FEDERAL REGISTER

Vol. 86 Tuesday

No. 190 October 5, 2021

Pages 54801–55468

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 86 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register
Vol. 86, No. 190
Tuesday, October 5, 2021

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 72

[NRC–2021–0108]

RIN 3150–AK64

List of Approved Spent Fuel Storage Casks: TN Americas, LLC, Standardized Advanced NUHOMS® Horizontal Modular Storage System Certificate of Compliance No. 1029, Renewal of Initial Certificate and Amendment Nos. 1, 3, and 4

AGENCY: Nuclear Regulatory Commission.

ACTION: Direct final rule; confirmation of effective date.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is confirming the effective date of October 27, 2021, for the direct final rule that was published in the **Federal Register** on August 13, 2021. The direct final rule amended the NRC's spent fuel storage regulations by revising the TN Americas, LLC, Standardized Advanced NUHOMS® Horizontal Modular Storage System listing within the ''List of approved spent fuel storage casks'' to renew, for an additional 40 years, the initial certificate and Amendment Nos. 1, 3, and 4 of Certificate of Compliance No. 1029.

DATES: *Effective date:* The effective date of October 27, 2021, for the direct final rule published August 13, 2021 (86 FR 44594), is confirmed.

ADDRESSES: Please refer to Docket ID NRC–2021–0108 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0108. Address questions about NRC dockets to Dawn Forder; telephone: 301–415–3407; email: *Dawn.Forder@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The proposed certificates of compliance, the proposed changes to the technical specifications, and the preliminary safety evaluation report are available in ADAMS under Package Accession No. ML21067A164. The final certificates of compliance, the final changes to the technical specifications, and the final safety evaluation report are available in ADAMS under Package Accession No. ML21246A086.
- *Attention:* The PDR, where you may examine and order copies of public documents, is currently closed. You may submit your request to the PDR via email at *pdr.resource@nrc.gov* or call 1–800–397–4209 between 8:00 a.m. and 4:00 p.m. (EST), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Irene Wu, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–1951, email: *Irene.Wu@nrc.gov.*

SUPPLEMENTARY INFORMATION: On August 13, 2021 (86 FR 44594), the NRC published a direct final rule amending its regulations in part 72 of title 10 of the *Code of Federal Regulations* to renew, for an additional 40 years, the initial certificate and Amendment Nos. 1, 3, and 4 of the TN Americas, LLC, Standardized Advanced NUHOMS® Horizontal Modular Storage System Certificate of Compliance No. 1029. The renewal of the initial certificate and Amendment Nos. 1, 3, and 4 revise the certificate of compliance's conditions and technical specifications to address aging management activities related to the structures, systems, and components of the dry storage system to ensure that these will maintain their intended functions during the period of extended storage operations.

In the direct final rule, the NRC stated that if no significant adverse comments were received, the direct final rule would become effective on October 27, 2021. The NRC did not receive any comments on the direct final rule. Therefore, this direct final rule will become effective as scheduled.

Dated: September 30, 2021.

For the Nuclear Regulatory Commission.

Cindy K. Bladey,

Chief, Regulatory Analysis and Rulemaking Support Branch, Division of Rulemaking, Environmental, and Financial Support, Office of Nuclear Material Safety and Safeguards.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2021–0548; Project Identifier MCAI–2021–00046–T; Amendment 39–21731; AD 2021–19–13]

RIN 2120–AA64

Airworthiness Directives; ATR–GIE Avions de Transport Régional Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all ATR–GIE Avions de Transport Régional Model ATR42–500 and ATR72–212A airplanes. This AD was prompted by reports indicating that certain Thales global positioning system (GPS) satellite based augmentation system (SBAS) receivers provided, under certain conditions, erroneous outputs on aircraft positions. This AD requires replacing affected GPS SBAS receivers with new, improved receivers, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective November 9, 2021.

The Director of the Federal Register approved the incorporation by reference

of a certain publication listed in this AD as of November 9, 2021.

ADDRESSES: For material incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this IBR material on the EASA website at *https://ad.easa.europa.eu.* You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0548.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0548; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Shahram Daneshmandi, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3220; email: *shahram.daneshmandi@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2021–0013, dated January 13, 2021 (EASA AD 2021–0013) (also referred to as the MCAI), to correct an unsafe condition for all ATR–GIE Avions de Transport Régional Model ATR42–500 and ATR72–212A airplanes.

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all ATR–GIE Avions de Transport Régional Model ATR42–500 and ATR72–212A airplanes. The NPRM published in the **Federal Register** on July 7, 2021 (86 FR 35697). The NPRM was prompted by reports indicating that Thales GPS SBAS receivers provided, under certain conditions, erroneous outputs on aircraft positions. The NPRM proposed to require replacing affected GPS SBAS receivers with new, improved receivers, as specified in EASA AD 2021–0013.

The FAA is issuing this AD to address erroneous aircraft position outputs from the GPS SBAS receivers, which could result in controlled flight into terrain, and consequent loss of control of the airplane. See the MCAI for additional background information.

Discussion of Final Airworthiness Directive

Comments

The FAA received a comment from the Air Line Pilots Association, International, (ALPA) who supported the NPRM without change.

Conclusion

The FAA reviewed the relevant data and determined that air safety requires adopting this AD as proposed. Except for minor editorial changes, this AD is adopted as proposed in the NPRM. None of the changes will increase the economic burden on any operator. Accordingly, the FAA is issuing this AD to address the unsafe condition on these products.

Related AD

AD 2020–08–02, Amendment 39–21108 (85 FR 20586, April 14, 2020) (AD 2020–08–02) applies to certain Thales GPS SBAS receivers installed on airplanes (including Model ATR42–500 and ATR72–212A) and helicopters. AD 2020–08–02 requires the installation of a software update to the aircraft navigation database and insertion of a change to the applicable airplane flight manual (AFM). The FAA issued AD 2020–08–02 to address erroneous aircraft position outputs from the affected Thales GPS SBAS receivers, which could result in controlled flight into terrain and loss of the aircraft. AD 2020–08–02 corresponds to EASA AD 2019–0004, dated January 11, 2019. Upon completion of EASA AD 2021–0013 by Model ATR42–500 and ATR72–212A airplanes, all requirements of EASA AD 2019–0004 are effectively terminated for those airplanes.

Related Service Information Under 1 CFR Part 51

EASA AD 2021–0013 describes procedures for replacing certain GPS SBAS receivers with new, improved receivers. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 15 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
2 work-hours × $85 per hour = $170	$0 *	$170	$2,550

The manufacturer will provide replacement receivers at no cost to the operators. The FAA has received no definitive data on which to base the cost estimates for these parts.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a

substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Will not affect intrastate aviation in Alaska, and

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2021–19–13 ATR–GIE Avions de Transport Régional: Amendment 39–21731; Docket No. FAA–2021–0548; Project Identifier MCAI–2021–00046–T.

(a) Effective Date

This airworthiness directive (AD) is effective November 9, 2021.

(b) Affected ADs

This AD affects AD 2020–08–02, Amendment 39–21108 (85 FR 20586, April 14, 2020) (AD 2020–08–02).

(c) Applicability

This AD applies to all ATR–GIE Avions de Transport Régional Model ATR42–500 and ATR72–212A airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

(e) Reason

This AD was prompted by reports that Thales global positioning system (GPS) satellite based augmentation system (SBAS) receivers provided, under certain conditions, erroneous outputs on aircraft positions. The FAA is issuing this AD to address the potential for these erroneous outputs, which could result in controlled flight into terrain, and consequent loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2021–0013, dated January 13, 2021 (EASA AD 2021–0013).

(h) Exceptions to EASA AD 2021–0013

(1) Where EASA AD 2021–0013 refers to its effective date, this AD requires using the effective date of this AD.

(2) The requirements specified in paragraphs (2) and (3) of EASA AD 2021–0013 do not apply to this AD. Instead, the airplane flight manual (AFM) changes required by AD 2020–08–02 must be removed from the existing AFM before further flight after compliance with all other actions required by this AD.

(3) The ''Remarks'' section of EASA AD 2021–0013 does not apply to this AD.

(i) Terminating Action for AD 2020–08–02

Accomplishment of this AD terminates all requirements of AD 2020–08–02 for Model ATR42–500 and ATR72–212A airplanes.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or ATR–GIE Avions de Transport Régional's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(k) Related Information

For more information about this AD, contact Shahram Daneshmandi, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3220; email: *shahram.daneshmandi@faa.gov.*

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2021–0013, dated January 13, 2021.

(ii) [Reserved]

(3) For EASA AD 2021–0013, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov,* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on September 7, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Airbus SAS Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Airbus SAS Model A310 series airplanes. This AD was prompted by a determination that new or more restrictive maintenance requirements and airworthiness limitations are necessary. This AD requires revising the existing maintenance or inspection

program, as applicable, to incorporate new or more restrictive airworthiness limitations, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD becomes effective October 20, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of October 20, 2021.

The FAA must receive comments on this AD by November 19, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax*: 202–493–2251.
- *Mail*: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For EASA material incorporated by reference (IBR) in this AD, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* internet *www.easa.europa.eu.* You may find this IBR material on the EASA website at *https://ad.easa.europa.eu.* You may view this IBR material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0789.

Examining the AD Docket

You may examine the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0789; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the mandatory continuing airworthiness information (MCAI), any comments received, and other information. The street address for Docket Operations is listed above.

FOR FURTHER INFORMATION CONTACT: Dan Rodina, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3225; email *dan.rodina@faa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2020–0267, dated December 3, 2020 (EASA AD 2020–0267) (also referred to as the MCAI), to correct an unsafe condition for all Airbus SAS Model A310–203, –204, –221, –222, –304, –322, –324, and –325 airplanes.

EASA AD 2020–0267 specifies that it requires a task (limitation) related to the retraction actuator assembly sliding rod already in Airbus A310 ALS Part 4 Revision 03 that is required by EASA AD 2017–0202 (which corresponds to FAA AD 2018–18–21, Amendment 39–19400 (83 FR 47054, September 18, 2018) (AD 2018–18–21)) and that incorporation of EASA AD 2020–0267 invalidates (terminates) prior instructions for that task. This AD therefore terminates the limitations for the retraction actuator assembly sliding rod having part number D52952, D52952–1, D52952–2, or D58006, as required by paragraph (g) of AD 2018–18–21, for Model A310 series airplanes only.

This AD was prompted by a determination that new or more restrictive airworthiness limitations are necessary. The FAA is issuing this AD to address the effects of aging on airplane systems. Such effects could change system characteristics, leading to an increased potential for failure of certain life-limited parts. See the MCAI for additional background information.

Related Service Information Under 1 CFR Part 51

EASA AD 2020–0267 describes new or more restrictive airworthiness limitations for airplane structures and safe life limits. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, it has notified the FAA of the unsafe condition described in the MCAI referenced above. The FAA is issuing this AD after determining that the unsafe condition described previously is likely to exist or develop on other products of the same type design.

Requirements of This AD

This AD requires revising the existing maintenance or inspection program, as applicable, to incorporate new or more restrictive airworthiness limitations, which are specified in EASA AD 2020–0267 described previously, as incorporated by reference. Any differences with EASA AD 2020–0267 are identified as exceptions in the regulatory text of this AD.

This AD requires revisions to certain operator maintenance documents to include new actions (*e.g.,* inspections). Compliance with these actions is required by 14 CFR 91.403(c). For airplanes that have been previously modified, altered, or repaired in the areas addressed by this AD, the operator may not be able to accomplish the actions described in the revisions. In this situation, to comply with 14 CFR 91.403(c), the operator must request approval for an alternative method of compliance (AMOC) according to paragraph (k)(1) of this AD.

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA developed a process to use some civil aviation authority (CAA) ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has been coordinating this process with manufacturers and CAAs. As a result, EASA AD 2020–0267 is incorporated by reference in this AD. This AD requires compliance with EASA AD 2020–0267 in its entirety through that incorporation, except for any differences identified as exceptions in the regulatory text of this AD. Using common terms that are the same as the heading of a particular section in EASA AD 2020–0267 does not mean that operators need comply only with that section. For example, where the AD requirement refers to ''all required actions and compliance times,'' compliance with this AD requirement is not limited to the section titled ''Required Action(s) and Compliance Time(s)'' in EASA AD 2020–0267. Service information required by EASA AD 2020–0267 for compliance will be available at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0789 after this AD is published.

Airworthiness Limitation ADs Using the New Process

The FAA's process of incorporating by reference MCAI ADs as the primary source of information for compliance with corresponding FAA ADs has been limited to certain MCAI ADs (primarily those with service bulletins as the primary source of information for accomplishing the actions required by the FAA AD). However, the FAA is now expanding the process to include MCAI ADs that require a change to airworthiness limitation documents, such as airworthiness limitation sections.

For these ADs that incorporate by reference an MCAI AD that changes airworthiness limitations, the FAA requirements are unchanged. Operators must revise the existing maintenance or inspection program, as applicable, to incorporate the information specified in the new airworthiness limitation document. The airworthiness limitations must be followed according to 14 CFR 91.403(c) and 91.409(e).

The previous format of the airworthiness limitation ADs included a paragraph that specified that no alternative actions (*e.g.,* inspections) or intervals may be used unless the actions and intervals are approved as an AMOC in accordance with the procedures specified in the AMOCs paragraph under ''Additional FAA Provisions.'' This new format includes a ''New Provisions for Alternative Actions and Intervals'' paragraph that does not specifically refer to AMOCs, but operators may still request an AMOC to use an alternative action, interval, or CDCCL.

FAA's Justification and Determination of the Effective Date

There are currently no domestic operators of these products. Accordingly, notice and opportunity for prior public comment are unnecessary, pursuant to 5 U.S.C. 553(b)(3). In addition, for the foregoing reason, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days.

Comments Invited

The FAA invites you to send any written relevant data, views, or arguments about this final rule. Send your comments to an address listed under **ADDRESSES**. Include ''Docket No. FAA–2021–0789; Project Identifier MCAI–2020–01607–T'' at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as ''PROPIN.'' The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Dan Rodina, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3225; email *dan.rodina@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Regulatory Flexibility Act (RFA)

The requirements of the RFA do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

Currently, there are no affected U.S.-registered airplanes. If an affected airplane is imported and placed on the U.S. Register in the future, the FAA provides the following cost estimates to comply with this AD:

The FAA has determined that revising the maintenance or inspection program takes an average of 90 work-hours per operator, although the FAA recognizes that this number may vary from operator to operator. In the past, the FAA has estimated that this action takes 1 work-hour per airplane. Since operators incorporate maintenance or inspection program changes for their affected fleet(s), the FAA has determined that a per-operator estimate is more accurate than a per-airplane estimate. Therefore, the FAA estimates the total cost per operator to be $7,650 (90 work-hours × $85 per work-hour).

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2021–19–18 Airbus SAS: Amendment 39–21736; Docket No. FAA–2021–0789; Project Identifier MCAI–2020–01607–T.

(a) Effective Date

This airworthiness directive (AD) becomes effective October 20, 2021.

(b) Affected ADs

This AD affects AD 2018–18–21, Amendment 39–19400 (83 FR 47054, September 18, 2018) (AD 2018–18–21).

(c) Applicability

This AD applies to all Airbus SAS Model A310–203, –204, –221, –222, –304, –322, –324, and –325 airplanes, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 05, Time Limits/Maintenance Checks.

(e) Reason

This AD was prompted by a determination that new or more restrictive maintenance requirements and airworthiness limitations are necessary. The FAA is issuing this AD to address the risks associated with the effects of aging on airplane systems. Such effects could change system characteristics, leading to an increased potential for failure of certain life-limited parts.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0267, dated December 3, 2020 (EASA AD 2020–0267).

(h) Exceptions to EASA AD 2020–0267

(1) Where EASA AD 2020–0267 refers to its effective date, this AD requires using the effective date of this AD.

(2) The requirements specified in paragraph (1) of EASA AD 2020–0267 do not apply to this AD.

(3) Paragraph (2) of EASA AD 2020–0267 specifies revising ''the approved AMP'' within 12 months after its effective date, but this AD requires revising the existing maintenance or inspection program, as applicable, within 90 days after the effective date of this AD.

(4) The initial compliance time for doing the tasks specified in paragraph (2) of EASA AD 2020–0267 is on or before the applicable ''limitations'' as incorporated by the requirements of paragraph (2) of EASA AD 2020–0267, or within 90 days after the effective date of this AD, whichever occurs later.

(5) The provisions specified in paragraph (3) of EASA AD 2020–0267 do not apply to this AD.

(6) The ''Remarks'' section of EASA AD 2020–0267 does not apply to this AD.

(i) New Provisions for Alternative Actions and Intervals

After the existing maintenance or inspection program has been revised as required by paragraph (g) of this AD, no alternative actions (*e.g.,* inspections) or intervals are allowed unless they are approved as specified in the provisions of the ''Ref. Publications'' section of EASA AD 2020–0267.

(j) Terminating Action for Certain Requirement of AD 2018–18–21

Accomplishing the actions required by this AD terminates the limitations for the retraction actuator assembly sliding rod having part number D52952, D52952–1, D52952–2, or D58006, as required by paragraph (g) of AD 2018–18–21 for Model A310–203, –204, –221, –222, –304, –322, –324, and –325 airplanes only.

(k) Additional FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (l) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (k)(2) of this AD, if any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(l) Related Information

For more information about this AD, contact Dan Rodina, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3225; email *dan.rodina@faa.gov.*

(m) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2020–0267, dated December 3, 2020.

(ii) [Reserved]

(3) For EASA AD 2020–0267, contact EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu;* Internet *www.easa.europa.eu.* You may find this EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2021–0789.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fr.inspection@nara.gov,* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on September 9, 2021.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

RIN 0694–AI24

The Export Administration Regulations; Editorial Revisions, Clarifications, and Corrections

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule; corrections.

SUMMARY: In this rule, the Bureau of Industry and Security (BIS) amends the Export Administration Regulations (EAR) by making targeted editorial corrections and clarifications. The errors addressed by this rule were inadvertent and these corrections will provide clarity and facilitate understanding of the regulations. This rule ensures that the language and policies already set forth in the EAR remain consistent throughout.

DATES: This rule is effective October 5, 2021.

FOR FURTHER INFORMATION CONTACT: Logan Norton, Regulatory Policy Division, *Logan.Norton@bis.doc.gov,* (202) 812–1762.

SUPPLEMENTARY INFORMATION:

Background

This final rule updates eleven parts of the Export Administration Regulations (EAR), parts 732, 734, 736, 738, 740, 744, 748, 750, 770, 772, and 774, such that most-recent language elsewhere in the EAR is consistent with the language in these parts. These changes are minor editorial revisions that either reflect Bureau of Industry and Security (BIS) policies that were previously published in the **Federal Register** and added to the EAR or reflect the modernization of procedures implemented by BIS. These revisions do not change the substance of the EAR.

Part 732 Steps for Using the EAR

In 2004, supplement no. 2 to part 732, the ''Subject to the EAR?'' flowchart, was revised to make it simpler and easier to read. However, the language of the supplement is not consistent with the language in other parts of the EAR, including language implemented before and after the 2004 amendment. In 1999, paragraphs (a) and (b) of § 734.5 were amended to better represent U.S. policy objectives but the 2004 update to supplement no. 2 did not capture these changes. Further, in 2009, paragraph (c) of § 734.5 was dropped from the EAR and in 2016, ''transfer (in-country)'' was added to the EAR in § 734.16. Elsewhere in this rule, § 734.3(a)(4) and (5) are being amended to align with § 736.2(b)(3) of the EAR; the changes to these sections also impact the flowchart in supplement no. 2 to part 732. This rule changes the ''Subject to the EAR?'' flowchart in supplement no. 2 of part 732 to reflect these changes. For example, the first text bubble of the supplement no longer mentions § 734.5(c) and the final text bubble simply refers readers to § 736.2(b)(3), rather than to any specific destinations.

Part 734 Scope of the Export Administration Regulations

Parts 734 and 736 were added to the EAR in 1996. Section 736.2 has been revised several times since then, updating the language regarding what constitutes a ''foreign-produced direct product.'' The most recent update to part 736 was in August of 2020. This rule amends § 734.3(a)(4) and (5) to reflect the terms currently used in § 736.2(b)(3) of the EAR. The definition for the term ''direct product'' is removed from § 734.3(a)(4), because it is being added to part 772, as detailed below.

Part 736

On January 15, 2021, BIS published an interim final rule (86 FR 4865) that inadvertently removed paragraphs (B) and (C) from § 736.2(b)(7)(i). Paragraphs (B) and (C) are added back by this rule. Those paragraphs dictate which schedules of chemicals listed in supplement no. 1 to part 745 a ''U.S. person'' may not export without complying with specific provisions and requirements of the EAR. In addition, as the January 15 interim final rule removed the definition of ''U.S. person'' from § 744.6(c) of the EAR (while leaving the identical definition in § 772.1 of the EAR), BIS is making conforming changes to § 736.2(b)(7)(i)(B) and (C). Specifically, BIS is revising both paragraphs to reference § 772.1, instead of § 744.6(c), for the definition of the term ''U.S. person.'' Quotation marks are also added around the term ''U.S. person'' in both paragraphs, given it is a defined term in part 772. Quotation marks are also added around the term ''direct product'' in § 736.2(b) for the same reason and as detailed below.

Part 738 Commerce Control List Overview and the Country Chart

In June of 2020, License Exception Civil End Users (CIV) was removed from the EAR. After the removal, a sample Commerce Control List entry set forth in § 738.4(b)(2) of the EAR unintentionally retained a reference to License Exception CIV. This rule rectifies this by removing the CIV reference from § 738.4(b)(2) while retaining the remainder of the sample entry.

Part 740 License Exceptions

On December 28, 2020, BIS published a final rule (85 FR 84211) adding Cyprus and Mexico to Country Group A:6. As there were issues with the amendatory instruction to that rule, this rule corrects the amendatory instruction and adds an ''X'' in Column ''[A:6]'' in Supplement No. 1 to Part 740 for ''Cyprus'' and ''Mexico.''

Part 744 Control Policy: End-User and End-Use Based

In April of 2020, BIS published a rule regarding military end users (85 FR 23459). In supplement no. 2 to part 744 of the EAR, paragraph (3)(viii) inadvertently reprinted out-of-date text from Export Control Classification Number (ECCN) 3A992 when referring to ECCN 3E991 technology for those 3A992 items. This rule updates the paragraph to reflect the current text in that ECCN. This edit does not change the scope of the license requirement for items controlled under the ECCN. Quotation marks are also added around the term ''direct product'' in supplement no. 4 to part 744, because the term is being added to part 772 by this rule, as detailed below.

Part 748 Applications (Classification, Advisory, and License) and Documentation

As has been the case for some time, the public may submit advisory opinion requests to BIS in a variety of ways in addition to through the mail (*e.g.,* the U.S. Postal Service or via a shipping and logistics delivery service). This rule revises § 748.3(c) of the EAR to include how to submit advisory opinion requests via email or through the BIS website.

Supplement no. 2 to part 748, ''Unique Application and Submission Requirements,'' is being clarified to reflect BIS policy regarding the letters of assurance described in paragraph (o)(3)(i), which are applicable to license applications submitted for the export of technology controlled for national security reasons to certain countries. Specifically, this clarification reflects BIS policy that license applicants must always obtain letters of assurance, which must be submitted to BIS upon request. Quotation marks are also added around the term ''direct product'' in supplement no. 2, because the term is being added to part 772 by this rule, as

detailed below. This rule also adds in that this applies to exports, reexports, and transfers (in-country), which is currently BIS policy regarding this paragraph.

This rule amends paragraph (b)(6) ''Block 6: Ultimate Consignee,'' of supplement no. 3 to part 748, ''Statement by Ultimate Consignee and Purchaser Content Requirements.'' Prior to publication of this rule, paragraph (b)(6) indicated that an ink signature is required on the BIS–711 ''Statement by Ultimate Consignee and Purchaser'' form. However, following public comments, in a March 2015 final rule, BIS confirmed that electronic signatures are permissible. This rule revises paragraph (b)(6) to more accurately reflect existing text found in § 748.11 of the EAR.

Part 750 Application Processing, Issuance and/or Denial

Sections 750.1, 750.8, and 750.9 are being updated to reflect BIS's use of the Simplified Network Application Process—Redesign (SNAP–R) system by eliminating or rewording parts of the sections that are no longer relevant given the online nature of the system. The SNAP–R system has been in place since October of 2006 and has largely replaced the previous system that involved the submission of paper license applications, but the EAR has not been fully updated to reflect that change. Now that BIS does not mail copies of licenses to applicants with SNAP–R accounts, and almost all exporters have access to licenses electronically (via the SNAP–R system) and can therefore save and print out multiple copies of their licenses themselves, a requirement to return a revoked license or a duplicate copy of a license is, under most circumstances, unnecessary. In § 750.8, the text specific to the return of a revoked license was relevant when BIS sent validated hard copies of licenses to exporters. This rule revises § 750.8 by removing the text requiring the return of revoked or suspended licenses. The remaining text specifies that if BIS revokes or suspends a license, the licensee must retain all applicable supporting documents and records of shipments in accordance with the recording keeping provisions of part 762 of the EAR. In § 750.9, the text specific to the return of duplicate licenses was relevant when BIS sent validated hard copies of licenses to exporters. This rule revises § 750.9 regarding lost, stolen or destroyed paper licenses by removing and reserving § 750.9(a)(3) of the EAR, which required the return of either the original or duplicate paper licenses should the original paper license be found. Doing so aligns the EAR with existing BIS policies and procedures. This rule also revises § 750.1 to reflect the changes this rule makes to §§ 750.8 and 750.9 of the EAR.

Section 750.7(a) is corrected by adding a sentence that directs readers to more detailed information regarding the release of ''technology'' authorized by the issuance of a BIS license, which is set forth within § 734.20 of the EAR. Section 750.7(a) is also broken up into subparagraphs (1), (2), and (3) to make it easier to read.

Part 770 Interpretations

''Release'' as it is used in the context of the EAR is defined in § 734.15, which was added to the EAR in 2016. However, § 770.3(d)(1)(ii) was never updated to reflect the definition. This rule rectifies this omission by amending § 770.3(d)(1)(ii) to direct readers to the definition of a ''release'' in § 734.15 and by altering the language in paragraph (d)(1)(ii) such that it answers the preceding question in § 770.3(d)(1)(i) correctly given the 2016 change in the definition of ''release.''

Part 772 Definitions of Terms

This final rule removes the definition of the term ''direct product'' from § 734.3(a)(4) and adds it to § 772.1. Given the changes to part 734 detailed above, the term ''direct product'' is better suited to appear as a defined term in part 772. This rule does not alter the definition of ''direct product'' or the BIS policy specific to the term.

BIS is also amending paragraph (a) of the definition of ''U.S. person'' in § 772.1 of the EAR to clarify that the definition applies for purposes of §§ 732.3(j), 736.2(b)(7), and 745.2(a)(1) of the EAR. This change does not alter BIS policy, but does bring the definition of ''U.S. person'' in line with the rest of the EAR.

Part 774 The Commerce Control List

This final rule corrects ECCN 0D617 to remove text that was inadvertently included from 0D606 and published as part of a revision of 0D617 on June 3, 2020 (85 FR 34306). In ECCN 0D617, this final rule removes references to 0x606 ECCNs and adds in its place text referencing the 0x617 ECCNs. This final rule also revises the Related Controls paragraph and Items paragraph (a) in the List of Items Controlled section of ECCN 0D617 to remove text that was inadvertently included from 0D606 and to add in its place the intended text from 0D617. The publication of this correction does not change existing BIS policy.

This final rule corrects a reference in the control chart for ECCN 7A611 from ''§ 724.6(a)(7)'' to ''§ 742.6(a)(7)'' in supplement no. 1 to part 774.

Export Control Reform Act of 2018

On August 13, 2018, the President signed into law the John S. McCain National Defense Authorization Act for Fiscal Year 2019, which included the Export Control Reform Act of 2018 (ECRA), 50 U.S.C. Sections 4801–4852. ECRA provides the legal basis for BIS's principal authorities and serves as the authority under which BIS issues this rule.

Rulemaking Requirements

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distribute impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This final rule has not been designated a ''significant regulatory action,'' under section 3(f) of Executive Order 12866.

2. Notwithstanding any other provision of law, no person may be required to respond to or be subject to a penalty for failure to comply with a collection of information, subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This regulation involves a collection currently approved by OMB under control number 0694–0088, Simplified Network Application Processing System. This collection includes, among other things, license applications and commodity classification, and carries a burden estimate of 29.6 minutes for a manual or electronic submission for a total burden estimate of 31,835 hours. BIS does not expect the burden hours associated with this collection to change.

3. This rule does not contain policies with federalism implications as that term is defined under Executive Order 13132.

Administrative Procedure Act and Regulatory Flexibility Act Requirements

Pursuant to Section 4821 of ECRA, this action is exempt from the Administrative Procedure Act (5 U.S.C. 553) requirements for notice of

proposed rulemaking, opportunity for public participation and delay in effective date.

Further, no other law requires that a notice of proposed rulemaking and an opportunity for public comment be given for this final rule. Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this rule under the Administrative Procedure Act or by any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) are not applicable. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

List of Subjects

15 CFR Part 732

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Part 734

Administrative practice and procedure, Exports, Inventions and patents, Research, Science and technology.

15 CFR Part 738

Exports.

15 CFR Part 744

Exports, Reporting and recordkeeping requirements, Terrorism.

15 CFR Parts 740, 748 and 750

Administrative practice and procedure, Exports, Reporting and recordkeeping requirements.

15 CFR Parts 736, 770, and 772

Exports.

15 CFR Part 774

Exports, Reporting and recordkeeping requirements, Terrorism.

Accordingly, parts 732, 734, 736, 738, 740, 744, 748, 750, 770, 772, and 774 of the Export Administration Regulations (15 CFR parts 730–774) are amended as follows:

PART 732—[AMENDED]

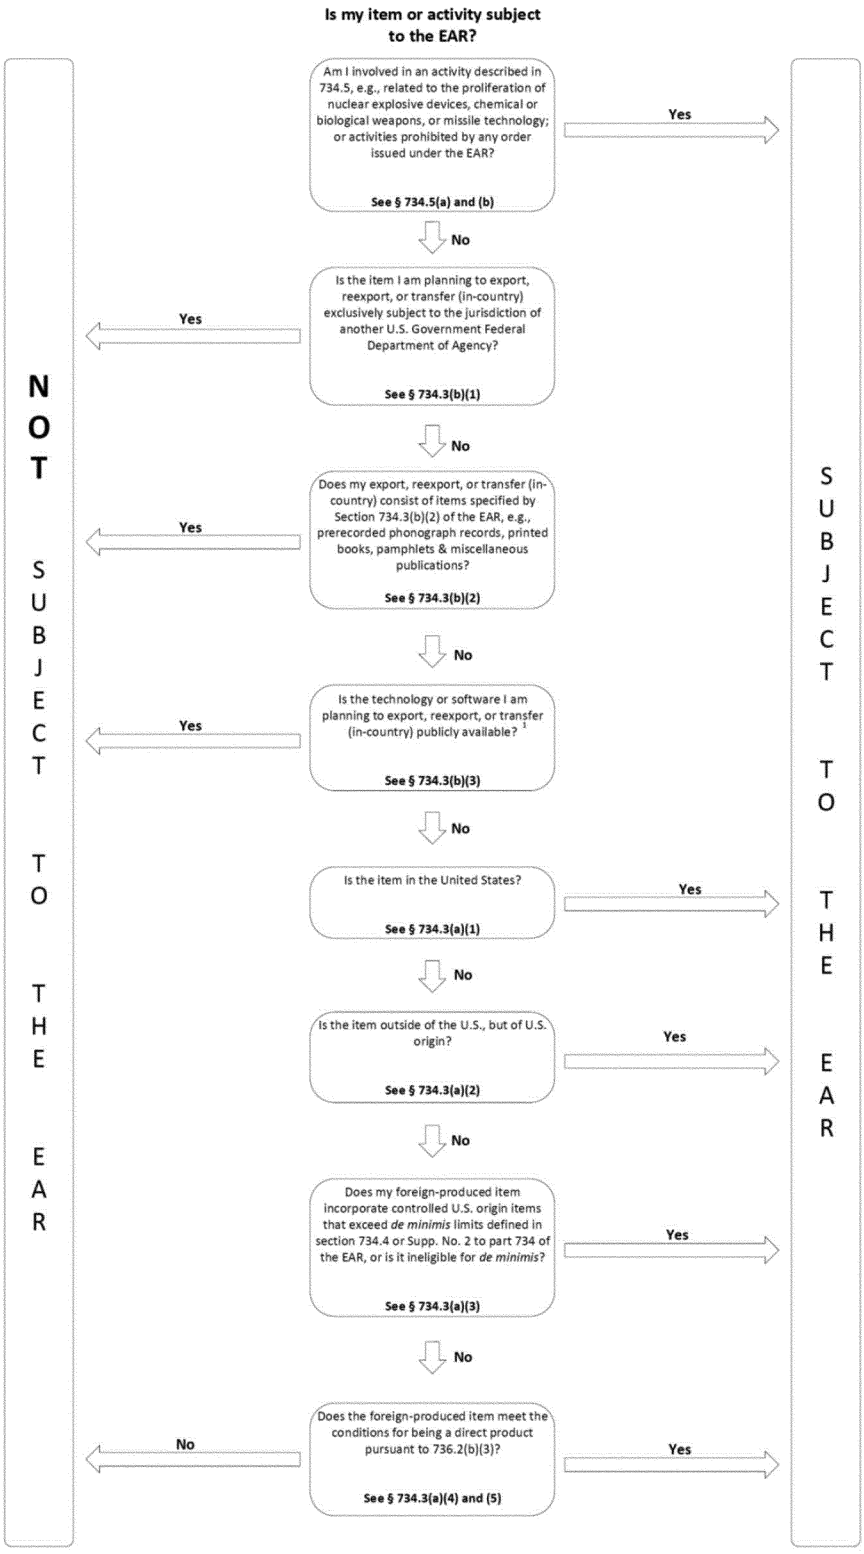
■ 1. The authority citation for part 732 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 2. Supplement no. 2 to part 732 is revised to read as follows:

Supplement No. 2 to Part 732—Subject to the EAR?

BILLING CODE 3510–33–P



[1] Encryption source code in electronic form or media (e.g., computer diskette or CD ROM) remains subject to the EAR (see §734.17)). Publicly available encryption object code "software" classified under ECCN 5D002 is not subject to the EAR when the corresponding source code meets the criteria specified in §742.15(b) of the EAR.

BILLING CODE 3510–33–C

PART 734—[AMENDED]

■ 3. The authority citation for part 734 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13020, 61 FR 54079, 3 CFR, 1996 Comp., p. 219; E.O. 13026, 61 FR 58767, 3

CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13637, 78 FR 16129, 3 CFR, 2014 Comp., p. 223; Notice of November 12, 2020, 85 FR 72897 (November 13, 2020).

■ 4. Section 734.3 is amended by revising paragraphs (a)(4) and (5), to read as follows:

§ 734.3 Items subject to the EAR.

(a) * * *

(4) Certain foreign-produced ''direct products'' of specified ''technology'' and ''software,'' as described in § 736.2(b)(3) of the EAR; and

Note to paragraph (a)(4): Certain foreign-manufactured items developed or produced from U.S.-origin encryption items exported pursuant to License Exception ENC are subject to the EAR. See § 740.17(a) of the EAR.

(5) Certain foreign-produced ''direct products'' of a complete plant or any major component of a plant as described in § 736.2(b)(3) of the EAR.

* * * * *

PART 736—[AMENDED]

■ 5. The authority citation for part 736 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13020, 61 FR 54079, 3 CFR, 1996 Comp., p. 219; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13338, 69 FR 26751, 3 CFR, 2004 Comp., p. 168; Notice of November 12, 2020, 85 FR 72897 (November 13, 2020); Notice of May 6, 2021, 86 FR 26793 (May 10, 2021).

■ 6. Section 736.2 is amended by:
■ a. Adding double quotation marks around the term ''Direct Product'' in paragraph (b) introductory text and the paragraph (b)(3) subject heading;
■ b. Adding double quotation marks around the term ''direct product'' wherever it appears in paragraph (b)(3);
■ c. Adding double quotation marks around the term ''direct products'' in paragraphs (b)(3)(ii)(B)(*2*), (b)(3)(iv)(B)(*2*), and (b)(3)(v); and
■ d. Adding paragraphs (b)(7)(i)(B) and (C).

The additions read as follows:

§ 736.2 General prohibitions and determination of applicability.

* * * * *

(b) * * *

(7) * * *

(i) * * *

(B) If you are a ''U.S. person'' as that term is defined in § 772.1 of the EAR, you may not export a Schedule 1 chemical listed in Supplement No. 1 to part 745 without first complying with the provisions of §§ 742.18 and 745.1 of the EAR.

(C) If you are a ''U.S. person'' as that term is defined in § 772.1 of the EAR, you may not export a Schedule 3 chemical listed in Supplement No. 1 to part 745 to a destination *not* listed in Supplement No. 2 to part 745 without complying with the End-Use Certificate requirements in § 745.2 of the EAR that apply to Schedule 3 chemicals controlled for CW reasons in ECCN 1C350, ECCN 1C355, and ECCN 1C395.

* * * * *

PART 738—[AMENDED]

■ 7. The authority citation for part 738 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c; 22 U.S.C. 2151 note; 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 8. Section 738.4 is amended by revising paragraph (b)(2) to read as follows:

§ 738.4 Determining whether a license is required.

* * * * *

(b) * * *

(2) Sample CCL entry.

2A000: Entry heading.

*	*	*	*	*	*	*
Cyprus			X	X		X
*	*	*	*	*	*	*
Mexico	X		X	X		X
*	*	*	*	*	*	*

* * * * *

PART 744—[AMENDED]

■ 11. The authority citation for 15 CFR part 744 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 3201 *et seq.;* 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13099, 63 FR 45167, 3 CFR, 1998 Comp., p. 208; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13224, 66 FR 49079, 3 CFR, 2001 Comp., p. 786; Notice of September 18, 2020, 85 FR 59641 (September 22, 2020); Notice of November 12, 2020, 85 FR 72897 (November 13, 2020).

■ 12. Supplement no. 2 to part 744 is amended by revising paragraph (3)(viii) to read as follows:

Supplement No. 2 to Part 744—List of Items Subject to the Military End Use or End User License Requirement of § 744.21

* * * * *

(3) * * *

(viii) 3E991 Limited to ''technology'' according to the General Technology Note for the ''development,'' ''production,'' or ''use'' of digital oscilloscopes and transient recorders using analog-to-digital conversion techniques, capable of storing transients by sequentially sampling single-shot inputs at successive intervals of less than 1 ns (greater than 1 giga-sample per second), digitizing to 8 bits or greater resolution and storing 256 or more samples.

* * * * *

Supplement 4 to Part 744 [Amended]

■ 13. Supplement no. 4 to part 744 is amended in footnote 1 by adding double quotation marks around the terms ''direct product'' and ''Direct product'' wherever they appear.

PART 748—[AMENDED]

■ 14. The authority citation for part 748 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Notice of August 6, 2021, 86 FR 43901 (August 10, 2021).

■ 15. Section 748.3 is amended by revising the introductory text of paragraph (c) and the introductory text of paragraph (c)(1) to read as follows:

§ 748.3 Classification requests and advisory opinions.

* * * * *

(c) *Advisory Opinions.* Advisory opinion requests must be made in writing, and may be delivered to BIS by mail, by email, or through the BIS website. If delivering a request by mail, submit to the address listed in § 748.1(d)(2). Both your letter and envelope must be marked ''Advisory Opinion.'' If submitting by email, submit to *RPD2@bis.doc.gov* with the subject title ''Advisory Opinion.'' If submitting through the BIS website, see *http://www.bis.doc.gov.*

(1) Your submission must contain the following information if you are requesting guidance regarding interpretations of the EAR:

* * * * *

■ 16. Supplement no. 2 to part 748 is amended by revising paragraph (o)(3)(i) to read as follows:

Supplement No. 2 to Part 748—Unique Application and Submission Requirements

* * * * *

(o) * * *

(3) * * *

(i) *Technology controlled for national security reasons.* If you are submitting a license application to export, reexport, and transfer (in-country) technology controlled for national security reasons to a country *not* listed in Country Group D:1, E:1, or E:2 (see Supplement No. 1 to part 740 of the EAR), you must obtain the letter from the ultimate consignee verifying that, unless prior authorization is obtained from BIS, the consignee will not knowingly reexport the technology to any destination, or export the ''direct product'' of the technology, directly or indirectly, to a country listed in Country Group D:1, E:1, or E:2 (see Supplement No. 2 to part 740 of the EAR). If you are unable to obtain this letter of assurance from your consignee, you must state in your license application why the assurances could not be obtained. BIS may request a copy of this letter. * * *

* * * * *

■ 17. Supplement no. 3 to part 748 is amended by revising paragraph (b)(6) to read as follows:

Supplement No. 3 to Part 748—Statement by Ultimate Consignee and Purchaser Content Requirements

* * * * *

(b) * * *

(6) Block 6: Ultimate Consignee. Enter the requested information and sign the statement digitally or in ink. (For a definition of ultimate consignee, see § 748.5(e) of this part.)

* * * * *

PART 750—[AMENDED]

■ 18. The authority citation for part 750 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* Sec. 1503, Pub. L. 108–11, 117 Stat. 559; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; E.O. 13637, 78 FR 16129, 3 CFR, 2013 Comp., p. 223; Presidential Determination 2003–23, 68 FR 26459, 3 CFR, 2004 Comp., p. 320.

■ 19. Section 750.1 is revised to read as follows:

§ 750.1 Scope.

In this part, references to the EAR are references to 15 CFR chapter VII, subchapter C. This part describes the Bureau of Industry and Security's (BIS) process for reviewing your application for a license and the applicable processing times for various types of applications. Information related to the issuance, revocation, or suspension of a license and the denial of a license application is provided along with the procedures on obtaining a duplicate or replacement license (limited to those which BIS has validated and issued in hardcopy), the transfer of a license, and the shipping tolerances available on licenses. This part also contains instructions on obtaining the status of a pending application.

■ 20. Section 750.7 is amended by revising paragraph (a) to read as follows:

§ 750.7 Issuance of licenses.

(a) *Scope.* (1) Unless limited by a condition set out in a license, the export, reexport, or transfer (in-country) authorized by a license is for the item(s), end-use(s), and parties described in the license application and any letters of explanation. The applicant must inform the other parties identified on the license, such as the ultimate consignees and end users, of the license's scope and of the specific conditions applicable to them.

(2) BIS grants licenses in reliance on representations the applicant made or submitted in connection with the license application, letters of explanation, and other documents submitted. Any license obtained in which a false or misleading representation was made, or a material fact was falsified or concealed on the license application, letters of explanation, or any document submitted in connection with the license application, shall be deemed void as of

the date of issuance. See § 750.8(a) of the EAR, which provides that all licenses are subject to revocation, in whole or in part, without notice. See part 764 of the EAR for other sanctions that may result in the event a violation occurs.

(3) A BIS license authorizing the release of ''technology'' to an entity also authorizes the release of the same ''technology'' to the entity's foreign persons who are permanent and regular employees (and who are not proscribed persons) of the entity's facility or facilities authorized on the license, except to the extent a license condition limits or prohibits the release of the ''technology'' to foreign persons of specific countries or country groups. See § 734.20 of the EAR for additional information regarding the release of ''technology'' authorized by a BIS license.

* * * * *

■ 21. Section 750.8 is amended by revising paragraph (b) to read as follows:

§ 750. 8 Revocation or suspension of licenses.

* * * * *

(b) *Revoked or suspended licenses.* If BIS revokes or suspends a license, the licensee must retain all applicable supporting documents and records of shipments in accordance with the recordkeeping provisions of part 762 of the EAR.

■ 22. Section 750.9 is amended by revising paragraph (a) to read as follows:

§ 750.9 Duplicate licenses.

(a) *Lost, stolen or destroyed.* For licensees whom BIS authorized the submission of paper applications, if a license is lost, stolen or destroyed, you, as the licensee, may obtain a duplicate of the license by submitting a letter to the BIS at the address listed in § 748.1(d)(2) of the EAR, Attention: Duplicate License Request.'' You must certify in your letter:

(1) That the original license ([number] issued to [name and address of licensee]) has been lost, stolen or destroyed; and

(2) The circumstances under which it was lost, stolen or destroyed.

* * * * *

PART 770—[AMENDED]

■ 23. The authority citation for 15 CFR part 770 is revised to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 24. Section 770.3 is amended by revising paragraph (d)(1)(ii) to read as follows:

§ 770.3 Interpretations related to exports of technology and software to destinations in Country Group D:1.

* * * * *

(d) * * *

(1) * * *

(ii) *Answer 1.* Export of technology includes release of U.S.-origin data in a foreign country as defined in § 734.15 of the EAR. So long as the circumstances described here would not exceed that permitted under the License Exception TSU for operation technology and software, as described in § 740.13(a) of the EAR, this is not a ''release'' of technology and a license would not be required.

* * * * *

PART 772—[AMENDED]

■ 25. The authority citation for part 772 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 26. Section 772.1 is amended by:

■ a. Adding a definition for ''direct product'' in alphabetical order; and

■ b. Revising paragraph (a) introductory text of the definition of ''U.S. person''.

The addition and revision read as follows:

§ 772.1 Definitions of terms as used in the Export Administration Regulations (EAR).

* * * * *

Direct product. The immediate product (including processes and services) produced directly by the use of technology or software.

* * * * *

U.S. Person. (a) For purposes of §§ 732.3(j), 736.2(b)(7), 740.21(e)(1), 744.6, 744.10, 744.11, 744.12, 744.13, 744.14, and 745.2(a)(1) of the EAR, the term U.S. person includes:

* * * * *

PART 774—[AMENDED]

■ 27. The authority citation for 15 CFR part 774 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c, 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 28. Supplement No. 1 to Part 774 is amended by revising ECCN 0D617 and ECCN 7A611 to read as follows:

Supplement No. 1 to Part 774—The Commerce Control List

* * * * *

0D617 ''Software'' ''specially designed'' for the ''development,'' ''production,'' operation, or maintenance of commodities controlled by 0A617, ''equipment'' controlled by 0B617, or materials controlled by 0C617 (see List of Items Controlled).

License Requirements

Reason for Control: NS, RS, AT, UN

Control(s)	*Country chart (see Supp. No. 1 to part 738)*

7A611 Military fire control, laser, imaging, and guidance equipment, as follows (see List of Items Controlled).

License Requirements

Reason for Control: NS, MT, RS, AT, UN

Control(s)	*Country chart (see Supp. No. 1 to part 738)*
NS applies to entire entry except 7A611.y.	NS Column 1.
MT applies to commodities in 7A611.a that meet or exceed the parameters in 7A103.b or .c.	MT Column 1.
RS applies to entire entry except 7A611.y.	RS Column 1.
RS applies to 7A611.y.	China, Russia, or Venezuela (see § 742.6(a)(7)).
AT applies to entire entry.	AT Column 1.
UN applies to entire entry except 7A611.y.	See § 746.1(b) for UN controls.

List Based License Exceptions (See Part 740 for a description of all license exceptions)

LVS: $1500
GBS: N/A

Special Conditions for STA

STA: Paragraph (c)(2) of License Exception STA (§ 740.20(c)(2) of the EAR) may not be used for any item in 7A611.

List of Items Controlled

Related Controls: (1) Military fire control, laser, imaging, and guidance equipment that are enumerated in USML Category XII, and technical data (including software) directly related thereto, are subject to the ITAR. (2) See Related Controls in ECCNs 0A504, 2A984, 6A002, 6A003, 6A004, 6A005, 6A007, 6A008, 6A107, 7A001, 7A002, 7A003, 7A005, 7A101, 7A102, and 7A103. (3) See ECCN 3A611 and USML Category XI for controls on countermeasure equipment. (4) See ECCN 0A919 for foreign-made ''military commodities'' that incorporate more than a *de minimis* amount of U.S. origin ''600 series'' controlled content.

Related Definitions: N/A

Items:

a. Guidance or navigation systems, not elsewhere specified on the USML, that are ''specially designed'' for a defense article on the USML or for a 600 series item.

b. to w. [Reserved]

x. ''Parts,'' ''components,'' ''accessories,'' and ''attachments,'' including accelerometers, gyros, angular rate sensors, gravity meters (gravimeters), and inertial measurement units (IMUs), that are ''specially designed'' for defense articles controlled by USML Category XII or items controlled by 7A611, and that are NOT:

x.1. Enumerated or controlled in the USML or elsewhere within ECCN 7A611;

x.2. Described in ECCNs 6A007, 6A107, 7A001, 7A002, 7A003, 7A101, 7A102 or 7A103; or

x.3. Elsewhere specified in ECCN 7A611.y or 3A611.y.

y. Specific ''parts,'' ''components,'' ''accessories,'' and ''attachments'' ''specially designed'' for a commodity subject to control in this ECCN or a defense article in Category XII and not elsewhere specified on the USML or in the CCL, as follows, and ''parts,'' ''components,'' ''accessories,'' and ''attachments'' ''specially designed'' therefor:

y.1 [Reserved]

Matthew S. Borman,

Deputy Assistant Secretary for Export Administration.

[FR Doc. 2021–20649 Filed 10–4–21; 8:45 am]

BILLING CODE 3510–33–P

DEPARTMENT OF COMMERCE

Bureau of Industry and Security

15 CFR Parts 742 and 774

[Docket No. 210928–0198]

RIN 0694–AI08

Commerce Control List: Expansion of Controls on Certain Biological Equipment ''Software''

AGENCY: Bureau of Industry and Security, Commerce.

ACTION: Final rule.

SUMMARY: The Bureau of Industry and Security (BIS) publishes this final rule to amend the Export Administration Regulations (EAR) to implement the decision made at the Australia Group (AG) Virtual Implementation Meeting session held in May 2021, and later adopted pursuant to the AG's silence procedure. This decision updated the AG Common Control List for dual-use biological equipment by adding controls on nucleic acid assembler and synthesizer ''software'' that is capable of designing and building functional genetic elements from digital sequence data. Prior to this AG decision, BIS, consistent with the interagency process described in the Export Control Reform Act of 2018 (ECRA), identified this ''software'' as a technology to be evaluated as an emerging technology. The decision by BIS to amend the CCL to include this ''software'' complies with the requirements of ECRA and also reflects the decision of the AG to add it to the regime's Common Control List, thereby making exports of this ''software'' subject to multilateral control through the implementation of these changes by individual AG participating countries (including the United States).

DATES: This rule is effective October 5, 2021.

FOR FURTHER INFORMATION CONTACT: Dr. Wesley Johnson, Chemical and Biological Controls Division, Office of Nonproliferation and Treaty Compliance, Bureau of Industry and Security, Telephone: (202) 482–0091, Email: *Wesley.Johnson@bis.doc.gov.*

SUPPLEMENTARY INFORMATION: The Bureau of Industry and Security (BIS) is amending the Export Administration Regulations (EAR) to implement the decision made at the Australia Group (AG) Virtual Implementation Meeting session held in May 2021, and subsequently adopted pursuant to the AG silence procedure (the AG silence procedure provides for the adoption of a measure, subsequent to its provisional acceptance at an AG plenary or intersessional meeting, provided that no participating country submits an objection on or before a specified date). The AG is a multilateral forum consisting of 42 participating countries and the European Union. These participants maintain export controls on a list of chemicals, biological agents, and related equipment and technology that could be used in a chemical or biological weapons program. The AG periodically reviews items on its control list to enhance the effectiveness of participating governments' national controls and to achieve greater harmonization among these controls.

Addition of New Export Control Classification Number (ECCN) 2D352—''Software'' for Nucleic Acid Assemblers/Synthesizers

This final rule amends the Commerce Control List (CCL), in Supplement No. 1 to part 774 of the EAR, to add a new ECCN 2D352 to reflect a decision made at the May 2021 Virtual Implementation Meeting session to modify the AG biological equipment list to add controls on ''software'' that is: (1) Designed for nucleic acid assemblers and synthesizers described on this AG Common Control List; and (2) capable of designing and building functional genetic elements from digital sequence data. Specifically, new ECCN 2D352 controls ''software'' designed for nucleic acid assemblers and synthesizers controlled by ECCN 2B352.j that is capable of designing and building functional genetic elements from digital sequence data.

This ''software,'' as controlled under new ECCN 2D352, requires a license for chemical and biological weapons (CB) reasons and anti-terrorism (AT) reasons to the destinations indicated under CB Column 2 and AT Column 1, respectively, on the Commerce Country Chart in Supplement No. 1 to part 738 of the EAR (also see the AT license requirements described in part 742 that apply to Iran, North Korea and Syria). A license also is required to certain

destinations in accordance with the embargoes and other special controls described in part 746 of the EAR.

ECCN 2E001 Amended To Include ''technology'' for New ECCN 2D352

In addition, this rule amends ECCN 2E001 (which controls, *inter alia,* ''technology'' for the ''development'' of the nucleic acid assemblers and synthesizers described in ECCN 2B352.j) to indicate that ''technology'' for the ''development'' of ''software'' controlled by new ECCN 2D352 is controlled by ECCN 2E001 for CB reasons and AT reasons to the destinations indicated under CB Column 2 and AT Column 1, respectively, on the Commerce Country Chart in Supplement No. 1 to part 738 of the EAR. The CB control entry in the License Requirements table for ECCN 2E001 is amended to reflect this change. The heading of ECCN 2E001 does not need to be amended to reflect this change because the ECCN heading indicates that, with limited specified exceptions, this ECCN controls ''technology'' for the ''development'' of ''software'' listed under Category 2D of the CCL, which now includes new ECCN 2D352.

Conforming Amendments to § 742.2 (Proliferation of Chemical and Biological Weapons)

Consistent with the May 2021 AG decision described above, this final rule amends Section 742.2 of the EAR by revising paragraphs (a)(2)(viii) and (a)(2)(ix) to reflect the addition of ECCN 2D352 to the CCL and to indicate that ''technology'' for the ''development'' of ''software'' controlled by new ECCN 2D352 is controlled by ECCN 2E001. These changes were not included in a proposed rule that BIS published on November 6, 2020 (85 FR 71012), which is described in more detail, below. However, because they are merely conforming changes that cross reference the aforementioned amendments to the CCL, BIS is making the changes in this final rule.

Evaluation of Nucleic Acid Assembler/Synthesizer ''Software'' as an Emerging Technology

Prior to the addition of nucleic acid assembler/synthesizer ''software'' to the AG biological equipment list, BIS identified this ''software'' as a technology to be evaluated as an emerging technology, consistent with the interagency process described in Section 1758 of the Export Control Reform Act of 2018 (ECRA) (codified at 50 U.S.C. 4817). This identification was based on a finding that this ''software'' is capable of being used to operate nucleic acid assemblers and synthesizers controlled under ECCN 2B352 for the purpose of generating pathogens and toxins without the need to acquire controlled genetic elements and organisms. Consequently, the absence of export controls on this ''software'' could be exploited for biological weapons purposes.

Consistent with the emerging and foundational technologies notice and comment requirements in Section 1758(a)(2)(C) of ECRA (50 U.S.C. 4817(a)(2)(C)), BIS published a proposed rule on November 6, 2020 (85 FR 71012) (hereinafter, ''November 6 proposed rule''), to provide the public with notice and the opportunity to comment on adding new ECCN 2D352 to control ''software'' for the operation of nucleic acid assemblers and synthesizers described in ECCN 2B352.j that is capable of designing and building functional genetic elements from digital sequence data. The November 6 proposed rule also indicated that ''technology'' for the ''development'' of such ''software'' would be controlled under ECCN 2E001.

As stated above, the imposition of controls on this ''software'' by this final rule (under new ECCN 2D352) reflects a decision by the AG to add this ''software'' to its biological equipment control list. Consequently, this action by BIS also conforms with Section 1758(c) of ECRA, which specifies that ''the Secretary of State, in consultation with the Secretary [of Commerce] and the Secretary of Defense, and the heads of other Federal agencies, as appropriate, shall propose that any technology identified pursuant to Section 1758(a) of ECRA be added to the list of technologies controlled by the relevant multilateral export control regimes.''

Comments Submitted in Response to BIS's November 6 Proposed Rule

BIS received comments from four respondents in response to the publication of its November 6 proposed rule. The comments from these respondents, together with BIS's responses, are described below.

Comment: One respondent stated that BIS should not treat commodities and ''software'' as potential emerging technologies, because Section 1758 of ECRA, which provides the statutory standard for establishing new controls on emerging and foundational technologies, refers only to ''technology,'' as defined in Section 1742 of ECRA (codified at 50 U.S.C. 4801). The respondent noted that Section 1758 of ECRA makes no mention of commodities or ''software,'' which, together with ''technology,'' are included in the statutory definition of ''item.'' The respondent further observed that the term ''item'' is included in other sections of ECRA and that its absence from Section 1758 is given meaning by considering only ''technology'' as defined in Section 1742 of ECRA. The respondent also noted that this interpretation would be consistent with the EAR definition of ''technology,'' which does not include commodities or ''software.'' Consequently, the respondent recommended that BIS should follow this interpretation of the statute, as well as its own regulations regarding the definition of ''technology,'' by identifying only emerging ''technology'' and not related emerging commodities and ''software.''

BIS response: The terms ''technologies,'' ''emerging technologies'' and ''critical technologies'' are used in Section 1758 of ECRA (50 U.S.C. 4817) and Section 721(a)(6) of the Defense Production Act of 1950 (DPA), as amended (50 U.S.C. 4565(a)(6)), with the latter defining ''critical technologies'' to mean those described in 50 U.S.C. 4565(a)(6)(A)(i) through (vi). The DPA indicates that the term ''critical technologies'' includes by definition emerging and foundational technologies controlled pursuant to Section 1758 of ECRA, as well as ''items included on the Commerce Control List'' for multilateral reasons or for surreptitious listening or regional stability reasons. As the respondent noted, the term ''items'' includes ''commodities,'' ''software'' and ''technology.'' Consequently, the term ''technologies,'' as used within the context of these ECRA and DPA provisions, encompasses ''commodities,'' ''software'' and ''technology,'' and not ''technology'' only (*e.g.,* as that term is more narrowly defined in Section 1742 of ECRA). Furthermore, note that BIS's August 27, 2020 (85 FR 52934), advance notice of proposed rulemaking on the identification and review of controls for certain foundational technologies stated that the term ''technologies,'' as used in Section 1758 of ECRA, includes not only ''technology,'' but also ''commodities'' and ''software'' as those terms are used in the EAR.

Comment: One respondent observed that the ''capable of'' standard does not place sufficient emphasis upon the purpose for which an item is designed. Consequently, this standard might inadvertently control technology that is not designed to produce a controlled item, even when the ability of the technology to produce the controlled item is wholly unrelated to the primary

purpose of the technology. Furthermore, the respondent noted that an exporter could be unaware that a given technology is ''capable of'' performing a function for which the technology was not designed and for which it is not commonly used.

BIS response: The consensus of the interagency process followed in accordance with Section 4817 of ECRA was that emerging technology controls should apply to ''software'' designed for nucleic acid assemblers and synthesizers controlled by 2B352.j that is ''capable of'' designing and building functional genetic elements from digital sequence data. The scope of this control is also consistent with the decision made at the AG's May 2021 Virtual Implementation Meeting session to add this ''software'' to its ''Control List of Dual-Use Biological Equipment and Related Technology and Software.'' If the controls on this ''software'' applied only to ''software'' ''designed'' or ''specially designed'' for the purpose of generating pathogens and toxins without the need to acquire controlled genetic elements and organisms, the scope of the controls would have been far too narrow. Consequently, there would have been a significantly increased risk that certain ''software'' not captured by narrower controls could have been exploited for biological weapons purposes.

Comment: One respondent stated that the ''software'' controls proposed to be implemented in new ECCN 2D352, and all future emerging and foundational technology controls, should be implemented multilaterally, rather than unilaterally. The respondent noted that a multilateral approach to export controls would increase their effectiveness and minimize their impact on U.S. industry. Specifically, multilateral export controls are preferable to unilateral controls, because the former typically place U.S. industry on a more level playing field versus producers/suppliers in other countries.

BIS response: This final rule imposes controls on ''software'' designed for nucleic acid assemblers and synthesizers controlled by 2B352.j to reflect the decision made at the AG's May 2021 Virtual Implementation Meeting session to add such ''software'' to its ''Control List of Dual-Use Biological Equipment and Related Technology and Software.'' This action by BIS is in accordance with Section 4817(c) of ECRA, which specifies that ''the Secretary of State, in consultation with the Secretary [of Commerce] and the Secretary of Defense, and the heads of other Federal agencies, as appropriate, shall propose that any technology identified pursuant to Section 4817(a) of ECRA be added to the list of technologies controlled by the relevant multilateral export control regimes.''

Comment: One respondent recommended that BIS issue emerging and foundational technology controls as proposed rules and closely follow ECRA's statutory requirements and guidance. This would provide industry with the opportunity to provide formal comments to government officials so that the latter could address industry's questions and concerns. The respondent further noted that such consultations are critical to the effectiveness of regulations in achieving national security goals, without placing undue or unintended burdens on U.S. exports.

BIS response: Consistent with the emerging and foundational technologies notice and comment requirements in Section 4817(a)(2)(C) of ECRA, BIS published a proposed rule on November 6, 2020 (85 FR 71012), to provide the public with notice and the opportunity to comment on adding a new ECCN 2D352 to control ''software'' for the operation of nucleic acid assemblers and synthesizers described in ECCN 2B352.j that is capable of designing and building functional genetic elements from digital sequence data. As indicated above, BIS received comments from four respondents in response to the publication of its November 6 proposed rule. These comments are addressed by BIS in the preamble of this final rule.

Comment: One respondent expressed concern that the acquisition of the nucleic acid assembler and synthesizer ''software'' proposed for control under new ECCN 2D352 by BIS's November 6 proposed rule could be used to generate pathogens and toxins without the need to directly acquire controlled genetic elements and organisms. This respondent indicated that ''the capabilities of this ''software'' lower the bar for acquisition of controlled genetic elements and so represent an increase in the risk of proliferation of biological weapons-related technology.'' According to this respondent, automated benchtop synthesis devices could allow unskilled individuals to create DNA sequences that might be used to produce a biological weapon. This respondent also expressed a growing concern about the potential for active circumvention of ''software'' for the operation of nucleic acid assemblers and synthesizers. For example, ''software'' for operating benchtop nucleic acid synthesis devices could be written to incorporate biosecurity screening onboard the device. Consequently, if such ''software'' were easily acquired (*e.g.,* in the absence of export controls), these devices could be hacked to circumvent biosecurity screening, thereby enabling covert synthesis of otherwise controlled genetic elements. For this reason, these devices (and, in certain instances, their components and operating ''software'') should be subject to export controls. In this regard, the respondent indicated a preference for multilateral export controls (*e.g.,* the adoption of export controls by the Australia Group).

BIS Response: The views expressed by this respondent support, and expand upon, the rationale provided by BIS (both in its November 6 proposed rule and in this final rule) for the imposition of controls on this nucleic acid assembler/synthesizer ''software'' under new ECCN 2D352. In addition, as noted in response to other comments described in this final rule, the controls on this ''software'' reflect the decision made at the AG's May 2021 Virtual Implementation Meeting session and, consequently, are being imposed multilaterally by all AG participating countries (including the United States).

Comment: One respondent expressed concern that the establishment by BIS of more restrictive controls on ''software'' for the operation of certain automated nucleic acid assemblers and synthesizers could damage trade and collaboration in this field with certain U.S. allies and thereby decrease the United States' global competitiveness in this field. Consequently, this respondent stated that any controls that are placed on such ''software'' should not impair the ability of the United States and its allies to trade in intermediate goods or to collaborate on R&D, both of which are crucial to maintaining their shared advantages vis-à-vis other foreign competitors. In this regard, the respondent noted that the methods for manipulating, growing, recovering, concentrating, stabilizing, and testing biological materials for use in weapons employ many of the same materials and equipment used to produce vaccines, pharmaceuticals, and a wide variety of food products.

BIS response: As indicated above, new ECCN 2D352 controls ''software'' designed for nucleic acid assemblers and synthesizers controlled by 2B352.j, consistent with the decision made at the AG's May 2021 Virtual Implementation Meeting session to add such ''software'' to its ''Control List of Dual-Use Biological Equipment and Related Technology and Software.'' This ''software,'' as controlled under new ECCN 2D352, requires a license for CB reasons and AT reasons to the destinations indicated under CB

Column 2 and AT Column 1, respectively, on the Commerce Country Chart in Supplement No. 1 to part 738 of the EAR. Consequently, this ''software'' generally does not require a license for export, reexport or transfer (in-country) to destinations located in AG-participating countries. That being the case, the controls that apply to this ''software'' under new ECCN 2D352 should not impair the ability of the United States to trade in intermediate goods with most of its allies or to collaborate on R&D with such countries.

Comment: One respondent asserted that the nucleic acid assembler and synthesizer ''software'' proposed for control under new ECCN 2D352 by BIS's November 6 proposed rule is currently subject to the controls described in Category XIV (m) of the United States Munitions List (USML) (22 CFR 121.1), as well as the controls described in USML Category XIV(f)(8). Specifically, this respondent stated that such ''software'' involves technical data directly related to the defense articles enumerated in paragraphs (a) through (l) and (n) of USML Category XIV and that, as such, it is subject to the export licensing jurisdiction of the Directorate of Defense Trade Controls, U.S. Department of State, under the International Traffic in Arms Regulations (ITAR) (22 CFR parts 120–130). Furthermore, the respondent asserted that such ''software'' is also restricted per USML Category XIV(f)(8)(ii) and (f)(8)(iii), which apply to any part, component, accessory, attachment, equipment, or system that is either manufactured using classified production data or being developed using classified information.

BIS Response: The ''software'' that this final rule controls under new ECCN 2D352 on the CCL is dual-use ''software'' that, as noted above, was added to the AG ''Control List of Dual-Use Biological Equipment and Related Technology and Software'' following a decision made at the AG's May 2021 Virtual Implementation Meeting session. As indicated in its title, all of the items included on this AG common control list are dual-use items—not military items. Consequently, the respondent is mistaken in claiming that such ''software'' is restricted per USML Category XIV(f)(8)(ii) and (f)(8)(iii), which apply to any part, component, accessory, attachment, equipment, or system that is either manufactured using classified production data or being developed using classified information. New ECCN 2D352 does not control ''software'' that was manufactured, or is in the process of being developed, using classified information subject to control under the ITAR or the regulations of any other U.S. Government agency.

Saving Clause

Shipments of items removed from eligibility for export, reexport or transfer (in-country) under a license exception or without a license (*i.e.,* under the designator ''NLR'') as a result of this regulatory action that were on dock for loading, on lighter, laden aboard an exporting carrier, or en route aboard a carrier to a port of export, on October 5, 2021, pursuant to actual orders for export, reexport or transfer (in-country) to a foreign destination, may proceed to that destination under the previously applicable license exception or without a license (NLR) so long as they are exported, reexported or transferred (in-country) before December 6, 2021. Any such items not actually exported, reexported or transferred (in-country) before midnight, on December 6, 2021, require a license in accordance with this regulation.

''Deemed'' exports of ''technology'' and ''source code'' removed from eligibility for export under a license exception or without a license (under the designator ''NLR'') as a result of this regulatory action may continue to be made under the previously available license exception or without a license (NLR) before December 6, 2021. Beginning at midnight on December 6, 2021, such ''technology'' and ''source code'' may no longer be released, without a license, to a foreign national subject to the ''deemed'' export controls in the EAR when a license would be required to the home country of the foreign national in accordance with this regulation.

Export Control Reform Act of 2018

The Export Control Reform Act of 2018 (ECRA), as amended, codified at 50 U.S.C. 4801–4852, serves as the authority under which BIS issues this rule.

Rulemaking Requirements

1. Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including: Potential economic, environmental, public health and safety effects; distributive impacts; and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits and of reducing costs, harmonizing rules, and promoting flexibility. This rule has been designated a ''significant regulatory action,'' although not economically significant, under section 3(f) of Executive Order 12866. Accordingly, this rule has been reviewed by the Office of Management and Budget.

2. Notwithstanding any other provision of law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) (PRA), unless that collection of information displays a currently valid Office of Management and Budget (OMB) Control Number. This rule contains the following collections of information subject to the requirements of the PRA. These collections have been approved by OMB under control numbers 0694–0088 (Simplified Network Application Processing System) and 0694–0096 (Five Year Records Retention Period). The approved information collection under OMB control number 0694–0088 includes license applications, among other things, and carries a burden estimate of 29.6 minutes per manual or electronic submission for a total burden estimate of 31,833 hours. The approved information collection under OMB control number 0694–0096 includes recordkeeping requirements and carries a burden estimate of less than 1 minute per response for a total burden estimate of 248 hours.

Although this final rule makes important changes to the EAR for items controlled for chemical/biological (CB) reasons, BIS has determined that the overall increase in costs and burdens due to this rule will be minimal. Specifically, BIS expects the burden hours associated with these collections will increase, slightly, by 7 hours and 39 minutes (*i.e.,* 15 applications × 30.6 minutes per response) for a total estimated cost increase of $230 (*i.e.,* 7 hours and 39 minutes × $30 per hour). The $30 per hour cost estimate for OMB control number 0694–0088 is consistent with the salary data for export compliance specialists currently available through *glassdoor.com* (*glassdoor.com* estimates that an export compliance specialist makes $55,280 annually, which computes to roughly $26.58 per hour). This increase is not expected to exceed the existing estimates currently associated with OMB control numbers 0694–0088 and 0694–0096.

Written comments and recommendations for the information collections referenced above should be sent within 30 days of the publication of this final rule to: *www.reginfo.gov/public/do/PRAMain.* Find these

particular information collections by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

3. This rule does not contain policies with Federalism implications as that term is defined in Executive Order 13132.

4. As stated in the preamble of this final rule, the amendments contained in this rule reflect a decision made at the Australia Group (AG) Virtual Implementation Meeting session held in May 2021, and later adopted pursuant to the AG's silence procedure. Therefore, pursuant to Section 1762 of the Export Control Reform Act of 2018 (ECRA) (50 U.S.C. Sec. 4821), this action is exempt from the Administrative Procedure Act (APA) (5 U.S.C. 553) requirements for notice of proposed rulemaking, opportunity for public participation and delay in effective date.

Because a notice of proposed rulemaking and an opportunity for public comment are not required to be given for this final rule by the APA or any other law, the analytical requirements of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA) (5 U.S.C. 601 *et seq.*), are not applicable.

Consistent with the emerging and foundational technologies notice and comment requirements in Section 1758(a)(2)(C) of ECRA (50 U.S.C. 4817(a)(2)(C)), BIS published a proposed rule on November 6, 2020 (85 FR 71012), to provide the public with notice and the opportunity to comment on its proposal to add a new ECCN 2D352 to the Commerce Control List (CCL), for the purpose of controlling ''software'' for certain nucleic acid synthesizers and assemblers for chemical/biological (CB) reasons. In addition, consistent with the Regulatory Flexibility Act, BIS prepared an initial regulatory flexibility analysis (IRFA) of the impact that the proposed rule, if adopted, would have on small businesses. The IRFA prepared by BIS requested comments on the analyses and conclusions contained therein, including the overall conclusion that the amendments in BIS's November 6 proposed rule would not have a significant economic impact on a substantial number of small entities.

BIS received comments from four respondents on its November 6 proposed rule—these comments and BIS's responses are summarized in the preamble of this final rule. BIS did not receive any comments in response to the analyses and conclusions contained in the IRFA for its November 6 proposed rule. Accordingly, no regulatory flexibility analysis is required for this final rule, and none has been prepared.

List of Subjects

15 CFR Part 742

Exports, Terrorism.

15 CFR Part 774

Exports, Reporting and recordkeeping requirements, Terrorism.

For the reasons stated in the preamble, parts 742 and 774 of the Export Administration Regulations (15 CFR parts 730–774) are amended as follows:

PART 742—CONTROL POLICY—CCL BASED CONTROLS

■ 1. The authority citation for 15 CFR part 774 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 22 U.S.C. 3201 *et seq.;* 42 U.S.C. 2139a; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; Sec. 1503, Pub. L. 108–11, 117 Stat. 559; E.O. 12058, 43 FR 20947, 3 CFR, 1978 Comp., p. 179; E.O. 12851, 58 FR 33181, 3 CFR, 1993 Comp., p. 608; E.O. 12938, 59 FR 59099, 3 CFR, 1994 Comp., p. 950; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783; Presidential Determination 2003–23, 68 FR 26459, 3 CFR, 2004 Comp., p. 320; Notice of November 12, 2020, 85 FR 72897 (November 13, 2020).

■ 2. Section 742.2 is amended by revising paragraphs (a)(2)(viii) and (ix) to read as follows:

§ 742.2 Proliferation of chemical and biological weapons.

(a) * * *

(2) * * *

(viii) Software identified in ECCN 2D351 or 2D352, as follows:

(A) Dedicated software identified in ECCN 2D351 for the ''use'' of toxic gas monitoring systems and their dedicated detecting components controlled by ECCN 2B351;

(B) Software designed for nucleic acid assemblers and synthesizers controlled by 2B352.j that is capable of designing and building functional genetic elements from digital sequence data.

(ix) Technology identified in ECCN 2E001 for the ''development'' of software controlled by ECCN 2D351 or 2D352.

* * * * *

PART 774—THE COMMERCE CONTROL LIST

■ 3. The authority citation for 15 CFR part 774 continues to read as follows:

Authority: 50 U.S.C. 4801–4852; 50 U.S.C. 4601 *et seq.;* 50 U.S.C. 1701 *et seq.;* 10 U.S.C. 8720; 10 U.S.C. 8730(e); 22 U.S.C. 287c, 22 U.S.C. 3201 *et seq.;* 22 U.S.C. 6004; 42 U.S.C. 2139a; 15 U.S.C. 1824; 50 U.S.C. 4305; 22 U.S.C. 7201 *et seq.;* 22 U.S.C. 7210; E.O. 13026, 61 FR 58767, 3 CFR, 1996 Comp., p. 228; E.O. 13222, 66 FR 44025, 3 CFR, 2001 Comp., p. 783.

■ 4. In Supplement No. 1 to Part 774 (the Commerce Control List), Category 2, add an entry for ECCN 2D352 immediately following ECCN 2D351, and revise ECCN 2E001 to read as follows:

Supplement No. 1 to Part 774—The Commerce Control List

* * * * *

2D352 ''Software'' designed for nucleic acid assemblers and synthesizers controlled by 2B352.j that is capable of designing and building functional genetic elements from digital sequence data.

BILLING CODE 3510–33–P

FEDERAL TRADE COMMISSION

16 CFR Part 1

Procedures for Submission of Rules Under the Horseracing Integrity and Safety Act

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission (''FTC'' or ''Commission'') is issuing rules pursuant to the Horseracing Integrity and Safety Act (''Act'') to provide procedures for the Horseracing Integrity and Safety Authority (''Authority'') to submit its proposed rules and proposed rule modifications to the Commission for review.

DATES: These rule revisions are effective on October 5, 2021.

FOR FURTHER INFORMATION CONTACT: Austin King (202–326–3166), Associate General Counsel for Rulemaking, Office of the General Counsel, Federal Trade Commission, 600 Pennsylvania Avenue NW, Washington, DC 20580.

SUPPLEMENTARY INFORMATION: The Horseracing Integrity & Safety Act,[1] enacted on December 27, 2020, directs the Federal Trade Commission to oversee the activities of a private, self-regulatory organization called the Horseracing Integrity and Safety Authority.

Section 4(a) of the Act, 15 U.S.C. 3053(a), requires the Authority to submit to the Commission, in accordance with such rules as the Commission may prescribe under Section 553 of Title 5, United States Code, any proposed rule, or proposed modification to a rule, of the Authority relating to: (1) The bylaws of the Authority; (2) a list of permitted and prohibited medications, substances, and methods, including allowable limits of permitted medications, substances, and methods; (3) laboratory standards for accreditation and protocols; (4) standards for racing surface quality maintenance; (5) racetrack safety standards and protocols; (6) a program for injury and fatality data analysis; (7) a program of research and education on safety, performance, and anti-doping and medication control; (8) a description of safety, performance, and anti-doping and medication control rule violations applicable to covered horses and covered persons; (9) a schedule of civil sanctions for violations; (10) a process or procedures for disciplinary hearings; and (11) a formula or methodology for determining the assessments described in 15 U.S.C. 3052(f).

Accordingly, the Commission is adding a new subpart S to part 1 of its Rules of Practice, to provide procedures for the Authority to file its proposed rules and proposed modifications to existing rules with the Commission for review.

I. Section 1.140—Definitions

Section 1.140 defines relevant terms used in the proposed regulations. Each definition is based on a corresponding definition contained in Section 2 of the Act, 15 U.S.C. 3051, except as otherwise noted below.

The definition of ''HISA Guidance'' derives from Section 5(g)(1) of the Act, 15 U.S.C. 3054(g)(1), which states the Authority may issue guidance that ''sets forth an interpretation of an existing rule, standard, or procedure of the Authority'' or a ''policy or practice with respect to the administration or enforcement of such an existing rule, standard, or procedure'' and ''relates solely to the administration of the Authority; or any other matter, as specified by the Commission, by rule, consistent with the public interest and the purposes of this subsection [15 U.S.C. 3054(g)(1)].'' The Commission is adopting this definition and adding that HISA Guidance does not have the force of law, to distinguish HISA Guidance from a proposed modification to a rule.

The Act does not contain definitions for ''proposed rule'' or ''proposed modification.'' However, because these terms are used frequently throughout the regulations, the Commission is defining them for clarity. ''Proposed rule'' is defined as any rule proposed by the Authority pursuant to the Act. ''Proposed rule modification'' or ''modification'' is defined as any proposed modification to a rule, proposed rule change, or any interpretation or statement of policy or practice relating to an existing rule of the Authority that is not HISA Guidance and would have the force of law if

[1] 15 U.S.C. 3051 through 3060.

approved as a final rule. A proposed modification is distinguished from HISA Guidance in that a modification would have the force of law if approved and must therefore be approved by the Commission pursuant to Section 4(b)(2) of the Act, 15 U.S.C. 3053(b)(2). HISA Guidance need not be approved by the Commission but takes effect upon submission to the Commission pursuant to Section 5(g)(3) of the Act, 15 U.S.C. 3054(g)(3).

II. Section 1.141—Required Submissions

The Act requires the Authority to submit proposed rules or proposed rule modifications on certain subjects to the Commission for approval. These subjects are set forth in Section 4(a) of the Act, 15 U.S.C. 3053(a), which states the Authority must submit to the Commission, in accordance with such rules as the Commission may prescribe under Section 553 of Title 5, any proposed rule, or proposed modification to a rule, of the Authority relating to: (1) The bylaws of the Authority; (2) a list of permitted and prohibited medications, substances, and methods, including allowable limits of permitted medications, substances, and methods; (3) laboratory standards for accreditation and protocols; (4) standards for racing surface quality maintenance; (5) racetrack safety standards and protocols; (6) a program for injury and fatality data analysis; (7) a program of research and education on safety, performance, and anti-doping and medication control; (8) a description of safety, performance, and anti-doping and medication control rule violations applicable to covered horses and covered persons; (9) a schedule of civil sanctions for violations; (10) a process or procedures for disciplinary hearings; and (11) a formula or methodology for determining assessments described in 15 U.S.C. 3052(f). The Commission is adopting this language in its regulations.

The Commission is also adding a provision that the Authority must submit ''any other proposed rule or modification the Act requires the Authority to submit to the Commission for approval.'' For instance, the Act requires the Authority to submit rules regarding modifications to baseline anti-doping standards (15 U.S.C. 3055(g)(3)(b)) and modifications to racetrack safety rules (15 U.S.C. 3056(c)(2)(B)(ii)). Section 5(c)(2) of the Act, 15 U.S.C. 3054(c)(2), requires the Authority to submit to the Commission for approval any rules and procedures under Section 5(c)(1)(A) of the Act, 15 U.S.C. 3054(c)(1)(A), authorizing access to offices, racetrack facilities, other places of business, books, records, and personal property of covered persons used in the care, treatment, training, and racing of covered horses; authorizing the issuance and enforcement of subpoenas and subpoenas duces tecum; and authorizing other investigatory powers of the nature and scope exercised by State racing commissions before the program effective date. Such proposed rules and modifications must also be submitted to the Commission for approval.

III. Section 1.142—Submission of Proposed Rule or Modification

The Act requires the Commission to evaluate the Authority's proposed rules and modifications to determine whether they are consistent with the Act and the applicable rules approved by the Commission. *See* 15 U.S.C. 3053(c)(2). To avoid delays in the rule review process, the Commission is requiring the Authority to submit the information necessary for it to evaluate the proposed rule or modification promptly and efficiently. Section 1.142 is designed to elicit the information the Commission needs to determine whether the proposed rule or modification is consistent with the Act and the rules and regulations issued thereunder.

A. Contents of Submission

For a submission to qualify as a proposed rule or proposed modification to a rule under Section 4(a) of the Act, 15 U.S.C. 3053(a), the Authority must submit a complete draft of the **Federal Register** document for its proposed or modified rule, which includes the text of the rule and a statement of the purpose of, and statutory basis for, the proposed rule or modification. The Commission's intention is to require the Authority to provide an explanation of its rules that will allow both the Commission and the public to understand the nature and purpose of its proposed rules or modifications—the reasons for adopting the proposed rule or modification; any problems the proposed rule or modification is intended to address and how the proposed rule or modification will resolve those problems; and how the proposed rule or modification will affect covered persons, covered horses, and covered horseraces.

The Commission is also requiring the Authority to explain the statutory basis for its proposed rules or modifications. To evaluate a proposed rule or modification, the Commission must be able to understand why the Authority believes its proposed rule or modification is consistent with the Act and the applicable rules approved by the Commission. Evaluation of a proposed rule or modification will also be aided by the Authority's description of any reasonable alternatives it considered and the reasons it selected the proposed rule or modification over the alternatives.

The Act does not give the Authority broad discretion in developing rules. It sets forth guardrails, in the form of baseline standards for anti-doping and medication control (15 U.S.C. 3055(g)(2)(A)), racetrack safety standards which the Authority must consider (15 U.S.C. 3056(a)(2)), guidelines for determining funding and calculating costs (15 U.S.C. 3052(f)(1)(C)(ii)), a specific formula for the assessment and collection of fees (15 U.S.C. 3052(f)(3)(C)), who must register with the Authority and the conditions of registration (15 U.S.C. 3054(d)), guidelines for establishing rule violations (15 U.S.C. 3057(a)(2)), requisite elements of the Authority's results management and disciplinary program (15 U.S.C. 3057(c)(2)), guidelines for establishing civil sanctions (15 U.S.C. 3057(d)(2)), and more. Accordingly, the Authority must explain why its proposed rule or modification is consistent with any standards in the Act and the rules approved by the Commission. Because the requisite considerations for anti-doping and racetrack safety are the most prescriptive, this section specifically addresses those standards and factors. The less prescriptive standards and factors must also be addressed, and the Commission provides for this in a less prescriptive rule, as discussed below.

1. Anti-Doping and Medication Control Program Considerations

When proposing a rule or modification to the horseracing anti-doping and medication control program, the Authority must explain how it considered the factors in Section 6 of the Act, 15 U.S.C. 3055, including the unique characteristics of a breed of horse made subject to the Act by election of a State racing commission or breed governing organization for such horse pursuant to Section 5(*l*) of the Act, 15 U.S.C. 3054(*l*), as required by Section 6(a)(2) of the Act, 15 U.S.C. 3055(a)(2). The Authority must explain how it considered the factors in Section 6(b) of the Act, 15 U.S.C. 3055(b), namely that: (1) Covered horses should compete only when they are free from the influence of medications, other foreign substances, and methods that affect their performance; (2) covered horses that are injured or unsound should not train or participate in covered races, and the use

of medications, other foreign substances, and treatment methods that mask or deaden pain in order to allow injured or unsound horses to train or race should be prohibited; (3) rules, standards, procedures, and protocols regulating medication and treatment methods for covered horses and covered races should be uniform and uniformly administered nationally; (4) to the extent consistent with chapter 57A of title 15, consideration should be given to international anti-doping and medication control standards of the International Federation of Horseracing Authorities and the Principles of Veterinary Medical Ethics of the American Veterinary Medical Association; (5) the administration of medications and treatment methods to covered horses should be based on an examination and diagnosis that identifies an issue requiring treatment for which the medication or method represents an appropriate component of treatment; (6) the amount of therapeutic medication a covered horse receives should be the minimum necessary to address the diagnosed health concerns identified during the examination and diagnostic process; and (7) the welfare of covered horses, the integrity of the sport, and the confidence of the betting public require full disclosure to regulatory authorities regarding the administration of medications and treatments to covered horses.

In addition, Section 6(g)(2)(A) of the Act, 15 U.S.C. 3055(g)(2)(A), provides that certain baseline anti-doping and medication control rules must constitute the initial rules of the horseracing anti-doping and medication control program and, except as exempted pursuant to Section 6(e) and (f) of the Act, 15 U.S.C. 3055(e) and (f), remain in effect at all times after the program effective date. Such baseline anti-doping and medication control rules include: (1) The lists of permitted and prohibited substances (including drugs, medications, and naturally occurring substances and synthetically occurring substances) in effect for the International Federation of Horseracing Authorities, including the International Federation of Horseracing Authorities International Screening Limits for urine, dated May 2019, and the International Federation of Horseracing Authorities International Screening Limits for plasma, dated May 2019; (2) the World Anti-Doping Agency International Standard for Laboratories (version 10.0), dated November 12, 2019; (3) the Association of Racing Commissioners International out-of-competition testing standards, Model Rules of Racing (version 9.2); and (4) the Association of Racing Commissioners International penalty and multiple medication violation rules, Model Rules of Racing (version 6.2). In the case of a conflict among the rules, Section 6(g)(2)(B) of the Act, 15 U.S.C. 3055(g)(2)(B), provides that the most stringent rule shall apply. Accordingly, the Commission is requiring the Authority to state whether a proposed rule adopts the baseline standards identified in Section 6(g)(2)(A) of the Act, 15 U.S.C. 3055(g)(2)(A). If there is a conflict in any baseline standards identified in Section 6(g)(2)(A) of the Act, 15 U.S.C. 3055(g)(2)(A), the Authority must identify the conflict and state whether the standard it adopted is the most stringent standard. Under Section 6(g)(3)(C) of the Act, 15 U.S.C. 3055(g)(3)(C), ''[t]he Authority shall not approve any proposed modification that renders an anti-doping and medication control rule less stringent than the baseline anti-doping and medication control rules . . . without the approval of the anti-doping and medication control enforcement agency.'' Thus, for a proposed rule modification, the Authority must explain whether the modification renders an anti-doping and medication control rule less stringent than the baseline anti-doping and medication control rules described in Section 6(g)(2)(A) of the Act, 15 U.S.C. 3055(g)(2)(A), and state whether the anti-doping and medication control enforcement agency has approved of the change.

2. Racetrack Safety Program Considerations

Section 7 of the Act, 15 U.S.C. 3056, requires the Authority to consider certain factors when developing the racetrack safety program. Accordingly, when proposing a rule or modification to any rule regarding its racetrack safety program, the Authority must explain how the proposed rule or modification meets the requirements in Section 7(b) of the Act, 15 U.S.C. 3056(b), which provides that the horseracing safety program must include the following: (1) A set of training and racing safety standards and protocols taking into account regional differences and the character of differing racing facilities; (2) a uniform set of training and racing safety standards and protocols consistent with the humane treatment of covered horses, which may include lists of permitted and prohibited practices or methods (such as crop use); (3) a racing surface quality maintenance system that takes into account regional differences and the character of differing racing facilities (which may include requirements for track surface design and consistency and established standard operating procedures related to track surface, monitoring, and maintenance, such as standardized seasonal assessment, daily tracking, and measurement); (4) a uniform set of track safety standards and protocols, that may include rules governing oversight and movement of covered horses and human and equine injury reporting and prevention; (5) programs for injury and fatality data analysis, that may include pre- and post-training and race inspections, use of a veterinarian's list, and concussion protocols; (6) the undertaking of investigations at racetrack and non-racetrack facilities related to safety violations; (7) procedures for investigating, charging, and adjudicating violations and for the enforcement of civil sanctions for violations; (8) a schedule of civil sanctions for violations; (9) disciplinary hearings, which may include binding arbitration, civil sanctions, and research; (10) management of violation results; (11) programs relating to safety and performance research and education; and (12) an evaluation and accreditation program that ensures racetracks in the United States meet the standards described in the elements of the Horseracing Safety Program.

The Authority must also consider the safety standards in Section 7(a)(2) of the Act, 15 U.S.C. 3056(a)(2), which provide that in the development of the horseracing safety program for covered horses, covered persons, and covered horseraces, the Authority and the Commission must take into consideration existing safety standards, including the National Thoroughbred Racing Association Safety and Integrity Alliance Code of Standards, the International Federation of Horseracing Authority's International Agreement on Breeding, Racing, and Wagering, and the British Horseracing Authority's Equine Health and Welfare program. The Commission is therefore requiring the Authority to explain how it considered and whether it adopted any of the standards in Section 7(a)(2) of the Act,15 U.S.C. 3056(a)(2). If any horseracing safety standards in Section 7(a)(2) of the Act, 15 U.S.C. 3056(a)(2), were considered but not adopted or were modified, the Authority must explain why it decided not to adopt or why it decided to modify such standard.

3. Other Considerations

The Commission is incorporating the specific anti-doping and racetrack safety standards into this section because they are the most prescriptive and extensive, but this should not be read as an

invitation to dispense with the less-prescriptive guardrails set forth in the Act. To the extent the Act requires the Authority to consider any factors or standards not specifically referenced in this section, the Authority must explain whether and how it considered those factors when proposing a rule or modification. For instance, when proposing a civil sanctions rule or modification pursuant to Section 8(d)(1) of the Act, 15 U.S.C. 3057(d)(1), the Authority must explain how the rule or modification meets the requirements of Section 8(d)(2) of the Act, 15 U.S.C. 3057(d)(2).

B. Supporting Documentation

The Commission is requiring the Authority to submit any pertinent factual information it relied on in developing its proposed rule or modification. More specifically, the Authority's submission to the Commission must include a copy of existing standards used as a reference for the development of a proposed rule or modification and any scientific data, studies, or analysis underlying the development of the proposed rule or modification. The Commission anticipates receiving, for instance, a copy of the lists of permitted and prohibited substances in effect for the International Federation of Horseracing Authorities, including the International Federation of Horseracing Authorities International Screening Limits for urine, dated May 2019, and any other rules and standards referenced in Section 6(g)(2)(A) of the Act, 15 U.S.C. 3055(g)(2)(A) when the Authority's baseline rules for anti-doping are submitted. For organizational purposes, supporting documentation must be attached as exhibits, and each exhibit must clearly identify the proposed rule or modification it supports.

C. Redline Document for Proposed Rule Modification

To enable the Commission to quickly and easily identify the substance of a proposed rule modification, the Commission is requiring the Authority to provide a redline document of the existing rule, marked with the proposed changes.

D. Timing of Submission

Section 4(c)(1) of the Act, 15 U.S.C. 3053(c)(1) provides for a 60-day timeframe between the Commission's publication of the Authority's proposed rule or modification in the **Federal Register** for public comment and the date the Commission must approve or disapprove the Authority's proposed rule or modification. To ensure it has sufficient time for review, the Commission is requiring the Authority to provide the information it needs to evaluate the Authority's proposed rule or modification at least 90 days in advance of the date the Authority proposes having its proposed rule or modification published in the **Federal Register** for public comment. This will give the Commission additional time to evaluate the Authority's proposed rule or modification. It should be noted this 90-day timeframe serves as a minimum, not a maximum, timeframe. The Secretary may shorten the timeframe if the Authority demonstrates that a shorter timeframe is necessary to meet statutory deadlines.

E. Conclusory Statements and Failure To Provide Requisite Analysis

The Authority must provide an adequate basis for the Commission's review of its rules. The Commission seeks to understand the Authority's analysis of the information it relied on to determine whether a proposed rule or modification was warranted and if so, what provisions the rule should contain. To this end, the information required under this section must be sufficiently detailed and contain sufficient analysis to support a Commission finding that a proposed rule or modification satisfies the statutory requirements. A mere assertion or conclusory statement that a proposed rule or modification is consistent with the requirements of the Act, for instance, is insufficient. If the Authority fails to describe and justify the proposed rule or modification in the manner described in this section, or fails to submit the information required by this section, the Commission may not have sufficient information to make an affirmative finding that the proposed rule or modification is consistent with the Act and the applicable rules approved by the Commission.

F. Public Comments

Section 4(d)(2) of the Act, 15 U.S.C. 3053(d)(2), provides the ''Commission shall publish in the **Federal Register** any [ ] proposed rule, standard, or procedure and provide an opportunity for public comment.'' However, the Act gives the Commission only a total of 60 days after publication to approve or disapprove a proposed rule or modification once it has been published in the **Federal Register**. Given that the Commission and the Authority will need time to review comments, the Act functionally provides for a much more limited comment period of approximately 30 days or less. To ensure the public has an adequate opportunity to review and understand the Authority's rules, ask questions, and provide comments, the Commission is encouraging the Authority to make its proposed rules publicly available and solicit public comments in advance of providing any submissions to the Commission. To avoid delays in Commission approval of its rules, the Authority should not wait until its proposed rule is published in the **Federal Register** to solicit its own public comments.

In a March 21, 2021 letter [2] to the Acting Chairwoman, Rebecca Kelly Slaughter, the Act's sponsors stated ''[t]he relationship between the [Commission] and the Authority is closely modeled on the enduring and effective relationship between the Securities and Exchange Commission (SEC) and Financial Industry Regulatory Authority (FINRA), a private self-regulatory organization.'' As part of its own rulemaking process, the FINRA Board of Governors may authorize the publication of its own Regulatory Notice soliciting comments on a rule proposal prior to its submission to the SEC.[3] If FINRA decides to issue a Regulatory Notice soliciting public comment on a proposal, the comment period typically is open for one to two months.[4] All comments become part of FINRA's ''official record'' of the rule proposal, and since December 1, 2003, FINRA has posted all comment letters on its website.[5] Depending on the comments received in response to the Regulatory Notice and any changes made to the proposal, FINRA staff will either return to the FINRA Board with a revised proposal or will file the rule proposal with the SEC for notice and comment.[6] Soliciting comments, as FINRA does, in advance of submitting any proposed rules or modifications to the Commission would benefit both the Authority, the regulated community, and the Commission. It would provide transparency and enable the Authority to resolve any issues with its rules prior to their submission to the Commission.

If public comments are solicited, the Commission is requiring the Authority to attach, as an exhibit to its submission under § 1.142, a copy of the comments. The Commission encourages the Authority to make such comments publicly available on its own website. In

[5] *Id.*

[6] *Id.*

addition, the Authority's draft **Federal Register** document must include a summary of the substance of all comments received and the Authority's written response to all significant issues raised in such comments. This advance resolution of comments will greatly facilitate the process of review of any proposed rules or modifications the Authority submits to the Commission.

IV. Section 1.143—Submissions to the Secretary

This section provides guidance for the Authority when submitting documents to the Secretary of the Commission.

All rule submissions made pursuant to § 1.142 and 15 U.S.C. 3053(a), rate increases which must be reported to the Commission under 15 U.S.C. 3052(f)(1)(C)(iv), or HISA Guidance which must be submitted to the Commission under 15 U.S.C. 3054(g)(2), must be emailed to the Secretary of the Commission at *electronicfilings@ftc.gov*. The subject line of the email must state: ''HISA Rule Submission,'' ''HISA Rate Increase Submission,'' or ''HISA Guidance Submission'' as applicable. This will enable the Secretary to easily identify submissions from the Authority and route them to the appropriate office.

To facilitate Commission review, documents must be organized and sent in a format that will facilitate the submission of documents to the Office of the Federal Register. Except for supporting documentation submitted pursuant to § 1.142(b) (existing standards used as a reference for the development of the proposed rule or modification, and scientific data, studies, or analysis underlying the development of the proposed rule or modification) and copies of public comments submitted pursuant to § 1.142(f), all documents submitted to the Secretary must be in a word processing format. This will enable the Commission to more easily make modifications to **Federal Register** documents, provide feedback on rule text, and draft orders. For organizational purposes, the Commission is requiring submissions with more than one attachment to contain a table of contents in the body of the email with a brief description of each item. The Authority must also provide the contact information for a person on the staff of the Authority responsible for responding to questions from the Commission. To facilitate submissions to the Office of the Federal Register, the Commission is requiring that the Authority's draft **Federal Register** documents follow the relevant format and editorial requirements for regulatory documents in the Office of **Federal Register**'s Document Drafting Handbook, 1 CFR parts 18, 21, and 22. Specifically, draft **Federal Register** documents must contain proper preamble captions and content; state the purpose of, and basis for, the proposed rule or modification; set forth regulatory text, headings, and authority citations; use correct numbering, structure, and amendatory language; and conform to style and formatting established by the Office of the Federal Register and Government Publishing Office (see, specifically, section 2.17 (proposed rules) of the Office of the Federal Register's Document Drafting Handbook).

If a document filed with the Secretary contains confidential information, the Secretary must be so informed, and a request for confidential treatment must be submitted in accordance with 16 CFR 4.9. Filings submitted electronically on or before 5:30 p.m. Eastern Time, on a business day, will be deemed filed on that business day, and all filings submitted after 5:30 p.m. Eastern Time, will be deemed filed on the next business day. This section also provides the Secretary of the Commission may reject a document for filing that fails to comply with the Commission's rules for filing in this section or § 1.142. Finally, if the conditions in this section and § 1.142 have been satisfied, the Commission will publish the proposed rules or modifications in the **Federal Register** for public comment.

V. Section 1.144—Approval or Disapproval of Proposed Rules or Modifications

Section 4(c)(1) of the Act, 15 U.S.C. 3053(c)(1) provides, ''Not later than 60 days after the date on which a proposed rule or modification is published in the **Federal Register**, the Commission shall approve or disapprove the proposed rule or modification.'' In addition, Section 4(c)(2) of the Act, 15 U.S.C. 3053(c)(2), provides ''[t]he Commission shall approve a proposed rule or modification if the Commission finds that the proposed rule or modification is consistent with [ ] this chapter; and [ ] applicable rules approved by the Commission.'' Accordingly, § 1.144 provides the Commission will approve or disapprove a proposed rule or modification by issuing an order within 60 days of the date the proposed rule or modification was published in the **Federal Register** for public comment. The Commission will approve a proposed rule or modification if it finds such proposed rule or modification is consistent with the Act and the applicable rules approved by the Commission. Further, a proposed rule or modification will not take effect unless it has been approved by the Commission.

Because these rule revisions relate solely to agency procedure and practice, publication for notice and comment is not required under the Administrative Procedure Act. 5 U.S.C. 553(b).[7]

List of Subjects in 16 CFR Part 1

Administrative practice and procedure.

For the reasons set forth in the preamble, the Federal Trade Commission amends title 16, chapter I, subchapter A of the Code of Federal Regulations as follows:

PART 1—GENERAL PROCEDURES

■ 1. The authority citation for part 1 continues to read as follows:

Authority: 15 U.S.C. 46; 15 U.S.C. 57a; 5 U.S.C. 552; 5 U.S.C. 601 note.

■ 2. Add subpart S to read as follows:

Subpart S—Procedures for Submissions Under the Horseracing Integrity and Safety Act

Sec.

Authority: 15 U.S.C. 3053.

§ 1.140 Definitions.

When used in relation to the Horseracing Integrity and Safety Act, 15 U.S.C. 3051 through 3060, and this subpart—

Act means the Horseracing Integrity and Safety Act, 15 U.S.C. 3051 through 3060.

Breeder means a person who is in the business of breeding covered horses.

Commission means the Federal Trade Commission.

Covered horse means any Thoroughbred horse, or any other horse made subject to the Act by election of the applicable State racing commission or the breed governing organization for such horse under 15 U.S.C. 3054(*l*), during the period—

(1) Beginning on the date of the horse's first timed and reported workout at a racetrack that participates in covered horseraces or at a training facility; and

[7] For this reason, the requirements of the Regulatory Flexibility Act are also inapplicable. 5 U.S.C. 601(2), 604(a). Likewise, the amendments do not modify any FTC collections of information within the meaning of the Paperwork Reduction Act. 44 U.S.C. 3501 *et seq.*

(2) Ending on the date on which the Authority receives written notice that the horse has been retired.

Covered horserace means any horserace involving covered horses that has a substantial relation to interstate commerce, including any Thoroughbred horserace that is the subject of interstate off-track or advance deposit wagers.

Covered persons means all trainers, owners, breeders, jockeys, racetracks, veterinarians, persons (legal and natural) licensed by a State racing commission and the agents, assigns, and employees of such persons and other horse support personnel who are engaged in the care, training, or racing of covered horses.

HISA Guidance means Horseracing Integrity and Safety Authority (Authority) guidance issued under 15 U.S.C. 3054(g)(1), which does not have the force of law.

Horseracing anti-doping and medication control program means the anti-doping and medication program established under 15 U.S.C. 3055(a).

Horseracing Integrity and Safety Authority or *Authority* means the private, independent, self-regulatory, nonprofit corporation recognized for purposes of developing and implementing a horseracing anti-doping and medication control program and a racetrack safety program for covered horses, covered persons, and covered horseraces.

Interstate off-track wager has the meaning given such term in Section 3 of the Interstate Horseracing Act of 1978, 15 U.S.C. 3002.

Jockey means a rider or driver of a covered horse in covered horseraces.

Owner means a person who holds an ownership interest in one or more covered horses.

Proposed rule means any rule proposed by the Authority pursuant to the Act.

Proposed rule modification or *modification* means:

(1) Any proposed modification to a rule or proposed rule change; or

(2) Any interpretation or statement of policy or practice relating to an existing rule of the Authority that is not HISA Guidance and would have the force of law if approved as a final rule.

Racetrack means an organization licensed by a State racing commission to conduct covered horseraces.

Racetrack safety program means the program established under 15 U.S.C. 3056(a).

State racing commission means an entity designated by State law or regulation that has jurisdiction over the conduct of horseracing within the applicable State.

Trainer means an individual engaged in the training of covered horses.

Training facility means a location that is not a racetrack licensed by a State racing commission that operates primarily to house covered horses and conduct official timed workouts.

Veterinarian means a licensed veterinarian who provides veterinary services to covered horses.

Workout means a timed running of a horse over a predetermined distance not associated with a race or its first qualifying race, if such race is made subject to the Act by election under 15 U.S.C. 3054(*l*) of the horse's breed governing organization or the applicable State racing commission.

§ 1.141 Required submissions.

The Authority must submit to the Commission any proposed rule, or proposed rule modification, of the Authority relating to—

(a) The bylaws of the Authority;

(b) A list of permitted and prohibited medications, substances, and methods, including allowable limits of permitted medications, substances, and methods;

(c) Laboratory standards for accreditation and protocols;

(d) Standards for racing surface quality maintenance;

(e) Racetrack safety standards and protocols;

(f) A program for injury and fatality data analysis;

(g) A program of research and education on safety, performance, and anti-doping and medication control;

(h) A description of safety, performance, and anti-doping and medication control rule violations applicable to covered horses and covered persons;

(i) A schedule of civil sanctions for violations;

(j) A process or procedures for disciplinary hearings;

(k) A formula or methodology for determining assessments described in 15 U.S.C. 3052(f); and

(l) Any other proposed rule or modification the Act requires the Authority to submit to the Commission for approval.

§ 1.142 Submission of proposed rule or modification.

(a) *Contents of submission.* In order for a submission to qualify as a proposed rule or proposed rule modification under 15 U.S.C. 3053(a), the Authority must submit to the Commission a complete draft of the **Federal Register** document for the proposed rule or proposed rule modification, which includes the text of the rule and a statement of the purpose of, and statutory basis for, the proposed rule or modification (''statement of basis and purpose''). The statement of basis and purpose must contain:

(1) The reasons for adopting the proposed rule or modification.

(2) Any problems the proposed rule or modification is intended to address and how the proposed rule or modification will resolve those problems.

(3) A description of any reasonable alternatives to the proposed rule or modification that may accomplish the stated objective and an explanation of the reasons the Authority chose the proposed rule or modification over its alternatives.

(4) How the proposed rule or modification will affect covered persons, covered horses, and covered horseraces.

(5) Why the proposed rule or modification is consistent with the requirements of the Act and any rules and regulations applicable to the Authority, including the following:

(i) *Anti-doping and medication control program.* When proposing a rule or modification to the horseracing anti-doping and medication control program, the Authority must explain how it considered the factors in 15 U.S.C. 3055, including:

(A) Under 15 U.S.C. 3055(a)(2), the unique characteristics of a breed of horse made subject to the Act by election of a State racing commission or breed governing organization for such horse pursuant to 15 U.S.C. 3054(*l*);

(B) The factors listed in 15 U.S.C. 3055(b); and

(C) The baseline anti-doping and medication control rules identified in 15 U.S.C. 3055(g)(2)(A). For a proposed rule, the Authority must state whether its proposed rule adopts the baseline standards identified in 15 U.S.C. 3055(g)(2)(A). If there is a conflict in any baseline standards identified in 15 U.S.C. 3055(g)(2)(A), the Authority must identify the conflict and state whether the standard it adopted is the most stringent standard. For a proposed rule modification, the Authority must explain whether the modification renders an anti-doping and medication control rule less stringent than the baseline anti-doping and medication control rules described in 15 U.S.C. 3055(g)(2)(A), and state whether the anti-doping and medication control enforcement agency has approved of the change.

(ii) *Racetrack safety program.* When proposing a rule or modification to any rule regarding the racetrack safety program required under 15 U.S.C. 3056(a)(1), the Authority must explain how the proposed rule or modification

meets the requirements in 15 U.S.C. 3056(b). The Authority must explain how it considered and whether it adopted the safety standards in 15 U.S.C. 3056(a)(2). If any horseracing safety standards in 15 U.S.C. 3056(a)(2) were considered but not adopted or were modified, the Authority must explain why it decided not to adopt or why it decided to modify such standard.

(iii) *Other rules.* To the extent the Act requires the Authority to consider any factors or standards not specifically referenced in this section, the Authority must explain whether and how it considered those factors when proposing a rule or modification. For instance, when proposing a civil sanctions rule or modification pursuant to 15 U.S.C. 3057(d)(1), the Authority must explain how the rule or modification meets the requirements of 15 U.S.C. 3057(d)(2).

(6) If written comments were solicited, the Authority's draft **Federal Register** document must include a summary of the substance of all comments received and the Authority's written response to all significant issues raised in such comments.

(7) The date that the Authority proposes for the **Federal Register** to publish its proposed rule or modification.

(b) *Supporting documentation.* The Authority's submission to the Commission required under paragraph (a) of this section must also include copies of the pertinent factual information underlying the Authority's development of the proposed rule or modification, including a copy of existing standards used as a reference for the development of the proposed rule or modification and scientific data, studies, or analysis underlying the development of the proposed rule or modification. Supporting documentation must be attached as exhibits, and each exhibit must clearly identify the proposed rule or modification it supports.

(c) *Redline document for proposed rule modification.* For proposed rule modifications, the Authority must also provide, in a document separate from the **Federal Register** document, a redline version of the existing rule that will enable the Commission to immediately identify any proposed changes.

(d) *Timing of submission.* To qualify as a proposed rule or proposed modification under 15 U.S.C. 3053(a), the Authority's submission must provide the information in paragraphs (a), (b), and (c) of this section at least 90 days in advance of the proposed date for the **Federal Register** to publish a proposed rule or modification for public comment pursuant to 15 U.S.C. 3053(b)(1). The Secretary may waive the 90-day requirement in this section if the Authority demonstrates such waiver is necessary to meet statutory deadlines.

(e) *Conclusory statements and failure to provide requisite analysis.* Information required to be submitted under this section must be sufficiently detailed and contain sufficient analysis to support a Commission finding that a proposed rule or modification satisfies the statutory requirements. For instance, a mere assertion or conclusory statement that a proposed rule or modification is consistent with the requirements of the Act is insufficient. Failure to describe and justify the proposed rule or modification in the manner described in this section or failure to submit the information required by this section may result in the Commission's having insufficient information to make an affirmative finding that the proposed rule or modification is consistent with the Act and the applicable rules approved by the Commission.

(f) *Public comments.* The Authority is encouraged to solicit public comments on its proposed rule or modification in advance of making a submission to the Commission pursuant to this section. If the Authority solicits public comments, it must attach a copy of the comments as an exhibit to its submission. By soliciting public comments and addressing significant issues raised therein, the Authority facilitates the Commission's review and approval of the Authority's proposed rule or modification.

§ 1.143 Submissions to the Secretary.

(a) *Electronic submission.* All rule submissions under § 1.142 and 15 U.S.C. 3053(a), rate increases that must be reported to the Commission under 15 U.S.C. 3052(f)(1)(C)(iv), or HISA Guidance that must be submitted to the Commission under 15 U.S.C. 3054(g)(2) must be emailed to the Secretary of the Commission at *electronicfilings@ftc.gov*. The subject line of the email must state: ''HISA Rule Submission,'' ''HISA Rate Increase Submission,'' or ''HISA Guidance Submission,'' as applicable.

(b) *Format for submission of proposed rules or modifications*—(1) *Electronic format.* Except for supporting documentation submitted pursuant to § 1.142(b) and copies of comments submitted pursuant to § 1.142(f), all documents submitted to the Secretary must be in a word processing format.

(2) *Table of contents.* Submissions with more than one attachment must contain a table of contents in the body of the email with a brief description of each item.

(3) *Contact information.* The Authority must provide the name, telephone number, and email address of a person on the staff of the Authority responsible for responding to questions and comments on the submission in the body of the email.

(4) *Draft* ***Federal Register*** *documents.* Draft **Federal Register** documents must follow the relevant format and editorial requirements for regulatory documents under 1 CFR parts 18, 21, and 22 (see Office of Federal Register's Document Drafting Handbook). The Document Drafting Handbook specifies that draft **Federal Register** documents (see 1 CFR 15.10) must:

(i) Contain proper preamble captions and content;

(ii) State the purpose of, and basis for, the proposed rule or modification;

(iii) Set forth regulatory text, headings, and authority citations;

(iv) Use correct numbering, structure, and amendatory language; and

(v) Conform to the style and formatting established by the Office of the Federal Register and Government Publishing Office. (See, specifically, section 2.17 (proposed rules) of the Office of the Federal Register's Document Drafting Handbook.)

(c) *Confidential information.* If a document filed with the Secretary contains confidential information, the Secretary must be so informed, and a request for confidential treatment must be submitted in accordance with 16 CFR 4.9.

(d) *Date of filing.* If the conditions of this section are otherwise satisfied, all filings submitted electronically on or before 5:30 p.m. Eastern Time, on a business day, will be deemed filed on that business day, and all filings submitted after 5:30 p.m. Eastern Time, will be deemed filed on the next business day.

(e) *Authority to reject documents for filing.* The Secretary of the Commission may reject a document for filing that fails to comply with the Commission's rules for filing in this section or § 1.142.

(f) ***Federal Register*** *publication.* If the conditions in this section and § 1.142 have been satisfied, the Commission will publish the proposed rules or modifications in the **Federal Register** and request public comment on those proposed rules or modifications.

§ 1.144 Approval or disapproval of proposed rules and proposed rule modifications.

(a) *Commission decision.* The Commission will approve or disapprove

a proposed rule or modification by issuing an order within 60 days of the date the proposed rule or modification was published in the **Federal Register** for public comment.

(b) *Standard of review.* The Commission will approve a proposed rule or modification if the Commission finds that the proposed rule or modification is consistent with the Act and the applicable rules approved by the Commission. If the Commission disapproves a rule or modification, it will make recommendations to the Authority to modify the proposed rule or modification within 30 days of such disapproval.

(c) *Effect.* A proposed rule or modification will not take effect unless it has been approved by the Commission.

By direction of the Commission.

April J. Tabor,

Secretary.

[FR Doc. 2021–21306 Filed 10–4–21; 8:45 am]

BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 860

[Docket No. FDA–2018–N–0236]

RIN 0910–AH53

Medical Device De Novo Classification Process

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule to establish requirements for the medical device De Novo classification process under the Federal Food, Drug, and Cosmetic Act (FD&C Act). This final rule establishes procedures and criteria related to requests for De Novo classification (''De Novo request'') and provides a pathway to obtain marketing authorization as a class I or class II device and for certain combination products. These requirements are intended to ensure the most appropriate classification of devices consistent with the protection of the public health and the statutory scheme for device regulation. They are also intended to limit the unnecessary expenditure of FDA and industry resources that may occur if devices for which general controls or general and special controls provide a reasonable assurance of safety and effectiveness are subject to premarket approval. The final rule implements the De Novo classification process under the FD&C Act, as enacted by the Food and Drug Administration Modernization Act of 1997 (FDAMA) and modified by the Food and Drug Administration Safety and Innovation Act (FDASIA) and the 21st Century Cures Act (Cures Act).

DATES: This rule is effective January 3, 2022.

ADDRESSES: For access to the docket to read background documents or comments received, go to *https://www.regulations.gov* and insert the docket number found in brackets in the heading of this final rule into the ''Search'' box and follow the prompts, and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Sergio de del Castillo, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 2431, Silver Spring, MD 20993, 301–796–6419.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Executive Summary

A. Purpose of the Final Rule

This rule establishes new regulations implementing the medical device De Novo classification process under the FD&C Act, which provides a pathway for certain new types of devices to obtain marketing authorization as class I or class II devices, rather than remaining automatically designated as a class III device, which would require premarket approval under the postamendments device classification section of the FD&C Act.

The De Novo classification process is intended to provide an efficient pathway to ensure the most appropriate classification of a device consistent with the protection of the public health and the statutory scheme for device regulation. When FDA classifies a device type as class I or II via the De Novo classification process, other manufacturers do not necessarily have to submit a De Novo request or premarket approval application (PMA) to legally market a device of the same type. Instead, manufacturers can use the less burdensome pathway of premarket notification (510(k)), when applicable, to legally market their device, because the device that was the subject of the original De Novo request can serve as a predicate device for a substantial equivalence determination.

B. Summary of the Major Provisions of the Final Rule

This rule establishes procedures and criteria for the submission and withdrawal of a De Novo request. It also establishes procedures and criteria for FDA to accept, review, grant, and/or decline a De Novo request. While several comments object to sections or subsections of the proposed rule, almost all comments voice support for the objective of the proposed rule: To establish regulations implementing the De Novo classification process. The rule provides that:

- A person may submit a De Novo request after submitting a 510(k) and receiving a not substantially equivalent (NSE) determination.
- A person may also submit a De Novo request without first submitting a 510(k), if the person determines that

there is no legally marketed device upon which to base a determination of substantial equivalence (SE).

- FDA will classify devices according to the classification criteria in the FD&C Act. FDA classifies devices into class I (general controls) if there is information showing that the general controls of the FD&C Act are sufficient to reasonably assure safety and effectiveness; into class II (special controls) if general controls, by themselves, are insufficient to provide reasonable assurance of safety and effectiveness, but there is sufficient information to establish special controls to provide such assurance; and into class III (premarket approval) if there is insufficient information to support classifying a device into class I or class II and the device is a life-sustaining or life-supporting device or is for a use which is of substantial importance in preventing impairment of human health or presents a potential unreasonable risk of illness or injury.
- Devices will be classified by FDA by written order.
- A De Novo request includes administrative information, regulatory history, device description, classification summary information, benefits and risks of device use, and performance data to demonstrate reasonable assurance of safety and effectiveness.
- FDA may refuse to accept a De Novo request that is ineligible or that is not sufficiently complete to permit a substantive review.
- After a De Novo request is accepted, FDA will begin a substantive review of the De Novo request that may result in either FDA requesting additional information, issuing an order granting the request, or declining the De Novo request.
- FDA may decline a De Novo request if, among other things, the device is ineligible or insufficient information is provided to support De Novo classification.

The rule also describes our practices for the conditions under which the confidentiality of a De Novo file is maintained.

C. Legal Authority

This rule is being issued under the device definition provision of the FD&C Act, the combination products provision of the FD&C Act, the device classification section of the FD&C Act, the De Novo classification section of the FD&C Act, the general rulemaking section of the FD&C Act, and the inspection section of the FD&C Act.

D. Costs and Benefits

The final rule clarifies the De Novo classification process for certain medical devices to obtain marketing authorization as class I or class II devices, rather than remaining automatically designated as class III devices under the FD&C Act. A more transparent De Novo classification process could improve the efficiency of obtaining marketing authorization for certain novel medical devices. The medical device industry will incur one-time costs to read and understand this rule. Over 10 years, the annualized cost estimates a 7 percent discount rate range from $0.01 million to $0.17 million, with a primary estimate of $0.09 million. The annualized costs over 10 years at a 3 percent discount rate range from $0.1 million to $0.15 million, with a primary estimate of $0.08 million.

II. Table of Abbreviations/Commonly Used Acronyms in This Document

Abbreviation or acronym	What it means
510(k)	Premarket Notification
CDRH	Center for Devices and Radiological Health
CFR	Code of Federal Regulations
EUA	Emergency Use Authorization
FDA	Food and Drug Administration
FD&C Act	Federal Food, Drug, and Cosmetic Act
FDAMA	Food and Drug Administration Modernization Act of 1997
FOIA	Freedom of Information Act
FR	Federal Register
GLP	Good Laboratory Practice
HDE	Humanitarian Device Exemption
IDE	Investigational Device Exemption
IC	Information Collection
ICR	Information Collection Request
NSE	Not Substantially Equivalent
OMB	Office of Management and Budget
PHI	Protected Health Information
PMA	Premarket Approval Application
PRA	Paperwork Reduction Act of 1995
Pub. L.	Public Law
QSR	Quality System Regulation
Ref.	Reference
RFD	Requests for Designation under 21 CFR 3.7 (§ 3.7)
SE	Substantially Equivalent
SSED	Summary of Safety and Effectiveness Data
U.S.C.	United States Code

III. Background

A. Need for the Regulation/History of This Rulemaking

In the **Federal Register** on December 7, 2018 (83 FR 63127), FDA issued a proposed rule entitled ''Medical Device De Novo Classification Process'' and requested comments on the proposed rule by March 7, 2019. This rule establishes procedures and criteria for the submission and withdrawal of a De Novo request. It also establishes procedures and criteria for FDA to accept, review, grant, and/or decline a De Novo request.

B. Summary of Comments to the Proposed Rule

FDA received comments on the proposed rule from several entities, including medical device associations; industry, medical and healthcare professional associations; public health

advocacy groups; law firms; and individuals. While several comments object to sections or subsections of the proposed rule, almost all comments voice support for the objective of the proposed rule: To establish regulations implementing the De Novo classification process. Comments raise concerns or request clarification regarding several issues, including:

- De Novo request information disclosure,
- facility inspections,
- devices that collect protected health information,
- training of FDA reviewers,
- the definitions,
- the De Novo request format,
- the De Novo request content,
- the criteria for accepting a De Novo request,
- the criteria for declining a De Novo request,
- the availability of the De Novo classification process for combination products, and
- the information needed to support FDA's determination to grant a De Novo classification request.

C. General Overview of Final Rule

FDA considered all comments received on the proposed rule and made changes, primarily for clarity and accuracy and to reduce burden in meeting regulatory requirements. On its own initiative, FDA is renumbering the sections to make them easier for De Novo requesters and the public to research and use. On its own initiative, FDA is also making minor technical changes to make the regulatory history, withdrawal, nonclinical studies, and classification summary provisions clearer. FDA also changed the word ''guidance'' to ''guidelines'' in the definition of Class II at § 860.3 (21 CFR 860.3) on its own initiative for consistency with the language used in section 513(a)(1)(B) of the FD&C Act (21 U.S.C. 360c (a)(1)(B)) and with § 860.123 (21 CFR 860.123) in the final rule. Finally, on its own initiative, FDA is adding requests for information regarding the class in which a device has been classified or the requirements applicable to a device under the FD&C Act that are submitted in accordance with section 513(g) of the FD&C Act, to the regulatory history information required to be included in a De Novo request under proposed § 860.234(a)(3) (21 CFR 860.234(a)(3)) (see § 860.220(a)(3) in the final rule). In the preamble of the proposed rule, FDA described section 513(g) requests for information as one of the submissions it was proposing to require requesters to identify as part of the regulatory history section of a De Novo request (see 83 FR 63127 at 63132). However, a reference to section 513(g) of the FD&C Act was inadvertently omitted from the proposed regulatory text included in the proposed rule. The changes from the proposed rule include the following revisions, additions, and removals.

- Renumber the proposed De Novo section numbers as follows:

TABLE 1—RENUMBERED SECTIONS

Proposed section No.	Renumbered section No.	Section name
860.201	860.200	Purpose and applicability.
860.223	860.210	De Novo request format.
860.234	860.220	De Novo request content.
860.245	860.230	Accepting a De Novo request.
860.256	860.240	Procedures for review of a De Novo request.
860.267	860.250	Withdrawal of a De Novo request.
860.289	860.260	Granting or declining a De Novo request.

- Revise the De Novo request confidentiality provision (§ 860.5(g)) to clarify that after an order granting a De Novo request is issued, data and information in the De Novo file that are not exempt from release under the Freedom of Information Act (FOIA) (5 U.S.C. 552) are immediately available for public disclosure; and to replace certain references to ''De Novo request'' with ''De Novo file.''
- Revise the De Novo format requirements as follows:
  - Remove the requirement to cite the volume number in the table of contents if the De Novo request consists of only one volume,
  - remove the requirement to provide a fax number when submitting a De Novo request, and
  - clarify that the De Novo request must be submitted as a single version in electronic format.
- Revise the De Novo content requirements as follows:
  - Add section 513(g) requests for information to the regulatory history requirement in proposed § 860.234(a)(3) (see § 860.220(a)(3)) and change the term ''use'' to ''device'' in the regulatory history requirement so the text more accurately refers to an application for ''humanitarian device exemption''.
  - Revise the order of the proposed requirements for the content of a De Novo request in proposed § 860.234(a)(9) through (11) (see § 860.220(a)(9) through (11) in the final rule).
  - Revise § 860.220(a)(7) and (a)(9) (this final rule renumbers proposed § 860.234(a)(7) as § 860.220(a)(7)) to clarify that the information required is that known to or that reasonably should be known to the requester.
  - Remove ''laboratory'' to clarify § 860.220(a)(13)(i) and (a)(15)(i) (this final rule renumbers proposed § 860.234(a)(13)(i) and (a)(15)(i) to § 860.220(a)(13)(i) and (a)(15)(i)) requires a summary of each nonclinical study.
  - Move the phrase, ''as appropriate,'' in § 860.220(a)(15)(i) to clarify that not all of the identified nonclinical studies may be applicable to the subject device.
  - Revise § 860.220(a)(15)(i) to clarify that a De Novo requester must include a protocol and complete test report for each nonclinical study.
  - Revise § 860.220(a)(15)(i) to clarify that a De Novo request must only include a statement regarding compliance with good laboratory practice (GLP) requirements in part 58 (21 CFR part 58) for nonclinical studies that are subject to part 58.
- Revise the provisions for withdrawal of a De Novo request to make minor technical changes.
- Revise the provisions for granting a De Novo request to specify that FDA will publish a notice of the classification order in the **Federal Register** within 30 days after granting the request.
- Revise the provisions for declining of a De Novo request to clarify that FDA will decline a De Novo request by written order and moves the grounds for which FDA may decline a De Novo request from § 860.260(b) into § 860.260(c).

IV. Legal Authority

The FD&C Act establishes a comprehensive system for the regulation of medical devices intended for human use. Among the provisions that provide authority for this final rule are sections 201(h), 503(g), 513(a) and (f), 701(a), and 704 of the FD&C Act (21 U.S.C. 321(h), 353(g), 360c(a) and (f), 371(a), and 374). This final rule establishes regulations to implement the De Novo classification process created by section 207 of FDAMA (Pub. L. 105–115) and amended by section 607 of FDASIA (Pub. L. 112–144) and section 3101 of the Cures Act (Pub. L. 114–255).

V. Comments on Proposed Rule and FDA Response

A. Introduction

We received several sets of comments on the proposed rule by the close of the comment period, each containing one or more comments on one or more issues. We received comments from medical device associations, industry, medical and healthcare professional associations, public health advocacy groups, law firms, and individuals. We describe and respond to comments in sections V.B through V.K. We have numbered each comment to help distinguish between different comments. We have grouped similar comments together under the same number, and, in some cases, we have separated different issues discussed in the same comment and designated them as distinct comments for purposes of our responses. The number assigned to each comment or comment topic is purely for organizational purposes and does not signify the comment's value or importance or the order in which comments were received.

B. Description of General Comments and FDA Response

Several comments made general remarks supporting the proposed rule without focusing on a particular proposed provision. Almost all comments supported the objective of the proposed rule: To establish regulations implementing the De Novo classification process. Several comments also requested that FDA make changes without focusing on a particular provision of the proposed rule. In the following paragraphs, we discuss and respond to such general comments.

(Comment 1) A commenter states that FDA should retain patient safety as its number one priority and integrate cybersecurity into the De Novo request process, and that science should support any decisions.

(Response 1) FDA agrees with this comment. As part of the cybersecurity review for premarket submissions for devices that contain software (including firmware) or programmable logic as well as software that is a medical device, FDA recommends that medical device manufacturers assess the impact of threats and vulnerabilities on device functionality and end users/patients as part of the cybersecurity review (Ref. 1).

(Comment 2) A commenter requests FDA to adopt an abbreviated procedure and a reduced user fee for De Novo requests when the requester believes that its device meets the criteria for classification in class I under section 513(a)(1)(A)(ii) of the FD&C Act, because the commenter believes that it would help provide more timely access to low-risk devices and conserve valuable FDA premarket review resources without compromising public health protection.

(Response 2) We do not agree that the procedure proposed by the commenter would be more efficient than the procedures described in FDA's proposed rule. The De Novo classification process provides a pathway for certain devices to obtain marketing authorization as class I or class II devices, rather than remaining automatically designated as class III under section 513(f)(1) of the FD&C Act. FDA makes the determination that a device is class I or class II under section 513(f)(2) of the FD&C Act using the criteria in section 513(a) of the FD&C Act. The process proposed by the commenter would require an abbreviated submission with only some of the information FDA proposed to require in a De Novo request when the requester believes that its device meets the criteria for classification as a class I device. The proposed process would also add a step to the Agency's review process for such devices by requiring FDA to determine within 15 days of receiving the request either that the device meets the criteria for classification into class I or that additional information is required to make the classification determination.

The FD&C Act provides 120 days for review of a De Novo request, regardless of the ultimate classification determination. In FDA's experience, 15 days is not a workable timeframe for the Agency to complete a substantive review of a submission for a new device type to determine that the device meets the criteria for classification into class I. Further, the commenter's suggested abbreviated initial submission omits information that is important for FDA's classification determinations, such as information on probable risks to health associated with use of the device. Therefore, under the commenter's proposed process, FDA would usually, if not always, need to require additional information within 15 days. In § 860.220(a) of this final rule, FDA has identified the required contents of a De Novo request taking into account the Agency's experience with the types of information needed to make a determination on a De Novo request. If a requester believes that some of the required information is not applicable to its device, the requester may submit a justification for omitting that information pursuant to § 860.220(c).

We also note that the proposed process does not appear to provide for any FDA action other than requesting additional information or classifying the device. Section 513(f)(2) of the FD&C Act provides for FDA to decline a De Novo request.

With respect to the user fees applicable to a De Novo request, the Medical Device User Fee Amendments of 2017 amended the FD&C Act to authorize FDA to collect user fees for certain premarket submissions received on or after October 1, 2017, including De Novo requests (see section 738 of the FD&C Act (21 U.S.C. 379j)). The fees are set by statute (section 738(a)(2)(A)(xi) of the FD&C Act) and therefore any changes to such fees are outside the scope of this rulemaking.

(Comment 3) A commenter concerned about the design of a remote monitoring system containing software states that as part of the De Novo request, a manufacturer should provide information on whether the device collects protected health information (PHI). The same commenter requests that the Health and Human Services' Office for Civil Rights should complete a review prior to the De Novo request being granted by FDA. A commenter states that a PHI pre-approval plan should be reviewed with the impact and patient experience included in the overall De Novo request grant.

(Response 3) Standards for the use and disclosure of protected health information by certain entities are set forth in regulations implementing the Health Insurance Portability and Accountability Act of 1996 (HIPAA) (Pub. L. 101–191), which are outside the scope of this rulemaking. To demonstrate a reasonable assurance of safety and effectiveness for software devices, documentation related to the requirements of the quality system regulation (QSR) (21 CFR part 820) is often a necessary part of the premarket submission. See also ''Guidance for the Content of Premarket Submissions for Software Contained in Medical Devices'' (Ref. 2). As part of QSR design controls, a manufacturer must ''establish and maintain procedures for validating the device design,'' which ''shall include software validation and risk analysis, where appropriate.'' (§ 820.30(g)). As part of the software validation and risk analysis required by § 820.30(g), software device manufacturers may need to establish a cybersecurity vulnerability and management approach, where appropriate. Such cybersecurity design controls help to ensure device security, including protection of health information.

(Comment 4) A comment recommends FDA provide additional training for FDA reviewers on De Novo classification to assist FDA reviewers in more thoroughly understanding the devices and how to review De Novo requests with the broader view of assessing the nature of the devices and their value to the patient.

(Response 4) FDA currently provides training to FDA staff on the De Novo classification process. With the publication of this final rule, FDA intends to update its current training to be reflective of the requirements of the final rule. FDA also understands that patient input can be an important consideration during FDA's review of a De Novo request, as reflected in our guidance for industry and FDA Staff, ''Factors to Consider When Making Benefit-Risk Determinations in Medical Device Premarket Approval and De Novo Classifications'' (Ref. 3) and ''Patient Preference Information—Voluntary Submission, Review in Premarket Approval Applications, Humanitarian Device Exemption Applications, and De Novo Requests, and Inclusion in Decision Summaries and Device Labeling'' (Ref. 4).

(Comment 5) A commenter proposes that unless required by the FD&C Act or the device is of high public health importance, FDA defer the identification of special controls for devices being granted De Novo classification until after the De Novo request is granted and FDA can make a general assessment of all class II devices. The same commenter also requests that FDA prioritize the identification of special controls for all class II devices.

(Response 5) Because special controls are necessary to assure the safety and effectiveness of class II devices, FDA does not agree with the commenter's proposal. FDA believes it is important to identify the appropriate special controls for class II devices at the time FDA grants the De Novo request. The granting of the De Novo request does several things: It allows the device to be marketed immediately, creates a classification regulation for devices of the type, and permits the device to serve as a predicate device (section 513(f)(2)(B) of the FD&C Act) (Ref. 5). Because these consequences flow from the grant of a De Novo request, and because special controls are necessary to reasonably assure the safety and effectiveness of a class II device, FDA will continue to identify special controls at the time that it grants a De Novo classification request.

The request that FDA prioritize the identification of special controls for all class II devices is outside the scope of this rulemaking.

(Comment 6) A comment recommends that medical device applicants be encouraged to perform and/or review studies that address the effect of the device on patient function, because the commenter states that, for all populations, the ability to function at work, at home, and with family is an important outcome.

(Response 6) Where relevant to the intended use of a device, FDA currently would take patient function into account in evaluating the safety and effectiveness of the device. As part of its initiative for patients to engage with FDA, FDA has incorporated patient perspectives into the total product life cycle, including in the premarket evaluation of devices (Refs. 4 and 6).

(Comment 7) A comment objects to the placement of all the De Novo request regulatory requirements in part 860 and suggests that the Center for Devices and Radiological Health (CDRH) separate requirements for the information needed to classify a device type from requirements for the information needed to authorize a specific low to moderate risk device for marketing by placing the latter in a separate regulation for ''Premarket Approval of Novel Class I and II Medical Devices.''

(Response 7) FDA disagrees with this comment. The De Novo classification provisions will be housed in part 860 of the CFR with the other device classification subparts. We recognize that, because the De Novo classification process includes a pathway to obtain marketing authorization for a specific device, placement of the De Novo classification regulations may not be as straightforward as the other classification regulations. FDA believes that part 860 is the most appropriate fit.

(Comment 8) A comment asserts that some devices, especially implantable devices, are inappropriately classified as class II instead of class III because these devices are ''potentially life-saving or life-threatening.'' The comment further indicates that the De Novo pathway should not replace the PMA pathway for implanted devices that are not eligible for 510(k) clearance and recommends that FDA document whether the increase in De Novo grants over the past few years indicates a movement from 510(k) clearance of devices to De Novo or from PMA review to the less stringent De Novo pathway before finalizing the proposed rule.

(Response 8) Altering the statutory standards for device classification and marketing authorization is outside the scope of this rulemaking. FDA classifies devices according to the statutory criteria set forth in section 513(a)(1) of the FD&C Act. Therefore, if FDA determines that general and special controls are sufficient to provide a reasonable assurance of safety and effectiveness for a potentially life-supporting device, FDA must classify that device into class II (see section 513(a)(1)(B) of the FD&C Act). Congress added section 513(f)(2) of the FD&C Act as part of FDAMA to limit unnecessary expenditure of FDA and industry resources that could occur if devices for which general controls or general and special controls provide a reasonable assurance of safety and effectiveness were subject to premarket approval under section 515 of the FD&C Act (21 U.S.C. 360e). As enacted by FDAMA, to submit a De Novo request, a device first had to be found NSE to legally marketed predicate devices through a 510(k). Section 513(f)(2) of the FD&C Act was modified by section 607 of FDASIA, which created an alternative mechanism for submitting a De Novo request that does not require that a device be reviewed first under a 510(k) and found NSE prior to submission of a De Novo request. If a person believes their device is appropriate for classification into class I or class II and determines, based on currently available information, there is no legally marketed predicate device, they may submit a De Novo request without a preceding 510(k) and NSE.

(Comment 9) A comment objects to making De Novo devices immediately available as a predicate device because the commenter suggests that it puts patient safety at risk and does not reward innovation. The commenter proposes a ''safe harbor'' of several years where the De Novo device cannot be used as a predicate.

(Response 9) FDA disagrees with this comment. Section 513(f)(2) of the FD&C Act provides that any device classified through the De Novo pathway ''shall be a predicate device for determining substantial equivalence'' and does not impose a waiting period for such devices to be used as predicates.

C. Comments and FDA Response on Use of Advisory Committees and Bundling Devices

(Comment 10) A comment requests FDA to revise § 860.1 to limit the use of advisory committees to cases of high-risk, life-supporting, or life-sustaining devices, or to classification panels because the commenter states that referring a De Novo request to an advisory committee should be unusual, as the devices that are the subject of such requests generally present low to moderate risk.

(Response 10) We disagree with this proposed revision. This comment is directed specifically to the De Novo classification process, and § 860.1 applies to both premarket and postmarket classifications and reclassifications. In addition, we do not agree that the only time we should seek advice from an advisory committee is in cases of high-risk, life-supporting, or life-sustaining devices, or in a classification panel; FDA may refer a matter to an advisory committee because it chooses to do so at its own discretion (see our guidance ''Procedures for Meetings of the Medical Devices Advisory Committee'' (Ref. 7).) For example, the Agency may present a matter before an advisory committee if the matter is of significant public interest or there is additional or special expertise provided by the panel that could assist FDA in its decision making.

(Comment 11) A comment asks FDA to revise the De Novo ''Purpose and applicability'' provision (the final rule renumbers the proposed § 860.201(b) as § 860.200(b)) to clarify that a De Novo request may also be submitted for a group of related devices because a commenter states that, in some cases, more than one related device should be submitted for De Novo classification.

(Response 11) FDA disagrees with this comment. Generally, it is not appropriate to bundle multiple devices in a single De Novo request. For example, FDA would not grant a De Novo request that would require FDA to create more than one classification regulation. If an applicant feels that they have a situation where it makes logical sense to bundle multiple devices into one De Novo request, it would be advisable to discuss proactively with FDA in advance of submission of the De Novo request.

D. Comments and FDA Response on De Novo Request Information Disclosure

(Comment 12) A comment requests that FDA revise the De Novo file confidentiality provision in § 860.5(g) so that it follows the approach for PMAs concerning confidentiality because the commenter asserts requesters are entitled to maintain confidentiality for information submitted to FDA through the De Novo process even if some information relating to the De Novo request has been disclosed publicly. Another comment requests that FDA revise the provision regarding disclosure of the existence of a De Novo request before an order granting the request is issued to clarify that such disclosure is governed by the trade secrets and confidential commercial information provisions in § 20.61 (21 CFR 20.61). A different comment questions why CDRH could not disclose the existence of a De Novo request and the date of its acceptance for review or the date it was refused.

(Response 12) FDA is making minor revisions to refer to the ''De Novo file'' instead of the ''De Novo request'' in four places in § 860.5(g) for consistency with the language used in § 860.5(g)(1) and to align with similar language used in 21 CFR 814.9 regarding confidentiality of information in a PMA file. FDA otherwise disagrees with the comments requesting revision of the proposed De Novo request confidentiality requirements. The provisions in § 860.5(g)(2) and (3) provide that, before an order granting the De Novo request is issued, FDA may not publicly disclose the existence of or data and information contained in a De Novo file, unless such information has already been publicly disclosed or acknowledged by the De Novo requester. Therefore, if a requester publicly acknowledges only the date and existence of a De Novo request submission, that acknowledgment would not, by itself, make underlying data and information in the De Novo file publicly available for disclosure under § 860.5(g). Further, the requester cannot have confidentiality concerns about information it has already publicly disclosed. This approach is concordant with FDA's general public information regulations at § 20.61 and § 20.81 (21 CFR 20.81). Under § 20.61, information submitted to FDA that qualifies as trade secret or confidential commercial information is generally exempt from public disclosure, but § 20.81 provides that records otherwise exempt from disclosure are available for public disclosure to the extent that they ''contain data or information that have previously been disclosed in a lawful manner to any member of the public, other than an employee or consultant or pursuant to other commercial arrangements with appropriate safeguards for secrecy.''

Regarding why FDA will not disclose the existence of a De Novo request that has not been publicly disclosed or acknowledged, disclosing the existence of the De Novo request would disclose the requester's intent to market the device. Consistent with FDA's approach in other premarket programs, we generally consider an applicant's intent to market a device to be confidential commercial information where the applicant has kept that intent confidential. This approach is supported by the Supreme Court's recent decision in *Food Mktg. Inst.* v. *Argus Leader Media,* 139 S. Ct. 2356, 2363 (2019).

(Comment 13) Some comments requested more clarity on how and when data and information may be disclosed by FDA, and some comments suggested that the data and information disclosed after FDA issues an order granting a De Novo request should only be available following a FOIA request. A commenter also recommended changes to clarify that the requester would have an opportunity to review and redact trade secret information before the release of any data and information in the De Novo request. Another commenter recommended that CDRH draft and post on its website a summary of the information submitted to support FDA's classification determination and require De Novo requesters to prepare summaries of data and information submitted to support the safety and effectiveness of the specific device that could be posted in FDA's De Novo database to align with public disclosure of 510(k) and PMA summaries.

(Response 13) As discussed in response to the previous comment, prior to sending an order granting the De Novo request to the De Novo requester, FDA will not disclose the data or information contained in the De Novo file, unless the De Novo requester has publicly disclosed or acknowledged such information (§ 860.5(g)(3)). To provide more clarity and to help ensure that information exempt from release is appropriately protected, we are revising § 860.5(g)(4) to make clear that after FDA sends an order granting the De Novo request to the De Novo requester, FDA may immediately disclose any safety and effectiveness information and any other information in the De Novo file that is not exempt from release under FOIA.

FDA disagrees with the comments requesting FDA to limit the release of data and information contained in a granted De Novo request to situations in which the Agency has received a FOIA request for that information. FDA proactively discloses information of interest to the public on a regular basis. For example, granting a De Novo request allows marketing of the particular device that is the subject of the request, creates a classification regulation for devices of this type, and permits the device to serve as a predicate device (section 513(f)(2) of the FD&C Act; Ref. 5). FDA believes that information regarding granted De Novo requests and summaries of safety and effectiveness information that formed the basis of FDA's granting decisions should be publicly posted without waiting to receive a FOIA request for that

information. With respect to affording requesters an opportunity to review and redact records that may contain trade secret information before they are disclosed, FDA will follow its existing pre-disclosure notification requirements in § 20.61.

Since 2010, FDA has posted on its website classification orders and redacted decision summary documents for devices classified through the De Novo classification process. This approach is analogous to our current approach for other marketing authorization pathways: summaries of safety and effectiveness information that formed the basis of FDA's decisions are posted on FDA's website for PMA approvals, available at *https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPMA/pma.cfm*; and for 510(k) clearances, 510(k) summaries are available at *https://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfPMN/pmn.cfm.* We believe the comment suggesting that FDA require a De Novo requester to prepare a summary of safety and effectiveness information for public posting to align with PMA and 510(k) procedures confuses the requirement for a PMA to include a summary that allows the reader to gain a general understanding of the data and information in the application (§ 814.20 (21 CFR 814.20(b)(3))) with the publicly posted detailed summary of safety and effectiveness data (SSED) on which an approval or denial decision is based for a PMA. Although some PMA applicants may submit draft SSEDs, the final SSEDs posted online are FDA documents. The De Novo decision summary is intended to present an objective and balanced summary of the scientific evidence that served as the basis for the decision to grant a De Novo request. Because the Agency already prepares such documents and determines what information supports its decision to grant the De Novo request, FDA is not revising the final rule to require requesters to prepare a similar summary, as this commenter requests. We believe the information that the commenter indicates would be of interest to healthcare providers and patients is already made publicly available through FDA's current approach.

E. Comments and FDA Response on Facility Inspections

(Comment 14) A comment supported facility inspection prior to granting or declining a De Novo request because the commenter states that it is essential for safety in the case of novel medical devices. Several comments wanted to delete either all of subsection § 860.240(c) (this final rule renumbers proposed § 860.256(c) as § 860.240(c)) or paragraph § 860.240(c)(2) (this final rule renumbers proposed § 860.256(c)(2) as § 860.240(c)(2)) or revise subsection § 860.240(c) because the commenters state these provisions are unduly burdensome or that FDA lacks statutory authority to require facility inspections to assess implementation of the QSR (part 820).

(Response 14) Several comments objected to proposed § 860.256(c) (this final rule renumbers proposed § 860.256(c) as § 860.240(c)), which relates to the inspection of relevant facilities prior to granting or declining a De Novo request and argued that the FD&C Act does not give FDA this inspection authority. FDA disagrees with the comments, and, as described below, is finalizing the provision with clarifying changes. The inspection would be done only in the two circumstances specified in the regulation. Based on past experience, inspections in these circumstances should arise with a small percentage of De Novo requests.

1. Clinical and Nonclinical Data

As explained in the proposed rule preamble, an inspection prior to its De Novo decision is used to help FDA determine whether clinical or nonclinical data were collected in a manner that ensures the data accurately represents the risks and benefits of the device, in accordance with section 513(a)(1)(C) of the FD&C Act. FDA has been conducting such inspections when data integrity and quality concerns arise during its review of a De Novo request, and information from these inspections has been critically important to the Agency's De Novo determination. For example, based on review of the clinical data provided in the De Novo request, FDA may determine that the results of a clinical investigation are clinically or physiologically improbable. An inspection may be conducted to verify the integrity of the data.

In another example, FDA may receive a whistleblower complaint alleging misconduct at one or more clinical investigational sites, and the results from the clinical investigation are used to support a De Novo request. Our assessment of the subject device is dependent on the veracity of the complaint. FDA inspections of one or more investigational sites to assess the veracity of the complaint would help determine whether evidence submitted in support of the De Novo request (*e.g.,* data from a particular site) needs to be excluded from FDA's consideration.

2. Quality System Regulation and Current Good Manufacturing Practices

For certain devices with critical and/or novel manufacturing processes that may impact the safety and effectiveness of the device, FDA also believes that an inspection may be necessary for FDA to determine whether general controls, including the QSR (part 820) for devices and current good manufacturing practices (21 CFR part 4, subpart A) for combination products, are adequate to provide a reasonable assurance of safety and effectiveness of the device, or whether special controls to mitigate risks must be developed. Such inspections are not for the purpose of reviewing for compliance with the QSR. Rather, the purpose of such an inspection is to gather information on critical and/or novel manufacturing processes, the methods and procedures used, and such additional information as may be necessary to assess the safety and effectiveness of a drug or biologic constituent part of a combination product. Such information will help classify the device type by providing an understanding of critical and/or novel manufacturing processes to determine if the device type is of low to moderate risk, to determine if general controls and special controls can effectively mitigate the probable risks to health, and to determine if the product specifications can reasonably be met. In some circumstances, this information can only be obtained by an inspection—and not any other means, such as through review of standard operating procedures—because it requires a detailed understanding of how manufacturers, in practice, carry out complex and/or safety critical processes, methods, or procedures. In these situations, the information obtained from an inspection would be necessary for FDA to make a De Novo determination.

For example, FDA may receive a De Novo request for a permanent implant with a coating that contains the same active ingredient that is in a new drug application (NDA) approved drug product. The combination product is intended to reduce the risk of surgical site infections. The safety and effectiveness of the combination product is linked to the ability of the manufacturer to ensure consistent levels of drug coating and drug release batch-to-batch. Probable risks associated with inconsistent coating or inconsistent drug release may include local/systemic toxicity, reproductive/genotoxicity, antibiotic resistance, and infection. An inspection would help assess the sampling methodology and laboratory

controls used by the manufacturer to ensure consistent levels of drug coating and drug release batch-to-batch. Such information would be critical to FDA in its De Novo determination because assessment of the sampling methodology and laboratory controls at the manufacturing facility would aid in FDA's determination that the product has consistent levels of drug coating and drug release batch-to-batch. This information would enable FDA to determine whether the proposed special controls are sufficient to reasonably assure safety and effectiveness or if additional controls are needed.

In another example, FDA may receive a De Novo request for a device that is provided sterile using a novel sterilization method for which there is little or no published information and limited or no history of FDA evaluation of sterilization development and/or validation data. Probable risks associated with inadequate sterilization may include risk of infection or contamination. An inspection of the facility where the device is sterilized would be critical to determining if special controls regarding sterilization validation are sufficient to mitigate the device's probable risks, verify that the novel sterilization method can feasibly be carried out, and determine if additional controls are needed to mitigate the risks associated with inadequate sterilization to reasonably assure the device's safety.

One commenter objected to inspections used to assess whether QSRs are adequate to ensure that critical and/or novel manufacturing processes that may impact the safety and effectiveness of the device are controlled on the grounds that such inspections require either a warrant or specific statutory authorization under the Constitution. Section 704(a)(1) of the FD&C Act grants FDA authority to enter and inspect ''any factory, warehouse, or establishment in which food, drugs, or devices are manufactured, processed, packed, or held for the introduction into interstate commerce or after such introduction.'' 21 U.S.C. 374. In addition, FDA intends to undertake inspections only in limited circumstances when the inspection is to help determine whether to grant a De Novo request from a firm and determine whether the proposed special controls are sufficient to reasonably assure safety and effectiveness or if additional controls are needed under section 513(f)(2) of the FD&C Act.

F. Comments and FDA Response on Definitions

(Comment 15) A comment proposed several changes to the ''Supplemental data sheet'' definition because not all implanted devices are class III, and another comment recommended changes to Form FDA 3429 (General Device Classification Questionnaire).

(Response 15) These comments are moot because, in a separate rulemaking (see 83 FR 64443 at 64454 through 64456, December 17, 2018, effective March 18, 2019), the definitions for the terms ''Supplemental data sheet'' and ''Classification questionnaire'' were removed from § 860.3 and the prior requirements to provide Form FDA 3427 (Supplemental Data Sheet) and Form FDA 3429 (General Device Classification Questionnaire) were removed from §§ 860.84 and 860.123.

(Comment 16) A comment requests that FDA keep the individual paragraph designations in the definitions section (§ 860.3) because the commenter states it is helpful to industry to be able to cite a specific term by paragraph designation.

(Response 16) FDA disagrees with this comment. FDA believes it would be easier for industry to locate definitions listed alphabetically. FDA has taken a similar approach in its labeling and unique device identification regulations (see 21 CFR 801.3 and 830.3). FDA further believes that it is not difficult to cite to alphabetical definitions within § 860.3.

G. Comments and FDA Response on De Novo Request Format

(Comment 17) A comment asks FDA to revise the proposed De Novo request format requirements to clarify that the application can be a single version in electronic format, conforming it to FDA's proposed rule, ''Medical Device Submissions: Amending Premarket Regulations That Require Multiple Copies and Specify Paper Copies To Be Allowed in Electronic Format'' (83 FR 46444, September 13, 2018).

(Response 17) FDA agrees that a De Novo request may be submitted as a single version in electronic format, which is currently eCopy and, in the future, may be a different electronic format. De Novo requests currently must be submitted as a single eCopy, in accordance with section 745A(b)(1) of the FD&C Act (21 U.S.C. 379k–1(b)(1)) and FDA's guidance, ''eCopy Program for Medical Device Submissions,'' issued April 27, 2020 (Ref. 8). Section 745A(b)(3) of the FD&C Act requires the presubmission and submission types enumerated in section 745A(b)(1) (including De Novo requests), any supplements to such presubmissions or submissions for devices, and any appeals of action taken with respect to such presubmissions or submissions, including devices under the Public Health Service Act, to be submitted solely in electronic format as specified by FDA in guidance. Once FDA issues guidance under section 745A(b)(3) of the FD&C Act, the Agency can require De Novo request submissions in electronic formats other than eCopy. We are revising paragraph § 860.210(a) (this final rule renumbers proposed § 860.223(a) as § 860.210(a)) to require submission of a De Novo request as a single version in electronic format).

(Comment 18) A commenter states it is overly prescriptive to require a specific format for a De Novo request.

(Response 18) We do not agree that the format FDA is requiring is overly prescriptive. Section 860.210 (this final rule renumbers proposed § 860.223 as § 860.210), the format section, requires that the De Novo request be signed by the requester or an authorized representative, be designated as a ''De Novo request,'' and be written or translated into English. FDA believes it is easier for FDA reviewers to find required information if the De Novo request information is provided in a specific format, thereby facilitating more efficient review and processing of the request.

(Comment 19) Because a De Novo request may contain only one volume, a comment asks FDA to revise the De Novo request format paragraph to qualify that the table of contents of a De Novo request reference a volume number only if the De Novo request contains more than one volume.

(Response 19) FDA agrees that it is unnecessary to cite the volume if the De Novo request does not contain more than one volume. We are revising paragraph § 860.220(a)(1) (this final rule renumbers proposed § 860.234(a)(1) as § 860.220(a)(1)) accordingly.

H. Comments and FDA Response on De Novo Request Content

(Comment 20) Some comments request FDA to revise the ''Device description'' provision at § 860.220(a)(6)(ii) ((this final rule renumbers proposed § 860.234(a)(6)(ii) as § 860.220(a)(6)(ii)) because the commenters state some of the terminology is more typically used to describe drugs than devices. The commenters suggest that ''component'' is more applicable to devices than ''ingredient,'' and that some components may not be ''functional'' but may still be important to a De Novo

classification decision. A commenter states the term ''principal components'' is appropriate because it signals that the submitter should identify the device's primary components but need not identify every component. Another commenter similarly suggests the term ''major components'' would be appropriate.

(Response 20) FDA disagrees that ingredient is an atypical term for a device. For example, in vitro diagnostic device labels generally are required to include the quantity, proportion, or concentration of each reactive ingredient for a reagent (21 CFR 809.10(a)(3)).

In addition, FDA does not agree with requiring only a device's principal or major components to be described in a De Novo request. FDA is requesting identification of all functional components or ingredients that comprise the subject device or combination product so that FDA has sufficient understanding of the device to evaluate whether general controls or general and special controls are sufficient to provide reasonable assurance of safety and effectiveness. We would consider any component of the device relating to how the device operates be a functional component. It was not our intent to limit the identification of the components or ingredients of the device or combination product. To that end, we disagree with the commenters' proposed edits to require identification of only major or principal components.

(Comment 21) Comments on the summary of studies (this final rule renumbers proposed § 860.234(a)(13)(ii) as § 860.220(a)(13)(ii)), the technical sections (this final rule renumbers proposed § 860.234(a)(15)(i) and (iii) as § 860.220(a)(15)(i) and (iii)), and the bibliography (this final rule renumbers proposed § 860.234(a)(16)(i) as § 860.220(a)(16)(i)) that are part of the required content of a De Novo request ask that FDA limit the required information to that ''necessary to determine the classification of the device.'' The commenter states that it is necessary to clarify that data unrelated to classification of the device (*e.g.,* for other indications) do not need to be submitted and that the focus of the application is to determine the classification of the device.

