally claimed as a credit (as provided in § 1.986(a)–1(c)) and the spot rate (as defined in § 1.988–1(d)) for the date the refund was received (for purposes of computing foreign currency gain or loss under section 988);

(6) In the case of any foreign income taxes that are not paid on or before the date that is 24 months after the close of the taxable year to which such taxes relate, the amount of such taxes in foreign currency, and the exchange rate that was used to translate such amount when originally claimed as a credit or added to PTEP group taxes (as defined in § 1.960–3(d)(1));

(7) If a redetermination of U.S. tax liability results in an amount of additional tax due, and the carryback or carryover of an unused foreign income tax under section 904(c) only partially eliminates such amount, the information required in § 1.904–2(f); and

(8) In the case of a pass-through entity, the name, address, and identifying number of each beneficial owner to which foreign taxes were reported for the taxable year or years to which the foreign tax redetermination relates, and the amount of foreign tax initially reported to each beneficial owner for each such year and the amount of foreign tax allocable to each beneficial owner for each such year after the foreign tax redetermination is taken into account.

(d) *Payment or refund of U.S. tax.* The amount of tax, if any, due upon a redetermination of U.S. tax liability is paid by the taxpayer after notice and demand has been made by the IRS. Subchapter B of chapter 63 of the Internal Revenue Code (relating to deficiency procedures) does not apply with respect to the assessment of the amount due upon such redetermination. In accordance with sections 905(c) and 6501(c)(5), the amount of additional tax due is assessed and collected without regard to the provisions of section 6501(a) (relating to limitations on assessment and collection). The amount of tax, if any, shown by a redetermination of U.S. tax liability to have been overpaid is credited or refunded to the taxpayer in accordance with subchapter B of chapter 66 (sections 6511 through 6515).

(e) *Interest and penalties—(1) In general.* If a redetermination of U.S. tax liability is required by reason of a foreign tax redetermination, interest is computed on the underpayment or overpayment in accordance with sections 6601 and 6611. No interest is assessed or collected on any underpayment resulting from a refund of foreign income taxes for any period before the receipt of the refund, except to the extent interest was paid by the foreign country or possession of the United States on the refund for the period before the receipt of the refund. See section 905(c)(5). In no case,

however, will interest assessed and collected pursuant to the preceding sentence for any period before receipt of the refund exceed the amount that otherwise would have been assessed and collected under section 6601 for that period. Interest is assessed from the time the taxpayer (or the foreign corporation, partnership, trust, or other pass-through entity of which the taxpayer is a shareholder, partner, or beneficiary) receives a refund until the taxpayer pays the additional tax due the United States.

(2) *Imposition of penalty.* Failure to comply with the provisions of this section subjects the taxpayer to the penalty provisions of section 6689 and § 301.6689–1 of this chapter.

(f) *Applicability date.* This section applies to foreign tax redeterminations (as defined in § 1.905–3(a)) occurring in taxable years ending on or after December 16, 2019, and to foreign tax redeterminations of foreign corporations occurring in taxable years that end with or within a taxable year of a United States shareholder ending on or after December 16, 2019.

§ 1.905–4T [REMOVED]

■ **Par. 23.** Section 1.904–4T is removed.

■ **Par. 24.** Section 1.905–5 is added to read as follows:

§ 1.905–5 Foreign tax redeterminations of foreign corporations that relate to taxable years of the foreign corporation beginning before January 1, 2018.

(a) *In general—(1) Effect of foreign tax redetermination of a foreign corporation.* Except as provided in paragraph (e) of this section, a foreign tax redetermination (as defined in § 1.905–3(a)) of a foreign corporation that relates to a taxable year of the foreign corporation beginning before January 1, 2018, and that may affect a taxpayer's foreign tax credit in any taxable year, must be accounted for by adjusting the foreign corporation's taxable income and earnings and profits, post-1986 undistributed earnings as defined in § 1.902–1(a)(9), and post-1986 foreign income taxes as defined in § 1.902–1(a)(8) (or its pre-1987 accumulated profits as defined in § 1.902–1(a)(10)(i) and pre-1987 foreign income taxes as defined in § 1.902–1(a)(10)(iii), as applicable) in the taxable year of the foreign corporation to which the foreign taxes relate.

(2) *Required redetermination of U.S. tax liability.* Except as provided in paragraph (e) of this section, a redetermination of U.S. tax liability is required to account for the effect of the foreign tax redetermination on the earnings and profits and taxable income

of the foreign corporation, the taxable income of a United States shareholder, and the amount of foreign taxes deemed paid by the United States shareholder under section 902 or 960 (as in effect before December 22, 2017), in the year to which the redetermined foreign taxes relate. For example, in the case of a refund of foreign income taxes, the subpart F income, earnings and profits, and post-1986 undistributed earnings (or pre-1987 accumulated profits, as applicable) of the foreign corporation are increased in the year to which the foreign tax relates to reflect the functional currency amount of the foreign income tax refund. The required redetermination of U.S. tax liability must account for the effect of the foreign tax redetermination on the characterization and amount of distributions or inclusions under section 951 or 1293 taken into account by each of the foreign corporation's United States shareholders and on the application of the high-tax exception described in section 954(b)(4), as well as on the amount of foreign income taxes deemed paid in such year. In addition, a redetermination of U.S. tax liability is required for any subsequent taxable year in which the United States shareholder received or accrued a distribution or inclusion from the foreign corporation, up to and including the taxable year in which the foreign tax redetermination occurs, as well as any year to which unused foreign taxes from such year were carried under section 904(c).

(b) *Notification requirements*—(1) *In general.* The notification requirements of § 1.905–4, as modified by paragraphs (b)(2) and (3) of this section, apply if a redetermination of U.S. tax liability is required under paragraph (a) or (e) of this section.

(2) *Notification relating to post-1986 undistributed earnings and post-1986 foreign income taxes.* In the case of foreign tax redeterminations with respect to taxes included in post-1986 foreign income taxes, in addition to the information required by § 1.905–4(c), the taxpayer must provide the balances of the pools of post-1986 undistributed earnings and post-1986 foreign income taxes before and after adjusting the pools, the dates and amounts of any dividend distributions or other inclusions made out of earnings and profits for the affected year or years, and the amount of earnings and profits from which such dividends were paid or such inclusions were made for the affected year or years.

(3) *Notification relating to pre-1987 accumulated profits and pre-1987 foreign income taxes.* In the case of foreign tax redeterminations with

respect to pre-1987 accumulated profits, in addition to the information required by § 1.905–4(c), the taxpayer must provide the following: The dates and amounts of any dividend distributions made out of earnings and profits for the affected year or years; the rate of exchange on the date of any such distribution; and the amount of earnings and profits from which such dividends were paid for the affected year or years.

(c) *Currency translation rules for adjustments to pre-1987 foreign income taxes.* Foreign income taxes paid with respect to pre-1987 accumulated profits that are deemed paid under section 960 (or under section 902 in the case of an amount treated as a dividend under section 1248) are translated into dollars at the spot rate for the date of the payment of the foreign income taxes, and refunds of such taxes are translated into dollars at the spot rate for the date of the refund. Foreign income taxes deemed paid by a taxpayer under section 902 with respect to an actual distribution of pre-1987 accumulated profits and refunds of such taxes are translated into dollars at the spot rate for the date of the distribution of the earnings to which the foreign income taxes relate. See section 902(c)(6) (as in effect before December 22, 2017) and § 1.902–1(a)(10)(iii). For purposes of this section, the term *spot rate* has the meaning provided in § 1.988–1(d).

(d) *Timing and effect of pooling adjustments.* The redetermination of U.S. tax liability required by paragraphs (a) and (e) of this section is made in accordance with section 905(c) as in effect for those taxable years, without regard (except as provided in paragraph (e) of this section) to rules that required adjustments to a foreign corporation's pools of post-1986 undistributed earnings and post-1986 foreign income taxes in the year of the foreign tax redetermination rather than in the year to which the redetermined foreign tax relates. No underpayment or overpayment of U.S. tax liability results from a foreign tax redetermination unless the required adjustments change the U.S. tax liability. Consequently, no interest is paid by or to a taxpayer as a result of adjustments, required by reason of a foreign tax redetermination, to a foreign corporation's pools of post-1986 undistributed earnings and post-1986 foreign income taxes in the year to which the redetermined foreign tax relates (or a subsequent year) that did not result in a change to U.S. tax liability, for example, because no foreign taxes were deemed paid in that year.

(e) *Election to account for certain foreign tax redeterminations with*

respect to pre-2018 taxable years in the foreign corporation's last pooling year—

(1) *In general.* A taxpayer may elect under the rules in paragraph (e)(2) of this section to account for foreign tax redeterminations of a foreign corporation that occur in the foreign corporation's taxable years ending with or within a taxable year of a United States shareholder of the foreign corporation ending on or after November 2, 2020, and that relate to taxable years of the foreign corporation beginning before January 1, 2018, by treating such foreign tax redeterminations as if they occurred in the foreign corporation's last taxable year beginning before January 1, 2018 (the “last pooling year”), and applying the rules in §§ 1.905–3T(d) and 1.905–5T for purposes of determining whether the foreign tax redetermination is accounted for in the foreign corporation's last pooling year or must be accounted for in the year to which the redetermined foreign tax relates. Except with respect to determining under the preceding sentence whether the foreign tax redetermination is accounted for in the foreign corporation's last pooling year or in the year to which the redetermined foreign tax relates, the rules of this section apply to foreign tax redeterminations covered by an election under this paragraph (e). Therefore, unless an exception in § 1.905–3T(d)(3) applies, a foreign tax redetermination to which an election under this paragraph (e) applies is accounted for under paragraph (a)(2) of this section by adjusting the foreign corporation's pools of post-1986 undistributed earnings and post-1986 foreign income taxes in the last pooling year, rather than in the year to which the redetermined foreign tax relates. For purposes of this paragraph (e), references to §§ 1.905–3T and 1.905–5T are to such provisions as contained in 26 CFR part 1, revised as of April 1, 2019.

(2) *Rules regarding the election—(i) Time and manner of election.* For a foreign corporation's first taxable year that ends with or within a taxable year of a United States shareholder of the foreign corporation ending on or after November 2, 2020 in which the foreign corporation has a foreign tax redetermination (the “first redetermination year”), the controlling domestic shareholders (as defined in § 1.964–1(c)(5)) of the foreign corporation make the election described in paragraph (e)(1) of this section by—

(A) Filing the statement required under § 1.964–1(c)(3)(ii) with a timely filed original income tax return for the taxable year of each controlling

domestic shareholder of the foreign corporation in which or with which the foreign corporation's first redetermination year ends;

(B) Providing any notices required under § 1.964-1(c)(3)(iii);

(C) Filing amended returns as required under § 1.905-4 and this section for each controlling domestic shareholder's taxable year with or within which ends the foreign corporation's last pooling year and each other affected year before the controlling domestic shareholder's taxable year with or within which ends the foreign corporation's first redetermination year reflecting a redetermination of the controlling domestic shareholder's U.S. tax liability for each such taxable year, in cases where a redetermination of the shareholder's U.S. tax liability for taxable years ending before the foreign corporation's last pooling year ends is not required under the rules in §§ 1.905-3T(d) and 1.905-5T;

(D) Filing amended returns as required under § 1.905-4 and this section with respect to each affected year before the controlling domestic shareholder's taxable year with or within which ends the foreign corporation's first redetermination year reflecting a redetermination of the controlling domestic shareholder's U.S. tax liability for each such taxable year, in cases where a redetermination of the shareholder's U.S. tax liability for taxable years ending before the foreign corporation's last pooling year ends is required under the rules in §§ 1.905-3T(d) and 1.905-5T and this section; and

(E) Providing any additional information required by applicable administrative pronouncements.

(ii) *Scope, duration, and effect of election.* An election under paragraph (e)(1) of this section with respect to the first redetermination year of a foreign corporation is binding on all persons who are, or were in a prior year to which the election applies, United States shareholders of the foreign corporation. In addition, such election applies to all foreign tax redeterminations in the first redetermination year and all subsequent taxable years of such foreign corporation and cannot be revoked. For foreign tax redeterminations that occur in taxable years after the first redetermination year, all United States shareholders of such foreign corporation must account for the foreign tax redeterminations under the rules in paragraph (e)(1) of this section by filing amended returns and providing other information as required by § 1.905-4 and paragraphs (e)(2)(i)(C) through (E) of this section.

(iii) *Requirements for valid election.* An election under paragraph (e)(1) of this section is valid only if all of the requirements in paragraph (e)(2)(i) of this section, including the requirement to provide notice under paragraph (e)(2)(i)(B) of this section, are satisfied by each of the controlling domestic shareholders with respect to the first redetermination year.

(iv) *CFC group conformity requirement—(A) In general.* An election made under paragraph (e)(1) of this section applies to all controlled foreign corporations that are members of the same CFC group, and the rules in paragraphs (e)(1) and (e)(2)(i) through (iii) of this section apply by reference to the CFC group. Therefore, an election by the controlling domestic shareholders of any controlled foreign corporation with respect to that controlled foreign corporation's first redetermination year also applies to foreign tax redeterminations of all members of the CFC group that includes that controlled foreign corporation, determined as of the close of that controlled foreign corporation's first redetermination year. The election is binding on all persons who are, or were in a prior year to which the election applies, United States shareholders of any member of the CFC group, applies with respect to foreign tax redeterminations of each member that occur in and after that member's first taxable year with or within which ends such controlled foreign corporation's first redetermination year, and cannot be revoked.

(B) *Determination of the CFC group—(1) Definition.* Subject to the rules in paragraphs (b)(2)(iv)(B)(2) and (3) of this section, the term *CFC group* means an affiliated group as defined in section 1504(a) without regard to section 1504(b)(1) through (6), except that section 1504(a) is applied by substituting "more than 50 percent" for "at least 80 percent" each place it appears, and section 1504(a)(2)(A) is applied by substituting "or" for "and." For purposes of this paragraph (e)(2)(iv)(B)(1), stock ownership is determined by applying the constructive ownership rules of section 318(a), other than section 318(a)(3)(A) and (B), by applying section 318(a)(4) only to options (as defined in § 1.1504-4(d)) that are reasonably certain to be exercised as described in § 1.1504-4(g), and by substituting in section 318(a)(2)(C) "5 percent" for "50 percent."

(2) *Member of a CFC group.* The determination of whether a controlled foreign corporation is included in a CFC group is made as of the close of the first

redetermination year of any controlled foreign corporation for which an election is made under paragraph (e)(1) of this section. One or more controlled foreign corporations are members of a CFC group if the requirements of paragraph (e)(2)(iv)(B)(2) of this section are satisfied as of the end of the first redetermination year of at least one of the controlled foreign corporations, even if the requirements are not satisfied as of the end of the first redetermination year of all controlled foreign corporations. If the controlling domestic shareholders do not have the same taxable year, the determination of whether a controlled foreign corporation is a member of a CFC group is made with respect to the first redetermination year that ends with or within the taxable year of the majority of the controlling domestic shareholders (determined based on voting power) or, if no such majority taxable year exists, the calendar year.

(3) *Controlled foreign corporations included in only one CFC group.* A controlled foreign corporation cannot be a member of more than one CFC group. If a controlled foreign corporation would be a member of more than one CFC group under paragraph (e)(2)(iv)(B)(2) of this section, then ownership of stock of the controlled foreign corporation is determined by applying paragraph (e)(2)(iv)(B)(2) of this section without regard to section 1504(a)(2)(B) or, if applicable, by reference to the ownership existing as of the end of the first redetermination year of a controlled foreign corporation that would cause a CFC group to exist.

(3) *Rules for successor entities.* All of the United States persons that own equity interests in a successor entity to a foreign corporation ("U.S. owners") may elect under the principles of paragraph (e)(2) of this section to apply the rules in paragraph (e)(1) to foreign tax redeterminations of such foreign corporation that occur in taxable years of the successor entity that end with or within taxable years of its U.S. owners ending on or after November 2, 2020.

(f) *Applicability date.* This section applies to foreign tax redeterminations (as defined in § 1.905-3(a)) of foreign corporation and successor entities that occur in taxable years that end with or within taxable years of a United States shareholder or other United States persons ending on or after November 2, 2020, and that relate to taxable years of such foreign corporations beginning before January 1, 2018.

§ 1.905-5T [REMOVED]

■ **Par. 25.** Section 1.905-5T is removed.

■ **Par. 26.** Section 1.951A–2 is amended by adding paragraph (c)(6) to read as follows:

§ 1.951A–2 Tested income and tested loss.

* * * *

(c) * * *
(6) *Allocation of deductions attributable to disqualified payments—*

(i) *In general.* A deduction related directly or indirectly to a disqualified payment is allocated and apportioned solely to residual CFC gross income, and any deduction related to a disqualified payment is not properly allocable to property produced or acquired for resale under section 263, 263A, or 471.

(ii) *Definitions.* The following definitions apply for purposes of this paragraph (c)(6).

(A) *Disqualified payment.* The term *disqualified payment* means a payment made by a person to a related recipient CFC during the disqualified period with respect to the related recipient CFC, to the extent the payment would constitute income described in section 951A(c)(2)(A)(i) and paragraph (c)(1) of this section without regard to whether section 951A applies.

(B) *Disqualified period.* The term *disqualified period* has the meaning provided in § 1.951A–3(h)(2)(ii)(C)(1), substituting “related recipient CFC” for “transferor CFC.”

(C) *Related recipient CFC.* The term *related recipient CFC* means, with respect to a payment by a person, a recipient of the payment that is a controlled foreign corporation that bears a relationship to the payor described in section 267(b) or 707(b) immediately before or after the payment.

(iii) *Treatment of partnerships.* For purposes of determining whether a payment is made by a person to a related recipient CFC for purposes of paragraph (c)(6)(ii)(A) of this section, a payment by or to a partnership is treated as made proportionately by or to its partners, as applicable.

(iv) *Examples.* The following examples illustrate the application of this paragraph (c)(6).

(A) *Example 1: Deduction related directly to disqualified payment to related recipient CFC—(1) Facts.* USP, a domestic corporation, owns all of the stock in CFC1 and CFC2, each a controlled foreign corporation. Both USP and CFC2 use the calendar year as their taxable year. CFC1 uses a taxable year ending November 30. On October 15, 2018, before the start of its first CFC inclusion year, CFC1 receives and accrues a payment from CFC2 of \$100x of prepaid royalties with respect to a license. The \$100x payment is excluded from subpart F income pursuant to

section 954(c)(6) and would constitute income described in section 951A(c)(2)(A)(i) and paragraph (c)(1) of this section without regard to whether section 951A applies.

(2) *Analysis.* CFC1 is a related recipient CFC (within the meaning of paragraph (c)(6)(ii)(C) of this section) with respect to the royalty prepayment by CFC2 because it is related to CFC2 within the meaning of section 267(b). The royalty prepayment is received by CFC1 during its disqualified period (within the meaning of paragraph (c)(6)(ii)(B) of this section) because it is received during the period beginning January 1, 2018, and ending November 30, 2018. Because it would constitute income described in section 951A(c)(2)(A)(i) and paragraph (c)(1) of this section without regard to whether section 951A applies, the payment is a disqualified payment. Accordingly, CFC2’s deductions related to such payment accrued during taxable years ending on or after April 7, 2020, are allocated and apportioned solely to residual CFC gross income under paragraph (c)(6)(i) of this section.

(B) *Example 2: Deduction related indirectly to disqualified payment to partnership in which related recipient CFC is a partner—(1) Facts.* The facts are the same as in paragraph (c)(6)(iv)(A)(1) of this section (the facts in *Example 1*), except that CFC1 and USP own 99% and 1%, respectively of FPS, a foreign partnership, which has a taxable year ending November 30. USP receives a prepayment of \$100x from CFC2 for the performance of future services. USP subcontracts the performance of these future services to FPS for which FPS receives and accrues a \$100x prepayment from USP. The services will be performed in the same country under the laws of which CFC1 and FPS are created or organized, and the \$100x prepayment is not foreign base company services income under section 954(e) and § 1.954–4(a). The \$100x prepayment would constitute income described in section 951A(c)(2)(A)(i) and paragraph (c)(1) of this section without regard to whether section 951A applies.

(2) *Analysis.* CFC1 is a related recipient CFC (within the meaning of paragraph (c)(6)(ii)(C) of this section) with respect to the services prepayment by USP because, under paragraph (c)(6)(iii) of this section, it is treated as receiving \$99x (99% of \$100x) of the services prepayment from USP, and it is related to USP within the meaning of section 267(b). The services prepayment is received by CFC1 during its disqualified period (within the meaning of paragraph (c)(6)(ii)(B) of this section)

because it is received during the period beginning January 1, 2018, and ending November 30, 2018. Because it would constitute income described in section 951A(c)(2)(A)(i) and paragraph (c)(1) of this section without regard to whether section 951A applies, the prepayment is a disqualified payment. In addition, CFC2’s deductions related to its prepayment to USP are indirectly related to the disqualified payment by USP. Accordingly, CFC2’s deductions related to such payment accrued during taxable years ending on or after April 7, 2020 are allocated and apportioned solely to residual CFC gross income under paragraph (c)(6)(i) of this section.

* * * *

■ **Par. 27.** Section 1.951A–7 is amended by adding reserved paragraph (c) and paragraph (d) to read as follows:

§ 1.951A–7 Applicability dates.

* * * *

(d) *Deduction for disqualified payments.* Section 1.951A–2(c)(6) applies to taxable years of foreign corporations ending on or after April 7, 2020, and to taxable years of United States shareholders in which or with which such taxable years end.

■ **Par. 28.** Section 1.954–1 is amended by:

■ 1. In paragraph (c)(1)(i)(C), removing the language “reduced by related person” and adding the language “reduced (but not below zero) by related person” in its place.

■ 2. Adding two sentences to the end of paragraph (d)(3)(iii).

■ 3. Revising paragraph (h)(1).

The revision and additions read as follows:

§ 1.954–1 Foreign base company income.

* * * *

(d) * * *

(3) * * *

(iii) * * * In addition, foreign income taxes that have not been paid or accrued because they are contingent on a future distribution of earnings are not taken into account for purposes of this paragraph (d)(3). If, pursuant to section 905(c) and § 1.905–3(b)(2), a redetermination of U.S. tax liability is required to account for the effect of a foreign tax redetermination (as defined in § 1.905–3(a)), this paragraph (d) is applied in the adjusted year taking into account the adjusted amount of the redetermined foreign tax.

* * * *

(h) * * *

(1) *Paragraph (d)(3) of this section.* Paragraph (d)(3) of this section applies to taxable years of a controlled foreign corporation ending on or after December

16, 2019. For taxable years of a controlled foreign corporation ending on or after December 4, 2018, but ending before December 16, 2019, see § 1.954–1(d)(3) as contained in 26 CFR part 1 revised as of April 1, 2019.

* * * * *

■ **Par. 29.** Section 1.954–2 is amended by:

- 1. Removing the text “and” from paragraph (h)(2)(i)(H).
- 2. Redesignating paragraph (h)(2)(i)(I) as paragraph (h)(2)(i)(J).
- 3. Adding a new paragraph (h)(2)(i)(I).
- 4. Adding a sentence to the end of paragraph (i)(3).

The additions read as follows:

§ 1.954–2 Foreign personal holding company income.

* * * * *

- (h) * * *
- (2) * * *
- (i) * * *

(I) Any guaranteed payments for the use of capital under section 707(c); and

* * * * *

- (j) * * *

(3) * * * Paragraph (h)(2)(i)(I) of this section applies to taxable years of controlled foreign corporations ending on or after December 16, 2019, and to taxable years of United States shareholders in which or with which such taxable years end.

■ **Par. 30.** Section 1.960–1 is amended by:

- 1. Adding a sentence at the end of paragraph (c)(2).
- 2. Revising paragraphs (d)(3)(ii)(A) and (B).
- 3. Removing paragraph (d)(3)(ii)(C).

The addition and revisions read as follows:

§ 1.960–1 Overview, definitions, and computational rules for determining foreign income taxes deemed paid under section 960(a), (b), and (d).

* * * * *

- (c) * * *
- (2) * * *

An item of income with respect to a current taxable year does not include an amount included as subpart F income of a controlled foreign corporation by reason of the recharacterization of a recapture account established in a prior U.S. taxable year (and the corresponding earnings and profits) of the controlled foreign corporation under section 952(c)(2) and § 1.952–1(f).

* * * * *

- (d) * * *
- (3) * * *
- (ii) * * *

(A) *In general.* A current year tax is allocated and apportioned among the section 904 categories under the rules of § 1.904–6. An amount of the current year tax that is allocated and apportioned to a section 904 category is then allocated and apportioned among the income groups within the section 904 category under § 1.861–20 (as modified by § 1.904–6(c)) by treating each income group as a statutory grouping and treating the residual income group as the residual grouping. Therefore, foreign gross income attributable to a base difference is assigned to the residual income grouping under § 1.861–20(d)(2)(ii)(B). See, however, paragraph (d)(3)(ii)(B) of this section for special rules for applying § 1.861–20 in the case of PTEP groups. For purposes of determining foreign income taxes deemed paid under the rules in §§ 1.960–2 and 1.960–3, the U.S. dollar amount of a current year tax is assigned to the section 904 categories, income groups, and PTEP groups (to the extent provided in paragraph (d)(3)(ii)(B) of this section) to which the current year tax is allocated and apportioned.

(B) *Foreign taxable income that includes previously taxed earnings and profits.* For purposes of allocating and apportioning a current year tax under this paragraph (d)(3)(ii), a PTEP group that is increased under § 1.960–3(c)(3) as a result of the receipt of a section 959(b) distribution in the current taxable year of the controlled foreign corporation is treated as an income group within the section 904 category. In such case, under § 1.861–20, the portion of the foreign gross income (as defined in § 1.861–20(b)(5)) that is characterized under Federal income tax principles as a distribution of previously taxed earnings and profits that results in the increase in the PTEP group in the current taxable year is assigned to that PTEP group. If a PTEP group is not treated as an income group under the first sentence of this paragraph (d)(3)(ii)(B), and the rules of § 1.861–20 would otherwise apply to assign foreign gross income to a PTEP group, that foreign gross income is instead assigned to the subpart F income group or tested income group to which the income that gave rise to the previously taxed earnings and profits

would be assigned if the income were recognized by the recipient controlled foreign corporation under Federal income tax principles in the current taxable year. For example, a net basis or withholding tax imposed on a controlled foreign corporation’s receipt of a section 959(b) distribution is allocated or apportioned to a PTEP group. In contrast, a withholding tax imposed on a disregarded payment from a disregarded entity to its controlled foreign corporation owner is never treated as related to a PTEP group, even if all of the controlled foreign corporation’s earnings are previously taxed earnings and profits, because the payment that gives rise to the foreign gross income from which the tax was withheld does not constitute a section 959(b) distribution in the current taxable year. That foreign gross income, however, may be assigned to a subpart F income group or tested income group.