(Response 21) FDA does not agree with these comments and does not believe the requested clarifications are necessary. Under the FD&C Act, FDA determines the classification of a device that is the subject of a De Novo request (section 513(f)(2) of the FD&C Act). The requirements for the content of a De Novo request reflect the information that, in FDA's experience, generally is necessary to determine if general or general and special controls are sufficient to provide a reasonable assurance of safety and effectiveness of the device that is the subject of the De Novo request. To the extent the requester believes that certain required content for a De Novo request is not applicable to its device, the requester has the option under § 860.220(c) (this final rule renumbers proposed § 860.234(c) to § 860.220(c)) to omit that information and submit a statement that specifies the omitted information and justifies the omission. FDA will notify the requester if it does not accept the justification.

Further, § 860.220(a)(15) (this final rule renumbers proposed § 860.234(a)(15) as § 860.220(a)(15)) already specifies that the required technical sections must include data and information ''in sufficient detail to permit FDA to determine whether to grant or decline the De Novo request.'' Therefore, we believe it is already clear the information required in the technical sections under § 860.220(a)(15)(i) and (iii) (the final rule renumbers proposed § 860.234(a)(15)(i) and (iii) as § 860.220(a)(15)(i) and (iii)) and the related summary of studies under § 860.220(a)(13) (the final rule renumbers proposed § 860.234(a)(13) as § 860.220(a)(13)) is information focused on FDA's classification determination. In addition, the bibliography of published reports required under § 860.220(a)(16)(i) (the final rule renumbers proposed § 860.234(a)(16)(i) as § 860.220(a)(16)(i)) is limited to reports ''that concern the safety or effectiveness of the device.'' Published reports concerning the safety or effectiveness of the device that is the subject of the De Novo request would be useful to FDA's evaluation of the request.

(Comment 22) Some comments object that FDA's proposed requirements for the data and information submitted in a De Novo request are overly broad or potentially confusing. One commenter supports requirements for a thorough review of existing data but requests that the requirement to submit '' 'all' available data . . . should be clarified to indicate that which is reasonably attainable by'' the De Novo requester. Other commenters request that FDA change the phrase ''known or reasonably known'' in certain provisions of § 860.220(a) (this final rule renumbers proposed § 860.234(a) to § 860.220(a)) to ''known or reasonably available to'' the requester. These commenters indicate that the ''known or reasonably known'' standard does not clarify to whom the required information is known or reasonably known. A commenter also indicates that the proposed language could lead FDA reviewers to decide a De Novo requester is ''hiding something'' if the submission lacks information known to the reviewer but not the requester. Another commenter states that use of the term ''reasonably available'' instead would ''impl[y] that the sponsor must engage in reasonable effort to obtain the relevant information.''

(Response 22) FDA did not include provisions in the proposed rule using the phrase ''all available data'' as one comment suggests, but we believe limiting all of the required information for a De Novo request to that ''reasonably attainable by'' the requester is inappropriate. In some cases, for example, a requester may know of studies or reports concerning the safety or effectiveness of the device but be unable to obtain them for some reason (*e.g.,* the requester must pay to gain access to a registry containing the relevant data). In these cases, it is still useful to provide to FDA the information about such studies or reports that is known or reasonably should be known to the requester, even if complete information about or copies of such studies or reports is unavailable to the requester. For example, FDA may have a greater ability to access a publication with more complete information.

In response to these comments, FDA is revising § 860.220(a)(7) and (9) (this final rule renumbers proposed § 860.234(a)(7) as § 860.220(a)(7) and renumbers § 860.234(a)(11) as § 860.220(a)(9)) to clarify that the information required is that known to or that reasonably should be known to the requester. The intent of requiring a De Novo request to include information that is known or reasonably known to the requester is to ensure that the requester engages in a reasonable effort to provide relevant information and does not omit information important to FDA's determination to grant or decline the De Novo request because of a failure to conduct reasonable searches for such information. As explained in the proposed rule, for example, the summary of known or reasonably known probable risks to health associated with the use of the device required in the De Novo request under § 860.220(a)(9) ''should be based on the best available information at the time of submission of the De Novo request.'' (83 FR 63127 at 63133) These requirements help ensure that FDA's evaluation of a

De Novo request is based on complete and quality information and minimize review staff's need to request additional information. We believe the term ''should reasonably be known'' appropriately captures the intent of these requirements.

(Comment 23) A comment requests that FDA provide more flexibility in the standard for valid scientific evidence for De Novo devices as a way to address lower risk devices, rather than requiring only less-detailed summary information for some components of a complete De Novo request.

(Response 23) FDA disagrees with the comment. As in other device classification processes, FDA relies upon valid scientific evidence in determining the safety and effectiveness of a device that is the subject of a De Novo request (§ 860.260(e) (this final rule renumbers proposed § 860.289(d) as § 860.260(e)). This is unchanged by the requirement to provide summaries of certain information as part of a De Novo request. In addition, the required content of a De Novo request must include, in addition to such summaries, technical sections containing nonclinical study results, software information and testing, and clinical investigation results with sufficient detail to allow FDA to make a determination on the De Novo request.

Regarding the commenter's request for ''flexibility'' in the standard for valid scientific evidence, FDA does not believe any change is necessary. FDA's regulatory definition of valid scientific evidence already makes clear that ''[t]he evidence required may vary according to the characteristics of the device, its conditions of use, the existence and adequacy of warnings and other restrictions, and the extent of experience with its use'' (§ 860.7(c)(2)). FDA has also issued guidance explaining its approach to making benefit-risk determinations in the context of De Novo requests, which is a flexible, patient-centric approach tailored to the type and intended use of the device. See our guidances ''Factors to Consider When Making Benefit-Risk Determinations in Medical Device Premarket Approval and De Novo Classifications'' (Ref. 3) and ''Consideration of Uncertainty in Making Benefit-Risk Determinations in Medical Device Premarket Approvals, De Novo Classifications, and Humanitarian Device Exemptions'' (Ref. 9).

(Comment 24) A commenter states FDA should focus on device design to improve device safety. The same commenter asserts that all premarket applications (PMA, 510(k), and De Novo requests) should include a design and development plan, design input, output, design reviews, verification, validation, transfer, and all design changes.

(Response 24) FDA agrees that device design is important to device safety. Manufacturers are already required under part 820 (QSR) to focus on device design (§ 820.30, Design controls). Additionally, FDA may require additional verification or validation information for specific design features or inspect relevant facilities, where appropriate (§ 860.240, this final rule renumbers proposed § 860.256 as § 860.240).

(Comment 25) Because a commenter notes that ''manufacturer'' is used elsewhere in the proposed rule and because some commenters state that many companies no longer use Fax machines, the comments request that FDA revise the ''Administrative information'' provision of the De Novo request content section to add a reference to ''manufacturer,'' in addition to owners and operators, and to remove the reference to Fax machines from § 860.220(a)(2) (this final rule renumbers proposed § 860.234(a)(2) as § 860.220(a)(2)).

(Response 25) FDA agrees to remove the reference to Fax machines and is revising paragraph § 860.220(a)(2) (this final rule renumbers proposed § 860.234(a)(2) as § 860.220(a)(2)) accordingly. However, we do not agree that it is necessary to add a reference to ''manufacturer'' in this provision. In the final rule, § 860.220(a)(2) requires that the De Novo request include the establishment registration number of the owner or operator submitting the De Novo request, if applicable, because certain ''owners or operators,'' as defined in 21 CFR 807.3(f), are the entities required to register and submit listing information under 21 CFR part 807. Use of the terms ''owner'' and ''operator'' in § 860.220(a)(2) does not mean that a device manufacturer is unable to submit a De Novo request. The registration and listing requirements apply to owners or operators of establishments who are ''engaged in the manufacture, preparation, propagation, compounding, assembly, or processing of a device intended for human use,'' unless they are exempt under 510(g) of the FD&C Act or FDA regulations (see 21 CFR 807.20).

(Comment 26) A comment requests FDA revise the indications for use paragraph (§ 860.220(a)(5), this final rule renumbers the proposed § 860.234(a)(5) as § 860.220(a)(5)) in the De Novo request content section to include references to intended use and the meaning of that term for the purpose of determining substantial equivalence because intended use will be relevant to 510(k) submissions made after FDA grants a De Novo request. The commenter also suggests the revisions would align more closely with the PMA requirements in § 814.20(b)(3).

(Response 26) FDA does not agree with this comment and believes that the indications for use requirement is aligned with § 814.20(b)(3)(i) and the definitions in Appendix D of FDA's guidance, ''The 510(k) Program: Evaluating Substantial Equivalence in Premarket Notifications [510(k)]'' (Ref. 10).

(Comment 27) A few commenters state it is unnecessary and places a potentially unrealistic burden on the De Novo requester to provide a ''complete'' device description; the comments request FDA require a ''device description.''

(Response 27) FDA disagrees with these comments and is retaining the word ''complete'' in § 860.220(a)(6) (this final rule renumbers the proposed § 860.234(a)(6) as § 860.220(a)(6)). The word ''complete'' is appropriate in this context and not overly burdensome. FDA does not expect an excessively detailed description of the device, but there must be sufficient detail to describe the aspects of the device that could affect safety or effectiveness. A complete device description is necessary for FDA to classify a device.

(Comment 28) Comments on the requirement to describe alternative practices (§ 860.220(a)(7), this final rule renumbers proposed § 860.234(a)(7) as § 860.220(a)(7)) either support the requirement as facilitating classification and improving transparency, or request revisions to reduce the burden of describing known or reasonably known alternative practices and procedures. The comments suggest revising the provision to instead ask for a summary related to the standard of care for a disease or condition for which the device is indicated as it bears on the device's proposed classification or assessment of probable benefits and risks.

(Response 28) FDA disagrees with the comments to limit the description of alternative practices. We do not believe this requirement requires extensive unnecessary efforts, as some of the commenters suggest. As explained in the proposed rule, this requirement is intended to capture alternative biologic, device, or drug practices or procedures. An understanding of available alternative practices or procedures that are used to diagnose, treat, prevent, cure, or mitigate the disease or condition for which the device is

intended or that similarly affect the structure or function of the body is one of the factors FDA considers in its benefit-risk assessments to determine the appropriate classification for a device. For example, for a device indicated to treat a rare condition for which there are no alternative treatments, FDA may accept greater uncertainty in the evidence regarding the device's probable benefits and probable risks. Furthermore, FDA does not agree with the assumption that a standard of care exists for all diseases or conditions for which a device is intended.

(Comment 29) Comments request that FDA rearrange the order of the provisions in proposed § 860.234(a)(9) through (11) (this final rule renumbers proposed § 860.234(a)(9) as § 860.220(a)(11) and this final rule renumbers proposed § 860.234(a)(11) as § 860.220(a)(9)). Commenters suggest that the risks and mitigations form the basis for the classification recommendation and accordingly request that the *Summary of risks and mitigations* provision (proposed § 860.234(a)(11) precede the *Classification recommendation* provision (proposed § 860.234(a)(9)). Commenters further suggest that the *Proposed special controls* provision (proposed § 860.234(a)(10)) should immediately follow the *Summary of risks and mitigations* provision to demonstrate whether specific mitigations are general and/or special controls.

(Response 29) The order in proposed § 860.234(a)(9) through (11) follows the order in which section 513(f)(2)(A)(v) of the FD&C Act discusses corresponding items. However, we believe the commenters' proposed changes make sense. Accordingly, we are revising the order of the paragraphs as follows:

- § 860.220(a)(9) *Summary of risks and mitigations*;
- § 860.220(a)(10) *Proposed special controls;* and
- § 860.220(a)(11) *Classification recommendation.*

(Comment 30) A comment supports the requirement for a summary of known or reasonably known probable risks, while another comment suggests that the De Novo request include both a summary and a discussion of the probable risks and mitigations identified through a formal risk analysis.

(Response 30) FDA agrees with the comment supporting the requirement for a De Novo request to include a summary of known or reasonably known probable risks, but FDA believes that requiring both a summary and a discussion of these probable risks and proposed mitigations is unnecessary. The De Novo request will be required to summarize probable risks to health associated with use of the device that are known or should reasonably be known to the requester and the proposed mitigations. For each mitigation measure that involves specific performance testing or labeling, the request must reference the associated section or pages of the supporting information, such as supporting protocols and/or testing data. FDA believes such information is sufficient to assist the Agency in identifying the probable risks to health and in evaluating the proposed risk mitigation measures to determine whether general controls or general and special controls can provide reasonable assurance of safety and effectiveness. Furthermore, FDA requires a related discussion demonstrating that the probable benefit to health outweighs the probable risks of the De Novo device in § 860.220(a)(14) (this final rule renumbers the proposed § 860.234(a)(14) as § 860.220(a)(14)).

(Comment 31) A comment requests that FDA revise the standards paragraph to clarify that De Novo requesters are not required to declare conformity to standards referenced in the De Novo request.

(Response 31) The standards paragraph at § 860.220(a)(12) (this final rule renumbers the proposed § 860.234(a)(12) as § 860.220(a)(12)) does not require that De Novo requesters submit a declaration of conformity to the referenced standard, so the requested clarification is not necessary. See our guidance, ''Appropriate Use of Voluntary Consensus Standards in Premarket Submissions for Medical Devices'' (Ref. 11) for additional information on how to use consensus standards in premarket submissions, including information for those choosing to rely on a consensus standard in a declaration of conformity to meet a premarket submission requirement.

(Comment 32) A commenter states that the bibliography of all published reports concerning the safety or effectiveness of the device not submitted under the technical sections of the De Novo request (§ 860.220(a)(16)(i), this final rule renumbers proposed § 860.234(a)(16)(i) as § 860.220(a)(16)(i)) and the identification, discussion, and analysis of any other data, information, or report relevant to an evaluation of the safety and effectiveness of the device (§ 860.220(a)(16)(ii), this final rule renumbers proposed § 860.234(a)(16)(ii) as § 860.220(a)(16)(ii)) should be provided to FDA for consideration.

(Response 32) FDA agrees with the comment and believes that providing a bibliography of all published reports concerning the safety or effectiveness of the device not submitted under the technical sections of the De Novo request, as required by § 860.220(a)(16)(i), and the information on other data, information, or reports relevant to an evaluation of the safety and effectiveness of the device required under § 860.220(a)(16)(ii) will be useful to FDA's assessment of safety and effectiveness.

(Comment 33) A comment opposed authorizing implanted medical devices for marketing through the De Novo pathway without long-term controlled clinical trials because the commenter states patients deserve long-term safety and effectiveness data. A comment further recommends FDA require information about changes to the research protocol and statistical methodology in the summary of studies submitted in the De Novo request because the commenter states the information is important for evaluating the quality of the study.

(Response 33) FDA disagrees that long-term controlled clinical trials must be required across all implanted medical devices. In reviewing a De Novo classification request, studies other than long-term controlled clinical trials may also constitute valid scientific evidence that FDA can rely upon in making a benefit-risk determination for an implanted device, as discussed in our guidance ''Factors to Consider When Making Benefit-Risk Determinations in Medical Device Premarket Approval and De Novo Classifications'' (Ref. 3). ''Valid scientific evidence'' is defined in section 513(a)(3) of the FD&C Act and § 860.7(c)(2). Valid scientific evidence, as discussed in § 860.7(c)(2), includes ''partially controlled studies, studies and objective trials without matched controls, well-documented case histories conducted by qualified experts, and reports of significant human experience with a marketed device.'' FDA does not believe long-term, controlled clinical studies are necessary to demonstrate that general controls or general and special controls will provide a reasonable assurance of safety and effectiveness for all implantable devices reviewed through the De Novo pathway. For example, some devices are intended to be implanted for a relatively short period of time (*e.g.,* 30 days) and then removed from the body; longer term clinical data therefore may not be needed to assess

the safety and effectiveness of these devices when used as intended.

Requiring these studies for all implantable devices is also inconsistent with FDA's least burdensome approach to medical device regulation, which is intended to eliminate unnecessary burdens that may delay the marketing of beneficial new products, while maintaining the statutory requirements for marketing authorization. As discussed in FDA's guidance, ''The Least Burdensome Provisions: Concept and Principles'' (Ref. 12), FDA typically follows a stepwise analytical process when requesting additional information to make a decision on a marketing submission to ensure the information requested reflects the least burdensome approach. FDA typically requests clinical data when analytical or nonclinical bench performance testing data, or nonclinical animal [1] and/or biocompatibility studies are insufficient, or available scientific methods are not acceptable, *e.g.,* the scientific methods are deemed unacceptable because they are not clinically validated or are not supported by a valid scientific rationale.

We do not believe any changes are necessary to address the comment's request that FDA require information about changes to the research protocol and statistical methodology. In addition to the summary of studies required under § 860.220(a)(13) (this final rule renumbers proposed § 860.234(a)(13) as § 860.220(a)(13)), the technical sections of the De Novo request must include, among other things, protocols, investigation design, results of statistical analyses, and any other appropriate information, for each clinical investigation used to support the De Novo request (§ 860.220(a)(15), this final rule renumbers proposed § 860.234(a)(15) as § 860.220(a)(15)). Therefore, the required contents of the technical section would already capture information regarding significant changes made to the protocol or to the statistical methodology that would be important for evaluating the results of the study.

(Comment 34) A few comments propose revisions to the human subject study summaries provision at § 860.220(a)(13)(ii) (this final rule renumbers proposed § 860.234(a)(13)(ii) as § 860.220(a)(13)(ii)) to require that this section of the De Novo request include a summary of ''any clinical data'' known by or reasonably available to the requester submitted in the De Novo request instead of a summary of ''each clinical investigation'' submitted in the De Novo request. The commenters suggest that the language in the proposed rule appeared to assume that the requester's only source of clinical data would be clinical investigations that the requester initiated and note that there may be other sources of clinical data, such as studies described in literature or conducted by others, or in marketing data from other countries. They also recommend limiting the information about such clinical data required in the summary to that ''known or reasonably available'' to the requester because it would clarify that when complete data are not available, they are not required.

(Response 34) FDA agrees that sources of clinical data other than clinical investigations initiated by the requester may be available to the requester; however, we do not agree that the proposed requirement for the De Novo request to include a summary of studies limits the types of clinical data that may be submitted in a De Novo request. Under § 860.220(a)(13), (this final rule renumbers proposed § 860.234(a)(13) as § 860.220(a)(13)), the De Novo request must include an abstract of any information or report described in the De Novo request under § 860.220(a)(16)(ii) (this final rule renumbers proposed § 860.234(a)(16)(ii) as § 860.220(a)(16)(ii)) and a summary of the results of technical data submitted under § 860.220(a)(15) (this final rule renumbers proposed § 860.234(a)(15) as § 860.220(a)(15)). The information required under § 860.220(a)(16)(ii) includes ''information derived from investigations other than those in the request and from commercial marketing experience.'' Therefore, clinical data derived from other sources, such as marketing experience in other countries, are among the types of data that would be summarized under § 860.220(a)(13). The particular paragraph of § 860.220(a)(13) that the commenters suggest revising sets forth additional information that summaries must discuss for those clinical investigations involving human subjects that are submitted in the De Novo request.

FDA also disagrees that it is necessary to limit the information required under § 860.220(a)(13)(ii) (this final rule renumbers proposed § 860.234(a)(13)(ii) as § 860.220(a)(13)(ii)) to that known or reasonably available to the requester. The requester should be able to provide the information required under § 860.220(a)(13)(ii) for clinical investigations submitted in the technical sections in support of the De Novo request. To the extent certain elements required for the summary of such clinical investigations are not included in the De Novo request because they are not reasonably available to the requester, the requester should address why they are not available. Therefore, we are not revising § 860.220(a)(13)(ii) in response to these comments.

(Comment 35) A comment requests FDA to qualify the requirement for a De Novo request to provide a discussion demonstrating that the data and information in the request constitute valid scientific evidence, with the phrase, ''if applicable,'' because a De Novo request for a low-risk device may present de minimis valid scientific evidence.

(Response 35) FDA disagrees with this comment. As part of the De Novo classification process, FDA must determine that the device is of low to moderate risk (21 U.S.C. 360c(f)(2)(A)(iv)). FDA relies upon valid scientific evidence in determining the safety and effectiveness of a device for purposes of classification, as explained in our response to Comment 23. Therefore, adding the phrase ''if applicable'' as the commenter suggests would not be appropriate.

As discussed in FDA's guidance, ''Factors to Consider When Making Benefit-Risk Determinations Medical Device Premarket Approval and De Novo Classifications'' (Ref. 3), FDA assesses the benefits and risks of a device that is the subject of a De Novo request to determine if general or general and special controls are sufficient to provide reasonable assurance of safety and effectiveness (see § 860.7(d)(1) and (e)(1)). While low-risk devices may not need to show as substantial a benefit to patients to have a favorable benefit-risk profile, FDA's classification determination must still be based on valid scientific evidence.

(Comment 36) A comment requests FDA to clarify that, where relevant, requirements for data and information in the technical sections in § 860.220(a)(15) (this final rule renumbers proposed § 860.234(a)(15) as § 860.220(a)(15)) may be satisfied by cross-referencing data and information submitted in satisfaction of the summary of studies provision (§ 860.220(a)(13), this final rule renumbers proposed § 860.234(a)(13) as § 860.220(a)(13)) to avoid requiring a requester to repeat information provided earlier in the De Novo request. A comment also requests that FDA remove the list of specific items that must be

[1] FDA supports the principles of the ''3Rs,'' to reduce, refine, and replace animal use in testing when feasible. We encourage sponsors to consult with us if it they wish to use a non-animal testing method they believe is suitable, adequate, validated, and feasible. We will consider if such an alternative method could be assessed for equivalency to an animal test method.

included in the summary of each clinical investigation under § 860.220(a)(13)(ii) (this final rule renumbers proposed § 860.234(a)(13)(ii) as § 860.220(a)(13)(ii)) because the commenter asserts it is unnecessarily restrictive and repetitive to require this information in the summary when the same information is also required in the technical sections of the De Novo request under § 860.220(a)(15)(iii) (this final rule renumbers proposed § 860.234(a)(15)(iii) as § 860.220(a)(15)(iii)).

(Response 36) FDA does not agree with this comment. The summary of technical data required under § 860.220(a)(13) is intended to be analogous to an executive summary of each study used to support the De Novo request and would typically include less information than that submitted in the technical sections. The information required in the technical sections (§ 860.220(a)(15)) is the more detailed and complete information regarding each study. While it may be appropriate to cross reference the information from the summary section (§ 860.220(a)(13)), FDA does not believe cross referencing the information in the summary required under § 860.220(a)(13) would be sufficient to provide all of the required technical information to support marketing authorization. Because the summary information required for clinical investigations submitted in the De Novo request may include information other than the specific items listed in § 860.220(a)(13)(ii) and because it is intended to be a higher level summary of the data in the technical sections, we do not believe the required summary is unnecessarily restrictive or repetitive.

(Comment 37) A few comments ask FDA to revise the nonclinical testing paragraph (§ 860.220(a)(15)(i), this final rule renumbers proposed (§ 860.234(a)(15)(i) as (§ 860.220(a)(15)(i)) by moving the ''as appropriate'' qualifier forward in the sentence.

(Response 37) FDA agrees that moving the words ''as appropriate'' forward in the sentence would clarify the requirement. We are revising paragraph § 860.220(a)(15)(i) accordingly.

(Comment 38) A few comments ask FDA to revise the requirements for a summary of studies and the technical sections in a De Novo request to clarify that a statement regarding compliance with part 58 is only necessary for studies that are required to comply with part 58 because the commenters state that many nonclinical studies are outside the scope of part 58 if they do not involve the use of animals or other test systems.

(Response 38) FDA agrees that some nonclinical studies that may be submitted to support a De Novo request, such as certain electromagnetic compatibility testing, are not subject to part 58. In response to these comments, FDA is revising § 860.220(a)(15)(i) (this final rule renumbers proposed § 860.234(a)(15)(i) as § 860.220(a)(15)(i)) to clarify that a statement of compliance with part 58 (or a brief statement of the reason for noncompliance) is required only for nonclinical studies subject to part 58.

(Comment 39) A comment asks FDA to revise the requirements for submitting results of clinical investigations involving human subjects (§ 860.220(a)(15)(iii), this final rule renumbers proposed § 860.234(a)(15)(iii) as § 860.220(a)(15)(iii)) to clarify that clinical investigations are not required in all cases to support the De Novo classification decision. Comments also requested revisions to this provision to clarify that some clinical investigations submitted in the De Novo request may be ongoing (*e.g.,* clinical investigations that are ongoing but for which all subjects have reached the primary endpoint). These comments also ask FDA to revise the proposed regulatory text to refer to ''records'' instead of copies of individual subject report forms because the commenters assert that many clinical investigations are carried out with validated electronic data capture systems and individual human subject forms are not used.

(Response 39) FDA agrees that clinical evidence may not always be required in a De Novo request to support a determination that general controls or general and special controls provide a reasonable assurance of safety and effectiveness of the device and device type. However, we believe no clarification is needed regarding whether a clinical investigation involving human subjects is required because that determination will be specific to the De Novo request. If the requester believes that information regarding clinical investigations required under § 860.220(a)(15)(iii) (this final rule renumbers proposed § 860.234(a)(15)(iii) as § 860.220(a)(15)(iii)), or other information required under § 860.220(a)(15)(i) (this final rule renumbers proposed § 860.234(a)(15)(i) as § 860.220(a)(15)(i)), is not applicable to its device, then the requester may include a justification for omitting that information from the De Novo request in accordance with § 860.220(c) (this final rule renumbers proposed § 860.234(c) as § 860.220(c)). If De Novo requesters have questions about the process for submission and review of a De Novo request for their device, we recommend that they consult FDA's guidance, ''De Novo Classification Process (Evaluation of Automatic Class III Designation)'' (Ref. 5) and request a meeting with FDA through the Q-submission program. Meetings between the requester and FDA allow for an open discussion and exchange of technical, scientific, and regulatory information that can help build a common understanding of FDA's initial expectations regarding clinical studies and nonclinical studies related to the De Novo request (Ref. 13).

FDA recognizes that some De Novo requests include results from clinical investigations that remain ongoing, such as a study that has a pre-specified interim analysis of safety or effectiveness data. However, FDA believes the regulatory text in § 860.220(a)(15)(iii) would already permit inclusion of such results and does not believe a revision to the regulatory text is necessary.

We also recognize that some comments raise a concern that individual subject forms are not used in many clinical investigations. While the commenters do not object to providing individual subject information for those subjects who died during a clinical investigation or who did not complete the investigation, the commenters suggest that the term ''records'' would better reflect electronic source data instead of the term ''copies of such forms.'' We agree with the comments that data capture and collection methods used in clinical investigations have evolved over time. FDA has published guidance, ''Use of Electronic Health Record Data in Clinical Investigations,'' addressing data capture in clinical investigations that do not use paper case report forms (Ref. 14). FDA interprets the term ''individual subject form,'' as used in this rule, to include the different electronic or paper formats used to capture individual subject data. Therefore, we do not believe that using the term ''record'' is necessary.

(Comment 40) A comment asks FDA to require that the technical sections of a De Novo request include a protocol and a report for all clinical investigations and laboratory studies to make the requirements for the technical sections more consistent and less confusing.

(Response 40) We agree that additional clarity regarding technical sections requirements for nonclinical studies would be helpful. Protocols and complete test reports generally are necessary to provide sufficient detail

regarding the results of a nonclinical study to permit FDA to determine whether to grant or decline the De Novo request. However, we are revising § 860.220(a)(15)(i) (this final rule renumbers proposed § 860.234(a)(15)(i) as § 860.220(a)(15)(i)) to state expressly that these materials must be provided for each nonclinical study submitted in the technical sections of the request. FDA's guidance, ''Recommended Content and Format of Non-Clinical Bench Performance Testing Information in Premarket Submissions'' (Ref. 15) discusses the information that should typically be included in test protocols and complete test reports for nonclinical bench performance testing provided in a premarket submission. We note that in cases where a requester is appropriately declaring conformity with a voluntary consensus standard that FDA has recognized pursuant to section 514(c) of the FD&C Act (21 U.S.C. 360d(c)) to meet applicable requirements, it may not be necessary to submit complete test reports with respect to those requirements. In these cases, the requester may submit a statement of omission for this information in the De Novo request in accordance with § 860.220(c). However, consistent with section 514(c)(3)(B) of the FD&C Act, FDA may request, at any time, the data or information relied on by a person to make a declaration of conformity with respect to a recognized standard. See FDA's guidance ''Appropriate Use of Voluntary Consensus Standards in Premarket Submissions for Medical Devices'' (Ref. 11) for more information regarding use of declarations of conformity in premarket submissions.

FDA disagrees with modifying § 860.220(a)(15)(iii) to specifically require submission of a clinical investigation report. This provision already describes the supporting information required regarding the results of each clinical investigation, and in our experience, there can be significant variability in the types of information included in ''reports'' prepared for clinical investigations. If some or all of the information required under § 860.220(a)(15)(iii) is included in a separate clinical investigation report, the requester may include the report in its De Novo request to satisfy those requirements.

(Comment 41) A comment asks FDA to revise the ''other information'' provision (§ 860.220(a)(16), this final rule renumbers proposed § 860.234(a)(16) as § 860.220(a)(16)) to limit the information required in the bibliography of all published reports not submitted under the technical sections of the De Novo request (§ 860.220(a)(15), this final rule renumbers proposed § 860.234(a)(15) as § 860.220(a)(15)) to those ''necessary to support the safety or effectiveness of the device'' because the commenter asserts such reports should be limited to those needed to establish the device's proposed classification, its probable risk, and its probable benefit.

(Response 41) We do not agree with limiting the bibliography required under § 860.220(a)(16) to that information necessary to support the device's safety or effectiveness. Paragraph § 860.220(a)(16)(i) (this final rule renumbers proposed § 860.234(a)(16)(i) as § 860.220(a)(16)(i)) requires that the requester submit a bibliography of all adverse or supportive published reports, other than those submitted in greater detail in the technical sections of the De Novo request, that are known to or should reasonably be known to the requester and that concern the safety and effectiveness of the device. The commenter's proposed revision would eliminate the requirement to include adverse published reports that may call into question the safety or effectiveness of the device at issue. However, such adverse reports may be important to FDA's assessment of the probable benefits and risks of the device and affect the Agency's classification determination.

(Comment 42) A comment supports the requirement to provide a sample of the device, if requested by FDA (§ 860.220(a)(17), this final rule renumbers proposed § 860.234(a)(17) as § 860.220(a)(17)) because it improves transparency. Other comments request that FDA eliminate the language indicating that the Agency may ''test'' one or more of the devices because FDA has traditionally relied on testing by the manufacturer. Another commenter indicated that while providing samples may be appropriate for a high-risk device likely to be reviewed in a PMA, it is unclear that samples are necessary for devices reviewed through the De Novo pathway.

(Response 42) FDA disagrees with the comments that suggest limiting the sample requirement and agrees with the comment that the request for samples improves transparency. In many cases, FDA relies on descriptions of a device and testing performed by manufacturers to evaluate safety and effectiveness. However, there are some situations in which FDA would request a sample of a device reviewed through the De Novo pathway because FDA needs to see or test the device to understand the device and determine if general or general and special controls are sufficient to reasonably assure safety and effectiveness of the device and device type. Examples of the situations where a device sample may be requested by FDA for examination or testing include devices intended for use by a lay person that previously have been marketed for use by a physician or other experienced healthcare professional, and devices with novel, complex designs that are difficult to assess solely through written description and/or engineering drawings.

(Comment 43) A comment supports the proposed requirement that a De Novo request include ''[l]abels, labeling, and advertisements sufficient to describe the device, its intended use, and the directions for its use'' (§ 860.220(a)(18), this final rule renumbers proposed § 860.234(a)(18) as § 860.220(a)(18)) because this requirement improves transparency. Other commenters propose limiting the requirement to not include advertisements because the commenters state advertisements are outside the scope of a class I and class II device review.

(Response 43) FDA agrees that the requirement to submit labels, labeling, and advertisements improves transparency. FDA disagrees that review of advertisements is outside the scope of De Novo request review. Under the proposed provision, only labels, labeling, and advertisements ''sufficient to describe the device, its intended use, and the directions for its use'' are required, and such information is necessary to determine the device's intended use and its safety and effectiveness for the purposes of classification. See, *e.g.,* § 860.7(b)(2).

(Comment 44) A comment supports the requirement for a requester to provide a list of any required information that is omitted from the De Novo request and a justification for any omission because the commenter states it would ensure completeness of the applicant's research and pre-application evaluations.

(Response 44) FDA agrees that it is beneficial for the requester to provide a statement identifying and justifying the omission of any information required under § 860.220(a) (this final rule renumbers proposed § 860.234(a) as § 860.220(a)) and is finalizing the requirement to provide such a statement in § 860.220(c) (this final rule renumbers proposed § 860.234(c) as § 860.220(c)). However, we wish to clarify that the omissions statement is not required to be in the format of a list, as the comment suggests.

(Comment 45) A comment requests FDA to revise the requirements for incorporation of information in FDA files by reference (§ 860.220(b), this final

rule renumbers proposed § 860.234(b) as § 860.220(b)) to permit the requester to file a general authorization allowing another person to submit additional pertinent information. According to the commenter, this would allow De Novo requesters to avoid the need for case-by-case authorization.

(Response 45) FDA disagrees with this comment and believes the commenter misunderstands the circumstances in which FDA requires an authorization. The provision in § 860.220(b) addresses situations in which a De Novo request references information in FDA's files that was submitted by someone other than the requester. For FDA to consider that information as part of the De Novo request, we require a written authorization from the person originally submitting that information to FDA that authorizes the use of the information in the De Novo request. Because the authorizer determines the scope of the authorization, it can be as broad or as limited as the authorizer wants the authorization to be. The comment seems to suggest that the requester should be able to provide authorization for the De Novo request to reference information in FDA's files submitted by others, but the submitters of the data are the ones in a position to authorize references to it.

(Comment 46) A few comments request FDA to revise the requirement to update a pending De Novo request with new information from ongoing or completed studies that may reasonably affect an evaluation of the safety and effectiveness of the device as it becomes available (§ 860.220(d), this final rule renumbers proposed § 860.234(d) as § 860.220(d)) because the commenters assert FDA should allow time for data aggregation and assessment. The comments suggest that FDA should require such information as agreed upon with the De Novo requester or as specified in a protocol.

(Response 46) FDA disagrees with these comments. The comments assume incorrectly that for each ongoing or completed nonclinical and/or clinical study, there exists a protocol that has timeframes for reporting new safety and effectiveness information to FDA or an agreement specifying when new safety and effectiveness information must be submitted to update a pending De Novo request. FDA is also concerned that specifying a set time period for updating the De Novo request would be problematic because the importance of the data required to be reported may vary. For example, FDA would be particularly interested in receiving quickly information that concerns the death of a human subject. Updating a De Novo request in accordance with pre-set periods in a protocol or agreement could also result in FDA making a decision on a De Novo request without key, available safety and effectiveness information. For example, an unplanned review of the safety data could have implications on the statistical validity of a study.

I. Comments and FDA Response on Criteria for Accepting a De Novo Request

(Comment 47) A comment states the requirements in § 860.230 (this final rule renumbers proposed § 860.245 as § 860.230)) should be moved to FDA's guidance, ''Acceptance Review for De Novo Classification Requests'' (FDA draft guidance published October 30, 2017). Another comment recommends finalizing FDA's guidance, ''Acceptance Review for De Novo Classification Requests,'' concurrently with finalizing the rule.

(Response 47) FDA disagrees with this comment because FDA's requirements are based on its statutes and regulations. FDA guidance provides non-binding recommendations. Regulations are necessary because they allow the Agency to enforce the requirements therein. For this reason, we decline to remove the accepting a De Novo request requirements, including those in § 860.230, from this regulation.

FDA's ''Acceptance Review for De Novo Classification Requests'' guidance was finalized on September 9, 2019 (84 FR 47310) (Ref. 16), so the comment requesting concurrent publication is moot.

(Comment 48) A comment requests FDA to clarify that references to ''15 days'' signify calendar days because it will enhance De Novo requester planning.

(Response 48) FDA declines to clarify in the codified but confirms that it interprets ''15 days'' to mean ''15 calendar days.'' This interpretation is consistent with FDA's final guidance entitled, ''Acceptance Review for De Novo Classification Requests'' (Ref. 16), which explains that the 15 days are calendar days. It is also consistent with our interpretation of ''days'' as used in analogous regulations for PMAs and 510(k)s.

J. Comments and FDA Response on Granting or Declining a De Novo Request

(Comment 49) A comment objects to developing a new lexicon for De Novo requests (*i.e.,* grant or decline) and asks FDA to use the term ''approval'' because the commenter asserts that CDRH approves both ''De Novo devices'' and ''PMA devices'' for marketing based on a determination that they are safe and effective for their intended use.

(Response 49) We disagree with this comment. The term ''decline'' is language from section 513(f)(2) of the FD&C Act, and FDA believes the term ''grant'' is appropriate, given that section 513(f)(2) of the FD&C Act addresses a ''request for classification.'' In addition, FDA does not make identical determinations when approving a PMA or granting a De Novo request. The statutory standards for approval of a PMA include a showing of reasonable assurance that the device is safe and effective (see section 515(d) of the FD&C Act). FDA will grant a De Novo request and classify the device as either class I or class II when the request demonstrates that general controls or general and special controls are adequate to provide reasonable assurance of safety and effectiveness (see section 513(a) and (f)(2) of the FD&C Act).

(Comment 50) To be consistent with section 513(f)(2)(C) of the FD&C Act, a few comments requested that FDA revise the provision regarding publication in the **Federal Register** of the notice announcing the classification of the device to state that the publication will occur within 30 days of granting the request.

(Response 50) FDA agrees to revise § 860.260(a)(2) (this final rule renumbers proposed § 860.289(a)(2) as § 860.260(a)(2)) to reflect the statutory timeframe for publishing a notice in the **Federal Register** announcing the classification of a device under section 513(f)(2)(C) of the FD&C Act. We are revising § 860.260(a)(2) accordingly to add the phrase ''within 30 days after the issuance of an order granting the De Novo request.'' We note that the classification of a device, including any special controls, is effective on the date the order letter is issued granting the De Novo request. Once the De Novo request is granted, the device may serve as a predicate device to which another device can claim substantial equivalence. FDA places copies of such orders on its website.

(Comment 51) A comment on the proposed provisions for declining a De Novo request notes that stating FDA ''may issue written notice'' declining a request suggests there is an alternative to issuing a written notice and asks FDA to describe the alternative.

(Response 51) FDA intended to outline the grounds for which FDA may decline a De Novo request in proposed § 860.289(b) (this final rule renumbers proposed § 860.289(b) as § 860.260(c) and moves the grounds for which FDA may decline a De Novo request into

§ 860.260(c)). FDA explained in the preamble to the proposed rule that it was proposing to ''decline a De Novo request by issuing a written order to the requester'' (83 FR 63127 at 63137). However, FDA is revising paragraph § 860.260(b) and (c) accordingly to clarify this point.

(Comment 52) A comment asks FDA to delete the entire paragraph § 860.260(c) (this final rule renumbers proposed § 860.289(b) as § 860.260(c) and moves the grounds for which FDA may decline a De Novo request into § 860.260(c)) on declining a De Novo request because the commenter states the paragraph exceeds the appropriate bases for denial of a De Novo request, which the commenter identifies as the device is inappropriate for classification into class I or class II, or there is a legally marketed predicate device.

(Response 52) FDA disagrees with this comment. Section 860.260(c)) (this final rule renumbers proposed § 860.289(b) as § 860.260(b) and moves the grounds for which FDA may decline a De Novo request into § 860.260(c)) explains FDA's interpretation and implementation of the statutory grounds for declining a De Novo request, which does not rely upon only section 513(f)(2)(A)(iv) of the FD&C Act. For example, if a product is not a device within the meaning of section 201(h) of the FD&C Act or a combination product as defined at § 3.2(e) (21 CFR 3.2(e)), then FDA may decline to grant the De Novo request.

As noted in the proposed rule (83 FR 63127 at 63137), FDA generally intends to decline a De Novo request for a combination product that does not have a device primary mode of action—(see § 3.2(m)). However, a De Novo request may be appropriate, for example, for the device constituent part of such a combination product if the constituent parts of the combination product are to be distributed separately (see § 3.2(e)(3) through (4)), and the other constituent part (drug or biological product) of the combination product is to be marketed under its own, separate application (*i.e.,* abbreviated new drug application, NDA, or biologics license application).

(Comment 53) A few comments request that FDA delete the entire paragraph on declining a De Novo request because the device labeling does not comply with parts 801 and 809 (21 CFR parts 801 and 809) because the commenters state it is outside the scope of the De Novo classification process to deny classification based on the device's labeling.

(Response 53) FDA disagrees with these comments. Parts 801 and 809 are general controls, and whether the device complies with general controls is necessary to determine whether it is of low to moderate risk for the purposes of classification. FDA may decline a De Novo request if it determines that the device submitted is not of low to moderate risk, or that general controls would be inadequate to control the risk and special controls to mitigate the risks cannot be developed. Whether the device's labeling complies with the requirements in parts 801 and 809 is necessary to determine which regulatory controls are appropriate for the new device type class. The device's labeling compliance with parts 801 and 809 is also necessary to determine the device's safety and effectiveness for the purposes of classification.

(Comment 54) A comment requests FDA to revise the basis for declining a De Novo request set forth in § 860.260(c)(8) (this final rule renumbers proposed § 860.289(b)(8) as § 860.260(c)(8)) to specify that a request may only be declined when certain nonclinical studies within the scope of part 58 are not conducted in compliance with those regulations. The commenter asserts that many nonclinical studies are outside the scope of part 58.

(Response 54) FDA agrees that a De Novo request may include nonclinical studies that are not subject to part 58, as we explained in Response 38. FDA would not decline a De Novo request on the basis that a nonclinical study failed to comply with part 58, if that study did not fall within the scope of studies that are subject to part 58. However, FDA is revising § 860.260(c)(8) to make this clearer.

(Comment 55) A comment requests that FDA revise the paragraph on declining a De Novo request (§ 860.260(c)(10)(i), this final rule renumbers proposed § 860.289(b)(10)(i) as § 860.260(c)(10)(i)) because the commenter states that failure to follow a protocol is not, per se, a reason to decline a De Novo request.

(Response 55) FDA disagrees with the commenter's suggestion to revise the provision on declining a De Novo request so that it does not include failure to follow a protocol. The failure to follow a protocol may cause the resulting data to be incomplete, invalid, or otherwise unreliable, and may be a sufficient reason to decline a De Novo request. Protocols typically discuss the objectives, design, methodology, and organization of a clinical or nonclinical study. Significant deviations from a study protocol may lead to a study that, as conducted, does not produce valid scientific evidence. Alternatively, data from a study that was terminated early may not provide sufficient information to support a reasonable assurance of safety or effectiveness.

(Comment 56) A comment objects to the placement of the paragraph on determining safety and effectiveness as one of the last paragraphs in subpart D because the commenter states FDA should do both a classification determination and a determination of the device's safety and effectiveness.

(Response 56) FDA does not agree with the comment's premise that the location of the paragraph in subpart D is an indication of the paragraph's importance. The FD&C Act provides that the De Novo process is both a classification and a marketing authorization grant for the particular device (section 513(f)(2) of the FD&C Act). The classification determination and ''determination of safety and effectiveness'' are necessary to make a determination regarding the device which is the subject of the De Novo request.

K. Comments and FDA Response on Availability of the De Novo Classification Process for Combination Products

(Comment 57) A comment requests that FDA clarify that for the summary of risk and mitigations and the risk-benefit discussion required to be submitted in the De Novo request, the summary and the risk-benefit discussion should describe the incremental risk and benefits posed by a combination product because the commenter states the content requirements should reflect that the De Novo classification process is available for combination products.

(Response 57) FDA believes that inclusion of this language is unnecessary as we consider section 503(g)(3) of the FD&C Act to be clear regarding its applicability to combination products that include an approved constituent part as defined in section 503(g)(3) of the FD&C Act. In addition, the statute is clear that these considerations apply to such combination products submitted under sections 515, 510(k), and 513(f)(2) of the FD&C Act. We do not believe inclusion of this language is necessary to provide further clarity beyond what is stated in the statute. Combination products have distinct premarket review and approvability considerations arising from combining a drug, device, and/or biological product, which retain their regulatory identities when they become constituent parts of combination products. Combination products are also a separate legal category of medical products, distinct from biological products, devices, and drugs. General principles of premarket review and

regulation for combination products include application of a risk-based approach and coordination among Centers for their review and regulation. Review of combination products in a De Novo classification request would consider safety and effectiveness questions relating to the combination product as a whole, each constituent part, interactions between them, and user/patient interaction with the product.

(Comment 58) A comment asks FDA to clarify that while a De Novo request may be appropriate for the device constituent part of a combination product where the constituent parts of the combination product are distributed separately (*e.g.,* § 3.2(e)(3) through (4)), and the non-device (drug or biologic) constituent part is to be marketed under its own, separate application, the non-device constituent part must be appropriately labeled for use with the device constituent part (*i.e.,* approved at doses, concentrations, routes of administration, indications, and adequate instructions for use). The commenter notes that if the non-device constituent part is not appropriately labeled for use with the device constituent part, then FDA would cause the non-device constituent party to be adulterated or misbranded.

(Response 58) FDA does not agree that clarification is necessary. Per § 3.2(e), the labeling of the constituent parts of such ''cross-labeled'' combination products specify use only with the other approved individually specified constituent part(s), which are required to achieve the intended use, indication, or effect. The labeling for the combination product is comprised of the labeling for each constituent part.

(Comment 59) A comment requests that FDA consider ''co-packaged'' combination products (per § 3.2(e)(2)) that have a device primary mode of action as eligible for the De Novo classification process.

(Response 59) Regarding inclusion of co-packaged combination products as defined in § 3.2(e)(2) that have a device primary mode of action, FDA does not believe further clarification is warranted in the codified because § 860.260 (this final rule renumbers proposed § 860.289 as § 860.260) explains that we are using the definition of combination products in § 3.2(e)(1) through (4). Co-packaged combination products as defined in § 3.2(e)(2) that have a device primary mode of action are part of this definition and eligible for the De Novo classification process.

VI. Effective Date

This final rule will become effective 90 days after the date of publication in the **Federal Register**.

VII. Economic Analysis of Impacts

We have examined the impacts of the final rule under Executive Order 12866, Executive Order 13563, the Regulatory Flexibility Act (5 U.S.C. 601–612), and the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). Executive Orders 12866 and 13563 direct us to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity). We believe that this final rule is a significant regulatory action as defined by Executive Order 12866.

The Regulatory Flexibility Act requires us to analyze regulatory options that would minimize any significant impact of a rule on small entities. Because small entities affected by this final rule would incur very low one-time costs to read and understand the rule, we certify that the final rule will not have a significant economic impact on a substantial number of small entities.

The Unfunded Mandates Reform Act of 1995 (section 202(a)) requires us to prepare a written statement, which includes an assessment of anticipated costs and benefits, before issuing ''any rule that includes any Federal mandate that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more (adjusted annually for inflation) in any one year.'' The current threshold after adjustment for inflation is $158 million, using the most current (2020) Implicit Price Deflator for the Gross Domestic Product. This final rule would not result in an expenditure in any year that meets or exceeds this amount.

The final rule will clarify the De Novo classification process for certain medical devices to obtain marketing authorization as class I or class II devices, rather than remaining automatically designated as class III devices under the FD&C Act. In addition, the final rule will clarify and create a more efficient De Novo classification process by specifying: (1) What medical devices are eligible for the De Novo classification process; (2) what information manufacturers must provide in De Novo requests; and (3) how to organize this information. By clarifying and making the process more efficient, the final rule could reduce the time and costs associated with reviewing De Novo requests. Moreover, the final rule will allow us to refuse to accept inappropriate and deficient De Novo requests and require us to protect the confidentiality of certain data and information submitted with a request until we issue an order granting the request.

Industry will incur costs to read and understand this final rule. We estimate that the annualized costs over 10 years would range from $0.01 million to $0.17 million at a 7 percent discount rate, with a primary estimate of $0.09 million. We estimate that the annualized costs over 10 years at a 3 percent discount rate would range from $0.01 million to $0.15 million, with a primary estimate of $0.08 million.

TABLE 2—SUMMARY OF BENEFITS, COSTS AND DISTRIBUTIONAL EFFECTS OF THE FINAL RULE

[$ millions]

Category	Primary estimate	Low estimate	High estimate	Units			Notes
				Year dollars	Discount rate (percent)	Period covered (years)	
Benefits:							
Annualized				2019	7	10	
Monetized $millions/year				2019	3	10	
Annualized Quantified				2019	7	10	
				2019	3	10	

TABLE 2—SUMMARY OF BENEFITS, COSTS AND DISTRIBUTIONAL EFFECTS OF THE FINAL RULE—Continued
[$ millions]

Category	Primary estimate	Low estimate	High estimate	Units			Notes
				Year dollars	Discount rate (percent)	Period covered (years)	
Qualitative							Clarification of the De Novo process for requesters. Potentially fewer incomplete submissions and faster introduction of medical devices.
Costs:							
Annualized Monetized $millions/year	$0.09	$0.01	$0.17	2019	7	10	
	0.08	0.01	0.15	2019	3	10	
Annualized Quantified				2019	7	10	
				2019	3	10	
Qualitative.							
Transfers:							
Federal Annualized Monetized $millions/year.				2019	7	10	
				2019	3	10	
	From:			To:			
Other Annualized Monetized $millions/year.				2019	7	10	
				2019	3	10	
	From:			To:			
Effects:							
State, Local or Tribal Government: None.							
Small Business: A small one-time administrative burden of up to $300 per year on each affected small entity.							
Wages: None.							
Growth: None.							

We have developed a comprehensive Economic Analysis of Impacts that assesses the impacts of the final rule. The full analysis of economic impacts is available in the docket for this final rule (Ref. 20) and at *https://www.fda.gov/about-fda/reports/economic-impact-analyses-fda-regulations.*

VIII. Analysis of Environmental Impact

We have determined under 21 CFR 25.34(b) and (f) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

IX. Paperwork Reduction Act of 1995

This final rule contains information collection provisions that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521). The title, description, and respondent description of the information collection provisions are shown in the following paragraphs with an estimate of the annual reporting burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing each collection of information.

Title: Medical Device De Novo Classification Process (OMB Control Number 0910–0844)—Revision.

Description: This final rule implements the medical device De Novo classification process under section 513(f)(2) of the FD&C Act, which provides a pathway for certain new types of devices to obtain marketing authorization as class I or class II devices, rather than remaining automatically designated as a class III device, which would require premarket approval under the postamendments device classification section of the FD&C Act (section 513(f)(1)).

On October 30, 2017, FDA issued a final guidance (De Novo Program guidance) (Ref. 5) to provide recommendations on the process for the submission and review of a De Novo request. The information collections associated with the guidance are approved under OMB control number 0910–0844. We provide below a revised burden estimate for the De Novo classification process as described in this final rule.

Section 860.200 (this final rule renumbers proposed § 860.201 as § 860.200) explains the purpose of the De Novo Classification regulations and provides the applicability of a De Novo request submission. Sections 860.210 and 860.220 (this final rule renumbers proposed § 860.223 and § 860.234 as § 860.210 and § 860.220) describe the format and content, respectively, of a De Novo request. Section 860.230 (this final rule renumbers proposed § 860.245 as § 860.230) describes the conditions under which FDA may refuse to accept a De Novo request. Section 860.240(b) (this final rule renumbers proposed § 860.256(b) as § 860.240(b)) provides for supplemental, amendatory, or additional information for a pending De Novo request. Section 860.250(a)(4) (this final rule renumbers proposed § 860.267(a)(4) as § 860.250(a)(4)) provides that a requester may submit a written notice to FDA that the De Novo request has been withdrawn.

Description of Respondents: Respondents to the information collection are medical device manufacturers seeking to market medical device products that have been automatically designated as class III under section 513(f)(1) of the FD&C Act.

TABLE 3—ESTIMATED ANNUAL REPORTING BURDEN [1]

Activity; 21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours	Total operating and maintenance costs
De Novo request—860.200, 860.210, 860.220, 860.230, 860.240(b).	68	1	68	182	12,376	$88
Written notice of withdrawal—860.250(a)(4).	5	1	5	0.17 (10 minutes)	1	7
Total					12,377	95

[1] Numbers have been rounded.

The information collection request (ICR) previously approved for the De Novo classification process (OMB control number 0910–0844), includes separate information collections (ICs) for De Novo requests submitted under section 513(f)(2)(i) of the FD&C Act (estimated 100-hour burden per response) and those submitted under section 513(f)(2)(ii) (estimated 180-hour burden per response), with burden estimates further separated by those sent to CDRH and those sent to the Center for Biologics Evaluation and Research.

For administrative efficiency, in this ICR revision, we are consolidating the separate ICs for requests submitted under section 513(f)(2)(i) or (ii) of the FD&C Act into a single IC for all De Novo requests submitted to FDA. Therefore, this final rule simply provides a burden estimate for all De Novo requests without distinguishing between those submitted under 513(f)(2)(i) or (ii) of the FD&C Act. This estimate includes estimated burdens associated with the initial request (purpose and applicability in § 860.200), format and content (§ 860.210 and § 860.220), supplements and amendments (§ 860.240(b)), and time to ensure that all the format and content requirements are met before submission (§ 860.230). Based on our recent experience with the De Novo Program, FDA estimates that the average burden per response for a De Novo request is 182 hours. Additionally, we adjusted the estimated number of respondents based on updated data.

The estimated burden for § 860.230 includes 2 hours per response for manufacturers to review their De Novo request for compliance with the acceptance criteria listed in § 860.230 to determine if it is complete and to complete the checklists recommended in the guidance ''Acceptance Review for De Novo Classification Requests'' (Ref.16). The information collections contained in the guidance, including 2 hours for review of the De Novo request for completeness and the checklists, were approved by OMB since publication of the proposed rule.

We estimate that the average burden per response for written notice of withdrawal of a De Novo request, as described in § 860.250(a)(4), is 10 minutes (0.17 hours). The burden table in the proposed rule erroneously listed 10 hours, rather than 10 minutes, for the average burden per response. We have corrected the error. The average burden per response is based on estimates by FDA administrative and technical staff who are familiar with the requirements for submission of a De Novo request (and related materials), have consulted and advised manufacturers on submissions, and have reviewed the documentation submitted. We expect that we will receive approximately five notices of withdrawal per year. There is no change to the currently approved burden estimate for withdrawal of a De Novo request.

These adjustments resulted in a 1,647-hour increase to the previously approved total burden estimate.

We received several comments related to the proposed rule. Descriptions of the comments on the proposed rule and FDA's responses are provided in section V of this final rule. Comments and responses related to the provisions that underlie the information collection are described in the following sections: section V.B, regarding general comments; section V.D, De Novo request information disclosure; section V.F, regarding definitions; section V.G, regarding De Novo request format; section V.H, regarding De Novo request content; section V.I, regarding criteria for accepting a De Novo request; section V.J, regarding criteria for granting or declining a De Novo request; and section V.K, regarding availability of the De Novo classification process for combination products. We have not made changes to the estimated burden as a result of the comments.

The estimate of the annual reporting burden provided in the proposed rule included printing and shipping for the complete paper submission and eCopy. Under § 860.210 of the final rule, each De Novo request must be provided as a single version in electronic format. Therefore, we have adjusted the operating and maintenance cost in the final rule to include the cost of the eCopy and shipping of the eCopy.

The cost per eCopy (CDs, DVDs, and flash drives) ranges from $0.25 to $2.50 per eCopy. All forms of eCopy media cost roughly $0.22 to ship. We estimate the average cost per eCopy, plus shipping, for a De Novo request or a request for withdrawal to be $1.30 per submission.

The annual cost estimate for De Novo requests is $88 (68 submissions × $1.30) (rounded). The annual cost estimate for requests for withdrawal is $7 (5 requests × $1.30) (rounded). Therefore, we estimate the total annual operating and maintenance costs of this information collection to be $95. This is a decrease of $7,188 to the currently approved total annual operating and maintenance cost estimate.

This final rule also refers to previously approved collections of information. These collections of information are subject to review by OMB under the PRA. The collections of information in the guidance entitled ''De Novo Classification Process (Evaluation of Automatic Class III Designation)'' (Ref. 5) have been approved under OMB control number 0910–0844; the collections of information in the guidance entitled ''Requests for Feedback and Meetings for Medical Device Submissions: The Q-Submission Program—Guidance for Industry and Food and Drug Administration Staff'' (Ref. 13) have been approved under OMB control number 0910–0756; the collections of information in the guidances entitled ''Guidance for Industry and Food and Drug Administration Staff—User Fees

for 513(g) Requests for Information'' (Ref. 17) and ''FDA and Industry Procedures for Section 513(g) Requests for Information under the Federal Food, Drug, and Cosmetic Act—Guidance for Industry and Food and Drug Administration Staff'' (Ref. 18) have been approved under OMB control number 0910–0705; and the collections of information in the guidance entitled ''Emergency Use Authorization of Medical Products and Related Authorities'' (Ref. 19) have been approved under OMB control number 0910–0595. The collections of information in Title 21 of the Code of Federal Regulations (CFR) are approved under the following OMB control numbers: part 3 under 0910–0523; parts 50 and 56 under 0910–0130; part 54 under 0910–0396; part 58 under 0910–0119; parts 801 and 809 under 0910–0485; part 807, subpart E, under 0910–0120; part 812 under 0910–0078; part 814, subparts A through E under 0910–0231; part 814, subpart H under 0910–0332; part 820 under 0910–0073; part 860, subpart C under 0910–0138.

The information collection provisions in this final rule have been submitted to OMB for review as required by section 3507(d) of the Paperwork Reduction Act of 1995.

Before the effective date of this final rule, FDA will publish a notice in the **Federal Register** announcing OMB's decision to approve, modify, or disapprove the information collection provisions in this final rule. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

X. Federalism

We have analyzed this final rule in accordance with the principles set forth in Executive Order 13132. We have determined that the rule does not contain policies that have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Accordingly, we conclude that the rule does not contain policies that have federalism implications as defined in the Executive order and, consequently, a federalism summary impact statement is not required.

XI. Consultation and Coordination With Indian Tribal Governments

We have analyzed this rule in accordance with the principles set forth in Executive Order 13175. We have determined that the rule does not contain policies that would have a substantial direct effect on one or more Indian Tribes, on the relationship between the Federal Government and Indian Tribes, or on the distribution of power and responsibilities between the Federal Government and Indian Tribes. Accordingly, we conclude that the rule does not contain policies that have tribal implications as defined in the Executive Order and, consequently, a tribal summary impact statement is not required.

List of Subjects in 21 CFR Part 860

Administrative practice and procedure, Medical devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act, and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 860 is amended as follows:

PART 860—MEDICAL DEVICE CLASSIFICATION PROCEDURES

■ 1. The authority citation for part 860 is revised to read as follows:

Authority: 21 U.S.C. 321(h), 353(g), 360c, 360d, 360e, 360i, 360j, 371, 374.

■ 2. In part 860, remove all references to ''the act'' and add in their place ''the Federal Food, Drug, and Cosmetic Act''.

■ 3. Amend § 860.1 by revising paragraph (b) to read as follows:

§ 860.1 Scope.

* * * * *

(b) This part prescribes the criteria and procedures to be used by advisory committees, including classification panels, where applicable, in making their recommendations, and by the Commissioner in making the Commissioner's determinations regarding the class of regulatory control (class I, class II, or class III) appropriate for particular devices. Supplementing the general Food and Drug Administration procedures governing advisory committees (part 14 of this chapter), this part also provides procedures for manufacturers, importers, and other interested persons to participate in proceedings to classify and reclassify devices. This part also describes the type of data required for determination of the safety and effectiveness of a device, and the circumstances under which information submitted to advisory committees, including classification panels, or to the Commissioner in connection with classification and reclassification proceedings, will be available to the public.

■ 4. Revise § 860.3 to read as follows:

§ 860.3 Definitions.

For the purposes of this part:

Class means one of the three categories of regulatory control for medical devices, defined as follows:

Class I means the class of devices that are subject only to the general controls authorized by or under sections 501 (adulteration), 502 (misbranding), 510 (registration), 516 (banned devices), 518 (notification and other remedies), 519 (records and reports), and 520 (general provisions) of the Federal Food, Drug, and Cosmetic Act. A device is in class I if:

(1) General controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device, or

(2) There is insufficient information from which to determine that general controls are sufficient to provide reasonable assurance of the safety and effectiveness of the device or to establish special controls to provide such assurance, but the device is not life-supporting or life-sustaining, or for a use which is of substantial importance in preventing impairment of human health, and which does not present a potential unreasonable risk of illness or injury.

Class II means the class of devices that is or eventually will be subject to special controls. A device is in class II if general controls alone are insufficient to provide reasonable assurance of its safety and effectiveness and there is sufficient information to establish special controls, including the promulgation of performance standards, postmarket surveillance, patient registries, development and dissemination of guidelines (including guidelines for the submission of clinical data in premarket notification submissions in accordance with section 510(k) of the Federal Food, Drug, and Cosmetic Act), recommendations, and other appropriate actions as the Commissioner deems necessary to provide such assurance. For a device that is purported or represented to be for use in supporting or sustaining human life, the Commissioner shall examine and identify the special controls, if any, which are necessary to provide adequate assurance of safety and effectiveness, and describe how such controls provide such assurance.

Class III means the class of devices for which premarket approval is or will be required in accordance with section 515 of the Federal Food, Drug, and Cosmetic Act. A device is in class III if insufficient information exists to determine that general controls are sufficient to provide reasonable assurance of its safety and effectiveness, or that application of special controls described in the definition of ''*Class II*'' in this section in addition to general controls, would provide such assurance, and if, in addition, the device is life-supporting or life-sustaining, or for a use which is of substantial importance in preventing impairment of human health, or if the device presents a potential unreasonable risk of illness or injury.

Classification panel means one of the several advisory committees established by the Commissioner under section 513 of the Federal Food, Drug, and Cosmetic Act and part 14 of this chapter for the purpose of making recommendations to the Commissioner on the classification and reclassification of devices and for other purposes prescribed by the Federal Food, Drug, and Cosmetic Act or by the Commissioner.

Classification regulation means a section under parts 862 through 892 of this chapter that contains the identification (general description and intended use) and classification (class I, II or III) of a single device type or more than one related device type(s).

Commissioner means the Commissioner of Food and Drugs, Food and Drug Administration, United States Department of Health and Human Services, or the Commissioner's designee.

De Novo request means any submission under section 513(f)(2) of the Federal Food, Drug, and Cosmetic Act for a medical device, requesting classification into class I or class II, including all information submitted with or incorporated by reference therein.

FDA means the Food and Drug Administration.

General controls mean the controls authorized by or under sections 501 (adulteration), 502 (misbranding), 510 (registration, listing, and premarket notification), 516 (banned devices), 518 (notification and other remedies), 519 (records, reports, and unique device identification), and 520 (general provisions) of the Federal Food, Drug, and Cosmetic Act.

Generic type of device means a grouping of devices that do not differ significantly in purpose, design, materials, energy source, function, or any other feature related to safety and effectiveness, and for which similar regulatory controls are sufficient to provide reasonable assurance of safety and effectiveness.

Implant means a device that is placed into a surgically or naturally formed cavity of the human body. A device is regarded as an implant for the purpose of this part only if it is intended to remain implanted continuously for a period of 30 days or more, unless the Commissioner determines otherwise to protect human health.

Life-supporting or life-sustaining device means a device that is essential to, or that yields information that is essential to, the restoration or continuation of a bodily function important to the continuation of human life.

Petition means a submission seeking reclassification of a device in accordance with § 860.123.

Special controls mean the controls necessary to provide reasonable assurance of safety and effectiveness for a generic type of device that is class II. Special controls include performance standards, performance testing, postmarket surveillance, patient registries, development and dissemination of guidelines (including guidelines for the submission of clinical data in premarket notification submissions in accordance with section 510(k) of the Federal Food, Drug, and Cosmetic Act), recommendations, and other appropriate actions, as the Commissioner deems necessary to provide such assurance.

■ 5. Amend § 860.5 by adding paragraph (g) to read as follows:

§ 860.5 Confidentiality and use of data and information submitted in connection with classification and reclassification.

* * * * *

(g) Confidentiality of data and information in a De Novo file is as follows:

(1) A ''De Novo file'' includes all data and information from the requester submitted with or incorporated by reference in the De Novo request, any De Novo supplement, or any other related submission relevant to the administrative file, as defined in § 10.3(a) of this chapter. Any record in the De Novo file will be available for public disclosure in accordance with the provisions of this section and part 20 of this chapter.

(2) The existence of a De Novo file may not be disclosed by FDA before an order granting the De Novo request is issued unless it previously has been publicly disclosed or acknowledged by the De Novo requester.

(3) Before an order granting the De Novo request is issued, data or information contained in the De Novo file is not available for public disclosure, except to the extent the existence of the De Novo file is disclosable under paragraph (g)(2) of this section and such data or information has been publicly disclosed or acknowledged by the De Novo requester.

(4) After FDA issues an order granting a De Novo request, the data and information in the De Novo file that are not exempt from release under the Freedom of Information Act, 5 U.S.C. 552, are immediately available for public disclosure.

■ 6. Add subpart D, consisting of §§ 860.200 through 860.260, to read as follows:

Subpart D—De Novo Classification

Sec.

Subpart D—De Novo Classification

§ 860.200 Purpose and applicability.

(a) The purpose of this part is to establish an efficient, transparent, and thorough process to facilitate De Novo classification into class I or class II for devices for which there is no legally marketed device on which to base a review of substantial equivalence and which meet the definition of class I or class II as described in section 513(a)(1) of the Federal Food, Drug, and Cosmetic Act and § 860.3.

(b) De Novo requests can be submitted for a single device type:

(1) After receiving a not substantially equivalent determination in response to a premarket notification (510(k)), or

(2) If a person determines there is no legally marketed device upon which to base a determination of substantial equivalence.

§ 860.210 De Novo request format.

(a) Each De Novo request or information related to a De Novo request pursuant to this part must be formatted in accordance with this section. Each De Novo request must be provided as a single version in electronic format. These materials must:

(1)(i) For devices regulated by the Center for Devices and Radiological Health, be sent to the current address displayed on the website *https://www.fda.gov/cdrhsubmissionaddress.*

(ii) For devices regulated by the Center for Biologics Evaluation and Research, be sent to the current address displayed on the website *https://www.fda.gov/about-fda/center-biologics-evaluation-and-research-cber/regulatory-submissions-electronic-and-paper.*

(2) Be signed by the requester or an authorized representative.

(3) Be designated ''De Novo Request'' in the cover letter.

(4) Have all content used to support the request written in, or translated into, English.

§ 860.220 De Novo request content.

(a) Unless the requester justifies an omission in accordance with paragraph (c) of this section, a De Novo request must include:

(1) *Table of contents.* A table of contents that specifies the volume (if the De Novo request contains more than one volume) and page number for each item.

(2) *Administrative information.* The name, address, phone, and email address of the requester and U.S. representative, if applicable. The establishment registration number, if applicable, of the owner or operator submitting the De Novo request.

(3) *Regulatory history.* Identify any prior submissions to FDA for the device, including, but not limited to, any premarket notifications (510(k)s) submitted under part 807 of this chapter; applications for premarket approval (PMAs) submitted under part 814 of this chapter; applications for humanitarian device exemption (HDE) submitted under part 814 of this chapter; applications for investigational device exemption (IDEs) submitted under part 812 of this chapter; requests for designation (RFD) under § 3.7 of this chapter; requests for information under section 513(g) of the Federal Food, Drug, and Cosmetic Act; applications for emergency use authorization (EUA) under section 564 of the Federal Food, Drug, and Cosmetic Act; pre-submissions, or previously submitted De Novo requests; or state that there have been no prior submissions.

(4) *Device name.* The generic name of the device as well as any proprietary name or trade name.

(5) *Indications for use.* A general description of the disease or condition the device is intended to diagnose, treat, prevent, cure or mitigate, or affect the structure or function of the body, including a description of the patient

population for which the device is intended. The indications for use include all the labeled patient uses of the device, including if it is prescription or over-the-counter.

(6) *Device description.* A complete description of:

(i) The device, including, where applicable, pictorial representations, device specifications, and engineering drawings;

(ii) Each of the functional components or ingredients of the device, if the device consists of more than one physical component or ingredient;

(iii) The properties of the device relevant to the diagnosis, treatment, prevention, cure, or mitigation of a disease or condition and/or the effect of the device on the structure or function of the body;

(iv) The principles of operation of the device; and

(v) The relevant FDA assigned reference number(s) for any medical devices (such as accessories or components) that are intended to be used with the device and that are already legally marketed.

(7) *Alternative practices and procedures.* A description of existing alternative practices or procedures that are used in diagnosing, treating, preventing, curing, or mitigating the disease or condition for which the device is intended or which similarly affect the structure or function of the body and that are known or should reasonably be known to the requester.

(8) *Classification summary.* (i) For devices not the subject of a previous submission under section 510(k) of the Federal Food, Drug, and Cosmetic Act, a complete description of:

(A) The searches used to establish that no legally marketed device of the same type exists.

(B) A list of classification regulations, PMAs, HDEs, premarket notifications (510(k)s), EUAs, and/or product codes regarding devices that are potentially similar to the subject device.

(C) A rationale explaining how the device that is the subject of the De Novo request is different from the devices covered by the classification regulations, PMAs, HDEs, 510(k)s, EUAs, and/or product codes identified in paragraph (a)(8)(i)(B) of this section.

(ii) For devices which were the subject of a previous submission under section 510(k) of the Federal Food, Drug, and Cosmetic Act that were determined not substantially equivalent (NSE), the relevant 510(k) number, along with a summary of the search performed to confirm the device has not been classified or reclassified since the date the NSE order was issued by FDA pursuant to § 807.100(a) of this chapter.

(9) *Summary of risks and mitigations.* A summary of probable risks to health associated with use of the device that are known or should reasonably be known to the requester and the proposed mitigations, including general controls and, if the classification recommendation from paragraph (a)(11) of this section is class II, special controls for each risk. For each mitigation measure that involves specific performance testing or labeling, the De Novo request must provide a reference to the associated section or pages for the supporting information in the De Novo request.

(10) *Proposed special controls.* If the classification recommendation from paragraph (a)(11) of this section is class II, then the summary must include an initial draft proposal for applicable special controls and a description of how those special controls provide reasonable assurance of safety and effectiveness.

(11) *Classification recommendation.* The recommended class (I or II) must be identified and must be supported by a description of why general controls, or general and special controls, are adequate to provide reasonable assurance of safety and effectiveness.

(12) *Standards.* Reference to any published voluntary consensus standards that are relevant to any aspect of the safety or effectiveness of the device and that are known or should reasonably be known to the requester. Such standards include voluntary consensus standards whether recognized or not yet recognized under section 514(c) of the Federal Food, Drug, and Cosmetic Act. Provide adequate information to demonstrate how the device meets, or justify any deviation from, the referenced standard.

(13) *Summary of studies.* An abstract of any information or report described in the De Novo request under paragraph (a)(16)(ii) of this section and a summary of the results of technical data submitted under paragraph (a)(15) of this section. Each such study summary must include a description of the objective of the study, a description of the experimental design of the study, a brief description of how the data were collected and analyzed, and a brief description of the results, whether positive, negative, or inconclusive. This section must also include the following:

(i) A summary of each nonclinical study submitted in the De Novo request;

(ii) A summary of each clinical investigation involving human subjects submitted in the De Novo request, including a discussion of investigation design, subject selection and exclusion criteria, investigation population, investigation period, safety and effectiveness data, adverse reactions and complications, subject discontinuation, subject complaints, device failures (including unexpected software events, if applicable) and replacements, results of statistical analyses of the clinical investigations, contraindications and precautions for use of the device, and other information from the clinical investigations as appropriate. Any investigation conducted under an investigational device exemption (IDE) under part 812 of this chapter must be identified as such.

(14) *Benefit and risk considerations.* A discussion demonstrating that:

(i) The data and information in the De Novo request constitute valid scientific evidence within the meaning of § 860.7(c) and

(ii) Pursuant to § 860.7, when subject to general controls, or general and special controls, the probable benefit to health from use of the device outweighs any probable injury or illness from such use.

(15) *Technical sections.* The following technical sections, which must contain data and information in sufficient detail to permit FDA to determine whether to grant or decline the De Novo request:

(i) A section containing the results of the nonclinical studies of the device, including, as appropriate, microbiological, toxicological, immunological, biocompatibility, stress, wear, shelf life, electrical safety, electromagnetic compatibility, and other laboratory or animal tests. Information on nonclinical studies must include protocols and complete test reports for each study. For those nonclinical studies subject to part 58 of this chapter, this section must include a statement that each such study was conducted in compliance with such regulations, or, if the study was not conducted in compliance with part 58 of this chapter, a brief statement of the reason for the noncompliance.

(ii) For all devices that incorporate software, a section containing all relevant software information and testing, including, but not limited to, appropriate device hazard analysis, hardware, and system information.

(iii) A section containing results of each clinical investigation of the device involving human subjects, including clinical protocols, number of investigators and subjects per investigator, investigation design, subject selection and exclusion criteria, investigation population, investigation period, safety and effectiveness data, adverse reactions and complications,

subject discontinuation, subject complaints, device failures (including unexpected software events if applicable) and replacements, tabulations of data from all individual subject report forms and copies of such forms for each subject who died during a clinical investigation or who did not complete the investigation, results of statistical analyses of the results of the clinical investigations, contraindications, warnings, precautions, and other limiting statements relevant to the use of the device type, and any other appropriate information from the clinical investigations. Any investigation conducted under an IDE under part 812 of this chapter must be identified as such. Information on clinical investigations involving human subjects must include the following:

(A) For clinical investigations conducted in the United States, a statement with respect to each investigation that it either was conducted in compliance with the institutional review board regulations in part 56 of this chapter, or was not subject to the regulations under § 56.104 or § 56.105 of this chapter, and that it was conducted in compliance with the informed consent regulations in part 50 of this chapter; or if the investigation was not conducted in compliance with those regulations, a brief statement of the reason for the noncompliance. Failure or inability to comply with these requirements does not justify failure to provide information on a relevant clinical investigation.

(B) For clinical investigations conducted in the United States, a statement that each investigation was conducted in compliance with part 812 of this chapter concerning sponsors of clinical investigations and clinical investigators, or if the investigation was not conducted in compliance with those regulations, a brief statement of the reason for the noncompliance. Failure or inability to comply with these requirements does not justify failure to provide information on a relevant clinical investigation.

(C) For clinical investigations conducted outside the United States that are intended to support the De Novo request, the requirements under § 812.28 of this chapter apply. If any such investigation was not conducted in accordance with good clinical practice (GCP) as described in § 812.28(a) of this chapter, include either a waiver request in accordance with § 812.28(c) of this chapter or a brief statement of the reason for not conducting the investigation in accordance with GCP and a description of steps taken to ensure that the data and results are credible and accurate and that the rights, safety, and well-being of subjects have been adequately protected. Failure or inability to comply with these requirements does not justify failure to provide information on a relevant clinical investigation.

(D) A statement that each investigation has been completed per the protocol or a summary of any protocol deviations.

(E) A financial certification or disclosure statement or both as required by part 54 of this chapter.

(F) For a De Novo request that relies primarily on data from a single investigator at one investigation site, a justification showing that these data and other information are sufficient to reasonably demonstrate the safety and effectiveness of the device when subject to general controls or general and special controls, and to ensure that the results from a site are applicable to the intended population.

(G) A discussion of how the investigation data represent clinically significant results, pursuant to § 860.7(e).

(16) *Other information.* (i) A bibliography of all published reports not submitted under paragraph (a)(15) of this section, whether adverse or supportive, known to or that should reasonably be known to the requester and that concern the safety or effectiveness of the device.

(ii) An identification, discussion, and analysis of any other data, information, or report relevant to an evaluation of the safety and effectiveness of the device known to or that should reasonably be known to the requester from any source, foreign or domestic, including information derived from investigations other than those in the request and from commercial marketing experience.

(iii) Copies of such published reports or unpublished information in the possession of or reasonably obtainable by the requester, if requested by FDA.

(17) *Samples.* If requested by FDA, one or more samples of the device and its components. If it is impractical to submit a requested sample of the device, the requester must name the location at which FDA may examine and test one or more of the devices.

(18) *Labeling and advertisements.* Labels, labeling, and advertisements sufficient to describe the device, its intended use, and the directions for its use. Where applicable, photographs or engineering drawings must be supplied.

(19) *Other information.* Such other information as is necessary to determine whether general controls or general and special controls provide reasonable assurance of safety and effectiveness of the device.

(b) Pertinent information in FDA files specifically referred to by a requester may be incorporated into a De Novo request by reference. Information submitted to FDA by a person other than the requester will not be considered part of a De Novo request unless such reference is authorized in writing by the person who submitted the information.

(c) If the requester believes that certain information required under paragraph (a) of this section to be in a De Novo request is not applicable to the device that is the subject of the De Novo request, and omits any such information from the De Novo request, the requester must submit a statement that specifies the omitted information and justifies the omission. The statement must be submitted as a separate section in the De Novo request and listed in the table of contents. If the justification for the omission is not accepted by FDA, FDA will so notify the requester.

(d) The requester must update the pending De Novo request with new safety and effectiveness information learned about the device from ongoing or completed studies and investigations that may reasonably affect an evaluation of the safety or effectiveness of the device as such information becomes available.

§ 860.230 Accepting a De Novo request.

(a) The acceptance of a De Novo request means that FDA has made a threshold determination that the De Novo request contains the information necessary to permit a substantive review. Within 15 days after a De Novo request is received by FDA, FDA will notify the requester whether the De Novo request has been accepted.

(b) If FDA does not find that any of the reasons in paragraph (c)(1) of this section for refusing to accept the De Novo request apply or FDA fails to complete the acceptance review within 15 days, FDA will accept the De Novo request for review and will notify the requester. The notice will include the De Novo request reference number and the date FDA accepted the De Novo request. The date of acceptance is the date that an accepted De Novo request was received by FDA.

(c)(1) FDA may refuse to accept a De Novo request if any of the following applies:

(i) The requester has an open or pending premarket submission or reclassification petition for the device;

(ii) The De Novo request is incomplete because it does not on its face contain all the information required

under section 513(f)(2) of the Federal Food, Drug, and Cosmetic Act or does not contain each of the items required under this part, or a justification for omission of any item;

(iii) The De Novo request is not formatted as required under § 860.210;

(iv) The De Novo request is for multiple devices and those devices are of more than one type; or

(v) The requester has not responded to, or has failed to provide a rationale for not responding to, deficiencies identified by FDA in previous submissions for the same device, including those submissions described in § 860.220(a)(3).

(2) If FDA refuses to accept a De Novo request, FDA will notify the requester of the reasons for the refusal. The notice will identify the deficiencies in the De Novo request that prevent accepting and will include the De Novo request reference number.

(3) If FDA refuses to accept a De Novo request, the requester may submit the additional information necessary to comply with the requirements of section 513(f)(2) of the Federal Food, Drug, and Cosmetic Act and this part. The additional information must include the De Novo request reference number of the original submission. If the De Novo request is subsequently accepted, the date of acceptance is the date FDA receives the additional information.

§ 860.240 Procedures for review of a De Novo request.

(a) FDA will begin substantive review of a De Novo request after the De Novo request is accepted under § 860.230. Within 120 days after receipt of a De Novo request or receipt of additional information that results in the De Novo request being accepted under § 860.230, FDA will review the De Novo request and send the requester an order granting the De Novo request under § 860.260(a) or an order declining the De Novo request under 860.260(b).

(b) A requester may supplement or amend a pending De Novo request to revise existing information or provide additional information.

(1) FDA may require additional information regarding the device that is necessary for FDA to complete the review of the De Novo request.

(2) Additional information submitted to FDA must include the reference number assigned to the original De Novo request and, if submitted on the requester's own initiative, the reason for submitting the additional information.

(c) Prior to granting or declining a De Novo request, FDA may inspect relevant facilities to help determine:

(1) That clinical or nonclinical data were collected in a manner that ensures that the data accurately represents the benefits and risks of the device; or

(2) That implementation of Quality System Regulation (part 820 of this chapter) requirements, in addition to other general controls and any specified special controls, provide adequate assurance that critical and/or novel manufacturing processes produce devices that meet specifications necessary to ensure reasonable assurance of safety and effectiveness.

§ 860.250 Withdrawal of a De Novo request.

(a) FDA considers a De Novo request to have been withdrawn if:

(1) The requester fails to provide a complete response to a request for additional information pursuant to § 860.240(b)(1) within 180 days after the date FDA issues such request;

(2) The requester fails to provide a complete response to the deficiencies identified by FDA pursuant to § 860.230(c)(2) within 180 days of the date notification was issued by FDA;

(3) The requester does not permit an authorized FDA employee an opportunity to inspect the facilities, pursuant to § 860.240(c), at a reasonable time and in a reasonable manner, and to have access to copy and verify all records pertinent to the De Novo request; or

(4) The requester submits a written notice to FDA that the De Novo request has been withdrawn.

(b) If a De Novo request is withdrawn, the Agency will notify the requester. The notice will include the De Novo request reference number and the date FDA considered the De Novo request withdrawn.

§ 860.260 Granting or declining a De Novo request.

(a)(1) FDA will issue to the requester an order granting a De Novo request if none of the reasons in paragraph (c) of this section for declining the De Novo request applies.

(2) If FDA grants a De Novo request, within 30 days after the issuance of an order granting the De Novo request, FDA will publish in the **Federal Register** a notice of the classification order, including any special controls.

(b) If FDA declines a De Novo request, FDA will issue a written order to the requester.

(c) FDA may decline a De Novo request if the requester fails to follow the requirements of this part or if, upon the basis of the information submitted in the De Novo request or any other information before FDA, FDA determines:

(1) The device does not meet the criteria under section 513(a)(1) of the Federal Food, Drug, and Cosmetic Act and § 860.3 for classification into class I or II;

(2) The De Novo request contains a false statement of material fact or there is a material omission;

(3) The device's labeling does not comply with the requirements in parts 801 and 809 of this chapter, as applicable;

(4) The product described in the De Novo request does not meet the definition of a device under section 201(h) of the Federal Food, Drug, and Cosmetic Act and is not a combination product as defined at § 3.2(e) of this chapter;

(5) The device is of a type which has already been approved in existing applications for premarket approval (PMAs) submitted under part 814 of this chapter;

(6) The device is of a type that has already been classified into class I, class II, or class III;

(7) An inspection of a relevant facility under § 860.240(c) results in a determination that general or general and special controls would not provide reasonable assurance of safety and effectiveness;

(8) A nonclinical study subject to part 58 of this chapter that is described in the De Novo request, and that is essential to show there is reasonable assurance of safety, was not conducted in compliance with part 58 of this chapter and no reason for the noncompliance is provided or, if a reason is provided, the practices used in conducting the study do not support the validity of the study;

(9) A clinical investigation described in the De Novo request involving human subjects that is subject to the institutional review board regulations in part 56 of this chapter, informed consent regulations in part 50 of this chapter, or GCP described in § 812.28(a) of this chapter, was not conducted in compliance with those regulations such that the rights or safety of human subjects were not adequately protected or the supporting data were determined to be otherwise unreliable;

(10) A clinical or nonclinical study necessary to demonstrate that general controls or general and special controls provide reasonable assurance of safety and effectiveness:

(i) Has not been completed per the study protocol, or

(ii) Deficiencies related to the investigation and identified in any request for additional information under § 860.240(b)(1) have not been adequately addressed; or

(11) After a De Novo request is accepted for review under § 860.230(b), the requester makes significant unsolicited changes to the device's:

(i) Indications for use; or

(ii) Technological characteristics.

(d) An order declining a De Novo request will inform the requester of the deficiencies in the De Novo request, including each applicable ground for declining the De Novo request.

(e) FDA will use the criteria specified in § 860.7 to determine the safety and effectiveness of a device in deciding whether to grant or decline a De Novo request. FDA may use information other than that submitted by the requester in making such determination.

Dated: September 30, 2021.

Janet Woodcock,

Acting Commissioner of Food and Drugs.

BILLING CODE 4164–01–P

FEDERAL MEDIATION AND CONCILIATION SERVICE

29 CFR Part 1400

RIN 3076–AA19

Outside Employment, Business Activities, or Interests Regulation

AGENCY: Federal Mediation and Conciliation Service.

ACTION: Final rule; rescission of regulation.

SUMMARY: On August 7, 1992, the Office of Government Ethics (OGE) published a final rule entitled ''Supplemental Agency Regulations'' requiring Federal agencies creating supplemental ethics regulations to submit such regulations to OGE for concurrence and joint issuance within their regulations. In accordance with ''Supplemental Agency Regulations,'' this final rule rescinds the current Federal Mediation and Conciliation Service (FMCS) supplemental ethics regulation ''Outside employment, business activities, or interests''.

DATES: This final rule is effective October 5, 2021.

FOR FURTHER INFORMATION CONTACT: Alisa Silverman, Attorney-Advisor, Office of General Counsel, Federal Mediation and Conciliation Service, 250 E St. SW, Washington, DC 20427; Office/Fax/Mobile 202–606–5488; *asilverman@fmcs.gov*.

SUPPLEMENTARY INFORMATION:

I. Discussion

On April 13, 1968, at 33 FR 5765, the Federal Mediation and Conciliation Service (FMCS) published a final rule entitled ''Outside employment, business activities, and interests.'' This final rule implemented ethics regulations concerning outside activities.

On August 7, 1992, at 57 FR 35042, the Office of Government Ethics (OGE) published a rule ''Supplemental Agency Regulations'' requiring Federal agencies creating supplemental ethics regulations to submit such regulations to OGE for concurrence and joint issuance within title 5 of the Code of Federal Regulations.

In accordance with 5 CFR 2635.105, FMCS is working jointly with OGE to develop new supplemental agency regulations to be published by OGE within title 5 of the Code of Federal Regulations. Therefore, FMCS is issuing this final rule, which rescinds the current rule on outside employment, business activities, and interests within title 29 of the Code of Federal Regulations.

II. Final Rule

FMCS has determined that this rule is suitable for final rulemaking. The revisions to FMCS' policies and requirements surrounding outside activities are purely internal matters of agency management, as well as the agency's procedure, and practice. Accordingly, FMCS is not required to engage in a notice and comment process to issue this rule under the Administrative Procedures Act, See U.S.C. 553(a)(2), 553(b)(A). Furthermore, because this rule is procedural rather than substantive, the normal requirement of 5 U.S.C. 553(d) that a rule not be effective until at least 30 days after publication in the **Federal Register** is inapplicable. FMCS also finds good cause to provide an immediate effective date for this rule because it imposes no obligations on parties outside the Federal Government and therefore no advance notice is required to enable employers or other private parties to come into compliance.

List of Subjects in 29 CFR Part 1400

Administrative practice and procedure.

For the reasons discussed in the preamble, and under the authority 29 U.S.C. 172 of Taft Harley Act of 1947, and 5 U.S.C. 7301, FMCS amends 29 CFR chapter XII as follows:

PART 1400—STANDARDS OF CONDUCT, RESPONSIBILITIES, AND DISCIPLINE

■ 1. The authority citation for part 1400 continues to read as follows:

Authority: E.O. 11222, 30 FR 6469, 3 CFR, 1965 Supp.; 5 CFR 735.104.

§ 1400.735–12 [Removed]

■ 2. Remove § 1400.735–12.

Issued in Washington, DC.

Sarah Cudahy,

General Counsel.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2020–0647]

RIN 1625–AA09

Drawbridge Operation Regulation; New Jersey Intracoastal Waterway, Point Pleasant, NJ; Correction

AGENCY: Coast Guard, Department of Homeland Security (DHS).

ACTION: Correcting amendments.

SUMMARY: The Coast Guard published a final rule in the **Federal Register** on August 23, 2021, which was effective on September 22, 2021, announcing changes to the Route 88 (Veterans Memorial) Bridge and Route 13 (Lovelandtown) Bridge across the NJICW at Point Pleasant Canal, mile 3.0 and 3.9, respectively at Point Pleasant, NJ. The amendatory instruction within that final rule was incorrect and the changes could not be incorporated into the CFR. This correcting amendment incorporates those changes into the CFR.

DATES: The correction is effective on October 5, 2021.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2020–0647. In the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Mr. Mickey Sanders, Bridge Administration Branch, Fifth District, U.S. Coast Guard, telephone (757) 398–6587, email *Mickey.D.Sanders2@uscg.mil*.

SUPPLEMENTARY INFORMATION:

Correction

On August 23, 2021, the Coast Guard published a final rule titled ''Drawbridge Operation Regulation; New

Jersey Intracoastal Waterway, Point Pleasant, NJ'' (86 FR 46966). This final rule amended 33 CFR 117.733. However, amendatory instruction number 2.c. incorrectly redesignated seven paragraphs into only six paragraphs.

List of Subjects in 33 CFR Part 117

Bridges.

Accordingly, 33 CFR part 117 is corrected by making the following correcting amendments:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and Department of Homeland Security Delegation No. 0170.1.

■ 2. Amend § 117.733 by:

■ a. Removing paragraphs (i) and (j);

■ b. Redesignating paragraphs (b) through (h) as (d) through (j); and

■ c. Adding new paragraphs (b) and (c).

The additions read as follows:

§ 117.733 New Jersey Intracoastal Waterway.

* * * * *

(b) The draw of the Route 88 Bridge, mile 3.0, across Point Pleasant Canal at Point Pleasant, shall operate as follows:

(1) From 7 a.m. to 11 p.m. the draw shall open on signal.

(2) From 11:01 p.m. to 6:59 a.m. the draw shall open on signal, if at least four hours advance notice is given.

(c) The draw of the Route 13 Bridge, mile 3.9, across Point Pleasant Canal at Point Pleasant, shall operate as follows:

(1) From 7 a.m. to 11 p.m. the draw shall open on signal.

(2) From 11:01 p.m. to 6:59 a.m. the draw shall open on signal, if at least four hours advance notice is given.

* * * * *

Dated: September 29, 2021.

M.T. Cunningham,

Chief, Office of Regulations and Administrative Law, U.S. Coast Guard.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 1, 73, and 74

[AU Docket No. 21–284; DA 21–1176; FR ID 50840]

Auction of Construction Permits for Low Power Television and TV Translator Stations; Notice and Filing Requirements, Minimum Opening Bids, Upfront Payments, and Other Procedures for Auction 111

AGENCY: Federal Communications Commission.

ACTION: Final action; requirements and procedures.

SUMMARY: This document summarizes the procedures, deadlines, and upfront payment and minimum opening bid amounts for the upcoming auction of construction permits for new or modified low power television and TV translator stations. The *Auction 111 Procedures Public Notice* summarized here is intended to familiarize potential applicants with details of the procedures, terms, and conditions governing participation in Auction 111, as well as an overview of the post-auction application and payment process.

DATES: Applications to participate in Auction 111 must be submitted before 6 p.m. Eastern Time (ET) on November 9, 2021. Upfront payments for Auction 111 must be received by 6 p.m. ET on January 25, 2022. Bidding in Auction 111 is scheduled to start on February 23, 2022.

FOR FURTHER INFORMATION CONTACT:

General Auction 111 Information: FCC Auctions Hotline at 888–225–5322, option two; or 717–338–2868.

Auction 111 Legal Information: Lyndsey Grunewald or Scott Mackoul at (202) 418–0660.

Licensing Information: Shaun Maher at (202) 418–2324 or Mark Colombo at (202) 418–7611.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's document, *Auction 111 Procedures Public Notice,* in AU Docket No. 21–284; DA 21–1176, released on September 21, 2021. The complete text of this document, including attachments and any related document, is available on the Commission's website at *http://www.fcc.gov/auction/111* or by using the search function for on the Commission's Electronic Comment Filing System (ECFS) web page at *www.fcc.gov/ecfs.* Alternative formats are available to persons with disabilities by sending an email to *FCC504@fcc.gov* or by calling the Consumer & Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

I. General Information

A. Introduction

1. By the *Auction 111 Procedures Public Notice,* the Office of Economics and Analytics (OEA) and the Media Bureau (MB) establish the procedures to be used for Auction 111, a closed auction of construction permits for new or modified low power television (LPTV) stations and TV translator stations (collectively referred to as LPTV/translator stations). Auction 111 is a closed auction; only those parties listed in Attachment A to the *Auction 111 Procedures Public Notice* are eligible to file applications to participate in Auction 111 and to complete the remaining steps to become qualified to bid.

B. Background and Relevant Authority

2. Auction 111 will resolve groups of pending mutually exclusive (MX) engineering proposals for up to 17 new or modified LPTV/translator station construction permits. The MX groups and engineering proposals listed in Attachment A to the *Auction 111 Procedures Public Notice* consist of applications for new LPTV/translator stations, or major changes to existing stations, that were accepted on a first-come, first-served basis (*i.e.,* rolling one-day windows), pursuant to 47 CFR 74.787(a)(3) and displacement relief applications filed pursuant to a special filing window for eligible LPTV/translator stations displaced by the broadcast television spectrum incentive auction (Auction 1000). Any LPTV/translator station applications for new facilities, major changes to existing facilities, or displacement relief that are mutually exclusive with one another must be resolved via the Commission's part 1 and part 73 competitive bidding rules.

3. In 2009, MB began accepting applications for new rural digital LPTV/translator stations on a limited basis and then later froze those filings. All but one of the MX groups listed in Attachment A to the *Auction 111 Procedures Public Notice* consist of applications for new or modified rural digital LPTV/translator stations that were submitted on the first day that MB began accepting such applications. The remaining MX group listed in Attachment A to the *Auction 111 Procedures Public Notice* consists of two displacement relief applications filed pursuant to a special displacement application filing window opened in

2018 by the Incentive Auction Task Force and MB for eligible licensees and permittees of LPTV/translator stations displaced by Auction 1000.

4. In order to facilitate resolution of pending mutually exclusive LPTV/translator station applications before initiating competitive bidding procedures, and given the passage of time since the applications were filed, MB announced that it would withhold action on certain MX applications for new or modified LPTV/translator stations, including each application listed in Attachment A to the *Auction 111 Procedures Public Notice,* from June 1, 2020 to July 31, 2020, in order to provide applicants with an opportunity to resolve mutual exclusivity through settlement or technical modification of their engineering proposals. MB advised each applicant that, absent resolution of its mutual exclusivity, its application would be subject to the Commission's competitive bidding procedures.

5. On July 9, 2021, OEA and MB released the *Auction 111 Comment Public Notice,* 86 FR 37972, July 19, 2021, seeking comment on competitive bidding procedures to be used in Auction 111 to resolve the applications that remained MX after this settlement period. OEA and MB received no comments in response to the *Auction 111 Comment Public Notice.* In the *Auction 111 Procedures Public Notice,* OEA and MB resolved all open issues raised in the *Auction 111 Comment Public Notice.* Auction 111 will proceed pursuant to the procedures described in the *Auction 111 Procedures Public Notice.*

6. Other Commission rules and decisions provide the underlying authority for the procedures OEA and MB adopted for Auction 111. Among other things, prospective applicants should familiarize themselves with the Commission's general competitive bidding rules, including recent amendments and clarifications thereto, as well as Commission decisions regarding competitive bidding procedures, application requirements, and obligations of Commission licensees. Applicants should also familiarize themselves with the Commission's rules relating to the LPTV and TV translator services, as well as Commission orders concerning competitive bidding for broadcast construction permits. Applicants must also be thoroughly familiar with the procedures, terms and conditions contained in the *Auction 111 Procedures Public Notice* and any future public notices that may be released in this proceeding or that relate to the construction permits being offered in Auction 111 or the LPTV/translator services.

7. The terms contained in the Commission's rules, relevant orders, and public notices are not negotiable. The Commission may amend or supplement the information contained in its public notices at any time and will issue public notices to convey any new or supplemental information to applicants. Pursuant to the Commission's rules, OEA and MB also retain the authority to implement further procedures during the course of this auction. It is the responsibility of all applicants to remain current with all Commission rules and with all public notices pertaining to Auction 111.

C. Construction Permits and Parties Eligible To Participate in Auction 111

8. Attachment A to the *Auction 111 Procedures Public Notice* lists the pending applications for LPTV/translator station construction permits that will be assigned through Auction 111 unless the applicants resolve their mutual exclusivity by entering into settlement agreements or making minor amendments to their pending applications before the deadline for filing an application to participate in the auction (FCC Form 175), referred to as a short-form application. Only the LPTV/translator station applicants listed in Attachment A to the *Auction 111 Procedures Public Notice* are eligible to file a short-form application for Auction 111. An applicant listed in Attachment A to the *Auction 111 Procedures Public Notice* may become qualified to bid in Auction 111 only if it complies with the auction filing, qualification, and payment requirements described in the *Auction 111 Procedures Public Notice,* and otherwise complies with applicable rules, policies, and procedures. Each listed applicant may become a qualified bidder only for those construction permits specified for that applicant in Attachment A to the *Auction 111 Procedures Public Notice.* As noted in the *Auction 111 Comment Public Notice,* each of the engineering proposals within each MX group are directly mutually exclusive with one another; therefore, no more than one construction permit will be awarded through Auction 111 for each MX group identified in Attachment A to the *Auction 111 Procedures Public Notice.*

9. A copy of the *Auction 111 Procedures Public Notice* has been sent by email and overnight delivery to the contact address listed on each LPTV/translator station application listed in Attachment A of the *Auction 111 Procedures Public Notice.* Future public notices in this proceeding may be provided directly to each applicant listed in Attachment A at this contact address as well. Each applicant is obligated to maintain the accuracy of this information pursuant to 47 CFR 1.65. Each party that is eligible to file a short-form application in Auction 111 should make sure that the contact address provided in its LPTV/translator station application is accurate and is a location capable of accepting packages. After the deadline for filing short-form applications (FCC Form 175) to participate in Auction 111, Auction 111-related materials will be sent to auction applicants at the contact addresses in their short-form applications. These addresses should also be locations that are capable of accepting packages that require signatures.

10. Section 73.3572(b) of the Commission's rules prohibits the transfer or assignment of an application for a new LPTV/translator station construction permit. Any change in ownership to an applicant for a new LPTV/translator station construction permit listed in Attachment A to the *Auction 111 Procedures Public Notice* that has resulted in a change in control of the applicant, or a situation where the original party or parties to the application do not retain more than 50 percent ownership interest in the application as originally filed, is considered a major amendment to the application and will result in the application being considered newly filed. If the LPTV/translator station application is considered newly-filed, the applicant will not be eligible to file a short-form application for Auction 111 and its pending application will be dismissed.

11. In accordance with the Commission's rules, the LPTV/translator station applicants listed in Attachment A to the *Auction 111 Procedures Public Notice* may withdraw or make minor amendments to their pending LPTV/translator station applications or enter into legal or engineering settlement agreements until 6:00 p.m. ET on November 9, 2021, the deadline for filing short-form applications in Auction 111. As mentioned in the *Auction 111 Comment Public Notice,* if such actions (1) are submitted prior to the short-form application filing deadline, (2) are fully in accordance with the Communications Act of 1934, as amended (the Act) and the Commission's rules, as determined by Commission staff, and (3) completely resolve the mutual exclusivity, then the subject MX group will be removed from Auction 111 and the remaining engineering proposal(s) will be processed under standard licensing

procedures. Additional details regarding making filings to resolve mutual exclusivity prior to the short-form application filing deadline are provided below.

12. Shortly after the short-form application filing deadline, OEA and MB will release a public notice identifying the remaining mutually exclusive applications that will be resolved through competitive bidding in Auction 111. As provided in 47 CFR 73.5002(d), these mutually exclusive applicants will then be given one final limited opportunity to resolve mutual exclusivity by the filing of technical amendments, dismissal requests, and requests for approval of universal settlements. Due to the prohibited communications rule, which starts at the short-form application filing deadline, applicants in Auction 111 will not be able to communicate with each other for the purpose of resolving conflicts outside of this limited settlement period. As noted in the *Auction 111 Comment Public Notice,* under the Commission's established precedent, once two or more short-form applications are accepted for an MX group, mutual exclusivity exists for the relevant construction permit for auction purposes. Unless the mutual exclusivity is resolved during this limited settlement opportunity, an applicant in Auction 111 cannot obtain a construction permit without placing a bid, even if no other auction applicant for that particular construction permit becomes qualified to bid or in fact places a bid.

II. Applying To Participate in Auction 111

A. Resolving Mutual Exclusivity Prior to the Short-Form Application Filing Deadline

13. The parties listed in Attachment A to the *Auction 111 Procedures Public Notice* may avoid resolving their mutual exclusivity through competitive bidding by instead resolving their mutual exclusivity, prior to the short-form application filing deadline, by means of requests to dismiss the pending LPTV/translator station applications, unilateral engineering amendments to such applications, legal settlement, or engineering settlement. Any unilateral amendments or amendments pursuant to a settlement agreement made to the pending LPTV/translator station applications must be minor, as defined by the applicable rules, and must not create new mutual exclusivities or application conflicts. Any legal or engineering settlement agreements must be filed with the Commission for approval and must include the documentation required by 47 CFR 73.3525. All amendments to pending applications and any requests for approval of settlement agreements, as well as accompanying documentation, must be submitted by filing an amended FCC Form 2100—Schedule C in the Media Bureau's Licensing and Management System (LMS) by 6:00 p.m. ET on November 9, 2021. OEA and MB encourage the parties listed in Attachment A to the *Auction 111 Procedures Public Notice* that are interested in resolving their mutual exclusivity to initiate and complete negotiations, and make any necessary filings, well ahead of the short-form application filing deadline. Applicants, however, should avoid both entering into a settlement agreement for a construction permit prior to the short-form application deadline and filing a short-form application covering that same construction permit. Such a situation could raise issues with regard to the applicant's compliance with the prohibited communications rule.

14. As mentioned above, if a unilateral engineering amendment or legal or engineering settlement (1) is submitted for approval in accordance with the procedures described above by 6:00 p.m. ET on November 9, 2021, (2) is fully in accordance with the Act and the Commission's rules, as determined by Commission staff, and (3) completely resolves the mutual exclusivity, then the subject MX group will be removed from Auction 111 and the remaining engineering proposal(s) will be processed under standard licensing procedures. If no such filing is made, and therefore the engineering proposals in an MX group remain mutually exclusive as of the short-form application filing deadline, then each applicant in that MX group must timely file a short-form application in order to avoid dismissal of its pending LPTV/translator station application. Specifically, MB will dismiss the mutually exclusive long-form application of any party eligible to participate in Auction 111 that fails to submit a short-form application. Accordingly, if only one member of an MX group submits a short-form application, and thus all other long-form applications in that MX group are dismissed, that short-form application is not mutually exclusive for auction purposes and the relevant construction permit will not be included in Auction 111. In that case, the engineering proposal of the party that submitted a short-form application will be treated as a singleton and processed under standard licensing procedures. OEA and MB note that, if an applicant forgoes filing a short-form application pursuant to an agreement with mutually exclusive applicants, such settlement agreement must be submitted to MB for approval. If a party to a settlement agreement files a short-form application, that settlement agreement may need to be disclosed in its short-form application pursuant to 47 CFR 1.2105(a)(2)(viii) or may be a prohibited joint bidding agreement pursuant to 47 CFR 1.2105(a)(2)(ix).

B. General Information Regarding Short-Form Applications

15. A short-form application, or FCC Form 175, provides information that the Commission uses to determine whether the applicant has the legal, technical, and financial qualifications to participate in a Commission auction for licenses or permits. The short-form application is the first part of the Commission's two-phased auction application process. In the first phase, a party seeking to participate in Auction 111 must file a short-form application in which it certifies, under penalty of perjury, that it is qualified to participate. Eligibility to participate in Auction 111 is determined based on an applicant's short-form application and certifications and on the applicant's upfront payment. After bidding closes, in the second phase of the process, each winning bidder in Auction 111 must file an amendment to its pending long-form application listed in Attachment A to the *Auction 111 Procedures Public Notice* for each permit it wins in the auction.

16. A party seeking to participate in Auction 111 must file an FCC Form 175 electronically via the Auction Application System prior to 6:00 p.m. ET on November 9, 2021, following the procedures prescribed in the FCC Form 175 Instructions. If an applicant claims eligibility for a bidding credit, then the information provided in its FCC Form 175 will be used to determine whether the applicant is eligible for the claimed bidding credit. The *Auction 111 Procedures Public Notice* describes more fully the information disclosures and certifications required in the short-form application. An applicant that files an FCC Form 175 for Auction 111 will be subject to the Commission's rule prohibiting certain communications. An applicant is subject to the prohibition beginning at the deadline for filing short-form applications—6:00 p.m. ET on November 9, 2021.

17. An Auction 111 applicant bears full responsibility for submitting an accurate, complete, and timely short-

form application. Pursuant to the Commission's competitive bidding rules, you must make a series of certifications under penalty of perjury on your FCC Form 175 related to the information provided in your application and your participation in the auction, and you must confirm that you are legally, technically, financially, and otherwise qualified to hold a license. If you fail to make the required certifications in your FCC Form 175 by the filing deadline, then your application will be deemed unacceptable for filing and cannot be corrected after the filing deadline.

18. Submitting an FCC Form 175 (and any amendments thereto) constitutes a representation by the certifying official that you are an authorized representative of the applicant with authority to bind the applicant, that you have read the form's instructions and certifications, and that the contents of the application, its certifications, and any attachments are true and correct. Submitting a false certification to the Commission may result in penalties, including monetary forfeitures, license forfeitures, ineligibility to participate in future auctions, and/or criminal prosecution.

19. Applicants are cautioned that requests for confidential treatment of required information submitted in FCC Form 175 will not be routinely granted because this information bears on each applicant's qualifications. The Commission generally has held that it may publicly release confidential business information where the party has put that information at issue in a Commission proceeding or where the Commission has identified a compelling public interest in disclosing the information. In this regard, the Commission specifically has held that information submitted in support of receiving bidding credits in auction proceedings should be made available to the public.

20. No individual or entity may file more than one short-form application or have a controlling interest in more than one short-form application. If a party submits multiple short-form applications for an auction, then only one application may form the basis for that party to become qualified to bid in that auction.

21. Similarly, and consistent with the Commission's general prohibition on joint bidding agreements, a party generally is permitted to participate in a Commission auction only through a single bidding entity. Accordingly, the filing of applications in Auction 111 by multiple entities controlled by the same individual or set of individuals generally will not be permitted. This restriction applies across all applications, without regard to the construction permits selected. As noted by the Commission in adopting the prohibition on applications by commonly controlled entities, this rule, in conjunction with the prohibition against joint bidding agreements, protects the competitiveness of the Commission's auctions.

22. Additional details regarding certain information required to be submitted in the FCC Form 175 are provided in the *Auction 111 Procedures Public Notice.* You should also consult the Commission's rules to ensure that all required information is included in your short-form application. To the extent the information in the *Auction 111 Procedures Public Notice* does not address your specific operating structure, or if you need additional information or guidance concerning the described disclosure requirements, you should review the educational materials for Auction 111 (see the Education section of the Auction 111 website at *www.fcc.gov/auction/111*) and use the contact information provided in the *Auction 111 Procedures Public Notice* to consult with Commission staff to better understand the information you must submit in your short-form application.

C. Authorized Bidders

23. An applicant must designate at least one authorized bidder, and no more than three, in its FCC Form 175. The Commission's rules prohibit an individual from serving as an authorized bidder for more than one auction applicant or being listed as an authorized bidder in more than one FCC Form 175 application.

D. Permit Selection

24. Only those parties listed in Attachment A to the *Auction 111 Procedures Public Notice* are eligible to submit short-form applications and only with regard to the construction permit(s) covered by the party's pending, long-form application(s) listed in Attachment A to the *Auction 111 Procedures Public Notice.* For each eligible party, the Auction Application System will only display on your FCC Form 175 the construction permits for which you are eligible to apply to bid. You must, however, affirmatively select on your FCC Form 175 the construction permit(s) on which you want to bid. You should carefully review and verify your construction permit selections before the deadline for submitting your FCC Form 175, because permit selections cannot be changed after the initial auction application filing deadline. The FCC auction bidding system will not accept bids on construction permits that were not selected on the bidder's FCC Form 175.

E. Disclosure of Agreements and Bidding Arrangements

25. An applicant must provide in its FCC Form 175 a brief description of, and identify each party to, any partnerships, joint ventures, consortia or agreements, arrangements, or understandings of any kind relating to the LPTV/TV translator station construction permits being auctioned, including any agreements that address or communicate directly or indirectly bids (including specific prices), bidding strategies (including the specific licenses on which to bid or not to bid), or the post-auction market structure, to which the applicant, or any party that controls or is controlled by the applicant, is a party. In most circumstances, if a party filing a short-form application has entered into a settlement agreement regarding a construction permit listed in Attachment A to the *Auction 111 Procedures Public Notice,* regardless of whether the party has selected that construction permit on its short-form application or not, that settlement agreement should be identified and briefly described in its FCC Form 175. In connection with the agreement disclosure requirement, the applicant must certify under penalty of perjury in its FCC Form 175 that it has described, and identified each party to, any such agreements, arrangements, or understandings to which it (or any party that controls it or that it controls) is a party. If, after the FCC Form 175 filing deadline, an auction applicant enters into any agreement relating to the licenses being auctioned, then it is subject to these same disclosure obligations. Each applicant must maintain the accuracy and completeness of the information in its pending auction application.

26. For purposes of making the required agreement disclosures on the FCC Form 175, if parties agree in principle on all material terms prior to the application filing deadline, then each party to the agreement that is submitting an auction application must provide a brief description of, and identify the other party or parties to, the agreement on its respective FCC Form 175, even if the agreement has not been reduced to writing. Parties that have not agreed in principle by the FCC Form 175 filing deadline should not describe, or include the names of parties to, the discussions on their applications.

27. The Commission's rules generally prohibit joint bidding and other arrangements involving auction applicants (including any party that controls or is controlled by such applicants). For purposes of the prohibition, a joint bidding arrangement includes any arrangement relating to the construction permits being auctioned that addresses or communicates, directly or indirectly, bidding at the auction, bidding strategies, including arrangements regarding price or the specific construction permits on which to bid, and any such arrangement relating to the post-auction market structure. The general prohibition on joint bidding arrangements excludes certain agreements, including those that are solely operational in nature, as defined in 47 CFR 1.2105(a)(2)(ix)(A)–(C).

28. To implement the prohibition on joint bidding arrangements, the Commission's rules require each applicant to certify in its short-form application that it has disclosed any arrangements or understandings of any kind relating to the licenses being auctioned to which it (or any party that controls or is controlled by it) is a party. The applicant must also certify that it (or any party that controls or is controlled by it) has not entered and will not enter into any arrangement or understanding of any kind relating directly or indirectly to bidding at auction with, among others, any other applicant.

29. Although the Commission's rules do not prohibit auction applicants from communicating about matters that are within the scope of an excepted agreement that has been disclosed in an FCC Form 175, the Commission reminds applicants that certain discussions or exchanges could nonetheless touch upon impermissible subject matters, and that compliance with the Commission's rules will not insulate a party from enforcement of the antitrust laws.

30. Applicants should bear in mind that a winning bidder will be required to disclose in its post-auction amendment to its pending long-form application the specific terms, conditions, and parties involved in any agreement relating to the licenses being auctioned into which it had entered prior to the time bidding was completed. This applies to any settlement agreement, joint venture, partnership, or other agreement, arrangement, or understanding of any kind entered into relating to the competitive bidding process, including any agreements relating to the permits being auctioned that address or communicate directly or indirectly bids (including specific prices), bidding strategies (including the specific permits on which to bid or not to bid), or the post-auction market structure, to which the applicant, or any party that controls or is controlled by the applicant, is a party.

F. Ownership Disclosure Requirements

31. Each applicant must comply with the ownership disclosure requirements and provide information required by 47 CFR 1.2105 and 1.2112. Specifically, in completing FCC Form 175, an applicant must fully disclose information regarding the real party or parties-in-interest in the applicant or application and the ownership structure of the applicant, including both direct and indirect ownership interests of 10% or more, as prescribed in 47 CFR 1.2105 and 1.2112. These interest holders may differ from the types of attributable interest holders that are required to be reported by broadcast applicants under part 73 of the Commission's rules in conjunction with licensing and assignment and transfer of facilities or reporting of ownership information, such as insulated interest holders and holders of non-voting stock/equity in the applicant. Each applicant is responsible for ensuring that information submitted in its short-form application is complete and accurate.

32. In certain circumstances, an applicant may have previously filed an FCC Form 602 ownership disclosure information report or filed an auction application for a previous auction in which ownership information was disclosed. The most current ownership information contained in any FCC Form 602 or previous auction application on file with the Commission that used the same FCC Registration Number (FRN) the applicant is using to submit its FCC Form 175 will automatically be pre-filled into certain ownership sections on the applicant's FCC Form 175, if such information is in an electronic format compatible with FCC Form 175. Each applicant must carefully review any ownership information automatically entered into its FCC Form 175, including any ownership attachments, to confirm that all information supplied on FCC Form 175 is complete and accurate as of the application filing deadline. Any information that needs to be corrected or updated must be changed directly in FCC Form 175.

G. Foreign Ownership Disclosure Requirements

33. Section 310 of the Act requires the Commission to review foreign investment in radio station licenses and imposes specific restrictions on who may hold certain types of radio licenses. In completing FCC Form 175, an applicant is required to disclose information concerning foreign ownership of the applicant. If an applicant has foreign ownership interests in excess of the applicable limit or benchmark set forth in 47 U.S.C. 310(b), then it may seek to participate in Auction 111 only if it has filed a petition for declaratory ruling with the Media Bureau prior to the FCC Form 175 filing deadline. An applicant must certify in its FCC Form 175 that, as of the deadline for filing its application to participate in the auction, the applicant either is in compliance with the foreign ownership provisions of 47 U.S.C. 310 or has filed a petition for declaratory ruling requesting Commission approval to exceed the applicable foreign ownership limit or benchmark in 47 U.S.C. 310(b) that is pending before, or has been granted by, the Commission.

H. Prohibited Communications and Compliance With Antitrust Laws

34. The rules prohibiting certain communications set forth in 47 CFR 1.2105(c) and 73.5002(d) and (e) apply to each applicant that files an FCC Form 175 in Auction 111. Section 1.2105(c)(1) of the Commission's rules provides that, subject to specified exceptions, after the deadline for filing a short-form application, all applicants are prohibited from cooperating or collaborating with respect to, communicating with or disclosing, to each other in any manner the substance of their own, or each other's, or any other applicant's bids or bidding strategies (including post-auction market structure), or discussing or negotiating settlement agreements, until after the down payment deadline.

1. Entities Subject to § 1.2105(c)

35. An applicant for purposes of this rule includes the officers and directors of the applicant, all controlling interests in the entity submitting the FCC Form 175, as well as all holders of interests amounting to 10% or more of that entity. A party that submits an application becomes an applicant under the rule at the short-form application filing deadline, and that status does not change based on later developments, including failure to become a qualified bidder.

2. Prohibition Applies Until Down Payment Deadline

36. The prohibition in 47 CFR 1.2105(c) on certain communications begins at an auction's short-form application filing deadline and ends at the auction's down payment deadline

after the auction closes, which will be announced in a future public notice.

37. After the short-form application filing deadline, OEA and MB will announce a limited settlement period of no more than two weeks during which this prohibition may be partially suspended for the purpose of resolving mutual exclusivity through settlements. Outside of this limited settlement period, and until this limited settlement period is announced, the prohibition on certain communications remains in effect.

3. Scope of Prohibition on Certain Communications; Prohibition on Joint Bidding Agreements

38. Section 1.2105(c) of the Commission's rules prohibits certain communications between auction applicants, regardless of whether the applicants seek permits in the same geographic area or market. The rule also prohibits any joint bidding arrangement, including arrangements relating to the permits being auctioned that address or communicate, directly or indirectly, bidding at the auction, bidding strategies, including arrangements regarding price or the specific permits on which to bid, and any such arrangements relating to the post-auction market structure. The rule allows for limited exceptions for communications within the scope of any arrangement consistent with the exclusion from the Commission's rule prohibiting joint bidding, provided such arrangement is disclosed on the applicant's auction application. An applicant may communicate pursuant to any pre-existing agreements, arrangements, or understandings relating to the licenses being auctioned that are solely operational or that provide for the transfer or assignment of licenses, provided that such agreements, arrangements, or understandings are disclosed on its application and do not both relate to the permits at auction and address or communicate bids (including amounts), bidding strategies, or the particular permits or licenses on which to bid or the post-auction market structure.

39. In addition to express statements of bids and bidding strategies, the prohibition against communicating in any manner includes public disclosures as well as private communications and indirect or implicit communications. Consequently, an applicant must take care to determine whether its auction-related communications may reach another applicant.

40. Parties subject to 47 CFR 1.2105(c) should take special care in circumstances where their officers, directors, and employees may receive information directly or indirectly relating to any applicant's bids or bidding strategies. Such information may be deemed to have been received by the applicant under certain circumstances. For example, Commission staff have determined that, where an individual serves as an officer or director for two or more applicants, the bids and bidding strategies of one applicant are presumed to be conveyed to the other applicant through the shared officer or director, which creates an apparent violation of the rule.

41. Subject to the limited exceptions described above, 47 CFR 1.2105(c)(1) prohibits applicants from discussing or negotiating settlement agreements and from communicating with specified other parties only with respect to their own, or each other's, or any other applicant's bids or bidding strategies. Moreover, a communication conveying bids or bidding strategies (including post-auction market structure) must also relate to the licenses being auctioned in order to be covered by the prohibition. Thus, the prohibition is limited in scope and does not apply to all communications between or among the specified parties. The Commission consistently has made clear that application of the rule prohibiting communications has never required total suspension of essential ongoing business. Entities subject to the prohibition may negotiate agreements, other than settlement agreements, during the prohibition period, provided that the communications involved do not relate to both: (1) The licenses or permits being auctioned and (2) bids or bidding strategies or post-auction market structure.

42. Accordingly, business discussions and negotiations that are unrelated to settlement agreements for the construction permits in Auction 111 or bidding in Auction 111 and that do not convey information about the bids or bidding strategies of an applicant, including the post-auction market structure, are not prohibited by the rule. Moreover, not all auction-related information is covered by the prohibition. For example, communicating merely whether a party has or has not applied to participate in Auction 111 will not violate the rule. In contrast, communicating, among other things, how a party will participate, including whether or not a party plans to submit an upfront payment and the upfront payment amount, specific bid amounts, and/or whether or not the party is placing bids, would convey bids or bidding strategies and would be prohibited.

43. While 47 CFR 1.2105(c) does not prohibit business discussions and negotiations among auction applicants that are unrelated to the auction, each applicant must remain vigilant not to communicate, directly or indirectly, information that affects, or could affect, bids or bidding strategies. Certain discussions might touch upon subject matters that could convey price or geographic information related to bidding strategies. Such subject areas include, but are not limited to, management, sales, local marketing agreements, and other transactional agreements.

44. OEA and MB caution applicants that bids or bidding strategies may be communicated outside of situations that involve one party subject to the prohibition communicating privately and directly with another such party. For example, the Commission has warned that prohibited communications concerning bids and bidding strategies may include communications regarding capital calls or requests for additional funds in support of bids or bidding strategies to the extent such communications convey information concerning the bids and bidding strategies directly or indirectly. Moreover, the Commission found a violation of the rule against prohibited communications when an applicant used the Commission's bidding system to disclose its bidding strategy in a manner that explicitly invited other auction participants to cooperate and collaborate in specific markets, and it has placed auction participants on notice that the use of its bidding system to disclose market information to competitors will not be tolerated and will subject bidders to sanctions.

45. Likewise, when completing a short-form application, each applicant should avoid any statements or disclosures that may violate 47 CFR 1.2105(c). Applicants also should be mindful that communicating non-public application or bidding information publicly or privately to another applicant may violate 47 CFR 1.2105(c) even though that information subsequently may be made public during later periods of the application or bidding processes.

4. Communicating With Third Parties

46. Section 1.2105(c) does not prohibit an applicant from communicating bids or bidding strategies to a third party, such as a consultant or consulting firm, counsel, or lender. The applicant should take appropriate steps, however, to ensure that any third party it employs for advice pertaining to its bids or bidding

strategies does not become a conduit for prohibited communications to other specified parties, as that would violate the rule. For example, an applicant might require a third party, such as a lender, to sign a non-disclosure agreement before the applicant communicates any information regarding bids or bidding strategy to the third party. Within third-party firms, separate individual employees, such as attorneys or auction consultants, may advise individual applicants on bids or bidding strategies, as long as such firms implement firewalls and other compliance procedures that prevent such individuals from communicating the bids or bidding strategies of one applicant to other individuals representing separate applicants. Although firewalls and/or other procedures should be used, their existence is not an absolute defense to liability if a violation of the rule has occurred.

47. As the Commission has noted in other broadcast auctions, in the case of an individual, the objective precautionary measure of a firewall is not available. As a result, an individual that is privy to bids or bidding information of more than one applicant presents a greater risk of becoming a conduit for a prohibited communication. Whether a prohibited communication has taken place in a given case will depend on all the facts pertaining to the case, including who possessed what information, what information was conveyed to whom, and the course of bidding in the auction.

48. Applicants may discuss the short-form application or bids for specific permits with the counsel, consultant, or expert of their choice before the short-form application deadline. Furthermore, the same third-party individual could continue to give advice to multiple applicants regarding their applications after the short-form application deadline, provided that no information pertaining to bids or bidding strategies is conveyed to that individual from any of the applicants the individual advises. No person may serve as an authorized bidder for more than one applicant in Auction 111.

49. Applicants also should use caution in their dealings with other parties, such as members of the press, financial analysts, or others who might become conduits for the communication of prohibited bidding information. For example, even though communicating that it has applied to participate in this auction will not violate the rule, an applicant's statement to the press that it intends to stop bidding in an auction could give rise to a finding of a violation of 47 CFR 1.2105. Similarly, an FCC Form 175 applicant's public statement of intent not to place bids during bidding in Auction 111 could also violate the rule.

5. Section 1.2105(c) Certifications

50. By electronically submitting its FCC Form 175, each applicant in Auction 111 certifies its compliance with 47 CFR 1.2105(c) and 73.5002(d). The mere filing of a certifying statement as part of an application, however, will not outweigh specific evidence that a prohibited communication has occurred, nor will it preclude the initiation of an investigation when warranted. Any applicant found to have violated these communication prohibitions may be subject to sanctions.

6. Duty To Report Prohibited Communications

51. Section 1.2105(c)(4) requires that any applicant that makes or receives a communication that appears to violate 47 CFR 1.2105(c) must report such communication in writing to the Commission immediately, and in no case later than five business days after the communication occurs. Each applicant's obligation to report any such communication continues beyond the five-day period after the communication is made, even if the report is not made within the five-day period.

7. Procedures for Reporting Prohibited Communications

52. A party reporting any information or communication pursuant to 47 CFR 1.65, 1.2105(a)(2), or 1.2105(c)(4) must take care to ensure that any report of a prohibited communication does not itself give rise to a violation of 47 CFR 1.2105(c). For example, reporting a prohibited communication through ECFS or another Commission filing system that allows public access to filed materials could violate the rule by communicating prohibited information to other parties covered by the rule.

53. An applicant must file only a single report concerning a prohibited communication and must file that report with the Commission personnel expressly charged with administering the Commission's auctions. This rule is designed to minimize the risk of inadvertent dissemination of information in such reports. Any reports required by 47 CFR 1.2105(c) must be filed consistent with the instructions set forth in the *Auction 111 Procedures Public Notice.* For Auction 111, such reports must be filed with the Chief of the Auctions Division, OEA, by the most expeditious means available. Any such report should be submitted by email to the Auctions Division Chief at the following email address: *auction111@fcc.gov.* If you choose instead to submit a report in hard copy, contact Auctions Division staff at *auction111@fcc.gov* or (202) 418–0660 for guidance.

54. Given the potential competitive sensitivity of information in such a report, a party seeking to report a prohibited communication should consider submitting its report with a request that the report or portions of the submission be withheld from public inspection by following the procedures specified in 47 CFR 0.459. Such parties should coordinate with the Auctions Division staff about the procedures for submitting reports of prohibited communications.

8. Winning Bidders Must Disclose Terms of Agreements

55. Each applicant that is a winning bidder will be required to provide, as part of its amendment to its long-form application, any agreement or arrangement relating to the competitive bidding process that it has entered into and a summary of the specific terms, conditions, and parties involved in that agreement. Such agreements must have been entered into prior to the filing deadline for short-form applications. This disclosure requirement applies to any settlement agreement, bidding consortia, joint venture, partnership, or agreement, understanding, or other arrangement entered into relating to the competitive bidding process, including any agreement relating to the post-auction market structure. Failure to comply with the Commission's rules can result in enforcement action.

9. Antitrust Laws

56. Regardless of compliance with the Commission's rules, applicants remain subject to the antitrust laws, which are designed to prevent anticompetitive behavior in the marketplace. Compliance with the disclosure requirements of 47 CFR 1.2105(c)(4) will not insulate a party from enforcement of the antitrust laws. For instance, a violation of the antitrust laws could arise out of actions taking place well before any party submits a short-form application. The Commission has cited a number of examples of potentially anticompetitive actions that would be prohibited under antitrust laws: For example, actual or potential competitors may not agree to divide territories in order to minimize competition, regardless of whether they split a market in which they both do business, or whether they merely reserve one market for one and another market for the other.

57. To the extent the Commission becomes aware of specific allegations that suggest that violations of the federal antitrust laws may have occurred, the Commission may refer such allegations to the United States Department of Justice for investigation. If an applicant is found to have violated the antitrust laws or the Commission's rules in connection with its participation in the competitive bidding process, then it may be subject to a forfeiture and may be prohibited from participating further in Auction 111 and in future auctions, among other sanctions.

I. New Entrant Bidding Credit

58. To promote the objectives of 47 U.S.C. 309(j) and further its long-standing commitment to the diversification of broadcast facility ownership, the Commission provides a tiered new entrant bidding credit for broadcast auction applicants with no, or very few, other media interests.

59. Applicants that qualify for the new entrant bidding credit are eligible for a bidding credit in this auction that represents the amount by which a bidder's winning bid is discounted. Eligibility for the new entrant bidding credit must be specified in an applicant's short-form application, which establishes that applicant's maximum bidding credit eligibility for Auction 111. The size of a new entrant bidding credit depends on the number of ownership interests in other media of mass communications that are attributable to the bidder-entity and its attributable interest-holders. A 35% bidding credit will be given to a winning bidder if it, and/or any individual or entity with an attributable interest in the winning bidder, has no attributable interest in any other media of mass communications, as defined in 47 CFR 73.5008. A 25% bidding credit will be given to a winning bidder if it, and/or any individual or entity with an attributable interest in the winning bidder, has an attributable interest in no more than three mass media facilities, as defined in 47 CFR 73.5008. No bidding credit will be given if any of the commonly owned mass media facilities serve the same area as the broadcast permit proposed in the auction, as defined in 47 CFR 73.5007(b), or if the winning bidder, and/or any individual or entity with an attributable interest in the winning bidder, has attributable interests in more than three mass media facilities.

60. Bidding credits are not cumulative; qualifying applicants receive either the 25% or the 35% bidding credit, but not both.

61. The interests of the applicant, and of any individuals or entities with an attributable interest in the applicant, in other media of mass communications are considered when determining an applicant's eligibility for the new entrant bidding credit. Attributable interests are defined in 47 CFR 73.3555 and note 2 of that section. In Auction 111, the bidder's attributable interests, and thus, its maximum new entrant bidding credit eligibility, are determined as of the short-form application filing deadline. An applicant intending to divest a media interest or make any other ownership change, such as resignation of positional interests (officer or director) in order to avoid attribution for purposes of qualifying for the new entrant bidding credit, must have consummated such divestment transactions, or have completed such ownership changes, by no later than the FCC Form 175 filing deadline. However events occurring after the short-form application filing deadline, such as the acquisition of attributable interests in media of mass communications, may cause diminishment or loss of the bidding credit and, must be reported immediately.

62. Under broadcast attribution rules, those entities or individuals with an attributable interest in a bidder include: (1) All officers and directors of a corporate bidder; (2) any owner of 5% or more of the voting stock of a corporate bidder; (3) all general partners and limited partners of a partnership bidder, unless the limited partners are sufficiently insulated; and (4) all members of a limited liability company, unless sufficiently insulated.

63. In cases where an applicant's spouse or close family member holds other media interests, such interests are not automatically attributable to the bidder. The Commission decides attribution issues in this context based on certain factors traditionally considered relevant.

64. The eligibility standards for the new entrant bidding credit include attribution of the media interests held by very substantial investors in, or creditors of, an applicant claiming new entrant status. Specifically, the attributable mass media interests held by an individual or entity with an equity and/or debt interest in an applicant shall be attributed to that bidder for purposes of determining its eligibility for the new entrant bidding credit, if the equity and debt interests, in the aggregate, exceed 33% of the total asset value of the applicant, even if such an interest is non-voting.

65. The equity/debt plus (EDP) attribution standard was relaxed to allow for higher investment opportunities in entities meeting the definition of eligible entities, as defined in Note 2(i) of 47 CFR 73.3555. The Commission will allow the holder of an equity or debt interest in the applicant to exceed the above-noted 33% threshold without triggering attribution provided (1) the combined equity and debt in the ''eligible entity'' is less than 50%; or (2) the total debt in the ''eligible entity'' does not exceed 80% of the asset value, and the interest holder does not hold any equity interest, option, or promise to acquire an equity interest in the ''eligible entity'' or any related entity.

66. Generally, media interests will be attributable for purposes of the new entrant bidding credit to the same extent that such other media interests are considered attributable for purposes of the broadcast multiple ownership rules. Attributable interests held by a winning bidder in existing low power television, television translator or FM translator facilities, however, will not be counted among the applicant's other mass media interests in determining its eligibility for a new entrant bidding credit. A medium of mass communications is defined in 47 CFR 73.5008(b). Full service noncommercial educational stations, on both reserved and non-reserved channels, are included among ''media of mass communications'' as defined in 47 CFR 73.5008(b).

1. Application Requirements

67. In addition to the ownership information required pursuant to 47 CFR 1.2105 and 1.2112, applicants seeking a new entrant bidding credit are required to establish on their short-form applications that they satisfy the eligibility requirements to qualify for the bidding credit. In those cases, a certification under penalty of perjury must be provided in completing the short-form application. An applicant claiming that it qualifies for a 35% new entrant bidding credit must certify that neither it nor any of its attributable interest holders has any attributable interests in any other media of mass communications. An applicant claiming that it qualifies for a 25% new entrant bidding credit must certify that neither it nor any of its attributable interest holders has any attributable interests in more than three media of mass communications, and must identify and describe such media of mass communications.

2. Unjust Enrichment

68. Applicants should note that unjust enrichment provisions apply to a winning bidder that utilizes a bidding credit and subsequently seeks to assign or transfer control of its license or construction permit to an entity not qualifying for the same level of bidding credit.

J. Provisions Regarding Former and Current Defaulters

69. Pursuant to the rules governing competitive bidding, each applicant must make certifications regarding whether it is a current or former defaulter or delinquent. A current defaulter or delinquent is not eligible to participate in Auction 111, but a former defaulter or delinquent may participate so long as it is otherwise qualified and makes an upfront payment that is 50% more than would otherwise be necessary. Accordingly, each applicant must certify under penalty of perjury on its FCC Form 175 that it, its affiliates, its controlling interests, and the affiliates of its controlling interests are not in default on any payment for a Commission construction permit or license (including down payments) and that it is not delinquent on any non-tax debt owed to any Federal agency. Additionally, an applicant must certify under penalty of perjury whether it (along with its controlling interests) has ever been in default on any payment for a Commission construction permit or license (including down payments) or has ever been delinquent on any non-tax debt owed to any Federal agency, subject to the exclusions described below. For purposes of making these certifications, the term ''controlling interest'' is defined in 47 CFR 1.2105(a)(4)(i).

70. Under the Commission's rule regarding applications by former defaulters, an applicant is considered a ''former defaulter'' or a ''former delinquent'' when, as of the FCC Form 175 deadline, the applicant or any of its controlling interests has defaulted on any Commission construction permit or license or has been delinquent on any non-tax debt owed to any Federal agency, but has since remedied all such defaults and cured all of the outstanding non-tax delinquencies. For purposes of the certification under 47 CFR 1.2105(a)(2)(xii), the applicant may exclude from consideration any cured default on a Commission construction permit or license or cured delinquency on a non-tax debt owed to a Federal agency for which any of the following criteria are met: (1) The notice of the final payment deadline or delinquency was received more than seven years before the FCC Form 175 filing deadline, (2) the default or delinquency amounted to less than $100,000, (3) the default or delinquency was paid within two quarters (*i.e.,* six months) after receiving the notice of the final payment deadline or delinquency, or (4) the default or delinquency was the subject of a legal or arbitration proceeding and was cured upon resolution of the proceeding. With respect to the first exclusion, notice to a debtor may include notice of a final payment deadline or notice of delinquency and may be express or implied depending on the origin of any Federal non-tax debt giving rise to a default or delinquency. Additionally, for the third exclusion, the date of receipt of the notice of a final default deadline or delinquency by the intended party or debtor will be used for purposes of verifying receipt of notice.

71. In addition to the *Auction 111 Procedures Public Notice,* applicants should review previous guidance on default and delinquency disclosure requirements in the context of the auction short-form application process. Applicants may consult with Auctions Division staff if they have any questions about default and delinquency disclosure requirements.

72. The Commission considers outstanding debts owed to the United States Government, in any amount, to be a serious matter. The Commission adopted rules, including a provision referred to as the red light rule, that implement its obligations under the Debt Collection Improvement Act of 1996, which governs the collection of debts owed to the United States. Under the red light rule, applications and other requests for benefits filed by parties that have outstanding debts owed to the Commission will not be processed. When adopting that rule, the Commission explicitly declared, however, that its competitive bidding rules are not affected by the red-light rule. As a consequence, the Commission's adoption of the red light rule does not alter the applicability of any of its competitive bidding rules, including the provisions and certifications of 47 CFR 1.2105 and 1.2106, with regard to current and former defaults or delinquencies.

73. The Commission's Red Light Display System, which provides information regarding debts currently owed to the Commission, may not be determinative of an auction applicant's ability to comply with the default and delinquency disclosure requirements of 47 CFR 1.2105. Thus, while the red light rule ultimately may prevent the processing of amendments to long-form applications by auction winners, an auction applicant's lack of current red light status is not necessarily determinative of its eligibility to participate in an auction (or whether it may be subject to an increased upfront payment obligation). Moreover, any long-form applications amended after the close of bidding will be reviewed for compliance with the Commission's red light rule, and such review may result in the dismissal of a winning bidder's long-form application. Each applicant should carefully review all records and other available Federal agency databases and information sources to determine whether the applicant, or any of its affiliates, or any of its controlling interests, or any of the affiliates of its controlling interests, currently owes or was ever delinquent in the payment of non-tax debt owed to any Federal agency.

K. Optional Applicant Status Identification

74. An applicant owned by members of minority groups and/or women, as defined in 47 CFR 1.2110(c)(3), or that is a rural telephone company, as defined in 47 CFR 1.2110(c)(4), may identify itself as such in filling out its FCC Form 175. This applicant status information is collected for statistical purposes only and assists the Commission in monitoring the participation of various groups in its auctions.

L. Noncommercial Educational Status Election

75. 47 U.S.C. 309(j)(2)(C) exempts from competitive bidding applications for construction permits for noncommercial educational (NCE) broadcast. For purposes of Auction 111, this exemption applies to a construction permit application for a new or modified LPTV/translator station that will be owned and operated by a municipality and will transmit only noncommercial programs for educational purposes. Applications for such NCE stations are exempt from competitive bidding in Auction 111. Accordingly, in the FCC Form 175, applicants will have an opportunity to designate their status as an exempt NCE station application under the definition specified in 47 U.S.C. 397(6)(B).

76. Applications for exempt NCE stations on non-reserved spectrum, filed during an auction filing window, will be returned as unacceptable for filing if mutually exclusive with any application for a commercial station. If an FCC Form 175 identifies the application's proposed station as an exempt noncommercial educational and that

application remains mutually exclusive with any short-form application for a commercial station after the limited settlement period, the NCE application will be returned as unacceptable for filing and the applicant will not be provided with any further opportunity to become eligible to bid in this auction. For this reason, each prospective applicant in this auction should consider carefully whether it wishes to propose operation as an exempt noncommercial educational station under 47 U.S.C. 397(6)(B) for any LPTV/translator station acquired in this auction. This exempt NCE election cannot be reversed after the initial short-form application filing deadline. Short-form applications that do not identify the facilities proposed in the FCC Form 175 as NCE will be considered, as a matter of law, applications for commercial broadcast stations.

M. Modifications to FCC Form 175

1. Only Minor Modifications Allowed

77. After the initial short-form application filing deadline, an Auction 111 applicant will be permitted to make only minor changes to its FCC Form 175. Examples of minor changes include the deletion or addition of authorized bidders (to a maximum of three) and the revision of addresses and telephone numbers of the applicant, its responsible party, and its contact person. Major modification to an FCC Form 175 (*e.g.,* change of construction permit selection, certain changes in ownership that would constitute an assignment or transfer of control of the applicant, change in the required certifications, change in applicant's legal classification that results in a change in control, or change in claimed eligibility for a higher percentage of bidding credit) will not be permitted after the FCC Form 175 filing deadline. If an amendment reporting changes is a major amendment, as described in 47 CFR 1.2105(b)(2), the major amendment will not be accepted and may result in the dismissal of the application. Questions about FCC Form 175 amendments should be directed to the Auctions Division at (202) 418–0660.

2. Duty To Maintain Accuracy and Completeness of FCC Form 175

78. Pursuant to 47 CFR 1.65, each applicant has a continuing obligation to maintain the accuracy and completeness of information furnished in a pending application, including a pending application to participate in Auction 111 or a pending LPTV/TV translator station application. Consistent with the requirements for spectrum auctions, an applicant for Auction 111 must furnish additional or corrected information to the Commission within five business days after a significant occurrence, or amend its FCC Form 175, no more than five business days after the applicant becomes aware of the need for the amendment. In accordance with the Commission's rules, an applicant's obligation to make modifications to a pending auction application in order to provide additional or corrected information continues beyond the five-day period, even if the report is not made within the five-day period. An applicant is obligated to amend its pending application even if a reported change may result in the dismissal of the application because it is subsequently determined to be a major modification.

79. Additional information on the procedures for modifying an FCC Form 175 appear in the *Auction 111 Procedures Public Notice.* As with filing the FCC Form 175, any amendment(s) to the application and related statements of fact must be certified by an authorized representative of the applicant with authority to bind the applicant. Submission of any such amendment or related statement of fact constitutes a representation by the person certifying that he or she is an authorized representative with such authority and that the contents of the amendment or statement of fact are true and correct.

III. Preparing for Bidding in Auction 111

A. Due Diligence

80. Each potential bidder is solely responsible for investigating and evaluating all technical and marketplace factors that may have a bearing on the value of the construction permit(s) it is seeking in Auction 111. The Commission makes no representations or warranties about the use of this spectrum or these construction permits for particular services. Each applicant should be aware that a Commission auction represents an opportunity to become an FCC permittee in a broadcast service, subject to certain conditions and regulations. This includes the established authority of the Commission to alter the terms of existing licenses by rulemaking, which is equally applicable to licenses awarded by auction. A Commission auction does not constitute an endorsement by the Commission of any particular service, technology, or product, nor does a Commission construction permit or license constitute a guarantee of business success.

81. An applicant should perform its due diligence research and analysis before proceeding, as it would with any new business venture. In particular, each potential bidder should perform technical analyses and/or refresh its previous analyses to assure itself that, should it become a winning bidder for any Auction 111 construction permit, it will be able to build and operate facilities that will fully comply with all applicable technical and legal requirements. Stations in the LPTV/translator services are licensed and operate on a secondary interference basis. This means that they may not interfere with, and must accept interference from, primary services including full power television stations. As a result, the operating channel of an LPTV/translator station may be displaced by a full power television station and the LPTV/translator station will either have to relocate to a new channel that does not cause interference or else discontinue operations altogether. Each applicant should also inspect any prospective transmitter sites located in, or near, the service area for which it plans to bid, to confirm the availability of such sites, and to familiarize itself with the Commission's rules regarding any applicable federal, state, and local requirements, including the National Environmental Policy Act (NEPA), the National Historic Preservation Act (NHPA), and other environmental statutes.

82. Each applicant in Auction 111 should continue to conduct its own research throughout the auction in order to determine the existence of pending or future administrative or judicial proceedings that might affect its decision to continue participating in the auction. Each applicant is responsible for assessing the likelihood of the various possible outcomes and for considering the potential impact on construction permits available in this auction. The due diligence considerations mentioned in the *Auction 111 Procedures Public Notice* do not comprise an exhaustive list of steps that should be undertaken prior to participating in Auction 111. As always, the burden is on the potential bidder to determine how much research to undertake, depending upon specific facts and circumstances related to its interests.

83. Applicants are solely responsible for identifying associated risks and for investigating and evaluating the degree to which such matters may affect their ability to bid on, otherwise acquire, or make use of the construction permits available in Auction 111. Each potential bidder is responsible for undertaking

research to ensure that any permits won in this auction will be suitable for its business plans and needs. Each potential bidder must undertake its own assessment of the relevance and importance of information gathered as part of its due diligence efforts.

84. The Commission makes no representations or guarantees regarding the accuracy or completeness of information in its databases or any third-party databases, including, for example, court docketing systems. To the extent the Commission's databases may not include all information deemed necessary or desirable by an applicant, it must obtain or verify such information from independent sources or assume the risk of any incompleteness or inaccuracy in said databases. Furthermore, the Commission makes no representations or guarantees regarding the accuracy or completeness of information that has been provided by incumbent licensees and incorporated into its databases.

B. Bidder Education

85. Before the opening of the short-form application filing window for Auction 111, detailed educational information will be provided in various formats to would-be participants on the Auction 111 web page. Specifically, OEA will provide various materials on the pre-bidding processes in advance of the opening of the short-form application window, beginning with the release of step-by-step instructions for completing the FCC Form 175, which OEA will make available in the Education section of the Auction 111 website at *www.fcc.gov/auction/111.* In addition, OEA will provide an online tutorial for the auction, covering pre-auction procedures including completing a short-form application in the FCC Auction Application System, and bidding procedures including how to use the FCC auction bidding system. In advance of the start of the mock auction, OEA will release a user guide for the bidding system.

86. These materials will be accessible in the Education section of the Auction 111 website at *www.fcc.gov/auction/111.*

C. Short-Form Applications: Due Before 6:00 p.m. ET on November 9, 2021

87. In order to be eligible to bid in Auction 111, an applicant must first submit a short-form application (FCC Form 175) electronically via the Auction Application System following the instructions set forth in the FCC Form 175 Instructions, which are available on the Education tab of the Auction 111 website at *www.fcc.gov/auction/111.* The short-form application will become available with the opening of the initial filing window and must be submitted prior to 6:00 p.m. ET on November 9, 2021. Late applications will not be accepted. No filing fee is required to be paid at the time of filing a short-form application.

88. Applications may be filed at any time beginning at noon ET on November 1, 2021, until the filing window closes at 6:00 p.m. ET on November 9, 2021. Applicants are strongly encouraged to file early and are responsible for allowing adequate time for filing their applications. There are no limits or restrictions on the number of times an application can be updated or amended until the initial filing deadline on November 9, 2021.

89. An applicant must always click on the CERTIFY & SUBMIT button on the Certify & Submit screen to successfully submit its FCC Form 175 and any modifications; otherwise the application or changes to the application will not be received or reviewed by Commission staff. Additional information about accessing, completing, and viewing the FCC Form 175 is provided in the FCC Form 175 Instructions. Applicants requiring technical assistance should contact FCC Auctions Technical Support at (877) 480–3201, option nine; (202) 414–1250; or (202) 414–1255 (text telephony (TTY)). Hours of service are Monday through Friday, from 8:00 a.m. to 6:00 p.m. ET. In order to provide better service to the public, all calls to Technical Support are recorded.

D. Application Processing, Limited Settlement Opportunity, and Minor Modifications

1. Public Notice of MX Groups and Limited Settlement Opportunity

90. After the initial short-form application filing deadline, Commission staff will review all timely submitted applications for Auction 111 to identify the MX Groups listed in Attachment A to the *Auction 111 Procedures Public Notice* for which two or more short-form applications were submitted and which are therefore subject to competitive bidding procedures. Following this review, OEA and MB will release a public notice identifying the remaining MX Groups in Auction 111. That public notice will also specify a settlement period, of no more than 10 business days, for resolving mutual exclusivity by the filing of technical amendments, dismissal requests, and requests for approval of settlement agreements. Technical amendments submitted by applicants to resolve their mutual exclusivities must be minor, as defined by the applicable rules, and must not create any new mutual exclusivity or other application conflict. Unless the mutual exclusivity is resolved during this limited settlement opportunity, an applicant in one of these MX Groups cannot obtain the construction permit without placing a bid, even if no other auction applicant in that MX Group becomes qualified to bid or in fact places a bid.

91. No more than one construction permit will be awarded through Auction 111 for each MX group identified in Attachment A to the *Auction 111 Procedures Public Notice.* Likewise, any settlement reached during this limited settlement opportunity may not result in more than one surviving application for an LPTV/translator station construction permit. Accordingly, partial settlements (*i.e.,* settlements which reduce the number of proposals in a group, but which do not completely resolve the mutual exclusivity of that group) and engineering solutions that completely resolve the mutual exclusivity of the group but result in more than one surviving application will not be permitted. To facilitate resolution of mutual exclusivity, the prohibited communications rule will be suspended during the settlement period as specified by future public notice(s). Discussions between applicants of bids, bidding strategies, or settlements outside of any announced settlement period would violate the Commission's prohibition on certain communications by auction applicants.

92. Non-mutually exclusive applications will be listed in a subsequent public notice to be released by OEA and MB. Such applications will not proceed to auction, but will proceed in accordance with instructions set forth in that public notice.

2. Public Notice of Applicants' Initial Application Status and Opportunity for Minor Modifications

93. Commission staff will review all timely submitted applications for Auction 111 that remain mutually exclusive after the limited settlement period to determine whether each applicant has complied with the application requirements and whether it has provided all required information concerning its qualifications for bidding. After this review is completed, OEA and MB will issue a public notice announcing applicants' initial application status by identifying: (1) Those that are complete; (2) those that are rejected; and (2) those that are incomplete or deficient because of defects that may be corrected. That public notice also will establish an

application resubmission filing window, during which an applicant may make permissible minor modifications to its application to address identified deficiencies. The public notice will include the deadline for resubmitting corrected applications and a copy of the public notice will be sent by overnight delivery to the contact address listed in the FCC Form 175 for each applicant. OEA and MB ask all applicants to make sure that the contact address provided in its short-form application is accurate and is a location capable of accepting packages that require a signature. In addition, each applicant with an incomplete application will be sent information on the nature of the deficiencies in its application, along with the name and contact information of a Commission staff member who can answer questions specific to the application. To become a qualified bidder, an applicant must have a complete application (*i.e.,* have timely corrected any identified deficiencies) and make a timely and sufficient upfront payment. Qualified bidders will be identified by public notice at least 10 days prior to the mock auction.

94. After the initial application filing deadline on November 9, 2021, applicants can make only minor modifications to their applications. Major modifications will not be permitted. After the deadline for resubmitting corrected applications, an applicant will have no further opportunity to cure any deficiencies in its application or provide any additional information that may affect Commission staff's ultimate determination of whether and to what extent the applicant is qualified to participate in Auction 111.

95. Commission staff will communicate only with an applicant's contact person or certifying official, as designated on the applicant's FCC Form 175, unless the applicant's certifying official or contact person notifies Commission staff in writing that another representative is authorized to speak on the applicant's behalf. Authorizations may be sent by email to *auction111@fcc.gov.*

3. Public Notice of Applicants' Final Application Status After Upfront Payment Deadline

96. After Commission staff review resubmitted applications for Auction 111 and evaluate upfront payments, OEA and MB will release a public notice identifying applicants that have become qualified bidders. Qualified bidders are those applicants with submitted FCC Forms 175 that are deemed timely filed and complete and that have made a sufficient upfront payment.

E. Upfront Payments

97. In order to be eligible to bid in Auction 111, a sufficient upfront payment and a complete and accurate FCC Remittance Advice Form (FCC Form 159, Revised 2/03) must be submitted before 6:00 p.m. ET on January 25, 2022. After completing its short-form application, an applicant will have access to an electronic pre-filled version of the FCC Form 159. An accurate and complete FCC Form 159 must accompany each payment. Proper completion of this form is critical to ensuring correct crediting of upfront payments. Payers using the pre-filled FCC Form 159 are responsible for ensuring that all the information on the form, including payment amounts, is accurate. Instructions for completing FCC Form 159 for Auction 111 are provided in Attachment B to the *Auction 111 Procedures Public Notice.*

1. Making Upfront Payments by Wire Transfer for Auction 111

98. Upfront payments for Auction 111 must be wired to, and will be deposited in, the U.S. Treasury.

99. Wire transfer payments for Auction 111 must be received before 6:00 p.m. ET on January 25, 2022. No other payment method is acceptable. To avoid untimely payments, applicants should discuss arrangements (including bank closing schedules and other specific bank wire transfer requirements, such as an in-person written request before a specified time of day) with their bankers several days before they plan to make the wire transfer, and must allow sufficient time for the transfer to be initiated and completed before the deadline. Wire transfer information is specified in the Making Upfront Payments by Wire Transfer section of the *Auction 111 Procedures Public Notice.*

100. To meet the upfront payment deadline, an applicant's payment must be credited to the Commission's account for Auction 111 before the deadline.

101. Each applicant is responsible for ensuring timely submission of its upfront payment and for timely filing of an accurate and complete FCC Form 159. An applicant should coordinate with its financial institution well ahead of the due date regarding its wire transfer and allow sufficient time for the transfer to be initiated and completed prior to the deadline. The Commission repeatedly has cautioned auction participants about the importance of planning ahead to prepare for unforeseen last-minute difficulties in making payments by wire transfer. Each applicant also is responsible for obtaining confirmation from its financial institution that its wire transfer to the U.S. Treasury was successful and from Commission staff that its upfront payment was timely received and that it was deposited into the proper account. As a regulatory requirement, the U.S. Treasury screens all payments from all financial institutions before deposits are made available to specified accounts. If wires are suspended, the U.S. Treasury may direct questions regarding any transfer to the financial institution initiating the wire. Each applicant must take care to assure that any questions directed to its financial institution(s) are addressed promptly. To receive confirmation from Commission staff, contact Scott Radcliffe of the Office of Managing Director's Revenue & Receivables Operations Group/Auctions at (202) 418–7518 or Theresa Meeks at (202) 418–2945.

102. Please note the following information regarding upfront payments: (1) All payments must be made in U.S. dollars; (2) all payments must be made by wire transfer; and (3) upfront payments for Auction 111 go to an account number different from the accounts used in previous FCC auctions.

103. Failure to deliver a sufficient upfront payment as instructed in the *Auction 111 Procedures Public Notice* by the upfront payment deadline will result in dismissal of the short-form application and disqualification from participation in the auction.

2. Completing and Submitting FCC Form 159

104. An accurate and complete FCC Form 159 (February 2003 edition) must be sent to the FCC to accompany each upfront payment. At least one hour before placing the order for the wire transfer (but on the same business day), applicants must fax a completed Form 159 to the FCC at (202) 418–2843. Alternatively, the completed form can be scanned and sent as an attachment to an email to *RROGWireFaxes@fcc.gov.* On the fax cover sheet or in the email subject header, write Wire Transfer—Auction Payment for Auction 111.

3. Upfront Payments and Bidding Eligibility

105. The Commission has delegated authority to OEA and MB to determine appropriate upfront payments for each construction permit being auctioned, taking into account such factors as the efficiency of the auction process and the potential value of similar licenses. An upfront payment is a refundable deposit

made by each applicant seeking to participate in bidding to establish its eligibility to bid on construction permits. Upfront payments that are related to the specific construction permits being auctioned protect against frivolous or insincere bidding and provide the Commission with a source of funds from which to collect payments owed at the close of bidding. In the *Auction 111 Comment Public Notice,* OEA and MB proposed an upfront payment amount for each construction permit and sought comment on the upfront payment amounts. OEA and MB received no comments regarding the upfront payment amounts for Auction 111, and OEA and MB adopted the upfront payment amounts proposed in Attachment A of the *Auction 111 Comment Public Notice.*

106. An applicant must make an upfront payment sufficient to obtain bidding eligibility on the construction permits on which it will bid. The upfront payment amount submitted by an applicant will determine its initial bidding eligibility, the maximum number of bidding units on which a bidder may place bids in any single round. In order to bid on a particular construction permit, a qualified bidder must have a current eligibility level that meets or exceeds the number of bidding units assigned to that construction permit. At a minimum, therefore, an applicant's total upfront payment must be enough to establish eligibility to bid on at least one of the construction permits selected on its FCC Form 175 for Auction 111, or else the applicant will not become qualified to participate in the auction. An applicant does not have to make an upfront payment to cover all construction permits the applicant selected on its FCC Form 175, rather only enough to cover the maximum number of bidding units that are associated with construction permits on which the applicant wishes to place bids and hold provisionally winning bids in any given round. The total upfront payment does not affect the total dollar amount the bidder may bid on any given construction permit.

107. In calculating its upfront payment amount, an applicant must determine the maximum number of bidding units on which it may wish to bid in any single round and submit an upfront payment amount for the auction covering that number of bidding units. In order to make this calculation, an applicant should add together the bidding units for all construction permits on which it seeks to be active in any given round. Applicants should check their calculations carefully, as there is no provision for increasing a bidder's eligibility after the upfront payment deadline.

108. An applicant that is a former defaulter, as described above, must pay an upfront payment 50% greater than that required of an applicant that is not a former defaulter. For purposes of this rule, defaults and delinquencies of the applicant itself and its controlling interests are included. If an applicant is a former defaulter, it must calculate its upfront payment for all of its selected construction permits by multiplying the number of bidding units on which it wishes to be active (bid on or hold provisionally winning bids on) during a given round by 1.5. In order to calculate the number of bidding units to assign to former defaulters, the Commission will divide the upfront payment received by 1.5 and round the result up to the nearest bidding unit. If an applicant fails to submit a sufficient upfront payment to establish eligibility to bid on at least one of the construction permits selected on its FCC Form 175, the applicant will not be eligible to participate in bidding in the auction. This applicant will retain its status as an applicant in Auction 111 and will remain subject to 47 CFR 1.2105(c) and 73.5002(d).

F. Auction Registration

109. All qualified bidders for Auction 111 are automatically registered for the auction. Registration materials will be distributed prior to the auction by overnight delivery. The mailing will be sent only to the contact person at the contact address listed in the FCC Form 175 and will include the SecurID® tokens that will be required to place bids, the web address and instructions for accessing and logging in to the auction bidding system, FCC assigned username (User ID) for each authorized bidder, and the Auction Bidder Line phone number.

110. Qualified bidders that do not receive this registration mailing will not be able to submit bids. Therefore, if this mailing is not received by the contact person for a qualified bidder by noon on February 15, 2022, call the Auctions Hotline at (717) 338–2868. In no event, however, will the Commission send auction registration materials to anyone other than the contact person listed on the applicant's FCC Form 175 or respond to a request for replacement registration materials from anyone other than the authorized bidder, contact person, or certifying official listed on the applicant's FCC Form 175. Receipt of this registration mailing is critical to participating in the auction, and each qualified bidder is responsible for ensuring it has received all registration materials.

111. In the event that a SecurID® token is lost or damaged, only a person who has been designated as an authorized bidder, the contact person, or the certifying official on the applicant's short-form application may request a replacement. To request a replacement, call the Auction Bidder Line at the telephone number provided in the registration materials or the Auction Hotline at (717) 338–2868.

G. Remote Electronic Bidding via the FCC Auction Bidding System

112. Bidders will be able to participate in Auction 111 over the internet using the FCC Auction Bidding System (bidding system) or by telephonic bidding. Each applicant should indicate its bidding preference—electronic or telephonic—on its FCC Form 175. Please note that telephonic bid assistants are required to use a script when entering bids placed by telephone. Telephonic bidders are therefore reminded to allow sufficient time to bid by placing their calls well in advance of the close of a round. The length of a call to place a telephonic bid may vary; please allow a minimum of 10 minutes. The toll-free telephone number for the auction bidder line will be provided to qualified bidders prior to the start of bidding in the auction.

113. Only qualified bidders are permitted to bid. Each qualified bidder will be issued three SecurID® tokens, which the Commission will provide at no charge. Each authorized bidder for a qualified bidder must have an individually assigned SecurID® token in order to access the bidding system, either by telephone or over the internet. In order to access the bidding function of the bidding system, bidders must be logged in during the bidding round using the passcode generated by the SecurID® token and a personal identification number (PIN) created by the bidder. Bidders are strongly encouraged to print a bid summary for each round after they have completed all their activity for that round. For security purposes, the SecurID® tokens, bidding system web address, FCC assigned username, and the telephonic bidding telephone number are only mailed to the contact person at the contact address listed on the FCC Form 175. Each SecurID® token is tailored to a specific auction. SecurID® tokens issued for other auctions or obtained from a source other than the FCC will not work for Auction 111. Please note that the SecurID® tokens can be recycled, and the Commission requests that bidders return the tokens to the

FCC. Pre-addressed envelopes will be provided to return the tokens once the auction has ended.

114. The Commission makes no warranties whatsoever, and shall not be deemed to have made any warranties, with respect to the FCC Auction Application System and the auction bidding system, including any implied warranties of merchantability or fitness for a particular purpose. In no event shall the Commission, or any of its officers, employees, or agents, be liable for any damages whatsoever (including, but not limited to, loss of business profits, business interruption, loss of use, loss of revenue, loss of business information, or any other direct, indirect, or consequential damages) arising out of or relating to the existence, furnishing, functioning, or use of the FCC Auction Application System or the FCC auction bidding system. Moreover, no obligation or liability will arise out of the Commission's technical, programming, or other advice or service provided in connection with the FCC auction systems.

115. To the extent an issue arises with the bidding system itself, the Commission will take all appropriate measures to resolve such issues quickly and equitably. Should an issue arise that is outside the bidding system or attributable to a bidder, including, but not limited to, a bidder's hardware, software, or internet access problem that prevents the bidder from submitting a bid prior to the end of a round, the Commission shall have no obligation to resolve or remedy such an issue on behalf of the bidder. Similarly, if an issue arises due to bidder error using the bidding system, the Commission shall have no obligation to resolve or remedy such an issue on behalf of the bidder. Accordingly, after the close of a bidding round, the results of bid processing will not be altered absent evidence of any failure in the bidding system.

H. Mock Auction

116. All qualified bidders will be eligible to participate in a mock auction on February 17, 2022. The mock auction will enable qualified bidders to become familiar with the FCC auction bidding system and to practice submitting bids prior to the auction. OEA and MB recommend that all qualified bidders, including all their authorized bidders, participate to ensure that they can log in to the bidding system and gain experience with the bidding procedures. Participating in the mock auction may reduce the likelihood of a bidder making a mistake during the auction. Details regarding the mock auction will be announced in the public notice announcing the qualified bidders for Auction 111.

117. By public notice or by announcement through the FCC auction bidding system, OEA and MB may delay, suspend, or cancel bidding in the auction in the event of natural disaster, technical obstacle, network interruption, administrative or weather necessity, evidence of an auction security breach or unlawful bidding activity, or for any other reason that affects the fair and efficient conduct of competitive bidding. In such cases, OEA and MB, in their sole discretion, may elect to resume the auction starting from the beginning of the current round or from some previous round, or cancel the auction in its entirety. OEA and MB emphasize that they will exercise this authority solely at their discretion, and not as a substitute for situations in which bidders may wish to apply their activity rule waivers.

I. Environmental Review Requirements

118. Permittees or licensees must comply with the Commission's rules for environmental review under the National Environmental Policy Act, the National Historic Preservation Act, and other federal environmental statutes. The construction of a broadcast facility is a federal action, and the permittee or licensee must comply with the Commission's environmental rules for each such facility. These environmental rules require, among other things, that the permittee or licensee consult with expert agencies having environmental responsibilities, including the U.S. Fish and Wildlife Service, the State Historic Preservation Office, the U.S. Army Corps of Engineers, and the Federal Emergency Management Agency (through the local authority with jurisdiction over floodplains). In assessing the effect of facility construction on historic properties, the permittee or licensee must follow the provisions of the FCC's Nationwide Programmatic Agreement Regarding the Section 106 National Historic Preservation Act Review Process. The permittee or licensee must prepare environmental assessments for any facility that may have a significant impact in or on wilderness areas, wildlife preserves, threatened or endangered species, or designated critical habitats, historical or archaeological sites, Indian religious sites, floodplains, and surface features. In addition, the permittee or licensee must prepare environmental assessments for facilities that include high intensity white lights in residential neighborhoods or excessive radio frequency emission.

IV. Bidding

119. The first round of bidding for Auction 111 will begin on February 23, 2022. The initial bidding schedule will be announced in a public notice listing the qualified bidders, which is released at least one week before the start of bidding in the auction.

A. Auction Structure

1. Simultaneous Multiple Round Auction

120. All construction permits listed in Attachment A to the *Auction 111 Procedures Public Notice* will be auctioned in a single auction using a simultaneous multiple-round auction format. This type of auction offers every construction permit for bid at the same time and consists of successive bidding rounds in which qualified bidders may place bids on individual construction permits. Unless otherwise announced, bids will be accepted on all construction permits in each round of the auction until bidding stops on every construction permit.

2. FCC Auction Bidding System

121. All bidding will take place remotely either through the FCC auction bidding system or by telephonic bidding. Please note that telephonic bid assistants are required to use a script when entering bids placed by telephone. Telephonic bidders are therefore reminded to allow sufficient time to bid by placing their calls well in advance of the close of a round. The length of a call to place a telephonic bid may vary; please allow a minimum of ten minutes.

122. An Auction 111 bidder's ability to bid on specific construction permits is determined by two factors: (1) The construction permits selected by that applicant in its FCC Form 175 and (2) the bidder's bidding eligibility measured in bidding units. The FCC auction bidding system will allow bidders to submit bids on only those construction permits the bidder selected on its FCC Form 175.

123. In order to access the bidding function of the FCC auction bidding system, bidders must be logged in during a bidding round using the passcode generated by the SecurID® token and a PIN created by the bidder. Bidders are strongly encouraged to print a round summary for each round after they have completed all of their activity for that round.

3. Round Structure

124. The initial schedule of bidding rounds will be announced in the public

notice listing the qualified bidders in the auction. Each bidding round is followed by the release of round results. Multiple bidding rounds may be conducted each day.

125. OEA and MB retain the discretion to adjust the bidding schedule in order to foster an auction pace that reasonably balances speed with the bidders' need to study round results and adjust their bidding strategies. OEA and MB may change the amount of time for bidding rounds, the amount of time between rounds, or the number of rounds per day, depending upon bidding activity and other factors.

4. Eligibility and Activity Rules

126. The amount of the upfront payment submitted by a bidder will determine its initial bidding eligibility in terms of bidding units. A bidder's bidding eligibility is the maximum number of bidding units on which a bidder may be active (bid or hold provisionally winning bids) in a given round. In Auction 111, each construction permit is assigned a specific number of bidding units as listed in Attachment A to the *Auction 111 Procedures Public Notice.* Bidding units assigned to each construction permit do not change as prices rise during the auction. Upfront payments are not attributed to specific construction permits. Rather, a bidder may place bids on any of the construction permits selected on its FCC Form 175 as long as the total number of bidding units associated with those construction permits does not exceed the bidder's current eligibility.

127. Eligibility cannot be increased during the auction; it can only remain the same or decrease. Thus, in calculating its upfront payment amount, an applicant must determine the maximum number of bidding units on which it may wish to bid or hold provisionally winning bids in any single round, and submit an upfront payment amount covering that total number of bidding units. At a minimum, an applicant's upfront payment must cover the bidding units for at least one of the construction permits it selected on its short-form application. The total upfront payment does not affect the total dollar amount a bidder may bid on any given construction permit.

128. To ensure that an auction closes within a reasonable period of time, an activity rule requires bidders to bid actively throughout the auction, rather than wait until late in the auction before participating. A bidder in Auction 111 will be required to be active on 100% of its current bidding eligibility during each round of the auction. A bidder's activity level in a round is the sum of the bidding units associated with construction permits covered by the bidder's new bids in the current round and provisionally winning bids from the previous round. That is, a bidder must either place a bid or be a provisionally winning bidder during each round of the auction. Failure to maintain the requisite activity level will result in the use of an activity rule waiver, if any remain, or a reduction in the bidder's eligibility, possibly curtailing or eliminating the bidder's ability to place bids in subsequent rounds of the auction.

5. Activity Rule Waivers

129. Each bidder in the auction will have three activity rule waivers, which are principally a mechanism for a bidder to avoid the loss of bidding eligibility in the event that exigent circumstances prevent it from bidding in a particular round. Use of an activity rule waiver preserves the bidder's eligibility despite its activity in the current round being below the required minimum activity level. An activity rule waiver applies to an entire round of bidding and not to a particular construction permit. A bidder may use an activity rule waiver in any round of the auction as long as the bidder has not used all of its waivers.

130. The FCC auction bidding system will assume that a bidder that does not meet the activity requirement would prefer to use an activity rule waiver (if available) rather than lose bidding eligibility. Therefore, the system will automatically apply a waiver at the end of any bidding round in which a bidder's activity level is below the minimum required unless (1) the bidder has no activity rule waiver remaining, or (2) the bidder overrides the automatic application of a waiver by reducing eligibility, therefore meeting the activity requirement. If the bidder has no waivers remaining and does not satisfy the required activity level, the bidder's current eligibility will be permanently reduced, possibly curtailing or eliminating the ability to place additional bids in the auction.

131. A bidder with insufficient activity may wish to reduce its bidding eligibility rather than use an activity rule waiver. If so, the bidder must affirmatively override the automatic waiver mechanism during the bidding round by using the reduce eligibility function in the FCC auction bidding system. In this case, the bidder's eligibility will be permanently reduced to bring it into compliance with the activity rule described above. Reducing eligibility is an irreversible action once the round has closed, and a bidder cannot regain its lost bidding eligibility.

132. Finally, a bidder may apply an activity rule waiver proactively as a means to keep the auction open without placing a bid. If a bidder proactively applies an activity rule waiver (using the proactive waiver function in the FCC auction bidding system) during a bidding round in which no bids are placed, the auction will remain open and the bidder's eligibility will be preserved. An automatic waiver applied by the FCC auction bidding system in a round in which there is no new bid or a proactive waiver will not keep the auction open.

6. Stopping Rule

133. For Auction 111, OEA and MB will employ a simultaneous stopping rule approach, which means all construction permits remain available for bidding until bidding stops on every construction permit. Specifically, bidding will close on all construction permits after the first round in which no bidder submits a new bid or applies a proactive waiver.

134. In certain circumstances, OEA and MB may employ the alternative versions of the simultaneous stopping rule listed below for Auction 111, for example, where the auction is proceeding unusually slowly or quickly, there is minimal overall bidding activity, or it appears likely that the auction will not close within a reasonable period of time or will close prematurely. Before exercising these options, OEA and MB are likely to attempt to change the pace of the auction. For example, OEA and MB may adjust the pace of bidding by changing the number of bidding rounds per day and/or the minimum acceptable bids. OEA and MB retain the discretion to exercise any of these options with or without prior announcement during the auction:

Option 1. The auction would close for all construction permits after the first round in which no bidder applies a proactive waiver or places a new bid on any construction permit on which it is not the provisionally winning bidder. Thus, absent any other bidding activity, a bidder placing a new bid on a construction permit for which it is the provisionally winning bidder would not keep the auction open under this modified stopping rule.

Option 2. The auction would close for all construction permits after the first round in which no bidder applies a waiver or places any new bid on any construction permit that already has a provisionally winning bid. Thus, absent any other bidding activity, a bidder

placing a new bid on an FCC-held construction permit (a construction permit that does not have a provisionally winning bid) would not keep the auction open under this modified stopping rule.

Option 3. The auction would close using a modified version of the simultaneous stopping rule that combines Option 1 and Option 2 above.

Option 4. The auction would close after a specified number of additional rounds (special stopping rule) to be announced in advance in the FCC auction bidding system. If OEA and MB invokes this special stopping rule, it will accept bids in the specified final round(s), after which the auction will close.

Option 5. The auction would remain open even if no bidder places a new bid or applies a waiver. In this event, the effect will be the same as if a bidder had applied a waiver. Thus, the activity rule will apply as usual, and a bidder with insufficient activity will either lose bidding eligibility or use a waiver.

B. Bidding Procedures

1. Minimum Opening Bids and Acceptable Bid Amounts

135. Section 309(j) of the Communications Act of 1934 calls upon the Commission to prescribe methods by which a reasonable reserve price will be required or a minimum opening bid established when applications for FCC licenses or construction permits are subject to auction (*i.e.,* because they are mutually exclusive), unless the Commission determines that a reserve price or minimum opening bid is not in the public interest. Consistent with this mandate, the Commission directed the Bureaus to seek comment on the use of a minimum opening bid and/or reserve price prior to the start of each auction. Among other factors, OEA and MB must consider the amount of spectrum being auctioned, levels of incumbency, the availability of technology to provide service, the size of the geographic service areas, the extent of interference with other spectrum bands, and any other relevant factors that could have an impact on the spectrum being auctioned.

136. For Auction 111, there will be no reserve prices for specific construction permits listed in Attachment A to the *Auction 111 Procedures Public Notice* that are different from minimum opening bid amounts. This is consistent with previous broadcast spectrum auctions.

137. In the *Auction 111 Comment Public Notice,* OEA and MB sought comment on specifically proposed minimum opening amounts for each construction permit listed in Attachment A to the *Auction 111 Procedures Public Notice,* reasoning that a minimum opening bid, which has been used in other broadcast auctions, is an effective tool for accelerating the competitive bidding process. Specifically, a minimum opening bid was proposed for each construction permit by taking into account various factors relating to the efficiency of the auction and the potential value of the spectrum, including the type of service and class of facility offered, market size, population covered by the proposed broadcast facility, industry cash flow data, and recent broadcast transactions.

138. OEA and MB received no comments on the proposed minimum opening bids, and therefore they adopted the minimum opening bid amounts proposed in the *Auction 111 Comment Public Notice.* The specific minimum opening bid amounts for each of the construction permits are specified in Attachment A to the *Auction 111 Procedures Public Notice.*

139. In each round, a qualified bidder will be able to place a bid on a given construction permit in any of up to nine different amounts. The FCC auction bidding system interface will list the nine acceptable bid amounts for each construction permit.

140. To calculate the first of the acceptable bid amounts, OEA and MB will use a minimum acceptable bid increment percentage of 10%. This means that the minimum acceptable bid amount for a construction permit will be approximately 10% greater than the provisionally winning bid amount for the construction permit. To calculate the eight additional acceptable bid amounts, OEA and MB will use an additional bid increment percentage of 5%.

141. In Auction 111, the minimum acceptable bid amount for a construction permit will be equal to its minimum opening bid amount until there is a provisionally winning bid for the construction permit. After there is a provisionally winning bid for a construction permit, the minimum acceptable bid amount will be calculated by multiplying the provisionally winning bid amount by one plus the minimum acceptable bid percentage—*i.e.,* provisionally winning bid amount * 1.10, rounded. Under the Commission's standard rounding procedure for auctions, results above $10,000 are rounded to the nearest $1,000; results below $10,000 but above $1,000 are rounded to the nearest $100; and results below $1000 are rounded to the nearest $10.

142. In Auction 111, the FCC auction bidding system will calculate the eight additional bid amounts by multiplying the minimum acceptable bid amount by the additional bid increment percentage of 5%, and that result (rounded) is the additional increment amount. The first additional acceptable bid amount equals the minimum acceptable bid amount plus the additional increment amount. The second additional acceptable bid amount equals the minimum acceptable bid amount plus two times the additional increment amount; the third additional acceptable bid amount is the minimum acceptable bid amount plus three times the additional increment amount; etc. Because the additional bid increment percentage is 5%, the calculation of the additional increment amount is (minimum acceptable bid amount) * (0.05), rounded. The first additional acceptable bid amount equals (minimum acceptable bid amount) + (additional increment amount); the second additional acceptable bid amount equals (minimum acceptable bid amount) + (2*(additional increment amount)); the third additional acceptable bid amount equals (minimum acceptable bid amount) + (3*(additional increment amount)); etc.

143. OEA and MB retain the discretion to change the minimum acceptable bid amounts, the minimum acceptable bid increment percentage, the additional bid increment percentage, and the number of acceptable bid amounts if it determines that circumstances so dictate, consistent with past practice. OEA and MB also retain the discretion to do so on a construction permit-by-construction permit basis. OEA and MB also retain the discretion to limit (a) the amount by which a minimum acceptable bid for a construction permit may increase compared with the corresponding provisionally winning bid, and (b) the amount by which an additional bid amount may increase compared with the immediately preceding acceptable bid amount. For example, OEA and MB could set a $1,000 limit on increases in minimum acceptable bid amounts over provisionally winning bids. Thus, if calculating a minimum acceptable bid using the minimum acceptable bid increment percentage results in a minimum acceptable bid amount that is $1,200 higher than the provisionally winning bid on a construction permit, the minimum acceptable bid amount would instead be capped at $1,000 above the provisionally winning bid. OEA and MB typically exercise this discretion based on its monitoring of ongoing bidding. If OEA and MB

exercise this discretion, they will alert bidders by announcement in the FCC auction bidding system during the auction.

2. Provisionally Winning Bids

144. Consistent with practice in past auctions, the FCC auction bidding system at the end of each bidding round will determine a provisionally winning bid for each construction permit based on the highest bid amount received for that permit. A provisionally winning bid will remain the provisionally winning bid until there is a higher bid on the same construction permit at the close of a subsequent round. Provisionally winning bids at the end of the auction become the winning bids.

145. OEA and MB will use a pseudo-random number generator to select a single provisionally winning bid if identical high bid amounts are submitted on a construction permit in a given round (*i.e.,* tied bids). The FCC auction bidding system will assign a pseudo-random number to each bid upon submission. The tied bid with the highest pseudo-random number wins the tiebreaker and becomes the provisionally winning bid. The remaining bidders, as well as the provisionally winning bidder, can submit higher bids in subsequent rounds. However, if the auction were to close with no other bids being placed, the winning bidder would be the one that placed the provisionally winning bid. If the construction permit receives any bids in a subsequent round, the provisionally winning bid again will be determined by the highest bid amount received for the construction permit.

146. As a reminder, provisionally winning bids count toward activity for purposes of the activity rule.

3. Bid Removal and Bid Withdrawal

147. Each qualified bidder has the option of removing any bids placed in a round provided that such bids are removed before the close of that bidding round. By removing a bid within a round, a bidder effectively ''unsubmits'' the bid. A bidder removing a bid placed in the same round is not subject to withdrawal payments. Removing a bid will affect a bidder's activity because a removed bid no longer counts toward bidding activity for the round. Once a round closes, a bidder may no longer remove a bid.

148. In recognition of the site-specific nature and wide geographic dispersion of the permits available in this auction, as well as its experience with past auctions of broadcast construction permits, qualified bidders are prohibited from withdrawing any bid after close of the round in which that bid was placed. Bidders are cautioned to select bid amounts carefully because no bid withdrawals will be allowed, even if a bid was mistakenly or erroneously made.

4. Bidding Results

149. Bids placed during a round will not be made public until the conclusion of that round. After a round closes, OEA and MB will compile reports of all bids placed, current provisionally winning bids, new minimum acceptable bid amounts for the following round, whether the construction permit is FCC-held, and bidder eligibility status (bidding eligibility and activity rule waiver), and post the reports for public access.

5. Auction Announcements

150. Commission staff will use auction announcements to report necessary information, such as schedule changes, to bidders. All auction announcements will be available by clicking a link in the FCC auction bidding system.

V. Post-Auction Procedures

151. The public notice announcing the close of the bidding and auction results will be released shortly after bidding has ended in Auction 111. That public notice will also establish the deadlines for submitting down payments, final payments, and amendments to long-form applications.

A. Down Payments

152. The Commission's rules provide that, unless otherwise specified by public notice, within ten business days after the release of the auction closing public notice for Auction 111, each winning bidder must submit sufficient funds (in addition to its upfront payment) to bring its total amount of money on deposit with the Commission to 20% of the net amount of its winning bids (less any bidding credits, if applicable).

B. Final Payments

153. Each winning bidder will be required to submit the balance of the net amount for each of its winning bids within 10 business days after the deadline for submitting down payments.

C. Winning Bidder Amendments to Long-Form Applications

154. Because each party eligible to apply for Auction 111 has already filed an application for a new or modified LPTV/translator station (FCC Form 2100, Schedule C (Schedule for a Construction Permit for a LPTV or TV Translator Broadcast Station) of FCC Form 2100 (Application for Media Bureau Video Service Authorization)), a winning bidder will not be required to submit a separate long-form application following close of bidding in Auction 111, but instead will be required to submit a minor amendment to its previously filed LPTV/Translator station application by a deadline to be determined after the close of the auction. Amendments must be filed electronically in the Media Bureau's Licensing and Management System (LMS) available at *https://enterprise efiling.fcc.gov/dataentry/login.html*. Winning bidders' applications, as amended, will be placed on public notice, triggering the appropriate period for the filing of petitions to deny. A winning bidder claiming new entrant status must include an exhibit demonstrating its eligibility for the bidding credit. Further instructions will be provided to winning bidders in the auction closing public notice.

D. Default and Disqualification

155. Any winning bidder that defaults or is disqualified after the close of an auction (*i.e.,* fails to remit the required down payment by the specified deadline, fails to submit a timely long-form application, fails to make a full and timely final payment, or is otherwise disqualified) is liable for default payments as described in 47 CFR 1.2104(g)(2). A default payment consists of a deficiency payment, equal to the difference between the amount of the bidder's winning bid and the amount of the winning bid the next time a construction permit covering the same spectrum is won in an auction, plus an additional payment equal to a percentage of the defaulter's bid or of the subsequent winning bid, whichever is less.

156. The percentage of the applicable bid to be assessed as an additional payment for defaults in a particular auction is established in advance of the auction. The additional default payment for Auction 111 is 20% of the applicable bid.

157. Finally, in the event of a default, the Commission has the discretion to re-auction the construction permit or offer it to the next highest bidder (in descending order) at its final bid amount. In addition, if a default or disqualification involves gross misconduct, misrepresentation, or bad faith by an applicant, then the Commission may declare the applicant and its principals ineligible to bid in future auctions and may take any other action that it deems necessary, including institution of proceedings to

revoke any existing authorizations held by the applicant.

E. Refund of Remaining Upfront Payment Balance

158. All refunds of upfront payment balances will be returned to the payer of record as identified on the FCC Form 159 unless the payer submits written authorization instructing otherwise.

159. This written authorization must comply with the refund instructions provided in the *Auction 111 Procedures Public Notice*.

160. The refund request must be submitted by fax to the Revenue & Receivables Operations Group/Auctions at (202) 418–2843, or by email to *RROGWireFaxes@fcc.gov*.

VI. Procedural Matters

A. Paperwork Reduction Act

161. The Office of Management and Budget (OMB) has approved the information collections in the Application to Participate in an FCC Auction, FCC Form 175. The *Auction 111 Procedures Public Notice* does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. Therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198.

B. Congressional Review Act

162. The Commission has determined, and Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, concurs, that these rules are ''non-major'' under the Congressional Review Act, 5 U.S.C. 804(2). The Commission will send a copy of the *Auction 111 Procedures Public Notice* in a report to Congress and the Government Accountability Office pursuant to the Congressional Review Act, 5 U.S.C. 801(a)(1)(A).

C. Supplemental Final Regulatory Flexibility Analysis

163. As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Commission prepared Initial Regulatory Flexibility Analyses (IRFAs) in connection with the *Broadcast Competitive Bidding Notice of Proposed Rulemaking* (NPRM), 62 FR 65392, December 12, 1997, and other Commission NPRMs (collectively, *Competitive Bidding NPRMs*) pursuant to which Auction 111 will be conducted. Final Regulatory Flexibility Analyses (FRFAs) likewise were prepared in the *Broadcast Competitive Bidding Order,* 63 FR 48615, September 11, 1998, and other Commission rulemaking orders (collectively, *Competitive Bidding Orders*) pursuant to which Auction 111 will be conducted. In this proceeding, a Supplemental Initial Regulatory Flexibility Analysis (Supplemental IRFA) was incorporated in the *Auction 111 Comment Public Notice.* The Commission sought written public comment on the proposals in the *Auction 111 Comment Public Notice,* including comments on the Supplemental IRFA. The Supplemental Final Regulatory Flexibility Analysis (Supplemental FRFA) supplements the FRFAs in the *Competitive Bidding Orders* to reflect the actions taken in the *Auction 111 Procedures Public Notice* and conforms to the RFA.

164. *Need for, and Objectives of, the Public Notice.* The procedures for the conduct of Auction 111 as described in the *Auction 111 Procedures Public Notice* implement the Commission's competitive bidding rules, which have been adopted by the Commission in multiple notice-and-comment rulemaking proceedings. More specifically, the *Auction 111 Procedures Public Notice* provides an overview of the procedures, terms, and conditions governing Auction 111, and the post-auction application and payment processes, as well as setting the minimum opening bid amount for each of the LPTV/translator station construction permits that are subject to being assigned by competitive bidding.

165. To promote the efficient and fair administration of the competitive bidding process for all Auction 111 participants, including small businesses, in the *Auction 111 Procedures Public Notice,* OEA and MB announce the following procedures: (1) Use of a simultaneous multiple-round auction format, consisting of sequential bidding rounds with a simultaneous stopping procedure (with discretion to exercise alternative stopping rules under certain circumstances); (2) a specific upfront payment amount for each construction permit; (3) a specific minimum opening bid amount for each construction permit; (4) a specific number of bidding units for each construction permit; (5) a bidder's initial bidding eligibility will be based on the amount of that bidder's upfront payment; (6) use of an activity requirement in which a bidder is required to be active on 100% of its bidding eligibility in each round of the auction so that bidders must bid actively during the auction rather than waiting until late in the auction before participating; (7) provision of three activity waivers for each qualified bidder to allow it to preserve bidding eligibility during the course of the auction; (8) use of minimum acceptable bid amounts and additional acceptable increments, along with the methodology for calculating such amounts; (9) a procedure for breaking ties if identical high bid amounts are submitted on one permit in a given round; (10) a prohibition on bid withdrawals while allowing for bid removals (before the close of a bidding round); (11) establishment of an additional default payment percentage of 20% of the applicable bid in the event that a winning bidder defaults or is disqualified after the auction; (12) retention by OEA and MB to exercise discretion to delay, suspend, or cancel bidding in Auction 111 for any reason that affects the ability of the competitive bidding process to be conducted fairly and efficiently; and (13) retention of discretion by OEA to adjust the bidding schedule in order to manage the pace of Auction 111.

166. *Summary of Significant Issues Raised by Public Comments in Response to the IRFA.* There were no comments filed that specifically addressed the procedures and policies proposed in the Supplemental IRFA.

167. *Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration.* Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comment filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA), and to provide a detailed statement of any change made to the proposed procedures as a result of those comments. The Chief Counsel did not file any comments in response to the procedures that were proposed in the *Auction 111 Comment Public Notice*.

168. *Description and Estimate of the Number of Small Entities to Which the Procedures Will Apply.* The RFA directs agencies to provide a description of and, where feasible, an estimate of the number of small entities that may be affected by the rules adopted herein. The RFA generally defines the term small entity as having the same meaning as the terms small business, small organization, and small governmental jurisdiction. In addition, the term small business has the same meaning as the term small business concern under the Small Business Act. A small business concern is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation;

and (3) satisfies any additional criteria established by the SBA.

169. The specific competitive bidding procedures and minimum opening bid amounts described in the *Auction 111 Procedures Public Notice* will affect all applicants participating in Auction 111, in which applicant eligibility is closed. Therefore, the specific competitive bidding procedures and minimum opening bid amounts described in the *Auction 111 Comment Public Notice* will affect only the 24 parties listed in Attachment A to the *Auction 111 Procedures Public Notice* and that are the only parties eligible to complete the remaining steps to become qualified to bid in Auction 111. These specific 24 Auction 111 parties include firms of all sizes.

170. *Television Broadcasting.* This Economic Census category comprises establishments primarily engaged in broadcasting images together with sound. These establishments operate television broadcast studios and facilities for the programming and transmission of programs to the public. These establishments also produce or transmit visual programming to affiliated broadcast television stations, which in turn broadcast the programs to the public on a predetermined schedule. Programming may originate in their own studio, from an affiliated network, or from external sources. The SBA has created the following small business size standard for such businesses: those having $41.5 million or less in annual receipts. The 2012 Economic Census reports that 751 firms in this category operated that entire year. Of that number, 656 had annual receipts of $25,000,000 or less, and 25 had annual receipts between $25,000,000 and $49,999,999. Based on this data OEA and MB therefore estimate that the majority of commercial television broadcasters are small entities under the applicable SBA size standard.

171. Additionally, the Commission has estimated the number of licensed commercial television stations to be 1,374. Of this total, 1,269 stations (or about 92.5%) had revenues of $41.5 million or less, according to Commission staff review of the BIA Kelsey Inc. Media Access Pro Television Database (BIA) on April 20, 2021, and therefore these stations qualify as small entities under the SBA definition.

172. In addition, the Commission has estimated the number of licensed noncommercial educational (NCE) television stations to be 384. These stations are non-profit, and therefore considered to be small entities.

173. There are also 2,371 LPTV stations, including Class A stations, and 3,306 TV translators. Given the nature of these services, OEA and MB presume that all of these entities qualify as small entities under the SBA small business size standard.

174. OEA and MB note, however, that the SBA size standard data does not enable them to make a meaningful estimate of the number of small entities that may participate in Auction 111.

175. In assessing whether a business entity qualifies as small under the SBA definition, business control affiliations must be included. The estimate therefore likely overstates the number of small entities that might be affected by this auction because the revenue figures on which this estimate is based does not include or aggregate revenues from affiliated companies. Moreover, the definition of small business also requires that an entity not be dominant in its field of operation and that the entity be independently owned and operated. The estimate of small businesses to which Auction 111 competitive bidding rules may apply does not exclude any television station from the definition of a small business on these bases and is therefore over-inclusive to that extent. Furthermore, OEA and MB are unable at this time to define or quantify the criteria that would establish whether a specific LPTV station or TV translator is dominant in its field of operation.

176. OEA and MB also note that they are unable to accurately develop an estimate of how many of the 24 parties in this auction are small businesses based on the number of small entities that applied to participate in prior broadcast auctions, because that information is not collected from applicants for broadcast auctions in which bidding credits are not based on an applicant's size (as is the case in auctions of licenses for wireless services). OEA and MB conclude, however, that the majority of Auction 111 eligible bidders would likely meet the SBA's definition of a small business concern.

177. *Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities.* For Auction 111, no new reporting, recordkeeping, or other compliance requirements for small entities or other auction applicants were proposed. The Commission designed the auction application process itself to minimize reporting and compliance requirements for applicants, including small business applicants. For all spectrum auctions, in the first part of the Commission's two-phased auction application process, parties desiring to participate in an auction file streamlined, short-form applications in which they certify under penalty of perjury as to their qualifications. Eligibility to participate in bidding is based on an applicant's short-form application and certifications, as well as its upfront payment. In the second phase of the auction application process, there are additional compliance requirements for winning bidders. Thus, a small business that fails to become a winning bidder does not need to provide the additional showings and more detailed demonstrations required of a winning bidder.

178. Auction 111 applicants, including small entities, will become qualified to bid in Auction 111 only if they comply with the following: (1) Submission of a short-form application that is timely and is found to be substantially complete, and (2) timely submission of a sufficient upfront payment for at least one of the construction permits that the applicant selected on its FCC Form 175. In accordance with the terms of 47 CFR 1.2105(b)(2), an applicant whose application is found to contain deficiencies will have a limited opportunity to bring its application into compliance with the Commission's competitive bidding rules during a resubmission window. In addition, each Auction 111 applicant must maintain the accuracy of its previously filed short-form application electronically using the FCC Auction Application System.

179. In the second phase of the process, there are additional compliance requirements only applicable to winning bidders. As with other winning bidders, any small entity that is a winning bidder will be required to comply with the terms of the following rules, among others: (1) 47 CFR 1.2107(b), by submitting as a down payment within 10 business days after release of the auction closing public notice sufficient funds (in addition to its upfront payment) to bring its total amount of money on deposit with the Commission for Auction 111 to 20% of the amount of its winning bid or bids; (2) 47 CFR 1.2109(a), by submitting within 10 business days after the down payment deadline the balance of the amount for each of its winning bids; and (3) 47 CFR 73.5005(a), by electronically filing an amended long-form application and required exhibits for each construction permit won through Auction 111.

180. Further, as required by 47 CFR 1.2105(c), reports concerning prohibited communications must be filed with the Chief of the Auctions Division, as

detailed in the *Auction 111 Procedures Public Notice.*

181. *Steps Taken to Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered.* The RFA requires an agency to describe any significant, specifically small business, alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rule for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.

182. OEA and MB intend that the procedures adopted in the *Auction 111 Procedures Public Notice* to facilitate participation in Auction 111 will result in both operational and administrative cost savings for small entities and other auction participants. In light of the numerous resources that will be available from the Commission to small entities and other auction participants at no cost, the processes and procedures announced in the *Auction 111 Procedures Public Notice* should minimize any economic impact of the auction processes and procedures on small entities and should result in both operational and administrative cost savings for small entities and other auction participants. For example, prior to the beginning of bidding in this auction, the Commission will hold a mock auction to allow qualified bidders the opportunity to familiarize themselves with both the processes and systems that will be used in Auction 111. During the auction, participants will be able to access and participate in bidding via the internet using a web-based system, or telephonically, providing two cost-effective methods of participation and avoiding the cost of travel for in-person participation. Further, small entities as well as other auction participants will be able to avail themselves of a telephone hotline for assistance with auction processes and procedures as well as a technical support telephone hotline to assist with issues such as access to or navigation within the electronic FCC Form 175 and use of the FCC's auction bidding system. In addition, all auction participants, including small business entities, will have access to various other sources of information and databases through the Commission that will aid in both their understanding and participation in the process. These mechanisms are made available to facilitate participation by all qualified bidders and may result in significant cost savings for small business entities that utilize these mechanisms. These resources, coupled with the description and communication of the bidding procedures before bidding begins in Auction 111, should ensure that the auction will be administered predictably, efficiently and fairly, thus providing certainty for small entities as well as other auction participants.

183. *Notice to SBA.* The Commission will send a copy of the *Auctions 111 Procedures Public Notice,* including the Supplemental FRFA, to the Chief Counsel for Advocacy of the SBA.

Federal Communications Commission.

William Huber,

Associate Chief, Auctions Division, Office of Economics and Analytics.

[CG Docket Nos. 03–123 and 10–51; DA 20–219; FR ID 50873]

Structure and Practices of the Video Relay Services Program; Correction

AGENCY: Federal Communications Commission.

ACTION: Correcting amendments.

SUMMARY: An amendment to the rules of the Federal Communications Commission (Commission) published in the **Federal Register** on July 7, 2021. The document inadvertently removed the incorporation by reference for the Request for Comments (RFC) 6351, xCard; vCard XML Representation and inadvertently retained the incorpation by reference for the Interoperabilty Profile for Relay User Equipment. This document corrects the regulation.

DATES: Effective on October 5, 2021

FOR FURTHER INFORMATION CONTACT: Michael Scott, Consumer and Governmental Affairs Bureau, at (202) 418–1264, or email *Michael.Scott@fcc.gov.*

SUPPLEMENTARY INFORMATION: This document corrects 49 CFR 64.621. The final rules document published at 86 FR 35632, July 7, 2021.

List of Subjects in 47 CFR Part 64

Incorporation by reference, Individuals with disabilities, Telecommunications, Telecommunications relay services.

Federal Communications Commission.

Gregory Haledjian,

Legal Advisor, Consumer and Governmental Affairs Bureau.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission corrects 47 CFR part 64 by making the following correcting amendment:

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

■ 1. The authority citation for part 64 continues to read as follows:

Authority: 47 U.S.C. 151, 152, 154, 201, 202, 217, 218, 220, 222, 225, 226, 227, 227b, 228, 251(a), 251(e), 254(k), 262, 276, 403(b)(2)(B), (c), 616, 620, 1401–1473, unless otherwise noted; Pub. L. 115–141, Div. P, sec. 503, 132 Stat. 348, 1091.

■ 2. Amend § 64.621 by:

■ a. Removing and reserving paragraph (c)(2)(i); and

■ b. Adding paragraph (c)(2)(ii).

The revision reads as follows:

§ 64.621 Interoperability and portability.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 160426363–7275–02; RTID 0648–XB395]

Coastal Migratory Pelagic Resources of the Gulf of Mexico and Atlantic Region; 2021–2022 Commercial Quota Reduction for King Mackerel in the Run-Around Gillnet Fishery of the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; commercial quota reduction.

SUMMARY: NMFS implements an accountability measure (AM) through this temporary rule for commercial

harvest of king mackerel in the southern zone of the Gulf of Mexico (Gulf) exclusive economic zone (EEZ) using run-around gillnet gear. NMFS has determined that landings of king mackerel harvested by run-around gillnet gear in the southern zone of the Gulf EEZ exceeded the commercial annual catch limit (ACL), equivalent to the commercial quota, in the 2020–2021 fishing year. Therefore, NMFS reduces the southern zone commercial ACL for king mackerel fishing using run-around gillnet gear in the Gulf EEZ during the 2021–2022 fishing year. This commercial ACL reduction is necessary to protect the Gulf king mackerel resource.

DATES: The temporary rule is effective from 6 a.m. local time on January 18, 2022, through June 30, 2022.

FOR FURTHER INFORMATION CONTACT: Kelli O'Donnell, NMFS Southeast Regional Office, telephone: 727–824–5305, email: *kelli.odonnell@noaa.gov.*

SUPPLEMENTARY INFORMATION: The fishery for coastal migratory pelagic fish in the Gulf includes king mackerel, Spanish mackerel, and cobia, and is managed under the Fishery Management Plan for the Coastal Migratory Pelagic Resources of the Gulf of Mexico and Atlantic Region (FMP). The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils, and is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622. All weights for the Gulf migratory group of king mackerel (Gulf king mackerel) described in this temporary rule apply as either round or gutted weight.

The commercial ACL (equivalent to the commercial quota) for Gulf king mackerel is divided into separate ACLs for hook-and-line and run-around gillnet gear. The use of run-around gillnets for king mackerel is restricted to the Gulf southern zone. The Gulf southern zone includes the EEZ off Collier and Monroe Counties in south Florida. The Gulf southern zone encompasses an area of the EEZ south of a line extending due west from the boundary of Lee and Collier Counties on the Florida west coast, and south of a line extending due east from the boundary of Monroe and Miami-Dade Counties on the Florida east coast (50 CFR 622.369(a)(1)(iii)).

For the 2020–2021 fishing season, the commercial gillnet quota for Gulf king mackerel was 575,400 lb (260,997 kg). Regulations at 50 CFR 622.8(b) and 622.388(a)(1) require NMFS to close any component of the king mackerel commercial sector when its respective quota has been reached, or is projected to be reached, by filing a notification with the Office of the Federal Register. On January 28, 2021, NMFS determined that the 2020–2021 commercial gillnet quota had been reached, and closed the commercial gillnet component for the remainder of the 2020–2021 fishing year (86 FR 7815, February 2, 2021).

NMFS' most recent landings data for the 2020–2021 fishing year indicate that the commercial gillnet component exceeded the 575,400-lb (260,997-kg) quota by 11,920 lb (5,407 kg). The AM specified in 50 CFR 622.388(a)(1)(iii) states if commercial landings of king mackerel caught by run-around gillnet gear exceed the commercial gillnet ACL, then NMFS will reduce the commercial gillnet ACL in the following fishing year by the amount of the ACL overage.

Prior to the application of the ACL reduction, the 2021–2022 commercial gillnet ACL for Gulf king mackerel in the southern zone is 575,400 lb (260,997 kg) (50 CFR 622.384(b)(1)(iii)(B)). The fishing season for run-around gillnet gear is currently closed from July 1, 2021, through January 17, 2022, and will open at 6 a.m. on January 18, 2022. The 2021–2022 fishing year runs through June 30, 2022.

Consistent with the AM, NMFS reduces the 2021–2022 commercial gillnet quota by the amount of the 2020–2021 commercial gillnet ACL overage resulting in a run-around gillnet ACL of 563,480 lb (255,590 kg). If king mackerel commercial gillnet landings do not exceed the adjusted ACL in the 2021–2022 fishing year, then in the 2022–2023 fishing year, the component's commercial quota will again be 575,400 lb (260,997 kg) as specified in 50 CFR 622.384(b)(1)(iii)(B).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 622.8(b) and 622.388(a)(1)(iii), which were issued pursuant to section 304(b), and is exempt from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, because prior notice and opportunity for public comment on this temporary rule is unnecessary. Such procedure is unnecessary because the rule that implemented the commercial ACL and the associated AM for the commercial ACL reduction has already been subject to public notice and comment, and all that remains is to notify the public of the commercial ACL reduction.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 30, 2021.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2021–21719 Filed 9–30–21; 4:15 pm]

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 140818679–5356–02; RTID 0648–XB465]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Reopening of the Red Snapper Recreational For-Hire Fishing Season in the Gulf of Mexico

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; reopening.

SUMMARY: NMFS is temporarily reopening the recreational fishing season for the Federal charter vessel/headboat (for-hire) component for red snapper in the exclusive economic zone (EEZ) of the Gulf of Mexico (Gulf) through this temporary rule. The most recent landings data for the red snapper for-hire component in the Gulf indicates the component annual catch target (ACT) for the 2021 fishing year has not yet been reached. The red snapper recreational for-hire component in the Gulf EEZ will reopen for 22 days to allow harvest of the remaining for-hire component ACT. NMFS intends this action to increase benefits to for-hire fisherman while protecting the Gulf red snapper resource by continuing to constrain harvest to the component quota.

DATES: This temporary rule is effective from 12:01 a.m., local time, on October 15, 2021, through 12:01 a.m., local time, on November 6, 2021.

FOR FURTHER INFORMATION CONTACT: Daniel Luers, NMFS Southeast Regional Office, telephone: 727–551–5719, email: *daniel.luers@noaa.gov.*

SUPPLEMENTARY INFORMATION: The Gulf reef fish fishery, which includes red snapper, is managed under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The FMP was prepared by the Gulf of

Mexico Fishery Management Council and is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

The final rule implementing Amendment 40 to the FMP established two components within the recreational sector fishing for Gulf red snapper: The private angling component, and the Federal for-hire component (80 FR 22422, April 22, 2015). Amendment 40 also allocated the red snapper recreational ACL (recreational quota) between the components and established separate seasonal closures for the two components. The Federal for-hire component's red snapper annual catch target (ACT) is 9 percent below the for-hire component quota (85 FR 9684, February 20, 2020; 50 CFR 622.41(q)(2)(iii)(B)). The measures in Amendment 40 were subsequently extended indefinitely through Amendment 45 to the FMP (81 FR 86971; December 2, 2016).

The red snapper for-hire component seasonal closure is projected from the component ACT. Projecting the for-hire component's seasonal closure using the ACT reduces the likelihood of the harvest exceeding the component quota and the total recreational quota.

All weights described in this temporary rule are in round weight.

The Federal for-hire component 2021 ACT for red snapper in the Gulf EEZ is 2.848 million lb (1.292 million kg) (50 CFR 622.41(q)(2)(iii)(B)).

The 2021 Federal Gulf red snapper for-hire fishing season was previously determined to be 63 days based on NMFS' projection of the date landings were expected to reach the component ACT. For details about the calculation of the projection for 2021, see *https://www.fisheries.noaa.gov/southeast/sustainable-fisheries/gulf-mexico-recreational-red-snapper-management.* NMFS previously announced in the **Federal Register** that the 2021 recreational season for the Federal for-hire component would begin at 12:01 a.m., local time, on June 1, 2021, and close at 12:01 a.m., local time, on August 3, 2021 (86 FR 15430; March 23, 2021).

However, the most recent landings data for the Gulf red snapper for-hire component plus projected landings for data that is not yet available indicate that approximately 670,113 lb (303,958 kg) of the for-hire component ACT remains. NMFS projects that this amount of the remaining ACT will be harvested in 22 days.

Therefore, in accordance with 50 CFR 622.8(c), NMFS reopens the Gulf red snapper Federal for-hire component for 22 days to allow the component ACT to be harvested. The recreational season for the Federal for-hire component will reopen at 12:01 a.m., local time, on October 15, 2021, and close at 12:01 a.m., local time, on November 6, 2021. When the for-hire component closes again on November 6, 2021, the bag and possession limits for red snapper for Federal for-hire vessels are zero. When the Federal for-hire component is closed, these bag and possession limits apply in the Gulf on board a vessel for which a valid Federal for-hire permit for Gulf reef fish has been issued, without regard to where such species were harvested, *i.e.,* in state or Federal waters. In addition, a person aboard a vessel that has been issued a charter vessel/headboat permit for Gulf reef fish any time during the fishing year may not harvest or possess red snapper in or from the Gulf EEZ when the Federal charter vessel/headboat component is closed.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is taken under 50 CFR 622.8(c), which was issued pursuant to section 304(b) of the Magnuson-Stevens Act, and is exempt from review under Executive Order 12866, and other applicable laws.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment is unnecessary and contrary to the public interest.

Such procedures are unnecessary because the regulation at 50 CFR 622.8(c) has already has already been subject to notice and public comment, and all that remains is to notify the public that additional harvest is available under the established Federal for-hire component ACT, and therefore, the Federal for-hire component for Gulf red snapper will reopen. Such procedures are contrary to the public interest because many for-hire operations book trips for clients in advance and require as much notice as NMFS is able to provide to adjust their business plans to account for the reopening of the fishing season. Additionally, a reopening of the component in October instead of later in the fishing year is preferable because it may reduce the likelihood of encountering inclement weather that generally occurs with greater frequency later in the fishing year.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 30, 2021.

[Docket No. 180117042–8884–02]

RTID 0648–XB483

Atlantic Highly Migratory Species; Atlantic Bluefin Tuna Fisheries

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; quota transfer.

SUMMARY: NMFS is transferring 140 metric tons (mt) of Atlantic bluefin tuna (BFT) quota from the Reserve category to the General category. This action is intended to provide further opportunities for General category fishermen to participate in the October through November General category fishery, based on consideration of the regulatory determination criteria regarding inseason adjustments. This action would affect Atlantic Tunas General category (commercial) permitted vessels and Highly Migratory Species (HMS) Charter/Headboat permitted vessels with a commercial sale endorsement when fishing commercially for BFT.

DATES: Effective October 4, 2021, through November 30, 2021.

FOR FURTHER INFORMATION CONTACT: Larry Redd, Jr., 301–427–8503, Nicholas Velseboer, 978–281–9260, or Lauren Latchford, 301–427–8503.

SUPPLEMENTARY INFORMATION: Atlantic HMS fisheries, including BFT fisheries, are managed under the authority of the Atlantic Tunas Convention Act (ATCA; 16 U.S.C. 971 *et seq.*) and the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*). The 2006 Consolidated Atlantic HMS Fishery Management Plan (FMP) and its amendments are implemented by regulations at 50 CFR part 635. Section 635.27 divides the U.S. BFT quota recommended by the International Commission for the Conservation of Atlantic Tunas (ICCAT) and as implemented by the United States among the various domestic

fishing categories, per the allocations established in the 2006 Consolidated HMS FMP and its amendments. NMFS is required under the Magnuson-Stevens Act to provide U.S. fishing vessels with a reasonable opportunity to harvest quotas under relevant international fishery agreements such as the ICCAT Convention, which is implemented domestically pursuant to ATCA.

The baseline General and Reserve category quotas are 555.7 mt and 29.5 mt, respectively. The General category baseline subquota for the October through November time-period is 72.2 mt. Under the regulations, any unused General category quota rolls forward from one time-period to the next and is available for use in subsequent time-periods. To date for 2021, NMFS has published several actions that adjusted the Reserve category quota (86 FR 8717, February 9, 2021; 86 FR 43420, August 9, 2021; 86 FR 51016, September 14, 2021). NMFS recently also recently adjusted the Reserve category quota using the allowable underharvest from 2020 to 2021. The current adjusted Reserve category quota is 151.5 mt.

Transfer of 140 mt From the Reserve Category to the General Category

Under § 635.27(a)(9), NMFS has the authority to transfer quota among fishing categories or subcategories after considering determination criteria provided under § 635.27(a)(8). NMFS has considered all of the relevant determination criteria and their applicability to this inseason quota transfer. These considerations include, but are not limited to, the following:

Regarding the usefulness of information obtained from catches in the particular category for biological sampling and monitoring of the status of the stock (§ 635.27(a)(8)(i)), biological samples collected from BFT landed by General category fishermen and provided by tuna dealers provide NMFS with valuable parts and data for ongoing scientific studies of BFT age and growth, migration, and reproductive status. Additional opportunity to land BFT in the General category would support the continued collection of a broad range of data for these studies and for stock monitoring purposes.

NMFS also considered the catches of the General category quota to date (including during the summer/fall and winter fisheries in the last several years) and the likelihood of closure of that segment of the fishery if no adjustment is made (§ 635.27(a)(8)(ii) and (ix)). The General category October through November time-period subquota has not yet been exceeded, but without a quota transfer at this time, NMFS would likely need to close the General category fishery shortly, and participants would have to stop BFT fishing activities while commercial-sized BFT remain available in the areas where General category permitted vessels operate at this time of year. Transferring 140 mt of quota from the Reserve category for the October through November 2021 subquota time-period would provide limited additional opportunities to harvest the U.S. BFT quota while avoiding exceeding it. NMFS also took into consideration a recently published final rule that would set restricted-fishing days for the General category during the months of September through November 2021 (86 FR 43421, August 9, 2021). That rule would further increase the likelihood that the fishery would remain open throughout the subperiod and year.

Regarding the projected ability of the vessels fishing under the General category quota to harvest the additional amount of BFT quota transferred before the end of the fishing year (§ 635.27(a)(8)(iii)), NMFS considered General category landings over the last several years and landings to date this year. Landings are highly variable and depend on access to commercial-sized BFT and fishing conditions, among other factors, such as the restrictions that some dealers placed on their purchases of BFT from General category participants this year. In the unlikely event that any of this quota is unused by November 30, such quota will roll forward to the next subquota time period within the calendar year (*i.e.,* to the December period), and NMFS anticipates that it would be used before the end of the fishing year. Thus, this quota transfer would allow fishermen to take advantage of the availability of fish on the fishing grounds and provide a reasonable opportunity to harvest available U.S. BFT quota.

NMFS also considered the estimated amounts by which quotas for other gear categories of the BFT fishery might be exceeded (§ 635.27(a)(8)(iv)) and the ability to account for all 2021 landings and dead discards. In the last several years, total U.S. BFT landings have been below the available U.S. quota such that the United States has carried forward the maximum amount of underharvest allowed by ICCAT from one year to the next. NMFS recently took such an action to carryover the allowable 127.3 mt of underharvest from 2020 to 2021. NMFS will need to account for 2021 landings and dead discards within the adjusted U.S. quota, consistent with ICCAT recommendations, and anticipates having sufficient quota to do that.

NMFS also considered the effects of the adjustment on the BFT stock and the effects of the transfer on accomplishing the objectives of the FMP (§ 635.27(a)(8)(v) and (vi)). This transfer would be consistent with established quotas and subquotas, which are implemented consistent with ICCAT recommendations (established in Recommendation 17–06 and maintained in Recommendation 20–06), ATCA, and the objectives of the 2006 Consolidated HMS FMP and amendments. In establishing these quotas and subquotas and associated management measures, ICCAT and NMFS considered the best scientific information available, objectives for stock management and status, and effects on the stock. This quota transfer is in line with the established management measures and stock status determinations. Another principal consideration is the objective of providing opportunities to harvest the available General category quota without exceeding the annual quota, based on the objectives of the 2006 Consolidated HMS FMP and its amendments, including to achieve optimum yield on a continuing basis and to allow all permit categories a reasonable opportunity to harvest available BFT quota allocations (related to § 635.27(a)(8)(x)). Specific to the General category, this includes providing opportunities equitably across all time-periods.

Given these considerations, NMFS is transferring 140 mt of the available 151.5 mt of Reserve category quota to the General category. Therefore, NMFS adjusts the General category October through November 2021 subquota to 212.2 mt and adjusts the Reserve category quota to 11.5 mt. The General category fishery will remain open until November 30, 2021, or until the adjusted General category quota is reached, whichever comes first.

Monitoring and Reporting

NMFS will continue to monitor the BFT fishery closely. Dealers are required to submit landing reports within 24 hours of a dealer receiving BFT. Late reporting by dealers compromises NMFS' ability to timely implement actions such as quota and retention limit adjustments, as well as closures, and may result in enforcement actions. Additionally, and separate from the dealer reporting requirement, General category and HMS Charter/Headboat vessel owners are required to report the catch of all BFT retained or discarded dead within 24 hours of the landing(s) or end of each trip, by accessing *hmspermits.noaa.gov* or by using the HMS Catch Reporting app or calling

(888) 872–8862 (Monday through Friday from 8 a.m. until 4:30 p.m.).

Depending on the level of fishing effort and catch rates of BFT, NMFS may determine that additional adjustments (*e.g.,* quota adjustment, daily retention limit adjustment, or closure) are necessary to ensure available quota is not exceeded or to enhance scientific data collection from, and fishing opportunities in, all geographic areas. If needed, subsequent adjustments will be published in the **Federal Register**. In addition, fishermen may call the Atlantic Tunas Information Line at (978) 281–9260, or access *hmspermits.noaa.gov,* for updates on quota monitoring and inseason adjustments.

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act and regulations at 50 CFR part 635 and is exempt from review under Executive Order 12866.

The Assistant Administrator for NMFS (AA) finds that it is impracticable and contrary to the public interest to provide prior notice of, and an opportunity for public comment on, this action for the following reasons:

The regulations implementing the 2006 Consolidated HMS FMP and its amendments provide for inseason retention limit adjustments to respond to the unpredictable nature of BFT availability on the fishing grounds, the migratory nature of this species, and the regional variations in the BFT fishery. Affording prior notice and opportunity for public comment to implement the quota transfer for the October through November 2021 time-period is contrary to the public interest as such a delay would likely fail to prevent the closure of the General category fishery when the baseline subquota for the October through November time-period is met and the need to re-open the fishery, with attendant costs to the fishery, including administrative costs and lost fishing opportunities. The delay would preclude the fishery from harvesting BFT that are available on the fishing grounds and that might otherwise become unavailable during a delay. This action does not raise conservation and management concerns. Transferring quota from the Reserve category to the General category does not affect the overall U.S. BFT quota, and the adjustment would have a minimal risk of exceeding the ICCAT-allocated quota. NMFS notes that the public had an opportunity to comment on the underlying rulemakings that established the U.S. BFT quota and the inseason adjustment criteria. Therefore, the AA finds good cause under 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment. For these reasons, there also is good cause under 5 U.S.C. 553(d) to waive the 30-day delay in effective date.

Authority: 16 U.S.C. 971 *et seq.* and 1801 *et seq.*

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 201209–0332; RTID 0648–XB484]

Fisheries of the Northeastern United States; Atlantic Bluefish Fishery; Quota Transfers From VA to RI and NJ to MA

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification; quota transfers.

SUMMARY: NMFS announces that the Commonwealth of Virginia and the State of New Jersey are transferring a portion of their 2021 commercial bluefish quota to the State of Rhode Island and the Commonwealth of Massachusetts, respectively. These quota adjustments are necessary to comply with the Atlantic Bluefish Fishery Management Plan quota transfer provisions. This announcement informs the public of the revised commercial bluefish quotas for Virginia, Rhode Island, New Jersey, and Massachusetts.

DATES: Effective September 30, 2021, through December 31, 2021.

FOR FURTHER INFORMATION CONTACT: Laura Hansen, Fishery Management Specialist, (978) 281–9225.

SUPPLEMENTARY INFORMATION: Regulations governing the Atlantic bluefish fishery are found in 50 CFR 648.160 through 648.167. These regulations require annual specification of a commercial quota that is apportioned among the coastal states from Maine through Florida. The process to set the annual commercial quota and the percent allocated to each state is described in § 648.162, and the final 2021 allocations were published on December 16, 2020 (85 FR 81421).

The final rule implementing Amendment 1 to the Bluefish Fishery Management Plan (FMP) published in the **Federal Register** on July 26, 2000 (65 FR 45844), and provided a mechanism for transferring bluefish quota from one state to another. Two or more states, under mutual agreement and with the concurrence of the NMFS Greater Atlantic Regional Administrator, can request approval to transfer or combine bluefish commercial quota under § 648.162(e)(1)(i) through (iii). The Regional Administrator must approve any such transfer based on the criteria in § 648.162(e). In evaluating requests to transfer a quota or combine quotas, the Regional Administrator shall consider whether: The transfer or combinations would preclude the overall annual quota from being fully harvested; the transfer addresses an unforeseen variation or contingency in the fishery; and the transfer is consistent with the objectives of the FMP and the Magnuson-Stevens Act.

Virginia is transferring 20,000 lb (9,072 kg) to Rhode Island, and New Jersey is transferring 50,000 lb (22,680 kg) to Massachusetts through mutual agreement of the states. These transfers were requested to ensure that Rhode Island and Massachusetts would not exceed their 2021 state quota. The revised bluefish quotas for 2021 are: Virginia, 238,800 lb (108,318 kg); Rhode Island, 223,434 lb (101,348 kg); New Jersey, 320,082 lb (145,187 kg); and, Massachusetts, 235,904 lb (107,004 kg).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 648.162(e)(1)(i) through (iii), which was issued pursuant to section 304(b), and is exempted from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 30, 2021.

Proposed Rules

Federal Register
Vol. 86, No. 190
Tuesday, October 5, 2021

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Parts 203 and 206

[Docket No. FR–6151–A–01]

RIN 2502–AJ51

Adjustable Rate Mortgages: Transitioning From LIBOR to Alternate Indices

AGENCY: Office of Housing, HUD.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The majority of adjustable rate mortgages (ARMs) insured by the Federal Housing Administration (FHA) are based on the London Interbank Offered Rate (LIBOR), an interest rate index that is likely to become uncertain after December 31, 2021 and no longer be published after June 30, 2023. In reaction to this uncertainty, HUD has begun to transition away from LIBOR as an approved interest rate index. HUD has also approved the Secured Overnight Financing Rate (SOFR) index in some circumstances.

HUD recognizes there may be operational difficulties for mortgagees to implement the change to a new index. HUD is considering a rule that would address a Secretary-approved replacement index for existing loans and provide for a transition date consistent with the cessation of the LIBOR index. HUD is also considering replacing the LIBOR index with the SOFR interest rate index, with a compatible spread adjustment to minimize the impact of the replacement index for legacy ARMs.

DATES: Public comment due date: December 6, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this advanced notice of proposed rulemaking to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW, Room 10276, Washington, DC 20410–0500. Communications must refer to the above docket number and title. There are two methods for submitting public comments. All submissions must refer to the above docket number and title.

1. Submission of Comments by Mail. Comments may be submitted by mail to the Regulations Division, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW, Room 10276, Washington, DC 20410–0500.

2. Electronic Submission of Comments. Interested persons may submit comments electronically through the Federal eRulemaking Portal at *www.regulations.gov.* HUD strongly encourages commenters to submit comments electronically. Electronic submission of comments allows the commenter maximum time to prepare and submit a comment, ensures timely receipt by HUD, and enables HUD to make them immediately available to the public. Comments submitted electronically through the *www.regulations.gov* website can be viewed by other commenters and interested members of the public. Commenters should follow the instructions provided on that site to submit comments electronically.

Note: To receive consideration as public comments, comments must be submitted through one of the two methods specified above. Again, all submissions must refer to the docket number and title of the rule.

No Facsimile Comments. Facsimile (FAX) comments are not acceptable.

Public Inspection of Public Comments. All properly submitted comments and communications submitted to HUD will be available for public inspection and copying between 8 a.m. and 5 p.m. weekdays at the above address. Due to security measures at the HUD Headquarters building, an advance appointment to review the public comments must be scheduled by calling the Regulations Division at 202–402–3055 (this is not a toll-free number). Individuals with speech or hearing impairments may access this number via TTY by calling the Federal Information Relay Service, toll-free, at 800–877–8339. Copies of all comments submitted are available for inspection and downloading at *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Joshua J. Miller, Senior Advisor to the Deputy Assistant Secretary for Single Family Housing, Office of Housing, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410–8000; telephone number 202–402–5052 (this is not a toll-free number). Hearing- and speech-impaired persons may access this number through TTY by calling the Federal Relay Service at 800–877–8339 (this is a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background

A. Statutory Provisions

Section 251(a) of the National Housing Act (NHA) (12 U.S.C. 1715z–16(a)) authorizes HUD to insure ARMs, and provides that adjustments to the interest rate shall correspond to a specified interest rate index approved in regulations by the Secretary, which must be readily accessible to mortgagors from generally available published sources. For Home Equity Conversion Mortgages (HECM or reverse mortgages), Section 255(d) of the National Housing Act (12 U.S.C. 1715z–20(d)) authorizes FHA to insure variable rate HECMs and impose additional eligibility requirements on HECMs, which could include requirements for HECM ARMs.

B. Forward Mortgages

HUD initially provided for mortgage insurance of ARMs for single family forward mortgages under part 203 and for part 234 condominium mortgages in 1984 (49 FR 23580, June 6, 1984). As provided in the statute at this time, such mortgages had to be adjusted annually, and there was a 1 percent cap on annual adjustments and an overall cap of 5 percent above the initial interest rate over the term of the mortgage. The index initially used was the Constant Maturity Treasury (CMT) rate. Subsequent to the statutory change allowing HUD to insure ARMs for mortgages that have fixed interest rates for 3 years or more and are not subject to interest rate caps if the interest rate remains fixed for more than 3 years, HUD, in 2004, issued a rule providing mortgage insurance for forward ARMs with rates first adjustable 1 year, 3 years, 5 years, 7 years, and 10 years from the date of the mortgagor's first debt service payment (69 FR 11500, March 10, 2004, codified at 24 CFR 203.49(d)).

Under the 2004 rule, for 1-year, and 3-year, and 5-year ARMs, each adjustment provided for a cap in either direction of one percentage point from

the interest rate in effect for the period immediately preceding the adjustment. For the life of the mortgage the overall 5 percent cap remained from the initial contract rate. For 7-year and 10-year ARMs, HUD raised the per-adjustment cap to 2 percent of the rate in effect for the immediately preceding period, and the life-of-mortgage cap to 6 percent from the initial contract rate. In all cases, changes of more than these amounts could not be carried over for inclusion in an adjustment for the subsequent year. In 2005, HUD revised the regulation to allow for annual adjustments of 2 percent for, and a life-of-mortgage cap of 6 percent for 5-year ARMs in 2005 (70 FR 16080, March 29, 2005), conforming 5-year ARMs to HUD's 7-year and 10-year ARM products.

In 2007, HUD added the LIBOR, along with the CMT, as acceptable indices for ARM adjustments for its ARM products. For forward mortgages, the applicability of these indices is codified at 24 CFR 203.49. The cap on 1-year and 3-year ARMs (no more than 1 percent in either direction per single adjustment, with a 5 percent from initial contract rate cap over the life of the loan) is codified at § 203.49(f)(1). The caps for 5-year, 7-year and 10-year ARMs (2 percent in either direction per adjustment, with a six percent from initial contract rate cap for the life of the mortgage) are located at § 203.49(f)(2). HUD also created model note documents for forward mortgages, which may have varied over the years. The 2015 model note contains provisions for the substitution of an index by the note holder based on ''comparable information,'' should the index specified in the note become unavailable.

C. Reverse Mortgages or HECMs

In 1989, the Home Equity Conversion Mortgage program rule provided for capped and uncapped ARMs (54 FR 24822, June 9, 1989). For capped HECM ARMs, the rule retained the 5 percentage point life-of-mortgage limit on interest rate increases and decreases in § 203.49, but increased the annual limit on rate increases and decreases from 1 percentage point to 2 percentage points (54 FR 24825). The rule also provided for an ARM that set a maximum interest rate that could be charged without a cap on monthly or annual increases or decreases. *Id.* In 2007, in the same rule in which LIBOR was added for forward mortgages, HUD added the LIBOR as an acceptable index for HECM ARM adjustments (72 FR 40048, July 20, 2007); these changes are codified in current §§ 206.3 (definitions) and 206.21 (interest rate). HUD's model HECM notes may have varied over the years, but the 2015 version contains provisions for the substitution of a Secretary-prescribed index, should the index specified in the note become unavailable.

For the capped option at § 206.21(b)(1), the interest rate cap structure is the same as provided in forward mortgages under § 203.49(a), (b), (d), and (f), except that under § 203.49(d), the reference to first debt service payment means the date of closing in the HECM context, and under § 203.49(f)(1), the cap on adjustments for 1-year and 3-year mortgages is 2 percentage points in the HECM context. Section 206.21(b)(1)(ii) applies the LIBOR and CMT index options in the same manner as forward mortgages at § 203.49(b) for both the capped and uncapped options. In addition, the uncapped option at § 206.21(b)(2) includes options to adjust based on the one-month CMT or one-month LIBOR index. Section 206.21(b)(1)(iii) also includes ARM interest rate adjustment options for HECMs in the same manner as forward mortgages at § 203.49(d).

On March 11, 2021, in Mortgagee Letter 2021–08, HUD removed LIBOR as an approved index for new HECM ARM originations and approved the SOFR index for new annually adjusted HECM ARM originations. (As explained in that Mortgagee Letter, the changes made by the Mortgagee Letter revised the existing HECM regulations pursuant to the authority granted in the Reverse Mortgage Stabilization Act of 2013 (Pub. L. 113–29; Section 255(h)(3) of the National Housing Act (12 U.S.C. 1715z–20(h)(3)). A mortgagee may set rates using CMT or SOFR for annually adjusted HECM ARMs and CMT only for monthly adjusted HECM ARMs. Also, among other changes to the ARM requirements in the Mortgagee Letter, HUD published revised model mortgage documents with ''fallback'' language intended to address future interest rate index transition events. This language was modeled after the Alternative Reference Rates Committee's (ARRC [1]) published fallback language for residential adjustable rate mortgages.[2]

D. Phase-Out of LIBOR

The financial industry is seeking to transition from LIBOR given its increasing unreliability. The publication of US Dollar (USD) LIBOR tenors of one-month and one-year was recently extended to June 30, 2023. [3] However, the announcements included supervisory guidance encouraging banks to stop new USD LIBOR issuances by the end of 2021.[4]

As noted by the Financial Stability Oversight Council, the scarcity of underlying transactions makes LIBOR potentially unsustainable, as many banks have grown uncomfortable in providing submissions based on expert judgment and may eventually choose to stop submitting altogether. Two banks stopped submitting to USD LIBOR in 2016.[5] The relatively small number of transactions underpinning LIBOR has been driven by changing market structure, regulatory capital, and liquidity requirements as well as changes in bank risk appetite for short-term funding, creating uncertainty as to the integrity of the rate. In July of 2017, the U.K. Financial Conduct Authority (FCA), the financial regulator of LIBOR, announced that it will no longer persuade or compel contributing banks to submit rates used to calculate LIBOR after December 31, 2021, which will further heighten the uncertainty of LIBOR.[6] On November 30, 2020, the Federal Reserve Board announced that regulators had proposed clear end dates for the USD LIBOR immediately following the December 31, 2021 publication for the one week and two month USD LIBOR settings, and the June 30, 2023 publication for other USD LIBOR tenors to ease transition away from LIBOR.[7]

[1] The Alternative Reference Rates Committee (ARRC) is a group of private-market participants convened by the Federal Reserve Board and the New York Fed to help ensure a successful transition from U.S. dollar (USD) LIBOR to a more robust reference rate, its recommended alternative, the Secured Overnight Financing Rate (SOFR). The ARRC is comprised of a diverse set of private-sector entities that have an important presence in markets affected by USD LIBOR and a wide array of official-sector entities, including banking and financial sector regulators, as ex-officio members. *https://www.newyorkfed.org/arrc.*

Continued

In December 2020, the ICE Benchmark Administration Limited (IBA) announced a consultation on its intention to cease publication of certain LIBOR tenors. On March 5, 2021, the IBA published the feedback to its consultation, announcing it will cease publication of the one month and one year USD LIBOR immediately following the LIBOR publication on June 30, 2023.[8]

With the uncertainty of LIBOR and upcoming phase-out, mortgagees must prepare to select a new replacement interest rate index for existing ARM contracts. The ARRC, a group of private market participants convened by the Federal Reserve Board and the Federal Reserve Bank of New York to ensure the transition from USD LIBOR to a reliable reference rate, has recommended selection of the SOFR for use in new USD contracts.[9] SOFR is published by the Federal Reserve Bank of New York in cooperation with the Office of Financial Research, an independent bureau with the U.S. Department of the Treasury, and ''. . . is a broad measure of the cost of borrowing cash overnight collateralized by U.S. Treasury securities in the repurchase agreement (repo) market.'' [10] It is anticipated that a spread-adjusted SOFR will be published to minimize the impact of the transition on legacy ARMs and other LIBOR-based contracts.

According to the ARRC, ''SOFR is suitable to be used across a broad range of financial products, including but not limited to, derivatives (listed, cleared, and bilateral-OTC), and many variable rate cash products that have historically referenced LIBOR.'' [11]

II. This Advanced Notice of Proposed Rulemaking

HUD intends to issue a proposed rulemaking to remove LIBOR as an available interest rate index and provide a new available index for periodic adjustments for newly-insured forward and HECM ARMs, to recommend a replacement comparable index for existing forward mortgages, and to implement a Secretary-prescribed replacement index for existing HECMs. Upon the cessation of LIBOR, a mortgagee would be able to replace LIBOR with the spread adjusted index approved by HUD. HUD intends to propose two separate transitions: A transition to replace LIBOR for existing mortgages and a transition to remove LIBOR and approve a new index for new forward originations.

HUD recognizes that existing mortgages and new originations present different challenges. For existing mortgages, the contract (*i.e.,* loan documents) for each loan governs the terms of the loan. As long as the LIBOR index is available, mortgagees may not have flexibility under their loan contracts to substitute a new index without a modification or a new contract, depending on which FHA model note form was used. Under some existing ARM contracts, a lender may only use a substitute index when the initial index ''is no longer available.'' Once the publication of the one-month and 12-month LIBOR cease to be published, mortgagees will be able to use a replacement index and provide notice to the borrower of the replacement, in accordance with the terms of the loan documents. HUD's goal is to avoid disrupting existing loans or causing unnecessary confusion during the transition. HUD also seeks to transition to an index which will best serve the goals of HUD's forward and reverse mortgage programs. HUD intends that changes made to the existing forward mortgage program and reverse mortgage program occur simultaneously. While HUD has already made certain regulatory amendments to the HECM ARM origination requirements in Mortgagee Letter 2021–08 pursuant to the authority granted in the Reverse Mortgage Stabilization Act of 2013 (Pub. L. 113–29; NHA section 255(h)(3)(12 U.S.C. 1715z–20(h)(3)), HUD will codify those requirements in the rulemaking. Also, HUD did not address the LIBOR transition for legacy HECM contracts in Mortgagee Letter 2021–08.

HUD seeks public comment on the best method of making such a transition for legacy loans and new originations. For each of the questions asked below, and regarding any other issue, HUD is interested specifically in public comment on whether and how HUD should take a different course of action for HECM and forward mortgages. While the following lists are not exhaustive, HUD is particularly interested in comments on the following questions:

Questions Regarding Replacing LIBOR for Existing Loans

Question for Comment 1: What alternative index would be preferred and/or what alternative index would be considered ''comparable'' to LIBOR?

Question for Comment 2: Will servicing mortgagees seek to replace the interest rate index from LIBOR prior to the last one-month and twelve-month USD LIBOR publication on June 30, 2023?

Question for Comment 3: What documentation would servicing mortgagees need to modify in moving to an alternative index? Would this documentation need to be modified before or after the Transition date, or both?

Question for Comment 4: How long would servicing mortgagees need to transition technology to an alternative index?

Question for Comment 5: How long would servicing mortgagees need to transition operations to an alternative index?

Question for Comment 6: What communication plan is being considered from servicing mortgagees to borrowers and how should borrower protections be addressed for this population?

Question for Comment 7: Do servicing mortgagees have any alternate proposals to negotiating new agreements?

Question for Comment 8: If servicing mortgagees intend to replace the index for existing ARMs prior to LIBOR ceasing to be published, how long would servicing mortgagees need to negotiate new agreements with borrowers to incorporate a new interest rate including providing a revised annual total cost of the loan?

Question for Comment 9: Do industry partners anticipate any concerns over a single interest rate change date for all existing mortgages?

Question for Comment 10: What methods of communication would servicing mortgagees expect to be most beneficial in communicating with borrowers on this index change?

Question for Comment 11: What issues do servicing mortgagees anticipate regarding HECM principal limit growth resulting from an index change?

Questions Regarding Removal of LIBOR and Establishing a New Index for New Originations

Question for Comment 12: What alternative index would be preferred?

Question for Comment 13: What tenure rate(s) would be preferred for the alternative index?

Question for Comment 14: How many tenure rate(s) would be needed for the alternative index?

III. Findings and Certifications

Regulatory Review—Executive Orders 12866 and 13563

Under Executive Order 12866 (Regulatory Planning and Review), a determination must be made whether a regulatory action is significant and, therefore, subject to review by the Office of Management and Budget (OMB) in accordance with the requirements of the order. Executive Order 13563 (Improving Regulations and Regulatory Review) directs executive agencies to analyze regulations that are ''outmoded, ineffective, insufficient, or excessively burdensome, and to modify, streamline, expand, or repeal them in accordance with what has been learned.'' Executive Order 13563 also directs that, where relevant, feasible, and consistent with regulatory objectives, and to the extent permitted by law, agencies are to, ''identify and consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public.''

The current rules providing for the use of LIBOR as an index for interest rate adjustments for ARMs in HUD's forward and reverse mortgage insurance programs are becoming obsolete as LIBOR is in the process of being phased out. HUD is required by statute to approve by regulation interest rate indexes for its forward ARM products. HUD must also amend by regulation its permitted interest rate indices for HECM ARM products and permit lenders to transition from LIBOR to a replacement index for existing HECM ARMs. Therefore, this rule is necessary to avoid HUD's rules on ARMs from becoming obsolete as well as to avoid the risk of financial harm for ARM lenders, borrowers, and the larger ARM market.

This advanced notice of proposed rulemaking has been reviewed by OMB. As a result of this review, OMB determined that this advanced notice of proposed rulemaking is not significant under Executive Order 12866 and Executive Order 13563.

Environmental Review

This advanced notice of proposed rulemaking consists of ''[s]tatutorily required and/or discretionary establishment and review of interest rates, loan limits, building cost limits, prototype costs, fair market rent schedules, HUD-determined prevailing wage rates, income limits and exclusions with regard to eligibility for or calculation of HUD housing assistance or rental assistance, and similar rate and cost determinations and related external administrative or fiscal requirements or procedures which do not constitute a development decision that affects the physical condition of specific project areas or building sites.'' Accordingly, under 24 CFR 50.19(c)(6), this advanced notice of proposed rulemaking is categorically excluded from environmental review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321).

Lopa P. Kolluri,

Principal Deputy Assistant Secretary, Office of Housing—Federal Housing Administration.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 100

[Docket Number USCG–2021–0582]

RIN 1625–AA08

Notice of Proposed Rule Making; Atlantic Ocean, Key West, FL

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to establish a temporary special local regulation for the RWO Offshore World Championship on November 10, 12 and 14, 2021. This action is necessary to ensure safety of life on navigable waters on the waters of the Key West Main Ship Channel, Key West Turning Basin, and Key West Harbor Entrance in Key West, FL. This proposed rulemaking would prohibit persons and vessels from entering, transiting through, anchoring in, or remaining within the regulated area without permission from the Captain of the Port Key West or a designated representative. We invite your comments on this proposed rulemaking.

DATES: Comments and related material must be received by the Coast Guard on or before October 20, 2021.

ADDRESSES: You may submit comments identified by docket number USCG–2021–0582 using the Federal eRulemaking Portal at *https://www.regulations.gov.* See the ''Public Participation and Request for Comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions about this proposed rulemaking, call or email Ensign Vera Max, Sector Key West Waterways Management Division, Coast Guard; telephone (305) 292–8768, email *SKWWaterways@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
COTP Captain of the Port
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background, Purpose, and Legal Basis

On May 7, 2021, Race World Offshore notified the Coast Guard that it will be conducting a high speed boat race from 9:30 a.m. to 4:30 p.m. on November 10, 12, and 14, 2021. Approximately 50 participants and 200 spectator craft will attend the event, which will take place in the Atlantic Ocean, off the tip of Key West, Florida, on the waters of the Key West Main Ship Channel, Key West Turning Basin, and Key West Harbor Entrance in Key West, FL. The Captain of the Port Key West has determined the potential hazards associated with the high speed boat race would be a safety concern for the participants, participant vessels, and the general public.

The purpose of this rulemaking is to protect event participants, spectators, and vessels on the navigable waters of the Key West Main Ship Channel, Key West Turning Basin, and Key West Harbor Entrance before, during, and after the scheduled event. The Coast Guard is proposing this rulemaking under authority in 46 U.S.C. 70041.

The Coast Guard is issuing this notice of proposed rulemaking (NPRM) with a 15-day prior notice and opportunity to comment pursuant to section (b)(3) of the Administrative Procedure Act (APA) (5 U.S.C. 553). This provision authorizes an agency to publish a rule in less than 30 days before its effective date for ''good cause found and published with the rule.'' Under 5 U.S.C. 553(b)(3)(B), the Coast Guard finds that good cause exists for publishing this NPRM with a 15-day comment period because it is impracticable to provide a 30-day comment period because we must establish this safety zone by November 10, 2021. A 15-day comment period would allow the Coast Guard to provide for public notice and comment, but also update the proposed regulation soon enough that the length of the notice and comment period does not compromise safety.

III. Discussion of Proposed Rule

The COTP Key West proposes to establish a temporary special local regulation from 9:30 a.m. until 4:30 p.m. each day on November 10, 12, and 14, 2021. The proposed special local regulation would consist of two regulated areas: (1) A race and safety buffer area and (2) a spectator area. These areas would prohibit persons and vessels from entering, transiting through, anchoring in, or remaining within the race area or buffer zone and prohibits vessels from transiting at speeds that cause wake within the spectator area, unless authorized by the Captain of the Port Key West or a designated representative. The special local regulation would cover all navigable waters in the Atlantic Ocean, off the tip of Key West, Florida, on the waters of the Key West Main Ship Channel, Key West Turning Basin, and Key West Harbor Entrance. The regulatory text we are proposing appears at the end of this document.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. This NPRM has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, the NPRM has not been reviewed by the Office of Management and Budget (OMB).

This regulatory action determination is based on the location, duration, and time-of-day of the regulated area. Although persons and vessels may not enter, transit through, anchor in, or remain within the area without authorization from the COTP or a designated representative, they will be able to safely transit around the area. Moreover, the Coast Guard would issue a Broadcast Notice to Mariners via VHF–FM marine channel 16 about the area, and the rule would allow vessels to seek permission to enter the area between race heats.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the regulated area may be small entities, for the reasons stated in section IV.A above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132 (Federalism), if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please call or email the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Directive 023–01 and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule involves a temporary special local regulation for a 7 hour duration on 3 days that would prohibit entry into the race area or buffer zone, and prohibit vessels from transiting at speeds that cause wake within the spectator area. Normally such actions are categorically excluded from further review under paragraph L61 of Appendix A, Table 1 of DHS Instruction Manual 023–01–001–01, Rev. 1. A preliminary Record of Environmental Consideration supporting this determination is available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the

person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places, or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov.* If your material cannot be submitted using *https://www.regulations.gov,* call or email the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted without change to *https://www.regulations.gov* and will include any personal information you have provided. For more about privacy and the docket, visit *https://www.regulations.gov/privacyNotice.*

Documents mentioned in this NPRM as being available in the docket, and all public comments, will be in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 100

Marine safety, Navigation (water), Reporting and recordkeeping requirements, Waterways.

For the reasons discussed in the preamble, the Coast Guard is proposing to amend 33 CFR part 100 as follows:

PART 100—SAFETY OF LIFE ON NAVIGABLE WATERS

■ 1. The authority citation for part 100 continues to read as follows:

Authority: 46 U.S.C. 70041; 33 CFR 1.05–1.

■ 2. Add a temporary § 100.T799–0582 to read as follows:

§ 100.T799–0582 Special Local Regulation; RWO World Championship, Key West, FL.

(a) *Locations.* The following regulated areas are established as special local regulations. All coordinates are North American Datum 1983.

(1) *Race and Safety Buffer Area.* Waters of the Atlantic Ocean of Key West, FL that are encompassed within the following points: Starting at Point 1 in position 24°32.506′ N, 81°49.984′ W; thence southwest to Point 2 in position 24°32.455′ N, 81°49.040′ W; thence northwest to Point 3 in position 24°32.559′ N, 81°49.584′ W; thence northwest to Point 4 in position 24°32.608′ N, 81°49.628′ W; thence northwest to Point 5 in position 24°33.095′ N, 81°49.265′ W; thence northeast to Point 6 in position 24°33.518′ N, 81°48.902′ W; thence northeast to Point 7 in position 24°33.908′ N, 81°48.448′ W; thence east to Point 8 in position 24°33.898′ N, 81°48.364′ W; thence southeast back to origin.

(2) *Spectator Area.* All waters of the Atlantic Ocean in Key West, FL that are encompassed within the following points: Starting at Point 1 in position 24°33.123′ N, 81°49.290′ W; thence northeast to Point 2 in position 24°33.545′ N, 81°48.923′ W; thence east to Point 3 in position 24°33.518′ N, 81°48.902′ W thence southwest to point 4 in position 24°33.095′ N, 81°49.265′ W thence west back to origin.

(b) *Definition.* As used in this section, the term ''designated representative'' means a Coast Guard Patrol Commander, including a Coast Guard coxswain, petty officer, or other officer operating a Coast Guard vessel and a Federal, State, and local officer designated by or assisting the Captain of the Port Key West in the enforcement of the safety zone.

(c) *Regulations.*

(1) All non-participant persons and vessels, except those persons and vessels participating in the high-speed boat races, are prohibited from entering, transiting through, anchoring in, or remaining within the regulated areas described in paragraph (a) of this section unless authorized by the Captain of the Port Key West or their designated representative.

(2) All persons are prohibited from entering the water or swimming in the spectator area described in paragraph (a)(2) of this section.

(3) All vessels are prohibited from transiting at speeds that cause wake within the spectator area described in paragraph (a)(2) of this section.

(4) To seek permission to enter, contact the Captain of the Port Key West or a designated representative by telephone at (305) 433–0954, or via VHF radio on channel 16. If authorization is granted by the Captain of the Port Key West or a designated representative, all persons and vessels receiving such authorization must comply with the instructions of the Captain of the Port Key West or a designated representative

(5) The Coast Guard will provide notice of the regulated area by Broadcast Notice to Mariners and on-scene designated representatives.

(d) *Enforcement Period.* This section will be enforced from 9:30 a.m. until 4:30 p.m. each day on November 10, 12, and 14, 2021.

Dated: September 29, 2021.

A. Chamie,

Captain, U.S. Coast Guard, Captain of the Port Key West.

[FR Doc. 2021–21575 Filed 10–4–21; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF EDUCATION

34 CFR Chapter II

[ED–2021–OESE–0115]

Request for Information Regarding the Implementation of Maintenance of Equity Provisions in the American Rescue Plan Act of 2021

AGENCY: Office of Elementary and Secondary Education, U.S. Department of Education.

ACTION: Request for information.

SUMMARY: The U.S. Department of Education (Department) is requesting information in the form of written comments regarding implementation of the statutory requirements for the American Rescue Plan Elementary and Secondary School Emergency Relief (ARP ESSER) Fund, under the American Rescue Plan (ARP) Act of 2021, that each State educational agency (SEA) and each local educational agency (LEA) that receives ARP ESSER funds maintain equity. Information received through this request may be used to assist the Department in preparing further guidance, providing technical assistance, engaging in potential rulemaking, and developing other resources.

DATES: We must receive your comments on or before November 4, 2021.

ADDRESSES: Submit your response to this request for information (RFI) through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments submitted by fax or by email or those submitted after the comment period. To ensure that we do not receive

duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

Federal eRulemaking Portal: Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under ''FAQ.''

Postal Mail, Commercial Delivery, or Hand Delivery: If you mail or deliver your comments in response to the request for information, address them to U.S. Department of Education, 400 Maryland Avenue SW, Room 3W113, Washington, DC 20202. Mailed comments must be postmarked by November 4, 2021, to be accepted.

Privacy Note: The Department's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov*. Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

This is a request for information only. This RFI is not a request for proposals (RFP) or a promise to issue an RFP or a notice inviting applications. This RFI does not commit the Department to contract for any supply or service whatsoever. Further, we are not seeking proposals and will not accept unsolicited proposals. The Department will not pay for any information or administrative costs that you may incur in responding to this RFI. The documents and information submitted in response to this RFI become the property of the U.S. Government and will not be returned.

FOR FURTHER INFORMATION CONTACT: Britt Jung, U.S. Department of Education, 400 Maryland Avenue SW, Washington, DC 20202. Telephone: (202) 453–5563. Email: *ESSERF@ed.gov*.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll-free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Background: The ARP Act provides a total of nearly $122 billion via the ARP ESSER Fund to SEAs and LEAs to help schools return safely to in-person instruction; sustain the safe operation of schools; and address the social, emotional, mental health, and academic impacts of the COVID–19 pandemic on the Nation's students.

Section 2004 of the ARP Act includes maintenance of equity (MOEquity) provisions that are a condition for an SEA and LEA to receive funds under the ARP ESSER Fund. Under section 2004(b) of the ARP Act, the MOEquity provisions ensure that an SEA does not disproportionately reduce State funding in fiscal years (FYs) 2022 and 2023 for LEAs serving a large share of students from low-income families and, for the highest-poverty LEAs, does not decrease State funding below their FY 2019 level. Similarly, under section 2004(c) of the ARP Act, the MOEquity provisions ensure that each LEA safeguards its high-poverty schools from disproportionate reductions to funding and staffing.

On June 9, 2021, the Department published Frequently Asked Questions on the MOEquity requirements (which the Department updated on August 6, 2021),[1] providing detailed guidance on how each SEA and LEA can comply with the MOEquity provisions.

Since issuing the guidance, the Department has continued to engage with a wide array of stakeholders to understand the opportunities and challenges related to MOEquity implementation within the context of the coronavirus disease 2019 (COVID–19) pandemic. The Department is eager to learn from the experiences and perspectives of SEAs, LEAs, and other stakeholders. We are, therefore, issuing this RFI to invite public comment on a range of MOEquity implementation questions. At the same time, the Department is publishing elsewhere in this issue of the **Federal Register** a Notice of Proposed Requirements (NPR) that would require each SEA to make publicly available information on how each LEA in the State is maintaining fiscal and staffing equity to ensure public transparency and accountability for the implementation of the MOEquity provisions.

Invitation to Comment: The Department is committed to supporting SEAs and LEAs in implementing the ARP Act MOEquity provisions with fidelity to the law. The Department recognizes that each State's education finance system is unique and that additional guidance may be needed regarding how to apply the MOEquity requirements with fidelity in the context of specific and varied State circumstances.

To help inform its support for SEAs and LEAs in implementing the MOEquity provisions, the Department is seeking input from the public. The Department is interested in responses to the specific questions below, as well as additional information and perspectives on MOEquity implementation. Because this RFI is intended to inform further guidance and any potential rulemaking, the Department does not anticipate responding to each comment received. When responding to this RFI, please address one or more of the following questions:

1. The Department is aware that each State's K–12 education funding system is unique and that State-specific considerations may impact how an SEA implements MOEquity requirements in a manner that is both meaningful and meets the technical requirements of the ARP Act. What types of State-specific considerations (*e.g.,* funding mechanisms, definitions of revenue sources, etc.) are relevant to the implementation of the State and local MOEquity provisions? What types of barriers exist to implementing the MOEquity provisions due to the State-specific approach to education funding? How might guidance or potential rulemaking account for unique State education finance systems so that State MOEquity implementation will be consistent with the goal of maintaining equity?

2. The Department recognizes that LEAs with small enrollments may exhibit greater annual variation in per-pupil funding and other calculations based primarily on their size. How might this issue be addressed to ensure the small size of an LEA does not render year-over-year comparisons unreliable, so that State MOEquity implementation will be consistent with the goal of maintaining equity?

3. MOEquity requires comparisons of ''per-pupil funding.'' Please identify any considerations that are relevant to implementation related to enrollment data and funding sources used in determining per-pupil funding. Are there safeguards that should be considered to ensure that State-specific enrollment methodologies do not distort per-pupil funding levels (*e.g.,* the use of hold harmless provisions or rolling averages)? Since MOEquity calculations are important to inform budget allocation decisions, what data are SEAs and LEAs most likely to have available and rely on for conducting initial MOEquity calculations?

4. LEAs may be exempted from MOEquity requirements per the ARP Act based on ''exceptional or uncontrollable circumstance[s].'' What factors should the Department be aware of related to the types of exceptional or

[1] See *https://oese.ed.gov/files/2021/08/Maintenance-of-Equity-updated-FAQs_final_08.06.2021.pdf*. (Maintenance of Equity Frequently Asked Questions).

uncontrollable circumstances, both specific to FY 2022 implementation and, more generally, to ensure that such exceptions do not contradict the intent of the law and are consistent with the goal of maintaining equity?

5. The purpose of the MOEquity provisions is to ensure that schools and LEAs serving large proportions of underserved groups of students—including students from low-income families, students of color, English learners, students with disabilities, and students experiencing homelessness—receive an equitable share of State and local funds as the Nation continues to respond to the COVID–19 pandemic's impact. In light of this purpose, what other information or related issues should the Department consider to ensure that the purpose of the MOEquity provisions are achieved?

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov*. At this site you can view this document, as well as all other documents of the Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov*. Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Ian Rosenblum,

Deputy Assistant Secretary for Policy and Programs Delegated the Authority to Perform the Functions and Duties of the Assistant Secretary for Elementary and Secondary Education.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

34 CFR Chapter II

[Docket ID ED–2021–OESE–0116]

Proposed Requirement—American Rescue Plan Act Elementary and Secondary School Emergency Relief Fund

AGENCY: Office of Elementary and Secondary Education, Department of Education.

ACTION: Proposed requirement.

SUMMARY: The Department of Education (Department) proposes a requirement for the American Rescue Plan Elementary and Secondary School Emergency Relief (ARP ESSER) Fund, under the American Rescue Plan Act of 2021 (ARP Act). This requirement is intended to promote accountability and transparency and ensure that each State educational agency (SEA) and each local educational agency (LEA) meets the statutory requirement to maintain equity.

DATES: We must receive your comments on or before November 4, 2021.

ADDRESSES: Submit your comments through the Federal eRulemaking Portal or via postal mail, commercial delivery, or hand delivery. We will not accept comments submitted by fax or by email or those submitted after the comment period. To ensure that we do not receive duplicate copies, please submit your comments only once. In addition, please include the Docket ID at the top of your comments.

- *Federal eRulemaking Portal:* Go to *www.regulations.gov* to submit your comments electronically. Information on using *Regulations.gov*, including instructions for accessing agency documents, submitting comments, and viewing the docket, is available on the site under ''FAQ.''
- *Postal Mail, Commercial Delivery, or Hand Delivery:* If you mail or deliver your comments about the proposed requirement, address them to U.S. Department of Education, 400 Maryland Avenue SW, Room 3W113, Washington, DC 20202.

Privacy Note: The Department's policy is to make all comments received from members of the public available for public viewing in their entirety on the Federal eRulemaking Portal at *www.regulations.gov*. Therefore, commenters should be careful to include in their comments only information that they wish to make publicly available.

FOR FURTHER INFORMATION CONTACT: Britt Jung, U.S. Department of Education, 400 Maryland Avenue SW, Room 3W113, Washington, DC 20202. Telephone: (202) 453–5563. Email: *ESSERF@ed.gov*.

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll-free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION:

Invitation to Comment: We invite you to submit comments regarding the proposed requirement. To ensure that your comments have maximum effect in developing the requirement, we urge you to clearly identify the specific section of the proposed requirement that each comment addresses.

We invite you to assist us in complying with the specific requirements of Executive Orders 12866 and 13563 and their overall requirement of reducing regulatory burden that might result from the proposed requirement. In addition to your general comments and recommended clarifications, we seek input on (i) what demographic information (*e.g.,* poverty status, race/ethnicity, students with disabilities, and English learners) LEAs should publicly post on the schools the LEA identifies as high-poverty schools as noted in proposed requirement (a)(2) and (ii) on any further ways we could reduce potential costs or increase potential benefits while preserving the effective and efficient administration of our programs.

During and after the comment period, you may inspect all public comments about the proposed requirement by accessing *Regulations.gov*. Due to the novel coronavirus 2019 (COVID–19) pandemic, the Department buildings are currently not open to the public. However, upon reopening you may also inspect the comments in person in room 3C124, 400 Maryland Avenue SW, Washington, DC, between the hours of 8:30 a.m. and 4:00 p.m., Eastern time, Monday through Friday of each week except Federal holidays.

At the same time the Department is publishing this Notice of Proposed Requirement, it is publishing a Request For Information (RFI) to help inform its support for SEAs and LEAs in implementing the MOEquity provisions. Through the RFI, the Department is seeking input from the public with respect to specific questions as well as additional information and perspectives on MOEquity implementation.

Assistance to Individuals With Disabilities in Reviewing the Rulemaking Record: On request we will provide an appropriate accommodation or auxiliary aid to an individual with a disability who needs assistance to review the comments or other

documents in the public rulemaking record for the proposed requirement. If you want to schedule an appointment for this type of accommodation or auxiliary aid, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

Purpose of Program: The ARP ESSER Fund provides a total of nearly $122 billion to SEAs and LEAs to help them safely reopen and sustain the safe operation of schools and address the impacts of the COVID–19 pandemic on the Nation's students by addressing students' academic, social, emotional, and mental health needs. As a condition of receiving the funds, each SEA and LEA must comply with multiple requirements, including the maintenance of equity (MOEquity) requirements in section 2004 of the ARP Act.

Program Authority: ARP Act of 2021, Public Law 117–2, March 11, 2021.

Proposed Requirement: This document contains one proposed requirement.

Background

The ARP Act provides a total of nearly $122 billion via the ARP ESSER Fund to SEAs and LEAs to help schools return safely to in-person instruction; sustain the safe operation of schools; and address the academic, social, emotional, and mental health impacts of the COVID–19 pandemic on the Nation's students. Section 2004 of the ARP Act includes new MOEquity provisions that are a condition for an SEA and LEA to receive funds under the ARP ESSER Fund. Under section 2004(b) of the ARP Act, the MOEquity provisions ensure that LEAs and schools serving a large share of students from low-income backgrounds do not experience a disproportionate share of reduced funding in fiscal years (FYs) 2022 and 2023, and that, for the highest-poverty LEAs, State funding is not decreased below their FY 2019 level. In addition, the MOEquity provisions ensure that each LEA safeguards its high-poverty schools from disproportionate cuts to funding and staffing. On August 6, 2021, the Department issued a Dear Colleague Letter (DCL) to Chief State School Officers and District School Superintendents emphasizing the importance of maintaining equity and addressing specific implementation challenges for fiscal year 2022. On August 6, the Department also issued updated Frequently Asked Questions on the Maintenance of Equity Requirements (MOEquity FAQs) [1] providing detailed guidance on how each SEA and LEA can maintain equity and comply with the MOEquity provisions. In that guidance, the Department indicated that SEAs and LEAs should consider making MOEquity data publicly available.

In Appendix A to the MOEquity frequently asked questions issued in June 2021 and updated on August 6, 2021, the Department asked each SEA to report to it baseline and initial data on the State's high-need and highest-poverty LEAs, the statewide per-pupil amount of State funds provided to all LEAs in FYs 2021 and 2022 as well as the per-pupil amount provided to each high-need LEA in those years, the per-pupil amount of State funds provided to each highest-poverty LEA in FYs 2019 and 2022, and a list of the highest-poverty LEAs for which the State must maintain equity. The Department is posting these data on its website at *https://oese.ed.gov/offices/american-rescue-plan/american-rescue-plan-elementary-and-secondary-school-emergency-relief/maintenance-of-equity/* and will update the data as new data become available. These data are available to interested stakeholders and the public. The Department also intends to collect SEA-level MOEquity data through each State's annual performance report and will make those data publicly available.

Although data on State-level MOEquity will be available on the Department's website, there are not publicly available data for LEA-level MOEquity. Accordingly, in the proposed requirement, the Department addresses this need to emphasize the importance of transparency and accountability in ways that are consistent with the Department's policy goals of ensuring that schools and LEAs serving large proportions of historically underserved groups of students—including students from low-income families, students of color, English learners, students with disabilities, migratory students, and students experiencing homelessness—receive an equitable share of State and local funds as the Nation continues to recover from the impact of the COVID–19 pandemic on our education system. To support these goals, and to ensure public accountability for the implementation of the MOEquity provisions of the ARP Act, the Department proposes to require that each SEA make publicly available information on how each LEA in the State is maintaining fiscal and staffing equity. Requiring that MOEquity data be publicly available will allow parents, families, and local communities to access information on how the LEA is maintaining equity for schools with high concentrations of students from low-income families. Additionally, public posting of data and information on how each LEA in the State is maintaining equity is an important accountability tool for SEAs and the Department.

Several questions in the MOEquity FAQs on LEA-level maintenance of equity (see generally Questions 22–32) address the data an SEA would report under this proposed requirement. For example, Question 32 discusses LEAs that may be excepted under paragraph (a)(1) below from meeting the MOEquity requirements, including those LEAs that qualify as having exceptional or uncontrollable circumstances in FY 2022 due to the pandemic. (See also the August 6, 2021, DCL.) Similarly, Questions 23–25 clarify how to identify high-poverty schools under paragraph (a)(2)(i). Question 26 provides information applicable to paragraphs (a)(2)(ii) and (iii) on how the amount of per-pupil funding aligns with reporting on per-pupil expenditures under section 1111(h)(1)(C)(x) of the Elementary and Secondary Education Act of 1965. Questions 28 and 29 clarify how to determine full-time-equivalent (FTE) staff applicable to paragraphs (a)(2)(iv) and (v). Finally, Questions 27 and 30 address how to determine if an LEA has maintained equity in its high-poverty schools for paragraph (a)(2)(vi).

Proposed Requirement

(a) By December 31 of each applicable school year, an SEA must publish the following MOEquity data on its website, in a way that is machine-readable and accessible, for each LEA in the State, listed by the applicable National Center for Education Statistics LEA and school ID, in a location accessible for parents and families:

(1) Whether the LEA is exempt from MOEquity requirements under section 2004(c)(2) of the ARP Act, including but not limited to an LEA that demonstrates an exceptional or uncontrollable circumstance.

(2) If an LEA is not exempt from MOEquity requirements as detailed in paragraph (a)(1)—

(i) Which schools in the LEA are identified as high-poverty schools as defined in section 2004(d)(4) of the ARP Act and demographic information for each such school compared to the entire LEA.

[1] See *https://oese.ed.gov/files/2021/08/Maintenance-of-Equity-updated-FAQs_final_08.06.2021.pdf.*

(ii) The per-pupil amount of funding for each high-poverty school in the LEA in FYs 2021, 2022, and 2023, as applicable for the year in which the data are published.

(iii) The per-pupil amount of funding in the aggregate for all schools in the LEA in FYs 2021, 2022, and 2023, as applicable for the year in which the data are published.

(iv) The per-pupil number of FTE staff for each high-poverty school in the LEA in FYs 2021, 2022, and 2023, as applicable for the year in which the data are published, which may also be indicated as the number of students per FTE staff.

(v) The per-pupil number of FTE staff in the aggregate for all schools in the LEA in FYs 2021, 2022, and 2023, as applicable for the year in which the data are published, which may also be indicated as the number of students per FTEs.

(vi) Whether the LEA did not maintain equity for any high-poverty school in FY 2022 or 2023, as applicable for the year in which the data are published.

(b) If an LEA maintains equity by grade span, the SEA must post the LEA's data described in paragraphs (a)(2)(i)–(vi) by grade span.

(c) When reporting on each data element in paragraph (a), the SEA must ensure that the data reported are accurate and consistent with the requirements in section 2004(c) of the ARP.

Executive Orders 12866 and 13563

Regulatory Impact Analysis

Under Executive Order 12866, the Office of Management and Budget (OMB) must determine whether this regulatory action is ''significant'' and, therefore, subject to the requirements of the Executive Order and subject to review by OMB. Section 3(f) of Executive Order 12866 defines a ''significant regulatory action'' as an action likely to result in a rule that may—

(1) Have an annual effect on the economy of $100 million or more, or adversely affect a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or Tribal governments or communities in a material way (also referred to as an ''economically significant'' rule);

(2) Create serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impacts of entitlement grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles stated in the Executive Order.

This proposed regulatory action is not a significant regulatory action subject to review by OMB under section 3(f) of Executive Order 12866.

We have also reviewed this proposed regulatory action under Executive Order 13563, which supplements and explicitly reaffirms the principles, structures, and definitions governing regulatory review established in Executive Order 12866. To the extent permitted by law, Executive Order 13563 requires that an agency—

(1) Propose or adopt regulations only on a reasoned determination that their benefits justify their costs (recognizing that some benefits and costs are difficult to quantify);

(2) Tailor its regulations to impose the least burden on society, consistent with obtaining regulatory objectives and taking into account—among other things and to the extent practicable—the costs of cumulative regulations;

(3) In choosing among alternative regulatory approaches, select those approaches that maximize net benefits (including potential economic, environmental, public health and safety, and other advantages; distributive impacts; and equity);

(4) To the extent feasible, specify performance objectives, rather than the behavior or manner of compliance a regulated entity must adopt; and

(5) Identify and assess available alternatives to direct regulation, including economic incentives—such as user fees or marketable permits—to encourage the desired behavior, or provide information that enables the public to make choices.

Executive Order 13563 also requires an agency ''to use the best available techniques to quantify anticipated present and future benefits and costs as accurately as possible.'' The Office of Information and Regulatory Affairs of OMB has emphasized that these techniques may include ''identifying changing future compliance costs that might result from technological innovation or anticipated behavioral changes.''

We are issuing the proposed requirement only on a reasoned determination that its benefits would justify its costs. In choosing among alternative regulatory approaches, we selected the approach that would maximize net benefits. Based on an analysis of anticipated costs and benefits, we believe that the proposed requirement is consistent with the principles in Executive Order 13563.

We also have determined that this regulatory action does not unduly interfere with State, local, and Tribal governments in the exercise of their governmental functions.

In accordance with the Executive Orders, the Department has assessed the potential costs and benefits, both quantitative and qualitative, of this regulatory action. The potential costs are those resulting from statutory requirements and those we have determined as necessary for administering the Department's programs and activities.

Potential Costs and Benefits

The Department has analyzed the costs and benefits of complying with the proposed requirement. Due to the varying capacity and administrative structures of affected entities, we cannot estimate, with absolute precision, the likely effects of the proposed requirement. However, as discussed below, we estimate that the proposed requirement would have a net cost of $60,000 over two years.

For the purposes of these estimates, the Department assumes that, as part of their routine compliance efforts and effective administration of the affected Federal grants, States already collect and retain the relevant MOEquity data on each LEA's implementation of the MOEquity requirements and that such data are stored in a single repository (*e.g.,* a single data file including information for all of the State's LEAs). We further assume that States regularly collect and retain demographic data on schools within the State. To the extent that these assumptions are incorrect, actual costs borne by States could be higher than those outlined below.

We assume that a representative from each of the 50 States, the District of Columbia, and Puerto Rico (hereafter referred to as States) would review the final requirement. We assume that such review would take, on average, one hour per State for a one-time cost of approximately $2,800.[2]

We assume that, for each State, a management analyst would need to spend approximately eight hours, on average, compiling the relevant data and preparing it for posting. Within this estimate, we assume a management analyst would compile and incorporate

[2] The Department assumes a loaded wage rate of $53.79 per hour based on the average hourly wage rate for management analysts employed in State governments, excluding schools and hospitals (*https://www.bls.gov/oes/current/naics4_999200.htm*), which is multiplied by 1.61 to account for the employer cost for employee compensation (*https://www.bls.gov/news.release/pdf/ecec.pdf*).

demographic data into the same file as the MOEquity data, employ any necessary data suppression rules, and make any necessary formatting changes for posting of the data. We assume that posting the data online would take a network administrator ($59.09 [3] per hour) approximately 30 minutes. In total, we assume posting data would cost approximately $32,300 per year.

Finally, we assume that approximately 20 States would need to update their data after initial posting. We assume the updates would take a management analyst approximately 4 hours to complete and would require 30 minutes for a network administrator to post. In total, we assume posting corrections would cost approximately $6,500 per year.

As noted above, approximately 20 States would need to post their data twice. As such, we estimate that the proposed requirement would cost a total of approximately $60,000 over two years.

In general, we believe that the costs outlined above could be offset with funds the States have reserved under the ARP ESSER grant program. The benefit of publicly posting this local MOEQuity data is to facilitate public accountability so that parents and families will be able to access publicly available information on how each LEA in the State is maintaining fiscal and staffing equity. As such, we believe the benefit to the general public would far outweigh any burden on States.

Clarity of the Regulations

Executive Order 12866 and the Presidential memorandum ''Plain Language in Government Writing'' require each agency to write regulations that are easy to understand.

The Secretary invites comments on how to make the proposed requirement easier to understand, including answers to questions such as the following:

- Are the requirements in the proposed regulations clearly stated?
- Do the proposed regulations contain technical terms or other wording that interferes with their clarity?
- Would the proposed regulations be difficult to understand for or to explain to someone with literacy challenges or limited English proficiency?
- Does the format of the proposed regulations (grouping and order of sections, use of headings, paragraphing, etc.) aid or reduce their clarity?
- Would the proposed regulations be easier to understand if we divided them into more (but shorter) sections?
- Could the description of the proposed regulations in the **SUPPLEMENTARY INFORMATION** section of this preamble be more helpful in making the proposed regulations easier to understand? If so, how?
- What else could we do to make the proposed regulations easier to understand?

To send any comments that concern how the Department could make the proposed requirement easier to understand, see the instructions in the **ADDRESSES** section.

Intergovernmental Review: These programs are subject to Executive Order 12372 and the regulations in 34 CFR part 79. One of the objectives of the Executive order is to foster an intergovernmental partnership and a strengthened federalism. The Executive order relies on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

This document provides early notification of our specific plans and actions for these programs.

Regulatory Flexibility Act Certification

The Secretary certifies that this proposed regulatory action would not have a significant economic impact on a substantial number of small entities. The U.S. Small Business Administration Size Standards define proprietary institutions as small businesses if they are independently owned and operated, are not dominant in their field of operation, and have total annual revenue below $7,000,000. Nonprofit institutions are defined as small entities if they are independently owned and operated and not dominant in their field of operation. Public institutions are defined as small organizations if they are operated by a government overseeing a population below 50,000.

The proposed regulatory action would affect only States, none of which is a small entity for the purpose of this analysis.

Paperwork Reduction Act

As part of its continuing effort to reduce paperwork and respondent burden, the Department provides the general public and Federal agencies with an opportunity to comment on proposed and continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*). This helps ensure that the public understands the Department's collection instructions, respondents provide the requested data in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the Department can properly assess the impact of collection requirements on respondents.

The proposed requirement that an SEA must publish on its website MOEquity data for each LEA in the State contains an information collection requirement. Under the PRA, the Department has submitted this requirement to OMB for its review.

A Federal agency may not conduct or sponsor a collection of information unless OMB approves the collection under the PRA and the corresponding information collection instrument displays a currently valid OMB control number. Notwithstanding any other provision of the law, no person is required to comply with, or is subject to penalty for failure to comply with, a collection of information if the collection instrument does not display a currently valid OMB control number.

As discussed in the *Potential Costs and Benefits* section of the *Regulatory Impact Analysis,* this proposed requirement would create cost and burden hours for SEAs. In the following paragraphs, we estimate the cost and burden hours associated with complying with this proposed requirement. Differences between the estimates in the *Regulatory Impact Analysis* and this section are due to differences in calculating the net impact and annual impact of this requirement.

We assume that, for each SEA, including the District of Columbia and the Commonwealth of Puerto Rico, a management analyst, at an hourly rate of $53.79, will spend approximately 8 hours compiling the relevant data and preparing it for publication on the SEA website. At an hourly rate of $59.09, we estimate that posting the data online would take a network administrator approximately 30 minutes. We estimate that posting the MOEquity data would cost each SEA $460 and result in 8.5 burden hours annually for a total annual cost of $23,900, and 442 burden hours.

We estimate that approximately 20 States will need to update their data after initial posting. We assume the updates would take a management analyst approximately 4 hours to complete and would require 30 minutes for a network administrator to post. We estimate posting corrections will cost each SEA $240 and result in 4.5 burden hours for a total cost of $4,900, and 90 burden hours.

Collectively, we estimate that this proposed requirement would result in a

[3] The Department assumes a loaded wage rate of $59.09 per hour based on the average hourly wage rate for network and computer systems administrators employed in State governments, excluding schools and hospitals (*https://www.bls.gov/oes/current/naics4_999200.htm*), which is multiplied by two to account for overhead and benefits.

total estimated cost of $23,800 and a total estimated burden of 532 hours to the public annually.

The Department is requesting paperwork clearance on the OMB 1810–0759 data collection associated with this proposed requirement. That request will account for all burden hours and costs discussed within this section. Consistent with 5 CFR 1320.8(d), the Department is soliciting comments on the information collection through this document. We must receive your comments on the collection activities contained in this proposed requirement on or before December 6, 2021. Comments related to the information collection activities must be submitted electronically through the Federal eRulemaking Portal at *www.regulations.gov* by selecting the Docket ID number ED–2021–OESE–0116 or via postal mail, commercial delivery, or hand delivery by referencing the Docket ID number and the title of the information collection request at the top of your comment. Comments submitted by postal mail or delivery should be addressed to the PRA Coordinator of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, Room 6W208D, Washington, DC 20202–8240.

Note: The Office of Information and Regulatory Affairs and the Department review all comments related to the information collection activities posted at *www.regulations.gov*.

COLLECTION OF INFORMATION

Information collection activity	Estimated number responses	Hours per response	Total estimated burden hours	Estimated total cost
MOEquity Data Posting	52	8.5	442	$32,300
MOEquity Data Updates	20	4.5	90	6,500
Annualized Total	72	.....	532	38,800

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

BILLING CODE 4000–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2021–0408; FRL–8902–01–R9]

Clean Air Plans; Base Year Emissions Inventories for the 2015 Ozone Standards; California

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve revisions to the California State Implementation Plan (SIP) concerning the base year emissions inventories for 18 areas designated as nonattainment areas (NAAs) for the 2015 ozone National Ambient Air Quality Standards (2015 ozone NAAQS) submitted on July 24, 2020. The areas include: Amador County, Butte County, Calaveras County, Imperial County, Kern County (Eastern Kern), Los Angeles—San Bernardino Counties (West Mojave Desert), Los Angeles—South Coast Air Basin, Mariposa County, Nevada County (Western part), Riverside County (Coachella Valley), Sacramento Metro, San Francisco Bay Area, San Joaquin Valley, San Luis Obispo (Eastern part), Sutter Buttes, Tuolumne County, Tuscan Buttes, and Ventura County. We are proposing to approve these revisions under the Clean Air Act (CAA or ''the Act''), which establishes emissions inventory requirements for all ozone nonattainment areas.

DATES: Written comments must arrive on or before November 4, 2021.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R09–OAR–2021–0408 at *https://www.regulations.gov.* For comments submitted at *Regulations.gov,* follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *Regulations.gov.* The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section. For the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Khoi Nguyen, Air Planning Office (AIR–2), EPA Region IX, 75 Hawthorne Street, San Francisco, CA 94105, (415) 947–4120, or by email at *nguyen.khoi@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' refer to the EPA.

Table of Contents

I. Background

On October 26, 2015, the EPA promulgated a revised 8-hour ozone NAAQS of 0.070 parts per million (ppm).[1] In accordance with section 107(d) of the CAA, the EPA must designate an area ''nonattainment'' if it is violating the NAAQS or if it is contributing to a violation of the NAAQS in a nearby area.

The EPA designated 21 areas in California as nonattainment for the 2015 ozone NAAQS on June 4, 2018, effective August 3, 2018.[2] Amador County, Calaveras County, Butte County, Imperial County, Mariposa County, San Francisco Bay Area, San Luis Obispo (Eastern part), Sutter Buttes, Tuolumne County, and Tuscan Buttes NAAs were classified as Marginal nonattainment. Kern County (Eastern Kern), Nevada County (Western part), Sacramento Metro, and San Diego County NAAs were classified as Moderate nonattainment. The EPA classified the Ventura County NAA as Serious nonattainment. The EPA classified the Los Angeles-San Bernardino Counties (West Mojave Desert) and Riverside County (Coachella Valley) NAAs as Severe-15 nonattainment. The EPA classified the Los Angeles-South Coast Air Basin and San Joaquin Valley NAAs as Extreme nonattainment. The EPA designated the lands of the Pechanga Band of Luiseño Mission Indians of the Pechanga Reservation and the Morongo Band of Mission Indians as separate NAAs and classified them as Marginal and Serious nonattainment, respectively. The State of California does not have regulatory authority on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction.

The EPA finalized the 2015 ozone NAAQS SIP Requirements Rule (SRR) on December 6, 2018.[3] The SRR established implementation requirements for the 2015 ozone NAAQS, including requirements for ''base year'' emissions inventories under CAA section 182(a)(1). The 2015 Ozone SRR is codified at 40 CFR part 51, subpart CC, and the emissions inventory requirements are codified at 40 CFR 51.1315.

Within two years of designations, Section 182(a)(1) of the CAA and 40 CFR 51.1315 require states and local governments to prepare base year emissions inventories for all areas exceeding the ozone standards. On July 27, 2020, the California Air Resources Board (CARB) submitted the ''70 ppb Ozone SIP Submittal'' (''2020 CARB SIP Submittal'') to the EPA.[4] The 2020 CARB SIP Submittal contains a staff report with a release date of May 22, 2020, and attachments of emissions inventories that address base year inventory requirements for 18 of the 21 NAAs in California.[5] In this action, we are evaluating and proposing action on the 2020 CARB SIP Submittal.[6]

[1] 80 FR 65292 (October 26, 2015).

[2] 83 FR 25776 (June 4, 2018).

[3] ''Implementation of the 2015 National Ambient Air Quality Standards for Ozone: Nonattainment Area State Implementation Plan Requirements,'' Final Rule, 83 FR 62998 (December 6, 2018).

[4] Letter dated July 24, 2020, from Richard W. Corey, Executive Officer, CARB, to John Busterud, Regional Administrator, EPA Region IX (submitted electronically July 27, 2020).

[5] CARB's submittal does not include the San Diego NAA, which was submitted separately via the State Planning Electronic Collaboration System (SPeCS) for SIPs on January 12, 2021. The EPA will take action on the emissions inventory for the San Diego NAA in a separate rulemaking. Because the State of California does not have regulatory authority over the Pechanga and Morongo NAAs, CARB's submittal does not include emissions inventories for these areas.

[6] The 2020 CARB SIP Submittal, Section III addresses Vehicle Miles Travel (VMT) offsets for the South Coast Air Basin, San Joaquin Valley, and Coachella Valley. The EPA will take action on VMT offsets in a separate rulemaking.

II. Summary and Analysis of the State's Submittal

A. Statutory and Regulatory Requirements

1. Procedural Requirements for Adoption and Submittal of SIP Revisions

CAA sections 110(a)(1) and 110(l) and 40 CFR 51.102 require states to provide reasonable notice and an opportunity for a public hearing prior to adoption of SIP revisions. Section 110(k)(1)(B) requires the EPA to determine whether a SIP submittal is complete within 60 days of receipt. Any plan that the EPA does not affirmatively determine to be complete or incomplete will become complete six months after the day of submittal by operation of law. A finding of completeness does not approve the submittal as part of the SIP, nor does it indicate that the submittal is approvable. It does start a 12-month clock for the EPA to act on the SIP submittal (see CAA section 110(k)(2)).

2. Requirements for Base Year Inventories

CAA section 182(a)(1) and 40 CFR 51.1315 require states to develop and submit, as a SIP revision, emissions inventories for all areas designated as nonattainment for any NAAQS. An emissions inventory for ozone is an estimation of actual emissions of air pollutants that contribute to the formation of ozone in an area. Ozone is a gas that is formed by the reaction of volatile organic compounds (VOC) and oxides of nitrogen (NO_X) in the atmosphere in the presence of sunlight (VOC and NO_X are referred to as ozone precursors). Therefore, an emissions inventory for ozone focuses on the emissions of VOC and NO_X. VOC is emitted by many types of sources, including power plants, industrial sources, on-road and off-road mobile sources, smaller stationary sources collectively referred to as area sources, and biogenic sources. NO_X is primarily emitted by combustion sources, both stationary and mobile.

Emissions inventories provide emissions data for a variety of air quality planning tasks, including establishing baseline emissions levels (*i.e.,* the level of anthropogenic emissions associated with violations of the ozone standard), calculating emissions reduction targets needed to attain the NAAQS and to achieve reasonable further progress (RFP) toward attainment of the ozone standard, determining emissions inputs for ozone air quality modeling analyses, and tracking emissions over time to

determine progress toward achieving air quality and emissions reduction goals. For the 2015 ozone NAAQS, states should submit ozone season day [7] emissions estimates for an inventory calendar year to be consistent with the baseline year for the RFP plan as required by 40 CFR 51.1310(b). For the RFP baseline year for the 2015 ozone NAAQS states may use a calendar year for the most recently available complete triennial (3-year cycle) emissions inventory (40 CFR 51, subpart A) preceding the year of the area's effective date of designation as a nonattainment area.[8] States are required to submit estimates of VOC and NO_X emissions for four general classes of anthropogenic sources: Stationary point sources; area sources; on-road mobile sources; and off-road mobile sources.

B. Summary of the State's Submittal

The 2020 CARB SIP Submittal documents the public review process followed prior to its submittal to the EPA as a revision to the SIP. The submittal includes a copy of a CARB notice of public meeting on June 25, 2020 to consider the approval of the submittal,[9] a transcript from the June 25, 2020 meeting,[10] a signed resolution stating that CARB made the emissions inventories available for public review at least 30 days prior to the board hearing and that the emissions inventories were adopted after notice and public hearing,[11] and a compilation of comments received by CARB prior to and during the June 25, 2020 public meeting.[12]

CARB selected 2017 as the base year because it was the most recent calendar year for which a complete triennial inventory was required to be submitted to the EPA, and because the year is consistent with the baseline year for the reasonable further progress (RFP) plan.[13] The submitted base year emissions inventories are expressed as 2017 average ozone season day emissions in tons per day (tpd) [14] and categorized as stationary point sources, area-wide sources, on-road mobile sources, and off-road mobile sources. The 2020 CARB SIP Submittal describes methods used to estimate emissions for each category and subcategory.[15] The 2020 CARB SIP Submittal also describes how emissions were calculated for ''split regions'' not defined by CARB's county, air basin, and district boundaries,[16] and CARB's quality assurance and quality control process.[17]

Table 1 summarizes the 2017 emissions inventories in tons of emissions per ozone season day for the Amador County, Butte County, Calaveras County, Imperial County, Kern County (Eastern Kern), Los Angeles—San Bernardino Counties (West Mojave Desert), Los Angeles—South Coast Air Basin, Mariposa County, Nevada County (Western part), Riverside County (Coachella Valley), Sacramento Metro, San Francisco Bay Area, San Joaquin Valley, San Luis Obispo (Eastern part), Tuolumne County, and Ventura County NAAs for NO_X and VOC [18] emissions.[19] The 2020 CARB SIP Submittal indicated that the Sutter Buttes and Tuscan Buttes NAAs are both small, high elevation areas and contained no anthropogenic sources; therefore there are no associated emissions inventories with these two NAAs.[20]

TABLE 1—2017 AVERAGE OZONE SEASON DAY EMISSIONS INVENTORIES

[tpd]

Category	NO_X	% of total	VOC	% of total
Amador County				
Stationary Sources	2.21	59	0.88	23
Area-wide Sources	0.05	1	1.55	41

Total	12.65	100	12.19	100

[7] See 40 CFR 51.1300(q). Also see ''Emissions Inventory Guidance for Implementation of Ozone and Particulate Matter National Ambient Air Quality Standards (NAAQS) and Regional Haze Regulations,'' EPA–454/B–17–002, EPA, May 2017. The selected ozone season should be representative of the conditions leading to nonattainment.

[8] 83 FR 63034–63035 (December 6, 2018). The RFP requirements specified in CAA section 182(b)(1) apply to all areas designated nonattainment for ozone classified Moderate or higher.

[9] Notice of Public Meeting to Consider 70 Parts Per Billion Ozone State Implementation Plan Submittal, California Air Resources Board, May 22, 2020.

[10] Videoconference Meeting, State of California, Air Resources Board, CAL/EPA Headquarters, Byron Sher Auditorium, Second Floor, 1001 I Street, Sacramento, California 95814, Thursday, June 25, 2020, 9:03 a.m., James F. Peters, CSR, Certified Shorthand Reporter, License Number 10063.

[11] CARB, ''70 Parts Per Billion Ozone State Implementation Plan Submittal,'' Resolution 20–17, June 25, 2020, Agenda Item No.: 20–6–1, signed by Ryan Sakazaki, Board Clerk.

[12] Compilation of comments received for 70 Parts Per Billion Ozone State Implementation Plan Submittal. CARB indicated in its July 24, 2020 transmittal letter to the EPA that CARB has considered all comments and has determined all are non-substantive and do not pertain to the action.

[13] 2020 CARB SIP Submittal, page 9.

[14] 2020 CARB SIP Submittal, pages 5 and 9. The submittal indicates that statewide attainment challenges for the 8-hour ozone standard occur in the summer months, defined as May–October, and that seasonal inventories account for temporal activity variations throughout the year, as determined by category-specific temporal profiles.

[15] 2020 CARB SIP Submittal, pages 10–33.

[16] 2020 CARB SIP Submittal, page 9.

[17] 2020 CARB SIP Submittal, pages 9–10.

[18] The State of California refers to reactive organic gases (ROG) rather than VOC in some of its ozone-related SIP submissions. As a practical matter, ROG and VOC refer to the same set of chemical constituents, and for simplicity, we refer to this set of gases as VOC in this proposed rule.

[19] 2020 CARB SIP Submittal, pages 7–35.

[20] 2020 CARB SIP Submittal, page 6.

Source: Attachment A of 2020 CARB SIP Submittal. The sum of the emissions values may not equal the totals shown due to rounding. The table excludes biogenic emissions. Additionally, there are no anthropogenic emissions from the Sutter Buttes and Tuscan Buttes NAAs.

1. Stationary Point Source Emissions

CARB estimates stationary point source emissions based on annual reports submitted by the local air districts. The inventory reflects actual emissions from industrial point sources reported to local air districts by facility operators through calendar year 2017.[21] The local air districts are responsible for working with facility operators to compile estimates, using source testing, direct measurement, or engineering calculations. CARB estimates emissions from smaller point sources, such as gasoline dispensing facilities and residential water heaters, as a group and reports them in a single source category. CARB groups stationary point source emissions into the following categories: Fuel combustion, waste disposal, cleaning and surface coatings, petroleum production and marketing, and industrial processes.[22]

[21] 2020 CARB SIP Submittal, page 14.

[22] 2020 CARB SIP Submittal, Attachment A. Fuel combustion subcategories: Electric utilities, cogeneration, oil and gas production (combustion), manufacturing and industrial, food and agricultural processing, service and commercial, other (fuel combustion). Waste disposal subcategories: Sewage treatment, incinerators, other (waste disposal). Cleaning and surface coatings subcategories: Laundering, degreasing, coatings and related process solvents, printing, adhesives, and sealants. Petroleum productions and marketing

Continued

CARB describes the methodologies it uses for smaller point sources in Section II.B of the ''Emission Inventory Components'' summary of the 2020 CARB SIP Submittal.[23] The categories for these smaller point sources include: Stationary non-agricultural diesel engines, agricultural diesel irrigation pumps, wine fermentation and aging, laundering, degreasing, coatings and thinners, adhesives and sealants, gasoline dispensing facilities, gasoline cargo tank, marine petroleum loading, marine petroleum unloading, and oil and gas production. In addition to describing each category, CARB provides website links to additional information on each methodology. For example, while CARB reports most of the food and agricultural processing emissions sources as individual point sources, CARB estimates the exhaust emissions from agricultural irrigation pumps from a model developed by CARB staff. This category includes emissions from the operation of diesel-fueled stationary and mobile agricultural irrigation pumps.[24]

2. Area-Wide Source Emissions

CARB's area-wide source inventories include categories where emissions take place over a wide geographic area, such as consumer products, cooking, and agricultural burning. CARB groups area-wide source emissions as either solvent evaporation or miscellaneous processes.[25]

CARB describes the methodologies for each area-wide source emissions category in Section II.C of the ''Emission Inventory Components'' summary of the 2020 CARB SIP Submittal.[26] Area-wide source emissions estimates are developed by CARB staff as well as some air districts. The methodologies are reviewed by CARB and air district staff before inclusion in the emissions inventory. CARB uses various models and methodologies for estimating emissions from area-wide source categories. CARB also provides information describing the methodologies used for the following area-wide sources: Consumer products and aerosol coatings, architectural coatings, pesticides, residential wood combustion, residential natural gas combustion, residential distillate oil and liquified petroleum gas, farming operations, fires, managed burning and disposal, and commercial cooking.[27] In addition to describing each category, CARB provides website links to additional information on each methodology. A few examples are provided below.

For the consumer products emissions estimates, CARB utilized sales and formulation data from CARB's mandatory survey of all consumer products sold in California for calendar years 2013 through 2015.[28] Based on the survey data, CARB staff determined the total product sales and total VOC emissions for the various product categories. Growth for personal care products is based on real disposable personal income projections per Regional Economic Models, Inc. (REMI) version 2.3. No growth is assumed for aerosol coatings. Growth for all other personal care products is based on California Department of Finance.

The California Department of Pesticide Regulation (DPR) develops month-specific emissions estimates for agricultural and structural pesticides for CARB.[29] The DPR applies Emission Potential values from the DPR database to the amount of grower-reported pesticide application in DPR's Pesticide Use Report database.[30]

CARB uses survey data and emissions factors to estimate emissions from residential wood combustion, a subcategory of residential fuel combustion.[31] In 2011, CARB updated its methodology for residential wood combustion to include more recent survey data on residential wood burning devices and consumption rates, updates to the EPA National Emissions Inventory emissions factors and improved calculation approaches.[32] The update reflects wood combustion surveys conducted by several districts including the Bay Area Air Quality Management District (AQMD) in 2007, South Coast AQMD in 2003 and 2006, Placer County Air Pollution Control District (APCD) in 2007, San Joaquin Valley APCD in 2014, and Sacramento Metropolitan AQMD in 2007. CARB also assumes no growth for this category based on the relatively stagnant residential wood fuel use over the past decade according to the American Community Survey and United States Energy Information Administration.

3. Off-Road Mobile Source Emissions

CARB has developed category-specific models for numerous off-road (also known as ''nonroad'') sources, including locomotives, ships, industrial and construction equipment, and recreational vehicles.[33] CARB estimated emissions from off-road sources using a suite of category-specific models or, where a new model was not available, the OFFROAD2007 model. The submittal indicated that many of the newer models were developed to support recent regulations, including in-use off-road equipment, ocean-going vessels, and others. CARB provided information describing the updates made to following off-road sources: Ocean going vessels,[34] commercial harbor craft, pleasure crafts and recreational vehicles, locomotives, fuel storage and handling equipment, fuel storage and handling, diesel agricultural equipment, in-use off-road equipment (*i.e.,* construction, industrial, mining, oil drilling, and ground support equipment), cargo handling equipment, and transportation refrigeration units.[35] In addition to describing each category, CARB provides website links to additional information on each methodology. These descriptions include the type of source represented,

subcategories: Oil and gas production, petroleum marketing, other (petroleum production and marketing). Industrial processes subcategories: Food agriculture, mineral processes, metal processes, wood and paper, other (industrial processes).

[23] 2020 CARB SIP Submittal, pages 14–19.

[33] 2020 CARB SIP Submittal, pages 11–14.

[34] CARB clarified via email that the link for ocean going vessels was updated to: *https://ww3.arb.ca.gov/msei/offroad/pubs/2019_ogv_inventory_writeup_ver_oct_18_2019.pdf.* See email dated February 9, 2021, from Stephanie Huber, CARB to Khoi Nguyen, EPA Region IX.

[35] Aircrafts are also considered off-road mobile sources. In CARB's February 9, 2021 email, CARB clarified that aircraft emissions are estimated by the districts.

the types and source of data used, and the models used.

For example, CARB groups commercial harbor craft into nine vessel types, including ferry and excursion vessels, tow boats, tugboats, pilot vessels, work boats, crew and supply vessels, commercial fishing vessels, charter fishing vessels, and other.[36] Vessel and engine data were reported to CARB by vessel operators in compliance with CARB's 2007 Commercial Harbor Craft Regulation. Staff updated the crew and supply vessel emissions inventory using 2009 reporting data and developed barge and dredge vessel emissions inventory using information from a 2009 CARB survey. Vessel population data were collected from various sources, including the U.S. Coast Guard, the California Department of Fish and Wildlife registration data, the CARB Harbor Craft Survey, and information from recent emissions inventory estimates generated for Los Angeles. Vessel and engine profiles, including vessel and engine type, age, size, annual hours of operation, and annual fuel use were developed based on the CARB survey.

4. On-Road Mobile Source Emissions

CARB estimated on-road mobile emissions from cars, light and heavy-duty trucks, motorcycles, buses, and motor homes using its Emission Factors (EMFAC) model version 2017,[37] which was the latest EPA-approved version available at the time the emissions inventories were prepared.[38] The on-road emissions were calculated by applying EMFAC2017 emissions factors to the transportation activity data provided by the local metropolitan planning organizations. CARB states that EMFAC2017 includes data on California's car and truck fleets and travel activity. Light-duty motor vehicle fleet age, vehicle type, and vehicle population were based on data from the Department of Motor Vehicles (DMV), updated in 2016. The model also reflects the emissions benefits of CARB's rulemakings such as the Pavley Standards and Advanced Clean Cars Program and includes the emissions benefits from CARB's Truck and Bus Rule and previously adopted rules for other on-road diesel fleets. CARB also indicates that EMFAC2017 utilizes a socio-econometric regression modeling approach to forecast new vehicle sales and to estimate future fleet mix. Light-duty passenger vehicle population includes 2016 DMV registration data along with updates to mileage accrual using data from the Bureau of Automotive Repair Smog Check Program. Updates to heavy-duty trucks include model year specific emissions factors based on new test data, and population estimates using DMV data for in-state trucks and International Registration Plan data for out-of-state trucks.

C. The EPA's Evaluation of the State's Submittal

1. Evaluation of Procedural Requirements

Based on the documentation included in CARB's submittal, the EPA finds that the submittal satisfies the procedural requirements of sections 110(a)(1) and 110(l) of the Act requiring states to provide reasonable notice and an opportunity for public hearing prior to adoption of SIP revisions. CARB's submittal became complete by operation of law on January 24, 2021 pursuant to section 110(k)(1)(B).

2. Evaluation of Base Year Inventory Requirements

The EPA has reviewed the 2020 CARB SIP Submittal for consistency with sections 172(c)(3) and 182(a)(1) of the CAA, and the EPA's emissions inventory requirements. In particular, the EPA has reviewed the techniques used by CARB to derive and quality assure the emissions estimates.

CARB documented the procedures used to estimate the emissions for each of the major source types. The documentation of the emissions estimation procedures is adequate for the EPA to determine that CARB followed acceptable procedures to estimate emissions.

CARB has established a quality assurance and quality control (QA/QC) process to ensure the integrity and accuracy of the emissions inventories used in the development of air quality plans. These QA/QC procedures were summarized in the documentation describing how the emissions totals were developed.[39] The EPA has determined that the QA/QC procedures are complete, adequate, and acceptable.

The EPA has also reviewed the 2017 average ozone season day base year emissions inventories in the 2020 CARB SIP Submittal. Our review included the emissions estimates for stationary sources, area-wide sources, and mobile sources. We find that CARB's selection of 2017 as the base year was appropriate for these areas because 2017 was the most recent calendar year for which a consistent and comprehensive statewide inventory was available. We also find that the emissions inventories appropriately address ozone season day emissions consistent with the definition of ozone season day emissions under 40 CFR 51.1300(q). The submittal provides sufficient information and explanation to allow the EPA to make a determination on the acceptability of the emissions inventories.

The EPA proposes to find that CARB has developed approvable inventories of NO_X and VOC emissions for the following ozone nonattainment areas as required under the CAA and SRR (40 CFR 51.1315, see also CAA section 172(c)(3)): Amador County, Butte County, Calaveras County, Imperial County, Kern County (Eastern Kern), Los Angeles—San Bernardino Counties (West Mojave Desert), Los Angeles—South Coast Air Basin, Mariposa County, Nevada County (Western part), Riverside County (Coachella Valley), Sacramento Metro, San Francisco Bay Area, San Joaquin Valley, San Luis Obispo (Eastern part), Sutter Buttes, Tuolumne County, Tuscan Buttes, and Ventura County.

III. Proposed Action

We are proposing to approve the 2020 CARB SIP Submittal to address the ozone-related emissions inventory requirements for 18 ozone nonattainment areas for the 2015 ozone NAAQS. These areas are: Amador County, Butte County, Calaveras County, Imperial County, Kern County (Eastern Kern), Los Angeles—San Bernardino Counties (West Mojave Desert), Los Angeles—South Coast Air Basin, Mariposa County, Nevada County (Western part), Riverside County (Coachella Valley), Sacramento Metro, San Francisco Bay Area, San Joaquin Valley, San Luis Obispo (Eastern part), Sutter Buttes, Tuolumne County, Tuscan Buttes, and Ventura County. The emissions inventories we are approving into the SIP are specified in Table 1. We are proposing to approve the emissions inventories because they contain comprehensive, accurate, and current inventories of actual emissions for all relevant sources in accordance with CAA sections 172(c)(3) and 182(a), and because CARB adopted the emissions inventories after providing for

[36] 2020 CARB SIP Submittal, page 11. Additional information on CARB's CHC methodology is available at: *https://www.arb.ca.gov/regact/2010/chc10/appc.pdf*.

[37] EMFAC is short for EMission FACtor. In August 2019, the EPA approved EMFAC2017 for SIP development and transportation purposes in California. 84 FR 41717 (August 15, 2019). CARB provides additional information and documentation on the EMFAC2017 model, available at: *https://ww2.arb.ca.gov/our-work/programs/mobile-source-emissions-inventory/msei-road-documentation*.

[38] 2020 CARB SIP Submittal, page 10.

[39] 2020 CARB SIP Submittal, page 9.

reasonable public notice and opportunity for a public hearing.

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this proposed action merely proposes to approve state law as meeting federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address disproportionate human health or environmental effects with practical, appropriate, and legally permissible methods under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Authority: 42 U.S.C. 7401 *et seq.*

Dated: September 29, 2021.

Deborah Jordan,

Acting Regional Administrator, Region IX.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[EPA–R10–RCRA–2021–0439; FRL–8853–01–R10]

Oregon: Proposed Authorization of State Hazardous Waste Management Program Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: Oregon has applied to the Environmental Protection Agency (EPA) for final authorization of changes to its hazardous waste program under the Resource Conservation and Recovery Act (RCRA), as amended. EPA has reviewed Oregon's application, and has determined that these changes satisfy all requirements needed to qualify for authorization. Therefore, we are proposing to authorize the State's changes. EPA seeks public comment prior to taking final action.

DATES: Comments on this proposed rule must be received on or before November 4, 2021.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–R10–RCRA–2021–0439 through the *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or removed from *www.regulations.gov.* EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include all points the commenter wishes to make. EPA will generally not consider comments or comment contents located outside of the primary submissions (*i.e.,* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.* The EPA encourages electronic submittals, but if you are unable to submit electronically or need other assistance, please contact Margaret Olson, the contact listed below. Please also contact Margaret Olson if you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you.

FOR FURTHER INFORMATION CONTACT: Margaret Olson, U.S. Environmental Protection Agency, Region 10, Oregon Operations Office, 805 SW Broadway, Suite 500, Portland, Oregon 97205, phone number: (503) 326–5874, email: *olson.margaret@epa.gov*.

SUPPLEMENTARY INFORMATION:

A. Why are revisions to state programs necessary?

States that have received final authorization from EPA under RCRA section 3006(b), 42 U.S.C. 6926(b), must maintain a hazardous waste program that is equivalent to, consistent with, and no less stringent than the Federal program. As the Federal program changes, states must change their programs and ask EPA to authorize the changes. Changes to state programs may be necessary when Federal or state statutory or regulatory authority is modified or when certain other changes occur. Most commonly, states must change their programs because of changes to EPA's regulations in 40 Code of Federal Regulations (CFR) parts 124, 260 through 268, 270, 273, and 279.

New Federal requirements and prohibitions imposed by Federal regulations that EPA promulgates pursuant to the Hazardous and Solid Waste Amendments of 1984 (HSWA) take effect in authorized states at the same time that they take effect in unauthorized states. Thus, EPA will implement those requirements and prohibitions in Oregon, including the issuance of new permits implementing

those requirements, until the State is granted authorization to do so.

B. What decisions has EPA made in this rule?

On October 16, 2020, Oregon submitted a complete program revision application seeking authorization of changes to its hazardous waste program that correspond to certain Federal rules promulgated between October 22, 1998 and April 17, 2015. EPA is proposing to determine that Oregon's application to revise its authorized program meets all the statutory and regulatory requirements established by RCRA, as set forth in RCRA section 3006(b), 42 U.S.C. 6926(b), and 40 CFR part 271. Therefore, EPA proposes to grant Oregon final authorization to operate its hazardous waste program with the changes described in the authorization application, and as outlined below in Section G of this document. Oregon has responsibility for permitting Treatment, Storage, and Disposal Facilities (TSDFs) within its borders (except in Indian country) and for carrying out the aspects of the RCRA program described in its revised program application, subject to the limitations of HSWA, as discussed above.

C. What is the effect of this proposed authorization decision?

If Oregon is authorized for the changes described in Oregon's authorization application, these changes will become part of the authorized State hazardous waste program and will therefore be federally enforceable. Oregon will continue to have primary enforcement authority and responsibility for its State hazardous waste program. EPA would maintain its authorities under RCRA sections 3007, 3008, 3013, and 7003, including its authority to:

- Conduct inspections, and require monitoring, tests, analyses and reports;
- Enforce RCRA requirements, including authorized State program requirements;
- Suspend or revoke permits; and
- Take enforcement actions regardless of whether the State has taken its own actions.

This action will not impose additional requirements on the regulated community because the regulations which EPA is proposing to authorize in Oregon are already effective under state law and are not changed by today's proposed action.

D. What happens if EPA receives comments that oppose this action?

If EPA receives comments on this proposed action, we will address all such comments in a later final rule. You may not have another opportunity to comment. If you want to comment on this authorization, you should do so at this time.

E. What has Oregon previously been authorized for?

Oregon initially received final authorization on January 30, 1986, effective January 31, 1986 (51 FR 3779), to implement the RCRA hazardous waste management program. EPA granted authorization for changes to Oregon's program on March 30, 1990, effective on May 29, 1990 (55 FR 11909); August 5, 1994, effective October 4, 1994 (59 FR 39967); June 16, 1995, effective August 15, 1995 (60 FR 31642); October 10, 1995, effective December 7, 1995 (60 FR 52629); September 10, 2002, effective September 10, 2002 (67 FR 57337); June 26, 2006 effective June 26, 2006 (71 FR 36216); and January 7, 2010, effective January 7, 2010 (75 FR 918).

F. What changes are we proposing with today's action?

On October 16, 2020, Oregon submitted a final complete program revision application, seeking authorization of changes to its hazardous waste management program in accordance with 40 CFR 271.21. EPA proposes to determine, subject to receipt of written comments that oppose this action, that Oregon's hazardous waste program revisions are equivalent to, consistent with, and no less stringent than the federal program, and therefore satisfy all the requirements necessary to qualify for final authorization. Therefore, EPA is proposing to authorize Oregon for the following program changes as identified in the list below.

Description of Federal requirement and Checklist [1] No.	**Federal Register** date and page (and/or RCRA statutory authority)	Analogous state authority

[1] The Checklist is a document that addresses the specific changes made to the Federal regulations by one or more related final rules published in the **Federal Register**. The EPA develops these checklists as tools to assist states in developing their authorization application and in documenting specific state regulations analogous to the Federal regulations. For more information, see the EPA's RCRA State Authorization website at *https://www.epa.gov/rcra/state-authorization-under-resource-conservation-and-recovery-act-rcra#about*.

[2] State rule contains more stringent and/or broader in scope provisions. For identification of these provisions refer to the authorization revision application's Attorney General Statement and Checklists found in the docket for this proposed rule. Some of these provisions are discussed in Section G of this rule.

G. Where are the revised State rules different from the Federal rules?

When revised state rules differ from the Federal rules in the RCRA state authorization process, EPA determines whether the state rules are equivalent to, more stringent than, or broader in scope than the federal program. Pursuant to RCRA Section 3009, 42 U.S.C. 6929, state programs may contain requirements that are more stringent than the federal regulations. Such more stringent requirements can be federally authorized and, once authorized, become federally enforceable.

The following Oregon provisions documented in this authorization action are more stringent than the Federal program:

- Oregon is more stringent than the Federal program at OAR 340–102–0041(2) by requiring annual reporting rather than biennial reporting.
- Oregon is more stringent than the Federal program at OAR 340–102–0200(4) which requires when opting-in to Subpart K, an eligible academic entity is required to submit their completed Laboratory Management Plan as defined in 40 CFR 262.214.
- Oregon is more stringent than the Federal program at OAR 340–102–0200(2) which requires container labels be affixed or attached to the container and eliminates the possibility of these labels being associated with the wrong container.
- Oregon is more stringent than the Federal program at OAR 340–101–0004(4) and (5) by requiring containers of solvent contaminated wipes be either laundered or disposed as hazardous waste. Oregon does not allow disposal of solvent contaminated wipes in a municipal landfill or non-hazardous waste incinerator.

Although the statute does not prevent states from adopting regulations that are broader in scope than the Federal program, states cannot receive authorization for such regulations, and they are not federally enforceable. Oregon is broader in scope than the Federal program documented in this authorization action by requiring academic laboratories that opt into Subpart K to obtain an EPA identification number.

Oregon has identified regulatory language at OAR 340–100–0004(3) as broader in scope. At 40 CFR 261.4(a)(26)(i) and 261.4(b)(18)(i), EPA regulations exclude solvent-contaminated wipes from the definitions of solid waste and hazardous waste, respectively, so long as the wipes are (among other things) stored in containers labeled ''Excluded Solvent-Contaminated Wipes.'' Oregon specifies at OAR 340–100–0004(3) that such wipes may also be ''labeled with equivalent wording describing the contents of the container and recognizing the exclusion[.]'' EPA has evaluated this regulatory language and determined that it is functionally equivalent to the Federal program, so we are including it in this proposed action.

H. Who handles permits after the final authorization takes effect?

When the final authorization takes effect, Oregon will issue permits for all the provisions for which it is authorized and will administer the permits it issues. Permits issued by EPA prior to authorizing Oregon for these revisions would continue in force until the effective date of the State's issuance or denial of a State hazardous waste management permit, at which time, the EPA would modify the existing EPA permit to expire at an earlier date, terminate the existing EPA permit, or allow the existing EPA permit to otherwise expire by its terms, except for those facilities located in Indian Country. The EPA will not issue new permits or new portions of permits for provisions for which Oregon is authorized after the effective date of this authorization. The EPA will continue to implement and issue permits for HSWA

requirements for which Oregon is not yet authorized.

I. How does today's action affect Indian country (18 U.S.C. 1151) in Oregon?

Oregon is not authorized to carry out its hazardous waste program in Indian country within the State, which includes:

- All lands within the exterior boundaries of Indian reservations within or abutting the State of Oregon.
- Any land held in trust by the U.S. for an Indian tribe; and
- Any other land, whether on or off an Indian reservation, that qualifies as Indian country.

Therefore, this action has no effect on Indian country. EPA retains jurisdiction over Indian country and will continue to implement and administer the RCRA program on these lands.

J. What is codification and will EPA codify Oregon's hazardous waste program as proposed in this rule?

Codification is the process of placing citations and references to the State's statutes and regulations that comprise the State's authorized hazardous waste program into the Code of Federal Regulations. EPA does this by adding those citations and references to the authorized State rules in 40 CFR part 272. EPA is not proposing to codify the authorization of Oregon's changes at this time. However, EPA reserves the ability to amend 40 CFR part 272, subpart MM at a later date.

K. Statutory and Executive Order Reviews

The Office of Management and Budget (OMB) has exempted this action from the requirements of Executive Order 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011). This action proposes to authorize State requirements for the purpose of RCRA section 3006 and imposes no additional requirements beyond those imposed by State law. Therefore, this action is not subject to review by OMB. Accordingly, I certify that this action will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Because this action proposes to authorize pre-existing requirements under State law and does not impose any additional enforceable duty beyond that required by State law, it does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538). For the same reason, this action also does not significantly or uniquely affect the communities of tribal governments, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000). This action will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it merely proposes to authorize State requirements as part of the State RCRA hazardous waste program without altering the relationship or the distribution of power and responsibilities established by RCRA. This action also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because it is not economically significant and it does not make decisions based on environmental health or safety risks. This action is not subject to Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001), because it is not a significant regulatory action under Executive Order 12866.

Under RCRA section 3006(b), the EPA grants a state's application for authorization as long as the state meets the criteria required by RCRA. It would thus be inconsistent with applicable law for the EPA, when it reviews a state authorization application, to require the use of any particular voluntary consensus standard in place of another standard that otherwise satisfies the requirements of RCRA. Thus, the requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) do not apply. As required by section 3 of Executive Order 12988 (61 FR 4729, February 7, 1996), in proposing this rule, the EPA has taken the necessary steps to eliminate drafting errors and ambiguity, minimize potential litigation, and provide a clear legal standard for affected conduct. The EPA has complied with Executive Order 12630 (53 FR 8859, March 15, 1988) by examining the takings implications of this action in accordance with the ''Attorney General's Supplemental Guidelines for the Evaluation of Risk and Avoidance of Unanticipated Takings'' issued under the executive order. This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). ''Burden'' is defined at 5 CFR 1320.3(b). Executive Order 12898 (59 FR 7629, February 16, 1994) establishes Federal executive policy on environmental justice. Its main provision directs Federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States. Because this action proposes authorization of pre-existing State rules which are at least equivalent to, and no less stringent than existing Federal requirements, and imposes no additional requirements beyond those imposed by State law, and there are no anticipated significant adverse human health or environmental effects, this proposed rule is not subject to Executive Order 12898.

Authority: This action is issued under the authority of sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act as amended, 42 U.S.C. 6912(a), 6926, and 6974(b).

Dated: September 28, 2021.

Michelle L. Pirzadeh,

Acting Regional Administrator, Region 10.

[WC Docket No. 12–375, DA 21–1192, FRID 51251]

Third Mandatory Data Collection for Inmate Calling Services

AGENCY: Federal Communications Commission.

ACTION: Solicitation of comments.

SUMMARY: The Wireline Competition Bureau and the Office of Economics and Analytics (WCB/OEA) seek comment on the contours and specific requirements of the forthcoming Third Mandatory Data Collection for inmate calling services. WCB/OEA have drafted proposed instructions, a template, and a certification form for the Third Mandatory Data Collection. WCB/OEA seek comment on all aspects of these documents.

DATES: Comments are due November 4, 2021. Reply Comments are due November 19, 2021.