* * * * *

■ **Par. 31.** Section 1.960–2 is amended by adding a sentence at the end of paragraph (b)(3)(iii) to read as follows:

§ 1.960–2 Foreign income taxes deemed paid under sections 960(a) and (d).

* * * * *

- (b) * * *
- (3) * * *

(iii) * * * See § 1.960–1(c)(2) for a rule regarding the treatment of an increase in the subpart F income of a controlled foreign corporation by reason of the recharacterization of a recapture account and the corresponding accumulated earnings and profits under section 952(c) and § 1.952–1(f).

* * * * *

§ 1.960–3 [Amended]

■ **Par. 32.** Section 1.960–3 is amended by removing the language “§ 1.951A–6(b)(2)” from the twelfth sentence of paragraph (e)(2)(i) and adding the language “§ 1.951A–5(b)(2)” in its place.

■ **Par. 33.** Section 1.960–4 is amended in table 2 to paragraph (f)(1) by revising the entry “Limitation for Year 2 before increase under section 960(c)(1) (\$10.50x × \$0/\$50x)” to read as follows:

§ 1.960–4 Additional foreign tax credit in year of receipt of previously taxed earnings and profits.

* * * * *

- (f) * * *
- (1) * * *

TABLE 2 TO PARAGRAPH (f)(1)

*	*	*	*	*	*	*	*
Limitation for Year 2 before increase under section 960(c)(1) (\$10.50x × \$0/\$50x)							0
*	*	*	*	*	*	*	*

* * * * *

■ **Par. 34.** Section 1.960–7 is revised to read as follows:

§ 1.960–7 Applicability dates.

(a) Except as provided in paragraph (b) of this section, §§ 1.960–1 through 1.960–6 apply to each taxable year of a foreign corporation ending on or after December 4, 2018, and to each taxable year of a domestic corporation that is a United States shareholder of the foreign corporation in which or with which such taxable year of such foreign corporation ends.

(b) Section 1.960–1(c)(2) and (d)(3)(ii) applies to taxable years of a foreign corporation beginning after December 31, 2019, and to each taxable year of a domestic corporation that is a United States shareholder of the foreign corporation in which or with which such taxable year of such foreign corporation ends. For taxable years of a foreign corporation that end on or after December 4, 2018, and also begin before January 1, 2020, see § 1.960–1(c)(2) and (d)(3)(ii) as in effect on December 17, 2019.

■ **Par. 35.** Section 1.965–5 is amended by:

- 1. Designating the text of paragraph (b) as paragraph (b)(1).
- 2. Adding a heading for newly designated paragraph (b)(1).
- 3. Adding paragraph (b)(2).

The revision and additions read as follows:

§ 1.965–5 Allowance of a credit or deduction for foreign income taxes.

* * * * *

(b) * * *

(1) *In general.* * * *
 (2) *Attributing taxes to section 959(a) distributions of section 965 previously taxed earnings and profits.* For purposes of paragraph (b)(1) of this section, foreign income taxes are attributable to a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits if such taxes would be allocated and apportioned to a distribution of such previously taxed earnings and profits under the principles of § 1.904–6(a)(1)(iv), regardless of whether an actual distribution is made or recognized for Federal income tax purposes. Therefore,

for example, a credit or deduction for the applicable percentage of foreign income taxes imposed on a United States shareholder that pays foreign tax on a distribution that is not recognized for Federal income tax purposes (for example, in the case of a consent dividend or stock dividend upon which a withholding tax is imposed) is not allowed under paragraph (b)(1) of this section to the extent it is attributable to a distribution of section 965(a) previously taxed earnings and profits or section 965(b) previously taxed earnings and profits under the principles of § 1.904–6(a)(1)(iv). For taxable years of foreign corporations beginning after December 31, 2019, in lieu of applying the principles of § 1.904–6 under this paragraph (b)(2), the rules in § 1.861–20 apply by treating the portion of a distribution attributable to section 965(a) previously taxed earnings and profits and the portion of a distribution attributable to section 965(b) previously taxed earnings and profits each as a statutory grouping, and the portion of the distribution that is attributable to other earnings and profits as the residual grouping. See § 1.861–20(g)(7) (*Example 6*).

■ **Par. 36.** Section 1.965–9 is amended by adding a sentence to the end of paragraph (c) to read as follows:

§ 1.965–9 Applicability dates.

* * * * *

(c) * * * Section 1.965–5(b)(2) applies to taxable years of foreign corporations that end on or after December 16, 2019, and with respect to a United States person, to the taxable years in which or with which such taxable years of the foreign corporations end.

■ **Par. 37.** Section 1.1502–4 is revised to read as follows:

§ 1.1502–4 Consolidated foreign tax credit.

(a) *In general.* The foreign tax credit under section 901 is allowed to the group only if the agent for the group (as defined in § 1.1502–77(a)) chooses to use the credit in the computation of the consolidated tax liability of the group for the consolidated return year. If that choice is made, section 275(a)(4) provides that no deduction against

taxable income may be taken on the consolidated return for foreign taxes paid or accrued by any member. However, if section 275(a)(4) does not apply, a deduction against consolidated taxable income may be allowed for certain taxes for which a credit is not allowed, even though the choice is made to claim a credit for other taxes. See, for example, sections 901(j)(3), 901(k)(7), 901(l)(4), 901(m)(6), and 908(b).

(b) *Computation of foreign tax credit.* The foreign tax credit for the consolidated return year is determined on a consolidated basis under the principles of sections 901 through 909 and 960. All foreign income taxes paid or accrued by members of the group for the year (including those deemed paid under section 960 and paragraph (d) of this section) must be aggregated.

(c) *Computation of limitation on credit.* For purposes of computing the group’s limiting fraction under section 904, the following rules apply:

(1) *Computation of taxable income from foreign sources—(i) Separate categories.* The group must compute a separate foreign tax credit limitation for income in each separate category (as defined in § 1.904–5(a)(4)(v)) for purposes of this section. The numerator of the limiting fraction in any separate category is the consolidated taxable income of the group determined in accordance with § 1.1502–11, taking into account adjustments required under section 904(b), if any, from sources without the United States in that category, determined in accordance with the rules of §§ 1.904–4 and 1.904–5 and the section 861 regulations (as defined in § 1.861–8(a)(1)).

(ii) *Adjustments under sections 904(f) and (g).* The rules for allocation and recapture of separate limitation losses and overall foreign losses under section 904(f) and § 1.1502–9 apply to determine the foreign source and U.S. source taxable income in each separate category of the consolidated group. Similarly, the rules for allocation and recapture of overall domestic losses under section 904(g) and § 1.1502–9 apply to determine the foreign source and U.S. source taxable income in each separate category of the consolidated group. See § 1.904(g)–3 for allocation rules under sections 904(f) and 904(g).

The rules of sections 904(f) and 904(g) do not operate to recharacterize foreign income tax attributable to any separate category.

(iii) *Computation of consolidated net operating loss.* The source and separate category of the group's consolidated net operating loss ("CNOL"), as that term is defined in § 1.1502-21(e), for the taxable year, if any, is determined based on the amounts of any separate limitation losses and U.S. source loss that are not allocated to reduce U.S. source income or income in other separate categories under the rules of sections 904(f) and 904(g) in computing the group's consolidated foreign tax credit limitations for the taxable year under paragraphs (c)(1)(i) and (ii) of this section.

(iv) *Characterization of CNOL carried to a separate return year—(A) In general.* The total amount of CNOL attributable to a member that is carried to a separate return year is determined under the rules of § 1.1502-21(b)(2). The source and separate category of the portion of the CNOL that is attributable to a member is determined under this paragraph (c)(1)(iv).

(B) *Tentative apportionment.* For the portion of the CNOL that is attributable to the member described in paragraph (c)(1)(iv) of this section, the consolidated group determines a tentative allocation and apportionment to each statutory and residual grouping (as described in § 1.861-8(a)(4) with respect to section 904 as the operative section) under the principles of § 1.1502-9(c)(2)(i), (ii), (iv), and (v) by treating the portion of the group's CNOL in each statutory and residual grouping as if it were a CSLL account, as that term is described in § 1.1502-9(b)(4). This determination is made as of the end of the taxable year of the consolidated group in which the CNOL arose or, if earlier and applicable, when the member leaves the consolidated group.

(C) *Adjustments.* (1) If the total tentative apportionment for all statutory and residual groupings exceeds the portion of the CNOL attributable to the member described in paragraph (c)(1)(iv)(A) of this section (the "excess amount"), then the tentative apportionment in each grouping is reduced by an amount equal to the excess amount multiplied by a fraction, the numerator of which is the tentative

apportionment in that grouping, and the denominator of which is the total tentative apportionments in all groupings.

(2) If the total tentative apportionment for all statutory and residual groupings is less than the total CNOL attributable to the member described in paragraph (c)(1)(iv)(A) (the "deficiency"), then the tentative apportionment in each grouping is increased by an amount equal to the deficiency multiplied by a fraction, the numerator of which is the CNOL in that grouping that was not tentatively apportioned, and the denominator of which is the total CNOL in all groupings that was not tentatively apportioned.

(v) *Consolidated net capital losses.*

The principles of the rules in paragraphs (c)(1)(i) through (iv) of this section apply for purposes of determining the source and separate category of consolidated net capital losses described in § 1.1502-22(e).

(2) *Computation of consolidated taxable income.* The denominator of the limiting fraction in any separate category is the consolidated taxable income of the group determined in accordance with § 1.1502-11, taking into account adjustments required under section 904(b), if any.

(3) *Computation of tax against which credit is taken.* The tax against which the limiting fraction under section 904(a) is applied will be the consolidated tax liability of the group determined under § 1.1502-2, but without regard to § 1.1502-2(a)(2) through (4) and (8) and (9), and without regard to any credit against such liability. See sections 26(b) and 901(a).

(d) *Carryover and carryback of unused foreign tax—(1) Allowance of unused foreign tax as consolidated carryover or carryback.* The consolidated group's carryovers and carrybacks of unused foreign tax (as defined in § 1.904-2(c)(1)) to the taxable year is determined on a consolidated basis under the principles of section 904(c) and § 1.904-2 and is deemed to be paid or accrued to a foreign country or possession for that year. The consolidated group's unused foreign tax carryovers and carrybacks to the taxable year consist of any unused foreign tax of the consolidated group, plus any unused foreign tax of members for separate return years, which may be

carried over or back to the taxable year under the principles of section 904(c) and § 1.904-2. The consolidated group's unused foreign tax carryovers and carrybacks do not include any unused foreign taxes apportioned to a corporation for a separate return year pursuant to § 1.1502-79(d). A consolidated group's unused foreign tax in each separate category is the excess of the foreign taxes paid, accrued or deemed paid under section 960 by the consolidated group over the limitation in the applicable separate category for the consolidated return year. See paragraph (c) of this section.

(2) *Absorption rules.* For purposes of determining the amount, if any, of an unused foreign tax which can be carried to a taxable year (whether a consolidated or separate return year), the amount of the unused foreign tax that is absorbed in a prior consolidated return year under section 904(c) shall be determined by—

(i) Applying all unused foreign taxes which can be carried to a prior year in the order of the taxable years in which those unused foreign taxes arose, beginning with the taxable year that ends earliest; and

(ii) Applying all unused foreign taxes which can be carried to such prior year from taxable years ending on the same date on a pro rata basis.

(e) *Example.* The following example illustrates the application of this section:

(1) *Facts.* (i) Domestic corporation P is incorporated on January 1, Year 1. On that same day, P incorporates domestic corporations S and T as wholly owned subsidiaries. P, S, and T file consolidated returns for Years 1 and 2 on the basis of a calendar year. T engages in business solely through a qualified business unit in Country A. S engages in business solely through qualified business units in Countries A and B. P does business solely in the United States. During Year 1, T sold an item of inventory to P at a gain of \$2,000. Under § 1.1502-13 the intercompany gain has not been taken into account as of the close of Year 1. The taxable income of each member for Year 1 from foreign and U.S. sources, and the foreign taxes paid on such foreign income, are as follows:

TABLE 1 TO PARAGRAPH (e)(1)(i)

Corporation	U.S. source taxable income	Foreign branch category foreign source taxable income	Foreign branch category foreign tax paid	Total taxable income
P	\$40,000	\$40,000
T	\$20,000	\$12,000	20,000
S	20,000	9,000	20,000
Group	40,000	40,000	21,000	80,000

(ii) The separate taxable income of each member was computed by taking into account the rules under § 1.1502-12. Accordingly, T's intercompany gain of \$2,000 is not included in T's taxable income for Year 1. The group's consolidated taxable income (computed in accordance with § 1.1502-11) is \$80,000. The consolidated tax liability against which the credit may be taken (computed in accordance with paragraph (c)(3) of this section) is \$16,800.

(2) *Analysis.* Under section 904(d) and paragraph (c)(1)(i) of this section, the aggregate amount of foreign income taxes paid to all foreign countries with respect to the foreign branch category income of \$21,000 (\$12,000 + \$9,000) that may be claimed as a credit in Year 1 is limited to \$8,400 (\$16,800 × \$40,000/\$80,000). Assuming P, as the agent for the group, chooses to use the foreign taxes paid as a credit, the group may claim a \$8,400 foreign tax credit.

(f) *Applicability date.* This section applies to taxable years for which the original consolidated Federal income tax return is due (without extensions) after January 11, 2021.

■ **Par. 38.** Section 1.1502-21 is amended by adding a sentence to the end of paragraph (b)(2)(iv)(B)(1) to read as follows:

§ 1.1502-21 Net operating losses.

* * * * *

- (b) * * *
- (2) * * *
- (iv) * * *
- (B) * * *
- (1) * * *

The source and section 904(d) separate category of the CNOL attributable to a member is determined under § 1.1502-4(c)(1)(iii).

* * * * *

PART 301—PROCEDURE AND ADMINISTRATION

■ **Par. 39.** The authority citation for part 301 is amended by adding an entry for § 301.6689-1 in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805.

* * * * *

Section 301.6689-1 also issued under 26 U.S.C. 6689(a), 26 U.S.C. 6227(d), and 26 U.S.C. 6241(11).

* * * * *

■ **Par. 40.** Section 301.6227-1 is amended by adding paragraph (g) to read as follows:

§ 301.6227-1 Administrative adjustment request by partnership.

* * * * *

(g) *Notice requirement and partnership adjustments required as a result of a foreign tax redetermination.* For special rules applicable when an adjustment to a partnership related item (as defined in section 6241(2)) is required as part of a redetermination of U.S. tax liability under section 905(c) and § 1.905-3(b) of this chapter as a result of a foreign tax redetermination (as defined in § 1.905-3(a) of this chapter), see § 1.905-4(b)(2)(ii) of this chapter.

* * * * *

■ **Par. 41.** Section 301.6689-1 is added to read as follows:

§ 301.6689-1 Failure to file notice of redetermination of foreign income taxes.

(a) *Application of civil penalty.* If a foreign tax redetermination occurs, and the taxpayer failed to notify the Internal Revenue Service (IRS) on or before the date and in the manner prescribed in § 1.905-4 of this chapter, or as required under section 404A(g)(2), for giving notice of a foreign tax redetermination, then, unless paragraph (d) of this section applies, there is added to the deficiency (or the imputed underpayment as determined under section 6225) attributable to such redetermination an amount determined under paragraph (b) of this section. Subchapter B of chapter 63 of the Internal Revenue Code (relating to deficiency proceedings) does not apply with respect to the assessment of the amount of the penalty.

(b) *Amount of the penalty.* The amount of the penalty shall be equal to—

- (1) Five percent of the deficiency (or imputed underpayment) if the failure is for not more than one month; plus

(2) An additional five percent of the deficiency (or imputed underpayment) for each month (or fraction thereof) during which the failure continues, but not to exceed in the aggregate twenty-five percent of the deficiency (or imputed underpayment).

(c) *Foreign tax redetermination defined.* For purposes of this section, a foreign tax redetermination is any redetermination for which a notice is required under sections 905(c) or 404A(g)(2). See §§ 1.905-3 through 1.905-5 of this chapter for rules relating to the notice requirement under section 905(c).

(d) *Reasonable cause.* The penalty set forth in this section shall not apply if it is established to the satisfaction of the IRS that the failure to file the notification within the prescribed time was due to reasonable cause and not due to willful neglect. An affirmative showing of reasonable cause must be made in the form of a written statement that sets forth all the facts alleged as reasonable cause for the failure to file the notification on time and that contains a declaration by the taxpayer that the statement is made under the penalties of perjury. This statement must be filed with the Internal Revenue Service Center in which the notification was required to be filed. The taxpayer must file this statement with the notice required under section 905(c) or 404A(g)(2). If the taxpayer exercised ordinary business care and prudence and was nevertheless unable to file the notification within the prescribed time, then the delay will be considered to be due to reasonable cause and not willful neglect.

(e) *Applicability date.* This section applies to foreign tax redeterminations occurring in taxable years ending on or after December 16, 2019, and to foreign tax redeterminations of foreign corporations occurring in taxable years that end with or within a taxable year of a United States shareholder ending on or after December 16, 2019.

§ 301.6689–1T [REMOVED]

■ **Par. 42.** Section 301.6689–1T is removed.

Sunita Lough,

Deputy Commissioner for Services and Enforcement.

Approved: September 18, 2020.

David J. Kautter,

Assistant Secretary of the Treasury (Tax Policy).

Guidance Related to the Foreign Tax Credit; Clarification of Foreign-Derived Intangible Income; Proposed Rule

DEPARTMENT OF THE TREASURY**Internal Revenue Service****26 CFR Part 1**

[REG–101657–20]

RIN 1545–BP70

Guidance Related to the Foreign Tax Credit; Clarification of Foreign-Derived Intangible Income**AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Notice of proposed rulemaking.

SUMMARY: This document contains proposed regulations relating to the foreign tax credit, including guidance on the disallowance of a credit or deduction for foreign income taxes with respect to dividends eligible for a dividends-received deduction; the allocation and apportionment of interest expense, foreign income tax expense, and certain deductions of life insurance companies; the definition of a foreign income tax and a tax in lieu of an income tax; transition rules relating to the impact on loss accounts of net operating loss carrybacks allowed by reason of the Coronavirus Aid, Relief, and Economic Security Act; the definition of foreign branch category and financial services income; and the time at which foreign taxes accrue and can be claimed as a credit. This document also contains proposed regulations clarifying rules relating to foreign-derived intangible income. The proposed regulations affect taxpayers that claim credits or deductions for foreign income taxes, or that claim a deduction for foreign-derived intangible income.

DATES: Written or electronic comments and requests for a public hearing must be received by February 10, 2021.

ADDRESSES: Commenters are strongly encouraged to submit public comments electronically. Submit electronic submissions via the Federal eRulemaking Portal at www.regulations.gov (indicate IRS and REG–101657–20) by following the online instructions for submitting comments. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn. The IRS expects to have limited personnel available to process public comments that are submitted on paper through mail. The Department of the Treasury (the “Treasury Department”) and the IRS will publish for public availability any comment submitted electronically, and to the extent practicable on paper, to its public docket. Send paper

submissions to: CC:PA:LPD:PR (REG–101657–20), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

Walsh, (202) 317–4908; concerning §§ 1.250(b)–1, 1.861–8, 1.861–9, and 1.861–14, Jeffrey P. Cowan, (202) 317–4924; concerning § 1.250(b)–5, Brad McCormack, (202) 317–6911; concerning §§ 1.164–2, 1.901–1, 1.901–2, 1.903–1, 1.905–1, and 1.905–3, Tianlin (Laura) Shi, (202) 317–6987; concerning §§ 1.367(b)–3, 1.367(b)–4, and 1.367(b)–10, Logan Kincheloe, (202) 317–6075; concerning §§ 1.367(b)–7, 1.861–10, 1.904–2, 1.904–4, 1.904–5, and 1.904(f)–12, Jeffrey L. Parry, (202) 317–4916; concerning submissions of comments and requests for a public hearing, Regina Johnson, (202) 317–5177 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:**Background**

On December 7, 2018, the Treasury Department and the IRS published proposed regulations (REG–105600–18) relating to foreign tax credits in the **Federal Register** (83 FR 63200) (the “2018 FTC proposed regulations”). Those regulations addressed several significant changes that the Tax Cuts and Jobs Act (Pub. L. 115–97, 131 Stat. 2054, 2208 (2017)) (the “TCJA”) made with respect to the foreign tax credit rules and related rules for allocating and apportioning deductions in determining the foreign tax credit limitation. On December 17, 2019, portions of the 2018 FTC proposed regulations were finalized in TD 9882, published in the **Federal Register** (84 FR 69022) (the “2019 FTC final regulations”). On the same date, new proposed regulations were issued addressing changes made by the TCJA as well as other related foreign tax credit rules (the “2019 FTC proposed regulations”). Correcting amendments to the 2019 FTC final regulations and the 2019 FTC proposed regulations were published in the **Federal Register** on May 15, 2020, see 85 FR 29323 (2019 FTC final regulations) and 85 FR 29368 (2019 FTC proposed regulations). The 2019 FTC proposed regulations are finalized in the Rules and Regulations section of this issue of the **Federal Register** (the “2020 FTC final regulations”).

On July 15, 2020, the Treasury Department and the IRS finalized regulations under section 250 (the “section 250 regulations”) in TD 9901,

published in the **Federal Register** (85 FR 43042).

This document contains proposed regulations (the “proposed regulations”) addressing: (1) The determination of foreign income taxes subject to the credit and deduction disallowance provision of section 245A(d); (2) the determination of oil and gas extraction income from domestic and foreign sources and of electronically supplied services under the section 250 regulations; (3) the impact of the repeal of section 902 on certain regulations issued under section 367(b); (4) the sourcing of inclusions under sections 951, 951A, and 1293; (5) the allocation and apportionment of interest deductions, including rules for allocating interest expense of foreign bank branches and certain regulated utility companies, an election to capitalize research and experimental expenditures and advertising expenses for purposes of calculating tax basis, and a revision to the controlled foreign corporation (“CFC”) netting rule; (6) the allocation and apportionment of section 818(f) expenses of life insurance companies that are members of consolidated groups; (7) the allocation and apportionment of foreign income taxes, including taxes imposed with respect to disregarded payments; (8) the definitions of a foreign income tax and a tax in lieu of an income tax, including the addition of a jurisdictional nexus requirement and changes to the net gain requirement, the treatment of certain tax credits, the treatment of foreign tax law elections for purposes of the noncompulsory payment rules, and the substitution requirement under section 903; (9) the allocation of the liability for foreign income taxes in connection with certain mid-year transfers or reorganizations; (10) transition rules to account for the effect on loss accounts of net operating loss carrybacks to pre-2018 taxable years that are allowed under the Coronavirus Aid, Relief, and Economic Security Act, Public Law 116–136, 134 Stat. 281 (2020); (11) the foreign branch category rules in § 1.904–4(f) and the definition of a financial services entity for purposes of section 904; and (12) the time at which credits for foreign income taxes can be claimed pursuant to sections 901(a) and 905(a).

Explanation of Provisions**I. Foreign Income Taxes With Respect to Dividends for Purposes of Section 245A(d)**

Section 245A(d)(1) provides that no credit is allowed under section 901 for any taxes paid or accrued (or treated as paid or accrued) with respect to any

dividend for which a deduction is allowed under that section. Section 245A(d)(2) disallows a deduction under chapter 1 for any tax for which a credit is not allowable under section 901 by reason of section 245A(d)(1). Section 245A(e)(3) also provides that no credit or deduction is allowed for foreign income taxes paid or accrued with respect to a hybrid dividend or a tiered hybrid dividend.

Proposed § 1.245A(d)–1(a) generally provides that neither a foreign tax credit under section 901 nor a deduction is allowed for foreign income taxes (as defined in § 1.901–2(a)) that are “attributable to” certain amounts. For this purpose, the proposed regulations rely on the rules in § 1.861–20, contained in the 2020 FTC final regulations and proposed to be modified in these proposed regulations, that allocate and apportion foreign income taxes to income for purposes of various operative sections, including sections 904, 960, and 965(g). Specifically, proposed § 1.245A(d)–1 provides that § 1.861–20 (which includes portions contained in these proposed regulations as well as in the 2020 FTC final regulations) applies for purposes of determining foreign income taxes paid or accrued that are attributable to any dividend for which a deduction is allowed under section 245A(a), to a hybrid dividend or tiered hybrid dividend, or to previously taxed earnings and profits that arose as a result of a sale or exchange that by reason of section 964(e)(4) or 1248 gave rise to a deduction under section 245A(a) or as a result of a tiered hybrid dividend that by reason of section 245A(e)(2) gave rise to an inclusion in the gross income of a United States shareholder (collectively, such previously taxed earnings and profits are referred to as “section 245A(d) PTEP”).

In addition, the rules apply to foreign income taxes that are imposed with respect to certain foreign taxable events, such as a deemed distribution under foreign law or an inclusion under a foreign law CFC inclusion regime, even though such event does not give rise to a distribution or inclusion for Federal income tax purposes. Proposed § 1.245A(d)–1(a) provides that foreign income taxes that are attributable to “specified earnings and profits” are also subject to the disallowance under section 245A(d). Under proposed § 1.245A(d)–1(b), § 1.861–20 applies to determine whether foreign income taxes are attributable to specified earnings and profits. Under § 1.861–20, foreign income taxes may be allocated and apportioned by reference to specified

earnings and profits, even though the person paying or accruing the foreign income tax does not have a corresponding U.S. item in the form of a distribution of, or income inclusion with respect to, such earnings and profits. See, for example, § 1.861–20(d)(2)(ii)(B), (C), or (D) (foreign law distribution or foreign law disposition and certain foreign law transfers between taxable units), (d)(3)(i)(C) (income from a reverse hybrid), (d)(3)(iii) (foreign law inclusion regime), and proposed § 1.861–20(d)(3)(v)(C)(1)(i) (disregarded payment treated as a remittance). Specified earnings and profits means earnings and profits that would give rise to a section 245A deduction (without regard to the holding period requirement under section 246 or the rules under § 1.245A–5 that disallow a deduction under section 245A(a) for certain dividends), a hybrid dividend, or a distribution sourced from section 245A(d) PTEP if an amount of money equal to all of the foreign corporation’s earnings and profits were distributed. Therefore, for example, a credit or deduction for foreign income taxes paid or accrued by a domestic corporation that is a United States shareholder (“U.S. shareholder”) with respect to a distribution that is not recognized for Federal income tax purposes (for example, in the case of a consent dividend under foreign tax law that is not regarded for Federal income tax purposes, or a distribution of stock that is excluded from gross income under section 305(a) but is treated as a taxable dividend under foreign tax law) is not allowed under section 245A(d) to the extent those foreign income taxes are attributable to specified earnings and profits.

An anti-avoidance rule is included in proposed § 1.245A(d)–1 to address situations in which taxpayers engage in transactions with a principal purpose of avoiding the purposes of section 245A(d), which is to disallow a foreign tax credit or deduction with respect to foreign income taxes imposed on income that is effectively exempt from tax (due to the availability of a deduction under section 245A(a)) or with respect to foreign income taxes imposed on a hybrid dividend or tiered hybrid dividend. Such transactions may include transactions to separate foreign income taxes from the income to which they relate in situations that are not explicitly covered under § 1.861–20 (including, for example, loss sharing transactions under group relief regimes). Such transactions may also include successive distributions (under foreign

law) out of earnings and profits that, under the rules in § 1.861–20, are treated as distributed out of previously taxed earnings and profits (and therefore foreign income taxes attributable to such amounts are not generally subject to the disallowance under section 245A(d)), when there is no reduction of such previously taxed earnings and profits due to the absence of a distribution under Federal income tax law. See proposed § 1.245A(d)–1(e)(4) (*Example 3*). The Treasury Department and the IRS are concerned that because the rules in § 1.861–20(d) addressing foreign law distributions and dispositions do not currently make adjustments to a foreign corporation’s earnings and profits to reflect distributions that are not recognized for Federal income tax purposes, such foreign law transactions could be used to circumvent the purposes of section 245A(d). Comments are requested on potential revisions to § 1.861–20(d) that could address these concerns, including the possibility of maintaining separate earnings and profits accounts, characterized with reference to the relevant statutory and residual groupings, for each taxable unit whereby the accounts would be adjusted annually to reflect transactions that occurred under foreign law but not under Federal income tax law.

II. Clarifications to Regulations Under Section 250

A. Definition of Domestic and Foreign Oil and Gas Extraction Income

Section 250 provides a domestic corporation a deduction (“section 250 deduction”) for its foreign-derived intangible income (“FDII”) as well as its global intangible low-taxed income (“GILTI”) inclusion amount and the amount treated as a dividend under section 78 that is attributable to its GILTI inclusion. The section 250 deduction attributable to FDII is calculated in part by determining the foreign-derived portion of a corporation’s deduction eligible income (“DEI”). DEI is defined as the excess of gross DEI over the deductions (including taxes) properly allocable to such gross income. See section 250(b)(3)(A) and § 1.250(b)–1(c)(2). Gross DEI is determined without regard to domestic oil and gas extraction income (“DOGEI”), which is defined as income described in section 907(c)(1) determined by substituting “within the United States” for “without the United States.” See section 250(b)(3)(B) and § 1.250(b)–1(c)(7). Similarly, foreign oil and gas extraction income (“FOGEI”) as defined in section 907(c)(1) is excluded from the computation of gross tested

income which is used to determine a U.S. shareholder's GILTI inclusion amount. See § 1.951A-2(c)(1)(v).

The Treasury Department and the IRS have determined that it would be inappropriate for taxpayers to use inconsistent methods to determine the amounts of DOGEI and FOGEI from the sale of oil or gas that has been transported or processed. Taxpayers with both types of income may have an incentive to minimize their DOGEI in order to maximize their potential section 250 deduction attributable to FDII, while in contrast maximizing their FOGEI in order to minimize their gross tested income, even though this would also decrease the amount of the section 250 deduction attributable to their GILTI inclusion amount. Accordingly, the proposed regulations provide that taxpayers must use a consistent method for purposes of determining both DOGEI and FOGEI. See proposed § 1.250(b)-1(c)(7). Similarly, for purposes of allocating and apportioning deductions, taxpayers are already required under existing regulations to use the same method of allocation and the same principles of apportionment where more than one operative section, for example sections 250 and 904, apply. See § 1.861-8(f)(2)(i).

B. Definition of Electronically Supplied Service

Section 1.250(b)-5(c)(5) defines the term "electronically supplied service" to mean a general service (other than an advertising service) that is delivered primarily over the internet or an electronic network, and provides that such services include, by way of examples, cloud computing and digital streaming services.

Since the publication of the section 250 regulations, the Treasury Department and the IRS have determined that the definition of electronically supplied services could be interpreted in a manner that includes services that were not primarily electronic and automated in nature but rather where the renderer applies human effort or judgment, such as professional services that are provided through the internet or an electronic network. Therefore, these proposed regulations clarify that the value of the service to the end user must be derived primarily from the service's automation or electronic delivery in order to be an electronically supplied service. The regulations further provide that services that primarily involve the application of human effort by the renderer to provide the service (not including the effort involved in developing or maintaining the technology to enable the electronic

service) are not electronically supplied services. For example, certain services for which automation or electronic delivery is not a primary driver of value, such as legal, accounting, medical, or teaching services delivered electronically and synchronously, are not electronically supplied services.

III. Carryover of Earnings and Profits and Taxes When One Foreign Corporation Acquires Assets of Another Foreign Corporation in a Section 381 Transaction

Section 1.367(b)-7 provides rules regarding the manner and the extent to which earnings and profits and foreign income taxes of a foreign corporation carry over when one foreign corporation ("foreign acquiring corporation") acquires the assets of another foreign corporation ("foreign target corporation") in a transaction described in section 381 (the combined corporation, the "foreign surviving corporation"). See § 1.367(b)-7(a). Before the repeal of section 902 in the TCJA, these rules were primarily relevant for determining the foreign income taxes of the foreign surviving corporation that were considered deemed paid by its U.S. shareholder with respect to a distribution or inclusion under section 902 or 960, respectively.

Section 1.367(b)-7 applies differently with respect to "pooling corporations" and "nonpooling corporations." A pooling corporation is a foreign corporation with respect to which certain ownership requirements were satisfied in pre-2018 taxable years and that, as a result, maintained "pools" of post-1986 undistributed earnings and related post-1986 foreign income taxes. See § 1.367(b)-2(l)(9). In general, if the foreign surviving corporation was a pooling corporation, the post-1986 undistributed earnings and post-1986 foreign income taxes of the foreign acquiring corporation and the foreign target corporation were combined on a separate category-by-separate category basis. See § 1.367(b)-7(d)(1). However, the regulations required the foreign surviving corporation to combine the taxes related to a deficit in a separate category of post-1986 undistributed earnings of one or both of the foreign acquiring corporation or foreign target corporation (a "hovering deficit") with other post-1986 foreign income taxes in that separate category only on a pro rata basis as the hovering deficit was absorbed by post-transaction earnings in the same separate category. See § 1.367(b)-7(d)(2)(iii). Similarly, a hovering deficit in a separate category of post-1986 undistributed earnings could

offset only earnings and profits accumulated by the foreign surviving corporation after the section 381 transaction. Under § 1.367(b)-7(d)(2)(ii), the reduction or offset was generally deemed to occur as of the first day of the foreign surviving corporation's first taxable year following the year in which the post-transaction earnings accumulated.

A nonpooling corporation is a foreign corporation that is not a pooling corporation and, as a result, maintains "annual layers" of pre-1987 accumulated profits and pre-1987 foreign income taxes. See § 1.367(b)-2(l)(10). In general, a foreign surviving corporation maintains the annual layers of pre-1987 accumulated profits and pre-1987 foreign income taxes, and the taxes related to a deficit in an annual layer cannot be associated with post-section 381 transaction earnings of the foreign surviving corporation.

As a result of the repeal of section 902 in the TCJA, post-1986 foreign income taxes and pre-1987 foreign income taxes of foreign corporations are generally no longer relevant for taxable years beginning on or after January 1, 2018. In addition, consistent with the TCJA, the Treasury Department and the IRS issued regulations under section 960 clarifying that only current year taxes are taken into account in determining taxes deemed paid under section 960. See § 1.960-1(c)(2). Current year tax means certain foreign income tax paid or accrued by a controlled foreign corporation in a current taxable year. See § 1.960-1(b)(4).

In light of the changes made by the TCJA and subsequent implementing regulations, the proposed regulations provide rules to clarify the treatment of foreign income taxes of a foreign surviving corporation in taxable years of foreign corporations beginning on or after January 1, 2018, and for taxable years of U.S. shareholders in which or with which such taxable years of foreign corporations end ("post-2017 taxable years"). The proposed regulations provide that all foreign target corporations, foreign acquiring corporations, and foreign surviving corporations are treated as nonpooling corporations in post-2017 taxable years and that any amounts remaining in the post-1986 undistributed earnings and post-1986 foreign income taxes of any such corporation as of the end of the foreign corporation's last taxable year beginning before January 1, 2018, are treated as earnings and taxes in a single pre-pooling annual layer in the foreign corporation's post-2017 taxable years.

The proposed regulations also clarify that foreign income taxes that are

related to non-previously taxed earnings of a foreign acquiring corporation and a foreign target corporation that were accumulated in taxable years before the current taxable year of the foreign corporation, or in a foreign target corporation's taxable year that ends on the date of the section 381 transaction, are not treated as current year taxes (as defined in § 1.960-1(b)(4)) of a foreign surviving corporation in any post-2017 taxable year. Furthermore, the proposed regulations clarify that foreign income taxes related to hovering deficits are not current year taxes in the year that the hovering deficit is absorbed, in part because the hovering deficit is not considered to offset post-1986 undistributed earnings until the first day of the foreign surviving corporation's first taxable year following the year in which the post-transaction earnings accumulated. In addition, because such taxes were paid or accrued by a foreign corporation in a prior taxable year, they are not considered paid or accrued by the foreign corporation in the current taxable year and therefore are not current year taxes under § 1.960-1(b)(4). Finally, foreign income taxes related to a hovering deficit in pre-1987 accumulated profits generally will not be reduced or deemed paid unless a foreign tax refund restores a positive balance to the associated earnings pursuant to section 905(c); therefore, such foreign income taxes are never included in current year taxes.

In addition to the proposed changes to § 1.367(b)-7, the proposed regulations remove some references to section 902 in other regulations issued under section 367(b) that are no longer relevant as a result of the repeal of section 902. For example, pursuant to § 1.367(b)-4(b)(2), a deemed dividend inclusion is required in certain cases upon the receipt of preferred stock by an exchanging shareholder, in order to prevent the excessive potential shifting of earnings and profits, notwithstanding that the exchanging shareholder's status as a section 1248 shareholder is preserved. One of the conditions for application of the rule requires a domestic corporation to meet the ownership threshold of section 902(a) or (b) and, thus, be eligible for a deemed paid credit on distributions from the transferee foreign corporation. § 1.367(b)-4(b)(2)(i)(B). These proposed rules generally retain the substantive ownership threshold of this requirement, but without reference to section 902 and by modifying the ownership threshold requirement to consider not only voting power but value as well. Specifically, § 1.367(b)-

4(b)(2)(i)(B) is revised to require that a domestic corporation owns at least 10 percent of the transferee foreign corporation by vote or value.

Comments are requested as to whether further changes to § 1.367(b)-4 or 1.367(b)-7, or any changes to other regulations issued under section 367, are appropriate in order to clarify their application after the repeal of section 902. In addition, the Treasury Department and the IRS are studying the interaction of § 1.367(b)-4(b)(2) with section 245A and other Code provisions and considering whether additional revisions to the regulation are appropriate in light of TCJA generally. Comments are specifically requested with respect to the proposed revisions to § 1.367(b)-4(b)(2), including whether there is a continuing need to prevent excessive potential shifting of earnings and profits through the use of preferred stock in light of the TCJA generally. For example, the Treasury Department and the IRS are considering, and request comments on, the extent to which, in certain transactions described in § 1.367(b)-4(b)(2), (1) an exchanging shareholder who would not qualify for a deduction under section 245A could potentially shift earnings and profits of a foreign acquired corporation to a transferee foreign corporation with a domestic corporate shareholder that would qualify for a deduction under section 245A, or (2) a domestic corporate exchanging shareholder of a foreign acquired corporation with no earnings and profits could access the earnings and profits of a transferee foreign corporation.

IV. Source of Inclusions Under Sections 951, 951A, 1293, and Associated Section 78 Dividend

Sections 861(a) and 862(a) contain rules to determine the source of certain items of gross income. Section 863(a) provides that the source of items of gross income not specified in sections 861(a) and 862(a) will be determined under regulations prescribed by the Secretary. As a result of changes to section 960 made by the TCJA, the Treasury Department and the IRS revised the regulations under section 960. As part of that revision, the Treasury Department and the IRS removed former § 1.960-1(h)(1), which contained a source rule for the amount included in gross income under section 951 and the associated section 78 dividend. Section 1.960-1(h)(1) provided that, for purposes of section 904, the amount included in gross income of a domestic corporation under section 951 with respect to a foreign corporation, plus any section 78

dividend to which such section 951 inclusion gave rise by reason of taxes deemed paid by such domestic corporation, was derived from sources within the foreign country or possession of the United States under the laws of which such foreign corporation, or the first-tier corporation in the same chain of ownership as such foreign corporation, was created or organized.

Although section 904(h)(1) treats as from sources within the United States certain amounts included in gross income under section 951(a) that otherwise would be treated as derived from sources without the United States, absent former § 1.960-1(h)(1), no rule specifies the source of inclusions under section 951 before the application of section 904(h)(1). In addition, the rule in former § 1.960-1(h)(1) only provided for the source of a domestic corporation's section 951 inclusions for purposes of section 904. A similar lack of guidance exists with respect to the source of inclusions under section 951A. See section 951A(f)(1)(A) (requiring the application of section 904(h)(1) with respect to amounts included in gross income under section 951A(a) in the same manner as amounts included under section 951(a)(1)(A)). The removal of former § 1.960-1(h)(1) also left uncertain the source of amounts included in gross income as a result of an election under section 1293(a), because under section 1293(f)(1), such amounts are treated for purposes of section 960 as amounts included in gross income under section 951(a).

To clarify the source of income inclusions after the removal of former § 1.960-1(h)(1), the proposed regulations include a new rule in § 1.861-3(d), which provides that for purposes of the sourcing provisions an amount included in the gross income of a United States person under section 951 is treated as a dividend received by the United States person directly from the foreign corporation that generated the inclusion.

This proposed rule differs from former § 1.960-1(h)(1) in two respects. First, former § 1.960-1(h)(1) provided that if the foreign corporation that generated the income included under section 951 was held indirectly through other foreign corporations, the amount included was treated as if it had been paid through such intermediate corporations and as received from the first-tier foreign corporation. The Treasury Department and the IRS have determined that, in light of the repeal of section 902, and because a section 951 inclusion with respect to a lower-tier CFC is not treated as a deemed distribution through the first-tier CFC,

the source of the inclusion should be determined by reference to the lower-tier CFC.

Second, former § 1.960–1(h)(1) treated the entire amount of the inclusion under section 951 as derived from sources without the United States. However, the Treasury Department and the IRS have determined that because dividends and inclusions of the same earnings and profits should be sourced in the same manner, the general rule for inclusions under section 951 should be consistent with the rule in section 861(a)(2)(B) and § 1.861–3(a)(3) that treats dividends as derived from sources within the United States to the extent that the dividend is from a foreign corporation with significant income effectively connected with the conduct of a trade or business in the United States. This is particularly appropriate in circumstances in which effectively connected income is not excluded from subpart F income under section 952(b) (which could arise as a result of a treaty obligation of the United States precluding the effectively connected income from being taxed by the United States in the hands of the CFC). In addition, the Treasury Department and the IRS have determined that the source of a taxpayer's gross income from an inclusion of CFC earnings that are subject to a high rate of foreign tax should be the same, regardless of whether the taxpayer includes the income under subpart F or elects the high-taxed exception of section 954(b)(4) and repatriates the earnings as a dividend. Therefore, the proposed regulations provide that the source of an inclusion under section 951 is determined under the same rules as those for dividends. However, the resourcing rules in section 904(h) and § 1.904–5(m) independently operate to ensure that dividends and inclusions under section 951(a) that are attributable to U.S. source income of the CFC retain that U.S. source in the hands of the United States shareholder.

The proposed regulations also clarify that the source of section 78 dividends associated with inclusions under section 951 follows the rules for sourcing dividends. See also § 1.78–1(a).

Finally, and consistent with sections 951A(f)(1)(A) and 1293(f)(1), the proposed regulations apply the same rules with respect to inclusions under sections 951A and 1293 and the associated section 78 dividend.

V. Allocation and Apportionment of Expenses Under Section 861 Regulations

A. Election To Capitalize R&E and Advertising Expenditures

A taxpayer determines its foreign tax credit limitation under section 904, in part, based on the taxpayer's taxable income from sources without the United States. Taxable income from sources without the United States is determined by deducting from the items of gross income from sources without the United States the expenses, losses, and other deductions properly allocated and apportioned to that income, and a ratable part of any expenses, losses, or other deductions that cannot definitely be allocated to some item or class of gross income. See section 862(b). Section 864(e)(2) generally requires taxpayers to allocate and apportion interest expense on the basis of assets, rather than income. Under the asset method, a taxpayer apportions interest expense to the various statutory or residual groupings based on the average total value of assets within each grouping for the taxable year as determined under the asset valuation rules of § 1.861–9T(g).

The preamble to the 2019 FTC proposed regulations stated that the Treasury Department and the IRS continue to study the rules for allocating and apportioning interest deductions, and requested comments on a potential proposal to provide for the capitalization and amortization of certain expenses solely for purposes of § 1.861–9 to better reflect asset values under the tax book value method. One comment supported the adoption of such a rule.

The Treasury Department and the IRS recognize that internally-developed intangible assets (including intangible assets such as goodwill that are created as a result of advertising) that have no tax book value because the costs of generating them have been currently deducted may nevertheless have continuing economic value, and that debt financing may support the generation and maintenance of that value. Accordingly, proposed § 1.861–9(k) provides an election for taxpayers to capitalize and amortize their research and experimental (“R&E”) and advertising expenditures incurred in a taxable year. This election is analogous to the election under § 1.861–9(i) to determine asset values based on the alternative tax book value method, since both elections allow taxpayers to determine the tax book value of an asset in a manner that is different from the general rules that apply under Federal

income tax law, but solely for purposes of allocating and apportioning interest expense under § 1.861–9, and not for any other Federal income tax purpose (such as determining the amount of any deduction actually allowed for depreciation or amortization).

Proposed § 1.861–9(k)(1) and (2) generally provides that for purposes of allocating and apportioning interest expense under § 1.861–9, an electing taxpayer capitalizes and amortizes its R&E expenditures under the rules in section 174 as contained in Public Law 115–97, title I, § 13206(a), which generally requires that beginning in taxable years beginning in 2022, R&E expenditures must be capitalized and then amortized.

Similarly, proposed § 1.861–9(k)(1) and (3) generally requires an electing taxpayer to capitalize and amortize its advertising expenditures. The definition of advertising expenditures and the method of cost recovery contained in proposed § 1.861–9(k)(3) is based on prior legislative proposals (which have not been enacted) proposing that certain advertising expenditures be capitalized. See, for example, H.R. 1, 113th Cong. Section 3110 (2014). Comments are requested on whether a different definition of advertising expenditures or a different method of cost recovery should be adopted for purposes of the election in proposed § 1.861–9(k).

B. Nonrecourse Debt of Certain Utility Companies

Section 1.861–10T provides certain exceptions to the general asset-based apportionment of interest expense requirement under section 864(e)(2), including rules that directly allocate interest expense to the income generated by certain assets that are subject to “qualified nonrecourse indebtedness.” See § 1.861–10T(b).

A comment to the 2019 FTC proposed regulations asserted that interest expense incurred on certain debt of regulated utility companies should be directly allocated to income from assets of the utility business because the debt must be approved by a regulatory agency and relates directly to the underlying needs of the utility business. The comment suggested that the existing rules for qualified nonrecourse indebtedness were insufficient because utility indebtedness is often subject to guarantees and cross collateralizations that permit the lender to seek recovery beyond any identified property, and because the cash flows of a regulated utility company used to support utility indebtedness are broader than the permitted cash flows described in § 1.861–10T(b).

In response to this comment, the proposed regulations provide that certain interest expense of regulated utility companies is directly allocated to assets of the utility business. See proposed § 1.861–10(f). The type of utility companies that qualify for the rule, and the rules for tracing debt to assets, are modeled on similar rules provided in regulations under section 163(j). See §§ 1.163(j)–1(b)(15) and 1.163(j)–10(d)(2). Consistent with the approach taken in § 1.163(j)–10(d)(2), the proposed regulations expand the scope of permitted cash flows under § 1.861–10T(b) but do not modify the requirement that the creditor look to particular assets as security for payment on the loan because unsecured debt generally is supported by all of the assets of the borrower. See also Part XI.L.2 of the Summary of Comments and Explanation of Revisions to TD 9905 (85 FR 56686).

C. Revision to CFC Netting Rule Relating to CFC-to-CFC Loans

Section 1.861–10(e)(8)(v) provides that for purposes of applying the CFC netting rule of § 1.861–10(e), certain loans made by one CFC to another CFC are treated as loans made by a U.S. shareholder to the borrower CFC, to the extent the U.S. shareholder makes capital contributions directly or indirectly to the lender CFC, and are treated as related group indebtedness. No income derived from the U.S. shareholder's ownership of the lender CFC stock is treated as interest income derived from related group indebtedness, including subpart F inclusions related to the interest income earned by the lender CFC. As a result, no interest expense is generally allocated to income related to the CFC-to-CFC debt, but the debt may nevertheless increase the amount of allocable related group indebtedness for which a reduction in assets is required under § 1.861–10(e)(7).

The Treasury Department and the IRS have determined that the failure to account for income related to the CFC-to-CFC debt can distort the general allocation and apportionment of other interest expense under § 1.861–9. Therefore, the proposed regulations revise § 1.861–10(e)(8)(v) to provide that CFC-to-CFC debt is not treated as related group indebtedness for purposes of the CFC netting rule. Proposed § 1.861–10(e)(8)(v) also provides that CFC-to-CFC debt is not treated as related group indebtedness for purposes of determining the foreign base period ratio, which is based on the average of related group debt-to-asset ratios in the five prior taxable years, even if the CFC-

to-CFC debt was otherwise properly treated as related group indebtedness in a prior year. This is necessary to prevent distortions that would otherwise arise in comparing the ratio in a year in which CFC-to-CFC debt was treated as related group indebtedness to the ratio in a year in which the CFC-to-CFC debt is not treated as related group indebtedness.

D. Direct Allocation of Interest Expense for Foreign Bank Branches

Under §§ 1.861–8 through 1.861–13, the combined interest expense of a domestic corporation and its foreign branches is allocated and apportioned to income categories on the basis of the tax book value of their combined assets. Comments received with respect to the 2018 and 2019 FTC proposed regulations asserted that special rules were needed for financial institutions for allocating and apportioning interest expense to foreign branch category income. The comments asserted that the general approach under §§ 1.861–8 through 1.861–13 fails to take into account the fact that foreign branches of financial institutions have assets and liabilities that reflect interest rates that differ from interest rates related to assets and liabilities of the home office held in the United States. As a result, the general approach results in over- or under-allocation of interest expense to the foreign branch category income.

In response to this comment, the proposed regulations provide that interest expense reflected on a foreign banking branch's books and records is directly allocated against the foreign branch category income of that foreign branch, to the extent it has foreign branch category income. The proposed regulations also provide for a corresponding reduction in the value of the assets of the foreign branch for purposes of allocating other interest expense of the foreign branch owner. See proposed § 1.861–10(g).

Comments are requested as to whether additional rules are needed to account for disregarded interest payments between foreign branches and between a foreign branch and a foreign branch owner. Comments are also requested as to whether adjustments to the amount of foreign branch liabilities subject to this rule are necessary to account for differing asset-to-liability ratios in a foreign branch and a foreign branch owner.

E. Treatment of Section 818(f) Expenses for Consolidated Groups

Section 818(f)(1) provides that a life insurance company's deduction for life insurance reserves and certain other deductions ("section 818(f) expenses")

are treated as items which cannot definitely be allocated to an item or class of gross income. Proposed § 1.861–14(h) in the 2019 FTC proposed regulations provided that section 818(f) expenses are allocated and apportioned on a separate company basis instead of on a life subgroup basis. In the 2020 FTC final regulations, this rule was withdrawn in response to comments. As discussed in Part I.C of the Summary of Comments and Explanation of Revisions to the 2020 FTC final regulations, the Treasury Department and the IRS have determined that there are merits and drawbacks to both the separate company and the life subgroup approaches.

These proposed regulations provide that section 818(f) expenses must be allocated and apportioned on a life subgroup basis, but that a one-time election is allowed for consolidated groups to choose instead to apply a separate company approach. A consolidated group's use of the separate entity method constitutes a binding choice to use the method chosen for that year for all members of the group and all taxable years thereafter.

F. Allocation and Apportionment of Foreign Income Taxes

1. Background

These proposed regulations repropose certain of the 2019 FTC proposed regulations in order to provide more detailed and comprehensive guidance regarding the assignment of foreign gross income, and the allocation and apportionment of the associated foreign income tax expense, to the statutory and residual groupings in certain cases. Comments to the 2019 FTC proposed regulations had requested more detailed guidance regarding the assignment to the statutory and residual groupings of foreign gross income arising from transactions that are dispositions of stock under Federal income tax law. In response to these comments, the Treasury Department and IRS have determined that it is appropriate to propose a comprehensive set of rules for dispositions of both stock and partnership interests, as well as rules that, similar to rules in the 2020 FTC final regulations for distributions with respect to stock, provide detailed rules for transactions that are distributions with respect to a partnership interest under Federal income tax law. The proposed regulations also address comments requesting that the rules for the assignment to the statutory and residual groupings of foreign gross income arising from disregarded payments distinguish between disregarded payments that would be

deductible if regarded under Federal income tax law and disregarded payments that would, if the payor (or recipient) were a corporation under Federal income tax law, be distributions with respect to stock or contributions to capital. See also Part IV.B of the Summary of Comments and Explanation of Revisions in the 2020 FTC final regulations.

2. Dispositions of Stock

Proposed § 1.861–20(d)(3)(i)(D) contains rules assigning to statutory and residual groupings the foreign gross income and associated foreign tax that arise from a transaction that is treated for Federal income tax purposes as a sale or other disposition of stock. These rules assign the foreign gross income first to the statutory and residual groupings to which any U.S. dividend amount, a term that applies in the disposition context when there is an amount of gain to which section 1248(a) or 964(e) applies, is assigned, to the extent thereof. Foreign gross income is next assigned to the grouping to which the U.S. capital gain amount is assigned, to the extent thereof.