ADDRESSES: Federal Communications Commission, 45 L Street NE, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Katherine Morehead, Pricing Policy Division of the Wireline Competition Bureau, at (202) 418–0696 or via email at *katherine.morehead@fcc.gov.*

SUPPLEMENTARY INFORMATION: This is a summary of a document that the Federal Communications Commission's Wireline Competition Bureau released on September 22, 2021. A full-text version of the document is available at the following internet address: *https://docs.fcc.gov/public/attachments/DA-21-1192A1.pdf.*

I. Introduction and Background

By this document, the Wireline Competition Bureau (WCB) and the Office of Economics and Analytics (OEA) (collectively, WCB/OEA) seek comment on the contours and specific requirements of the forthcoming Third Mandatory Data Collection for inmate calling services (ICS). In 2020, the Commission sought comment on whether and how the Commission should proceed with any new data collection. The record demonstrated the need to ''collect, in a more consistent and directed manner, the data and information necessary to respond to the various criticisms in the record about the imperfections and inconsistencies in the data from the Second Mandatory Data Collection.'' In the *2021 ICS Order,* the Commission directed WCB/OEA to develop a new data collection related to providers' operations, costs, demand, and revenues. The Commission has conducted two prior mandatory data collections relating to inmate calling services in the past eight years—the 2013 First Mandatory Data Collection and the 2015 Second Mandatory Data Collection. The Commission explained that it would use the collected data to set permanent interstate and international ICS provider-related rate caps that more closely reflect providers' costs of serving correctional facilities. The Commission also emphasized that the data would enable it to evaluate and, if warranted, revise the current ancillary service charge caps.

The Commission delegated authority to WCB/OEA to implement this Third Mandatory Data Collection, including ''determining and describing the types of information required related to providers' operations, costs, demand, and revenues,'' and directed WCB/OEA to develop a template and instructions for the collection. The draft instructions and template for the Third Mandatory Data Collection are posted on the Commission's website and are located at this link: Third Mandatory Data Collection Instructions. The template consists of a Word document and Excel spreadsheets. For simplicity, WCB/OEA refer to these respective portions of the template as the Word template and the Excel template. The Commission also directed WCB/OEA to consider record suggestions regarding, among other matters, data granularity, cost allocation, and specificity in definitions and instructions in designing the data collection, and ''to require each provider to fully explain and justify each step of its costing process'' including, where appropriate, ''to specify the methodology the provider shall use in any or all of those steps.'' The Commission also directed WCB/OEA to ''incorporate lessons learned from the two prior data collections to ensure that [the Commission] collect[s], to the extent possible, uniform cost, demand, and revenue data from each provider.''

II. Overall Structure of the Data Collection

Pursuant to WCB/OEA's delegated authority, WCB/OEA have drafted proposed instructions, a template, and a certification form for the Third Mandatory Data Collection. WCB/OEA seek comment on all aspects of these documents. Do they sufficiently implement the requirements the Commission articulated for the mandatory data collection in the *2021 ICS Order*? If not, what steps should WCB/OEA take to improve the proposed documents? The Commission's prior data collections have demonstrated that detailed and specific instructions and templates are essential to ensure that providers use similar procedures to determine and report their costs, revenues, and other data. WCB/OEA invite comment on whether the proposed instructions and template are sufficiently detailed to accomplish this objective. If not, what additional instructions, inquiries, or fields should WCB/OEA add? Conversely, are there any instructions, inquiries, or fields that should be removed because they are unnecessary to ensure that providers report uniform and accurate data and other information?

A. Instructions to the Third Mandatory Data Collection

WCB/OEA seek comment on whether the instructions provide sufficient guidance to ensure that providers use uniform methodologies and report the required information in a consistent manner. What improvements can WCB/OEA make to the instructions? Are there any changes that would clarify the instructions or increase uniformity across providers' responses, particularly regarding how to report and allocate their costs? If so, what specific changes should WCB/OEA make? Are there any definitions that are unclear? Are there any undefined terms WCB/OEA should define? Is there alternative or additional language that would minimize ambiguity in any instruction? The proposed instructions also include many requests that are not specifically described below. WCB/OEA seek comment on all aspects of the proposed instructions, including on those requests that WCB/OEA do not address individually in this document.

Reporting Period. The proposed instructions generally seek data for each calendar year from 2019 through 2021, but seek cost data only for calendar year 2021, in part to minimize the burden of responding to this data collection. Is this the correct period for general data requests, such as revenues, site commission payments, and calling minutes? Is cost data only for calendar year 2021 the most relevant to collect? Would cost data from 2019, on the other hand, provide the most representative data set, given that the data from 2020 and 2021 will reflect the impact of the COVID–19 pandemic upon operations? Should WCB/OEA adopt a longer or shorter period for any set of requests? If so, why? Are there any specific known and measurable changes to ICS-related investments, expenses, revenues, and demand over the next few years that are not reflected in the data the proposed instructions seek to collect?

Financial Information. The proposed instructions require providers to report financial data in accordance with generally accepted accounting principles and specify that the carrying value of all assets shall reflect the results of recent impairment testing that accurately removes any overstatement of carrying value otherwise recorded in a provider's book of accounts. Under generally accepted accounting principles, an asset or asset group is impaired when its carrying amount, that is, the value reflected on the balance sheet, net of depreciation or amortization, exceeds its fair market value. In that case, the value of the impaired asset or asset group is written down and the reduced value is reflected on the balance sheet and a loss is recorded on the income statement. Is this the correct approach? If not, why not? How often do providers test their assets for impairment and how often are they required to do so under generally accepted accounting principles? Are additional instructions needed to ensure that the carrying value of providers' assets is not overstated? If so, what other instructions should WCB/OEA adopt?

WCB/OEA seek comment on whether providers maintain sufficient records to enable them to respond fully to the data collection. If not, what additional steps should WCB/OEA take to ensure that the Commission has sufficient information to set reasonable permanent provider-related rate caps for interstate and international ICS and to revise the current ancillary service change caps? Should WCB/OEA adopt workarounds that would provide reasonable proxies for any financial data that providers are unable to report and, if so, what workarounds should WCB/OEA specify?

Cost Allocation. WCB/OEA propose several steps for providers to follow in allocating their costs among various services, as set forth in the proposed instructions. What refinements, if any, should WCB/OEA make to the proposed cost allocation methodology? Is there an alternative methodology that would better ensure that providers allocate their costs in a manner consistent with how they are incurred? If so, what is that methodology and why would it produce more accurate results than the proposed method? Are there additional allocation steps or instructions that would result in greater uniformity in providers' cost allocation procedures or greater accuracy in the cost allocation results? Do all or most providers routinely track certain data in the normal course of operating their businesses that should be used to develop allocators for particular costs or groups of costs? Are there additional steps WCB/OEA should take to ensure that each provider will directly assign its investments and expenses to the extent possible? Similarly, are there additional steps WCB/OEA can take to ensure that each provider will allocate shared and common investments and expenses in a cost-causative manner?

Response Granularity. WCB/OEA propose that all providers submit data both at the company-wide level and for each correctional facility in which the provider offered calling services during the reporting period. WCB/OEA seek comment on this approach. Assuming WCB/OEA should require providers to report data on a facility-level basis, how should WCB/OEA require providers that track costs only on a contract level to respond? Are the cost allocation procedures set forth in the instructions sufficient to enable these providers to allocate costs down to the facility and, if not, what additional procedures should WCB/OEA require? Are there any additional data WCB/OEA should seek that would help ensure that providers allocate costs to facilities in a manner that more accurately reflects how such costs are incurred? How and to what degree should a provider document or explain the way it derives facility-level costs?

The proposed instructions give providers the option of reporting their investment and expense data for ICS and related ancillary services without separating them into interstate and intrastate components or, if they prefer, to perform that separation prior to reporting their data. This approach reflects the fact that WCB/OEA are unaware of any material cost differences between providing interstate and intrastate calling services based on the record in this proceeding to date. Is that understanding correct? Are there any data for which a separation into interstate and intrastate components would be helpful in determining the costs providers incur solely in providing interstate and international calling services and related ancillary services?

B. Template

WCB/OEA propose to require providers to submit the requisite data using a reporting template, to be filed through the Commission's electronic comment filing system (ECFS). The proposed template consists of a Word document (Appendix A to the instructions) for responses requiring narrative information and Excel spreadsheets (Appendix B to the instructions) for responses that require specific numbers or information. WCB/OEA seek suggestions for improvements WCB/OEA can make to the template. Is there an alternative organization that would reduce any perceived burdens? Are there other organizational or substantive improvements WCB/OEA can make to the reporting requirements? Are there inquiries WCB/OEA should add to the templates? Are there inquiries WCB/OEA should eliminate? If so, why? Do any questions require clarification?

III. Specific Inquiries

General Categories of Information Requested. The proposed instructions require providers to submit certain types of information related to their operations, costs, demand, and revenues. Are the categories of data described in sufficient detail in the proposed instructions? Are there additional categories or subcategories of information WCB/OEA should require providers to submit, in order to gather accurate, consistent, and sufficiently disaggregated data? Is there additional information that would help quantify the relative financial importance of different products and services in each provider's business portfolio or ICS operations? Is there additional information WCB/OEA could seek to facilitate a thorough accounting of the providers' investments, particularly to distinguish investments in intangible assets that were created internally from investments in intangible assets and goodwill generated by acquisitions or asset purchases? If so, how should WCB/OEA draw this distinction and how should any distinctions be reflected in the development of permanent rate caps? Is there additional information WCB/OEA should seek to help thoroughly account for a provider's recurring capital expenses or recurring operating expenses? Should customer deposits be subtracted from the provider's net investment in assets, the base upon which an allowable rate of return is calculated? Do customer deposits represent non-investor-supplied capital? Does the provider pay interest on the outstanding customer deposit balance? Is the provider able to earn a return on the outstanding customer deposit balance? Are there additional subcategories of data WCB/OEA should seek that will enable the Commission to better estimate providers' costs of serving individual correctional facilities?

Demand for Interstate and International Calling Services. WCB/OEA propose to seek information on providers' demand for interstate and international calling services by requiring providers to report billed minutes, unbilled minutes, average daily population, number of telephones installed, and the number of kiosks installed. Are there other types of data that would provide a more accurate picture of demand such as the number of beds, or the rate of new account generation, at a particular facility? For example, would the rates of new account generation or account termination serve as accurate proxies for demand, or otherwise reflect cost drivers that could be used to better allocate provider costs? Could a measure of demand other than minutes be used as the unit of sale for the permanent rate caps? If providers do not know the average daily population of certain facilities they serve, what data could they report to provide a reasonable proxy for average daily population in those instances? What impact has the COVID–19 pandemic had on the cost of providing and the demand for intrastate, interstate, and international calling services? Do providers expect that impact to persist?

Data for Jails with Fewer than 1,000 ADP. The Commission explained in the *2021 ICS Order* that ''[a]lthough in some places WCB/OEA use the term 'smaller jails' to refer to facilities with average

daily populations less than 1,000, that usage is not meant to imply that such jails are small in any absolute sense.'' In the *2021 ICS Order,* the Commission observed that the record then before it did not ''allow [it] to reasonably set permanent or even new interim interstate rate caps for jails with less than 1,000 average daily population.'' What types of data would provide a more accurate picture of the costs providers incur in serving such jails? What are the specific factors that differentiate the costs associated with serving such jails from the costs of serving larger jails? What data should WCB/OEA collect to analyze those factors? What are the one-time costs that providers incur to initiate service for a newly incarcerated person in such jails as compared to larger jails? Should WCB/OEA require providers to separately report these one-time costs? If so, what are the appropriate one-time cost categories? The record suggests that higher turnover in jails with less than 1,000 ADP may affect providers' and facilities' costs. How should providers be required to report turnover data, and how can WCB/OEA analyze those data to identify the impact of turnover on provider and facility costs, or to distinguish between them? Are there additional data WCB/OEA can request that would help the Commission quantify and evaluate the effect of turnover?

Site Commissions. WCB/OEA propose to require that providers separately identify the amounts of (1) legally mandated, (2) contractually prescribed, (3) monetary, and (4) in-kind site commission payments. Are there other categories of information WCB/OEA should seek regarding site commissions? How should providers submit information concerning in-kind payments? For example, should WCB/OEA require providers to describe their in-kind payments in detail and assign them a dollar value? In the *2021 ICS Order,* the Commission observed that the record did not allow it to ''determine on a permanent basis whether and what portion of [site commission] payments are legitimately related to the cost'' of providing inmate calling service.'' What types of information should WCB/OEA seek to help make this determination? Should WCB/OEA, for example, require providers to explain whether they agree to pay site commission on ICS calls to get footholds in facilities where they can offer non-ICS products and services that will not be subject to site commission payments obligations? If so, how can WCB/OEA ensure that providers allocate their site commission payments between their ICS-related operation and those other operations in a cost-causative manner?

Security Services. As the Commission explained in 2021, to determine whether any costs associated with security services should be recovered through ICS rates, it first must be able to determine whether any of those costs are directly related to the provision of ICS and distinguish them from other security costs incurred by correctional institutions. To facilitate this determination, the proposed instructions would require providers to report security costs in connection with the providers' ICS-related and non-ICS-related operations. Are there other data WCB/OEA should seek concerning such costs? What categories of security costs are properly considered directly related to ICS? What categories are not? How should WCB/OEA require providers to separate and report security costs which are legitimately or directly related to ICS from general facility security costs? Should WCB/OEA require providers to specify whether any such cost is incurred by the ICS provider or the facility? In 2021, the Commission observed that there is record evidence suggesting that some of the security and surveillance functions described by the National Sheriffs' Association as being performed by correctional facility staff appear to duplicate some of the security functions that providers report as costs. Are there any other data WCB/OEA could collect that would assist the Commission in determining whether security costs are directly or legitimately related to the provision of ICS? Should WCB/OEA collect specific data about security costs that may not be directly or legitimately related to the provision of ICS, such as costs incurred to monitor and record every call made by an incarcerated person?

Ancillary Service Charges. WCB/OEA propose to require providers to report revenues and disaggregated costs incurred for ancillary services. WCB/OEA seek comment on this proposal, as reflected in the instructions. In the *2021 ICS Order,* the Commission observed that the existing record did not allow it to ''adjust [the] caps on ancillary service fees beyond the new cap on fees for single-call services and third-party financial transaction fees.'' The instructions for the Second Mandatory Data Collection required certain ancillary service revenues to be reported separately, but providers were not required to report their ancillary service costs separately from other inmate calling services costs. Further, providers were not required to separately report costs relating to any specific ancillary service. The Commission found that there was ''no reliable way to exclude ancillary service costs from [the] provider-related rate caps calculations at this time.'' By consequence, the Commission allowed such costs to ''remain as part of the industry costs'' used in the calculations for the interim rate caps. What other revenue or disaggregated cost data should WCB/OEA seek to enable the Commission to evaluate and, if warranted, revise the current ancillary service charge caps and/or isolate and exclude ancillary service costs from any future calculations related to per-minute rate caps?

In the *2021 ICS Order,* the Commission identified ''confusion among industry stakeholders regarding the relationship between the automated payment fee and third-party financial transaction fees as they relate to credit card processing fees.'' To determine how credit card processing works in relation to these two ancillary services, WCB/OEA propose to require providers to report the total amount of revenues derived from charging automated payment fees and third-party transaction fees, to report the amount of that total that is credit card processing separately, and specify whether the provider, an affiliate, or a third party performs the processing. Do commenters agree with this approach? If not, how should WCB/OEA require providers to report credit card processing revenues embedded in revenues derived from these two ancillary service charges?

The Commission also expressed concern about ''the adverse effect of revenue-sharing arrangements between calling service providers and third-party financial institutions'' in the context of ancillary services. To assist the Commission in understanding the prevalence and effect of such agreements, WCB/OEA propose to require providers to identify revenue-sharing agreements related to ancillary services and the revenues shared under those agreements. What other information should WCB/OEA seek on revenue-sharing agreements?

Additional Data. Beyond the foregoing, are there other types of data WCB/OEA should require providers to submit to ensure that WCB/OEA fully capture the costs of providing ICS? Are there additional data that may enable the Commission to better understand the costs ICS providers and correctional facilities incur in connection with ICS? How should any such data be compiled and used to ensure that direct and shared and common costs are assigned

or allocated in the most cost-causative manner? What data should WCB/OEA collect concerning international calling costs to isolate those costs and to eliminate the risk of double counting?

Are there other issues WCB/OEA should consider regarding the data WCB/OEA propose to collect? Should WCB/OEA seek data on the marketing and sale of inmate calling services, such as contracts by which correctional facilities purchase calling services on behalf of incarcerated persons at fixed monthly rates? If so, what data should WCB/OEA ask for? For example, should WCB/OEA direct providers to identify in narrative responses the terms of any bulk-purchasing arrangements they have with correctional facilities? ''Bulk purchasing'' in this context refers to the purchase by a correctional facility of ICS at fixed monthly rates or other similar arrangements such as unlimited calling plans at fixed rates. What data should WCB/OEA ask for from providers that enter into service arrangements, such as GTL's contract with San Francisco, whereby incarcerated people receive free telephone service?

IV. Miscellaneous

In the *2021 ICS Order,* the Commission delegated to WCB/OEA the authority to ''require providers to submit any additional information that they deem necessary to help the Commission formulate permanent rate caps or to revise [the] rules governing ancillary service charges.'' WCB/OEA propose to require all providers to submit audited financial statements or reports, or similar documentation, for the relevant reporting period, to the extent they have been produced in the ordinary course of business. Are there other reports or documentation WCB/OEA should seek? Should WCB/OEA require providers to provide copies of all or a random sample of their ICS contracts to assist Commission staff in verifying or crosschecking data submitted in response to the Third Mandatory Data Collection?

Separately, in the *2021 ICS Order,* the Commission reasoned that the benefits of conducting a third data collection ''far outweigh any burden on providers'' given the ''adverse impact that unreasonably high rates and ancillary services charges have on incarcerated people and those family and loved ones they call.'' While WCB/OEA do not revisit this general finding, WCB/OEA do seek to maximize the benefits of this data collection while minimizing the costs to the extent WCB/OEA can. WCB/OEA therefore seek comment on whether these proposals will meet the Commission's objectives in requiring the data collection. If not, what additional questions should WCB/OEA ask to ensure the Commission has all the data it needs to set permanent rate caps, evaluate ancillary service fees, and adjust the caps for those fees, if necessary? Conversely, are there ways that WCB/OEA could minimize the burden on providers while still ensuring WCB/OEA collect all the data the Commission needs to meet its goals? If so, what specific changes do commenters propose in this regard? WCB/OEA also seek to ensure that smaller providers are not disproportionately burdened by this data collection, while recognizing that data from smaller providers is critical to the Commission's ratemaking process going forward. Do commenters have suggestions as to how WCB/OEA can get the information WCB/OEA need from smaller providers in a less burdensome way? If so, how?

In the *2021 Order,* the Commission eliminated the separate interim rate cap that had applied to interstate collect calls, an action that reflected a record establishing that collect calls now play only a limited role in the inmate calling services marketplace and that there is at most a relatively small difference between the costs of providing collect and non-collect inmate calling services calls. Consistent with that Commission action, the proposed instructions do not differentiate among debit, prepaid, and collect calls. WCB/OEA seek comment on whether the instructions should distinguish among these call types. If so, why and for which specific components of the proposed data collection?

Finally, as part of the Commission's continuing effort to advance communications equity for all, including people of color and others who have been historically underserved, marginalized, and adversely affected by persistent poverty and inequality, WCB/OEA invite comment on any equity-related considerations and benefits (if any) that may be associated with the upcoming Third Mandatory Data Collection. Section 1 of the Communications Act of 1934, as amended, provides that the Commission ''regulat[es] interstate and foreign commerce in communication by wire and radio so as to make [such service] available, so far as possible, to all the people of the United States, without discrimination on the basis of race, color, religion, national origin, or sex.'' WCB/OEA define the term ''equity'' consistent with Executive Order 13985 as the consistent and systematic fair, just, and impartial treatment of all individuals, including individuals who belong to underserved communities that have been denied such treatment, such as Black, Latino, and Indigenous and Native American persons, Asian Americans and Pacific Islanders and other persons of color; members of religious minorities; lesbian, gay, bisexual, transgender, and queer (LGBTQ+) persons; persons with disabilities; persons who live in rural areas; and persons otherwise adversely affected by persistent poverty or inequality. Specifically, WCB/OEA seek comment on how these proposals for that collection may promote or inhibit advances in diversity, equity, inclusion, and accessibility.

V. Procedural Matters

Filing of Comments and Replies. Pursuant to sections 1.415 and 1.419 of the Commission's rules, 47 CFR 1.415, 1.419, interested parties may file comments and reply comments on or before the dates indicated on the first page of this document. Comments may be filed using the Commission's Electronic Comment Filing System. *See* FCC, Electronic Filing of Documents in Rulemaking Proceedings, 63 FR 24121 (May 1, 1998). The Protective Order issued in this proceeding permits parties to designate certain material as confidential. Filings that contain confidential information should be appropriately redacted and filed pursuant to the procedure described therein.

- *Electronic Filers:* Comments may be filed electronically using the internet by accessing the ECFS: *https://www.fcc.gov/ecfs/.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. If more than one docket or rulemaking number appears in the caption of this proceeding, filers must submit two additional copies for each additional docket or rulemaking number.
- Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.
- Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701. U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.
- Effective March 19, 2020, and pending additional information, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect

the health and safety of individuals, and to mitigate the transmission of COVID–19.

Comments and reply comments must include a short and concise summary of the substantive arguments raised in the pleading. Comments and reply comments must also comply with section 1.49 and all other applicable sections of the Commission's rules. WCB/OEA direct all interested parties to include the name of the filing party and the date of the filing on each page of their comments and reply comments. All parties are encouraged to use a table of contents, regardless of the length of their submission. WCB/OEA also strongly encourage parties to track the organization set forth in the WCB/OEA document and the instructions in order to facilitate the internal review process.

People with Disabilities. WCB/OEA ask that requests for accommodations be made as soon as possible in order to allow the agency to satisfy such requests whenever possible. Send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530.

Ex Parte Presentations. This proceeding shall be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda, or other filings in the proceeding, the presenter may provide citations to such data or arguments in the prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with section 1.1206(b) of the Commission's rules. Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

Supplemental Initial Regulatory Flexibility Act Analysis. As required by the RFA, the Commission has prepared a Supplemental Initial Regulatory Flexibility Analysis (Supplemental IRFA) of the possible significant economic impact on small entities by the policies and rules proposed in the WCB/OEA document. The Commission requests written public comments on the Supplemental IRFA. Comments must be identified as responses to the Supplemental IRFA and must be filed by the deadlines for comments provided in this Notice. The Commission will send a copy of the WCB/OEA document, including this Supplemental IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, summaries of the WCB/OEA document and the Supplemental IRFA will be published in the **Federal Register**.

Final Paperwork Reduction Act Analysis. The WCB/OEA document contains new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. It will be submitted to the Office of Management and Budget (OMB) for review under section 3507(d) of the PRA. OMB, the general public, and other federal agencies are invited to comment on the new or modified information collection requirements contained in this proceeding. Contemporaneously with the publication of this Notice in the **Federal Register**, WCB/OEA will publish a notice in the **Federal Register** seeking comment pursuant to the PRA on the information collection requirements for the Mandatory Data Collection in the *2021 ICS Order* and this Public Notice. WCB/OEA will consider comments submitted in response to both **Federal Register** notices in finalizing this information collection for submission to OMB. In addition, WCB/OEA note that pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198; *see* 44 U.S.C. 3506(4), WCB/OEA previously sought comment on how the Commission will further reduce the information collection burden for small business concerns with fewer than 25 employees.

Additional Information. For further information, please contact Erik Raven-Hansen, Wireline Competition Bureau, Pricing Policy Division, at (202) 418–1532 or *erik.raven-hansen@fcc.gov, or Peter Bean,* Wireline Competition Bureau, Pricing Policy Division, at (202) 418–0786 or *peter.bean@fcc.gov.* Please copy *mandatorydatacollection@fcc.gov on any email correspondence.*

VI. Supplemental Initial Regulatory Flexibility Analysis

As required by the Regulatory Flexibility Act of 1980, as amended (RFA), the Wireline Competition Bureau (WCB) and the Office of Economics and Analytics (OEA) (collectively, WCB/OEA) have prepared this Supplemental Initial Regulatory Flexibility Analysis (Supplemental IRFA) of the possible significant economic impact on small entities by the policies and rules proposed in the WCB/OEA document. WCB/OEA request written public comments on this Supplemental IRFA. Comments must be identified as responses to the Supplemental IRFA and must be filed by the deadlines for comments provided in this Public Notice. The Commission will send a copy of the WCB/OEA document, including this Supplemental IRFA, to the Chief Counsel for Advocacy of the Small Business Administration (SBA). In addition, the Public Notice and the Supplemental IRFA (or summaries thereof) will be published in the **Federal Register**.

A. Need for, and Objectives of, the Proposed Data Collection

In this document, WCB/OEA seek comment on the contours and specific requirements of the forthcoming Third Mandatory Data Collection for inmate calling services (ICS). In 2020, the Commission sought comment on whether and how the Commission should proceed with any new data collection. In the *2021 ICS Order,* the Commission adopted a new data collection requirement. The Commission determined that this data collection would enable it to adopt permanent interstate and international rate caps, protect consumers against unjust and unreasonable ancillary service charges, and improve its continuing review of the inmate calling services marketplace.

Pursuant to their delegated authority, WCB/OEA have drafted proposed instructions and a template for the Third Mandatory Data Collection and are issuing the WCB/OEA document to seek comment on all aspects of these documents.

B. Legal Basis

The legal basis for any action that may be taken pursuant to the WCB/OEA document is contained in sections 1, 2, 4(i)–(j), 201(b), 218, 220, 276, and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i)–(j), 201(b), 218, 220, 276, and 403.

C. Description and Estimate of the Number of Small Entities to Which the Third Mandatory Data Collection Will Apply

The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the Third Mandatory Data Collection. The RFA generally defines the term ''small entity'' as having the same meaning as the terms ''small business,'' ''small organization,'' and ''small governmental jurisdiction.'' In addition, the term ''small business'' has the same meaning as the term ''small-business concern'' under the Small Business Act. Pursuant to 5 U.S.C. 601(3), the statutory definition of a small business applies ''unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**.'' A ''small-business concern'' is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.

Regulatory Flexibility Analyses were incorporated in a 2020 document and the *2021 ICS Order*. In those analyses, the Commission described in detail the small entities that might be affected. Accordingly, in this document, for the Supplemental IRFA, WCB/OEA hereby incorporate by reference the descriptions and estimates of the number of small entities from these previous Regulatory Flexibility Analyses.

D. Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

The WCB/OEA document seeks comments on the specifics of the Third Mandatory Data Collection to ensure calling services rates, charges, and practices are just and reasonable. The Third Mandatory Data Collection requires ICS providers to submit, among other things, data and other information on calls, demand, operations, company and contract information, information about facilities served, revenues, site commission payments, and ancillary fees.

E. Steps Taken To Minimize the Significant Economic Impact on Small Entities and Significant Alternatives Considered

The RFA requires an agency to describe any significant alternatives that it has considered in reaching its proposed approach, which may include the following four alternatives (among others): ''(1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance and reporting requirements under the rules for such small entities; (3) the use of performance rather than design standards; and (4) an exemption from coverage of the rule, or any part thereof, for such small entities.'' WCB/OEA will consider all of these factors when WCB/OEA receive substantive comment from the public and potentially affected entities.

The Third Mandatory Data Collection is a one-time request and does not impose a recurring obligation on providers. Because the Commission's *2021 ICS Order* requires all ICS providers to comply with the mandatory data collection, the collection will affect smaller as well as larger ICS providers. The Commission has taken steps to ensure that the data collection template is competitively neutral and not unduly burdensome for any set of providers. Additionally, the WCB/OEA document asks whether there are ways of minimizing the burden of the data collection on providers while still ensuring that the Commission collects all the data needed to meet its goals.

WCB/OEA will consider the economic impact on small entities, as identified in comments filed in response to the WCB/OEA document and this Supplemental IRFA, in reaching its final conclusions and finalizing the instructions and the template for the Third Mandatory Data Collection.

F. Federal Rules That May Duplicate, Overlap, or Conflict With the Proposed Rules

None.

Federal Communications Commission.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No.: 210916–0190]

RIN 0648–BK68

Fisheries of the Northeastern United States; Atlantic Sea Scallop Fishery; Amendment 21

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to approve and implement through regulations measures included in Amendment 21 to the Atlantic Sea Scallop Fishery Management Plan, which the New England Fishery Management Council adopted and submitted to NMFS for approval. This action would allow for more controlled access to the scallop resource by the limited access and limited access general category fleets and increase monitoring to a growing directed scallop fishery in Federal waters, including the Northern Gulf of Maine Management Area. These proposed management measures are intended to promote conservation of the scallop resource in the Northern Gulf of Maine Management Area and to manage total removals from the area by all fishery components. Amendment 21 would also expand flexibility in the limited access general category individual fishing quota fishery to reduce impacts of potential decreases in ex-vessel price and increases in operating costs.

DATES: Comments must be received by November 4, 2021.

ADDRESSES: The Council has prepared a draft Environmental Assessment (EA) for this action that describes the proposed measures Amendment 21 to the Atlantic Sea Scallop Fishery Management Plan (FMP) and other considered alternatives and analyzes the impacts of the proposed measures and alternatives. The Council submitted a draft of the amendment to NMFS that includes the draft EA, a description of the Council's preferred alternatives, the Council's rationale for selecting each alternative, and a Regulatory Impact Review (RIR). Copies of supporting documents used by the New England Fishery Management Council, including the EA and RIR, are available from: Thomas A. Nies, Executive Director,

New England Fishery Management Council, 50 Water Street, Newburyport, MA 01950 and accessible via the internet in documents available at: *https://www.nefmc.org/library/amendment-21*.

You may submit comments, identified by NOAA–NMFS–2021–0065, by the following method:

• *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov* and enter NOAA–NMFS–2021–0065 in the Search box. Click the ''Comment'' icon, complete the required fields, and enter or attach your comments.

Instructions: Comments sent by any other method or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous).

Comments regarding the burden-hour estimates or other aspects of the collection-of-information requirements contained in this proposed rule may be submitted to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Travis Ford, Fishery Policy Analyst, (978) 281–9233, *travis.ford@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Background

The Atlantic sea scallop fishery is prosecuted along the east coast from Maine to Virginia, although most fishing activity takes place between Massachusetts and New Jersey. Management measures were first adopted in 1982, but there have been several major revisions to the management program in the subsequent decades.

Development of the Limited Access General Category Fishery

The Council established the general category component as an open access permit category in 1994 while developing a limited access program for qualifying vessels (now the limited access component). Through Amendment 11 to the Scallop FMP (73 FR 20090, April 14, 2008), the Council transitioned the general category component from open access to limited access in order to limit fishing mortality and control fleet capacity. The Council's vision for the Limited Access General Category (LAGC) component was a fleet made up of relatively small vessels, with possession limits to maintain the historical character of this fleet and provide opportunities to various participants, including vessels from smaller coastal communities. Amendment 11 established three LAGC permit categories, which allowed for continued participation in the general category fishery at varying levels. Vessels that met qualifying criteria were issued an LAGC individual fishing quota (IFQ) permit and allocated quota based on the 'contribution factor' (*i.e.* if they fished longer and landed more during the qualification period, they received a higher allocation). General category permit holders that did not meet the qualifying criteria for an LAGC IFQ permit were eligible to receive either an LAGC Northern Gulf of Maine (NGOM) permit or LAGC incidental permit. Limited access vessels that fished under general category rules and qualified under the same IFQ qualification criteria were issued LAGC IFQ permits and allocated a portion (0.5 percent) of the total scallop allocation. Unlike vessels with only LAGC IFQ permits, limited access vessels that also qualified for an LAGC IFQ permit were not allowed to transfer quota to or from other vessels.

Northern Gulf of Maine Management Area

The Council also established the Northern Gulf of Maine (NGOM) Management Area and permit category through Amendment 11. The area was established to enable continued fishing and address concerns related to conservation, administrative burden, and enforceability of scallop fishing within the Gulf of Maine. Amendment 11 authorized vessels with either an LAGC NGOM permit or LAGC IFQ permit to fish within the NGOM Management Area at a 200 lb per day (91 kg per day) trip limit until the fleet reaches the annual total allowable catch (TAC) for the area. The Council did not recommend restrictions on limited access vessels fishing in the NGOM because the improved management and abundance of scallops in the major resource areas on Georges Bank and in the Mid-Atlantic region made access to Gulf of Maine scallops less important for the limited access boats and general category boats from other regions. From 2008 through 2017, limited access vessels were able to operate in the NGOM management area under days-at-sea (DAS) management as long as the LAGC TAC had not been caught. The initial measures were intended to allow directed scallop fishing in the NGOM, and the Council envisioned that management of this area would be reconsidered if the scallop population and fishery in the NGOM grew in the future.

For each of the years 2009 through 2015, the NGOM TAC of 70,000 lb (31,751 kg) was not caught, and the fishery remained open for the entire year. In fishing years 2016 and 2017, there was a notable increase in effort in the NGOM management area by both LAGC and limited access vessels fishing the large year class of scallops on Stellwagen Bank, located mostly within the NGOM. Monitoring removals by the limited access component in the NGOM was challenging because vessels could fish both inside and outside NGOM management area while fishing under DAS management on the same trip.

In response to the increase in effort and landings in the NGOM area in 2016 and 2017, the Council developed the following problem statement for the Federal scallop fishery in the NGOM management area: Recent high landings and unknown biomass in the NGOM Scallop Management Area underscore the critical need to initiate surveys and develop additional tools to better manage the area and fully understand total removals.

Recent actions have developed measures that allow managers to track fishing effort and landings by all components from the NGOM management area. The NGOM TAC is now based on recent survey information, with separate TACs for the limited access and LAGC components. These measures were intended to be a short-term solution to allow controlled fishing in the NGOM management area until NGOM issues could be addressed more holistically, as this action proposes to do.

Limited Access General Category Individual Fishing Quota Possession Limits

The initial general category possession limit was set at 400 lb (181 kg) per trip through Amendment 4 (59 FR 2757; January 19, 1994). In 2007, Amendment 11 maintained the general category possession limit of 400 lb (181 kg) for qualifying IFQ vessels. Amendment 15 (76 FR 43746, July 21, 2011) increased the LAGC IFQ possession limit to 600 lb (272 kg) following concerns from industry

members that the 400-lb (181-kg) possession limit was not economically feasible due to increased operating costs. The 200-lb (91-kg) trip limit increase was not expected to change the nature of the ''day boat'' fishery and would keep the LAGC IFQ component consistent with the vision statement laid out by the Council in Amendment 11. The Council recently completed a program review of the LAGC IFQ fishery and analyzed the impacts of changes to IFQ trip limits. This review found that increasing the possession limit for IFQ trips would increase flexibility in fishing decisions, which could improve safety. Further, a higher possession limit would provide increased fishing revenue and vessel profit. The results of the program review are summarized in the Amendment 21 scoping document, which can be found at this website: *https://www.nefmc.org/library/amendment-21.*

Quota Transfers by Limited Access/LAGC IFQ Vessels

Amendment 15 allowed LAGC IFQ permit holders to permanently transfer some or all of their quota allocation to another LAGC IFQ permit holder while retaining the permit itself. During development of Amendment 15, the Council considered an option that would have included limited access permit holders that also have LAGC IFQ permits (combo vessels) in this allowance; however, the Council decided against this option so as not to change the overall 5-percent and 0.5-percent allocations specified in Amendment 11. For example, if a combo vessel permanently transferred quota to an LAGC IFQ-only vessel, the 5-percent allocation would be expected to increase and would have implications on quota accumulation caps that apply to LAGC IFQ-only permit holders (*i.e.* 5-percent maximum for owners, 2.5-percent maximum for individual vessels).

Summary of Amendment 21

The Council initiated Amendment 21 to consider adjusting the management of the NGOM to allow for more controlled access by the limited access and LAGC components, to increase monitoring to support a growing directed scallop fishery in Federal waters, and to consider adjusting the LAGC IFQ program to support overall economic performance while allowing for continued participation in the general category fishery at varying levels. To address these issues, the Council approved Amendment 21 at its September 2020 meeting. Amendment 21 would:

- Change the Annual Catch Limit (ACL) flow chart to account for biomass in the NGOM as part of the Overfishing Limit (OFL) and the Acceptable Biological Catch (ABC) to be consistent with other portions of scallop resource management;
- Develop landing limits for all permit categories in the NGOM and establish an 800,000-lb (362,874 kg) NGOM Set-Aside trigger for the NGOM directed fishery, with a sharing agreement for access by all permit categories for allocation above the trigger. Allocation above the trigger would be divided, with 5 percent for the NGOM fleet and 95 percent for limited access and LAGC IFQ fleets;
- Expand the scallop observer program to monitor directed scallop fishing in the NGOM by using a portion of the NGOM allocation to off-set monitoring costs;
- Allocate 25,000 lb (11,340 kg) of the NGOM allocation to increase the overall Scallop Research Set-Aside (RSA) and support Scallop RSA compensation fishing;
- Increase the LAGC IFQ possession limit to 800 lb (363 kg) per trip only for access area trips;
- Prorate the daily observer compensation rate in 12-hour increments for observed LAGC IFQ trips longer than 1 day; and
- Allow for temporary transfers of IFQ from limited access vessels with IFQ to LAGC IFQ-only vessels.

It is the Council's intent for Amendment 21 that the proposed measures become effective in concordance with updated specifications for fishing year 2022, which are currently under development through Framework Adjustment 34 to the Scallop FMP and have a target implementation date of April 1, 2022. If the implementation of Framework Adjustment 34 is delayed beyond April 1, 2022, the default measures, specifications, and possession limits for fishing year 2022 developed in Framework Adjustment 33 to the Scallop FMP (86 FR 27042, May 19, 2021) would still apply.

Proposed Measures

Accounting for the NGOM as Part of the ABC and ACL

Amendment 21 would modify the ACL flowchart to account for the scallop biomass in the NGOM as part of the legal limits in the fishery by adding biomass from the area into calculations of the OFL and ABC. This action would move the accounting of the NGOM ACL from only within the OFL into the OFL and ABC/ACL for the entire fishery (Figure 1). By including exploitable scallop biomass from the NGOM as part of the scallop OFL and ABC, the ACL and sub-ACLs for the limited access and LAGC IFQ, and the limited access Annual Catch Target (ACT) would increase. The observer set-aside would also increase with the NGOM as part of the OFL/ABC. The ABC/ACL would be reduced by the NGOM Set-Aside value, along with the Research and Observer Set-Asides and incidental catch (Figure 1). The Council would set specifications for the NGOM though future specifications actions.

The Council would use the following approach to include the NGOM in the ACL flowchart:

1. Exploitable biomass from surveyed areas of the NGOM would be estimated;

2. The contribution to the OFL would be calculated at the fishing mortality (F) rate equal to the estimate of F of Maximum Sustainable Yield (F_{MSY}) for Georges Bank from the most recent research or management track assessment, unless direct estimates of F_{MSY} for the Gulf of Maine are available; and

3. Combining OFL values from areas on Georges Bank/Mid Atlantic and the NGOM could be done in a single model (*e.g.,* add the NGOM to the Scallop Area Management Simulator model), or as separate calculations. The method would, in part, be determined by the available data.

Incorporating the NGOM into the ACL flowchart would have no impact on limited access DAS, or any other fishery allocation that is part of the Annual Projected Landings (APL).

Including the NGOM in the OFL and ABC would allow the fishery's overall limits to change with biomass in the NGOM. This would create a mechanism to increase the LAGC IFQ and limited access ACTs by accounting for biomass in the NGOM. In addition, incorporating the biomass from the NGOM into the ACL flowchart would increase the allocation that is available for the fishery's observer set-aside program.

BILLING CODE 3510–22–P

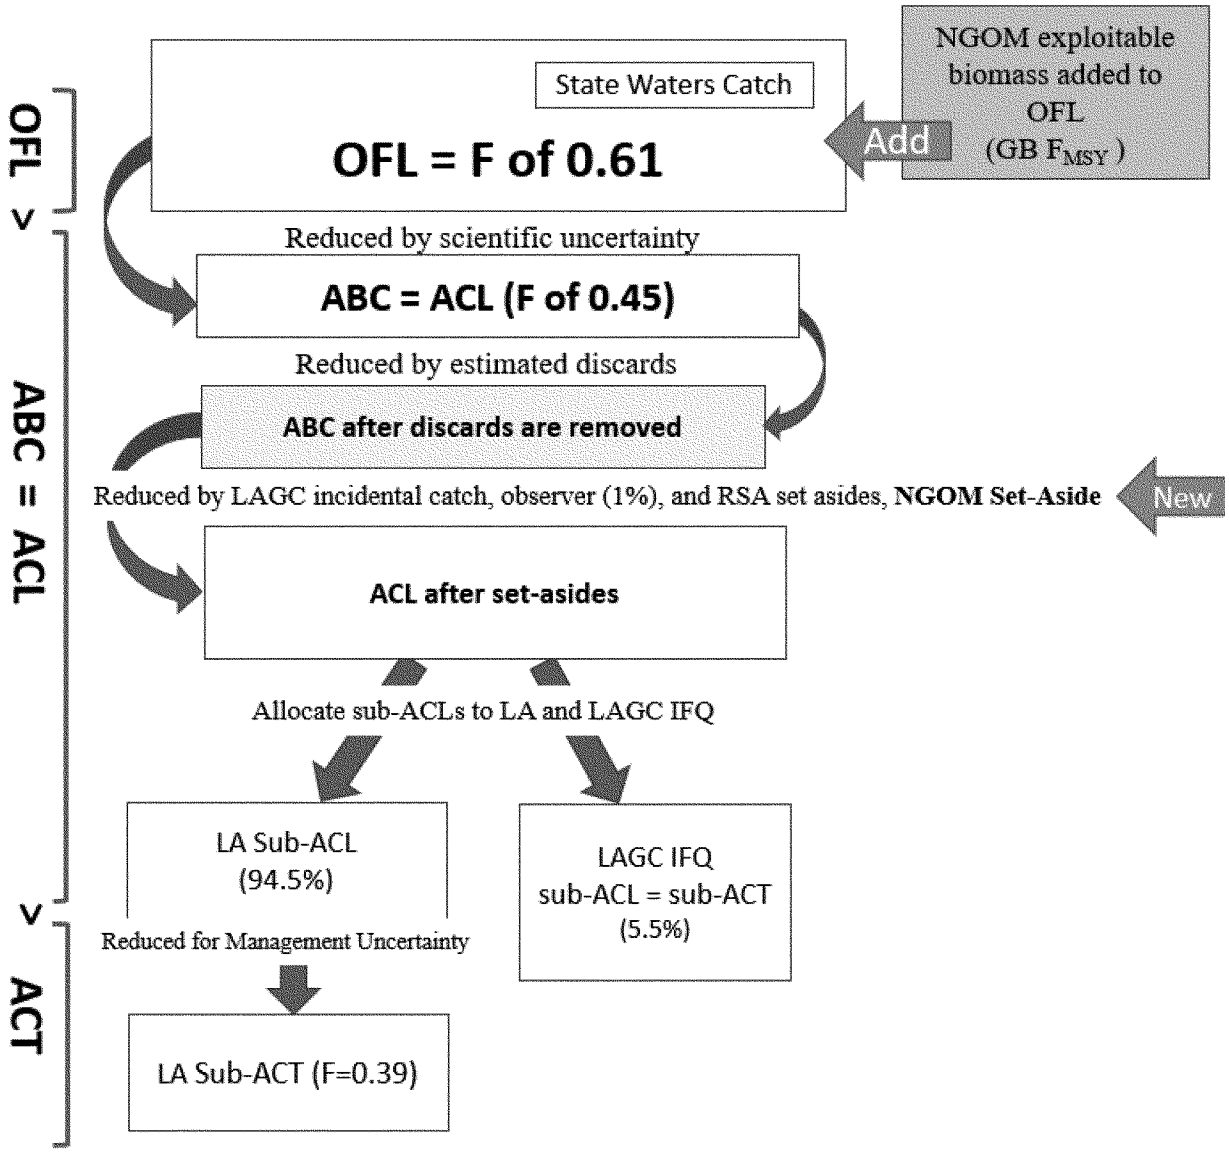

Figure 1 -- Example of Scallop Legal Limits (OFL, ABC, and ACL) With the NGOM Incorporated Into Estimates of the OFL and ABC.

BILLING CODE 3510–22–P

Creating the NGOM Total Allowable Limit

Amendment 21 would require that the Council set an overall Total Allowable Limit (TAL) for the NGOM management area for all permit categories. If NGOM survey data are available, the NGOM TAL would be developed using a projection method to estimate exploitable biomass in upcoming fishing years. The allowable landings would be set by applying an F rate ranging from F=0.15 to F=0.25 to exploitable biomass in open areas of the NGOM, as specified by the Council. A portion of the NGOM TAL would be added to the fishery wide RSA (described below). In addition, one percent of the NGOM's contribution to the fishery-wide ABC would be removed from the NGOM TAL to off-set monitoring costs (described below).

NGOM Set-Aside and NGOM Annual Projected Landings

The remaining portion of NGOM TAL after contributions to the fishery-wide observer and RSAs are removed would then be allocated to the NGOM Set-Aside up to the NGOM Set-Aside trigger (800,000 lb (362,874 kg)). The NGOM Set-Aside would support a directed LAGC fishery (including NGOM and LAGC IFQ permitted vessels) in the NGOM Management Area at a possession limit of 200 lb (91 kg) per vessel per day. If there is additional allocation available above the 800,000-lb (362,874-kg) trigger, the allocation above the trigger would be shared between the NGOM Set-Aside (5 percent of the allocation above the trigger) and the NGOM APL (95 percent of the allocation above the trigger) for allocating to the limited access and LAGC IFQ fleets. The NGOM APL would then be added to the overall APL to increase allocations for the limited access and LAGC IFQ fleets. If there is allocation above the NGOM Set-Aside trigger, the Council would determine the methods of how the NGOM APL

could be harvested by the limited access and LAGC IFQ components in a subsequent specifications package or framework adjustment.

The trip limit for LAGC vessels fishing the NGOM Set-Aside (*i.e.,* NGOM and IFQ vessels) would be 200 lb (91 kg) per vessel per day. Landings from LAGC IFQ vessels fishing the NGOM Set-Aside would be deducted from their IFQ as well as from the NGOM Set-Aside. LAGC vessels with incidental catch permits (LAGC Category C) would be permitted to land up to 40 lb (18 kg) per day while fishing on non-scallop trips in the NGOM if the area is open for LAGC vessels fishing against the NGOM Set-Aside. Scallop landings by vessels with LAGC incidental permits would not count against the NGOM Set-Aside. Incidental catch from the area would be tracked as part of the final year-end catch accounting.

For catch accounting purposes, all landings from the NGOM would be included in the review of year-end catch data.

NGOM Accountability Measures

Any overage of NGOM Set-Aside or NGOM APL allocations fished inside the NGOM Management Area would be subject to a pound-for-pound payback in a subsequent fishing year after an overage is determined. If reliable data are available to calculate an overage (Year 1), NMFS may implement these accountability measures (AMs) in the following fishing year (Year 2) through the rulemaking process for updated fishery specifications. If reliable data are not available in time for the start of the following fishing year, then the AMs would be implemented 2 years after the overage occurred (Year 3). Data may not be available by the start of the following fishing year because NMFS does not complete final catch accounting until June of the following fishing year. For example, if an overage occurred in fishing year 2021, NMFS would not have the final accounting data until June of fishing year 2022. The AMs could then be implemented at the April 1 start of fishing year 2023.

This approach to allocating the scallop resource in the NGOM would promote resource conservation by setting limits on total removals from the NGOM and implementing AMs for all permit categories fishing in the area. The NGOM Set-Aside approach, combined with options to grow the size of this set-aside with increasing biomass, would preserve and support a directed LAGC fishery in Federal waters in the NGOM, and distribute allocations to all permit types as the biomass in the area grows. This would allow for vessel-level allocations to the limited access and LAGC IFQ fleets, while setting aside allocation for LAGC NGOM permits to access the fishery on a first-come, first-serve basis. The set-aside approach would promote conservation in the management unit by setting a landings limit for all components of the fishery.

Expanding the Scallop Industry-Funded Observer Program to the NGOM

Amendment 21 would expand the observer call-in requirement to all scallop vessels operating in the NGOM, including NGOM-permitted vessels. This expansion of the call-in requirement would facilitate observer coverage in the NGOM Management Area.

This action would remove one percent of the NGOM ABC from the NGOM TAL to offset monitoring costs for vessels fishing in this area. This allocation would be removed from the NGOM TAL before allocating to the NGOM set-aside. This allocation could be used to support monitoring of all permit categories that have access to the NGOM Management Area. The NGOM monitoring set-aside would be added to the fishery-wide observer set-aside that is calculated as one percent of the ABC.

The scallop observer program would be expanded to cover directed scallop trips in Federal waters in the NGOM Management Area. Scallop trips by LAGC vessels in the NGOM are currently not covered by the observer program. This expanded program would utilize the cumulative allocation of the NGOM observer set-aside and the observer set-aside to support observer coverage in the scallop fishery. All compensation allocation for all observed trips would come out of the same pool, and NMFS would administer a single scallop observer program. At a minimum, observer coverage levels for the NGOM Management Area would be set to meet Standard Bycatch Reporting Methodology requirements.

The amount of daily compensation available for LAGC trips in the NGOM may vary from the daily compensation rate for LAGC IFQ vessels that have a higher trip limit. Vessels selected to carry an observer would be able to land the full amount of the daily observer compensation rate in addition to the NGOM trip limit. For example, if the daily compensation rate is set at 100 lb (45 kg), vessels with observers would be able to land 300 lb (136 kg) that trip.

Expanding the observer call-in requirement to the NGOM Management Area would facilitate the deployment of observers on directed scallop trips in Federal waters. Allowing vessels to land the daily observer compensation rate in addition to the trip limit is consistent with existing regulations for limited access and LAGC IFQ vessels when those vessels carry observers. Expanding the observer call-in requirement to directed scallop fishing in the NGOM means that monitoring requirements will be consistent for all scallop permit types across the entirety of the Atlantic sea scallop resource within the U.S. Exclusive Economic Zone.

NGOM Research Set-Aside

Amendment 21 would set-aside 25,000 lb (11,340 kg) from the NGOM TAL to support RSA compensation fishing in the NGOM management area and increase the overall allocation available for the scallop RSA program. The total amount of RSA available would be the sum of the NGOM RSA and the existing 1.25 million-lb (566,990-kg) fishery-wide RSA (*i.e.,* 1.275 million lb (573,330 kg)).

RSA compensation fishing in the NGOM management area would be allowed. Although, NGOM RSA will be combined with the overall RSA, RSA compensation fishing in the NGOM would be capped at the available NGOM RSA, *i.e.,* 25,000 lb (11,340 kg). Any vessels that are awarded NGOM RSA compensation would be required to declare into the area and fish exclusively within the NGOM Management Area. Compensation fishing in the NGOM Management Area could be done to support any research project awarded through the Scallop RSA. However, projects focusing on research in the NGOM would have the first opportunity to fish compensation allocation in the NGOM. NMFS would administer this process.

This action would not mandate that NGOM RSA be harvested strictly in the NGOM Management Area. Vessels allocated NGOM RSA would have an option to fish NGOM RSA in the NGOM or in any other area available to RSA compensation fishing.

Using a portion of the NGOM TAL to increase the size of the overall Scallop RSA program would allow for the funding of additional scallop-related research and provide opportunities for vessels to complete compensation fishing within the NGOM management unit. Limiting the amount of RSA compensation fishing that can occur in the NGOM is consistent with the goal of accurately monitoring catch in the management area.

Because 25,000 lb (11,340 kg) is a relatively small proportion of the current RSA, increasing the set-aside by this amount may have limited biological implications if the allocation can be

fished in any area open to compensation fishing. This would maintain some of the flexibility of the RSA program, while increasing the allocation available to support research. Further, a 25,000-lb (11,340-kg) set-aside is consistent with recent RSA awards that focused on research in the NGOM area.

Limited Access General Category Individual Fishing Quota Possession Limit

Amendment 21 would increase the LAGC IFQ possession limit to 800 lb (363 kg) for access area trips and maintain the 600-lb (172-kg) possession limit for open area trips. The LAGC IFQ component has been subject to a possession limit since the program's inception through Amendment 11. Interest in increasing the 600-lb (172-kg) trip limit through this action is based on the continued increase of operating expenses, which are principally driven by fuel costs associated with longer steam times. For LAGC IFQ vessels that elect to do so, transiting farther offshore to fish access areas with higher landings per unit of effort and improved meat yield leads to increased trip costs due to higher fuel expenses associated with longer steam times. Increasing the access area possession limit would reduce the overall number of trips and combined steam time needed to harvest quota from offshore access areas, thereby reducing overall trip costs (*i.e.,* fuel) and operating expenses (*i.e.,* vessel maintenance) relative to the current 600-lb (172-kg) limit. Increasing the access area possession limit could offer LAGC IFQ vessels more flexibility with regard to timing access area trips around weather conditions, which could potentially improve safety in this component of the fishery.

Observer Compensation Available for LAGC IFQ Vessels

Amendment 21 would make LAGC IFQ vessels eligible for additional compensation when carrying an observer on board and fishing trips longer than 1 day (24 hours). The daily compensation rate, as determined by NMFS, would be prorated at 12-hour increments for trips exceeding 24 hours. The amount of compensation a vessel could receive on one trip would be capped at 2 days (48 hours) and vessels fishing longer than 48 hours would not receive additional compensation allocation. For example, if the observer compensation rate is 200 lb/day (90.7 kg/day) and an LAGC IFQ vessel carrying an observer departs on July 1 at 2200 and lands on July 3 at 0100, the length of the trip would equal 27 hours, or 1 day and 3 hours. In this example, the LAGC IFQ vessel would be eligible for 1 day plus 12 hours of compensation allocation, *i.e.,* 300 lb (136 kg). An LAGC IFQ vessel would be able to harvest the trip limit and the daily compensation rate on the observed trip, or the vessel could harvest any unfished compensation on a subsequent trip while adhering to the commercial possession limit.

Aligning the amount that vessels can be compensated when carrying an observer with the length of a typical LAGC IFQ trip would reduce the risk of observer bias in the LAGC IFQ fishery. Currently, LAGC IFQ vessels are allowed 1 day of compensation for carrying an observer regardless of the length of a trip but are required to assume the cost of having the observer on board even when a trip exceeds the 1-day limit. Prorating in this method would make the level of compensation to a vessel more accurate with regard to the cost of carrying an observer on board for the full length of a trip. In addition, it would reduce the incentive for vessels to fish longer trips for the purpose of receiving additional compensation. Relieving vessels of the additional cost burden for trips of over 1 day would reduce the likelihood that fishing behavior would be different for observed trips versus unobserved trips.

Temporary Transfer of IFQ From Limited Access Vessels With IFQ (Combo Vessels) to LAGC IFQ-Only Vessels

Amendment 21 would allow temporary transfers of IFQ from combo vessels to LAGC IFQ-only permits and would maintain the existing prohibition on transferring quota in to combo vessels. This action would not change how IFQ is allocated. Quota accumulation caps would remain consistent with the limits established through Amendment 15 for LAGC IFQ-only permits, regardless of any additional quota that may become available through one-way, temporary transfers from combo vessels. An individual LAGC IFQ permit still would not be able to hold more than 2.5 percent of the IFQ allocated to the LAGC IFQ component in a year and an ownership entity still cannot hold more than 5 percent of the IFQ allocated to the LAGC IFQ component in a year.

Allowing one-way, temporary transfers from combo vessels to LAGC IFQ-only permits would increase the overall level of quota available to LAGC IFQ-only vessels, and it would not require changes to how allocations are estimated and distributed among the two fleets. Increasing the pool of quota that would be available to the LAGC IFQ-only fishery through temporary transfers could increase the level of participation for vessels currently in the fishery or potentially lead to more participation in terms of active vessels. Increasing potential harvest for existing participants and/or supporting additional vessels in the IFQ fishery would be expected to improve the overall performance of this component of the fishery. Allowing temporary transfers would give combo vessels the choice to lease out some or all of their quota on an annual basis.

Specifications and Framework Adjustment Process

The regulations at § 648.55 list management measures that may be changed or implemented through specifications or framework actions. During the development of Amendment 21, the Council identified a list of specific issues that may be addressed through future specifications actions or framework adjustments. The existing scallop regulations would not need to be expanded to address concepts that the Council would like to adjust through a specifications package or a framework adjustment in the future. The Council's list included:

1. § 648.55(f)(25) Set-asides for funding research;

a. Contribution of RSA percentage and/or assigned pounds from the NGOM allocation.

2. § 648.55(f)(31) Modifications to provisions associated with observer set-asides; observer coverage; observer deployment; observer service provider; and/or the observer certification regulations;

a. Observer set-aside percentage from the NGOM Allocation.

3. § 648.55(f)(35) Adjustments to the Northern Gulf of Maine scallop fishery measures;

a. Partition the NGOM into multiple sub-areas with separate allocations;

b. Partition the NGOM Set-Aside is multiple seasons;

c. Modify the F rate used to set the NGOM TAL; and

d. Harvest methods of the NGOM APL by the IFQ and limited access boats.

4. § 648.55(f)(37) Increases or decreases in the LAGC possession limit;

a. Accounting for access area trips in the LAGC IFQ fishery.

5. § 648.55(f)(38) Adjustments to aspects of ACL management, including accountability measures;

a. Modify how the NGOM is accounted for in the calculation of OFL, ABC, and ACLs.

In addition, the Council clarified that it could develop options for electronic monitoring to replace at-sea monitors in

a future framework based on existing language in these existing regulations:

1. § 648.55(f)(31) Modifications to provisions associated with observer set-asides; observer coverage; observer deployment; observer service provider; and/or the observer certification regulations;

2. § 648.55(g) *Industry-funded monitoring programs.* Fishery management plans (FMPs) managed by the New England Fishery Management Council (New England Council), including Atlantic Herring, Atlantic Salmon, Atlantic Sea Scallops, Deep-Sea Red Crab, Northeast Multispecies, and Northeast Skate Complex, may include industry-funded monitoring (IFM) programs to supplement existing monitoring required by the Standard Bycatch Reporting Methodology (SBRM), Endangered Species Act, and the Marine Mammal Protection Act. IFM programs may use observers, monitors, including at-sea monitors and portside samplers, and electronic monitoring to meet specified IFM coverage targets. The ability to meet IFM coverage targets may be constrained by the availability of Federal funding to pay NMFS cost responsibilities associated with IFM.

Identifying a list of changes that may be made to the FMP in subsequent specification packages or framework adjustments would give the Council flexibility to address specific issues without initiating an amendment to the FMP. This list is intended to capture the range of issues that could be taken up in a later action and was discussed during the development of Amendment 21, but is not intended to limit the range of issues that could be addressed under existing regulatory authority.

Regulatory Adjustments and Corrections Under Regional Administrator Authority

NMFS is proposing several changes consistent with section 305(d) of the Magnuson-Stevens Act, which provides that the Secretary of Commerce may promulgate regulations necessary to ensure that amendments to an FMP are carried out in accordance with the FMP and the Magnuson-Stevens Act. These adjustments do not make any substantive changes to the implications of the current regulations. First, NMFS would revise § 648.14(i) to more clearly define the prohibitions based on the scallop regulations at § 648 Subpart D. As a result, this proposed rule includes revisions to the regulatory text that would reorganize and condense references to possession limits and restrictions. The specific regulations being revised or removed are specified in Table 1. Second, in §§ 648.2, 648.14(i), 648.52, 648.55, and 648.59, NMFS would make revisions to consistently reference the Scallop Access Area Program throughout the regulations. Third, in § 648.14(i)(x), NMFS would clarify the presumption related to where scallops are caught (*i.e.,* Federal/state waters), not whether a vessel has a Federal scallop permit. Fourth, NMFS would update §§ 648.14(i)(x)(3)(iv)(B) and 648.52(a)(1) with a corrected reference to § 648.10(f). Fifth, in § 648.52(b), (c), (d), (e), (f), NMFS would add headings for consistency across paragraphs. Sixth, in § 648.52(f), NMFS would remove duplicative possession limit language for IFQ vessels. Seventh, in § 648.53(h)(3)(i)(A) and (B), NMFS would clarify that the IFQ accumulation cap applies to the annual IFQ allocation, not the IFQ sub-ACL. Eighth, in § 648.53(h)(5)(i) and (ii), NMFS would clarify that these regulations apply to IFQ permit holders regardless of whether the permit is in confirmation of permit history (CPH). Ninth, in § 648.59(b)(4), to promote safety at sea, NMFS would allow vessels to enter or exit a Scallop Access Area more than once per trip if there is a compelling safety reason.

Finally, due to the extensive regulatory changes in this action, we are updating references throughout the scallop regulations that will change based on the proposed regulatory adjustments. We have included a summary of all of the proposed regulatory changes in this rule in Table 1.

TABLE 1—SUMMARY OF PROPOSED REGULATORY CHANGES TO 50 CFR PART 648

Section	Authority	Summary of proposed changes
§§ 648.2, 648.14(i), 648.52, 648.55, 648.59	305(d)	Changing to consistently reference the Scallop Access Area Program throughout the regulations.
§ 648.14(i)(iii)	305(d)	Clarifying possession limits and restrictions which are already described in §§ 648.52 and 648.59.
§ 648.14(i)(x)	305(d)	Clarifying the presumption related to where scallops are caught (*i.e.,* Federal/state waters), not whether a vessel has a Federal scallop permit.
§ 648.14(i)(x)(3)(iii)(C) and (D)	305(d)	Clarifying possession limits and restrictions which are already described in § 648.52 for LAGC vessels in the NGOM are clearly stated later in the section specific to IFQ and NGOM vessels. Deleting to remove duplicative text.
§§ 648.14(i)(x)(3)(iv)(B), 648.52(a)(1)	305(d)	Updating with corrected reference to § 648.10(f).
§ 648.14(i)(x)(4)(i)(A)	305(d) and Amendment 21	Revising IFQ possession and landing regulations based on Amendment 21 measures. Clarify regulations by referencing IFQ possession limits for open and access areas in § 648.52(a).
§ 648.14(i)(x)(4)(i)(C)	Amendment 21	Updating NGOM landings and possession regulations with Amendment 21 language (*i.e.,* NGOM Set-Aside).
§ 648.14(i)(x)(4)(i)(D) and (G)	305(d)	Reducing duplicative language around possession and landing limits that are clearly stated later in § 648.52(a) and (c).
§ 648.14(i)(x)(5)(ii)	305(d)	Clarifying by cutting duplicative landings and possession prohibition, and referencing NGOM possession limit that is clearly stated in § 648.52(a).
§ 648.14(i)(x)(5)(iii)	Amendment 21	Updating NGOM regulations with Amendment 21 language (*i.e.,* NGOM Set-Aside).

TABLE 1—SUMMARY OF PROPOSED REGULATORY CHANGES TO 50 CFR PART 648—Continued

Section	Authority	Summary of proposed changes
§ 648.14(i)(x)(6)	305(d)	Clarifying regulations by removing duplicative landing and possession limit prohibition for incidental permits, and referencing incidental possession limit that is clearly stated in § 648.52.
§ 648.52(a)(1) and (2)	Amendment 21	Updating regulations with LAGC IFQ possession limits for open and access area trips.
§ 648.52(a)(2)	Amendment 21	Clarifying that default access area trips in fishing year 2022 will be subject to the 600-lb (272-kg) trip limit.
§ 648.52(b), (c), (d), (e), (f)	305(d)	Adding headings for consistency.
§ 648.52(a)(2)	Amendment 21	Making in-shell possession limit consistent with increased LAGC IFQ access area trip limit.
§ 648.52(b)	Amendment 21	Updating NGOM regulations with Amendment 21 language (*i.e.,* NGOM Set-Aside).
§ 648.52(f)	305(d)	Removing duplicative possession limit language for IFQ vessels.
§ 648.53(a)(3)(ii)	Amendment 21	Updating APL language to incorporate NGOM catch limit measures.
§ 648.53(a)(8)	Amendment 21	Adding language describing NGOM TAL and allocation structure.
§ 648.53(g)(1)	Amendment 21	Including NGOM contribution to observer set-aside.
§ 648.53(h)(3)(i)(A) and (B)	305(d)	Clarifying that the IFQ accumulation cap applies to the annual IFQ allocation, not the IFQ sub-ACL.
§ 648.53(h)(5)(i) and (ii)	305(d)	Clarifying that these regulations apply to IFQ permit holders regardless of whether permit is in CPH.
§ 648.53(h)(5)(i)(B)	Amendment 21	Specifying that temporary transfers from combo vessels to IFQ-only are allowed.
§ 648.53(h)(5)(ii)(A) and (iii)	Amendment 21	Clarifying that combo vessels are prohibited from permanently transferring or receiving IFQ.
§ 648.55(a)(1)	Amendment 21	Updating language to reflect NGOM catch limits.
§ 648.56(d)	Amendment 21	Including NGOM contribution to RSA.
§ 648.59(b)(4)	305(d)	Adjusting to promote safety at sea.

Classification

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the NMFS Assistant Administrator has made a preliminary determination that this proposed rule is consistent with the FMP, other provisions of the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

The Chief Council for Regulation of the Department of Commerce certified to the Chief Council for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities.

During the development of preferred alternatives in Amendment 21, NMFS and the Council considered ways to reduce the regulatory burden on and provide flexibility to the regulated community. The measures that would be implemented by the preferred alternatives related to NGOM allocations and the LAGC IFQ possession limit in access areas, along with other Amendment 21 actions, would increase the economic benefits on small entities both in the short- and long-term. The proposed action for the NGOM allocation would adjust landing limits and related research and observer set-asides based on annual scallop surveys in the NGOM area, leading to increased harvest and wider fishery participation in the future. However, there would be no change to the LAGC IFQ allocation when increasing the LAGC IFQ possession limit in access areas.

Overall, the preferred alternatives in Amendment 21 would ensure that catch levels are sustainable, reduce the risk of overfishing, and maximize yield and economic benefits. The establishment of the NGOM Set-Aside and the increase to the LAGC IFQ access area possession limit are expected to have an immediate positive economic gain with potential for increased fishing participants/participation or effort, particularly in the NGOM area when there are more scallop fishing opportunities. The preferred alternatives in other actions of Amendment 21 also have overall positive economic effects benefitting both small and large entities.

As a result, an initial regulatory flexibility analysis is not required and none has been prepared.

This proposed rule contains a collection-of-information requirement subject to review and approval by Office of Management and Budget (OMB) under the Paperwork Reduction Act (PRA). This rule revises the existing requirements for the collection of information OMB Control No. 0648–0546 by expanding the number of vessels required to carry observers and call-in to the observer program. Prior to Amendment 21, NGOM-permitted vessels were not required to carry observers. Amendment 21 would require that NGOM vessels call in to the observer program and, when selected, procure and carry an observer. Expanding the observer call-in requirement to directed scallop fishing in the NGOM means that monitoring requirements will be consistent for all scallop permit types across the entirety of the Atlantic sea scallop resource within the U.S. Exclusive Economic Zone. This proposed change would increase the number of respondents by 110 (512 respondents to 622 respondents). This would result in an additional 933 (5,252 hours to 6,185 hours) burden hours and an additional $5,608 ($44,937 to $50,545) in total annual cost burden to the respondents. Public reporting burden for calling into the observer program is estimated to average 10 minutes, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and

completing and reviewing the collection of information.

Public comment is sought regarding whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the burden estimate; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information, including through the use of automated collection techniques or other forms of information technology. Submit comments on these or any other aspects of the collection of information at *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function and entering the OMB Control Number 0648–0546.

Notwithstanding any other provisions of the law, no person is required to respond or, nor shall any person by subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

List of Subjects in 50 CFR Part 648

Fisheries, Fishing, Recordkeeping and reporting requirements.

Dated: September 16, 2021.

Samuel D. Rauch, III,

Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 648 is proposed to be amended as follows:

PART 648—FISHERIES OF THE NORTHEASTERN UNITED STATES

■ 1. The authority citation for part 648 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 648.2, revise the definition of ''Open areas'' to read as follows:

§ 648.2 Definitions.

* * * * *

Open areas, with respect to the Atlantic sea scallop fishery, means any area that is not subject to restrictions of the Scallop Access Area Program specified in §§ 648.59 and 648.60, the Northern Gulf of Maine Management Area specified in § 648.62, Habitat Management Areas specified in § 648.370, Dedicated Habitat Research areas specified in § 648.371, the Frank R. Lautenberg Deep-Sea Coral Protection Area described in § 648.372, or the New England Deep-Sea Coral Protection Area in § 648.373.

* * * * *

■ 3. Amend § 648.14 by:
■ a. Revising paragraphs (i)(1)(iii) and (x), (i)(2)(vi) introductory text, and (i)(2)(vi) (C), (D), and (E);
■ b. Removing paragraphs (i)(3)(iii)(C) and (D);
■ c. Revising paragraph (i)(3)(iv)(B), (i)(3)(v)(C) and (D), (i)(4)(i)(A);
■ d. Removing and reserving paragraph (i)(4)(i)(B);
■ e. Revising paragraph (i)(4)(i)(C);
■ f. Removing and reserving paragraph (i)(4)(i)(D);
■ g. Removing paragraphs (i)(4)(i)(G) and (H);
■ h. Revising paragraphs (i)(4)(ii)(A) and (B);
■ i. Removing and reserving paragraph (i)(5)(ii);
■ j. Revising paragraph (i)(5)(iii); and
■ k. Removing paragraph (i)(6).

The revisions read as follows:

§ 648.14 Prohibitions.

* * * * *

(i) * * *

(1) * * *

(iii) *Possession and landing.* Fish for, land, or possess on board a vessel per trip, or possess at any time prior to a transfer to another person for a commercial purpose, other than solely for transport on land in excess of any of the possession and/or landing limits described in §§ 648.52 and 648.59.

* * * * *

(x) *Presumption.* For purposes of this section, the following presumption applies: Scallops that are possessed or landed at or prior to the time when the scallops are received by a dealer, or scallops that are possessed by a dealer, are deemed to be harvested from the EEZ, unless the preponderance of evidence demonstrates that such scallops were harvested by a vessel fishing exclusively for scallops in state waters.

* * * * *

(2) * * *

(vi) *Scallop Rotational Area Management Program and Scallop Access Area Program requirements.*

(C) Fish for, possess, or land scallops in or from a Scallop Access Area in excess of the vessel's remaining specific allocation for that area as specified in § 648.59(b)(3) or the amount permitted to be landed from that area.

(D) Possess more than 50 bu (17.6 hL) of in-shell scallops outside the boundaries of a Scallop Access Area by a vessel that is declared into the Scallop Access Area Program as specified in § 648.59.

(E) Fish for, possess, or land scallops in or from any Scallop Access Area without an observer on board, unless the vessel owner, operator, or manager has received a waiver to carry an observer for the specified trip and area fished.

* * * * *

(3) * * *

(iv) * * *

(B) Fail to comply with any requirement for declaring in or out of the LAGC scallop fishery or other notification requirements specified in § 648.10(f).

* * * * *

(v) * * *

(C) Fish for or land per trip, or possess in excess of 40 lb (18.1 kg) of shucked scallops at any time in or from any Scallop Access Area specified at § 648.60, unless declared into the Scallop Access Area Program.

(D) Fish for, possess, or land scallops in or from any Scallop Access Area without an observer on board, unless the vessel owner, operator, or manager has received a waiver to carry an observer for the specified trip and area fished.

* * * * *

(4) * * *

(i) * * *

(A) Fish for or land per trip, or possess at any time, in excess of the possession and landing limits described in § 648.52(a).

* * * * *

(C) Declare into the NGOM scallop management area and fish against the NGOM Set-Aside after the effective date of a notification published in the **Federal Register** stating that after the NGOM Set-Aside has been harvested as specified in § 648.62, unless the vessel is fishing exclusively in state waters, declared a state-waters only NGOM trip, and is participating in an approved state waters exemption program as specified in § 648.54, or unless the vessel is participating in the scallop RSA program as specified in § 648.56.

* * * * *

(ii) * * *

(A) Have an ownership interest in vessels that collectively are allocated more than 5 percent of the total IFQ scallop APL as specified in § 648.53(a)(9).

(B) Have an IFQ allocation on an IFQ scallop vessel of more than 2.5 percent of the total IFQ scallop APL as specified in § 648.53(a)(9).

* * * * *

(5) * * *

(iii) Fish for, possess, or land scallops in state or Federal waters of the NGOM

management area after the effective date of notification in the **Federal Register** that the LAGC share of the NGOM Set-Aside has been harvested as specified in § 648.62, unless the vessel is fishing exclusively in state waters, declared a state-waters only NGOM trip, and is participating in an approved state waters exemption program as specified in § 648.54, or unless the vessel is participating in the scallop RSA program as specified in § 648.56.

* * * * *

■ 4. In § 648.52, revise paragraphs (a) through (f) to read as follows:

§ 648.52 Possession and landing limits.

(a) *IFQ trips.*

(1) *Open area trips.* A vessel issued an IFQ scallop permit that is declared into the IFQ scallop fishery in the open area, as specified in § 648.10(f), or on a properly declared NE multispecies, surfclam, or ocean quahog trip (or other fishery requiring a VMS declaration) and not fishing in a scallop access area, unless as specified in paragraph (g) of this section or exempted under the state waters exemption program described in § 648.54, may not possess or land, per trip, more than 600 lb (272 kg) of shucked scallops, or possess more than 75 bu (26.4 hL) of in-shell scallops shoreward of the VMS Demarcation Line. Such a vessel may land scallops only once in any calendar day. Such a vessel may possess up to 100 bu (35.2 hL) of in-shell scallops seaward of the VMS Demarcation Line on a properly declared IFQ scallop trip, or on a properly declared NE multispecies, surfclam, or ocean quahog trip, or other fishery requiring a VMS declaration, and not fishing in a scallop access area.

(2) *Access areas trips.* A vessel issued an IFQ scallop permit that is declared into the IFQ Scallop Access Area Program, as specified in § 648.10(f), may not possess or land, per trip, more than 800 lb (363 kg) of shucked scallops, or possess more than 100 bu (35.2 hL) of in-shell scallops shoreward of the VMS Demarcation Line. Such a vessel may land scallops only once in any calendar day. Such a vessel may possess up to 100 bu (35.2 hL) of in-shell scallops seaward of the VMS Demarcation Line on a properly declared IFQ scallop access area trip. Vessels fishing the 2022 default access area trips shall be subject to a 600-lb (272-kg) possession limit, as described in § 648.59(g)(3)(v).

(b) *NGOM trips.* A vessel issued an NGOM scallop permit, or an IFQ scallop permit that is declared into the NGOM scallop fishery and fishing against the NGOM Set-Aside as described in § 648.62, unless exempted under the state waters exemption program described under § 648.54, may not possess or land, per trip, more than 200 lb (90.7 kg) of shucked scallops, or possess more than 25 bu (8.81 hL) of in-shell scallops shoreward of the VMS Demarcation Line. Such a vessel may land scallops only once in any calendar day. Such a vessel may possess up to 50 bu (17.6 hL) of in-shell scallops seaward of the VMS demarcation line on a properly declared NGOM scallop fishery trip.

(c) *Incidental trips.* A vessel issued an Incidental scallop permit, or an IFQ scallop permit that is not declared into the IFQ scallop fishery or on a properly declared NE multispecies, surfclam, or ocean quahog trip or other fishery requiring a VMS declaration as required under § 648.10(f), unless exempted under the state waters exemption program described under § 648.54, may not possess or land, per trip, more than 40 lb (18.1 kg) of shucked scallops, or possess more than 5 bu (1.76 hL) of in-shell scallops shoreward of the VMS Demarcation Line. Such a vessel may land scallops only once in any calendar day. Such a vessel may possess up to 10 bu (3.52 hL) of in-shell scallops seaward of the VMS Demarcation Line.

(d) *Limited access vessel access area trips.* Owners or operators of vessels with a limited access scallop permit that have properly declared into the Scallop Access Area Program as described in § 648.59 are prohibited from fishing for or landing per trip, or possessing at any time, scallops in excess of any sea scallop possession and landing limit set by the Regional Administrator in accordance with § 648.59(b)(5).

(e) *Limited access vessel open area in-shell scallop possession limit.* Owners or operators of vessels issued limited access permits are prohibited from fishing for, possessing, or landing per trip more than 50 bu (17.6 hl) of in-shell scallops shoreward of the VMS Demarcation Line, unless when fishing under the state waters exemption specified under § 648.54.

(f) *Limited access vessel access area in-shell scallop possession limit.* A limited access vessel that is declared into the Scallop Area Access Program as described in § 648.59, may not possess more than 50 bu (17.6 hL) of in-shell scallops outside of the Access Areas described in § 648.60.

* * * * *

■ 5. Amend § 648.53 by:

■ a. Revising paragraphs (a)(3)(ii), (8), (g)(1), (h)(3)(i)(A) and (B), (5)(i), (5)(ii)(A), and (5)(iii); and

■ b. Adding paragraph (a)(9).

The revisions and addition read as follows:

§ 648.53 Overfishing limit (OFL), acceptable biological catch (ABC), annual catch limits (ACL), annual catch targets (ACT), annual projected landings (APL), DAS allocations, individual fishing quotas (IFQ).

(a) * * *

(3) * * *

(ii) *APL.* The APL shall be equal to the combined projected landings by the limited access and LAGC IFQ, in open areas, access areas, and Northern Gulf of Maine management area after set-asides (RSA, NGOM, and observer) and incidental landings are accounted for, for a given fishing year. Projected scallop landings are calculated by estimating the landings that will come from open area, access area, and Northern Gulf of Maine effort combined for both limited access and LAGC IFQ fleets. These projected landings shall not exceed the overall ABC/ACL and ACT, as described in paragraph (a) of this section.

* * * * *

(8) *Northern Gulf of Maine Total Allowable Landings (TAL).* The NGOM TAL is the landings available for harvest from the NGOM Management Area. The TAL shall be set by applying a fishing mortality rate of F=0.15 to F=0.25 to exploitable biomass estimated from open areas of the NGOM.

(i) *NGOM Observer Set-Aside.* The NGOM TAL shall be reduced by 1 percent to off-set monitoring costs for vessels fishing in this area. The NGOM monitoring set-aside would be added to the fishery-wide observer set-aside, as described in paragraph (g) of this section.

(ii) *NGOM Research Set-Aside.* The NGOM TAL shall be reduced by 25,000 lb (11,340 kg) to be added to the fishery-wide research set-aside, as described in § 648.56(d).

(iii) *Northern Gulf of Maine Set-Aside.* The NGOM Set-Aside shall be the portion of the NGOM TAL that is available for harvest by the LAGC IFQ and NGOM fleets at 200 lb (91 kg) per trip per day as set through specifications. After the observer and research set-asides are removed, the first 800,000 lb (362,874 kg) of the NGOM TAL shall be allocated to the NGOM Set-Aside. For all allocation above 800,000 lb (362,874 kg), 5 percent shall go to the NGOM Set-Aside, and 95 percent shall go to the NGOM Annual Projected Landings.

(iv) *NGOM APL.* The NGOM APL shall be the portion of the NGOM TAL that is available for harvest for the limited access and LAGC IFQ fleets set through specifications after the observer and research set-asides are removed and the first 800,000 lb (362,874 kg) of the

NGOM TAL are allocated to the NGOM Set-Aside. For all allocation above 800,000 lb (362,874 kg), 5 percent shall go to the NGOM set-aside, and 95 percent shall go to the NGOM APL. The method in which the limited access and LAGC IFQ components will access the NGOM APL will be determined in future specifications.

(9) *Scallop fishery catch limits.* The following catch limits will be effective for the 2021 and 2022 fishing years:

TABLE 1 TO PARAGRAPH (a)(9)—SCALLOP FISHERY CATCH LIMITS

Catch limits	2021 (mt)	2022 (mt) [1]
OFL	45,392	41,926
ABC/ACL (discards removed)	30,517	28,074
Incidental Catch	23	23
RSA	567	567
Observer Set-Aside	305	281
ACL for fishery	29,622	27,203
Limited Access ACL	27,993	25,707
LAGC Total ACL	1,629	1,496
LAGC IFQ ACL (5 percent of ACL)	1,481	1,360
Limited Access with LAGC IFQ ACL (0.5 percent of ACL)	148	136
Limited Access ACT	24,260	22,279
APL (after set-asides removed)	17,269	([1])
Limited Access APL (94.5 percent of APL)	16,319	([1])
Total IFQ Annual Allocation (5.5 percent of APL) [2]	950	712
LAGC IFQ Annual Allocation (5 percent of APL) [2]	863	648
Limited Access with LAGC IFQ Annual Allocation (0.5 percent of APL) [2]	86	65

[1] The catch limits for the 2022 fishing year are subject to change through a future specifications action or framework adjustment. This includes the setting of an APL for 2022 that will be based on the 2021 annual scallop surveys. The 2022 default allocations for the limited access component are defined for DAS in paragraph (b)(3) of this section and for access areas in § 648.59(b)(3)(i)(B).

[2] As specified in paragraph (a)(6)(iii)(B) of this section, the 2022 IFQ annual allocations are set at 75 percent of the 2021 IFQ Annual Allocations.

* * * * *

(g) * * *

(1) To help defray the cost of carrying an observer, 1 percent of the ABC/ACL defined in paragraph (a)(3) of this section and 1 percent of the NGOM ABC/ACL shall be set aside to be used by vessels that are assigned to take an at-sea observer on a trip. This observer set-aside is specified through the specifications or framework adjustment process defined in § 648.55.

* * * * *

(3) * * *

(i) * * *

(A) Unless otherwise specified in paragraphs (h)(3)(i)(B) and (C) of this section, a vessel issued an IFQ scallop permit or confirmation of permit history shall not be issued more than 2.5 percent of the IFQ-only annual allocation to the IFQ scallop vessels as described in paragraph (a)(6) of this section.

(B) A vessel may be initially issued more than 2.5 percent of the IFQ-only annual allocation allocated to the IFQ scallop vessels as described in paragraph (a)(6) of this section, if the initial determination of its contribution factor specified in accordance with § 648.4(a)(2)(ii)(E) and paragraph (h)(2)(ii) of this section, results in an IFQ that exceeds 2.5 percent of the IFQ-only annual allocation to the IFQ scallop vessels as described in paragraph (a)(6) of this section. A vessel that is allocated an IFQ that exceeds 2.5 percent of the IFQ-only annual allocation to the IFQ scallop vessels as described in paragraph (a)(6) of this section, in accordance with this paragraph (h)(3)(i)(B), may not receive IFQ through an IFQ transfer, as specified in paragraph (h)(5) of this section. All scallops that have been allocated as part of the original IFQ allocation or transferred to a vessel during a given fishing year shall be counted towards the vessel cap.

* * * * *

(5) * * *

(i) *Temporary IFQ transfers.* (A) *IFQ-only vessels.* Subject to the restrictions in paragraph (h)(5)(iii) of this section, the owner of an IFQ scallop vessel (and/or IFQ scallop permit in confirmation of permit history) not issued a limited access scallop permit may temporarily transfer (*e.g.,* lease) its entire IFQ allocation, or a portion of its IFQ allocation, to another IFQ scallop vessel (and/or IFQ scallop permit in confirmation of permit history) not issued a limited access scallop permit. Temporary IFQ transfers shall be effective only for the fishing year in which the temporary transfer is requested and processed. IFQ can be temporarily transferred more than once (*i.e.,* re-transferred). For example, if a vessel temporarily transfers IFQ to a vessel, the transferee vessel may re-transfer any portion of that IFQ to another vessel. There is no limit on how many times IFQ can be re-transferred in a fishing year. The Regional Administrator has final approval authority for all temporary IFQ transfer requests.

(B) *Limited access vessels with LAGC IFQ.* Subject to the restrictions in paragraph (h)(5)(iii) of this section, the owner of a limited access vessel with LAGC IFQ (and/or a limited access permit with LAGC IFQ in confirmation of permit history) may temporarily transfer (*e.g.,* lease) its entire IFQ allocation, or a portion of its IFQ allocation, to an IFQ-only scallop vessel that does not have a limited access permit. Temporary IFQ transfers shall be effective only for the fishing year in which the temporary transfer is requested and processed. IFQ can be temporarily transferred more than once (*i.e.,* re-transferred). The Regional Administrator has final approval authority for all temporary IFQ transfer requests.

* * * * *

(ii) * * *

(A) Subject to the restrictions in paragraph (h)(5)(iii) of this section, the owner of an IFQ scallop vessel (and/or IFQ scallop permit in confirmation of permit history) not issued a limited access scallop permit may transfer IFQ permanently to or from another IFQ scallop vessel (and/or IFQ scallop

permit in confirmation of permit history) not issued a limited access scallop permit. Any such transfer cannot be limited in duration and is permanent as to the transferee, unless the IFQ is subsequently permanently transferred to another IFQ scallop vessel. IFQ may be permanently transferred to a vessel and then be re-transferred (temporarily transferred (*i.e.,* leased) or permanently transferred) by such vessel to another vessel in the same fishing year. There is no limit on how many times IFQ can be re-transferred in a fishing year. Limited access vessels with LAGC IFQ permits are prohibited from permanently transferring or receiving IFQ.

* * * * *

(iii) *IFQ transfer restrictions.* The owner of an IFQ scallop vessel (and/or IFQ scallop permit in confirmation of permit history) not issued a limited access scallop permit may transfer that vessel's IFQ to another IFQ scallop vessel, regardless of whether or not the vessel has fished under its IFQ in the same fishing year. Requests for IFQ transfers cannot be less than 100 lb (46.4 kg), unless that the transfer reflects the total IFQ amount remaining on the transferor's vessel, or the entire IFQ allocation. IFQ may be temporarily or permanently transferred to a vessel and then temporarily re-transferred (*i.e.,* leased) or permanently re-transferred by such vessel to another vessel in the same fishing year. There is no restriction on how many times IFQ can be re-transferred. A transfer of an IFQ may not result in the sum of the IFQs on the receiving vessel exceeding 2.5 percent of the allocation to IFQ-only scallop vessels. A transfer of an IFQ, whether temporary or permanent, may not result in the transferee having a total ownership of, or interest in, general category scallop allocation that exceeds 5 percent of the allocation to IFQ-only scallop vessels. Limited access scallop vessels that are also issued an IFQ scallop permit may not permanently transfer or receive IFQ. Further, they may not temporarily receive IFQ.

* * * * *

■ 6. In § 648.55, revise paragraphs (a)(1) and (f) introductory text to read as follows:

§ 648.55 Specifications and framework adjustments to management measures.

(a) * * *

(1) The Scallop Plan Development Team (PDT) shall meet at least every 2 years to assess the status of the scallop resource and to develop and recommend the following specifications for a period of up to 2 years, as well as second or third-year default measures, for consideration by the New England Fishery Management Council's Atlantic Sea Scallop Oversight Committee and Advisory Panel: OFL, overall ABC/ACL, sub-ACLs, sub-ACTs, DAS open area allocations, possession limits, modifications to rotational area management (*e.g.,* schedule, rotational closures and openings, seasonal restrictions, modifications to boundaries, etc.), access area limited access poundage allocations and LAGC IFQ fleet-wide trip allocations, annual incidental catch target TAC, and NGOM TAL.

* * * * *

(f) *Framework adjustments.* The Council may at any time initiate a framework adjustment to add or adjust management measures within the Scallop FMP if it finds that action is necessary to meet or be consistent with the goals and objectives of the FMP. The Council shall develop and analyze appropriate management actions over the span of at least two Council meetings. To address interactions between the scallop fishery and sea turtles and other protected species, such adjustments may include proactive measures including, but not limited to, the timing of Sea Scallop Access Area openings, seasonal closures, gear modifications, increased observer coverage, and additional research. The Council shall provide the public with advance notice of the availability of both the proposals and the analyses, and opportunity to comment on them prior to and at the second Council meeting. The Council's recommendation on adjustments or additions to management measures may include specifications measures specified in paragraph (a) of this section, which must satisfy the criteria set forth § 648.53(a) in order to prevent overfishing of the available biomass of scallops and ensure that OY is achieved on a continuing basis. Other measures that may be changed or implemented through framework action include:

* * * * *

■ 7. In § 648.56, revise paragraph (d) is to read as follows:

§ 648.56 Scallop research.

* * * * *

(d) Available RSA allocation shall be 1.275 million lb (578 mt) annually, which shall be deducted from the ABC/ACL specified in § 648.53(a) prior to setting ACLs for the limited access and LAGC fleets, as specified in § 648.53(a)(3) and (4), respectively. Approved RSA projects shall be allocated an amount of scallop allocation that can be harvested in open areas, available access areas, and the NGOM. The specific access areas that are open to RSA harvest and the amount of NGOM allocation to be landed through RSA harvest shall be specified through the framework process as identified in § 648.59(e)(1). In a year in which a framework adjustment is under review by the Council and/or NMFS, NMFS shall make RSA awards prior to approval of the framework, if practicable, based on total scallop allocation needed to fund each research project. Recipients may begin compensation fishing in open areas prior to approval of the framework, or wait until NMFS approval of the framework to begin compensation fishing within approved access areas.

* * * * *

■ 8. In § 648.59, revise the section title and paragraphs (a) introductory text, (a)(3), (b)(4), (g)(3)(i), and (4)(ii) to read as follows:

§ 648.59 Scallop Rotational Area Management Program and Scallop Access Area Program requirements.

(a) The Scallop Rotational Area Management Program consists of Scallop Rotational Areas, as defined in § 648.2. Guidelines for this area rotation program (*i.e.,* when to close an area and reopen it to scallop fishing) are provided in § 648.55(a)(6). Whether a rotational area is open or closed to scallop fishing in a given year, and the appropriate level of access by limited access and LAGC IFQ vessels, are specified through the specifications or framework adjustment processes defined in § 648.55. When a rotational area is open to the scallop fishery, it is called an Access Area and scallop vessels fishing in the area are subject to the Scallop Access Area Program Requirements specified in this section. Areas not defined as Scallop Rotational Areas specified in § 648.60, Habitat Management Areas specified in § 648.370, or areas closed to scallop fishing under other FMPs, are governed by other management measures and restrictions in this part and are referred to as Open Areas.

* * * * *

(3) *Transiting a Scallop Access Area.* Any sea scallop vessel that has not declared a trip into the Scallop Access Area Program may enter a Scallop Access Area, and possess scallops not caught in the Scallop Access Areas, for transiting purposes only, provided the vessel's fishing gear is stowed and not available for immediate use as defined in § 648.2. Any scallop vessel that has declared a trip into the Scallop Area Access Program may not enter or be in another Scallop Access Area on the

same trip except such vessel may transit another Scallop Access Area provided its gear is stowed and not available for immediate use as defined in § 648.2, or there is a compelling safety reason to be in such areas without such gear being stowed. A vessel may only transit the Closed Area II Scallop Rotational Area, as defined in § 648.60(d), if there is a compelling safety reason for transiting the area and the vessel's fishing gear is stowed and not available for immediate use as defined in § 648.2.

* * * * *

(b) * * *

(4) *Area fished.* While on a Scallop Access Area trip, a vessel may not fish for, possess, or land scallops in or from areas outside the Scallop Access Area in which the vessel operator has declared the vessel will fish during that trip, and may not enter or exit the specific declared Scallop Access Area more than once per trip unless there is a compelling safety reason. A vessel on a Scallop Access Area trip may not enter or be in another Scallop Access Area on the same trip except such vessel may transit another Scallop Access Area as provided for under paragraph (a)(3) of this section.

* * * * *

(g) * * *

(3) * * *

(i) An LAGC scallop vessel authorized to fish in the Scallop Rotational Areas specified in § 648.60 or in paragraph (g)(3)(iv) of this section may land scallops, subject to the possession limit specified in § 648.52(a)(2), unless the Regional Administrator has issued a notice that the number of LAGC IFQ access area trips have been or are projected to be taken. All LAGC IFQ access area trips must be taken in the fishing year that they are allocated (*i.e.,* there are no carryover trips). The total number of LAGC IFQ trips in an Access Area is specified in the specifications or framework adjustment processes defined in § 648.55.

* * * * *

(4) * * *

(ii) *Other species.* Unless issued an LAGC IFQ scallop permit and fishing under an approved NE multispecies SAP under NE multispecies DAS, an LAGC IFQ vessel fishing in the Closed Area I, Closed Area II, Closed Area II Extension, and Nantucket Lightship Rotational Areas specified in § 648.60, and the Nantucket Lightship North Scallop Access Area specified in paragraph (g)(3)(iv) of this section is prohibited from possessing any species of fish other than scallops and monkfish, as specified in § 648.94(c)(8)(i). Such a vessel may fish in an approved SAP under § 648.85 and under multispecies DAS in the scallop access area, provided that it has not declared into the Scallop Access Area Program. Such a vessel is prohibited from fishing for, possessing, or landing scallops.

Notices

Federal Register
Vol. 86, No. 190
Tuesday, October 5, 2021

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Forest Service

Notice of Proposed New Fee Sites

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice of proposed new fee sites.

SUMMARY: The Humboldt-Toiyabe National Forest (Forest) is proposing to charge new fees at one group campground, two campgrounds, and one new horse campground. These sites are currently in use by the public but are not currently charging fees for use. Funds from fees would be used for the continued operation and maintenance of these recreation sites. Fees are assessed based on the level of amenities and services provided, cost of operation and maintenance, market assessment, and public comment. Significant capital improvements made in the past few years, coupled with increased visitation, support a fee. A review of visitor use data and fee collection information for existing fee campgrounds and group campgrounds on the Forest demonstrate public need and demand for the variety of recreation opportunities these facilities provide.

DATES: If approved, the new fee would be implemented no earlier than six months following the publication of this notice in the **Federal Register**.

ADDRESSES: Humboldt-Toiyabe National Forest, Attention: Erin Rajala, 825 Avenue E, Ely, Nevada 89301 or *erin.rajala@usda.gov.*

FOR FURTHER INFORMATION CONTACT: Erin Rajala, Recreation and Wilderness Program Manager at 775–289–5129. Information about proposed fee changes can also be found on the Humboldt-Toiyabe National Forest website: *https://www.fs.usda.gov/htnf.*

SUPPLEMENTARY INFORMATION: The Federal Recreation Lands Enhancement Act (Title VII, Pub. L. 108–447) directed the Secretary of Agriculture to publish a six-month advance notice in the **Federal Register** whenever new recreation fee areas are established. A market analysis indicated that the proposed fees are both reasonable and acceptable for the type of recreation experience they provide.

The fees are only proposed at this time and will be determined upon further analysis and public comment. The following campground and group campground are included in this proposal for new fees: Horse Campground for $10 per night and Kalamazoo and White River Campgrounds for $5 per night. Bird Creek Campground is proposing a new double campsite fee for $15 per night and group sites at $20 and $45 per night.

Once public involvement is complete, these new fees will be reviewed and approved by a Recreation Resource Advisory Committee prior to a final decision and implementation.

Dated: September 29, 2021.

Sandra Watts,

Acting Associate Deputy Chief, National Forest System.

[FR Doc. 2021–21571 Filed 10–4–21; 8:45 am]

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Forest Service

Notice of Proposed New Fee Sites

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice of proposed new fee sites.

SUMMARY: The Okanogan-Wenatchee National Forest is proposing to charge new fees at 23 recreation sites listed in **SUPPLEMENTARY INFORMATION** of this notice. Many sites have recently been reconstructed or amenities are being added to improve services and experiences. Fees are assessed based on the level of amenities and services provided, cost of operation and maintenance, market assessment, and public comment. Funds from fees would be used for the continued operation and maintenance of these recreation sites.

DATES: If approved, the new fees would be implemented no earlier than six months following the publication of this notice in the **Federal Register**.

ADDRESSES: ATTN: Recreation Fee Proposals, Okanogan-Wenatchee National Forest, 215 Melody Lane, Wenatchee, WA 98801.

FOR FURTHER INFORMATION CONTACT: Suzanne Cable, Recreation Fee Coordinator, 509–664–9394, or *SM.FS.FeeProposal@usda.gov.*

SUPPLEMENTARY INFORMATION: The Federal Recreation Lands Enhancement Act (Title VII, Pub. L. 108–447) directed the Secretary of Agriculture to publish a six-month advance notice in the **Federal Register** whenever new recreation fee areas are established.

As part of this proposal, Mystery Campground, Three Creek Campground, Nice Campground, and North Fork Campground would be converted to group campgrounds offering a new opportunity for the public and available to reserve at $40–$75/night. A $5 day-use fee at Lower Echo Trailhead, Spillway Day Use Area, Upper Echo Trailhead, Blackpine Lake Picnic Area, Swiftwater Picnic Area, Conrad Meadows Trailhead, Crater Creek Trailhead, Foggy Dew Trailhead, Goat Peak Trailhead, Lower Mad River Trailhead, Penstock Trailhead, Pot Peak Trailhead, Rattlesnake Creek Trailhead, and Chickadee Trailhead would be added to improve services and facilities, and recreation passes would be honored. This proposal would also implement new fees at eight campgrounds (Antilon Lake, Crawfish Lake, Grasshopper Meadow, Lake Creek, Napeequa Crossing, North Summit Horse Camp, Rainy Creek, and White River Falls), all proposed at $10 per night. In addition, this proposal would implement new fees at four recreation rentals: Tyee Lookout proposed at $90 a night; two yurts at Lake Creek Campground (Entiat Ranger District), proposed at $75 a night; and Steliko Lookout, proposed at $75 a night. New fees would provide increased visitor opportunities, as well as increased staffing to address operations and maintenance needs and enhance customer service.

Advanced reservations for campgrounds and cabins will be available through *www.recreation.gov* or by calling 1–877–444–6777. The reservation service charges an $8.00 fee for reservations.

These new fees will be reviewed by a Recreation Resource Advisory

Committee prior to a final decision and implementation.

Dated: September 29, 2021.

Sandra Watts,

Acting Associate Deputy Chief, National Forest System.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Forest Service

Intent To Establish Secure Rural Schools Resource Advisory Committees

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice of intent to establish Secure Rural Schools Resource Advisory Committees.

SUMMARY: The Forest Service, United States Department of Agriculture (USDA), intends to establish the following: The Greater Rocky Mountain Resource Advisory Committee (RAC) in the Rocky Mountain Region (R2) by consolidating the Saguache-Upper Rio Grande, Rocky Mountain, and San Juan RACs; the Rural Nevada RAC in the Intermountain Region (R4) by consolidating the White Pine-Nye and Humboldt NV RACs; the National Forests in Mississippi RAC in the Southern Region (R8) by consolidating the Delta-Bienville, DeSoto, Holly Springs-Tombigbee, and Southwest Missippippi RACs; the Ottawa RAC in the Eastern Region (R9) by consolidating the Gogebic and Ontonagon RACs; the North Tongass RAC in the Alaska Region (R10) by consolidating the Juneau, Lynn Canal-Icy Strait, Yakutat, and Sitka RAC; and the South Tongass RAC in the Alaska Region (R10) by consolidating the Wrangell-Petersburg, Prince of Wales, and Ketchikan RACs. Secure Rural Schools (SRS) RACs are established pursuant to the Secure Rural Schools and Community Self-Determination Act (the Act), as amended, and most recently authorized in accordance to the Agricultural Improvement Act of 2018 (Pub. L. 115–334). The SRS RACs will operate in compliance with the Federal Advisory Committee Act (FACA). The purpose of the SRS RACs is to improve collaborative relationships among people who use and care for National Forests. The Secretary has determined that the work of the SRS RACs are in the public's interest and relevant to the duties of the Department of Agriculture. The SRS RACs are statutory committees. Additional information concerning the SRS RACs can be found by visiting the SRS RACs website at: *http://www.fs.usda.gov/pts/.*

FOR FURTHER INFORMATION CONTACT: Comments concerning this notice should be addressed to Juana Rosas, National Partnership Coordinator, National Partnership Office, USDA Forest Service, Yates Building, 1400 Independence Avenue, Mailstop #1158, Washington, DC 20250. Comments also may be submitted by email to: Juana Rosas at *juana.rosas@usda.gov.* Individuals who use telecommunication devices for the deaf/hard-of-hearing (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339, 24 hours a day, every day of the year, including holidays.

SUPPLEMENTARY INFORMATION:

Background

In accordance with the provisions of FACA, the Secretary of Agriculture intends to establish SRS RACs to provide advice and recommendations to the Forest Service concerning projects and funding consistent with SRS Title II of the Act. The duties of SRS RACs include monitoring projects, advising the Secretary on the progress and results of monitoring efforts, and making recommendations to the Forest Service for any appropriate changes or adjustments to the projects being monitored by the SRS RACs.

SRS RACs Membership

The SRS RACs will be comprised of no more than 15 members and no fewer than 9 members in accordance with the Agricultural Improvement Act of 2018, also known as the 2018 Farm Bill. Members will be approved by the Secretary of Agriculture or their designee except for RACs located in the states of Arizona and Montana where they will be approved by the Regional Forester and each will serve a 4-year term. SRS RAC memberships will be balanced in terms of the points of view represented and functions to be performed. The SRS RACs shall include representation from the following interest areas:

(1) Five persons who represent:

(a) Organized Labor or Non-Timber Forest Product Harvester Groups,

(b) Developed Outdoor Recreation, Off Highway Vehicle Users, or Commercial Recreation Activities,

(c) Energy and Mineral Development, or Commercial or Recreational Fishing Interests,

(d) Commercial Timber Industry, or

(e) Federal Grazing or Other Land Use Permits, or Represent Non-industrial Private Forest Land Owners within the area for which the committee is organized.

(2) Five persons who represent:

(a) Nationally Recognized Environmental Organizations,

(b) Regionally or Locally Recognized Environmental Organizations,

(c) Dispersed Recreational Activities,

(d) Archaeological and Historical Interests, or

(e) Nationally or Regionally Recognized Wild Horse and Burro Interest Groups, Wildlife or Hunting Organizations, or Watershed Associations.

(3) Five persons who represent:

(a) State Elected Office (or a designee),

(b) County or Local Elected Office,

(c) American Indian Tribes within or adjacent to the area for which the committee is organized,

(d) Area School Officials or Teachers, or

(e) Affected Public at Large.

Of these members, one will become the Chairperson who is recognized for their ability to lead a group in a fair and focused manner and who has been briefed on the mission of the RAC. A chairperson is selected by a majority of RAC members. The Committee will meet on an annual basis or as needed and determined by the Forest Service.

In the event that a vacancy arises, the Designated Federal Officer (DFO) may fill the vacancy in the manner in which the original appointments were made. In accordance with the SRS Act, members of the SRS RAC shall serve without compensation. SRS RAC members may be allowed travel and per diem expenses for attendance at committee meetings, subject to approval of the DFO responsible for administrative support to the SRS RAC.

Equal opportunity practices in accordance with USDA policies shall be followed in all appointments to the RACs. To help ensure that the recommendations of the RACs have taken into account the needs of the diverse groups served by the Department, membership shall include, to the extent practicable, individuals representing minorities, women, and persons with disabilities. USDA prohibits discrimination in all of its programs and activities on the basis of race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability or age. Additionally, discrimination based on political beliefs, income derived from a public assistance program, marital status, family/parental status, or reprisal or retaliation for prior civil rights activity in any program or activity conducted or funded by USDA is also prohibited by

statutes enforced by USDA (not all bases apply to all programs).

Dated: September 30, 2021.

Cikena Reid,

USDA Committee Management Officer.

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Forest Service

Notice of Proposed New Fee Site

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice of proposed new fee site.

SUMMARY: The San Juan National Forest (Forest) proposes to charge new fees at the Chimney Rock National Monument. These sites are currently in use by the public, but the Forest Service is not currently charging a fee for their use. Funds from fees would be used for the continued operation and maintenance of these recreation sites. Fees are assessed based on the level of amenities and services provided, cost of operation and maintenance, market assessment, and public comment. Significant capital improvements made in the past few years, coupled with increased visitation, support a fee. A review of visitor use data and fee collection information for existing fee campgrounds and group campgrounds on the Forest demonstrate public need and demand for the variety of recreation opportunities these facilities provide.

DATES: If approved, the new fee would be implemented no earlier than six months following the publication of this notice in the **Federal Register**.

ADDRESSES: Pagosa Ranger District, Chimney Rock Fee Change Proposal, P.O. Box 310, Pagosa Springs, CO 81147, or by emailing Paul Blackman at *paul.blackman@usda.gov.*

FOR FURTHER INFORMATION CONTACT: Paul Blackman, District Recreation Staff, 970–264–1505 or *paul.blackman@usda.gov.* Information about proposed fee changes can also be found on the San Juan National Forest's website: *https://www.fs.usda.gov/sanjuan.*

SUPPLEMENTARY INFORMATION: The Federal Recreation Lands Enhancement Act (Title VII, Pub. L. 108–447) directed the Secretary of Agriculture to publish a six-month advance notice in the **Federal Register** whenever new recreation fee areas are established. Fees are based on the level of amenities and services provided, the cost of operations and maintenance, and the market assessment of similar types of opportunities within the geographic area.

The current fee is $12–$16 per adult and $6–$8 per child which is charged by the Chimney Rock Interpretive Association. The proposal will establish a new Forest Service fee of $20 per vehicle for five days and $10 per motorcycle for five days. Revenue from these fees will help the Forest Service and its partner, Chimney Rock Interpretive Association, to provide services and amenities so visitors can continue to access and enjoy a unique and high-quality monument experience. Revenue would be directed primarily towards infrastructure maintenance and repairs, as well as Forest Service activities such as managing parking, maintaining trails, providing education, protecting cultural resources, and providing other visitor services.

Once public involvement is complete, these new fees will be reviewed and approved by the Rocky Mountain Regional Office prior to a final decision and implementation.

Dated: September 29, 2021.

Sandra Watts,

Acting Associate Deputy Chief, National Forest System.

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

[Docket Number: RUS–21–Electric–0020]

Badger State Solar, LLC: Notice of Intent To Prepare an Environmental Impact Statement and Hold a Virtual Public Scoping Meeting on October 26, 2021

AGENCY: Rural Utilities Service, Agriculture (USDA).

ACTION: Notice of intent to prepare an Environmental Impact Statement and hold a virtual public scoping meeting.

SUMMARY: The Rural Utilities Service (RUS) announces its intent to prepare an Environmental Impact Statement (EIS) and hold a virtual public scoping meeting in connection with possible impacts related to the Badger State Solar, LLC's Alternating Current solar project (Project). The Project consists of a 149-megawatt photovoltaic Alternating Current solar energy generating facility located on approximately 1,750 acres in the Townships of Jefferson and Oakland, in Jefferson County, Wisconsin. RUS is considering funding this application, thereby making the proposed Project an undertaking subject to review under the National Historic Preservation Act (NHPA). RUS has determined that a loan for the Project would be a federal action and is, therefore, subject to National Environmental Policy Act (NEPA) review.

DATES: The public scoping meeting webinar will be held on October 26, 2021 at 7 p.m. EST via Zoom. Those wishing to attend the webinar are invited to register online at the virtual scoping meeting room website *https://badgerstatesolar.consultation.ai.* An email will be sent to registrants with information for how to access the webinar. Attendees will be able to provide spoken comments during the webinar. The virtual scoping meeting room is an interactive website which will be available throughout the public scoping period. Attendees will be able to submit written comments through the virtual scoping meeting room website. Written comments may also be submitted to *BadgerStateSolarEIS@usda.gov.*

Written requests to participate as a ''consulting party'' or to provide comments for consideration during the scoping process for the proposed Project must be received on or before November 4, 2021.

ADDRESSES: To request ''consulting party'' status, submit comments, or for further information, please contact: *BadgerStateSolarEIS@usda.gov.*

Project-related information will be available at RUS's and Badger State Solar's websites located at: *https://www.rd.usda.gov/resources/environmental-studies/impact-statements, https://badgerstatesolar.consultation.ai,* and *https://www.badgerstatesolar.com.* This includes the Alternative Evaluation and Site Selection Studies prepared for the project. Project information will also be available at the Jefferson Public Library in Jefferson, WI; the Cambridge Community Library in Cambridge, WI and the Lake Mills Library in Lake Mills, WI.

Due to the COVID 19 pandemic, electronic communication is preferred because delivery of hard copies by mail may not be delivered in a timely manner.

SUPPLEMENTARY INFORMATION: RUS is the lead federal agency, as defined at 40 CFR 1508.1(o), for preparation of the EIS. With this notice, federal and state agencies and federally recognized Tribes with jurisdiction or special expertise are invited to be cooperating agencies. Such agencies or tribes may make a request to RUS to be a cooperating agency by contacting the RUS contact provided in this notice. Designated cooperating

agencies have certain responsibilities to support the NEPA and scoping process, as specified at 40 CFR 1501.8.

In addition, with this notice, RUS invites any affected federal, state, and local agencies, Tribes, and other interested persons to comment on the scope, alternatives, and significant issues to be analyzed in depth in the EIS.

Throughout the scoping period a virtual public scoping meeting room will be available online at *https://badgerstatesolar.consultation.ai.* The virtual public scoping meeting room is an interactive website which will include information about the project, the NEPA process, and next steps in the process. Interested parties will also be able to register to attend the October 26 webinar on Zoom through the virtual scoping meeting room website.

Public participation is an integral component of the environmental review process for federal actions. Public participation will be especially important during the scoping phase of the proposed Project. RUS will be seeking information, comments, and assistance from federal, State, and local agencies, Tribes, and other individuals who may be interested in or affected by the proposed Project. This input will be used in preparing the Draft EIS. Comments submitted during the scoping process should be in writing. The comments should describe as clearly and completely as possible any issues, concerns, or input commenters may have so that they can be addressed appropriately in the EIS.

RUS is considering funding this application, thereby making the proposed Project an undertaking subject to review under Section 106 of the National Historic Preservation Act (NHPA), 16 U.S.C. 470(f), and its implementing regulation, ''Protection of Historic Properties'' (36 CFR part 800). Any party wishing to participate directly with RUS as a ''consulting party'' in Section 106 review may submit a written request to the RUS contact provided below. Pursuant to 36 CFR 800.3(f)(3), RUS will consider, and provide a timely response to any and all requests for consulting party status.

Badger State Solar proposes to construct, install, operate, and maintain a 149-megawatt photovoltaic Alternating Current solar energy generating facility on a site in the Townships of Jefferson and Oakland, in Jefferson County, Wisconsin. The proposed project is approximately 1,750 acres located on the north and south sides of U.S. Highway 18, approximately 2-miles west of the City of Jefferson and west of State Highway 89. The collector substation would be located in the Primary Development Area. Site land cover is predominantly agricultural crops and pasture, with some forest and wetland.

Construction involves the installation on leased lands of 127,752 single-axis tracking PV panels in the Primary Project area. The PV panels would be mounted on a steel racking frame. Supporting facilities include an electrical substation. The lease agreement allows for an operating period of 40 years. A power purchase agreement (PPA) has been executed with Dairyland Power Cooperative for the entire output of the Project. The proposed site is near the point of interconnection to the grid at the American Transmission Company Jefferson substation near the intersection of State Trunk Highway 89 and U.S. Highway 18.

Construction equipment would include graders, bulldozers, excavators, forklifts, trailers, plows, trenchers, pile drivers, and directional boring rigs. Vehicles for transporting construction materials and components primarily would be legal load over-the road flatbed and box trucks. Transport would use existing regional roads, bridges, and intersections. Laydown areas would be established within the Project site. Internal site access roads would be required. The site would be fenced. Overhead collector circuits would not be required.

Badger State has submitted an Application for a Certificate of Public Convenience and Necessity (CPCN) to the Public Service Commission of Wisconsin (PSC). Consultations have been conducted with the Wisconsin Department of Natural Resources (WDNR) and an endangered resource review (ER) has been submitted to the agency. Consultations with other agencies include the Federal Aviation Administration (FAA), Natural Resources Conservation Service (NRCS), U.S. Environmental Protection Agency (USEPA), and informal consultation with the U.S. Fish and Wildlife Service (USFWS). Badger State has consulted property owners, local town and county officials and staff, state elected representatives, Wisconsin Department of Agriculture Trade and Consumer Protection, and engaged the general public.

Among the alternatives that RUS will address in the EIS is the No Action alternative, under which the proposal would not be undertaken or if RUS did not fund the proposed Project, and any reasonable alternatives defined as a result of the scoping process. In the EIS, the effects of the proposal will be compared to the existing conditions in the affected area of the proposal. Public health and safety, environmental impacts, socio-economic, and engineering aspects of the proposal will also be considered in the EIS.

As part of its broad environmental review process, RUS must take into account the effect of the proposal on historic properties in accordance with Section 106 of the National Historic Preservation Act (Section 106) and its implementing regulation, ''Protection of Historic Properties'' (36 CFR part 800). Pursuant to 36 CFR 800.2(d)(3), RUS is using its procedures for public involvement under NEPA to meet its responsibilities to solicit and consider the views of the public during Section 106 review. Accordingly, comments submitted in response to this Notice will inform RUS decision-making during Section 106 review.

From information provided in the studies mentioned above, and using input provided by government agencies, tribes, and the public, RUS will prepare a Draft EIS. The Draft EIS will be filed with the U.S. Environmental Protection Agency (USEPA) and will be available for public comment by the Fall 2021. At that time, the RUS and USEPA will publish a notice of the availability of the Draft EIS and notice of receipt, respectively, in the **Federal Register**. In addition, the Badger State Solar will publish notices in local newspapers and any online local news sources. The comment period for the DEIS will be 45 days from the date the EPA publishes its **Federal Register** notice announcing receipt of the Draft EIS.

To assist the involved federal agencies in identifying and considering issues and concerns on the proposal, comments on the Draft EIS should be as specific as possible. It is also helpful if the comments refer to the specific pages or chapters of the Draft EIS. Comments may also address the adequacy of the Draft EIS or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the CEQ's regulations at 40 CFR 1503.3 in addressing these points. After the comment period ends on the Draft EIS, the comments will be analyzed, considered, and responded to by the agencies involved in preparing the Final EIS.

The public will again have the opportunity to review and comment on the Final EIS. Upon completion of a 30-day public comment period, the RUS will document its decision regarding the proposed Project and reasons for the decision in a Record of Decision. A public notice announcing the availability of the Record of Decision

will be published in the **Federal Register** and local newspapers.

Any final action by RUS related to the proposal will be subject to, and contingent upon, compliance with all relevant executive orders and federal, state, and local environmental laws and regulations in addition to the completion of the environmental review requirements as prescribed in RUS Environmental Policies and Procedures, 7 CFR part 1970.

Christopher A. McLean,

Acting Administrator, Rural Utilities Service, U.S. Department of Agriculture.

BILLING CODE 3410–15–P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Kentucky Advisory Committee to the U.S. Commission on Civil Rights

AGENCY: U.S. Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Kentucky Advisory Committee (Committee) to the U.S. Commission on Civil Rights will hold a meeting on Thursday, October 14, 2021, at 12:00 p.m. Eastern Time. The Committee will discuss civil rights concerns in the state.

DATES: The meeting will take place on Thursday, October 14, 2021, from 12:00 p.m.–1:00 p.m. Eastern Time.

ADDRESSES:

Online Registration (Audio/Visual): https://bit.ly/3AQUdmE.

Telephone (Audio Only): Dial 800–360–9505 USA Toll Free; Access code: 433 716 81.

FOR FURTHER INFORMATION CONTACT: Barbara Delaviez, DFO, at *bdelaviez@usccr.gov* or (202) 376–8473.

SUPPLEMENTARY INFORMATION: Members of the public can listen to these discussions. Committee meetings are available to the public through the above call-in number. Any interested member of the public may call this number and listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number. Individuals who are deaf, deafblind and hard of hearing may also follow the proceedings by first calling the Federal Relay Service at 1–800–877–8339 and providing the Service with the conference call number and conference ID number.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Liliana Schiller at *lschiller@usccr.gov*. Persons who desire additional information may contact the Regional Programs Unit at (312) 353–8311.

Records generated from this meeting may be inspected and reproduced at the Regional Programs Unit Office, as they become available, both before and after the meeting. Records of the meeting will be available via *www.facadatabase.gov* under the Commission on Civil Rights, Kentucky Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, *http://www.usccr.gov,* or may contact the Regional Programs Unit at the above email or street address.

Agenda

Roll Call
Introduction of Liliana Schiller
Post-Report Gate—Discussion about distribution of Report on Bail Reform
Concept Stage—orientation/reminder of Stage Gate Process
Next Steps
Open Comment
Adjourn

Dated: Monday, September 30, 2021.

David Mussatt,

Supervisory Chief, Regional Programs Unit.

[FR Doc. 2021–21680 Filed 10–4–21; 8:45 am]

BILLING CODE P

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Boundary and Annexation Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on Tuesday, May 18, 2021 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: U.S. Census Bureau, Commerce.

Title: Boundary and Annexation Survey.

OMB Control Number: 0607–0151.

Form Number(s): BAS–1, BAS–2, BAS–3, BAS–5, BAS–6, BASSC–1L, BASSC–3L, BASSC–4L.

Type of Request: Regular submission, Request for a Revision of a Currently Approved Collection.

Number of Respondents: 40,000 governments.

Average Hours per Response: 7.5 hours. This estimate is based on an average of 5 hours for a no change participant and 10 hours for a participant with changes.

Burden Hours: 300,000 hours.

Needs and Uses: The Boundary and Annexation Survey (BAS) provides tribal, state, and local governments an opportunity to review the Census Bureau's legal boundary data to ensure the Census Bureau has the correct boundary, name, and status information. BAS also allows participants to review and provide updates to Census Designated Places (CDPs). BAS fulfills the agency's responsibility as part of the National Spatial Data Infrastructure, for which the Office of Management and Budget (OMB) Circular A–16 designates the Census Bureau as the lead federal agency for maintaining national data about legal government boundaries, as well as statistical and administrative boundaries. BAS supports the spatial data steward responsibilities of the *OMB E-Gov*, *Data.gov*, the National Map, and Geographic Names Information System.

The Census Bureau uses the boundaries collected in BAS to tabulate data for various censuses and surveys including the decennial census, American Community Survey (ACS), and Population Estimates Program (PEP). It also uses the legal boundaries collected through BAS to support several other programs such as Congressional and State Legislative redistricting, the Economic Census, the Geographic Update Population Certification Program, and the Special Census program.

Numerous federal programs also rely on accurate boundaries collected through BAS. The U.S. Geological

Survey's National Map is updated annually to depict the legal boundaries provided by BAS. The Department of Housing and Urban Development uses legal boundaries to determine jurisdictional eligibility for various grant programs, such as the Community Development Block Grant program. In addition, the Department of Agriculture uses legal boundaries to determine eligibility for various rural housing and economic development programs.

The following collection methods allow the Census Bureau to coordinate among various levels of governments to obtain the most accurate legal boundary, CDPs, and contact information:

- BAS
  - Annual Response
  - Submissions—Digital and Paper
  - Non-Response Follow-Up
  - State Agreements
  - Consolidated BAS (CBAS) Agreements
- State Certification
- Boundary Quality

The following changes have been made since the BAS 60-day notification was published on Tuesday, May 18, 2021.

- The paper BAS annual response form (ARF) will no longer be included in the late-January annual response mailing. Participants will be instructed to complete the online response form or provide their response via email.
- BAS participants requesting CD/DVD will no longer receive state specific inserts or paper forms. State specific insert information will move to the online form. The paper forms are specific to the paper response method and will not be included with CD/DVD requests.
- BAS participants requesting paper maps will no longer receive state specific inserts. State specific insert information will move to the online form.
- BAS participants requesting paper maps will receive an insert that includes a list of materials included in the packet. This insert was omitted from the 60-day notification in error.
- The governor's letter for state certification will be replaced by an email. A non-response follow-up email was also added.
- The state certifying official letter will be replaced by an email. A non-response follow-up email was also added.

BAS

The Census Bureau collects legal boundary, CDP, and contact updates from tribal, state, and local governments during BAS. Governments are first contacted during annual response where they are asked if they have legal boundary, CDP, or contact updates to report. Those indicating they have updates to provide can choose to create a submission using an approved response method. Those governments that do not respond to annual response or those governments that indicate they have updates to provide are followed up with during BAS non-response follow-up. The BAS schedule is outlined below.

- January 1—Boundary updates must be legally in effect on or before this date to be reported in the current survey year.
- January to May—Tribal, state, and local governments respond during annual response or non-response follow-up indicating if they have legal boundary, CDP, or contact updates to report. Those with boundary updates to report download or request materials to create a submission to return to the Census Bureau.
- Early January—The Census Bureau sends the annual response email. Tribal, state, and local governments are contacted through email to determine if they have legal boundary, CDP, or contact updates to report.
- Late January—The Census Bureau sends the annual response letter. Tribal, state, and local governments that do not have an email address on file with the Census Bureau or did not respond to the annual response email are contacted through mail to determine if they have legal boundary, CDP, or contact updates to report.
- Mid-February—The Census Bureau conducts BAS non-response follow-up through email. Governments that have not responded to annual response, along with those that indicated they have boundary changes to report, are contacted through email.
- March 1—Boundary updates returned by this date will be reflected in the ACS and PEP data and in next year's BAS materials.
- March to May—The Census Bureau conducts BAS non-response telephone follow-up. Governments that did not respond to the annual response email, letter, and non-response email are contacted over the phone to determine if they have any legal boundary, CDP, or contact updates to report.
- May 31—Boundary updates returned by this date will be reflected in next year's BAS materials.

BAS—Annual Response

The Census Bureau first contacts tribal, state, and local governments during annual response. During this phase, the Census Bureau contacts all eligible governments through email and mail. The BAS annual response email includes program information and directs governments to respond through an online form if they have legal boundary, CDP, or contact updates to report. Only those governments that do not have an email address on file with the Census Bureau or did not respond to the annual response email are contacted through mail. The mailed package consists of a letter and program flyer.

Through annual response, participants are instructed to review the legal boundary, name, and status information, along with the contact information that the Census Bureau has on file for their government. BAS participants are also able to review CDP boundaries. Eligible governments can review their boundaries using the Census Bureau's TIGERweb online GIS viewer, partnership shapefiles, or PDF maps.

Participants respond if they have legal boundary, CDP, or contact updates to report through an online form, email, fax, or mail. Those indicating they have updates to provide can choose to create a submission using the Census Bureau's Geographic Update Partnership Software (GUPS) tool, their own GIS, or on paper maps. Participants can request to receive the materials to create their submission through download, by mail on CD/DVD or on large format paper maps.

The Census Bureau uses email and encourages participants to use the online form to respond to annual response to reduce cost and participant burden.

BAS—Submissions

Tribal, state, and local governments with boundary updates can choose to create a submission using either digital or paper response methods during annual response. The data provided to the partners, by the Census Bureau, are derived from its Master Address File and Topologically Integrated Geographic Encoding and Reference (MAF/TIGER) System. The boundary data reflects updates reported by partners through the prior year's BAS.

BAS—Digital Submission Methods

The Census Bureau offers participants two digital submission methods. Governments with boundary updates can create a submission using the GUPS tool or their own GIS. When completing annual response, participants select one of the following options:

- CD/DVD. Participants can choose to receive GUPS and the partnership shapefiles through mail on CD/DVD.

• Download. Participants can choose to download GUPS and partnership shapefiles, or partnership shapefiles only to use in their own GIS. The Census Bureau also offers a partnership toolbox that can be used in the partner's own GIS.

Those partners that elect to receive digital materials on CD/DVD will receive a package through the mail containing the following materials:

• Letter.
• CD or DVD containing GUPS tool.
• CD or DVD containing partnership shapefiles, respondent guides, and a readme text file.

Governments that elect to download materials can find the software, partnership shapefiles, respondent guides, and other information included in the letter on the BAS website.

Tribal, state, and local governments use GUPS or their own GIS to create a submission with legal boundaries updates, and optionally, CDPs, linear features, and landmarks updates. Partners return these updates electronically using the Census Bureau's SWIM file transfer module. Governments selecting one of the digital response methods during annual response will receive SWIM access information through email.

BAS—Paper Submission Method

The Census Bureau also provides partners a paper map option to create a submission with legal boundary, CDP, linear feature, and landmark updates. When completing annual response, partners select the following option:

• Paper maps. Participants can choose to receive large format paper maps through mail. Those partners that elect to receive paper maps will receive a package through the mail containing the following materials:

• Letter.
• Insert listing materials included in the package.
• Form specific to the government type.
  ○ BAS–1—Incorporated places and consolidated cities.
  ○ BAS–2—Counties and county equivalent governments.
  ○ BAS–3—Minor civil divisions.
  ○ BAS–5—Federally recognized tribal reservations and off-reservation trust lands.
• Large format paper maps covering the extent of the government.
• Supplies to update the paper maps.
• Respondent guide.
• Postage-paid return envelope.

Tribal, state, and local governments use the provided supplies to annotate legal boundaries updates, and optionally, CDPs, linear features, and landmarks updates on paper maps. Partners return these updates using the Census Bureau provided postage-paid return envelope.

BAS—Non-Response Follow-Up

Tribal, state, and local governments that do not respond to annual response or those governments that indicate they have updates to provide are followed up with during BAS non-response follow-up. Non-response follow-up is conducted through email and over the phone.

Governments that have not responded to annual response, along with those that indicated they have boundary changes to report, are first contacted through email. The email reminds participants to respond through an online form if they have legal boundary, CDP, or contact updates to report. Those governments that indicated they have boundary updates to report are requested to submit those updates to the Census Bureau by the BAS program deadline.

Partners that still have not responded are contacted by phone later in the program cycle. Governments are requested to provide a response over the phone on whether they have legal boundary, CDP, or contact updates to report. Again, those governments that indicated they have boundary updates to report are reminded to submit those updates to the Census Bureau by the program deadline.

State Agreements

BAS state agreements allow for the coordination and sharing of information and resources between the Census Bureau and state governments in collecting boundary information for local governments. Through this agreement with state governments, the Census Bureau aims to reduce the duplication of effort across various levels of governments as well as the cost and time burden associated with participating in BAS. To facilitate a state agreement, the Census Bureau may enter a Memorandum of Understanding (MOU) with the state. States interested in establishing a state agreement MOU can do so when there is state legislation requiring local governments to report all legal boundary updates to a state agency.

The Census Bureau currently maintains two types of state agreements. In the first type of agreement, the state reports boundary changes for all local governments within its jurisdiction during BAS. Local governments in this type of agreement are notified about BAS, however, do not receive materials to participate, and are instructed to report all boundary updates to the state so that they are reported to the Census Bureau. Under the second type of agreement, the state provides the Census Bureau with a list of local governments that reported boundary changes. The Census Bureau uses the list to target those local governments during BAS. States have the option to report the list of governments with known legal boundary changes to the Census Bureau.

Consolidated BAS (CBAS) Agreements

The Census Bureau offers CBAS agreements to counties or county equivalent governments that are interested in submitting boundary updates for legal governments within their jurisdiction. CBAS agreements help ensure collection of complete and accurate boundary data, reduces duplication of effort between local and county governments and the Census Bureau, and reduces the cost and time burden on local governments. Once entered into a CBAS agreement, local governments are notified about BAS, however, do not receive materials to participate, and are instructed to report all boundary updates to the county or county equivalent government so that they are reported to the Census Bureau.

State Certification

The state certification program provides an annual opportunity for state agencies to verify that the legal boundary, name, and status information received through BAS updates were reported in accordance with state law. The Census Bureau requests that each state governor designate a state certifying official (SCO) to participate in the program. The SCO reviews listings of legal boundary changes, as well as government names and statuses that were submitted through the previous year's BAS. These listings include the attribute information for new incorporations, dissolutions, mergers, consolidations, and legal boundary changes. The listings also include the names and functional statuses of all local governments within the state's jurisdiction. The SCO can request that the Census Bureau edit the attribute data, add missing records, or remove invalid records. Invalid records only are removed if the state government maintains an official record of all changes to legal boundaries and governments as mandated by state law. The state certification schedule is as follows:

• October—The Census Bureau sends an email to governors requesting the state appoint an SCO to participate in the program. Non-response emails are sent to governors that do not respond.

• December—The Census Bureau distributes the SCO emails. The SCO email contains information required by the SCO to participate in the program. Non-response emails are sent to SCOs that do not respond.

• March—The Census Bureau distributes discrepancy emails to local governments based on feedback from the SCO.

The state certification materials include emails to the governor, general emails to convey any additional information, respondent guide, legal boundary change, and government name and status listings to the SCO, and discrepancy emails to local governments. The listings and respondent guide are provided on the BAS website. The SCO returns all updates electronically through the SWIM file transfer module.

Boundary Quality

The Boundary Quality project is designed to assess, analyze, and improve the spatial quality of legal, statistical, and administrative boundaries within the Census Bureau's MAF/TIGER System. Ensuring quality boundaries is a critical component of the geographic preparations for each decennial census and the Census Bureau's ongoing geographic programs. In addition, the improvement of boundary quality is an essential element of the Census Bureau's commitment as the responsible agency for legal boundaries under OMB Circular A–16.

The Boundary Quality project represents an effort to systematically target and assess boundary quality within the Census Bureau's MAF/TIGER System. Historically, it has relied exclusively on geographic programs such as BAS and the Participant Statistical Areas Program (PSAP) to obtain updates to tribal, state, local government, and CDP boundaries. While programs like BAS play an essential role in improving boundary quality, the goal of boundary quality activities is to establish a more accurate baseline for legal boundaries and CDPs within an entire state or county. BAS would build on this baseline by collecting individual legal boundary changes and optionally associated addresses, and CDP updates, on a transaction basis as they occur over the years.

Affected Public: Tribal, state, and local governments in all 50 states and District of Columbia.

Frequency: Annual.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13, U.S.C., Section 6.

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0607–0151.

Sheleen Dumas,

Foreign-Trade Zones Board

[B–67–2021]

Foreign-Trade Zone (FTZ) 7—Mayaguez, Puerto Rico, Notification of Proposed Production Activity, AbbVie Ltd. (Pharmaceutical Products), Barceloneta, Puerto Rico

AbbVie Ltd. (AbbVie) submitted a notification of proposed production activity to the FTZ Board (the Board) for its facility in Barceloneta, Puerto Rico within Subzone 7I. The notification conforming to the requirements of the Board's regulations (15 CFR 400.22) was received on September 24, 2021.

Pursuant to 15 CFR 400.14(b), FTZ production activity would be limited to the specific foreign-status materials and specific finished products described in the submitted notification (summarized below) and subsequently authorized by the Board. The benefits that may stem from conducting production activity under FTZ procedures are explained in the background section of the Board's website—accessible via *www.trade.gov/ftz.* The proposed finished products and materials would be added to the production authority that the Board previously approved for the operation, as reflected on the Board's website.

The proposed finished products include UBRELVY® tablets, ATOGEPANT® tablets and atogepant and ubrelvy extrudates (duty-free).

The proposed foreign-status materials include ubrogepant and atogepant active pharmaceutical ingredients (duty rate 6.5%). The request indicates both materials are subject to duties under section 301 of the Trade Act of 1974 (section 301), depending on the country of origin. The applicable Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is November 15, 2021.

A copy of the notification will be available for public inspection in the ''Online FTZ Information System'' section of the Board's website.

For further information, contact Christopher Wedderburn at *Chris.Wedderburn@trade.gov.*

Dated: September 30, 2021.

Andrew McGilvray,

Executive Secretary.

Foreign-Trade Zones Board

[B–45–2021]

Foreign-Trade Zone (FTZ) 281—Miami-Dade County, Florida, Authorization of Production Activity, Intel Corporation (Kitting, Assembly and Packaging of Computer Electronics), Miami, Florida

On June 2, 2021, ModusLink Corporation, an operator within FTZ 281, submitted a notification of proposed production activity to the FTZ Board on behalf of Intel Corporation for its facility within FTZ 281.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (86 FR 31695, June 15, 2021). On September 30, 2021, the applicant was notified of the FTZ Board's decision that no further review of the activity is warranted at this time. The production activity described in the notification was authorized, subject to the FTZ Act and the FTZ Board's regulations, including Section 400.14. Textile bags must be admitted in privileged foreign status (19 CFR 146.41).

Dated: September 30, 2021.

Andrew McGilvray,

Executive Secretary.

Cold-Rolled Steel Flat Products From Brazil, China, India, Japan, Republic of Korea, and United Kingdom: Final Results of the Expedited Sunset Reviews of the Antidumping Duty Orders

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: As a result of these expedited sunset reviews, the Department of Commerce (Commerce) finds that revocation of the antidumping duty (AD) orders on certain cold-rolled steel flat products (cold-rolled steel) from Brazil, China, India, Japan, Republic of Korea (Korea), and the United Kingdom would be likely to lead to continuation or recurrence of dumping as indicated in the ''Final Results of Sunset Review'' section of this notice.

DATES: Applicable October 5, 2021.

FOR FURTHER INFORMATION CONTACT: Reginald Anadio, Abdul Alnoor, or Thomas Hanna, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–2000, (202) 482–4554, or (202) 482–0835, respectively.

SUPPLEMENTARY INFORMATION:

Background

On July 14 and September 20, 2016, Commerce published in the **Federal Register** the *China and Japan Orders* and the *Brazil, India, Korea, and United Kingdom Orders,* respectively (collectively, *Orders*).[1] On June 1, 2021, Commerce published the notice of initiation of the sunset reviews of the *Orders* pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).[2] In accordance with 19 CFR 351.218(d)(1)(i) and (ii), Commerce received notices of intent to participate in these sunset reviews from Cleveland-Cliffs Inc.,[3] Nucor Corporation, California Steel Industries,[4] Steel Dynamics Inc., and United States Steel Corporation (collectively, the domestic interested parties) within 15 days after the date of publication of the *Initiation Notice.*[5] The domestic interested parties claimed interested party status under section 771(9)(C) of the Act. Commerce received adequate substantive responses to the *Initiation Notice* from the domestic interested parties within the 30-day period specified in 19 CFR 351.218(d)(3)(i).[6] Commerce did not receive a substantive response from any respondent interested party and no hearing was requested. On July 22, 2021, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from any respondent interested party.[7]

In accordance with section 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted expedited, *i.e.,* 120-day, sunset reviews of the *Orders.*

Scope of the Orders: Brazil, India, Korea, the United Kingdom, and China

The products covered by the orders on cold-rolled steel from Brazil, India, Korea, the United Kingdom, and China are currently classified in the Harmonized Tariff Schedule of the United States (HTSUS) under subheadings: 7209.15.0000, 7209.16.0030, 7209.16.0060, 7209.16.0070, 7209.16.0091, 7209.17.0030, 7209.17.0060, 7209.17.0070, 7209.17.0091, 7209.18.1530, 7209.18.1560, 7209.18.2510, 7209.18.2520, 7209.18.2580, 7209.18.6020, 7209.18.6090, 7209.25.0000, 7209.26.0000, 7209.27.0000, 7209.28.0000, 7209.90.0000, 7210.70.3000, 7211.23.1500, 7211.23.2000, 7211.23.3000, 7211.23.4500, 7211.23.6030, 7211.23.6060, 7211.23.6090, 7211.29.2030, 7211.29.2090, 7211.29.4500, 7211.29.6030, 7211.29.6080, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7225.50.6000, 7225.50.8080, 7225.99.0090, 7226.92.5000, 7226.92.7050, and 7226.92.8050.

The products subject to the orders on cold-rolled steel from Brazil, India, Korea, the United Kingdom, and China may also enter under the following HTSUS subheadings: 7210.90.9000, 7212.50.0000, 7215.10.0010, 7215.10.0080, 7215.50.0016, 7215.50.0018, 7215.50.0020, 7215.50.0061, 7215.50.0063, 7215.50.0065, 7215.50.0090, 7215.90.5000, 7217.10.1000, 7217.10.2000, 7217.10.3000, 7217.10.7000, 7217.90.1000, 7217.90.5030, 7217.90.5060, 7217.90.5090, 7225.19.0000, 7226.19.1000, 7226.19.9000, 7226.99.0180, 7228.50.5015, 7228.50.5040, 7228.50.5070, 7228.60.8000, and 7229.90.1000. The HTSUS subheadings are provided for convenience and customs purposes. A full description of the scope of the orders on cold-rolled steel from Brazil, India, Korea, the United Kingdom, and China is contained in the Issues and Decision Memorandum.[8] The written description is dispositive.

Scope of the Order: Japan[9]

The products covered by the order on cold-rolled steel from Japan are currently classified in the HTSUS under subheadings: 7209.15.0000, 7209.16.0030, 7209.16.0040, 7209.16.0045, 7209.16.0060, 7209.16.0070, 7209.16.0091, 7209.17.0030, 7209.17.0040, 7209.17.0045, 7209.17.0060, 7209.17.0070, 7209.17.0091, 7209.18.1530, 7209.18.1560, 7209.18.2510, 7209.18.2520, 7209.18.2580, 7209.18.6020, 7209.18.6090, 7209.25.0000, 7209.26.0000, 7209.27.0000, 7209.28.0000, 7209.90.0000, 7210.70.3000, 7211.23.1500, 7211.23.2000, 7211.23.3000, 7211.23.4500, 7211.23.6030, 7211.23.6060, 7211.23.6090, 7211.29.2030, 7211.29.2090, 7211.29.4500, 7211.29.6030, 7211.29.6080, 7211.90.0000, 7212.40.1000, 7212.40.5000, 7225.50.6000, 7225.50.8080, 7225.99.0090, 7226.92.5000, 7226.92.7050, and 7226.92.8050.

The products subject to the order on cold-rolled steel from Japan may also enter under the following HTSUS subheadings: 7210.90.9000, 7212.50.0000, 7215.10.0010, 7215.10.0080, 7215.50.0016, 7215.50.0018, 7215.50.0020, 7215.50.0061, 7215.50.0063, 7215.50.0065, 7215.50.0090, 7215.90.5000, 7217.10.1000, 7217.10.2000, 7217.10.3000, 7217.10.7000, 7217.90.1000, 7217.90.5030, 7217.90.5060, 7217.90.5090, 7225.19.0000, 7226.19.1000, 7226.19.9000, 7226.99.0180, 7228.50.5015, 7228.50.5040, 7228.50.5070, 7228.60.8000, and 7229.90.1000. The HTSUS subheadings are provided for convenience and customs purposes. A full description of the scope of the order on cold-rolled steel from Japan is contained in the Issues and Decision Memorandum.[10] The written description is dispositive.

Analysis of Comments Received

All issues raised in this review are addressed in the Issues and Decision Memorandum, including the likelihood of continuation or recurrence of dumping in the event of revocation and the magnitude of dumping margins likely to prevail if the order was revoked. Parties can find a complete discussion of all issues raised in this review and the corresponding recommendations in the Issues and Decision Memorandum, which is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be found at *http://enforcement.trade.gov/frn/index.html.*

Final Results of Sunset Review

Pursuant to sections 751(c) and 752(c) of the Act, Commerce determines that revocation of the *Orders* would be likely to lead to continuation or recurrence of dumping and the magnitude of the margins of dumping likely to prevail would be weighted-average margins up to the following percentages:

Country	Weighted-average margin (percent)
Brazil	35.43
China	265.79
India	7.60
Japan	71.35
Korea	28.42
United Kingdom	25.17

Notification Regarding Administrative Protective Orders

This notice serves as a reminder to parties subject to administrative protective order (APO) of their responsibility concerning the disposition of proprietary information disclosed under APO in accordance with 19 CFR 351.305(a). Timely written notification of the destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a violation which is subject to sanction.

Notification to Interested Parties

Commerce is issuing and publishing these final results and notice in accordance with sections 751(c), 752(c), and 777(i)(1) of the Act and 19 CFR 351.221(c)(5)(ii).

[8] *See* Memorandum, ''Issues and Decision Memorandum for the Expedited Sunset Reviews of the Antidumping Duty Orders on Cold-Rolled Steel Flat Products from Brazil, China, India, Japan, South Korea, and United Kingdom,'' dated concurrently with, and hereby adopted by, this notice (Issues and Decision Memorandum).

[9] As discussed in the accompanying Issues and Decision Memorandum, a result of the changed circumstances review, Commerce modified the scope of the order on cold-rolled steel from Japan to specify an exclusion on certain cold-rolled steel from Japan. *See Certain Cold-Rolled Steel Flat Products From Japan: Final Results of Changed Circumstances Review, and Revocation of Antidumping Duty Order, in Part,* 82 FR 12337 (March 2, 2017); *see also* Issues and Decision Memorandum.

Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes From the Republic of Turkey: Preliminary Results and Rescission in Part of Countervailing Duty Administrative Review; 2019

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) is conducting an administrative review of the countervailing duty (CVD) order on heavy walled rectangular welded carbon steel pipes and tubes (HWR pipes and tubes) from the Republic of Turkey (Turkey) for the period January 1, 2019, through December 31, 2019. Commerce preliminarily determines that Ozdemir Boru Profil San. Ve Tic. Ltd. Sti. (Ozdemir), the sole producer/exporter of HWR pipes and tubes from Turkey subject to this review, received *de minimis* countervailable subsidies. In addition, we are also rescinding this review with regard to eight companies for which the request for review was timely withdrawn by Nucor Tubular Products Inc. (the petitioner).

DATES: Applicable October 5, 2021.

FOR FURTHER INFORMATION CONTACT: Janae Martin or Jaron Moore, AD/CVD Operations, Office VIII, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0238 or (202) 482–3640, respectively.

SUPPLEMENTARY INFORMATION:

Background

On September 30, 2020, Commerce received a timely request for an administrative review of several companies from the petitioner, in accordance with section 751(a) of the Tariff Act of 1930, as amended (the Act), and 19 CFR 351.213(b).[1] Commerce received no other requests for administrative review of these companies. On October 30, 2020, Commerce published a notice of initiation of an administrative review of the CVD order on HWR pipes and tubes from Turkey.[2]

On January 28, 2021, the petitioner timely withdrew its request for an administrative review with respect to the following eight companies: Agir Haddecilik A.S., Cag Celik Demir ve Celik Endustri A.S., Cinar Boru Profil San Ve Tic. A.S., Mescier Dis Ticaret Ltd. Sti., MTS Lojistik ve Tasimacilik Hizmetleri TIC A.C. Istanbul, Noksel Celik Boru Sanayi A, SEBA Dis Ticaret AS., and Tosyali Toyo Celik A.S.[3] As a result, the only company for which the request for review was not withdrawn is Ozdemir.

On May 18, 2021, Commerce extended the deadline for the preliminary results to September 30, 2021.[4]

For a complete description of the events that followed the initiation of this review, *see* the Preliminary Decision Memorandum.[5] A list of topics discussed in the Preliminary Decision Memorandum is included as an appendix to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.*

Scope of the Order

The merchandise covered by the order is HWR pipes and tubes from Turkey. For a complete description of the scope of the order, *see* the Preliminary Decision Memorandum.

Methodology

Commerce is conducting this review in accordance with section 751(a)(1)(A) of the Act. For each of the subsidy programs found countervailable, we preliminarily determine that there is a subsidy, *i.e.,* a government financial contribution that gives rise to a benefit to the recipient, and that the subsidy is specific.[6] For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum.

Rescission of Administrative Review, in Part

Pursuant to 19 CFR 351.213(d)(1), Commerce will rescind an administrative review, in whole or in part, if the party that requested a review withdraws the request within 90 days of the publication date of the notice of initiation of the requested review. On October 30, 2020, Commerce published the notice of initiation of the requested review in the **Federal Register**.[7] The petitioner's withdrawal request was timely submitted,[8] and no other interested party requested an administrative review of the eight companies named above. Therefore, in accordance with 19 CFR 351.213(d)(1), we are rescinding this administrative review of the CVD order on HWR pipes and tubes from Turkey, in part, with respect to the aforementioned eight companies.

Preliminary Results of Review

Commerce preliminarily determines that the following countervailable subsidy rate exists for Ozdemir for the period January 1, 2019, through December 31, 2019:

[1] *See* Petitioner's Letter, ''Request for Administrative Review,'' dated September 30, 2020.

[8] *See* Petitioner's Letter, ''Partial Withdrawal of Request for Administrative Review,'' dated January 28, 2021.

Company	Subsidy rate (percent)
Ozdemir Boru Profil San. Ve Tic. Ltd. Sti	*0.26

* (*de minimis*).

Assessment Rate

Consistent with section 751(a)(2)(C) of the Act, upon issuance of the final results, Commerce shall determine, and U.S. Customs and Border Protection (CBP) shall assess, countervailing duties on all appropriate entries covered by this review. If the assessment rate calculated in the final results is zero or *de minimis,* we will instruct CBP to liquidate all appropriate entries without regard to countervailing duties. Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**. If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

With respect to the companies for which this administrative review is rescinded (*i.e.,* Agir Haddecilik A.S., Cag Celik Demir ve Celik Endustri A.S., Cinar Boru Profil San Ve Tic. A.S., Mescier Dis Ticaret Ltd. Sti., MTS Lojistik ve Tasimacilik Hizmetleri TIC A.C. Istanbul, Noksel Celik Boru Sanayi A, SEBA Dis Ticaret AS., and Tosyali Toyo Celik A.S.), countervailing duties shall be assessed at rates equal to the cash deposit rate required at the time of entry, or withdrawal from warehouse, for consumption, during the period January 1, 2019, through December 31, 2019, in accordance with 19 CFR 351.212(c)(1)(i).

Cash Deposit Rate

Pursuant to section 751(a)(1) of the Act, Commerce intends to instruct CBP to collect cash deposits of estimated countervailing duties in the amount indicated for Ozdemir with regard to shipments of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of the final results of this review, except, where the rate calculated in the final results is zero or *de minimis,* no cash deposit will be required. For all non-reviewed firms, we will instruct CBP to continue to collect cash deposits of estimated countervailing duties at the most recent company-specific or all-others rate applicable to the company, as appropriate. These cash deposit instructions, when imposed, shall remain in effect until further notice.

Disclosure and Public Comment

We will disclose to parties to this proceeding the calculations performed in reaching the preliminary results within five days of the date of publication of these preliminary results.[9] Interested parties may submit written comments (case briefs) within 30 days of publication of the preliminary results and rebuttal comments (rebuttal briefs) within seven days after the time limit for filing case briefs.[10] Pursuant to 19 CFR 351.309(d)(2), rebuttal briefs must be limited to issues raised in the case briefs. Parties who submit arguments are requested to submit with the argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.[11]

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must do so within 30 days of publication of these preliminary results by submitting a written request to the Assistant Secretary for Enforcement and Compliance using Enforcement and Compliance's ACCESS system.[12] Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce will inform parties of the scheduled date of the hearing which will be held at a time and date to be determined.[13] Issues addressed during the hearing will be limited to those raised in the briefs.[14] Parties should confirm the date and time of the hearing two days before the scheduled date.

Parties are reminded that all briefs and hearing requests must be filed electronically using ACCESS and received successfully in their entirety by 5 p.m. Eastern Time on the due date. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.[15]

Unless the deadline is extended pursuant to section 751(a)(3)(A) of the Act, Commerce intends to issue the final results of this administrative review, including the results of our analysis of the issues raised by the parties in their comments, within 120 days after the date of publication of this notice, pursuant to section 751(a)(3)(A) and 19 CFR 351.213(h), unless this deadline is extended.

Notification to Interested Parties

This administrative review and notice are in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(4).

Dated: September 29, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

Certain Corrosion-Resistant Steel Products From India: Final Results of the Expedited First Sunset Review of the Countervailing Duty Order

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) finds that revocation of the countervailing duty (CVD) order on certain corrosion-resistant steel products (CORE) from India would be likely to lead to the continuation or recurrence of countervailable subsidies at the levels indicated in the ''Final Results of Sunset Review'' section of this notice.

DATES: Applicable October 5, 2021.

FOR FURTHER INFORMATION CONTACT: Nathan James, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–5305.

SUPPLEMENTARY INFORMATION:

Background

On July 25, 2016, Commerce published in the **Federal Register** the CVD order on CORE from India.[1] On July 1, 2021, Commerce published the notice of initiation of the first sunset review of the CVD order on CORE from India, pursuant to section 751(c) of the Tariff Act of 1930, as amended (the Act).[2] In June 2021, Commerce received timely notices of intent to participate from California Steel Industries (CSI), Cleveland-Cliffs Inc., Nucor Corporation (Nucor), Steel Dynamics Inc. (SDI), and United States Steel Corporation (U.S. Steel) (collectively, domestic interested parties).[3] The companies claimed interested party status under section 771(9)(C) of the Act as domestic producers of CORE.

On July 1, 2021, Commerce received a timely and adequate substantive response from the domestic interested parties.[4] We received no substantive responses from any other interested parties, including the Government of India, nor was a hearing requested. On July 22, 2021, Commerce notified the U.S. International Trade Commission that it did not receive an adequate substantive response from respondent interested parties.[5] As a result, pursuant to 751(c)(3)(B) of the Act and 19 CFR 351.218(e)(1)(ii)(C)(2), Commerce conducted an expedited (120-day) sunset review of the CVD order on CORE from India.

Scope of the Order

The product covered by the order is CORE. For a full description of the scope, *see* the Issues and Decision Memorandum.[6]

Analysis of Comments Received

All issues raised in this sunset review are addressed in the accompanying Issues and Decision Memorandum, which is hereby adopted by this notice. The issues discussed in the Issues and Decision Memorandum are the likelihood of continuation or recurrence of a countervailable subsidy, the net countervailable subsidy rate likely to prevail if the order were revoked, and the nature of the subsidy programs. A list of the topics discussed in the Issues and Decision Memorandum is attached as an appendix to this notice.

The Issues and Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *http://access.trade.gov.* In addition, a complete version of the Issues and Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.*

Final Results of Sunset Review

Pursuant to sections 751(c)(1) and 752(b) of the Act, Commerce determines that revocation of the CVD order on CORE from India would be likely to lead to the continuation or recurrence of countervailable subsidies at the rates listed below:

Producer/exporter	Net subsidy rate (percent)
JSW Steel Limited and JSW Steel Coated Products Limited	6.69
Uttam Galva Steels Limited and Uttam Value Steels Limited	530.74
All Others	6.12

Notification Regarding Administrative Protective Order (APO)

This notice also serves as the only reminder to parties subject to an APO of their responsibility concerning the destruction of proprietary information disclosed under APO in accordance with 19 CFR 351.305. Timely notification of the return or destruction of APO materials or conversion to judicial protective order is hereby requested. Failure to comply with the regulations and terms of an APO is a sanctionable violation.

Notification to Interested Parties

We are issuing and publishing these results in accordance with sections 751(c), 752(b), and 777(i)(1) of the Act and 19 CFR 351.218.

Dated: September 29, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

Certain Oil Country Tubular Goods From the Republic of Korea: Preliminary Results of Antidumping Duty Administrative Review and Preliminary Determination of No Shipments; 2019–2020

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily finds that certain oil country tubular goods (OCTG) from the Republic of Korea (Korea) were sold in the United States at prices below normal value. The period of review (POR) is September 1, 2019, through August 31, 2020. Interested parties are invited to comment on these preliminary results.

DATES: Applicable October 5, 2021.

FOR FURTHER INFORMATION CONTACT: Davina Friedmann, Mark Flessner, or Frank Schmitt, AD/CVD Operations, Office VI, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–0698, (202) 482–6312, or (202) 482–4880, respectively.

Background

These preliminary results are made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this administrative review on October 30, 2020.[1] Commerce selected Hyundai Steel Company (Hyundai Steel) and SeAH Steel Corporation (SeAH) as the two mandatory respondents in this review.[2] On April 29, 2021, in accordance with section 751(a)(3)(A) of the Act, Commerce extended the preliminary results of review by 120 days, until September 30, 2021.[3]

For a complete description of the events that followed the initiation of this administrative review, *see* the Preliminary Decision Memorandum.[4] A list of topics included in the Preliminary Decision Memorandum is included as Appendix I to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at *https://access.trade.gov.* In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at *http://enforcement.trade.gov/frn/.*

Scope of the Order

The product covered by the *Order*[5] is OCTG from Korea. For a complete description of the scope of the *Order, see* the Preliminary Decision Memorandum.

Methodology

Commerce is conducting this administrative review in accordance with section 751(a)(2) of the Act. Commerce has calculated export prices in accordance with section 772(a) of the Act. Constructed export prices have been calculated in accordance with section 772(b) of the Act. Normal value (NV) is calculated in accordance with section 773 of the Act. Commerce preliminarily does not find that a cost-based particular market situation existed in Korea during the POR.[6] For a full description of the methodology underlying our conclusions, *see* the Preliminary Decision Memorandum.

Preliminary Determination of No Shipments

On November 25, 2020, HiSteel Co., Ltd. (HiSteel) submitted a letter certifying that it had no exports or sales of subject merchandise into the United States during the POR.[7] U.S. Customs and Border Protection (CBP) did not have any information to contradict this claim of no shipments during the POR.[8] Therefore, we preliminarily determine that HiSteel did not have any shipments of subject merchandise during the POR. Consistent with Commerce's practice, we will not rescind the review with respect to HiSteel but will complete the review and issue instructions to CBP based on the final results.[9]

Rates for Non-Examined Companies

The statute and Commerce's regulations do not address the rate to be applied to companies not selected for examination when Commerce limits its examination in an administrative review pursuant to section 777A(c)(2) of the Act. Generally, Commerce looks to section 735(c)(5) of the Act, which provides instructions for calculating the all-others rate in a market economy investigation, for guidance when calculating the rate for companies which were not selected for individual examination in an administrative review. Under section 735(c)(5)(A) of the Act, the all-others rate is normally ''an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero or *de minimis* margins, and any margins determined entirely {on the basis of facts available}.''

In this review, we preliminarily calculated dumping margins for the two mandatory respondents, Hyundai Steel and SeAH, of 19.38 and 3.85 percent, respectively, and we have assigned to the non-selected companies a rate of 11.62 percent, which is the simple average of Hyundai Steel's and SeAH's margins.[10]

Preliminary Results of Review

Commerce preliminarily finds that, for the period September 1, 2019, through August 31, 2020, the following weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
Hyundai Steel Company	19.38
SeAH Steel Corporation	3.85
Non-examined companies[11]	11.62

Disclosure, Public Comment, and Opportunity to Request a Hearing

We intend to disclose the calculations performed for these preliminary results of review to interested parties within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b). Pursuant to 19 CFR 351.309(c), interested parties may submit case briefs no later than 30 days after the date of publication of this notice. Rebuttal briefs, the content of which is limited to issues raised in the case briefs, may be filed no later than seven days after the date for filing case briefs.[12] Parties who submit case briefs or rebuttal briefs in this proceeding are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.[13] Executive summaries should be limited to five pages total, including footnotes. Case and rebuttal briefs should be filed

using ACCESS [14] and must be served on interested parties.[15] An electronically filed document must be received successfully in its entirety by Commerce's electronic records system, ACCESS, by 5:00 p.m. Eastern Time on the date that the document is due.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing must submit a written request to the Assistant Secretary for Enforcement and Compliance, filed electronically via Commerce's electronic records system, ACCESS. An electronically filed request must be received successfully in its entirety by 5:00 p.m. Eastern Time within 30 days of the date of publication of this notice.[16] Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; and (3) a list of issues parties intend to discuss. Issues raised in the hearing will be limited to those raised in the respective case and rebuttal briefs. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined.[17] Parties should confirm the date, time, and location of the hearing two days before the scheduled date.

Pursuant to Section 751(a)(2)(B)(iv) of the Act and 19 CFR 351.213(h)(2), Commerce intends to issue the final results of this administrative review, including the results of its analysis of the issues raised in any case or rebuttal briefs, no later than 120 days after the date of publication of this notice, unless extended.[18]

Assessment Rates

Upon issuance of the final results, Commerce shall determine, and CBP shall assess, antidumping duties on all appropriate entries covered by this review.[19]

For any individually examined respondents whose weighted-average dumping margin is above *de minimis* (*i.e.,* greater than or equal to 0.5 percent) in the final results of this review, we will calculate importer-specific *ad valorem* duty assessment rates based on the ratio of the total amount of antidumping duties calculated for the examined sales to the total entered value of the examined sales to that importer, and we will instruct CBP to assess antidumping duties on all appropriate entries covered by this review. For entries of subject merchandise during the POR produced by each respondent for which it did not know its merchandise was destined for the United States, we will instruct CBP to liquidate such entries at the all-others rate if there is no rate for the intermediate company(ies) involved in the transaction.[20] Where the individually-selected respondent's weighted-average dumping margin is zero or *de minimis,* or an importer-specific assessment rate is zero or *de minimis,* we will instruct CBP to liquidate the appropriate entries without regard to antidumping duties.

For the companies which were not selected for individual review, we intend to assign an assessment rate based on the methodology described in the ''Rates for Non-Examined Companies'' section. The final results of this review shall be the basis for the assessment of antidumping duties on entries of merchandise covered by this review where applicable.

Commerce intends to issue assessment instructions to CBP no earlier than 35 days after the date of publication of the final results of this review in the **Federal Register**.[21] If a timely summons is filed at the U.S. Court of International Trade, the assessment instructions will direct CBP not to liquidate relevant entries until the time for parties to file a request for a statutory injunction has expired (*i.e.,* within 90 days of publication).

Cash Deposit Requirements

The following cash deposit requirements will be effective upon publication of the notice of final results of this administrative review for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication, as provided by section 751(a)(2) of the Act: (1) The cash deposit rate for the companies listed in the final results of review will be equal to the weighted-average dumping margin established in the final results of this administrative review; (2) for merchandise exported by producers or exporters not covered in this review but covered in a prior segment of the proceeding, the cash deposit rate will continue to be the company-specific rate published for the most recently completed segment of this proceeding in which they were reviewed; (3) if the exporter is not a firm covered in this review, a prior review, or the original investigation but the producer is, then the cash deposit rate will be the rate established for the most recently completed segment of this proceeding for the producer of the merchandise; (4) the cash deposit rate for all other producers or exporters will continue to be 5.24 percent, the all-others rate established in the less-than-fair-value investigation.[22] These cash deposit requirements, when imposed, shall remain in effect until further notice.

Notification to Importers

This notice serves as a preliminary reminder to importers of their responsibility under 19 CFR 351.402(f)(2) to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this POR. Failure to comply with this requirement could result in Commerce's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

Notification to Interested Parties

The preliminary results of this administrative review are issued and published in accordance with sections 751(a)(1) and 777(i)(1) of the Act, and 19 CFR 351.221(b)(4).

Dated: September 29, 2021.

Christian Marsh,

Acting Assistant Secretary for Enforcement and Compliance.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to the Office of Naval Research's Arctic Research Activities in the Beaufort and Chukchi Seas (Year 4)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that NMFS has issued an IHA to the U.S. Navy's Office of Naval Research (ONR) to incidentally harass, by Level B harassment only, marine mammals during oceanographic research activities associated with the Arctic Research Activities (Year 4) in the Beaufort and eastern Chukchi Seas. The Navy's activities are considered military readiness activities pursuant to the MMPA, as amended by the National Defense Authorization Act for Fiscal Year 2004 (NDAA).

DATES: This Authorization is effective from October 5, 2021 through October 4, 2022.

FOR FURTHER INFORMATION CONTACT: Kelsey Potlock, Office of Protected Resources, NMFS, (301) 427–8401.

Electronic copies of the application and supporting documents, as well as a list of the references cited in this document, may be obtained online at: *https://www.fisheries.noaa.gov/action/incidental-take-authorization-office-naval-research-arctic-research-activities-beaufort-1.* In case of problems accessing these documents, please call the contact listed above.

SUPPLEMENTARY INFORMATION:

Background

The MMPA prohibits the ''take'' of marine mammals, with certain exceptions. Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed incidental take authorization may be provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s) and will not have an unmitigable adverse impact on the availability of the species or stock(s) for taking for subsistence uses (where relevant). Further, NMFS must prescribe the permissible methods of taking and other ''means of effecting the least practicable adverse impact'' on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stocks for taking for certain subsistence uses (referred to in shorthand as ''mitigation''); and requirements pertaining to the mitigation, monitoring and reporting of the takings are set forth.

The NDAA (Pub. L. 108–136) removed the ''small numbers'' and ''specified geographical region'' limitations indicated above and amended the definition of ''harassment'' as it applies to a ''military readiness activity.'' The activity for which incidental take of marine mammals is being requested addressed here qualifies as a military readiness activity. The definitions of all applicable MMPA statutory terms cited above are included in the relevant sections below.

Summary of Request

On June 4, 2021, NMFS received a request from the Office of Naval Research (ONR) for an IHA to take marine mammals incidental to oceanographic research activities, known as Arctic Research Activities, in the Beaufort and eastern Chukchi Seas. The application was deemed adequate and complete on August 4, 2021. ONR's request is for take of beluga whales (*Delphinapterus leucas;* two stocks) and ringed seals (*Pusa hispida hispida*) by Level B harassment only. Neither ONR nor NMFS expects serious injury or mortality to result from this activity and, therefore, an IHA is appropriate.

This IHA will cover the fourth year of a larger project for which ONR obtained prior IHAs (83 FR 48799, September 27, 2018; 84 FR 50007, September 24, 2019; 85 FR 53333, August 28, 2020) and may request take authorization for subsequent facets of the overall project. This IHA will be valid for a period of one year, October 5, 2021 to October 4, 2022. The larger project involves several scientific objectives that support the Arctic and Global Prediction Program, as well as the Ocean Acoustic Program and the Naval Research Laboratory, for which ONR is the parent command. ONR has complied with all the requirements (*e.g.,* mitigation, monitoring, and reporting) of the previous IHAs (83 FR 48799, September 27, 2018; 84 FR 50007, September 24, 2019; 85 FR 53333, August 28, 2020).

Description of Activities

Overview

ONR's Arctic Research Activities include scientific experiments to be conducted in support of the following programs: The Arctic and Global Prediction Program, the Ocean Acoustic Program, and the Naval Research Laboratory (NRL), for which ONR is the parent command. Specifically, the project includes the Arctic Mobile Observing System (AMOS), Ocean Acoustics field work, and NRL experiments in the Beaufort and Chukchi Seas. Project activities involve acoustic testing during cruises (two planned) and a multi-frequency navigation system concept test using left-behind active acoustic sources. More specifically, these experiments involve the deployment of moored, drifting, and ice-tethered active acoustic sources as well as a towed source (see details in the proposed notice (86 FR 47065; August 23, 2021) on the Shallow Water Integrate Mapping System) from the Research Vessel (R/V) *Sikuliaq* and another vessel, most likely the U.S. Coast Guard Cutter (CGC) HEALY. Underwater sound from the acoustic sources may result in behavioral harassment of marine mammals.

A detailed description of the planned Arctic Research Activities is provided in the **Federal Register** notice of the proposed IHA (86 FR 47065; August 23, 2021). Since that time, no changes have been made to the project activities. Therefore, a detailed description is not provided here. Please refer to that **Federal Register** notice for the description of the specified activities.

Comments and Responses

A notice of NMFS's proposal to issue an IHA to ONR was published in the **Federal Register** on August 23, 2021 (86 FR 47065). That proposed notice described, in detail, ONR's activities, the marine mammal species that may be affected by the activities and the anticipated effects on marine mammals. During this period, NMFS received two non-substantive public comments that did not present relevant information and did not change our determinations or any aspects of the IHA as described in the proposed **Federal Register** notice (86 FR 47065; August 23, 2021).

Changes From the Proposed IHA to Final IHA

NMFS notes one correction to information provided in the notice of proposed IHA (86 FR 47065; August 23, 2021). The location of the activity was described in error as being potentially as close as 110 miles from Alaska. The correct distance is 110 nautical miles (nm; 204 km).

Description of Marine Mammals in the Area of Specified Activities

Sections 3 and 4 of the application summarize available information regarding status and trends, distribution and habitat preferences, and behavior and life history, of the potentially affected species. Additional information regarding population trends and threats may be found in NMFS's Stock Assessment Reports (SARs; *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments*) and more general information about these species (*e.g.,* physical and behavioral descriptions) may be found on NMFS's website (*https://www.fisheries.noaa.gov/find-species*).

Table 1 lists all species or stocks for which take is expected and is authorized for this action, and summarizes information related to the population or stock, including regulatory status under the MMPA and Endangered Species Act (ESA) and potential biological removal (PBR), where known. For taxonomy, we follow Committee on Taxonomy (2021). PBR is defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population (as described in NMFS's SARs). While no mortality is anticipated or authorized here, PBR and annual serious injury and mortality from anthropogenic sources are included here as gross indicators of the status of the species and other threats.

Marine mammal abundance estimates presented in this document represent the total number of individuals that make up a given stock or the total number estimated within a particular study or survey area. NMFS's stock abundance estimates for most species represent the total estimate of individuals within the geographic area, if known, that comprises that stock. For some species, this geographic area may extend beyond U.S. waters. All managed stocks in this region are assessed in NMFS's 2020 Alaska SARs (Muto *et al.,* 2021). All values presented in Table 1 are the most recent available at the time of publication and are available in the 2020 SARs (Muto *et al.,* 2021) and available online at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments.*

TABLE 1—SPECIES EXPECTED TO OCCUR IN THE PROJECT AREA

Common name	Scientific name	Stock	ESA/MMPA status; strategic (Y/N) [1]	Stock abundance (CV, N_{min}, most recent abundance survey) [2]	PBR	Annual M/SI [3]
Order Cetartiodactyla—Cetacean—Superfamily Odontoceti (toothed whales, dolphins, and porpoises)						
Family Monodontidae						
Beluga whale	*Delphinapterus leucas.*	Beaufort Sea [4]	-,-; N	39,258 (0.229, N/A, 1992)	[4] UND	102
Beluga whale	*Delphinapterus leucas.*	Eastern Chukchi	-,-; N	13,305 (0.51, 8,875, 2012)	178	55
Order Carnivora—Superfamily Pinnipedia						
Family Phocidae (earless seals)						
Ringed seal [5]	*Pusa hispida hispida*	Arctic	T, D; Y	171,418	5,100	6,459

[1] Endangered Species Act (ESA) status: Endangered (E), Threatened (T)/MMPA status: Depleted (D). A dash (-) indicates that the species is not listed under the ESA or designated as depleted under the MMPA. Under the MMPA, a strategic stock is one for which the level of direct human-caused mortality exceeds PBR or which is determined to be declining and likely to be listed under the ESA within the foreseeable future. Any species or stock listed under the ESA is automatically designated under the MMPA as depleted and as a strategic stock.

[2] NMFS marine mammal stock assessment reports online at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessments.* CV is coefficient of variation; Nmin is the minimum estimate of stock abundance.

[3] These values, found in NMFS's SARs, represent annual levels of human-caused mortality plus serious injury from all sources combined (*e.g.,* commercial fisheries, ship strike). Annual M/SI often cannot be determined precisely and is in some cases presented as a minimum value or range. A CV associated with estimated mortality due to commercial fisheries is presented in some cases.

[4] The 2016 guidelines for preparing SARs state that abundance estimates older than 8 years should not be used to calculate PBR due to a decline in the reliability of an aged estimate. Therefore, the PBR for this stock is considered undetermined.

[5] Abundance and associated values for ringed seals are for the U.S. population in the Bering Sea only.

A detailed description of the species likely to be affected by the Arctic Research Activities, including brief information regarding population trends and threats, and information regarding local occurrence, were provided in the

Federal Register notice for the proposed IHA (86 FR 47065; August 23, 2021). Since that time, we are not aware of any changes in the status of these species and stocks; therefore, detailed descriptions are not provided here. Please refer to that **Federal Register** notice for those descriptions. Please also refer to NMFS's website (*https://www.fisheries.noaa.gov/find-species*) for generalized species accounts.

Marine Mammal Hearing

Hearing is the most important sensory modality for marine mammals underwater, and exposure to anthropogenic sound can have deleterious effects. To appropriately assess the potential effects of exposure to sound, it is necessary to understand the frequency ranges marine mammals are able to hear. Current data indicate that not all marine mammal species have equal hearing capabilities (*e.g.,* Richardson *et al.,* 1995; Wartzok and Ketten, 1999; Au and Hastings, 2008). To reflect this, Southall *et al.* (2007) recommended that marine mammals be divided into functional hearing groups based on directly measured or estimated hearing ranges on the basis of available behavioral response data, audiograms derived using auditory evoked potential techniques, anatomical modeling, and other data. Note that no direct measurements of hearing ability have been successfully completed for mysticetes (*i.e.,* low-frequency cetaceans). Subsequently, NMFS (2018) described generalized hearing ranges for these marine mammal hearing groups. Generalized hearing ranges were chosen based on the approximately 65 decibel (dB) threshold from the normalized composite audiograms, with the exception for lower limits for low-frequency cetaceans where the lower bound was deemed to be biologically implausible and the lower bound from Southall *et al.* (2007) retained. Marine mammal hearing groups and their associated hearing ranges are provided in Table 2.

TABLE 2—MARINE MAMMAL HEARING GROUPS (NMFS, 2018)

Hearing group	Generalized hearing range *
Low-frequency (LF) cetaceans (baleen whales)	7 Hz to 35 kHz.
Mid-frequency (MF) cetaceans (dolphins, toothed whales, beaked whales, bottlenose whales)	150 Hz to 160 kHz.
High-frequency (HF) cetaceans (true porpoises, *Kogia,* river dolphins, cephalorhynchid, *Lagenorhynchus cruciger* & *L. australis*).	275 Hz to 160 kHz.
Phocid pinnipeds (PW) (underwater) (true seals)	50 Hz to 86 kHz.
Otariid pinnipeds (OW) (underwater) (sea lions and fur seals)	60 Hz to 39 kHz.

* Represents the generalized hearing range for the entire group as a composite (*i.e.,* all species within the group), where individual species' hearing ranges are typically not as broad. Generalized hearing range chosen based on ~65 dB threshold from normalized composite audiogram, with the exception for lower limits for LF cetaceans (Southall *et al.* 2007) and PW pinniped (approximation).

The pinniped functional hearing group was modified from Southall *et al.* (2007) on the basis of data indicating that phocid species have consistently demonstrated an extended frequency range of hearing compared to otariids, especially in the higher frequency range (Hemilä *et al.,* 2006; Kastelein *et al.,* 2009; Reichmuth and Holt, 2013).

For more detail concerning these groups and associated frequency ranges, please see NMFS (2018) for a review of available information. Two marine mammal species (1 cetacean and 1 pinniped (1 phocid) species) have the reasonable potential to co-occur with the survey activities. Please refer to Table 1. Beluga whales are classified as mid-frequency cetaceans.

Potential Effects of Specified Activities on Marine Mammals and Their Habitat

The effects of underwater noise from the deployed acoustic sources have the potential to result in behavioral harassment of marine mammals in the vicinity of the study area. The **Federal Register** notice for the proposed IHA (86 FR 47065; August 23, 2021) included a discussion of the effects of anthropogenic noise on marine mammals and their habitat, therefore that information is not repeated here; please refer to the **Federal Register** notice (86 FR 47065; August 23, 2021) for that information.

Estimated Take

This section provides an estimate of the number of incidental takes authorized through this IHA, which will inform NMFS' consideration of the negligible impact determination.

Harassment is the only type of take expected to result from these activities. For this military readiness activity, the MMPA defines ''harassment'' as (i) Any act that injures or has the significant potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) Any act that disturbs or is likely to disturb a marine mammal or marine mammal stock in the wild by causing disruption of natural behavioral patterns, including, but not limited to, migration, surfacing, nursing, breeding, feeding, or sheltering, to a point where the behavioral patterns are abandoned or significantly altered (Level B harassment).

Authorized takes are by Level B harassment only, in the form of disruption of behavioral patterns for individual marine mammals resulting from exposure to acoustic transmissions. Based on the nature of the activity, Level A harassment is neither anticipated nor authorized.

As described previously, no mortality is anticipated or authorized for this activity. Below we describe how the take is estimated.

Generally speaking, we estimate take by considering: (1) Acoustic thresholds above which NMFS believes the best available science indicates marine mammals will be behaviorally harassed or incur some degree of permanent hearing impairment; (2) the area or volume of water that will be ensonified above these levels in a day; (3) the density or occurrence of marine mammals within these ensonified areas; and, (4) and the number of days of activities. We note that while these basic factors can contribute to a basic calculation to provide an initial prediction of takes, additional information that can qualitatively inform take estimates is also sometimes available (*e.g.,* previous monitoring results or average group size). For this IHA, ONR employed a sophisticated model known as the Navy Acoustic Effects Model (NAEMO) for assessing the impacts of underwater sound. Below, we describe the factors considered here in more detail and present the authorized take.

Acoustic Thresholds

Using the best available science, NMFS recommends the use of acoustic

thresholds that identify the received level of underwater sound above which exposed marine mammals would be reasonably expected to be behaviorally harassed (equated to Level B harassment) or to incur PTS of some degree (equated to Level A harassment).

Level B Harassment for non-explosive sources—Though significantly driven by received level, the onset of behavioral disturbance from anthropogenic noise exposure is also informed to varying degrees by other factors related to the source (*e.g.,* frequency, predictability, duty cycle), the environment (*e.g.,* bathymetry), and the receiving animals (*e.g.,* hearing, motivation, experience, demography, behavioral context) and can be difficult to predict (Southall *et al.,* 2007, Ellison *et al.,* 2012). Based on what the available science indicates and the practical need to use a threshold based on a factor that is both predictable and measurable for most activities, NMFS typically uses a generalized acoustic threshold based on received level to estimate the onset of behavioral harassment. NMFS typical generalized acoustic thresholds are received levels of 120 dB of 1 microPascal (re 1 μPa; rms) for continuous (*e.g.,* vibratory pile-driving, drilling) and above 160 dB re 1 μPa (rms) for non-explosive impulsive (*e.g.,* seismic airguns) or intermittent (*e.g.,* scientific sonar) sources. In this case, NMFS has adopted the Navy's approach to estimating incidental take by Level B harassment from the active acoustic sources for this action, which includes use of the dose response functions described below.

The Navy's dose response functions were developed to estimate take from sonar and similar transducers. Multi-year research efforts have conducted sonar exposure studies for odontocetes and mysticetes (Miller *et al.,* 2012; Sivle *et al.,* 2012). Several studies with captive animals have provided data under controlled circumstances for odontocetes and pinnipeds (Houser *et al.,* 2013a; Houser *et al.,* 2013b). Moretti *et al.,* (2014) published a beaked whale dose-response curve based on passive acoustic monitoring of beaked whales during U.S. Navy training activity at Atlantic Underwater Test and Evaluation Center during actual Anti-Submarine Warfare exercises. This new information necessitated the update of the behavioral response criteria for the U.S. Navy's environmental analyses.

Southall *et al.,* (2007), and more recently Southall *et al.,* (2019), synthesized data from many past behavioral studies and observations to determine the likelihood of behavioral reactions at specific sound levels. While in general, the louder the sound source the more intense the behavioral response, it was clear that the proximity of a sound source and the animal's experience, motivation, and conditioning were also critical factors influencing the response (Southall *et al.,* 2007; Southall *et al.,* 2019). After examining all of the available data, the authors felt that the derivation of thresholds for behavioral response based solely on exposure level was not supported because context of the animal at the time of sound exposure was an important factor in estimating response. Nonetheless, in some conditions, consistent avoidance reactions were noted at higher sound levels depending on the marine mammal species or group allowing conclusions to be drawn. Phocid seals demonstrated avoidance reactions at or below 190 dB re 1 μPa at 1m; thus, seals may actually receive levels adequate to produce TTS before avoiding the source.

Odontocete behavioral criteria for non-impulsive sources were updated based on controlled exposure studies for dolphins and sea mammals, sonar, and safety (3S) studies where odontocete behavioral responses were reported after exposure to sonar (Antunes *et al.,* 2014; Houser *et al.,* 2013b); Miller *et al.,* 2011; Miller *et al.,* 2014; Miller *et al.,* 2012). For the 3S study, the sonar outputs included 1–2 kilohertz (kHz) up- and down-sweeps and 6–7 kHz up-sweeps; source levels were ramped up from 152–158 dB re 1 μPa to a maximum of 198–214 re 1 μPa at 1 meter (m). Sonar signals were ramped up over several pings while the vessel approached the mammals. The study did include some control passes of ships with the sonar off to discern the behavioral responses of the mammals to vessel presence alone versus active sonar.

The controlled exposure studies included exposing the Navy's trained bottlenose dolphins to mid-frequency sonar while they were in a pen. Mid-frequency sonar was played at 6 different exposure levels from 125–185 dB re 1 μPa (rms). The behavioral response function for odontocetes resulting from the studies described above has a 50 percent probability of response at 157 dB re 1 μPa. Additionally, distance cutoffs (20 km for mid-frequency (MF) cetaceans) were applied to exclude exposures beyond which the potential of significant behavioral responses is considered to be unlikely.

The pinniped behavioral threshold was updated based on controlled exposure experiments on the following captive animals: Hooded seal, gray seal (*Halichoerus grypus*), and California sea lion (Götz *et al.,* 2010; Houser *et al.,* 2013a; Kvadsheim *et al.,* 2010). Hooded seals were exposed to increasing levels of sonar until an avoidance response was observed, while the grey seals were exposed first to a single received level multiple times, then an increasing received level. Each individual California sea lion was exposed to the same received level ten times. These exposure sessions were combined into a single response value, with an overall response assumed if an animal responded in any single session. The resulting behavioral response function for pinnipeds has a 50 percent probability of response at 166 dB re 1 μPa. Additionally, distance cutoffs (10 km for pinnipeds) were applied to exclude exposures beyond which the potential of significant behavioral responses is considered to be unlikely.

Level A harassment for non-explosive sources—NMFS' Technical Guidance for Assessing the Effects of Anthropogenic Sound on Marine Mammal Hearing (Version 2.0) (Technical Guidance, 2018) identifies dual criteria to assess auditory injury (Level A harassment) to five different marine mammal groups (based on hearing sensitivity) as a result of exposure to noise from two different types of sources (impulsive or non-impulsive). ONR's activities involve only non-impulsive sources.

These thresholds are provided in Table 3 below. The references, analysis, and methodology used in the development of the thresholds are described in NMFS 2018 Technical Guidance, which may be accessed at *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-acoustic-technical-guidance.*

TABLE 3—THRESHOLDS IDENTIFYING THE ONSET OF PERMANENT THRESHOLD SHIFT

Hearing group	PTS onset acoustic thresholds * (received level)	
	Impulsive	Non-impulsive
Low-Frequency (LF) Cetaceans	*Cell 1:* $L_{pk,flat}$: 219 dB; $L_{E,LF,24h}$: 183 dB	*Cell 2:* $L_{E,LF,24h}$: 199 dB.
Mid-Frequency (MF) Cetaceans	*Cell 3:* $L_{pk,flat}$: 230 dB; $L_{E,MF,24h}$: 185 dB	*Cell 4:* $L_{E,MF,24h}$: 198 dB.
High-Frequency (HF) Cetaceans	*Cell 5:* $L_{pk,flat}$: 202 dB; $L_{E,HF,24h}$: 155 dB	*Cell 6:* $L_{E,HF,24h}$: 173 dB.
Phocid Pinnipeds (PW) (Underwater)	*Cell 7:* $L_{pk,flat}$: 218 dB; $L_{E,PW,24h}$: 185 dB	*Cell 8:* $L_{E,PW,24h}$: 201 dB.
Otariid Pinnipeds (OW) (Underwater)	*Cell 9:* $L_{pk,flat}$: 232 dB; $L_{E,OW,24h}$: 203 dB	*Cell 10:* $L_{E,OW,24h}$: 219 dB.

* Dual metric acoustic thresholds for impulsive sounds: Use whichever results in the largest isopleth for calculating PTS onset. If a non-impulsive sound has the potential of exceeding the peak sound pressure level thresholds associated with impulsive sounds, these thresholds should also be considered.

Note: Peak sound pressure (L_{pk}) has a reference value of 1 µPa, and cumulative sound exposure level (L_E) has a reference value of 1µPa²s. In this Table, thresholds are abbreviated to reflect American National Standards Institute standards (ANSI 2013). However, peak sound pressure is defined by ANSI as incorporating frequency weighting, which is not the intent for this Technical Guidance. Hence, the subscript "flat" is being included to indicate peak sound pressure should be flat weighted or unweighted within the generalized hearing range. The subscript associated with cumulative sound exposure level thresholds indicates the designated marine mammal auditory weighting function (LF, MF, and HF cetaceans, and PW and OW pinnipeds) and that the recommended accumulation period is 24 hours. The cumulative sound exposure level thresholds could be exceeded in a multitude of ways (*i.e.,* varying exposure levels and durations, duty cycle). When possible, it is valuable for action proponents to indicate the conditions under which these acoustic thresholds will be exceeded.

Quantitative Modeling

The Navy performed a quantitative analysis to estimate the number of marine mammals that could be exposed to underwater acoustic transmissions above the previously described threshold criteria during ONR's action. Inputs to the quantitative analysis included marine mammal density estimates obtained from the Navy Marine Species Density Database, marine mammal depth occurrence distributions (U.S. Department of the Navy, 2017b), oceanographic and environmental data, marine mammal hearing data, and criteria and thresholds for levels of potential effects. The quantitative analysis consists of computer modeled estimates and a post-model analysis to determine the number of potential animal exposures. The model calculates sound energy propagation from the non-impulsive acoustic sources, the sound received by animat (virtual animal) dosimeters representing marine mammals distributed in the area around the modeled activity, and whether the sound received by animats exceeds the thresholds for effects.

The Navy developed a set of software tools and compiled data for estimating acoustic effects on marine mammals without consideration of behavioral avoidance or mitigation. These tools and data sets serve as integral components of NAEMO. In NAEMO, animats are distributed non-uniformly based on species-specific density, depth distribution, and group size information and animats record energy received at their location in the water column. A fully three-dimensional environment is used for calculating sound propagation and animat exposure in NAEMO. Site-specific bathymetry, sound speed profiles, wind speed, and bottom properties are incorporated into the propagation modeling process. NAEMO calculates the likely propagation for various levels of energy (sound or pressure) resulting from each source used during the training event.

NAEMO then records the energy received by each animat within the energy footprint of the event and calculates the number of animats having received levels of energy exposures that fall within defined impact thresholds. Predicted effects on the animats within a scenario are then tallied and the highest order effect (based on severity of criteria; *e.g.,* PTS over TTS) predicted for a given animat is assumed. Each scenario, or each 24-hour period for scenarios lasting greater than 24 hours is independent of all others, and therefore, the same individual marine mammal (as represented by an animat in the model environment) could be impacted during each independent scenario or 24-hour period. In few instances, although the activities themselves all occur within the study location, sound may propagate beyond the boundary of the study area. Any exposures occurring outside the boundary of the study area are counted as if they occurred within the study area boundary. NAEMO provides the initial estimated impacts on marine species with a static horizontal distribution (*i.e.,* animats in the model environment do not move horizontally).

There are limitations to the data used in the acoustic effects model, and the results must be interpreted within this context. While the best available data and appropriate input assumptions have been used in the modeling, when there is a lack of definitive data to support an aspect of the modeling, conservative modeling assumptions have been chosen (*i.e.,* assumptions that may result in an overestimate of acoustic exposures):

- Animats are modeled as being underwater, stationary, and facing the source and therefore always predicted to receive the maximum potential sound level at a given location (*i.e.,* no porpoising or pinnipeds' heads above water);
- Animats do not move horizontally (but change their position vertically within the water column), which may overestimate physiological effects such as hearing loss, especially for slow moving or stationary sound sources in the model;
- Animats are stationary horizontally and therefore do not avoid the sound source, unlike in the wild where animals would most often avoid exposures at higher sound levels, especially those exposures that may result in PTS;
- Multiple exposures within any 24-hour period are considered one continuous exposure for the purposes of calculating potential threshold shift, because there are not sufficient data to estimate a hearing recovery function for the time between exposures; and
- Mitigation measures were not considered in the model. In reality, sound-producing activities would be reduced, stopped, or delayed if marine mammals are detected by visual monitoring.

Because of these inherent model limitations and simplifications, model-estimated results should be further analyzed, considering such factors as the range to specific effects, avoidance, and the likelihood of successfully implementing mitigation measures. This analysis uses a number of factors in addition to the acoustic model results to

predict acoustic effects on marine mammals.

For the other non-impulsive sources, NAEMO calculates the SPL and SEL for each active emission during an event. This is done by taking the following factors into account over the propagation paths: Bathymetric relief and bottom types, sound speed, and attenuation contributors such as absorption, bottom loss, and surface loss. Platforms such as a ship using one or more sound sources are modeled in accordance with relevant vehicle dynamics and time durations by moving them across an area whose size is representative of the testing event's operational area.

Table 4 provides range to effects for noise produced through use of the acoustic sources to mid-frequency cetacean and pinniped-specific criteria. Range to effects is important information in predicting non-impulsive acoustic impacts. Therefore, the ranges in Table 4 provide realistic maximum distances over which the specific effects from the use of non-impulsive sources during ONR's action will be possible.

TABLE 4—RANGE TO PTS, TTS, AND BEHAVIORAL EFFECTS IN THE PROJECT AREA BASED ON CUTOFF DISTANCES FOR NON-IMPULSIVE ACOUSTIC SOURCES

Source type	Range to behavioral effects (meters)		Range to TTS effects (meters) [c]		Range to PTS effects (meters) [c]	
	MF cetacean	Pinniped	MF cetacean	Pinniped	MF cetacean	Pinniped
On-site drifting sources [b]	[a] 10,000	[a] 10,000	0	0	0	0
Fixed sources	[a] 20,000	[a] 5,000	0	0	0	0

[a] Cutoff distance applied (U.S. Department of the Navy, 2017a).
[b] Assessed under the assumption that some of the on-site drifting sources would become closer together.
[c] No effect (and therefore, no distance from source) is anticipated based on the NAEMO modeling.

A behavioral response study conducted on and around the Navy range in Southern California (SOCAL BRS) observed reactions to sonar and similar sound sources by several marine mammal species, including Risso's dolphins (*Grampus griseus*), a mid-frequency cetacean (DeRuiter *et al.,* 2013; Goldbogen *et al.,* 2013; Southall *et al.,* 2011; Southall *et al.,* 2012; Southall *et al.,* 2013). In a preliminary analysis, none of the Risso's dolphins exposed to simulated or real mid-frequency sonar demonstrated any overt or obvious responses (Southall *et al.,* 2012, Southall *et al.,* 2013). In general, although the responses to the simulated sonar were varied across individuals and species, none of the animals exposed to real Navy sonar responded; these exposures occurred at distances beyond 10 km, and were up to 100 km away (DeRuiter *et al.,* 2013). These data suggest that most odontocetes (not including beaked whales (Family *Ziphiidae*) and harbor porpoises (*Phocoena phocoena*)) likely do not exhibit significant behavioral reactions to sonar and other transducers beyond approximately 10 km. Therefore, the Navy uses a cutoff distance for odontocetes of 10 km for moderate source level, single platform training, and testing events, and 20 km for all other events, including ONR's action (U.S. Department of the Navy, 2017a). NMFS has adopted this approach in support of this final IHA.

Southall *et al.,* (2007) reported that pinnipeds do not exhibit strong reactions to SPLs up to 140 dB re 1 µPa from non-impulsive sources. While there are limited data on pinniped behavioral responses beyond about 3 km in the water, the Navy used a distance cutoff of 2.7 nm (5 km) for moderate source level, single platform training and testing events, and 5.4 nm (10 km) for all other events, including the Arctic Research Activities (U.S. Department of the Navy, 2017a).

Regardless of the received level at the cutoff distances described above, take is not estimated to occur beyond 10 and 20 km from the source for pinnipeds and cetaceans, respectively. No instances of PTS were modeled for any species or stock; as such, no take by Level A harassment is anticipated or is authorized. Further information on cutoff distances can be found in Section 6.5.1 in ONR's 2021–2022 IHA application on NMFS' website: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/incidental-take-authorizations-military-readiness-activities.*

The marine mammal density numbers utilized for quantitative modeling are from the Navy Marine Species Density Database (U.S. Department of the Navy, 2014). Density estimates are based on habitat-based modeling by Kaschner *et al.,* (2006) and Kaschner (2004). While density estimates for the two stocks of beluga whales are equal (Kaschner *et al.,* 2006; Kaschner 2004), take has been apportioned to each stock proportional to the abundance of each stock. Table 5 shows the exposures expected for the beluga whale and ringed seal based on NAEMO modeled results.

TABLE 5—QUANTITATIVE MODELING RESULTS OF POTENTIAL EXPOSURES

Species	Density (animals/km^2)	Level B harassment (behavioral)	Level B harassment (TTS)	Total take	Percentage of stock taken [1]
Cetacean (odontocete)					
Beluga Whale (Beaufort Sea stock) [1]	0.0087	375	0	375	0.96
Beluga Whale (Chukchi Sea stock) [1]	.....	125	0	125	0.94

TABLE 5—QUANTITATIVE MODELING RESULTS OF POTENTIAL EXPOSURES—Continued

Species	Density (animals/km^2)	Level B harassment (behavioral)	Level B harassment (TTS)	Total take	Percentage of stock taken [1]
Pinniped (phocid)					
Ringed Seal	0.3958	6,050	0	6,050	3.53

[1] Acoustic exposures to beluga whales were not modeled at the stock level. Take of beluga whales in each stock was based on the proportion of each stock in relation to the total number of beluga whales. Therefore, 75 percent of the calculated take was apportioned to the Beaufort Sea stock, and 25 percent of the calculated take was apportioned to the Eastern Chukchi Sea stock.

Mitigation

In order to issue an IHA under section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to the activity, and other means of effecting the least practicable impact on the species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of the species or stock for taking for certain subsistence uses. NMFS regulations require applicants for incidental take authorizations to include information about the availability and feasibility (economic and technological) of equipment, methods, and manner of conducting the activity or other means of effecting the least practicable adverse impact upon the affected species or stocks and their habitat (50 CFR 216.104(a)(11)). The NDAA for FY 2004 amended the MMPA as it relates to military readiness activities and the incidental take authorization process such that ''least practicable impact'' shall include consideration of personnel safety, practicality of implementation, and impact on the effectiveness of the military readiness activity.

In evaluating how mitigation may or may not be appropriate to ensure the least practicable adverse impact on species or stocks and their habitat, as well as subsistence uses where applicable, we carefully consider two primary factors:

(1) The manner in which, and the degree to which, the successful implementation of the measure(s) is expected to reduce impacts to marine mammals, marine mammal species or stocks, and their habitat, as well as subsistence uses. This considers the nature of the potential adverse impact being mitigated (likelihood, scope, range). It further considers the likelihood that the measure will be effective if implemented (probability of accomplishing the mitigating result if implemented as planned), the likelihood of effective implementation (probability implemented as planned), and;

(2) The practicability of the measures for applicant implementation, which may consider such things as cost, impact on operations, and, in the case of a military readiness activity, personnel safety, practicality of implementation, and impact on the effectiveness of the military readiness activity.

Mitigation for Marine Mammals and Their Habitat

Ships operated by or for the Navy have personnel assigned to stand watch at all times, day and night, when moving through the water. While in transit, ships must use extreme caution and proceed at a safe speed (1–3 knots in ice; <10 knots in open ice-free waters) such that the ship can take proper and effective action to avoid a collision with any marine mammal and can be stopped within a distance appropriate to the prevailing circumstances and conditions.

While underway, the ships (including non-Navy ships operating on behalf of the Navy) utilizing active acoustics and towed in-water devices will have at least one watch person during activities. While underway, watch personnel must be alert at all times and have access to binoculars.

During mooring or UUV deployment, visual observation will start 15 minutes prior to and continue throughout the deployment within an exclusion zone of 180 feet (ft; 55 m, roughly one ship length) around the deployed mooring. Deployment will stop if a marine mammal is visually detected within the exclusion zone. Deployment will re-commence if any one of the following conditions are met: (1) The animal is observed exiting the exclusion zone, (2) the animal is thought to have exited the exclusion zone based on its course and speed, or (3) the exclusion zone has been clear from any additional sightings for a period of 15 minutes for pinnipeds and 30 minutes for cetaceans.

Ships will avoid approaching marine mammals head-on and will maneuver to maintain an exclusion zone of 500 yards (yd; 457 m) around observed whales, and 200 ft (183 m) around all other marine mammals, provided it is safe to do so in ice-free waters.

All personnel conducting on-ice experiments, as well as all aircraft operating in the study area, are required to maintain a separation distance of 1,000 ft (305 m) from any observed marine mammal.

These requirements do not apply if a vessel's safety is at risk, such as when a change of course would create an imminent and serious threat to safety, person, vessel, or aircraft, and to the extent that vessels are restricted in their ability to maneuver. No further action is necessary if a marine mammal other than a whale continues to approach the vessel after there has already been one maneuver and/or speed change to avoid the animal. Avoidance measures should continue for any observed whale in order to maintain an exclusion zone of 500 yd (457 m).

Based on our evaluation of the Navy's measures, NMFS has determined that the mitigation measures provide the means effecting the least practicable impact on the affected species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for subsistence uses.

Monitoring and Reporting

In order to issue an IHA for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth requirements pertaining to the monitoring and reporting of such taking. The MMPA implementing regulations at 50 CFR 216.104 (a)(13) indicate that requests for authorizations must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present in the action area. Effective reporting is critical, both to compliance as well as to ensure that the most value is obtained from the required monitoring.

Monitoring and reporting requirements prescribed by NMFS

should contribute to improved understanding of one or more of the following:

- Occurrence of marine mammal species or stocks in the area in which take is anticipated (*e.g.,* presence, abundance, distribution, density).
- Nature, scope, or context of likely marine mammal exposure to potential stressors/impacts (individual or cumulative, acute or chronic), through better understanding of: (1) Action or environment (*e.g.,* source characterization, propagation, ambient noise); (2) affected species (*e.g.,* life history, dive patterns); (3) co-occurrence of marine mammal species with the action; or (4) biological or behavioral context of exposure (*e.g.,* age, calving or feeding areas).
- Individual marine mammal responses (behavioral or physiological) to acoustic stressors (acute, chronic, or cumulative), other stressors, or cumulative impacts from multiple stressors.
- How anticipated responses to stressors impact either: (1) Long-term fitness and survival of individual marine mammals; or (2) populations, species, or stocks.
- Effects on marine mammal habitat (*e.g.,* marine mammal prey species, acoustic habitat, or other important physical components of marine mammal habitat).
- Mitigation and monitoring effectiveness.

While underway, the ships (including non-Navy ships operating on behalf of the Navy) utilizing active acoustics will have at least one watch person during activities. Watch personnel undertake extensive training in accordance with the U.S. Navy Lookout Training Handbook or civilian equivalent, including on the job instruction and a formal Personal Qualification Standard program (or equivalent program for supporting contractors or civilians), to certify that they have demonstrated all necessary skills (such as detection and reporting of floating or partially submerged objects). Additionally, watch personnel have taken the Navy's Marine Species Awareness Training. Their duties may be performed in conjunction with other job responsibilities, such as navigating the ship or supervising other personnel. While on watch, personnel employ visual search techniques, including the use of binoculars, using a scanning method in accordance with the U.S. Navy Lookout Training Handbook or civilian equivalent. A primary duty of watch personnel is to detect and report all objects and disturbances sighted in the water that may be indicative of a threat to the ship and its crew, such as debris, or surface disturbance. Per safety requirements, watch personnel also report any marine mammals sighted that have the potential to be in the direct path of the ship as a standard collision avoidance procedure.

The U.S. Navy has coordinated with NMFS to develop an overarching program plan in which specific monitoring will occur. This plan is called the Integrated Comprehensive Monitoring Program (ICMP) (U.S. Department of the Navy, 2011). The ICMP has been developed in direct response to Navy permitting requirements established through various environmental compliance efforts. As a framework document, the ICMP applies by regulation to those activities on ranges and operating areas for which the Navy is seeking or has sought incidental take authorizations. The ICMP is intended to coordinate monitoring efforts across all regions and to allocate the most appropriate level and type of effort based on a set of standardized research goals, and in acknowledgement of regional scientific value and resource availability.

The ICMP is focused on Navy training and testing ranges where the majority of Navy activities occur regularly as those areas have the greatest potential for being impacted. ONR's Arctic Research Activities in comparison is a less intensive test with little human activity present in the Arctic. Human presence is limited to a minimal amount of days for source operations and source deployments, in contrast to the large majority (greater than 95 percent) of time that the sources will be left behind and operate autonomously. Therefore, a dedicated monitoring project is not warranted. However, ONR will record all observations of marine mammals, including the marine mammal's location (latitude and longitude), behavior, and distance from project activities.

The Navy is committed to documenting and reporting relevant aspects of research and testing activities to verify implementation of mitigation, comply with permits, and improve future environmental assessments. If any injury or death of a marine mammal is observed during the 2021–2022 Arctic Research Activities, the Navy will immediately halt the activity and report the incident to the Office of Protected Resources, NMFS, and the Alaska Regional Stranding Coordinator, NMFS. The following information must be provided:

- Time, date, and location of the discovery;
- Species identification (if known) or description of the animal(s) involved;
- Condition of the animal(s) (including carcass condition if the animal is dead);
- Observed behaviors of the animal(s), if alive;
- If available, photographs or video footage of the animal(s); and
- General circumstances under which the animal(s) was discovered (*e.g.,* deployment of moored or drifting sources, during on-ice experiments, or by transiting vessel).

ONR will provide NMFS with a draft exercise monitoring report within 90 days of the conclusion of the activity. The draft exercise monitoring report will include data regarding acoustic source use and any mammal sightings or detection will be documented. The report will include the estimated number of marine mammals taken during the activity. The report will also include information on the number of shutdowns recorded. If no comments are received from NMFS within 30 days of submission of the draft final report, the draft final report will constitute the final report. If comments are received, a final report must be submitted within 30 days after receipt of comments.

Negligible Impact Analysis and Determination

NMFS has defined negligible impact as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival (50 CFR 216.103). A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (*i.e.,* population-level effects). An estimate of the number of takes alone is not enough information on which to base an impact determination. In addition to considering estimates of the number of marine mammals that might be ''taken'' through harassment, NMFS considers other factors, such as the likely nature of any responses (*e.g.,* intensity, duration), the context of any responses (*e.g.,* critical reproductive time or location, migration), as well as effects on habitat, and the likely effectiveness of the mitigation. We also assess the number, intensity, and context of estimated takes by evaluating this information relative to population status. Consistent with the 1989 preamble for NMFS's implementing regulations (54 FR 40338; September 29, 1989), the impacts from other past and ongoing anthropogenic activities are incorporated into this analysis via their impacts on the environmental baseline (*e.g.,* as reflected in the regulatory status

of the species, population size and growth rate where known, ongoing sources of human-caused mortality, or ambient noise levels).

Underwater acoustic transmissions associated with the Arctic Research Activities, as outlined previously, have the potential to result in Level B harassment of beluga seals and ringed seals in the form of behavioral disturbances. No serious injury, mortality, or Level A harassment are anticipated to result from these described activities.

Effects on individuals that are taken by Level B harassment could include alteration of dive behavior, alteration of foraging behavior, effects to breathing rates, interference with or alteration of vocalization, avoidance, and flight. More severe behavioral responses are not anticipated due to the localized, intermittent use of active acoustic sources. Most likely, individuals will simply be temporarily displaced by moving away from the acoustic source. As described previously in the behavioral effects section, seals exposed to non-impulsive sources with a received sound pressure level within the range of calculated exposures (142–193 dB re 1 μPa), have been shown to change their behavior by modifying diving activity and avoidance of the sound source (Götz *et al.,* 2010; Kvadsheim *et al.,* 2010). Although a minor change to a behavior may occur as a result of exposure to the sound sources associated with ONR's action, these changes will be within the normal range of behaviors for the animal (*e.g.,* the use of a breathing hole further from the source, rather than one closer to the source, will be within the normal range of behavior). Thus, even repeated Level B harassment of some small subset of the overall stock is unlikely to result in any significant realized decrease in fitness for the affected individuals, and will not result in any adverse impact to the stock as a whole.

The project is not expected to have significant adverse effects on marine mammal habitat. While the activities may cause some fish to leave the area of disturbance, temporarily impacting marine mammals' foraging opportunities, this will encompass a relatively small area of habitat leaving large areas of existing fish and marine mammal foraging habitat unaffected. As such, the impacts to marine mammal habitat are not expected to cause significant or long-term negative consequences

In summary and as described above, the following factors primarily support our determination that the impacts resulting from this activity are not expected to adversely affect the species or stock through effects on annual rates of recruitment or survival:

- No injury, serious injury, or mortality is anticipated or authorized;
- Impacts will be limited to Level B harassment only;
- TTS is not expected or predicted to occur; only temporary behavioral modifications are expected to result from these activities; and
- There will be no permanent or significant loss or modification of marine mammal prey or habitat.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the monitoring and mitigation measures, NMFS finds that the total marine mammal take from these activities will have a negligible impact on all affected marine mammal species or stocks.

Unmitigable Adverse Impact Analysis and Determination

Impacts to subsistence uses of marine mammals resulting from the planned action are not anticipated (as described in greater detail in the proposed notice of the IHA (86 FR 47065; August 23, 2021)). The closest active acoustic source (fixed or drifting) within the project site that is likely to cause Level B harassment take is approximately 110 nm (204 km) from land and outside of known subsistence use areas. However, almost all leave-behind sources that will constitute most of the Level B harassment take will be approximately 240 mi (386 km) from shore. In comparison with IHAs issued to ONR for their previous Arctic Research Activities, this project is further north; therefore, there is no spatial overlap between known subsistence harvest sites and the activities contained herein. Furthermore, and as stated above, the range to effects for non-impulsive acoustic sources in this experiment is much smaller than the distance from shore, with acoustic sources that could constitute take being located far away from known subsistence hunting areas. Lastly, the action will not remove individuals from the population.

Based on this information, NMFS has determined that there will be no unmitigable adverse impact on subsistence uses from ONR's planned activities.

Endangered Species Act

Section 7(a)(2) of the Endangered Species Act of 1973 (16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally, in this case with the NMFS Alaska Regional Office (AKR), whenever we propose to authorize take for endangered or threatened species.

The AKR issued a Biological Opinion on September 29, 2021, which concluded that ONR's Arctic Research Activities and NMFS's issuance of an IHA for those activities are not likely to jeopardize the continued existence of the Arctic ringed seal or adversely modify any designated critical habitat.

National Environmental Policy Act

In compliance with the National Environmental Policy Act (NEPA) of 1969 (42 U.S.C. 4321 *et seq.*), as implemented by the regulations published by the Council on Environmental Quality (CEQ; 40 CFR parts 1500–1508), ONR prepared an Supplemental Overseas Environmental Assessment (SOEA) to consider the direct, indirect, and cumulative effects to the human environment resulting from the Arctic Research Activities. NMFS made ONR's SOEA available to the public for review and comment, concurrently with the publication of the proposed IHA (86 FR 47065; August 23, 2021), on the NMFS website (*https://www.fisheries.noaa.gov/action/incidental-take-authorization-office-naval-research-arctic-research-activities-beaufort-1*), in relation to its suitability for adoption by NMFS in order to assess the impacts to the human environment of issuance of an IHA to ONR. In addition, in compliance with NEPA and the CEQ regulations, as well as NOAA Administrative Order 216–6, NMFS has reviewed ONR's SOEA and determined it to be sufficient. NMFS has subsequently adopted that EA (SOEA) and signed a Finding of No Significant Impact (FONSI) on September 23, 2021.

Authorization

As a result of these determinations, NMFS has issued an IHA to ONR for conducting oceanographic research activities in the Beaufort and eastern Chukchi Seas from October 5, 2021 through October 4, 2022, provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated.

Dated: September 30, 2021.

Kimberly Damon-Randall,

Director, Office of Protected Resources, National Marine Fisheries Service.

[RTID 0648–XB459]

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of one scientific research permit.

SUMMARY: Notice is hereby given that NMFS has issued a scientific research permit (Permit 19571–2R) to the NMFS Southwest Fisheries Science Center in La Jolla, California, under the Endangered Species Act (ESA). The research is intended to increase knowledge of black abalone listed under the ESA and to help guide management, conservation, and recovery efforts.

ADDRESSES: The permit and related documents are available for review upon written request via email to *nmfs.wcr-apps@noaa.gov* (please include the permit number in the subject line of the email).

FOR FURTHER INFORMATION CONTACT: Susan Wang, Long Beach, California, phone: 562–980–4199, email: *Susan.Wang@noaa.gov.*

SUPPLEMENTARY INFORMATION: Notice was published in the **Federal Register** on February 16, 2021, that a request for a permit renewal had been submitted by NMFS's Southwest Fisheries Science Center. To locate the **Federal Register** notice that announced our receipt of the application and a complete description of the research, go to *www.federalregister.gov* and search on the permit number and **Federal Register** notice information provided in the table below.

TABLE 1—ISSUED PERMITS

Permit No.	RTID	Applicant	Previous **Federal Register** notice	Issuance date
19571–2R	0648–XA872 ..	NMFS Southwest Fisheries Science Center—8901 La Jolla Shores Drive, La Jolla, CA 92037 (Responsible Party: Kristen Koch).	86 FR 9489; February 16, 2021.	September 16, 2021.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), a final determination has been made that the activities proposed are categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Authority

Scientific research permits are issued in accordance with section 10(a)(1)(A) of the ESA (16 U.S.C. 1531 *et seq.*) and regulations governing listed fish and wildlife permits (50 CFR parts 222–226). NMFS issues permits based on finding that such permits: (1) Are applied for in good faith; (2) if granted and exercised, would not operate to the disadvantage of the listed species that are the subject of the permit; and (3) are consistent with the purposes and policy of section 2 of the ESA. The authority to take listed species is subject to conditions set forth in the permits.

Dated: September 30, 2021.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

[RTID 0648–XB460]

Marine Mammals; File No. 25794

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application.

SUMMARY: Notice is hereby given that Jennifer Burns, Ph.D., Texas Tech University, Biology Department, 2901 Main Street Lubbock, TX 79409–3131 has applied in due form for a permit to import and export specimens of gray seals (*Halichoerus grypus*) for scientific research.

DATES: Written, telefaxed, or email comments must be received on or before November 4, 2021.

ADDRESSES: The application and related documents are available for review by selecting ''Records Open for Public Comment'' from the ''Features'' box on the Applications and Permits for Protected Species (APPS) home page, *https://apps.nmfs.noaa.gov,* and then selecting File No. 25794 from the list of available applications. These documents are also available upon written request via email to *NMFS.Pr1Comments@noaa.gov.*

Written comments on this application should be submitted via email to *NMFS.Pr1Comments@noaa.gov.* Please include File No. 25794 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request via email to *NMFS.Pr1Comments@noaa.gov.* The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Jennifer Skidmore or Sara Young, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*) and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

The applicant proposes to import and export of parts collected from gray seals at Sable Island, Nova Scotia for the purpose of studying the role of maternal iron transfer in the development of heme stores and aerobic diving capacity in gray seal pups. Samples will be imported and exported from up to 35 males, 51 females and 16 pups (of either sex) per year. In addition, the applicant is proposing to opportunistically import and export of samples from 100 gray seals from Canada DFO archives and organs opportunistically salvaged from up to 20 deceased gray seals in Canada. Samples would include blood, milk, whiskers, nails, fur, blubber, muscle, scat, spew, saliva, and urine. Samples

will be imported from Canada through Houston/Dallas (Texas Tech University), Boston (Woods Hole), or Los Angeles/Seattle/Anchorage (University of Alaska Fairbanks). Samples may also be re-exported back to Canada. A permit is requested for a duration of five years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: September 30, 2021.

Benjamin Laws,

Acting Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; NOAA Coastal Ocean Program Grants Proposal Application Package

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Revised Notice of Information Collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for an additional 30 days of public comment preceding submission of the collection to OMB. A 60-day notice of request for comment on the extension of this collection was published in the **Federal Register** on June 8, 2021. This additional notice alerts the public that NOAA intends to revise the information.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before December 6, 2021.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *Adrienne.thomas@noaa.gov.* Please reference OMB Control Number 0648–0384 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or

specific questions related to collection activities should be directed to Laurie Golden, Grants Administrator, 240–533–0285 or *laurie.golden@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for a revision and extension of a currently approved information collection. The National Oceanic and Atmospheric Administration's Coastal Ocean Program (COP), now known as the Competitive Research Program (CRP) under the National Centers for Coastal Ocean Science, provides direct financial assistance through grants and cooperative agreements for research supporting the management of coastal ecosystems and the NOAA RESTORE Science Program (RSP). The statutory authority for COP is Public Law 102–567 Section 201 (Coastal Ocean Program). NOAA was authorized to establish and administer the Restore Science Program, in consultation with the U.S. Fish and Wildlife Service, by the Resources and Ecosystems Sustainability, Tourist Opportunities, and Revived Economies (RESTORE) of the Gulf States Act of 2012 (Pub. L. 112–141, Section 1604). Identified in the RESTORE Act as the Gulf Coast Ecosystem restoration Science, Observation, Monitoring, and Technology Program, the Program is commonly known as the NOAA RESTORE Science Program. In addition to standard government application requirements, applicants for financial assistance are required to submit a project summary form, current and pending form, and a key contacts form for both programs. CRP recipients are required to file annual progress reports and a project final report using CRP formats. The RSP are required to file semi-annual progress reports, a final report, and a Gantt chart showing project milestones using RSP formats. All of these requirements are needed for better evaluation of proposals and monitoring of awards.

Several revisions are being requested for this information collection. The approved annual and final reports for CRP will be revised to include the request for publication digital object identifiers (DOIs). The RSP semi-annual and final reports will be revised to include end-user details. Finally, the Current and Pending Support form is being updated to require applicants disclose all sources of current and pending research support, contractual or otherwise, direct and indirect, including current and pending private and public sources of funding or income, both foreign and domestic. Other support should include all resources made available to a Covered Person in support of and/or related to all of their professional research and development efforts, including resources provided directly to the Covered Person rather than through the research institution, and regardless of whether they have monetary value (*e.g.,* even if the support received is only in-kind, such as office/laboratory space, equipment, supplies, or employees). This should include resource and/or financial support from all foreign and domestic entities, including but not limited to, gifts provided with terms or conditions, financial support for laboratory personnel, and participation of student and visiting researchers supported by other sources of funding.

II. Method of Collection

Respondents have a choice of either electronic or paper forms.

III. Data

OMB Control Number: 0648–0384.

Form Number: None.

Type of Review: Regular submission (revision/extension of a currently approved collection).

Affected Public: Non-profit institutions; State, local, or tribal government; business or other for-profit organizations.

Estimated Number of Respondents: 1,200.

Estimated Time per Response: 30 minutes each for a project summary, key contacts and current and pending federal support; 6 hours for a semi-annual report; 6 hours for an annual report, 10.5 hours for a CRP final report, 10.5 hours for the RSP final report; and 1 hour for the milestone Gantt chart.

Estimated Total Annual Burden Hours: 1,875.

Estimated Total Annual Cost to Public: $0 in recordkeeping/reporting costs.

Respondent's Obligation: Mandatory.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

[RTID 0648–XB488]

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council's is convening its Scientific and Statistical Committee (SSC) via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This webinar will be held on Monday, October 25, 2021, beginning at 9 a.m. Webinar registration information: *https://attendee.gotowebinar.com/register/7720008007096709389.*

Call in information: +1 (562) 247–8422, Access Code: 206–777–773.

ADDRESSES: *Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Scientific and Statistical Committee will meet to review recent stock assessment information from the 2021 Groundfish Management Track Assessments and information provided by the Council's Groundfish Plan Development Team (PDT), and recommend the overfishing limits and acceptable biological catch (ABC) for Georges Bank (GB) cod, and Gulf of Maine (GOM) cod for fishing years 2022–24. They will review information presented by the Groundfish PDT and consider recommending revised OFLs/ABCs for GB haddock and GOM haddock for fishing year 2022. Also on the agenda is to review information presented by the Groundfish PDT and consider recommending revised OFLs/ABCs for white hake under the recently implemented rebuilding plan for this stock. They will consider other business as necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

(Authority: 16 U.S.C. 1801 *et seq.*)

Dated: September 30, 2021.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to Long Beach Cruise Terminal Improvement Project in the Port of Long Beach, California

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of incidental harassment authorization.

SUMMARY: NMFS has received a request from the Carnival Corporation & PLC (Carnival) for the re-issuance of a previously issued incidental harassment authorization (IHA) with the only change being effective dates. The initial IHA authorized take of five species of marine mammals, by Level A and Level B harassment, incidental to construction associated with the Port of Long Beach Cruise Terminal Improvement Project in Port of Long Beach, California. The project has been delayed and none of the work covered in the initial IHA has been conducted. The initial IHA was effective from November 19, 2019, through November 18, 2020, and was re-issued with new effective dates of December 10, 2020 through December 9, 2021. The scope of the activities and anticipated effects remain the same, authorized take numbers are not changed, and the required mitigation, monitoring, and reporting remains the same as included in the initial IHA. NMFS is, therefore, issuing a third identical IHA to cover the incidental take analyzed and authorized in the initial IHA.

DATES: This authorization is effective from December 10, 2021, through December 9, 2022.

ADDRESSES: An electronic copy of the final 2019 IHA previously issued to Carnival, Carnival's application, and the **Federal Register** notices proposing and issuing the initial IHA may be obtained by visiting *https://www.fisheries.noaa.gov/action/incidental-take-authorization-cruise-terminal-improvement-project-port-long-beach-ca.* In case of problems accessing these documents, please call the contact listed below (see **FOR FURTHER INFORMATION CONTACT**).

FOR FURTHER INFORMATION CONTACT: Ben Laws, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

Sections 101(a)(5)(A) and (D) of the Marine Mammal Protection Act (MMPA; 16 U.S.C. 1361 *et seq.*) direct the Secretary of Commerce (as delegated to NMFS) to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

An authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth.

NMFS has defined ''negligible impact'' in 50 CFR 216.103 as an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.

The MMPA states that the term ''take'' means to harass, hunt, capture, kill or attempt to harass, hunt, capture, or kill any marine mammal.

Except with respect to certain activities not pertinent here, the MMPA defines ''harassment'' as any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild (Level A harassment); or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering (Level B harassment).

Summary of Request

On November 25, 2019, NMFS published final notice of our issuance of an IHA authorizing take of marine mammals incidental to the Port of Long Beach Cruise Terminal Improvement Project (84 FR 64833). The effective dates of that IHA were November 19, 2019 through November 18, 2020. On November 24, 2020, Carnival informed NMFS that the project was delayed. Carnival submitted a request that we reissue an identical IHA that would be effective from December 10, 2020

through December 9, 2021, in order to conduct the construction work that was analyzed and for which take was authorized in the previously issued IHA. That IHA was issued on December 9, 2020. On September 20, 2021, Carnival notified NMFS that the project had remained delayed due to COVID–19 impacts, and requested that we re-issue an identical IHA, with effective dates from December 10, 2021 through December 9, 2022. None of the pile driving considered in the initial IHA has occurred. Therefore, reissuance of the IHA is appropriate.

Summary of Specified Activity and Anticipated Impacts

The planned activities (including mitigation, monitoring, and reporting), authorized incidental take, and anticipated impacts on the affected stocks are the same as those analyzed and authorized through the previously issued IHA.

The purpose of Carnival's project is to make improvements to its existing berthing facilities at the Long Beach Cruise Terminal in order to accommodate a new, larger class of cruise ships. Implementation of the project requires pile driving to install two high-capacity mooring dolphins, fenders, and a new passenger bridge system, and dredging at the existing berth and the immediate surrounding area. The location, timing, and nature of the activities, including the types of equipment planned for use, are identical to those described in the initial IHA. The mitigation, monitoring, and reporting measures are also identical to those prescribed in the initial IHA.

Species that are expected to be taken by the specified activity include short-beaked common dolphin (*Delphinus delphis*), long-beaked common dolphin (*Delphinus capensis*), bottlenose dolphin (*Tursiops truncatus*), California sea lion (*Zalophus californianus*) and harbor seal (*Phoca vitulina*). A description of the methods and inputs used to estimate take anticipated to occur and, ultimately, the take that was authorized is found in the previous documents referenced above. The data inputs and methods of estimating take are identical to those used in the initial IHA. NMFS has reviewed recent Stock Assessment Reports, information on relevant Unusual Mortality Events, and recent scientific literature, and determined that no new information affects our original analysis of impacts or take estimate under the initial IHA.

Determinations

Carnival will conduct activities as analyzed in the initial 2019 IHA. As described above, the number of authorized takes of the same species and stocks of marine mammals are identical to the numbers that were found to meet the negligible impact and small numbers standards and authorized under the initial IHA and no new information has emerged that would change those findings. The re-issued 2021 IHA includes identical required mitigation, monitoring, and reporting measures as the initial IHA, and there is no new information suggesting that our analysis or findings should change.

Based on the information contained here and in the referenced documents, NMFS has determined the following: (1) The required mitigation measures will effect the least practicable impact on marine mammal species or stocks and their habitat; (2) the authorized takes will have a negligible impact on the affected marine mammal species or stocks; (3) the authorized takes represent small numbers of marine mammals relative to the affected stock abundances; and (4) Carnival's activities will not have an unmitigable adverse impact on taking for subsistence purposes as no relevant subsistence uses of marine mammals are implicated by this action.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216–6A, NMFS must review our proposed action with respect to environmental consequences on the human environment.

Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review. This action is consistent with categories of activities identified in CE B4 of the Companion Manual for NOAA Administrative Order 216–6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Because the only change to the IHA are effective dates, the CE on record for issuance of the initial IHA applies to this action.

Endangered Species Act (ESA)

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS consults internally whenever we propose to authorize take for endangered or threatened species.

However, no incidental take of ESA-listed species is authorized or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

Authorization

NMFS has issued an IHA to Carnival for in-water construction activities associated with the specified activity from December 10, 2021 through December 9, 2022. All previously described mitigation, monitoring, and reporting requirements from the initial 2019 IHA are incorporated.

Dated: September 30, 2021.

Kimberly Damon-Randall,

Director, Office of Protected Resources, National Marine Fisheries Service.

Endangered and Threatened Species; Announcement of Workshop To Inform Recovery Planning for ESA Listed Rice's Whale (Balaenoptera Ricei)

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice.

SUMMARY: We, NMFS, are convening a workshop to solicit information from experts to inform recovery planning for Rice's whale (*Balaenoptera ricei*) under section 4(f) of the Endangered Species Act (ESA). This workshop will be open to the public.

DATES: *Workshop dates and information:* We will hold the recovery planning workshop for the Rice's whale virtually over the course of 5 sessions in October and November 2021.

- Monday, October 18, 11 a.m.–4 p.m. Eastern Daylight Savings Time (EDT)
- Monday, November 1, 12 p.m.–4 p.m. EDT
- Wednesday, November 10, 12 p.m.–4 p.m. Eastern Standard Time (EST)
- Tuesday, November 16, 12 p.m.–4 p.m. EST
- Thursday, November 18, 12 p.m.–4 p.m. EST

ADDRESSES: If you plan to attend the workshop as an interested member of the public, please register for each session that you would like to observe:

- *Session 1: ttps://bit.ly/RIWH-Wkshp1-Oct18-RSVP*
- *Session 2: https://bit.ly/RIWH-Wkshp2-Nov1-RSVP*
- *Session 3: https://bit.ly/RIWH-Wkshp3-Nov10-RSVP*
- *Session 4: https://bit.ly/RIWH-Wkshp4-Nov16-RSVP*
- *Session 5: https://bit.ly/RIWH-Wkshp5-Nov18-RSVP*

FOR FURTHER INFORMATION CONTACT: Barb Zoodsma, (727) 824–5312, NMFS Southeast Regional Office (SERO), Protected Resources Division, *Barb.Zoodsma@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Background

On April 15, 2019, we published a final rule listing the Gulf of Mexico Bryde's whale (*Balaenoptera edeni*; a subspecies of Bryde's whales) as endangered under the Endangered Species Act (ESA) (84 FR 15446). In 2021, a published study in a peer-reviewed journal (Rosel *et al.,* 2021) provided evidence for and described the individuals referred to as the Gulf of Mexico Bryde's whales as an entirely new species (not just subspecies) of baleen whale. The new species is described as the Rice's whale (*Balaenoptera ricei*). Consequently, on August 23, 2021, we published a direct final rule to update the taxonomic classification, description, and common name of species included in the list of endangered species maintained at 50 CFR 224.101 to reflect the updated science (86 FR 47022). The direct final rule changes the common name of the listed entity from Bryde's whale (Gulf of Mexico subspecies) to Rice's whale, the scientific name from *B. edeni* (unnamed subspecies) to *B. ricei,* and the description of the listed entity from Bryde's whales that breed and feed in the Gulf of Mexico to the entire species. The direct final rule and these changes will be effective on October 22, 2021. The direct final rule ensures that the list of endangered species reflects the best available scientific information. Although the changes to the enumeration of listed species are not yet effective, we are referring to the species using the updated scientific understanding. Therefore, this rule will refer to the individuals as Rice's whale or *B. ricei,* as appropriate. The species' status and legal protections under the ESA remain the same despite the forthcoming changes.

The final listing rule (84 FR 15446; April 15, 2019) describes the background of the listing action for this species and provides a summary of our conclusions regarding its status. For additional background and information about this species, the reader is referred to the status review report, final listing rule, and our species web pages (available at *https://www.fisheries.noaa.gov/species/rices-whale*).

NMFS is required by section 4(f) of the ESA to develop and implement recovery plans for the conservation and survival of federally-listed species unless the Secretary finds that such a plan will not promote the conservation of the species. Recovery means that the status of a listed species has improved to the point at which the protections of the ESA are no longer necessary. The ESA specifies that recovery plans are to include (1) a description of site-specific management actions necessary to achieve the plan's goal for the conservation and survival of the species; (2) objective, measurable criteria which, when met, would result in the species being removed from the list; and (3) estimates of the time and costs required to carry out the actions needed to achieve the plan's conservation and survival goal and to achieve intermediate steps toward that goal. Under section 4(f) of the ESA, public notice and an opportunity for public review and comment also are provided during recovery plan development.

This notice serves as a public notice and opportunity for public attendance in the recovery workshop. Once a recovery plan has been drafted, it will be announced in the **Federal Register** and available on our website for public review and comment before being finalized.

Recovery Planning Workshop Announcement

NMFS will hold a virtual workshop in five sessions to help inform our recovery planning for Rice's whale. The first session will be held on Monday, October 18, 2021, and the last session will be held Thursday, November 18, 2021 (see **DATES** section). We invited experts and stakeholders in specific topic areas, including the species' biology and ecology, threats to the species and the species' habitat, the recovery planning process itself, and cetacean conservation and management. These experts and stakeholders will help us identify potential actions to address the threats to the species, identify gaps in knowledge and associated research needs, as well as begin developing recovery criteria for the species. Identified experts and stakeholders include representatives of Federal and State agencies, scientific experts, individuals from industry, and individuals from conservation partners and nongovernmental organizations.

NMFS has contracted a facilitator to manage the workshop as well as note takers to document input received. We are seeking information; we will not be asking for consensus recommendations on how to recover the Rice's whale species. A summary of the workshop will be prepared, noting the main points raised by the participants.

This workshop will be open to the public, and a public comment period will be provided at the end of each session. If you plan to attend the workshop as an interested member of the public, please register via the website addresses listed in the **ADDRESSES** section, so we can ensure sufficient online connectivity for participants and interested parties during our logistics planning.

Schedule of Workshops

- *Session 1: Workshop Series Kick-Off*—October 18—Session 1 will focus on general background and orientation to Rice's whale recovery process
- *Session 2: Entanglement, Prey, and Climate Change*—November 1—Session 2 will focus on entanglement, prey, and climate change
- *Session 3: Marine Debris and Environmental Pollutants*—November 10—Session 3 will focus on marine debris and environmental pollutants (oil spills, contaminants and disease)
- *Session 4: Anthropogenic Noise and Acoustic Habitat, Vessel Strikes, Marine Structures*—November 16—Session 4 will focus on anthropogenic noise and acoustic habitat, vessel strikes, and marine structures (offshore renewable energy, sediment diversion and aquaculture)
- *Session 5: Recovery Criteria Discussion*—November 18—Session 5 will focus on bringing workshop takeaways together and deeper dive into recovery criteria

Workshops are accessible to persons with disabilities. Send requests for auxiliary aids at least five business days in advance of the start date of the session to Barb Zoodsma at *Barb.Zoodsma@noaa.gov.*

Authority: 16 U.S.C. 1531 *et seq.*

National Technical Information Service

National Technical Information Service Advisory Board

AGENCY: National Technical Information Service, Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: This notice announces the next meeting of the National Technical Information Service (NTIS) Advisory Board (the Advisory Board).

DATES: The Advisory Board will meet on Wednesday, October 27, 2021 from 1:00 p.m. to approximately 4:30 p.m., Eastern Time, via teleconference.

ADDRESSES: The Advisory Board meeting will be via teleconference. Please note attendance instructions under the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Elizabeth Shaw, (703) 605–6136, *eshaw@ntis.gov* or Steven Holland at *sholland@ntis.gov.*

SUPPLEMENTARY INFORMATION: The Advisory Board is established by Section 3704b(c) of Title 15 of the United States Code. The charter has been filed in accordance with the requirements of the Federal Advisory Committee Act, as amended (5 U.S.C. app.). The Advisory Board reviews and makes recommendations to improve NTIS programs, operations, and general policies in support of NTIS' mission to advance Federal data priorities, promote economic growth, and enable operational excellence by providing innovative data services to Federal agencies through joint venture partnerships with the private sector.

The meeting will focus on a review of the progress NTIS has made in implementing its data mission and strategic direction. A final agenda and summary of the proceedings will be posted on the NTIS website as soon as they are available (*https://www.ntis.gov/about/advisorybd/index.xhtml*).

The teleconference will be via controlled access. Members of the public interested in attending via teleconference or speaking are requested to contact Ms. Shaw at the contact information listed in the **FOR FURTHER INFORMATION CONTACT** section above not later than Friday, October 22, 2021. If there are sufficient expressions of interest, up to one-half hour will be reserved for public oral comments during the session. Speakers will be selected on a first-come, first-served basis. Each speaker will be limited to five minutes. Questions from the public will not be considered during this period.

Speakers who wish to expand upon their oral statements, those who had wished to speak but could not be accommodated on the agenda, and those who were unable to attend are invited to submit written statements by emailing Ms. Shaw at the email address provided in the **FOR FURTHER INFORMATION CONTACT** section above.

Dated: September 29, 2021.

Gregory Capella,

Director.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Matters Related to First Inventor To File

AGENCY: United States Patent and Trademark Office, Department of Commerce.

ACTION: Notice of information collection; request for comment.

SUMMARY: The United States Patent and Trademark Office (USPTO), as required by the Paperwork Reduction Act of 1995, invites comments on the extension and revision of an existing information collection: 0651–0071 (Matters Relating to First Inventor to File). The purpose of this notice is to allow 60 days for public comment preceding submission of the information collection to OMB.

DATES: To ensure consideration, comments regarding this information collection must be received on or before December 6, 2021.

ADDRESSES: Interested persons are invited to submit written comments by any of the following methods. Do not submit Confidential Business Information or otherwise sensitive or protected information:

- *Email: InformationCollection@uspto.gov.* Include ''0651–0071 comment'' in the subject line of the message.
- *Federal Rulemaking Portal: http://www.regulations.gov.*
- *Mail:* Kimberly Hardy, Office of the Chief Administrative Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Parikha Mehta, Legal Advisor, Office of Patent Legal Administration, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–3248; or by email to *Parikha.Mehta@uspto.gov* with ''0651–0071 comment'' in the subject line of the message. Additional information about this information collection is also available at *http://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent System uses a 'first to file' system, as introduced by the Leahy-Smith America Invents Act (AIA) which was enacted into law on September 16, 2011. To determine the first inventor to file, information is needed in order to identify the inventorship and ownership, or obligation to assign ownership, of each claimed invention on its effective filing date. Section 3 of the AIA, *inter alia,* amended 35 U.S.C. 102 and 103 consistent with the objectives of the AIA, including the conversion of the United States patent system from a ''first to invent'' system to a ''first inventor to file'' system. The changes in section 3 of the AIA went into effect on March 16, 2013, but apply only to certain applications filed on or after March 16, 2013.

This information collection covers information required by 37 CFR 1.55(k), 1.78(a)(6), and 1.78(d)(6) to assist the USPTO in determining whether an application is subject to 35 U.S.C. 102 and 103 as amended by Section 3 of the AIA, or 35 U.S.C. 102 and 103, in effect on March 15, 2013.

II. Method of Collection

The items in this information collection may be submitted by mail, facsimile, hand delivery, or via the Patent Electronic Systems (EFS-Web or Patent Center).

III. Data

OMB Control Number: 0651–0071.
Form Number(s): None.
Type of Review: Extension and revision of a currently approved information collection.
Affected Public: Private sector; individuals or households.
Estimated Number of Respondents: 99 respondents per year.
Estimated Number of Responses: 144 responses per year.
Estimated Time per Response: The USPTO estimates that the responses in this information collection will take the public 2 hours to complete. This

includes the time to gather the necessary information, create the document, and submit the completed request to the USPTO.

Estimated Total Annual Respondent Burden Hours: 288 hours.

Estimated Total Annual Respondent Hourly Cost Burden: $115,200.

TABLE 1—TOTAL HOURLY BURDEN FOR PRIVATE SECTOR RESPONDENTS

Item No.	Item	Estimated annual respondents	Responses per respondent	Estimated annual responses	Estimated time for response (hours)	Estimated burden (hour/year)	Rate [1] ($/hour)	Estimated annual respondent cost burden
		(a)	(b)	(a) × (b) = (c)	(d)	(c) × (d) = (e)	(f)	(e) × (f) = (g)
1	Submissions Under CFR 1.55(k)	47	1.5	71	2	142	$400	$56,800
2	Submissions Under 37 CFR 1.78(a)(6).	37	1.5	56	2	112	400	44,800
3	Submissions Under 37 CFR 1.78(d)(6).	9	1.5	14	2	28	400	11,200
Total		96		141		282		112,800

[1] 2019 Report of the Economic Survey, published by the Committee on Economics of Legal Practice of the American Intellectual Property Law Association (AIPLA); *https://www.aipla.org/detail/journal-issue/2019-report-of-the-economic-survey.* The USPTO uses the mean rate for attorneys in private firms which is $400 per hour.

TABLE 2—TOTAL HOURLY BURDEN FOR INDIVIDUALS OR HOUSEHOLDS RESPONDENTS

Item No.	Item	Estimated annual respondents	Responses per respondent	Estimated annual responses	Estimated time for response (hours)	Estimated burden (hour/year)	Rate [2] ($/hour)	Estimated annual respondent cost burden
		(a)	(b)	(a) × (b) = (c)	(d)	(c) × (d) = (e)	(f)	(e) × (f) = (g)
1	Submissions Under CFR 1.55(k)	1	1	1	2	2	$400	$800
2	Submissions Under 37 CFR 1.78(a)(6)	1	1	1	2	2	400	800
3	Submissions Under 37 CFR 1.78(d)(6)	1	1	1	2	2	400	800
Total		3		3		6		2,400

[2] 2019 Report of the Economic Survey, published by the Committee on Economics of Legal Practice of the American Intellectual Property Law Association (AIPLA); *https://www.aipla.org/detail/journal-issue/2019-report-of-the-economic-survey.* The USPTO uses the mean rate for attorneys in private firms which is $400 per hour.

Estimated Total Annual Respondent (Non-hourly) Cost Burden: $8. There are no capital start-up, filing fees, recordkeeping, or maintenance costs associated with this information collection. However, the information collection may have annual (non-hour) costs in the form of postage costs.

Although the USPTO prefers that the items in this information collection be submitted electronically, responses may be submitted by mail through the United States Postal Service (USPS). The USPTO estimates that 1% of the items will be submitted in the mail resulting in 1 mailed item. The USPTO estimates that the average postage cost for a mailed submission, using a Priority Mail 2-day flat rate legal envelope, will be $8.25. Therefore, the USPTO estimates $8 in postage costs associated with this information collection.

IV. Request for Comments

The USPTO is soliciting public comments to:

(a) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility;

(b) Evaluate the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected; and

(d) Minimize the burden of the collection on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

All comments submitted in response to this notice are a matter of public record. USPTO will include or summarize each comment in the request to OMB to approve this information collection. Before including an address, telephone number, email address, or other personal identifying information (PII) in a comment, be aware that the entire comment—including PII—may be made publicly available at any time. While you may ask in your comment to withhold PII from public view, USPTO cannot guarantee that it will be able to do so.

Kimberly Hardy,

Information Collections Officer, Office of the Chief Administrative Officer, United States Patent and Trademark Office.

September 29, 2021

Order Scheduling Prehearing Conference

Pursuant to 16 CFR 1025.21, the undersigned Administrative Law Judge hereby schedules a prehearing conference in the above matter. In view of the social distancing precautions necessitated by the ongoing Covid-19 pandemic, the prehearing conference shall be held by telephone as follows:

Date: Wednesday, October 20, 2021.

Time: 11:00 a.m. Eastern Time.

Call-in Number: 888–370–8496; Passcode: 69953050.

In accordance with 16 CFR 1025.21(b), the issues to be addressed at the conference are the items numbered (1) through (14) in 16 CFR 1025.21(a). If the time of the conference is infeasible for any party, that party should promptly file a motion for a continuance. I direct that notice of this conference and a statement of the issues to be discussed shall be published in the **Federal Register** at least ten days in advance of the scheduled date. 16 CFR 1025.21(b)

A ruling on the parties' Joint Motion to Amend Discovery Schedule and for Protective Order will be forthcoming.

So ordered.

Done and dated September 29, 2021
Arlington, VA

/s/
Mary F. Withum,
Administrative Law Judge.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID: USA–2021–HQ–0022]

Proposed Collection; Comment Request

AGENCY: Department of the Army, Department of Defense (DoD).

ACTION: Information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* Army Survivor Outreach Services announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by December 6, 2021.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: DoD cannot receive written comments at this time due to the COVID–19 pandemic. Comments should be sent electronically to the docket listed above.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to United States Army Installation Management Command Headquarters, 2405 Gun Shed Road, Bldg. 2261 JBSA-Fort Sam Houston, TX 78234, ATTN: Mrs. Kelly Frank, or call 210–466–1200.

SUPPLEMENTARY INFORMATION: *Title; Associated Form; and OMB Number:* Survivor Access Card Application Form; OMB Control Number 0702–SACA.

Needs and Uses: In accordance with AR 190–13, The Army Physical Security Program directed access to Army installations by Family members who are Gold Star and Next of Kin Surviving members to receive services, attend events, view memorials, and similar activities. A Gold Star Family member is a Survivor of a Service member who has lost their life during any armed hostilities in which the United States was engaged and authorized to wear the Gold Star Lapel Button. The Next of Kin Family member is a Survivor of a Service member who lost their life while serving on active duty. Both Gold Star and Gold Star Next of Kin include Survivors of Service members who lose their lives while assigned to a reserve or National Guard unit in drill status. Eligible Survivors to receive the Gold Star Lapel Button or Gold Star Next of Kin (NOK) Lapel Button include the following: Widow or widower, parents, each child, stepchild, child through adoption, brother, half–brother, sister, half–sister or step-siblings. Eligible Survivors must first contact the installation level Survivor Outreach Services (SOS) support coordinator to verify eligibility and coordinate issuance of an installation access credential. Current procedures for obtaining a Survivor Access Card (SAC) direct the Survivor Outreach Service Staff members to assist Survivors in completing the application process for the SAC, verifying the Survivor's eligibility, and coordinating with the installation office responsible for issuing cards. The SAC is issued through the installation's Visitor Control Center. The collection instrument, Survivor Access Card Application Form, is obtained by eligible Surviving Family members from the SOS staff members. The collection instrument is completed electronically and in person by the eligible Surviving Family members, SOS staff members, and Physical Security Personnel. Eligible Surviving Family members are responding to the information collection to obtain the SAC which grants unescorted access onto Army installations to authorized facilities. The SOS staff member forwards the request to the local garrison Physical Security Office to conduct an NCIC–III check. After an applicant is approved, a SAC is issued through the local identification card section or the Automated Installation Entry (AIE) digital SAC is issued through the installation's Visitor Control Center.

Affected public: Individuals or households.

Annual burden hours: 670.

Number of respondents: 670.

Responses per respondent: 1.

Annual responses: 670.

Average burden per response: 1 hour.

Frequency: Once.

Dated: September 28, 2021.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEPARTMENT OF DEFENSE

Office of the Secretary

U.S. Strategic Command Strategic Advisory Group; Notice of Federal Advisory Committee Meeting

AGENCY: Office of the Chairman Joint Chiefs of Staff, U.S. Strategic Command Strategic Advisory Group, Department of Defense (DoD).

ACTION: Notice of closed Federal Advisory Committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the U.S. Strategic Command Strategic Advisory Group (USSTRATCOM SAG) will take place.

DATES:

Day 1—Wednesday, October 27, 2021 from 12:00 p.m. to 5:00 p.m. (Closed)

Day 2—Thursday, October 28, 2021 from 9:00 a.m. to 5:00 p.m. (Closed)

ADDRESSES: 900 SAC Boulevard, Offutt Air Force Base, Nebraska 68113.

FOR FURTHER INFORMATION CONTACT: Mark Olson, (402) 912–0322 (voice), (facsimile), *mark.j.olson.civ@mail.mil* (email). Mailing address is 901 SAC Boulevard, Suite 1F7, Offutt AFB, NE 68113–6030.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) (5 U.S.C., appendix), the Government in the Sunshine Act (5 U.S.C. 552b), and 41 CFR 102–3.140 and 102–3.150.

Purpose of the Meeting: The purpose of the meeting is to provide independent advice on scientific, technical, intelligence, and policy-related issues to the U.S. Strategic Command, during the development of the Nation's strategic war plans.

Agenda: Topics include: Annual Stockpile Assessment; Nuclear Force Modernization; NC3 Enterprise Center (NEC) status deliverables and timeline; NC3 Joint All Domain Command and Control (JADC2); and Operations in a GPS Denied Environment and Deterring Russian/Chinese Escalation to Nuclear Use.

Meeting Accessibility: Pursuant to 5 U.S.C. 552b, and 41 CFR 102–3.155, the Department of Defense has determined that the meeting shall be closed to the public. Per delegated authority by the Chairman, Joint Chiefs of Staff, Admiral Charles A. Richard, Commander, U.S. Strategic Command, in consultation with his legal advisor, has determined in writing that the public interest requires that all sessions of this meeting be closed to the public because they will be concerned with matters listed in 5 U.S.C. 552b(c)(1).

Written Statements: Pursuant to section 10(a)(3) of the Federal Advisory Committee Act and 41 CFR 102–3.140, interested persons may submit written statements to the Designated Federal Officer for the USSTRATCOM SAG at any time. Written statements should be submitted to the Designated Federal Officer at the email or mailing address listed above in **FOR FURTHER INFORMATION CONTACT**. If statements pertain to a specific topic being discussed at a planned meeting, then these statements must be submitted no later than five (5) business days prior to the meeting in question. Written statements received after this date may not be provided to or considered by the USSTRATCOM SAG until its next meeting. The Designated Federal Officer will review all timely submitted written statements and provide copies to all the committee members before the meeting that is the subject of this notice.

Dated: September 29, 2021.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

[Docket No.: ED–2021–SCC–0145]

Agency Information Collection Activities; Comment Request; District Survey on Use of Funds Under Title II, Part A

AGENCY: Office of Elementary and Secondary Education (OESE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing a revision of a currently approved collection.

DATES: Interested persons are invited to submit comments on or before December 6, 2021.

ADDRESSES: To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2021–SCC–0145. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the *regulations.gov* site is not available to the public for any reason, ED will temporarily accept comments at *ICDocketMgr@ed.gov.* Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the PRA Coordinator of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W208D, Washington, DC 20202–8240.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection

activities, please contact Andrew Brake, 202–453–6136.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: District Survey on Use of Funds Under Title II, Part A.

OMB Control Number: 1810–0618.

Type of Review: A revision of a currently approved collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 4,452.

Total Estimated Number of Annual Burden Hours: 8,852.

Abstract: The U.S. Department of Education is requesting clearance for a revision to 1810–0618 in order to continue collecting data annually from school districts about how Title II, Part A funds are used to support authorized activities and improve equitable access to teachers for low-income and minority students; including professional development for teachers, principals, and other school leaders. The reporting requirements are outlined in Section 2104(b) of the Elementary and Secondary Education Act (ESEA), as reauthorized by the Every Student Succeeds Act of 2015 (ESSA). The annual survey will include a state representative sample of traditional school districts, a nationally representative sample of charter school districts, and an annual request for each state to provide a list of districts that receive Title II, Part A funds and each district's allocated Title II, part A amount. The survey will be sent to district Title II, Part A coordinators and administered using an electronic instrument.

Dated: September 30, 2021.

Kate Mullan,

PRA Coordinator, Strategic Collections and Clearance Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

BILLING CODE 4000–01–P

DEPARTMENT OF EDUCATION

List of Borrowers Who Have Defaulted on Their Health Education Assistance Loans

AGENCY: Federal Student Aid, Department of Education.

ACTION: Notice.

SUMMARY: Federal Student Aid (FSA), as required by the Public Health Service Act (the Act), is publishing this list of Health Education Assistance Loan (HEAL) borrowers who have defaulted on their loans as of August 1, 2021. This information is also made available for use by organizations authorized by the Act.

FOR FURTHER INFORMATION CONTACT:

For Defaulted HEAL Borrowers with Account-Related Questions: A borrower who is in default on a HEAL program loan and who has an account-related question should contact: HHS Program Support Center, Debt Collection Center, 7700 Wisconsin Avenue, Suite 8–8310A, Bethesda, MD 20857 (use ZIP code 20814 for overnight mail). Telephone: (301) 492–4664.

For General HEAL Information: For general HEAL program questions, contact the HEAL program team: Telephone: (844) 509–8957. Email: *HEAL@ed.gov.*

For Organizations Requesting HEAL Defaulted Borrower Information or Confirmation under Section 709(c)(2) of the Act (42 U.S.C. 292h(c)(2)): To request information related to a HEAL defaulted borrower or confirmation of the borrower's default status, contact the HEAL program team: Telephone: (844) 509–8957. Email: *HEAL@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service, toll free, at 1–800–877–8339.

SUPPLEMENTARY INFORMATION: From fiscal year 1978 through fiscal year 1998, the HEAL program insured loans made by participating lenders to eligible graduate students in schools of medicine, osteopathy, dentistry, veterinary medicine, optometry, podiatry, public health, pharmacy, and chiropractic, and in programs in health administration and clinical psychology. Authorization for new HEAL program loans was discontinued on September 30, 1998.

Under division H, title V, section 525 of the Consolidated Appropriations Act, 2014 (Pub. L. 113–76), and title VII, part A, subpart I of the Public Health Service Act (42 U.S.C. chapter 6A), the authority to administer the HEAL program, including servicing, collecting, and enforcing any loans made under the HEAL program that remain outstanding, was transferred from the Secretary of Health and Human Services to the Secretary of Education effective July 1, 2014. Section 709(c)(1) of the Act (42 U.S.C. 292h(c)(1)) requires, and a routine use in a system of records notice published in the **Federal Register** on August 14, 2018 (83 FR 40264) permits, the publishing of the list of HEAL borrowers who have defaulted on their loans.

Information on the HEAL program is available on the Department of Education's FSA Partner Connect Knowledge Center website at: *fsapartners.ed.gov/knowledge-center.*

List of Defaulters

The following list provides the names and other information of borrowers who have defaulted on their HEAL program loans as of August 1, 2021. Specifically, the list includes the borrower's name, last known city and State of residence, area of practice, and the total amount due on the HEAL debt. The Department publishes this information in order to correctly identify the person in default and to provide relevant information to the authorized recipients of this information, such as State licensing boards and hospitals.

In accordance with section 709(c)(2) of the Act (42 U.S.C. 292h(c)(2)), FSA will provide the information included in this **Federal Register** notice and updated information on the borrower's default status to relevant Federal agencies and to schools, school associations, professional and specialty associations, State licensing boards, hospitals with which listed borrowers may be associated, and other relevant organizations, upon written request to the email address listed under **FOR FURTHER INFORMATION CONTACT**. Any written request must be on the

letterhead of the organization making the request.

Accessible Format: On request to the program contact person listed under **FOR FURTHER INFORMATION CONTACT**, individuals with disabilities can obtain this document in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

Electronic Access to This Document: The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

Program Authority: 20 U.S.C. 1071 *et seq.* and 1087a *et seq.;* and 42 U.S.C. 292h(c).

Richard Cordray,

Chief Operating Officer, Federal Student Aid.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

Renewal of a Currently Approved Information Collection for the Energy Efficiency and Conservation Block Grant Financing Programs

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice and request for comments.

SUMMARY: The Department of Energy (DOE), pursuant to the Paperwork Reduction Act of 1995, intends to extend for three years a currently approved collection of information with the Office of Management and Budget (OMB). The information collection request, Energy Efficiency and Conservation Block Grant Program, was previously approved under OMB Control No. 1910–5150 and its current expiration date is September 30, 2021. The proposed collection will collect information on the status of Grantee activities, expenditures, and results, to ensure that program funds are being used appropriately, effectively, and expeditiously.

DATES: Comments regarding this collection must be received on or before November 4, 2021. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, please advise the OMB Desk Officer of your intention to make a submission as soon as possible. The Desk Officer may be telephoned at (202) 395–4650.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function, or to: James Carlisle, EE–5W, U.S. Department of Energy, 1000 Independence Ave. SW, Washington, DC 20585, Email: *james.carlisle@ee.doe.gov*.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to: James Carlisle, U.S. Department of Energy, 1000 Independence Ave. SW, Washington, DC 20585, Phone: (202) 287–1724, Fax: (412) 386–5835, Email: *james.carlisle@ee.doe.gov*.

SUPPLEMENTARY INFORMATION: This information collection request contains: (1) *OMB No.:* 1910–5150; (2) *Information Collection Request Title:* Energy Efficiency and Conservation Block Grant Program Financing Programs; (3) *Type of Review:* Renewal

of a Currently Approved Information Collection; (4) *Purpose:* To collect information on the status of Financing Program activities, expenditures, and results, to ensure that program funds are being used appropriately, effectively and expeditiously; (5) *Annual Estimated Number of Respondents:* 54; (6) *Annual Estimated Number of Total Responses:* 101; (7) *Annual Estimated Number of Burden Hours:* 303; (8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* $12,120. Respondents, total responses, burden hours and the annual cost burden have all been reduced over time because of the retirement of grants, fewer programs and a lessened burden on reporting and recordkeeping costs.

Statutory Authority: Title V, Subtitle E of the Energy Independence and Security Act (EISA), Public Law 110–140 as amended (42 U.S.C. 17151 *et seq.*).

Signing Authority

This document of the Department of Energy was signed on September 27, 2021, by Kelly Speakes-Backman, Principal Deputy Assistant Secretary and Acting Assistant Secretary for Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on September 29, 2021.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

National Nuclear Security Administration

Supply of Molybdenum-99 (Mo-99) Produced Without the Use of Highly Enriched Uranium (HEU)

AGENCY: National Nuclear Security Administration (NNSA), Department of Energy (DOE).

ACTION: Request for information (RFI).

SUMMARY: DOE, in accordance with Section 3174 of the American Medical Isotopes Production Act of 2012 (AMIPA), is preparing for a Secretarial certification regarding the sufficiency of supply of non-HEU based Mo-99. DOE is seeking public input as part of its certification development process and analysis to determine the sufficiency of Mo-99 supply to meet U.S. patient needs.

DATES: DOE will accept comments, data, and information in response to this RFI on or before November 4, 2021.

ADDRESSES: Interested persons may submit comments via email to the Office of Conversion at *OfficeofConversion@nnsa.doe.gov.*

Although DOE has routinely accepted public comment submissions through a variety of mechanisms, including postal mail and hand delivery/courier, the Department has found it necessary to make temporary modifications to the comment submission process in light of the ongoing coronavirus (COVID–19) pandemic. DOE is currently accepting only electronic submissions at this time.

If a commenter finds that this change poses an undue hardship, please contact the Office of Conversion at *OfficeofConversion@nnsa.doe.gov* to discuss the need for alternative arrangements. Once the COVID–19 pandemic health emergency is resolved, DOE anticipates resuming all of its regular options for public comment submission, including postal mail and hand delivery/courier. No facsimiles (faxes) will be accepted.

Instructions: All submissions received must include the agency name and title for this RFI in Microsoft Word or PDF file format and avoid the use of special characters or any form of encryption.

FOR FURTHER INFORMATION CONTACT: Requests for additional information may be sent to Max Postman in the Office of Conversion at 240–246–5564, *Max.Postman@nnsa.doe.gov.*

SUPPLEMENTARY INFORMATION:

I. Authority and Background

The U.S. medical community depends on a reliable supply of the radioisotope Mo-99 for nuclear medical diagnostic procedures. Approximately 80 percent of these procedures depend on the use of technetium-99m (Tc-99m), a decay product of Mo-99. Tc-99m is used in over 40,000 medical procedures every day in the United States. Its primary uses include diagnosing heart disease and cancer, as well as studying organ structure and function. Historically, the United States has not had the capability to produce Mo-99 domestically and, until 2018, imported 100 percent of its supply from international producers, some of which supply was produced using targets fabricated with proliferation-sensitive HEU.

AMIPA (Subtitle F, Title XXXI of the National Defense Authorization Act for Fiscal Year 2013 (Pub. L. 112–139)), enacted on January 2, 2013, amended Section 134 of the Atomic Energy Act of 1954 (42 U.S.C. 2160d) by striking subsection c. and inserting language that prohibits the Nuclear Regulatory Commission (NRC) from issuing a license for the export of HEU from the United States for the purposes of medical isotope production, effective seven years after enactment of AMIPA, subject to a certification regarding the sufficiency of Mo-99 supply in the United States.

Section 3174 of AMIPA requires the Secretary of Energy to either jointly certify, with the Secretary of Health and Human Services, that there is a sufficient supply of Mo-99 produced without the use of HEU available to meet U.S. patient needs, and that it is not necessary to export U.S.-origin HEU for the purposes of medical isotope production in order to meet U.S. patient needs, or, to unilaterally certify that there is insufficient global supply of Mo-99 produced without the use of HEU available to satisfy the domestic market, and that the export of U.S.-origin HEU for the purposes of medical isotope production is the most effective temporary means to increase the supply of Mo-99 to the domestic U.S. market, thereby delaying the effective date of the export license ban for up to six years.

DOE published a **Federal Register** notice (84 FR 65378) on November 27, 2019 requesting public comment on the status of Mo-99 supplies for U.S. patients in preparation for a Secretarial certification regarding the sufficiency of supply of non-HEU based Mo-99. The Secretary of Energy certified on January 2, 2020, that, at the time, there was an insufficient global supply of Mo-99 produced without the use of HEU and that the export of U.S.-origin HEU for the purposes of medical isotope production was the most effective temporary means to increase the supply of Mo-99 to the domestic U.S. market. This certification was published in the **Federal Register** on January 21, 2020 (85 FR 3362). This certification was effective for no more than two years from the effective date of January 2, 2020. The **Federal Register** notice stated that DOE would conduct periodic reviews of the domestic U.S. and global Mo-99 markets and would work toward a certification to Congress regarding the

sufficiency of supply as soon as the statutory conditions are satisfied.

DOE must issue a new certification on or before January 2, 2022. In accordance with AMIPA and to ensure public review and comments, the development of the certification is being announced in the **Federal Register**.

II. Issues on Which DOE Seeks Comment and Information

DOE is seeking information from interested parties on the status of Mo-99 supplies for U.S. patients. DOE requests that commenters fully explain any assumptions that underlie their reasoning. DOE also requests that commenters provide underlying data or other information sufficient to allow DOE to review and verify any of the assumptions, calculations, or views expressed by the commenters. DOE specifically invites responses to the following questions:

(1) Do current supplies of Mo-99 meet U.S. patient demand?

(2) Do current supplies of non-HEU based Mo-99 meet U.S. patient demand?

(3) Since the publication of DOE's November 27, 2019 **Federal Register** notice requesting public comment on the status of Mo-99 supplies for U.S. patients (84 FR 65378) have there been shortages of Mo-99 in the United States? If so, how severe, how often, and how did shortages impact patient care? What caused such shortages?

(4) How would extending the period that the NRC may issue HEU export licenses for medical isotope production impact the supply of Mo-99 in the United States?

(5) How would enacting a ban on the export of HEU for medical isotope production impact the supply of Mo-99 in the United States?

In addition, DOE welcomes information on other topics that interested parties consider significant in preparing for the Secretarial certification.

Confidential Business Information: According to 10 CFR 1004.11, any person submitting information he or she believes to be confidential and exempt from public disclosure should submit via email two well-marked copies: One copy of the document marked ''confidential'' including all the information believed to be confidential, and one copy of the document marked ''non-confidential'' with the information believed to be confidential deleted. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

Signing Authority

This document of the Department of Energy was signed on September 29, 2021, by Kasia Mendelsohn, Acting Deputy Administrator for Defense Nuclear Nonproliferation, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on September 30, 2021.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

Applicants: Sterlington Power LLC.

Description: Tariff Amendment: Notice of Cancellation of Market Based Rate Tariff to be effective 9/30/2021.

Filed Date: 9/29/21.

Accession Number: 20210929–5093.

Comment Date: 5 p.m. ET 10/20/21.

Docket Numbers: ER21–2965–000.

Applicants: Atlantic City Electric Company, Delmarva Power & Light Company, PECO Energy Company, PJM Interconnection, L.L.C.

Description: § 205(d) Rate Filing: Atlantic City Electric Company submits tariff filing per 35.13(a)(2)(iii: ACE, Delmarva and PECO Revisions to OATT, Atts. H–1A, H–3D, and H–7A to be effective 1/1/2022.

Filed Date: 9/29/21.

Accession Number: 20210929–5096.

Comment Date: 5 p.m. ET 10/20/21.

Docket Numbers: ER21–2965–001.

Applicants: Atlantic City Electric Company, Delmarva Power & Light Company, PECO Energy Company, PJM Interconnection, L.L.C.

Description: Tariff Amendment: Atlantic City Electric Company submits tariff filing per 35.17(b): Amendment to ACE, Delmarva and PECO Revisions to Atts. H–1A, H–3D, and H–7A to be effective 1/1/2022.

Filed Date: 9/29/21.

Accession Number: 20210929–5103.

Comment Date: 5 p.m. ET 10/20/21.

Docket Numbers: ER21–2966–000.

Applicants: Illinois Power Generating Company, Bracewell LLP.

Description: Baseline eTariff Filing: Illinois Power Generating Company submits tariff filing per 35.1: Filing of Limited Use Agreement to be effective 11/29/2021.

Filed Date: 9/29/21.

Accession Number: 20210929–5100.

Comment Date: 5 p.m. ET 10/20/21.

Docket Numbers: ER21–2967–000.

Applicants: Strategic Energy Capital Fund, LP.

Description: Baseline eTariff Filing: Application for Market-Based Rate Authorization.

Filed Date: 9/29/21.

Accession Number: 20210929–5111.

Comment Date: 5 p.m. ET 10/20/21.

Docket Numbers: ER21–2968–000.

Applicants: Upper Michigan Energy Resources Corporation.

Description: § 205(d) Rate Filing: Filing of Reactive Supply Service Rate Schedule FERC No. 1 to be effective 9/30/2021.

Filed Date: 9/29/21.

Accession Number: 20210929–5115.

Comment Date: 5 p.m. ET 10/20/21.

Docket Numbers: ER21–2969–000.

Applicants: Avista Corporation.

Description: § 205(d) Rate Filing: Avista Corp LTF PTP Agreement T–1189 to be effective 10/1/2021.

Filed Date: 9/29/21.

Accession Number: 20210929–5122.

Comment Date: 5 p.m. ET 10/20/21.

Docket Numbers: ER21–2970–000.

Applicants: Peninsula Power, LLC.

Description: Tariff Amendment: Notice of Cancellation of Market Based Rate Tariff to be effective 9/30/2021.

Filed Date: 9/29/21.

Accession Number: 20210929–5136.

Comment Date: 5 p.m. ET 10/20/21.

Take notice that the Commission received the following electric reliability filings:

Docket Numbers: RR21–9–000.

Applicants: North American Electric Reliability Corporation.

Description: Amendment to August 24, 2021 request of NERC for acceptance of 2022 Business Plans and Budgets of NERC and Regional Entities and for Approval of Proposed Assessments to Fund Budgets under RR21–9.

Filed Date: 9/29/21.

Accession Number: 20210929–5105.

Comment Date: 5 p.m. ET 10/13/21.

Docket Numbers: RR21–10–000.

Applicants: North American Electric Reliability Corporation.

Description: Petition of the North American Electric Reliability Corporation and the Regional Entities for Approval of Revisions to the NERC Rules of Procedure.

Filed Date: 9/29/21.

Accession Number: 20210929–5133.

Comment Date: 5 p.m. ET 10/20/21.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: September 29, 2021.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. OR21–12–000]

Tesoro Logistics Northwest Pipeline LLC; Notice of Petition for Declaratory Order

Take notice that on September 24, 2021, pursuant to Rule 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207(a)(2) (2019) and section 284.502(b)(1) of the Commission's regulations,[1] Tesoro Logistics Northwest Pipeline LLC (TLNP), a subsidiary of MPLX LP, hereby requests (Petition) that the Commission issue a declaratory order approving various requested rulings related to a proposed expansion (Expansion) of its SLC Core Pipeline system that, following the Expansion, will be capable of transporting crude oil from Fort Laramie Station, Wyoming to Wahsatch Station, Utah. TLNP respectfully requests that the Commission act on this Petition no later than December 23, 2021 so that TLNP and its shippers may receive the certainty necessary for TLNP to move forward with the development of the Expansion and place it into service.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene, or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov,* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Comment Date: 5:00 p.m. Eastern time on October 25, 2021.

Dated: September 29, 2021.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 11834–080]

Brookfield White Pine Hydro, LLC; Notice of Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Application Type:* Application for Temporary Variance of Minimum Flow Requirements.

b. *Project No:* 11834–080.

c. *Date Filed:* September 21, 2021.

d. *Applicant:* Brookfield White Pine Hydro, LLC (licensee).

e. *Name of Project:* Upper and Middle Dams Storage Hydroelectric Project.

f. *Location:* The project is located on Rapid River in Oxford and Franklin counties, Maine.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791a–825r.

h. *Applicant Contact:* Kelley Maloney, Manager, Licensing and Compliance, Brookfield White Pine Hydro, LLC, 150 Main Street, Lewiston, ME 04240, Phone: (207) 755–5605.

i. *FERC Contact:* Jonathan Schram, (202) 502–8264, *jonathan.schram@ferc.gov*.

j. *Deadline for filing comments, motions to intervene, and protests:* October 29, 2021.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp*. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docsfiling/ecomment.asp*. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include the docket number P–11834–080. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* The licensee requests a temporary variance of the minimum flow requirements in the Rapid River below the Middle Dam development due to drought conditions. License Article 402, in part, requires the licensee to release a minimum flow of 472 cubic feet per second (cfs) from September 16 through the start of the spring refill of Richardson Lake. The licensee explains that due to ongoing drought conditions, it is concerned that there might not be enough water storage to sustain brook trout through their fall spawning season under the current license-required minimum flows. Therefore, in order to conserve as much water as possible, the licensee is requesting Commission approval to reduce the minimum flow below Middle Dam to 310 cfs until April 23, 2022, at which time a minimum flow of 472 cfs would be released in accordance with its license requirements. Should the 2022 spring refill of Richardson Lake start, or have already started by April 23, 2022, then the licensee would instead release a minimum flow of 382 cfs as required by license Article 402.

l. *Locations of the Application:* This filing may be viewed on the Commission's website at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1–866–208–3676 or email *FERCOnlineSupport@ferc.gov,* for TTY, call (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit

comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

Dated: September 29, 2021.

Debbie-Anne A. Reese,

Deputy Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP21–1146–000]

Southwest Gas Storage Company; Notice of Petition for Declaratory Order

Take notice that on September 22, 2021, pursuant to Rule 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207(a)(2) (2019) and section 284.502(b)(1) of the Commission's regulations,[1] Southwest Gas Storage Company (Southwest Gas Storage or Petitioner) filed a petition for declaratory order (petition) requesting that the Commission issue a declaratory order granting Southwest Gas Storage authorization to charge market-based rates for proposed no-notice storage, firm parking, firm loan and interruptible gas balancing services, all as more fully explained in its petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene, or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. [Docket No. CP21–496–000]

NFEnergía LLC; Notice of Application and Establishing Intervention Deadline

Take notice that on September 15, 2021, NFEnergía LLC (NFEnergía), 111 W 19th Street, New York, New York 10011, filed in Docket No. CP21–496–000 an abbreviated application under Section 3(a) of the Natural Gas Act (NGA), Parts 153 and 380 of the Commission's regulations, and the Order issued by the Commission on March 19, 2021 in Docket No. CP20–466–000 (Order on Show Cause),[1] requesting authorization to operate the San Juan Micro-Fuel Handling Facility (MFH Facility), a liquefied natural gas (LNG) import and regasification facility, located at the Port of San Juan in Puerto Rico, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

Any questions regarding this filing may be directed to Cameron MacDougall, General Counsel, NFEnergía LLC, 111 W 19th Street, New York, New York, 10011, by phone at (202) 479–1522, or by email at *cmacdougall@fortress.com.*

Pursuant to Section 157.9 of the Commission's Rules of Practice and Procedure,[2] within 90 days of this Notice the Commission staff will either:

[1] New Fortress Energy LLC, 174 FERC ¶ 61,207 (2021) (Order on Show Cause), notice of reh'g denial, 175 FERC ¶ 62,108 (2021), reh'g denial confirmed, 176 FERC ¶ 61,031 (2021) (Rehearing Order).

[2] 18 CFR (Code of Federal Regulations) § 157.9.

Complete its environmental review and place it into the Commission's public record (eLibrary) for this proceeding, or issue a Notice of Schedule for Environmental Review. If a Notice of Schedule for Environmental Review is issued, it will indicate, among other milestones, the anticipated date for the Commission staff's issuance of the final environmental impact statement (FEIS) or environmental assessment (EA) for this proposal. The filing of an EA in the Commission's public record for this proceeding or the issuance of a Notice of Schedule for Environmental Review will serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's FEIS or EA.

Public Participation

There are two ways to become involved in the Commission's review of this project: You can file comments on the project, and you can file a motion to intervene in the proceeding. There is no fee or cost for filing comments or intervening. The deadline for filing a motion to intervene is 5:00 p.m. Eastern Time on October 20, 2021.

Comments

Any person wishing to comment on the project may do so. Comments may include statements of support or objections to the project as a whole or specific aspects of the project. The more specific your comments, the more useful they will be. To ensure that your comments are timely and properly recorded, please submit your comments on or before October 20, 2021.

There are three methods you can use to submit your comments to the Commission. In all instances, please reference the project docket number CP21–496–000 in your submission.

(1) You may file your comments electronically by using the eComment feature, which is located on the Commission's website at *www.ferc.gov* under the link to Documents and Filings. Using eComment is an easy method for interested persons to submit brief, text-only comments on a project;

(2) You may file your comments electronically by using the eFiling feature, which is located on the Commission's website (*www.ferc.gov)* under the link to Documents and Filings. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Comment on a Filing''; or

(3) You may file a paper copy of your comments by mailing them to the address below.[3] Your written comments must reference the project docket number (CP21–496–000).

Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426

The Commission encourages electronic filing of comments (options 1 and 2 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.* Persons who comment on the environmental review of this project will be placed on the Commission's environmental mailing list, and will receive notification when the environmental documents (EA or EIS) are issued for this project and will be notified of meetings associated with the Commission's environmental review process.

The Commission considers all comments received about the project in determining the appropriate action to be taken. However, the filing of a comment alone will not serve to make the filer a party to the proceeding. To become a party, you must intervene in the proceeding. For instructions on how to intervene, see below.

Interventions

Any person, which includes individuals, organizations, businesses, municipalities, and other entities,[4] has the option to file a motion to intervene in this proceeding. Only intervenors have the right to request rehearing of Commission orders issued in this proceeding and to subsequently challenge the Commission's orders in the U.S. Circuit Courts of Appeal.

To intervene, you must submit a motion to intervene to the Commission in accordance with Rule 214 of the Commission's Rules of Practice and Procedure [5] and the regulations under the NGA [6] by the intervention deadline for the project, which is October 20, 2021. As described further in Rule 214, your motion to intervene must state, to the extent known, your position regarding the proceeding, as well as the your interest in the proceeding. For an individual, this could include your status as a landowner, ratepayer, resident of an impacted community, or recreationist. You do not need to have property directly impacted by the project in order to intervene. For more information about motions to intervene, refer to the FERC website at *https://www.ferc.gov/resources/guides/how-to/intervene.asp.*

There are two ways to submit your motion to intervene. In both instances, please reference the Project docket number CP21–496–000 in your submission.

(1) You may file your motion to intervene by using the Commission's eFiling feature, which is located on the Commission's website (*www.ferc.gov)* under the link to Documents and Filings. New eFiling users must first create an account by clicking on ''eRegister.'' You will be asked to select the type of filing you are making; first select ''General'' and then select ''Intervention.'' The eFiling feature includes a document-less intervention option; for more information, visit *https://www.ferc.gov/docs-filing/efiling/document-less-intervention.pdf.;* or

(2) You may file a paper copy of your motion to intervene, along with three copies, by mailing the documents to the address below.[7] Your motion to intervene must reference the project docket number CP21–496–000.

Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426

The Commission encourages electronic filing of motions to intervene (option 1 above) and has eFiling staff available to assist you at (202) 502–8258 or *FercOnlineSupport@ferc.gov.*

Motions to intervene must be served on the applicant either by mail at: Cameron MacDougall, General Counsel, NFEnergía LLC, 111 W 19th Street, New York, New York, 10011, or by email at *cmacdougall@fortress.com.* Any subsequent submissions by an intervenor must be served on the applicant and all other parties to the proceeding. Contact information for parties can be downloaded from the service list at the eService link on FERC Online. Service can be via email with a link to the document.

All timely, unopposed [8] motions to intervene are automatically granted by

[3] Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

[4] 18 CFR 385.102(d).

[5] 18 CFR 385.214.

[6] 18 CFR 157.10.

[7] Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

[8] The applicant has 15 days from the submittal of a motion to intervene to file a written objection to the intervention.

operation of Rule 214(c)(1).[9] Motions to intervene that are filed after the intervention deadline are untimely, and may be denied. Any late-filed motion to intervene must show good cause for being late and must explain why the time limitation should be waived and provide justification by reference to factors set forth in Rule 214(d) of the Commission's Rules and Regulations.[10] A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies (paper or electronic) of all documents filed by the applicant and by all other parties.

Tracking the Proceeding

Throughout the proceeding, additional information about the project will be available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website at *www.ferc.gov* using the ''eLibrary'' link as described above. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. For more information and to register, go to *www.ferc.gov/docs-filing/esubscription.asp.*

Intervention Deadline: 5:00 p.m. Eastern Time on Wednesday, October 20, 2021.

Dated: September 29, 2021.

Debbie-Anne A. Reese,

Deputy Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[EPA–HQ–OGC–2021–0637; FRL–9089–01–OGC]

Proposed Consent Decree; Clean Air Act Citizen Suit

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed consent decree; request for public comment.

SUMMARY: In accordance with the Clean Air Act, as amended (CAA or the Act), notice is given of a proposed consent decree in *Center for Biological Diversity, et al.* v. *Regan,* No. 4–21–cv–02498–JST (N.D. CA.). On April 7, 2021 and May 26, 2021, the Center for Biological Diversity and the Center for Environmental Health (collectively, Plaintiffs) filed a complaint and a first amended complaint, respectively, in the United States District Court for the Northern District of California, alleging that the Administrator of the United States Environmental Protection Agency (EPA) failed to perform certain nondiscretionary duties.

DATES: Written comments on the proposed consent decree must be received by *November 4, 2021.*

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2021–0637, online at *https://www.regulations.gov* (EPA's preferred method). Follow the online instructions for submitting comments.

Instructions: All submissions received must include the Docket ID number for this action. Comments received may be posted without change to *https://www.regulations.gov,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the ''Additional Information about Commenting on the Proposed Consent Decree'' heading under the **SUPPLEMENTARY INFORMATION** section of this document. Out of an abundance of caution for members of the public and our staff, the EPA Docket Center and Reading Room are closed to the public, with limited exceptions, to reduce the risk of transmitting COVID–19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. We encourage the public to submit comments via *https://www.regulations.gov,* as there may be a delay in processing mail and faxes. Hand deliveries and couriers may be received by scheduled appointment only. For further information on EPA Docket Center services and the current status, please visit us online at *https://www.epa.gov/dockets.*

EPA continues to carefully and continuously monitor information from the CDC, local area health departments, and our federal partners so that we can respond rapidly as conditions change regarding COVID–19.

FOR FURTHER INFORMATION CONTACT: Derek Mills, Air and Radiation Law Office (2344A), Office of General Counsel, U.S. Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone (202) 564–3341; email address *mills.derek@epa.gov.*

SUPPLEMENTARY INFORMATION: First, Plaintiffs allege that EPA failed to issue a finding of failure to submit for state implementation plans (SIPs) addressing reasonably available control technology (RACT) for volatile organic compounds (VOC) from sources covered by the 2016 Oil and Gas control techniques guideline (CTG) for the 2015 ozone National Ambient Air Quality Standards (NAAQS) for states and areas listed in the First Amended Complaint within six months after the SIP due date. Second, Plaintiffs allege that EPA failed to take final action to approve or disapprove, in whole or in part, Oil and Gas CTG SIPs for the 2008 NAAQS submitted by various states for the nonattainment areas listed in the First Amended Complaint. The proposed consent decree would establish deadlines for EPA to take specified actions.

I. Obtaining a Copy of the Proposed Consent Decree

The official public docket for this action (identified by Docket ID No. EPA–HQ–OGC–2021–0637) contains a copy of the proposed consent decree.

The electronic version of the public docket for this action contains a copy of the proposed consent decree and is available through *https://www.regulations.gov.* You may use *https://www.regulations.gov* to submit or view public comments, access the index listing of the contents of the official public docket, and access those documents in the public docket that are available electronically. Once in the system, key in the appropriate docket identification number then select ''search.''

II. Additional Information About the Proposed Consent Decree

The proposed consent decree, which would fully resolve the current lawsuit cited above filed by the Center for Biological Diversity and the Center for Environmental Health, would require the EPA to take action under the CAA to make a finding of failure to submit for SIPs addressing RACT for VOC from sources covered by the 2016 Oil and Gas CTG pursuant to 42 U.S.C. 7410(k)(1)(B) for the 2015 ozone NAAQS for certain states and areas as listed in the proposed consent decree (Pennsylvania and New York), unless the state provides the SIP submission and it is deemed complete prior to EPA issuing the finding. The proposed consent decree would also require the EPA, pursuant to CAA sections 110(k)(2)–(4), 42 U.S.C. 7410(k)(2)–(4), to take final

[9] 18 CFR 385.214(c)(1).

[10] 18 CFR 385.214(b)(3) and (d).

action to approve or disapprove, in whole or in part a SIP submission addressing the 2016 Oil and Gas CTG submitted by California to address various areas as listed in the proposed consent decree.

Under the terms of the proposed consent decree, EPA shall sign a notice or notices finding that the states identified as such in the consent decree have failed to submit a SIP or SIP revision addressing RACT for VOC sources covered by the Oil and Gas RACT CTG for the 2015 ozone NAAQS for the nonattainment area or state listed in the proposed consent decree by the established deadline, unless the state provides the SIP submission and it is deemed complete prior to EPA issuing the finding. In addition, under the proposed consent decree, EPA shall sign a notice or notices of final rulemaking to approve, disapprove, conditionally approve, or approve in part and conditionally approve or disapprove in part, the Oil and Gas RACT CTG SIP submission for the areas as listed and identified as such in the proposed consent decree by the established deadline.

In accordance with section 113(g) of the CAA, for a period of thirty (30) days following the date of publication of this document, the Agency will accept written comments relating to the proposed consent decree. EPA or the Department of Justice may withdraw or withhold consent to the proposed consent decree if the comments disclose facts or considerations that indicate that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

III. Additional Information About Commenting on the Proposed Consent Decree

Submit your comments, identified by Docket ID No. EPA–HQ–OGC–2021–0637, via *https://www.regulations.gov.* Once submitted, comments cannot be edited or removed from this docket. EPA may publish any comment received to its public docket. Do not submit to EPA's docket at *https://www.regulations.gov* any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.* For additional information about submitting information identified as CBI, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. Note that written comments containing CBI and submitted by mail may be delayed and deliveries or couriers will be received by scheduled appointment only.

If you submit an electronic comment, EPA recommends that you include your name, mailing address, and an email address or other contact information in the body of your comment. This ensures that you can be identified as the submitter of the comment and allows EPA to contact you in case EPA cannot read your comment due to technical difficulties or needs further information on the substance of your comment. Any identifying or contact information provided in the body of a comment will be included as part of the comment that is placed in the official public docket and made available in EPA's electronic public docket. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Use of the *https://www.regulations.gov* website to submit comments to EPA electronically is EPA's preferred method for receiving comments. The electronic public docket system is an ''anonymous access'' system, which means EPA will not know your identity, email address, or other contact information unless you provide it in the body of your comment.

Please ensure that your comments are submitted within the specified comment period. Comments received after the close of the comment period will be marked ''late.'' EPA is not required to consider these late comments.

Gautam Srinivasan,

Associate General Counsel.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9107–01–OA]

Local Government Advisory Committee (LGAC) and Small Communities Advisory Subcommittee (SCAS) Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification of public meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (FACA), EPA herby provides notice of a meeting for the Local Government Advisory Committee (LGAC) and the Small Communities Advisory Subcommittee (SCAS) on the date and time described below. This meeting will be open to the public. For information on public attendance and participation, please see the registration information under **SUPPLEMENTARY INFORMATION**. Due to unforeseen administrative circumstances, EPA is announcing this meeting with less than 15 calendar days' notice.

DATES: The LGAC and the SCAS will meet virtually October 15th, 2021 starting at 12:00 p.m. through 4:30 p.m. Eastern Time.

FOR FURTHER INFORMATION CONTACT: Paige Lieberman, Designated Federal Officer (DFO), at *LGAC@epa.gov* or 202–564–3115.

Information on Accessibility: For information on access or services for individuals requiring accessibility accommodations, please contact Paige Lieberman by email at *LGAC@epa.gov.* To request accommodation, please do so five (5) business days prior to the meeting, to give EPA as much time as possible to process your request.

SUPPLEMENTARY INFORMATION: This will convene the first LGAC and SCAS meeting since EPA's August 2021 appointment of new and returning members. During the meeting, EPA will share its vision for the agency over the next several years, including providing clean and safe water to all, safeguarding and revitalizing communities, addressing climate change, advancing environmental justice, and ensuring the safety of chemicals for people and the environment. LGAC and SCAS members will discuss workgroups and future plans to address EPA's priorities.

All interested persons are invited to attend and participate. The LGAC and SCAS will hear comments from the public from 3:45–4:15 p.m. (EDT). Individuals or organizations wishing to address the Committee or Subcommittee will be allowed a maximum of five (5)

minutes to present their point of view. Also, written comments should be submitted electronically to *LGAC@epa.gov* for the LGAC and SCAS. Please contact the DFO at the email listed under **FOR FURTHER INFORMATION CONTACT** to schedule a time on the agenda by October 12, 2021. Time will be allotted on a first-come first-served basis, and the total period for comments may be extended if the number of requests for appearances requires it.

Registration: The meeting will be held virtually through an online audio and video platform. Members of the public who wish to participate should register through the LGAC website at *https://www.epa.gov/ocir/local-government-advisory-committee-lgac* or by contacting the Designated Federal Officer (DFO) at *LGAC@epa.gov* by October 12, 2021. The agenda and other supportive meeting materials will be available online at *https://www.epa.gov/ocir/local-government-advisory-committee-lgac* and can be obtained by written request to the DFO. In the event of cancellation for unforeseen circumstances, please contact the DFO or check the website above for reschedule information.

Dated: September 29, 2021.

Julian Bowles,

Director, State and Local Relations, Office of Congressional and Intergovernmental Relations.

[FR Doc. 2021–21566 Filed 10–4–21; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–XXXX; FR ID 51257]

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before December 6, 2021. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *nicole.ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–XXXX.

Title: Inmate Calling Services, 2021 One-Time Data Collection.

Form Number(s): FCC Form 2302(a) and FCC Form 2302(b).

Type of Review: New collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 20 respondents; 20 responses.

Estimated Time per Response: 245 hours on average.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in sections 1, 4(i)-4(j), 201(b), 218, 220, 225, 255, 276, 403, and 617 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 154(i)-(j), 201(b), 218, 220, 225, 255, 276, 403 and 617.

Total Annual Burden: 4,900 hours.

Total Annual Cost: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: The Protective Order in the Commission's inmate calling services (ICS) proceeding, WC Docket 12–375, 28 FCC Rcd 16954 (WCB 2013), provides confidential treatment for the proprietary information submitted by (ICS providers in response to the Commission's directives. The Commission will treat as presumptively confidential any particular information identified as confidential by the provider in accordance with the Freedom of Information Act and Commission rules. Each confidential document should be stamped and submitted to the Secretary's Office with an accompanying cover letter, as specified by the Protective Order.

Needs and Uses: In the 2021 ICS Order, WC Docket No. 12–375, FCC 21–60, 86 FR 40682, the Commission continued its reform of the ICS industry by, among other things, directing the Commission's Wireline Competition Bureau (WCB) and Office of Economics and Analytics (OEA) (collectively, WCB/OEA) to collect data and other information regarding ICS providers' operations, costs, demands, and revenues. The Commission explained that it would use this Third Mandatory Data Collection to set permanent interstate and international ICS provider-related rate caps that more closely reflect providers' costs of serving correctional facilities. The Commission also emphasized that those data would enable it to evaluate and, if warranted, revise the current ancillary service charge caps.

The Commission delegated authority to WCB/OEA to implement the Third Mandatory Data Collection—including determining and describing the types of information to require providers to submit regarding their operations, costs, demand, and revenues—and directed WCB/OEA to develop a template and instructions for the collection.

Pursuant to their delegated authority, WCB/OEA drafted proposed instructions, a template, and a certification form for the Third Mandatory Data Collection. *See* Third Mandatory Data Collection Instructions, available for download at *http://www.fcc.gov/sites/default/files/third_mandatory_data_collection_instructions.docx*. Under WCB/OEA's proposals, ICS providers would be required to submit the required data using a reporting template, to be filed through the Commission's electronic comment filing system (ECFS). The proposed template consists of a Word document (Appendix A to the instructions) for responses requiring narrative information and Excel spreadsheets (Appendix B to the instructions) for responses that require specific numbers or information. ICS

providers must also submit an audited financial statement or report for each Year from 2019 through 2021, and a signed certification of truthfulness, accuracy, and completeness. The instructions, template, and certification form will simplify compliance with, and reduce the burden of, this data collection. These proposed documents will be submitted for approval by the Office of Management and Budget as FCC Form 2302(a) and FCC Form 2302(b).

On September 22, 2021, WCB/OEA issued a Public Notice seeking comment on all aspects of the proposed collection, including the draft instructions, template, and certification form. Notice of this document is being published elsewhere in this issue of the **Federal Register**. WCB/OEA will consider comments submitted in response to both of these **Federal Register** documents in finalizing this information collection prior to submitting the documents to the Office of Management and Budget.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL DEPOSIT INSURANCE CORPORATION

FDIC Advisory Committee on Community Banking; Notice of Meeting

AGENCY: Federal Deposit Insurance Corporation (FDIC).

ACTION: Notice of open meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, notice is hereby given of a meeting of the FDIC Advisory Committee on Community Banking. The Advisory Committee will provide advice and recommendations on a broad range of policy issues that have particular impact on small community banks throughout the United States and the local communities they serve. The meeting is open to the public. Out of an abundance of caution related to current and potential coronavirus developments, the public's means to observe this meeting of the Advisory Committee on Community Banking will be via a Webcast live on the internet. In addition, the meeting will be recorded and subsequently made available on-demand approximately two weeks after the event. The web addresses for viewing the live event and the recording are provided below in the **ADDRESSES** paragraph.

DATES: Wednesday, November 3, 2021, from 1:00 p.m. to 5:00 p.m.

ADDRESSES: To view the live event, visit *http://fdic.windrosemedia.com.* To view the recording, visit *http://fdic.windrosemedia.com/index.php?category=Community+Banking+Advisory+Committee.* If you require a reasonable accommodation to participate, please contact *DisabilityProgram@fdic.gov* or call 703–562–2096 to make necessary arrangements.

FOR FURTHER INFORMATION CONTACT: Requests for further information concerning the meeting may be directed to Debra A. Decker, Committee Management Officer of the FDIC, at (202) 898–8748.

SUPPLEMENTARY INFORMATION:

Agenda: The agenda will include a discussion of current issues affecting community banking. The agenda is subject to change. Any changes to the agenda will be announced at the beginning of the meeting.

Type of Meeting: This meeting of the Advisory Committee on Community Banking will be Webcast live via the internet *http://fdic.windrosemedia.com.* For optimal viewing, a high-speed internet connection is recommended.

Federal Deposit Insurance Corporation.

Dated at Washington, DC, on September 30, 2021.

James P. Sheesley,

Assistant Executive Secretary.

BILLING CODE 6714–01–P

FEDERAL HOUSING FINANCE AGENCY

[No. 2021–N–10]

Proposed Collection; Comment Request

AGENCY: Federal Housing Finance Agency.

ACTION: 30-Day notice of submission of information collection for approval from Office of Management and Budget.

SUMMARY: In accordance with the requirements of the Paperwork Reduction Act of 1995 (PRA), the Federal Housing Finance Agency (FHFA or the Agency) is seeking public comments concerning an information collection known as ''Minority and Women Inclusion,'' which has been assigned control number 2590–0014 by the Office of Management and Budget (OMB). FHFA intends to submit the information collection to OMB for review and approval of a three-year extension of the control number, which is due to expire on October 31, 2021.

DATES: Interested persons may submit comments on or before November 4, 2021.

ADDRESSES: Submit comments to the Office of Information and Regulatory Affairs of the Office of Management and Budget, Attention: Desk Officer for the Federal Housing Finance Agency, Washington, DC 20503, Fax: (202) 395–3047, Email: *OIRA_submission@omb.eop.gov.* Please also submit comments to FHFA, identified by ''Proposed Collection; Comment Request: ''Minority and Women Inclusion, (No. 2021–N–10)'' by any of the following methods:

- *Agency Website: www.fhfa.gov/open-for-comment-or-input.*
- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments. If you submit your comment to the *Federal eRulemaking Portal,* please also send it by *email* to FHFA at *RegComments@fhfa.gov* to ensure timely receipt by the Agency.
- *Mail/Hand Delivery:* Federal Housing Finance Agency, 400 Seventh Street SW, Washington, DC 20219, ATTENTION: Proposed Collection; Comment Request: ''Minority and Women Inclusion, (No. 2021–N–10)''.

We will post all public comments we receive without change, including any personal information you provide, such as your name and address, email address, and telephone number, on the FHFA website at *http://www.fhfa.gov.* In addition, copies of all comments received will be available for examination by the public through the electronic comment docket for this PRA Notice also located on the FHFA website.

FOR FURTHER INFORMATION CONTACT: Felicia Bland, Supervisory Examination Specialist, Office of Minority and Women Inclusion, by email at *Felicia.Bland@fhfa.gov* or by telephone at (202) 365–7471; or Angela Supervielle, Counsel, *Angela.Supervielle@fhfa.gov,* (202) 649–3973 (these are not toll-free numbers); Federal Housing Finance Agency, 400 Seventh Street SW, Washington, DC 20219. The Telecommunications Device for the Deaf is (800) 877–8339.

SUPPLEMENTARY INFORMATION: FHFA is seeking comments on its collection of information regarding the minority and gender classification of individuals serving on the boards of directors of the Federal Home Loan Banks (Banks) and of the Office of Finance under FHFA's regulations on Minority and Women

Inclusion (MWI), codified at 12 CFR part 1223, which it will be submitting for renewal of the OMB control number under the PRA.

A. Need for and Use of the Information Collection

The Federal Home Loan Bank System consists of eleven regional Banks and the Office of Finance, which issues and services the Banks' debt securities. The Banks are wholesale financial institutions, organized under authority of the Federal Home Loan Bank Act (Bank Act) to serve the public interest by enhancing the availability of residential housing finance and community lending credit through their member institutions and, to a limited extent, through certain eligible non-member entities. Each Bank is structured as a regional cooperative that is owned and controlled by member financial institutions located within its district, which are also its primary customers. The Bank Act vests the management of each Bank in a board of directors that consists of two types of directors: (1) Member directors, who are drawn from the officers and directors of member institutions located in the Bank's district and who are elected to represent members in a particular state in that district; and (2) independent directors, who are unaffiliated with any of the Bank's member institutions, but who reside in the Bank's district and are elected on an at-large basis.[1] The Office of Finance is also governed by a board of directors, which consists of the presidents of the eleven Banks and five independent directors.[2]

Section 1319A of the Federal Housing Enterprises Financial Safety and Soundness Act of 1992 (Safety and Soundness Act) requires that each of the Banks establish an Office of Minority and Women Inclusion (OMWI) to be responsible for all matters relating to diversity in its management, employment, and business activities, in accordance with requirements established by FHFA.[3] Section 1319A also requires that each Bank implement standards and procedures to ensure, to the maximum extent possible, the inclusion and utilization of women and minorities ''at all levels'' of its business and activities, and submit an annual report to FHFA detailing actions taken to achieve those goals.[4]

FHFA's MWI regulations implement those statutory requirements and also extend the requirements to the Office of Finance. The MWI regulations require generally that each Bank and the Office of Finance ''develop, implement, and maintain policies and procedures to ensure, to the maximum extent possible in balance with financially safe and sound business practices, the inclusion and utilization of minorities, women, individuals with disabilities, and minority-, women-, and disabled-owned businesses in all business and activities and at all levels of the regulated entity, including in management, employment, procurement, insurance, and all types of contracts.'' [5] In recognition of the fact that each Bank is required by statute to promote diversity and inclusion ''at all levels'' of its business and activities, the MWI regulations further require that the Banks' policies and procedures (as well as those of the Office of Finance) ''[e]ncourage the consideration of diversity in nominating or soliciting nominees for positions on boards of directors and engage in recruiting and outreach directed at encouraging individuals who are minorities, women and individuals with disabilities to seek or apply for employment with the regulated entity.'' [6]

In conformity with the statutory requirements, FHFA's MWI regulations require that each Bank and the Office of Finance submit to FHFA an annual report describing, among other things, its efforts to promote diversity at all levels of management and employment, and the results of those efforts.[7] In order to provide a quantitative basis upon which to assess the results of those efforts, FHFA's MWI regulations require that each Bank and the Office of Finance set forth in their respective annual reports the demographic data reported on the EEO–1 form, which they are required to file annually with the Equal Employment Opportunity Commission (EEOC).[8] The EEO–1 form requires that each respondent provide race, ethnicity and gender information for its employees, broken down into various job categories. Because the EEO–1 form does not require that a respondent provide information on board directors, FHFA cannot use the EEO–1 data to assess the effectiveness of the Federal Home Loan Bank System's efforts to ''encourage the consideration of diversity in nominating or soliciting nominees for positions on boards of directors.''

Therefore, in order to enable FHFA to assess those efforts, the MWI regulations separately require that the annual reports set forth ''[d]ata showing for the reporting year by minority and gender classification, the number of individuals on the board of directors of each Bank and the Office of Finance,'' using the same racial and ethnic classifications that are used on the EEO–1 form (which comply with OMB's ''Statistical Policy Directive No. 15, Race and Ethnic Standards for Federal Statistics and Administrative Reporting'').[9] The MWI regulations require that each Bank and the Office of Finance collect that data ''through an information collection requesting each director's voluntary self-identification of his or her minority and gender classification without personally identifiable information.''

FHFA uses the information collected under this control number to assess the effectiveness of the policies and procedures that each Bank and the Office of Finance is required to implement to promote diversity in all of its business and activities ''at all levels'' and, specifically, to encourage diversity in the nomination and solicitation of nominees for members of its boards of directors. FHFA also uses the information to establish a baseline to analyze future trends related to the diversity of the boards of directors of the Banks and the Office of Finance and to assess the effectiveness of the strategies developed by the Banks and the Office of Finance for promoting, developing, and retaining diverse board talent.

B. Burden Estimate

FHFA estimates the total annual hour burden imposed upon respondents by this information collection to be 20.5 hours. This is based on estimates that 205 Bank and Office of Finance Directors will respond annually, with each response taking an average of 0.1 hours (6 minutes) (205 respondents × 0.1 hours = 20.5 hours).

C. Comments Request

In accordance with the requirements of 5 CFR 1320.8(d), FHFA published an initial notice and request for public comments regarding this information collection in the **Federal Register** on July 17, 2021.[10] The 60-day comment period closed on July 16, 2018. FHFA received no comments.

FHFA requests written comments on the following: (1) Whether the collection of information is necessary for the proper performance of FHFA functions, including whether the information has

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, without revision, the Policy Impact Survey (FR 3075; OMB No. 7100–0362).

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829.

Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. The OMB inventory, as well as copies of the PRA Submission, supporting statements, and approved collection of information instrument(s) are available at *https://www.reginfo.gov/public/do/PRAMain.* These documents are also available on the Federal Reserve Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above.

Final Approval Under OMB Delegated Authority of the Extension for Three Years, Without Revision, of the Following Information Collection

Report title: Policy Impact Survey.

Agency form number: FR 3075.

OMB control number: 7100–0362.

Frequency: On occasion.

Respondents: Bank holding companies, savings and loan holding companies, any nonbank financial company that the Financial Stability Oversight Council has determined should be supervised by the Board, and the combined domestic operations of foreign banking organizations.

Estimated number of respondents: 14.

Estimated average hours per response: 700.

Estimated annual burden hours: 68,600.

General description of report: This survey collects information from certain types of institutions regulated by the Board in order to assess the effects of proposed, pending, or recently adopted policy changes at the domestic and international levels. The Board uses the survey to collect information used for certain quantitative impact studies (QISs) [1] sponsored by financial stability bodies such as the Basel Committee on Banking Supervision (BCBS) and the Financial Stability Board. Recent collections have included the Basel III monitoring exercise, which monitors the global impact of the Basel III framework,[2] the global systemically important bank (G–SIB) exercise, which assesses firms' systemic risk profiles,[3] and a survey of the domestic systemic risk footprint of large foreign banking organizations. Since the collected data may change from survey to survey, there is no fixed reporting form.

Legal authorization and confidentiality: Information collected under the FR 3075 is authorized by the Board's reporting authorities, which are located in section 5(c) of the Bank Holding Company Act [4] for bank holding companies and their subsidiaries, section 10(b)(2) of the Home Owners' Loan Act [5] for savings and loan holding companies and their subsidiaries, section 161(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act [6] for nonbank financial companies supervised by the Board, section 8(a) of the International Banking Act and section 5(c) of the Bank Holding Company Act [7] for the combined domestic operations of certain foreign banking organizations, section 9 of the Federal Reserve Act [8] for state member banks, sections 25 and 25A of the Federal Reserve Act [9] for Edge and agreement corporations, and section 7(c)(2) of the International Banking Act and section 7(a) of the Federal Deposit Insurance Act [10] for U.S. branches and agencies of foreign banks. Response to the FR 3075 is voluntary.

The questions asked on each survey will vary. The Board's ability to keep confidential responses to the FR 3075 must therefore be determined on a case-by-case basis. To the extent responses include nonpublic commercial or financial information, which is both customarily and actually treated as private by the respondent, such information may be kept confidential pursuant to exemption 4 of the Freedom of Information Act (FOIA).[11] Some survey responses may also contain information contained in or related to an examination of a financial institution, which may be kept confidential under exemption 8 of the FOIA.[12] To the extent a respondent submits personal, medical, or similar files, the disclosure of which would constitute an unwarranted invasion of privacy, the respondent may request confidential treatment pursuant to exemption 6 of the FOIA.[13]

Aggregate survey information from the FR 3075 is not considered confidential and may be cited in published material such as Board studies or working papers, proposed or final rules, professional journals, the *Federal Reserve Bulletin,* testimony and reports to the Congress, or other vehicles.

Current actions: On May 26, 2021, the Board published a notice in the **Federal Register** (86 FR 28345) requesting public comment for 60 days on the extension, without revision, of the Policy Impact Survey, FR 3075. The comment period for this notice expired on July 26, 2021. The Board did not receive any comments.

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, with revision, the Supervisory and Regulatory Survey (FR 3052; OMB No. 7100–0322).

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829.

Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. The OMB inventory, as well as copies of the PRA Submission, supporting statements, and approved collection of information instrument(s) are available at *https://www.reginfo.gov/public/do/PRAMain.* These documents are also available on the Federal Reserve Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above.

Final Approval Under OMB Delegated Authority of the Extension for Three Years, Without Revision, of the Following Information Collection

Report title: The Supervisory and Regulatory Survey.

Agency form number: FR 3052.

OMB control number: 7100–0322.

Frequency: On occasion.

Respondents: May include bank holding companies, state member banks, savings and loan holding companies, intermediate holding companies, U.S. branches and agencies of foreign banking organizations (FBOs), Edge Act and agreement corporations, nonbank financial companies that the Financial Stability Oversight Council has determined should be supervised by the Board, and the combined domestic operations of FBOs.

Estimated number of respondents: 5,000.

Estimated average hours per response: 0.5.

Estimated annual burden hours: 60,000.

General description of report: The FR 3052 collects information from financial institutions specifically tailored to the Federal Reserve's supervisory, regulatory, and operational responsibilities. The Board utilizes the survey process, as needed, to collect information on specific issues that affect its decision making. The principal value of the FR 3052 is the flexibility it provides the Federal Reserve to respond quickly to the need for data due to unanticipated economic, financial, supervisory, or regulatory developments. The Board cannot predict what specific information will be needed, but such needs are generally very time-sensitive. Because the relevant questions may change with each survey, there is no fixed reporting form. Past surveys have collected information related to energy lending exposure, cloud-based data exchange services, regulatory capital, Comprehensive Capital Analysis and Review, operational risk loss event history, transactions by government securities dealers, and small debit card issuers.

Written qualitative questions or questionnaires may include categorical questions, yes-no questions, ordinal questions, and open-ended questions. Written quantitative surveys may include dollar amounts, percentages, numbers of items, interest rates, and other such information. Institutions might also be asked to provide copies of existing documents (for example, pertaining to practices and performances for a particular business activity). Before conducting a survey, the Board reviews any information to be collected to determine if the information is available by other means.

Legal authorization and confidentiality: The FR 3052 is authorized by a number of statutes authorizing the Board to require reports of condition from institutions subject to its supervision. These include section 9 of the Federal Reserve Act (FRA),[1] section 5 of the Bank Holding Company Act,[2] section 10 of the Home Owners' Loan Act,[3] section 7 of the International Banking Act (IBA),[4] section 8 of the IBA,[5] sections 25 and 25A of the FRA,[6] and section 161 of the Dodd-Frank Wall Street Reform and Consumer Protection Act.[7] Survey submissions under the FR 3052 are voluntary.

The questions asked on each survey will vary. The Board's ability to keep confidential responses to the FR 3052 must therefore be determined on a case-by-case basis. Much of the information collected is likely to constitute nonpublic commercial or financial information, which is both customarily and actually treated as private by the respondent, and may be kept confidential by the Board pursuant to exemption 4 of the Freedom of Information Act (FOIA).[8] Some survey responses may also contain information contained in or related to an examination of a financial institution, which may be kept confidential under exemption 8 of the FOIA.[9] Responses to the FR 3052 are tabulated and summarized at the Board. This aggregate information is not considered confidential, and aggregate survey information may be cited in published material such as Board studies or working papers, professional journals, the Federal Reserve Bulletin, testimony and reports to the Congress, or other vehicles.

[1] 12 U.S.C. 324 (requiring state member banks to make reports of condition ''in such form and [containing] such information as the Board of Governors of the Federal Reserve System may require'').

[2] 12 U.S.C. 1844(c)(1)(A) (authorizing the Board to require a bank holding company and any subsidiary thereof to submit reports regarding financial condition and compliance).

[3] 12 U.S.C. 1467a(b)(2) (authorizing the Board to require a savings and loan holding company and any subsidiary thereof to submit reports containing such information concerning the operation of the company or its subsidiaries as the Board may require).

[4] 12 U.S.C. 3105(c)(2) (subjecting each branch or agency of a foreign bank to the provisions of 12 U.S.C. 324 requiring reports of financial condition as if it were a state member bank).

[5] 12 U.S.C. 3106(a) (generally subjecting foreign banking organizations to the Bank Holding Company Act).

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, with revision, the Weekly Report of Selected Assets and Liabilities of Domestically Chartered Commercial Banks and U.S. Branches and Agencies of Foreign Banks (FR 2644; OMB No. 7100–0075).

DATES: Comments must be submitted on or before December 6, 2021.

ADDRESSES: You may submit comments, identified by FR 2644, by any of the following methods:

- *Agency Website: https://www.federalreserve.gov/.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include the OMB number or FR number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

All public comments are available from the Board's website at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons or to remove personally identifiable information at the commenter's request. Accordingly, comments will not be edited to remove any confidential business information, identifying information, or contact information. Public comments may also be viewed electronically or in paper in Room 146, 1709 New York Avenue NW, Washington, DC 20006, between 9:00 a.m. and 5:00 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the Office of Management and Budget (OMB) Desk Officer for the Federal Reserve Board, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the Paperwork Reduction Act (PRA) to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

During the comment period for this proposal, a copy of the proposed PRA OMB submission, including the draft reporting form and instructions, supporting statement, and other documentation, will be made available on the Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above. Final versions of these documents will be made available at *https://www.reginfo.gov/public/do/PRAMain,* if approved.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, With Revision, the Following Information Collection

Report title: Weekly Report of Selected Assets and Liabilities of Domestically Chartered Commercial Banks and U.S. Branches and Agencies of Foreign Banks.

Agency form number: FR 2644.

OMB control number: 7100–0075.

Frequency: Weekly.

Respondents: Domestically chartered commercial banks and U.S. branches and agencies of foreign banks.

Estimated number of respondents: 850.

Estimated average hours per response: 2.19.

Estimated annual burden hours: 96,798.

General description of report: The FR 2644 is a balance sheet report that is collected as of each Wednesday from an authorized stratified sample of 875 domestically chartered commercial banks and U.S. branches and agencies of foreign banks. The FR 2644 is the only source of high-frequency data used in the analysis of current banking developments. The FR 2644 collects sample data that are used to estimate universe levels for the entire commercial banking sector in conjunction with data from the quarterly commercial bank Consolidated Reports of Condition and Income (FFIEC 031, FFIEC 041, and FFIEC 051; OMB No. 7100–0036) and the Report of Assets and Liabilities of U.S. Branches and Agencies of Foreign Banks (FFIEC 002;

OMB No. 7100–0032) (Call Reports). Data from the FR 2644 and the Call Reports are utilized in construction of weekly estimates of U.S. bank credit, balance sheet data for the U.S. commercial banking sector, and sources and uses of banks' funds, and to analyze current banking developments, including the monitoring of broad credit and funding conditions. The Board publishes the data in aggregate form in the weekly H.8 statistical release, *Assets and Liabilities of Commercial Banks in the United States,* which is followed closely by other government agencies, the banking industry, financial press, and other users.[1] The H.8 release provides a balance sheet for the commercial banking industry as a whole as well as data disaggregated by its large domestic, small domestic and foreign-related bank components.

Proposed revisions: The Board proposes four revisions to simplify and reduce the overall reporting burden associated with the FR 2644 report. The proposed FR 2644 reporting form would consist of 29 balance-sheet items and no memoranda items, an overall reduction of two data items, and be collected from fewer respondents.

Proposed Elimination of Two Data Items

Data item M.1, Net unrealized gains (losses) on available-for-sale securities, has been included on the FR 2644 reporting form since July 1, 2009, when this report was first used to collect data for all bank groups (large, small, and foreign-related). Before that, this item appeared on the FR 2416 reporting form (Weekly Report of Assets and Liabilities for Large Banks) beginning October 2, 1996. Data item M.1 was added to the FR2416 form, and included in the subsequent single FR2644 form, to better understand how changing interest rates and market valuations affect the fair value of banks' available-for-sale securities.

Data item M.1.a, Net unrealized gains (losses) on available-for-sale securities, U.S. Treasury and U.S. government agency obligations, mortgage-backed securities, was added to the FR2644 as of January 7, 2015. Since M.1.a was the largest component of M.1, its addition enabled staff to split the residual (M.1 less M.1.a) into estimates of the effects on the fair value of the remaining two categories of securities included on the FR2644 reporting form.

The recommendation to discontinue the collection of these two data items is based on the following two factors:

(1) There is insufficient additional information available from the weekly data relative to the corresponding Call Report data. The reporting instructions for these items state that banks that do not revalue daily or weekly should report the most recent value available. In reviewing the weekly data, the Board's experience has been that many banks, including some large banks, revalue only quarterly, when filing Call Reports. For these banks, the weekly data add no more value than the corresponding Call Report data.

(2) Banks that do not report item M.1 on the Call Report are being asked to report the item weekly on the FR 2644. Beginning March 31, 2015, only banks that use the accumulated other comprehensive income (AOCI) opt-out election on Call Report Schedule RC–R, Regulatory Capital Components and Ratios, report net unrealized gains (losses) on the Call Reports. (Banks that do not report these values on the Call Reports, which includes all advanced approaches institutions, include net unrealized gains (losses) in the AOCI component.) In addition, item M.1.a, net unrealized gains (losses) related to mortgage-backed securities, was never included on the Call Reports. The Board generally seeks to collect data items on the FR 2644 that are comparable, if not identical, to items appearing on the Call Reports. This standard simplifies reporting for weekly respondents, allows the Board to perform interseries edits of the FR 2644 data with corresponding Call Report data, and enables estimation, based on Call Report data, of the universe of banks. Currently, data items M.1 and M.1.a do not meet this standard.

Proposed Definitional Changes for FFIEC 002 Filers

Currently, all respondents on the FR 2644 panel are instructed to include loans to individuals in one of the three consumer loan categories on the reporting form. However, for FFIEC 002 filers (U.S. agencies and branches of foreign banks), this instruction does not match the reporting of these data on their Call Report. U.S. branches and agencies of foreign banks are instructed to combine any consumer loans they might hold with other, non-segregated loans on the FFIEC 002,[2] unlike their domestically chartered counterparts who have comparable consumer loan items on their Call Reports. Thus, these FFIEC 002 reporters have been asked to report weekly data on the FR 2644 that are not required on their quarterly Call Reports. For respondents to the FR 2644 that file the FFIEC 002, the Board proposes to revise the instructions for the FR 2644 to match those of the FFIEC 002—to instruct FFIEC 002 filers to include consumer loans in all other loans and leases on the FR 2644.

Likewise, all respondents to the FR 2644 panel report loans and leases gross of any allowances for loan and lease losses, with a separate entry for these allowances. However, the FFIEC 002 instructs U.S. agencies and branches of foreign banks to net loans and leases of any specific reserves. The Board recommends amending the FR 2644 instructions for these reporters to match those for the FFIEC 002. Thus, U.S. agencies and branches of foreign banks would net any specific reserves from the loan items and leave the allowance for loan and lease losses (item 4.g) blank.

The reasons for these proposed changes are the same as those listed in bullet item 2 above: Simplification of reporting, performance of interseries edits, and ability to create universe estimates. Both changes in reporting instruction will only affect a handful of U.S. branches and agencies of foreign banks, as most of these institutions do not issue consumer loans or establish accounts for loan and lease losses.

Proposed Definitional Change for Small Domestically Chartered Commercial Banks

The FR 2644 reporting form captures loans to, and acceptances of, commercial banks in the U.S. (item 4.b) to isolate interbank lending which is not considered a true measure of bank credit and their willingness to lend. However, the smallest respondents (those FFIEC 041 filers with less than $300 million in assets and all FFIEC 051 filers) only report loans to depository institutions and acceptances of other banks on their respective Call Reports and therefore, their data for this item frequently fails comparisons to Call Report data (interseries edits). Therefore, the Board proposes to revise the reporting instructions for these two bank groups—FFIEC 041 filers with less than $300 million in assets and FFIEC 051 filers would report loans to depository institutions—to minimize reporting discrepancies and to align reporting with the Call Reports.