Any excess of the foreign gross income recognized by reason of the transaction over the sum of the U.S. dividend amount and the U.S. capital gain amount is assigned to the statutory and residual groupings in the same proportions as the proportions in which the tax book value of the stock is (or would be if the taxpayer were a United States person) assigned to the groupings under the rules of § 1.861–9(g) in the U.S. taxable year in which the disposition occurs. This rule, which uses the asset apportionment percentages of the tax book value of the stock as a surrogate for earnings of the corporation that are not recognized for U.S. tax purposes, associates foreign tax on a U.S. return of capital amount (that is, foreign tax on foreign gain in excess of the amount of gain recognized for U.S. tax purposes) with the same groupings to which the tax would be assigned under § 1.861–20(d)(3)(i)(B)(2) of the 2020 FTC final regulations if the item of foreign gross income arose from a distribution made by the corporation, rather than a sale or other disposition of the stock.

As discussed in Part III.B of the Summary of Comments and Explanation of Revisions to the 2020 FTC final regulations, the Treasury Department and the IRS have determined that it is appropriate to treat foreign tax on a U.S. return of capital amount resulting from a distribution as a timing difference in the recognition of corporate earnings. The proposed regulations adopt the

same rule in the case of a foreign tax on a U.S. return of capital amount resulting from a disposition of stock. The Treasury Department and the IRS have determined that this result is appropriate because a foreign country generally recognizes more gain on a disposition of stock than is recognized for U.S. tax purposes when the shareholder's tax basis in the stock is greater for U.S. tax purposes than for foreign tax purposes, and this disparity typically occurs when the shareholder's U.S. tax basis in the stock has been increased under section 961 to reflect subpart F or GILTI inclusions of earnings attributable to the stock. Comments are requested on whether other situations more commonly result in this disparity, such that different rules might be appropriate for distributions and sales in order to better match foreign tax on income included in the foreign tax base with income included in the U.S. tax base.

3. Partnership Transactions

The proposed regulations contain new rules on the treatment of distributions from partnerships and sales of partnership interests, including partnerships that are treated as corporations for foreign law purposes. In general, these rules follow similar principles as the rules for distributions from corporations and sales of stock.

The rule in proposed § 1.861–20(d)(3)(ii)(B), like the rule for assigning foreign tax on a return of capital with respect to stock, uses the asset apportionment percentages of the tax book value of the partner's distributive share of the partnership's assets (or, in the case of a limited partner with less than a 10 percent interest, the tax book value of the partnership interest) as a surrogate for the partner's distributive share of earnings of the partnership that are not recognized in the year in which the distribution is made for U.S. tax purposes. Proposed § 1.861–20(d)(3)(ii)(C) similarly associates foreign tax on a U.S. return of capital amount in connection with the sale or other disposition of a partnership interest with a hypothetical distributive share. The Treasury Department and the IRS have determined that this rule is appropriate because foreign tax on a return of capital distribution from a partnership most commonly occurs in the case of hybrid partnerships (that is, entities that are treated as partnerships for U.S. tax purposes but as corporations for foreign tax purposes). In this case, earnings that have been recognized and capitalized into basis by the partner for U.S. tax purposes as a distributive share of income in prior years are not subject

to foreign tax until the earnings are distributed. Similarly, the higher U.S. tax basis in an interest in a hybrid partnership accounts for the most common cases where the amount of foreign gross income that results from a sale of a partnership interest exceeds the amount of taxable gain for U.S. tax purposes. Comments are requested on whether a different ordering rule or matching convention may better match foreign tax on income included in the foreign tax base with income included in the U.S. tax base. Comments are also requested on whether special rules are needed to associate foreign gross income and the associated foreign tax on distributions from partnerships and sales of partnership interests with items that are subject to special treatment for U.S. tax purposes (such as gain recharacterized as ordinary income under section 751).

4. Disregarded Payments

i. Background

The proposed regulations contain a new comprehensive set of rules addressing the allocation and apportionment of foreign income taxes relating to disregarded payments. In general, the 2019 FTC proposed regulations assigned foreign gross income included by reason of a disregarded payment by a branch owner to the residual grouping and assigned foreign gross income included by reason of a disregarded payment by a branch to its owner by reference to the asset apportionment percentages of the tax book value of the branch assets in the statutory and residual groupings. Comments noted that this rule, in the context of section 960, could lead to the assignment of foreign income taxes to the residual grouping rather than a grouping to which an inclusion under section 951 or 951A is attributable, resulting in the disallowance of foreign tax credits. Comments requested that, for purposes of assigning foreign gross income included by reason of a disregarded payment to a statutory or residual grouping, the rule should identify disregarded payments that should be treated as made out of current earnings, and distinguish those payments from other types of disregarded payments.

ii. Reattribution Payments

Proposed § 1.861–20(d)(3)(v) contains new rules that generally assign foreign gross income arising from the receipt of disregarded payments and the associated foreign tax to the recipient's statutory and residual groupings based on the current or accumulated income

of the payor (as computed for U.S. tax purposes) out of which the disregarded payment is considered to be made. For this purpose, the regulations refer to disregarded payments made to or by a taxable unit. In the case of a taxpayer that is an individual or a domestic corporation, a taxable unit means a foreign branch, a foreign branch owner, or a non-branch taxable unit, as defined in proposed § 1.904–4(f)(3). In the case of a taxpayer that is a foreign corporation, a taxable unit means a tested unit as such term is defined in proposed § 1.954–1(d)(2), as contained in proposed regulations (REG–127732–19) addressing the high-tax exception under section 954(b)(4), published in the **Federal Register** (85 FR 44650) on July 23, 2020 (the “2020 HTE proposed regulations”). See proposed § 1.861–20(d)(3)(v)(A) and (d)(3)(v)(E)(10).

Proposed § 1.861–20(d)(3)(v)(B)(1) addresses the assignment of foreign gross income that arises from the portion of a disregarded payment that results in a reattribution of U.S. gross income from the payor taxable unit to the recipient taxable unit. Under proposed § 1.861–20(d)(3)(v)(B)(1), the foreign gross income is assigned to the statutory and residual groupings to which the amount of U.S. gross income that is reattributed (a “reattribution amount”) is initially assigned upon receipt of the disregarded payment by a taxable unit, before taking into account reattribution payments made by the recipient taxable unit. For this purpose, under proposed § 1.861–20(d)(3)(v)(B)(2), in the case of a taxpayer that is an individual or a domestic corporation, the attribution rules in § 1.904–4(f)(2) apply to determine the section 904 separate categories of reattribution amounts received by foreign branches, foreign branch owners, and non-branch taxable units. In the case of a taxpayer that is a foreign corporation, the attribution rules in proposed § 1.954–1(d)(1)(iii) (as contained in the 2020 HTE proposed regulations)¹ apply to determine the reattribution amounts received by a tested unit in the tested income and subpart F income groupings of its tested units for purposes of the applying the high-tax exception of section 954(b)(4). Under proposed § 1.861–20(d)(3)(v)(B)(2), the rules in the 2020 HTE proposed regulations for attributing U.S. gross income to tested units also apply to attribute items of foreign gross income to tested units for purposes of allocating and apportioning the

associated foreign income taxes in computing the amount of an inclusion and deemed-paid taxes under sections 951, 951A, and 960.

For purposes of applying all other operative sections, the U.S. gross income that is attributable to a taxable unit is determined under the principles of the foreign branch category rules (for U.S. taxpayers) or the high-tax exception rules (for foreign corporations). The foreign branch category rules of § 1.904–4(f)(2) generally attribute U.S. gross income to taxable units on the basis of books and records, as modified to reflect Federal income tax principles, and reattribute U.S. gross income between the general category and the foreign branch category by reason of certain disregarded payments between a foreign branch and its owner, or another foreign branch, that would be deductible if regarded for Federal income tax purposes. The reattribution is made by reference to the statutory and residual groupings of the payor to which the disregarded payment would be allocated and apportioned if it were regarded for Federal income tax purposes.

Proposed § 1.954–1(d)(1)(iii), as contained in the 2020 HTE proposed regulations, generally adopts the principles of § 1.904–4(f)(2) for purposes of assigning U.S. gross income to tested units of a controlled foreign corporation for purposes of the high-tax exception. However, although § 1.904–4(f)(2)(vi) does not treat disregarded interest payments as a disregarded reallocation transaction, under proposed § 1.954–1(d)(1)(iii)(B) of the 2020 HTE proposed regulations, disregarded interest payments are treated as reattribution payments to the extent they are deductible for foreign law purposes in the country where the payor taxable unit is a tax resident. Proposed § 1.954–1(d)(1)(iii)(B)(4) provides that these disregarded interest payments are treated as made ratably out of the payor’s current year U.S. gross income to the extent thereof, and provides ordering rules when the same taxable unit both makes and receives disregarded interest payments. Comments are requested on additional ordering rules that should be included in the final regulations, including rules that apply when multiple taxable units both make and receive disregarded payments, such as rules for determining the starting point for assigning reattribution payments received by taxable units, and the order in which particular types of disregarded payments made by taxable units are allocated and apportioned to U.S. gross income (including income attributable

to reattribution payments received by the payor taxable unit) of the payor taxable unit. In addition, because proposed § 1.861–20(d)(3)(v) more clearly coordinates with the provisions in proposed § 1.954–1(d)(1), the proposed regulations propose to update proposed § 1.954–1(d)(1)(iv)(A) (as contained in the 2020 HTE proposed regulations) to clarify that the rules in § 1.861–20 (rather than the principles of § 1.904–6(b)(2)) apply in the case of disregarded payments. In order to achieve consistency with the new tested unit rules in proposed § 1.954–1(d) and taxable unit rules in § 1.861–20(d)(3)(v), the proposed regulations also contain a modification to the high-tax kickout rules in § 1.904–4(c)(4) to provide that the grouping rules at the CFC level are applied on a tested unit (instead of foreign QBU) basis.

Proposed § 1.861–20(d)(3)(v)(B)(3) provides that the statutory or residual grouping to which foreign gross income of a taxable unit (including foreign gross income that arises from the receipt of a disregarded payment) is assigned is determined without regard to reattribution payments made by the taxable unit, and that no item of foreign gross income is reassigned to another taxable unit by reason of a reattribution payment that reattributes U.S. gross income of the payor taxable unit to another taxable unit by reason of such reattribution payments. Under this rule, if foreign gross income is associated under § 1.861–20(d)(1) with a corresponding U.S. item initially attributed to a payor taxable unit, that foreign gross income is always assigned to the grouping that includes the U.S. gross income of that payor taxable unit. The effect of this rule and proposed § 1.861–20(d)(3)(v)(B)(1) is to allocate and apportion foreign tax imposed on foreign gross income that is associated either with a corresponding U.S. item that is initially attributed to a payor taxable unit or with a reattribution amount that is attributed to a recipient taxable unit (before taking into account reattribution payments made by the recipient taxable unit) to the grouping that includes the U.S. gross income of the taxable unit that paid the foreign tax; no portion of the foreign tax is associated with U.S. gross income that is reattributed to another taxable unit by reason of a reattribution payment.

In the case of foreign income tax imposed on the basis of foreign taxable income for a taxable period (that is, net basis taxes), this rule will generally produce appropriate results because foreign gross income of a taxable unit will generally be reduced by foreign law deductions for disregarded payments

¹ References to § 1.954–1(d) in these proposed regulations are to proposed § 1.954–1(d) as contained in the 2020 HTE proposed regulations.

made by that taxable unit, so that the amount of the payor's foreign taxable income will approximate the amount of U.S. taxable income attributed to the taxable unit after accounting for reattribution payments made and received by that taxable unit. Foreign gross basis taxes (such as withholding taxes) imposed on foreign gross income of a taxable unit, if not reassigned along with the associated U.S. gross income that is reattributed to another taxable unit as the result of a reattribution payment, however, may in some cases distort the effective foreign tax rate of the payor taxable unit. The Treasury Department and the IRS have determined that rules reattributing foreign gross basis taxes among taxable units by reason of reattribution payments would require complex ordering rules that would be unduly burdensome for taxpayers to apply and for the IRS to administer. Comments are requested on whether the final regulations should include different rules, including anti-abuse rules, to account for the assignment of foreign gross basis taxes paid by taxable units that make disregarded payments.

iii. Remittances and Contributions

Similar to the rules in the 2019 FTC proposed regulations, proposed § 1.861–20(d)(3)(v)(C)(1)(i) assigns foreign gross income that arises from a disregarded payment that is treated as a remittance for U.S. tax purposes by reference to the statutory and residual groupings to which the assets of the payor taxable unit are assigned (or would be assigned if the taxable unit were a United States person) under the rules of § 1.861–9 for purposes of apportioning interest expense. This rule uses the payor's asset apportionment percentages as a proxy for the accumulated earnings of the payor taxable unit from which the remittance is made. Proposed § 1.861–20(d)(3)(v)(C)(1)(ii) provides that for this purpose the assets of the taxable unit making the remittance are determined in accordance with the rules of § 1.987–6(b) that apply in determining the source and separate category of exchange gain or loss on a section 987 remittance, as modified in two respects.

First, for purposes of § 1.860–20(d)(3)(v)(C)(1)(i) the assets of the remitting taxable unit include stock owned by the taxable unit, even though for purposes of section 987 such stock may be treated as owned directly by the owner of the taxable unit. This rule helps to ensure that foreign tax on remittances are properly associated with earnings of corporations that may be distributed through the taxable unit.

Second, proposed § 1.861–20(d)(3)(v)(C)(1)(ii) modifies the determination of assets under § 1.987–6(b)(2) to provide that the assets of a taxable unit that give rise to U.S. gross income that is assigned to another taxable unit by reason of a reattribution payment are treated as assets of the recipient taxable unit. The Treasury Department and the IRS have determined that reassigning the tax book value of assets among taxable units in proportion to the U.S. gross income attributed to a taxable unit, after taking into account all reattribution payments made and received by the taxable unit, for purposes of determining the statutory and residual groupings to which foreign tax on a remittance is assigned is appropriate to properly match the foreign tax with the accumulated earnings out of which the remittance is made. In addition, because it uses asset values that are already required to be computed and maintained for other Federal income tax purposes, this reattribution rule is less complicated to apply than a rule that would treat disregarded assets and liabilities as if they were regarded for U.S. tax purposes in applying this rule.

However, the Treasury Department and the IRS acknowledge that any asset method for associating foreign gross income included by the remittance recipient with the payor's accumulated earnings may lead to inexact determinations of the groupings of the accumulated earnings out of which a remittance is paid, particularly when a taxable unit makes a remittance in conjunction with reattribution payments. The potential for distortions exist to the extent the tax book value of assets does not reflect their income-producing value, as in the case of self-developed intangibles the costs of which are currently expensed, as well as to the extent the characterization of the tax book value of an asset based on the income generated by the asset in the current taxable year does not reflect the characterization of the income generated by the asset over time. Comments are requested on whether a different method of determining the statutory and residual groupings to which a remittance is assigned, such as the maintenance of historical accounts of accumulated earnings of taxable units, including adjustments to reflect disregarded payments among taxable units, could produce more accurate results without unduly increasing administrative burdens.

Similar to the rule in the 2019 FTC proposed regulations, proposed § 1.861–20(d)(3)(v)(C)(2) provides that foreign gross income and the associated foreign

tax that arise from the receipt of a contribution are assigned to the residual category, except as provided under the rules for an operative section (such as under proposed § 1.904–6(b)(2)(ii), which assigns foreign tax on contributions to a foreign branch to the foreign branch category). Proposed § 1.861–20(d)(3)(v)(E)(2) defines a contribution as a disregarded transfer of property that would be treated as a transaction described in section 118 or 351 if the recipient taxable unit were treated as a corporation for Federal income tax purposes, or the excess amount of a disregarded payment made to a taxable unit that the payor unit owns over the amount that is treated as a reattribution payment.

Foreign tax paid by a foreign corporation that is allocated and apportioned to the residual category is not eligible to be deemed paid under section 960. See § 1.960–1(e). However, because proposed § 1.861–20(d)(3)(v) treats most disregarded payments as reattribution payments or remittances, and contributions (as characterized for corporate law purposes) are rarely subject to foreign tax, the Treasury Department and the IRS expect this rule will have limited application.

Proposed § 1.861–20(d)(3)(v)(C)(3) provides an ordering rule attributing the amount of foreign gross income that arises from the receipt of a disregarded payment that includes both a reattribution payment and a remittance or contribution first to the portion of the disregarded payment that is a reattribution payment. Any excess amount of the foreign gross income item is attributed to the portion of the disregarded payment that is a remittance or contribution.

In addition, proposed § 1.861–20(d)(2)(ii)(D) provides that if an item of foreign gross income arises from an event that for foreign law purposes is treated as a distribution, contribution, accrual, or payment between taxable units, but that is not treated as a disregarded payment for Federal income tax purposes (for example, a consent dividend from a disregarded entity), the foreign gross income and associated foreign tax are assigned in the same way as if a transfer of property in the amount of the foreign gross income item resulted in a disregarded payment in the year the foreign tax is paid or accrued.

Finally, in light of the heightened importance of the rules in § 1.904–4(f), which are being applied in connection with § 1.861–20 as well as the high-tax exception rules in § 1.951A–2(c)(7), the proposed regulations include some technical changes to the rules in § 1.904–4(f) that will facilitate this

interaction. See Part XI.A of this Explanation of Provisions.

iv. Disregarded Payments With Respect to Disregarded Sales of Property

Proposed § 1.861–20(d)(3)(v)(D) clarifies that an item of foreign gross income attributable to gain recognized under foreign law by reason of a disregarded payment received in exchange for property is characterized and assigned under § 1.861–20(d)(2)(ii)(A) of the 2020 FTC final regulations, that is, as a timing difference in the taxation of the property's built-in gain. Proposed § 1.861–20(d)(3)(v)(D) further provides that if a taxpayer recognizes U.S. gross income as a result of a disposition of property that was previously received in exchange for a disregarded payment, any item of foreign gross income that the taxpayer recognizes as a result of that same disposition is assigned to a statutory or residual grouping under the U.S. corresponding item rules in § 1.861–20(d)(1) of the 2020 FTC final regulations. Because in this situation the seller's basis in the property initially acquired in a disregarded sale is not adjusted for U.S. tax purposes, but is assumed to reflect the purchase price for foreign tax purposes, the assignment of the foreign gross income resulting from the regarded sale of the property is made without regard to any reattribution of the gain that is recognized for U.S. tax purposes under § 1.904–4(f)(2)(vi)(A) or (D), which apply to attribute U.S. gross income in the amount of the property's built-in gain at the time of the initial acquisition to the foreign branch or foreign branch owner that originally transferred the property in the disregarded sale. The same result obtains with respect to all taxable units under proposed § 1.861–20(d)(3)(v)(B)(3).

5. Group-Relief Regimes

The Treasury Department and the IRS are concerned about the use of certain foreign law group-relief regimes (that is, regimes that allow for the sharing of losses of one member of a group with another member) to create a mismatch in how foreign income taxes are characterized under § 1.861–20 for purposes of various operative sections, including sections 245A(d), 904, and 960. Comments are requested on the appropriate treatment of foreign income taxes paid or accrued in connection with the sharing of losses.

VI. Creditability of Foreign Taxes Under Sections 901 and 903

A. Definition of Foreign Income Tax

1. Background and Overview

Section 901 allows a credit for foreign income, war profits, and excess profits taxes, and section 903 provides that such taxes include a tax in lieu of a generally-imposed foreign income, war profits, or excess profits tax.² Section 1.901–2, which was originally promulgated in 1983 in TD 7918 (the “1983 final regulations”), sets forth conditions for determining when a foreign levy is a foreign income, war profits, and excess profits tax (collectively, an “income tax”) that is creditable under section 901. Under the existing regulations, a foreign levy is an income tax if and only if (1) it is a tax, and (2) the predominant character of that tax is that of an income tax in the U.S. sense. See § 1.901–2(a)(1). Under § 1.901–2(a)(3), the predominant character of a foreign tax is that of an income tax in the U.S. sense if it meets two requirements: (1) The foreign tax is likely to reach net gain in the normal circumstances in which it applies (the “net gain requirement”), and (2) it is not a “soak-up” tax. To satisfy the net gain requirement, a tax must meet the realization, gross receipts, and net income requirements in § 1.901–2(b)(2), (3), and (4), respectively. Under § 1.901–2(a)(1), a foreign tax either is or is not a foreign income tax, in its entirety, for all persons subject to the foreign tax. This all-or-nothing rule ensures consistent outcomes for taxpayers and minimizes the administrative burdens on the IRS that would result if the creditability of a foreign tax instead varied depending on each taxpayer's particular facts.

The Treasury Department and the IRS have determined that it is necessary and appropriate to require that a foreign tax conform to traditional international norms of taxing jurisdiction as reflected in the Internal Revenue Code in order to qualify as an income tax in the U.S. sense, or as a tax in lieu of an income tax. As discussed in more detail in Part VI.A.2 of this Explanation of Provisions, this requirement will ensure that the foreign tax credit operates in accordance with its purpose to mitigate double taxation of income that is attributable to a taxpayer's activities or investment in a foreign country.

In addition, the Treasury Department and the IRS have determined that it is

² Taxpayers may generally claim a deduction instead of a credit for these foreign taxes, as well as for certain other foreign taxes that do not qualify for the foreign tax credit. See section 164(a).

necessary and appropriate to revise the net gain requirement in order to better align the regulatory tests with norms reflected in the Internal Revenue Code that define an income tax in the U.S. sense, as well as to simplify and clarify the application of the rules. In particular, the existing regulations provide that the net gain requirement is met if a foreign tax reaches net gain in the “normal circumstances” in which it applies. However, this rule leads to inappropriate results and presupposes an empirical analysis requiring access to information that is difficult for taxpayers and the IRS to obtain. Therefore, the proposed regulations narrow the situations in which an empirical analysis is relevant in analyzing the nature of a foreign tax. See Part VI.A.3 of this Explanation of Provisions.

The proposed regulations make other changes to improve or clarify the rules, and to address issues that have arisen since the 1983 final regulations were issued. In particular, the proposed regulations introduce the term “net income tax” to describe foreign levies described in section 901 and the term “foreign income tax” to describe foreign levies described in section 901 or 903. See also Part X.F of this Explanation of Provisions (describing conforming changes made to §§ 1.960–1 and 1.960–2). Conforming changes to the terms and definitions cross-referenced in other regulations will be made when the proposed regulations are finalized.

The proposed regulations specifically address the treatment of surtaxes and the circumstances in which a source-based withholding tax on cross-border income can qualify as a foreign income tax. The proposed regulations also reorganize the existing regulations to address soak-up taxes as part of the determination of the amount of tax paid, rather than as part of the definition of a foreign income tax, and clarify the rules for determining when a foreign tax is a separate levy. The proposed regulations addressing the amount of tax paid also modify the treatment of refundable credits, clarify the interaction between the rules addressing refundable amounts and multiple levies, and clarify the application of the noncompulsory payment rules with respect to foreign tax law elections. Finally, the proposed regulations revise the definition of a tax in lieu of an income tax. These rules are described in more detail in Parts VI.A.3.v, VI.A.4, VI.A.5, VI.B, and VI.C of this Explanation of Provisions.

The proposed regulations do not include proposed amendments to the rules in § 1.901–2A addressing dual

capacity taxpayers. However, certain proposed changes to §§ 1.901–2 and 1.903–1 may impact § 1.901–2A. For example, when the proposed regulations are finalized, certain terms that are defined in § 1.901–2 and cross-referenced in § 1.901–2A will need to be updated. Comments are requested on whether additional changes to § 1.901–2A are appropriate in light of the proposed revisions to §§ 1.901–2 and 1.903–1.

2. Jurisdictional Nexus Requirement

As a dollar-for-dollar credit against U.S. income tax, the foreign tax credit is intended to mitigate double taxation of foreign source income. This fundamental purpose is served most appropriately if there is substantial conformity in the principles used to calculate the base of the foreign tax and the base of the U.S. income tax. This conformity extends not just to ascertaining whether the foreign tax base approximates U.S. taxable income determined on the basis of realized gross receipts reduced by allocable expenses, but also to whether there is a sufficient nexus between the income that is subject to tax and the foreign jurisdiction imposing the tax. Although prior regulations under section 901 did contain jurisdictional limitations on the definition of an income tax, see § 4.901–2(a)(1)(iii) (1980) (requiring that a foreign tax follow “reasonable rules regarding source of income, residence, or other bases for taxing jurisdiction”), the existing regulations do not contain such a rule.

In recent years, several foreign countries have adopted or are considering adopting a variety of novel extraterritorial taxes that diverge in significant respects from traditional norms of international taxing jurisdiction as reflected in the Internal Revenue Code. In addition, the Treasury Department and the IRS have received requests for guidance on whether the definition of foreign income tax includes a jurisdictional limitation, and recommending that the regulations adopt a rule requiring that income subject to foreign tax bear an appropriate connection to a foreign country for a foreign tax to be eligible for the foreign tax credit. In light of these developments, the Treasury Department and the IRS have determined that it is appropriate to revisit the regulatory definition of a foreign income tax to ensure that to be creditable, foreign taxes in fact have a predominant character of “an income tax in the U.S. sense.”

The Treasury Department and the IRS have determined that in order to qualify

as a creditable income tax, the foreign tax law must require a sufficient nexus between the foreign country and the taxpayer’s activities or investment of capital or other assets that give rise to the income being taxed. For example, a tax imposed by a foreign country on a taxpayer’s income that lacks a sufficient nexus to such country (such as the lack of operations, employees, factors of production, or management in that foreign country) is not an income tax in the U.S. sense and should not be eligible for a foreign tax credit if paid or accrued by U.S. taxpayers. Such a nexus is required in order for persons and income to be subject to U.S. income tax, and so a similar nexus reflecting the foreign country’s exercise of taxing jurisdiction consistent with Federal income tax principles should be required in order for foreign taxes to be eligible for a dollar-for-dollar credit against U.S. income tax.

The proposed regulations therefore require that for a foreign tax to qualify as an income tax, the tax must conform with established international norms, reflected in the Internal Revenue Code and related guidance, for allocating profit between associated enterprises, for allocating business profits of nonresidents to a taxable presence in the foreign country, and for taxing cross-border income based on source or the situs of property (together, the “jurisdictional nexus requirement”). Proposed § 1.901–2(c)(1)(i) generally provides that in the case of a foreign country imposing tax on nonresidents, the foreign tax law must determine the amount of income subject to tax based on the nonresident’s activities located in the foreign country (including its functions, assets, and risks located in the foreign country). Thus, for example, rules that are consistent with the rules under section 864(c) for taxing income effectively connected with a U.S. trade or business, or with Articles 5 and 7 of the U.S. Model Income Tax Convention for taxing profits attributable to a permanent establishment, will meet this requirement. However, foreign countries that, for example, impose tax by using as a significant factor the location of customers, users, or any other similar destination-based criterion to allocate profit (for example, by deeming a taxable presence based on the existence of customers) will not satisfy the jurisdictional nexus requirement.