Reduce the Authorized Sample

The FR 2644 panel has an authorized maximum respondent panel size of 875 domestically chartered commercial banks and U.S. branches and agencies of foreign banks. Currently, the panel

[1] The H.8 release is available on the Board's website, *http://www.federalreserve.gov/releases/h8/current/default.htm.*

[2] Prior to July 2009, foreign-related institutions filed the FR 2069 report, which was tailored to that bank group and did not include consumer loan items; on that report, consumer loans were included in ''all other loans.''

consists of 792 total reporters—727 domestically chartered banks and 65 foreign-related institutions [3]—covering all 12 Federal Reserve Districts. The panel accounts for about 89 percent of the total assets of U.S. commercial banks, as well as a high level of coverage for most reported items. While the number of panel respondents tends to run below the authorized size due to mergers among reporters and loss of respondents due to the voluntary nature of the collection, the current number of respondents is unusually low relative to the authorized size because the recruitment of new respondents was temporarily paused with the onset of the COVID–19 pandemic in 2020.

Quarterly Call Reports are used to benchmark the universe estimates of small domestically chartered banks [4] and foreign-related institutions. Average revisions to the estimates of small banks over the last 16 benchmarks—from March 2017 to December 2020—were somewhat larger than those over the previous renewal cycle, while those for the foreign-related institutions shrank considerably. While the average revisions are not overly large, they are still significant. Even so, the Board proposes reducing the authorized panel size from 875 to 850 in light of the continuing consolidation in the commercial bank universe as well as the ongoing difficulty in attracting and maintaining respondents due to the voluntary nature of this collection.

Legal authorization and confidentiality: The FR 2644 is authorized by section 2A of the Federal Reserve Act (FRA), which states that the Board ''shall maintain long run growth of the monetary and credit aggregates commensurate with the economy's long run potential to increase production, so as to promote effectively the goals of maximum employment, stable prices, and moderate long-term interest rates'' (12 U.S.C. 225a.) and by section 11(a)(2) of the FRA, which authorizes the Board to require a depository institution to provide ''reports of its liabilities and assets as the Board may determine to be necessary or desirable to enable the Board to discharge its responsibility to monitor and control monetary and credit aggregates'' (12 U.S.C. 248(a)(2)). Section 7(c)(2) of the International Banking Act of 1978 makes U.S. branches and agencies of foreign banks subject to the reporting requirements of section 11(a)(2) of the FRA (12 U.S.C. 3105(c)(2)). The FR 2644 is voluntary, although the Board would have the authority to require depository institutions to file these reports.

Although the Board releases aggregate data derived from the FR 2644 in the weekly H.8 Statistical Release, individual bank information provided by each respondent is treated as confidential because that information constitutes nonpublic commercial or financial information, which is both customarily and actually treated as private by the respondent, and thus may be kept confidential by the Board pursuant to exemption 4 of the Freedom of Information Act (5 U.S.C. 552(b)(4)).

Board of Governors of the Federal Reserve System, September 29, 2021.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE 6210–01–P

[3] As of March 31, 2021. Two branches in the Second District file combined reports on the FR 2644.

[4] Small domestic banks are those not in the top 25 in asset size as of each quarterly Call Report.

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, without revision, the Application Form for Membership on the Community Advisory Committee Council (FR 1401; OMB No. 7100–0371).

DATES: Comments must be submitted on or before December 6, 2021.

ADDRESSES: You may submit comments, identified by FR 1401, by any of the following methods:

- *Agency Website: https://www.federalreserve.gov/.* Follow the instructions for submitting comments at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx.*
- *Email: regs.comments@federalreserve.gov.* Include the OMB number in the subject line of the message.
- *Fax:* (202) 452–3819 or (202) 452–3102.
- *Mail:* Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

All public comments are available from the Board's website at *https://www.federalreserve.gov/apps/foia/proposedregs.aspx* as submitted, unless modified for technical reasons or to remove personally identifiable information at the commenter's request. Accordingly, comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper in Room 146, 1709 New York Avenue NW, Washington, DC 20006, between 9:00 a.m. and 5:00 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452–3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the Office of Management and Budget (OMB) Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the PRA to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

A copy of the Paperwork Reduction Act (PRA) OMB submission, including the reporting form and instructions, supporting statement, and other documentation will be available at *https://www.reginfo.gov/public/do/PRAMain,* if approved. These documents will also be made available on the Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under

the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, Without Revision, the Following Information Collection

Report title: Application Form for Membership on the Community Advisory Committee Council.

Agency form number: FR 1401.

OMB control number: 7100–0371.

Frequency: Annually.

Respondents: Any person seeking to be considered for membership on the Community Advisory Committee (CAC) Council.

Estimated number of respondents: 300.

Estimated average hours per response: 1.

Estimated annual burden hours: 300.

General description of report: The CAC Application (Application) is used to obtain information about the experience and qualification of persons seeking to be considered for membership on the CAC of the Board. The Application collects an applicant's contact information; details regarding current employment and areas of expertise; a resume, which typically includes information about employment history, education, and training; and a cover letter explaining why the applicant is interested in serving on the CAC and what he or she believes are their primary qualifications. Applicants can voluntarily elect to provide additional information to support their application.

Legal authorization and confidentiality: The Application is authorized pursuant to sections 2A and 10 of the Federal Reserve Act (FRA).[1] Section 2A of the FRA requires the Board and Federal Open Market Committee to maintain long run growth of the monetary and credit aggregates commensurate with the economy's long run potential to increase production, so as to promote effectively the goals of maximum employment, stable prices, and moderate long-term interest rates.[2] Section 10 of the FRA authorizes the Board to ''determine and prescribe the manner in which its obligations shall be incurred and its disbursements and expenses allowed and paid.'' [3]

Providing information collected as part of the Application is required to obtain a benefit.

Generally, information provided on the Application may be kept confidential from the public under exemption 6 of the Freedom of Information Act (FOIA) to the extent that the disclosure of the information ''would constitute a clearly unwarranted invasion of personal privacy.'' For example, the release of information such as the applicant's address, home telephone number, or personal email address to the public would likely constitute a clearly unwarranted invasion of personal privacy and be kept confidential. However, the release of information such as the educational and professional qualifications of successful applicants would not likely constitute a clearly unwarranted invasion of personal privacy and may be disclosed under the FOIA. In addition, once a person becomes a member of the CAC, their name, and the name and location of the organization where they are employed, would generally be listed on the Board's public website.

Board of Governors of the Federal Reserve System, September 29, 2021.

Michele Taylor Fennell, Deputy Associate Secretary of the Board.

[FR Doc. 2021–21594 Filed 10–4–21; 8:45 am]

[1] 12 U.S.C. 225a and 244.

[2] 12 U.S.C. 225a.

[3] 12 U.S.C. 244. This authority permits the Board to collect personal information (*e.g.,* bank account routing numbers) needed to disburse travel funds to CAC members.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the PRA to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

A copy of the Paperwork Reduction Act (PRA) OMB submission, including the reporting form and instructions, supporting statement, and other documentation will be available at *https://www.reginfo.gov/public/do/PRAMain,* if approved. These documents will also be made available on the Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, With Revision, the Following Information Collection

Report title: Disclosure Requirements of Subpart H of Regulation H (Consumer Protection in Sales of Insurance).

Agency form number: FR H–7.

OMB control number: 7100–0298.

Frequency: On occasion.

Respondents: State member banks or any other person at an office of a bank or on behalf of a bank (collectively, Covered Persons).

Estimated number of respondents: Insurance and extension of credit, 341; advertisements, 341.

Estimated average hours per response: Insurance and extension of credit, 1.5 minutes; advertisements, 25 minutes.

Estimated annual burden hours: Insurance and extension of credit, 5,371; advertisements, 142.

General description of report: The insurance consumer protection rules in Regulation H require depository institutions to prepare and provide certain disclosures to consumers. The disclosure requirements are codified at 12 CFR 208.81 *et seq.* and require Covered Persons to make certain disclosures: Before the completion of the initial purchase of an insurance product or annuity by a consumer; at the time a consumer applies for an extension of credit in connection with which an insurance product or annuity is solicited, offered, or sold; and in advertisements and promotional materials for insurance products or annuities.

Proposed revisions: The Board proposes to revise the FR H–7 information collection to account for the advertisements and promotional materials disclosure requirement in Regulation H, Subpart H, that has not been previously cleared by the Board under the PRA. The Board is not proposing to create any forms associated with the FR H–7 to address this requirement.

Legal authorization and confidentiality: The Disclosure Requirements of Subpart H of Regulation H are authorized by section 305 of the Gramm-Leach-Bliley Act of 1999 (GLBA), which requires that the Board issue regulations, including disclosure requirements, applicable to retail sales practices, solicitations, advertising, or offers of insurance by depository institutions.[1] The disclosures required under Subpart H of Regulation H are mandatory.

Because the FR H–7 disclosures are provided by state member banks to customers, confidentiality issues should generally not arise. In the event the records are obtained by the Board as part of the examination or supervision of a financial institution, this information may be considered confidential pursuant to exemption 8 of the Freedom of Information Act, which protects information contained in ''examination, operating, or condition reports'' obtained in the bank supervisory process.[2]

Consultation outside the agency: The Board consulted with the other federal banking agencies with similar regulations pursuant to section 305 of the GLBA.

Board of Governors of the Federal Reserve System, September 29, 2021.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS–10417, CMS–10768 and CMS–R–43]

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments on the collection(s) of information must be received by the OMB desk officer by *November 4, 2021.*

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at website address at: *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

FOR FURTHER INFORMATION CONTACT: William Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Title of Information Collection:* Medicare Fee-for-Service Prepayment Review of Medical Records; *Type of Information Collection Request:* Revision; *Use:* The Medical Review program is designed to prevent improper payments in the Medicare FFS program. Whenever possible, Medicare Administrative Contractors (MACs) are encouraged to automate this process; however, it may require the evaluation of medical records and related documents to determine whether Medicare claims are billed in compliance with coverage, coding, payment, and billing policies. Addressing improper payments in the Medicare fee-for-service (FFS) program and promoting compliance with Medicare coverage and coding rules is a top priority for the CMS. Preventing Medicare improper payments requires the active involvement of every component of CMS and effective coordination with its partners including various Medicare contractors and providers. The information required under this collection is requested by Medicare contractors to determine proper payment, or if there is a suspicion of fraud. Medicare contractors request the information from providers/suppliers submitting claims for payment when data analysis indicates aberrant billing patterns or other information which may present a vulnerability to the Medicare program. *Form Number:* CMS–10417 (OMB control number: 0938–0969); *Frequency:* Occasionally; *Affected Public:* Private Sector, State, Business, and Not-for Profits; *Number of Respondents:* 485,632; *Number of Responses:* 485,632; *Total Annual Hours:* 242,816. (For questions regarding this collection, contact Christine Grose at (410–786–1362).)

2. *Type of Information Collection Request:* New collection (Request for a new OMB control number); *Title of Information Collection:* The ESRD Network Peer Mentoring Program; *Use:* The End Stage Renal Disease (ESRD) Network Peer Mentoring Program is a voluntary program designed to provide patient peer support to people with kidney disease. In part, the peer support is beneficial because patients can give each other something most practitioners do not have: Lived experience with kidney disease. The support and perspective of someone who has ''been there'' can help people better cope with their circumstances.

The ESRD Network Peer Mentoring Program is a partnership between dialysis facilities, ESRD Networks, and patient peer mentors and mentees that wish to engage in the program. The peer mentoring program is organized and published with educational opportunities for peer mentors and mentees, provides resources, and includes a complementary toolkit for ESRD Networks and dialysis facilities to promote and operationalize the program.

Program applicants are people with ESRD who: (1) Are adults over the age of 18; have been receiving in-center or home dialysis or have been transplanted for at least six months; actively engage in the care plan; consistently demonstrate leadership qualities at facility Quality Assurance & Performance Improvement (QAPI) meetings, Lobby Days, and other facility

activities; and wish to be a peer mentor; or (2) are over 18 years of age; are newly diagnosed patients but have been on in-center dialysis for at least six months; are looking for peer support to help them transition to their new reality; and are known as a peer mentee.

To participate in the ESRD Network Peer Mentoring Program, peer mentors and mentees will complete an online application form stored in Confluence. The application serves to validate the peer mentor or peer mentee interest in the ESRD Network Peer Mentoring Program. Information collection is important to the process of pairing peer mentors and mentees with similarly lived experience and interests with their kidney disease. In addition, the application collects information about the peers' interest in kidney disease, treatment modality, age range, preferred gender recognition, and attitudes toward their kidney disease diagnosis. It also supports aligning hobbies, and genders to support best matched peers with each other. *Form Number:* CMS–10768 (OMB control number: 0938–NEW); *Frequency:* Once; *Affected Public:* Individuals and Households; *Number of Respondents:* 75; *Total Annual Responses:* 75; *Total Annual Hours:* 19. (For policy questions regarding this collection, contact Lisa Rees at 816–426–6353.)

3. *Type of Information Collection Request:* Revision of a previously approved collection; *Title of Information Collection:* Conditions of Coverage for Portable X-ray Suppliers and Supporting Regulations; *Use:* The requirements contained in this information collection request are classified as conditions of participation or conditions for coverage. Portable X-rays are basic radiology studies (predominately chest and extremity X-rays) performed on patients in skilled nursing facilities, residents of long-term care facilities and homebound patients. The CoPs are based on criteria described in the law, and are designed to ensure that each portable X-ray supplier has properly trained staff and provides the appropriate type and level of care for patients. The information collection requirements described below are necessary to certify portable X-ray suppliers wishing to participate in the Medicare program. There are currently 506 portable X-ray suppliers participating in the Medicare program.

On September 30, 2019 (84 FR 51732), CMS updated the personnel requirements for portable X-ray technicians at 42 CFR 486.104(a), to focus on the qualifications of the individual performing services removing school accreditation requirements and simplifying the structure of the requirements. Additionally, CMS also revised the requirements for referral of service at 42 CFR 486.106(a) for portable X-ray requirements for orders. This change removed the requirement that physician or non-physician practitioner's orders for portable X-ray services must be written and signed and replacing the specific requirements related to the content of each portable X-ray order with a cross-reference to the requirements at 42 CFR 410.32, which also apply to portable X-ray services. *Form Number:* CMS–R–43 (OMB Control number: 0938–0338); *Frequency:* Yearly; *Affected Public:* Business or other for-profit and Not-for-profit institutions; *Number of Respondents:* 506; *Total Annual Responses:* 1,012; *Total Annual Hours:* 324. (For policy questions regarding this collection contact James Cowher at 410–786–1948.)

Dated: September 29, 2021.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2021–N–0031]

Best Practices for Development and Application of Disease Progression Models; Public Workshop

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop.

SUMMARY: The Food and Drug Administration (FDA) Center for Drug Evaluation and Research, and Center for Biologics Evaluation and Research, are announcing a public workshop entitled ''Best Practices for Development and Application of Disease Progression Models.'' The purpose of this public workshop is to discuss the best practices for developing disease progression models and their application to support drug development decisions, share experiences and case studies that highlight the opportunities and limitations in the development and application of disease progression models including models for natural history of disease and clinical trial simulations, and discuss the knowledge gaps and research needed to advance the development and use of disease progression models.

DATES: The public workshop will be held on November 19, 2021, from 9:30 a.m. to 2:30 p.m., Eastern Time. See the **SUPPLEMENTARY INFORMATION** section for registration date and information.

ADDRESSES: This workshop will be virtual only.

FOR FURTHER INFORMATION CONTACT: Maryanne Dingman, Office of Clinical Pharmacology, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993–0002, 301–796–8777; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

Under the FDA Reauthorization Act of 2017 (Pub. L. 115–52), FDA agreed, in accordance with section I of the Prescription Drug User Fee Act (PDUFA) VI Performance Goals, ''Ensuring the Effectiveness of the Human Drug Review, part J, Enhancing Regulatory Decision Tools to Support Drug Development and Review,'' to hold several workshops to identify best practices for model-informed drug development. This workshop, ''Best Practices for Development and Application of Disease Progression Models,'' fulfills FDA's performance commitment under PDUFA VI.

II. Topics for Discussion at the Public Workshop

The following topics will be discussed at the public workshop:

- Role of disease models in drug development and regulatory review;
- Lessons learned from past experiences of applying disease models in drug development;
- Best practice considerations for disease modeling to support drug development and regulatory decisions; and
- Best practice considerations for clinical trial simulations based on disease progression/natural history models to support drug development and regulatory decisions.

III. Participating in the Public Workshop

Registration: Persons interested in attending this public workshop must register by November 9, 2021, at *https://go.usa.gov/xMxPZ.*

If you need special accommodations due to a disability, please contact

Maryanne Dingman (see **FOR FURTHER INFORMATION CONTACT**) no later than November 9, 2021.

Streaming Webcast of the Public Workshop: This public workshop will be webcast. A live webcast of this workshop will be available at *https://go.usa.gov/xMxPZ* on the day of the workshop.

If you have never attended a Connect Pro event before, test your connection at *https://collaboration.fda.gov/common/help/en/support/meeting_test.htm.* To get a quick overview of the Connect Pro program, visit *https://www.adobe.com/go/connectpro_overview.* FDA has verified the website addresses in this document, as of the date this document publishes in the **Federal Register**, but websites are subject to change over time.

Transcripts: Please be advised that as soon as a transcript of the public meeting is available, it will be accessible at *https://www.regulations.gov.* It may be viewed at the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. It will also be accessible at *https://go.usa.gov/xMxPZ.*

Dated: September 28, 2021.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2021–D–0669]

S1B(R1) Addendum to S1B Testing for Carcinogenicity of Pharmaceuticals; International Council for Harmonisation; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''S1B(R1) Addendum to S1B Testing for Carcinogenicity of Pharmaceuticals''. The draft guidance was prepared under the auspices of the International Council for Harmonisation (ICH), formerly the International Conference on Harmonisation. The draft guidance expands the testing scheme for assessing human carcinogenic risk of small molecule pharmaceuticals by introducing an additional approach that is not described in the original S1B Guideline. The draft guidance is intended to offer an integrative approach that provides specific weight of evidence (WoE) criteria that inform whether or not a 2-year rat study adds value in completing a human carcinogenicity risk assessment. The Addendum also adds a plasma exposure ratio-based approach for setting the high dose in the rasH2-Tg mouse model, while all other aspects of the recommendations for high dose selection in S1C(R2) Guideline would still apply.

DATES: Submit either electronic or written comments on the draft guidance by December 6, 2021 to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

- *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.
- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2021–D–0669 for ''S1B(R1) Addendum to S1B Testing for Carcinogenicity of Pharmaceuticals.'' Received comments will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

- Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food

and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002, or the Office of Communication, Outreach and Development, Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. The draft guidance may also be obtained by mail by calling CBER at 1–800–835–4709 or 240–402–8010. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the guidance document.

FOR FURTHER INFORMATION CONTACT: *Regarding the guidance:* Timothy McGovern, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 6426, Silver Spring, MD 20993–0002, 240–402–0477, *Timothy.McGovern@fda.hhs.gov;* or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

Regarding the ICH: Jill Adleberg, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6364, Silver Spring, MD 20993–0002, 301–796–5259, *Jill.Adleberg@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''S1B(R1) Addendum to S1B Testing for Carcinogenicity of Pharmaceuticals''. The guidance was prepared under the auspices of ICH. ICH has the mission of achieving greater regulatory harmonization worldwide to ensure that safe, effective, high-quality medicines are developed, registered, and maintained in the most resource-efficient manner.

By harmonizing the regulatory requirements in regions around the world, ICH guidelines have substantially reduced duplicative clinical studies, prevented unnecessary animal studies, standardized the reporting of important safety information, standardized marketing application submissions, and made many other improvements in the quality of global drug development and manufacturing and the products available to patients.

The six Founding Members of the ICH are FDA; the Pharmaceutical Research and Manufacturers of America; the European Commission; the European Federation of Pharmaceutical Industries Associations; the Japanese Ministry of Health, Labour, and Welfare; and the Japanese Pharmaceutical Manufacturers Association. The Standing Members of the ICH Association include Health Canada and Swissmedic. Additionally, the Membership of ICH has expanded to include other regulatory authorities and industry associations from around the world (refer to *https://www.ich.org/*).

ICH works by involving technical experts from both regulators and industry parties in detailed technical harmonization work and the application of a science-based approach to harmonization through a consensus-driven process that results in the development of ICH guidelines. The regulators around the world are committed to consistently adopting these consensus-based guidelines, realizing the benefits for patients and for industry.

As a Founding Regulatory Member of ICH, FDA plays a major role in the development of each of the ICH guidelines, which FDA then adopts and issues as guidance for industry. FDA's guidance documents do not establish legally enforceable responsibilities. Instead, they describe the Agency's current thinking on a topic and should be viewed only as recommendations, unless specific regulatory or statutory requirements are cited.

In May 2021, the ICH Assembly endorsed the draft guideline entitled ''S1B(R1) Addendum to S1B Testing for Carcinogenicity of Pharmaceuticals'' and agreed that the guideline should be made available for public comment. The draft guideline is the product of the Safety Expert Working Group of the ICH. Comments about this draft will be considered by FDA and the Safety Expert Working Group.

The draft guidance provides guidance on expanding the testing scheme for assessing human carcinogenic risk of small molecule pharmaceuticals by introducing an additional approach that is not described in the original S1B Guideline and also adds a plasma exposure ratio-based approach for setting the high dose in the rasH2-Tg mouse model.

This draft guidance has been left in the original ICH format. The final guidance will be reformatted and edited to conform with FDA's good guidance practices regulation (21 CFR 10.115) and style before publication. The draft guidance, when finalized, will represent the current thinking of FDA on ''S1B(R1) Addendum to S1B Testing for Carcinogenicity of Pharmaceuticals''. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. Therefore, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3521) is not required for this guidance. The previously approved collections of information are subject to review by OMB under the PRA. The collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014; the collections of information in 21 CFR part 314 have been approved under OMB control number 0910–0001.

III. Electronic Access

Persons with access to the internet may obtain the draft guidance at *https://www.regulations.gov, https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs, https://www.fda.gov/regulatory-information/search-fda-guidance-documents,* or *https://www.fda.gov/vaccines-blood-biologics/guidance-compliance-regulatory-information-biologics/biologics-guidances.*

Dated: September 30, 2021.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Meeting of the National Advisory Committee on Rural Health and Human Services

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: In accordance with the Federal Advisory Committee Act, this notice announces the Secretary's National Advisory Committee on Rural Health and Human Services (NACRHHS) has scheduled a public meeting. Information about NACRHHS

and the agenda for this meeting can be found on the NACRHHS website at *https://www.hrsa.gov/advisory-committees/rural-health/index.html.*

DATES:

- Monday, October 25, 2021, 12:00 p.m.–5:30 p.m. Eastern Time (ET);
- Tuesday, October 26, 2021, 12:30 p.m.–4:15 p.m. ET; and
- Wednesday, October 27, 2021, 12:30 p.m.–4:30 p.m. ET.

ADDRESSES: This meeting will be held via webinar. While this meeting is open to the public, advance registration is required. Please register online at *https://www.surveymonkey.com/r/WLSYQS5* by the deadline of 12:00 p.m. ET on October, 24, 2021. Instructions on how to access the meeting via Zoom will be provided upon registration.

FOR FURTHER INFORMATION CONTACT: Steven Hirsch, Administrative Coordinator at the Federal Office of Rural Health Policy, HRSA, 5600 Fishers Lane, 17W59D, Rockville, Maryland 20857; (301) 443–7322; or *shirsch@hrsa.gov.*

SUPPLEMENTARY INFORMATION: NACRHHS provides advice and recommendations to the Secretary of HHS (Secretary) on policy, program development, and other matters of significance concerning both rural health and rural human services.

At this meeting, NACRHHS will discuss Behavioral Health and Primary Care Integration in Rural America and recommendations to the Secretary on designation of a new type of provider, the Rural Emergency Hospital.

Members of the public will have the opportunity to provide comments. Public participants wishing to provide oral comments must submit a written version of their statement at least three business days in advance of the scheduled meeting. Oral comments will be honored in the order they are requested and may be limited as time permits. Public participants wishing to offer a written statement should send it to Steven Hirsch, using the contact information above, at least 3 business days prior to the meeting.

Individuals who plan to attend and need special assistance or another reasonable accommodation should notify Steven Hirsch at the address and phone number listed above at least 10 business days prior to the meeting.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Meeting of the Advisory Committee on Heritable Disorders in Newborns and Children

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In accordance with the Public Health Service Act and the Federal Advisory Committee Act, this notice announces that the Advisory Committee on Heritable Disorders in Newborns and Children (ACHDNC or Committee) has scheduled a public meeting. Information about ACHDNC and the agenda for this meeting can be found on ACHDNC website at *https://www.hrsa.gov/advisory-committees/heritable-disorders/index.html.*

DATES: Tuesday, November 9, 2021, from 10:00 a.m. to 3:00 p.m. Eastern Time (ET) and Wednesday, November 10, 2021, from 10:00 a.m. to 3:00 p.m. ET.

ADDRESSES: This meeting will be held via webinar. While this meeting is open to the public, advance registration is required.

Please register online at *https://www.achdncmeetings.org/registration/* by 12:00 p.m. ET on November 8, 2021. Instructions on how to access the meeting via webcast will be provided upon registration.

FOR FURTHER INFORMATION CONTACT: Alaina Harris, Maternal and Child Health Bureau, HRSA, 5600 Fishers Lane, Room 18W66, Rockville, Maryland 20857; (301) 443–0721; or *ACHDNC@hrsa.gov.*

SUPPLEMENTARY INFORMATION: ACHDNC provides advice and recommendations to the Secretary of Health and Human Services (Secretary) on the development of newborn screening activities, technologies, policies, guidelines, and programs for effectively reducing morbidity and mortality in newborns and children having, or at risk for, heritable disorders. ACHDNC reviews and reports regularly on newborn and childhood screening practices, recommends improvements in the national newborn and childhood screening programs, and fulfills requirements stated in the authorizing legislation. In addition, ACHDNC's recommendations regarding inclusion of additional conditions for screening on the Recommended Uniform Screening Panel, following adoption by the Secretary, are evidence-informed preventive health services provided for in the comprehensive guidelines supported by HRSA pursuant to section 2713 of the Public Health Service Act (42 U.S.C. 300gg–13). Under this provision, non-grandfathered group health plans and health insurance issuers offering group or individual health insurance are required to provide insurance coverage without cost-sharing (a co-payment, co-insurance, or deductible) for preventive services for plan years (*i.e.,* policy years) beginning on or after the date that is 1 year from the Secretary's adoption of the condition for screening.

During the November 9–10, 2021, meeting, ACHDNC will hear from experts in the fields of public health, medicine, heritable disorders, rare disorders, and newborn screening. Agenda items include the following:

(1) The Committee will vote on whether or not to approve the following updates to the Committee's evidence-based review and decision-making process: The condition nomination form, methods for assessing published and unpublished evidence, and additional guidance for the Committee's decision matrix.

(2) A presentation on phase two of the Mucopolysaccharidosis type II evidence review;

(3) A presentation on phase one of the Guanidinoacetate methyltransferase deficiency evidence review;

(4) A Krabbe disease nomination overview;

(5) A possible Committee vote on whether to move Krabbe disease forward to a full evidence review; and

(6) Workgroup updates.

The agenda for this meeting does not include any vote or decision to recommend a condition for inclusion in the Recommended Uniform Screening Panel. As noted in the agenda items, the Committee may hold a vote on whether or not to recommend a nominated condition (Krabbe disease) to full evidence review, and will hear presentations on evidence review of Mucopolysaccharidosis type II and Guanidinoacetate methyltransferase deficiency, any of which may lead to such a recommendation at a future time. Agenda items are subject to change as priorities dictate. Information about ACHDNC, including a roster of members and past meeting summaries, is also available on the ACHDNC website.

Members of the public also will have the opportunity to provide comments. Public participants providing general oral comments may submit written statements in advance of the scheduled meeting. Oral comments will be

honored in the order they are requested and may be limited as time allows. Requests to provide a written statement or make oral comments to ACHDNC must be submitted via the registration website by 12:00 p.m. ET on Thursday, November 4, 2021. Individuals who need special assistance or another reasonable accommodation should notify Alaina Harris at the address and phone number listed above at least 10 business days prior to the meeting.

Maria G. Button,

Director, Executive Secretariat.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of a meeting of the National Cancer Advisory Board and NCI Board of Scientific Advisors.

The meeting will be held as a virtual meeting and is open to the public as indicated below. Individuals who plan to view the virtual meeting and need special assistance or other reasonable accommodations to view the meeting, should notify the Contact Person listed below in advance of the meeting. The meeting will be videocast and can be accessed from the NIH Videocasting and Podcasting website (*http://videocast.nih.gov/*).

A portion of the National Cancer Advisory Board meeting will be closed to the public in accordance with the provisions set forth in section 552b(c)(6), Title 5 U.S.C., as amended. The intramural programs and projects and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the intramural programs and projects, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Cancer Advisory Board and NCI Board of Scientific Advisors.

Date: December 7, 2021.

Closed: 12:00 p.m. to 1:00 p.m.

Agenda: Review of intramural program site visit outcomes and the discussion of confidential personnel issues.

Open: 1:15 p.m. to 4:45 p.m.

Agenda: NCAB Subcommittee Meetings—Subcommittee on Planning and Budget; *Ad Hoc* Subcommittee on Experimental Therapeutics; and *Ad Hoc* Subcommittee on Population Science, Epidemiology and Disparities.

Place: National Cancer Institute—Shady Grove, 9609 Medical Center Drive, Rockville, MD 20850 (Virtual Meeting).

Name of Committee: National Cancer Advisory Board and NCI Board of Scientific Advisors.

Date: December 8, 2021.

Open: 1:00 p.m. to 5:00 p.m.

Agenda: Joint meeting of the National Cancer Advisory Board and NCI Board of Scientific Advisors, NCI Director's report and presentations, NCI Board of Scientific Advisors Concepts Review.

Place: National Cancer Institute—Shady Grove, 9609 Medical Center Drive, Rockville, MD 20850 (Virtual Meeting).

Name of Committee: National Cancer Advisory Board and NCI Board of Scientific Advisors.

Date: December 9, 2021.

Open: 1:00 p.m. to 5:00 p.m.

Agenda: Joint meeting of the National Cancer Advisory Board and NCI Board of Scientific Advisors, NCI Board of Scientific Advisors Concepts Review and presentations.

Place: National Cancer Institute—Shady Grove, 9609 Medical Center Drive, Rockville, MD 20850 (Virtual Meeting).

Contact Person: Paulette S. Gray, Ph.D., Director, Division of Extramural Activities, National Cancer Institute—Shady Grove, National Institutes of Health, 9609 Medical Center Drive, 7th Floor, Room 7W444, Bethesda, MD 20892, 240–276–6340, *grayp@mail.nih.gov*.

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: NCAB: *https://deainfo.nci.nih.gov/advisory/ncab/ncabmeetings.htm,* BSA: *https://deainfo.nci.nih.gov/advisory/bsa/bsameetings.htm,* where an agenda and any additional information for the meeting will be posted when available.

BILLING CODE 4140–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

Docket No. USCG–2021–0740]

Information Collection Request to Office of Management and Budget; OMB Control Number: 1625–0032

AGENCY: Coast Guard, DHS.

ACTION: Sixty-day notice requesting comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the U.S. Coast Guard intends to submit an Information Collection Request (ICR) to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs (OIRA), requesting an extension of its approval for the following collection of information: 1625–0032, Vessel Inspection Related Forms and Reporting Requirements Under Title 46 U.S. Code; without change. Our ICR describes the information we seek to collect from the public. Before submitting this ICR to OIRA, the Coast Guard is inviting comments as described below.

DATES: Comments must reach the Coast Guard on or before December 6, 2021.

ADDRESSES: You may submit comments identified by Coast Guard docket number [USCG–2021–0740] to the Coast Guard using the Federal eRulemaking Portal at *https://www.regulations.gov*. See the ''Public participation and request for comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

A copy of the ICR is available through the docket on the internet at *https://www.regulations.gov*. Additionally, copies are available from: COMMANDANT (CG–6P), ATTN: PAPERWORK REDUCTION ACT MANAGER, U.S. COAST GUARD, 2703 MARTIN LUTHER KING JR. AVE. SE, STOP 7710, WASHINGTON, DC 20593–7710.

FOR FURTHER INFORMATION CONTACT: A.L. Craig, Office of Privacy Management, telephone 202–475–3528, or fax 202–372–8405, for questions on these documents.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology.

In response to your comments, we may revise this ICR or decide not to seek an extension of approval for the Collection. We will consider all comments and material received during the comment period.

We encourage you to respond to this request by submitting comments and related materials. Comments must contain the OMB Control Number of the ICR and the docket number of this request, [USCG–2021–0740], and must be received by December 6, 2021.

Submitting Comments

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov*. If your material cannot be submitted using *https://*

www.regulations.gov, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted.

We accept anonymous comments. All comments received will be posted without change to *https://www.regulations.gov* and will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Information Collection Request

Title: Vessel Inspection Related Forms and Reporting Requirements Under Title 46 U.S. Code.

OMB Control Number: 1625–0032.

Summary: This collection of information requires owners, operators, agents or masters of certain inspected vessels to obtain and/or post various forms as part of the Coast Guard's Commercial Vessel Safety Program.

Need: The Coast Guard's Commercial Vessel Safety Program regulations are found in 46 CFR, including parts 2, 26, 31, 71, 91, 107, 115, 126, 169, 176 and 189, as authorized in Title 46 U.S. Code. A number of reporting and recordkeeping requirements are contained therein.

Forms:

- CG–841, Certificate of Inspection
- CG–854, Temporary Certificate of Inspection
- CG–948, Permit to Proceed to Another Port for Repairs
- CG–949, Permit to Carry Excursion Party
- CG–950, Application for Permit to Carry Excursion Party
- CG–950A, Application for Special Permit
- CG–2832, Vessel Inspection Record

Respondents: Owners, operators, agents and masters of vessels.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has decreased from 1,705 hours to 735 hours a year, due to change in the estimated time for respondents to complete certain recordkeeping tasks.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Dated: September 29, 2021.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

[FR Doc. 2021–21639 Filed 10–4–21; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2021–0735]

Policy Letter: Change 1 to CG–MMC Policy Letter 01–21, Guidelines for Qualifying for STCW Endorsements for Basic and Advanced IGF Code Operations

AGENCY: Coast Guard, Homeland Security (DHS).

ACTION: Notice of availability.

SUMMARY: The Coast Guard announces the availability of Change 1 to CG–MMC Policy Letter 01–21, Guidelines for Qualifying for STCW Endorsements for Basic and Advanced IGF Code Operations. The Coast Guard will use applicable regulations and this policy to evaluate whether mariners may be issued endorsements for Basic and Advanced IGF Code Operations.

DATES: The policies announced in Change 1 to CG–MMC Policy Letter 01–21 are effective as of September 20, 2021.

ADDRESSES: To view the policy letter mentioned in this notice, search the docket number USCG–2021–0735 using the Federal eRulemaking Portal at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: For information about this document, contact James Cavo, Mariner Credentialing Program Policy Division (CG–MMC–2), Coast Guard; telephone 202–372–1205; email *MMCPolicy@uscg.mil.*

SUPPLEMENTARY INFORMATION: The Coast Guard is revising CG–MMC Policy Letter 01–21 to reduce the amount of seagoing service required to renew an endorsement for Basic or Advanced IGF Code Operations and to add an additional method to renew the endorsement by providing evidence of being a qualified instructor of a relevant course.

The seagoing service option to renew a Basic or Advanced IGF Code Operations endorsement in the original policy letter exceeds the seagoing service requirement to initially qualify for an STCW endorsement in Basic IGF Code Operations. Holding an STCW endorsement for Advanced Liquefied Gas Tanker Cargo Operations or Basic Liquefied Gas Tanker Cargo Operations is a method to qualify for the Basic IGF Code endorsement. The seagoing service requirement to qualify for either an Advanced Liquefied Gas Tanker Cargo Operations endorsement or an Basic Liquefied Gas Tanker Cargo Operations endorsement is 90 days. This change reduces the seagoing service required as an option to renew an STCW endorsement for Basic IGF Code Operations to 90 days. In addition, this change notice reduces the seagoing service required as an option to renew an STCW for Advanced IGF Code Operations to 90 days.

Methods to qualify for renewal of an STCW endorsement in IGF Code Operations include completion of refresher training, evidence of being a qualified instructor of a relevant course, or seagoing service. Mariners will also need to meet the applicable requirements in 46 CFR 10.227 for the renewal of their MMC.

This notice is issued under authority of 5 U.S.C. 552(a).

Dated: September 20, 2021.

J.G. Lantz,

U.S. Coast Guard, Director of Commercial Regulations and Standards.

[FR Doc. 2021–21635 Filed 10–4–21; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

[Docket No. USCG–2021–0734]

Policy Letter: Change 1 to CG–MMC Policy Letter 02–18, Guidelines for Qualifications of Personnel for Issuing STCW Endorsements for Basic and Advanced Polar Code Operations

AGENCY: Coast Guard, Homeland Security (DHS).

ACTION: Notice of availability.

SUMMARY: The Coast Guard announces the availability of Change 1 to CG–MMC Policy Letter 02–18, Guidelines for Qualifications of Personnel for Issuing STCW Endorsements for Basic and Advanced Polar Code Operations. The Coast Guard will use applicable regulations and this policy to evaluate whether mariners may be issued endorsements for Basic and Advanced Polar Code Operations.

DATES: The policies announced in Change 1 to CG–MMC Policy Letter 02–18 are effective as of September 20, 2021.

ADDRESSES: To view the policy letter mentioned in this notice, search the docket number USCG–2021–0734 using the Federal eRulemaking Portal at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: For information about this document, contact James Cavo, Mariner Credentialing Program Policy Division (CG–MMC–2), Coast Guard; telephone 202–372–1205; email *MMCPolicy@uscg.mil.*

SUPPLEMENTARY INFORMATION: This change revises CG-Policy Letter 02–18 to include the requirements for renewal of Basic and Advanced Polar Code Operations endorsements. Renewal requirements for these endorsements were not included in the original policy letter. Methods to qualify for renewal of an STCW endorsement in Polar Code Operations will include completion of refresher training, evidence of being a qualified instructor of a Basic or Advanced Polar Code Operations course at least twice within the past five years, or sea service.

The professional requirements to renew a merchant mariner credential (MMC) in 46 CFR 10.227 include the option to present evidence of at least 1 year of sea service during the past 5 years. However, Section A–I/11 paragraph 4.1 of the STCW Code only requires 2 months of seagoing service within the previous 5 years for renewal of Basic and Advanced Polar Code endorsements. To align with the STCW requirements and to ensure the seagoing service requirement for the renewal of a Polar Code Operations endorsement does not exceed the seagoing service requirement to initially qualify for Polar Code Operations endorsement, the seagoing service requirement for renewal of Polar Code Operations endorsements will be 2 months of seagoing service in the previous 5 years. Mariners will also need to meet the applicable requirements in 46 CFR 10.227 for the renewal of their MMC.

This change also removes transitional provisions that expired on July 1, 2020.

This notice is issued under authority of 5 U.S.C. 552(a).

Dated: September 20, 2021.

J.G. Lantz,

U.S. Coast Guard, Director of Commercial Regulations and Standards.

Coast Guard

[Docket No. USCG–2021–0741]

Information Collection Request to Office of Management and Budget; OMB Control Number: 1625–0036

AGENCY: Coast Guard, DHS.

ACTION: Sixty-day notice requesting comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the U.S. Coast Guard intends to submit an Information Collection Request (ICR) to the Office of Management and Budget (OMB), Office of Information and Regulatory Affairs (OIRA), requesting an extension of its approval for the following collection of information: 1625–0036, Plan Approval and Records for U.S. and Foreign Tank Vessels Carrying Oil in Bulk; without change. Our ICR describes the information we seek to collect from the public. Before submitting this ICR to OIRA, the Coast Guard is inviting comments as described below.

DATES: Comments must reach the Coast Guard on or before December 6, 2021.

ADDRESSES: You may submit comments identified by Coast Guard docket number [USCG–2021–0741] to the Coast Guard using the Federal eRulemaking Portal at *https://www.regulations.gov*. See the ''Public participation and request for comments'' portion of the **SUPPLEMENTARY INFORMATION** section for further instructions on submitting comments.

A copy of the ICR is available through the docket on the internet at *https://www.regulations.gov*. Additionally, copies are available from: COMMANDANT (CG–6P), ATTN: PAPERWORK REDUCTION ACT MANAGER, U.S. COAST GUARD, 2703 MARTIN LUTHER KING JR. AVE. SE, STOP 7710, WASHINGTON, DC 20593–7710.

FOR FURTHER INFORMATION CONTACT: A.L. Craig, Office of Privacy Management, telephone 202–475–3528, or fax 202–372–8405, for questions on these documents.

SUPPLEMENTARY INFORMATION:

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology.

In response to your comments, we may revise this ICR or decide not to seek an extension of approval for the Collection. We will consider all comments and material received during the comment period.

We encourage you to respond to this request by submitting comments and related materials. Comments must contain the OMB Control Number of the ICR and the docket number of this request, [USCG–2021–0741], and must be received by December 6, 2021.

Submitting Comments

We encourage you to submit comments through the Federal eRulemaking Portal at *https://www.regulations.gov*. If your material cannot be submitted using *https://www.regulations.gov,* contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Documents mentioned in this notice, and all public comments, are in our online docket at *https://www.regulations.gov* and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted.

We accept anonymous comments. All comments received will be posted without change to *https://www.regulations.gov* and will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Information Collection Request

Title: Plan Approval and Records for U.S. and Foreign Tank Vessels Carrying Oil in Bulk.

OMB Control Number: 1625–0036.

Summary: This information collection aids the Coast Guard in determining if a vessel complies with certain safety and environmental protection standards. Plans, to include records, for construction or modification of U.S. or foreign vessels submitted and maintained on board are required for compliance with these standards.

Need: Title 46 U.S. Code 3703 provides the Coast Guard with the authority to regulate design, construction, alteration, repair, maintenance, operation, equipping, personnel qualification, and manning of vessels carrying oil in bulk. See *e.g.,* 33 CFR part 157, Rules for the Protection of the Marine Environment Relating to Tank Vessels Carrying Oil in Bulk, and 46 CFR Subchapter D, Tank Vessels.

Forms: None.

Respondents: Owners and operators of vessels.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has increased from 2,109 hours to 2,497 hours a year, due to an increase in the estimated number of respondents.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Dated: September 29, 2021.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

BILLING CODE 9110–04–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–6222–N–02]

Appointments to the Housing Counseling Federal Advisory Committee; Solicitation of Nominations

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, Department of Housing and Urban Development (HUD).

ACTION: Announcement of new members of the Housing Counseling Federal Advisory Committee and notice of the solicitation of nominations for appointment to the Housing Counseling Federal Advisory Committee.

SUMMARY: This notice announces the members of the Housing Counseling Federal Advisory Committee (HCFAC) that were appointed or reappointed by the Secretary on September 14, 2021. This notice also invites nominations for appointments to fill four additional vacancies on the HCFAC.

DATES: All Nominations must be received no later than November 4, 2021.

ADDRESSES: Nominations must be in writing using form HUD–90005 (Application for Membership on the HCFAC, OMB Approval Number: 2502–0606) and submitted via electronically to *HCFAC.application@hud.gov.* Individuals who do not have internet access may submit nominations to the Office of the Deputy Assistant Secretary for Housing Counseling, HUD, 451 7th Street SW, Room 9224, Washington DC 20410.

FOR FURTHER INFORMATION CONTACT: Virginia F. Holman, Housing Program Specialist, U.S. Department of Housing and Urban Development, Office of Housing Counseling, Office of Outreach and Capacity Building, *Virginia.F.Holman@hud.gov,* telephone number 540–894–7790. (This is not a toll-free number). Persons who have difficulty hearing or speaking may access this number via TTY by calling the toll-free Federal Relay Service at (800) 877–8339 (This is a toll-free number). Individuals with questions may also email *HCFAC.application@hud.gov* and in the subject line write ''HCFAC application question.''

SUPPLEMENTARY INFORMATION:

I. Background and Authority

The HCFAC is congressionally mandated to provide advice to the Office of Housing Counseling (OHC) (42 U.S.C. 3533(g)(4)). The HCFAC provides the OHC valuable advice regarding its mission to provide individuals and families with the knowledge they need to obtain, sustain, and improve their housing through a strong national network of HUD-approved housing counseling agencies and HUD-certified counselors. The HCFAC, however, does not have any role in reviewing or awarding of OHC housing counseling grants and procurement contracts. The HCFAC is subject to the requirements of the Federal Advisory Committee Act, and the Presidential Memorandum ''Final Guidance on Appointments of Lobbyists to Federal Boards and Commissions,'' dated June 18, 2010, along with any relevant guidance published in the **Federal Register** or otherwise issued by the Office of Management and Budget (OMB).[1]

Pursuant to section 3533(g)(4)(B), the HCFAC shall consist of not more than 12 individuals appointed by the Secretary. The membership will equally represent the mortgage industry, the real estate industry, consumers and HUD-approved housing counseling agencies. Each member shall be appointed in his or her individual capacity for a term of up to 3 years.

II. HCFAC Members

On September 14, 2021, the following members were appointed to the HCFAC for a 3-year term:

Ibijoke Akinbowale, Director, National Community Reinvestment Coalition Housing Counseling Network

Lawrence Batiste, President, Batiste Premier Realty

Carol Ann Dujanovich, Vice President and Director of Operations, 1st Nations Reverse Mortgage

Marcia Lewis, Deputy Executive Director—Change Management, Indianapolis Housing Authority

Bill Sevilla, Director, Community Development and Asset Building, Centro Campesino; and

Tony Walters, Executive Director, National American Indian Housing Council

On September 14, 2021, the following members were reappointed to the HCFAC for a 3-year term:

Patricia Arvielo, President and Co-Founder, New American Funding; and Paul Yorkis, President, Patriot Real Estate

III. Nominations for the Housing Counseling Federal Advisory Committee

HUD is seeking additional nominations for membership on the HCFAC. Nominees shall have experience representative of at least one of the 4 categories—the mortgage industry, real estate industry, consumers, and HUD-approved housing counseling agencies. Nominations may be made by agency officials, members of Congress, the general public, professional organizations, and self-nominations. Nominees must be U.S. citizens and cannot be U.S. Government employees.

All appointed nominees will be serving on the HCFAC in their individual capacity and not in a representative capacity, therefore, no Federally-registered lobbyists may serve on the HCFAC.[2] Individual capacity, as clarified by OMB, refers to individuals

[1] *See* 5 U.S.C. appendix; 79 FR 47482.

[2] *See* 79 FR 4782 (''Revised Guidance on Appointment of Lobbyists to Federal Advisory Committees, Boards, and Commissions'') (clarifying that federally registered lobbyists may not serve on advisory committee, board, or Commission in an ''individual capacity.'')

who are appointed to committees to exercise their own individual best judgment on behalf of the government, such as when they are designated as Special Government Employees as defined in 18 U.S.C. 202.

Nominations to the HCFAC must be submitted via Form HUD–90005, which is available here: *https://files.hudexchange.info/resources/documents/HCFAC-Application-HUD-Form-90005.pdf.* Each nominee will be required to provide all the information on Form HUD–90005.

Nominations should be submitted electronically to *HCFAC.application@hud.gov.* Individuals that do not have internet access may submit nominations to the Office of the Deputy Assistant Secretary for Housing Counseling, HUD, 451 7th Street SW, Washington DC 20410. Those who submitted applications previously, and those who have been appointed previously, must reapply if they wish to be considered for an appointment.

HCFAC members will be required to adhere to the conflict-of-interest rules applicable to Special Government Employees as such employees are defined in 18 U.S.C. 202(a). The rules include relevant provisions in 18 U.S.C. related to criminal activity, Standards of Ethical Conduct for Employees of the Executive Branch (5 CFR part 2635) and Executive Order 12674 (as modified by Executive Order 12731). Therefore, applicants will be required to submit to pre-appointment screenings relating to identity of interest and financial interests that HUD might require. If selected, HCFAC members will also be asked to complete OGE Form-450 (Confidential Financial Disclosure Report).

Members of the HCFAC shall serve without pay but shall receive travel expenses including per diem in lieu of subsistence as authorized by 5 U.S.C. 5703. Regular attendance is essential to the effective operation of the HCFAC.

This Notice is not intended to be the exclusive method by which HUD will solicit nominations and expressions of interest to identify qualified candidates; however, all nominees for membership on the HCFAC will be subject to the same application process and evaluation criteria.

IV. Selection and Meetings

Member selections will be made by the Secretary and will be based on the Nominee's qualifications to contribute to the accomplishment of the HCFAC's objectives. Membership on the Committee is personal to the appointee and committee members serve at the discretion of the Secretary.

The estimated number of meetings (in-person or virtual) anticipated within a fiscal year is two (2). Additional meetings may be held as needed to render advice to the Deputy Assistant Secretary for the Office of Housing Counseling. The meetings may use electronic communication technologies for attendance.

All meetings will be announced by notice in the **Federal Register**. Announcements of the meetings may be made using other methods as well.

Janet Golrick,

Acting Chief of Staff, Office of Housing—Federal Housing Administration.

BILLING CODE 4210–67–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–7035–N–02]

60-Day Notice of Proposed Information Collection: Coronavirus Aid, Relief, and Economic Security (CARES) Act Reporting Information Collection Request; OMB Control No: 2535–0123

AGENCY: Office of the Chief Financial Officer, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the revision of existing information collection requests, as well as a new information request, described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* December 6, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Anna Guido, Management Analyst, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Room 4176, Washington, DC 20410–5000; telephone 202–402–5535 (this is not a toll-free number) or email at *Anna.P.Guido@HUD.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through Teletype (TTY) by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Dustin Hogenson, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; telephone 202–402–6554, (this is not a toll-free number). Persons with hearing or speech impairments may access this number via TTY by calling the Federal Relay Service at (800) 877–8339. Copies of available documents submitted to OMB may be obtained from Dustin Hogenson.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: CARES Act Reporting Information Collection Request.

OMB Approval Numbers:

2535–0123 Collection of required information for CARES Act Quarterly Reporting

Type of Request: Revisions of existing collections 2506–0133 (Housing Opportunities for Persons with AIDS (HOPWA) Program) 2506–0089 (Emergency Solutions Grant Data Collection), and 2506–0077 (Community Development Block Grant (CDBG) Entitlement Program) and a new collection activity under 2535–0123 (Collection of Required Information for CARES Act Quarterly Reporting).

Form Number(s)

OMB Control Numbers

- 2506–0133
- 2506–0089
- 2506–0077

Other affected forms and systems

- HUD–40110–C
- HUD–40110–D
- Integrated Disbursement and Information System (IDIS)
- Sage HMIS Reporting Repository

Description of the need for the information and proposed use: The change to the existing ICRs and renewal of the CARES Act Reporting ICR will enable HUD to collect from recipients of large covered funds, which are defined as CARES Act grants that exceed $150,000 in the aggregate, the quarterly information required to be in compliance with the requirements outlined in Section 15011 of the CARES Act.

This will revise and renew existing OMB control numbers 2506–0133, 2506–0089, and 2506–0077, to help improve compliance with CARES Act requirements. This information will be reported by the grant recipients to the program offices within HUD, then aggregated with the related information

already approved. This aggregated information will form the required quarterly reporting for CARES Act funds that HUD submits to the Pandemic Response Accountability Committee (PRAC).

A new information collection request under OMB control number 2353–0123 is also being submitted that will allow the collection of grant recipient reporting information through a reporting portal. This portal is in development, and upon completion will enable certain HUD programs to collect and report information in line with CARES Act requirements.

BURDEN ESTIMATES

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
CDBG	1,209	4	4,836	78.5	379,626	35.16	13,347,650.16
ESG	2,360	4	9,440	12.75	120,360	39.96	4,809,585.60
HOPWA (HUD–40110–C)	128	4	512	41	20,992	25.35	532,147.20
HOPWA (HUD–40110–D)	116	4	464	55	25,520	25.35	646,932.00
IHBG	792	4	3,168	1	3,168	25	79,200.00
TBRA/Op Fund	1,230	4	4,920	2	9,840	35.16	345,974.40
Total	5,835	4	23,340		559,506		19,761,489.36

**Please note:* The CPD programs (CDBG, ESG, and HOPWA) in the table above reference existing ICRs under control numbers 2506–0113, 2506–0089, and 2506–0077. The PIH programs (IHBG, TBRA, Op Fund) will leverage the existing ICR under control number 2535–0123 to implement a new reporting portal.

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Sairah R Ijaz,

Assistant Chief Financial Officer for Systems. The Office of the Chief Financial Officer.

BILLING CODE 4210–67–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[FWS–R7–ES–2021–0075; FXFR133707PB000–212–FF07CAMM00]

Endangered and Threatened Wildlife and Plants; Initiation of a 5-Year Status Review of the Polar Bear (Ursus maritimus)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice; request for information.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce our intention to conduct a 5-year status review under the Endangered Species Act of 1973, as amended, for the polar bear (*Ursus maritimus*). The polar bear was listed as threatened in 2008. A 5-year status review is based on the best scientific and commercial data available at the time of the review. We are requesting submission of information that has become available since the last review of the species in 2017.

DATES: To ensure consideration of your comments in our preparation of this 5-year status review, we must receive your comments and information by December 6, 2021. However, we will accept information about any species at any time.

ADDRESSES: Please submit your information on the current status of the polar bear by one of the following methods:

- *U.S. mail or hand-delivery:* Public Comments Processing, Attn: FWS–R7–ES–2021–0075, U.S. Fish and Wildlife Service Headquarters, MS: PRB/3W; 5275 Leesburg Pike; Falls Church, Virginia 22041–3803; or
- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting information to Docket No. FWS–R7–ES–2021–0075. For more about submitting information, see Request for Information in the **SUPPLEMENTARY INFORMATION** section, below.

FOR FURTHER INFORMATION CONTACT: David Gustine, Polar Bear Lead, Marine Mammals Management, by telephone at 907–786–3800. Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at 800–877–8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: We are initiating a 5-year status review under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), for the polar bear (*Ursus maritimus*). A 5-year status review is based on the best scientific and commercial data available at the time of the review; therefore, we are requesting submission of any new information on this species that has become available since the last 5-year review was conducted in 2017.

Why do we conduct a 5-year review?

Under the ESA, we maintain Lists of Endangered and Threatened Wildlife and Plants (which we collectively refer to as the List) in the Code of Federal Regulations (CFR) at 50 CFR 17.11 (for animals) and 17.12 (for plants). Section 4(c)(2)(A) of the ESA requires us to review each listed species' status at least once every 5 years. Further, our regulations at 50 CFR 424.21 require that we publish a notice in the **Federal Register** announcing those species

under active review. For additional information about 5-year reviews, go to *http://www.fws.gov/endangered/what-we-do/recovery-overview.html.*

What information do we consider in our review?

In conducting these reviews, we consider the best scientific and commercial data that have become available since the listing determination or most recent status review, such as:

(1) The biology of the species, including, but not limited to, population trends, distribution, abundance, demographics, and genetics;

(2) Habitat conditions, including, but not limited to, amount, distribution, and suitability;

(3) Conservation measures that have been implemented that benefit the species;

(4) Threat status and trends in relation to the five listing factors (as defined in section 4(a)(1) of the ESA); and

(5) Other new information, data, or corrections, including, but not limited to, taxonomic or nomenclatural changes, identification of erroneous information contained in the List, and improved analytical methods.

Any new information will be considered during the 5-year review and will also be useful in evaluating the ongoing recovery programs for the species.

Species Under Review

Entity listed: Polar bear (*Ursus maritimus*).

- *Where listed:* wherever found.
- *Classification:* Threatened.
- *Date listed (publication date for final listing rule):* May 15, 2008.
- ***Federal Register*** *citation for final listing rule:* 73 FR 28212.

Request for Information

To ensure that a 5-year review is complete and based on the best available scientific and commercial information, we request new information from all sources. See What Information Do We Consider in Our Review? for specific criteria. If you submit information, please support it with documentation such as maps, bibliographic references, methods used to gather and analyze the data, and/or copies of any pertinent publications, reports, or letters by knowledgeable sources.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comments, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Completed and Active Reviews

A list of all completed and currently active 5-year reviews addressing species for which the Alaskan Region of the Service has lead responsibility is available at *https://www.fws.gov/alaska/pages/endangered-species-program/recovery-endangered-species.*

Authority

This document is published under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Peter Fasbender,

Assistant Regional Director, Fisheries and Ecological Service, Alaska Region.

BILLING CODE 4333–15–P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–670 and 731–TA–1570 (Preliminary)]

Freight Rail Coupler Systems and Components From China; Institution of Anti-Dumping and Countervailing Duty Investigations and Scheduling of Preliminary Phase Investigations

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: The Commission hereby gives notice of the institution of investigations and commencement of preliminary phase antidumping and countervailing duty investigation Nos. 701–TA–670 and 731–TA–1570 (Preliminary) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether there is a reasonable indication that an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of freight rail coupler systems and components thereof from China, provided for in subheading 8607.30.10 of the Harmonized Tariff Schedule of the United States, that are alleged to be sold in the United States at less than fair value and alleged to be subsidized by the Government of China. Subject merchandise attached to finished rail cars may also enter under HTSUS heading 8606 or under subheading 980300 if imported as an Instrument of International Traffic. Unless the Department of Commerce (''Commerce'') extends the time for initiation, the Commission must reach a preliminary determination in antidumping and countervailing duty investigations in 45 days, or in this case by November 15, 2021. The Commission's views must be transmitted to Commerce within five business days thereafter, or by November 22, 2021.

DATES: September 29, 2021.

FOR FURTHER INFORMATION CONTACT: Stamen Borisson, (202) 205–3125, Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

SUPPLEMENTARY INFORMATION:

Background.—These investigations are being instituted, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), in response to petitions filed on September 29, 2021, by the Coalition of Freight Coupler Producers, consisting of Amsted Rail Company, Inc., Chicago, IL and McConway & Torley LLC, Pittsburgh, PA.

For further information concerning the conduct of these investigations and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and B (19 CFR part 207).

Participation in the investigations and public service list.—Persons (other than petitioners) wishing to participate in the investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in §§ 201.11 and 207.10 of the Commission's rules, not later than seven days after publication of this notice in the **Federal Register**. Industrial users and (if the merchandise under investigation is sold at the retail level) representative consumer organizations have the right to appear as parties in Commission antidumping duty and countervailing duty investigations. The

Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to these investigations upon the expiration of the period for filing entries of appearance.

Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in these investigations available to authorized applicants representing interested parties (as defined in 19 U.S.C. 1677(9)) who are parties to the investigations under the APO issued in the investigations, provided that the application is made not later than seven days after the publication of this notice in the **Federal Register**. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Conference.—In light of the restrictions on access to the Commission building due to the COVID–19 pandemic, the Commission is conducting the staff conference through video conferencing on October 20, 2021. Requests to appear at the conference should be emailed to *preliminaryconferences@usitc.gov* (DO NOT FILE ON EDIS) on or before October 18, 2021. Please provide an email address for each conference participant in the email. Information on conference procedures will be provided separately and guidance on joining the video conference will be available on the Commission's Daily Calendar. A nonparty who has testimony that may aid the Commission's deliberations may request permission to participate by submitting a short statement.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov*). No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

Written submissions.—As provided in §§ 201.8 and 207.15 of the Commission's rules, any person may submit to the Commission on or before October 25, 2021, a written brief containing information and arguments pertinent to the subject matter of the investigations. Parties shall file written testimony and supplementary material in connection with their presentation at the conference no later than noon on October 19, 2021. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

In accordance with §§ 201.16(c) and 207.3 of the rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

Certification.—Pursuant to § 207.3 of the Commission's rules, any person submitting information to the Commission in connection with these investigations must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will acknowledge that any information that it submits to the Commission during these investigations may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of these or related investigations or reviews, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements.

Authority: These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.12 of the Commission's rules.

By order of the Commission.

Dated: September 30, 2021.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2021–21725 Filed 10–4–21; 8:45 am]

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1199]

Certain Tobacco Heating Articles and Components Thereof; Commission's Final Determination Finding a Violation of Section 337; Issuance of a Limited Exclusion Order and Cease and Desist Orders; Termination of the Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission (''Commission'') has found a violation of section 337 of the Tariff Act of 1930, as amended, in this investigation and has issued a limited exclusion order prohibiting the importation of infringing tobacco heating articles and components thereof and cease and desist orders directed against respondents Philip Morris USA, Inc. (''PM USA'') and Altria Client Services LLC (''ACS''). The investigation is terminated.

FOR FURTHER INFORMATION CONTACT: Lynde Herzbach, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3228. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: On May 15, 2020, the Commission instituted this investigation under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337 (''section 337''), based on a complaint filed by RAI Strategic Holdings, Inc., R.J. Reynolds Vapor Company, and R.J. Reynolds Tobacco Company, all of Winston-Salem, North Carolina (collectively, ''Complainants''). *See* 85 FR 29482–83. The complaint, as supplemented, alleges a violation of section 337 based upon the importation of certain tobacco heating articles and components thereof by reason of infringement of certain claims of U.S. Patent Nos. 9,839,238 (''the '238 patent''); 9,930,915 (''the '915 patent'');

9,901,123 (''the '123 patent) (collectively, ''the Asserted Patents''). The complaint also alleges the existence of a domestic industry. The notice of investigation names five respondents: ACS Altria Group, Inc. (''AGI''), and PM USA, all of Richmond, Virginia; Philip Morris International Inc. (''PMI'') of New York, New York; and Philip Morris Products S.A. of Neuchatel, Switzerland (collectively, ''Respondents''). *See id.* The Office of Unfair Import Investigations (''OUII'') is also a party to the investigation. *See id.*

The Commission previously terminated respondents AGI and PMI from the investigation based on Complainants' partial withdrawal of the complaint. *See* Order No. 24 (Dec. 14, 2020), *unreviewed by* Comm'n Notice (Jan. 5, 2021).

The Commission previously affirmed that the economic prong of the domestic industry requirement is satisfied under 19 U.S.C. 1337(a)(3)(A) with respect to the '238 and '915 patents and provided supplemental analysis. Order No. 35 (Jan. 19, 2021), *affirmed in part by* Notice (Feb. 18, 2021).

On May 14, 2021, the presiding ALJ issued the final initial determination on violation (''FID''), which finds a violation of section 337 based on infringement of the '123 patent and the '915 patent and finds no violation as to the '238 patent.

On June 15, 2021, both Complainants and Respondents filed submissions on the public interest pursuant to Commission Rule 210.50(a)(4). OUII did not file a statement on the public interest. The Commission also received seven filings in response to its **Federal Register** notice calling for public interest comments. *See* 86 FR 28382 (May 16, 2021).

On July 27, 2021, the Commission determined to review the FID in part. 86 FR 41509–11 (Aug. 2, 2021). Specifically, the Commission determined to review: (1) As to the '915 patent, the ALJ's construction of the limitation ''electrical energy source'' recited in asserted claims 1 and 3 and the FID's infringement, technical prong, and invalidity findings to the extent they may be affected by a modified claim construction; (2) as to the '123 patent, the FID's obviousness and domestic industry findings; and (3) as to the '238 patent, the FID's infringement finding. *Id.* The Commission also asked the parties to address a question related to the issues under review regarding the '915 patent. *Id.* The Commission further requested briefing on remedy, bonding, and the public interest. *Id.*

On August 10, 2021, Complainants, Respondents, and OUII each filed an initial written response to the Commission's request for briefing. On August 17, 2021, Complainants and Respondents each filed a reply submission. On August 20, 2021, OUII filed its reply submission.

On August 5, 6, 9, and 10, 2021, twenty-nine members of the public submitted public interest submissions. On August 9, 2021, the Hispanic Leadership Fund and the National Minority Quality Form filed public interest submissions. On August 10, 2021, Nextera Healthcare filed a public interest submission. On August 11, 2021, Tom Miller, the Attorney General of Iowa, filed a public interest submission.

On September 13, 2021, Respondents filed Respondents' Motion to Take Judicial Notice of Recent Regulatory Determinations and District Court Opinion. On September 15, 2021, Complainants filed Complainants' Opposition to Respondents' Motion to Take Judicial Notice of Recent Regulatory Determinations and District Court Opinion. The Commission has determined to deny the motion, but has considered the parties' submissions in its consideration of the public interest factors.

Having reviewed the record of the investigation, including the FID and the parties' submissions, the Commission has found a violation of section 337 as to claims 1–3, and 5 of the '915 patent and claims 27–30 of the '123 patent. Specifically, with respect to the '915 patent, the Commission has determined to: (1) Modify the construction of the limitation ''electrical energy source'' recited in asserted claims 1 and 3 to mean ''receptacle that provides for transmission of electrical current from the power source to the heating member, where the receptacle is not limited to a structure that requires wiring or insertion''; and (2) affirm the FID's findings as to infringement, technical prong, and invalidity findings under the modified claim construction. With respect to the '123 patent, the Commission has determined to: (1) Affirm, with supplemental analysis, the FID's finding that Respondents failed to prove claims 27–30 of the '123 patent are invalid for obviousness under 35 U.S.C. 103; and (2) take no position as to the FID's findings with respect to the economic prong of the domestic industry requirement under subsection 337(a)(3)(A). The Commission has further determined to affirm the FID's non-infringement finding for the '238 patent.

The Commission has determined that the appropriate remedy is: (1) A limited exclusion order prohibiting the importation of tobacco heating articles and components thereof that infringe claims 1–3, and 5 of the '915 patent and claims 27–30 of the '123 patent; and (2) cease and desist orders directed to respondents PM USA and ACS. The Commission has determined that the public interest factors do not preclude issuance of the limited exclusion order or the cease and desist orders. The Commission has further determined that no bond is required during the period of Presidential review. *See* 19 U.S.C. 1337(j)(3).

The investigation is terminated. The Commission's reasoning in support of its determinations is set forth more fully in its opinion. The Commission's orders and opinion were delivered to the President and the United States Trade Representative on the day of their issuance.

The Commission vote for this determination took place on September 29, 2021.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: September 29, 2021.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

INTERNATIONAL TRADE COMMISSION

Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled *Certain Barcode Scanners, Mobile Computers with Barcode Scanning Capabilities, Scan Engines, and Components Thereof, DN 3570;* the Commission is soliciting comments on any public interest issues raised by the complaint or complainant's filing pursuant to the Commission's Rules of Practice and Procedure.

FOR FURTHER INFORMATION CONTACT: Lisa R. Barton, Secretary to the Commission, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–2000. The public version of the complaint can be

accessed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.*

General information concerning the Commission may also be obtained by accessing its internet server at United States International Trade Commission (USITC) at *https://www.usitc.gov*. The public record for this investigation may be viewed on the Commission's Electronic Document Information System (EDIS) at *https://edis.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205–1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint and a submission pursuant to § 210.8(b) of the Commission's Rules of Practice and Procedure filed on behalf of Honeywell International Inc.; Hand Held Products, Inc.; and Metrologic Instruments, Inc. on September 29, 2021. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain barcode scanners, mobile computers with barcode scanning capabilities, scan engines, and components thereof. The complainant names as respondents: Zebra Technologies Corporation of Lincolnshire, IL; and Symbol Technologies, Inc. of Holtsville, NY. The complainant requests that the Commission issue a limited exclusion order, cease and desist orders, and impose a bond upon respondents alleged infringing articles during the 60-day Presidential review period pursuant to 19 U.S.C. 1337(j).

Proposed respondents, other interested parties, and members of the public are invited to file comments on any public interest issues raised by the complaint or § 210.8(b) filing. Comments should address whether issuance of the relief specifically requested by the complainant in this investigation would affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

(i) Explain how the articles potentially subject to the requested remedial orders are used in the United States;

(ii) identify any public health, safety, or welfare concerns in the United States relating to the requested remedial orders;

(iii) identify like or directly competitive articles that complainant, its licensees, or third parties make in the United States which could replace the subject articles if they were to be excluded;

(iv) indicate whether complainant, complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to the requested exclusion order and/or a cease and desist order within a commercially reasonable time; and

(v) explain how the requested remedial orders would impact United States consumers.

Written submissions on the public interest must be filed no later than by close of business, eight calendar days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation. Any written submissions on other issues must also be filed by no later than the close of business, eight calendar days after publication of this notice in the **Federal Register**. Complainant may file replies to any written submissions no later than three calendar days after the date on which any initial submissions were due. No other submissions will be accepted, unless requested by the Commission. Any submissions and replies filed in response to this Notice are limited to five (5) pages in length, inclusive of attachments.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. Submissions should refer to the docket number (''Docket No. 3570'') in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, Electronic Filing Procedures.[1]) Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov.*) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice. Persons with questions regarding filing should contact the Secretary at *EDIS3Help@usitc.gov.*

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel,[2] solely for cybersecurity purposes. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.[3]

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of §§ 201.10 and 210.8(c) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.8(c)).

By order of the Commission.

Issued: September 30, 2021.

Lisa Barton,

Secretary to the Commission.

JOINT BOARD FOR THE ENROLLMENT OF ACTUARIES

Meeting of the Advisory Committee; Meeting

AGENCY: Joint Board for the Enrollment of Actuaries.

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The Joint Board for the Enrollment of Actuaries gives notice of a closed teleconference meeting of the

Advisory Committee on Actuarial Examinations.

DATES: The meeting will be held on October 29, 2021, from 9:00 a.m. to 5:30 p.m. (EDT).

FOR FURTHER INFORMATION CONTACT: Elizabeth Van Osten, Designated Federal Officer, Advisory Committee on Actuarial Examinations, at (202) 317–3648 or *elizabeth.j.vanosten@irs.gov.*

SUPPLEMENTARY INFORMATION: Notice is hereby given that the Advisory Committee on Actuarial Examinations will hold a teleconference meeting on October 29, 2021, from 9:00 a.m. to 5:30 p.m. (EDT). The meeting will be closed to the public.

The purpose of the meeting is to discuss topics and questions that may be recommended for inclusion on future Joint Board examinations in actuarial mathematics, pension law and methodology referred to in 29 U.S.C. 1242(a)(1)(B).

A determination has been made as required by section 10(d) of the Federal Advisory Committee Act, 5 U.S.C. App., that the subject of the meeting falls within the exception to the open meeting requirement set forth in Title 5 U.S.C. 552b(c)(9)(B), and that the public interest requires that such meeting be closed to public participation.

Dated: September 29, 2021.

Thomas V. Curtin, Jr.,

Executive Director, Joint Board for the Enrollment of Actuaries.

Notice Pursuant to The National Cooperative Research and Production Act Of 1993—Cooperative Research Group On CHEDE–8

Notice is hereby given that, on August 31, 2021, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (''the Act''), Cooperative Research Group on CHEDE–8 (''CHEDE–8'') has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, Borgwarner Inc., Auburn Hills, MI, has withdrawn as a party to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and CHEDE–8 intends to file additional written notifications disclosing all changes in membership.

On December 4, 2019, CHEDE–8 filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on December 30, 2019 (84 FR 71977).

The last notification was filed with the Department on June 2, 2021. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on July 26, 2021 (86 FR 40079).

BILLING CODE 4410–11–P

DEPARTMENT OF JUSTICE

[OMB Number 1105–0025]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Extension Without Change of a Previously Approved Collection; Federal Coal Lease Request

AGENCY: Antitrust Division, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Department of Justice (DOJ), Antitrust Division (ATR), will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until December 6, 2021.

FOR FURTHER INFORMATION CONTACT: If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Jill Ptacek, Attorney, Antitrust Division, United States Department of Justice, 450 Fifth Street NW, Suite 8000, Washington, DC 20530 (phone: 202–307–6607).

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *The Title of the Form/Collection:* Federal Coal Lease Reserves.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form numbers are ATR–139 and ATR–140. The applicable component within the Department of Justice is the Antitrust Division.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Business or other for profit. Other: None. The Department of Justice evaluates the competitive impact of issuances, transfers and exchanges of federal coal leases. These forms seek information regarding a prospective coal lessee's existing coal reserves. The Department uses this information to determine whether the issuance, transfer or exchange of the federal coal lease is consistent with the antitrust laws.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that 10 respondents will complete each form, with each response taking approximately two hours.

6 *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 20 annual burden hours associated with this collection, in total.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, Suite 3E.405B, Washington, DC 20530.

Dated: September 30, 2021.

Melody Braswell,

Department Clearance Officer, PRA, U.S. Department of Justice.

BILLING CODE 4410–12–P

DEPARTMENT OF JUSTICE

[OMB Number 1122–0027]

Agency Information Collection Activities; Proposed eCollection Requested; Extension of a Currently Approved Collection

AGENCY: Office on Violence Against Women, Department of Justice.

ACTION: 30-Day notice.

SUMMARY: The Department of Justice, Office on Violence Against Women (OVW) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted for 60 days until December 6, 2021.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) Type of Information Collection: Extension of a currently approved collection.

(2) Title of the Form/Collection: Semi-Annual Progress Report for Grantees from the Engaging Men and Youth Program.

(3) Agency form number, if any, and the applicable component of the Department of Justice sponsoring the collection: Form Number: 1122–0027. U.S. Department of Justice, Office on Violence Against Women.

(4) Affected public who will be asked or required to respond, as well as a brief abstract: The affected public includes the approximately 8 grantees of the Consolidated Grant Program to Address Children and Youth Experiencing Domestic and Sexual Assault and Engage Men and Boys as Allies (Consolidated Youth Program) who are implementing engaging men and youth projects. The Consolidated Youth Program creates a unique opportunity for communities to increase collaboration among non-profit victim service providers, violence prevention programs, and child and youth organizations serving victims ages 0–24. Additionally, it supports organizations and programs that promote boys' and men's role in combating violence against women and girls. Eligible applicants are nonprofit, nongovernmental entities, Indian tribes or tribal nonprofit organizations, and territorial, tribal or unit of local government entities.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond/reply: It is estimated that it will take the approximately 8 respondents (grantees from the Consolidated Youth Program who are implementing engaging men and youth projects) approximately one hour to complete a semi-annual progress report.

The semi-annual progress report is divided into sections that pertain to the different types of grantee activities.

(6) Program grantees will only be required to complete the sections of the form that pertain to their own specific activities.

(7) An estimate of the total public burden (in hours) associated with the collection: The total annual hour burden to complete the data collection forms is 16 hours, that is 8 grantees completing a form twice a year with an estimated completion time for the form being one hour.

If additional information is required contact: Melody Braswell, Deputy Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E, 405B, Washington, DC 20530.

Dated: September 30, 2021.

Melody Braswell,

Department Clearance Officer, PRA, U.S. Department of Justice.

Labor Advisory Committee for Trade Negotiations and Trade Policy

AGENCY: Bureau of International Labor Affairs, Labor.

ACTION: Meeting notice.

SUMMARY: Notice of a Labor Advisory Committee for Trade Negotiations and Trade Policy meeting.

DATES: October 18, 2021, 3:00 p.m. to 4:30 p.m.; Virtually via Zoom for Government.

FOR FURTHER INFORMATION CONTACT: Anne M. Zollner, Designated Federal Official and Division Chief, Trade Negotiations and Implementation, Office of Trade and Labor Affairs, Bureau of International Labor Affairs, Department of Labor, Frances Perkins Building, Room S–5317, 200 Constitution Ave. NW, Washington, DC 20210, telephone (202) 693–4890, *zollner.anne@dol.gov.*

SUPPLEMENTARY INFORMATION: The Labor Advisory Committee for Trade Negotiations and Trade Policy consults with and makes recommendations to the Secretary of Labor and the United States Trade Representative on general policy matters concerning labor and trade negotiations, operations of any trade agreement once entered into, and other matters arising in connection with the administration of the trade policy of the United States.

During the meeting, the Committee will review and discuss current issues that influence U.S. trade policy. The Committee will also discuss potential U.S. negotiating objectives and bargaining positions in current and anticipated trade negotiations. Pursuant to 19 U.S.C. 2155(f)(2)(A), the meeting will concern matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions. Therefore, the meeting is exempt from the requirements of subsections (a) and (b) of sections 10 and 11 of the Federal Advisory Committee Act (relating to open meetings, public notice, public participation, and public availability of documents). 5 U.S.C. app. Accordingly, the meeting will be closed to the public.

Signed at Washington, DC, this 30th day of September 2021.

Thea M. Lee,

Deputy Undersecretary, Bureau of International Affairs.

[FR Doc. 2021–21681 Filed 10–4–21; 8:45 am]

BILLING CODE 4510–28–P

DEPARTMENT OF LABOR

[Docket No: DOL–2021–00##]

Privacy Act of 1974; System of Records

AGENCY: Office of Assistant Secretary for Administration and Management, DOL.

ACTION: Notice of a new system of records.

SUMMARY: As required by the Privacy Act of 1974, and Office of Management and Budget (OMB) Circular No. A–108, this notice is a new Privacy Act System of Records titled Contractor and Visitor Public Health Emergency Records DOL/OASAM–38, which include information on contractor employees who work in, as well as visitors to, Department of Labor (DOL) facilities during declared public health emergencies. The system contains information provided by the contractor's employees including such information as their applicable vaccination or medical countermeasure status and whether they are experiencing symptoms associated with the public health emergency. Each contractor with employees who will work in DOL facilities (regardless of whether the contract is with DOL or another Federal agency such as GSA) will be asked to confirm if its employees have been vaccinated or have received appropriate medical countermeasures, in addition, the contractor will be required to ensure that its employees follow the guidelines specified for working in DOL facilities, for example, to mitigate the spread of COVID–19, not fully vaccinated employees are required to wear masks and maintain physical distancing. Visitors to DOL facilities will also be asked to provide information about their vaccination or medical countermeasure status and may be asked to provide proof of their status and information about whether they are experiencing any symptoms associated with the public health emergency.

DATES:

Comment Dates: We will consider comments that we receive on or before November 4, 2021.

Applicable date: This notice is applicable upon publication, subject to a 30-day review and comment period for the routine uses.

ADDRESSES: We invite you to submit comments on this notice. You may submit comments by any of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Mail, hand delivery, or courier:* 200 Constitution Avenue NW, N–1301, Washington, DC. In your comment, specify Docket ID DOL–2021–00##.
- *Federal mailbox: https://dol.gov/privacy.*

All comments will be made public by DOL and will be posted without change to *http://www.regulations.gov,* including any personal information provided.

FOR FURTHER INFORMATION CONTACT: To submit general questions about the system, contact Rick Kryger, at telephone 292–693–4158, or email *kryger.rick.j@dol.gov.*

SUPPLEMENTARY INFORMATION: DOL is establishing a system of records, DOL/OASAM–38, subject to the Privacy Act of 1974, 5 U.S.C. 552a. The purpose of this new system of records is to house information provided by contractors, subcontractors, their employees, and visitors needed for DOL to take appropriate actions during a public health emergency. The information collected includes medical countermeasures, such as vaccinations, diagnostic test results, whether the individual is experiencing relevant symptoms, and any other information necessary to assist DOL with determining appropriate mitigation measures to take with respect to contractor employees and visitors in DOL facilities or in the performance of duties associated with the Department.

In general, the information will be used to confirm that contractors, their employees, and visitors to DOL facilities are aware of and complying with requirements necessitated by the public

health emergency, such as those to wear masks and maintain physical distancing while working onsite or visiting a DOL facility. For onsite contractor employees, the information will be used to make decisions such as office space planning and assigning office space, assigning tasks that require individuals to work in close physical proximity, as well for operational staffing requirements for carrying out work in field operations.

Privacy Act

As required by the Privacy Act (specifically 5 U.S.C. 552a(r)) and implemented by the Office of Management and Budget (OMB) Circular A–108, DOL has provided a report of this system of records to the Office of Information and Regulatory Affairs, Office of Management and Budget; the Chairman, Committee on Government Reform and Oversight, House of Representatives; and the Chairman, Committee on Governmental Affairs, United States Senate.

SYSTEM NAME AND NUMBER:

Contractor and Visitor Public Health Emergency Records DOL/OASAM–38.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

The U.S. Department of Labor (DOL) Office of Assistant Secretary and Administration and Management owns the Contractor and Visitor Public Health Emergency Records System, which is housed in secure datacenters in the continental United States. Each DOL agency that has contractors working in a DOL facility has custody of the records pertaining to its own contracts. Contact the system manager for additional information.

SYSTEM MANAGER(S):

Rick Kryger, Deputy Chief Information Officer, Office of the Assistant Secretary for Administration and Management, U.S. Department of Labor, 200 Constitution Avenue NW, N–1301, Washington, DC 20210.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Emergencies Act (50 U.S.C. 1601–1651); the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121, 5192(1)); 5 U.S.C. 301, 7901, 7902, and 7903; the Occupational Safety and Health Act (29 U.S.C. 668), Executive Order 12,196 ''Occupational safety and health programs for Federal employees;'' Workforce Innovation and Opportunity Act (WIOA) WIOA 159(g) ((29 U.S.C. 3209(g)) and WIOA 147(a)(3)(J) ((29 U.S.C. 3197(a)(3)(J)).

PURPOSE(S) OF THE SYSTEM:

To capture and report health and safety-related information during public health emergencies. Such reporting will be provided to DOL contracting officers and other authorized officials in DOL to enable the agency to use the data from the system to review submissions for compliance with applicable mitigation requirements, and, in the case of contractor employees, with contractual terms and conditions for contracts for which they are responsible.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

The Contractor and Visitor Public Health Emergency Records System contains records related to employees of prime and subcontractors who are performing work on federal contract awards at any DOL facility, or in shared operations. An owner, agent, or employee of a prime or subcontractor may enter or certify information, as applicable.

The Contractor and Visitor Public Health Emergency Records System may also contain records related to visitors to DOL facilities, such as, but not limited to, volunteers, individuals from outside the DOL workforce on detail to DOL, experts/consultants, and grantees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The information in the system of records consists of electronic or hard copy records, including records of vaccination status or other medical countermeasures (such as diagnostic test results), status of employees or visitors, and other health and safety information related to the public health emergency. The information in the system of records includes the name of the person entering, and as applicable, certifying, information on behalf of the prime or subcontractor, their position within the company, phone number, and email address. Categories of records include, but are not limited to: Name, unique identifier assigned by the prime or subcontractor, medical countermeasure (vaccination or diagnostic test) status, symptom questionnaires and other information relevant and necessary for mitigation purposes. Optional records that may be required for certain contracts or in certain geographic areas include: name, position, work phone number, email address, DOL facility, lands, or shared operations at which the employee will be working on-site, and other similar records related to their official responsibilities.

RECORDS SOURCE CATEGORIES:

Contract employee records are created, reviewed and, as appropriate, certified by the prime or subcontractor. Records pertaining to the individual entering and certifying data in the system may be created by the individual, by a contracting officer, or in the case of a subcontractor by the prime contractor or another subcontractor. Visitor records are created, reviewed and, as appropriate, certified by the appropriate Agency Official receiving the visitor to the DOL facility.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those universal routine uses previously published and listed at *https://www.dol.gov/agencies/sol/privacy/intro,* information in this system may be disclosed to state and local public health officials for purposed related to the public health emergency, such as contract tracing.

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

Electronic records in this system of records are stored on security measure protected (for example, e-authentication, password, restricted access protocol, etc.) databases, electronically on e-media devices (computer hard drive, magnetic disc, tape, digital media, CD, DVD, etc.). Paper copies of records are stored within secured or locked facilities.

POLICIES AND PRACTICES FOR RETRIEVEAL OF RECORDS:

Records may be retrieved by the individual's name, unique identifier assigned by the prime or subcontractor, vaccination status, position, or facility at which the employee will be working on-site.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

Records are maintained in file folders and DOL computer systems at applicable locations as set out above under the heading ''System Location.'' System records will be retained and disposed of according to DOL's records maintenance and disposition schedules as well as any applicable General Records Schedules.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

Records in this system of records are safeguarded in accordance with applicable rules and policies, including all applicable DOL automated systems security and access policies. Strict controls have been imposed to minimize the risk of compromising the

information that is being stored. Access to the computer systems containing the records in this system of records is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions.

Records in the system are protected from unauthorized access and misuse through a combination of administrative, technical, and physical security measures. Administrative measures include but are not limited to policies that limit system access to individuals within an agency with a legitimate business need, and regular review of security procedures and best practices to enhance security. Technical measures include but are not limited to system design that allows prime contractor and subcontractor employees access only to data for which they are responsible; role-based access controls that allow government employees access only to data regarding contracts awarded by their agency or reporting unit; required use of strong passwords that are frequently changed; and use of encryption for certain data transfers. Physical security measures include but are not limited to the use of data centers which meet government requirements for storage of sensitive data.

RECORDS ACCESS PROCEDURES:

Prime and subcontractors enter and review their own data in the system and are responsible for ensuring that those data are correct. If an individual wishes to access their own data in the system after it has been submitted, that individual should consult the System Manager.

CONTESTING RECORD PROCEDURES:

Individuals desiring to contest or amend information maintained in the system should direct their request to the above listed System Manager and should include the reason for contesting it and the proposed amendment to the information with supporting information to show how the record is inaccurate. A request for contesting records pertaining to an individual should contain:

- Name, and
- Any other pertinent information to help identify the file.

NOTIFICATION PROCEDURES:

An individual may request information regarding this system of records or information as to whether the system contains records pertaining to the individual from the System Manager above.

EXEMPTIONS PROMULGATED FOR THE SYSTEM:

None.

HISTORY:

None.

Milton Stewart,

Senior Agency Official for Privacy, Office of the Assistant Secretary for Administration and Management, U.S. Department of Labor.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice: (21–063)]

NASA Planetary Science Advisory Committee Meeting; Cancellation

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting cancellation.

SUMMARY: In accordance with the Federal Advisory Committee Act, the National Aeronautics and Space Administration (NASA) announces that the planned meeting on October 18–19, 2021, of the Planetary Science Advisory Committee is cancelled. This meeting was announced in the **Federal Register** on September 24, 2021, (see reference below). The cancellation of this meeting is due to NASA administrative priorities. NASA will announce the new dates for this meeting in a future **Federal Register** notice.

SUPPLEMENTARY INFORMATION:

REF: **Federal Register**/Vol. 86, No. 183/Friday September 24, 2021/Notices; page 53117–53118.

Patricia Rausch,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–21–0014; NARA–2022–001]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice of certain Federal agency requests for records disposition authority (records schedules). We publish notice in the **Federal Register** and on *regulations.gov* for records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on such records schedules.

DATES: NARA must receive comments on the schedules listed in this notice by November 19, 2021.

ADDRESSES: You may submit comments by the following method:

- *Federal eRulemaking Portal: http://www.regulations.gov.* On the website, enter either of the numbers cited at the top of this notice into the search field. This will bring you to the docket for this notice, in which we have posted the records schedules open for comment. Each schedule has a 'comment' button so you can comment on that specific schedule.

Due to COVID–19 building closures, we are currently temporarily not accepting comments by mail. However, if you are unable to comment via *regulations.gov,* you may contact *request.schedule@nara.gov* for instructions on submitting your comment. You must cite the control number of the schedule you wish to comment on. You can find the control number for each schedule in parentheses at the end of each schedule's entry in the list at the end of this notice.

FOR FURTHER INFORMATION CONTACT: Kimberly Keravuori, Regulatory and External Policy Program Manager, by email at *regulation_comments@nara.gov.* For information about records schedules, contact Records Management Operations by email at *request.schedule@nara.gov* or by phone at 301–837–1799.

SUPPLEMENTARY INFORMATION:

Public Comment Procedures

We are publishing notice of records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on these records schedules, as required by 44 U.S.C. 3303a(a), and list the schedules at the end of this notice by agency and subdivision requesting disposition authority.

In addition, this notice lists the organizational unit(s) accumulating the records or states that the schedule has agency-wide applicability. It also provides the control number assigned to each schedule, which you will need if you submit comments on that schedule.

We have uploaded the records schedules and accompanying appraisal

memoranda to the *regulations.gov* docket for this notice as ''other'' documents. Each records schedule contains a full description of the records at the file unit level as well as their proposed disposition. The appraisal memorandum for the schedule includes information about the records.

We will post comments, including any personal information and attachments, to the public docket unchanged. Because comments are public, you are responsible for ensuring that you do not include any confidential or other information that you or a third party may not wish to be publicly posted. If you want to submit a comment with confidential information or cannot otherwise use the *regulations.gov* portal, you may contact *request.schedule@nara.gov* for instructions on submitting your comment.

We will consider all comments submitted by the posted deadline and consult as needed with the Federal agency seeking the disposition authority. After considering comments, we will post on *regulations.gov* a ''Consolidated Reply'' summarizing the comments, responding to them, and noting any changes we have made to the proposed records schedule. We will then send the schedule for final approval by the Archivist of the United States. You may elect at *regulations.gov* to receive updates on the docket, including an alert when we post the Consolidated Reply, whether or not you submit a comment. If you have a question, you can submit it as a comment, and can also submit any concerns or comments you would have to a possible response to the question. We will address these items in consolidated replies along with any other comments submitted on that schedule.

We will post schedules on our website in the Records Control Schedule (RCS) Repository, at *https://www.archives.gov/records-mgmt/rcs,* after the Archivist approves them. The RCS contains all schedules approved since 1973.

Background

Each year, Federal agencies create billions of records. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval. Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives or to destroy, after a specified period, records lacking continuing administrative, legal, research, or other value. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

Agencies may not destroy Federal records without the approval of the Archivist of the United States. The Archivist grants this approval only after thorough consideration of the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the Government's activities, and whether or not the records have historical or other value. Public review and comment on these records schedules is part of the Archivist's consideration process.

Schedules Pending

1. Department of Defense, Defense Logistics Agency, Records related to Safety and Health (DAA–0361–2021–0016).
2. Department of Transportation, Pipeline and Hazardous Materials Safety Administration, Controlled Correspondence (DAA–0571–2018–0008).
3. Court Services and Offender Supervision Agency for the District of Columbia, Pretrial Services Agency, Post-Release and Supervision Lists (DAA–0562–2021–0029).

Laurence Brewer,

Chief Records Officer for the U.S. Government.

National Industrial Security Program Policy Advisory Committee (NISPPAC); Meeting

AGENCY: Information Security Oversight Office (ISOO), National Archives and Records Administration (NARA).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: We are announcing an upcoming National Industrial Security Program Policy Advisory Committee (NISPPAC) meeting in accordance with the Federal Advisory Committee Act and implementing regulations.

DATES: The meeting will be on October 27, 2021, from 10:00 a.m. to 1:00 p.m. EDT.

ADDRESSES: This meeting will be a virtual meeting. See supplementary procedures below.

FOR FURTHER INFORMATION CONTACT: Heather Harris Pagán, ISOO Senior Program Analyst, by telephone at 202.357.5351 or by email at *NISPPAC@nara.gov.* Contact ISOO at *ISOO@nara.gov.*

SUPPLEMENTARY INFORMATION: This virtual meeting is open to the public in accordance with the Federal Advisory Committee Act (5 U.S.C. app 2) and implementing regulations at 41 CFR 101–6. The Committee will discuss National Industrial Security Program policy matters.

Procedures: Members of the public must register in advance through the Event Services link *https://ems8.intellor.com?do=register&t=1&p=839420* if you wish to attend. NISPPAC members, ISOO employees, and speakers should send an email to *NISPPAC@nara.gov* for the appropriate registration information instead of registering with the above link.

Tasha Ford,

Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Mathematical and Physical Sciences; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name and Committee Code: Advisory Committee for Mathematical and Physical Sciences (#66).

Date and Time: November 3, 2021; 11:15 a.m.–4:45 p.m.; November 4, 2021; 11:20 a.m.–5:00 p.m.

Place: NSF, 2415 Eisenhower Avenue, Alexandria, VA 22314 (Virtual attendance only).

To attend the virtual meeting, please send your request for the virtual meeting link to Michelle Bushey at the following email address: *mbushey@nsf.gov*.

Type of Meeting: Open.

Contact Person: Leighann Martin, National Science Foundation, 2415 Eisenhower Avenue, Room C 9000, Alexandria, Virginia 22314; Telephone: 703/292–4659.

Summary of Minutes: Minutes and meeting materials will be available on the MPS Advisory Committee website at *http://www.nsf.gov/mps/advisory.jsp* or

can be obtained from the contact person listed above.

Purpose of Meeting: To provide advice, recommendations and counsel on major goals and policies pertaining to MPS programs and activities.

Agenda

Wednesday, November 3, 2021

- Call to Order and Official Opening of the Meeting
- Approval of Prior Meeting Minutes—Catherine Hunt, MPSAC Chair
- MPS Update by Assistant Director
- Science Highlight
- MPS and the Living World Subcommittee Report Out and discussion
- Biotech discussion with MPS and BIO AC members
- Discussion with the AC: TIP
- Facilities and Infrastructure Subcommittee Report Out
- Facilities and Infrastructure Subcommittee: New Charge
- Preparation for discussion with NSF Director and COO
- Closing remarks and adjourn day 1

Thursday, November 4, 2021

- Login and register
- Welcome and Overview of Agenda
- Canvassing Committee Reflections
- LEAPS and Ascend Panels
- CEOSE Outbrief
- White paper discussions: Climate Change, Broadening Participation, and Clean Energy
- Astro 2020 Report Update
- Preparation for discussion with NSF Director and COO
- Meeting and discussion with NSF Director and COO
- Closing remarks and adjourn

Dated: September 29, 2021.

Crystal Robinson,

Committee Management Officer.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Education and Human Resources; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces the following meeting:

Name and Committee Code: Advisory Committee for Education and Human Resources (#1119) (Virtual Meeting).

Date and Time: Wednesday, November 3, 2021; 12:00 p.m.–5:00 p.m. and Thursday, November 4, 2021; 12:00 p.m.–5:00 p.m.

Place: Sponsored by the National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314 | Virtual.

To attend the virtual meeting, all visitors must register at least 48 hours prior to the meeting.at: *https://nsf.zoomgov.com/webinar/register/WN_e5ZlM-BHS9SZlVSJAKKJ3w*.

The final agenda for the meeting will be posted to: *https://www.nsf.gov/ehr/advisory.jsp*.

Type of Meeting: Open.

Contact Person: Keaven M. Stevenson, National Science Foundation, 2415 Eisenhower Avenue, Room C11001, Alexandria, VA 22314; (703) 292–8600/*kstevens@nsf.gov*.

Summary of Minutes: Minutes and meeting materials will be available on the EHR Advisory Committee website at *http://www.nsf.gov/ehr/advisory.jsp* or can be obtained from Dr. Bonnie A. Green, National Science Foundation, 2415 Eisenhower Avenue, Room C11000, Alexandria, VA 22314; (703) 292–8600; *ehr_ac@nsf.gov*.

Purpose of Meeting: To provide advice with respect to the Foundation's science, technology, engineering, and mathematics (STEM) education and human resources programming.

Agenda

Wednesday, November 3, 2021, 12:00 p.m.–5:00 p.m. (Eastern Standard Time)

- Welcoming Remarks from the AC Chair and the EHR Acting Assistant Director
- Theme 1: Innovation Through Partnership
  - Session 1: Understanding the New Directorate for Technology, Innovation, and Partnerships (TIP)
  - Session 2: Developing and Leveraging Partnerships in STEM Higher Education
  - Session 3: Building a New Infrastructure for Partnerships with EHR & TIP

Thursday, November 4, 2021, 12:00 p.m.–5:00 p.m. (Eastern Standard Time)

- Theme 2: Innovation Through Broadening Participation in STEM
  - Session 4: Utilizing a Comprehensive Approach to Broaden Participation of Groups Underrepresented in STEM
  - Session 5: Advancing the Use of Translational Science for the Purpose of Broadening Participation Through K–12 STEM Education
  - Session 6: Encouraging Authentic and Useable Assessment for Broadening Participation
- Discussion with NSF Director and Chief Operating Officer and Closing Remarks

Dated: September 29, 2021.

Crystal Robinson,

Committee Management Officer.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2021–0183]

Monthly Notice; Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving No Significant Hazards Considerations

AGENCY: Nuclear Regulatory Commission.

ACTION: Monthly notice.

SUMMARY: Pursuant to section 189.a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the U.S. Nuclear Regulatory Commission (NRC) is publishing this regular monthly notice. The Act requires the Commission to publish notice of any amendments issued, or proposed to be issued, and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves no significant hazards consideration (NSHC), notwithstanding the pendency before the Commission of a request for a hearing from any person. This monthly notice includes all amendments issued, or proposed to be issued, from August 20, 2021, to September 16, 2021. The last monthly notice was published on September 7, 2021.

DATES: Comments must be filed by November 4, 2021. A request for a hearing or petitions for leave to intervene must be filed by December 6, 2021.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal Rulemaking Website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0183. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov*. For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory

Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Kathy Entz, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–2464, email: *Kathleen.Entz@nrc.gov*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2021–0183, facility name, unit number(s), docket number(s), application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0183.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.
- *Attention:* The PDR, where you may examine and order copies of public documents, is currently closed. You may submit your request to the PDR via email at *pdr.resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking Website (*https://www.regulations.gov*). Please include Docket ID NRC–2021–0183, facility name, unit number(s), docket number(s), application date, and subject, in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses and Proposed No Significant Hazards Consideration Determination

For the facility-specific amendment requests shown in this document, the Commission finds that the licensees' analyses provided, consistent with section 50.91 of title 10 of *the Code of Federal Regulations* (10 CFR), ''Notice for public comment; State consultation,'' are sufficient to support the proposed determinations that these amendment requests involve NSHC. Under the Commission's regulations in 10 CFR 50.92, ''Issuance of amendment,'' operation of the facilities in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission is seeking public comments on these proposed determinations. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determinations.

Normally, the Commission will not issue the amendments until the expiration of 60 days after the date of publication of this notice. The Commission may issue any of these license amendments before expiration of the 60-day period provided that its final determination is that the amendment involves NSHC. In addition, the Commission may issue any of these amendments prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example in derating or shutdown of the facility. If the Commission takes action on any of these amendments prior to the expiration of either the comment period or the notice period, it will publish in the **Federal Register** a notice of issuance. If the Commission makes a final NSHC determination for any of these amendments, any hearing will take place after issuance. The Commission expects that the need to take action on any amendment before 60 days have elapsed will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any persons (petitioner) whose interest may be affected by any of these actions may file a request for a hearing and petition for leave to intervene (petition) with respect to that action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. The NRC's regulations are accessible electronically from the NRC Library on the NRC's website at *https://www.nrc.gov/reading-rm/doc-collections/cfr/.* If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

As required by 10 CFR 2.309(d) the petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements for standing: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest.

In accordance with 10 CFR 2.309(f), the petition must also set forth the specific contentions that the petitioner seeks to have litigated in the proceeding. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner must provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion that support the contention and on which the petitioner intends to rely

in proving the contention at the hearing. The petitioner must also provide references to the specific sources and documents on which the petitioner intends to rely to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant or licensee on a material issue of law or fact. Contentions must be limited to matters within the scope of the proceeding. The contention must be one that, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy the requirements at 10 CFR 2.309(f) with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene. Parties have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that party's admitted contentions, including the opportunity to present evidence, consistent with the NRC's regulations, policies, and procedures.

Petitions must be filed no later than 60 days from the date of publication of this notice. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii). The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document.

If a hearing is requested, and the Commission has not made a final determination on the issue of NSHC, the Commission will make a final determination on the issue of NSHC. The final determination will serve to establish when the hearing is held. If the final determination is that the amendment request involves NSHC, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1). The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission no later than 60 days from the date of publication of this notice. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document, and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

If a petition is submitted, any person who is not a party to the proceeding and is not affiliated with or represented by a party may, at the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of his or her position on the issues but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as further discussed, is granted. Detailed guidance on electronic submissions is located in the Guidance for Electronic Submissions to the NRC (ADAMS Accession No. ML13031A056) and on the NRC website at *https://www.nrc.gov/site-help/e-submittals.html.*

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals/getting-started.html.* After a digital ID certificate is obtained and a docket created, the participant must submit adjudicatory documents in Portable Document Format. Guidance on submissions is available on the NRC's public website at *https://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. Eastern Time on the due date. Upon receipt of a transmission, the E-Filing system timestamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-

free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., Eastern Time, Monday through Friday, excluding government holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

The following table provides the plant name, docket number, date of application, ADAMS accession number, and location in the application of the licensees' proposed NSHC determinations. For further details with respect to these license amendment applications, see the applications for amendment, which are available for public inspection in ADAMS. For additional direction on accessing information related to this document, see the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT REQUEST(S)

Duke Energy Progress, LLC; Shearon Harris Nuclear Power Plant, Unit 1; Wake and Chatham Counties, NC	
Docket No(s)	50–400.
Application date	June 7, 2021.
ADAMS Accession No	ML21158A131.
Location in Application of NSHC	Pages 3–4 of Enclosure.
Brief Description of Amendment(s)	The proposed amendment would revise the technical specifications to reflect the transition of licensee-controlled plant procedure PLP–106, ''Technical Specification Equipment List Program,'' to a licensee-controlled Technical Requirements Manual.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	David Cummings, Associate General Counsel, Mail Code DEC45, 550 South Tryon Street, Charlotte NC 28202.
NRC Project Manager, Telephone Number	Michael Mahoney, 301–415–3867.
Exelon Generation Company, LLC; Braidwood Station, Units 1 and 2, Will County, IL; Byron Station, Units 1 and 2, Ogle County, IL; Exelon Generation Company, LLC; Clinton Power Station, Unit 1; DeWitt County, IL	
Docket No(s)	50–454, 50–455, 50–456, 50–457, 50–461.
Application date	July 30, 2021.
ADAMS Accession No	ML21211A585.
Location in Application of NSHC	Pages 3–5 of Attachment 1.
Brief Description of Amendment(s)	The proposed technical specification (TS) changes add explanatory text to the Safety Function Determination Program in TS 5.5.15 (Braidwood Station and Byron Station) and TS 5.5.10 (Clinton Power Station) clarifying the ''appropriate LCO for loss of function,'' and that consideration does not have to be made for a loss of power in determining loss of function.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Tamra Domeyer, Associate General Counsel, Exelon Generation Company, LLC, 4300 Winfield Road, Warrenville, IL 60555.
NRC Project Manager, Telephone Number	Joel Wiebe, 301–415–6606.
Nebraska Public Power District; Cooper Nuclear Station; Nemaha County, NE	
Docket No(s)	50–298.
Application date	July 20, 2021.
ADAMS Accession No	ML21202A200.
Location in Application of NSHC	Pages 7–9 of Attachment 1.
Brief Description of Amendment(s)	The proposed amendment would revise Cooper Nuclear Station Technical Specifications Section 5.5.12, ''Primary Containment Leakage Rate Testing Program,'' to include an exception to the 24-calendar month interval exclusion of certain pathways during 10 CFR Part 50, Appendix J, Type A testing. Specifically, the amendment would extend the allowance to not vent and drain pathways during the Type A test, which have been Type B or C tested within the previous 24 calendar months of the Type A test, from 24 calendar months to 30 calendar months.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	John C. McClure, Nebraska Public Power District, P.O. Box 499, Columbus, NE 68602–0499.
NRC Project Manager, Telephone Number	Thomas Wengert, 301–415–4037.

LICENSE AMENDMENT REQUEST(S)—Continued

Northern States Power Company—Minnesota; Prairie Island Nuclear Generating Plant, Units 1 and 2; Goodhue County, MN	
Docket No(s)	50–282, 50–306.
Application date	August 6, 2021.
ADAMS Accession No	ML21218A093.
Location in Application of NSHC	Pages 18–21 of Enclosure 1.
Brief Description of Amendment(s)	The amendments request changes to the Prairie Island Nuclear Generating Plant, Units 1 and 2 (PINGP), licensing bases to implement a 24-month operating cycle. The amendment proposes to change the PINGP technical specifications (TSs) to support the change in the maximum surveillance intervals from 24 months to 30 months including changes to one TS allowable value in TS Table 3.3.2–1 and changes to TS 5.5.2 and 5.5.17. The proposed changes to TS 5.5.2 would implement TS Task Force (TSTF) Traveler 299 (TSTF–299) ''Administrative Controls Program 5.5.2.b Test Interval and Exceptions.'' The proposed changes to TS 5.5.17 documents the use of Generic Letter 91–04 ''Changes in Technical Specification Surveillance Intervals to Accommodate a 24-Month Fuel Cycle,'' to increase the surveillance requirement intervals.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Peter M. Glass, Assistant General Counsel, Xcel Energy, 414 Nicollet Mall—401–8, Minneapolis, MN 55401.
NRC Project Manager, Telephone Number	Robert Kuntz, 301–415–3733.
Southern Nuclear Operating Company, Inc.; Joseph M. Farley Nuclear Plant, Units 1 and 2; Houston County, AL	
Docket No(s)	50–348, 50–364.
Application date	July 29, 2021.
ADAMS Accession No	ML21210A242.
Location in Application of NSHC	Page E–10 and E–11 of Enclosure.
Brief Description of Amendment(s)	The proposed amendment would modify the licensing basis of the Joseph M. Farley Nuclear Plant, Units 1 and 2, by allowing the permanent removal of the encapsulation vessels around the first isolation valves in the recirculation suction lines for the Containment Spray and Residual Heat Removal/Low Head Safety Injection systems.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Millicent Ronnlund, Vice President and General Counsel, Southern Nuclear Operating Co., Inc., P.O. Box 1295, Birmingham, AL 35201–1295.
NRC Project Manager, Telephone Number	Stephanie Devlin-Gill, 301–415–5301.
STP Nuclear Operating Company; South Texas Project, Units 1 and 2; Matagorda County, TX	
Docket No(s)	50–498, 50–499.
Application date	August 10, 2021, as supplemented by letter dated September 9, 2021.
ADAMS Accession No	ML21222A227, ML21252A758.
Location in Application of NSHC	Pages 2–3 of the Enclosure.
Brief Description of Amendment(s)	The amendments would adopt Technical Specifications Task Force (TSTF) Traveler TSTF–577, Revision 1, ''Revised Frequencies for Steam Generator Tube Inspections.'' The amendments would modify the technical specification requirements related to steam generator tube inspections and reporting based on operating history.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Kym Harshaw, Vice President and General Counsel, STP Nuclear Operating Company, P.O. Box 289, Wadsworth, TX 77483.
NRC Project Manager, Telephone Number	Dennis Galvin, 301–415–6256.
Tennessee Valley Authority; Sequoyah Nuclear Plant, Units 1 and 2; Hamilton County, TN	
Docket No(s)	50–327, 50–328.
Application date	August 5, 2021.
ADAMS Accession No	ML21217A174.
Location in Application of NSHC	Pages 6–7 of Attachment 1.
Brief Description of Amendment(s)	The proposed amendments would modify technical specification requirements to permit the use of risk-informed completion times in accordance with Technical Specifications Task Force (TSTF) Traveler, TSTF–505, Revision 2, ''Provide Risk-Informed Extended Completion Times—RITSTF [Risk-Informed TSTF] Initiative 4b,'' dated July 2, 2018 (ADAMS Accession No. ML18183A493).
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	David Fountain, Executive VP and General Counsel, Tennessee Valley Authority, 400 West Summit Hill Drive, WT 6A, Knoxville, TN 37902.
NRC Project Manager, Telephone Number	Perry Buckberg, 301–415–1383.

III. Notice of Issuance of Amendments to Facility Operating Licenses and Combined Licenses

During the period since publication of the last monthly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

A notice of consideration of issuance of amendment to facility operating license or combined license, as applicable, proposed NSHC determination, and opportunity for a hearing in connection with these actions, was published in the **Federal Register** as indicated in the safety evaluation for each amendment.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22(b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.22(b) and has made a determination based on that assessment, it is so indicated in the safety evaluation for the amendment.

For further details with respect to each action, see the amendment and associated documents such as the Commission's letter and safety evaluation, which may be obtained using the ADAMS accession numbers indicated in the following table. The safety evaluation will provide the ADAMS accession numbers for the application for amendment and the **Federal Register** citation for any environmental assessment. All of these items can be accessed as described in the ''Obtaining Information and Submitting Comments'' section of this document.

LICENSE AMENDMENT ISSUANCE(S)

Dominion Energy Nuclear Connecticut, Inc.; Millstone Power Station, Unit No. 2; New London County, CT	
Docket No(s)	50–336.
Amendment Date	September 9, 2021.
ADAMS Accession No	ML21222A230.
Amendment No(s)	343.
Brief Description of Amendment(s)	The amendment revised the Millstone 2 Technical Specification (TS) Section 6.26, ''Steam Generator (SG) Program,'' and the SG tube inspection reporting requirements in TS Section 6.9.1.9, ''Steam Generator Tube Inspection Report,'' and made several editorial changes to the Millstone 2 TSs.
Public Comments Received as to Proposed NSHC (Yes/No).	No.
Duke Energy Carolinas, LLC; Catawba Nuclear Station, Units 1 and 2; York County, SC; Duke Energy Carolinas, LLC; McGuire Nuclear Station, Units 1 and 2; Mecklenburg County, NC; Duke Energy Carolinas, LLC; Oconee Nuclear Station, Units 1, 2, and 3; Oconee County, SC; Duke Energy Progress, LLC; Brunswick Steam Electric Plant, Units 1 and 2; Brunswick County, NC; Duke Energy Progress, LLC; H. B. Robinson Steam Electric Plant, Unit No. 2; Darlington County, SC; Duke Energy Progress, LLC; Shearon Harris Nuclear Power Plant, Unit 1; Wake and Chatham Counties, NC.	
Docket No(s)	50–413, 50–414, 50–369, 50–370, 50–269, 50–270, 50–287, 50–325, 50–324, 50–261, 50–400.
Amendment Date	August 26, 2021.
ADAMS Accession No	ML21155A213.
Amendment No(s)	309 to NPF 35, 305 to NPF 52, No. 319 to NPF 9, 298 to NPF 17, 422 to DPR 38, 424 to DPR 47, 423 to DPR 55, 306 to DPR 71, 334 to DPR 62, 186 to NPF 63, and 270 to DPR 23.
Brief Description of Amendment(s)	These amendments are issued to revise and replace the site-specific emergency plans of the seven plants with the Duke Energy Common Emergency Plan (DECEP) with site-specific annexes. The DECEP was developed using the guidance in NUREG 0654/FEMA REP–1, ''Criteria for Preparation and Evaluation of Radiological Emergency Response Plans and Preparedness in Support of Nuclear Power Plants,'' Revision 2.
Public Comments Received as to Proposed NSHC (Yes/No).	No.
Duke Energy Progress, LLC; Brunswick Steam Electric Plant, Units 1 and 2; Brunswick County, NC.	
Docket No(s)	50–325, 50–324.
Amendment Date	September 29, 2020.
ADAMS Accession No	ML20269A305.
Amendment No(s)	301 (Unit 1) and 329 (Unit 2).
Brief Description of Amendment(s)	The amendments revised the technical specification safety limit on minimum critical power ratio to reduce the need for cycle-specific changes to the value while still meeting the regulatory requirement for a safety limit.
Public Comments Received as to Proposed NSHC (Yes/No).	No
Entergy Operations, Inc.; Waterford Steam Electric Station, Unit 3; St. Charles Parish, LA	
Docket No(s)	50–382.
Amendment Date	August 24, 2021.
ADAMS Accession No	ML21131A243.
Amendment No(s)	260.

LICENSE AMENDMENT ISSUANCE(S)—Continued

Brief Description of Amendment(s)	The amendment revised multiple Waterford Steam Electric Station, Unit 3, technical specifications in order for the licensee to implement a modification to the existing digital microcomputers of the core protection calculator and control element assembly calculator systems.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Holtec Pilgrim, LLC and Holtec Decommissioning International; Pilgrim Nuclear Power Station; Plymouth County, MA

Docket No(s)	50–293.
Amendment Date	August 5, 2021.
ADAMS Accession No	ML21217A175.
Amendment No(s)	255.
Brief Description of Amendment(s)	The amendment revised the license to reflect the requirements associated with the security changes set forth in the revised Pilgrim Security Plan, Training and Qualification Plan, and Safeguards Contingency Plan (the Plan) for the independent spent fuel storage installation (ISFSI) only configuration, upon the permanent removal of all spent fuel from the spent fuel pool as per 10 CFR 72.212(b)(9). The changes to the Pilgrim Plan reflect changes in the status of the nuclear power reactor based on certifications that the licensee has submitted under 10 CFR 50.82(a) for permanent cessation of power operations and permanent removal of fuel from the reactor vessel and has completed the transfer of all irradiated fuel to the on-site ISFSI. The implementation of the proposed changes is predicated upon the completion of the transfer of all spent fuel to dry storage in casks within the ISFSI.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Holtec Pilgrim, LLC and Holtec Decommissioning International; Pilgrim Nuclear Power Station; Plymouth County, MA

Docket No(s)	50–293.
Amendment Date	August 24, 2021.
ADAMS Accession No	ML21203A048.
Amendment No(s)	256.
Brief Description of Amendment(s)	The NRC has issued Amendment No. 256 to Renewed Facility Operating License No. DPR–35 for the Pilgrim Nuclear Power Station (Pilgrim, the licensee) Permanently Defueled Technical Specifications in response to Holtec Decommissioning International's application dated March 17, 2021 (ADAMS Accession No. ML21076A404), and supplemental letter dated May 28, 2021, ADAMS Accession No. ML21148A199). These changes reflect the removal of all spent nuclear fuel from the spent fuel pool and its transfer to dry cask storage within an on-site independent spent fuel storage installation (ISFSI). These changes will more fully reflect the permanently shutdown status of the decommissioning facility, as well as the reduced scope of structures, systems, and components necessary to ensure plant safety now that all spent fuel has been permanently moved to the Pilgrim ISFSI (new ISFSI or ISFSI II), an activity which is scheduled to be completed in mid-November 2021.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Pacific Gas and Electric Company; Diablo Canyon Power Plant, Units 1 and 2; San Luis Obispo County, CA

Docket No(s)	50–275, 50–323.
Amendment Date	September 2, 2021.
ADAMS Accession No	ML21160A174.
Amendment No(s)	239 (Unit 1) and 240 (Unit 2).
Brief Description of Amendment(s)	The amendments revised Technical Specification 3.2.1, ''Heat Flux Hot Channel Factor (FQ(Z)),'' to implement methodology from licensing topical report WCAP 17661, Revision 1, ''Improved RAOC [Relaxed Axial Offset Control] and CAOC [Constant Axial Offset Control] FQ Surveillance Technical Specifications.''
Public Comments Received as to Proposed NSHC (Yes/No).	No.

PSEG Nuclear LLC; Salem Nuclear Generating Station, Unit Nos. 1 and 2; Salem County, NJ

Docket No(s)	50–272, 50–311.
Amendment Date	September 3, 2021.
ADAMS Accession No	ML21202A078.
Amendment No(s)	338 (Unit No. 1) and 320 (Unit No. 2).
Brief Description of Amendment(s)	These amendments adopt Technical Specifications Task Force (TSTF) Traveler TSTF–577, ''Revised Frequencies for Steam Generator Tube Inspections,'' which is an approved change to the standard technical specifications, into the Salem Nuclear Generating Station, Unit Nos. 1 and 2, technical specifications.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Tennessee Valley Authority; Browns Ferry Nuclear Plant, Units 1, 2, and 3; Limestone County, AL

Docket No(s)	50–259, 50–260, 50–296.

LICENSE AMENDMENT ISSUANCE(S)—Continued

Amendment Date	August 30, 2021.
ADAMS Accession No	ML21214A139.
Amendment No(s)	318, 341, and 301.
Brief Description of Amendment(s)	The amendments modified Technical Specification 3.8.6, ''Battery Cell Parameters,'' to clarify the operability requirements for the Unit, Shutdown Board, and Diesel Generator batteries.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Wolf Creek Nuclear Operating Corporation; Wolf Creek Generating Station, Unit 1; Coffey County, KS

Docket No(s)	50–482.
Amendment Date	September 3, 2021.
ADAMS Accession No	ML21210A247.
Amendment No(s)	230.
Brief Description of Amendment(s)	The amendment revised Technical Specification 3.6.3, ''Containment Isolation Valves,'' Condition D, to allow the use of a blind flange for Required Action D.1. In addition, the amendment changed Surveillance Requirement 3.6.3.1 to allow the use of a blind flange.
Public Comments Received as to Proposed NSHC (Yes/No).	No.

Dated: September 27, 2021.

For the Nuclear Regulatory Commission.

Applications and Amendments to Facility Operating Licenses and Combined Licenses Involving Proposed No Significant Hazards Considerations and Containing Sensitive Unclassified Non-Safeguards Information and Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information

AGENCY: Nuclear Regulatory Commission.

ACTION: License amendment request; notice of opportunity to comment, request a hearing, and petition for leave to intervene; order imposing procedures.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) received and is considering approval of two amendment requests. The amendment requests are for Donald C. Cook Nuclear Plant, Unit 2, and Monticello Nuclear Generating Plant. For each amendment request, the NRC proposes to determine that they involve no significant hazards consideration (NSHC). Because each amendment request contains sensitive unclassified non-safeguards information (SUNSI), an order imposes procedures to obtain access to SUNSI for contention preparation by persons who file a hearing request or petition for leave to intervene.

DATES: Comments must be filed by November 4, 2021. A request for a hearing or petitions for leave to intervene must be filed by December 6, 2021. Any potential party as defined in section 2.4 of title 10 of the *Code of Federal Regulations* (10 CFR) who believes access to SUNSI is necessary to respond to this notice must request document access by October 15, 2021.

ADDRESSES: You may submit comments by any of the following methods; however, the NRC encourages electronic comment submission through the Federal Rulemaking website:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0176. Address questions about Docket IDs in *Regulations.gov* to Stacy Schumann; telephone: 301–415–0624; email: *Stacy.Schumann@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Office of Administration, Mail Stop: TWFN–7–A60M, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, ATTN: Program Management, Announcements and Editing Staff.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Karen Zeleznock, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, telephone: 301–415–1118, email: *Karen.Zeleznock@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2021–0176, facility name, unit number(s), docket number(s), application date, and subject when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2021–0176.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''Begin Web-based ADAMS Search.'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in this document.
- *Attention:* The PDR, where you may examine and order copies of public documents, is currently closed. You may submit your request to the PDR via email at *pdr.resource@nrc.gov* or call 1–800–397–4209 or 301–415–4737, between 8:00 a.m. and 4:00 p.m. Eastern Time (ET), Monday through Friday, except Federal holidays.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website (*https://www.regulations.gov*). Please include Docket ID NRC–2021–0176, facility

name, unit number(s), docket number(s), application date, and subject, in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *https://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Pursuant to Section 189a.(2) of the Atomic Energy Act of 1954, as amended (the Act), the NRC is publishing this notice. The Act requires the Commission to publish notice of any amendments issued or proposed to be issued and grants the Commission the authority to issue and make immediately effective any amendment to an operating license or combined license, as applicable, upon a determination by the Commission that such amendment involves NSHC, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This notice includes notices of amendments containing SUNSI.

III. Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Combined Licenses, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The Commission has made a proposed determination that the following amendment requests involve NSHC. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, or (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown in this document.

The Commission is seeking public comments on these proposed determinations. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determinations.

Normally, the Commission will not issue the amendments until the expiration of 60 days after the date of publication of this notice. The Commission may issue any of these license amendments before expiration of the 60-day period provided that its final determination is that the amendment involves no significant hazards consideration. In addition, the Commission may issue any of these amendments prior to the expiration of the 30-day comment period if circumstances change during the 30-day comment period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility. If the Commission takes action on any of these amendments prior to the expiration of either the comment period or the notice period, it will publish a notice of issuance in the **Federal Register**. If the Commission makes a final no significant hazards consideration determination for any of these amendments, any hearing will take place after issuance. The Commission expects that the need to take this action will occur very infrequently.

A. Opportunity To Request a Hearing and Petition for Leave To Intervene

Within 60 days after the date of publication of this notice, any person (petitioner) whose interest may be affected by any of these actions may file a request for a hearing and petition for leave to intervene (petition) with respect to that action. Petitions shall be filed in accordance with the Commission's ''Agency Rules of Practice and Procedure'' in 10 CFR part 2. Interested persons should consult a current copy of 10 CFR 2.309. The NRC's regulations are accessible electronically from the NRC Library on the NRC's website at *https://www.nrc.gov/reading-rm/doc-collections/cfr/*. If a petition is filed, the Commission or a presiding officer will rule on the petition and, if appropriate, a notice of a hearing will be issued.

As required by 10 CFR 2.309(d), the petition should specifically explain the reasons why intervention should be permitted with particular reference to the following general requirements for standing: (1) The name, address, and telephone number of the petitioner; (2) the nature of the petitioner's right to be made a party to the proceeding; (3) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (4) the possible effect of any decision or order which may be entered in the proceeding on the petitioner's interest.

In accordance with 10 CFR 2.309(f), the petition must also set forth the specific contentions that the petitioner seeks to have litigated in the proceeding. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner must provide a brief explanation of the bases for the contention and a concise statement of the alleged facts or expert opinion that support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to the specific sources and documents on which the petitioner intends to rely to support its position on the issue. The petition must include sufficient information to show that a genuine dispute exists with the applicant or licensee on a material issue of law or fact. Contentions must be limited to matters within the scope of the proceeding. The contention must be one that, if proven, would entitle the petitioner to relief. A petitioner who fails to satisfy the requirements at 10 CFR 2.309(f) with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene. Parties have the opportunity to participate fully in the conduct of the hearing with respect to resolution of that party's admitted contentions, including the opportunity to present evidence, consistent with the NRC's regulations, policies, and procedures.

Petitions must be filed no later than 60 days from the date of publication of this notice. Petitions and motions for leave to file new or amended contentions that are filed after the deadline will not be entertained absent a determination by the presiding officer that the filing demonstrates good cause by satisfying the three factors in 10 CFR 2.309(c)(1)(i) through (iii). The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document.

If a hearing is requested, and the Commission has not made a final determination on the issue of NSHC, the Commission will make a final determination on the issue of NSHC. The final determination will serve to

establish when the hearing is held. If the final determination is that the amendment request involves NSHC, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing would take place after issuance of the amendment. If the final determination is that the amendment request involves a significant hazards consideration, then any hearing held would take place before the issuance of the amendment unless the Commission finds an imminent danger to the health or safety of the public, in which case it will issue an appropriate order or rule under 10 CFR part 2.

A State, local governmental body, Federally recognized Indian Tribe, or agency thereof, may submit a petition to the Commission to participate as a party under 10 CFR 2.309(h)(1). The petition should state the nature and extent of the petitioner's interest in the proceeding. The petition should be submitted to the Commission no later than 60 days from the date of publication of this notice. The petition must be filed in accordance with the filing instructions in the ''Electronic Submissions (E-Filing)'' section of this document and should meet the requirements for petitions set forth in this section, except that under 10 CFR 2.309(h)(2) a State, local governmental body, or Federally recognized Indian Tribe, or agency thereof does not need to address the standing requirements in 10 CFR 2.309(d) if the facility is located within its boundaries. Alternatively, a State, local governmental body, Federally recognized Indian Tribe, or agency thereof may participate as a non-party under 10 CFR 2.315(c).

If a petition is submitted, any person who is not a party to the proceeding and is not affiliated with or represented by a party may, at the discretion of the presiding officer, be permitted to make a limited appearance pursuant to the provisions of 10 CFR 2.315(a). A person making a limited appearance may make an oral or written statement of his or her position on the issues but may not otherwise participate in the proceeding. A limited appearance may be made at any session of the hearing or at any prehearing conference, subject to the limits and conditions as may be imposed by the presiding officer. Details regarding the opportunity to make a limited appearance will be provided by the presiding officer if such sessions are scheduled.

B. Electronic Submissions (E-Filing)

All documents filed in NRC adjudicatory proceedings including documents filed by an interested State, local governmental body, Federally recognized Indian Tribe, or designated agency thereof that requests to participate under 10 CFR 2.315(c), must be filed in accordance with 10 CFR 2.302. The E-Filing process requires participants to submit and serve all adjudicatory documents over the internet, or in some cases, to mail copies on electronic storage media, unless an exemption permitting an alternative filing method, as discussed below, is granted. Detailed guidance on electronic submissions is located in the Guidance for Electronic Submissions to the NRC (ADAMS Accession No. ML13031A056) and on the NRC website at *https://www.nrc.gov/site-help/e-submittals.html.*

To comply with the procedural requirements of E-Filing, at least 10 days prior to the filing deadline, the participant should contact the Office of the Secretary by email at *hearing.docket@nrc.gov,* or by telephone at 301–415–1677, to (1) request a digital identification (ID) certificate, which allows the participant (or its counsel or representative) to digitally sign submissions and access the E-Filing system for any proceeding in which it is participating; and (2) advise the Secretary that the participant will be submitting a petition or other adjudicatory document (even in instances in which the participant, or its counsel or representative, already holds an NRC-issued digital ID certificate). Based upon this information, the Secretary will establish an electronic docket for the proceeding if the Secretary has not already established an electronic docket.

Information about applying for a digital ID certificate is available on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals/getting-started.html.* After a digital ID certificate is obtained and a docket created, the participant must submit adjudicatory documents in Portable Document Format. Guidance on submissions is available on the NRC's public website at *https://www.nrc.gov/site-help/electronic-sub-ref-mat.html.* A filing is considered complete at the time the document is submitted through the NRC's E-Filing system. To be timely, an electronic filing must be submitted to the E-Filing system no later than 11:59 p.m. (ET) on the due date. Upon receipt of a transmission, the E-Filing system timestamps the document and sends the submitter an email confirming receipt of the document. The E-Filing system also distributes an email that provides access to the document to the NRC's Office of the General Counsel and any others who have advised the Office of the Secretary that they wish to participate in the proceeding, so that the filer need not serve the document on those participants separately. Therefore, applicants and other participants (or their counsel or representative) must apply for and receive a digital ID certificate before adjudicatory documents are filed to obtain access to the documents via the E-Filing system.

A person filing electronically using the NRC's adjudicatory E-Filing system may seek assistance by contacting the NRC's Electronic Filing Help Desk through the ''Contact Us'' link located on the NRC's public website at *https://www.nrc.gov/site-help/e-submittals.html,* by email to *MSHD.Resource@nrc.gov,* or by a toll-free call at 1–866–672–7640. The NRC Electronic Filing Help Desk is available between 9 a.m. and 6 p.m., (ET), Monday through Friday, excluding government holidays.

Participants who believe that they have good cause for not submitting documents electronically must file an exemption request, in accordance with 10 CFR 2.302(g), with their initial paper filing stating why there is good cause for not filing electronically and requesting authorization to continue to submit documents in paper format. Such filings must be submitted in accordance with 10 CFR 2.302(b)–(d). Participants filing adjudicatory documents in this manner are responsible for serving their documents on all other participants. Participants granted an exemption under 10 CFR 2.302(g)(2) must still meet the electronic formatting requirement in 10 CFR 2.302(g)(1), unless the participant also seeks and is granted an exemption from 10 CFR 2.302(g)(1).

Documents submitted in adjudicatory proceedings will appear in the NRC's electronic hearing docket, which is publicly available at *https://adams.nrc.gov/ehd,* unless excluded pursuant to an order of the presiding officer. If you do not have an NRC-issued digital ID certificate as described above, click ''cancel'' when the link requests certificates and you will be automatically directed to the NRC's electronic hearing dockets where you will be able to access any publicly available documents in a particular hearing docket. Participants are requested not to include personal privacy information such as social security numbers, home addresses, or personal phone numbers in their filings unless an NRC regulation or other law requires submission of such information. With respect to copyrighted works, except for limited excerpts that serve the purpose of the

adjudicatory filings and would constitute a Fair Use application, participants should not include copyrighted materials in their submission.

Indiana Michigan Power Company; Donald C. Cook Nuclear Plant, Unit 2; Berrien County, MI	
Docket No(s)	50–316.
Application Date	June 15, 2021.
ADAMS Accession No	ML21210A278.
Location in Application of NSHC	Pages 23–25 of Enclosure 2.
Brief Description of Amendment(s)	The requested amendment would revise the reactor coolant system heatup and cooldown curves and low temperature overpressure protection (LTOP) requirements in Technical Specification (TS) 3.4.3 and 3.4.12, respectively. The proposed changes to the LTOP requirements in TS 3.4.12 will also require changes to be made to TS 3.4.6, 3.4.7, and 3.4.10.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Robert B. Haemer, Senior Nuclear Counsel, Indiana Michigan Power Company, One Cook Place, Bridgman, MI 49106.
NRC Project Manager, Telephone Number	Scott Wall, 301–415–2855.

Northern States Power Company; Monticello Nuclear Generating Plant; Wright County, MN	
Docket No(s)	50–263.
Application Date	July 29, 2021.
ADAMS Accession No	ML21211A594 (Package).
Location in Application of NSHC	Pages 15–17 of Enclosure.
Brief Description of Amendment(s)	The amendment would revise the Technical Specification 5.6.3 "Core Operating Limits Report (COLR)," to allow the application of advanced Framatome, Inc., methodologies for determining core operating limits in support of loading Framatome, Inc. ATRIUM 11 fuel type into the Monticello Nuclear Generating Plant core and to incorporate a new long-term reactor stability solution.
Proposed Determination	NSHC.
Name of Attorney for Licensee, Mailing Address	Peter M. Glass, Assistant General Counsel, Xcel Energy, 414 Nicollet Mall—401–8, Minneapolis, MN 55401.
NRC Project Manager, Telephone Number	Robert Kuntz, 301–415–3733

Order Imposing Procedures for Access to Sensitive Unclassified Non-Safeguards Information for Contention Preparation

Indiana Michigan Power Company; Donald C. Cook Nuclear Plant, Unit 2; Berrien County, MI

Northern States Power Company; Monticello Nuclear Generating Plant; Wright County, MN

A. This Order contains instructions regarding how potential parties to this proceeding may request access to documents containing SUNSI.

B. Within 10 days after publication of this notice of hearing and opportunity to petition for leave to intervene, any potential party who believes access to SUNSI is necessary to respond to this notice may request access to SUNSI. A ''potential party'' is any person who intends to participate as a party by demonstrating standing and filing an admissible contention under 10 CFR 2.309. Requests for access to SUNSI submitted later than 10 days after publication of this notice will not be considered absent a showing of good cause for the late filing, addressing why the request could not have been filed earlier.

C. The requestor shall submit a letter requesting permission to access SUNSI to the Office of the Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Attention: Rulemakings and Adjudications Staff, and provide a copy to the Deputy General Counsel for Hearings and Administration, Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. The expedited delivery or courier mail address for both offices is: U.S. Nuclear Regulatory Commission, 11555 Rockville Pike, Rockville, Maryland 20852. The email address for the Office of the Secretary and the Office of the General Counsel are *Hearing.Docket@nrc.gov* and *RidsOgcMailCenter.Resource@nrc.gov,* respectively.[1] The request must include the following information:

(1) A description of the licensing action with a citation to this **Federal Register** notice;

(2) The name and address of the potential party and a description of the potential party's particularized interest that could be harmed by the action identified in C.(1); and

(3) The identity of the individual or entity requesting access to SUNSI and the requestor's basis for the need for the information in order to meaningfully participate in this adjudicatory proceeding. In particular, the request must explain why publicly available versions of the information requested would not be sufficient to provide the basis and specificity for a proffered contention.

D. Based on an evaluation of the information submitted under paragraph C.(3) the NRC staff will determine within 10 days of receipt of the request whether:

(1) There is a reasonable basis to believe the petitioner is likely to establish standing to participate in this NRC proceeding; and

(2) The requestor has established a legitimate need for access to SUNSI.

E. If the NRC staff determines that the requestor satisfies both D.(1) and D.(2) above, the NRC staff will notify the requestor in writing that access to SUNSI has been granted. The written notification will contain instructions on how the requestor may obtain copies of the requested documents, and any other conditions that may apply to access to those documents. These conditions may include, but are not limited to, the signing of a Non-Disclosure Agreement

[1] While a request for hearing or petition to intervene in this proceeding must comply with the filing requirements of the NRC's ''E-Filing Rule,'' the initial request to access SUNSI under these procedures should be submitted as described in this paragraph.

or Affidavit, or Protective Order [2] setting forth terms and conditions to prevent the unauthorized or inadvertent disclosure of SUNSI by each individual who will be granted access to SUNSI.

F. Filing of Contentions. Any contentions in these proceedings that are based upon the information received as a result of the request made for SUNSI must be filed by the requestor no later than 25 days after receipt of (or access to) that information. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of hearing or opportunity for hearing), the petitioner may file its SUNSI contentions by that later deadline.

G. Review of Denials of Access.

(1) If the request for access to SUNSI is denied by the NRC staff after a determination on standing and requisite need, the NRC staff shall immediately notify the requestor in writing, briefly stating the reason or reasons for the denial.

(2) The requestor may challenge the NRC staff's adverse determination by filing a challenge within 5 days of receipt of that determination with: (a) The presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if he or she is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

(3) Further appeals of decisions under this paragraph must be made pursuant to 10 CFR 2.311.

H. Review of Grants of Access. A party other than the requestor may challenge an NRC staff determination granting access to SUNSI whose release would harm that party's interest independent of the proceeding. Such a challenge must be filed within 5 days of the notification by the NRC staff of its grant of access and must be filed with: (a) The presiding officer designated in this proceeding; (b) if no presiding officer has been appointed, the Chief Administrative Judge, or if he or she is unavailable, another administrative judge, or an Administrative Law Judge with jurisdiction pursuant to 10 CFR 2.318(a); or (c) if another officer has been designated to rule on information access issues, with that officer.

If challenges to the NRC staff determinations are filed, these procedures give way to the normal process for litigating disputes concerning access to information. The availability of interlocutory review by the Commission of orders ruling on such NRC staff determinations (whether granting or denying access) is governed by 10 CFR 2.311.[3]

I. The Commission expects that the NRC staff and presiding officers (and any other reviewing officers) will consider and resolve requests for access to SUNSI, and motions for protective orders, in a timely fashion in order to minimize any unnecessary delays in identifying those petitioners who have standing and who have propounded contentions meeting the specificity and basis requirements in 10 CFR part 2. The attachment to this Order summarizes the general target schedule for processing and resolving requests under these procedures.

It is so ordered.

Dated: September 21, 2021.

For the Nuclear Regulatory Commission.

Annette L. Vietti-Cook,

Secretary of the Commission.

ATTACHMENT 1—GENERAL TARGET SCHEDULE FOR PROCESSING AND RESOLVING REQUESTS FOR ACCESS TO SENSITIVE UNCLASSIFIED NON-SAFEGUARDS INFORMATION IN THIS PROCEEDING

Day	Event/activity
0	Publication of **Federal Register** notice of hearing and opportunity to petition for leave to intervene, including order with instructions for access requests.
10	Deadline for submitting requests for access to Sensitive Unclassified Non-Safeguards Information (SUNSI) with information: Supporting the standing of a potential party identified by name and address; describing the need for the information in order for the potential party to participate meaningfully in an adjudicatory proceeding.
60	Deadline for submitting petition for intervention containing: (i) Demonstration of standing; and (ii) all contentions whose formulation does not require access to SUNSI (+25 Answers to petition for intervention; +7 petitioner/requestor reply).
20	U.S. Nuclear Regulatory Commission (NRC) staff informs the requestor of the staff's determination whether the request for access provides a reasonable basis to believe standing can be established and shows need for SUNSI. (NRC staff also informs any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information.) If NRC staff makes the finding of need for SUNSI and likelihood of standing, NRC staff begins document processing (preparation of redactions or review of redacted documents).
25	If NRC staff finds no ''need'' or no likelihood of standing, the deadline for petitioner/requestor to file a motion seeking a ruling to reverse the NRC staff's denial of access; NRC staff files copy of access determination with the presiding officer (or Chief Administrative Judge or other designated officer, as appropriate). If NRC staff finds ''need'' for SUNSI, the deadline for any party to the proceeding whose interest independent of the proceeding would be harmed by the release of the information to file a motion seeking a ruling to reverse the NRC staff's grant of access.
30	Deadline for NRC staff reply to motions to reverse NRC staff determination(s).
40	(Receipt +30) If NRC staff finds standing and need for SUNSI, deadline for NRC staff to complete information processing and file motion for Protective Order and draft Non-Disclosure Affidavit. Deadline for applicant/licensee to file Non-Disclosure Agreement for SUNSI.
A	If access granted: issuance of presiding officer or other designated officer decision on motion for protective order for access to sensitive information (including schedule for providing access and submission of contentions) or decision reversing a final adverse determination by the NRC staff.
A + 3	Deadline for filing executed Non-Disclosure Affidavits. Access provided to SUNSI consistent with decision issuing the protective order.

[2] Any motion for Protective Order or draft Non-Disclosure Affidavit or Agreement for SUNSI must be filed with the presiding officer or the Chief Administrative Judge if the presiding officer has not yet been designated, within 30 days of the deadline for the receipt of the written access request.

[3] Requestors should note that the filing requirements of the NRC's E-Filing Rule (72 FR 49139; August 28, 2007, as amended at 77 FR 46562; August 3, 2012) apply to appeals of NRC staff determinations (because they must be served on a presiding officer or the Commission, as applicable), but not to the initial SUNSI request submitted to the NRC staff under these procedures.

ATTACHMENT 1—GENERAL TARGET SCHEDULE FOR PROCESSING AND RESOLVING REQUESTS FOR ACCESS TO SENSITIVE UNCLASSIFIED NON-SAFEGUARDS INFORMATION IN THIS PROCEEDING—Continued

Day	Event/activity
A + 28	Deadline for submission of contentions whose development depends upon access to SUNSI. However, if more than 25 days remain between the petitioner's receipt of (or access to) the information and the deadline for filing all other contentions (as established in the notice of opportunity to request a hearing and petition for leave to intervene), the petitioner may file its SUNSI contentions by that later deadline.
A + 53	(Contention receipt +25) Answers to contentions whose development depends upon access to SUNSI.
A + 60	(Answer receipt +7) Petitioner/Intervenor reply to answers.
>A + 60	Decision on contention admission.

[FR Doc. 2021–20848 Filed 10–4–21; 8:45 am]

BILLING CODE 7590–01–P

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2021–136 and CP2021–143]

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the Commission's consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* October 7, 2021.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request's acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service's request(s) can be accessed via the Commission's website (*http://www.prc.gov*). Non-public portions of the Postal Service's request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.[1]

The Commission invites comments on whether the Postal Service's request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3633, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s).:* MC2021–136 and CP2021–143; *Filing Title:* USPS Request to Add Priority Mail & First-Class Package Service Contract 203 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* September 29, 2021; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Matthew Ashford; *Comments Due:* October 7, 2021.

BILLING CODE 7710–FW–P

RAILROAD RETIREMENT BOARD

Privacy Act of 1974; System of Records; (Railroad Retirement Board—Office of Personnel Management)

AGENCY: Railroad Retirement Board (RRB).

ACTION: Renewal of computer-matching program.

SUMMARY: As required by the Privacy Act of 1974, as amended, the RRB is issuing public notice of its renewal of an ongoing computer-matching program with the Office of Personnel Management (OPM) that expired on March 1, 2019. The purpose of this notice is to advise individuals applying for or receiving benefits under the Railroad Retirement Act of the use made by RRB of this information obtained from OPM by means of a computer match. We will file a report of this computer-matching program with the Committee on Homeland Security and Governmental Affairs of the Senate; the Committee on Oversight and Government Reform of the House of Representatives; and the Office of Information and Regulatory Affairs, Office of Management and Budget (OMB).

DATES: This matching program will take effect November 4, 2021. The matching program will continue for 18 months after the effective date and may be extended for an additional 12 months, if the conditions specified in 5 U.S.C. 552a(o)(2)(D) have been met, with an expiration date of April 1, 2024.

ADDRESSES: Interested parties may comment on this publication by writing to Ms. Stephanie Hillyard, Secretary to the Board, Railroad Retirement Board,

844 North Rush Street, Chicago, Illinois 60611–1275.

FOR FURTHER INFORMATION CONTACT: Mr. Timothy Grant, Associate Chief Information Officer, Railroad Retirement Board, 844 North Rush Street, Chicago, Illinois 60611–2092, telephone 312–751–4869 or email at *tim.grant@rrb.gov*.

SUPPLEMENTARY INFORMATION:

A. General

The Computer Matching and Privacy Protection Act of 1988, (Pub. L. 100–503), amended by the Privacy Act of 1974, (5 U.S.C. 552a) as amended, requires a Federal agency participating in a computer matching program to publish a notice in the **Federal Register** for all matching programs.

The Privacy Act, as amended, regulates the use of computer matching by Federal agencies when records contained in a Privacy Act System of Records are matched with other Federal, State, or local government records. It requires Federal agencies involved in computer matching programs to:

(1) Negotiate written agreements with the other agency or agencies participating in the matching programs;

(2) Obtain the approval of the matching agreement by the Data Integrity Boards (DIB) of the participating Federal agencies;

(3) Publish notice of the computer matching program in the **Federal Register**;

(4) Furnish detailed reports about matching programs to Congress and OMB;

(5) Notify applicants and beneficiaries that their records are subject to matching; and

(6) Verify match findings before reducing, suspending, terminating, or denying a person's benefits or payments. The last published notice for this matching program was March 1, 2018 (78 FR 70971).

B. RRB Computer Matches Subject to the Privacy Act

We have taken appropriate action to ensure that all of our computer matching programs comply with the requirements of the Privacy Act, as amended.

Notice of Computer Matching Program, RRB With the Office of Personnel Management (OPM)

Name of Participating Agencies: OPM and RRB.

Authority for Conducting the Matching Program: Sections 3(a)(1), 4(a)(1) and 4(f)(1) of the Railroad Retirement Act, as amended, 45 U.S.C. 231b(a)(1), 231c(a)(1) and 231c(f)(1) require that the RRB reduce the Railroad Retirement benefits of certain beneficiaries entitled to Railroad Retirement employee and/or spouse/widow benefits who are also entitled to a government pension based on their own non-covered earnings. We call this reduction a Public Service Pension (PSP) offset.

Section 224 of the Social Security Act, as amended, 42 U.S.C. 424a, provides for the reduction of disability benefits when the disabled worker is also entitled to a public disability benefit (PDB). We call this a PDB offset. A civil service disability benefit is considered a PDB. Section 224(h)(1) requires any Federal agency to provide RRB with information in its possession that RRB may require for the purposes of making a timely determination of the amount of reduction under section 224 of the Social Security Act. Pursuant to 5 U.S.C. Section 552a(b)(3) OPM has established routine uses to disclose the subject information to RRB.

Purpose of the Matching Program: The purpose of the match is to enable the RRB to (1) identify affected RRB annuitants who are in receipt of a Federal public pension benefit but who have not reported receipt of this benefit to the RRB, and (2) receive timely and accurate Federal public pension benefit information for affected RRB annuitants.

Categories of Individuals: Individuals receiving Federal public pensions or RRB annuities. *Categories of Records:* OPM will provide the RRB once a year via secure electronic file transfer, data extracted from its annuity and survivor master file of its Civil Service Retirement and Insurance Records. Normally on December of each year, OPM transmits to us approximately 2.5 million electronic records for matching. The records contain these data elements: Name, social security number, date of birth, civil service claim number, first potential month and year of eligibility for civil service benefits, first month, day, year of entitlement to civil service benefits, amount of current gross civil service benefits, and effective date (month, day, year) of civil service amount, and where applicable, civil service disability indicator, civil service FICA covered month indicator, and civil service total service months. The RRB will match the Social Security number, name, and date of birth contained in the OPM file against approximately the 1.2 million records in our files. For records that match, the RRB will extract the civil service payment information.

Systems of Records: The Privacy Act System of Records designation is OPM/Central-1, (Civil Service Retirement and Insurance Records), Published in the **Federal Register** on June 7, 2011 (76 FR 32997). The RRB Privacy Act System of Records is RRB–22, Railroad Retirement, Survivor, and Pensioner Benefit System, published in the **Federal Register** on May 15, 2015 (80 FR 28018).

Dated: September 30, 2021.

By authority of the Board.

Stephanie Hillyard,

Secretary to the Board.

BILLING CODE 7905–01–P

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

National Strategic Plan for Advanced Manufacturing; Request for Information

AGENCY: Office of Science and Technology Policy (OSTP).

ACTION: Notice of request for information (RFI).

SUMMARY: On behalf of the National Science and Technology Council (NSTC), Committee on Technology, Subcommittee on Advanced Manufacturing, OSTP requests input from all interested parties on the development of a National Strategic Plan for Advanced Manufacturing. Through this RFI, OSTP seeks input from the public, on ways to improve government coordination, and on long-term guidance for Federal programs and activities in support of United States manufacturing competitiveness, including: Advanced manufacturing research and development that will create jobs, grow the economy across multiple industrial sectors, strengthen national security, enhance sustainability, contribute to climate change challenges, and improve health care. The public input provided in response to this RFI will inform OSTP and NSTC as they work with Federal agencies and other stakeholders to develop the strategic plan.

DATES: Responses are due by December 17, 2021.

ADDRESSES: Responses should be submitted online at *https://docs.google.com/forms/d/e/1FAIpQLSeZdOIhLsiSLqqOWqP0MekJHA0EHlEDb_D6mjl-H5JghM0F2g/viewform.*

Instructions: Response to this RFI is voluntary. Respondents need not reply to all questions listed. Each individual or institution is requested to submit only one response. OSTP and/or NSTC may post responses to this RFI, without change, on a Federal website. OSTP, therefore, requests that no business proprietary information, copyrighted

information, or personally identifiable information be submitted in response to this RFI. Please note that the United States Government will not pay for response preparation, or for the use of any information contained in the response.

FOR FURTHER INFORMATION CONTACT: Said Jahanmir, *amnpo@nist.gov,* 202–819–5296.

SUPPLEMENTARY INFORMATION: The Consolidated and Further Continuing Appropriations Act 2015 (Pub. L. 113–235), incorporating the Revitalize American Manufacturing and Innovation Act of 2014, revised 42 U.S.C. 6622 to direct NSTC to develop and to update, in coordination with the National Economic Council, a strategic plan to improve government coordination and to provide long-term guidance for Federal programs and activities in support of United States manufacturing competitiveness, including advanced manufacturing research and development (R&D). The current National Strategic Plan for Advanced Manufacturing (''Plan'') was released on October 5, 2018 (*https://www.manufacturing.gov/news/announcements/2018/10/strategy-american-leadership-advanced-manufacturing*).

Advanced manufacturing is a family of activities that (1) depend on the use and coordination of information, automation, computation, software, sensing, and networking, and/or (2) make use of cutting-edge materials and emerging capabilities enabled by the physical and biological sciences, for example: Nanotechnology, chemistry, and biology. It involves both new ways to manufacture existing products, and the manufacture of new products emerging from new advanced technologies.

NSTC has commenced the development of an updated Plan to be released in 2022. Pursuant to 42 U.S.C. 6622, OSTP is soliciting public input through this RFI to obtain recommendations from a wide range of stakeholders, including representatives from diverse manufacturing companies, academia, other relevant organizations and institutions, and the general public. The public input provided in response to this RFI will inform OSTP and NSTC as they work with Federal agencies and other stakeholders to develop an updated revised Plan.

Questions To Inform Development of the Plan

OSTP seeks responses to the following questions to improve government coordination and to provide long-term guidance for Federal programs and activities in support of United States manufacturing competitiveness, including advanced manufacturing R&D.

1. Which emerging science and technology areas will be key to the next generation of advanced manufacturing for global competitiveness, sustainability, and environmental challenges?

2. What should be the near-term and long-term technology development R&D priorities for advanced manufacturing, the anticipated timeframe for achieving the objectives, and the metrics in assessing progress toward the objectives?

3. What are examples of technological, market, or business challenges that may best be addressed by public-private partnerships, and are likely to attract both participation and primary funding from industry?

4. How can Federal agencies and federally funded R&D centers supporting advanced manufacturing R&D facilitate the transfer of research results, intellectual property, and technology into commercialization and manufacturing for the benefit of society and ensure sustainability, national security, and economic security?

5. How would you assess the state of the domestic advanced manufacturing workforce in the U.S? How can Federal agencies and federally funded R&D centers develop, align, and strengthen all levels of advanced manufacturing education, training, and certification programs to ensure a high-quality, equitable, diverse, and inclusive workforce that meets the needs of the sector and drives new advanced manufacturing jobs into the future?

6. How can the Federal government assist in the development of regional public-private partnerships to achieve greater distribution of advanced manufacturing clusters or technology hubs, particularly in underserved regions of the country? What outreach and engagement strategies are most useful in promoting development in underserved regions of the country?

7. How do we assess the adequacy of the domestic advanced manufacturing supply chain and industrial base? How can Federal agencies assist small and medium sized manufacturing companies to adopt advanced technologies and to develop a robust and resilient manufacturing supply chain? What steps can these agencies take to promote the development and diffusion of technology that augments worker skills (rather than substituting for them), and ensures that manufacturing jobs are good jobs?

8. Are there useful models (at the international, national, state and/or local level) that should be expanded?

9. The current Strategy for American Leadership in Advanced Manufacturing (*https://www.manufacturing.gov/news/announcements/2018/10/strategy-american-leadership-advanced-manufacturing*) has three top-level goals, each with objectives and priorities: (1) Develop and transition new manufacturing technologies; (2) Educate, train, and connect the manufacturing workforce; and (3) Expand the capabilities of the domestic manufacturing supply chains. Are these goals appropriate for the next 4–5 years? Are there additional top-level goals to consider?

10. Is there any additional information related to advanced manufacturing in the United States, not requested above, that you believe should be considered?

Dated: September 30, 2021.

Stacy Murphy,

Operations Manager.

BILLING CODE 3270–FI–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–237, OMB Control No. 3235–0226]

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Extension:
Rule 10f–3

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget a request for extension and approval of the collections of information discussed below.

Section 10(f) of the Investment Company Act of 1940 (15 U.S.C. 80a) (the ''Act'') prohibits a registered investment company (''fund'') from purchasing any security during an underwriting or selling syndicate if the fund has certain affiliated relationships with a principal underwriter for the security. Congress enacted this provision in 1940 to protect funds and their shareholders by preventing underwriters from ''dumping''

unmarketable securities on affiliated funds.

Rule 10f–3 (17 CFR 270.10f–3) under the Act permits a fund to engage in a securities transaction that otherwise would violate Section 10(f) if, among other things: (i) The fund's directors have approved procedures for purchases made in reliance on the rule, regularly review fund purchases to determine whether they comply with these procedures, and approve necessary changes to the procedures; and (ii) a written record of each transaction effected under the rule is maintained for six years, the first two of which in an easily accessible place. The written record must state: (i) From whom the securities were acquired; (ii) the identity of the underwriting syndicate's members; (iii) the terms of the transactions; and (iv) the information or materials on which the fund's board of directors has determined that the purchases were made in compliance with procedures established by the board.

Rule 10f–3 also conditionally allows managed portions of fund portfolios to purchase securities offered in otherwise off-limits primary offerings. To qualify for this exemption, Rule 10f–3 requires that the subadviser that is advising the purchaser be contractually prohibited from providing investment advice to any other portion of the fund's portfolio and consulting with any other of the fund's advisers that is a principal underwriter or affiliated person of a principal underwriter concerning the fund's securities transactions.

These requirements provide a mechanism for fund boards to oversee compliance with the rule. The required recordkeeping facilitates the Commission staff's review of Rule 10f–3 transactions during routine fund inspections and, when necessary, in connection with enforcement actions.

The staff estimates that approximately 953 funds engage in at least one Rule 10f–3 transaction each year, for a total of 953 such transactions.[1] Rule 10f–3 requires that the purchasing fund create a written record of each transaction that includes, among other things, from whom the securities were purchased and the terms of the transaction. The staff estimates that it takes an average fund approximately 30 minutes per transaction and, in the aggregate, approximately 477 hours[2] for funds to comply with this portion of the rule.

The funds also must maintain and preserve these transactional records in accordance with the rule's recordkeeping requirement, and the staff estimates that it takes a fund approximately 20 minutes per transaction and, in the aggregate, approximately 318 hours[3] annually for the funds to comply with this portion of the rule.

In addition, fund boards must, no less than quarterly, examine each of these transactions to ensure that they comply with the fund's policies and procedures. The information or materials upon which the board relied to come to this determination also must be maintained and the staff estimates that it takes a fund 1 hour per quarter and, in the aggregate, approximately 3,812 hours[4] annually for the funds to comply with this rule requirement.

The staff estimates that reviewing and revising as needed written procedures for Rule 10f–3 transactions takes, on average for each fund, two hours of a compliance attorney's time per year.[5] Thus, annually, in the aggregate, the staff estimates that funds spend a total of approximately 1,906 hours[6] on monitoring and revising Rule 10f–3 procedures.