If the foreign tax law imposes tax on a nonresident’s income based on the income arising from sources in the foreign country (for example, tax imposed on interest, rents, or royalties sourced in the foreign country and paid to a nonresident), proposed § 1.901–

2(c)(1)(ii) requires the sourcing rules of the foreign tax law to be reasonably similar to the sourcing rules that apply for Federal income tax purposes. For the avoidance of doubt, the proposed regulations provide that in the case of income from services, the income must be sourced based on the place of performance of the services, not the location of the services recipient.

The jurisdictional nexus requirement for taxing gains from sales or other dispositions of property is separately addressed in proposed § 1.901–2(c)(1)(iii), which provides that income from sales or other dispositions of property by nonresidents that do not meet the activities requirement in proposed § 1.901–2(c)(1)(i) satisfy the jurisdictional nexus requirement only with respect to gains on the disposition of real property in the foreign country or movable property forming part of the business property of a taxable presence in the foreign country (or from interests in certain entities holding such property). This rule is consistent with the fact that Federal income tax law generally does not tax gains of nonresidents that do not have a trade or business in the United States. See, for example, section 865(a)(2) and (e)(2); § 1.871–7(a)(1); see also U.S. Model Income Tax Convention (2016), Art. 13.

A similar rule applies under proposed § 1.901–2(c)(2) with respect to determining the income of a resident taxpayer in cases where income of a related entity may be allocated under transfer pricing rules to the resident taxpayer. For the jurisdictional nexus requirement to be satisfied in such a case, the foreign tax law’s transfer pricing rules must be determined under arm’s length principles. Thus, for example, foreign tax laws that contain transfer pricing rules that are consistent with the arm’s length standard under the section 482 regulations, or with the arm’s length principle under the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations, will satisfy this requirement. However, foreign transfer pricing rules that allocate profits by taking into account as a significant factor the location of customers, users, or any other similar destination-based criterion will not satisfy the jurisdictional nexus requirement. Comments are requested on whether special rules are needed to address foreign transfer pricing rules that allocate profits to a resident on a formulary basis (rather than on the basis of arm’s length prices), such as through the use of fixed margins in a manner that is not consistent with arm’s length principles. The jurisdictional nexus

requirement is not violated when a foreign country imposes tax on the worldwide income of a resident taxpayer, including under controlled foreign corporation regimes that deem income to be included (or distributed) to a resident shareholder (as opposed to allocated directly to the resident under a transfer pricing adjustment). For this purpose, the terms resident and nonresident are defined in proposed § 1.901–2(g)(6) and in the case of an entity, the classification is generally based on the entity's place of incorporation or management.

As part of its response to the extraterritorial tax measures referred to in this Part VI.A.2 of the Explanation of Provisions, the Treasury Department has been actively engaged in negotiations with other countries, as part of the OECD/G20 Inclusive Framework on BEPS, to explore the possibility of a new international framework for allocating taxing rights.³ If an agreement is reached that includes the United States, the Treasury Department recognizes that changes to the foreign tax credit system may be required at that time.

No inference is intended as to the application of existing §§ 1.901–2 and 1.903–1 to the treatment of novel extraterritorial foreign taxes such as digital services taxes, diverted profits taxes, or equalization levies. In addition, the proposed regulations, when finalized, would not affect the application of existing income tax treaties to which the United States is a party with respect to covered taxes (including any specifically identified taxes) that are creditable under the treaty. Comments are requested on the extent to which the new jurisdictional nexus requirement may impact the treatment of other types of foreign taxes, and on alternative approaches the Treasury Department and the IRS may consider to modify the rules to achieve the policy objectives described in this Part VI.A.2 of the Explanation of Provisions.

3. Net Gain Requirement

i. Use of Empirical Analysis

The existing regulations provide that the net gain requirement is met if a foreign tax reaches net gain in the “normal circumstances” in which it applies. See § 1.901–2(a)(1). As noted in the preamble to the 1983 final regulations, this rule is based on the

standard set forth in *Inland Steel Company v. United States*, 677 F.2d 72 (Ct. Cl. 1982), *Bank of America Nat'l Trust and Savings Ass'n v. United States*, 459 F.2d 513 (Ct. Cl. 1972) (“*Bank of America I*”), and *Bank of America Nat'l Trust and Savings Ass'n v. Comm'r*, 61 T.C. 752 (1974), *aff'd*, 538 F.2d 334 (9th Cir.1976) (“*Bank of America II*”). See TD 7918, 48 FR 46272–01 (1983).

The Treasury Department and the IRS have determined that, in some respects, the empirical analysis contemplated by the existing regulations is unnecessary to identify the essential elements of an income tax in the U.S. sense. In addition, in the absence of specific rules and thresholds in the regulations on how to evaluate empirical data (if even available), both taxpayers and the IRS have had difficulties in applying the existing regulations to foreign taxes in a consistent and predictable manner. In some cases, the reliance on empirical data to determine whether the requirements of the existing regulations are met creates uncertainty and undue burdens for taxpayers and the IRS, considering challenges in obtaining the necessary information. Therefore, the proposed regulations limit the relevance of the “normal circumstances” in which the tax applies, as well as the role of the predominant character analysis, in determining whether a tax meets the various components of the net gain requirement. These changes will lead to more accurate and consistent outcomes and reduce the compliance and administrative burdens of the existing law requirement that taxpayers and the IRS obtain from the foreign government empirical information, such as tax return information for persons subject to the tax, to determine the normal circumstances in which the tax applies.

Instead, proposed § 1.901–2(b)(1) generally provides that whether a tax is a foreign income tax is determined under the terms of the foreign tax law, taking into account statutes, regulations, case law, and administrative rulings or other official pronouncements, as modified by treaties. Accordingly, whether a tax satisfies the net gain requirement is generally based on whether the terms of the foreign tax law governing the computation of the tax base meet the realization, gross receipts, and cost recovery requirements that make up the net gain requirement under § 1.901–2(a)(3). This approach will better allow taxpayers and the IRS to evaluate the nature of the foreign tax based on objective and readily available information (that is, based on the terms of the foreign tax law, rather than how it is applied in practice), to achieve

more consistent and predictable outcomes. Evaluation of the normal circumstances in which the tax applies is still a factor in determining whether specific elements of the net gain requirement are satisfied, but the proposed regulations specifically identify the elements of the requirement for which this type of empirical evidence is relevant.

ii. Realization Requirement

Under the existing regulations, a foreign tax generally satisfies the realization requirement if, judged on the basis of its predominant character, it is imposed upon or after the occurrence of events (“realization events”) that would result in the realization of income under the Code, or in certain cases, it is imposed on the occurrence of a pre-realization event, such as in the case of a foreign law mark-to-market regime. See § 1.901–2(b)(2)(i).

As discussed in Part VI.A.3.i of this Explanation of Provisions, due to the burdens resulting from the requirement to perform an empirical analysis to ascertain the nature of a tax, the proposed regulations provide more specific rules regarding the elements of the requirement for which this type of empirical evidence is relevant. In particular, the Treasury Department and the IRS have determined that the inclusion in the foreign tax base of insignificant amounts of gross receipts that do not meet the realization requirement should not prevent an otherwise-qualifying foreign tax from qualifying as an income tax. Accordingly, proposed § 1.901–2(b)(2) provides that if a foreign tax generally meets the various realization requirements described in proposed § 1.901–2(b)(2)(i)(A) through (C), except with respect to one or more specific and defined classes of nonrealization events, the tax may still be treated as meeting the realization requirement if the incidence and amounts of gross receipts attributable to the nonrealization events are minimal relative to the incidence and amounts of gross receipts attributable to events covered by the foreign tax that do meet the realization requirement. This determination is made based on the application of the foreign tax to all taxpayers subject to the foreign tax (rather than on a taxpayer-by-taxpayer basis). Therefore, for example, if a foreign tax contains all of the same realization requirements as the Code, but also imposes tax on imputed rent with respect to owner-occupied housing, the foreign tax may still qualify as a foreign income tax if, relative to all of the income of all taxpayers that are subject to the tax, imputed rental

³ See Statement by the OECD/G20 Inclusive Framework on BEPS on the Two-Pillar Approach to Address the Tax Challenges Arising from the Digitalisation of the Economy (January 2020), available at <https://www.oecd.org/tax/beps/statement-by-the-oecd-g20-inclusive-framework-on-beps-january-2020.pdf>.

income comprises a relatively small amount (even if for some taxpayers, all of their income may constitute imputed rent). Comments are requested on whether the regulations could substitute a more objective standard for identifying acceptable deviations from the realization requirement that would avoid the need for empirical analysis.

Proposed § 1.901–2(b)(2)(i)(C) consolidates the rules relating to pre-realization timing differences, including the rule currently in § 1.901–2(b)(2)(ii) that foreign taxes imposed on a shareholder on deemed distributions or inclusions (such as inclusions similar to those imposed by U.S. law under subpart F) of income realized by the distributing entity satisfy the realization requirement, so long as a second tax is not imposed on the shareholder on the same income upon the occurrence of a later event (such as an actual distribution). Under proposed § 1.901–2(b)(2)(i)(C), because a shareholder-level tax on a distribution from a corporation is imposed on a different taxpayer, the shareholder-level tax is not treated as a second tax on the corporation's income (including income arising from a pre-realization event). For this purpose, proposed § 1.901–2(b)(2)(i)(C) provides that a disregarded entity is treated as a taxpayer separate from its owner. Comments are requested on whether there are additional categories of pre-realization timing differences that should be included in the final regulations.

Finally, the Treasury Department and the IRS expect to update the examples illustrating the realization requirement that are contained in § 1.901–2(b)(2)(iv) and include them in the regulations when proposed § 1.901–2(b)(2) is finalized.

iii. Gross Receipts Requirement

Under existing § 1.901–2(b)(3), a foreign tax satisfies the gross receipts requirement if, judged on the basis of its predominant character, it is imposed on the basis of (1) gross receipts; or (2) gross receipts computed under a method that is likely to produce an amount that is not greater than the fair market value of actual arm's length gross receipts ("the alternative gross receipts test"). See § 1.901–2(b)(3)(ii) *Examples 1 and 2*.

The proposed regulations modify the alternative gross receipts test to provide that it is satisfied in the case of tax imposed on deemed gross receipts arising from pre-realization timing difference events described in proposed § 1.901–2(b)(2)(i)(C) (that is, a mark-to-market regime, tax on the physical transfer, processing, or export of readily

marketable property, or a deemed distribution or inclusion), or on the basis of gross receipts from a non-realization event that is insignificant and therefore does not cause the foreign tax to fail the realization requirement in proposed § 1.901–2(b)(2). Therefore, taxes on insignificant non-realization events or pre-realization timing difference events that satisfy the realization requirement in proposed § 1.901–2(b)(2)(i)(C) also satisfy the gross receipts test.

However, the proposed regulations remove the provision referring to gross receipts computed under a method that is "likely" to produce an amount not greater than gross receipts. This rule purports to allow for foreign taxes to be imposed on an amount greater than the amount of income actually realized, or the value of the property being taxed, and the Treasury Department and the IRS have determined that such a tax should not be considered to be a tax on income, since it can be imposed on amounts in excess of actual gross receipts. In addition, the Treasury Department and the IRS have determined that the test is vague, unduly burdensome, and has given rise to controversies requiring taxpayers and the IRS to conduct an empirical evaluation to determine whether a nonconforming statutory method of determining alternative gross receipts is likely not to exceed the fair market value of actual gross receipts. See, for example, *Phillips Petroleum v. Comm'r*, 104 T.C. 256 (1995) (applying the former § 1.901–2T (1980) TD 7739). The Treasury Department and the IRS have determined that, other than in the case of insignificant non-realization events, only a tax base determined with reference to realized gross receipts or, in the case of a pre-realization timing difference event, the value or amount of a deemed inclusion or accrual (and not an approximation of gross receipts), should qualify as an income tax in the U.S. sense. In contrast, a tax based on alternative measurements of gross receipts, such as a foreign tax that requires gross receipts to be calculated by applying a markup to costs, fundamentally diverges from the measurement of realized gross receipts under the Internal Revenue Code, and could result in a taxable base that exceeds the amount of income properly attributable to the taxpayer's activities or investment in the foreign country. The revised rule will also minimize the need for empirical analyses, making it simpler for both taxpayers and the IRS to determine whether a tax satisfies the net gain requirement.

This rule is not intended to implicate the allocation of gross income under transfer pricing or branch profit attribution rules, which are instead addressed under proposed § 1.901–2(c). Proposed § 1.901–2(b)(3)(i) provides that in determining a taxpayer's actual gross receipts, amounts that are properly allocated to such taxpayer under the jurisdictional nexus rules in proposed § 1.901–2(c), such as pursuant to transfer pricing rules that properly allocate income to a taxpayer on the basis of costs incurred by that entity, are treated as the taxpayer's actual gross receipts.

iv. Cost Recovery Requirement

Under the net income requirement in the existing regulations, foreign tax law must permit the recovery of the significant costs and expenses attributable, under reasonable principles, to gross receipts included in the taxable base. A foreign tax law permits the recovery of significant costs and expenses even if such costs and expenses are recovered at a different time than they would be under the Code, unless the time of recovery is such that under the circumstances there is effectively a denial of recovery. Under the "nonconfiscatory gross basis tax" rule in § 1.901–2(b)(4) of the existing regulations, which reflects the standard described in *Bank of America I*, a foreign tax whose base is gross receipts or gross income does not satisfy the net income requirement except in the "rare situation" when the tax is almost certain to reach some net gain in the normal circumstances in which it applies because costs and expenses will almost never be so high as to offset gross receipts or gross income, respectively, and the rate of the tax is such that after the tax is paid persons subject to the tax are almost certain to have net gain. Thus, a tax on the gross receipts or gross income of businesses can satisfy the net income requirement in the existing regulations if businesses subject to the tax are almost certain never to incur a loss (after payment of the tax).

The Treasury Department and the IRS have determined that to constitute an income tax for U.S. tax purposes, that is, a tax on net gain, the base of a foreign tax should conform in essential respects to the determination of taxable income for Federal income tax purposes. See, for example, *Keasbey & Mattison Co. v. Rothensies*, 133 F.2d 894, 895 (3d Cir. 1943) (holding that the criteria prescribed by U.S. revenue laws are determinative of the meaning of the term "income taxes" in applying the former version of section 901); and *Comm'r v. American Metal Co.*, 221

F.2d 134, 137 (2d Cir. 1955) (providing that “the determinative question is ‘whether the foreign tax is the substantial equivalent of an ‘income tax’ as that term is understood in the United States’”). The Treasury Department and the IRS have determined that any foreign tax imposed on a gross basis is by definition not an income tax in the U.S. sense, regardless of the rate at which it is imposed or the extent of the associated costs.

In addition, the Treasury Department and the IRS have determined that the empirical standards contained in *Bank of America I* and that are contemplated by the nonconfiscatory gross basis tax rule in the existing regulations create substantial compliance and administrative burdens for taxpayers and the IRS when evaluating whether a foreign tax is an income tax in the U.S. sense. For example, the IRS and taxpayers must obtain foreign tax return information with respect to all persons subject to the tax to determine if persons subject to the tax are almost certain never to incur an after-tax loss. See, for example, *PPL Corp. v. Comm’r*, 135 T.C. 304 (2010), *rev’d*, 665 F.3d 60 (3d Cir. 2011), *rev’d*, 569 U.S. 329 (2013); *Texasgulf, Inc. v. Comm’r*, 107 T.C. 51 (1996), *aff’d*, 172 F.3d 209 (2d Cir. 1999); and *Exxon Corp. v. Comm’r*, 113 T.C. 338 (1999) (applying the empirical analysis required by the regulations).

Therefore, the proposed regulations remove the nonconfiscatory gross basis tax rule. Instead, the proposed regulations provide that whether a tax meets the net gain requirement is made solely on the basis of the terms of the foreign tax law that define the foreign taxable base, without any consideration of the rate of tax imposed on that base. See proposed § 1.901–2(b)(1). In addition, the cost recovery requirement in proposed § 1.901–2(b)(4) requires the deductions allowed under the foreign tax law to approximate the cost recovery provisions of the Internal Revenue Code in order for the foreign tax to qualify as an income tax in the U.S. sense. Under proposed § 1.901–2(b)(4)(i)(A), a tax that is imposed on gross receipts or gross income, without reduction for any costs or expenses attributable to earning that income, cannot qualify as a net income tax, without regard to whether the empirical impact of the tax is confiscatory, and even if in practice there are no or few costs and expenses attributable to all or particular types of gross receipts included in the foreign tax base. Under this rule, the cost recovery requirement is not satisfied for taxes such as payroll taxes on gross income from wages, but may be satisfied in the case of a personal income tax

similar to that imposed under section 1 of the Code on all gross income (including wages), if the foreign country allows taxpayers to reduce such gross income by the substantial costs and expenses that are reasonably attributable to such gross income (taking into account any reasonable deduction disallowance provisions).

Under the “alternative allowance rule” in § 1.901–2(b)(4) of the existing regulations, a foreign tax that does not permit recovery of one or more significant costs or expenses, but that provides allowances that effectively compensate for nonrecovery of such significant costs or expenses, is considered to permit recovery of such costs or expenses. The Treasury Department and IRS have determined, however, that the alternative allowance rule fundamentally diverges from the approach to cost recovery in the Internal Revenue Code, and so is inconsistent with an essential element of an income tax in the U.S. sense. Moreover, it is unduly burdensome, and may be impossible as a practical matter, for taxpayers and the IRS to determine whether an alternative allowance under foreign tax law effectively compensates for the nonrecovery of significant costs or expenses attributable to realized gross receipts under that foreign law. The alternative allowance rule in the existing regulations has given rise to controversies between taxpayers and the IRS, and different interpretations by the courts, over whether the rule requires taxpayers to demonstrate that the alternative allowance exceeds disallowed expense deductions for a majority of persons potentially subject to the tax, a majority of persons that actually pay the tax, or for taxpayers in the aggregate, determined by comparing the aggregate amounts of disallowed deductions and alternative allowances reported on the foreign tax returns of all persons subject to the tax. See, for example, *Texasgulf, Inc. v. Comm’r*, 107 T.C. 51 (1996), *aff’d*, 172 F.3d 209 (2d Cir. 1999); and *Exxon Corp. v. Comm’r*, 113 T.C. 338 (1999). Therefore, the proposed regulations at § 1.901–2(b)(4)(i)(A) modify the alternative allowance rule to treat alternative allowances as meeting the cost recovery requirement only if the foreign tax law expressly guarantees that the alternative allowance will equal or exceed actual costs (for example, under a provision identical to percentage depletion allowed under section 613).

The proposed regulations at § 1.901–2(b)(4)(i)(B)(1) retain the existing rule that foreign tax law is considered to permit the recovery of significant costs and expenses even if the costs and

expenses are recovered at a different time than they would be if the Internal Revenue Code applied, unless the time of recovery is so much later (for example, after the property becomes worthless or is disposed of) as effectively to constitute a denial of such recovery. The regulations clarify that the different time can be either earlier or later than it would be if the Code applied, and that time value of money considerations relating to the economic cost (or value) of accelerating (or deferring) a foreign tax liability are not relevant in determining the amount of recovered costs and expenses.

The proposed regulations also add a new rule to allow a tax to satisfy the cost recovery requirement even if recovery of all or a portion of certain costs or expenses is disallowed, if such disallowance is consistent with the types of disallowances required under the Internal Revenue Code. See proposed § 1.901–2(b)(4)(i)(B)(2). For example, foreign tax law is considered to permit the recovery of significant costs and expenses even if such law disallows interest deductions equal to a certain percentage of adjusted taxable income similar to the limitation under section 163(j) or disallows interest and royalty deductions in connection with hybrid transactions similar to those subject to section 267A. This new provision is consistent with the rule that principles of U.S. law apply to determine whether a tax is a creditable income tax. See § 1.901–2(a)(1)(ii); see also, for example, *Keasbey*, 133 F.2d at 897; and *American Metal*, 221 F.2d at 137.

Finally, proposed § 1.901–2(b)(4)(i)(B)(2) provides that an empirical analysis of a foreign tax is still pertinent, in part, in determining whether a cost or expense is significant for purposes of the cost recovery requirement. In particular, the significance of a cost or expense is determined based on whether, for all taxpayers to which the foreign tax applies, the item of cost or expense constitutes a significant portion of the total costs or expenses. However, proposed § 1.901–2(b)(4)(i)(B)(2) adds certainty by providing that costs or expenses related to capital expenditures, interest, rents, royalties, services, and research and experimentation are always treated as significant costs or expenses. The Treasury Department and the IRS have determined that these types of costs represent a substantial portion of expenses typically deducted in computing taxable income for U.S. tax purposes. Requiring a foreign tax law to allow recovery of these costs will

increase assurances that the income subject to U.S. and foreign tax is actually subject to double taxation. Because interest expense in particular is a significant cost that under section 864(e)(2) is allocable to all of a taxpayer's worldwide income-producing activities regardless of where it is incurred, a foreign levy that allows, for example, no deduction for interest expense is not an income tax in the U.S. sense, even if U.S. taxpayers record minimal interest expense in foreign countries that restrict its deductibility.

v. Qualifying Surtax

The Treasury Department and the IRS have received questions on the appropriate treatment of certain foreign taxes that are computed as a percentage of the tax due under a separate levy that is itself an income tax. To address the treatment of these taxes, proposed § 1.901-2(b)(5) adds a rule providing that a foreign tax satisfies the net gain requirement if the base of the foreign tax is the amount of a foreign income tax.

4. Soak-Up Taxes

The proposed regulations move the soak-up tax rule from the rules that define a creditable levy to the rules for determining the amount of creditable tax that is considered paid. See proposed § 1.901-2(e)(6). Because the rules at existing §§ 1.901-2(a)(3)(ii) and 1.903-1(b)(2) treat an otherwise creditable levy as a soak-up tax only to the extent it would not be imposed but for the availability of a credit, this change is more consistent with the general structure of the regulations that determine whether a separate levy as a whole qualifies as a creditable tax, and then identifies the amount of a particular taxpayer's foreign tax liability that is paid or accrued and can be claimed as a foreign tax credit.

In addition, the proposed regulations omit the special rule in § 1.903-1(b)(2) that limits the portion of a tax in lieu of an income tax that is a soak-up tax to the amount by which the foreign tax exceeds the income tax that would have been paid if the taxpayer had instead been subject to the generally-imposed income tax. The Treasury Department and the IRS have determined that this rule is inconsistent with the rationale for making soak-up taxes not creditable, which is to ensure that the foreign country does not impose a soak-up tax liability that under the existing regulations could be allowed as a foreign tax credit to reduce the taxpayer's U.S. tax liability.

Finally, the Treasury Department and the IRS are reconsidering the examples illustrating the soak-up tax rules that are

contained in §§ 1.901-2(c)(2) and 1.903-1(b)(3) (*Examples 6 and 7*) and expect to include updated examples in the regulations when proposed § 1.901-2(e)(6) is finalized. Comments are requested on whether additional issues are presented by currently applicable soak-up taxes that should be addressed in the final regulations.

5. Separate Levy Determination

Whether a foreign levy is an income tax is determined independently for each separate foreign levy. For purposes of sections 901 and 903, whether a single levy or separate levies are imposed by a foreign country depends on U.S. principles and not on whether foreign law imposes the levy or levies in a single or separate statutes. Section § 1.901-2(d)(1) of the existing regulations provides that, where the base of a levy is different in kind, and not merely in degree, for different classes of persons subject to the levy, the levy is considered for purposes of sections 901 and 903 to impose separate levies for such classes of persons.

The proposed regulations revise § 1.901-2(d)(1) to clarify the determination of whether a foreign levy is separate from another foreign levy for purposes of determining if a levy meets the requirements of section 901 or 903. The Treasury Department and the IRS have determined that the standards under the existing regulations for making this determination are unclear. In one place the existing regulations state that the only differentiating factor is if the base of the levy is different in kind, as opposed to degree. See, for example, § 1.901-2(d)(1) (“foreign levies identical to the taxes imposed by sections 11, 541, 881, 882, 1491, and 3111 of the Internal Revenue Code are each separate levies, because the base of each of those levies differs in kind, and not merely in degree”). However, in the same sentence, the regulations suggest that one levy may be separate from another levy if a different class of taxpayers is subject to each levy, regardless of whether the base of the two levies is different in kind. See, for example, *id.* (“a foreign levy identical to the tax imposed by section 871(b) of the Internal Revenue Code is a separate levy from a foreign levy identical to the tax imposed by section 1 of the Internal Revenue Code *as it applies to persons other than those described in section 871(b)*” (emphasis added)).

The proposed regulations modify the rules for determining whether a foreign levy is a separate levy to clarify how U.S. principles are relevant in determining whether one foreign levy is separate from another foreign levy. In

general, the proposed regulations identify separate levies as those that include different items of income and expense in determining the base of the tax, but in certain circumstances separate levies may result even if the taxable base of each levy is the same. In particular, proposed § 1.901-2(d)(1)(i) provides that a foreign levy is always separate from another foreign levy if the levy is imposed by a different foreign tax authority, even if the base of the tax is the same. Proposed § 1.901-2(d)(1)(ii) provides the general rule that separate levies are imposed on particular classes of taxpayers if the taxable base is different for those taxpayers. For example, the proposed regulations provide that a foreign levy identical to the tax imposed by section 3101 (employee tax on wage income) is a separate levy from the foreign levy identical to the tax imposed by section 3111 (employer tax on wages paid). Proposed § 1.901-2(d)(1)(ii) also provides that income included in the taxable base of a separate levy may also be included in the taxable base of another levy (which may or may not also include other items of income); and separate levies are considered to be imposed if the taxable bases are not combined as a single taxable base. Therefore, a foreign levy identical to the tax imposed by section 1411 is a separate levy from a foreign levy identical to the tax imposed by section 1 because tax is separately imposed on the income included in each taxable base.

Additionally, the proposed regulations at § 1.901-2(d)(1)(iii) provide that a foreign levy imposed on nonresidents is treated as a separate levy from that imposed on residents of the taxing jurisdiction, even if the base is the same for both levies, and even if the levies are treated as a single levy under foreign tax law. These changes are intended to ensure that, in general, if a generally-imposed income tax on residents is also imposed on an extraterritorial basis on some nonresidents, in violation of the jurisdictional nexus requirement, only the portion of the levy that applies to nonresidents will not be treated as a foreign income tax. Otherwise, a foreign country's general income tax regime could fail to qualify as a net income tax if the tax was also imposed on an extraterritorial basis on some nonresidents.

Finally, proposed § 1.901-2(d)(1)(iii) provides that a withholding tax on gross income of nonresidents is treated as a separate levy with respect to each class of gross income (as listed in section 61) to which it applies. This special rule is

provided in order to allow withholding taxes that are imposed on several classes of income, based on sourcing rules that meet the jurisdictional nexus requirement with respect to only some of the classes of income, to be analyzed as separate levies under the covered withholding tax rule in § 1.903-1(c)(2). See Part VI.C.3 of this Explanation of Provisions.