Based on an analysis of Form N–CEN filings, the staff estimates that approximately 146 new funds enter into subadvisory agreements each year.[7] The staff estimates that it will require approximately 0.75 hours to draft and execute additional clauses in subadvisory contracts in order for new funds and subadvisers to be able to rely on the exemptions in Rule 10f–3.[8] Assuming that all 146 funds that enter into new subadvisory contracts each year make the modification to their contract required by the rule, we estimate that the rule's contract modification requirement will result in 110 burden hours annually for new funds.[9]

The staff estimates, therefore, that Rule 10f–3 imposes an information collection burden of 6,623 hours.[10]

The collection of information required by Rule 10f–3 is necessary to obtain the benefits of the rule. Responses will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: September 29, 2021.

J. Matthew DeLesDernier,

Assistant Secretary.

[FR Doc. 2021–21590 Filed 10–4–21; 8:45 am]

BILLING CODE 8011–01–P

[1] These estimates are based on data from Form N–CEN filings with the Commission.

[2] This estimate is based on the following calculation: (0.5 hours × 953 = 477 hours).

[3] This estimate is based on the following calculations: (20 minutes × 953 transactions = 19,060 minutes; 19,060 minutes/60 = 318 hours).

[4] This estimate is based on the following calculation: (1 hour per quarter × 4 quarters × 953 funds = 3,812 hours).

[5] These averages take into account the fact that in most years, fund attorneys and boards spend little or no time modifying procedures and in other years, they spend significant time doing so.

[6] This estimate is based on the following calculation: (953 funds × 2 hours = 1,906 hours).

[7] Based on information in Form N–CEN filings, we estimate that approximately 139 new open-end funds and 7 new closed-end funds, or a total of 146 new funds enter into new subadvisory agreements each year (139 + 7 = 146 new funds). We understand that existing funds may also enter into new subadvisory agreements, but in many cases would benefit from having previously drafted Rule 10f–3 clauses in prior or existing subadvisory contracts.

[8] Because such clauses are identical to the clauses that a fund would need to insert in their subadvisory contracts to rely on Rules 12d3–1, 17a–10, and 17e–1, and because we believe that funds that use one such rule generally use all of these rules, we apportion this 3 hour time burden equally to all four rules. Therefore, we estimate that the burden allocated to Rule 10f–3 for this contract change would be 0.75 hours (3 hours ÷ 4 rules = 0.75 hours).

[9] These estimates are based on the following calculations: (0.75 hours × 146 portfolios = 110 burden hours).

[10] This estimate is based on the following calculation: (477 hours + 318 hours + 3,812 hours + 1,906 hours + 110 hours = 6,623 total burden hours).

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–562, OMB Control No. 3235–0624]

Submission for OMB Review; Comment Request

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Extension:
Regulation R, Rule 701

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995

(''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the previously approved collection of information provided for in Regulation R, Rule 701 (17 CFR 247.701) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Regulation R, Rule 701 requires a broker or dealer (as part of a written agreement between the bank and the broker or dealer) to notify the bank if the broker or dealer makes certain determinations regarding the financial status of the customer, a bank employee's statutory disqualification status, and compliance with suitability or sophistication standards.

The Commission estimates there are 3,560 registered brokers or dealers that would, on average, notify 1,000 banks approximately two times annually about a determination regarding a customer's high net worth or institutional status or suitability or sophistication standing as well as a bank employee's statutory disqualification status. Based on these estimates, the Commission anticipates that Regulation R, Rule 701 would result in brokers or dealers making approximately 2,000 notifications to banks per year. The Commission further estimates (based on the level of difficulty and complexity of the applicable activities) that a broker or dealer would spend approximately 15 minutes per notice to a bank. Therefore, the estimated total annual third party disclosure burden for the requirements in Regulation R, Rule 701 is 500 [1] hours for brokers or dealers.

The retention period for the recordkeeping requirement under Rule 17Ad–2(c), (d), and (h) is not less than two years following the date the notice is submitted. The recordkeeping requirement under this rule is mandatory to assist the Commission in monitoring transfer agents who fail to meet the minimum performance standards set by the Commission rule. This rule does not involve the collection of confidential information. Please note that a transfer agent is not required to file under the rule unless it does not meet the minimum performance standards for turnaround, processing or forwarding items received for transfer during a month.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: September 29, 2021.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93206; File No. SR–FINRA–2021–025]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Establish an Administration and Delivery Fee for the Municipal Advisor Principal Examination

September 30, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 27, 2021, the Financial Industry Regulatory Authority, Inc. (''FINRA'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by FINRA. FINRA has designated the proposed rule change as ''establishing or changing a due, fee or other charge'' under Section 19(b)(3)(A)(ii) of the Act [3] and Rule 19b–4(f)(2) thereunder,[4] which renders the proposal effective upon receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

FINRA is proposing to amend Section 4(c) of Schedule A to the FINRA By-Laws to establish an administration and delivery fee for the new Municipal Advisor Principal Examination (''Series 54 examination'').

Below is the text of the proposed rule change. Proposed new language is in italics; proposed deletions are in brackets.

* * * * *

Schedule A to the By-Laws of the Corporation

* * * * *

Section 4—Fees [5]

(a) through (b) No Change.

(c) The following fees shall be assessed to each individual who takes an examination as described below. These fees are in addition to the registration fee described in paragraph (b) and any other fees that the owner of an examination that FINRA administers may assess.

Examination No.	Examination name	Examination fee
N/A	Securities Industry Essentials (SIE) Examination	$60
Series 4	Registered Options Principal Examination	105
Series 6	Investment Company Products and Variable Contracts Representative Examination	40
Series 7	General Securities Representative Examination	245
Series 9	General Securities Sales Supervisor Examination—Options Module	80
Series 10	General Securities Sales Supervisor Examination—General Module	125

[1] 1,000 banks × 2 notices = 2,000 notices; (2,000 notices × 15 minutes) = 30,000 minutes/60 minutes = 500 hours.

[1] 15 U.S.C. 78s(b)(1).

Series 87	Research Analyst Examination—Regulatory	130
Series 99	Operations Professional Examination	40

(1) through (4) No Change.

(d) through (i) No Change.

* * * * *

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

FINRA is proposing amendments to Schedule A to the FINRA By-Laws to establish an administration and delivery fee for the Series 54 examination. The Municipal Securities Rulemaking Board (''MSRB'') has established qualification classifications for municipal advisor professionals. The Commission approved amendments to MSRB Rule G–3 that established two new registration classifications for municipal advisors: [6] (1) Municipal advisor representatives (*i.e.,* those individuals who engage in municipal advisory activities); and (2) municipal advisor principals (*i.e.,* those individuals who engage in the management, direction or supervision of the municipal advisory activities of the municipal advisor or its associated persons).[7] Both municipal advisor representatives and municipal advisor principals are required to pass the Municipal Advisor Representative Examination (''Series 50 examination'') to be qualified in accordance with MSRB rules.[8]

MSRB Rule G–3(e)(ii)(A) was amended to establish additional qualification requirements for municipal advisor principals, including the requirement to pass the Series 54 examination.[9] Under the amended rule, municipal advisor principals are required to pass both the Series 50 examination and the Series 54 examination prior to becoming qualified as a municipal advisor principal.[10]

To provide persons who function as municipal advisor principals with sufficient time to satisfy the requirement to pass the new Series 54 examination, the MSRB initially included a one-year grace period from the effective date of the Series 54 examination, during which a person functioning as a municipal advisor principal would be permitted to continue to engage in the management, direction or supervision of the municipal advisory activities of the municipal advisor and its associated persons so long as such person is qualified with the Series 50 examination.[11]

The date by which individuals are required to become qualified with the Series 54 examination has been extended three times due to impacts related to the pandemic. In April 2020, the MSRB extended the date by which individuals were required to become qualified with the Series 54 examination from November 12, 2020 to March 31, 2021.[12] In December 2020, the MSRB further extended the time period from March 31, 2021 to November 12, 2021.[13] In September 2021, the MSRB further extended the time period from November 12, 2021 to November 30, 2021.[14]

FINRA develops, maintains, and delivers all FINRA qualification examinations for individuals who are registered or seeking registration with FINRA. FINRA also administers and delivers examinations developed by the

[6] The term ''municipal advisor'' is defined to mean a person that: (i) Provides advice to or on behalf of a municipal entity or obligated person with respect to municipal financial products or the issuance of municipal securities, including advice with respect to the structure, timing, terms, and other similar matters concerning such financial products or issues; or (ii) undertakes a solicitation of a municipal entity. The definition includes financial advisors, guaranteed investment contract brokers, third-party marketers, placement agents, solicitors, finders, and swap advisors that are engaged in municipal advisory activities, unless they are statutorily excluded. The definition does not include a municipal entity or an employee of a municipal entity. *See* 15 U.S.C. 78*o*–4(e)(4).

MSRB and other self-regulatory organizations.[15] The SEC has designated FINRA to administer and deliver the Series 54 examination for municipal advisors.[16]

FINRA currently administers examinations electronically through the PROCTOR® system [17] at testing centers operated by vendors under contract with FINRA.[18] For qualification examinations sponsored by a FINRA client and administered by FINRA, FINRA charges an administration and delivery fee that represents either a portion of or the entire examination fee. Consistent with this practice, FINRA charges an administration and delivery fee of $115 for the Series 50 examination.[19]

The proposed administration and delivery fee for the Series 54 exam is also $115.[20] The proposed administration and delivery fee will offset FINRA's costs associated with the administration and delivery of the Series 54 examination and, as discussed below, contribute to supporting FINRA's other operations.

FINRA has filed the proposed rule change for immediate effectiveness. The effective date and the implementation date will be the date of filing.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(5) of the Act,[21] which requires, among other things, that FINRA rules provide for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system that FINRA operates or controls.

Reasonableness of the Proposed Fee

FINRA believes that the proposed administration and delivery fee for the Series 54 examination is reasonable. In establishing an administration and delivery fee of $115 for the Series 54 examination, FINRA applied the same criteria as it does for establishing the fees for other examinations with similar characteristics related to test length and volume. In particular, the Series 54 examination fee is consistent with the fee charged for the Series 50 examination, which has the same number of questions (and thus requires the same testing time).

The proposed administration and delivery fee will be used to cover FINRA's costs associated with the administration and delivery of the Series 54 examination, including the fees that vendors charge FINRA for delivering qualification examinations through their test delivery networks and PROCTOR system maintenance and enhancement expenses. The proposed fee also will contribute to supporting FINRA's other operations. As FINRA has explained previously, it is not feasible to associate a direct affiliated revenue stream for each of its programs and thus numerous operations and services must be funded by other revenue sources, which include both general regulatory assessments and use-based fees.[22]

The Proposed Fee Is Equitable and Not Unfairly Discriminatory

FINRA believes that the proposed administration and delivery fee for the Series 54 examination is equitable and not unfairly discriminatory. The proposed fee is a use-based fee and FINRA will charge the fee each time a municipal advisor representative accesses the content. Thus, the exam for municipal advisor principals will be available on the same terms to every municipal advisor representative.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. FINRA believes that the establishment of the administration and delivery fee for the Series 54 examination will have a limited economic impact on the industry.

MSRB rules require every municipal advisor to have at least one municipal advisor principal.[23] There are approximately 500 registered municipal advisors.[24] The administration and delivery fees may be paid by the individuals taking the examination or their associated firms.

FINRA administers this examination as a service provider to the MSRB as designated by the SEC. In providing this service, FINRA is not exercising regulatory discretion and therefore is not itself imposing burdens on those individuals who may choose to sit for the examination. FINRA does exercise discretion in establishing the administration and delivery fee. Regardless of whether individuals pay the fee or some part of the fee is paid by firms, FINRA believes that the proposal is likely to have minimal effects on firms' costs or liquidity. The proposal will therefore have at most minimal competitive effects.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act [25] and paragraph (f)(2) of Rule 19b–4 thereunder.[26] At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of

[15] In this regard, the Exchange Act provides that a registered securities association shall administer required qualification examinations for municipal securities brokers and municipal securities dealers who are members of the association. *See* 15 U.S.C. 78*o*–4(c)(7)(A)(i).

[16] *See* Securities Exchange Act Release No. 75714 (August 17, 2015) 80 FR 50883 (August 21, 2015) (Designation of the Financial Industry Regulatory Authority to Administer Professional Qualification Tests for Associated Persons of Registered Municipal Advisors). Section 15B(c)(7)(A)(iii) of the Exchange Act requires that the SEC or its designee administer qualification examinations for municipal advisors. The SEC previously designated FINRA to examine FINRA members' activities as registered municipal advisors and evaluate compliance by such members with federal securities laws, SEC rules and regulations, and MSRB rules applicable to municipal advisors. *See* Securities Exchange Act Release No. 70462 (September 20, 2013), 78 FR 67468 (November 12, 2013) (S7–45–10) (Registration of Municipal Advisors).

[17] PROCTOR is a computer system that is specifically designed for the administration and delivery of computer-based testing and training.

[18] The MSRB has temporarily allowed the Series 54 examination to be taken online as an interim accommodation for individuals who need to become appropriately qualified as a municipal advisor principal before the compliance date. *See supra* note 14.

[19] The administration and delivery fee represents a portion of the entire examination fee when a FINRA client has established an additional fee for an examination that it sponsors. The fee to take the Series 50 examination is $265. Of this amount, $115 is the FINRA administration and delivery fee, and $150 is the development fee determined by the FINRA client, the MSRB. *See* MSRB Rule A–16. *See also supra* note 8.

[20] The fee to take the Series 54 examination is $265. Of this amount, $115 is the FINRA administration and delivery fee, and $150 is the development fee determined by the FINRA client, the MSRB. *See* MSRB Rule A–16. the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–FINRA–2021–025 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–FINRA–2021–025. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–FINRA–2021–025 and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[27]

J. Matthew DeLesDernier,

Assistant Secretary.

[FR Doc. 2021–21746 Filed 10–4–21; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–263, OMB Control No. 3235–0275]

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Extension:
Rule 17Ad–13

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 17Ad–13 (17 CFR 240.17Ad–13), under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*). The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 17Ad–13 requires certain registered transfer agents to file annually with the Commission and the transfer agent's appropriate regulatory authority a report prepared by an independent accountant on the basis of a study and evaluation of the transfer agent's system of internal accounting controls for the transfer of record ownership and the safeguarding of related securities and funds. If the independent accountant's report specifies any material inadequacy in a transfer agent's system, the rule requires the transfer agent to notify the Commission and its appropriate regulatory agency in writing, within sixty calendar days after the transfer agent receives the independent accountant's report, of any corrective action taken or proposed to be taken by the transfer agent. In addition, Rule 17Ad–13 requires that transfer agents maintain the independent accountant's report and any other documents required by the rule for at least three years, the first year in an easily accessible place. These recordkeeping requirements assist the Commission and other regulatory agencies with monitoring transfer agents and ensuring compliance with the rule. Small transfer agents and transfer agents that service only their own companies' securities are exempt from Rule 17Ad–13.

Approximately 100 professional independent transfer agents must file with the Commission one report prepared by an independent accountant pursuant to Rule 17Ad–13 each year. Commission staff estimates that, on average, the annual internal time burden for each transfer agent to submit the independent accountant's report to the Commission is minimal or zero. The time required for an independent accountant to conduct the study and evaluation of a transfer agent's system of internal accounting controls and complete the report varies depending on the size and nature of the transfer agent's operations. Commission staff estimates that, on average, each Rule 17Ad–13 report can be completed by the independent accountant in 120 hours. In light of Commission staff's review of previously filed Rule 17Ad–13 reports and Commission staff's conversations with transfer agents and accountants, Commission staff estimates that 120 hours are needed to perform the study and prepare the report on an annual basis. Commission staff estimates that the average hourly rate of an independent accountant is $260, resulting in an annual external cost burden of $31,200 for each of the approximately 100 professional independent transfer agents. The aggregate total annual external cost for the 100 respondents is approximately $3,120,000.

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have any practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

[27] 17 CFR 200.30–3(a)(12).

Please direct your written comments to: David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or send an email to: *PRA_Mailbox@sec.gov.*

Dated: September 29, 2021.

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Extension:
Form N–PORT

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

The title for the collection of information is ''Form N–PORT under the Investment Company Act of 1940.'' Form N–PORT requires funds to report portfolio holdings information in a structured, XML format. The form is filed electronically using the Commission's electronic filing system (Electronic Data Gathering, Analysis and Retrieval or ''EDGAR''). The purpose of Form N–PORT is to satisfy the filing and disclosure requirements of Section 30(b) of the Investment Company Act, and of Rule 30b1–9 thereunder.

We estimate that 11980 entities will be required to submit reports on Form N–PORT. We estimate that 35% of funds will file reports on Form N–PORT in house and the remaining 65% of funds will retain the services of a third party to prepare and file reports on Form N–PORT on the fund's behalf. The estimated annual hourly burden associated with Form N–PORT 1,839,903 hours for an average of 153.6 hours per entity. The total annual internal time cost associated with Form N–PORT is $654,658,288. The total annual external cost associated with Form N–PORT is $113,858,133.

The requirements of this collection of information are mandatory. Responses will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: September 29, 2021.

SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33–10993; 34–93204; 39–2541; IC–34392; File No. S7–12–21]

Potential Technical Changes to EDGAR Filer Access and Filer Account Management Processes

AGENCY: Securities and Exchange Commission.

ACTION: Request for comment.

SUMMARY: The Securities and Exchange Commission (''Commission'') is requesting comment on potential technical changes related to how entities and individuals access the Commission's Electronic Data Gathering, Analysis, and Retrieval system (''EDGAR'') to make submissions, and how these entities and individuals (''filers'') manage the permissions of individuals who may file on EDGAR on their behalf. Individuals who seek to file on EDGAR on behalf of a filer would be directed to a third-party service provider to create individual user account credentials and to enable multifactor authentication. Each filer would designate a ''filer administrator''—analogous to the current filer contact person who receives the filer's EDGAR access codes—to manage the permissions of the filer's individual users through a new filer management tool on EDGAR.

DATES: *Comments should be received on or before the later of:* December 1, 2021, or November 4, 2021.

ADDRESSES: Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/submitcomments.htm*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number S7–12–21 on the subject line.

Paper Comments

- Send paper comments to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number S7–12–21. This file number should be included on the subject line if email is used. To help the Commission process and review comments more efficiently, please use only one method of submission. The Commission will post all submitted comments on our website (*http://www.sec.gov*). Typically, comments are also available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Operating conditions may limit access to the Commission's Public Reference Room. All comments received will be posted without change. Persons submitting comments are cautioned that the Commission does not redact or edit personal identifying information from comment submissions. Please submit only information that you wish to make available publicly.

FOR FURTHER INFORMATION CONTACT: Rosemary Filou, Deputy Director and Chief Counsel; Daniel Chang, Senior Special Counsel; EDGAR Business Office, at 202–551–3900, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is seeking public comment on potential technical changes to the EDGAR access process that include the addition of individual user account credentials as well as a tool on EDGAR through which filers would manage their EDGAR accounts. During the comment period, the Commission will open an EDGAR ''Beta'' environment where pre-enrolled EDGAR filers may preview and test many of the potential access changes. The Commission plans to provide more information regarding

the Beta environment for the potential technical changes and what functions can be tested in the Beta environment through an information page on *SEC.gov*.

I. Introduction and Background

Individuals and entities seek to access EDGAR to make electronic submissions with the Commission to comply with various provisions of the federal securities laws. Prospective EDGAR filers currently apply for access in accord with 17 CFR 232.10 (Rule 10 of Regulation S–T) by completing the online uniform application for EDGAR access codes (''Form ID'') [1] on the EDGAR Filer Management website [2] and submitting a notarized copy of that application signed by an authorized individual of the filer.[3]

If the Form ID application is approved, the contact person listed on the Form ID receives an EDGAR account number unique to the filer known as a central index key (''CIK''), if needed,[4] and information regarding EDGAR access codes. EDGAR access codes include the EDGAR password, central index key confirmation code (''CCC''), password modification authorization code (''PMAC''), and passphrase.[5] Filings on EDGAR are not currently linked to a specific authorized individual, but rather associated with the CIK generally. Additionally, multifactor authentication is not presently available to validate individuals accessing EDGAR and simplify password retrieval.

The Commission is considering potential technical changes to the EDGAR filer access and filer account management processes (''potential access changes'') to enhance the security of EDGAR, improve the ability of filers to securely maintain access to their EDGAR accounts, facilitate the responsible management of EDGAR filer credentials, and simplify procedures for accessing EDGAR.

Individuals who seek to file on EDGAR would be directed to a third-party service provider to create individual user account credentials, including a unique username and password (''account credentials''), and to enable multifactor authentication. The filer would designate a ''filer administrator'' analogous to the current filer contact person who receives access codes. The filer administrator would manage the permissions of the filer's EDGAR ''users''—individuals with account credentials authorized by the filer to make submissions on its behalf.[6] A new EDGAR filer management tool would allow the filer administrator to add and remove users and filer administrators, elevate a user to filer administrator, and change a filer administrator to a user. This tool would assist filers in complying with their existing obligation to securely maintain access to their EDGAR account.[7]

The filer management tool would be accessed through the EDGAR Filer Management website, which would be redesigned with a new layout and features. The new account credentials would be used to access the other two EDGAR websites—EDGAR Filing and EDGAR Online Forms; however, those websites would remain largely unchanged.[8]

The potential access changes would eliminate the EDGAR password,[9] PMAC, and passphrase. Users would make submissions by using the filer's CIK and CCC after logging in with their new account credentials. The potential access changes would enable the Commission to identify the unique user making each filing on EDGAR while allowing a filer administrator to manage the permissions of users authorized to make submissions on the filer's behalf.

In conjunction with this request for comment, the Commission will allow pre-enrolled filers to access an EDGAR Beta environment, where filers will be able to preview and test many of the potential access changes. As with any change to EDGAR code, the potential access changes to EDGAR may affect custom code that filers have created in their systems to interact with EDGAR. The Beta environment generally should allow filers to determine what changes would be needed to their custom code to accommodate the potential access changes and to provide targeted technical feedback to the Commission about the potential access changes. The Commission currently anticipates that the Beta environment will be available in October 2021. All filers will be eligible to enroll to participate in the EDGAR Beta environment, which may be made available for future EDGAR changes. The Commission will provide more information regarding the Beta environment for the potential access changes and what functions can be tested in the Beta environment through an information page on *SEC.gov*.

We have established an information page explaining the potential access changes on the EDGAR—Information for Filers web page on *SEC.gov*,[10] leveraging the recently introduced EDGAR—How Do I guide [11] for filers, and providing additional filer assistance such as in-context help, live webinars, and on-demand how-to videos. Our goal is to make the transition as easy as possible for filers. We will also provide a help desk devoted to assisting filers with the potential access changes.

If the potential access changes are implemented, the Commission anticipates that it would adopt amendments to certain Commission rules and forms to reflect the potential access changes. The corresponding amendments would include changes to Rule 10 of Regulation S–T, Form ID and associated rules,[12] and the EDGAR Filer Manual, which is incorporated by reference in the Code of Federal

[1] *See* Form ID, uniform application for access codes to file on EDGAR, 17 CFR 239.63, 249.446, 269.7, and 274.402.

[2] *See* EDGAR Filer Management website at *https://www.filermanagement.edgarfiling.sec.gov.*

[3] *See* EDGAR Filer Manual, Volume I, at Section 3. The EDGAR Filer Manual specifies the instructions filers must follow when making electronic filings on EDGAR and is incorporated by reference in the Code of Federal Regulations by 17 CFR 232.301 (Rule 301 of Regulation S–T). Rule 10 of Regulation S–T and the EDGAR Filer Manual permit manual, electronic, and remote online notarizations, authorized by the law of any state or territory of the United States or the District of Columbia. *See* 17 CFR 232.10 and EDGAR Filer Manual, Volume I, at Section 3. An ''authorized individual'' for purposes of the Form ID notarization process includes, for example, the Chief Executive Officer, Chief Financial Officer, partner, corporate secretary, officer, director, or treasurer of a company filer; or for individual filers, the individual filer or a person with a power of attorney from the individual filer. *See* EDGAR Filer Manual, Volume I, at Section 3.

[4] Currently, most applicants completing the Form ID for EDGAR access have not previously been assigned a CIK. However, a small number of other applicants have already been assigned a CIK, but have not filed electronically on EDGAR. These applicants continue to use the same CIK when they receive access to EDGAR and are not assigned a new CIK.

[5] *See* EDGAR Filer Manual, Volume I, at Section 4. For a discussion of the functions of these access codes, please see the ''Understand and utilize EDGAR CIKs, passphrases and access codes'' section of EDGAR—How Do I, at *https://www.sec.gov/edgar/filer-information/how-do-i.*

[6] For purposes of this request for comment, the term ''users'' includes filer administrators unless otherwise indicated.

[7] *See* EDGAR Filer Manual, Volume I, at Section 4.

[8] EDGAR Gateway Filing website at *https://www.edgarfiling.sec.gov/Welcome/EDGARLogin.htm;* and EDGAR Online Forms Management website at *https://www.edgarfiling.sec.gov/Welcome/EDGAROnlineFormsLogin.htm.* The three EDGAR filing websites would also remind filers of their obligations to comply with the rules and regulations governing access to EDGAR.

[9] The EDGAR password would be replaced by the password in the account credentials obtained from the third-party service provider.

[10] *See* EDGAR—Information for Filers web page at *https://www.sec.gov/edgar/filer-information.*

[11] *See* EDGAR—How Do I at *https://www.sec.gov/edgar/filer-information/how-do-i.*

[12] *See* Form ID, uniform application for access codes to file on EDGAR, 17 CFR 239.63, 249.446, 269.7, and 274.402.

Regulations by Rule 301 of Regulation S–T.

We would expect to implement a phased transition of existing filers to the potential access changes, as discussed below, to make the transition a user-friendly experience for filers.

II. Discussion

We are considering potential technical changes to the method by which filers access EDGAR to make submissions and manage their EDGAR accounts.

A. Individual Account Credentials

Under the potential access changes, each individual seeking to make submissions on EDGAR on behalf of a filer would be required to obtain individual account credentials from a third-party service provider. The Commission is considering using as the third-party service provider *Login.gov*, an official website of the U.S. Government that provides a sign-in service for use by the public and Federal agencies.[13] When an individual creates account credentials with the third-party service provider, the individual would be prompted to provide an email address and select an authentication option.[14] After the individual confirms the email address and completes the authentication, the third-party service provider would assign the individual unique account credentials.

Multifactor authentication adds a layer of validation each time an individual signs in to EDGAR. For example, if the telephone authentication option is selected, the individual would enter a one-time passcode received by text message/SMS or from a telephone call to the provided telephone number each time the individual logs in to a filer's EDGAR account. Multifactor authentication would be used only for purposes of validation, and individuals would be reminded on EDGAR to provide only a business email account and relevant business information when creating account credentials. EDGAR would no longer employ the EDGAR password, PMAC, and passphrase codes.

If the individual enters their account credentials and successfully completes the multifactor authentication process, the individual would be able to access the EDGAR Filer Management website. To make submissions on behalf of a certain filer on the three EDGAR filing websites,[15] however, individuals would also need to be authorized as a user by the relevant filer administrator.

B. Filer Administrators

As part of the changes we are considering, a filer would designate which of its users would act as filer administrator(s) to manage the filer's EDGAR account, analogous to the contact person who currently receives access codes. A filing entity would be required to designate at least two filer administrators. Employees at filing entities often change; therefore, designating two filer administrators would increase the chances that management of the filer's EDGAR account would be uninterrupted. For individual filers, one filer administrator would be required. Both filing entities and individual filers would be permitted to have additional filer administrators.

Under the potential access changes, prospective filers would designate their filer administrator during the initial Form ID application process while existing filers would enroll their filer administrators during a transition period. EDGAR would contain a link to the third-party service provider's website, where the prospective filer administrator could obtain account credentials. After the prospective filer administrator obtains account credentials, the prospective filer administrator would be automatically redirected to the EDGAR Filer Management website to access the Form ID application. We would permit a third party to be a filer administrator if the third party submits a Form ID listing the third party as filer administrator and includes a notarized power of attorney from an authorized individual of the filer that grants authority to the third party.[16]

The filer administrator would replace the current filer contact person to manage the filer's access to EDGAR. As described in more detail below, the filer administrator would manage and confirm the permissions of users through the new filer management tool. All filer administrators would be able to manage and confirm permissions of users regardless of whether they are listed on the Form ID or added as filer administrators through the filer management tool.

On the Form ID, prospective filers would include the names and business contact information of two filer administrators for filing entities or one filer administrator for individual filers. The prospective filer would then electronically submit the Form ID and upload a notarized copy of the Form ID signed by an authorized individual of the prospective filer, as currently required.

If the Form ID application is approved, EDGAR would provide the filer administrator with a CCC code and a link to the EDGAR Filer Management website, similar to the current process. The filer administrator could then access the filer's account and the filer management tool by logging onto the EDGAR Filer Management website with the filer administrator's account credentials.

The Commission would require existing filers to transition to the potential access process. Each existing filer would designate an individual to function as filer administrator. The filer administrator for the existing filer would obtain account credentials through the third-party service provider; log in to a transition page in EDGAR; and enter the filer's CIK, CCC, EDGAR password, and passphrase. Once existing filers transition to the potential access changes, they will no longer be able to use the current login method. Existing filers that do not have active EDGAR access codes would be required to complete a new Form ID to reapply for access.

C. Filer Management Tool and Annual Confirmation of Permissions

The potential access changes would include a new filer management tool on the EDGAR Filer Management website where a filer administrator, acting on behalf of the filer, could view, add, remove, and confirm users. The filer administrator could also change the permissions of a user to filer administrator and vice versa. Further, on the filer management tool, filer administrators could delegate filing authority to third parties—such as filing agents—and remove such delegations. Thus, the filer management tool would allow filer administrators to view and manage the permissions of all of the filer's users.

---

[13] *See https://www.login.gov/.*

[14] *Login.gov* authentication options include: (1) A security key; (2) government employee or military PIV or CAC cards; (3) authentication application; (4) text message/SMS or telephone call; and (5) backup codes, with (1), (2), and (3) being the most secure method, and (5) being the least secure authentication option according to *Login.gov. See generally Login.gov*, Authentication Options at *https://www.login.gov/help/get-started/authentication-options/. See also generally Login.gov*, Privacy and security: Our security practices at *https://login.gov/policy/our-security-practices/* for information on *Login.gov's* security practices.

[15] *See supra* note 8.

[16] Currently, we permit a person with a power of attorney from an individual filer to sign the Form ID application for the individual filer; in that case, the power of attorney document must accompany the notarized Form ID application. *See* EDGAR Filer Manual, Volume I, at Section 3. Existing Commission practice also permits the Form ID to be signed by an individual with a power of attorney from a filing entity, such as a corporation.

Once the filer administrator adds a user on the filer management tool, that user would have access to the EDGAR filing websites when the user obtains account credentials and logs in to the websites. Unlike the filer administrator, a user could only view the user's permissions on the filer management tool, not those of the filer administrator or other users; and the only action the user could take on the tool would be to remove their own ability to file on behalf of the filer.

Filer administrators and users included on the filer management tool would be able to make submissions, submit correspondence, and manage certain filer information.

Filers are currently required to change their EDGAR password annually (a filer's EDGAR password expires 12 months after it was created or last changed), or have their access deactivated. Because the potential access changes would eliminate the EDGAR password, an annual confirmation of permissions on the filer management tool would replace the present requirement to change the EDGAR password annually.

EDGAR would notify filer administrators to access the EDGAR Filer Management website to review the list of the filer's users, including other filer administrators, and annually confirm on the filer management tool the accuracy of the permissions of those authorized to file on behalf of the filer. EDGAR would also notify each user to confirm annually the user's permissions. The annual confirmation of permissions would help the filer remain aware of who makes submissions on EDGAR on its behalf and provide an opportunity to update information about users no longer associated with the filer or no longer authorized to file on its behalf.

Filers are currently deactivated if they do not timely change their EDGAR password on an annual basis, and, under the potential access changes, if no filer administrator timely confirms permissions for a filer, that filer would be deactivated. The deactivated filer would have to resubmit a Form ID application; if approved, staff would reactivate the permissions of the filer administrator(s) listed on the Form ID application. The filer administrator could then reactivate other filer administrators and users using the filer management tool. Where filer administrators or users become deactivated because they have not confirmed their own permissions, other filer administrators could reactivate those users and filer administrators using the filer management tool.

D. Transition Period

There are approximately 180,000 EDGAR filer accounts in which a filing has been made in the last two years, approximately 115,000 of which represent filing entities and approximately 65,000 of which represent individual filers.[17] If the potential access changes are implemented, the Commission would require filers to transition these accounts to the potential access process on a gradual basis over a six month period, likely beginning in spring 2022. During the transition period, existing accounts could access EDGAR through the current process until they transition to the potential access changes.

After all active accounts have transitioned, the Commission would address the transition of an additional approximately 600,000 inactive EDGAR filer accounts to the potential access changes. The Commission would inform filers of its plans regarding inactive accounts before it proceeds with those plans.

III. Questions

The Commission is providing an opportunity for the EDGAR filing community and other interested parties to provide feedback on the potential technical changes to the EDGAR filer access and account management processes. The Commission welcomes input on the following:

1. Does the filing community have experience with obtaining account credentials from third-party service providers including or similar to *Login.gov* that the Commission should consider? If so, which third-party service party service providers, and what experience? Would the use of third-party service providers give rise to any security concerns for individual or entity filers?

2. Under the potential access changes, there would need to be at least two filer administrators for filing entities and one filer administrator for individual filers; filers could designate as many filer administrators as they would like. Is this appropriate? If not, why? Should filing entities be required to have more than two filer administrators? For filing entities, would one filer administrator be adequate? Should individual filers be required to have more than one filer administrator? If so, why? Should there be a limit on the number of filer administrators?

3. With the filer management tool, the filer administrator could view, add, remove, and confirm users and other filer administrators as well as change the permissions of a user to administrator and vice-versa. Users could similarly use the tool to view and remove their own permissions. In addition, both filer administrators and users would use the filer management tool to confirm current permissions on an annual basis. Are there other functions that should be incorporated into the filer management tool or any other information that administrators or users should be able to view? Should any of these functions not be included on the filer management tool?

4. With the filer management tool, the filer administrator could delegate filing authority to third parties such as filing agents and remove such delegations. Should filer administrators be able to delegate filing authority to third parties and remove such delegations? Do commenters have any concerns with this function or any suggested modifications? Should ''filing agents'' be limited to entities listed in EDGAR as ''filing agents'' based on their Form ID filing or should it also include entities that function as filing agents but who identified themselves on their Form ID filing as ''filer?''

5. Are there alternatives to the filer management tool that the Commission should consider? For example, are there alternative methods that would enable filers to take the same actions as they would using the filer management tool that would be easier to implement or more user-friendly? Do commenters have experience with alternatives to the filer management tool, whether positive or negative, that the Commission should consider?

6. Filer administrators and users would confirm their access permissions annually. The annual confirmation of permissions would help the filer remain aware of who makes submissions on EDGAR on its behalf. Should the confirmation be annual or at more or less frequent intervals? Are there concerns that the Commission should be aware of for filers that only make submissions annually or less frequently? Should both filer administrators and users confirm permissions annually, or only filer administrators? Should the requirement to apply for access again occur automatically upon failure by a filer to confirm the access permissions or should there be a grace period if the filer administrator fails to confirm the access permissions within a specified time period? If there should be a grace period, how long should it be? Would the annual confirmation create any additional burden on filers or filing agents compared to the current annual EDGAR password update requirement?

[17] In total, regardless of account activity, there are approximately 785,000 filer accounts in EDGAR.

If so, are there any improvements to the annual confirmation as currently described that would reduce the burden for filers or filing agents?

7. Would the potential access changes facilitate the responsible management of EDGAR filer credentials? Are there additional changes to the access process that we should make to encourage such responsible management? For example, should administrators be required to update their account permissions within a reasonable period of time following the separation of employment of a user from the filer or a change in the user's filing responsibilities? Would the potential access changes create any undue burdens for filers or filing agents? If so, how could the potential access changes be modified to ease such burdens? Are there any other concerns that the Commission should be aware of with the transition to the potential access changes?

8. Are there any issues specific to certain types of filers that should be considered with regard to the potential access changes? For example, asset-backed securities (ABS) issuers often create one or more serial companies each year, each of which is a separate legal entity with its own CIK, even though it generally has the same contact information as the ABS issuer. If the potential technical changes are implemented, should new serial companies have their user and filer administrator information automatically copied from the ABS issuer's user and filer administrator information? If so, in order to ensure that the ABS issuer has user and filer administrator information that could be copied to the new serial company, would there be any issues associated with requiring ABS issuers to have transitioned to *Login.gov* before the ABS issuer can create new serial companies? Separately, should we allow the annual confirmations of users and filer administrators for an ABS issuer to also apply to the serial companies associated with that ABS issuer, if the same users and filer administrators were associated with each serial company?

9. How long would it take existing filers to adjust to the potential access changes? Should we transition existing active accounts to the potential access changes on a gradual basis over a several month period, possibly beginning in spring 2022? If so, how? For example, should the transition period be tiered based on the volume of filings made by a filer or a filing agent on an annual basis? Should another method be used? What is an appropriate length of time for the transition period?

10. What other changes to the EDGAR filer access and account management processes should the Commission consider in the future?

IV. General Request for Public Comment

We request and encourage any interested person to submit comments on any aspect of the potential technical changes to the EDGAR filer access and filer account management processes, and suggestions for additional changes. In particular, we request comment on obtaining and using third-party service provider account credentials to access EDGAR, the filer administrator managing the permissions of users associated with the filer's EDGAR account, and the filer management tool. Comments are of particular assistance if accompanied by analysis of the issues addressed in those comments and any data that may support the analysis. We urge commenters to be as specific as possible.

By the Commission.

Dated: September 30, 2021.

Vanessa A. Countryman,

Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93179; File No. SR–NYSEArca–2021–73]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change To List and Trade Shares of the Franklin Responsibly Sourced Gold ETF Under NYSE Arca Rule 8.201–E

September 29, 2021.

On August 23, 2021, NYSE Arca, Inc. filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the Franklin Responsibly Sourced Gold ETF. The proposed rule change was published for comment in the **Federal Register** on September 8, 2021.[3] The Commission has received no comments on the proposed rule change.

Section 19(b)(2) of the Act [4] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is October 23, 2021. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[5] designates December 7, 2021 as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–NYSEArca–2021–73).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93181; File No. SR–NYSENAT–2021–18]

Self-Regulatory Organizations; NYSE National, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend NYSE National Rule 7.2

September 30, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 28, 2021, NYSE National, Inc. (''NYSE National'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 92840 (September 1, 2021), 86 FR 50385.

[4] 15 U.S.C. 78s(b)(2).

[5] *Id.*

[6] 17 CFR 200.30–3(a)(31).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE National Rule 7.2 (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange. Juneteenth National Independence Day was designated a legal public holiday in June 2021. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE National Rule 7.2 (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange.

On June 17, 2021, Juneteenth National Independence Day was designated a legal public holiday.[3] Consistent with broad industry sentiment [4] and the approach recommended by the Securities Industry and Financial Markets Association (''SIFMA''),[5] the Exchange proposes to add ''Juneteenth National Independence Day'' to the existing list of holidays in the first paragraph of NYSE National Rule 7.2. As a result, the Exchange will not be open for business on Juneteenth National Independence Day, which falls on June 19 of each year. In accordance with the second paragraph of NYSE National Rule 7.2, when the holiday falls on a Saturday, the Exchange will not be open for business on the preceding Friday, and when it falls on a Sunday, the Exchange will not be open for business on the succeeding Monday.[6]

The first paragraph of the revised rule would read as follows (proposed additions *italicized*):

The Exchange will not be open for business on New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, *Juneteenth National Independence Day,* Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed change would remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors and the public interest because the proposed amended rule would clearly state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The change would thereby promote clarity and transparency in the Exchange rules by updating the list of holidays of the Exchange.

The proposed change does not raise any new or novel issues.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[9] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather to amend the Exchange rule regarding holidays.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [10] and Rule 19b–4(f)(6)(iii) thereunder.[11]

A proposed rule change filed under Rule 19b–4(f)(6) [12] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[13] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative prior to 30 days after the date of the filing. The Exchange states that waiver of the operative delay would be consistent with the protection of investors and the public interest because the proposed rule change, as described above, would state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken

[3] Public Law 117–17.

[8] 15 U.S.C. 78f(b)(5).

[9] 15 U.S.C. 78f(b)(8).

[10] 15 U.S.C. 78s(b)(3)(A).

[11] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[12] 17 CFR 240.19b–4(f)(6).

[13] 17 CFR 240.19b–4(f)(6)(iii).

off if June 19 fell on a Saturday or Sunday. The Exchange further states that the proposed change does not raise any new or novel issues. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSENAT–2021–18 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSENAT–2021–18. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSENAT–2021–18, and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–541, OMB Control No. 3235–0620]

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Extension:
Rule 22c–2

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Rule 22c–2 (17 CFR 270.22c–2) under the Investment Company Act of 1940 (15 U.S.C. 80a) (the ''Investment Company Act'' or ''Act'') requires the board of directors (including a majority of independent directors) of most registered open-end investment companies (''funds'') to either approve a redemption fee of up to two percent or determine that imposition of a redemption fee is not necessary or appropriate for the fund. Rule 22c–2 also requires a fund to enter into written agreements with their financial intermediaries (such as broker-dealers and retirement plan administrators) under which the fund, upon request, can obtain certain shareholder identity and trading information from the intermediaries. The written agreement must also allow the fund to direct the intermediary to prohibit further purchases or exchanges by specific shareholders that the fund has identified as being engaged in transactions that violate the fund's market timing policies. These requirements enable funds to obtain the information that they need to monitor the frequency of short-term trading in omnibus accounts and enforce their market timing policies.

The rule includes three ''collections of information'' within the meaning of the Paperwork Reduction Act of 1995 (''PRA'').[1] First, the rule requires boards to either approve a redemption fee of up to two percent or determine that imposition of a redemption fee is not necessary or appropriate for the fund. Second, funds must enter into information sharing agreements with all of their ''financial intermediaries'' [2] and maintain a copy of the written information sharing agreement with each intermediary in an easily accessible place for six years. Third, pursuant to the information sharing agreements, funds must have systems that enable them to request frequent trading information upon demand from their intermediaries, and to enforce any restrictions on trading required by funds under the rule.

The collections of information created by rule 22c–2 are necessary for funds to effectively assess redemption fees, enforce their policies in frequent trading, and monitor short-term trading,

[1] 44 U.S.C. 3501–3520.

[2] The rule defines a Financial Intermediary as: (i) Any broker, dealer, bank, or other person that holds securities issued by the fund in nominee name; (ii) a unit investment trust or fund that invests in the fund in reliance on section 12(d)(i)(E) of the Act; and (iii) in the case of a participant directed employee benefit plan that owns the securities issued by the fund, a retirement plan's administrator under section 316(A) of the Employee Retirement Security Act of 1974 (29 U.S.C. 1002(16)(A) or any person that maintains the plans' participant records. Financial Intermediary does not include any person that the fund treats as an individual investor with respect to the fund's policies established for the purpose of eliminating or reducing any dilution of the value of the outstanding securities issued by the fund. Rule 22c–2(c)(1).

including market timing, in omnibus accounts. These collections of information are mandatory for funds that redeem shares within seven days of purchase. The collections of information also are necessary to allow Commission staff to fulfill its examination and oversight responsibilities.

Rule 22c–2(a)(1) requires the board of directors of all registered open-end management investment companies and series thereof (except for money market funds, ETFs, or funds that affirmatively permit short-term trading of its securities) to approve a redemption fee for the fund, or instead make a determination that a redemption fee is either not necessary or appropriate for the fund. Commission staff understands that the boards of all funds currently in operation have undertaken this process for the funds they currently oversee, and the rule does not require boards to review this determination periodically once it has been made. Accordingly, we expect that only boards of newly registered funds or newly created series thereof would undertake this determination. Commission staff estimates that 36 funds (excluding money market funds and ETFs) are newly formed each year and would need to make this determination.[3]

Based on conversations with fund representatives,[4] Commission staff estimates that it takes 2 hours of the board's time as a whole (at a rate of $4,465 per hour)[5] to approve a redemption fee or make the required determination on behalf of all series of the fund. In addition, Commission staff estimates that it takes compliance personnel of the fund 8 hours (at a rate of $72 per hour)[6] to prepare trading, compliance, and other information regarding the fund's operations to enable the board to make its determination, and takes internal compliance counsel of the fund 3 hours (at a rate of $373 per hour)[7] to review this information and present its recommendations to the board. Therefore, for each fund board that undertakes this determination process, Commission staff estimates it expends 13 hours[8] at a cost of $10,625.[9] As a result, Commission staff estimates that the total time spent for all funds on this process is 468 hours at a cost of $382,500.[10]

Rule 22c–2(a)(2) also requires a fund to enter into information-sharing agreements with each of its financial intermediaries. Commission staff understands that all currently registered funds have already entered into such agreements with their intermediaries. Funds enter into new relationships with intermediaries from time to time, however, which requires them to enter into new information sharing agreements. Commission staff understands that, in general, funds enter into information-sharing agreement when they initially establish a relationship with an intermediary, which is typically executed as an addendum to the distribution agreement. The Commission staff understands that most shareholder information agreements are entered into by the fund group (a group of funds with a common investment adviser), and estimates that there are currently 840 currently active fund groups.[11] Commission staff estimates that, on average, each active fund group enters into relationships with 3 new intermediaries each year. Commission staff understands that funds generally use a standard information sharing agreement, drafted by the fund or an outside entity, and modifies that agreement according to the requirements of each intermediary. Commission staff estimates that negotiating the terms and entering into an information sharing agreement takes a total of 4 hours of attorney time (at a rate of $425 per hour)[12] per intermediary (representing 2.5 hours of fund attorney time and 1.5 hours of intermediary attorney time). Accordingly, Commission staff estimates that it takes 12 hours at a cost of $5,100 each year[13] to enter into new information sharing agreements, and all existing market participants incur a total of 10,080 hours at a cost of $4,284,000.[14]

In addition, newly created funds advised by new entrants (effectively new fund groups) must enter into information sharing agreements with all of their financial intermediaries. Commission staff estimates that there are 41 new fund groups that form each year that will have to enter into information sharing agreements with each of their intermediaries.[15] Commission staff estimates that fund groups formed by new advisers typically have relationships with significantly fewer intermediaries than existing fund groups, and estimates that new fund groups will typically enter into 100 information sharing agreements with their intermediaries when they begin operations.[16] As discussed previously, Commission staff estimates that it takes 4 hours of attorney time (at a rate of $425 per hour)[17] per intermediary to enter into information sharing agreements. Therefore, Commission staff estimates that each newly formed fund group will incur 400 hours of attorney time at a cost of $170,000[18] and that all newly formed fund groups will incur a total of 16,400 hours at a cost of $6,970,000 to enter into information sharing agreements with their intermediaries.[19]

[3] This estimate is based on the number of registrants filing initial Form N–1A or N–3 from 2017 to 2019. This estimate does not carve out money market funds, ETFs, or funds that affirmatively permit short-term trading of their securities, so this estimate corresponds to the outer limit of the number of registrants that would have to make this determination.

[4] Unless otherwise stated, estimates throughout this analysis are derived from a survey of funds and conversations with fund representatives.

[5] The estimate of $4,465 per hour for the board's time as a whole is based on conversations with representatives of funds and their legal counsel.

[6] The $72 per hour figure for a compliance clerk is from SIFMA's *Office Salaries in the Securities Industry 2013,* modified by Commission staff to account for an 1,800-hour work-year and inflation, and multiplied by 2.93 to account for bonuses, firm size, employee benefits and overhead.

[7] The $373 per hour figure for internal compliance counsel is from SIFMA's *Management & Professional Earnings in the Securities Industry 2013,* modified by Commission staff to account for an 1,800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

[8] This calculation is based on the following estimates: (2 hours of board time + 3 hours of internal compliance counsel time + 8 hours of compliance clerk time = 13 hours).

[9] This calculation is based on the following estimates: ($8,930 ($4,465 board time × 2 hours = $8,930) + $576 ($72 compliance time × 8 hours = $576) + $1,119 ($373 attorney time × 3 hours = $1,119) = $10,625).

[10] This calculation is based on the following estimates: (13 hours × 36 funds = 468 hours); ($10,625 × 36 funds = $382,500).

[11] ICI, 2020 Investment Company Fact Book at Fig 2.12 (2020) (*https://www.ici.org/research/stats/factbook*).

[12] The $425 per hour figure for attorneys is from SIFMA's *Management & Professional Earnings in the Securities Industry 2013,* modified by Commission staff to account for an 1,800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

[13] This estimate is based on the following calculations: (4 hours × 3 new intermediaries = 12 hours); (12 hours × $425 = $5,100).

[14] This estimate is based on the following calculations: (12 hours × 840 fund groups = 10,080 hours); (10,080 hours × $425 = $4,284,000).

[15] ICI, 2020 Investment Company Fact Book at Fig 2.12 (2020) (*https://www.ici.org/research/stats/factbook*).

[16] Commission staff understands that funds generally use a standard information sharing agreement, drafted by the fund or an outside entity, and then modifies that agreement according to the requirements of each intermediary.

[17] The $425 per hour figure for an attorney is from SIFMA's Management & Professional Earnings in the Securities Industry 2013, modified by Commission staff to account for an 1,800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead.

[18] This estimate is based on the following calculations: (4 hours × 100 intermediaries = 400 hours); (400 hours × $425 = $170,000).

[19] This estimate is based on the following calculations: (41 fund groups × 400 hours = 16,400 hours); ($425 × 16,400 = $6,970,000).

Rule 22c–2(a)(3) requires funds to maintain records of all information-sharing agreements for 6 year*s in an easily* accessible place. Commission staff understands that most shareholder information agreements are stored at the fund group level and estimates that there are currently approximately 840 fund groups.[20] Commission staff understands that information-sharing agreements are generally included as addendums to distribution agreements between funds and their intermediaries, and that these agreements would be stored as required by the rule as a matter of ordinary business practice. Therefore, Commission staff estimates that maintaining records of information-sharing agreements requires 10 minutes of time spent by a general clerk (at a rate of $64 per hour) [21] per fund, each year. Accordingly, Commission staff estimates that all funds will incur 140 hours at a cost of $8,960 [22] in complying with the recordkeeping requirement of rule 22c–2(a)(3).

Therefore, Commission staff estimates that to comply with the information sharing agreement requirements of rule 22c–2(a)(2) and (3), it requires a total of 26,620 hours at a cost of $11,262,960.[23]

The Commission staff estimates that on average, each fund group requests shareholder information once a week, and gives instructions regarding the restriction of shareholder trades every day, for a total of 417 responses related to information sharing systems per fund group each year, and a total 350,280 responses for all fund groups annually.[24] In addition, as described above, the staff estimates that funds make 36 responses related to board determinations, 2,520 responses related to new intermediaries of existing fund groups, 4,100 responses related to new fund group information sharing agreements, and 840 responses related to recordkeeping, for a total of 7,496 responses related to the other requirements of rule 22c–2. Therefore, the Commission staff estimates that the total number of responses is 357,776 (350,280 + 7,496 = 357,776).

The Commission staff estimates that the total hour burden for rule 22c–2 is 27,088 hours at a cost of $11,645,460.[25] Responses provided to the Commission will be accorded the same level of confidentiality accorded to other responses provided to the Commission in the context of its examination and oversight program. Responses provided in the context of the Commission's examination and oversight program are generally kept confidential. Complying with the information collections of rule 22c–2 is mandatory for funds that redeem their shares within 7 days of purchase. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: September 29, 2021.

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

[20] ICI, 2020 Investment Company Fact Book at Fig 2.12 (2020) (*https://www.ici.org/research/stats/factbook*).

[21] The $64 per hour figure for a general clerk is derived from SIFMA's Office Salaries in the Securities Industry 2013 modified to account for an 1800-hour work-year and inflation, and multiplied by 2.93 to account for bonuses, firm size, employee benefits, and overhead.

[22] This estimate is based on the following calculations: (10 minutes × 840 fund groups = 8,400 minutes); (8,400 minutes/60 = 140 hours); (140 hours × $64 = $8,960).

[23] This estimate is based on the following calculations: (10,080 hours + 16,400 hours + 140 hours = 26,620 hours); ($4,284,000 + $6,970,000 + $8,960 = $11,262,960).

[24] This estimate is based on the following calculations: (52 + 365 = 417); (417 × 840 fund groups = 350,280).

[25] This estimate is based on the following calculations: (468 hours (board determination) + 26,620 hours (information sharing agreements) = 27,088 total hours); ($382,500 (board determination) + $11,262,960 (information sharing agreements) = $11,645,460).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93177; File No. SR–ICC–2021–019]

Self-Regulatory Organizations; ICE Clear Credit LLC; Notice of Filing of Proposed Rule Change Relating to the ICC CDS Instrument On-Boarding Policies and Procedures

September 29, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934,[1] and Rule 19b–4,[2] notice is hereby given that on September 22, 2021, ICE Clear Credit LLC (''ICC'') filed with the Securities and Exchange Commission the proposed rule change as described in Items I, II and III below, which Items have been prepared primarily by ICC. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The principal purpose of the proposed rule change is to revise the CDS Instrument On-boarding Policies and Procedures (''Instrument On-boarding Policy''). These revisions do not require any changes to the ICC Clearing Rules (''Rules'').

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, ICC included statements concerning the purpose of and basis for the proposed rule change, security-based swap submission, or advance notice and discussed any comments it received on the proposed rule change, security-based swap submission, or advance notice. The text of these statements may be examined at the places specified in Item IV below. ICC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(a) Purpose

ICC proposes to amend the Instrument On-boarding Policy. This document provides an overview of ICC's on-boarding process for new instruments, which includes selecting new instruments for clearing, configuring internal systems, notifying and receiving feedback from stakeholders, and ensuring operational readiness by ICC and its Clearing Participants (''CPs''). The proposed changes amend the guiding principles that ICC maintains for instrument selection. ICC believes that such changes will facilitate the prompt and accurate clearance and settlement of securities transactions and derivative agreements, contracts, and transactions for which it is responsible. ICC proposes to make such changes effective following Commission approval of the proposed rule change. The proposed rule change is described in detail as follows.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

ICC proposes amendments to the Subsection III.A which discusses the guiding principles that ICC maintains for considering instruments for clearing. Such principles are designed to ensure that ICC proceeds in a prudent manner with respect to instrument selection while also providing the best opportunity for CPs to minimize their risk. The proposed changes incorporate an additional guiding principle to consider instruments that are constituents of the currently clearable On-The-Run (''OTR'') indices to become clearing eligible in order to provide additional instruments to hedge and mitigate indirect risk exposure from the OTR indices. For other instruments that are not constituents of currently clearable OTR indices, the current guiding principles would remain and ICC would continue to consider instrument open interest and volume. For all instruments, ICC would continue to consider instruments that can be cleared through ICC's systems and processes and to support industry wide initiatives and protocols.

(b) Statutory Basis

ICC believes that the proposed rule change is consistent with the requirements of Section 17A of the Act [3] and the regulations thereunder applicable to it, including the applicable standards under Rule 17Ad–22.[4] In particular, Section 17A(b)(3)(F) of the Act [5] requires that the rule change be consistent with the prompt and accurate clearance and settlement of securities transactions and derivative agreements, contracts and transactions cleared by ICC, the safeguarding of securities and funds in the custody or control of ICC or for which it is responsible, and the protection of investors and the public interest. As described above, the proposed changes incorporate an additional guiding principle that ICC consider instruments that are constituents of the currently clearable OTR indices to become clearing eligible in order to provide additional instruments to hedge and mitigate indirect risk exposure from the OTR indices. ICC believes that such changes would support and enhance the guiding principles and ensure that ICC continues to proceed in a prudent manner with respect to instrument selection while also providing CPs the best opportunity to minimize their risk. Moreover, the Instrument On-boarding Policy will continue to ensure that ICC's risk models adequately capture the risks associated with proposed new instruments and that the end-of-day price discovery process operates effectively and provides reliable prices for proposed new instruments, including through the risk management and pricing configuration and evaluation and the dress rehearsal. The proposed rule change is therefore consistent with the prompt and accurate clearing and settlement of the contracts cleared by ICC, the safeguarding of securities and funds in the custody or control of ICC or for which it is responsible, and the protection of investors and the public interest, within the meaning of Section 17A(b)(3)(F) of the Act.[6]

The amendments would also satisfy relevant requirements of Rule 17Ad–22.[7] Rule 17Ad–22(e)(2)(i) and (v) [8] requires each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to provide for governance arrangements that are clear and transparent and specify clear and direct lines of responsibility. The Instrument On-boarding Policy continues to describe the roles and responsibilities of relevant stakeholders with respect to instrument selection and subject new instruments to ICC's governance process. As such, in ICC's view, the proposed rule change continues to ensure that ICC maintains policies and procedures that are reasonably designed to provide for clear and transparent governance arrangements and specify clear and direct lines of responsibility, consistent with Rule 17Ad–22(e)(2)(i) and (v).[9]

Rule 17Ad–22(e)(4)(ii) [10] requires each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to effectively identify, measure, monitor, and manage its credit exposures to participants and those arising from its payment, clearing, and settlement processes, including by maintaining additional financial resources at the minimum to enable it to cover a wide range of foreseeable stress scenarios that include, but are not limited to, the default of the two participant families that would potentially cause the largest aggregate credit exposure for the covered clearing agency in extreme but plausible market conditions. The proposed changes distinguish a category of instruments that are constituents of the currently clearable OTR indices to provide additional instruments to hedge and mitigate indirect risk exposure from the OTR indices. New instruments will continue to be subject to the risk management and pricing configuration and evaluation and the dress rehearsal under the Instrument On-boarding Policy to ensure that ICC's risk models adequately capture the risks associated with new instruments and that the end-of-day price discovery process operates effectively, thereby supporting ICC's ability to maintain its financial resources and withstand the pressures of defaults, consistent with the requirements of Rule 17Ad–22(e)(4)(ii).[11]

Rule 17Ad–22(e)(17) [12] requires, in relevant part, each covered clearing agency to establish, implement, maintain, and enforce written policies and procedures reasonably designed to manage its operational risks by (i) identifying the plausible sources of operational risk, both internal and external, and mitigating their impact through the use of appropriate systems, policies, procedures, and controls; and (ii) ensuring that systems have a high degree of security, resiliency, operational reliability, and adequate, scalable capacity. The Instrument On-boarding Policy continues to describe the process, including testing and preparation, for the introduction of new instruments to ensure that ICC and its CPs are operationally ready and that ICC proceeds in a controlled manner, thereby supporting ICC's ability to identify the plausible sources of operational risk and mitigate their impact and ensure that systems have a high degree of security, resiliency, operational reliability, and adequate, scalable capacity, consistent with the requirements of Rule 17Ad–22(e)(17).[13]

Rule 17Ad–22(e)(21) [14] requires, among other things, that each covered clearing agency establish, implement, maintain, and enforce written policies and procedures reasonably designed to be efficient and effective in meeting the requirements of its participants and the markets it serves. The proposed changes are designed to provide additional instruments to hedge and mitigate indirect risk exposure from the OTR indices. Such changes would support and enhance the guiding principles by ensuring that ICC continues to proceed in a prudent manner with respect to instrument selection while also providing CPs the best opportunity to

minimize their risk, thereby allowing ICC to be efficient and effective in meeting the requirements of its participants and the markets it serves, consistent with Rule 17Ad–22(e)(21).[15]

(B) Clearing Agency's Statement on Burden on Competition

ICC does not believe the proposed amendments would have any impact, or impose any burden, on competition not necessary or appropriate in furtherance of the purpose of the Act. The proposed changes to the Instrument On-boarding Policy will apply uniformly across all market participants. Therefore, ICC does not believe the proposed rule change imposes any burden on competition not necessary or appropriate in furtherance of the purpose of the Act.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments relating to the proposed rule change have not been solicited or received. ICC will notify the Commission of any written comments received by ICC.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–ICC–2021–019 on the subject line.

Paper Comments

Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR–ICC–2021–019. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filings will also be available for inspection and copying at the principal office of ICE Clear Credit and on ICE Clear Credit's website at *https://www.theice.com/clear-credit/regulation.* All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–ICC–2021–019 and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93195; File No. SR–OCC–2021–009]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Revise the Options Clearing Corporation's Schedule of Fees

September 29, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Exchange Act'' or ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 28, 2021, The Options Clearing Corporation (''OCC'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared primarily by OCC. OCC filed the proposed rule change pursuant to Section 19(b)(3)(A)(ii)[3] of the Act and Rule 19b–4(f)(2)[4] thereunder so that the proposal was effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change by OCC would revise OCC's schedule of fees to implement a fee holiday for the period beginning November 1, 2021, and ending December 31, 2021. OCC's schedule of fees is included as Exhibit 5 to File No. SR–OCC–2021–009. Material proposed to be added to OCC's schedule of fees as currently in effect is underlined and material proposed to be deleted is marked in strikethrough text. All capitalized terms not defined herein have the same meaning as set forth in the OCC By-Laws and Rules.[5]

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, OCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(ii).

[4] 17 CFR 240.19b–4(f)(2).

[5] OCC's By-Laws and Rules can be found on OCC's public website: *https://www.theocc.com/Company-Information/Documents-and-Archives/By-Laws-and-Rules.*

may be examined at the places specified in Item IV below. OCC has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of these statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Purpose

The purpose of this proposed rule change is to revise OCC's schedule of fees to implement a fee holiday for the period beginning November 1, 2021, and ending December 31, 2021. OCC's Capital Management Policy (''Policy'') provides that OCC reviews its fee schedule on a periodic basis in consideration of factors including, but not limited to, projected operating expenses, projected volumes, anticipated cash flows, and capital needs.[6] Provided that OCC's shareholders' equity (''Equity''), less the minimum persistent amount of capital that OCC maintains exclusively to address losses or liquidity shortfalls arising from member defaults (the ''Minimum Corporate Contribution''),[7] exceeds 110% of the Target Capital Requirement [8] (''Early Warning'') [9] plus any amount approved for capital expenditures, OCC's Board, or a Committee the Board has delegated, may use tools as it considers appropriate to lower costs for Clearing Members. Such tools for reducing the cost of clearing include lowering fees, declaring a fee holiday, or issuing refunds.[10]

OCC has experienced record volumes in 2021 while maintaining expenses at or around the budgeted amount. These strong financial results put OCC in a position to continue to invest resources in OCC's initiative to update and upgrade its technology infrastructure for critical clearing and settlement services, risk systems and data management,[11] while at the same time lowering the cost of clearing for the users of the markets OCC serves. Accordingly, effective June 1, 2021, OCC lowered its clearing fee from $0.045 per contract to $0.02 per contract.[12]

As of June 30, 2021, OCC maintained Equity of approximately $693 million, or approximately $418 million more than the Early Warning.[13] Based on projections of contract volume and expenses, OCC believes that it can implement a two-month fee holiday while maintaining sufficient revenue to support OCC's operations and capital needs, including 2021 cash needs related to OCC's technology infrastructure transformation.[14] Accordingly, OCC proposes to modify its fee schedule to decrease both its per contract and per trade clearing fees to $0 for the last two months of 2021.[15]

Fee schedule		Proposed fee holiday from November 1, 2021 to December 31, 2021	
Clearing Fees		Clearing Fees	
Trades with contracts of 0–2,750	$0.02/contract	Trades with contracts of 0–2,750	$0/contract.
Trades with contracts of more than 2,750	$55/trade	Trades with contracts of more than 2,750	$0/trade.

OCC proposes to make the fee change effective November 1, 2021, because OCC believes that this date is the first date that the industry could be prepared to process the new fee without disruption based on consultations with market participants.[16] Effective the first trading day of 2022, clearing fees will revert to the fee schedule in effect before November 1, 2021 and OCC will remove the fee holiday from its schedule of fees.

(2) Statutory Basis

Section 17A(b)(3)(D) of the Act [17] requires that the rules of a clearing agency provide for the equitable allocation of reasonable dues, fees, and other charges among its participants. OCC believes that the proposed fee holiday is reasonable because it is designed to decrease the cost of clearing while maintaining sufficient reserves in the form of liquid net assets to cover OCC's operating expenses and address potential business or operational losses so that OCC can continue to meet its obligations as a systemically important financial market utility to Clearing Members and the general public if such losses were to materialize (including through a recovery or orderly wind-down of critical operations and services) and thereby facilitating compliance with certain requirements of Rule 17Ad–22(e)(15)(ii).[18]

In determining the appropriateness of a fee holiday, the CPC considered a variety of factors, including the projected revenue loss that would result from a two-month fee holiday, projected expenses, projected average daily volume, and a scenario analysis modeling the sensitivity of operating income, adjusting for different clearing fee levels.[19] The CPC also considered OCC's cash needs through 2021 to support its technology transformation initiative. OCC believes that the proposed fee holiday is reasonable and consistent with its existing By-Laws and Rules. OCC also believes that the proposed fee holiday would result in an equitable allocation of fees among its participants because it would be equally applicable to all market participants. As a result, OCC believes that the proposed fee holiday provides for the equitable

allocation of reasonable fees in accordance with Section 17A(b)(3)(D) of the Act.[20]

The proposed rule change is not inconsistent with the existing rules of OCC, including any other rules proposed to be amended.

(B) Clearing Agency's Statement on Burden on Competition

Section 17A(b)(3)(I) of the Act[21] requires that the rules of a clearing agency not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. OCC does not believe that the proposed rule change would have any impact or impose a burden on competition. Although this proposed rule change affects clearing members, their customers, and the markets that OCC serves, OCC believes that the proposed rule change would not disadvantage or favor any particular user of OCC's services in relationship to another user because the proposed fee holiday applies equally to all users of OCC. Accordingly, OCC does not believe that the proposed rule change would have any impact or impose a burden on competition.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

Written comments on the proposed rule change were not and are not intended to be solicited with respect to the proposed rule change and none have been received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Pursuant to Section 19(b)(3)(A)(ii)[22] of the Act, and Rule 19b–4(f)(2) thereunder,[23] the proposed rule change is filed for immediate effectiveness as it constitutes a change in fees charged to OCC's members. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.[24]

[20] 15 U.S.C. 78q–1(b)(3)(D).

[21] 15 U.S.C. 78q–1(b)(3)(I).

[22] 15 U.S.C. 78s(b)(3)(A)(ii).

[23] 17 CFR 240.19b–4(f)(2).

[24] Notwithstanding its immediate effectiveness, implementation of this rule change will be delayed until this change is deemed certified under CFTC Regulation 40.6.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–OCC–2021–009 on the subject line.

Paper Comments

- Send paper comments in triplicate to Vanessa Countryman, Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–OCC–2021–009. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of OCC.

All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–OCC–2021–009 and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[25]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93186; File No. SR–NYSEArca–2021–85]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend NYSE Arca Rules 7.2–E and 7.2–O

September 30, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 28, 2021, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Arca Rules 7.2–E and 7.2–O (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange. Juneteenth National Independence Day was designated a legal public holiday in June 2021. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE Arca Rules 7.2–E and 7.2–O (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange.

On June 17, 2021, Juneteenth National Independence Day was designated a legal public holiday.[3] Consistent with broad industry sentiment [4] and the approach recommended by the Securities Industry and Financial Markets Association (''SIFMA''),[5] the Exchange proposes to add ''Juneteenth National Independence Day'' to the existing list of holidays in the first paragraph of NYSE Arca Rules 7.2–E and 7.2–O. As a result, the Exchange will not be open for business on Juneteenth National Independence Day, which falls on June 19 of each year. In accordance with the second paragraph of NYSE Arca Rules 7.2–E and 7.2–O, when the holiday falls on a Saturday, the Exchange will not be open for business on the preceding Friday, and when it falls on a Sunday, the Exchange will not be open for business on the succeeding Monday.[6]

The first paragraph of the revised rule would read as follows (proposed additions *italicized*):

The Exchange will not be open for business on New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, *Juneteenth National Independence Day,* Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed change would remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors and the public interest because the proposed amended rule would clearly state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The change would thereby promote clarity and transparency in the Exchange rules by updating the list of holidays of the Exchange.

The proposed change does not raise any new or novel issues.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[9] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather to amend the Exchange rule regarding holidays.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [10] and Rule 19b–4(f)(6)(iii) thereunder.[11]

A proposed rule change filed under Rule 19b–4(f)(6) [12] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[13] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative prior to 30 days after the date of the filing. The Exchange states that waiver of the operative delay would be consistent with the protection of investors and the public interest because the proposed rule change, as described above, would state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The Exchange further states that the proposed change does not raise any new or novel issues. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings

[10] 15 U.S.C. 78s(b)(3)(A).

[11] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[12] 17 CFR 240.19b–4(f)(6).

[13] 17 CFR 240.19b–4(f)(6)(iii).

[14] For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2021–85 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2021–85. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2021–85, and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93174; File No. SR–CboeBZX–2021–052]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change To List and Trade Shares of the Global X Bitcoin Trust Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares

September 29, 2021.

On August 3, 2021, Cboe BZX Exchange, Inc. (''BZX'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the Global X Bitcoin Trust under BZX Rule 14.11(e)(4). The proposed rule change was published for comment in the **Federal Register** on August 23, 2021.[3] The Commission has received comments on the proposed rule change.[4]

Section 19(b)(2) of the Act[5] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is October 7, 2021. The Commission is extending this 45-day time period.

The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change and the comments received. Accordingly, pursuant to Section 19(b)(2) of the Act,[6] the Commission designates November 21, 2021, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR–CboeBZX–2021–052).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

J. Matthew DeLesDernier,

Assistant Secretary.

Extension:
Form ADV–E

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management and Budget for extension and approval.

Form ADV–E (17 CFR 279.8) is the cover sheet for certificates of accounting filed pursuant to rule 206(4)–2 under the Investment Advisers Act of 1940 (17 CFR 275.206(4)–2). The rule further requires that the public accountant file with the Commission a Form ADV–E and accompanying statement within four business days of the resignation, dismissal, removal or other termination of its engagement.

The Commission has estimated that compliance with the requirement to complete Form ADV–E imposes a total burden of approximately 0.05 hours (3 minutes) per respondent. Based on current information from advisers

[7] 17 CFR 200.30–3(a)(31).

registered with the Commission, the Commission staff estimates that 1,743 filings will be submitted with respect to surprise examinations and 33 filings will be submitted with respect to termination of accountants. Based on these estimates, the total estimated annual burden would be 88.80 hours ((1,743 filings × .05 hours) + (33 filings × .05 hours)).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication. An agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

Please direct your written comments to David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, C/O Cynthia Roscoe, 100 F Street NE, Washington, DC 20549; or send an email to: *PRA_Mailbox@sec.gov.*

Dated: September 29, 2021.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–298, OMB Control No. 3235–0337]

Proposed Collection; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Extension:
Rule 17Ac2–2 and Form TA–2

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the existing collection of information provided for in Rule 17Ac2–2(17 CFR 240.17Ac2–2) and Form TA–2 under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act''). The Commission plans to submit this existing collection of information to the Office of Management and Budget (''OMB'') for extension and approval.

Rule 17Ac2–2 and Form TA–2 require registered transfer agents to file an annual report of their business activities with the Commission. These reporting requirements are designed to ensure that all registered transfer agents are providing the Commission with sufficient information on an annual basis about the transfer agent community and to permit the Commission to effectively monitor business activities of transfer agents.

The amount of time needed to comply with the requirements of Rule 17Ac2–2 and Form TA–2 varies. Of the total 362 registered transfer agents, approximately 9.2% (or 33 registrants) would be required to complete only questions 1 through 3 and the signature section of Form TA–2, which the Commission estimates would take each registrant approximately 30 minutes, for a total burden of approximately 17 hours (33 × .5 hours). Approximately 26.5% of registrants (or 96 registrants) would be required to answer questions 1 through 5, question 11 and the signature section, which the Commission estimates would take approximately 1 hour and 30 minutes, for a total of approximately 144 hours (96 × 1.5 hours). Approximately 64.2% of the registrants (or 232 registrants) would be required to complete the entire Form TA–2, which the Commission estimates would take approximately 6 hours, for a total of approximately 1,392 hours (232 × 6 hours). The aggregate annual burden on all 362 registered transfer agents is thus approximately 1,553 hours (17 hours + 144 hours + 1,392 hours) and the average annual burden per transfer agent is approximately 4.29 hours (1,553 ÷ 362).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

Please direct your written comments to: David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or send an email to: *PRA_Mailbox@sec.gov.*

Dated: September 29, 2021.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–373; OMB Control No. 3235–0422]

Submission for OMB Review; Comment Request

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

Extension:
Rule 23c–3 and Form N–23c–3

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for extension of the previously approved collection of information discussed below.

Rule 23c–3 (17 CFR 270.23c–3) under the Investment Company Act of 1940 (15 U.S.C. 80a–1 *et seq.*) permits a registered closed-end investment company (''closed-end fund'' or ''fund'') that meets certain requirements to repurchase common stock of which it is the issuer from shareholders at periodic intervals, pursuant to repurchase offers made to all holders of the stock. The rule enables these funds to offer their shareholders a limited ability to resell their shares in a manner that previously was available only to open-end investment company shareholders.

There have been recent regulatory developments put forth by the Commission that will provide shareholders of closed-end funds with

additional benefits. Effective August 1, 2021, rule 23c–3 will be amended by including a new subparagraph (e) that will permit a fund that relies on rule 23c–3 to register an indefinite amount of securities, under Section 24 of the Investment Company Act upon the effectiveness of a fund's registration statement.[1] In addition, concurrent with the implementation of rule 23c–3(e), the Commission adopted an amendment to rule 24f–2 under the Investment Company Act, permitting closed-end funds to compute registration fees on an annual net basis.[2] The Commission's intent in proposing and adopting rules 23c–3(e) and 24f–2(a) respectively, was to avoid the possibility a closed-end fund of inadvertently selling more shares than it had registered.[3] These revisions to rule 23c–3 do not impose additional collections of information.

Notwithstanding these recent regulatory developments, a closed-end fund that relies on rule 23c–3 must send shareholders a notification that contains specified information each time the fund makes a repurchase offer (on a quarterly, semi-annual, or annual basis, or, for certain funds, on a discretionary basis not more often than every two years). The fund also must file copies of the shareholder notification with the Commission (electronically through the Commission's Electronic Data Gathering, Analysis, and Retrieval System (''EDGAR'')) on Form N–23c–3, a filing that provides certain information about the fund and the type of offer the fund is making.[4] The fund must describe in its annual report to shareholders the fund's policy concerning repurchase offers and the results of any repurchase offers made during the reporting period. The fund's board of directors must adopt written procedures designed to ensure that the fund's investment portfolio is sufficiently liquid to meet its repurchase obligations and other obligations under the rule. The board periodically must review the composition of the fund's portfolio and change the liquidity procedures as necessary. The fund also must file copies of advertisements and other sales literature with the Commission as if it were an open-end investment company subject to Section 24 of the Investment Company Act (15 U.S.C. 80a–24) and the rules that implement Section 24. Rule 24b–3 under the Investment Company Act (17 CFR 270.24b–3), however, exempts the fund from that requirement if the materials are filed instead with the Financial Industry Regulatory Authority (''FINRA'').

The requirement that the fund send a notification to shareholders of each offer is intended to ensure that a fund provides material information to shareholders about the terms of each offer. The requirement that copies be sent to the Commission is intended to enable the Commission to monitor the fund's compliance with the notification requirement. The requirement that the shareholder notification be attached to Form N–23c–3 is intended to ensure that the fund provides basic information necessary for the Commission to process the notification and to monitor the fund's use of repurchase offers. The requirement that the fund describe its current policy on repurchase offers and the results of recent offers in the annual shareholder report is intended to provide shareholders current information about the fund's repurchase policies and its recent experience. The requirement that the board approve and review written procedures designed to maintain portfolio liquidity is intended to ensure that the fund has enough cash or liquid securities to meet its repurchase obligations, and that written procedures are available for review by shareholders and examination by the Commission. The requirement that the fund file advertisements and sales literature as if it were an open-end fund is intended to facilitate the review of these materials by the Commission or FINRA to prevent incomplete, inaccurate, or misleading disclosure about the special characteristics of a closed-end fund that makes periodic repurchase offers.

The Commission staff estimates that 60 funds make use of rule 23c–3 annually, including 32 funds that are relying upon rule 23c–3 for the first time. The Commission staff estimates that on average a fund spends 89 hours annually in complying with the requirements of the rule and Form N–23c–3, with funds relying upon rule 23c–3 for the first time incurring an additional one-time burden of 28 hours. The Commission therefore estimates the total annual hour burden of the rule's and form's paperwork requirements to be 6,236 hours. In addition to the burden hours, the Commission staff estimates that the average yearly cost to each fund that relies on rule 23c–3 to print and mail repurchase offers to shareholders is about $32,744.13. The Commission estimates total annual cost is therefore about $1,964,647.

Estimates of average burden hours and costs are made solely for purposes of the Paperwork Reduction Act and are not derived from a comprehensive or even representative survey or study of the costs of Commission rules and forms. Compliance with the collection of information requirements of the rule and form is mandatory only for those funds that rely on the rule in order to repurchase shares of the fund. The information provided to the Commission on Form N–23c–3 will not be kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website:*www.reginfo.gov*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov*.

Dated: September 29, 2021.

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93178; File No. SR–ICEEU–2021–014]

Self-Regulatory Organizations; ICE Clear Europe Limited; Order Approving Proposed Rule Change, as Modified by Partial Amendment No. 1, Relating to the ICE Clear Europe Clearing Membership Policy and Clearing Membership Procedures

September 29, 2021.

I. Introduction

On August 2, 2021, ICE Clear Europe Limited (''ICE Clear Europe'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities

Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to adopt a new Clearing Membership Policy (the ''Policy'') and new Clearing Membership Procedures (the ''Procedures,'' and together with the Policy, the ''Documents''). The proposed Documents would consolidate and summarize ICE Clear Europe's existing clearing membership criteria and document certain existing processes and procedures concerning the membership application process. On August 11, 2021, ICE Clear Europe filed Partial Amendment No. 1 to the proposed rule change.[3] Notice of the proposed rule change, as modified by Partial Amendment No. 1, was published in the **Federal Register** on August 18, 2021.[4] The Commission did not receive comments on the proposed rule change, as modified by Partial Amendment No. 1. For the reasons discussed below, the Commission is approving the proposed rule change, as modified by Partial Amendment No. 1 (hereafter referred to as the ''proposed rule change'').

II. Description of the Proposed Rule Change

As described in more detail below, ICE Clear Europe proposes to adopt the Documents to consolidate and summarize its existing clearing membership criteria and to document certain existing processes and procedures concerning its membership application and monitoring processes to ensure that Clearing Members meet admission criteria upon initial membership and continue to meet such criteria throughout their membership.[5]

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] ICE Clear Europe filed Partial Amendment No. 1 to delete from the filed Exhibit 5B, Clearing Membership Procedures, certain statements in sections 2.4.1 and 2.4.2 of such Procedures concerning the termination of clearing membership by a Clearing Member. Specifically, ICE Clear Europe proposes to remove the statements that it will define a minimum notice period and may publish a Circular confirming that a Termination Notice has been issued, because the appropriate minimum notice period and requirements for publishing a Circular are set forth in existing Clearing Rule 209, which is not proposed to be amended. Partial Amendment No. 1 did not otherwise make any changes to the substance of the filing or the text of the proposed rule change.

[4] Self-Regulatory Organizations; ICE Clear Europe Limited; Notice of Filing of Proposed Rule Change, as Modified by Partial Amendment No. 1, Relating to the ICE Clear Europe Clearing Membership Policy and Clearing Membership Procedures, Exchange Act Release No. 92652 (August 12, 2021), 86 FR 46290 (August 18, 2021) (SR–ICEEU–2021–014) (''Notice'').

[5] Capitalized terms used but not defined herein have the meanings specified in the ICE Clear Europe Clearing Rules (the ''Rules''). The description herein of the proposed rule change is substantially excerpted from the Notice.

A. Clearing Membership Policy

The proposed new Policy would consolidate and summarize ICE Clear Europe's existing clearing membership criteria, which are set forth in full detail in the Rules, and its related processes for assessing applicants for membership, variations of permissions concerning membership class, and termination of membership, all of which would be documented in more detail in the proposed Procedures as described below.

The Policy would describe ICE Clear Europe's membership risks and state the objectives of the Policy to ensure that such risks are properly managed, and that clearing membership admission criteria are non-discriminatory, transparent, and objective to ensure fair and open access, and designed to meet relevant regulatory requirements. The Policy also would describe how such objectives are met by ICE Clear Europe through setting and monitoring appropriate membership criteria, establishing a due diligence process, and requiring prompt notifications from Clearing Members of any changes to their businesses that may impact a Clearing Member's ability to meet the membership criteria. The core clearing membership criteria, including holding sufficient capital, being a party to a Clearing Membership Agreement, and other financial and operational criteria, would be summarized in the Policy, with the full criteria set out in Rule 201 and the CDS Procedures.

In addition to a summary of the core clearing membership criteria, the Policy would provide that ICE Clear Europe has established processes for clearing membership application, permission variations, and clearing membership termination which are described in further detail in the Procedures. The Policy also would address the ongoing monitoring of membership criteria, including periodic in-depth counterparty reviews, periodic review of financial positions, updates to ICE Clear Europe's counterparty rating system, the maintenance of a watch list, requiring an annual member return from Clearing Members, and other operational monitoring processes such as daily margin calls and CDS end-of-day (''EOD'') price submissions.

Proposed section 5 of the Policy would provide document governance arrangements for breach management, ongoing reviews, and exception handling. Consistent with the document governance arrangements for other ICE Clear Europe policies and procedures, proposed section 5 would state that (i) the document owner is responsible for ensuring that documents remain up-to-date and are reviewed in accordance with ICE Clear Europe's governance processes, (ii) the document owner will report material breaches or unapproved deviations from the Policy document to the document owner's Head of Department, the Chief Risk Officer, and the Head of Compliance (or their delegates), who together will determine if further escalation should be made to relevant senior executives, the Board, and/or competent authorities, and (iii) exceptions to the Policy are approved in accordance with ICE Clear Europe's governance process for the approval of changes to the Policy document.

B. Clearing Membership Procedures

The proposed new Procedures would describe in further detail the processes for reviewing and approving applications for clearing membership, variations of membership permissions, ongoing monitoring, and membership termination. The stated objective of the Procedures would be to establish a due diligence process to ensure applicants meet ICE Clear Europe's membership criteria at the time of application and on an ongoing basis, and also provide notifications of any changes to their businesses that could impact their ability to meet the membership criteria.

The Procedures would describe each phase of the Clearing Member application process, starting with the Membership Department providing applicants with all relevant application documentation; the internal due diligence of applications by relevant ICE Clear Europe departments, including Operations, Risk, Treasury, Membership, AML/KYC, Risk Oversight, Compliance, and Legal; the process for approval or rejection of applications by the Executive Risk Committee under authority delegated by the Board, and the right to appeal to the Board; notifications of new applications for clearing membership to the relevant Product Risk Committees after their approval by the Executive Risk Committee; additional membership conditions or criteria that ICE Clear Europe may, in its discretion, require prior to approval; and additional information requests that ICE Clear Europe may make during the application process. The Procedures also would describe the process for a Clearing Member to obtain membership to a different membership class at ICE Clear Europe (*i.e.,* a CDS Clearing Member authorized to clear credit default swap (''CDS'') contracts, or an F&O Clearing Member authorized to become party to Energy Contracts or Financials & Softs Contracts, or both).

Regarding termination of clearing membership, the Procedures would cross-reference the procedures in existing Rule 209 for a Clearing Member to resign its clearing membership, and for ICE Clear Europe to terminate a Clearing Member's clearing membership.

The Procedures would provide detailed core membership requirements and additional information on core membership criteria, which would include minimum capital requirements as well as a description of additional financial requirements that ICE Clear Europe may impose on Clearing Members to meet the minimum capital requirement. The Procedures would address certain aspects of the calculation of member capital, including the disallowance of certain assets from such calculation as well as the methods that Clearing Members may use to add capital, where necessary, including the use of subordinated debt and controller guarantees if approved by ICE Clear Europe. The Procedures also would reference Guaranty Fund contributions for CDS and F&O clearing services, including the required replenishment of contributions in the event of application of the funds and the need to meet any additional assessment; the margin-to-capital ratio requirement; default management capabilities; and EOD price submissions, which apply only to CDS Clearing Members as required by the CDS EOD Price Discovery Policy.

The Procedures also would summarize ICE Clear Europe's ongoing monitoring of Clearing Members that include the following: (i) Periodic review of the financial position and compliance with the relevant membership requirements of each Clearing Member; (ii) quarterly review of Clearing Members' capital situation and financial information, and monthly reviews of the financial information of FCM/BD Clearing Members; (iii) quarterly counterparty rating system report, which aggregates risk factors covering credit, market price, liquidity, and operational risk for each Clearing Member; (iv) the watch list highlighting Clearing Members with special risk situations; (v) annual member returns pursuant to which Clearing Members must provide certain information to ICE Clear Europe on Anti-Money Laundering/Know Your Client (''AML/KYC'') requirements, authorized signatories, compliance with the Rules, and key contact information; and (vi) daily monitoring of Clearing Member operational performance in fulfilling financial obligations to cover cash payments, margin collateral, Guaranty Fund contributions, and delivery obligations.

Finally, the Procedures would also set out the same document governance arrangements for breach management, ongoing reviews, and exception handling as those described above with respect to the Policy.

III. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to such organization.[6] For the reasons given below, the Commission finds that the proposed rule change, as modified by Partial Amendment No. 1, is consistent with Section 17A(b)(3)(F) of the Act[7] and Rules 17Ad–22(e)(2)(i) and (v), and (e)(18) thereunder.[8]

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, among other things, that the rules of ICE Clear Europe be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions, as well as to assure the safeguarding of securities and funds which are in the custody or control of ICE Clear Europe or for which it is responsible.[9]

As discussed above, the proposed rule change would adopt a new Clearing Membership Policy and new Clearing Membership Procedures. The proposed Documents would consolidate and summarize existing clearing membership criteria and related processes in the Rules that govern clearing membership at ICE Clear Europe. For the reasons discussed below, the Commission believes that the proposed rule change would enable ICE Clear Europe to manage and mitigate the risks posed by Clearing Members, including the risk of membership defaults and the potential loss of mutualized funds resulting from Clearing Member failures to meet clearing membership criteria. The Commission further believes that, in turn, managing effectively such risks would enable ICE Clear Europe to promote the prompt and accurate clearance and settlement of securities transactions and help assure the safeguarding of securities and funds which are in the custody or control of ICE Clear Europe or for which it is responsible.

i. Clearing Membership Policy

As discussed above, the proposed rule change would establish a new Policy that consolidates and summarizes ICE Clear Europe's existing clearing membership criteria and the existing processes that ICE Clear Europe undertakes to assess applicants for membership, monitor Clearing Member adherence to the membership criteria on an ongoing basis, authorize variations of permissions to Clearing Members, and terminate membership, whether initiated by the Clearing Member or by ICE Clear Europe. The Policy would state that it is designed to ensure that membership risks are properly managed, and that clearing membership admission criteria are non-discriminatory, transparent, and objective to ensure fair and open access, and also meet relevant regulatory requirements. The Policy would summarize how ICE Clear Europe achieves such objectives by setting appropriate membership criteria and monitoring ongoing adherence to such criteria; establishing a due diligence process that ensures that applicants meet the membership criteria when admitted and on a continuing basis; and requiring prompt notifications from Clearing Members of any changes to their businesses that may impact a Clearing Member's ability to meet the membership criteria. The Policy also would establish document governance and procedures for breach management and exceptions and changes to the Policy document.

By creating a consolidated summary of existing clearing membership criteria for admitting applicants and the related processes that ICE Clear Europe currently undertakes for monitoring and terminating Clearing Members, the Commission believes that the Policy would facilitate ICE Clear Europe's ability to implement the membership risk management objectives of the Policy and thereby enhance its overall risk management. In the Commission's view, enhanced management of membership risks is critical to mitigating the risk of Clearing Member defaults that could undermine ICE Clear Europe's ability to maintain prompt and accurate clearance and settlement of securities transactions and the safeguarding of securities and funds at ICE Clear Europe. For example, ICE Clear Europe relies on accurate end-of-day prices to generate margin

[6] 15 U.S.C. 78s(b)(2)(C).

[7] 15 U.S.C. 78q–1(b)(3)(F).

[8] 17 CFR 240.17Ad–22(e)(2)(i) and (v), and (e)(18).

[9] 15 U.S.C. 78q–1(b)(3)(F).

requirements, which it uses to manage the risks associated with clearing CDS portfolios. Similarly, ICE Clear Europe relies on its default management tools to help manage and reduce the risks associated with a defaulting Clearing Member's portfolio. Such risks, if not properly managed, could cause ICE Clear Europe to realize losses on such portfolios and could disrupt ICE Clear Europe's ability to promptly and accurately clear CDS and other derivative transactions and safeguard securities and funds which are in the custody or control of ICE Clear Europe or for which it is responsible. For these reasons, the Commission believes that the proposed rule change, in establishing a new Policy that clearly and succinctly documents membership criteria and the related processes for admitting, monitoring, and terminating Clearing Members, would promote the prompt and accurate clearance and settlement of securities transactions and help assure the safeguarding of securities and funds which are in the custody or control of ICE Clear Europe or for which it is responsible. Finally, the Commission believes that, in defining the responsibilities of the document owner in document governance, breach management, and exception handling, the Policy would help to ensure ongoing and consistent compliance with ICE Clear Europe's clearing membership criteria and related processes for admission to membership, monitoring, and termination of membership, as well as establish a process to modify the Policy as needed.

ii. Clearing Membership Procedures

As discussed above, the new Procedures would describe in further detail ICE Clear Europe's existing processes for reviewing applications for clearing membership, variations of membership permissions, ongoing monitoring, and membership termination. The Procedures would have a stated objective for the membership application process to establish a due diligence process to ensure applicants meet ICE Clear Europe's membership criteria at the time of application and on an ongoing basis after admission, and also provide notifications of any changes to their businesses that could impact their ability to meet the membership criteria. The Procedures would provide the same document governance arrangements for breach management, ongoing reviews, and exception handling as those described above with respect to the Policy.

By creating a consolidated summary that would describe the application of ICE Clear Europe's existing procedures and processes for reviewing applications for clearing membership, variations of membership permissions, ongoing monitoring, and termination of membership, the Commission believes that the Procedures would enhance ICE Clear Europe's ability to implement the complementary objectives of the Documents and thereby enhance its membership risk management policies and procedures that contribute to the effectiveness of its overall risk management. Also, in defining the responsibilities of the document owner in document governance, breach management, and exception handling, the Procedures would help to ensure ongoing and consistent compliance with ICE Clear Europe's general governance and exceptions process for the Procedures document.

iii. Promoting the Prompt and Accurate Clearance and Settlement of Securities Transactions, and Assuring the Safeguarding of Securities and Funds

For the reasons discussed above, the Commission believes that the proposed rule change would help to ensure that ICE Clear Europe effectively manages the potential risks posed by its Clearing Members in the clearance and settlement of CDS and other derivative contracts and transactions cleared at ICE Clear Europe. Moreover, the Commission believes that such membership risks, if not properly managed, could threaten ICE Clear Europe's ability to operate and thereby clear and settle cleared contracts, and also could threaten access to securities and funds in ICE Clear Europe's control. Accordingly, the Commission believes that, in ensuring that ICE Clear Europe has clear and effective processes and procedures for identifying and managing membership risks by setting appropriate membership criteria; assessing applicants for membership based on such criteria; monitoring Clearing Member adherence to the membership criteria on an ongoing basis; authorizing variations of permissions to Clearing Members; terminating membership; and establishing clear document governance procedures for the Documents, the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions and help assure the safeguarding of securities and funds which are in the custody or control of the ICE Clear Europe or for which it is responsible.

Therefore, the Commission finds that the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions, and assure the safeguarding of securities and funds in ICE Clear Europe's custody or control, consistent with the Section 17A(b)(3)(F) of the Act.[10]

B. Consistency With Rule 17Ad–22(e)(2)(i) and (v) Under the Act

Rule 17Ad–22(e)(2)(i) and (v) require that ICE Clear Europe establish, implement, maintain, and enforce written policies and procedures reasonably designed to provide for governance arrangements that are clear and transparent and specify clear and direct lines of responsibility, respectively.[11] As discussed above, each of the Documents would establish the general governance and exceptions process for that document, and this process would be identical between the Documents. The Commission believes that, in doing so, the Documents would establish clear and transparent arrangements for ensuring that ICE Clear Europe personnel adhere to the Documents and for modifying the Documents as needed. The Commission also believes that the Documents would define clearly the roles and responsibilities of the document owner, the Head of Department, the Chief Risk Officer, and the Head of Compliance for document governance, breach management, and exception handling. The Commission believes that these lines of responsibility would be clear and transparent because they would be defined and readily available for review in the Documents.

As discussed above, the Procedures would define the roles and responsibilities of the relevant departments within ICE Clear Europe in the application process prior to submission of applications to the Executive Risk Committee for approval. The Procedures would specify that applications for membership are formally considered, and approved and rejected by, the Executive Risk Committee, and that the relevant Product Risk Committees are notified of approved applications. The Commission believes that these aspects of the proposed rule change would help to ensure that the governance regarding review and approval of applicants is clear and transparent, and also establishes a clear and direct line of responsibility, by clearly specifying that the Executive Risk Committee would approve or disapprove applications under delegated authority from the Board. The Commission believes this would therefore clearly specify the

[10] 15 U.S.C. 78q–1(b)(3)(F).

[11] 17 CFR 240.17Ad–22(e)(2)(i) and (v).

responsibility of ICE Clear Europe management in approving or rejecting applicants.

For these reasons, the Commission finds that the proposed rule change is consistent with Rule 17Ad–22(e)(2)(i) and (v).[12]

C. Consistency With Rule 17Ad–22(e)(18) Under the Act

Rule 17Ad–22(e)(18) requires that ICE Clear Europe establish, implement, maintain, and enforce written policies and procedures reasonably designed to establish objective, risk-based, and publicly disclosed criteria for participation, which permit fair and open access by direct and, where relevant, indirect participants and other financial market utilities, to require participants to have sufficient financial resources and robust operational capacity to meet obligations arising from participation in the clearing agency, and monitor compliance with such participation requirements on an ongoing basis.[13]

As discussed above, the Documents would summarize the core membership requirements and additional information on core membership criteria, which would include minimum capital requirements as well as a description of additional financial requirements that ICE Clear Europe may impose on Clearing Members to meet the minimum capital requirement. In particular, the Procedures would address more detailed aspects of the calculation of member capital; Guaranty Fund contributions for both CDS and F&O clearing services; the margin-to-capital ratio requirement; default management capabilities; and EOD price submissions for CDS Clearing Members. The Commission believes that these aspects of the proposed rule change would establish objective, risk-based, and disclosed clearing membership criteria that require applicants for clearing membership to prove that they have sufficient financial resources and robust operational capacity to meet obligations arising from participation in ICE Clear Europe. Moreover, the Commission believes that these criteria represent objective criteria which any applicant for clearing membership could potentially satisfy, thereby permitting fair and open access to membership at ICE Clear Europe.

As discussed above, the Documents also would summarize ICE Clear Europe's ongoing monitoring of Clearing Members that would include: (i) Periodic review of the financial position and compliance with the relevant membership requirements of each Clearing Member; (ii) quarterly review of Clearing Members' capital situation and financial information, and monthly reviews of the financial information of FCM/BD Clearing Members; (iii) quarterly counterparty rating system report, which aggregates risk factors covering credit, market price, liquidity, and operational risk for each Clearing Member; (iv) the watch list highlighting Clearing Members with special risk situations; (v) annual member returns pursuant to which Clearing Members must provide certain information to ICE Clear Europe on AML/KYC requirements, authorized signatories, compliance with the Rules, and key contact information; and (vi) daily monitoring of Clearing Member operational performance in fulfilling financial obligations to cover cash payments, margin collateral, Guaranty Fund contributions, and delivery obligations. The Commission believes that these aspects of the proposed rule change would facilitate ICE Clear Europe's ability to monitor compliance by Clearing Members with its participation requirements on an ongoing basis and thereby mitigate the risks posed by Clearing Members who may no longer meet the requirements for continuing participation in ICE Clear Europe.

For these reasons, the Commission finds that the proposed rule change is consistent with Rule 17Ad–22(e)(18).[14]

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and in particular, with the requirements of Section 17A(b)(3)(F) of the Act[15] and Rules 17Ad–22(e)(2)(i) and (v), and (e)(18) thereunder.[16]

It is therefore ordered pursuant to Section 19(b)(2) of the Act[17] that the proposed rule change (SR–ICEEU–2021–014), be, and hereby is, approved.[18]

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93203; File No. SR–NYSE–2021–57]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Extend the Pilot Related to the Market-Wide Circuit Breaker in Rule 7.12

September 30, 2021.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that on September 29, 2021, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to extend the pilot related to the market-wide circuit breaker in Rule 7.12 to the close of business on March 18, 2022. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries,

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to extend the pilot related to the market-wide circuit breaker in Rule 7.12 to the close of business on March 18, 2022.

Background

The Market-Wide Circuit Breaker (''MWCB'') rules, including the Exchange's Rule 7.12, provide an important, automatic mechanism that is invoked to promote stability and investor confidence during periods of significant stress when cash equities securities experience extreme market-wide declines. The MWCB rules are designed to slow the effects of extreme price declines through coordinated trading halts across both cash equity and equity options securities markets.

The cash equities rules governing MWCBs were first adopted in 1988 and, in 2012, all U.S. cash equity exchanges and FINRA amended their cash equities uniform rules on a pilot basis (the ''Pilot Rules,'' *i.e.,* Rule 7.12 (a)–(d)).[4] The Pilot Rules currently provide for trading halts in all cash equity securities during a severe market decline as measured by a single-day decline in the S&P 500 Index (''SPX'').[5] Under the Pilot Rules, a market-wide trading halt will be triggered if SPX declines in price by specified percentages from the prior day's closing price of that index. The triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3). A market decline that triggers a Level 1 or Level 2 halt after 9:30 a.m. and before 3:25 p.m. would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. would not halt market-wide trading. (Level 1 and Level 2 halts may occur only once a day.) A market decline that triggers a Level 3 halt at any time during the trading day would halt market-wide trading for the remainder of the trading day.

The Commission approved the Pilot Rules, the term of which was to coincide with the pilot period for the Plan to Address Extraordinary Market Volatility Pursuant to Rule 608 of Regulation NMS (the ''LULD Plan''),[6] including any extensions to the pilot period for the LULD Plan.[7] In April 2019, the Commission approved an amendment to the LULD Plan for it to operate on a permanent, rather than pilot, basis.[8] In conjunction with the proposal to make the LULD Plan permanent, the Exchange amended Rule 80B to untie the Pilot Rules' effectiveness from that of the LULD Plan and to extend the Pilot Rules' effectiveness to the close of business on October 18, 2019.[9] The Exchange subsequently amended Rule 80B [10] and the corresponding Pillar rule, Rule 7.12, to extend the Pilot Rules' effectiveness for an additional year to the close of business on October 18, 2020,[11] and later, on October 18, 2021.[12]

The Exchange now proposes to amend Rule 7.12 [13] to extend the pilot to the close of business on March 18, 2022. This filing does not propose any substantive or additional changes to Rule 7.12.

The MWCB Task Force and the March 2020 MWCB Events

In late 2019, Commission staff requested the formation of a MWCB Task Force (''Task Force'') to evaluate the operation and design of the MWCB mechanism. The Task Force included representatives from the SROs, the Commission, CME, the Commodity Futures Trading Commission (''CFTC''), and the securities industry and conducted several organizational meetings in December 2019 and January 2020.

In Spring 2020, the MWCB mechanism proved itself to be an effective tool for protecting markets through turbulent times. In March 2020, at the outset of the worldwide COVID–19 pandemic, U.S. equities markets experienced four MWCB Level 1 halts, on March 9, 12, 16, and 18, 2020. In each instance, the markets halted as intended upon a 7% drop in the S&P 500 Index, and resumed as intended 15 minutes later.

In response to these events, in the Spring and Summer of 2020, the Task Force held ten meetings that were attended by Commission staff, with the goal of performing an expedited review of the March 2020 halts and identifying any areas where the MWCB mechanism had not worked properly. Given the risk of unintended consequences, the Task Force did not recommend changes that were not rooted in a noted deficiency. The Task Force recommended creating a process for a backup reference price in the event that SPX were to become unavailable, and enhancing functional MWCB testing. The Task Force also asked CME to consider modifying its rules to enter into a limit-down state in the futures pre-market after a 7% decline instead of 5%. CME made the requested change, which became effective on October 12, 2020.[14]

The MWCB Working Group's Study

On September 17, 2020, the Director of the Commission's Division of Trading and Markets asked the SROs to conduct a more complete study of the design and operation of the Pilot Rules and the LULD Plan during the period of volatility in the Spring of 2020.

In response to the request, the SROs created a MWCB ''Working Group'' composed of SRO representatives and industry advisers that included members of the advisory committees to both the LULD Plan and the NMS Plans governing the collection, consolidation, and dissemination of last-sale transaction reports and quotations in NMS Stocks. The Working Group met regularly from September 2020 through March 2021 to consider the

Commission's request, review data, and compile its study. The Working Group's efforts in this respect incorporated and built on the work of an MWCB Task Force.

The Working Group submitted its study to the Commission on March 31, 2021 (the ''Study'').[15] In addition to a timeline of the MWCB events in March 2020, the Study includes a summary of the analysis and recommendations of the MWCB Task Force; an evaluation of the operation of the Pilot Rules during the March 2020 events; an evaluation of the design of the current MWCB system; and the Working Group's conclusions and recommendations.

In the Study, the Working Group concluded: (1) The MWCB mechanism set out in the Pilot Rules worked as intended during the March 2020 events; (2) the MWCB halts triggered in March 2020 appear to have had the intended effect of calming volatility in the market, without causing harm; (3) the design of the MWCB mechanism with respect to reference value (SPX), trigger levels (7%/13%/20%), and halt times (15 minutes) is appropriate; (4) the change implemented in Amendment 10 to the Plan to Address Extraordinary Market Volatility (the ''Limit Up/Limit Down Plan'' or ''LULD Plan'') did not likely have any negative impact on MWCB functionality; and (5) no changes should be made to the mechanism to prevent the market from halting shortly after the opening of regular trading hours at 9:30 a.m.

In light of the foregoing conclusions, the Working Group also made several recommendations, including that the Pilot Rules should be permanent without any changes.[16]

Proposal To Extend the Operation of the Pilot Rules Pending the Commission's Consideration of the Exchange's Filing To Make the Pilot Rules Permanent

On July 16, 2021, the Exchange proposed a rule change to make the Pilot Rules permanent, consistent with the Working Group's recommendations.[17] On August 27, 2021, the Commission extended its time to consider the proposed rule change to October 20, 2021.[18] The Exchange now proposes to extend the expiration date of the Pilot Rules to the end of business on March 18, 2022.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[19] in general, and furthers the objectives of Section 6(b)(5) of the Act,[20] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. The market-wide circuit breaker mechanism under Rule 7.12 is an important, automatic mechanism that is invoked to promote stability and investor confidence during a period of significant stress when securities markets experience extreme broad-based declines. Extending the market-wide circuit breaker pilot for an additional five months would ensure the continued, uninterrupted operation of a consistent mechanism to halt trading across the U.S. markets while the Commission reviews the Exchange's proposed rule change to make the Pilot Rules permanent.

The Exchange also believes that the proposed rule change promotes just and equitable principles of trade in that it promotes transparency and uniformity across markets concerning when and how to halt trading in all stocks as a result of extraordinary market volatility. Based on the foregoing, the Exchange believes the benefits to market participants from Pilot Rules should continue on a pilot basis because they will promote fair and orderly markets and protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act because the proposal would ensure the continued, uninterrupted operation of a consistent mechanism to halt trading across the U.S. markets while the Commission reviews the Exchange's proposed rule change to make the Pilot Rules permanent.

Further, the Exchange understands that FINRA and other national securities exchanges will file proposals to extend their rules regarding the market-wide circuit breaker pilot. Thus, the proposed rule change will help to ensure consistency across market centers without implicating any competitive issues.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[21] and Rule 19b–4(f)(6) thereunder.[22] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

A proposed rule change filed under Rule 19b–4(f)(6)[23] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[24] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange asked that the Commission waive the 30 day operative delay so that the proposal may become operative immediately upon filing. Extending the pilot Rules' effectiveness to the close of business on March 18, 2022 will extend the protections provided by the Pilot Rules, which would otherwise expire in less than 30 days. Waiver of the operative delay would therefore permit uninterrupted continuation of the MWCB pilot while the Commission reviews the Exchange's proposed rule change to make the Pilot Rules permanent. Therefore, the Commission hereby waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[25]

[25] For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on

Continued

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [26] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2021–57 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2021–57. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2021–57 and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[27]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: 2:00 p.m. on Thursday, October 7, 2021.

PLACE: The meeting will be held via remote means and/or at the Commission's headquarters, 100 F Street NE, Washington, DC 20549.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters also may be present.

In the event that the time, date, or location of this meeting changes, an announcement of the change, along with the new time, date, and/or place of the meeting will be posted on the Commission's website at *https://www.sec.gov.*

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(3), (5), (6), (7), (8), 9(B) and (10) and 17 CFR 200.402(a)(3), (a)(5), (a)(6), (a)(7), (a)(8), (a)(9)(ii) and (a)(10), permit consideration of the scheduled matters at the closed meeting.

The subject matter of the closed meeting will consist of the following topics:

Institution and settlement of injunctive actions;

Institution and settlement of administrative proceedings;

Resolution of litigation claims; and

Other matters relating to examinations and enforcement proceedings.

At times, changes in Commission priorities require alterations in the scheduling of meeting agenda items that may consist of adjudicatory, examination, litigation, or regulatory matters.

CONTACT PERSON FOR MORE INFORMATION: For further information; please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

Authority: 5 U.S.C. 552b.

Dated: September 30, 2021.

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93188; File No. SR–EMERALD–2021–31]

Self-Regulatory Organizations; MIAX Emerald, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule To Adopt a Tiered-Pricing Structure for Additional Limited Service MIAX Emerald Express Interface Ports

September 29, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 28, 2021, MIAX Emerald, LLC (''MIAX Emerald'' or ''Exchange''), filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the Exchange's Fee Schedule (the ''Fee Schedule'') to amend certain port fees.

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings/emerald,* at MIAX's principal office, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule to adopt a tiered-pricing structure for additional Limited Service MIAX Emerald Express Interface (''MEI'') Ports [3] available to Market Makers.[4] The Exchange believes a tiered-pricing structure will encourage Market Makers to be more efficient and economical when determining how to connect to the Exchange. This should also enable the Exchange to better monitor and provide access to the Exchange's network to ensure sufficient capacity and headroom in the System.[5]

The Exchange initially filed the proposed fee changes on August 2, 2021, with the changes being immediately effective.[6] The First Proposed Rule Change was published for comment in the **Federal Register** on August 19, 2021.[7] The Commission received one comment letter on the First Proposed Rule Change.[8] The Exchange withdrew the First Proposed Rule Change on September 27, 2021 and resubmitted its proposal.[9] The Exchange withdrew the Second Proposed Rule Change and now submits this proposal, which is immediately effective.

Additional Limited Service MEI Port Tiered-Pricing Structure

The Exchange proposes to amend the fees for additional Limited Service MEI Ports. Currently, the Exchange allocates two (2) Full Service MEI Ports [10] and two (2) Limited Service MEI Ports [11] per matching engine [12] to which each Market Maker connects. Market Makers may also request additional Limited Service MEI Ports for each matching engine to which they connect. The Full Service MEI Ports, Limited Service MEI Ports and the additional Limited Service MEI Ports all include access to the Exchange's primary and secondary data centers and its disaster recovery center. Market Makers may request additional Limited Service MEI Ports for which they are assessed a $100 monthly fee for each additional Limited Service MEI Port for each matching engine.

The Exchange now proposes to move from a flat monthly fee per additional Limited Service MEI Port for each matching engine to a tiered-pricing structure for additional Limited Service MEI Ports for each matching engine under which the monthly fee would vary depending on the number of additional Limited Service MEI Ports the Market Maker elects to purchase. Specifically, the Exchange will continue to provide the first and second additional Limited Service MEI Ports for each matching engine free of charge, as described above, per the initial allocation of Limited Service MEI Ports that Market Makers receive. The Exchange now proposes the following tiered-pricing structure: (i) The third and fourth additional Limited Service MEI Ports for each matching engine will increase from the current flat monthly fee of $100 to $200 per port; (ii) the fifth and sixth additional Limited Service MEI Ports for each matching engine will increase from the current flat monthly fee of $100 to $300 per port; and (iii) the seventh to the twelfth additional Limited Service MEI Ports will increase from the current monthly flat fee of $100 to $400 per port (collectively, the ''Proposed Access Fees'').

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act [13] in general, and furthers the objectives of Section 6(b)(4) of the Act [14] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among Exchange Members and issuers and other persons using any facility or system which the Exchange operates or controls. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act [15] in that it is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive. In such an environment, the Exchange must continually adjust its fees for services and products, in addition to order flow, to remain competitive with other exchanges. The Exchange believes that the proposed changes reflect this competitive environment.

The Exchange believes the proposal to move from a flat fee per month to a tiered-pricing structure is reasonable, equitably allocated and not unfairly discriminatory because the Exchange believes the proposed structure would encourage firms to be more economical and efficient in the number of additional Limited Service MEI Ports

[3] The MIAX Emerald Express Interface (''MEI'') is a connection to the MIAX Emerald System that enables Market Makers to submit simple and complex electronic quotes to MIAX Emerald. *See* the Definitions Section of the Fee Schedule.

[4] The term ''Market Makers'' refers to Lead Market Makers (''LMMs''), Primary Lead Market Makers (''PLMMs''), and Registered Market Makers (''RMMs'') collectively. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[5] The term ''System'' means the automated trading system used by the Exchange for the trading of securities. *See* the Definitions Section of the Fee Schedule and Exchange Rule 100.

[6] *See* Securities Exchange Act Release No. 92662 (August 13, 2021), 86 FR 46726 (August 19, 2021) (SR–EMERALD–2021–25) (the ''First Proposed Rule Change'').

[7] *Id.*

[8] *See* Letter from Richard J. McDonald, Susquehanna International Group, LLC (''SIG''), to Vanessa Countryman, Secretary, Commission, dated September 7, 2021 (''SIG Comment Letter'').

[9] *See* SR–EMERALD–2021–30 (the ''Second Proposed Rule Change'').

[10] ''Full Service MEI Ports'' means a port which provides Market Makers with the ability to send Market Maker simple and complex quotes, eQuotes, and quote purge messages to the MIAX Emerald System. Full Service MEI Ports are also capable of receiving administrative information. Market Makers are limited to two Full Service MEI Ports per Matching Engine. *See* the Definitions Section of the Fee Schedule.

[11] ''Limited Service MEI Ports'' means a port which provides Market Makers with the ability to send simple and complex eQuotes and quote purge messages only, but not Market Maker Quotes, to the MIAX Emerald System. Limited Service MEI Ports are also capable of receiving administrative information. Market Makers initially receive two Limited Service MEI Ports per Matching Engine. *See* the Definitions Section of the Fee Schedule.

[12] ''Matching Engine'' means a part of the MIAX Emerald electronic system that processes options orders and trades on a symbol-by-symbol basis. Some Matching Engines will process option classes with multiple root symbols, and other Matching Engines may be dedicated to one single option root symbol (for example, options on SPY may be processed by one single Matching Engine that is dedicated only to SPY). A particular root symbol may only be assigned to a single designated Matching Engine. A particular root symbol may not be assigned to multiple Matching Engines. *See* the Definitions Section of the Fee Schedule.

[13] 15 U.S.C. 78f(b).

[14] 15 U.S.C. 78f(b)(4).

[15] 15 U.S.C. 78f(b)(5).

they purchase. The Exchange believes this will enable the Exchange to better monitor and provide access to the Exchange's network to ensure sufficient capacity and headroom in the System.

The Exchange notes that firms that are primarily order routers seeking best-execution do not utilize Limited Service MEI Ports on MIAX Emerald. Therefore, the fees described in the proposed tiered-pricing structure will only be allocated to market making firms that engage in advanced trading strategies and typically request multiple Limited Service MEI Ports, beyond the two per matching engine that are free. Accordingly, the firms engaged in market making business generate higher costs by utilizing more of the Exchange's resources. The market making firms that purchase higher amounts of Limited Service MEI Ports tend to have specific business oriented market making and trading strategies, as opposed to firms engaging solely in order routing as part of their best-execution obligations. The use of such additional Limited Service MEI Ports is a voluntary business decision of each market maker.

The Exchange believes that exchanges, in setting fees of all types, should meet very high standards of transparency to demonstrate why each new fee or fee increase meets the requirements of the Act that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among market participants. The Exchange believes this high standard is especially important when an exchange imposes various access fees for market participants to access an exchange's marketplace. The Exchange deems port fees to be access fees. It records these fees as part of its ''Access Fees'' revenue in its financial statements. The Exchange believes that it is important to demonstrate that these fees are based on its costs and reasonable business needs. The Exchange believes the Proposed Access Fees will allow the Exchange to offset expense the Exchange has and will incur, and that the Exchange is providing sufficient transparency (as described below) into how the Exchange determined to charge such fees. Accordingly, the Exchange is providing an analysis of its revenues, costs, and profitability associated with the Proposed Access Fees. This analysis includes information regarding its methodology for determining the costs and revenues associated with the Proposed Access Fees.

In order to determine the Exchange's costs to provide the access services associated with the Proposed Access Fees, the Exchange conducted an extensive cost review in which the Exchange analyzed nearly every expense item in the Exchange's general expense ledger to determine whether each such expense relates to the Proposed Access Fees, and, if such expense did so relate, what portion (or percentage) of such expense actually supports the access services. The sum of all such portions of expenses represents the total cost to the Exchange to provide the access services associated with the Proposed Access Fees. For the avoidance of doubt, no expense amount was allocated twice. The Exchange is also providing detailed information regarding the Exchange's cost allocation methodology—namely, information that explains the Exchange's rationale for determining that it was reasonable to allocate certain expenses described in this filing towards the cost to the Exchange to provide the access services associated with the Proposed Access Fees.

In order to determine the Exchange's projected revenues associated with the Proposed Access Fees, the Exchange analyzed the number of Market Makers currently utilizing Limited Service MEI Ports, and, utilizing a recent monthly billing cycle representative of 2021 monthly revenue, extrapolated annualized revenue on a going-forward basis. The Exchange does not believe it is appropriate to factor into its analysis future revenue growth or decline into its projections for purposes of these calculations, given the uncertainty of such projections due to the continually changing access needs of market participants, discounts that can be achieved due to lower trading volume and vice versa, market participant consolidation, etc. Additionally, the Exchange similarly does not factor into its analysis future cost growth or decline. The Exchange is presenting its revenue and expense associated with the Proposed Access Fees in this filing in a manner that is consistent with how the Exchange presents its revenue and expense in its Audited Unconsolidated Financial Statements. The Exchange's most recent Audited Unconsolidated Financial Statement is for 2020. However, since the revenue and expense associated with the Proposed Access Fees were not in place in 2020 or for the first seven months of 2021, the Exchange believes its 2020 Audited Unconsolidated Financial Statement is not representative of its current total annualized revenue and costs associated with the Proposed Access Fees. Accordingly, the Exchange believes it is more appropriate to analyze the Proposed Access Fees utilizing its 2021 revenue and costs, as described herein, which utilize the same presentation methodology as set forth in the Exchange's previously-issued Audited Unconsolidated Financial Statements. Based on this analysis, the Exchange believes that the Proposed Access Fees are fair and reasonable because they will not result in excessive pricing or supra-competitive profit when comparing the Exchange's total annual expense associated with providing the services associated with the Proposed Access Fees versus the total projected annual revenue the Exchange will collect for providing those services.

* * * * *

On March 29, 2019, the Commission issued its Order Disapproving Proposed Rule Changes to Amend the Fee Schedule on the BOX Market LLC Options Facility to Establish BOX Connectivity Fees for Participants and Non-Participants Who Connect to the BOX Network (the ''BOX Order'').[16] On May 21, 2019, the Commission issued the Staff Guidance on SRO Rule Filings Relating to Fees.[17] Accordingly, the Exchange believes that the Proposed Access Fees are consistent with the Act because they (i) are reasonable, equitably allocated, not unfairly discriminatory, and not an undue burden on competition; (ii) comply with the BOX Order and the Guidance; (iii) are supported by evidence (including comprehensive revenue and cost data and analysis) that they are fair and reasonable because they will not result in excessive pricing or supra-competitive profit; and (iv) utilize a cost-based justification framework that is substantially similar to a framework previously used by the Exchange, and its affiliates MIAX PEARL, LLC (''MIAX Pearl'') and Miami International Securities Exchange, LLC (''MIAX''), to establish or increase other non-transaction fees.[18] Accordingly, the Exchange believes that the Commission should find that the Proposed Access Fees are consistent with the Act.

* * * * *

As of September 27, 2021, the Exchange had a market share of only

[17] *See* Staff Guidance on SRO Rule Filings Relating to Fees (May 21, 2019), at *https://www.sec.gov/tm/staff-guidance-sro-rule-filings-fees* (the ''Guidance'').

[18] See Securities Exchange Act Release Nos. 90981 (January 25, 2021), 86 FR 7582 (January 29, 2021) (SR–PEARL–2021–01) (proposal to increase connectivity fees); 90980 (January 25, 2021), 86 FR 7602 (January 29, 2021) (SR–MIAX–2021–02) (proposal to increase connectivity fees).

4.99% of the U.S. equity options industry for the month of September 2021.[19] The Exchange is not aware of any evidence that a market share of approximately 4–5% provides the Exchange with anti-competitive pricing power. If the Exchange were to attempt to establish unreasonable pricing, then no market participant would join or access the Exchange, and existing market participants would discontinue all or some of their access services. If the Exchange were to attempt to establish unreasonable pricing for any of its means provided to access the Exchange, market participants may look to access the Exchange via other means such as through a third party service provider, or look to connect to the Exchange via a competing exchange with cheaper access alternatives that also provides routing services to the Exchange. In addition, existing market participants that are connected to the Exchange may choose to disconnect from the Exchange or reduce their number of connections to the Exchange as a means to reduce their overall costs.

The proposed tiered-pricing structure and proposed fees for additional Limited Service MEI Ports are less than or similar to fees charged by competing options exchanges for similar access on those exchanges. The Exchange believes that it provides a better value through its enhanced network monitoring, customer reporting, and superior network infrastructure than markets with higher market shares and more expensive access alternatives. For example, NYSE American, LLC (''Amex'') (equity options market share of 7.86% as of September 23, 2021 for the month of September) [20] and NYSE Arca, Inc. (''Arca'') (equity options market share of 12.58% as of September 23, 2021 for the month of September) [21] both charge $450 per port for order/quote entry ports 1–40 and $150 per port for ports 41 and greater,[22] all on a per matching engine basis, with Amex and Arca having 17 match engines and 19 match engines, respectively.[23] Similarly, The Nasdaq Stock Market LLC (''NASDAQ'') (equity options market share of 7.81% as of September 23, 2021 for the month of September) [24] charges $1,500 per port for SQF ports 1–5, $1,000 per SQF port for ports 6–20, and $500 per SQF port for ports 21 and greater,[25] all on a per matching engine basis, with NASDAQ having multiple matching engines.[26] The NASDAQ SQF Interface Specification provides that PHLX/NOM/BX Options trading infrastructures may consist of multiple matching engines with each matching engine trading only a range of option underlyings. Further, the SQF infrastructure is such that the firms connect to one or more servers residing directly on the matching engine infrastructure. Since there may be multiple matching engines, firms will need to connect to each engine's infrastructure in order to establish the ability to quote the symbols handled by that engine.[27]

In the each of the above cases, the Exchange's highest tier in the proposed tiered-pricing structure is lower than that of competing options exchanges. Further, as described in more detail below, those exchanges generate higher operating profit margins and higher ''access fees'' than the Exchange, even with the proposed fee change. Despite proposing lower or similar fees to that of competing options exchanges with similar market share, the Exchange believes that it provides a better overall value to its Members and non-Members via a highly deterministic System, enhanced network monitoring and customer reporting, and a superior network infrastructure than markets with higher market shares and more expensive access alternatives. Each of the port rates in place at competing options exchanges were filed with the Commission for immediate effectiveness and remain in place today.

Separately, the Exchange is not aware of any reason why market participants could not simply drop their access (or not initially access an exchange) if an exchange were to establish prices for its non-transaction fees that, in the determination of such market participant, did not make business or economic sense for such market participant to access such exchange. No options market participant is required by rule, regulation, or competitive forces to be a Member of the Exchange. As evidence of the fact that market participants can and do drop their access to exchanges based on non-transaction fee pricing, R2G Services LLC (''R2G'') filed a comment letter after BOX's proposed rule changes to increase its connectivity fees (SR–BOX–2018–24, SR–BOX–2018–37, and SR–BOX–2019–04). The R2G Letter stated, ''[w]hen BOX instituted a $10,000/month price increase for connectivity; we had no choice but to terminate connectivity into them as well as terminate our market data relationship. The cost benefit analysis just didn't make any sense for us at those new levels.'' Similarly, the Exchange noted in a recent filing that once MIAX Emerald issued a notice that it was instituting MEI Port fees, among other non-transaction fees, one MIAX Emerald Member dropped its access to MIAX Emerald as a result of those fees.[28] Accordingly, these examples show that if a market participant believes, based on its business model, that an exchange charges too high of a fee for ports and/or other non-transaction fees, including other access fees for its relevant marketplace, market participants can choose to drop their access to such exchange.

In order to provide more detail and to quantify the Exchange's costs associated with providing access to the Exchange in general, the Exchange notes that there are material costs associated with providing the infrastructure and headcount to fully-support access to the Exchange. The Exchange incurs technology expense related to establishing and maintaining Information Security services, enhanced network monitoring and customer reporting, as well as Regulation SCI mandated processes, associated with its network technology. While some of the expense is fixed, much of the expense is not fixed, and thus increases as the services associated with the Proposed Access Fees increase. For example, new Members to the Exchange may require the purchase of additional hardware to support those Members as well as enhanced monitoring and reporting of customer performance that the Exchange and its affiliates provide. Further, as the total number Members increases, the Exchange and its affiliates

may need to increase their data center footprint and consume more power, resulting in increased costs charged by their third-party data center provider. Accordingly, the cost to the Exchange and its affiliates to provide access to its System for market participants is not fixed. The Exchange believes the Proposed Access Fees are a reasonable attempt to offset a portion of the costs to the Exchange associated with providing access to its network infrastructure.

The Exchange only has four primary sources of revenue: Transaction fees, access fees (which includes the Proposed Access Fees), regulatory fees, and market data fees. Accordingly, the Exchange must cover all of its expenses from these four primary sources of revenue.

The Exchange believes that the Proposed Access Fees are fair and reasonable because they will not result in excessive pricing or supra-competitive profit, when comparing the total annual expense that the Exchange projects to incur in connection with providing these access services versus the total annual revenue that the Exchange projects to collect in connection with services associated with the Proposed Access Fees. For 2021, [29] the total annual expense for providing the access services associated with the Proposed Access Fees is projected to be approximately $0.88 million. The approximately $0.88 million in projected total annual expense is comprised of the following, all of which are directly related to the access services associated with the Proposed Access Fees: (1) Third-party expense, relating to fees paid by the Exchange to third-parties for certain products and services; and (2) internal expense, relating to the internal costs of the Exchange to provide the services associated with the Proposed Access Fees.[30] As noted above, the Exchange believes it is more appropriate to analyze the Proposed Access Fees utilizing its 2021 revenue and costs, which utilize the same presentation methodology as set forth in the Exchange's previously-issued Audited Unconsolidated Financial Statements.[31] The $0.88 million in projected total annual expense is directly related to the access services associated with the Proposed Access Fees, and not any other product or service offered by the Exchange. It does not include general costs of operating matching systems and other trading technology, and no expense amount was allocated twice.

As discussed, the Exchange conducted an extensive cost review in which the Exchange analyzed nearly every expense item in the Exchange's general expense ledger (this includes over 150 separate and distinct expense items) to determine whether each such expense relates to the access services associated with the Proposed Access Fees, and, if such expense did so relate, what portion (or percentage) of such expense actually supports those services, and thus bears a relationship that is, ''in nature and closeness,'' directly related to those services. The sum of all such portions of expenses represents the total cost of the Exchange to provide access services associated with the Proposed Access Fees.

For 2021, total third-party expense, relating to fees paid by the Exchange to third-parties for certain products and services for the Exchange to be able to provide the access services associated with the Proposed Access Fees, is projected to be $0.05 million. This includes, but is not limited to, a portion of the fees paid to: (1) Equinix, for data center services, for the primary, secondary, and disaster recovery locations of the Exchange's trading system infrastructure; (2) Zayo Group Holdings, Inc. (''Zayo'') for network services (fiber and bandwidth products and services) linking the Exchange's office locations in Princeton, New Jersey and Miami, Florida, to all data center locations; (3) Secure Financial Transaction Infrastructure (''SFTI''),[32] which supports connectivity and feeds for the entire U.S. options industry; (4) various other services providers (including Thompson Reuters, NYSE, Nasdaq, and Internap), which provide content, connectivity services, and infrastructure services for critical components of options connectivity and network services; and (5) various other hardware and software providers (including Dell and Cisco, which support the production environment in which Members connect to the network to trade, receive market data, etc.). For clarity, only a portion of all fees paid to such third-parties is included in the third-party expense herein, and no expense amount is allocated twice. Accordingly, the Exchange does not allocate its entire information technology and communication costs to the access services associated with the Proposed Access Fees.

For clarity, only a portion of all fees paid to such third-parties is included in the third-party expense herein, and no expense amount is allocated twice. Accordingly, the Exchange does not allocate its entire information technology and communication costs to the access services associated with the Proposed Access Fees. Further, the Exchange notes that, with respect to the expenses included herein, those expenses only cover the MIAX Emerald market; expenses associated with MIAX Pearl for its options and equities markets and MIAX, are accounted for separately and are not included within the scope of this filing. As noted above, the percentage allocations used in this proposed rule change may differ from past filings from the Exchange or its affiliates due to, among other things, changes in expenses charged by third-parties, adjustments to internal resource allocations, and different system architecture of the Exchange as compared to its affiliates. Further, as part its ongoing assessment of costs and expenses, the Exchange recently conducted a periodic thorough review of its expenses and resource allocations which, in turn, resulted in a revised percentage allocations in this filing.

The Exchange believes it is reasonable to allocate such third-party expense described above towards the total cost to the Exchange to provide the access services associated with the Proposed Access Fees. In particular, the Exchange believes it is reasonable to allocate the identified portion of the Equinix expense because Equinix operates the data centers (primary, secondary, and disaster recovery) that host the Exchange's network infrastructure. This includes, among other things, the necessary storage space, which continues to expand and increase in

[29] The Exchange has not yet finalized its 2021 year end results.

[30] The percentage allocations used in this proposed rule change may differ from past filings from the Exchange or its affiliates due to, among other things, changes in expenses charged by third-parties, adjustments to internal resource allocations, and different system architecture of the Exchange as compared to its affiliates.

[31] For example, the Exchange previously noted that all third-party expense described in its prior fee filing was contained in the information technology and communication costs line item under the section titled ''Operating Expenses Incurred Directly or Allocated From Parent,'' in the Exchange's 2019 Form 1 Amendment containing its financial statements for 2018. *See* Securities Exchange Act Release No. 87877 (December 31, 2019), 85 FR 738 (January 7, 2020) (SR–EMERALD–2019–39). Accordingly, the third-party expense described in this filing is attributed to the same line item for the Exchange's 2021 Form 1 Amendment, which will be filed in 2022.

[32] In fact, on October 22, 2019, the Exchange was notified by SFTI that it is again raising its fees charged to the Exchange by approximately 11%, without having to show that such fee change complies with the Act by being reasonable, equitably allocated, and not unfairly discriminatory. It is unfathomable to the Exchange that, given the critical nature of the infrastructure services provided by SFTI, that its fees are not required to be rule-filed with the Commission pursuant to Section 19(b)(1) of the Act and Rule 19b–4 thereunder. *See* 15 U.S.C. 78s(b)(1) and 17 CFR 240.19b–4, respectively.

cost, power to operate the network infrastructure, and cooling apparatuses to ensure the Exchange's network infrastructure maintains stability. Without these services from Equinix, the Exchange would not be able to operate and support the network and provide the access services associated with the Proposed Access Fees to its Members and their customers. The Exchange did not allocate all of the Equinix expense toward the cost of providing the access services associated with the Proposed Access Fees, only that portion which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 2.05% of the total applicable Equinix expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[33]

The Exchange believes it is reasonable to allocate the identified portion of the Zayo expense because Zayo provides the internet, fiber and bandwidth connections with respect to the network, linking the Exchange with its affiliates, MIAX Pearl and MIAX, as well as the data center and disaster recovery locations. As such, all of the trade data, including the billions of messages each day per exchange, flow through Zayo's infrastructure over the Exchange's network. Without these services from Zayo, the Exchange would not be able to operate and support the network and provide the access services associated with the Proposed Access Fees. The Exchange did not allocate all of the Zayo expense toward the cost of providing the access services associated with the Proposed Access Fees, only the portion which the Exchange identified as being specifically mapped to providing the Proposed Access Fees, approximately 1.64% of the total applicable Zayo expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[34]

The Exchange believes it is reasonable to allocate the identified portions of the SFTI expense and various other service providers' (including Thompson Reuters, NYSE, Nasdaq, and Internap) expense because those entities provide connectivity and feeds for the entire U.S. options industry, as well as the content, connectivity services, and infrastructure services for critical components of the network. Without these services from SFTI and various other service providers, the Exchange would not be able to operate and support the network and provide access to its Members and their customers. The Exchange did not allocate all of the SFTI and other service providers' expense toward the cost of providing the access services associated with the Proposed Access Fees, only the portions which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 2.05% of the total applicable SFTI and other service providers' expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees.[35]

The Exchange believes it is reasonable to allocate the identified portion of the other hardware and software provider expense because this includes costs for dedicated hardware licenses for switches and servers, as well as dedicated software licenses for security monitoring and reporting across the network. Without this hardware and software, the Exchange would not be able to operate and support the network and provide access to its Members and their customers. The Exchange did not allocate all of the hardware and software provider expense toward the cost of providing the access services associated with the Proposed Access Fees, only the portions which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 1.23% of the total applicable hardware and software provider expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees.[36]

For 2021, total projected internal expense, relating to the internal costs of the Exchange to provide the access services associated with the Proposed Access Fees, is projected to be $0.83 million. This includes, but is not limited to, costs associated with: (1) Employee compensation and benefits for full-time employees that support the access services associated with the Proposed Access Fees, including staff in network operations, trading operations, development, system operations, and business that support those employees and functions (including an increase as a result of the higher determinism project); (2) depreciation and amortization of hardware and software used to provide the access services associated with the Proposed Access Fees, including equipment, servers, cabling, purchased software and internally developed software used in the production environment to support the network for trading; and (3) occupancy costs for leased office space for staff that provide the access services associated with the Proposed Access Fees. The breakdown of these costs is more fully-described below. For clarity, only a portion of all such internal expenses are included in the internal expense herein, and no expense amount is allocated twice. Accordingly, the Exchange does not allocate its entire costs contained in those items to the access services associated with the Proposed Access Fees.

The Exchange believes it is reasonable to allocate such internal expense described above towards the total cost to the Exchange to provide the access services associated with the Proposed Access Fees. In particular, the Exchange's employee compensation and benefits expense relating to providing the access services associated with the Proposed Access Fees is projected to be approximately $0.76 million, which is only a portion of the $9.74 million total projected expense for employee compensation and benefits. The Exchange believes it is reasonable to allocate the identified portion of such expense because this includes the time spent by employees of several departments, including Technology, Back Office, Systems Operations, Networking, Business Strategy Development (who create the business requirement documents that the Technology staff use to develop network features and enhancements), and Trade Operations. As part of the extensive cost review conducted by the Exchange, the Exchange reviewed the amount of time spent by each employee on matters relating to the provision of access services associated with the Proposed Access Fees. Without these employees,

[33] As noted above, the percentage allocations used in this proposed rule change may differ from past filings from the Exchange or its affiliates due to, among other things, changes in expenses charged by third-parties, adjustments to internal resource allocations, and different system architecture of the Exchange as compared to its affiliates. Again, as part its ongoing assessment of costs and expenses, the Exchange recently conducted a periodic thorough review of its expenses and resource allocations which, in turn, resulted in a revised percentage allocations in this filing.

[34] *Id.*

[35] *Id.*

[36] *Id.*

the Exchange would not be able to provide the access services associated with the Proposed Access Fees to its Members and their customers. The Exchange did not allocate all of the employee compensation and benefits expense toward the cost of the access services associated with the Proposed Access Fees, only the portions which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 7.81% of the total applicable employee compensation and benefits expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[37]

The Exchange's depreciation and amortization expense relating to providing the services associated with the Proposed Access Fees is projected to be $0.06 million, which is only a portion of the $3.13 million total projected expense for depreciation and amortization. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense includes the actual cost of the computer equipment, such as dedicated servers, computers, laptops, monitors, information security appliances and storage, and network switching infrastructure equipment, including switches and taps that were purchased to operate and support the network and provide the access services associated with the Proposed Access Fees. Without this equipment, the Exchange would not be able to operate the network and provide the access services associated with the Proposed Access Fees to its Members and their customers. The Exchange did not allocate all of the depreciation and amortization expense toward the cost of providing the access services associated with the Proposed Access Fees, only the portion which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 1.92% of the total applicable depreciation and amortization expense, as these access services would not be possible without relying on such. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[38]

The Exchange's occupancy expense relating to providing the services associated with the Proposed Access Fees is projected to be $0.01 million, which is only a portion of the $0.52 million total projected expense for occupancy. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense represents the portion of the Exchange's cost to rent and maintain a physical location for the Exchange's staff who operate and support the network, including providing the access services associated with the Proposed Access Fees. This amount consists primarily of rent for the Exchange's Princeton, NJ office, as well as various related costs, such as physical security, property management fees, property taxes, and utilities. The Exchange operates its Network Operations Center (''NOC'') and Security Operations Center (''SOC'') from its Princeton, New Jersey office location. A centralized office space is required to house the staff that operates and supports the network. The Exchange currently has approximately 150 employees. Approximately two-thirds of the Exchange's staff are in the Technology department, and the majority of those staff have some role in the operation and performance of the access services associated with the Proposed Access Fees. Without this office space, the Exchange would not be able to operate and support the network and provide the access services associated with the Proposed Access Fees to its Members and their customers. Accordingly, the Exchange believes it is reasonable to allocate the identified portion of its occupancy expense because such amount represents the Exchange's actual cost to house the equipment and personnel who operate and support the Exchange's network infrastructure and the access services associated with the Proposed Access Fees. The Exchange did not allocate all of the occupancy expense toward the cost of providing the access services associated with the Proposed Access Fees, only the portion which the Exchange identified as being specifically mapped to operating and supporting the network, approximately 1.93% of the total applicable occupancy expense. The Exchange believes this allocation is reasonable because it represents the Exchange's cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[39]

The Exchange notes that a material portion of its total overall expense is allocated to the provision of access services (including connectivity, ports, and trading permits). The Exchange believes this is reasonable and in line, as the Exchange operates a technology-based business that differentiates itself from its competitors based on its trading systems that rely on access to a high performance network, resulting in significant technology expense. Over two-thirds of Exchange staff are technology-related employees. The majority of the Exchange's expense is technology-based. As described above, the Exchange has only four primary sources of fees to recover their costs; thus, the Exchange believes it is reasonable to allocate a material portion of their total overall expense towards access fees.

Accordingly, based on the facts and circumstances presented, the Exchange believes that its provision of the access services associated with the Proposed Access Fees will not result in excessive pricing or supra-competitive profit. To illustrate, on a going-forward, fully-annualized basis, the Exchange projects that annualized revenue for providing the access services associated with the Proposed Access Fees would be approximately $2.07 million per annum, based on a recent billing cycle. This revenue number includes the revenue the Exchange projects to collect only from the fees the Exchange will charge for additional Limited Service MEI Ports after the first two Limited Service MEI Ports that Market Makers receive for free. The Exchange projects that its annualized expense for providing the services associated with the Proposed Access Fees will be approximately $0.88 million per annum. This expense includes the costs related to all Limited Service MEI Ports, including the two Limited Service MEI Ports that Market Makers receive for free. Accordingly, on a fully-annualized basis, the Exchange believes its total projected revenue for providing the access services associated with the Proposed Access Fees will not result in excessive pricing or supra-competitive profit, as the Exchange will make a profit margin of approximately 58% ($2.07 million in total revenue minus $.088 [sic] million in expense = $1.19 million in profit per annum). Additionally, this profit margin does not take into account the cost of capital expenditures (''CapEx'') the Exchange projects to spend each year on CapEx going forward.

[37] *Id.*

[38] *Id.*

[39] *Id.*

For the avoidance of doubt, none of the expenses included herein relating to the access services associated with the Proposed Access Fees relate to the provision of any other services offered by the Exchange or its affiliates. Stated differently, no expense amount of the Exchange is allocated twice. The Exchange notes that, with respect to expenses associated with the Exchange's affiliates, MIAX Pearl and MIAX, those expenses are accounted for separately and are not included within the scope of this filing. Stated differently, no expense amount of the Exchange is also allocated to MIAX Pearl or MIAX.

The Exchange believes it is reasonable, equitable and not unfairly discriminatory to allocate the respective percentages of each expense category described above towards the total cost to the Exchange of operating and supporting the network, including providing the access services associated with the Proposed Access Fees because the Exchange performed a line-by-line item analysis of nearly every expense of the Exchange, and has determined the expenses that directly relate to providing access to the Exchange. Further, the Exchange notes that, without the specific third-party and internal items listed above, the Exchange would not be able to provide the access services associated with the Proposed Access Fees to its Members and their customers. Each of these expense items, including physical hardware, software, employee compensation and benefits, occupancy costs, and the depreciation and amortization of equipment, have been identified through a line-by-line item analysis to be integral to providing access services. The Proposed Access Fees are intended to recover the Exchange's costs of providing access to its System. Accordingly, the Exchange believes that the Proposed Access Fees are fair and reasonable because they do not result in excessive pricing or supra-competitive profit, when comparing the actual costs to the Exchange versus the projected annual revenue from the Proposed Access Fees.

The Exchange believes the proposed changes are reasonable, equitably allocated and not unfairly discriminatory, and do not result in a ''supra-competitive'' [40] profit. Of note, the Guidance defines ''supra-competitive profit'' as profits that exceed the profits that can be obtained in a competitive market.[41] With the proposed changes, the Exchange anticipates that its profit margin will be approximately 58%, inclusive of the Proposed Access Fees. In order to achieve a consistent, premium network performance, the Exchange must build out and continue to maintain a network that has the capacity to handle the message rate requirements of not only firms that consume minimal ports resources of the Exchange, but also those firms that most heavily consume port resources of the Exchange, network consumers, and purchasers of numerous Limited Service MEI Ports, which handle billions of messages per day across the Exchange's network. These billions of messages per day consume the Exchange's resources and significantly contribute to the overall network port expense for storage and network transport capabilities. Given that purchasers of the greatest amount of Limited Service MEI Ports utilize the most resources across the network, the Exchange believes that it is reasonable to operate at a profit margin of approximately 58% for these ports, inclusive of the Proposed Access Fees. Such profit margin should enable the Exchange to continue to invest in its network and systems, maintain its current infrastructure, support future enhancements to ports and network connectivity, and continue to offer enhanced customer reporting and monitoring services.

While the proposed fees are similar or less than that of other options exchanges,[42] as discussed above, the incremental increase in revenue generated from the 58% profit margin for Limited Service MEI Ports will allow the Exchange to further invest in its System architecture and matching engine functionality to the benefit of all market participants. The ability to continue to invest in technology and systems will also enable the Exchange to improve the determinism and overall performance of not only its logical ports, but overall performance including the resiliency and efficiency of its matching engines. The revenue generated under the proposed rule change would also provide the Exchange with the resources necessary to further innovate and enhance its systems and seek additional improvements or functionality to offer market participants generally. The Exchange believes that these investments, in turn, will benefit all investors by encouraging other exchanges to further invest, innovate, and improve their own systems in response.

Based on the 2020 Audited Financial Statements of competing options exchanges (since the 2021 Audited Financial Statements will likely not become publicly available until early July 2022, after the Exchange has submitted this filing), the Exchange's revenue that is derived from its access fees is in line with the revenue that is derived from access fees of competing exchanges. For example, the total revenue from ''access fees'' [43] for 2020 for MIAX Emerald was $7,244,000. MIAX Emerald projects that the total revenue from ''access fees'' for 2021 for MIAX Emerald will be $20,910,179, inclusive of the Proposed Access Fees described herein. The Exchanges notes that the projected 2021 ''access fee'' revenue also includes projected revenue due to the Exchange's recent proposal to move to a tiered-pricing structure for its 10Gb ULL connectivity (SR–EMERALD–2021–29).

The Exchange's 2021 projected revenue from access fees is still less than, or similar to, the access fee revenues generated by access fees charged by other U.S. options exchanges. For example, the Cboe Exchange, Inc. (''Cboe'') reported $70,893,000 in ''access and capacity fee'' [44] revenue for 2020. Cboe C2 Exchange, Inc. (''C2'') reported $19,016,000 in ''access and capacity fee'' revenue for 2020.[45] Cboe BZX Exchange, Inc. (''BZX'') reported $38,387,000 in ''access and capacity fee'' revenue for 2020.[46] Cboe EDGX Exchange, Inc. (''EDGX'') reported $26,126,000 in ''access and capacity fee'' revenue for 2020.[47] PHLX reported $20,817,000 in ''Trade Management Services'' revenue for 2019.[48] The Exchange notes it is unable to compare ''access fee'' revenues with PHLX (or other affiliated NASDAQ exchanges) because after 2019, the ''Trade Management Services'' line item was bundled into a much larger line item in

[40] *See supra* note 17.

[41] *See id.*

[42] *See supra* notes 22 and 25.

[43] As described in the Exchange's Audited Financial Statements, fees for ''access services'' are assessed to exchange members for the opportunity to trade and use other related functions of the exchanges. *See https://www.sec.gov/Archives/edgar/vprr/2100/21000461.pdf.*

[44] According to Cboe, access and capacity fees represent fees assessed for the opportunity to trade, including fees for trading-related functionality. *See* Form 1 Amendment, at *https://www.sec.gov/Archives/edgar/vprr/2100/21000465.pdf.*

[45] *See id.*

[46] *See id.*

[47] *See id.*

[48] According to PHLX, ''Trade Management Services'' includes ''a wide variety of alternatives for connectivity to and accessing [the PHLX] markets for a fee. These participants are charged monthly fees for connectivity and support in accordance with [PHLX's] published fee schedules.'' *See* Form 1 Amendment, at *https://www.sec.gov/Archives/edgar/vprr/2001/20012246.pdf.*

PHLX's Form 1, simply titled ''Market services.'' [49]

The Exchange also believes that, based on the 2020 Audited Financial Statements of competing options exchanges, the Exchange's overall operating margin is in line with or less than the operating margins of competing options exchanges, including the revenue and expense associated with the Proposed Access Fees. For example, the 2020 operating margin for MIAX Emerald was −12%.[50] Based on competing exchanges' Form 1 Amendments, ISE's operating profit margin for 2020 was approximately 85%; PHLX's operating profit margin for 2020 was approximately 49%; NASDAQ's operating profit margin for 2020 was approximately 62%; Arca's operating profit margin for 2020 was approximately 55%; Amex's operating profit margin for 2020 was approximately 59%; Cboe Exchange, Inc.'s (''Cboe'') operating profit margin for 2020 was approximately 74%; and Cboe BZX Exchange, Inc.'s (''BZX'') operating profit margin for 2020 was approximately 52%.

The Exchange further believes its proposed fees are reasonable, equitably allocated and not unfairly discriminatory because the Exchange believes that it benefits overall competition in the marketplace to allow relatively new entrants like the Exchange and its affiliates, MIAX Pearl and MIAX, to propose fees that may help these new entrants recoup their substantial investment in building out costly infrastructure. The Exchange and its affiliates have historically set their fees purposefully low in order to attract business and market share. The Exchange notes that the concept of a tiered-pricing structure for ports is not new or novel.[51]

The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive. In such an environment, the Exchange must continually adjust its fees for services and products, in addition to order flow, to remain competitive with other exchanges. The Exchange believes that the proposed changes reflect this competitive environment.

The Exchange believes the proposal to move from a flat fee per month to a tiered-pricing structure is reasonable, equitably allocated and not unfairly discriminatory because the Exchange believes the proposed structure would encourage firms to be more economical and efficient in the number of Limited Service MEI Ports they purchase. The Exchange believes this will enable the Exchange to better monitor and provide access to the Exchange's network in order to ensure that the Exchange meets its obligations under the Act such that access to the Exchange is offered on terms that are not unfairly discriminatory, as well as to ensure sufficient capacity and headroom in the System.

There is also no regulatory requirement that any market participant access any one options exchange, that each Market Maker access the Exchange utilizing more than the two free Limited Service MEI Ports that the Exchange provides, access the Exchange in a particular capacity, or trade any particular product offered on the Exchange. Moreover, membership is not a requirement to participate on the Exchange. A market participant may submit orders to the Exchange via a Sponsored User.[52] Indeed, the Exchange is unaware of any one options exchange whose membership includes every registered broker-dealer. Based on a recent analysis conducted by Cboe, as of October 21, 2020, only three (3) of the broker-dealers, out of approximately 250 broker-dealers, were members of at least one exchange that lists options for trading and were members of all 16 options exchanges.[53] Additionally, the Cboe Fee Filing found that several broker-dealers were members of only a single exchange that lists options for trading and that the number of members at each exchange that trades options varies greatly.[54]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

With respect to intra-market competition, the Exchange does not believe that the proposed rule change would place certain market participants at the Exchange at a relative disadvantage compared to other market participants or affect the ability of such market participants to compete. As stated above, the Exchange does not believe its proposed pricing will impose a barrier to entry to smaller participants and notes that the proposed pricing structure for is associated with relative usage of the various market participants. Firms that are primarily order routers seeking best-execution do not utilize Limited Service MEI Ports on MIAX Emerald and therefore will not pay the fees associated with the tiered-pricing structure. Rather, the fees described in the proposed tiered-pricing structure will only be allocated to market making firms that engage in advanced trading strategies and typically request multiple Limited Service MEI Ports, beyond the two that are free. Accordingly, the firms engaged in market making business generate higher costs by utilizing more of the Exchange's resources. The market making firms that purchase higher amounts of Limited Service MEI Ports tend to have specific business oriented market making and trading strategies, as opposed to firms engaging solely in best-execution order routing business. Additionally, the use of such additional Limited Service MEI Ports is entirely voluntary.

The Exchange also does not believe that the proposed rule change will result in any burden on inter-market competition that is not necessary or appropriate in furtherance of the purposes of the Act. As discussed above, options market participants are not forced to access all options exchanges. The Exchange operates in a highly competitive environment, and as discussed above, its ability to price access and ports is constrained by competition among exchanges and third parties. There are other options markets of which market participants may access

[50] This information is provided in response to the SIG Comment Letter. *See supra* note 8.

[51] *See* Cboe BZX Exchange, Inc. (''BZX'') Options Fee Schedule, Options Logical Port Fees, Ports with Bulk Quoting Capabilities (charging $1,500/month for the 1st and 2nd port, $2,500/month for the 3rd port or more); Cboe Exchange, Inc. (''Cboe'') Fee Schedule, Logical Connectivity Fees (charging $750/month per port for BOE/FIX Logical Ports 1 to 5 and $800/month per port for BOE/FIX Logical Ports greater than 5; charging $1,500/month per port for BOE Bulk Logical Ports 1 to 5, $2,500/month per port for BOE Bulk Logical Ports 6 to 30, and $3,000/month per port for BOE Bulk Logical Ports greater than 30); The Nasdaq Stock Market LLC (''Nasdaq''), Options 7, Pricing Schedule, Section 3 Nasdaq Options Market—Ports and Other Services (charging $1,500/month per port for first 5 ports, $1,000/month per port for the next 15 ports, and $500/month per port for all ports over 20).

[52] *See* Exchange Rule 210. The Sponsored User is subject to the fees, if any, of the Sponsoring Member. The Exchange notes that the Sponsoring Member is not required to publicize, let alone justify or file with the Commission its fees, and as such could charge the Sponsored User any fees it deems appropriate, even if such fees would otherwise be considered supra-competitive, or otherwise potentially unreasonable or uncompetitive.

[53] *See* Securities Exchange Act Release No. 90333 (November 4, 2020), 85 FR 71666 (November 10, 2020) (SR–CBOE–2020–105) (the ''Cboe Fee Filing''). The Cboe Fee Filing cited to the October 2020 Active Broker Dealer Report, provided by the Commission's Office of Managing Executive, on October 8, 2020.

[54] *Id.*

in order to trade options. There is also a possible range of alternative strategies, including routing to the exchange through another participant or market center or accessing the Exchange indirectly. For example, there are 15 other U.S. options exchanges, which the Exchange must consider in its pricing discipline in order to compete for market participants. In this competitive environment, market participants are free to choose which competing exchange to use to satisfy their business needs. As a result, the Exchange believes this proposed rule change permits fair competition among national securities exchanges. Accordingly, the Exchange does not believe its proposed fee changes impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange received one comment on the proposed rule change.[55] The Exchange notes that the Exchange, and its affiliates, MIAX Pearl and MIAX, justified similar fee changes in the past with similar, if not identical, justifications in previous filings that have been noticed by the Commission for public comment and are currently in effect.[56] Nonetheless, the Exchange has sought to address the commenters concerns via the enhanced justification and additional information included in this proposal.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,[57] and Rule 19b–4(f)(2)[58] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–EMERALD–2021–31 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–EMERALD–2021–31. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–EMERALD–2021–31 and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[59]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93176; File No. SR–LCH SA–2021–002]

Self-Regulatory Organizations; LCH SA; Order Approving Proposed Rule Change Relating to Eligible Collateral and Liquidity Risk Management

September 29, 2021.

I. Introduction

On August 18, 2021, Banque Centrale de Compensation, which conducts business under the name LCH SA (''LCH SA''), filed with the Securities and Exchange Commission (''Commission'' or ''SEC''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4,[2] a proposed rule change to expand the non-cash collateral that a Clearing Member may post with LCH SA to meet margin requirements and make certain other changes as described further below.[3] The proposed rule change was published for comment in the **Federal Register** on August 27, 2021.[4] The Commission did not receive comments regarding the proposed rule change. For the reasons discussed below, the Commission is approving the proposed rule change.

II. Description of the Proposed Rule Change

A. Additional Eligible Collateral

The proposed rule change would expand the list of non-cash collateral that a Clearing Member may post with LCH SA to meet margin requirements to include certain non-Euro government securities.[5] To carry out this change,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Capitalized terms used but not defined herein have the meanings specified in the CDS Clearing Rule Book, the CDS Clearing Procedures, the Clearing Notice, or the Liquidity Risk Modelling Framework the Clearing Regulations, as applicable.

[4] Self-Regulatory Organizations; LCH SA; Notice of Filing of Proposed Rule Change to Relating to Eligible Collateral and Liquidity Risk Management, Exchange Act Release No. 34–92723 (Aug. 23, 2021); 86 FR 48257 (Aug. 27, 2021) (SR–LCH SA–2021–002) (''Notice'').

[5] This description is substantially excerpted from the Notice, 86 FR 48257.

LCH SA would publish a new Clearing Notice, in accordance with Article 4.2.6.1 of the CDS Clearing Rule Book (the ''Rule Book''), specifying the additional acceptable non-Euro government securities.[6] The Clearing Notice would refer to the additional acceptable non-Euro government securities as the ''New Instruments.'' The Clearing Notice would further specify that only New Instruments with a minimum outstanding amount equivalent of 500 million Euros would be eligible.