B. Amount of Tax That is Considered Paid

1. Background

As discussed in more detail in Part X of this Explanation of Provisions, section 901 allows a credit for foreign income taxes in either the year the taxes are paid or the year the taxes accrue, according to the taxpayer's method of accounting for such taxes. See section 905(a). Regardless of the year in which the credit is allowed, the taxpayer must both owe and actually remit the foreign income tax to be entitled to a foreign tax credit for such tax. See section 905(b); *Chrysler v. Comm'r*, 116 T.C. 465, 469 n.2 (2001), *aff'd*, 436 F.3d. 644 (6th Cir. 2006). The taxpayer's liability for the tax may become fixed and determinable in a different taxable year than that in which the tax is remitted, so that the taxpayer's entitlement to the credit may be perfected in a taxable year after the taxable year in which the credit is allowed.

Section 1.901-2(e) of the existing regulations provides rules for determining the amount of foreign tax that is considered paid and eligible for credit under section 901. The existing regulations at § 1.901-2(g)(1) and proposed § 1.901-2(g)(5) clarify that the word "paid" as used in § 1.901-2(e) means "paid" or "accrued," depending on whether the taxpayer claims the foreign tax credit for taxes paid (that is, remitted) or accrued (that is, for which the liability becomes fixed) during the taxable year. The proposed regulations clarify in several respects the amount of tax that is considered paid (or accrued, as the case may be) and eligible for credit. These clarifications are explained in Parts VI.B.2 and 3 of this Explanation of Provisions.

2. Refundable Amounts, Credits, and Multiple Levies

Under § 1.901-2(e)(2)(i) of the existing regulations, a payment to a foreign country is not treated as an amount of tax paid to the extent that it is reasonably certain that the amount will be refunded, credited, rebated, abated, or forgiven. That regulation further provides that it is not reasonably certain that an amount will be refunded,

credited, rebated, abated, or forgiven if the amount is not greater than a reasonable approximation of the final tax liability to the foreign country.

Current law is unclear whether an amount that is not treated as an amount of tax paid under § 1.901-2(e)(5)(i) because it is reasonably certain to be credited against a taxpayer's tentative liability for a second foreign tax should be treated as a constructive refund of the credited amount from the foreign country, followed by a constructive payment by the taxpayer of the second foreign tax. The law is similarly unclear as to whether credits allowed under foreign tax law that are computed with reference to amounts other than foreign tax payments (such as, for example, investment tax credits) may be treated as a constructive receipt of cash by the taxpayer from the foreign country, followed by a constructive payment by the taxpayer of foreign income tax. The results have sometimes differed depending on whether the credit is refundable under foreign law, that is, whether taxpayers are entitled to receive a cash payment from the foreign country to the extent the credit exceeds the taxpayer's foreign income tax liability. See, for example, Rev. Rul. 86-134, 1986-2 C.B. 104 (investment incentives reduced tentative Dutch income tax liability during period in which such incentives could only be claimed as an offset against the income tax liability, rather than as a refundable credit).

The Treasury Department and the IRS have determined that the current uncertainty as to how to properly account for tax credits leads to varying and inconsistent interpretations and that a single, clear rule regarding the treatment of tax credits would improve the consistency in outcomes for taxpayers. In addition, the Treasury Department and the IRS are concerned that if the use of tax credits can be treated as a means of payment of a foreign income tax for foreign tax credit purposes, then foreign countries, rather than reducing their tax rates, could instead offer tax credits that would have the same economic effect without reducing the amount of foreign income tax that is treated as paid by taxpayers for purposes of the foreign tax credit. The Treasury Department and the IRS have also determined it is too administratively challenging to determine whether a foreign country whose law provides for nominally refundable credits in practice actually issues cash payments to taxpayers that do not have income tax liabilities equal to the credit. In addition, the Treasury Department and the IRS have determined that the rule in § 1.901-

2(e)(2)(i) with respect to amounts that will be "credited" is ambiguous. Section 1.901-2(e)(4)(i) of the existing regulations provides that if, under foreign law, a taxpayer's tentative liability for one levy (the "first levy") is or can be reduced by the amount of the taxpayer's liability for a different levy (the "second levy"), then the amount considered paid by the taxpayer to the foreign country pursuant to the second levy is an amount equal to its entire liability for that levy, and the remainder of the amount paid is considered paid pursuant to the first levy. However, § 1.901-2(e)(2)(i) suggests that the credited amount of the second levy is not considered paid.

Therefore, proposed § 1.901-2(e)(2)(i) provides certainty on the treatment of credited amounts by eliminating the provision that suggests that an amount of tax is not treated as paid if it is allowed as a credit. Instead, proposed § 1.901-2(e)(2)(ii) provides that foreign income tax is not considered paid if it is reduced by a tax credit, regardless of whether the amount of the tax credit is refundable in cash. Therefore, an amount allowed as a credit (including, but not limited to, an amount paid under one levy that is credited against an amount due under another levy) is not treated as a constructive payment of cash from the foreign country (or a constructive refund of the levy that is paid) followed by a constructive payment of the levy that is reduced by the credit, even if the creditable amount is refundable in cash to the extent it exceeds the taxpayer's liability for the levy that is reduced by the credit. However, proposed § 1.901-2(e)(2)(iii) provides that overpayments of tax (which exceed the taxpayer's liability and so are not treated as an amount of tax paid) that are refundable in cash at the taxpayer's option and that are applied in satisfaction of the taxpayer's liability for foreign income tax may qualify as an amount of such foreign income tax paid.

Comments are requested on whether additional rules should be provided for government grants that are provided outside of the foreign tax system, and the circumstances in which such grants should also be treated as a reduction in the amount of tax paid.

Finally, as noted in this Part VI.B.2, the multiple levy rule in § 1.901-2(e)(4) of the existing regulations provides that when an amount of a second levy is applied as a credit to reduce the taxpayer's liability for a first levy, the full amount of the second levy (and not the amount of the first levy that is offset by the credit) is considered paid. The proposed regulations clarify the

multiple levy rule by referring to the first levy as the “reduced levy” and to the second levy as the “applied levy.” The proposed regulations also modify an existing example and add a new example to illustrate the application of proposed § 1.901–2(e)(2) and (4). See proposed § 1.901–2(e)(4)(ii).

3. Noncompulsory Payments

i. Background

Section 1.901–2(e)(5) provides that an amount paid is not a compulsory payment, and thus is not an amount of tax paid, to the extent that the amount paid exceeds the amount of the taxpayer’s liability under foreign law for tax (the “noncompulsory payment rule”). Section 1.901–2(e)(5) further provides that if foreign tax law includes options or elections whereby a taxpayer’s liability may be shifted, in whole or part, to a different year, the taxpayer’s use or failure to use such options or elections does not result in a noncompulsory payment, and that a settlement by a taxpayer of two or more issues will be evaluated on an overall basis, not on an issue-by-issue basis, in determining whether an amount is a compulsory amount. In addition, it provides that a taxpayer is not required to alter its form of doing business, its business conduct, or the form of any transaction in order to reduce its liability for tax under foreign law.

On March 30, 2007, proposed regulations (REG–156779–06) were published in the **Federal Register** at 72 FR 15081 that, in part, would amend § 1.901–2(e)(5) to treat as a single taxpayer all foreign entities in which the same United States person has a direct or indirect interest of 80 percent or more (a “U.S.-owned foreign group”). The proposed rule (the “2007 proposed regulations”) would apply for purposes of determining whether amounts paid are compulsory payments of foreign tax, for example, when one member of a U.S.-owned foreign group surrenders a loss to another member of the group that reduces the foreign tax due from the second member in that year but increases the amount of foreign tax owed by the loss member in a subsequent year. In Notice 2007–95, 2007–2 C.B. 1091, the Treasury Department and the IRS announced that, in reviewing comments received, it was determined that the proposed change may lead to inappropriate results in certain cases and that the proposed change would be effective for taxable years beginning after the publication of final regulations, but that taxpayers may rely on that portion of the proposed regulations for taxable

years ending on or after March 29, 2007, and beginning on or before the date on which final regulations are published.

Section 1.909–2 provides an exclusive list of foreign tax credit splitter arrangements, including a loss-sharing splitter arrangement, which exists under a foreign group relief or other loss-sharing regime to the extent a “usable shared loss” of a “U.S. combined income group” (that is, an individual or corporation and all the entities with which it combines income and expense under Federal income tax law) is used to offset foreign taxable income of another U.S. combined income group. See § 1.909–1(b)(2).

ii. Treatment of Elections and Other Clarifications

Section 1.901–2(e)(5) currently applies on a taxpayer-by-taxpayer basis, obligating each taxpayer to minimize its liability for foreign taxes over time. The 2007 proposed regulations were intended to create a limited exception to the taxpayer-by-taxpayer approach, recognizing that the net effect of a loss surrender in the case of a group relief regime may be to minimize the amount of foreign taxes paid in the aggregate by the group over time. However, the 2007 proposed regulations were both overinclusive and underinclusive. Comments criticized the approach taken, including how the U.S.-owned foreign group was defined, and noted that the proposal had created uncertainty over the extent to which noncompulsory payment issues arise in situations not addressed by the proposed regulations. In addition, as noted in Notice 2007–95, the Treasury Department and the IRS have determined that the 2007 proposed regulations would lead to inappropriate results in certain cases. Furthermore, a comment received in connection with 2012 temporary regulations issued under section 909 (TD 9597, 77 FR 8127) recommended that the 2007 proposed regulations be withdrawn in light of the coverage of loss-sharing splitter arrangements under the section 909 regulations.

The Treasury Department and the IRS agree that the 2007 proposed regulations should be withdrawn. However, withdrawing the 2007 proposed regulations (which taxpayers were permitted to rely on under Notice 2007–95) without providing additional guidance could result in a disallowance of all foreign tax credits related to loss-sharing arrangements because under § 1.901–2(e)(5) the requirement to minimize foreign income tax liability applies on a taxpayer-by-taxpayer basis. To address this issue, proposed § 1.901–

2(e)(5)(ii)(B)(2) provides that when foreign law permits one foreign entity to join a consolidated group, or to surrender its loss to offset the income of another foreign entity pursuant to a foreign group relief or other loss-sharing regime, a taxpayer’s decision to file as a consolidated group, to surrender or not to surrender a loss, or to use or not to use a surrendered loss, will not give rise to a noncompulsory payment.

Although the proposed regulations will generally exempt loss surrender under group relief or other loss-sharing regimes from the noncompulsory payment regulations, the Treasury Department and the IRS remain concerned that in certain cases loss sharing arrangements, particularly when combined with hybrid arrangements, may be used to separate foreign taxes from the related income. For example, if passive category income of a CFC is offset for U.S. tax purposes by a loss recognized by a disregarded entity owned by that CFC, but that loss is surrendered to reduce general category tested income of an affiliated CFC for foreign tax purposes, under § 1.909–3(a) the split taxes of the loss CFC may be eligible to be deemed paid if the affiliated CFC’s related income is included in the U.S. shareholder’s income in the same taxable year, but such taxes may not be properly associated with the related income. Therefore, the Treasury Department and the IRS are considering whether additional guidance on loss sharing arrangements, including for example under § 1.861–20, is needed. Comments are requested on this and other aspects of the treatment of loss sharing arrangements.

The existing regulations at § 1.901–2(e)(5) provide that where foreign tax law includes options or elections whereby a taxpayer’s foreign income tax liability may be shifted to a different year, the taxpayer’s use or failure to use such options or elections does not result in a noncompulsory payment. However, the regulations are not clear as to whether the use or failure to use options or elections that result in an overall change in foreign income tax liability over time would result in a noncompulsory payment. For example, a taxpayer’s choice to capitalize and amortize capital expenditures over time, rather than to claim a current expense deduction, does not result in a noncompulsory payment; in contrast, a taxpayer’s election to compute its tax liability under one of two alternative regimes, one of which qualifies as an income tax and one of which qualifies as a tax in lieu of an income tax, may result in a noncompulsory payment if

the taxpayer does not choose the option that is reasonably calculated to minimize its liability for creditable foreign tax over time. Accordingly, proposed § 1.901–2(e)(5)(ii) provides that the use or failure to use such an option or election is relevant to whether a taxpayer has minimized its liability for foreign income taxes. However, an exception is provided for elections to surrender losses under a foreign consolidation, group relief or other loss-surrender regime, as well as for an option or election to treat an entity as fiscally transparent or non-fiscally transparent for foreign tax purposes. Because these elections and options generally have the effect of shifting to another entity, rather than reducing in the aggregate, a taxpayer group's foreign income tax liability, the Treasury Department and the IRS have determined that foreign tax credit concerns related to the use or failure to use such an election or option are more appropriately addressed under other rules. The Treasury Department and IRS request comments on whether there are other foreign options or elections that should be excepted from the general rule.

The Treasury Department and IRS are aware that some taxpayers have taken the position that because § 1.901–2(e)(5) refers to payments of “foreign taxes,” rather than “foreign income taxes,” the noncompulsory payment regulations only require taxpayers to minimize their total liability for all foreign taxes in the aggregate (including non-income taxes such as excise taxes), as opposed to minimizing foreign income tax. The Treasury Department and IRS disagree with this interpretation, since § 1.901–2(e) defines the amount of “taxes paid” for purposes of section 901, which only applies to creditable foreign income taxes. Accordingly, proposed § 1.901–2(e)(5)(i) clarifies that taxpayers are obligated to minimize their foreign income tax liabilities. For example, if a taxpayer may choose to apply a tax credit to reduce either the amount of a creditable income tax or the amount of a non-creditable excise tax, then the proposed regulations require that the taxpayer choose to minimize its liability for the creditable income tax; if instead the taxpayer chooses to apply the credit against the excise tax, income tax in the amount of the applied credit is considered a noncompulsory payment.

Finally, proposed § 1.901–2(e)(5)(i) clarifies that the time value of money is not relevant in determining whether a taxpayer has met its obligation to minimize the amount of its foreign income tax liabilities over time. This rule is consistent with the rule in

§ 1.901–2(b)(4), providing that the amount of costs that are treated as recovered in computing the base of a foreign tax is the same, regardless of whether a taxpayer chooses to deduct currently, or to capitalize and amortize, a particular expense. Therefore, for example, if a taxpayer subject to foreign income tax at a rate of 20 percent chooses to capitalize a \$100x cost and deduct it ratably over five years rather than to deduct the entire \$100x cost in the first year, the full \$100x cost is considered recovered under either option, and is not affected by the fact that as an economic matter the present value of the \$20x reduction in tax liability by reason of the \$100x deduction in the first year exceeds the discounted present value of the same \$20x reduction in tax spread over five years. Similarly, under proposed § 1.901–2(e)(5)(i), the taxpayer will be treated as paying the same amount of foreign income tax regardless of whether it chooses to pay that amount in the current tax year or in a later year.

Although the Treasury Department and the IRS understand that time value of money considerations have economic effects, for Federal income tax purposes income and expenses (including taxes) generally are neither discounted nor indexed by reference to time value of money considerations. A regime that required taxpayers to minimize the discounted present value, rather than the nominal amount, of foreign income tax liabilities would be complex, requiring assumptions about future tax rates and appropriate discount rates. Similarly, a regime that required taxpayers to compare the discounted present value of a foreign tax credit for a foreign income tax to the discounted present value of a deduction for an alternative payment of non-creditable tax that would be incurred in a different year and select the option that minimized the cost to the U.S. fisc would be comparably complex and burdensome for taxpayers to apply and for the IRS to administer. Accordingly, the proposed regulations provide that economic considerations related to the discounted present value of U.S. and foreign tax benefits are not taken into account for purposes of determining the amount of cost recovery or the amount of foreign income tax that is, or would be under foreign tax law options available to the taxpayer, paid or accrued over time.

C. Tax in Lieu of Income Tax

1. In General

Section 903 provides that, for purposes of the foreign tax credit, the

term “income, war profits, and excess profits taxes” includes a tax paid in lieu of an income tax otherwise generally imposed by any foreign country or by any possession of the United States (an “in lieu of tax”). The existing regulations clarify that the foreign country's purpose in imposing the foreign tax (for example, whether it imposes the foreign tax because of administrative difficulty in determining the base of the income tax otherwise generally imposed) is immaterial. See § 1.903–1(a). The existing regulations further provide that it is immaterial whether the base of the foreign tax bears any relation to realized net income and that the base may, for example, be gross income, gross receipts or sales, or the number of units produced or sold. See § 1.903–1(b)(1). The existing regulations also require that the foreign tax meet a substitution requirement, which is satisfied if the tax in fact operates as a tax imposed in substitution for, and not in addition to, an income tax or a series of income taxes otherwise generally imposed. See id.

The proposed regulations revise the substitution requirement by more specifically defining the circumstances in which a foreign tax is considered “in lieu of” a generally-imposed income tax, consistent with the interpretation of the substitution requirement in prior judicial decisions. See, for example, *Metro. Life Ins. Co. v. United States*, 375 F.2d 835, 838–40 (Ct. Cl. 1967). In addition, the proposed regulations provide that an in lieu of tax under section 903, by virtue of the substitution requirement, must also satisfy the jurisdictional nexus requirement described in proposed § 1.901–2(c). Although prior regulations under section 903 did contain a jurisdictional limitation with respect to in lieu of taxes, see § 4.903–1(a)(4) (1980) (requiring that an in lieu of tax follow “reasonable rules of taxing jurisdiction within the meaning of § 4.901–2(a)(1)(iii)”), the existing regulations do not contain such a rule. The reasons for adopting a jurisdictional nexus requirement under § 1.901–2, as described in Part VI.A.2 of this Explanation of Provisions, apply equally to in lieu of taxes described in section 903. In addition, this rule is necessary to ensure that a foreign tax that is imposed on net gain but that fails the jurisdictional nexus requirement in § 1.901–2 cannot be converted into a creditable tax under section 903 simply by being imposed on a taxable base other than income (such as a tax on gross receipts).

Furthermore, the proposed regulations include a special rule for

certain cross-border source-based withholding taxes in order to clarify the application of the substitution requirement to such taxes. The rules in proposed § 1.903–1 apply independently to each separate levy. Therefore, if a separate levy is an in lieu of tax, and a second levy is later enacted by the same foreign country, such second levy may also qualify as an in lieu of tax if the requirements in proposed § 1.903–1 are met.

2. Substitution Requirement

The foreign tax that is being analyzed under section 903 (the “tested foreign tax”) satisfies the substitution requirement only if, based on the foreign tax law, four tests are met. First, as under the existing regulations, a separate levy that is a foreign income tax described in § 1.901–2(a)(3) (a “foreign net income tax”) must be generally imposed by the same foreign country (a “generally-imposed net income tax”). See proposed § 1.903–1(c)(1)(i).

Second, proposed § 1.903–1(c)(1)(ii) requires that neither the generally-imposed net income tax nor any other separate levy that is a foreign net income tax imposed by the same foreign country that imposes the tested foreign tax is imposed with respect to any portion of the income to which the amounts (such as sales or units of production) that form the base of the tested foreign tax relate (the “excluded income”). For example, if a tonnage tax regime applies with respect to a taxpayer engaged in shipping, income from shipping must be excluded from the foreign country’s regular net income tax for the tonnage tax to qualify as an in lieu of tax. This requirement is not met if, under the foreign tax law, a net income tax imposed by the same foreign country applies to the excluded income of any persons that are subject to the tested foreign tax, even if not all of the persons subject to the tested foreign tax are subject to the net income tax.

Third, proposed § 1.903–1(c)(1)(iii) requires that, but for the existence of the tested foreign tax, the generally-imposed net income tax would be imposed on the excluded income. For example, if a tonnage tax regime applies with respect to a taxpayer engaged in shipping, it must be shown that, but for the existence of such regime, the regular income tax would apply to income from shipping. This “but for” requirement is met only if the imposition of the tested foreign tax bears a “close connection” to the failure to impose the generally-imposed net income tax on the excluded income. See *Metro. Life Ins. Co.*, 375 F.2d at 840.

The proposed regulations provide that the close connection requirement is satisfied if the generally-imposed net income tax would apply by its terms to the excluded income but for the fact that it is expressly excluded. For example, if a corporate income tax regime would, by its terms, apply to all corporations, but income of insurance companies is expressly excluded by law under such regime and taxed under a separate regime, then the close connection requirement is met.

Otherwise, a close connection must be established with proof that the foreign country made a “cognizant and deliberate choice” to impose the tested foreign tax instead of the generally-imposed net income tax. *Id.* Such proof may take into account the legislative history of either the tested foreign tax or the generally-imposed net income tax for purposes of ascertaining the intent and purpose of the two taxes in order to determine the relationship between them.

Not all income derived by persons subject to the tested foreign tax need be excluded income, as long as the tested foreign tax applies only to amounts that relate to the excluded income. For example, if a taxpayer that earns income from operating restaurants and hotels is subject to a generally-imposed net income tax except that, pursuant to an agreement with the foreign country, the taxpayer’s income from restaurants is subject to a tax based on number of tables and not to the income tax, the table tax can meet the substitution requirement notwithstanding that the hotel income is subject to the generally-imposed net income tax.

Fourth, proposed § 1.903–1(c)(1)(iv) requires that, if the generally-imposed net income tax were applied to the excluded income, the generally-imposed net income tax would either continue to qualify as a foreign net income tax, or would itself constitute a separate levy that is a foreign net income tax. This rule is intended to ensure that a foreign tax can qualify as an in lieu of tax only if the foreign country imposing the tax could instead have subjected the excluded income to a tax on net gain that would satisfy the jurisdictional nexus requirement in § 1.901–2(c).

Finally, proposed § 1.861–20(h) provides a rule for allocating and apportioning foreign taxes described in section 903 (other than withholding taxes) to statutory and residual groupings. In general, the rule provides that the in lieu of tax is allocated and apportioned in the same proportions as the excluded income.

3. Covered Withholding Tax

Gross-basis taxes, such as withholding taxes, do not satisfy the net gain requirement under proposed § 1.901–2(b). While such withholding taxes may be treated as in lieu of taxes under section 903, the analysis under section 903 and existing § 1.903–1 is unclear. Therefore, proposed § 1.903–1(c)(2) provides a special rule for applying the substitution requirement to certain “covered withholding taxes” imposed by a foreign country that also has a generally-imposed net income tax.

First, the tax must be a withholding tax (as defined in section 901(k)(1)(B)) that is imposed on gross income of persons who are nonresidents of the foreign country imposing the tax. See proposed § 1.903–1(c)(2)(i).

Second, the tax cannot be in addition to a net income tax that is imposed by the foreign country on any portion of the income subject to the withholding tax. See proposed § 1.903–1(c)(2)(ii). Thus, for example, if a withholding tax applies by its terms to certain gross income of nonresidents that is also subject to the generally-imposed net income tax if it is attributable to a taxable presence of the nonresident in the foreign country imposing the tax, the withholding tax cannot meet the substitution requirement, including as to nonresidents that do not have a taxable presence in that country.

Third, the withholding tax must meet the source-based jurisdictional nexus requirement in proposed § 1.901–2(c)(1)(ii), requiring that rules for sourcing income to the foreign country are reasonably similar to the sourcing rules that apply for Federal income tax purposes (including that services income is sourced to the place of performance). Similar to the rule in proposed § 1.903–1(c)(1)(iv) requiring that the generally-imposed net income tax, if expanded to cover the excluded income, would continue to qualify as a net income tax under § 1.901–2, proposed § 1.903–1(c)(2)(iii) requires that the income subject to the withholding tax satisfies the source requirement described in § 1.901–2(c)(1)(ii).

VII. Rules for Allocating Taxes After Certain Ownership and Entity Classification Changes

A. Background

On February 14, 2012, the **Federal Register** published final regulations (77 FR 8124, TD 9576) under section 901 concerning the determination of the person who pays a tax for foreign tax credit purposes (the “2012 final regulations”). The 2012 final regulations

address the inappropriate separation of foreign income taxes from the income on which the tax was imposed in certain circumstances. The 2012 final regulations provide rules for allocating foreign tax imposed on the combined income of multiple persons, as well as rules for allocating entity-level foreign tax imposed on partnerships and disregarded entities that undergo ownership or certain entity classification changes that do not cause the foreign taxable year of the partnership or disregarded entity (the “continuing foreign taxable year”) to close.

Section 1.901–2(f)(4)(i) of the 2012 final regulations addresses partnership terminations under section 708(b)(1) that do not cause the foreign taxable year to close. Under this provision, foreign tax paid or accrued with respect to the continuing foreign taxable year (for example, in the case of a section 708(b)(1) termination, foreign tax paid or accrued by a successor corporation or owner of a disregarded entity) is allocated between each terminating partnership and successor entity (or, in the case of a partnership that becomes a disregarded entity, the owner of the disregarded entity). The allocation is based upon the respective portions of the foreign tax base that are attributable under the principles of § 1.1502–76(b) to the period of existence of the terminating partnership and successor entity or the period of ownership by a disregarded entity owner during the continuing foreign taxable year. Section 1.901–2(f)(4)(i) also provides similar rules for allocating foreign tax paid or accrued by a partnership among the respective portions of the partnership’s U.S. taxable year that end with, and begin after, a change in a partner’s interest in the partnership that does not result in a partnership termination (a variance).

Section 1.901–2(f)(4)(ii) of the 2012 final regulations addresses a change in the ownership of a disregarded entity that does not cause the foreign taxable year of the entity to close. Under this rule, foreign tax paid or accrued with respect to the foreign taxable year is allocated between the transferor and transferee of the disregarded entity. The allocation is made based on the respective portions of the foreign tax base that are attributable under the principles of § 1.1502–76(b) to the period of ownership of each transferor and transferee.

B. Covered Events

The proposed regulations move the § 1.901–2(f)(4) allocation rules that apply in the case of partnership

terminations and variances and other ownership and entity classification changes to new § 1.901–2(f)(5), and modify those rules to ensure that they cover any entity classification change under U.S. tax law that does not cause the entity’s foreign taxable year to close. The proposed regulations also clarify certain aspects of the 2012 final regulations. The general legal liability rules for taxes imposed on partnerships and disregarded entities are now contained in proposed § 1.901–2(f)(4) and are generally unchanged from the 2012 final regulations.

Proposed § 1.901–2(f)(5)(i) provides a single allocation rule that applies to a partnership, disregarded entity, or corporation that undergoes one or more “covered events” during its foreign taxable year that do not result in a closing of the foreign taxable year. Under proposed § 1.901–2(f)(5)(ii), a covered event is a partnership termination under section 708(b)(1), a transfer of a disregarded entity, or a change in the entity classification of a disregarded entity or a corporation. These proposed regulations therefore apply to allocate foreign tax paid or accrued with respect to the continuing foreign taxable year of a partnership that terminates under section 708(b)(1), a disregarded entity that becomes a partnership or a corporation, and a corporation that becomes a partnership or a disregarded entity. In addition, proposed § 1.901–2(f)(5)(iv) allocates foreign tax paid or accrued with respect to certain changes in a partner’s interest in a partnership (a “variance”) by treating the variance as a covered event.