Moreover, the Clearing Notice would specify that New Instruments transferred by a Clearing Member to LCH SA as Collateral shall be taken into account to satisfy the Clearing Member's Margin Requirements only up to 15% of the total Margin Requirements and New Instruments transferred by a Clearing Member to LCH SA as Collateral in excess of such 15% cap shall be ignored for the purposes of determining whether the Clearing Member's Margin Requirements are satisfied. LCH SA is including this particular limitation because the European Central Bank will not convert New Instruments to Euros and LCH SA currently does not otherwise have the operational capacity to convert New Instruments to Euros.[7]

Moreover, LCH SA has determined, at this time, not to treat New Instruments as Pledged Eligible Collateral. Pledged Eligible Collateral is that Eligible Collateral which a Clearing Member may pledge to LCH SA under a pledge agreement entered into between LCH SA and the Clearing Member. Under Article 3.2.3.2 of the Rule Book, Pledged Eligible Collateral is transferred to LCH SA using a Belgian law security interest with no title transfer pursuant to the applicable provisions of Belgian law. LCH SA determined that Clearing Member interest was not sufficient to justify the additional operational resources needed to allow the transfer of New Instruments as Pledged Eligible Collateral. Accordingly, the Clearing Notice would specify that New Instruments are not eligible as Pledged Eligible Collateral. Moreover, the proposed rule change would amend the definition of Pledged Eligible Collateral in Section 1.1.1 of the Rule Book to provide that the term means ''Eligible Collateral as described in a Clearing Notice which is pledged in accordance with a Pledge Agreement.'' Because the proposed Clearing Notice would specify that New Instruments are not Pledged Eligible Collateral, this proposed change would exclude New Instruments from the definition of Pledged Eligible Collateral in Section 1.1.1 of the Rule Book.

In furtherance with this change, the proposed rule change also would amend Section 3.13 of the CDS Clearing Procedures. Section 3.13 describes how Clearing Members may transfer Eligible Collateral pursuant to a Pledge Agreement under Article 3.2.3.2 of the Rule Book. The proposed rule change would clarify that the term Eligible Collateral, as used in Section 3.13, means Eligible Collateral as described in a Clearing Notice. Because the proposed Clearing Notice would specify that New Instruments are not Pledged Eligible Collateral, this proposed change would exclude New Instruments from amended Section 3.13 of the CDS Clearing Procedures.

The proposed rule change also would amend LCH SA's Liquidity Risk Modelling Framework (the ''Framework'') to take into account this expansion of Eligible Collateral. The Framework describes the Liquidity Stress Testing framework by which the Collateral and Liquidity Risk Management department of LCH Group Holdings Limited (''CaLM'') assures that LCH SA has enough cash available to meet any financial obligations, both expected and unexpected, that may arise over the liquidation period for each of the clearing services that LCH SA offers. The proposed rule change would amend Sections 4.1.3, 4.1.4, 5.2.1.1, 5.3.5, and 5.4.3 of the Framework to clarify that LCH SA will exclude New Instruments from the calculation of LCH SA's liquidity resources. The proposed rule change would further specify the reason for this exclusion: New Instruments are not European Central Bank eligible and currently not covered by CaLM's activities for transformation into Euros. In other words, the European Central Bank will not convert New Instruments to Euros and LCH SA currently does not otherwise have the operational capacity to convert them to Euros.[8] For this same reason, the proposed rule change would amend Section 5.5.1 of the Framework to clarify that Non-Euro, non-cash Collateral like the New Instruments are not European Central Bank eligible assets.

Finally, in accordance with these changes, the proposed rule change also would amend Section 3.9 of the CDS Clearing Procedures to update the link to the portion of LCH SA's website that contains a list of Eligible Collateral.

B. Other Changes

In addition to the expansion of Eligible Collateral, the proposed rule change would also expand the custodians at which Clearing Members may deposit Eligible Collateral by adding Clearstream Banking Luxembourg as a central securities depository for LCH SA. The proposed rule change would amend Section 3.4(d) of the CDS Clearing Procedures to include Clearing Banking Luxembourg in the list of entities through which securities may be transferred to LCH SA. Similarly, the proposed rule change would amend Sections 3.10 and 3.12 to include Clearing Banking Luxembourg in the list of central securities depositories in which LCH SA holds Eligible Collateral.

Moreover, unrelated to the expansion of Eligible Collateral, the proposed rule change also would amend the Framework to clarify certain sections, tables, and formula in response to model validations and other routine updates. Beginning in Section 4.1.1, Description of sources of liquidity, the proposed rule change would add description to clarify LCH SA's ability to use Collateral as a source of liquidity. Specifically, the proposed rule change would clarify that, with limited exceptions, LCH SA generally receives Collateral on a full title transfer basis, which permits LCH SA to use such collateral, to offset it with all related claims and to consider such Collateral available for liquidity purposes. As would be described, the two exceptions are: (i) Collateral deposited through a pledge and (ii) Collateral deposited through a central bank guarantee.

Next, in Sections 4.1.3 and 4.1.4, the proposed rule change would clarify that Collateral deposited through a pledge may be used for liquidity purposes only if the Clearing Member pledging such Collateral has defaulted.

The proposed rule change also would amend Section 4.1.4 regarding the use of non-Euro cash Collateral posted in full title by Clearing Members (*i.e.* Collateral that is not pledged). Section 4.1.4 currently describes how such Collateral may be used to raise liquidity and how CaLM has demonstrated its ability to raise Euro cash with non-Euro non-cash collateral. The proposed rule change would specify that the non-Euro non-cash collateral used by CaLM in that case was collateral in USD and GBP.

[6] The additional non-Euro Eligible Collateral would be: (i) Australian Treasury Bills and Government Bonds; (ii) Canadian Treasury Bills and Government Bonds; (iii) Danish Treasury Bills and Government Bonds; (iv) Japanese Treasury Bills, Treasury Discount Bills, and Government Bonds; (v) Norwegian Treasury Bills and Government Bonds; (vi) Swedish Treasury Bills and Government Bonds; and (vii) Swiss Treasury Bills and Government Bonds.

[7] Notice, 86 FR 48257.

[8] Notice, 86 FR 48257.

The proposed rule change also would add to Section 4.1.4 a short explanation of the overdraft facility in place with Citibank that allows LCH SA to source non-Euro currencies in case of liquidity needs.

In Section 4.2.1.4, the proposed rule change would update the table of figures of the liquidity injected in the settlement system to smooth settlement activity. LCH SA represents that these figures are updated periodically in line with the observed cash flows.[9]

In Section 5.1.1, the proposed rule change would clarify that LCH SA has a group policy that allows LCH SA to perform an extraordinary margin call if liquidity deteriorates.

Section 5.1.2 currently describes how LCH SA monitors liquidity risks potentially arising from operational issues at settlement platforms and how any warnings about such risks are escalated to senior management to provide colours. The proposed rule change would replace the word ''colours'' with ''justifications.''

Section 5.2.1.1 currently notes that investments maturing over the operational target are not factored as liquidity resources for certain purposes. The proposed rule change would replace the word ''over'' with ''beyond.''

In Section 5.3.1, which provides an overview of the Liquidity Coverage Ratio (''LCR''), the proposed rule change would add an explanation that the LCR is an internal ratio similar, but not equivalent, to the banking metric defined in the Basel III framework and is used to ensure compliance with EMIR. The proposed rule change would also correct two typographical errors in Section 5.3.1.

Section 5.3.1.1 currently describes the assessment of the market risk related to the volatility of the value of the securities arising from RepoClear settlement and pledged at the Banque de France. The proposed rule change would add further description of the formula and assumptions used in making that assessment.

Next, the proposed rule change would amend Section 5.3.1.3, to clarify the treatment of settlement risk to account for early exercise of American-style options. The proposed rule change would describe how the liquidity needs coming from American-style options are computed.

Section 5.3.1.4 currently specifies that the liquidity needs arising from variation margin are assessed consistent with the relevant listed derivatives stress scenario. The proposed rule change would specify that such scenario includes spread shifts and implied volatility shifts, thus clarifying the calculation of that particular LCR component. The proposed rule change would make similar updates to Sections 5.3.1.5 and 5.3.4.

In Section 5.5, the proposed rule change would delete a duplicated sentence.

Section 5.5.1 of the Framework describes the independent stress of various risk factors, and it includes a discussion of how many defaults LCH SA can sustain before generating a liquidity shortfall. The proposed rule change would add a clarification to this discussion that, when considering multiple defaults, the clearing members with the worst credit quality are assumed defaulting first.

Finally, the proposed rule change would update Appendix 3 and Appendix 5 to add description of the overdraft facility in place with Citibank that allows LCH SA to source non-Euro currencies in case of liquidity needs.

III. Discussion and Commission Findings

Section 19(b)(2)(C) of the Act directs the Commission to approve a proposed rule change of a self-regulatory organization if it finds that such proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to such organization.[10] For the reasons given below, the Commission finds that the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act[11] and Rules 17Ad–22(e)(5), (e)(7), and (e)(7)(ix).[12]

A. Consistency With Section 17A(b)(3)(F) of the Act

Section 17A(b)(3)(F) of the Act requires, among other things, that the rules of LCH SA be designed to promote the prompt and accurate clearance and settlement of securities transactions and, to the extent applicable, derivative agreements, contracts, and transactions, as well as to assure the safeguarding of securities and funds which are in the custody or control of LCH SA or for which it is responsible.[13] As discussed in more detail below, the Commission finds that the proposed rule change is consistent with Section 17A(b)(3)(F) of the Act.[14]

i. Additional Eligible Collateral

As discussed above, the proposed rule change would expand the list of non-cash collateral that a Clearing Member may post with LCH SA to meet margin requirements to include New Instruments, which would be certain non-Euro government securities. The proposed rule change would do so by issuing a new Clearing Notice to specify the New Instruments and amending Section 3.9 of the CDS Clearing Procedures to update the link to the portion of LCH SA's website that contains a list of Eligible Collateral. The Commission believes that by expanding the collateral that Clearing Members may post to satisfy margin requirements to include New Instruments and accordingly updating the link to the portion of LCH SA's website that contains a list of Eligible Collateral, these proposed changes would promote the ability of Clearing Members to meet margin requirements and therefore clear and settle transactions at LCH SA. Thus, the Commission believes these aspects of the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions.

Moreover, the Commission believes that the conditions placed upon New Instruments would promote the prompt and accurate clearance and settlement of securities transactions and assure the safeguarding of securities and funds which are in the custody or control of LCH SA or for which it is responsible. The Commission believes that, for example, limiting New Instruments to those with a minimum outstanding amount equivalent to 500 million Euros would help to ensure that LCH SA is able to liquidate posted New Instruments if necessary. Moreover, given that that the European Central Bank will not convert New Instruments to Euros and LCH SA currently does not otherwise have the operational capacity to convert New Instruments to Euros, the Commission believes that limiting the amount of additional Eligible Collateral to 15% of a Clearing Member's total Margin Requirements should help to ensure that LCH SA is able to maintain sufficient liquidity even while accepting New Instruments as Eligible Collateral. Similarly, the Commission believes that amending the Framework to clarify that LCH SA will exclude New Instruments from the calculation of LCH SA's liquidity resources and that non-Euro, non-cash Collateral like New Instruments are not European Central Bank eligible assets, should help to ensure that LCH SA is able to maintain sufficient liquidity. The Commission believes that maintaining sufficient liquidity should, in turn, help to ensure that LCH SA is able to

[14] 15 U.S.C. 78q–1(b)(3)(F).

continue clearing and settling securities transactions and safeguarding securities and funds in the face of a Clearing Member default or other liquidity need, and therefore the Commission believes these aspects of the proposed rule change would be consistent with Section 17A(b)(3)(F) of the Act.[15]

Finally, as discussed above, LCH SA has determined, at this time, not to treat New Instruments as Pledged Eligible Collateral due to a lack of Clearing Member interest and the additional operational resources required to allow such treatment. Accordingly, the proposed rule change would amend the Rule Book and the CDS Clearing Procedures to ensure that New Instruments are not treated as Pledged Eligible Collateral. The Commission believes these changes in particular should help to ensure that LCH SA is able to focus its operations and resources on clearing and settling securities transactions and assuring the safeguarding of securities and funds.

Therefore, for the reasons discussed above, the Commission finds that these aspects of the proposed rule change are consistent with the Section 17A(b)(3)(F) of the Act.[16]

ii. Other Changes

In addition to the expansion of Eligible Collateral, the Commission believes that the other changes discussed above would promote the prompt and accurate clearance and settlement of securities transactions and would assure the safeguarding of securities and funds which are in the custody or control of LCH SA or for which it is responsible. In particular, the Commission believes that amending Section 3 of the CDS Clearing Procedures to include Clearing Banking Luxembourg in the list of central securities depositories through which securities may be transferred to LCH SA would provide Clearing Members and LCH SA an additional option to use as a central securities depository, therefore increasing LCH SA's operational resiliency. The Commission believes that increasing operational resiliency, in turn, should promote the prompt and accurate clearance and settlement of securities transactions and assure the safeguarding of securities and funds which are in the custody or control of LCH SA or for which it is responsible by reducing the likelihood that Clearing Members would be unable to provide collateral to LCH SA.

Moreover, the Commission believes that the other clarifications, updates, and corrections to the Framework described in Section II.B above would be consistent with the Section 17A(b)(3)(F) of the Act.[17] As discussed above, these changes would, among other things, clarify LCH SA's ability to use Collateral, including Collateral that is pledged; describe the overdraft facility in place with Citibank that allows the LCH SA to source non-Euro currencies in case of liquidity needs; update the figures describing the liquidity injected in the settlement system to smooth settlement activity; clarify the treatment of settlement risk related to American-style options and other aspects of liquidity stress scenarios; and correct typographical and drafting errors. The Commission believes that all of the changes described in Section II.B above would improve the Framework by increasing its clarity and readability and helping to ensure that the Framework accurately describes how LCH SA considers and covers its liquidity needs. The Commission believes that increasing the clarity and readability of the Framework should help to avoid errors and inconsistencies in the application of the Framework and this should, in turn, improve LCH SA's ability to maintain sufficient liquidity using the Framework. Because the Commission believes that having sufficient liquidity should help to ensure that LCH SA is able to continue clearing and settling securities transactions and safeguarding securities and funds in the face of a Clearing Member default or other liquidity need, the Commission therefore finds these aspects of the proposed rule change are consistent with Section 17A(b)(3)(F) of the Act.[18]

B. Consistency With Rule 17Ad–22(e)(5)

Rule 17Ad–22(e)(5) requires that LCH SA establish, implement, maintain and enforce written policies and procedures reasonably designed to limit the assets it accepts as collateral to those with low credit, liquidity, and market risks, and set and enforce appropriately conservative haircuts and concentration limits if LCH SA requires collateral to manage its or its participants' credit exposure; and require a review of the sufficiency of its collateral haircuts and concentration limits to be performed not less than annually.[19] As discussed above, under the proposed new Clearing Notice, only those New Instruments with a minimum outstanding amount equivalent to 500 million Euros would be eligible for posting to LCH SA. The Commission believes that this aspect of the proposed rule change would help to ensure that New Instruments are limited to those assets with low liquidity risks, consistent with Rule 17Ad–22(e)(5),[20] by setting a reasonable condition that would help to ensure that LCH SA is able to liquidate the additional Eligible Collateral if necessary. Moreover, as discussed above, under the proposed new Clearing Notice, New Instruments transferred by a Clearing Member to LCH SA as Collateral shall be taken into account to satisfy the Clearing Member's Margin Requirements only up to 15% of the total Margin Requirements. The Commission believes this aspect of the proposed rule change would set an appropriate limit that should help to ensure that a Clearing Member's collateral is not overly concentrated in New Instruments. The Commission further believes this limit is important given that the European Central Bank will not convert New Instruments to Euros and LCH SA currently does not otherwise have the operational capacity to convert New Instruments to Euros.

Thus, the Commission finds that these aspects of the proposed rule change are consistent with Rule 17Ad–22(e)(5).[21]

C. Consistency With Rules17Ad–22(e)(7) and)(e)(7)(ix)

Rule 17Ad–22(e)(7) generally requires that LCH SA establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively measure, monitor, and manage the liquidity risk that arises in or is borne by LCH SA, including measuring, monitoring, and managing its settlement and funding flows on an ongoing and timely basis, and its use of intraday liquidity.[22] As discussed in Part II.B above, the proposed rule change would add to the Framework description of Collateral as a source of liquidity—that LCH SA generally can use Collateral for liquidity purposes except (i) Collateral that is pledged (which could only be used for liquidity purposes if the Clearing Member pledging such Collateral has defaulted) and (ii) Collateral deposited through a central bank guarantee. The Commission believes that this additional description would help to clarify the sources of liquidity that LCH SA would use to, among other things, manage its liquidity risk. Moreover, the proposed rule change would clarify how CaLM has used collateral in USD and GBP to raise Euro cash and update the table of figures of the liquidity injected

[15] 15 U.S.C. 78q–1(b)(3)(F).

[16] 15 U.S.C. 78q–1(b)(3)(F).

[17] 15 U.S.C. 78q–1(b)(3)(F).

[18] 15 U.S.C. 78q–1(b)(3)(F).

[19] 17 CFR 240.17Ad–22(e)(5).

[20] 17 CFR 240.17Ad–22(e)(5).

[21] 17 CFR 240.17Ad–22(e)(5).

[22] 17 CFR 240.17Ad–22(e)(7).

in the settlement system to smooth settlement activity. Again, the Commission believes this additional description would help to clarify LCH SA's sources of liquidity and how it manages settlement and funding flows. Finally, the proposed rule change would add a general explanation of the LCR and how it relates to the Basel III framework. The proposed rule change similarly would add further explanations of some of the assumptions used in calculating the LCR, such as settlement risk associated with American-style options, liquidity needs arising from variation margin, and that when considering multiple defaults Clearing Members with the worst credit quality are assumed defaulting first. Because LCH SA uses the LCR to ensure that it has sufficient liquidity, the Commission believes that the additional description would help to clarify the LCR and therefore how LCH SA manages its liquidity risk. Thus, the Commission believes these aspects of the proposed rule change generally would be consistent with Rule 17Ad–22(e)(7).[23]

Rule 17Ad–22(e)(7)(ix), in particular, requires that LCH SA establish, implement, maintain and enforce written policies and procedures reasonably designed to effectively measure, monitor, and manage the liquidity risk that arises in or is borne by LCH SA, including measuring, monitoring, and managing its settlement and funding flows on an ongoing and timely basis, and its use of intraday liquidity by, at a minimum describing LCH SA's process to replenish any liquid resources that LCH SA may employ during a stress event.[24] As discussed in Part II.B above, the proposed rule change would add description to the Framework of LCH SA's group policy that allows LCH SA to perform an extraordinary margin call if liquidity deteriorates and description of the overdraft facility in place with Citibank that allows the LCH SA to source non-Euro currencies in case of liquidity needs. The Commission believes that these clarifications would help to describe LCH SA's process to replenish any liquid resources that LCH SA may employ during a stress event, consistent with Rule 17Ad–22(e)(7)(ix).[25]

Thus, the Commission finds that these aspects of the proposed rule change are consistent with Rule 17Ad–22(e)(7) generally and (e)(7)(ix) in particular.[26]

Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act, and in particular, with the requirements of Section 17A(b)(3)(F) of the Act[27] and Rules 17Ad–22(e)(5), (e)(7), and (e)(7)(ix).[28]

It is therefore ordered pursuant to Section 19(b)(2) of the Act[29] that the proposed rule change (SR–LCH SA–2021–002) be, and hereby is, approved.[30]

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93173; File No. SR–CboeBZX–2021–024]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To List and Trade Shares of the WisdomTree Bitcoin Trust Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares

September 29, 2021.

On March 26, 2021, Cboe BZX Exchange, Inc. (''BZX'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the WisdomTree Bitcoin Trust under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares. The proposed rule change was published for comment in the **Federal Register** on April 15, 2021.[3]

On May 26, 2021, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On July 13, 2021, the Commission instituted proceedings under Section 19(b)(2)(B) of the Act[6] to determine whether to approve or disapprove the proposed rule change.[7]

Section 19(b)(2) of the Act[8] provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such determination. The proposed rule change was published for comment in the **Federal Register** on April 15, 2021.[9] The 180th day after publication of the proposed rule change is October 12, 2021. The Commission is extending the time period for approving or disapproving the proposed rule change for an additional 60 days. The Commission finds that it is appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change and the issues raised in the comment letters that have been submitted in connection therewith. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[10] designates December 11, 2021, as the date by which the Commission shall either approve or disapprove the proposed rule change (File Number SR–CboeBZX–2021–024).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93212; File No. SR–NYSE–2021–40]

Self-Regulatory Organizations; New York Stock Exchange LLC; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To Adopt on a Permanent Basis the Pilot Program for Market-Wide Circuit Breakers in Rule 7.12

September 30, 2021.

I. Introduction

On July 2, 2021, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act'') [1] and Rule 19b–4 thereunder,[2] a proposal to make its rules governing the operation of the Market-Wide Circuit Breakers (''MWCB'') mechanism permanent. The proposed rule change was published for comment in the **Federal Register** on July 22, 2021.[3] On August 27, 2021, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to either approve the proposed rule changes, disapprove the proposed rule changes, or institute proceedings to determine whether to disapprove the proposed changes.[5] The Commission has received no comments on the proposed rule change.

This order institutes proceedings under Section 19(b)(2)(B) of the Exchange Act [6] to determine whether to approve or disapprove the proposed rule changes.

II. Description of the Proposed Rule Changes

MWCBs are coordinated, cross-market trading halts designed to operate during extreme market-wide declines to provide opportunities for markets and market participants to assess market conditions and systemic stress.[7] Each cash equity exchange and options exchange has rules that govern the operation of these MWCBs. These rules operate on a pilot basis. The current pilot period was recently extended from October 18, 2021 to March 18, 2022.[8]

The MWCB Pilot Rules provide for trading halts in all cash equity securities during a severe market decline as measured by a single-day decline in the S&P 500 Index (''SPX'').[9] Under the Pilot Rules, a market-wide trading halt will be triggered if SPX declines in price by specified percentages from the prior day's closing price of that index.[10] The triggers are set at three circuit breaker thresholds: 7% (Level 1), 13% (Level 2), and 20% (Level 3).[11] A market decline that triggers a Level 1 or Level 2 halt after 9:30 a.m. and before 3:25 p.m. would halt market-wide trading for 15 minutes, while a similar market decline at or after 3:25 p.m. would not halt market-wide trading.[12] Level 1 and Level 2 halts may occur only once a day. A market decline that triggers a Level 3 halt at any time during the trading day would halt market-wide trading for the remainder of the trading day.[13]

The NYSE's MWCB Pilot Rules also require all designated Regulation SCI firms to participate in at least one MWCB test each year.[14] Specifically, Regulation SCI Firms must attest that they are able to or have attempted to: (A) Receive and process MWCB halt messages from the securities information processors (''SIPs''); (B) receive and process resume messages from the SIPs following a MWCB halt; (C) receive and process market data from the SIPs relevant to MWCB halts; and (D) send orders following a Level 1 or Level 2 MWCB halt in a manner consistent with their usual trading behavior.[15]

The triggers provided for in the MWCB Pilot Rules were triggered for the first time in March 2020 when MWCB Level 1 halts occurred on March 9, 12, 16, and 18, 2020. In response to these events, a task force comprised of the SROs reviewed the events and concluded that the MWCBs had performed as expected and recommended that no changes be made to the MWCB rules.[16] Subsequently, at the request of the Director of the Commission's Division of Trading and Markets, the SROs and a ''Working Group'' composed of SRO representatives and industry advisers that included members of the advisory committees to both the LULD Plan and the NMS Plans prepared a study, which includes a timeline of the MWCB events in March 2020; a summary of the analysis and recommendations of the MWCB Task Force; an evaluation of the operation of the Pilot Rules during the March 2020 events; an evaluation of the design of the current MWCB system; and the Working Group's conclusions and recommendations.[17]

Based on the conclusions and recommendations reached by the Working Group after analyzing how the MWCBs performed in March 2020, the Exchange proposed to transition the Pilot Rules to operate on a permanent basis without substantive change.[18]

III. Proceedings To Determine Whether To Disapprove SR–NYSE–2021–40 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act to determine whether the proposal should be approved or disapproved. Institution of such proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change, as discussed below. Institution of disapproval proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved.

Pursuant to Section 19(b)(2)(B) of the Act, the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis and input concerning the proposed rule change's consistency with the Act [19] and, in particular, with Section 6(b)(5) of the Act, which requires, among other things, that the rules of a national securities exchanges be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.[20]

Under the Commission's Rule of Practice, the ''burden to demonstrate that a proposed rule change is consistent with the Exchange Act and the rules and regulations issued thereunder . . . is on the self-regulatory organization ['SRO'] that proposed the

rule change.'' [21] The description of a proposed rule change, its purpose and operation, its effect, and a legal analysis of its consistency with applicable requirements must all be sufficiently detailed and specific to support an affirmative Commission finding.[22] Any failure of the SRO to provide this information may result in the Commission not having a sufficient basis to make an affirmative finding that a proposed rule change is consistent with the Act and applicable rules and regulations.[23]

As discussed above, the Exchange is proposing to make the current MWCB Pilot Rules permanent, substantively without change, including the provision requiring systems testing by certain market participants. Specifically, the Exchange proposes to require Designated Market Makers and Supplemental Liquidity Providers that have been determined by the Exchange to contribute a meaningful percentage of the Exchange's overall volume, measured on a quarterly or monthly basis, to participate in MWCB testing, though the Exchange may consider other factors in determining the member organizations that will be required to participate in testing. These market participants would be required to participate in at least one MWCB test each year and attest that they can send and receive MWCB halt and resume messages, as well as receive and process market data from the SIPs relevant to MWCBs and send orders following a MWCB Level 1 or Level 2 event. The proposed testing requirement, however, does not contemplate an ongoing assessment of whether the MWCB design (*e.g.,* trigger thresholds, measurement criteria, and time of day application) remains appropriate over time, as the market structure evolves, and under various threat scenarios, nor does it require the Exchange to participate in testing. The Commission seeks comment on the following questions and asks commenters to submit data where appropriate to support their views:

1. Do commenters believe that an ongoing assessment of the MWCB design should be conducted as market structure evolves and under various threat scenarios? If so, how could such an assessment meaningfully be conducted, understanding that it is difficult to replicate or forecast how market participants would behave during an actual MWCB event? How frequently should such an assessment be done?

2. Are commenters aware of ongoing assessment methods in other contexts (*e.g.,* cybersecurity) that could inform how an ongoing assessment of the MWCB could be structured?

3. Should the Exchange be required to participate in a coordinated fashion in the operational test with the other SROs, report the results of their operational tests and periodic assessment of the MWCB design to the Commission and inform the Commission of any concerns or proposed modifications concerning the MWCBs?

For the reasons discussed above, the Commission believes it is appropriate to institute proceedings pursuant to Section 19(b)(2)(B) of the Act to determine whether the proposal should be approved or disapproved.

IV. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the concerns identified above, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposed rule change is inconsistent with Section 6(b)(5) or any other provision of the Act, or the rules and regulation thereunder. Although there do not appear to be any issues relevant to approval or disapproval which would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b–4, any request or an opportunity to make an oral presentation.[24]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposal should be approved or disapproved by October 26, 2021. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by November 9, 2021. The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal which are set forth in the Notice, in addition to any other comments they may wish to submit about the proposed change.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2021–40 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2021–40. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*).

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR–NYSE–2021–40 and should be submitted on or before October 26, 2021. Rebuttal comments should be submitted byNovember 9, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[25]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93183; File No. SR–NYSE–2021–56]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend NYSE Rule 7.2

September 30, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 28, 2021, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Rule 7.2 (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange. Juneteenth National Independence Day was designated a legal public holiday in June 2021. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE Rule 7.2 (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange.

On June 17, 2021, Juneteenth National Independence Day was designated a legal public holiday.[3] Consistent with broad industry sentiment [4] and the approach recommended by the Securities Industry and Financial Markets Association (''SIFMA''),[5] the Exchange proposes to add ''Juneteenth National Independence Day'' to the existing list of holidays in the first paragraph of NYSE Rule 7.2. As a result, the Exchange will not be open for business on Juneteenth National Independence Day, which falls on June 19 of each year. In accordance with the second paragraph of NYSE Rule 7.2, when the holiday falls on a Saturday, the Exchange will not be open for business on the preceding Friday, and when it falls on a Sunday, the Exchange will not be open for business on the succeeding Monday.[6]

The first paragraph of the revised rule would read as follows (proposed additions *italicized*):

The Exchange will not be open for business on New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, *Juneteenth National Independence Day,* Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed change would remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors and the public interest because the proposed amended rule would clearly state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The change would thereby promote clarity and transparency in the Exchange rules by updating the list of holidays of the Exchange.

The proposed change does not raise any new or novel issues.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[9] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather to amend the Exchange rule regarding holidays.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section

[3] Public Law 117–17.

[4] *See, e.g. https://www.bloomberg.com/news/articles/2021-06-18/bofa-makes-juneteenth-a-holiday-joining-jpmorgan-wells-fargo?sref=Hhue1scO.*

[5] SIFMA recommends a full market close in observance of Juneteenth National Independence Day. *See https://www.sifma.org/resources/general/holiday-schedule/. See also https://www.sifma.org/resources/news/sifma-revises-2022-fixed-income-market-close-recommendations-in-the-u-s-to-include-full-close-for-juneteenth-national-independence-day/.*

[6] NYSE Rule 7.2. There is an exception to the practice if unusual business conditions exist, such as the ending of a monthly or yearly accounting period. *Id.*

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

[9] 15 U.S.C. 78f(b)(8).

19(b)(3)(A) of the Act[10] and Rule 19b–4(f)(6)(iii) thereunder.[11]

A proposed rule change filed under Rule 19b–4(f)(6)[12] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[13] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative prior to 30 days after the date of the filing. The Exchange states that waiver of the operative delay would be consistent with the protection of investors and the public interest because the proposed rule change, as described above, would state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The Exchange further states that the proposed change does not raise any new or novel issues. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSE–2021–56 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2021–56. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2021–56, and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93187; File No. SR–NYSEAMER–2021–39]

Self-Regulatory Organizations; NYSE American LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend NYSE American Rule 7.2E

September 30, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 28, 2021, NYSE American LLC (''NYSE American'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE American Rule 7.2E (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange. Juneteenth National Independence Day was designated a legal public holiday in June 2021. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE American Rule 7.2E (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange.

On June 17, 2021, Juneteenth National Independence Day was designated a legal public holiday.[3] Consistent with broad industry sentiment [4] and the approach recommended by the Securities Industry and Financial Markets Association (''SIFMA''),[5] the Exchange proposes to add ''Juneteenth National Independence Day'' to the existing list of holidays in the first paragraph of NYSE American Rule 7.2E. As a result, the Exchange will not be open for business on Juneteenth National Independence Day, which falls on June 19 of each year. In accordance with the second paragraph of NYSE American Rule 7.2E, when the holiday falls on a Saturday, the Exchange will not be open for business on the preceding Friday, and when it falls on a Sunday, the Exchange will not be open for business on the succeeding Monday.[6]

The first paragraph of the revised rule would read as follows (proposed additions *italicized*):

The Exchange will not be open for business on New Year's Day, Martin Luther King Jr. Day, Presidents' Day, Good Friday, Memorial Day, *Juneteenth National Independence Day,* Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed change would remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors and the public interest because the proposed amended rule would clearly state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The change would thereby promote clarity and transparency in the Exchange rules by updating the list of holidays of the Exchange.

The proposed change does not raise any new or novel issues.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[9] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather to amend the Exchange rule regarding holidays.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [10] and Rule 19b–4(f)(6)(iii) thereunder.[11]

A proposed rule change filed under Rule 19b–4(f)(6) [12] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[13] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative prior to 30 days after the date of the filing. The Exchange states that waiver of the operative delay would be consistent with the protection of investors and the public interest because the proposed rule change, as described above, would state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The Exchange further states that the proposed change does not raise any new or novel issues. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEAMER–2021–39 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEAMER–2021–39. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEAMER–2021–39, and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93172; File No. SR–Nasdaq–2021–066]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change, as Modified by Amendment No. 1, To List and Trade Shares of the Valkyrie XBTO Bitcoin Futures Fund Under Nasdaq Rule 5711(g)

September 29, 2021.

On August 23, 2021, The Nasdaq Stock Market LLC (''Nasdaq'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the Valkyrie XBTO Bitcoin Futures Fund under Nasdaq Rule 5711(g). On August 25, 2021, Nasdaq filed Amendment No. 1 to the proposed rule change. The proposed rule change, as modified by Amendment No. 1, was published for comment in the **Federal Register** on September 9, 2021.[3] The Commission has received no comments on the proposed rule change.

Section 19(b)(2) of the Act[4] provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is October 24, 2021. The Commission is extending this 45-day time period.

The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change and any comments. Accordingly, pursuant to Section 19(b)(2) of the Act,[5] the Commission designates December 8, 2021, as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change, as modified by Amendment No. 1 (File No. SR–Nasdaq–2021–066).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[6]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93192; File No. SR–NYSE–2021–53]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing of Proposed Rule Change To Amend the Shareholder Voting Requirement Set Forth in Section 312.07 of the NYSE Listed Company Manual

September 29, 2021.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on September 16, 2021, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to adopt an amendment to the shareholder voting requirement set forth in Section 312.07 of the NYSE Listed Company Manual.

[15] 17 CFR 200.30–3(a)(12).

[5] *Id.*

[6] 17 CFR 200.30–3(a)(31).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

Section 312.07 of the NYSE Listed Company Manual (''Manual'') provides that, where shareholder approval is a prerequisite to the listing of any additional or new securities of a listed company, or where any matter requires shareholder approval, the minimum vote which will constitute shareholder approval for such purposes is defined as approval by a majority of votes cast on a proposal in a proxy bearing on the particular matter. Section 312.07 is currently applicable to shareholder approval of stock issuances under Sections 303A.08 (equity compensation) and 312.03 of the Manual.[4]

The text of Section 312.07 does not specifically address the treatment of abstentions. However, the Exchange has historically advised companies that abstentions should be treated as votes cast for purposes of Section 312.07. Under that approach, a proposal is deemed approved under Section 312.07 only if the votes in favor of the proposal exceed the aggregate of the votes cast against the proposal plus abstentions. The Exchange has observed that this approach has caused confusion among listed companies. The corporate laws of many states, including Delaware, allow companies to include in their governing documents that votes cast for purposes of a shareholder vote includes yes and no votes (but not abstentions), such that a proposal succeeds if the votes in favor exceed the votes cast against. The Exchange understands that, consistent with those state laws, many public companies have bylaws indicating that abstentions are not treated as votes cast.

The Exchange proposes to amend Section 312.07 to provide that a company must calculate the votes cast with respect to a proposal that is subject to Section 312.07 in accordance with its own governing documents and any applicable state law. The Exchange believes that this treatment of abstentions will avoid any complications engendered among issuers and shareholders when different voting standards are applied under the Exchange rule, a company's governing documents, and/or applicable state laws.

The Exchange notes that Nasdaq has a rule requiring that proposals receive a majority of ''the votes cast,'' [5] but is silent on the question as to whether abstentions should be treated as votes cast. Nasdaq has published an FAQ on its website that clearly states:

Nasdaq does not define the term ''votes cast''. As such, a company must calculate the ''votes cast'' in accordance with its governing documents and any applicable state law.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Securities Exchange Act of 1934 (the ''Act'') generally.[6] Section 6(b)(5) [7] requires, among other things, that exchange rules are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect the public interest and the interests of investors, promote just and equitable principles of trade and that they are not designed to permit unfair discrimination between issuers, brokers or dealers.

The Exchange believes that the proposal is designed to protect the public interest and the interests of investors. The proposed approach to calculations of ''votes cast'' in Section 312.07 would not prescribe a particular interpretation under Exchange rules. Rather, a listed company would calculate votes cast in accordance with the company's governing documents and applicable state laws. In doing so, the proposal will reduce confusion among issuers and shareholders. The proposed amendment would also help ensure that shareholders properly understand the implications of choosing to abstain on a proposal subject to approval under Exchange rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposal would impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. There would be no effect on the competition among issuers listed on the NYSE resulting from the proposed amendment, because all issuers would calculate votes cast in accordance with their own governing documents and applicable state laws. The proposed amendment is consistent with the existing interpretation of the comparable rule of the other primary listing exchange, so the proposed amendment would have no effect on the competition for listings among exchanges.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[4] Item 21(b) of Schedule 14A requires companies soliciting proxies to disclose the method by which votes will be counted, including the treatment and effect of abstentions and broker non-votes under applicable state law as well as the company's charter and bylaw provisions.

[5] *See* Nasdaq Marketplace Rule 5635(e)(4).

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSE–2021–53. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSE–2021–53, and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[8]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93171; File No. SR–NYSEArca–2021–67]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change To List and Trade Shares of the One River Carbon Neutral Bitcoin Trust Under NYSE Arca Rule 8.201–E

September 29, 2021.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on September 20, 2021, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to list and trade shares of the One River Carbon Neutral Bitcoin Trust under NYSE Arca Rule 8.201–E. The proposed change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to list and trade shares (''Shares'') of the One River Carbon Neutral Bitcoin Trust (the ''Trust'') pursuant to NYSE Arca Rule 8.201–E which governs the listing and trading of ''Commodity-Based Trust Shares.''[4]

Description of the Trust

The Shares will be issued by the Trust, a Delaware statutory trust.[5] The sponsor of the Trust is One River Digital Asset Management, LLC (''Sponsor''), a Delaware limited liability company. The Sponsor is a wholly-owned subsidiary of One River Asset Management, LLC. The trustee for the Trust is Delaware Trust Company (''Trustee''). The custodian for the Trust is Coinbase Custody Trust Company, LLC (''Custodian''). The Custodian will hold all of the Trust's bitcoin on the Trust's behalf. The marketing agent for the Trust is Foreside Global Services, LLC (the ''Marketing Agent''). The Bank of New York Mellon acts as the Trust's transfer agent (in such capacity, the ''Transfer Agent'') and its administrator (in such capacity, the ''Administrator'') to perform various administrative, accounting and recordkeeping functions on behalf of the Trust.

Operation of the Trust[6]

According to the Registration Statement, the Trust's investment objective is to seek to track the performance of bitcoin, as measured by the performance of the MVIS One River Carbon Neutral Bitcoin Index (the ''Index''), adjusted for the Trust's expenses and other liabilities. The Index is designed to reflect the performance of bitcoin in U.S. dollars on a carbon neutral basis. As described below, the Trust intends to offset the carbon footprint associated with bitcoin once a quarter by paying for the instantaneous retirement of carbon credits necessary to account for the daily estimated carbon emissions associated with the bitcoins

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] Commodity-Based Trust Shares are securities issued by a trust that represent investors' discrete identifiable and undivided beneficial ownership interest in the commodities deposited into the Trust.

[5] The Trust is a Delaware statutory trust, formed on April 27, 2021, pursuant to the Delaware Statutory Trust Act. The Trust operates pursuant to the Trust Agreement dated April 26, 2021. On May 24, 2021, the Trust filed a registration statement on Form S–1 under the Securities Act of 1933 (15 U.S.C. 77a) (the ''Securities Act'') (File No. 333–256407) (the ''Registration Statement on Form S–1'' or ''Registration Statement''). The Trust intends to adopt an Amended and Restated Trust Agreement as described in the Registration Statement on Form S–1 prior to requesting accelerated effectiveness thereof.

[6] The description of the operation of the Trust, the Shares and the bitcoin market contained herein are based, in part, on the Registration Statement. *See* note 5, *supra.*

held by the Trust.[7] MVIS, with the assistance of its affiliates, is also the calculation agent for the Index and MVIS® CryptoCompare Bitcoin Benchmark Rate.

In seeking to achieve its investment objective, the Trust will hold bitcoin and will value its Shares based on the same methodology used to calculate the Index, as adjusted to reflect the expenses associated with offsetting carbon credits. The Trust aims to provide a cost-efficient, carbon neutral way for shareholders to implement strategic and tactical asset allocation strategies that use bitcoin by investing in the Trust's Shares rather than purchasing, holding, and trading bitcoin directly.

Under normal circumstances, the Trust will not purchase or sell bitcoin directly, although the Trust may direct the Custodian to sell or transfer bitcoin to pay certain expenses. The Trust will also not hold cash or cash equivalents. However, there may be situations where the Trust will hold cash on a temporary basis. The Trust has entered into a cash custody agreement with BNYM (in such capacity, the ''Cash Custodian'') under which BNYM acts as custodian of the Trust's cash and cash equivalents. The Fund will not hold futures, options or options on futures.

The Trust will process all creations and redemptions in-kind. Financial firms that are authorized to purchase or redeem Shares with the Trust (known as ''Authorized Participants'') will deliver, or facilitate the delivery of, bitcoin to the Bitcoin Account (as defined below) in exchange for Shares when they purchase Shares. The Trust, through the Custodian, will then deliver bitcoin to such Authorized Participants when they redeem Shares. All bitcoin will be held by the Custodian. The Transfer Agent will facilitate the processing of purchase and sale orders in ''Creation Baskets'' (defined below) from the Trust.

Although the Trust will create Baskets only upon the receipt of bitcoins, and will redeem Baskets only by distributing bitcoins, a separate cash exchange process will be made available to Authorized Participants, which can be used, for example, by Authorized Participants who cannot or do not wish to own a bitcoin digital wallet address. Under the cash exchange process, an Authorized Participant may deposit cash with the Administrator, which will facilitate the purchase or sale of bitcoins through a liquidity provider (each, a ''Liquidity Provider'') on behalf of an Authorized Participant. The bitcoin purchased (or sold) by the Liquidity Provider in connection with the cash exchange process will, in turn, be delivered to (or from, as appropriate) the Custodian, on behalf of the Trust, in exchange for Baskets. To the extent an Authorized Participant chooses to rely on this cash exchange process when submitting an order to create or redeem a Basket, that Authorized Participant will pay (or receive) a cash amount based on a firm quote calculated by the Liquidity Provider, which will be equal to the spot price of bitcoin, as reported by the BBR (as defined below), at the time at which the Administrator receives the appropriate cash collateral amount (or the time at which the Administrator notifies the Authorized Participant that the order has been accepted, in the case of redemptions), plus a proportional transaction fee that is intended to cover the Liquidity Provider's expenses in connection with the creation or redemption order. Regardless of whether an Authorized Participant chooses to rely on this cash exchange process in connection with a given creation or redemption order, the Trust will create (or redeem, as appropriate) Baskets only upon the receipt (or distribution, as appropriate) of bitcoin, and will not create or redeem any Baskets based on the receipt or distribution of cash alone.

The Index and Carbon Neutrality

The MVIS One River Carbon Neutral Bitcoin Index is designed to reflect the performance of bitcoin in U.S. dollars on a carbon neutral basis. The Index is constructed using bitcoin price feeds from eligible bitcoin spot markets and volume weighted median price average (''VWMP''), calculated over 20 intervals in rolling three-minute increments,[8] less the estimated cost of offsetting the daily carbon emissions attributable to each bitcoin in the network.

The Index methodology was developed by MV Index Solutions GmbH (the ''Index Provider'' or ''MVIS'') and is monitored by the One River Index Committee (the ''Committee''), an independent, third-party calculation agent for the Index. MVIS, with the assistance of its affiliates, is also the calculation agent for the MVIS® CryptoCompare Bitcoin Benchmark Rate, which measures the value of the underlying bitcoin represented by the Index. The Index and its public dissemination provide transparency to investors.

In establishing the Index, MVIS and the Sponsor created a robust, transparent process for quantifying the carbon footprint of bitcoin in a clear, repeatable manner. The cost of the carbon offset used in the Index is calculated in the following steps. First, electricity consumption for the bitcoin mining network is recorded daily. Second, geolocation of bitcoin miners identifies the location of electricity usage. Third, for each location, the average production of electricity by its source of production (*e.g.,* solar, coal) is recorded. This estimates the carbon emission intensity of electricity consumption in the Bitcoin network. Fourth, total electricity consumption is multiplied by the carbon intensity of the Bitcoin network to estimate total carbon emissions. These steps allow MVIS to obtain a daily estimate of the carbon emissions necessary to run the Bitcoin network. The total carbon emissions of the Bitcoin network are divided by the total number of bitcoins in circulation[9] to estimate the carbon emissions attributable to each bitcoin on each day. Finally, the carbon emission attributable to each bitcoin is multiplied by the MCO2-token market price of a carbon offset, thus, providing a daily account of the cost of carbon for each bitcoin.

The Trust intends to offset the carbon footprint associated with the bitcoin it holds by paying for the retirement of voluntary carbon credits—equal to the daily estimated carbon emissions associated with the bitcoins held by the Trust. Voluntary carbon credits are certified and standardized under the Verra Verified Carbon Standard (''Verra''), an organization that

[7] The instantaneous retirement of carbon credits means that the Trust does not hold an intangible asset and that the carbon credit is permanently removed from tradeable supply.

[8] Unlike previous proposed rule changes relating to the listing of bitcoin products on U.S. exchanges that the Commission has disapproved, *see, e.g.,* Order Disapproving a Proposed Rule Change, as Modified by Amendment No. 1, Relating to the Listing and Trading of Shares of the Bitwise Bitcoin ETF Trust Under NYSE Arca Rule 8.201–E, Securities Exchange Act Release No. 87267 (Oct. 9, 2019), 84 FR 55382 (Oct. 16, 2019) (SR–NYSEArca–2019–01) (the ''Bitwise Order'') (measuring price over 6 consecutive five-minute segments) and Order Disapproving a Proposed Rule Change, as Modified by Amendment No. 1, to Amend NYSE Arca Rule 8.201–E (Commodity-Based Trust Shares) and to List and Trade Shares of the United States Bitcoin and Treasury Investment Trust Under NYSE Arca Rule 8.201–E, Securities Exchange Act Release No. 88284 (February 26, 2020), 85 FR 12595 (March 3, 2020) (SR–NYSEArca–2019–39) (the ''Wilshire Phoenix Order'') (measuring price over 12 consecutive five-minute segments), the Sponsor believes that the use of 20 consecutive three-minute segments will better enable the Index to approximate a normal sampling distribution with respect to bitcoin prices and, thus, will result in overall more accurate pricing of bitcoin.

[9] Bitcoin in circulation is number of coins that are circulating in the market and are in public hands. It is analogous to the flowing shares in the stock market. Several third-party vendors provide verified data on at least a daily basis. *See https://coinmarketcap.com/currencies/bitcoin/.*

establishes and manages standards and programs in connection with voluntary carbon credits. The Trust will only utilize carbon credits that meet the Verra standards.

The Trust has entered into an agreement with LIRDES S.A. (doing business as Moss Earth) (''Moss''), a company located in Uruguay, to pay for carbon credit tokens created by Moss (''MCO2 tokens'') representing certified reductions in greenhouse gas emissions. The MCO2 token is a digital representation of a carbon credit that is stored on a registry by Verra and can be acquired in over the counter or publicly traded markets. The MCO2 tokens issued by Moss are carbon offsets encrypted and tokenized utilizing blockchain technology and are stored on a registry managed by Verra.

Moss purchases carbon credits from projects that are certified under Verra's Verified Carbon Standard. Each circulating MCO2 token is intended to represent a claim on a certified carbon credit held in an aggregated pool of carbon credits within the Moss account on the Verra Registry. Tokenized carbon credits are fungible and do not represent a claim on a specific underlying carbon credit issued to a specific carbon reduction project.

The Trust will purchase MCO2 tokens from Moss at the end of March, June, September, and December at pre-negotiated prices and Moss will instantaneously retire the tokens to the public blockchain.[10] The number of MCO2 tokens paid for by the Trust will equal the aggregated sum of offsets implied by the daily carbon emissions for a single bitcoin over the preceding quarter multiplied by the average number of bitcoins held in the Trust's portfolio during the quarter, with a view towards tracking the carbon footprint offset estimate calculated by the Index. Employing tokenized carbon credits provides investors with enhanced transparency as the blockchain serves as a public record of the Trust transactions in carbon offsets on the Verra registry.

The Index value is the benchmark value of the bitcoin less the estimated daily cost of offsetting the carbon emissions of a single bitcoin. The value of the carbon offset provides the marketplace with a tangible measurement of the implied market cost of carbon emissions. The daily accumulation of the carbon offset component of the Index measures the totality of the cost of the carbon offset required for holding a single bitcoin over the accumulation period.

The Trust does not hold the carbon offset MCO2 tokens as an asset. Instead, the Trust pays for the MCO2 tokenized carbon offsets from Moss, who then instantaneously retire the tokens to the public blockchain, to reduce global carbon emissions by the carbon dioxide tonnage (or tonnage of other similar greenhouse gases) corresponding to such tokens. In tokenized form, investors and the marketplace can validate the activity in carbon credit offsets through the public blockchain, enhancing transparency. The retirement of the carbon offset makes it unusable in the future and is the final step in offsetting emissions. Upon expiration of its agreement with Moss in April 2031, the Trust will either enter into a replacement agreement, or alternatively pay for the retirement of MCO2 tokens or similar carbon credits at then current spot prices for such instruments.

According to the Sponsor, the Index is the aggregation of executed trade data for major bitcoin spot exchanges. To be eligible for inclusion in the Index, a constituent bitcoin exchange (''Constituent Bitcoin Exchange'') must facilitate spot trading of bitcoin against the US Dollar and make trade data and order data available through an application programming interface (''API'') with sufficient reliability, relevant data, and appropriate speed. The volume for spot trading must meet a minimum threshold when compared to the total volume of all Constituent Bitcoin Exchanges included in the Index. To be considered, an exchange must also enforce policies to ensure fair and transparent market conditions and have processes in place to impede illegal, or manipulative trading practices. Additionally, to be included as a constituent in the Index, each Constituent Bitcoin Exchange must comply with applicable law and regulation, including proper AML/KYC procedures.

The MVIS® CryptoCompare Bitcoin Benchmark Rate (BBR), the bitcoin component of the Index, is the bitcoin benchmark used in the tracking of funds comprising $821.2 million in total capitalization as of June 29, 2021, including recently introduced exchange-traded products in Canada.[11] The constituent exchanges are based on the top five ranking CryptoCompare exchange benchmarks: Coinbase, Gemini, Bitstamp, Kraken, and itBit. BBR was first released in 2019 to improve upon systematic evaluation of exchange counterparties with no established framework for assessing various exchange risks. CryptoCompare assigns a grade from AA to F to each spot exchange, with the goal of helping markets assess the lowest-risk exchanges in the industry. Eligible spot markets include all U.S. digital asset exchanges and/or regulated digital asset exchanges selected by the Committee. Such markets will be evaluated semi-annually, and the final selections will be made on the third Friday of January and July or during market disruptions where a market review is warranted, as determined by the Committee.

Top-tier exchanges are in the AA–B bracket and meet the standard of acceptable risk. More than 160 global spot exchanges are evaluated monthly based on data transparency, KYC stringency and transaction monitoring. Operational standards have increased across the board. The Sponsor notes that after ascertaining API data from these exchanges, the information is aggregated from actual trade data in a manner specifically designed to resist manipulation. Partitions are utilized to ensure large individual trades have a limited effect on the price of the Index by only influencing the volume-weighted median for a particular partition. Use of volume-weighted medians, as opposed to volume-weighted means, verifies that transactions conducted at outlying prices do not have an excessive effect on the value of a partition. The Index weighs each partition equally and also weighs each exchange that is a part of the Index equally.

Bitcoin and the Bitcoin Network[12]

According to the Registration Statement, bitcoin is a digital asset that can be transferred among participants on the Bitcoin network on a peer-to-peer basis via the internet. Unlike other means of electronic payments, bitcoin can be transferred without the use of a central administrator or clearing agency. Because a central party is not necessary to administer bitcoin transactions or maintain the bitcoin ledger, the term decentralized is often used in descriptions of bitcoin.

The ''Bitcoin network'' is a decentralized, open-source protocol of a peer-to-peer network. No single entity owns or operates the Bitcoin network.

[10] MCO2 tokens are recorded on the Ethereum blockchain and is publicly available. *See https://www.blockchain.com/explorer?view=eth.*

[11] *See* MVIS Investible Indices, available at: *https://www.mvis-indices.com/indices/digital-assets/mvis-cryptocompare-bitcoin-benchmark-rate.*

[12] Bitcoin (with an uppercase ''B'') is used to describe the system as a whole that is involved in maintaining the ledger of bitcoin ownership and facilitating the transfer of bitcoin among parties. When referring to the digital asset within the Bitcoin network, bitcoin is written with a lower case ''b.''

Bitcoin is not issued by any government, by banks or similar organizations. The infrastructure of the Bitcoin network is collectively maintained by a decentralized user base. The Bitcoin network is accessed through software, and software governs the creation, movement, and ownership of ''bitcoin,'' the unit of account on the Bitcoin network ledger. The value of bitcoin is determined, in part, by the supply of, and demand for, bitcoin in the global markets for trading bitcoin, market expectations for the adoption of bitcoin as a decentralized store of value, the number of merchants and/or institutions that accept bitcoin as a form of payment and the volume of private end-user-to-end-user transactions.

The first step in using bitcoin for transactions is to download specialized software referred to as a ''bitcoin wallet.'' A user's bitcoin wallet can run on a computer or smartphone, and can be used both to send and to receive bitcoin. Within a bitcoin wallet, a user can generate one or more unique ''bitcoin addresses,'' which are conceptually similar to bank account numbers on the Bitcoin Blockchain and are associated with a pair of public and private keys. After establishing a bitcoin address, a user can send or receive bitcoin from his or her bitcoin address to another user's address using the public and private keys. Sending bitcoin from one bitcoin address to another is similar in concept to sending a bank wire from one person's bank account to another person's bank account.

The amount of bitcoin associated with each bitcoin address is listed in a public ledger, referred to as a ''blockchain.'' Copies of the Bitcoin Blockchain exist on thousands of computers on the Bitcoin network throughout the internet. A user's bitcoin wallet will either contain a copy of the Bitcoin Blockchain or be able to connect with another computer that holds a copy of the Bitcoin Blockchain.

When a bitcoin user wishes to transfer bitcoin to another user, the sender must first request a bitcoin address from the recipient. The sender then uses his or her bitcoin wallet software to create a data packet containing the proposed addition (often referred to as a ''transaction'') to the Bitcoin Blockchain. The proposed transaction would reduce the sender's address and increase the recipient's address by the amount of bitcoin desired to be transferred, and is sent on a peer-to-peer basis to other computers participating in the Bitcoin network.

Bitcoin transaction and ownership records are reflected on the ''Bitcoin Blockchain,'' which is a digital public record or ledger. Copies of this ledger are stored in a decentralized manner on the computers of each Bitcoin network node (a node is any user who maintains on their computer a full copy of all the bitcoin transaction records, the blockchain, as well as related software). Transaction data is permanently recorded in files called ''blocks,'' which reflect transactions that have been recorded and authenticated by Bitcoin network participants. The Bitcoin network software source code includes protocols that govern the creation of new bitcoin and the cryptographic system that secures and verifies bitcoin transactions.

Bitcoin Transactions

According to the Registration Statement, bitcoin transactions are similar to an irreversible digital check. The transaction contains the sender's bitcoin address, the recipient's bitcoin address, the amount of bitcoin to be sent, a transaction fee and the sender's digital signature. The sender's use of his or her digital signature enables participants on the Bitcoin network to verify the authenticity of the bitcoin transaction. A user's digital signature is generated via usage of the user's so-called ''private key,'' one of two numbers in a so-called cryptographic ''key pair.'' A key pair consists of a ''public key'' and its corresponding private key, both of which are lengthy alphanumeric codes, derived together and possessing a unique relationship. Public keys are associated with bitcoin addresses that are publicly known and can accept a bitcoin transfer. Private keys are used to sign transactions that initiate the transfer of bitcoin from a sender's bitcoin address to a recipient's bitcoin address. Only the holder of the private key associated with a particular bitcoin address can digitally sign a transaction proposing a transfer of bitcoin from that particular bitcoin address.

Bitcoin can be transferred in direct peer-to-peer transactions through the direct sending of bitcoin over the Bitcoin Blockchain from one bitcoin address to another. Among end-users, bitcoin can be used to pay other members of the Bitcoin network for goods and services under what resembles a barter system. Consumers can also pay merchants and other commercial businesses for goods or services through direct peer-to-peer transactions on the Bitcoin Blockchain or through third-party service providers. In addition, investors may purchase and sell bitcoin to speculate as to the value of bitcoin in the bitcoin market, or as a long-term investment to diversify their portfolio.

The value of bitcoin within the market is determined, in part, by the supply of and demand for bitcoin in the global bitcoin market, market expectations for the adoption of bitcoin as a store of value, the number of merchants that accept bitcoin as a form of payment, and the volume of peer-to-peer transactions, among other factors.

Custody of the Trust's Bitcoins

The Custodian will retain custody of the Trust's bitcoin in an account for the Trust (the ''Bitcoin Account''). The Custodian will keep a substantial portion of the private keys associated with the Trust's bitcoin in ''cold storage'' or similarly secure technology. Cold storage is a safeguarding method with multiple layers of protections and protocols, by which the private key(s) corresponding to the Trust's bitcoin is (are) generated and stored in an offline manner. Private keys are generated in offline computers that are not connected to the internet so that they are resistant to hacking.

Calculation of Net Asset Value

The NAV of the Trust will be equal to the median price of the bitcoin used in the calculation of the Index less the Trust's liabilities, including the cost of carbon measured in the Index, divided by the total number of outstanding Shares. The accumulation of the daily carbon offset costs calculated in the Index act as an expense to the Trust. The payment for the retirement of carbon offsets will occur once per quarter of the calendar year. The number of MCO2 tokens retired will equal the aggregated sum of offsets implied by the daily carbon footprint for each bitcoin during the quarter. The NAV will accrue the estimated carbon cost daily.

The Trust will not hold carbon offsets as assets; they are functionally equivalent to an expense of the Trust and will be retired by the Trust instantaneously upon payment. Furthermore, the creation of the Index and tokenization of the carbon offsets will provide additional transparency to investors with respect to the NAV of the Trust vis-à-vis the estimated carbon footprint of the bitcoin retired by the Trust, and will thus give investors an opportunity to independently monitor the Trust's efforts to offset the carbon emissions associated with its bitcoin holdings.

The Administrator will calculate the NAV of the Trust once each Exchange trading day. The NAV for a normal trading day will be released after 4:00

p.m. Eastern Time (''E.T.''). Trading during the core trading session on the Exchange typically closes at 4:00 p.m. E.T. However, NAVs are not officially struck until later in the day (often by 5:30 p.m. E.T. and almost always by 8:00 p.m. E.T.). The pause between 4:00 p.m. E.T. and 5:30 p.m. E.T. (or later) provides an opportunity to algorithmically detect, flag, investigate, and correct unusual pricing should it occur.

Intraday Indicative Value

In order to provide updated information relating to the Trust for use by Shareholders and market professionals, the Trust's website, as well as one or more major market data vendors, will disseminate an updated intraday indicative value (''IIV'') per Share updated every 15 seconds through the facilities of CTA/CQ High Speed Lines during the Exchange's Core Trading Session.[13] The IIV will be calculated by using the prior day's closing NAV per Share of the Trust as a base and updating that value throughout the trading day to reflect changes in the most recently reported price level of the Index as reported by Bloomberg, L.P. or another reporting service.

The IIV disseminated during the NYSE Arca Core Trading Session should not be viewed as an actual real-time update of the NAV, which will be calculated only once at the end of each trading day. The IIV will be widely disseminated on a per Share basis every 15 seconds during the NYSE Arca Core Trading Session by one or more major market data vendors. In addition, the IIV will be available through on-line information services.

Creation and Redemption of Shares

According to the Registration Statement, the Trust will issue Shares on an ongoing basis, but only in one or more Baskets. A Basket equals a block of 50,000 Shares. The Trust intends to redeem Shares in Baskets on an ongoing basis from Authorized Participants, according to the procedures described herein.

The creation and redemption of a Basket requires the delivery to the Trust, or the distribution by the Trust, of the number of whole and fractional bitcoins represented by each Basket being created or redeemed, the number of which is determined by dividing the number of bitcoins owned by the Trust at 4:00 p.m. E.T. on the trade date of a creation or redemption order, as adjusted for the number of whole and fractional bitcoins constituting accrued but unpaid fees and expenses of the Trust, by the number of Shares outstanding at such time (the quotient so obtained calculated to one one-hundred-millionth of one bitcoin), and multiplying such quotient by 50,000 (the ''Basket Bitcoin Amount''). The Basket Bitcoin Amount multiplied by the number of Baskets being created or redeemed is the ''Total Basket Bitcoin Amount.''

The MCO2 tokenized carbon offset is not a part of the Basket as it is not an asset to the Trust, nor does the Trust's payment for the retirement of such MCO2 tokens impact the process by which the Trust creates or redeems Baskets. The Trust will pay for the retirement of such carbon offsets at a quarterly frequency, thereby permanently offsetting carbon emissions.

According to the Registration Statement, Authorized Participants are the only persons that may place orders to create and redeem Creation Baskets. Authorized Participants must (1) be a registered broker-dealer, (2) enter into a Participant Agreement with the Sponsor, the Administrator, the Marketing Agent and the Liquidity Providers,[14] and (3) in the case of the creation or redemption of Baskets that do not use the Conversion Procedures,[15] own a bitcoin wallet address that is recognized by the Custodian as belonging to the Authorized Participant.

Creation Procedures

According to the Registration Statement, on any business day, an Authorized Participant may order one or more Creation Baskets from the Trust by placing a creation order with the Administrator. For purposes of processing both purchase and redemption orders, a ''business day'' means any day other than a day when the Exchange or the New York Stock Exchange is closed for regular trading.

As noted above, creation orders will be placed ''in-kind.'' Creation orders must be placed no later than 3:59:59 p.m. E.T. on each business day. Authorized Participants may only create Baskets and cannot create any Shares in an amount less than a Basket.

The Basket Bitcoin Amount required for a Creation Basket will be determined by dividing the number of bitcoins owned by the Trust at 4:00 p.m. E.T. on the trade date of a creation or redemption order, as adjusted for the number of whole and fractional bitcoins constituting accrued but unpaid fees and expenses of the Trust, by the number of Shares outstanding at such time (the quotient so obtained calculated to one one-hundred-millionth of one bitcoin), and multiplying such quotient by 50,000. All questions as to the composition of a Basket Bitcoin Amount will be conclusively determined by the Sponsor and will be final and binding on all persons interested in the Trust.

Redemption Procedures

According to the Registration Statement, the procedures by which an Authorized Participant can redeem one or more Creation Baskets mirror the procedures for the creation of Creation Baskets. On any business day, an Authorized Participant may place a redemption order specifying the number of Redemption Baskets to be redeemed. As noted above, redemption orders must be placed ''in-kind.'' Redemption orders must be placed no later than 3:59:59 p.m. E.T. on each Business Day. The Authorized Participants may only redeem Baskets and cannot redeem any Shares in an amount less than a Basket.

Bitcoin and Investor Protection

In prior orders relating to the listing of products on U.S. exchanges, the Commission Staff expressed its concern that the global market for bitcoin may be subject to potential manipulation.[16] In

[13] Several major market data vendors display and/or make widely available IIVs taken from the Consolidated Tape Association (''CTA'') or other data feeds. In addition, the IIV will be available through on-line information services such as Bloomberg and Reuters.

[14] Although the Trust will create Baskets only upon the receipt of bitcoins, and will redeem Baskets only by distributing bitcoins, an Authorized Participant may deposit cash with the Administrator, which will facilitate the purchase or sale of bitcoins through a Liquidity Provider on behalf of an Authorized Participant (the ''Conversion Procedures''). Liquidity Providers must (1) enter into a Participant Agreement with the Sponsor, the Administrator, the Marketing Agent and each Authorized Participant and (2) own a Liquidity Provider Account.

[15] The Conversion Procedures will be facilitated by a single Liquidity Provider. On an order-by-order basis, the Sponsor will select the Liquidity Provider that it believes will provide the best execution of the Conversion Procedures, and will base its decision on factors such as the Liquidity Provider's creditworthiness, financial stability, the timing and speed of execution, liquidity and the likelihood of, and capabilities in, execution, clearance and settlement. In the event that an order cannot be filled in its entirety by a single Liquidity Provider, additional Liquidity Provider(s) will be selected by the Sponsor to fill the remaining amount based on the criteria above.

[16] *See* Order Setting Aside Action by Delegated Authority and Disapproving a Proposed Rule Change, as Modified by Amendments No. 1 and 2, To List and Trade Shares of the Winklevoss Bitcoin Trust, Securities Exchange Act Release No. 83723 (July 26, 2018), 83 FR 37579 (Aug. 1, 2018) (SR–BatsBZX–2016–30) (the ''Winklevoss Order''); the Bitwise Order; Order the Wilshire Phoenix Order; Order Disapproving a Proposed Rule Change to List and Trade the Shares of the ProShares Bitcoin ETF

Continued

order for any proposed rule change from an exchange to be approved, the Commission must determine that, among other things, the proposal is consistent with the requirements of Section 6(b)(5) of the Act.[17] In these disapproval orders, the Commission outlined that a proposal relating to a Bitcoin-based ETP could satisfy its concerns regarding potential for fraud and manipulation by demonstrating that (1) the underlying commodity market is inherently resistant to fraud and manipulation; (2) there are other means to prevent fraudulent and manipulative acts and practices that are sufficient; or (3) the listing exchange has entered into a surveillance sharing agreement with a regulated market of significant size relating to the underlying or reference assets.

According to the Sponsor,[18] bitcoin is dominant, accounting for more than 49% of the total market capitalization of cryptoassets.[19] As of June 2021, the market cap for Bitcoin is over $600 billion.[20] Bitcoin also has the longest history of any cryptoasset. Alongside the growth in users, active wallets and market capitalization, institutional ratings of various tokens have increased substantially. Ratings are based on factors such as core team, project, and ecosystem metrics. Bitcoin ranks as one of the most widely used, if not the most widely used, cryptoassets in the global token market. Within the Bitcoin network, there are more than 38 million unique bitcoin wallet addresses holding a positive balance, which shows a steady increase in the number of bitcoin owners and depth of ownership over the last four years. Holding periods for bitcoin are also relatively long, as 58% of owners maintain ownership for longer than a one-year period, and 70% of all holders are in profitable positions.[21]

The marketplace is maturing with increased institutional participation.[22] Twenty-eight public companies hold bitcoin, accounting for less than 1% of the total supply. More traditional financial market participants appear to be embracing cryptoassets: Large insurance companies,[23] asset managers,[24] university endowments,[25] pension funds,[26] and even historically bitcoin skeptical fund managers [27] are allocating to bitcoin. Established companies like Tesla, Inc.,[28] MicroStrategy Incorporated,[29] and Square, Inc.,[30] among others, have recently announced substantial investments in bitcoin in amounts as large as $1.5 billion (Tesla) and $425 million (MicroStrategy). MassMutual Insurance Company, one of the nation's oldest private companies and a historically conservative investor, has purchased over $100 million in bitcoin.

The rise in the digital economy has led to an increase in activity within the regulated banking system, reflecting increased institutional demand. Silvergate Bank, a commercial bank service provider in California, reported fee income from digital currency customers of $7.1 million in the first quarter of 2021, up from $1.7 million a year earlier. These are substantial developments since the Commission last reviewed a bitcoin ETF proposal. Additionally, licensed and regulated service providers have emerged to provide fund custodial services for digital assets, among other services. For example, in December 2020, the Commission adopted a conditional no-action position permitting certain special purpose broker-dealers to custody digital asset securities under Rule 15c3–3 under the Exchange Act; in September 2020, the Staff of the Commission released a no-action letter permitting certain broker-dealers to operate a non-custodial Alternative Trading System (''ATS'') for digital asset securities, subject to specified conditions.

Further, the U.S. Department of the Treasury's (the ''Treasury'') Financial Crimes Enforcement Network (''FinCEN''), which in 2013 and 2019 released guidance regarding the applicability of the Bank Secrecy Act (''BSA'') and its implementing regulations to exchangers and administrators of convertible virtual currency,[31] has recently proposed two separate rulemaking initiatives aimed at enhancing transparency, which would require certain financial institutions to collect, retain, share and report to FinCEN information related to certain transactions involving convertible virtual currency or certain digital assets,

including identification information of persons engaged in such transactions.[32] Although FinCEN has not finalized these proposed rules, they signal an intention by FinCEN to close any regulatory gaps and require certain cryptoasset transactions to be subject to anti-money laundering compliance measures. Further to this point, in March 2021 the Financial Action Task Force (''FATF'') issued updated draft guidance that, when issued in final form, would significantly broaden the reach of certain anti-money laundering, including know-your-customer, compliance requirements applicable to transactions in virtual assets or involving virtual asset service providers.[33] Although FinCEN has not finalized its proposed rules yet, and the FATF guidance does not have the force of law, these actions signal a concerted effort among regulatory bodies to introduce requirements that would reduce anonymity of cryptoasset transactions and implement stronger anti-money laundering compliance measures among industry participants. In addition, the Treasury's Office of Foreign Assets Control (''OFAC'') has brought enforcement actions over apparent violations of the sanctions laws in connection with the provision of wallet management services for digital assets.[34] The proposed anti-money laundering rules are intended to reduce anonymity and promote transparency within the cryptoasset markets generally and of cryptoasset exchanges specifically, including the exchanges that compose the bitcoin component of the Index (as described below). These regulatory and enforcement actions acknowledge the increasing use of bitcoin and other cryptoassets within the broader global financial sector generally, and represent ongoing efforts to regularize the use of such cryptoassets within existing regulatory frameworks.

Technological advancements on the bitcoin protocol are also progressing and will broaden institutional adoption of the bitcoin protocol as a technology. The last major upgrade to the protocol occurred in 2017, when the technical feature known as ''segregated witness'' (''Segregated Witness'') was added. The Segregated Witness advancement allowed for the rise in block space and enabled the Lightning Network, a fast and inexpensive payment system that operates on the bitcoin protocol, to be safely employed. The Lightning network's capacity has risen from less than $200 thousand to more than $50 million since then.

Taproot is a technological innovation that will be implemented in November 2021. This innovation will allow for single-signature and multi-signature scripts and other complex transactions to become identical-looking commitments on the Bitcoin Blockchain. The Taproot innovation will accommodate complex transactions through smart contracts, which will have broader financial adoption. Institutional holdings of bitcoin reflect collateral that can benefit from these technological advancements.

There have also been advancements in regulatory frameworks, both on a global and national scale, on cryptoasset exposures since the Commission's last review. The Bank of International Settlements, the global bank for central banks who supports monetary and financial stability, provided consultation on prudential treatment of cryptoassets. The philosophy behind the guidance was ''same risk, same activity, same treatment,'' reinforcing the concept of ''technological neutrality.'' The design of the prudential treatment of cryptoassets is conservative, with a 1250% risk weight applied to the maximum of long and short exposures.[35]

Furthermore, within the United States, the Commodity Futures Trading Commission (''CFTC'') has exercised its regulatory jurisdiction in bringing a number of enforcement actions related to bitcoin and against trading platforms that offer cryptoasset trading,[36] including, in certain cases, against defendants for direct trading of cryptoassets.[37]

In *Gelfman,* the CFTC filed for injunctive relief against Gelfman Blueprint Inc., and its CEO, Nicholas Gelfman, concerning an alleged Ponzi scheme, asserting jurisdiction on the basis of Mr. Gelfman engaging in some Bitcoin trading and thereby engaging in manipulative trading in commodities. Similarly, in *CabbageTech,* CabbageTech, Corp. was found guilty of fraudulent behavior in another case brought by the CFTC for ''a deceptive and fraudulent virtual currency scheme.'' The CFTC has historically asserted jurisdiction over spot market commodities trading, where manipulative trading in the spot market can affect its derivatives market. The *Gelfman* case is unique in that the CFTC asserted jurisdiction over the spot market when there was little to no derivatives trading in the United States. Similarly, the *CabbageTech* case did not indicate that there was any derivatives trading conducted, yet the court rejected the defendant's claim that the CFTC had no jurisdiction in the matter. Courts have taken an expansive interpretation of the CFTC's jurisdiction over trading in particular virtual currency products on the basis that futures trading in such products as a class already occurs.[38] The CFTC's enforcement division has remained consistently active in the virtual currency space. On October 1, 2020, the CFTC filed a civil enforcement action against the owner/operators of the BitMEX trading platform, which was one of the largest bitcoin derivative exchanges.[39] On March 19, 2021, the CFTC ordered digital asset exchange

operator CoinBase Inc., to pay $6.5 million in monetary penalties and desist from further violations of Commodity Exchange Act and CFTC rules in connection with alleged reckless delivery of false, misleading, or inaccurate reports concerning transactions in digital assets, including bitcoin, on the Global Digital Asset Exchange (GDAX) electronic trading platform, as well as allegations of manipulative market activities by CoinBase Inc. employees.[40]

The U.S. Office of the Comptroller of the Currency (''OCC'') has also made clear that federally-chartered banks are able to provide custody services for cryptoassets and other digital assets.[41] In addition, the Board of Governors of the Federal Reserve System proposed guidelines to evaluate the requests for account services at Federal Reserve Banks in light of recent changes to the financial payments landscape.[42] The guidelines are in response to the rapidly-evolving technological progress and new financial services observed through cryptoassets, of which bitcoin is the dominant asset. The proposal is aimed at financial stability, protecting consumers, and promoting innovation in the payments system.

The Sponsor notes below the advancement of the application of the Index (as described below) over that same period of time, including how the Index articulates the potential remedy that it can be to sufficiently mitigate the pricing issues and various risks surrounding market manipulation.

Bitcoin and Market Integrity

The bitcoin market has evolved significantly as adoption pressure has broadened from both retail and institutional clients from a global perspective. There has been concern over whether cryptoasset exchanges have mechanisms in place to report and remediate price and ensure market integrity. As the industry has grown substantially and the number of marketplaces expands, it follows that the quality of these marketplaces will vary. This notion is amplified for exchanges that are unregulated or decentralized. Therefore, the Sponsor believes that there must be sufficiency of data inputs for the calculation of the spot price of bitcoin. In turn the data must be provided under licensing arrangements with each exchange, which in turn impose strict entry criteria. As described below, the design of the methodology and framework of the Index are sufficiently resistant to market manipulation while providing oversight managed by an independent committee.

Index Price Manipulation

According to the Sponsor, the use of the Index eliminates those bitcoin spot markets with indicia of suspicious, fake, or non-economic volume from the NAV calculation methodology pursuant to which the Trust prices its Shares. In addition, the use of multiple eligible bitcoin spot markets is designed to mitigate the potential for idiosyncratic market risk, as the failure of any individual bitcoin spot market should not materially impact pricing for the Trust.

The use of 20 rolling three-minute increments means a malicious actor would need to sustain efforts to manipulate the market over an extended period of time, or would need to replicate efforts multiple times, potentially triggering review from the spot market or regulators, or both. The use of a ''median'' price limits the ability of outlier prices, which may have been caused by attempts to manipulate the price on a particular market, to impact the NAV, as it systematically excludes those outlier prices from the NAV calculation. Any attempt to manipulate the NAV would require a substantial amount of capital distributed across a majority of the eligible spot markets, and potentially coordinated activity across those markets, making it more difficult to conduct, profit from, or avoid the detection of market manipulation.

The Sponsor further believes that because the Trust will, in all ordinary circumstances, not purchase or sell bitcoin, but instead process all creations and redemptions in-kind in transactions with Authorized Participants, the Trust is uniquely protected against potential attempts by bad actors to manipulate the price of bitcoin on spot markets contributing to the Index and thereby the Trust's NAV calculation.[43] This is true even with respect to transactions with Authorized Participants who rely on the cash exchange process, as regardless of whether an Authorized Participant chooses to rely on such process in connection with a given creation or redemption order, the Trust will create (or redeem, as appropriate) Baskets only upon the receipt (or distribution, as appropriate) of bitcoin, and will not create or redeem any Baskets based on the receipt or distribution of cash alone. Even if a bad actor were able to temporarily manipulate the price of bitcoin on a spot market or manipulate enough of the volume of the markets to overwhelm the protections designed into the Index and thereby the NAV, the fact that the Trust will create or redeem Baskets only upon receipt or distribution of bitcoin (in all circumstances barring a forced redemption) means that the amount of bitcoin per Share held by the Trust would not be impacted. Therefore, long-term Shareholders of the Trust would be protected in a way that shareholders of trusts processing creations or redemptions directly in cash would not be protected. In other words, because the Trust will generally not accept cash in order to create new Shares or, barring a forced redemption of the Trust or under other extraordinary circumstances, be forced to sell bitcoin to pay cash for redeemed Shares, the ratio of bitcoin per Share that Authorized Participants will tender (for creations) or receive (for distributions) will not change as a result of any changes in the price per Share, even if the Authorized Participant relies on the cash exchange process to facilitate such creation or redemption.

The Trust's NAV incorporates unpaid expenses, including costs of carbon offsets through the MCO2 token. If MCO2 tokens are unavailable for any reason, the carbon credit prices will be benchmarked to the average wholesale price as defined by IHS Markit survey for voluntary carbon credit wholesale prices, OPIS, plus the cost of tokenizing the credits. In addition, the Trust's performance will necessarily fall below that of similar bitcoin-focused investment vehicles due to the expenses associated with retiring MCO2 tokens as required to track the Index. Given the Trust's focus on carbon neutrality, its performance from a purely financial perspective will necessarily fall below other similar investment structures that do not seek to achieve a carbon neutral result from their portfolio investments. However, as discussed above, the Sponsor believes that the Trust's use of in-kind creations and distributions will tend to insulate Shareholders from any impact that these carbon neutrality-related expenses may have on the price of Shares by ensuring that Shareholders will pay (for creations) and receive (for

[40] *See* CFTC Release No. 8369–21 (March 19, 2021), available at: *https://www.cftc.gov/PressRoom/PressReleases/8369-21.*

[42] *See* Federal Reserve Docket No. OP–1747 (May 5, 2021), available at *https://www.federalreserve.gov/newsevents/pressreleases/files/bcreg20210505a1.pdf.*

[43] Except to pay certain expenses or in the case of a forced redemption or other ordinary circumstances, the Trust will not purchase or sell bitcoin directly.

redemptions) the same number of bitcoin regardless of Share price.

Availability of Information

Quotation and last-sale information regarding the Shares will be disseminated through the facilities of the CTA. The IIV will be available through on-line information services.

Information about the Shares will be posted to the Trust's website *https://www.oneriveram.com/digital-strategies.* Information will include: (i) The NAV and NAV per Share for each Exchange trading day, posted at end of day; (ii) the daily holdings of the Trust, before 9:30 a.m. E.T. on each Exchange trading day; (iii) the Trust's effective prospectus, in a form available for download; and (v) the Shares' ticker and CUSIP information; and additional quantitative information updated on a daily basis for the Trust. The Trust's website will include: (i) The prior business day's trading volume, the prior business day's reported NAV and closing price, and a calculation of the premium and discount of the closing price or mid-point of the bid/ask spread at the time of NAV calculation (''Bid/Ask Price'') against the NAV and (ii) data in chart format displaying the frequency distribution of discounts and premiums of the daily closing price or Bid/Ask Price against the NAV, within appropriate ranges, for at least each of the four previous calendar quarters.

The Index value is available on Calculation Agent's website and from major market data vendors. Quotation and last sale information for bitcoin will be widely disseminated through a variety of major market data vendors, including Bloomberg and Reuters. In addition, the complete real-time price (and volume) data for bitcoin is available by subscription from Reuters and Bloomberg. The spot price of bitcoin also is available on a 24-hour basis from major market data vendors, including Bloomberg and Reuters. Information relating to trading, including price and volume information, in bitcoin will be available from major market data vendors and from the exchanges on which bitcoin are traded. The normal trading hours for bitcoin exchanges are 24-hours per day, 365-days per year.

The Sponsor will publish the NAV per Share on the Trust's website as soon as practicable after its determination. The Trust will provide website disclosure of its NAV daily. The website disclosure of the Trust's NAV will occur at the same time as the disclosure by the Sponsor of the NAV to Authorized Participants so that all market participants are provided such information at the same time. Therefore, the same information will be provided on the public website as well as in electronic files provided to Authorized Participants. Accordingly, each investor will have access to the current NAV of the Trust through the Trust's website, as well as from one or more major market data vendors.

Trading

The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of equity securities. Shares will trade on the NYSE Arca Marketplace from 4:00 to 8:00 p.m. E.T. in accordance with NYSE Arca Rule 7.34–E (Early, Core, and Late Trading Sessions). The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions. As provided in NYSE Arca Rule 7.6–E, the minimum price variation (''MPV'') for quoting and entry of orders in equity securities traded on the NYSE Arca Marketplace is $0.01, with the exception of securities that are priced less than $1.00, for which the MPV for order entry is $0.0001.

The Shares will conform to the initial and continued listing criteria under NYSE Arca Rule 8.201–E. Trading of the Shares will be subject to NYSE Arca Rule 8.201–E(g), which sets forth certain restrictions on Equity Trading Permit (''ETP'') holders (''ETP Holders'') acting as registered market makers in Commodity-Based Trust Shares to facilitate surveillance. The Exchange represents that, for initial and continued listing, the Trust will be in compliance with Rule 10A–3 [44] under the Act, as provided by NYSE Arca Rule 5.3–E. A minimum of 100,000 Shares of the Trust will be outstanding at the commencement of trading on the Exchange.

Trading Halts

With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares of the Trust.[45] Trading in Shares of the Trust will be halted if the circuit breaker parameters in NYSE Arca Rule 7.12–E have been reached. Trading also may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable.

The Exchange may halt trading during the day in which an interruption to the dissemination of the IIV occurs.[46] If the interruption to the dissemination of the IIV persists past the trading day in which it occurred, the Exchange will halt trading no later than the beginning of the trading day following the interruption. In addition, if the Exchange becomes aware that the NAV with respect to the Shares is not disseminated to all market participants at the same time, it will halt trading in the Shares until such time as the NAV is available to all market participants. The Exchange may also halt trading if the value of the Index is no longer calculated or available on at least a 15-second delayed basis from a source unaffiliated with the Sponsor, Trust, Custodian or the Exchange.

Surveillance

The Exchange represents that trading in the Shares of the Trust will be subject to the existing trading surveillances administered by the Exchange, as well as cross-market surveillances administered by FINRA on behalf of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws.[47] The Exchange represents that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and federal securities laws applicable to trading on the Exchange.

The surveillances referred to above generally focus on detecting securities trading outside their normal patterns, which could be indicative of manipulative or other violative activity. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations.

The Exchange or FINRA, on behalf of the Exchange, or both, will communicate as needed regarding trading in the Shares with other markets and other entities that are members of the Intermarket Surveillance Group (''ISG''), and the Exchange or FINRA, on behalf of the Exchange, or both, may obtain trading information regarding trading in the Shares from such markets and other entities. In addition, the Exchange may obtain information regarding trading in the Shares from

[44] 17 CFR 240.10A–3.

[45] *See* NYSE Arca Rule 7.12–E.

[46] A limit up/limit down condition in the futures market would not be considered an interruption requiring the Trust to be halted.

[47] FINRA conducts cross-market surveillances on behalf of the Exchange pursuant to a regulatory services agreement. The Exchange is responsible for FINRA's performance under this regulatory services agreement.

markets and other entities that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement (''CSSA'').[48] The Exchange is also able to obtain information regarding trading in the Shares in connection with such ETP Holders' proprietary or customer trades which they effect through ETP Holders on any relevant market.

In addition, the Exchange also has a general policy prohibiting the improper distribution of material, non-public information by its employees.

All statements and representations made in this filing regarding (1) the description of the portfolios of the Trust, (2) limitations on portfolio holdings or reference assets, or (3) the applicability of Exchange listing rules specified in this rule filing shall constitute continued listing requirements for listing the Shares on the Exchange.

The Sponsor has represented to the Exchange that it will advise the Exchange of any failure by the Trust to comply with the continued listing requirements, and, pursuant to its obligations under Section 19(g)(1) of the Act, the Exchange will monitor for compliance with the continued listing requirements. If the Trust is not in compliance with the applicable listing requirements, the Exchange will commence delisting procedures under NYSE Arca Rule 5.5–E(m).

2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under Section 6(b)(5)[49] that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares will be listed and traded on the Exchange pursuant to the initial and continued listing criteria in NYSE Arca Rule 8.201–E. The Exchange has in place surveillance procedures that are adequate to properly monitor trading in the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws. The Exchange or FINRA, on behalf of the Exchange, or both, will communicate as needed regarding trading in the Shares with other markets that are members of the ISG, and the Exchange or FINRA, on behalf of the Exchange, or both, may obtain trading information regarding trading in the Shares from such markets. In addition, the Exchange may obtain information regarding trading in the Shares from markets that are members of ISG or with which the Exchange has in place a CSSA. Also, pursuant to NYSE Arca Rule 8.201–E(g), the Exchange is able to obtain information regarding trading in the Shares and the underlying bitcoin or any bitcoin derivative through ETP Holders acting as registered market makers, in connection with such ETP Holders' proprietary or customer trades through ETP Holders which they effect on any relevant market.

The proposed rule change is designed to prevent fraudulent and manipulative acts and practices. The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of the Shares on the Exchange during all trading sessions and to deter and detect violations of Exchange rules and the applicable federal securities laws, and the Exchange may obtain information regarding trading in the Shares via the ISG, from other exchanges who are members or affiliates of the ISG, or with which the Exchange has entered into a comprehensive surveillance sharing agreement. Beyond the use of such surveillance agreements, the Exchange believes the significant liquidity in the spot market and resultant minimal impact of market orders on the overall price of bitcoin, in conjunction with the Trust's offering only in-kind creation and redemption of Shares with respect to Authorized Participants, further mitigates the risk associated with potential manipulation and financially disincentivizes manipulation of the Index.

To protect investors and the public interest, there is a considerable amount of bitcoin price and market information available on public websites and through professional and subscription services. Investors may obtain, on a 24-hour basis, bitcoin pricing information based on the spot price for bitcoin from various financial information service providers. The closing price and settlement prices of bitcoin are readily available from exchanges and other publicly available websites. In addition, such prices are published in public sources, or on-line information services such as Bloomberg and the Wall Street Journal. In addition to the price transparency of the Index and of bitcoin itself, the Trust will provide website disclosure of its bitcoin holdings daily, as well as additional information about the Trust. Quotation and last-sale information regarding the Shares will be disseminated through the facilities of the CTA. The IIV will be widely disseminated on a per Share basis every 15 seconds during the NYSE Arca Core Trading Session (normally 9:30 a.m. E.T. to 4:00 p.m. E.T.) by one or more major market data vendors. In addition, the IIV will be available through on-line information services. The Exchange represents that the Exchange may halt trading during the day in which an interruption to the dissemination of the IIV or the Index value occurs. If the interruption to the dissemination of the IIV or the Index value persists past the trading day in which it occurred, the Exchange will halt trading no later than the beginning of the trading day following the interruption. In addition, if the Exchange becomes aware that the NAV with respect to the Shares is not disseminated to all market participants at the same time, it will halt trading in the Shares until such time as the NAV is available to all market participants.

The proposed rule change is also designed to promote just and equitable principles of trade and to protect investors and the public interest in that there is a considerable amount of bitcoin price and market information available on public websites and through professional and subscription services. Investors may obtain, on a 24-hour basis, bitcoin pricing information based on the spot price for bitcoin from various financial information service providers.

The Trust's website will also include a form of the prospectus for the Trust that may be downloaded. The website will include the Shares' ticker and CUSIP information, along with additional quantitative information updated on a daily basis for the Trust. The Trust's website will include (i) daily trading volume, the prior business day's reported NAV and closing price, and a calculation of the premium and discount of the closing price or mid-point of the Bid/Ask Price against the NAV; and (ii) data in chart format displaying the frequency distribution of discounts and premiums of the daily closing price or Bid/Ask Price against the NAV, within appropriate ranges, for at least each of the four previous calendar quarters. The Trust's website will be publicly available prior to the public offering of Shares and accessible at no charge.

The Index value is available on Calculation Agent's website and from major market data vendors. The spot

[48] For a list of the current members of ISG, *see www.isgportal.org.* The Exchange notes that not all components of the Trust may trade on markets that are members of ISG or with which the Exchange has in place a CSSA.

[49] 15 U.S.C. 78f(b)(5).

price of bitcoin also is available on a 24-hour basis from major market data vendors.

Trading in Shares of the Trust will be halted if the circuit breaker parameters in NYSE Arca Rule 7.12–E have been reached or because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest in that it will facilitate the listing and trading of a new type of exchange-traded product based on the price of bitcoin that will enhance competition among market participants, to the benefit of investors and the marketplace. As noted above, the Exchange has in place surveillance procedures that are adequate to properly monitor trading in the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange notes that the proposed rule change will facilitate the listing and trading of an additional type of exchange-traded product, and the first such product based on Bitcoin, which will enhance competition among market participants, to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

A. By order approve or disapprove the proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2021–67 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2021–67. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2021–67 and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[50]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93182; File No. SR–NYSECHX–2021–13]

Self-Regulatory Organizations; NYSE Chicago, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend NYSE Chicago Rule 7.2

September 30, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 28, 2021, the NYSE Chicago, Inc. (''NYSE Chicago'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Chicago Rule 7.2 (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange. Juneteenth National Independence Day was designated a legal public holiday in June 2021. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below,

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE Chicago Rule 7.2 (Holidays) to make Juneteenth National Independence Day a holiday of the Exchange.

On June 17, 2021, Juneteenth National Independence Day was designated a legal public holiday.[3] Consistent with broad industry sentiment [4] and the approach recommended by the Securities Industry and Financial Markets Association (''SIFMA''),[5] the Exchange proposes to add ''Juneteenth National Independence Day'' to the existing list of holidays in the first paragraph of NYSE Chicago Rule 7.2. As a result, the Exchange will not be open for business on Juneteenth National Independence Day, which falls on June 19 of each year. In accordance with the second paragraph of NYSE Chicago Rule 7.2, when the holiday falls on a Saturday, the Exchange will not be open for business on the preceding Friday, and when it falls on a Sunday, the Exchange will not be open for business on the succeeding Monday.[6]

The first paragraph of the revised rule would read as follows (proposed additions *italicized*):

The Exchange will not be open for business on New Year's Day, Martin Luther King Jr. Day, Washington's Birthday, Good Friday, Memorial Day, *Juneteenth National Independence Day,* Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b) of the Act,[7] in general, and furthers the objectives of Section 6(b)(5) of the Act,[8] in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to, and perfect the mechanisms of, a free and open market and a national market system and, in general, to protect investors and the public interest and because it is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the proposed change would remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, protect investors and the public interest because the proposed amended rule would clearly state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The change would thereby promote clarity and transparency in the Exchange rules by updating the list of holidays of the Exchange.

The proposed change does not raise any new or novel issues.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,[9] the Exchange believes that the proposed rule change will not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed change is not designed to address any competitive issue but rather to amend the Exchange rule regarding holidays.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [10] and Rule 19b–4(f)(6)(iii) thereunder.[11]

A proposed rule change filed under Rule 19b–4(f)(6) [12] normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[13] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay so that the proposal may become operative prior to 30 days after the date of the filing. The Exchange states that waiver of the operative delay would be consistent with the protection of investors and the public interest because the proposed rule change, as described above, would state that the Exchange will not be open for business on Juneteenth National Independence Day, which is a federal holiday, and would address what day would be taken off if June 19 fell on a Saturday or Sunday. The Exchange further states that the proposed change does not raise any new or novel issues. For these reasons, the Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission hereby waives the operative delay and designates the proposed rule change operative upon filing.[14]

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

[13] 17 CFR 240.19b–4(f)(6)(iii).

[14] For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSECHX–2021–13 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSECHX–2021–13. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSECHX–2021–13, and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[15]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93209; File No. SR–PEARL–2021–43]

Self-Regulatory Organizations; MIAX PEARL, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by MIAX PEARL, LLC To Amend Exchange Rule 100, Definitions, Rule 402, Criteria for Underlying Securities, Rule 403, Withdrawal of Approval of Underlying Securities, Rule 404, Series of Option Contracts Open for Trading, Rule 404A, Select Provisions of Options Listing Procedures Plan, Rule 406, Long-Term Option Contracts, Rule 500, Access to and Conduct on the Exchange, Rule 503, Openings on the Exchange, Rule 515, Execution of Orders, and Rule 519, MIAX Pearl Order Monitor (''MOM'')

September 30, 2021.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 24, 2021, MIAX PEARL, LLC (''MIAX Pearl'') or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend Exchange Rules 100, Definitions, 402, Criteria for Underlying Securities, 403, Withdrawal of Approval of Underlying Securities, 404, Series of Option Contracts Open for Trading, 404A, Select Provisions of Options Listing Procedures Plan, 406, Long-Term Option Contracts, 500, Access to and Conduct on the Exchange, 503, Openings on the Exchange, 515, Execution of Orders, and 519, MIAX Pearl Order Monitor (''MOM''), to make minor, non-substantive edits and clarifying changes to the rule text.

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings/*pearl, at MIAX Pearl's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rule 100, Definitions, to make minor non-substantive edits and clarifying changes. First, the Exchange proposes to amend Exchange Rule 100, Definitions, to make a minor, non-substantive clarifying change to the definition for ''PBBO.'' Currently, the definition for ''PBBO'' is as follows: ''The term 'PBBO' means the best bid or offer on the PEARL Exchange.'' Pursuant to Exchange Rule 100, when referring to the Exchange, the term ''MIAX Pearl'' is used. The Exchange proposes to amend the definition for ''PBBO'' in Exchange Rule 100 to insert the word ''MIAX'' in front of the words ''PEARL Exchange'' to align the name of the Exchange with how the term is defined and used throughout the Exchange's rulebook. Further, the Exchange proposes to delete the word ''the'' before the newly inserted word ''MIAX'' and delete the last word, ''Exchange,'' for clarity. With the proposed changes, the definition for ''PBBO'' will be as follows: ''The term 'PBBO' means the best bid or offer on MIAX Pearl.''

Next, the Exchange proposes to delete the period at the end of subparagraph (a)(1) of Exchange Rule 402(a) and add ''; and'' for purposes of clarity in the rule text that both conditions listed in Exchange Rule 402(a)(1)–(2) must be met.

[15] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

Next, the Exchange proposes to amend subparagraph (b) of Exchange Rule 402 to correctly spell the word ''foregoing'' in the last sentence before subparagraph (b)(1). The purpose of this change is for clarity in the rule text.

Next, the Exchange proposes to delete the period at the end of subparagraph (b)(6)(i) of Exchange Rule 402 and add ''; and'' for the sentence to be grammatically correct and for purposes of clarity in the rule text that both conditions listed in Exchange Rule 402(b)(6)(i)–(ii) must be met.

Next, the Exchange proposes to delete the period at the end of subparagraph (c)(2)(i)(A) of Exchange Rule 402 and add ''; and'' for the sentence to be grammatically correct and for purposes of clarity in the rule text.

Next, the Exchange proposes to delete the comma at the end of subparagraph (g)(1) of Exchange Rule 402 and add a semicolon for purposes of clarity in the rule text.

Next, the Exchange proposes to amend subparagraph (i) of Exchange Rule 402 to remove the word ''or'' after proposed renumbered subparagraphs (i)(1), (2) and (3). The Exchange also proposes to amend the hierarchical headings in Exchange Rule 402(i) as follows: Subparagraphs (i)(A)–(E) will be renumbered as (i)(1)–(5); subparagraph (i)(E)(1) will be renumbered as (i)(5)(i); subparagraphs (i)(E)(1)(i)–(iii) will be renumbered as (i)(5)(i)(A)–(C); subparagraph (i)(E)(2) will be renumbered as (i)(5)(ii); subparagraphs (i)(E)(2)(i)–(ii) will be renumbered as (i)(5)(ii)(A)–(B); and subparagraphs (i)(E)(2)(ii)(A)–(D) will be renumbered as (i)(5)(ii)(B)1.–4. The purpose of these proposed changes is to provide consistency and clarity throughout the rule text for the hierarchical subparagraph headings.

Next, the Exchange proposes to delete the semicolon at the end of subparagraph (k)(1)(vi) of Exchange Rule 402 and add a period for the sentence to be grammatically correct and for purposes of clarity in the rule text.

Next, the Exchange proposes to amend subparagraph (g) of Exchange Rule 403 to capitalize the word ''In'' that begins subparagraphs (g)(1) and (g)(2). The Exchange also proposes to amend subparagraph (g) of Exchange Rule 403 to replace certain internal cross reference to other rules in light of the changes described above. In particular, the Exchange proposes to amend the cross references contained in Exchange Rule 403(g)(1)–(2), that are to Exchange Rules 402(i)(E)(1)(i)–(ii), to now be to Exchange Rule 402(i)(5)(i)(A)–(B). These proposed rule changes are for clarity and consistency with the rule text.

Next, the Exchange proposes to amend Exchange Rule 403, Interpretation and Policy .02, to add a colon before an itemized list in the second sentence, which uses semicolons for the sentence to be grammatically correct.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .02(a), to remove the word ''Pilot'' when referring to the Short Term Option Series Program. The purpose of this proposed change is to provide consistency and clarity throughout the rule text as the Short Term Options Series Program is not a pilot program.[3]

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .02(c), to add the word ''thirty'' before the number in parentheses in the first sentence for purposes of consistency and clarity in the rule text.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .02(f), to add the number ''(21)'' after the word ''twenty-one'' for purposes of consistency and clarity in the rule text.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .10, to update the name of one of the Exchange-Traded Funds (''ETF'') from ''PowerShares Trust (''QQQ'')'' to its updated name ''Invesco QQQ Trust (''QQQ'').'' [4] According to the most recent Prospectus for the QQQ ETF, the ETF Sponsor changed that ETF's name. Accordingly, the Exchange proposes to update the name of the QQQ ETF for consistency with the QQQ ETF's Prospectus.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .11, to add the number ''(21)'' after the word ''twenty-one'' for purposes of consistency and clarity in the rule text.

Next, the Exchange proposes to amend subparagraph (b) of Exchange Rule 404A to add quotation marks around the phrase ''Exchange Traded Fund Shares'' for the sentence to be grammatically correct.

Next, the Exchange proposes to amend subparagraph (a) of Exchange Rule 406, Long-Term Option Contracts, to add the number ''(10)'' after the word ''ten'' for purposes of consistency and clarity in the rule text.

Next, the Exchange proposes to amend subparagraphs (b)(i)–(iv) of Exchange Rule 500, Access to and Conduct on the Exchange, to: (1) Replace periods with semicolons; and (2) add the word ''and'' to subparagraph (b)(iv) in the list for the sentence to be grammatically correct. The Exchange proposes to replace the periods in (i)–(iv) for the sentence to be grammatically correct and for purposes of clarity in the rule text.

Next, the Exchange proposes to amend subparagraph (b)(1)(ii)(A) to Exchange Rule 503, Openings on the Exchange, to remove the word ''or'' for purposes of clarity and consistency in the rule text.

Next, the Exchange proposes to amend Exchange Rule 515, Execution of Orders, to make minor, non-substantive edits and clarifying changes to the rule text in order to provide consistency and clarity within the rule text. Exchange Rule 515(g)(3)(iv) currently contains several references to the term ''Post-Only.'' However, there are two instances in subparagraph (g)(3)(iv) of Exchange Rule 515 where the term ''Post-Only'' is missing the hyphen connecting the two words. The Exchange now proposes to amend paragraph (g)(3)(iv) to amend all references to ''Post-Only'' to add the hyphen where it is missing. The purpose of these changes is to provide consistency and clarity throughout the rule text.

Next, the Exchange proposes to amend Exchange Rule 519, MIAX Pearl Order Monitor (''MOM''), to make minor, non-substantive edits and clarifying changes to the rule text. The Exchange proposes to amend the example in Exchange Rule 519(a)(3) to move the word ''not'' in clause ''(B)'' of that example. With the proposed change, clause ''(B)'' will state as follows: ''(B) if the NBO is $0.10 an incoming limit order to buy options for $0.15 will not be rejected; whereas if the NBO is $0.10 an incoming limit order to buy options for $0.35 will be rejected as the limit price of the order is $0.25 greater than the NBO.'' Similarly, the Exchange proposes to amend the example in Exchange Rule 519(a)(4) to delete the extra word ''be'' in the last part of clause ''(B'') of that example. With the proposed change, clause ''(B)'' will state as follows: ''(B) if the NBB is $0.30 an incoming limit order to sell options for $0.15 will be rejected; whereas if the NBB is $0.30 an incoming limit order to sell options for $0.20 will not be rejected as the limit price of the order is not less than 50% of the NBB price.'' The purpose of these changes is to provide clarity in the rule text.

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with Section 6(b) of the Act [5] in general, and furthers the objectives of Section 6(b)(5) of the Act [6] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes the proposed changes promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed rule changes will provide greater clarity to Members [7] and the public regarding the Exchange's Rules. It is in the public interest for rules to be accurate and concise so as to eliminate the potential for confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes the proposed changes will not impose any burden on intra-market competition as there is no functional change to the Exchange's System and because the rules of the Exchange apply to all MIAX Pearl participants equally. The proposed rule change will have no impact on competition as it is not designed to address any competitive issue but rather is designed to remedy minor non-substantive issues and provide added clarity to the rule text of Exchange Rules 100, 402, 403, 404, 404A, 406, 500, 503, 515, and 519. In addition, the Exchange does not believe the proposal will impose any burden on inter-market competition as the proposal does not address any competitive issues and is intended to protect investors by providing further transparency regarding the Exchange's functionality.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) [8] of the Act and Rule 19b–4(f)(6) thereunder.[9] Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act and subparagraph (f)(6) of Rule 19b–4 thereunder.[10]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–PEARL–2021–43 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–PEARL–2021–43. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–PEARL–2021–43, and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93210; File No. SR–MIAX–2021–40]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by Miami International Securities Exchange, LLC To Amend Exchange Rule 402, Criteria for Underlying Securities, Rule 403, Withdrawal of Approval of Underlying Securities, Rule 404, Series of Option Contracts Open for Trading, Rule 404A, Select Provisions of Options Listing Procedures Plan, Rule 503, Openings on the Exchange, Rule 515A, MIAX Price Improvement Mechanism (''PRIME'') and PRIME Solicitation Mechanism, and Rule 518, Complex Orders

September 30, 2021.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 24, 2021, Miami International Securities Exchange, LLC (''MIAX'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to make a number of minor, non-substantive edits to Exchange Rules 402, Criteria for Underlying Securities, 403, Withdrawal of Approval of Underlying Securities, 404, Series of Option Contracts Open for Trading, 404A, Select Provisions of Options Listing Procedures Plan, 503, Openings on the Exchange, 515A, MIAX Price Improvement Mechanism (''PRIME'') and PRIME Solicitation Mechanism, and 518, Complex Orders.

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings/,* at MIAX's principal office, and at the Commission's Public Reference Room.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Exchange Rules 402, 403, 404, 404A, 503, 515A, and 518 to make minor non-substantive edits and clarifying changes to provide consistency and clarity within the rule text.

First, the Exchange proposes to delete the period at the end of subparagraph (a)(1) of Exchange Rule 402 and add ''; and'' for purposes of clarity in the rule text that both conditions listed in Exchange Rule 402(a)(1)–(2) must be met.

Next, the Exchange proposes to amend subparagraph (b) of Exchange Rule 402 to correctly spell the word ''foregoing'' in the last sentence.

Next, the Exchange proposes to delete the period at the end of subparagraph (b)(6)(i) of Exchange Rule 402 and add ''; and'' for the sentence to be grammatically correct and for purposes of clarity in the rule text that both conditions listed in Exchange Rule 402(b)(6)(i)–(ii) must be met.

Next, the Exchange proposes to delete the period at the end of subparagraph (c)(2)(i)(A) of Exchange Rule 402 and add ''; and'' for the sentence to be grammatically correct and for purposes of clarity in the rule text.

Next, the Exchange proposes to delete the comma at the end of subparagraph (g)(1) of Exchange Rule 402 and add a semicolon for purposes of clarity in the rule text.

Next, the Exchange proposes to amend subparagraph (i) of Exchange Rule 402 to remove the word ''or'' after subparagraphs (i)(1), (2) and (3). The purpose of these proposed changes is to provide consistency and clarity throughout the rule text.

Next, the Exchange proposes to delete the semicolon at the end of subparagraph (k)(1)(vi) of Exchange Rule 402 and add a period for the sentence to be grammatically correct and for purposes of clarity in the rule text.

Next, the Exchange proposes to amend Exchange Rule 403, Interpretation and Policy .02, to add a colon before the list in the second sentence, which uses semicolons for the sentence to be grammatically correct.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .02(a), to remove the word ''Pilot'' when referring to the Short Term Option Series Program. The purpose of this proposed change is to provide consistency and clarity throughout the rule text as the Short Term Options Series Program is not a pilot program.[3]

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .02(c), to add the word ''thirty'' before the number in parentheses in the first sentence for purposes of consistency and clarity in the rule text.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .02(e), to capitalize the word ''rule'' in the last sentence of this subparagraph for purposes of consistency and clarity in the rule text.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .02(f), to add the number ''(21)'' after the word ''twenty-one'' for purposes of consistency and clarity in the rule text.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretation and Policy .10, to update the name of one of the Exchange-Traded Funds (''ETF'') from ''PowerShares Trust (''QQQ'')'' to its updated name ''Invesco QQQ Trust (''QQQ'').''[4] According to the most recent Prospectus for the QQQ ETF, the ETF Sponsor changed that ETF's name. Accordingly, the Exchange proposes to update the name of the QQQ ETF for consistency with the QQQ ETF's Prospectus.

Next, the Exchange proposes to amend Exchange Rule 404, Interpretations and Policies .11, to add the number ''(21)'' after the word ''twenty-one'' for purposes of consistency and clarity in the rule text.

Next, the Exchange proposes to amend subparagraph (b) of Exchange Rule 404A to add quotation marks around the phrase ''Exchange Traded

[3] *See* Exchange Rule 404, Interpretation and Policy .02.

[4] *See* Invesco QQQ Trust, Series 1 Prospectus, dated January 31, 2021, *https://connect.rightprospectus.com/Invesco/TADF/46090E103/P?site=ETF.*

Fund Shares'' for the sentence to be grammatically correct.

Next, the Exchange proposes to amend subparagraph (d) of Exchange Rule 503 to: (1) Change the word ''an'' to ''a'' immediately preceding the phrase ''class-by- class basis''; (2) remove the space in the middle of the hyphenated word ''class-by- class''; and (3) remove the word ''the'' before the phrase ''. . . Members through a Regulatory Circular.'' These proposed rule changes are to make the sentence grammatically correct and to provide clarity in the rule text.

Next, the Exchange proposes to amend subparagraph (e)(1) of Exchange Rule 503 to make two clarifying changes: (1) Deleting the space between the words ''market'' and ''place'' in the second sentence; and (2) capitalizing the word ''members'' in the third sentence. The purpose of these proposed changes is to provide consistency and clarity throughout the rule text as ''marketplace'' is supposed to be one word and the term ''Members'' [5] is a defined term in the Exchange's rulebook that should be capitalized.

Next, the Exchange proposes to amend subparagraph (f)(2)(vii)(B)5.a. of Exchange Rule 503 to make two clarifying changes. Subparagraph (f)(2)(vii)(B)5.a. currently has two references to Interpretations and Policies of Exchange Rule 503, stated as ''Policy .02'' and ''Policy .03.'' The Exchange now proposes to insert the words ''Interpretation and'' in front of both of those references to Interpretations and Policies in order to provide consistency and clarity throughout the rule text.

Next, the Exchange proposes to amend Exchange Rule 503, Interpretation and Policy .03(f)(1). Currently, Interpretation and Policy .03(f)(1) provides as follows: ''The System will broadcast a system imbalance broadcast message to all subscribers of the Exchange's relevant data feed and begin an SSIP Imbalance Timer, the duration of which shall be determined by the Exchange and announced via Regulatory Circular, however it shall not to exceed ten seconds.'' The Exchange now proposes to delete the word ''to'' at the end of that sentence in order for the sentence be grammatically correct and to provide clarity throughout the rule text.

Next, the Exchange proposes to amend subparagraph (a)(1) of Exchange Rule 515A to provide consistency and clarity to the rule text. Subparagraphs (a)(1)(i)–(iii) provide the three conditions that must be met in order for a Member (an ''Initiating Member'') to initiate a PRIME Auction.[6] The Exchange proposes to move the ''and'' from the end of subparagraph (a)(1)(i) to the end of subparagraph (a)(1)(ii), delete the period after subparagraph (a)(1)(ii), and lowercase the word ''with'' that begins subparagraph (a)(1)(iii). The purpose of these changes is to provide consistency and clarity to the rule text such that market participants know that in order to initiate a PRIME Auction, all three conditions of subparagraphs (a)(1)(i)–(iii) of Exchange Rule 515A must be met.

Finally, the Exchange proposes to amend subparagraph (b)(3) of Exchange Rule 518 to add a closing parenthesis around the phrase ''as defined in Rule 518(d)(4).'' The purpose of the proposed rule change is for the sentence to be grammatically correct and for clarity in the rule text.

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with Section 6(b) of the Act [7] in general, and furthers the objectives of Section 6(b)(5) of the Act [8] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes the proposed changes promote just and equitable principles of trade and remove impediments to and perfect the mechanism of a free and open market and a national market system because the proposed rule changes will provide greater clarity to Members and the public regarding the Exchange's Rules. It is in the public interest for rules to be accurate and concise so as to eliminate the potential for confusion.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes the proposed changes will not impose any burden on intra-market competition as there is no functional change to the Exchange's System and because the rules of the Exchange apply to all MIAX participants equally. The proposed rule change will have no impact on competition as it is not designed to address any competitive issue but rather is designed to remedy minor non-substantive issues and provide added clarity to the rule text of Exchange Rules 402, 403, 404, 404A, 503, 515A, and 518. In addition, the Exchange does not believe the proposal will impose any burden on inter-market competition as the proposal does not address any competitive issues and is intended to protect investors by providing further transparency regarding the Exchange's functionality.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) [9] of the Act and Rule 19b–4(f)(6) thereunder.[10] Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act and subparagraph (f)(6) of Rule 19b–4 thereunder.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the

[5] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

[6] *See* Exchange Rule 515A(a)(1).

[7] 15 U.S.C. 78f(b).

[8] 15 U.S.C. 78f(b)(5).

[9] 15 U.S.C. 78s(b)(3)(A)(iii).

[10] 17 CFR 240.19b–4(f)(6).

[11] In addition, Rule 19b–4(f)(6)(iii) requires the Exchange to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–MIAX–2021–40 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–MIAX–2021–40. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MIAX–2021–40, and should be submitted on or before October 26, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93191; File No. SR–NYSEArca–2021–57]

Self-Regulatory Organizations; NYSE Arca, Inc.; Order Instituting Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To List and Trade Shares of the NYDIG Bitcoin ETF Under NYSE Arca Rule 8.201–E

September 29, 2021.

On June 30, 2021, NYSE Arca, Inc. (''NYSE Arca'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares (''Shares'') of the NYDIG Bitcoin ETF (''Trust'') under NYSE Arca Rule 8.201–E (Commodity-Based Trust Shares). The proposed rule change was published for comment in the **Federal Register** on July 19, 2021.[3]

On August 23, 2021, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] This order institutes proceedings under Section 19(b)(2)(B) of the Act [6] to determine whether to approve or disapprove the proposed rule change.

I. Summary of the Proposal

As described in more detail in the Notice,[7] the Exchange proposes to list and trade the Shares of the Trust under NYSE Arca Rule 8.201–E, which governs the listing and trading of Commodity-Based Trust Shares on the Exchange.

The investment objective of the Trust is to reflect the performance of the price of bitcoin less the expenses of the Trust's operations.[8] The Trust will not seek to reflect the performance of any benchmark or index. In seeking to achieve its investment objective, the Trust will only hold bitcoin.[9] The Trust generally does not intend to hold cash or cash equivalents. However, the Trust may hold cash and cash equivalents on a temporary basis to pay extraordinary expenses.[10]

The net asset value (''NAV'') of the Trust will be determined in accordance with Generally Accepted Accounting Principles (''GAAP'') as the total value of bitcoin held by the Trust, plus any cash or other assets, less any liabilities including accrued but unpaid expenses. The NAV of the Trust will typically be determined as of 4:00 p.m. E.T. on each day that the Exchange is open for regular trading (''Business Day''). The Administrator will calculate the NAV of the Trust once each Exchange trading day. The Exchange's Core Trading Session closes at 4:00 p.m. E.T. The Trust's daily activities will generally not be reflected in the NAV determined for the Business Day on which the transactions are effected (the trade date), but rather on the following Business Day. The NAV for the Trust's Shares will be disseminated daily to all market participants at the same time.[11]

The Trust will disseminate an intraday indicative value (''IIV'') per Share updated every 15 seconds. The IIV will be calculated by using the same methodology that the Trust uses to determine NAV, which is to follow GAAP. Generally, GAAP requires the fair value of an asset that is traded on a market to be measured by reference to orderly transactions on an active

[4] 15 U.S.C. 78s(b)(2).

[5] *See* Securities Exchange Act Release No. 92722 (Aug. 23, 2021), 86 FR 48268 (Aug. 27, 2021). The Commission designated October 17, 2021, as the date by which it should approve, disapprove, or institute proceedings to determine whether to disapprove the proposed rule change.

[6] 15 U.S.C. 78s(b)(2)(B).

[7] *See* Notice, *supra* note 3.

[8] *See id.* at 38129. NYDIG Asset Management LLC (''Sponsor'') is the sponsor of the Trust, and Delaware Trust Company is the trustee. U.S. Bancorp Fund Services, LLC (''Administrator'') is the transfer agent and the administrator of the Trust. The bitcoin custodian for the Trust is NYDIG Trust Company LLC (''Bitcoin Custodian''). The Bitcoin Custodian is chartered as a limited purpose trust company by the New York State Department of Financial Services (''NYDFS'') and is authorized by NYDFS to provide digital asset custody services. Both the Sponsor and the Bitcoin Custodian are indirect wholly-owned subsidiaries of New York Digital Investment Group LLC. *See id.*

[9] *See id.*

[10] *See id.* at 38130. The Trust will enter into a cash custody agreement with U.S. Bank N.A. under which U.S. Bank N.A. will act as custodian of the Trust's cash and cash equivalents. *See id.*

market. Among all active markets with orderly transactions, the market that is used to determine the fair value of an asset is the principal market. The Sponsor expects that the principal market will initially generally be the NYDFS-regulated trading venue with the highest trading volume and level of activity.[12]

The Trust will create and redeem Shares from time to time, but only in one or more blocks of 10,000 Shares (''Creation Baskets''). Creation Baskets will only be made in exchange for delivery to the Trust or the distribution by the Trust of the amount of bitcoin represented by the Shares being created or redeemed, the amount of which will be based on the quantity of bitcoin attributable to each Share of the Trust (net of accrued but unpaid Sponsor fees, extraordinary expenses or liabilities) being created or redeemed determined as of 4:00 p.m. E.T. on the day the order is properly received.[13]

II. Proceedings To Determine Whether To Approve or Disapprove SR–NYSEArca–2021–57 and Grounds for Disapproval Under Consideration

The Commission is instituting proceedings pursuant to Section 19(b)(2)(B) of the Act [14] to determine whether the proposed rule change should be approved or disapproved. Institution of proceedings is appropriate at this time in view of the legal and policy issues raised by the proposed rule change, as discussed below. Institution of proceedings does not indicate that the Commission has reached any conclusions with respect to any of the issues involved. Rather, as described below, the Commission seeks and encourages interested persons to provide comments on the proposed rule change.

Pursuant to Section 19(b)(2)(B) of the Act,[15] the Commission is providing notice of the grounds for disapproval under consideration. The Commission is instituting proceedings to allow for additional analysis of the proposed rule change's consistency with Section 6(b)(5) of the Act, which requires, among other things, that the rules of a national securities exchange be ''designed to prevent fraudulent and manipulative acts and practices'' and ''to protect investors and the public interest.'' [16]

The Commission asks that commenters address the sufficiency of the Exchange's statements in support of the proposal, which are set forth in the Notice,[17] in addition to any other comments they may wish to submit about the proposed rule change. In particular, the Commission seeks comment on the following questions and asks commenters to submit data where appropriate to support their views:

1. What are commenters' views on whether the proposed Trust and Shares would be susceptible to manipulation? What are commenters' views generally on whether the Exchange's proposal is designed to prevent fraudulent and manipulative acts and practices? What are commenters' views generally with respect to the liquidity and transparency of the bitcoin markets, the bitcoin markets' susceptibility to manipulation, and thus the suitability of bitcoin as an underlying asset for an exchange-traded product?

2. The Exchange asserts that the ''significant increase in trading volume and open interest in the bitcoin futures market, growth of liquidity in the spot market for bitcoin, and certain features of the Shares mitigate the manipulation concerns expressed by the Commission when it last reviewed exchange proposals to list a bitcoin exchange-traded product.'' [18] The Exchange concludes ''that, on the whole, the manipulation concerns previously articulated by the Commission have since been significantly mitigated, and do not exceed those that exist in the markets for other commodities that underly [sic] securities listed on U.S. national securities exchanges.'' [19] Do commenters agree or disagree? Are the changes that the Exchange identifies sufficient to support the determination that the proposal to list and trade the Shares is designed to protect investors and the public interest and is consistent with the other applicable requirements of Section 6(b)(5) of the Act?

3. The Exchange states that the ''Trust would provide investors with exposure to bitcoin in a manner that may be more efficient, more convenient and more regulated than the purchase of bitcoin or other investment products that provide exposure to bitcoin.'' [20] The Exchange asserts that ''investors in [over-the-counter] bitcoin funds . . . have historically borne significantly higher fees and expenses than those that would be borne by investors in the Trust'' and that investors holding bitcoin often face ''credit risk'' and ''risk of loss or theft of their bitcoin.'' [21] What are commenters' views regarding the Exchange's assertions? Do these reasons provide an appropriate basis for the determination that the proposal is consistent with the applicable requirements of Section 6(b)(5) of the Act?

4. The Exchange asserts that the Chicago Mercantile Exchange (''CME'') represents a regulated market of significant size relating to bitcoin.[22] The Exchange states that ''proprietary research, including lead-lag analyses, . . . demonstrates that prices in the CME bitcoin futures market . . . lead prices in the bitcoin spot market, including non-U.S. bitcoin spot markets.'' According to the Exchange, ''[t]his finding supports the thesis that a market participant attempting to manipulate the Shares would have to trade on that market.'' [23] The Exchange, however, does not provide any information regarding the proprietary research. What are commenters' views regarding these assertions?

5. According to the Exchange, ''the bitcoin futures market is one of the primary venues that market participants use to transact large exposures to bitcoin,'' and, ''[i]n contrast to the efficient leverage offered through the futures market, many bitcoin spot trading venues require full pre-funding of trading, which means it would be highly capital intensive to 'spoof' or 'layer' order books on spot trading venues.'' [24] The Exchange therefore concludes that if a market participant intended to manipulate the price of bitcoin, and thereby the Shares, the bitcoin futures market is the one that would be manipulated first.[25] Do commenters agree with the Exchange's analysis and conclusion?

6. What are commenters' views of the Exchange's assertion that (a) the significant volume in the bitcoin futures market; (b) the overall size of the bitcoin market; (c) the significant liquidity available in the bitcoin spot markets; and (d) the ability of market participants to buy or sell large amounts of bitcoin without significant market impact demonstrate that the Shares would not become the predominant force on pricing in either the bitcoin spot or futures markets? [26]

7. What are commenters' views on the Exchange's statements that ''the cost to buy or sell $5 million worth of bitcoin

[12] *See id.* at 38132.

averages roughly 20 basis points'' and that, ''[f]or a $10 million market order, the cost to buy or sell is roughly 40 basis points.'' [27] What are commenters' views of the Exchange's assertion that these metrics are comparable to the liquidity of existing commodity exchange-traded products? [28] What are commenters' views on the Exchange's assertion that the fact that ''the Trust receives and holds only bitcoin . . . substantially reduces the potential for manipulation of the number of Shares created or redeemed, which therefore substantially reduces the potential for shareholders to be harmed by manipulation.''? [29]

III. Procedure: Request for Written Comments

The Commission requests that interested persons provide written submissions of their views, data, and arguments with respect to the issues identified above, as well as any other concerns they may have with the proposal. In particular, the Commission invites the written views of interested persons concerning whether the proposal is consistent with Section 6(b)(5) or any other provision of the Act, and the rules and regulations thereunder. Although there do not appear to be any issues relevant to approval or disapproval that would be facilitated by an oral presentation of views, data, and arguments, the Commission will consider, pursuant to Rule 19b–4, any request for an opportunity to make an oral presentation.[30]

Interested persons are invited to submit written data, views, and arguments regarding whether the proposal should be approved or disapproved by October 26, 2021. Any person who wishes to file a rebuttal to any other person's submission must file that rebuttal by November 9, 2021.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2021–57 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2021–57. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2021–57 and should be submitted by October 26, 2021. Rebuttal comments should be submitted by November 9, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93175; File No. SR–CboeBZX–2021–029]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Designation of a Longer Period for Commission Action on Proceedings To Determine Whether To Approve or Disapprove a Proposed Rule Change To List and Trade Shares of the Kryptoin Bitcoin ETF Trust Under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares

September 29, 2021.

On April 9, 2021, Cboe BZX Exchange, Inc. (''BZX'') filed with the Securities and Exchange Commission (''Commission''), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'') [1] and Rule 19b–4 thereunder,[2] a proposed rule change to list and trade shares of the Kryptoin Bitcoin ETF Trust under BZX Rule 14.11(e)(4), Commodity-Based Trust Shares. The proposed rule change was published for comment in the **Federal Register** on April 28, 2021.[3]

On June 9, 2021, pursuant to Section 19(b)(2) of the Act,[4] the Commission designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change.[5] On July 23, 2021, the Commission instituted proceedings under Section 19(b)(2)(B) of the Act [6] to determine whether to approve or disapprove the proposed rule change.[7]

Section 19(b)(2) of the Act [8] provides that, after initiating proceedings, the Commission shall issue an order approving or disapproving the proposed rule change not later than 180 days after the date of publication of notice of filing of the proposed rule change. The Commission may extend the period for issuing an order approving or disapproving the proposed rule change, however, by not more than 60 days if the Commission determines that a longer period is appropriate and publishes the reasons for such

[6] 15 U.S.C. 78s(b)(2)(B).

[7] *See* Securities Exchange Act Release No. 92476 (July 23, 2021), 86 FR 40883 (July 29, 2021).

[8] 15 U.S.C. 78s(b)(2).

determination. The proposed rule change was published for comment in the **Federal Register** on April 28, 2021.[9] The 180th day after publication of the proposed rule change is October 25, 2021. The Commission is extending the time period for approving or disapproving the proposed rule change for an additional 60 days.

The Commission finds that it is appropriate to designate a longer period within which to issue an order approving or disapproving the proposed rule change so that it has sufficient time to consider the proposed rule change and the issues raised in the comment letters that have been submitted in connection therewith. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[10] designates December 24, 2021, as the date by which the Commission shall either approve or disapprove the proposed rule change (File Number SR–CboeBZX–2021–029).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[11]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–93185; File No. SR–MIAX–2021–43]

Self-Regulatory Organizations; Miami International Securities Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule To Adopt a Tiered-Pricing Structure for Additional Limited Service MIAX Express Interface Ports

September 29, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 28, 2021, Miami International Securities Exchange LLC (''MIAX'' or ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to amend the MIAX Options Fee Schedule (the ''Fee Schedule'') to amend certain port fees.

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings,* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend the Fee Schedule to adopt a tiered-pricing structure for additional Limited Service MIAX Express Interface (''MEI'') Ports [3] available to Market Makers.[4] The Exchange believes a tiered-pricing structure will encourage Market Makers to be more efficient and economical when determining how to connect to the Exchange. This should also enable the Exchange to better monitor and provide access to the Exchange's network to ensure sufficient capacity and headroom in the System.[5]

The Exchange initially filed the proposed fee changes on August 2, 2021, with the changes being immediately effective.[6] The First Proposed Rule Change was published for comment in the **Federal Register** on August 19, 2021.[7] The Commission received one comment letter on the First Proposed Rule Change.[8] The Exchange has withdrawn the First Proposed Rule Change and now submits this proposal, which is immediately effective. This proposal provides additional justification for the proposed fee changes and addresses certain points raised in the single comment letter that was submitted on the First Proposed Rule Change.

Additional Limited Service MEI Port Tiered-Pricing Structure

The Exchange proposes to amend the fees for additional Limited Service MEI Ports. Currently, the Exchange allocates two (2) Full Service MEI Ports [9] and two (2) Limited Service MEI Ports [10] per matching engine [11] to which each Market Maker connects. Market Makers may also request additional Limited Service MEI Ports for each matching engine to which they connect. The Full Service MEI Ports, Limited Service MEI Ports and the additional Limited Service MEI Ports all include access to the Exchange's primary and secondary data centers and its disaster recovery center. Market Makers may request additional Limited Service MEI Ports for which they are assessed a $100 monthly fee for each additional Limited Service MEI

[9] *See supra* note 3.

[11] 17 CFR 200.30–3(a)(57).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] MIAX Express Interface is a connection to MIAX systems that enables Market Makers to submit simple and complex electronic quotes to MIAX. *See* Fee Schedule, note 26.

[4] The term ''Market Makers'' refers to Lead Market Makers (''LMMs''), Primary Lead Market Makers (''PLMMs''), and Registered Market Makers (''RMMs'') collectively. *See* Exchange Rule 100.

[5] The term ''System'' means the automated trading system used by the Exchange for the trading of securities. *See* Exchange Rule 100.

[6] *See* Securities Exchange Act Release No. 92661 (August 13, 2021), 86 FR 46737 (August 19, 2021) (SR–MIAX–2021–37) (the ''First Proposed Rule Change'').

[7] *Id.*

[8] *See* Letter from Richard J. McDonald, Susquehanna International Group, LLC (''SIG''), to Vanessa Countryman, Secretary, Commission, dated September 7, 2021 (''SIG Comment Letter'').

[9] Full Service MEI Ports provide Market Makers with the ability to send Market Maker quotes, eQuotes, and quote purge messages to the MIAX System. Full Service MEI Ports are also capable of receiving administrative information. Market Makers are limited to two Full Service MEI Ports per matching engine. *See* Fee Schedule, Section 5(d)(ii), note 27.

[10] Limited Service MEI Ports provide Market Makers with the ability to send eQuotes and quote purge messages only, but not Market Maker Quotes, to the MIAX System. Limited Service MEI Ports are also capable of receiving administrative information. Market Makers initially receive two Limited Service MEI Ports per matching engine. *See* Fee Schedule, Section 5(d)(ii), note 28.

[11] A ''matching engine'' is a part of the MIAX electronic system that processes options quotes and trades on a symbol-by-symbol basis. Some matching engines will process option classes with multiple root symbols, and other matching engines will be dedicated to one single option root symbol (for example, options on SPY will be processed by one single matching engine that is dedicated only to SPY). A particular root symbol may only be assigned to a single designated matching engine. A particular root symbol may not be assigned to multiple matching engines. *See* Fee Schedule, Section 5(d)(ii), note 29.

Port for each matching engine. This fee has been unchanged since 2016.[12]

The Exchange now proposes to move from a flat monthly fee per additional Limited Service MEI Port for each matching engine to a tiered-pricing structure for additional Limited Service MEI Ports for each matching engine under which the monthly fee would vary depending on the number of additional Limited Service MEI Ports the Market Maker elects to purchase. Specifically, the Exchange will continue to provide the first and second additional Limited Service MEI Ports for each matching engine free of charge, as described above, per the initial allocation of Limited Service MEI Ports that Market Makers receive. The Exchange now proposes the following tiered-pricing structure: (i) The third and fourth additional Limited Service MEI Ports for each matching engine will increase from the current flat monthly fee of $100 to $150 per port; (ii) the fifth and sixth additional Limited Service MEI Ports for each matching engine will increase from the current flat monthly fee of $100 to $200 per port; and (iii) the seventh additional Limited Service MEI Port, and each Limited Service MEI Port for each matching engine purchased thereafter, will increase from the current monthly flat fee of $100 to $250 per port (collectively, the ''Proposed Access Fees'').

2. Statutory Basis

The Exchange believes that its proposal to amend its Fee Schedule is consistent with Section 6(b) of the Act [13] in general, and furthers the objectives of Section 6(b)(4) of the Act [14] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among Exchange Members and issuers and other persons using any facility or system which the Exchange operates or controls. The Exchange also believes the proposal furthers the objectives of Section 6(b)(5) of the Act [15] in that it is designed to promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general protect investors and the public interest and is not designed to permit unfair discrimination between customers, issuers, brokers and dealers.

The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive. In such an environment, the Exchange must continually adjust its fees for services and products, in addition to order flow, to remain competitive with other exchanges. The Exchange believes that the proposed changes reflect this competitive environment.

The Exchange believes the proposal to move from a flat fee per month to a tiered-pricing structure is reasonable, equitably allocated and not unfairly discriminatory because the Exchange believes the proposed structure would encourage firms to be more economical and efficient in the number of additional Limited Service MEI Ports they purchase. The Exchange believes this will enable the Exchange to better monitor and provide access to the Exchange's network to ensure sufficient capacity and headroom in the System.

The Exchange notes that firms that are primarily order routers seeking best-execution do not utilize Limited Service MEI Ports on MIAX. Therefore, the fees described in the proposed tiered-pricing structure will only be allocated to market making firms that engage in advanced trading strategies and typically request multiple Limited Service MEI Ports, beyond the two per matching engine that are free. Accordingly, the firms engaged in market making business generate higher costs by utilizing more of the Exchange's resources. The market making firms that purchase higher amounts of Limited Service MEI Ports tend to have specific business oriented market making and trading strategies, as opposed to firms engaging solely in order routing as part of their best-execution obligations. The use of such additional Limited Service MEI Ports is a voluntary business decision of each market maker.

The Exchange believes that exchanges, in setting fees of all types, should meet very high standards of transparency to demonstrate why each new fee or fee increase meets the requirements of the Act that fees be reasonable, equitably allocated, not unfairly discriminatory, and not create an undue burden on competition among market participants. The Exchange believes this high standard is especially important when an exchange imposes various access fees for market participants to access an exchange's marketplace. The Exchange deems port fees to be access fees. It records these fees as part of its ''Access Fees'' revenue in its financial statements. The Exchange believes that it is important to demonstrate that these fees are based on its costs and reasonable business needs. The Exchange believes the Proposed Access Fees will allow the Exchange to offset expense the Exchange has and will incur, and that the Exchange is providing sufficient transparency (as described below) into how the Exchange determined to charge such fees. Accordingly, the Exchange is providing an analysis of its revenues, costs, and profitability associated with the Proposed Access Fees. This analysis includes information regarding its methodology for determining the costs and revenues associated with the Proposed Access Fees.

In order to determine the Exchange's costs to provide the access services associated with the Proposed Access Fees, the Exchange conducted an extensive cost review in which the Exchange analyzed nearly every expense item in the Exchange's general expense ledger to determine whether each such expense relates to the Proposed Access Fees, and, if such expense did so relate, what portion (or percentage) of such expense actually supports the access services. The sum of all such portions of expenses represents the total cost to the Exchange to provide the access services associated with the Proposed Access Fees. For the avoidance of doubt, no expense amount was allocated twice. The Exchange is also providing detailed information regarding the Exchange's cost allocation methodology—namely, information that explains the Exchange's rationale for determining that it was reasonable to allocate certain expenses described in this filing towards the cost to the Exchange to provide the access services associated with the Proposed Access Fees.

In order to determine the Exchange's projected revenues associated with the Proposed Access Fees, the Exchange analyzed the number of Market Makers currently utilizing Limited Service MEI Ports, and, utilizing a recent monthly billing cycle representative of 2021 monthly revenue, extrapolated annualized revenue on a going-forward basis. The Exchange does not believe it is appropriate to factor into its analysis future revenue growth or decline into its projections for purposes of these calculations, given the uncertainty of such projections due to the continually changing access needs of market participants, discounts that can be achieved due to lower trading volume and vice versa, market participant consolidation, etc. Additionally, the Exchange similarly does not factor into its analysis future cost growth or decline. The Exchange is presenting its

[12] *See* Securities Exchange Act Release No. 79666 (December 22, 2016), 81 FR 96133 (December 29, 2016) (SR–MIAX–2016–47).

[13] 15 U.S.C. 78f(b).

[14] 15 U.S.C. 78f(b)(4).

[15] 15 U.S.C. 78f(b)(5).

revenue and expense associated with the Proposed Access Fees in this filing in a manner that is consistent with how the Exchange presents its revenue and expense in its Audited Unconsolidated Financial Statements. The Exchange's most recent Audited Unconsolidated Financial Statement is for 2020. However, since the revenue and expense associated with the Proposed Access Fees were not in place in 2020 or for the first seven months of 2021, the Exchange believes its 2020 Audited Unconsolidated Financial Statement is not representative of its current total annualized revenue and costs associated with the Proposed Access Fees. Accordingly, the Exchange believes it is more appropriate to analyze the Proposed Access Fees utilizing its 2021 revenue and costs, as described herein, which utilize the same presentation methodology as set forth in the Exchange's previously-issued Audited Unconsolidated Financial Statements. Based on this analysis, the Exchange believes that the Proposed Access Fees are fair and reasonable because they will not result in excessive pricing or supra-competitive profit when comparing the Exchange's total annual expense associated with providing the services associated with the Proposed Access Fees versus the total projected annual revenue the Exchange will collect for providing those services.

* * * * *

On March 29, 2019, the Commission issued its Order Disapproving Proposed Rule Changes to Amend the Fee Schedule on the BOX Market LLC Options Facility to Establish BOX Connectivity Fees for Participants and Non-Participants Who Connect to the BOX Network (the ''BOX Order'').[16] On May 21, 2019, the Commission issued the Staff Guidance on SRO Rule Filings Relating to Fees.[17] Accordingly, the Exchange believes that the Proposed Access Fees are consistent with the Act because they (i) are reasonable, equitably allocated, not unfairly discriminatory, and not an undue burden on competition; (ii) comply with the BOX Order and the Guidance; (iii) are supported by evidence (including comprehensive revenue and cost data and analysis) that they are fair and reasonable because they will not result in excessive pricing or supra-competitive profit; and (iv) utilize a cost-based justification framework that is substantially similar to a framework previously used by the Exchange, and its affiliates MIAX PEARL, LLC (''MIAX Pearl'') and MIAX Emerald, LLC (''MIAX Emerald''), to establish or increase other non-transaction fees.[18] Accordingly, the Exchange believes that the Commission should find that the Proposed Access Fees are consistent with the Act.

* * * * *

As of September 27, 2021, the Exchange had a market share of only 5.80% of the U.S. equity options industry for the month of September 2021.[19] The Exchange is not aware of any evidence that a market share of approximately 5–6% provides the Exchange with anti-competitive pricing power. If the Exchange were to attempt to establish unreasonable pricing for any of its means provided to access the Exchange, market participants may look to access the Exchange via other means such as through a third party service provider, or look to connect to the Exchange via a competing exchange with cheaper access alternatives that also provides routing services to the Exchange. In addition, existing market participants that are connected to the Exchange may choose to disconnect from the Exchange or reduce their number of connections to the Exchange as a means to reduce their overall costs.

The proposed tiered-pricing structure and proposed fees for additional Limited Service MEI Ports are less than or similar to fees charged by competing options exchanges for similar access on those exchanges. The Exchange believes that it provides a better value through its enhanced network monitoring, customer reporting, and superior network infrastructure than markets with higher market shares and more expensive access alternatives. For example, NYSE American, LLC (''Amex'') (equity options market share of 7.86% as of September 23, 2021 for the month of September)[20] and NYSE Arca, Inc. (''Arca'') (equity options market share of 12.58% as of September 23, 2021 for the month of September)[21] both charge $450 per port for order/quote entry ports 1–40 and $150 per port for ports 41 and greater,[22] all on a per matching engine basis, with Amex and Arca having 17 match engines and 19 match engines, respectively.[23] Similarly, The Nasdaq Stock Market LLC (''NASDAQ'') (equity options market share of 7.81% as of September 23, 2021 for the month of September)[24] charges $1,500 per port for SQF ports 1–5, $1,000 per SQF port for ports 6–20, and $500 per SQF port for ports 21 and greater,[25] all on a per matching engine basis, with NASDAQ having multiple matching engines.[26] The NASDAQ SQF Interface Specification provides that PHLX/NOM/BX Options trading infrastructures may consist of multiple matching engines with each matching engine trading only a range of option underlyings. Further, the SQF infrastructure is such that the firms connect to one or more servers residing directly on the matching engine infrastructure. Since there may be multiple matching engines, firms will need to connect to each engine's infrastructure in order to establish the ability to quote the symbols handled by that engine.[27]

In the each of the above cases, the Exchange's highest tier in the proposed tiered-pricing structure is lower than that of competing options exchanges. Further, as described in more detail below, those exchanges generate higher operating profit margins and higher ''access fees'' than the Exchange, even with the proposed fee change. Despite proposing lower or similar fees to that of competing options exchanges with similar market share, the Exchange believes that it provides a better overall value to its Members and non-Members via a highly deterministic System, enhanced network monitoring and customer reporting, and a superior network infrastructure than markets with higher market shares and more expensive access alternatives. Each of the port rates in place at competing

options exchanges were filed with the Commission for immediate effectiveness and remain in place today.

Separately, the Exchange is not aware of any reason why market participants could not simply drop their access (or not initially access an exchange) if an exchange were to establish prices for its non-transaction fees that, in the determination of such market participant, did not make business or economic sense for such market participant to access such exchange. No options market participant is required by rule, regulation, or competitive forces to be a Member of the Exchange. As evidence of the fact that market participants can and do drop their access to exchanges based on non-transaction fee pricing, R2G Services LLC (''R2G'') filed a comment letter after BOX's proposed rule changes to increase its connectivity fees (SR–BOX–2018–24, SR–BOX–2018–37, and SR–BOX–2019–04). The R2G Letter stated, ''[w]hen BOX instituted a $10,000/month price increase for connectivity; we had no choice but to terminate connectivity into them as well as terminate our market data relationship. The cost benefit analysis just didn't make any sense for us at those new levels.'' Similarly, the Exchange's affiliate, MIAX Emerald, noted in a recent filing that once MIAX Emerald issued a notice that it was instituting MEI Port fees, among other non-transaction fees, one MIAX Emerald Member dropped its access to MIAX Emerald as a result of those fees.[28] Accordingly, these examples show that if a market participant believes, based on its business model, that an exchange charges too high of a fee for ports and/or other non-transaction fees, including other access fees for its relevant marketplace, market participants can choose to drop their access to such exchange.

In order to provide more detail and to quantify the Exchange's costs associated with providing access to the Exchange in general, the Exchange notes that there are material costs associated with providing the infrastructure and headcount to fully-support access to the Exchange. The Exchange incurs technology expense related to establishing and maintaining Information Security services, enhanced network monitoring and customer reporting, as well as Regulation SCI mandated processes, associated with its network technology. While some of the expense is fixed, much of the expense is not fixed, and thus increases as the services associated with the Proposed Access Fees increase. For example, new Members to the Exchange may require the purchase of additional hardware to support those Members as well as enhanced monitoring and reporting of customer performance that the Exchange and its affiliates provide. Further, as the total number Members increases, the Exchange and its affiliates may need to increase their data center footprint and consume more power, resulting in increased costs charged by their third-party data center provider. Accordingly, the cost to the Exchange and its affiliates to provide access to its System for market participants is not fixed. The Exchange believes the Proposed Access Fees are a reasonable attempt to offset a portion of the costs to the Exchange associated with providing access to its network infrastructure.

The Exchange only has four primary sources of revenue: Transaction fees, access fees (which includes the Proposed Access Fees), regulatory fees, and market data fees. Accordingly, the Exchange must cover all of its expenses from these four primary sources of revenue.

The Exchange believes that the Proposed Access Fees are fair and reasonable because they will not result in excessive pricing or supra-competitive profit, when comparing the total annual expense that the Exchange projects to incur in connection with providing these access services versus the total annual revenue that the Exchange projects to collect in connection with services associated with the Proposed Access Fees. For 2021,[29] the total annual expense for providing the access services associated with the Proposed Access Fees is projected to be approximately $1.32 million. The approximately $1.32 million in projected total annual expense is comprised of the following, all of which are directly related to the access services associated with the Proposed Access Fees: (1) Third-party expense, relating to fees paid by the Exchange to third-parties for certain products and services; and (2) internal expense, relating to the internal costs of the Exchange to provide the services associated with the Proposed Access Fees.[30] As noted above, the Exchange believes it is more appropriate to analyze the Proposed Access Fees utilizing its 2021 revenue and costs, which utilize the same presentation methodology as set forth in the Exchange's previously-issued Audited Unconsolidated Financial Statements.[31] The $1.32 million in projected total annual expense is directly related to the access services associated with the Proposed Access Fees, and not any other product or service offered by the Exchange. It does not include general costs of operating matching systems and other trading technology, and no expense amount was allocated twice.

As discussed, the Exchange conducted an extensive cost review in which the Exchange analyzed nearly every expense item in the Exchange's general expense ledger (this includes over 150 separate and distinct expense items) to determine whether each such expense relates to the access services associated with the Proposed Access Fees, and, if such expense did so relate, what portion (or percentage) of such expense actually supports those services, and thus bears a relationship that is, ''in nature and closeness,'' directly related to those services. The sum of all such portions of expenses represents the total cost of the Exchange to provide access services associated with the Proposed Access Fees.

For 2021, total third-party expense, relating to fees paid by the Exchange to third-parties for certain products and services for the Exchange to be able to provide the access services associated with the Proposed Access Fees, is projected to be $0.16 million. This includes, but is not limited to, a portion of the fees paid to: (1) Equinix, for data center services, for the primary, secondary, and disaster recovery locations of the Exchange's trading system infrastructure; (2) Zayo Group Holdings, Inc. (''Zayo'') for network services (fiber and bandwidth products

[28] *See* Securities Exchange Act Release No. 91460 (April 2, 2021), 86 FR 18349 (April 8, 2021) (SR–EMERALD–2021–11) (Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Its Fee Schedule To Adopt Port Fees, Increase Certain Network Connectivity Fees, and Increase the Number of Additional Limited Service MIAX Emerald Express Interface Ports Available to Market Makers) (adopting tiered MEI Port fee structure ranging from $5,000 to $20,500 per month).

[29] The Exchange has not yet finalized its 2021 year end results.

[30] The percentage allocations used in this proposed rule change may differ from past filings from the Exchange or its affiliates due to, among other things, changes in expenses charged by third-parties, adjustments to internal resource allocations, and different system architecture of the Exchange as compared to its affiliates.

[31] For example, the Exchange previously noted that all third-party expense described in its prior fee filing was contained in the information technology and communication costs line item under the section titled ''Operating Expenses Incurred Directly or Allocated From Parent,'' in the Exchange's 2019 Form 1 Amendment containing its financial statements for 2018. *See* Securities Exchange Act Release No. 87875 (December 31, 2019), 85 FR 770 (January 7, 2020) (SR–MIAX–2019–51). Accordingly, the third-party expense described in this filing is attributed to the same line item for the Exchange's 2021 Form 1 Amendment, which will be filed in 2022.

and services) linking the Exchange's office locations in Princeton, New Jersey and Miami, Florida, to all data center locations; (3) Secure Financial Transaction Infrastructure (''SFTI''),[32] which supports connectivity and feeds for the entire U.S. options industry; (4) various other services providers (including Thompson Reuters, NYSE, Nasdaq, and Internap), which provide content, connectivity services, and infrastructure services for critical components of options connectivity and network services; and (5) various other hardware and software providers (including Dell and Cisco, which support the production environment in which Members connect to the network to trade, receive market data, etc.). For clarity, only a portion of all fees paid to such third-parties is included in the third-party expense herein, and no expense amount is allocated twice. Accordingly, the Exchange does not allocate its entire information technology and communication costs to the access services associated with the Proposed Access Fees.

For clarity, only a portion of all fees paid to such third-parties is included in the third-party expense herein, and no expense amount is allocated twice. Accordingly, the Exchange does not allocate its entire information technology and communication costs to the access services associated with the Proposed Access Fees. Further, the Exchange notes that, with respect to the expenses included herein, those expenses only cover the MIAX market; expenses associated with MIAX Pearl for its options and equities markets and MIAX Emerald, are accounted for separately and are not included within the scope of this filing. As noted above, the percentage allocations used in this proposed rule change may differ from past filings from the Exchange or its affiliates due to, among other things, changes in expenses charged by third-parties, adjustments to internal resource allocations, and different system architecture of the Exchange as compared to its affiliates. Further, as part its ongoing assessment of costs and expenses, the Exchange recently conducted a periodic thorough review of its expenses and resource allocations which, in turn, resulted in a revised percentage allocations in this filing.

The Exchange believes it is reasonable to allocate such third-party expense described above towards the total cost to the Exchange to provide the access services associated with the Proposed Access Fees. In particular, the Exchange believes it is reasonable to allocate the identified portion of the Equinix expense because Equinix operates the data centers (primary, secondary, and disaster recovery) that host the Exchange's network infrastructure. This includes, among other things, the necessary storage space, which continues to expand and increase in cost, power to operate the network infrastructure, and cooling apparatuses to ensure the Exchange's network infrastructure maintains stability. Without these services from Equinix, the Exchange would not be able to operate and support the network and provide the access services associated with the Proposed Access Fees to its Members and their customers. The Exchange did not allocate all of the Equinix expense toward the cost of providing the access services associated with the Proposed Access Fees, only that portion which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 4.95% of the total applicable Equinix expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[33]

The Exchange believes it is reasonable to allocate the identified portion of the Zayo expense because Zayo provides the internet, fiber and bandwidth connections with respect to the network, linking the Exchange with its affiliates, MIAX Pearl and MIAX Emerald, as well as the data center and disaster recovery locations. As such, all of the trade data, including the billions of messages each day per exchange, flow through Zayo's infrastructure over the Exchange's network. Without these services from Zayo, the Exchange would not be able to operate and support the network and provide the access services associated with the Proposed Access Fees. The Exchange did not allocate all of the Zayo expense toward the cost of providing the access services associated with the Proposed Access Fees, only the portion which the Exchange identified as being specifically mapped to providing the Proposed Access Fees, approximately 2.64% of the total applicable Zayo expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[34]

The Exchange believes it is reasonable to allocate the identified portions of the SFTI expense and various other service providers' (including Thompson Reuters, NYSE, Nasdaq, and Internap) expense because those entities provide connectivity and feeds for the entire U.S. options industry, as well as the content, connectivity services, and infrastructure services for critical components of the network. Without these services from SFTI and various other service providers, the Exchange would not be able to operate and support the network and provide access to its Members and their customers. The Exchange did not allocate all of the SFTI and other service providers' expense toward the cost of providing the access services associated with the Proposed Access Fees, only the portions which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 4.95% of the total applicable SFTI and other service providers' expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees.[35]

The Exchange believes it is reasonable to allocate the identified portion of the other hardware and software provider expense because this includes costs for dedicated hardware licenses for switches and servers, as well as dedicated software licenses for security monitoring and reporting across the network. Without this hardware and software, the Exchange would not be able to operate and support the network and provide access to its Members and their customers. The Exchange did not allocate all of the hardware and software provider expense toward the cost of

[32] In fact, on October 22, 2019, the Exchange was notified by SFTI that it is again raising its fees charged to the Exchange by approximately 11%, without having to show that such fee change complies with the Act by being reasonable, equitably allocated, and not unfairly discriminatory. It is unfathomable to the Exchange that, given the critical nature of the infrastructure services provided by SFTI, that its fees are not required to be rule-filed with the Commission pursuant to Section 19(b)(1) of the Act and Rule 19b–4 thereunder. *See* 15 U.S.C. 78s(b)(1) and 17 CFR 240.19b–4, respectively.

[33] As noted above, the percentage allocations used in this proposed rule change may differ from past filings from the Exchange or its affiliates due to, among other things, changes in expenses charged by third-parties, adjustments to internal resource allocations, and different system architecture of the Exchange as compared to its affiliates. Again, as part its ongoing assessment of costs and expenses, the Exchange recently conducted a periodic thorough review of its expenses and resource allocations which, in turn, resulted in a revised percentage allocations in this filing.

providing the access services associated with the Proposed Access Fees, only the portions which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 4.95% of the total applicable hardware and software provider expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees.[36]

For 2021, total projected internal expense, relating to the internal costs of the Exchange to provide the access services associated with the Proposed Access Fees, is projected to be $1.16 million. This includes, but is not limited to, costs associated with: (1) Employee compensation and benefits for full-time employees that support the access services associated with the Proposed Access Fees, including staff in network operations, trading operations, development, system operations, and business that support those employees and functions (including an increase as a result of the higher determinism project); (2) depreciation and amortization of hardware and software used to provide the access services associated with the Proposed Access Fees, including equipment, servers, cabling, purchased software and internally developed software used in the production environment to support the network for trading; and (3) occupancy costs for leased office space for staff that provide the access services associated with the Proposed Access Fees. The breakdown of these costs is more fully-described below. For clarity, only a portion of all such internal expenses are included in the internal expense herein, and no expense amount is allocated twice. Accordingly, the Exchange does not allocate its entire costs contained in those items to the access services associated with the Proposed Access Fees.

The Exchange believes it is reasonable to allocate such internal expense described above towards the total cost to the Exchange to provide the access services associated with the Proposed Access Fees. In particular, the Exchange's employee compensation and benefits expense relating to providing the access services associated with the Proposed Access Fees is projected to be approximately $0.91 million, which is only a portion of the $12.6 million total projected expense for employee compensation and benefits. The Exchange believes it is reasonable to allocate the identified portion of such expense because this includes the time spent by employees of several departments, including Technology, Back Office, Systems Operations, Networking, Business Strategy Development (who create the business requirement documents that the Technology staff use to develop network features and enhancements), and Trade Operations. As part of the extensive cost review conducted by the Exchange, the Exchange reviewed the amount of time spent by each employee on matters relating to the provision of access services associated with the Proposed Access Fees. Without these employees, the Exchange would not be able to provide the access services associated with the Proposed Access Fees to its Members and their customers. The Exchange did not allocate all of the employee compensation and benefits expense toward the cost of the access services associated with the Proposed Access Fees, only the portions which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 7.24% of the total applicable employee compensation and benefits expense. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[37]

The Exchange's depreciation and amortization expense relating to providing the services associated with the Proposed Access Fees is projected to be $0.22 million, which is only a portion of the $4.8 million total projected expense for depreciation and amortization. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense includes the actual cost of the computer equipment, such as dedicated servers, computers, laptops, monitors, information security appliances and storage, and network switching infrastructure equipment, including switches and taps that were purchased to operate and support the network and provide the access services associated with the Proposed Access Fees. Without this equipment, the Exchange would not be able to operate the network and provide the access services associated with the Proposed Access Fees to its Members and their customers. The Exchange did not allocate all of the depreciation and amortization expense toward the cost of providing the access services associated with the Proposed Access Fees, only the portion which the Exchange identified as being specifically mapped to providing the access services associated with the Proposed Access Fees, approximately 4.60% of the total applicable depreciation and amortization expense, as these access services would not be possible without relying on such. The Exchange believes this allocation is reasonable because it represents the Exchange's actual cost to provide the access services associated with the Proposed Access Fees, and not any other service, as supported by its cost review.[38]

The Exchange's occupancy expense relating to providing the services associated with the Proposed Access Fees is projected to be $0.03 million, which is only a portion of the $0.6 million total projected expense for occupancy. The Exchange believes it is reasonable to allocate the identified portion of such expense because such expense represents the portion of the Exchange's cost to rent and maintain a physical location for the Exchange's staff who operate and support the network, including providing the access services associated with the Proposed Access Fees. This amount consists primarily of rent for the Exchange's Princeton, NJ office, as well as various related costs, such as physical security, property management fees, property taxes, and utilities. The Exchange operates its Network Operations Center (''NOC'') and Security Operations Center (''SOC'') from its Princeton, New Jersey office location. A centralized office space is required to house the staff that operates and supports the network. The Exchange currently has approximately 150 employees. Approximately two-thirds of the Exchange's staff are in the Technology department, and the majority of those staff have some role in the operation and performance of the access services associated with the Proposed Access Fees. Without this office space, the Exchange would not be able to operate and support the network and provide the access services associated with the Proposed Access Fees to its Members and their customers. Accordingly, the Exchange believes it is reasonable to allocate the identified portion of its occupancy expense because such amount represents the Exchange's actual cost to house the equipment and personnel who operate and support the Exchange's network infrastructure and the access services associated with the Proposed Access Fees. The Exchange