These proposed regulations also ensure that the allocation rules apply not just in the case of one or more covered events of the same type within a continuing foreign taxable year, but also in the case of any combination of covered events. For example, proposed § 1.901–2(f)(5) applies to foreign tax that is paid or accrued with respect to a continuing foreign taxable year in which a corporation elects to be treated as a disregarded entity and the disregarded entity subsequently becomes a partnership. A portion of foreign tax is allocated among all persons that were predecessor entities (namely, a terminating partnership or corporation undergoing an entity classification change) or prior owners (namely, the owner of a disregarded entity that is transferred or undergoes an entity classification change) during the continuing foreign taxable year. Like the rules provided in the 2012 final regulations, the allocation is made based on the respective portions of the foreign tax base for the continuing foreign

taxable year that are attributable under the principles of § 1.1502–76(b) to the period of existence or ownership of each predecessor entity or prior owner during such year.

C. Timing of the Payment or Accrual of an Allocated Tax

These proposed regulations also provide consistent rules for when allocated tax is treated as paid or accrued. Proposed § 1.901–2(f)(5)(i) provides that tax allocated to a predecessor entity is treated as paid or accrued as of the close of the last day of its last U.S. taxable year, and that tax allocated to the prior owner of a disregarded entity is treated as paid or accrued as of the close of the last day of its U.S. taxable year in which the change in ownership occurs.

D. Treatment of Withholding Taxes

The 2012 final regulations do not clearly state whether foreign withholding taxes are subject to the allocation rules. As explained in Part VI.A of this Explanation of Provisions, foreign taxes are allocated based on the portion of the foreign tax base that is attributed to the period of existence or ownership of each predecessor or prior owner during the foreign taxable year, applying the principles of § 1.1502–76(b). The principles of § 1.1502–76(b) allow taxpayers to use either a closing of the books method or a ratable allocation method in attributing the foreign tax base to these periods.

If the ratable allocation method is used, foreign tax is generally allocated to a predecessor entity or prior owner based on its ratable share of the foreign tax base for the continuing foreign taxable year. In the case of net basis foreign tax paid or accrued by a new owner or successor entity with respect to a continuing foreign taxable year, the resulting allocation of a portion of the tax to a predecessor entity or prior owner is appropriate because the predecessor entity or prior owner generally took into account for U.S. tax purposes a portion of the related income on which the net basis tax was imposed. However, in the case of withholding tax that is imposed on an amount that accrues for U.S. tax purposes when it is paid, such as a dividend, an allocation of a portion of the withholding tax based on ratably allocating the dividend income over the foreign taxable year to a predecessor entity or prior owner is not appropriate because the predecessor entity or prior owner will not have taken any of the related dividend income into account for U.S. tax purposes. Even if withholding tax is imposed on income, such as interest,

that accrues for U.S. tax purposes ratably over a period, an allocation of a portion of the withholding tax to a predecessor entity or prior owner based on ratably allocating the interest income over the foreign taxable year may not be appropriate if the foreign taxable year is not the same period as the accrual period under the terms of the instrument that generated the interest.

Because applying the ratable allocation method under proposed § 1.901–2(f)(5) to allocate withholding taxes to a predecessor entity or prior owner may separate withholding taxes from income that accrues when paid, and may not achieve appropriate matching of withholding taxes and related income in the case of withholding tax imposed on income that accrues over a period, these proposed regulations provide that withholding taxes paid in the foreign taxable year of a covered event are not subject to allocation under proposed § 1.901–2(f)(5).

E. Elections Under Sections 336(e) and 338

Sections 1.336–2(g)(3)(ii) and 1.338–9(d) provide rules for allocating foreign tax between old target and new target where a section 336(e) election or 338 election, respectively, is in effect with respect to the sale, exchange, or distribution of the target and the transaction does not cause old target's foreign taxable year to close. The proposed regulations clarify that, in the case of a section 338 election, the allocation is made with respect to the portions of the foreign tax base that are attributable under § 1.1502–76(b) principles to old target and new target, and clarify how the allocation is made if there are multiple transfers of the stock of target that are each subject to a separate section 338 election during the foreign taxable year. The proposed regulations also provide that if a section 338 election is made for target and target holds an interest in a disregarded entity or partnership, the rules of § 1.901–2(f)(4) and (5) apply to determine the person who is considered for Federal income tax purposes to pay foreign income tax imposed at the entity level on the income of the disregarded entity or partnership. In addition, the proposed regulations clarify that withholding tax is not subject to allocation. Finally, the proposed regulations make a conforming change to the allocation rules that apply where a section 336(e) election is in effect by providing that withholding taxes are not subject to allocation.

VIII. Transition Rules Accounting for NOL Carrybacks

A. Background

The 2019 FTC final regulations provide transition rules for assigning any separate limitation loss (“SLL”) or overall foreign loss (“OFL”) accounts in a pre-2018 separate category to a post-2017 separate category. The regulations also provide transition rules for how an SLL or OFL that reduced pre-2018 general category income is recaptured in post-2017 years, and for how to treat foreign losses that are part of general category net operating losses (“NOLs”) incurred in pre-2018 taxable years that are carried forward to post-2017 taxable years. See § 1.904(f)–12(j).

The transition rules included in the 2019 FTC final regulations did not address post-2017 NOL carrybacks to pre-2018 taxable years because section 172 generally did not allow for NOL carrybacks when the 2019 FTC final regulations were issued. However, on March 27, 2020, Congress enacted the Coronavirus Aid, Relief, and Economic Security Act, Pub. L. 116–136, 134 Stat. 281 (2020) (the “CARES Act”), which revised section 172(b) to allow taxpayers to carry back, for five years, NOLs incurred in 2018 through 2020.

B. Rule for Post-2017 NOL Carrybacks

The proposed regulations provide rules analogous to the existing transition rules in § 1.904(f)–12(j) to situations involving an NOL arising in a post-2017 taxable year that is carried back to a pre-2018 taxable year. In particular, proposed § 1.904(f)–12(j)(5)(i) confirms that the rules of § 1.904(g)–3(b) apply to the NOL carryback, and provides that income in a pre-2018 separate category in the taxable year to which the NOL is carried back is generally treated as if it included only income that would be assigned to the same separate category in post-2017 taxable years. Therefore, any SLL created by reason of a passive category component of a post-2017 NOL that is carried back to offset pre-2018 general category income will be recaptured in post-2017 taxable years as general category income, and not as a combination of post-2017 general, foreign branch, or section 951A category income.

However, in order to reduce the potential for creating SLLs by reason of the carryback of a post-2017 NOL component in the foreign branch category or section 951A category to a pre-2018 taxable year, the proposed regulations provide that such losses will first ratably offset a taxpayer's general category income in the carryback year, to the extent thereof, and that no SLL

account will be created as a result of that offset. The amount of income in the general category available to be offset under this rule is determined after first offsetting the general category income in the carryback year by a post-2017 NOL component in the general category that is carried back to the same year.

IX. Foreign Tax Credit Limitation Under Section 904

A. Revisions to Definition of Foreign Branch Category Income

The proposed regulations revise certain aspects of the foreign branch category income rules in § 1.904–4(f) to account for a broader range of disregarded payments, as well as to better coordinate with the rules in § 1.861–20 and the elective high-tax exception rules in proposed § 1.954–1(d) of the 2020 HTE proposed regulations (85 FR 44650).

Section 904(d)(2)(J)(i) defines foreign branch category income as business profits of a United States person that are attributable to qualified business units in foreign countries. Section 1.904–4(f)(2)(ii) and (iii) of the 2019 FTC final regulations provide that income attributable to a foreign branch does not include income arising from activities carried out in the United States or income arising from stock that is not dealer property. Section 1.904–4(f)(1)(ii) of the 2019 FTC final regulations, reflecting section 904(d)(2)(J)(ii), provides that passive category income is excluded from foreign branch category income. These rules exclude from foreign branch category income for purposes of section 904 income generated by assets that may be owned through the foreign branch and reflected on its books and records, but that is not properly characterized as business profits attributable to foreign branch activities.

In contrast, in the different context of applying the disregarded payment rules in proposed § 1.861–20(d)(3)(v) or proposed § 1.954–1(d), which rely on the rules in § 1.904–4(f), such income is properly attributed to a taxable unit or a tested unit, respectively, for purposes of those provisions. In order to facilitate the incorporation by cross-reference of the rules and principles in § 1.904–4(f) for attributing income to taxable units for purposes of other provisions, the proposed regulations move the exclusions for income arising from U.S. activities and stock to § 1.904–4(f)(1)(iii) and (iv), respectively, and modify the language to provide that such income may be attributable to a foreign branch but is always excluded from foreign branch category income. See also Part

V.F.4 of this Explanation of Provisions (discussing the rules in proposed § 1.861–20(d)(3)(v)(B)(2) for attributing income to taxable units). This technical change does not reflect any reconsideration by the Treasury Department and the IRS of the determination in the 2019 FTC final regulations that income arising from U.S. activities and stock do not constitute business profits that are attributable to foreign branches within the meaning of section 904(d)(2)(f).

Proposed § 1.904–4(f)(2)(vi)(G) provides that the disregarded reallocation payment rules generally apply in the case of disregarded payments made to and from a “non-branch taxable unit” (as defined in proposed §§ 1.904–4(f)(3) and 1.904–6(b)(2)(i)(B)), which includes certain persons and interests that do not meet the definition of a foreign branch or foreign branch owner. This change accounts for the fact that disregarded payments may occur among, for example, foreign branches, foreign branch owners, and disregarded entities that have no trade or business (and are therefore not foreign branches). In order to attribute gross income to a foreign branch or a foreign branch owner, disregarded payments to and from non-branch taxable units must cause the reattribution of current gross income to the same extent as disregarded payments to and from foreign branches and foreign branch owners. The gross income attributed to a non-branch taxable unit after taking into account all the disregarded payments that it makes and receives must then be further attributed to a foreign branch (if it is part of a “foreign branch group”), or foreign branch owner (if it is part of a “foreign branch owner group”), to the extent of its ownership of the non-branch taxable unit. For this purpose, a non-branch taxable unit is part of either a foreign branch group or a foreign branch owner group to the extent it is owned, including indirectly through other non-branch taxable units, by a foreign branch or a foreign branch owner, respectively. The gross income that is attributed to the members of a foreign branch group is attributed to the foreign branch that owns the group, and the gross income that is attributed to the members of a foreign branch owner group is attributed to the foreign branch owner that owns the group.

The proposed regulations also clarify that the reattribution of gross income by reason of disregarded payments is capped at the amount of current gross income in the payor foreign branch or foreign branch owner. See proposed § 1.904–4(f)(2)(vi)(A).

Finally, the proposed regulations include more detailed rules on the treatment of payments between foreign branches, and provide an example illustrating the application of the matching rule in § 1.1502–13 to the rules in § 1.904–4(f)(2)(vi) in response to a comment received with respect to the 2019 FTC proposed regulations. See proposed § 1.904–4(f)(4)(xiii) through (xv) (*Examples 13 through 15*).

B. Financial Services Entities

Section 904(d)(2)(D)(i) provides that financial services income can only be received or accrued by a person “predominantly engaged in the active conduct of a banking, insurance, financing, or similar business.” The 2019 FTC proposed regulations modified the definition of a financial services entity (“FSE”) by adopting a definition of “predominantly engaged in the active conduct of a banking, insurance, financing, or similar business” and “income derived in the active conduct of a banking, insurance, financing, or similar business.” As discussed in the preamble to the 2020 FTC final regulations, in response to comments made in response to the 2019 FTC proposed regulations, the Treasury Department and the IRS determined that these provisions of the 2019 FTC proposed regulations should be revised and repropose to provide an additional opportunity for comment.

The proposed regulations retain the general approach of the existing § 1.904–4(e) final regulations by providing a numerical test whereby an entity is a financial services entity if more than a threshold percentage of its gross income is derived directly from active financing income, and the regulations continue to contain a list of income that qualifies as active financing income. However, the proposed regulations lower the threshold from 80 percent to 70 percent, and further provide that active financing income must generally be earned from customers or other counterparties that are not related parties. These changes will promote simplification and greater consistency between Code provisions that have complementary policy objectives, while still taking into account the differences between sections 954 and 904. The modified rule also makes clear that internal financing companies do not qualify as financial services entities if 70 percent or less of their gross income meets the unrelated customer requirement. In addition, the proposed regulations modify § 1.904–5(b)(2) to provide that the look-through rules in § 1.904–5 apply in all cases to assign related party payments

attributable to passive category income to the passive category, including in the case of related party payments made to a financial services entity. Comments are requested on the treatment of related party payments in the numerator and denominator of the 70-percent gross income test, and whether related party payments should in some cases constitute active financing income.

In the case of an insurance company’s income from investments, the Treasury Department and the IRS recognize that an insurance company must hold passive investment assets to support its insurance obligations, including capital and surplus in addition to insurance reserves, to ensure the company’s ability to satisfy insurance liabilities if claims are greater than anticipated or investment returns are less than anticipated. However, the Treasury Department and the IRS have determined that limits on the amount of an insurance company’s investment income that may be treated as active financing income are appropriate in cases where an insurance company holds substantially more investment assets and earns substantially more passive investment income than necessary to support its insurance business. Thus, proposed § 1.904–4(e)(2)(ii) imposes a cap on the amount of an insurance company’s income from investments that may be treated as active financing income. The cap is determined based on an applicable percentage of the insurance company’s total insurance liabilities. If investment income exceeds the insurance company’s investment income limitation, investment income in excess of the limitation is not considered ordinary and necessary to the proper conduct of the company’s insurance business and will not qualify as active financing income.

The Treasury Department and the IRS request comments on the investment income limitation rule and in particular on whether the applicable percentages selected for life and nonlife insurance companies are reasonable.

X. Sections 901(a) and 905(a)—Rules Regarding When the Foreign Tax Credit Can Be Claimed

A. Background

Section 901(a) provides that a taxpayer has the option, for each taxable year, to claim a credit for foreign income taxes paid or accrued to a foreign country in such taxable year, subject to the limitations under section 904. Alternatively, a taxpayer may deduct the foreign income taxes under section 164(a)(3). The deduction and credit for

foreign income taxes are mutually exclusive; section 275(a)(4) provides that no deduction shall be allowed for foreign income taxes if the taxpayer chooses to take to any extent the benefits of section 901. Section 1.901-1(c) of the existing regulations, which clarifies the application of section 275(a)(4), provides that if a taxpayer chooses with respect to any taxable year to claim a credit for taxes to any extent, such choice will be considered to apply to all taxes paid or accrued in such taxable year to all foreign countries, and no portion shall be allowed as a deduction in such taxable year or any succeeding taxable year.

Section 901(a) further provides that the choice to claim the foreign tax credit for any taxable year “may be made or changed at any time before the expiration of the period prescribed for making a claim for credit or refund of the tax imposed by this chapter for such taxable year.” Section 6511 prescribes the periods for making a claim for credit or refund of U.S. tax. The default period under section 6511(a) is three years from the time the taxpayer filed the relevant return or two years from when the tax is paid, whichever is later. Section 6511(d) sets forth special periods of limitation for making a claim of credit or refund of U.S. tax that is attributable to particular attributes. Under section 6511(d)(3), if the refund relates to an overpayment attributable to any taxes paid or accrued to any foreign country for which credit is allowed under section 901, the taxpayer has 10 years from the un-extended due date of the return for the taxable year in which the foreign taxes are paid or accrued to file the claim. See § 301.6511(d)-3. Section 6511(d)(2) sets out a special limitations period for refund claims “attributable to a net operating loss carryback” of three years from the due date of the return for the year in which the net operating loss originated. The existing regulations at § 1.901-1(d) provide that a taxpayer can claim the benefits of section 901 (or claim a deduction in lieu of a foreign tax credit) at any time before the expiration of the period prescribed by section 6511(d)(3)(A).

Section 905(a) and § 1.905-1(a) of the existing regulations provide that a taxpayer may claim a credit for foreign income taxes either in the year the taxes accrue or in the year the taxes are paid, depending on the taxpayer’s method of accounting. Sections 1.446-1(c) and 1.461-1 provide rules for when income and liabilities are taken into account for taxpayers using the cash receipts and disbursement method of accounting (cash method) and for taxpayers using

the accrual method of accounting. Under § 1.461-1(a)(1), cash method taxpayers generally take into account allowable deductions in the taxable year in which paid. For accrual method taxpayers, § 1.461-1(a)(2) provides that liabilities are taken into account in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. If the liability of a taxpayer is to pay a tax, economic performance occurs as the tax is paid to the governmental authority that imposed the tax. See § 1.461-4(g)(6)(i). However, in the case of foreign income taxes, economic performance occurs when the requirements of the all events test, other than economic performance, are met, whether or not the taxpayer elects to credit such taxes under section 901. See § 1.461-4(g)(6)(iii)(B). In the case of foreign income taxes imposed on the basis of a taxable period, because all of the events that fix the fact and amount of liability for the foreign tax with reasonable accuracy do not occur until the end of the foreign taxable year, such foreign income taxes accrue and are creditable in the U.S. tax year within which the taxpayer’s foreign taxable year ends. See § 1.960-1(b)(4); Revenue Ruling 61-93, 1961-1 C.B. 390.

Section 905(a) also provides that, regardless of the taxpayer’s method of accounting, a taxpayer can elect to claim the foreign tax credit in the year in which the taxes accrue. Once made, this election is irrevocable and must be followed in all subsequent years. In addition, courts have held that the election to claim the foreign tax credit on the accrual basis cannot be made on an amended return. See *Strong v. Willcuts*, 17 AFTR 1027 (D. Minn.) (1935) (holding that taxpayer may not change to accrual basis on an amended return because when the taxpayer made an election that the Government has accepted, the rights of the parties became fixed); see also Rev. Rul. 59-101, 1959-1 C.B. 189 (holding that a taxpayer who elected on his original return to claim credit for foreign income tax accrued may not change this election and file amended returns to claim credit for foreign taxes in the year paid). However, for the year the election is made, a taxpayer can claim a credit both for taxes that accrue in that year as well as taxes paid in such year that had accrued in prior years. See *Ferrer v. Comm’r*, 35 T.C. 617 (1961) (holding that a cash method taxpayer is entitled, in the year he elects pursuant to section

905(a) to claim foreign tax credits on the accrual basis, to claim a credit for prior years’ foreign income taxes paid as well as foreign income taxes accrued in that year), *rev’d on other grounds*, 304 F.2d 125 (2d Cir. 1962).

With respect to the accrual of a contested tax, the Supreme Court held in *Dixie Pine Products Co. v. Comm’r*, 320 U.S. 516 (1944), that a state income tax that is contested is not fixed, and so does not accrue, until the contest is resolved. See also section 461(f) (rule permitting taxpayers to deduct contested taxes in the year in which they are paid does not apply to foreign income taxes). The contested tax doctrine, however, does not apply in determining when foreign taxes accrue for purposes of the foreign tax credit. See *Cuba Railroad Co. v. United States*, 124 F. Supp. 182, 185 (S.D.N.Y. 1954) (holding that taxes with respect to taxpayer’s 1943 income accrued for purposes of the foreign tax credit in 1943 even though the tax was contested and paid in a later year). In Revenue Ruling 58-55, 1958-1 C.B. 266, the IRS examined *Dixie Pine* and *Cuba Railroad*, as well as the legislative history and purpose of the foreign tax credit provisions, and concluded that a contested foreign tax does not accrue until the contest is resolved and the liability becomes finally determined, but for foreign tax credit purposes, the foreign tax, once finally determined, is considered to accrue in the taxable year to which it relates. The revenue ruling further clarified that this “relation back” rule does not apply for purposes of determining the taxable year in which foreign taxes may be deducted under section 164, which is governed by the contested tax doctrine.

The relation back rule has since been consistently applied by courts. See, for example, *United States v. Campbell*, 351 F.2d 336, 338 (2d Cir. 1965) (explaining that if a taxpayer contests his liability for a foreign tax imposed on income in 1960, and the liability is finally adjudicated in 1965, the taxpayer may not claim the credit until 1965, but at that time the credit relates back to offset U.S. tax imposed on taxpayer’s 1960 income); *Albemarle Corp. & Subsidiaries v. United States*, 797 F.3d 1011, 1019 (Fed. Cir. 2015) (holding that in the context of determining in what year a taxpayer is eligible to claim a foreign tax credit, the relation back doctrine applies, and thus the 10-year limitations period for filing a refund claim started to run from the un-extended due date for the return for the year to which the tax relates, not the later year in which the contest was resolved). In Revenue Ruling 70-290,

1970–1 C.B. 160, the IRS held that contested taxes that have been paid to the foreign country may be provisionally accrued and claimed as a foreign tax credit, even if the liability has not actually accrued because the taxpayer continues to contest its liability for the tax in the foreign country. The revenue ruling reasons that this is permissible because section 905(c) would require a redetermination of U.S. tax liability if the taxpayer's contest is successful, and the foreign tax is refunded to the taxpayer by the foreign government. Revenue Ruling 84–125, 1984–2 C.B. 125, similarly held that a taxpayer is eligible to claim a credit for the portion of contested taxes that have actually been paid for the taxable year in which the contested liability relates because such taxes are accruable at the time of payment, even though the amount of the liability is not finally determined.

The Treasury Department and the IRS received comments in response to the 2019 FTC proposed regulations asking for clarification on when contested taxes accrue for purposes of the foreign tax credit and for clarification regarding whether the special period of limitations in section 6511(d)(3)(A) applies in the case of a refund claim relating to foreign income taxes that a taxpayer chose to deduct. Questions have also arisen regarding whether taxpayers can make an election to claim the foreign tax credit or revoke such an election (in order to deduct the foreign taxes) on an amended return when making or revoking such election results in a time-barred U.S. tax deficiency in one or more intervening years because the assessment statute under section 6501 does not align with the time for making or changing the election under § 1.901–1(d).

These proposed regulations provide rules clarifying when a foreign tax credit may be taken for both cash method taxpayers and for accrual method taxpayers, and in the case of accrual method taxpayers, clarify the application of the relation-back doctrine. The proposed regulations also modify the period during which a taxpayer can change the choice to claim a credit or a deduction for foreign income taxes on an amended return to align with the different refund periods under section 6511. The proposed regulations also clarify that a change from claiming a deduction to claiming a credit, or vice versa, for foreign income taxes results in a foreign tax redetermination under section 905(c). In addition, the proposed regulations address mismatch and time-barred deficiency issues resulting from the

application of the relation-back doctrine for the accrual of foreign income taxes for purposes of the foreign tax credit, and the application of the contested tax doctrine for purposes of determining when foreign income taxes can be deducted.

B. Rules for Choosing To Deduct or Credit Foreign Income Taxes

1. Application of Section 275(a)(4)

Section 1.901–1(c) of the existing regulations, interpreting section 275(a)(4), provides that if a taxpayer chooses to claim a foreign tax credit to any extent with respect to the taxable year, such choice applies to all creditable taxes and no deduction for any such taxes is allowed in such taxable year or in any succeeding taxable year. Questions have arisen as to whether this rule prevents taxpayers from claiming either the benefit of a credit or a deduction with respect to additional taxes that are paid in a taxable year in which a taxpayer claims a foreign tax credit if those additional taxes relate (under the relation-back doctrine) to an earlier year in which taxpayer claimed a deduction. As described in Part X.A of this Explanation of Provisions, additional tax paid by an accrual method taxpayer (or a cash method taxpayer that has elected to claim foreign tax credits using the accrual method) as a result of a foreign tax audit or at the end of a contest relate back and are considered to accrue in the taxable year to which the taxes relate. Thus, the additional taxes are not creditable in the year they are paid and would only be creditable in the relation-back year. However, if a taxpayer deducted foreign income taxes in the relation-back year, the taxpayer cannot claim an additional deduction in the earlier year because the additional taxes accrue for deduction purposes in the year the additional taxes are paid.

The Treasury Department and the IRS have determined that this result is not intended by section 275(a)(4), the purpose of which is to prevent taxpayers from claiming the benefits of both a credit and a deduction with respect to the same taxes. Thus, the proposed regulations provide an exception which allows a taxpayer that is claiming credits on an accrual basis to claim, in a year in which it has elected to claim a credit for foreign income taxes that accrue in that year, also to deduct additional taxes paid in that year that, for foreign tax credit purposes, relate back and are considered to accrue in a prior year in which the taxpayer deducted foreign income taxes. See proposed § 1.901–1(c)(3).

2. Period Within Which an Election To Claim a Foreign Tax Credit Can Be Made or Changed

The proposed regulations also modify § 1.901–1(d), which sets forth the period during which a taxpayer can make or change its election to claim a foreign tax credit. Existing § 1.901–1(d), which was amended in 1987 under TD 8160 (52 FR 33930–02), provides that a taxpayer can, for a particular taxable year, claim the benefits of section 901 or claim a deduction in lieu of a foreign tax credit at any time before the expiration of the period prescribed by section 6511(d)(3)(A) (or section 6511(c) if the period is extended by agreement). The 1987 amendment was preceded by cases in which courts determined that the applicable period of limitations for making an initial election to claim a foreign tax credit under section 901 is the special 10-year period in section 6511(d)(3)(A). See *Woodmansee v. United States*, 578 F.2d 1302 (9th Cir. 1978); *Hart v. United States*, 585 F.2d 1025 (Ct. Cl. 1978) (also holding that prior regulations, which required taxpayers to make the election to claim a foreign tax credit within the three-year period prescribed by 6511(a), were invalid).

However, as recent court decisions have made clear, the 10-year statute of limitations in section 6511(d)(3)(A) applies only to claims for credit or refund of U.S. taxes attributable to foreign income taxes for which the taxpayer was allowed a credit; it does not apply in the case of a claim for credit or refund of U.S. taxes attributable to foreign income taxes for which a taxpayer claimed a deduction under section 164(a)(3). See, for example, *Trusted Media Brands, Inc. v. United States*, 899 F.3d 175 (2d Cir. 2018). In addition, the reason for the special period of limitations provided by section 6511(d)(3) is to allow taxpayers to seek a refund of U.S. tax if foreign taxes were assessed or increased after the regular three-year statute of limitations period has run, and to better align with the IRS' ability to assess additional U.S. tax under section 905(c) when a taxpayer receives a refund of the foreign income tax claimed as a credit. The special period of limitations is not needed when a taxpayer instead claims a deduction, because accrued foreign income taxes do not relate back for deduction purposes, and the additional tax paid as a result of the foreign assessment can be claimed as a deduction in the year the contest is resolved.

Therefore, the Treasury Department and the IRS have determined that the

better interpretation of section 901(a) is that the period for choosing or changing the election to claim a credit or a deduction is based on the applicable refund period, depending on the choice made. Thus, an election to claim a credit, or to change from claiming a deduction to claiming a credit, for taxes paid or accrued in a particular year must be made before the expiration of the 10-year period prescribed by section 6511(d)(3)(A) within which a claim for refund attributable to foreign tax credits may be made, but a choice to claim a deduction, or to change from claiming a credit to claiming a deduction, for taxes paid or accrued in a particular year must be made before the expiration of the three-year period prescribed by section 6511(a) within which a claim for refund attributable to a section 164 deduction may be made. See proposed § 1.901-1(d). This proposed rule eliminates the mismatch between the election and refund periods that exists under the existing regulations, whereby a taxpayer who makes a timely election to change from claiming a credit to claiming a deduction within a 10-year period may in some cases be time-barred from obtaining a refund of U.S. taxes attributable to the resulting decrease in taxable income for the deduction year. In addition, the proposed rule is consistent with the court's decision in each of *Hart* and *Woodmansee*, since it allows taxpayers to elect to claim a credit within the 10-year period provided by section 6511(d)(3)(A).

3. Change in Election Treated as a Foreign Tax Redetermination Under Section 905(c)

As part of the 2019 FTC final regulations, the Treasury Department and the IRS issued final regulations under § 1.905-3 to provide guidance on when foreign tax redeterminations occur. Section 1.905-3(a) provides that a foreign tax redetermination means a change in the liability for a foreign income tax or certain other changes that affect a taxpayer's foreign tax credit. Consistent with section 905(c), this includes when foreign income taxes for which a taxpayer claimed a credit are refunded, foreign income taxes when paid or later adjusted differ from amounts a taxpayer claimed as a credit or added to PTEP group taxes, and when accrued taxes are not paid within 24 months of the close of the taxable year to which the taxes relate. The 2020 FTC final regulations further modify the definition of foreign tax redetermination to include changes to foreign income tax liability that affect a taxpayer's U.S. tax liability even when there is no change

to the amount of foreign tax credits claimed, such as when a change to foreign taxes affects subpart F and GILTI inclusion amounts or affects whether or not a CFC's subpart F income and tested income is eligible for the high-tax exception under section 954(b)(4) in the year to which the redetermined foreign tax relates.

These proposed regulations further amend § 1.905-3 to provide that a foreign tax redetermination includes a change by a taxpayer in its decision to claim a credit or a deduction for foreign income taxes that may affect a taxpayer's U.S. tax liability. Section 905(c)(1)(A) provides that a foreign tax redetermination is required "if accrued taxes when paid differ from the amounts claimed as credits by the taxpayer." When a taxpayer changes its election from claiming a credit to claiming a deduction, or vice versa, with respect to foreign income taxes paid or accrued in a particular year, the amount of tax that was accrued and paid differs from the amount that has been claimed as a credit by the taxpayer. Accordingly, a change in a taxpayer's election to claim a credit or a deduction for foreign income taxes is described in section 905(c)(1)(A) even if the foreign income tax liability remains unchanged.

This interpretation is consistent with the purpose of section 905(c) and within the constraints courts have placed in interpreting the provision. As noted by the court in *Texas Co. (Caribbean) Ltd. v. Comm'r*, 12 T.C. 925 (1949), section 905(c) addresses problems for which the relevant information might not be available within the general period of limitations or ones where the taxpayer has exclusive control of the information, which justify removing these situations from the generally-applicable period of limitations on assessment. The court in *Texas Co.* held that a U.S. tax deficiency that results from a computational error, which was discoverable by the IRS within the normal assessment period, is not within the scope of section 905(c). A taxpayer's decision to change its election can occur outside the normal assessment period under section 6501(a) and is information that is under the exclusive control of the taxpayer. Thus, the Treasury Department and the IRS have determined that it is appropriate to treat a change in election as a foreign tax redetermination that requires a redetermination of U.S. tax liability for the affected years and notification of the IRS to the extent required under § 1.905-4.

The effect of treating a change in a taxpayer's decision to claim a credit or a deduction for foreign income taxes as a foreign tax redetermination is that the

IRS may assess and collect any U.S. tax deficiencies in intervening years that result from the taxpayer's change in election, even if the generally-applicable three-year assessment period under section 6501(a) has expired. See section 6501(c)(5). This can occur, for example, if a timely change to switch from deductions originally claimed in a loss year (to increase a net operating loss) to credits (in order to claim a carryforward of excess foreign taxes in a later year) would result in a time-barred deficiency in a year to which the net operating loss that was increased by the deductions for foreign taxes was originally carried. Currently, the law is unclear how section 274(a)(4), equitable doctrines such as the duty of consistency, or the mitigation provisions under sections 1311 through 1314 operate to prevent taxpayers from obtaining a double benefit (through both a deduction and a credit) for a single amount of foreign income tax paid. These uncertainties have led taxpayers to request guidance from the IRS to clarify the effect of a timely change in election on their U.S. tax liabilities. The proposed regulations provide a clear and efficient process by which taxpayers can eliminate uncertainty with respect to the tax consequences of changing from claiming a credit to claiming a deduction, or vice versa, for foreign income taxes, within the time period allowed.

C. Rules for When a Cash Method Taxpayer Can Claim the Foreign Tax Credit

Proposed § 1.905-1(c) provides rules on when foreign income taxes are creditable for taxpayers using the cash method of accounting. Consistent with § 1.461-1(a)(1), which provides that for taxpayers using the cash method, amounts representing allowable deductions are taken into account in the taxable year in which they are paid, proposed § 1.905-1(c)(1) provides that foreign income taxes are creditable in the taxable year in which they are paid. Foreign income taxes are generally considered paid in the year the taxes are remitted to the foreign country. However, foreign income taxes that are withheld from gross income by the payor are considered paid in the year withheld. See proposed § 1.905-1(c)(1). As discussed in Part VI.B of this Explanation of Provisions, taxes that are not paid within the meaning of § 1.901-2(e) because they exceed a reasonable approximation of the taxpayer's final foreign income tax liability are not eligible for a foreign tax credit.

The regulations at § 1.905-3(a) further provide that a refund of foreign income taxes that have been claimed as a credit

in the year paid, or a subsequent determination that the amount paid exceeds the taxpayer's liability for foreign income tax, is a foreign tax redetermination under section 905(c), and the taxpayer must file an amended return and redetermine its U.S. tax liability for the affected years. However, additional taxes that are paid by a cash method taxpayer in a later year with respect to a prior year do not relate back to the prior year, nor do they result in a redetermination of foreign income taxes paid and U.S. tax liability under section 905(c) for the prior year; instead, those additional taxes are creditable in the year in which they are paid.

Proposed 1.905–1(e) sets forth rules for cash method taxpayers electing to claim foreign tax credits on an accrual basis. As provided by section 905(a), this election is irrevocable, and once made, must be followed in all subsequent years, and consistent with the holding in *Strong v. Willcuts*, the election generally cannot be made on an amended return. See proposed § 1.905–1(e)(1). However, the proposed regulations provide exceptions to these general rules in order to ensure that a taxpayer who makes this election to switch from claiming credits on a cash basis to an accrual basis is not double taxed in certain situations. First, proposed § 1.905–1(e)(2) provides that a taxpayer who has previously never claimed a foreign tax credit may make the election to claim the foreign tax credit on an accrual basis when the taxpayer claims the credit, even if such initial claim for credit is made on an amended return. In addition, following the decision in *Ferrer v. CIR*, proposed § 1.905–1(e)(3) provides that, for the taxable year in which the accrual election is made and for the subsequent years in which a taxpayer claims a foreign tax credit on an accrual basis, that taxpayer can claim a foreign tax credit for taxes paid in the year, if pursuant to the rules for accrual method taxpayers that are described in Part X.D of this Explanation of Provisions, those taxes paid relate to a taxable year before the taxpayer elected to claim credits on an accrual basis. The Treasury Department and the IRS have determined that this result is appropriate because otherwise taxpayers that make the accrual election would, in effect, have to forego a credit for prior year taxes, unless the election is made for the very first year in which a credit is claimed.

D. Rules for Accrual Method Taxpayers

1. In General

Proposed § 1.905–1(d)(1) provides general rules for when taxpayers using the accrual method of accounting can claim a foreign tax credit. This determination requires applying the all events test contained in § 1.461–1. In accordance with § 1.461–1(a)(2)(i), foreign income taxes accrue in the taxable year in which all the events have occurred that establish the fact of liability, and the amount of the liability can be determined with reasonable accuracy. See also § 1.461–4(g)(6)(iii)(B) (economic performance with respect to foreign income taxes occurs when the requirements of the all events test, other than the payment prong of the economic performance requirement, are met). The proposed regulations confirm that where the all events test has not been met with respect to a foreign income tax liability, such as in the case where the tax liability is contingent upon a distribution of earnings, such taxes have not accrued and may not be claimed as a credit. See proposed § 1.905–1(d)(1)(i).

Proposed § 1.905–1(d)(1)(ii) incorporates the relation-back doctrine, and provides that, for foreign tax credit purposes, once the all events test is met, the foreign income taxes relate back and are considered to accrue in the year to which the taxes relate, the “relation-back year.” For example, additional taxes paid as a result of a foreign adjustment relate back and are considered to accrue at the end of the foreign taxable year(s) with respect to which the taxes were adjusted. Thus, the additional taxes paid in the later year are creditable in the relation-back year, not in the year in which the additional taxes are paid. See proposed § 1.905–1(d)(6)(iii) (*Example 3*); see also § 1.905–3(b)(1)(ii)(A) (*Example 1*). Moreover, in the case of foreign income taxes which are treated as refunded pursuant to § 1.905–3(a) because they were not paid within 24 months of the close of the taxable year in which they first accrued, proposed § 1.905–1(d)(1)(ii) provides that when payment is later made, the taxes are considered to accrue in the relation-back year.

2. Special Rule for 52–53 Week Taxable Years

Consistent with Revenue Ruling 61–93, the proposed regulations provide that the liability for a foreign tax becomes fixed on the last day of the taxpayer's foreign taxable year; thus, foreign income taxes generally accrue and are creditable in the taxpayer's U.S. taxable year with or within which its foreign taxable year ends. However, the

Treasury Department and the IRS have determined that it is appropriate to provide a limited exception to this rule in order to address mismatches that occur for taxpayers that elect to use a 52–53 week taxable year for U.S. tax purposes under § 1.441–2. Section 1.441–2 permits certain eligible taxpayers to elect to use a fiscal year that (i) varies from 52 to 53 weeks in length, (ii) always ends on the same day of the week, and (iii) ends either on the same day of the week that last occurs in a calendar month or on whatever date the same day of the week falls that is nearest to the last day of the calendar month.

A taxpayer that adopts a 52–53 week year, or that changes from a 52–53 week year to another fiscal year, without changing its foreign taxable year, will often have a short taxable year that does not include the foreign year-end. That short U.S. taxable year would include substantially all of the foreign income but none of the related foreign taxes. Similarly, a taxpayer that uses a 52–53 week year for U.S. tax purposes but that uses a foreign tax year that ends on a fixed month-end will in some years have a U.S. taxable year that does not include a foreign year-end and in other years have a U.S. taxable year that includes two foreign year-ends. For example, a taxpayer who uses a 52–53 week year that ends on the last Friday of December for U.S. tax purposes would have a tax year that begins Saturday, December 26, 2020, and that ends Friday, December 31, 2021, which includes two calendar year-ends. The following taxable year, which begins on Saturday, January 1, 2022, and ends on Friday, December 30, 2022, would not include a calendar year-end.

Proposed § 1.905–1(d)(2) addresses these mismatches by providing that where a U.S. taxpayer uses a 52–53 week taxable year that ends by reference to the same calendar month as its foreign taxable year, and the U.S. taxable year closes within 6 days of the close of the foreign taxable year, then for purposes of determining the amount of foreign income tax that accrues during the U.S. taxable year, the U.S. taxable year will be deemed to end on the last day of its foreign taxable year.

3. Accrual of Contested Foreign Income Taxes

The Treasury Department and IRS have determined that the administrative rulings that allow an accrual method taxpayer to claim a foreign tax credit for a contested tax that has been remitted to a foreign country, notwithstanding the fact that the contest is ongoing, are inconsistent with the all events test

(specifically, the test's requirement that all the events must have occurred that establish the fact and amount of the liability with reasonable accuracy).⁴ In addition, permitting taxpayers to claim a credit for contested taxes before the contest is resolved reduces the incentive for taxpayers to continue to pursue the contest and exhaust all effective and practical remedies, as required under § 1.901-2(e)(5)(i), if the period of assessment for the year to which the taxes relate has closed and the IRS would be time-barred from disallowing the foreign tax credit claimed with respect to the contested tax paid on noncompulsory payment grounds. The Treasury Department and the IRS have determined that this is an inappropriate result that undermines the longstanding policy for requiring an amount of foreign income tax to be a compulsory payment in order to be creditable.

Therefore, the proposed regulations provide new rules for when a credit for contested foreign income taxes can be claimed. Following the Supreme Court's holding in *Dixie Pine*, and consistent with the exception to section 461(f) and § 1.461-2(a)(2)(i) for foreign income taxes, proposed § 1.905-1(d)(3) provides that contested foreign income taxes do not accrue until the contest is resolved, because only then is the amount of the foreign income tax liability finally determined. Thus, contested foreign income taxes accrue and are creditable only when resolution of the contest establishes the fact and the amount of a liability with reasonable accuracy, even if the taxpayer remits the contested taxes to the foreign country in an earlier year. When the contest is resolved, the liability accrues and, for foreign tax credit purposes, relates back and is considered to accrue in the earlier year to which the liability relates. Once the finally determined liability has been paid, as required by section 905(c)(2)(B) and § 1.905-3(a), the taxpayer can claim a foreign tax credit in the relation-back year.

However, the Treasury Department and the IRS recognize that a taxpayer may be placed in a difficult position if it pays the contested tax to the foreign country (which it may do, for example, to toll the accrual of interest owed to the foreign country) but cannot be made whole until the contest is resolved, possibly years later. Thus, the proposed regulations provide that a taxpayer may elect to claim a provisional credit for the portion of the taxes paid, even though the contest is not resolved and the

amount of the liability is not yet fixed. See proposed § 1.905-1(d)(4). As a condition for making this election, a taxpayer must agree to give the IRS an opportunity to examine whether the taxpayer exhausted all effective and practical remedies when the contest is concluded by agreeing to notify the IRS when the contest concludes and by agreeing to not assert the statute of limitations as a defense to the assessment of additional taxes and interest if the IRS determines that the tax was not a compulsory payment. The proposed regulations require taxpayers making this election to file with their amended return (for the year in which the credit is claimed) a provisional foreign tax credit agreement meeting the conditions under proposed § 1.905-1(d)(4)(ii) through (iv) and to file annual certifications notifying the IRS of the status of the contest.

The Treasury Department and the IRS intend to withdraw Revenue Ruling 70-290 and Revenue Ruling 84-125 when the proposed regulations are finalized. Taxpayers can make the election under proposed § 1.905-1(d)(4) for contested taxes remitted in taxable years beginning on or after the date the proposed regulations are finalized but that relate to an earlier taxable year. See proposed § 1.905-1(h).

4. Correction of Improper Accruals

The proposed regulations address issues that arise when an accrual method taxpayer, including a foreign corporation or a partnership or other pass-through entity, has established an improper method of accounting for accruing foreign income taxes. A taxpayer generally establishes an improper method of accounting for an item once it has treated the item consistently in two consecutive tax years (see Rev. Rul. 90-38, 1990-1 CB 57). Proposed § 1.905-1(d)(5)(i) provides that the time at which a taxpayer accrues a foreign income tax expense generally is treated as a method of accounting, regardless of whether the taxpayer or the owners of the foreign corporation, partnership or other pass-through entity claim credits or deductions for those taxes. Therefore, taxpayers must comply with the procedures set forth in Revenue Procedure 2015-13, 2015-5 I.R.B. 419, or successor administrative procedures, to obtain the Commissioner's consent before changing from an improper method to a proper method of accruing foreign income taxes.

The proposed regulations provide specific rules, under a "modified cut-off" approach, for adjusting the amount of foreign income taxes that can be

claimed as a credit or deduction in the year that a taxpayer changes from an improper to a proper method of accruing foreign income taxes (and in subsequent years, if applicable) in order to prevent a duplication or omission of any amount of foreign income tax paid. Proposed § 1.905-1(d)(5)(ii) requires taxpayers to adjust the amount of foreign income tax that is assigned under § 1.861-20 to each statutory or residual grouping (such as separate categories) and that properly accrues in the year of change, accounted for in the currency in which the foreign tax liability is denominated, (1) downward by the amount of foreign income tax in the same grouping that was improperly accrued and claimed as a credit or a deduction in a taxable year before the year of change ("pre-change year") and that did not properly accrue in any pre-change year, and (2) upward by the amount of foreign income tax in the same grouping that properly accrued in a pre-change year but which the taxpayer, under its improper method of accounting, failed to accrue and claim as either a credit or a deduction in any pre-change year. To the extent that the required amount of the downward adjustment exceeds the amount of properly-accrued foreign income tax in the year of change, the balance carries forward to offset properly-accrued taxes in subsequent years.

Proposed § 1.905-1(d)(5)(iii) provides rules coordinating the application of the rules under section 905(c) with the rules in proposed § 1.905-1(d)(5). Under proposed § 1.905-1(d)(5)(iii), the determination of whether an improperly-accrued foreign income tax was paid within 24 months of the close of the taxable year to which the taxes relate for purposes of section 905(c)(2) will be measured from the close of the taxable year(s) in which the taxpayer accrued the tax. Any payment of properly-accrued tax in and after the year of change that is offset by the downward adjustment required by proposed § 1.905-1(d)(5)(ii) and so not allowed as a foreign tax credit or deduction in that year is treated as a payment of the foreign income tax improperly accrued in pre-change years, in order, based on the most recently-accrued amounts.

Finally, proposed § 1.905-1(d)(5)(iv) provides that when a foreign corporation, partnership, or other pass-through entity changes from an improper method of accruing foreign income taxes, the rules in § 1.905-1(d)(5) apply as if the foreign corporation, partnership or other pass-through entity were eligible to, and did, claim foreign tax credits. Comments are

⁴ See Rev. Rul. 70-290, 1970-1 C.B. 160, and Rev. Rul. 84-125, 1984-2 C.B. 125, discussed in Part X.A of this Explanation of Provisions.

requested on additional adjustments that may be required to prevent an omission or duplication of a tax benefit for foreign income taxes that have been improperly accrued (or which the taxpayer has improperly failed to accrue) under the taxpayer's improper method of accounting. Comments are also requested on alternative methods for implementing a method change involving the improper accrual of foreign income taxes.

E. Creditable Foreign Tax Expenditures of Partnerships and Other Pass-Through Entities

The proposed regulations provide rules that clarify when foreign income taxes paid or accrued by a partnership or other pass-through entity (that is, foreign income taxes for which the pass-through entity is considered to be legally liable under § 1.901-2(f)) can be claimed as a credit or deduction by such entity's partners, shareholders, or beneficiaries. Consistent with the rules in §§ 1.702-1(a)(6) and 1.703-1(b)(2), proposed § 1.905-1(f) provides that a partner that elects to claim a foreign tax credit in a taxable year may claim its distributive share of foreign income taxes that the partnership paid or accrued (as determined under the partnership's method of accounting) during the partnership's taxable year that ends with or within the partner's taxable year. Thus, the pass-through entity's method of accounting for foreign income taxes generally controls for purposes of determining the taxable year in which a partner is considered to pay or accrue its distributive share of those taxes. Therefore, a cash method taxpayer may claim a credit for its distributive share of an accrual method partnership's foreign income taxes even if the partnership has not paid (that is, remitted) the taxes to the foreign country during the partner's taxable year with or within which the partnership's tax expense accrued, so long as those taxes otherwise qualify for the credit, and subject to the rules of section 905(c)(2)(A) (treating accrued foreign taxes as refunded if not paid within 24 months). The rules in proposed § 1.905-1(f) also apply in the case of shareholders of a S corporation, beneficiaries of an estate or trust, or other owners of a pass-through entity with respect to foreign income taxes paid or accrued by such entities.

With respect to a contested foreign tax liability of a pass-through entity, the proposed regulations provide that the entity takes into account and reports a contested foreign income tax to its partners, shareholders, beneficiaries, or other owners only when the contest

concludes and the finally determined amount of the liability has been paid by the entity. This rule takes into account the requirement in section 905(c)(2)(B) and § 1.905-3(a) that a foreign tax that first accrues more than 24 months after the close of the taxable year to which the tax relates can only be claimed as a credit once the tax has been paid. See proposed § 1.905-1(f)(1). However, proposed § 1.905-1(f)(2) allows a partner or other owner of a pass-through entity to claim a provisional foreign tax credit for its share of a contested foreign income tax liability that the entity has paid to the foreign country pursuant to the procedures in proposed § 1.905-1(d)(4). As required by §§ 1.905-3(a) and 1.905-4(b), a pass-through entity is required to notify the IRS and its partners, shareholders, or beneficiaries if there is a foreign tax redetermination with respect to foreign income tax previously reported to its partners, shareholders, or beneficiaries.

F. Conforming Changes to Regulations Under Section 960

Existing regulations under section 960 provide a definition of a current year tax that includes language regarding the timing of accrual of a foreign income tax, including the timing of accrual of additional payments of foreign income tax resulting from a foreign tax redetermination. These proposed regulations revise this definition to cross-reference the proposed rules in § 1.905-1 regarding when foreign income taxes are considered to be paid or accrued for foreign tax credit purposes.

In addition, existing rules exclude from the definition of a foreign income tax a levy for which a credit is disallowed at the level of a controlled foreign corporation. The proposed regulations revise the definition of a foreign income tax in § 1.960-1(b) to include a levy that is a foreign income tax within the meaning of proposed § 1.901-2(a), including a levy for which a credit is disallowed at the level of the controlled foreign corporation. These changes are necessary to clarify that a foreign income tax for which a credit is disallowed is nonetheless an item of expense that must be allocated and apportioned to an income group under the rules of § 1.960-1(d) in order to determine the amount of net income in each income group.

Finally, proposed § 1.960-1(b)(5) introduces a new defined term, "eligible current year taxes," that refers to current year taxes for which a foreign tax credit may be allowed. This change is necessary to ensure that the current year taxes that are deemed paid under

sections 960(a) and (d) comprise only current year taxes that are eligible for a foreign tax credit. Conforming changes to § 1.960-2 are proposed to provide that deemed paid computations are made only with respect to eligible current year taxes. Additional conforming changes will be proposed to § 1.960-3 to address the computation of deemed paid taxes under section 960(b) as part of future proposed regulations under section 959.

XI. Applicability Dates

The rules in §§ 1.164-2(d), 1.336-2(g)(3)(ii) and (iii), 1.338-9(d), 1.368(b)-10(c)(1), 1.861-9(k), 1.861-10(f) and (g), 1.861-14(h), 1.861-20(h), 1.901-1, 1.901-2, 1.903-1, 1.904-4(e)(1)(ii) and (e)(2) and (3), 1.904-5(b)(2), 1.905-1, 1.905-3(a) and (b)(4), 1.960-1(b)(4) through (6), and 1.960-1(c)(1)(ii) through (iv) and (d)(3)(ii)(B) generally apply to taxable years beginning on or after the date final regulations adopting these rules are filed with the **Federal Register**.

Consistent with the prospective applicability date in the section 250 regulations, the revisions to §§ 1.250(b)-1(c)(7) and 1.250(b)-5(c)(5) apply to taxable years beginning on or after January 1, 2021. See § 1.250-1(b).

The rules in proposed §§ 1.367(b)-4(b)(2)(i)(B), 1.367(b)-7(g), 1.367(b)-10(c)(1), 1.861-3(d), 1.861-8(e)(4)(i), and 1.861-10(e)(8)(v) generally apply to taxable years ending on or after November 2, 2020.

Proposed §§ 1.245A(d)-1, 1.861-20 (other than proposed § 1.861-20(h)), 1.904-4(f), and 1.904-6(b)(2) apply to taxable years that begin after December 31, 2019, and end on or after November 2, 2020.

Finally, proposed § 1.904(f)-12(j)(5) applies to carrybacks of net operating losses incurred in taxable years beginning after December 31, 2017, which is consistent with the applicability date in the CARES Act with respect to net operating loss carrybacks. See Public Law 116-136, 134 Stat. 355, section 2303(d), (2020); see also section 7805(b)(2).

Special Analyses

I. Regulatory Planning and Review

Executive Orders 13771, 13563 and 12866 direct agencies to assess costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563

emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. The Executive Order 13771 designation for any final rule resulting from these proposed regulations will be informed by comments received.

The proposed regulations have been designated by the Office of Information and Regulatory Affairs (OIRA) as subject to review under Executive Order 12866 pursuant to the Memorandum of Agreement (MOA, April 11, 2018) between the Treasury Department and the Office of Management and Budget regarding review of tax regulations. The Office of Information and Regulatory Affairs has designated these regulations as economically significant under section 1(c) of the MOA. Accordingly, the OMB has reviewed these regulations.

A. Background and Need for the Proposed Regulations

The U.S. foreign tax credit (FTC) regime alleviates potential double taxation by allowing a non-refundable credit for foreign income taxes paid or accrued that could be applied to reduce the U.S. tax on foreign source income. Although the Tax Cuts and Jobs Act (TCJA) eliminated the U.S. tax on some foreign source income by enacting a dividends received deduction, the United States continues to tax other foreign source income, and to provide foreign tax credits against this U.S. tax. The calculation of how foreign taxes can be credited against U.S. tax operates by defining different categories of foreign source income (a “separate category”) based on the type of income.⁵ Foreign taxes paid or accrued, as well as deductions for expenses borne by U.S. parents and domestic affiliates that support foreign operations, are allocated to the separate categories based on the income to which such taxes or deductions relate. These allocations of deductions reduce foreign source taxable income and therefore reduce the allowable FTCs for the separate category, since FTCs are limited to the U.S. income tax on the foreign source taxable income (that is, foreign source gross income less allocated expenses) in that separate category. Therefore, these expense allocations help to determine how much foreign tax credit is allowable, and the taxpayer can then use allowable foreign tax credits allocated to each separate category

against the U.S. tax owed on income in that category.

The Code and existing regulations further provide definitions of the foreign taxes that constitute creditable foreign taxes. Section 901 allows a credit for foreign income taxes, war profits taxes, and excess profits taxes. The existing regulations under section 901 define these “foreign income taxes” such that a foreign levy is an income tax if it is a tax whose predominant character is that of an income tax in the U.S. sense. Under the existing regulations, this requires that the foreign tax is likely to reach net gain in the normal circumstances in which it applies (the “net gain requirement”), and that it is not a so-called soak-up tax.
